MOODY S

INVESTORS SERVICE

Rating Action: Moody s assigns Baa3 / Aa1.br rating to CEMIG GT s BRL 1 billion senior, unsecured debentures; Outlook Stable

Global Credit Research - 25 Jan 2012

Sao Paulo, January 25, 2012 Moody s América Latina (Moody s) assigned the Baa3 rating on the global scale, and the Aa1.br Brazilian National Scale Rating (NSR) to CEMIG GERAÇÃO E TRANSMISSÃO S.A. s (CEMIG GT) BRL 1 billion, senior unsecured debentures. The outlook is stable for both ratings. The debentures will be issued in three series (5, 7 and 10 years), and will be guaranteed by COMPANHIA ENERGÉTICA DE MINAS GERAIS (CEMIG), the holding company of the economic group, which includes CEMIG GT, CEMIG Distribuição S.A. (CEMIG D), and LIGHT S.A. (LIGHT).

The proceeds of CEMIG GT s debentures will be used to refinance BRL 1 billion promissory notes (PNs), which were just issued on January 13, 2012.

RATINGS RATIONALE

The Baa3 issuer ratings of CEMIG GT s debentures reflect the overall investment grade profile of CEMIG and its subsidiaries, given that, together on a consolidated basis, they have adequate credit metrics for the rating category, a strong presence in the Brazilian electricity sector, experienced management, recognized competitiveness, adequate liquidity given their good historical access to capital markets, and above average corporate governance practices.

The stable outlook reflects our expectation that CEMIG and CEMIG GT will continue to prudently manage their capital expenditures and acquisition program in order to maintain their credit metrics and preserve their current liquidity position.

CEMIG s rather ambitious expansion plan via acquisitions and equity investments, the evolving Brazilian regulatory framework, and a relatively high dividend pay-out ratio constrain the ratings, as do the risks associated with the potential political interference of the Government of the State of Minas Gerais (MG) in CEMIG s business strategy, the upcoming impact of the third cycle of tariff revision in 2013, and the ongoing lack of definition from the federal regulatory agency (ANEEL) with respect to the process of renewal of generation, transmission and distribution concessions, the majority of which will start to expire in 2015.

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Moody's stable outlook reflects CEMIG's and CEMIG GT's track record in securing funding at adequate terms to finance their capital expenditures and acquisitions while presenting credit metrics that are generally in line with the Baa3 rating category.

The acquisition of TRANSMISSORA ALIANÇA DE ENERGIA ELETRICA S.A. (TAESA) (Baa3; stable) in 2009, the purchase of Abengoa's transmission assets in Brazil by TAESA, CEMIG's acquisition of a stake in LIGHT S.A.'s equity capital (LIGHT) (Ba1; stable), and LIGHT's capital injection in RENOVA ENERGIA S.A. (equivalent to 34.4% of RENOVA's voting shares) demonstrate CEMIG's ambitious strategy to become one of the leading players in the Brazilian electricity industry.

Following the sizable acquisition of TAESA (around BRL 5 billion) in 2009, CEMIG (on a consolidated basis) has presented higher leverage ratios and weaker credit metrics. In addition, the recent acquisition of Abengoa's transmission assets contributed to exercise pressure on TAESA's liquidity position and on CEMIG's

Table of Contents

financial leverage on a consolidated basis, as a significant portion of the funding for the aforementioned acquisition was in the form of short-term debt. Notwithstanding, CEMIG has succeeded in maintaining good access to the local bank and capital markets.

CEMIG has replicated the financing structure used in 2009 with CEMIG GT's investment in TAESA using an investment fund (Fundo de Investimento Privado , or FIP) in its follow-on investment in LIGHT. FIPs are investment vehicles which CEMIG has set up in partnership with financial investors. In the case of LIGHT, the FIP acquired 26% of LIGHT's capital from two former major shareholders. This structure has allowed CEMIG and CEMIG GT to remain a minority shareholder in LIGHT and TAESA respectively, which have allowed them to maintain their status as privately-held companies, thus avoiding budgetary constraints or borrowing limits set by the Government. As a result, TAESA and LIGHT continue to be eligible for a wide range of funding sources, including the Brazilian National Development Bank (BNDES).

