Press Release:

PNM Resources Updates 2002 Earnings Guidance, Provides Guidance for 2003

ALBUQUERQUE, N.M., January 2, 2003- PNM Resources (NYSE:PNM) today announced it is lowering its 2002 earnings guidance. The company now expects 2002 operating earnings will be about \$1.80 per share, not including a one-time charge against earnings of \$0.14 per share reported in the third quarter. The company's previous estimate for 2002 ongoing earnings was \$1.90 to \$2.10 per share.

The company cited three factors that have had a negative impact on 2002 earnings:

- o Unexpected outages in December at the Four Corners Power Plant caused an increase in operating expenses and a shortfall in PNM wholesale revenues. The company has a 13 percent ownership interest in Units 4 and 5 of the Four Corners plant.
- o Higher than anticipated final transition costs for the changeover from a surface to an underground coal mining operation to serve the company's San Juan Generating Station. The new underground mine entered full commercial operation in the fourth quarter 2002.
- o Relatively mild weather in the company's New Mexico service territory during late November and early December.

In 2003, PNM Resources expects to earn between \$1.80 and \$2.05 per share for the year. The company expects that 2003 earnings will benefit from lower fuel costs stemming from reduced coal costs for San Juan Generating Station. Earnings in 2003 are also expected to benefit from increased revenues due to new and expanded long-term wholesale power contracts and continued load growth in the PNM New Mexico service territory.

The company expects that 2003 earnings will be reduced by a proposed decrease in retail electric rates now under consideration by the New Mexico Public Regulation Commission, by increased pension and healthcare costs, and by the impact of inflation.

PNM Resources is an energy holding company based in Albuquerque, New Mexico. PNM, the principal subsidiary of PNM Resources, provides natural gas service to 441,000 gas customers and electric utility service to 378,000 customers in New Mexico. The company also sells power on the wholesale market in the Western U.S. PNM Resources stock is traded primarily on the NYSE under the symbol PNM.
