**Item 2.01 Completion of Acquisition or Disposition of Assets.**

On April 1, 2013, LRR Energy, L.P. (the Partnership) closed its previously announced acquisition (the Acquisition) of oil and natural gas properties located in the Mid-Continent region in Oklahoma and crude oil hedges from the Seller (as defined below) for a purchase price of \$38.2 million in cash, subject to customary purchase price adjustments, pursuant to a Purchase and Sale Agreement (Purchase Agreement), dated March 18, 2013, by and among Lime Rock Resources II-A, L.P. and Lime Rock Resources II-C, L.P. (collectively, Seller), and the Partnership and LRE Operating, LLC (collectively, Purchaser).

The total estimated proved reserves attributable to the properties, based on the unweighted arithmetic average first-day-of-the-month oil and natural gas prices for the twelve-month period ended December 2012 and an effective date of April 1, 2013, were approximately 1,655 MBoe, of which approximately 84% were oil and 100% were classified as proved developed producing reserves. The average net production associated with the properties as of the date of the execution of the Purchase Agreement was approximately 335 Boe/d, implying a reserve-to-production ratio of 13.5 years. There are approximately 315 producing wells on the properties, none of which are operated, and the properties have a three-year average annual proved developed producing production decline rate of 6%. The Partnership estimates that annual maintenance capital expenditures associated with the properties will be \$1.1 million, and the Partnership estimates that these properties will provide annualized cash flow from operations of approximately \$6.1 million during 2013. Please see Forward-Looking Statements below.

The foregoing description is not complete and is qualified in its entirety by reference to the full text of the Purchase Agreement, which is filed as Exhibit 2.1 to this Current Report on Form 8-K and incorporated herein by reference.
