FORWARD-LOOKING STATEMENTS

| than stater operations statements | terly Report on Form 10-Q contains forward-looking statements that involve substantial risks and uncertainties. All statements, other ments of historical facts, contained in this Quarterly Report on Form 10-Q, including statements regarding our strategy, future s, future financial position, future revenues, projected costs, prospects, plans and objectives of management, are forward-looking s. The words anticipate, believe, estimate, expect, intend, may, plan, predict, project, target, potential, will, and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these g words. |
|---|--|
| The forwa | ard-looking statements in this Quarterly Report on Form 10-Q include, among other things, statements about: |
| • | our plans to develop and commercialize our most advanced product candidates and companion diagnostics; |
| • | our ongoing and planned discovery programs, preclinical studies and clinical trials; |
| | |

- our collaborations with PharmaEngine, Inc. related to MM-398 and Sanofi related to MM-121;
- our ability to establish and maintain additional collaborations;
- the timing of and our ability to obtain and maintain regulatory approvals for our product candidates;
- the rate and degree of market acceptance and clinical utility of our products;
- our intellectual property position;
- our commercialization, marketing and manufacturing capabilities and strategy;
- the potential advantages of our Network Biology approach to drug research and development;

| • the potential use of our Network Biology approach in fields other than oncology; and |
|---|
| • our estimates regarding expenses, future revenues, capital requirements and needs for additional financing. |
| We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements, and you should not place undue reliance on our forward-looking statements. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements we make. We have included important factors in the cautionary statements included in this Quarterly Report on Form 10-Q, particularly in Part II, Item 1A. Risk Factors, that could cause actual results or events to differ materially from the forward-looking statements that we make. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments we may make. |
| You should read this Quarterly Report on Form 10-Q and the documents that we have filed as exhibits to the Quarterly Report on Form 10-Q completely and with the understanding that our actual |

Merrimack Pharmaceuticals, Inc.

Notes to Condensed Consolidated Financial Statements

(unaudited)

1. Nature of the Business

Merrimack Pharmaceuticals, Inc. (the Company) is a biopharmaceutical company discovering, developing and preparing to commercialize innovative medicines consisting of novel therapeutics paired with companion diagnostics. The Company has five targeted therapeutic oncology candidates in clinical development (MM-398, MM-121, MM-111, MM-302 and MM-151), multiple product candidates in preclinical development and a discovery effort advancing additional candidate medicines. The Company uses its interdisciplinary Network Biology approach in drug discovery and development. The Company is incorporated in the State of Delaware.

The Company is subject to risks and uncertainties common to companies in the biopharmaceutical industry, including, but not limited to, its ability to secure additional capital to fund operations, development by competitors of new technological innovations, dependence on collaborative arrangements, protection of proprietary technology, compliance with government regulations and dependence on key personnel. Product candidates currently under development will require significant additional research and development efforts, including extensive preclinical and clinical testing and regulatory approval prior to commercialization. These efforts require significant amounts of additional capital, adequate personnel infrastructure and extensive compliance reporting capabilities.

The accompanying condensed consolidated financial statements have been prepared on a basis which assumes that the Company will continue as a going concern and which contemplates the realization of assets and satisfaction of liabilities and commitments in the normal course of business. However, the Company has incurred significant losses and does not have commercial operations underway. As of March 31, 2012, the Company had cash and cash equivalents of \$30,555,000. In April 2012, the Company closed the initial public offering of its common stock pursuant to a registration statement on Form S-1, as amended. The Company sold an aggregate of 15,042,459 shares of common stock under the registration statement at a public offering price of \$7.00 per share, including 742,459 shares pursuant to the exercise by the underwriters of an over-allotment option. Net proceeds were approximately \$100.5 million, after deducting underwriting discounts and commissions but prior to the payment of remaining offering expenses payable by the Company and accrued dividends on the Company s Series B convertible preferred stock. The Company expects its existing cash and cash equivalents on hand as of March 31, 2012, together with the net proceeds from the initial public offering, to be sufficient to fund operations into the second half of 2013.

The Company may seek additional funding through public or private financings, or through existing or new collaboration arrangements. The Company may not be able to obtain financing on acceptable terms, or at all, and the Company may not be able to enter into additional collaborative arrangements. The terms of any financing may adversely affect the holdings or the rights of the Company s stockholders. Arrangements with collaborators or others may require the Company to relinquish rights to certain of its technologies or product candidates. If the Company is unable to obtain funding, the Company could be forced to delay, reduce or eliminate its research and development programs or commercialization efforts, which could adversely affect its business prospects.

|-------|----------|--------|---------|------------|----------|
|-------|----------|--------|---------|------------|----------|

Significant accounting policies followed by the Company in the preparation of its condensed consolidated financial statements are as follows:

Basis of Presentation

The accompanying condensed consolidated financial statements as of March 31, 2012, and for the three months ended March 31, 2011 and 2012, have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission (the SEC) and generally accepted accounting principles in the United States of America (GAAP) for condensed consolidated financial information. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, these condensed consolidated financial statements reflect all adjustments which are necessary for a fair statement of the Company's financial position and results of its operations, as of and for the periods presented. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto contained in the Company's Current Report on Form 8-K filed with the SEC on April 27, 2012.

The information presented in the condensed consolidated financial statements and related notes as of March 31, 2012, and for the three months ended March 31, 2011 and 2012, is unaudited. The December 31, 2011 condensed consolidated balance sheet included herein was derived from the audited financial statements as of that date, but does not include all disclosures, including notes, required by GAAP for complete financial statements.

Interim results for the three months ended March 31, 2012 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2012, or any future period.

Principles of Consolidation

These condensed consolidated financial statements include the accounts of the Company, its wholly owned subsidiary Hermes BioSciences, Inc., which was merged with and into the Company during 2011, its wholly owned subsidiary Merrimack Pharmaceuticals (Bermuda) Ltd., which was incorporated during 2011, and its 74% majority owned subsidiary Silver Creek Pharmaceuticals, Inc. (Silver Creek). All intercompany transactions and balances have been eliminated in consolidation.

There were no changes to the Company s ownership of Silver Creek during the three months ended March 31, 2011 and 2012. The Company s consolidated financial statement activity related to Silver Creek during these periods is as follows:

(in thousands) Non-Controlling Interest

| Balance at December 31, 2010 | \$ 1,027 |

Use of estimates

GAAP requires the Company s management to make estimates and judgments that may affect the reported amounts of assets, liabilities, revenues, expenses and related disclosures. The Company bases estimates and judgments on historical experience and on various other factors that it believes to be reasonable under the circumstances. The significant estimates in these condensed consolidated financial statements include revenue recognition, useful lives with respect to long-lived assets and intangibles, valuation of stock options, convertible preferred stock warrants, contingencies, accrued expenses, intangible assets, goodwill, in-process research and development and tax valuation reserves. The Company s actual results may differ from these estimates under different assumptions or conditions. The Company evaluates its estimates on an ongoing basis. Changes in estimates are reflected in reported results in the period in which they become known by the Company s management.

Cash, Cash Equivalents and Restricted Cash

Cash and cash equivalents are short-term, highly liquid investments with an original maturity of three months or less at the date of purchase. Investments qualifying as cash equivalents primarily consist of money market funds.

Cash accounts with any type of restriction are classified as restricted cash. If restrictions are expected to be lifted in the next twelve months, the restricted cash account is classified as current. As of December 31, 2011 and March 31, 2012, the Company recorded restricted cash of \$381,000 and \$481,000, respectively.

Revenue Recognition

The Company enters into biopharmaceutical product development agreements with collaborative partners for the research and development of therapeutic and diagnostic products. The terms of the agreements may include nonrefundable signing and licensing fees, funding for research, development and manufacturing, milestone payments and royalties on any product sales derived from collaborations. These multiple element arrangements are analyzed to determine whether the deliverables can be separated or whether they must be accounted for as a single unit of accounting.

In January 2011, the Company adopted new authoritative guidance on revenue recognition for multiple element arrangements. This guidance, which applies to multiple element arrangements entered into or materially modified on or after January 1, 2011, amends the criteria for separating and allocating consideration in a multiple element arrangement by modifying the fair value requirements for revenue recognition and eliminating the use of the residual method. The fair value of deliverables under the arrangement may be derived using a best estimate of selling price if vendor specific objective evidence and third-party evidence are not available. Deliverables under the arrangement will be separate units of accounting provided that a delivered item has value to the customer on a stand-alone basis and if the arrangement does not include a general right of return relative to the delivered item and delivery or performance of the undelivered item is considered probable and substantially in the control of the vendor. The Company also adopted guidance that permits the recognition of revenue contingent upon the achievement of a milestone in its entirety, in the period in which the milestone is achieved, only if the milestone meets certain criteria and is considered to be substantive. The Company did not enter into any significant multiple element arrangements or materially modify any of its existing multiple element arrangements during the year ended December 31, 2011 or the three months ended March 31, 2012. The Company s existing license and collaboration agreements continue to be accounted for under previously issued revenue recognition guidance for multiple element arrangements

and milestone revenue recognition, as described below.

