**Risk Factors**

## Edgar Filing: CANADIAN IMPERIAL BANK OF COMMERCE /CAN/ - Form FWP

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

- Depending on the performance of the Market Measure as measured shortly before the maturity date, you may lose up to 85% of the principal amount of the notes.
- Payments on the notes, including repayment of principal, are subject to the credit risk of CIBC, and actual or perceived changes in the creditworthiness of CIBC are expected to affect the value of the notes. If CIBC becomes insolvent or is unable to pay its obligations, you may lose your entire investment.
- Your potential for a positive return based on the depreciation of the Basket is limited. The absolute value return feature applies only if the Ending Value is greater than the Starting Value but greater than or equal to the Threshold Value. Because the Threshold Value is 85% of the Starting Value, any positive return due to depreciation of the Basket is limited to 15%. Any decline in the Ending Value from the Starting Value by more than 15% will result in a loss, rather than a positive return, on the notes.
- The initial estimated value of the notes on the pricing date will be less than their public offering price.
- If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.
- Changes in the level of one of the Basket Components may be offset by changes in the level of the other Basket Components.
- You will have no rights of a holder of the securities included in the Basket Components, and you will not be entitled to receive securities or dividend distributions by the issuers of those securities.
- Your return on the notes may be affected by factors affecting the international securities markets, specifically markets in the countries represented in the Basket Components. In addition, you will not obtain the benefit of any increase in the value of the currencies in which the securities in the Basket Components are denominated against the U.S. dollar which you would have received if you had owned the securities in the Basket Components during the term of your notes, although the value of the Basket may be adversely affected by general exchange rate movements in the market.

*Final terms will be set on the pricing date within the given range for the specified Market-Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure.*
