Notes to Schedule of Investments:

\*Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation

## Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-Q

reporting system, established market makers, or independent pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available, or for which a development/event occurs that may significantly impact the value of a security are fair-valued, in good faith, pursuant to procedures approved by the Board of Trustees, or persons acting at their discretion pursuant to procedures approved by the Board of Trustees. The Fund's investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold, and these differences could be material. The Fund's net asset value ( NAV ) is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange ( NYSE ) on each day the NYSE is open for business.

---

## Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-Q

- (a) All or partial amount segregated for the benefit of the counterparty as collateral for call options written.
- (b) Non-income producing.
- (c) Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate market value of \$74,265,657, representing 4.4% of net assets.
- (d) 144A Exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
- (e) Step Bond Coupon is a fixed rate for an initial period then resets at a specific date and rate.
- (f) Perpetual maturity. Maturity date shown is the next call date.
- (g) At April 30, 2012, the cost basis of portfolio securities (before call options written) for federal income tax purposes was \$1,892,236,739. Gross unrealized appreciation was \$85,024,792, gross unrealized depreciation was \$276,885,989 and net unrealized depreciation was \$191,861,197. The difference between book and tax cost basis was attributable to wash sale loss deferrals.

### **Glossary:**

ADR American Depositary Receipt

### **Other Investments:**

Transactions in call options written for the three months ended April 30, 2012:

	<b>Contracts</b>	<b>Premiums</b>
Options outstanding, January 31, 2012	62,685	\$14,705,028
Options written	88,255	24,675,435
Options terminated in closing purchase transactions	(76,075)	(17,468,658)
Options expired	(16,725)	(6,793,825)
Options outstanding, April 30, 2012	58,140	\$15,117,980

### **Fair Value Measurements**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

- Level 1 quoted prices in active markets for identical investments that the Fund has the ability to access
- Level 2 valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.) or quotes from inactive exchanges
- Level 3 valuations based on significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

## Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-Q

An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in the aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used.

The valuation techniques used by the Fund to measure fair value during the three months ended April 30, 2012 maximized the use of observable inputs and minimized the use of unobservable inputs.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Fund generally uses to evaluate how to classify each major category of assets and liabilities for Level 2 and Level 3, in accordance with Generally Accepted Accounting Principles.

Equity Securities (Common and Preferred Stock) Equity securities traded in inactive markets are valued using inputs which include broker-dealer quotes, recently executed transactions adjusted for changes in the benchmark index, or evaluated price quotes received from independent pricing services that take into account the integrity of the market sector and issuer, the individual characteristics of the security, and information received from broker-dealers and other market sources pertaining to the issuer or security. To the extent that these inputs are observable, the values of equity securities are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

Convertible Bonds & Notes Convertible bonds & notes are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of convertible bonds & notes are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

---

Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-Q

**Option Contracts** Option contracts traded over the counter ( OTC ) are valued by independent pricing services based on pricing models that incorporate various inputs such as interest rates, credit spreads, currency exchange rates and volatility measurements for in-the-money, at-the-money, and out-of-the-money contracts based on a given strike price. To the extent that these inputs are observable, the values of OTC option contracts are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

The Fund's policy is to recognize transfers between levels at the end of the reporting period.

A summary of the inputs used at April 30, 2012 in valuing the Fund's assets and liabilities is listed below (refer to the Schedule of Investments for more detailed information on Investments in Securities):

	Level 1 - Quoted Prices	Level 2 - Other Significant Observable Inputs	Level 3 - Significant Unobservable Inputs	Value at 4/30/12
<b>Investments in Securities - Assets</b>