Table of Contents

The Company recognized upfront license payments as revenue upon delivery of the license only if the license had stand-alone value and the fair value of the undelivered performance obligations could be determined. If the fair value of the undelivered performance obligations could be determined, such obligations were accounted for separately as the obligations were fulfilled. If the license was considered to either not have stand-alone value or have stand-alone value but the fair value of any of the undelivered performance obligations could not be determined, the arrangement was accounted for as a single unit of accounting and the license payments and payments for performance obligations were recognized as revenue over the estimated period of when the performance obligations would be performed.

Whenever the Company determined that an arrangement should be accounted for as a single unit of accounting, it determined the period over which the performance obligations would be performed and revenue would be recognized. If the Company could not reasonably estimate the timing and the level of effort to complete its performance obligations under the arrangement, then revenue under the arrangement was recognized on a straight-line basis over the period the Company expected to complete its performance obligations, which is reassessed at each subsequent reporting period.

The Company s collaboration agreements may include additional payments upon the achievement of performance-based milestones. As milestones are achieved, a portion of the milestone payment, equal to the percentage of the total time that the Company has performed the performance obligations to date over the total estimated time to complete the performance obligations, multiplied by the amount of the milestone payment, will be recognized as revenue upon achievement of such milestone. The remaining portion of the milestone will be recognized over the remaining performance period. Milestones that are tied to regulatory approval are not considered probable of being achieved until such approval is received. Milestones tied to counter-party performance are not included in the Company s revenue model until the performance conditions are met.

Royalty revenue will be recognized upon the sale of the related products provided the Company has no remaining performance obligations under the arrangement.

Convertible Preferred Stock and Convertible Preferred Stock Warrants

Convertible preferred stock is initially recorded at the proceeds received, net of issuance costs and warrants, where applicable. There was no activity related to the convertible preferred stock for the three months ended March 31, 2012. However, as described in Note 3, in April 2012, the Company closed the initial public offering of its common stock. Upon closing, all outstanding shares of the Company s convertible preferred stock were converted into 66,255,529 shares of common stock.

The Company accounts for freestanding warrants as liabilities at their fair value. The Company measures the fair value of the convertible preferred stock warrants at the end of each reporting period and records the change in fair value to other income (expense). For the three months ended March 31, 2011 and 2012, the Company recorded other income (expense) related to this re-measurement of \$(716,000) and \$559,000, respectively. However, as described in Note 3, in April 2012, the Company closed the initial public offering of its common stock. Upon closing, all outstanding warrants to purchase shares of convertible preferred stock were converted into warrants to purchase shares of common stock.

Other Income (Expense)

The Company records gains and losses on the change in value and time to expiration of convertible preferred stock warrants, the recognition of federal and state sponsored tax incentives and other one-time income or expense-related items in other income (expense) on the Company s condensed

Table of Contents

consolidated statement of operations. Other income for the three months ended March 31, 2011 included a cash settlement of \$1.8 million from a former service provider.

Deferred Financing Costs

The Company capitalizes certain legal, accounting and other fees that are directly associated with in-process equity financings as current assets until such financings occur. After occurrence, these costs are recorded in equity, in the case of a common stock financing, or mezzanine equity, in the case of a convertible preferred stock financing, net of proceeds received.

As of December 31, 2011 and March 31, 2012, the Company recorded deferred financing costs of \$1,946,000 and \$2,631,000, respectively, on the accompanying condensed consolidated balance sheet in contemplation of an initial public offering. As discussed in Note 3, in April 2012, the Company closed the initial public offering of its common stock. Upon closing, these deferred financing costs were netted against the equity proceeds within stockholders equity (deficit).

3. Initial Public Offering

In April 2012, the Company closed the initial public offering of its common stock pursuant to a registration statement on Form S-1, as amended. The Company sold an aggregate of 15,042,459 shares of common stock under the registration statement at a public offering price of \$7.00 per share, including 742,459 shares pursuant to the exercise by the underwriters of an over-allotment option. Net proceeds were approximately \$100.5 million, after deducting underwriting discounts and commissions but prior to the payment of remaining offering expenses payable by the Company and accrued dividends on the Company s Series B convertible preferred stock.

Upon closing the initial public offering, all outstanding shares of the Company s convertible preferred stock were converted into 66,255,529 shares of common stock, all outstanding warrants to purchase shares of convertible preferred stock were converted into warrants to purchase shares of common stock and approximately \$4.3 million of cash dividends became payable to the holders of Series B convertible preferred stock.

4. Net Loss per Common Share

Basic net loss per share is calculated by dividing the net loss attributable to common stockholders by the weighted-average number of common shares outstanding during the period, without consideration for common stock equivalents. Diluted net loss per share is computed by dividing the net loss attributable to common stockholders by the weighted-average number of common share equivalents outstanding for the period determined using the treasury-stock method. For purposes of this calculation, convertible preferred stock, stock options and warrants are considered to be common stock equivalents and are only included in the calculation of diluted net loss per share when their effect is dilutive.

Table of Contents

The following table presents the computation of basic and diluted net loss per share available to common stockholders for the three months ended March 31, 2011 and 2012:

| | | Three months ended March 31, | | | |

| Options to purchase common stock | 15,939 | 17,515 | | |
| Convertible preferred stock warrants | 304 | 302 | | |
| Common stock warrants | 2,937 | 2,631 | | |

5. License and Collaboration Agreements

Sanofi

On September 30, 2009, the Company entered into a license and collaboration agreement with Sanofi for the development and commercialization of a drug candidate being developed by the Company under the name MM-121. The agreement became effective on November 10, 2009 and Sanofi paid the Company a nonrefundable, noncreditable upfront license fee of \$60.0 million. During the third quarter of 2010 and the fourth quarter of 2011, the Company received a total of \$20.0 million in milestone payments associated with dosing the first patients in Phase 2 clinical trials in breast cancer and non-small cell lung cancer. During the first quarter of 2012, the Company received an additional milestone payment of \$5.0 million associated with dosing the first patient in a Phase 2 clinical trial in ovarian cancer. The Company is eligible to receive additional future development, regulatory and sales milestone payments as well as future royalty payments depending on the success of MM-121.

Under the agreement, Sanofi is responsible for all MM-121 development and manufacturing costs. The Company retained the right to participate in the development of MM-121 through Phase 2 proof of concept trials. The Company also has the right, but not the obligation, to co-promote MM-121 in the United States. Sanofi reimburses the Company for direct costs incurred in development and compensates the Company for its internal development efforts based on a full time equivalent (FTE) rate. Also as part of the agreement, the Company was required to manufacture certain quantities of MM-121 and, at Sanofi s and the Company s option, may continue to manufacture additional quantities of MM-121 in the future. Sanofi reimburses the Company for direct costs incurred in manufacturing and compensates the Company for its internal manufacturing efforts based on an FTE rate. The Company satisfied its manufacturing obligations during 2010 and has elected to continue to manufacture quantities of MM-121.

The Company applied revenue recognition guidance to determine whether the performance obligations under this collaboration, including the license, the right to future technology, back-up compounds, participation on steering committees, development services and manufacturing services, could be accounted for separately or as a single unit of accounting. The Company determined that its

Table of Contents

development services performance obligation is considered a separate unit of accounting, as it is set at the Company s option, has stand-alone value and the FTE rate is considered fair value. Therefore, the Company recognizes cost reimbursements for MM-121 development services as incurred. The Company determined that the license, the right to future technology, back-up compounds, participation on steering committees and manufacturing services performance obligations represented a single unit of accounting. As the Company cannot reasonably estimate its level of effort over the collaboration, the Company recognizes revenue from the upfront payment, milestone payment and manufacturing services payments using the contingency-adjusted performance model over the expected development period, which is currently estimated to be 12 years from the effective date of the agreement. Under this model, when a milestone is earned or manufacturing services are rendered and product is delivered, revenue is immediately recognized on a pro-rata basis in the period the milestone was achieved or product was delivered based on the time elapsed from the effective date of the agreement. Thereafter, the remaining portion is recognized on a straight-line basis over the remaining development period.

During the three months ended March 31, 2011 and 2012, the Company recognized revenue based on the following components of the Sanofi agreement:

| (in thousands) | Three months 2011 | ended Ma | arch 31, 2012 |
|----------------------------------|-------------------|----------|------------------|
| Upfront payment | \$ 1,250 | \$ | 1,250 |
| Milestone payment | 208 | | 1,412 |
| Development services | 4,705 | | 8,142 |
| Manufacturing services and other | 255 | | 521 |
| | | | |
| Total | \$ 6,418 | \$ | 11,325 |

As of December 31, 2011 and March 31, 2012, the Company maintained the following assets and liabilities related to the Sanofi agreement:

| (in thousands) | December | 31, 2011 | March 31, 2012 | | |
|-------------------------------|----------|----------|----------------|--|--|
| Accounts receivable, billed | \$ | 4,478 \$ | 2,123 | | |
| Accounts receivable, unbilled | | 2,925 | 3,827 | | |
| Deferred revenue | | 84.466 | 87.847 | | |

PharmaEngine, Inc.

