NOTE TO UNITED STATES READERS -

DIFFERENCES IN UNITED STATES AND CANADIAN REPORTING PRACTICES

The Company is permitted, under a multi-jurisdictional disclosure system adopted by the United States Securities and Exchange Commission (the **SEC**), to prepare this Annual Report on Form 40-F in accordance with Canadian disclosure requirements, which are different from those of the United States. The Company prepares its consolidated financial statements, which are filed with this report on Form 40-F, in accordance with Canadian generally accepted accounting practices (**GAAP**), and they may be subject to Canadian auditing and auditor independence standards. They may not be comparable to consolidated financial statements of United States companies. Significant differences between Canadian GAAP and United States GAAP are described in Note 12 of the comparative audited consolidated financial statements of the Company.

DISCLOSURE CONTROLS AND PROCEDURES

After evaluating the effectiveness of the Company's disclosure controls and procedures as required by Exchange Act Rule 13a-15(b) and Rule 15d-15(b), the Chief Executive Officer and Chief Financial Officer of the Company have concluded that, as of the end of the Company's fiscal year covered by this Form 40-F Annual Report, the Company's disclosure controls and procedures were adequately designed and effective to ensure that material information required to be disclosed by the Company in the reports that it files or submits to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and accumulated and

communicated to the Company's management, including its principal executive and

principal financial officers, or persons performing similar functions, as appropriate to allow time for accurate and timely decisions regarding required disclosure.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL

OVER FINANCIAL REPORTING

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's system of internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP in Canada and in the United States.

Management recognizes that effective internal control over financial reporting may nonetheless not prevent or detect all possible misstatements or frauds. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has evaluated the effectiveness of the Company's internal control over financial reporting as of December 31, 2010 based on the criteria set forth in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that, as of December 31, 2010, the Company's internal control over financial reporting was effective and no material weaknesses were discovered.

RESOURCE AND RESERVE ESTIMATES

The Company's Annual Information Form (**AIF**) filed as Exhibit 99.1 to this annual Report on Form 40-F has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of United States securities laws. National Instrument 43-101- *Standards of Disclosure for Mineral Projects* (**NI 43-101**) is a rule of the Canadian Securities Administrators which establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. These standards differ significantly from the requirements of the SEC, and reserve and resource information incorporated by reference herein may not be comparable to similar information disclosed by U.S. companies. One consequence of these differences is that reserves calculated in accordance with Canadian standards may not be reserves under the SEC standards.

The terms mineral reserve , proven mineral reserve and probable mineral reserve are Canadian mining terms defined in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum (the **CIM**) in the *CIM Standards on Mineral Resources and Mineral Reserves*, adopted by the CIM Council, as the same may be amended from time to time by the CIM. These definitions differ from the definitions in the SEC Industry Guide 7.

Under U.S. standards mineralization may not be classified as a reserve unless a determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made.

Under SEC Industry Guide 7 standards, a Final or Bankable feasibility study is required to report reserves, the three-year historical average precious metals prices are used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

In addition, the terms mineral resource, measured mineral resource, indicated mineral resource and inferred mineral resource are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and normally are not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that any part or all of the mineral deposits in these categories will ever be converted into reserves. Inferred mineral resources have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category.

Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of contained ounces in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute reserves by SEC standards as in place tonnage and grade without reference to unit measures.

Accordingly, information contained in this report and the documents incorporated by reference herein containing descriptions of our mineral deposits may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under U.S. federal securities laws and the rules and regulations thereunder.
