-

**ITEM 1.04 Mine Safety Reporting of Shutdowns and Patterns of Violations**

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) was enacted. Section 1503 of the Act included new reporting requirements related to mine safety, including disclosing on a Current Report on Form 8-K the receipt of an imminent danger order under Section 107 (a) of the Federal Mine Safety and Health Act of 1977 ( the Mine Act ) issued by the federal Mine Safety and Health Administration ( MSHA ).

On Tuesday, October 7, 2014, at approximately 12:47 p.m., Central Time, Hopkins County Coal, LLC ( HCC ), an operating subsidiary of the Partnership, received an imminent danger order under Section 107(a) of the Mine Act at the Elk Creek Mine. The Order was issued when a representative of MSHA alleged the existence of excessive methane within a discrete area located near a set of 120 psi seals. The seals are used to separate older, previously mined areas from areas actively being mined for coal. No miners were injured as a result of any of the conditions alleged in the Order. HCC adjusted ventilation controls within the area and the Order was terminated. HCC is reviewing MSHA s Order and may seek judicial review of its issuance.

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