On May 5, 2011, the Company entered into an assignment, sublicense and collaboration agreement with PharmaEngine, Inc. (PharmaEngine) under which the Company reacquired rights in Europe and certain countries in Asia to a drug being developed under the name MM-398. In exchange, the Company agreed to pay PharmaEngine a nonrefundable, noncreditable upfront payment of \$10.0 million and will be required to make up to an aggregate of \$80.0 million in development and regulatory milestone payments and \$130.0 million in sales milestone payments upon the achievement of specified development, regulatory and annual net sales milestones. During the first quarter of 2012, the Company paid a milestone of \$5.0 million under the collaboration agreement with PharmaEngine in connection

Table of Contents

with dosing the first patient in a Phase 3 clinical trial of MM-398 in pancreatic cancer. PharmaEngine is also entitled to tiered royalties on net sales of MM-398 in Europe and certain countries in Asia. The Company is responsible for all future development costs of MM-398 except those required specifically for regulatory approval in Taiwan. The Company determined that PharmaEngine is a variable interest entity based on an analysis of PharmaEngine s capitalization. However, the Company determined that the Company cannot control the activities of PharmaEngine, and therefore, the Company is not the primary beneficiary and should not consolidate the financial results of PharmaEngine.

During the three months ended March 31, 2012, the Company recognized research and development expenses of \$5.3 million related to the agreement with PharmaEngine, which consisted of the \$5.0 million milestone payment and \$0.3 million of research and development reimbursement.

6. Fair Value of Financial Instruments

The carrying amounts of cash and cash equivalents, prepaid expenses, accounts receivable, accounts payable and accrued expenses and other short-term assets and liabilities approximate fair value due to the short-term nature of these instruments. The capital lease obligations and convertible preferred stock warrants are also carried at fair value.

Fair value is an exit price, representing the amount that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants. Fair value is determined based on observable and unobservable inputs. Observable inputs reflect readily obtainable data from independent sources, while unobservable inputs reflect certain market assumptions. As a basis for considering such assumptions, GAAP establishes a three-tier value hierarchy, which prioritizes the inputs used to develop the assumptions and for measuring fair value as follows: (Level 1) observable inputs such as quoted prices in active markets for identical assets; (Level 2) inputs other than the quoted prices in active markets that are observable either directly or indirectly; and (Level 3) unobservable inputs in which there is little or no market data, which requires the Company to develop its own assumptions. This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

The following tables show assets and liabilities measured at fair value on a recurring basis as of December 31, 2011 and March 31, 2012 and the input categories associated with those assets and liabilities:

| As of December 31, 2011 (in thousands) | Level 1 | Level 2 | Level 3 |
|--|--------------|---------|---------|
| Assets | | | |
| Cash equivalents Money Markets | \$ 35,076 | S | \$ |
| Liabilities | | | |
| Convertible preferred stock warrants | | | 1,516 |
| As of March 31, 2012 (in thousands) | Level 1 | Level 2 | Level 3 |
| Assets | | | |
| Cash equivalents Money Markets | \$ 3,63 | 6 | |

| Liabilities | | |
|--------------------------------------|----|-----|
| Convertible preferred stock warrants | | 957 |
| | | |
| | | |
| | 13 | |

Table of Contents

The Company s investment portfolio consists of investments classified as cash equivalents. All highly liquid investments with an original maturity of three months or less when purchased are considered to be cash equivalents. The Company s cash and cash equivalents are invested in a U.S. treasury and federal agency-backed money market fund that approximates its face value. The fair value of the convertible preferred stock warrants as of December 31, 2011 and March 31, 2012 was determined using the Black-Scholes option valuation model.

The following table provides a roll-forward of the fair value of the convertible preferred stock warrants categorized as Level 3 instruments, for the three months ended March 31, 2011 and 2012:

| (in thousands) | Convertible preferred ck warrants |
|--|---|
| Balance, December 31, 2010 | \$ 652 |
| Unrealized loss included in other income (expense) | 716 |
| | |
| Balance, March 31, 2011 | \$ 1,368 |
| | |
| (in thousands) | Convertible preferred ck warrants |
| Balance, December 31, 2011 | \$ 1,516 |
| Unrealized gain included in other income (expense) | (559) |
| ` . | , , |
| Balance, March 31, 2012 | \$ 957 |

7. Accrued Expenses and other

Accrued expenses and other as of December 31, 2011 and March 31, 2012 consisted of the following:

| (in thousands) | December 31, 2011 | March 31, 2012 | | |
|-------------------------------------|-------------------|----------------|--------|--|
| Goods and services \$ | 9,18 | 9 \$ | 8,457 | |
| Payroll and related benefits | 3,66 | 6 | 3,382 | |
| Contractual liability | | | 1,222 | |
| | | | | |
| Total accrued expenses and other \$ | 12,85 | 5 \$ | 13,061 | |

As described in Note 10, the Company has recorded a contractual liability of \$1.2 million related to a contractual matter with Sanofi.

Table of Contents

8. Common Stock

During the first quarter of 2012, the Company amended its certificate of incorporation to increase the number of authorized shares of common stock to 200.0 million. As of December 31, 2011 and March 31, 2012, the Company had 138.5 million shares and 200.0 million shares, respectively, of common stock, \$0.01 par value per share, authorized.

There were 11,834,000 and 11,907,000 shares of common stock issued and outstanding as of December 31, 2011 and March 31, 2012, respectively. The shares reserved for future issuance as of December 31, 2011 and March 31, 2012 consisted of the following:

| (in thousands) | December 31, 2011 | March 31, 2012 |
|---|-------------------|----------------|
| Conversion of Series B, Series C, Series D, Series E, Series F and Series G convertible preferred | | |
| stock | 66,256 | 66,256 |
| Convertible preferred stock warrants | 302 | 302 |
| Common stock warrants | 2,640 | 2,631 |
| 1999 Stock Option Plan and 2008 Stock Incentive Plan | 17,617 | 17,515 |
| | | |
| | 86,815 | 86,704 |

As discussed in Note 3, in April 2012, the Company closed the initial public offering of its common stock pursuant to a registration statement on Form S-1, as amended. The Company sold an aggregate of 15,042,459 shares of common stock under the registration statement at a public offering price of \$7.00 per share, including 742,459 shares pursuant to the exercise by the underwriters of an over-allotment option. Upon closing, all outstanding shares of the Company s convertible preferred stock were converted into 66,255,529 shares of common stock.

9. Stock-Based Compensation

During the three months ended March 31, 2011 and 2012, the Company did not issue options to purchase shares of common stock.

As of December 31, 2011 and March 31, 2012, there were 830,000 and 866,111 shares of common stock, respectively, available to be issued under the 2008 Stock Incentive Plan, as amended (the 2008 Plan).

The 2011 Stock Incentive Plan (the 2011 Plan) became effective upon closing of the Company s initial public offering in April 2012. Upon effectiveness of the 2011 Plan, no further awards were available to be issued under the 2008 Plan. The 2011 Plan is administered by the Board of Directors of the Company and permits the Company to grant incentive and non-qualified stock options, stock appreciation rights, restricted stock, restricted stock units and other stock-based awards. The 2011 Plan increases the total number of shares of common stock available to be issued by 3.5 million.

Table of Contents

The Company recognized stock-based compensation expense as follows for the three months ended March 31, 2011 and 2012:

| (in thousands) | Three months ended Mar 2011 | | | ch 31, 2012 |
|---|--------------------------------|-------|----|----------------|
| Employee awards: | | | | |
| Research and development | \$ | 700 | \$ | 909 |
| General and administrative | | 273 | | 430 |
| | | | | |
| Stock-based compensation for employee awards | | 973 | | 1,339 |
| Stock-based compensation for nonemployee awards | | 47 | | |
| | | | | |
| Total stock-based compensation | \$ | 1,020 | \$ | 1,339 |

The following table summarizes stock option activity during the three months ended March 31, 2012:

| (in thousands, except per share amounts) | Number of shares | Weighted average exercise price | Aggregate intrinsic value |
|---|------------------|---------------------------------------|---------------------------------|
| Outstanding, December 31, 2011 | 17,617 | \$ 2.56 | \$ 74,329 |
| | | | |
| Exercised | (66) | \$ 2.24 | |
| Forfeited | (36) | \$ 3.37 | |
| | | | |
| Outstanding, March 31, 2012 | 17,515 | \$ 2.56 | \$ 63,769 |
| | | | |
| Exercisable, March 31, 2012 | 14,171 | \$ 2.23 | \$ 56,177 |
| Vested and expected to vest, March 31, 2012 | 17,339 | \$ 2.54 | \$ 63,485 |

The aggregate intrinsic value was calculated as the difference between the exercise price of the stock options and the fair value of the underlying common stock as of the respective balance sheet date.

10. Commitments and Contingencies

Operating leases

The Company leases its office, laboratory and manufacturing space under non-cancellable operating leases. Total rent expense under these operating leases was \$700,000 and \$893,000 for the three months ended March 31, 2011 and 2012, respectively.

During the first quarter of 2012, the Company entered into a lease amendment to further expand its office, laboratory and manufacturing space. The amendment leases additional space for a seven year term effective March 2012. The aggregate rent due over the seven year term of the lease amendment is approximately \$2.7 million. As part of this agreement, the landlord agreed to reimburse the Company for a portion of tenant improvements made to the facility, up to a total of \$464,000. Tenant improvements are

Table of Contents

recorded in deferred lease benefits on the accompanying condensed consolidated balance sheets and amortized over the term of the lease as reductions to rent expense.

During the first quarter of 2012, the Company completed tenant improvements to the leased facility and recorded a related receivable from the landlord of \$329,000 in prepaid expenses and other assets on the accompanying condensed consolidated balance sheets as of March 31, 2012.