Pursuant to the FIPs' shareholders' agreements, after five years the financial investors may exercise a put option against CEMIG and CEMIG GT, which would then have the obligation to acquire their respective participations in the FIPs plus unpaid cumulative dividends. Given the profile of the FIPs' financial investors, we expect that they will exercise their option by selling back their shares to CEMIG GT and CEMIG at the end of five years which could arise in 2014 and 2015, respectively. We have conservatively treated the purchase obligations stemming from the FIPs' shareholding agreements as off-balance sheet debt. In our projections, we have also made adjustments for the potential full consolidation of TAESA and LIGHT, and confirmed that CEMIG will still post credit metrics in line with the Baa3 rating, however at the lower end of this rating category, which leaves less cushion for CEMIG to absorb the impact of any unanticipated events.

Given CEMIG's ambitious capital expenditures and acquisition program the likelihood of a rating upgrade in the short and medium-term is very limited. Quantitatively, Moody's could consider a rating upgrade if Retained Cash Flow to Total Debt rose above 20% and Interest Coverage became higher than 4.5x on a sustainable basis.

The ratings could be downgraded if CEMIG GT and/or CEMIG continue to make large equity investments or acquisitions but fail to secure long-term financing at reasonable terms that will allow them to preserve an adequate liquidity level and/or robust capital structure. The ratings could also be downgraded if retained cash flow to total debt falls below 11% or interest coverage declines to below 3.0x for an extended period.

In accordance with Moody's methodology for government related issuers, or GRIs, the Baa3 corporate family rating of CEMIG reflects the combination of the following inputs:

- Baseline credit assessment (BCA) of 10 (mapping to a Baa3)
- High-level dependence (70%)
- Moderate level of government support (31-50%)
- The Ba1 rating of the State of Minas Gerais, which has a stable outlook.

CEMIG is a GRI as defined in Moody's rating methodology *The Application of Joint Default Analysis to Government Related Issuers*. Moody's methodology for GRIs is to systematically incorporate into the rating both the stand-alone credit risk profile

Table of Contents

or Baseline Credit Assessment (BCA) of the company as well as an assessment of the likelihood that its government owner would provide extraordinary support to the company's obligations. The BCA of a GRI is expressed on a 1-21 scale or as a range within the 1-21 scale, according to the issuer's preference, where one represents the equivalent risk of an Aaa, two a Aa1, three a Aa2 and so forth. Please refer to Moody's special comments "Rating Government-Related Issuers in Americas Corporate Finance" and "Government-Related Issuers: July 2006 Update" at moodys.com for additional information on GRIs.

The last rating action for CEMIG was in February 2011 when Moody's affirmed the Baa3 global scale and Aa1.br Brazil national scale issuer ratings to CEMIG GT and CEMIG D. At the same time, Moody's affirmed the Ba1 global scale and Aa2.br on the NSR of CEMIG. Moody's also changed the outlook for all ratings to stable.

The methodologies used in this rating were Regulated Electric and Gas Utilities published in August 2009, and Government-Related Issuers: Methodology Update published in July 2010. Please see the Credit Policy page on www.moodys.com for a copy of these methodologies.

The Aa1.br national scale rating reflects the standing of the company's operating subsidiaries' credit quality relative to their domestic peers.

Moody's National Scale Ratings (NSRs) are intended as relative measures of creditworthiness among debt issues and issuers within a country, enabling market participants to better differentiate relative risks.

NSRs differ from Moody's global scale ratings in that they are not globally comparable with the full universe of Moody's rated entities, but only with NSRs for other rated debt issues and issuers within the same country. NSRs are designated by a .nn country modifier signifying the relevant country, as in .br for Brazil. For further information on Moody's approach to national scale ratings, please refer to Moody's Rating Implementation Guidance published in March 2011 entitled "Mapping Moody's National Scale Ratings to Global Scale Ratings".

Headquartered in Belo Horizonte, the capital city of the State of Minas Gerais, Companhia Energética de Minas Gerais (CEMIG) is a holding company with interests in the generation, transmission and distribution of electricity. The government of the state of Minas Gerais holds 51% of its voting capital and 22% of its total capital. CEMIG Geração e Transmissão S.A. (CEMIG GT) and CEMIG Distribuição S.A. (CEMIG D), are CEMIG's two main subsidiaries responsible for around 82% of consolidated Net Sales and 80% of consolidated EBITDA. In 2010, CEMIG D sold 25 TWh in the state of Minas Gerais (an

increase of 11% over 2009), and is Brazil's third largest electricity distribution company in terms of net revenues. CEMIG GT is one of the largest Brazilian electricity generation companies with an installed capacity of 6.9 GW. In the last twelve months ended September 30, 2011, CEMIG posted net consolidated sales of BRL 14,169 million (USD 8,592 million) and net profit of BRL 2,378 million (USD 1,442 million).
