Nokia reporting structure

To date, NSN has been reported as a single reportable segment for Nokia financial reporting purposes. During Q3 2013, Nokia acquired Siemens stake in NSN and as a result, NSN is a wholly owned subsidiary of Nokia. Consequently, beginning with this interim report, Nokia reports financial information for two operating and reportable segments within NSN - Mobile Broadband and Global Services - which reflects how Nokia management is reviewing the NSN financial information following the completion of the transaction. As a result, in its interim report, Nokia will be presenting financial information for a total of five operating and reportable segments: Smart Devices and Mobile Phones within Devices & Services; HERE; and Mobile Broadband and Global Services within NSN.

NSN standalone interim report

As previously announced, as a result of the debt securities NSN issued in March 2013, NSN is

committed to making certain financial data publicly available through its standalone reporting format. Consequently, NSN also plans to publish its standalone third quarter 2013 and January-September 2013 interim report on October 29, 2013 at approximately 1.30pm Finnish time. The report will also be made available on NSN's website at: www.nsn.com/about-us/company/financial/financial-results.

The reported financial results presented on a standalone basis by NSN may differ from those reported by Nokia due to the treatment of discontinued operations and certain accounting presentation differences. In addition, the presentation of underlying business performance information by Nokia and NSN differs due to presentation differences adopted by Nokia (non-IFRS information) and NSN (information before specific items) and the items excluded by each in their respective presentations.