Contingencies

Contractual matter

The Company manufactures MM-121 under a license and collaboration agreement with Sanofi. Under this agreement, Sanofi reimburses the Company for direct costs incurred in manufacturing. During 2009 and 2010, the Company utilized a third party contractor to perform fill-finish manufacturing services. This third party contractor experienced U.S. Food and Drug Administration (FDA) inspection issues with its quality control process that resulted in a formal warning letter from the FDA. Following a review by Sanofi and the Company, some MM-121 was pulled from clinical trial sites and replaced with MM-121 that was filled by a different contractor. Sanofi had requested that the Company assume financial responsibility for the MM-121 material that was pulled from clinical trial sites. The Company and Sanofi have since agreed that, during 2012 and 2013, the Company will reimburse Sanofi approximately \$1.2 million of previously billed amounts. The Company has recorded a contractual liability of \$1.2 million in accrued expenses and other on the accompanying condensed consolidated balance sheets as of March 31, 2012. The Company s revenue recognition model for manufacturing services performed under the license and collaboration agreement with Sanofi is to recognize these services over the period of performance, which is currently estimated to be 12 years from the effective date of the agreement. Removal of these previously billed amounts from the revenue recognition model and establishing this contractual liability resulted in an earnings reduction of \$0.2 million for the three months ended March 31, 2012 in the accompanying condensed consolidated statement of operations.

11. Related Party Transactions

In connection with the initial public offering of the Company s common stock, Sanofi purchased 5,217,391 shares of the Company s common stock in April 2012.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion of our financial condition and results of operations should be read in conjunction with our financial statements and the notes to those financial statements appearing elsewhere in this Quarterly Report on Form 10-Q and the audited consolidated financial statements and notes thereto and management s discussion and analysis of financial condition and results of operations for the year ended December 31, 2011 included in our Annual Report on Form 10-K. This discussion contains forward-looking statements that involve significant risks and uncertainties. As a result of many factors, such as those set forth in Part II, Item 1A. Risk Factors of this Quarterly Report on Form 10-Q, which are incorporated herein by reference, our actual results may differ materially from those anticipated in these

| forward-looking statements. | | |
|-----------------------------|--|--|
| iorwara-looking slatements. | | |

Overview

We are a biopharmaceutical company discovering, developing and preparing to commercialize innovative medicines consisting of novel therapeutics paired with companion diagnostics. Our mission is

Table of Contents

to provide patients, physicians and the healthcare system with the medicines, tools and information to transform the approach to care from one based on the identification and treatment of symptoms to one focused on the diagnosis and treatment of illness through a more precise mechanistic understanding of disease. We seek to accomplish our mission by applying our proprietary systems-based approach to biomedical research, which we call Network Biology. Our initial focus is in the field of oncology. We have five programs in clinical development. In our most advanced program, we are conducting a Phase 3 clinical trial.

We have devoted substantially all of our resources to our drug discovery and development efforts, including advancing our Network Biology approach, conducting clinical trials for our product candidates, protecting our intellectual property and providing general and administrative support for these operations. We have not generated any revenue from product sales and, to date, have financed our operations primarily through private placements of our convertible preferred stock, collaborations and, to a lesser extent, through government grants, the monetization of tax credits and equipment lease financings. Through March 31, 2012, we have received \$268.2 million from the sale of convertible preferred stock and warrants and \$150.5 million of upfront license fees, milestone payments, reimbursement of development and manufacturing services and other payments from our collaborations. In April 2012, we closed the initial public offering of our common stock pursuant to a registration statement on Form S-1, as amended. We sold an aggregate of 15,042,459 shares of common stock under the registration statement at a public offering price of \$7.00 per share, including 742,459 shares pursuant to the exercise by the underwriters of an over-allotment option. Net proceeds were approximately \$100.5 million, after deducting underwriting discounts and commissions but prior to the payment of remaining offering expenses payable by us and accrued dividends on our Series B convertible preferred stock. As of March 31, 2012, we had cash and cash equivalents of \$30.6 million. We expect our existing cash and cash equivalents on hand as of March 31, 2012, together with the net proceeds from the initial public offering, to be sufficient to fund operations into the second half of 2013.

We have never been profitable and, as of March 31, 2012, we had an accumulated deficit of \$374.1 million. Our net loss was \$23.4 million for the three months ended March 31, 2012 and \$13.5 million for the three months ended March 31, 2011. We expect to continue to incur significant expenses and increasing operating losses for at least the next several years. We expect our research and development expenses to increase in connection with our ongoing activities, particularly as we continue the research, development and clinical trials of our product candidates, including multiple simultaneous clinical trials for certain product candidates, some of which we expect will be entering late stage clinical development. In addition, subject to obtaining regulatory approval of any of our product candidates, we expect to incur significant commercialization expenses for product sales, marketing, manufacturing and distribution. Until such time, if ever, as we can generate substantial product revenues, we expect to finance our cash needs through a combination of equity offerings, debt financings, collaborations, strategic alliances, licensing arrangements and other marketing and distribution arrangements. We may be unable to raise capital when needed or on attractive terms, which would force us to delay, limit, reduce or terminate our research and development programs or commercialization efforts. We will need to generate significant revenues to achieve profitability, and we may never do so.

Strategic Partnerships, Licenses and Collaborations

Sanofi

In September 2009, we entered into a license and collaboration agreement with Sanofi for the development and commercialization of MM-121. Under this agreement, we granted Sanofi an exclusive, royalty-bearing, worldwide right and license to develop and commercialize MM-121 in exchange for payment by Sanofi of an upfront license fee of \$60.0 million, up to \$410.0 million in potential

Table of Contents

development and regulatory milestone payments, of which we have already received \$25.0 million, up to \$60.0 million in potential sales milestone payments and tiered, escalating royalties beginning in the sub-teen double digits based on net sales of MM-121 in the United States and beginning in the high single digits based on net sales of MM-121 outside the United States. Of the \$25.0 million in development and regulatory milestone payments received, \$5.0 million was earned and received in the first quarter of 2012. We have the right, but not the obligation, to co-promote and commercialize MM-121 in the United States and to participate in the development of MM-121 through Phase 2 proof of concept trials, which we are currently conducting. If we co-promote MM-121 in the United States, we will be responsible for paying our sales force costs and a specified percentage of direct medical affairs, marketing and promotion costs for MM-121 in the United States and will be eligible to receive tiered, escalating royalties beginning in the high teens based on net sales of MM-121 in the United States. We are also entitled to an increase in the royalty rate if a diagnostic product is actually used with MM-121 in the treatment of solid tumor indications. Sanofi is responsible for all development and manufacturing costs for MM-121. Although Sanofi will ultimately be responsible for manufacturing MM-121 under the agreement, we are currently manufacturing MM-121 for use in ongoing clinical trials. Sanofi will assume responsibility for all manufacturing of MM-121 at such time as material is needed for Phase 3 clinical trials. Sanofi reimburses us for internal time at a designated full-time equivalent rate per year and reimburses us for direct costs and services related to the development and manufacturing of MM-121.

The timing of cash received from Sanofi differs from revenue recognized for financial statement purposes. We recognize revenue for development services as incurred and recognize revenue for the upfront payment, milestone payments and manufacturing services using the contingency-adjusted performance model over the expected development period, which is currently estimated to be 12 years from the effective date of our agreement with Sanofi. During the three months ended March 31, 2011 and 2012, we recognized revenue based on the following components of the Sanofi agreement:

| | | Three months ended March 31, | | | | |
|----------------------------------|----|------------------------------|----|--------|--|--|
| (in thousands) | 20 | 11 | | 2012 | | |
| Upfront payment | \$ | 1,250 | \$ | 1,250 | | |
| Milestone payments | | 208 | | 1,412 | | |
| Development services | | 4,705 | | 8,142 | | |
| Manufacturing services and other | | 255 | | 521 | | |
| Total | \$ | 6.418 | \$ | 11.325 | | |

Financial Obligations Related to the License and Development of MM-398

In September 2005, Hermes BioSciences, Inc., or Hermes, which we acquired in October 2009, entered into a license agreement with PharmaEngine, Inc., or PharmaEngine, under which PharmaEngine received an exclusive license to research, develop, manufacture and commercialize MM-398 in Europe and certain countries in Asia. In May 2011, we entered into a new agreement with PharmaEngine under which we reacquired all previously licensed rights for MM-398, other than rights to commercialize MM-398 in Taiwan. As a result, we now have the exclusive right to commercialize MM-398 in all territories in the world, except for Taiwan, where PharmaEngine has an exclusive commercialization right. Upon

Table of Contents

entering into the May 2011 agreement with PharmaEngine, we paid PharmaEngine a \$10.0 million upfront license fee. In addition, we made a milestone payment of \$5.0 million to PharmaEngine during the first quarter of 2012 in connection with dosing the first patient in our Phase 3 clinical trial of MM-398. We may be required to make up to an aggregate of \$75.0 million in additional development and regulatory milestone payments and \$130.0 million in additional sales milestone payments to PharmaEngine upon the achievement of specified development, regulatory and annual net sales milestones. PharmaEngine is also entitled to tiered royalties on net sales of MM-398 in Europe and certain countries in Asia. The royalty rates under the agreement range from high single digits up to the low teens as a percentage of our net sales of MM-398 in these territories. Under the May 2011 agreement, we are responsible for all future development costs of MM-398 except those required specifically for regulatory approval in Taiwan. During the three months ended March 31, 2012, we recognized research and development expense of \$5.3 million under the May 2011 agreement with PharmaEngine, which consisted of the \$5.0 million milestone payment and \$0.3 million of research and development reimbursement.

Financial Operations Overview

Revenues

We have not yet generated any revenue from product sales. All of our revenue to date has been derived from license fees, milestone payments and development and manufacturing services and other payments received from collaborations, primarily with Sanofi, and grant payments received from the National Cancer Institute. In the future, we may generate revenue from a combination of product sales, license fees, milestone payments and research, development and manufacturing payments from collaborations and royalties from the sales of products developed under licenses of our intellectual property. We expect that any revenue we generate will fluctuate from quarter to quarter as a result of the timing and amount of license fees, research, development and manufacturing reimbursements, milestone and other payments from collaborations, and the amount and timing of payments that we receive upon the sale of our products, to the extent any are successfully commercialized. We do not expect to generate revenue from product sales until 2014, at the earliest. If we or our collaborators fail to complete the development of our product candidates in a timely manner or obtain regulatory approval for them, our ability to generate future revenue, and our results of operations and financial position, would be materially adversely affected.

Research and development expense

The following table summarizes our principal product development programs, including the related stages of development for each product candidate in development and the research and development expenses allocated to each clinical product candidate. Prior to May 2011, our collaborator, PharmaEngine, led the clinical development of MM-398 with minimal investment by us.

Table of Contents

| (in | | Current stage of | | ths ended March 31, | |

MM-398

MM-398 is currently being evaluated in a Phase 2 clinical trial in pancreatic cancer and in a Phase 3 clinical trial as a therapy in metastatic pancreatic cancer for patients who have failed treatment with gemcitabine. Our current estimate for the external costs associated with completing the Phase 3 clinical trial is between \$17.0 million and \$22.0 million. In May 2011, we made an upfront license payment of \$10.0 million to PharmaEngine. In the first quarter of 2012, we made a milestone payment of \$5.0 million to PharmaEngine in connection with dosing the first patient in our Phase 3 trial. We may be required to make up to an aggregate of \$75.0 million in additional development and regulatory milestone payments and \$130.0 million in additional sales milestone payments to PharmaEngine upon the achievement of specified development, regulatory and annual net sales milestones. PharmaEngine is also entitled to tiered royalties based on net sales of MM-398 in Europe and certain countries in Asia. The royalty rates range from high single digits up to the low teens as a percentage of our net sales of MM-398 in these territories. In addition, several investigator sponsored trials are ongoing in which the majority of the total clinical trial costs are paid by the investigators. Investigator sponsored trials include a Phase 2 clinical trial in colorectal cancer, a Phase 1 clinical trial in colorectal cancer and a Phase 1 clinical trial in glioma.

MM-121

We have entered into a license and collaboration agreement with Sanofi related to MM-121. Under the terms of the agreement, we are responsible for leading clinical development through Phase 2 proof of concept trials for each indication. Although Sanofi will ultimately be responsible for manufacturing MM-121 under the license and collaboration agreement, we are currently manufacturing MM-121 for use in ongoing clinical trials. Sanofi will assume responsibility for all manufacturing of MM-121 at such time as material is needed for Phase 3 clinical trials. All expenses related to manufacturing are required to be reimbursed by Sanofi. Sanofi pays a portion of the estimated manufacturing campaign costs upfront and the remainder during and upon completion of the manufacturing campaign in accordance with an agreed upon budget. We separately record revenue and expenses on a gross basis under this arrangement. Sanofi is responsible for all development and manufacturing costs of MM-121. We are currently conducting three Phase 2 clinical trials, one Phase 1/2 clinical trial and four Phase 1 clinical trials of MM-121 in multiple cancer types. During the third quarter

Table of Contents

| of 2010, we received a \$10.0 million milestone payment from Sanofi for dosing the first patient in a proof of concept Phase 2 clinical trial of MM-121 in breast cancer. During the fourth quarter of 2011, we received a \$10.0 million milestone payment from Sanofi for dosing the first patient in a proof of concept Phase 2 clinical trial of MM-121 in non-small cell lung cancer. During the first quarter of 2012, we received a \$5.0 million milestone payment from Sanofi for dosing the first patient in a proof of concept Phase 2 clinical trial of MM-121 in ovarian cancer. |
|---|
| MM-111 |
| We are currently conducting two Phase 1 clinical trials of MM-111 in multiple cancer types. |
| MM-302 |
| We are currently conducting one Phase 1 clinical trial of MM-302 in breast cancer. |
| MM-151 |
| We are currently conducting one Phase 1 clinical trial of MM-151 in solid tumors. During the first quarter of 2012, we made a \$1.5 million payment under our collaboration agreement with Adimab LLC. |

General and administrative expense

General and administrative expense consists primarily of salaries and other related costs for personnel, including stock-based compensation expenses and benefits, in our executive, legal, intellectual property, business development, finance, purchasing, accounting, information technology, corporate communications, investor relations and human resources departments. Other general and administrative expenses include employee training and development, board of directors costs, depreciation, insurance expenses, facility-related costs not otherwise included in research and development expense, and professional fees for legal services, including patent-related expenses, pre-commercial consulting costs, and accounting and information technology services. We expect that general and administrative expense will increase in future periods in proportion to increases in research and development and as a result of increased payroll, expanded infrastructure, increased consulting, legal, accounting and investor relations expenses associated with being a public company and costs incurred to develop and commercialize our clinical products.

Other income (expense)

Other income and other expense primarily consist of gains and losses on the change in value and time to expiration of convertible preferred stock warrants, the recognition of federal and state sponsored tax incentives and other one-time income or expense-related items.

Critical Accounting Policies and Significant Judgments and Estimates

Our management s discussion and analysis of our financial condition and results of operations is based on our unaudited interim condensed consolidated financial statements, which we have prepared in accordance with the rules and regulations of the Securities and Exchange Commission, or the SEC, and generally accepted accounting principles in the United States for condensed consolidated information. The preparation of these interim condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported revenues and

Table of Contents

expenses during the reporting periods. We evaluate our estimates and judgments on an ongoing basis. Estimates include revenue recognition, useful lives with respect to long-lived assets and intangibles, valuation of stock options, convertible preferred stock warrants, contingencies, accrued expenses and other, intangible assets, goodwill, in-process research and development and tax valuation reserves. We base our estimates on historical experience and on various other factors that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Our actual results may differ from these estimates under different assumptions or conditions.

Revenue recognition

We enter into biopharmaceutical product development agreements with collaborators for the research and development of therapeutic and diagnostic products. The terms of these agreements may include nonrefundable signing and licensing fees, funding for research, development and manufacturing, milestone payments and royalties on any product sales derived from collaborations. We assess these multiple elements in accordance with the Financial Accounting Standards Board Accounting Standards Codification 605, *Revenue Recognition*, in order to determine whether particular components of the arrangement represent separate units of accounting.

In January 2011, we adopted new authoritative guidance on revenue recognition for multiple element arrangements. This guidance, which applies to multiple element arrangements entered into or materially modified on or after January 1, 2011, amends the criteria for separating and allocating consideration in a multiple element arrangement by modifying the fair value requirements for revenue recognition and eliminating the use of the residual method. The fair value of deliverables under the arrangement may be derived using a best estimate of selling price if vendor specific objective evidence and third-party evidence are not available.

Deliverables under the arrangement will be separate units of accounting provided that a delivered item has value to the customer on a stand-alone basis and if the arrangement does not include a general right of return relative to the delivered item and delivery or performance of the undelivered item is considered probable and substantially in the control of the vendor. We also adopted guidance that permits the recognition of revenue contingent upon the achievement of a milestone in its entirety, in the period in which the milestone is achieved, only if the milestone meets certain criteria and is considered to be substantive. We did not enter into any significant multiple element arrangements or materially modify any of our existing multiple element arrangements during the year ended December 31, 2011 or the three months ended March 31, 2012. Our existing collaboration agreements continue to be accounted for under previously issued revenue recognition guidance for multiple element arrangements and milestone revenue recognition, as described below.

We recognized upfront license payments as revenue upon delivery of the license only if the license had stand-alone value and the fair value of the undelivered performance obligations could be determined. If the fair value of the undelivered performance obligations could be determined, such obligations were accounted for separately as the obligations were fulfilled. If the license was considered to either not have stand-alone value or have stand-alone value but the fair value of any of the undelivered performance obligations could not be determined, the arrangement was accounted for as a single unit of accounting and the license payments and payments for performance obligations were recognized as revenue over the estimated period of when the performance obligations would be performed.

Whenever we determined that an arrangement should be accounted for as a single unit of accounting, we determined the period over which the performance obligations would be performed and revenue would be recognized. If we could not reasonably estimate the timing and the level of effort to

Table of Contents

complete our performance obligations under the arrangement, then we recognized revenue under the arrangement on a straight-line basis over the period that we expected to complete our performance obligations, which is reassessed at each subsequent reporting period.

Our collaboration agreements may include additional payments upon the achievement of performance-based milestones. As milestones are achieved, a portion of the milestone payment, equal to the percentage of the total time that we have performed the performance obligations to date over the total estimated time to complete the performance obligations, multiplied by the amount of the milestone payment, is recognized as revenue upon achievement of such milestone. The remaining portion of the milestone will be recognized over the remaining performance period. Milestones that are tied to regulatory approval are not considered probable of being achieved until such approval is received. Milestones tied to counterparty performance are not included in our revenue model until the performance conditions are met. To date, we have not received any royalty payments or recognized any royalty revenue. We will recognize royalty revenue upon the sale of the related products, provided we have no remaining performance obligations under the arrangement.

We record deferred revenue when payments are received in advance of the culmination of the earnings process. This revenue is recognized in future periods when the applicable revenue recognition criteria have been met.

Contractual matter

We manufacture MM-121 under a license and collaboration agreement with Sanofi. Under this agreement, Sanofi reimburses us for direct costs incurred in manufacturing. During 2009 and 2010, we utilized a third party contractor to perform fill-finish manufacturing services. This third party contractor experienced U.S. Food and Drug Administration, or FDA, inspection issues with its quality control process that resulted in a formal warning letter from the FDA. Following a review by Sanofi and us, some MM-121 was pulled from clinical trial sites and replaced with MM-121 that was filled by a different contractor. Sanofi had requested that we assume financial responsibility for the MM-121 material that was pulled from clinical trial sites. We and Sanofi have since agreed that, during 2012 and 2013, we will reimburse Sanofi approximately \$1.2 million of previously billed amounts. We have recorded a contractual liability of \$1.2 million in accrued expenses and other on the accompanying condensed consolidated balance sheets as of March 31, 2012. Our revenue recognition model for manufacturing services performed under the license and collaboration agreement with Sanofi is to recognize these services over the period of performance, which is currently estimated to be 12 years from the effective date of the agreement. Removal of these previously billed amounts from our revenue recognition model and establishing this contractual liability resulted in an earnings reduction of \$0.2 million for the three months ended March 31, 2012.

JOBS Act

On April 5, 2012, the Jumpstart Our Business Startups Act, or the JOBS Act, was enacted. Among other provisions, the JOBS Act provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act of 1933, as amended, or the Securities Act, for complying with new or revised accounting standards. This allows an emerging growth company to delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. We are electing to delay such adoption of new or revised accounting standards, and as a result, we may not comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for public companies that are not emerging growth companies. Additionally, we are in the process of evaluating the benefits of relying on other exemptions and reduced reporting requirements provided by the JOBS Act.

Table of Contents

Subject to certain conditions set forth in the JOBS Act, as an emerging growth company, we intend to rely on certain of these exemptions, including not being required to provide an auditor s attestation report on our system of internal controls over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 and comply with any requirement that may be adopted by the Public Company Accounting Oversight Board regarding mandatory audit firm rotation or a supplement to the auditor s report providing additional information about the audit and the financial statements. We may remain an emerging growth company for up to five years, until December 31, 2017, although if the market value of our common stock that is held by non-affiliates exceeds \$700 million as of any June 30 before that time or if we have annual gross revenues of \$1 billion or more in any fiscal year, we would cease to be an emerging growth company as of December 31 of the applicable year.

Results of Operations

Comparison of the three months ended March 31, 2011 and 2012

| | Three months ended March 31, | | | |
|-------------------------------------|------------------------------|----------|----|----------|
| (in thousands) | | 2011 | | 2012 |
| Collaboration revenues | \$ | 6,461 | \$ | 11,344 |
| Research and development expenses | | 18,001 | | 31,651 |
| General and administrative expenses | | 3,101 | | 3,728 |
| | | | | |
| Loss from operations | | (14,641) | | (24,035) |
| Interest income | | 14 | | 9 |
| Interest expense | | (6) | | (1) |
| Other income | | 1,098 | | 625 |
| | | | | |
| Net loss | \$ | (13,535) | \$ | (23,402) |

Collaboration revenues

Collaboration revenues for the three months ended March 31, 2012 were \$11.3 million, compared to \$6.5 million for the three months ended March 31, 2011, an increase of \$4.8 million, or 74%. This increase resulted from increases in development services, milestone and manufacturing revenues recognized under the license and collaboration agreement with Sanofi.

| Table of Contents |
|--|
| Research and development expenses |
| Research and development expenses for the three months ended March 31, 2012 were \$31.7 million, compared to \$18.0 million for the three months ended March 31, 2011, an increase of \$13.7 million, or 76%. This increase was primarily attributable to: |
| • \$7.3 million of increased MM-398 spending due primarily to a \$5.0 million milestone payment made to PharmaEngine in the first quarter of 2012 and increased costs associated with our Phase 3 clinical trial; |
| • \$4.5 million of increased spending on preclinical, general research and discovery due to an increase in the number of preclinical programs in our pipeline, the timing of material and supply purchases and an antibody discovery related payment of \$0.4 million made in the first quarter of 2012; |
| • \$2.2 million of increased MM-121 spending due to initiation of four new clinical trials and increased spending on ongoing clinical trials; |
| • \$0.2 million of increased MM-302 spending due to increased preclinical and clinical costs; and |
| • \$0.2 million of increased stock compensation expense due to increased headcount. |
| These increases were partially offset by the following decreases: |
| • \$0.4 million of decreased MM-151 spending primarily due to a \$1.9 million decrease in manufacturing costs due to the timing of manufacturing activities, partially offset by a \$1.5 million collaboration payment made during the first quarter of 2012; and |
| • \$0.4 million of decreased MM-111 spending due to the timing of clinical trial activities. |
| General and administrative expenses |

General and administrative expenses for the three months ended March 31, 2012 were \$3.7 million, compared to \$3.1 million for the three months ended March 31, 2011, an increase of \$0.6 million, or 19%. This increase was primarily attributable to an increase in labor and labor-related costs and an increase in costs related to our initial public offering, which closed in April 2012.

Other income

Other income for the three months ended March 31, 2012 was \$0.6 million, compared to \$1.1 million for the three months ended March 31, 2011, a decrease of \$0.5 million, or 45%. This decrease was primarily due to the absence of a \$1.8 million cash settlement from a former service provider recognized in the first quarter of 2011, partially offset by a \$1.3 million quarter-over-quarter benefit from the remeasurement of fair value of our convertible preferred stock warrants.

Table of Contents

Liquidity and Capital Resources

Sources of liquidity

We have financed our operations to date primarily through private placements of our convertible preferred stock, collaborations, an initial public offering of our common stock and, to a lesser extent, through government grants, the monetization of tax credits and equipment lease financings. Through March 31, 2012, we have received \$268.2 million from the sale of convertible preferred stock and warrants and \$150.5 million of upfront license fees, milestone payments, reimbursement of development and manufacturing services and other payments from our collaborations. In April 2012, we closed the initial public offering of our common stock pursuant to a registration statement on Form S-1, as amended. We sold an aggregate of 15,042,459 shares of common stock under the registration statement at a public offering price of \$7.00 per share, including 742,459 shares pursuant to the exercise by the underwriters of an over-allotment option. Net proceeds were approximately \$100.5 million, after deducting underwriting discounts and commissions but prior to the payment of remaining offering expenses payable by us and accrued dividends on our Series B convertible preferred stock.

As of March 31, 2012, we had cash and cash equivalents of approximately \$30.6 million, of which \$1.6 million related to the cash and cash equivalents held by our majority owned subsidiary Silver Creek Pharmaceuticals, Inc., or Silver Creek, which is consolidated for financial reporting purposes. This \$1.6 million is designated for the operations of Silver Creek.

We made a \$1.5 million payment under our collaboration agreement with Adimab LLC and an antibody discovery related payment of \$0.4 million during the first quarter of 2012.

Cash flows

The following table provides information regarding our cash flows for the three months ended March 31, 2011 and 2012.

| (in thousands) | 2 | Three months e | nded Mai | rch 31, 2012 |
|--|----|----------------|----------|-----------------|
| Cash used in operating activities | \$ | (9,944) | \$ | (19,403) |
| Cash used in investing activities | | (561) | | (426) |
| Cash provided by (used in) financing activities | | 12,387 | | (70) |
| | | | | |
| Net increase (decrease) in cash and cash equivalents | \$ | 1,882 | \$ | (19,899) |

Operating activities

Cash used in operating activities of \$9.9 million during the three months ended March 31, 2011 was primarily a result of our \$13.5 million net loss, partially offset by non-cash items of \$2.9 million and changes in operating assets and liabilities of \$0.7 million. Cash used in operating activities of \$19.4

| Table of Contents |
|---|
| million during the three months ended March 31, 2012 was primarily a result of our net loss of \$23.4 million, partially offset by non-cash items of \$2.0 million and changes in operating assets and liabilities of \$2.0 million, which includes receipt of a \$5.0 million milestone payment under our license and collaboration agreement with Sanofi. |
| Investing activities |
| Cash used in investing activities during the three months ended March 31, 2011 and 2012 was primarily due to the purchase of property and equipment. |
| Financing activities |
| Cash provided by financing activities of \$12.4 million for the three months ended March 31, 2011 was primarily a result of proceeds of \$12.5 million received for our Series G convertible preferred stock financing received in advance of the closing in April 2011. Cash used in financing activities of \$0.1 million during the three months ended March 31, 2012 was primarily a result of deferred financing costs related to the initial public offering which closed in April 2012 of \$0.2 million, partially offset by proceeds from the issuance of common stock of \$0.1 million. |
| Funding requirements |
| As of March 31, 2012, we had cash and cash equivalents of \$30.6 million. In April 2012, we closed the initial public offering of our common stock pursuant to a registration statement on Form S-1, as amended. We sold an aggregate of 15,042,459 shares of common stock under the registration statement at a public offering price of \$7.00 per share, including 742,459 shares pursuant to the exercise by the underwriters of an over-allotment option. Net proceeds were approximately \$100.5 million, after deducting underwriting discounts and commissions but prior to the payment of remaining offering expenses payable by us and accrued dividends on our Series B convertible preferred stock. |
| We have not completed development of any therapeutic products or companion diagnostics. We expect to continue to incur significant expense and increasing operating losses for at least the next several years. We anticipate that our expenses will increase substantially as we: |
| • initiate or continue clinical trials of our five most advanced product candidates; |
| continue the research and development of our other product candidates; |

seek to discover additional product candidates;

| • seek regulatory approvals for our product candidates that successfully complete clinical trials; |
|--|
| • establish a sales, marketing and distribution infrastructure and scale up manufacturing capabilities to commercialize products for which we may obtain regulatory approval; and |
| • add operational, financial and management information systems and personnel, including personnel to support our product development and planned commercialization efforts. |
| We expect that the net proceeds from our initial public offering, together with our existing cash and cash equivalents, anticipated interest income and anticipated milestone payments and development and manufacturing funding under our collaboration with Sanofi related to MM-121, will enable us to fund our operating expenses and capital expenditure requirements into the second half of 2013. We have based |
| 28 |
| |
| |
| |
| |

Table of Contents

this estimate on assumptions that may prove to be wrong, and we could use our available capital resources sooner than we currently expect. Because of the numerous risks and uncertainties associated with the development and commercialization of our product candidates, and the extent to which we enter into collaborations with third parties to participate in their development and commercialization, we are unable to estimate the amounts of increased capital outlays and operating expenditures associated with our current and anticipated clinical trials. Our future capital requirements will depend on many factors, including:

- the progress and results of the clinical trials of our five most advanced product candidates; the success of our collaborations with Sanofi related to MM-121 and PharmaEngine related to MM-398; the scope, progress, results and costs of preclinical development, laboratory testing and clinical trials for our other product candidates; the costs, timing and outcome of regulatory review of our product candidates; the costs of commercialization activities, including product sales, marketing, manufacturing and distribution; the costs of preparing, filing and prosecuting patent applications and maintaining, enforcing and defending intellectual property-related claims;
- the extent to which we acquire or invest in businesses, products and technologies; and
- our ability to establish and maintain additional collaborations on favorable terms, particularly marketing and distribution arrangements for oncology product candidates outside the United States and Europe.

Until such time, if ever, as we can generate substantial product revenues, we expect to finance our cash needs through a combination of equity offerings, debt financings, collaborations, strategic alliances, licensing arrangements and other marketing and distribution arrangements. We do not have any committed external sources of funds, other than our collaboration with Sanofi, which is terminable by Sanofi for convenience upon 180 days prior written notice. To the extent that we raise additional capital through the sale of equity or convertible debt securities, the ownership interest of our stockholders will be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect the rights of our stockholders. Debt financing, if available, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures or declaring dividends. If we raise additional funds through marketing and distribution arrangements or other collaborations, strategic alliances or licensing arrangements with third parties,

we may have to relinquish valuable rights to our technologies, future revenue streams, research programs or product candidates or to grant licenses on terms that may not be favorable to us. If we are unable to raise additional funds through equity or debt financings when needed, we may be required to delay, limit, reduce or terminate our product development or commercialization efforts or grant rights to develop and market product candidates that we would otherwise prefer to develop and market ourselves.

Table of Contents

Contractual obligations and commitments

On April 3, 2012, upon the closing of our initial public offering, we became required to pay the former holders of Series B convertible preferred stock cash dividends of approximately \$4.3 million. We expect these dividend payments will be made in the second quarter of 2012.

During the first quarter of 2012, we entered into a lease amendment to further expand our office, laboratory and manufacturing space. The amendment leases additional space for a seven year term effective March 2012. The aggregate rent due over the seven year term of the lease amendment is approximately \$2.7 million.

We and Sanofi have agreed that, during 2012 and 2013, we will reimburse Sanofi approximately \$1.2 million of previously billed amounts.

There have been no other material changes to our contractual obligations and commitments outside the ordinary course of business from those disclosed under the heading Management s Discussion and Analysis of Financial Condition and Results of Operations Contractual Obligations and Commitments in our Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC on March 30, 2012.

Off-Balance Sheet Arrangements

We did not have during the periods presented, and we do not currently have, any off-balance sheet arrangements, as defined under SEC rules.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to market risk related to changes in interest rates. Our current investment policy is to invest our cash in a variety of financial instruments, principally deposits, securities issued by the U.S. government and its agencies and money market instruments. The goals of our investment policy are preservation of capital, fulfillment of liquidity needs and fiduciary control of cash and investments. We also seek to maximize income from our investments without assuming significant risk.

Our primary exposure to market risk is interest income sensitivity, which is affected by changes in the general level of interest rates, particularly because our investments are in short-term marketable securities. Due to the short-term duration of our investment portfolio and the low risk profile of our investments, an immediate 10% change in interest rates from levels at March 31, 2012 would not have a material effect on the fair market value of our portfolio. Accordingly, we would not expect our operating results or cash flows to be affected to any significant degree by the effect of a sudden change in market interest rates on our investment portfolio.

We do not believe that our cash, cash equivalents and available-for-sale investments have significant risk of default or illiquidity. While we believe our cash, cash equivalents and available-for-sale investments do not contain excessive risk, we cannot provide absolute assurance that in the future our investments will not be subject to adverse changes in market value. In addition, we maintain significant amounts of cash and cash equivalents at one or more financial institutions that are in excess of federally insured limits.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2012. The term disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of March 31, 2012, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a 15(d) and 15d 15(d) under the Exchange Act) occurred during the three months ended March 31, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II

OTHER INFORMATION

Item 1. Legal Proceedings.

We are currently engaged in two ongoing opposition proceedings to European patents in the European Patent Office to narrow or invalidate the claims of patents owned by third parties. We have obtained favorable interim decisions in both oppositions, although both decisions are now under appeal. The ultimate outcome of these oppositions remains uncertain. In addition, we have obtained a favorable decision in a third opposition, which is longer appealable.

We filed our notice of opposition in the first proceeding, opposing a patent (EP 0896586) held by Genentech, Inc., or Genentech, in July 2007 on the grounds of added matter, insufficient disclosure, lack of novelty and lack of inventive step. Amgen and U3 Pharma also opposed the Genentech patent. If the issued claims of the Genentech patent were determined to be valid and construed to cover MM-121 or MM-111, our development and commercialization of these product candidates in Europe could be delayed or prevented. In August 2009, the European Patent Office issued a written decision rejecting several sets of Genentech s claims and upholding the patent solely on the basis of a further set of claims that we believe will not restrict the development or commercialization of MM-121 or MM-111. All parties have appealed this decision. Pending the outcome of the appeal proceedings, the original issued claims of the Genentech patent remain in effect. Each party has submitted written statements regarding the appeal to the European Patent Office. No date has been set for a hearing for the appeal.

We filed our notice of opposition in the second proceeding, opposing a patent (EP 1187634) held by Zensun (Shanghai) Science and Technology Ltd., or Zensun, in September 2008 on the grounds of added matter, insufficient disclosure, lack of novelty and lack of inventive step. If the issued claims of the Zensun patent were determined to be valid and construed to cover MM-111, our development and commercialization of MM-111 in Europe could be delayed or prevented. In August 2010, the European Patent Office issued a written decision revoking Zensun s patent. Zensun has appealed this decision. Pending the outcome of this appeal, the original issued claims of the Zensun patent remain in effect. Each party has submitted written statements regarding the appeal to the European Patent Office. No date has been set for a hearing for the appeal.

We filed our notice of opposition in the third proceeding, opposing a patent (EP 1414494) held by Max-Planck-Gesellschaft zur Forderung der Wissenschaften e.V., or Max-Planck, in December 2009 on the grounds of added matter, insufficient disclosure, lack of novelty and lack of inventive step. A number of other pharmaceutical companies are also opposing the Max-Planck patent. If the issued claims of the Max-Planck patent were determined to be valid and construed to cover MM-121, our development and commercialization of MM-121 in Europe could be delayed or prevented. In December 2011, the European Patent Office issued a written decision revoking Max-Planck s patent. Max-Planck may no longer appeal this decision.

We are not currently a party to any other material legal proceedings.

Item 1A. Risk Factors.

| Risks | Related | to Our | Financial | Position | and N | leed for . | Additional (| Capital |
|-------|---------|--------|-----------|----------|-------|------------|--------------|---------|
| | | | | | | | | |

We have incurred significant losses since our inception, which has raised substantial doubt about our ability to continue as a going concern. We expect to incur losses for the foreseeable future and may never achieve or maintain profitability.

32

Table of Contents

Since inception, we have incurred significant operating losses. Our net loss was \$23.4 million for the three months ended March 31, 2012, \$79.7 million for the year ended December 31, 2011, \$50.2 million for the year ended December 31, 2010 and \$49.1 million for the year ended December 31, 2009. As of March 31, 2012, we had an accumulated deficit of \$374.1 million. To date, we have financed our operations primarily through private placements of our convertible preferred stock, collaborations and, to a lesser extent, through government grants, the monetization of tax credits and equipment lease financings. We have devoted substantially all of our efforts to research and development, including clinical trials. We have not completed development of any therapeutic product candidates or companion diagnostics. We expect to continue to incur significant expenses and increasing operating losses for at least the next several years. We anticipate that our expenses will

| | ibstantially as we: |
|---|---|
| • | initiate or continue our clinical trials of our five most advanced product candidates; |
| • | continue the research and development of our other product candidates; |
| • | seek to discover additional product candidates; |
| • | seek regulatory approvals for our product candidates that successfully complete clinical trials; |
| • which we | establish a sales, marketing and distribution infrastructure and scale up manufacturing capabilities to commercialize products for may obtain regulatory approval; and |
| • developme | add operational, financial and management information systems and personnel, including personnel to support our product ent and planned commercialization efforts. |
| This will r and clinica selling tho | e and remain profitable, we must succeed in developing and eventually commercializing products with significant market potential. equire us to be successful in a range of challenging activities, including discovering product candidates, completing preclinical testial trials of our product candidates, obtaining regulatory approval for these product candidates and manufacturing, marketing and see products for which we may obtain regulatory approval. We are only in the preliminary stages of some of these activities. We may seed in these activities and may never generate revenues that are significant or large enough to achieve profitability. Even if we do |

ng achieve profitability, we may not be able to sustain or increase profitability on a quarterly or annual basis. Our failure to become and remain profitable would depress the value of our company and could impair our ability to raise capital, expand our business, diversify our product offerings or continue our operations. A decline in the value of our company could also cause you to lose all or part of your investment.

We will need substantial additional funding. If we are unable to raise capital when needed, we would be forced to delay, reduce or eliminate our product development programs or commercialization efforts.

We expect our research and development expenses to increase in connection with our ongoing activities, particularly as we continue the research, development and clinical trials of, and seek regulatory approval for, our product candidates. In addition, subject to obtaining regulatory approval of any of our product candidates, we expect to incur significant commercialization expenses for product sales, marketing, manufacturing and distribution. We will need substantial additional funding in connection with our continuing operations. If we are unable to raise capital when needed or on attractive terms, we would be forced to delay, reduce or eliminate our research and development programs or commercialization efforts.

| We expect that our existing cash and cash equivalents, anticipated interest income and anticipated milestone payments and research and |
|---|
| development and manufacturing funding under our license and collaboration agreement with Sanofi related to MM-121, will enable us to fund |
| our operating expenses and capital expenditure requirements into the second half of 2013. Our future capital requirements will depend on many |
| factors, including: |

the progress and results of the clinical trials of our five most advanced product candidates;
 the success of our collaborations with Sanofi related to MM-121 and PharmaEngine related to MM-398;
 the scope, progress, results and costs of preclinical development, laboratory testing and clinical trials for our other product candidates;
 the costs, timing and outcome of regulatory review of our product candidates;
 the costs of commercialization activities, including product sales, marketing, manufacturing and distribution;
 the costs of preparing, filing and prosecuting patent applications and maintaining, enforcing and defending intellectual property-related claims;
 the extent to which we acquire or invest in businesses, products and technologies; and

arrangements for oncology product candidates outside the United States and Europe.

Conducting preclinical testing and clinical trials is a time-consuming, expensive and uncertain process that takes years to complete, and we may never generate the necessary data required to obtain regulatory approval and achieve product sales. In addition, our product candidates, if approved, may not achieve commercial success. Our commercial revenues, if any, will be derived from sales of products that we do not expect to be commercially available for several years, if at all. Accordingly, we will need to continue to rely on additional financing to achieve our business objectives.

our ability to establish and maintain additional collaborations on favorable terms, particularly marketing and distribution

Raising additional capital may cause dilution to our existing stockholders, restrict our operations or require us to relinquish rights to our technologies or product candidates.

Until such time, if ever, as we can generate substantial product revenues, we expect to finance our cash needs through a combination of equity offerings, debt financings, collaborations, strategic alliances, licensing arrangements and other marketing and distribution arrangements. We do not have any committed external source of funds, other than our collaboration with Sanofi for the development and commercialization of MM-121, which is terminable by Sanofi for convenience upon 180 days prior written notice. To the extent that we raise additional capital through the sale of equity or convertible debt securities, your ownership interest will be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect your rights as a stockholder. Debt financing, if available, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures or declaring dividends. If we raise additional funds through marketing and distribution arrangements or other collaborations, strategic alliances or licensing arrangements with third parties, we may have to relinquish valuable rights to our technologies, future revenue streams, research programs or product candidates or to grant licenses

on terms that may not be favorable to us. If we are unable to raise additional funds through equity or debt financings when needed, we may be required to delay, limit, reduce or terminate our product development or commercialization efforts or grant rights to develop and market product candidates that we would otherwise prefer to develop and market ourselves.

Risks Related to the Development and Commercialization of Our Product Candidates

We depend heavily on the success of our five most advanced product candidates. All of our product candidates are still in preclinical and clinical development. Clinical trials of our product candidates may not be successful. If we are unable to commercialize our product candidates, or experience significant delays in doing so, our business will be materially harmed.

We have invested a significant portion of our efforts and financial resources in the acquisition of rights to MM-398 and the development of our four other most advanced product candidates for the treatment of various types of cancer. All of our therapeutic product candidates are still in preclinical and clinical development. Our ability to generate product revenues, which we do not expect will occur for at least the next several years, if ever, will depend heavily on the successful development and eventual commercialization of these product candidates. The success of our product candidates, which include both our therapeutic product candidates and companion diagnostic candidates, will depend on several factors, including the following:

- successful enrollment in, and completion of, preclinical studies and clinical trials;
- receipt of marketing approvals from the FDA and similar regulatory authorities outside the United States for our product candidates, including our companion diagnostics;
- establishing commercial manufacturing capabilities, either by building such facilities ourselves or making arrangements with third party manufacturers;
- launching commercial sales of the product, whether alone or in collaboration with others;
- acceptance of the product by patients, the medical community and third party payors;
- effectively competing with other therapies;

a continued acceptable safety profile of the product following approval; and

| • qualifying for, maintaining, enforcing and defending intellectual property rights and claims. |
|---|
| If we do not achieve one or more of these factors in a timely manner or at all, we could experience significant delays or an inability to successfully commercialize our product candidates, which would materially harm our business. |
| If clinical trials of our product candidates fail to demonstrate safety and efficacy to the satisfaction of the FDA or similar regulatory authorities outside the United States or do not otherwise produce positive results, we may incur additional costs or experience delays in completing, or ultimately be unable to complete, the development and commercialization of our product candidates. |
| Before obtaining regulatory approval for the sale of our product candidates, we must conduct extensive clinical trials to demonstrate the safety and efficacy of our product candidates in humans. Clinical testing is expensive, difficult to design and implement, can take many years to complete and is |
| 35 |

Table of Contents

uncertain as to outcome. A failure of one or more of our clinical trials can occur at any stage of testing. The outcome of preclinical testing and early clinical trials may not be predictive of the success of later clinical trials, and interim results of a clinical trial do not necessarily predict final results.

For example, the favorable results from a Phase 2 clinical trial of MM-398 in patients with metastatic pancreatic cancer may not be predictive of success in our Phase 3 clinical trial of MM-398 for the same indication, in particular because the trials have different efficacy endpoints and the Phase 2 trial was a single arm study that did not compare MM-398 to other therapies. Our Phase 3 trial is designed to compare the efficacy of MM-398 against a combination of 5-FU and leucovorin based on an expected efficacy endpoint of statistically significant difference in overall survival. In addition, preclinical and clinical data are often susceptible to varying interpretations and analyses, and many companies that have believed their product candidates performed satisfactorily in preclinical studies and clinical trials have nonetheless failed to obtain marketing approval of their products.

We may experience numerous unforeseen events during, or as a result of, clinical trials that could delay or prevent our ability to receive regulatory approval or commercialize our product candidates, including:

- regulators or institutional review boards may not authorize us or our investigators to commence a clinical trial or conduct a clinical trial at a prospective trial site;
- clinical trials of our product candidates may produce negative or inconclusive results, and we may decide, or regulators may require us, to conduct additional clinical trials or abandon product development programs;
- the number of patients required for clinical trials of our product candidates may be larger than we anticipate, enrollment in these clinical trials may be insufficient or slower than we anticipate or patients may drop out of these clinical trials at a higher rate than we anticipate;
- our third party contractors may fail to comply with regulatory requirements or meet their contractual obligations to us in a timely manner, or at all;
- we might have to suspend or terminate clinical trials of our product candidates for various reasons, including a finding that the patients are being exposed to unacceptable health risks;
- regulators or institutional review boards may require that we or our investigators suspend or terminate clinical research for various reasons, including noncompliance with regulatory requirements;
