NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000's omitted in tables except for per share data)

1. Basis of presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB and Item 310 of Regulation S-B. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements.

The accompanying consolidated financial statements reflect all adjustments which are, in the opinion of management, necessary for a fair statement of the results for the interim periods presented. All such adjustments are of a normal recurring nature. Operating results for the three months ended March 31, 2006 are not necessarily indicative of the results that may be expected for the year ended December 31, 2006. The consolidated financial statements should be read in conjunction with the annual report and the notes thereto.

2. Summary of significant accounting policies

Principles of consolidation

The consolidated financial statements include the accounts of Servotronics, Inc. and its wholly-owned subsidiaries (the "Company").

Cash and cash equivalents

The Company considers cash and cash equivalents to include all cash accounts and short-term investments purchased with an original maturity of three months or less.

Revenue recognition

Revenues are recognized as services are rendered or as units are shipped

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB

and at the designated FOB point consistent with the transfer of title, risks and rewards of ownership. Such purchase orders generally include specific terms relative to quantity, item description, specifications, price, customer responsibility for in-process costs, delivery schedule, shipping point, payment and other standard terms and conditions of purchase and may provide for progress payments based on in-process costs as they are incurred.

Inventories

Inventories are stated at the lower of standard cost or net realizable value. Cost includes all cost incurred to bring each product to its present location and condition, which approximates actual cost (first-in, first-out). Market provisions in respect of net realizable value and obsolescence are applied to the gross value of the inventory. Pre-production and start-up costs are expensed as incurred.

Shipping and handling costs

Shipping and handling costs are classified as a component of cost of goods sold.

Property, plant and equipment

Property, plant and equipment is carried at cost; expenditures for new facilities and equipment, and expenditures which substantially increase the useful lives of existing plant and equipment are capitalized; expenditures for maintenance and repairs are expensed as incurred. Upon disposal of properties, the related cost and accumulated depreciation are removed from the respective accounts and any profit or loss on disposition is included in income.

- 6 -

Depreciation is provided on the basis of estimated useful lives of depreciable properties, primarily by the straight-line method for financial statement purposes and by accelerated methods for tax purposes. Depreciation expense includes the amortization of capital lease assets. The estimated useful lives of depreciable properties are generally as follows:

Buildings and improvements	5-39 years
Machinery and equipment	5-15 years
Tooling	3-5 years

Income taxes

The Company accounts for income taxes in accordance with SFAS No. 109, "Accounting for Income Taxes". SFAS No. 109 requires the recognition of deferred tax liabilities and assets for the expected future tax consequences of operating loss and credit carryforwards and temporary differences between the carrying amounts and the tax bases of assets and liabilities. The Company and its subsidiaries file a consolidated federal income tax return and separate state income tax returns.

Employee stock ownership plan

Contributions to the employee stock ownership plan are determined annually by the Company according to plan formula.

Impairment of long-lived assets

The Company reviews long-lived assets for impairment whenever events or changes in business circumstances indicate that the carrying amount of the assets may not be fully recoverable based on undiscounted future operating cash

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB

flow analyses. If an impairment is determined to exist, any related impairment loss is calculated based on fair value. Impairment losses on assets to be disposed of, if any, are based on the estimated proceeds to be received, less costs of disposal.

Use of estimates

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

New accounting pronouncements

During the year ended December 31, 2005, the Financial Accounting Standards Board (FASB) issued a revision to SFAS 123 entitled SFAS 123 R - "Share-Based Payment", requiring companies to include the fair value of stock options granted as an expense in the statement of operations. This revision became effective and was adopted by the Company on January 1, 2006. See note 6, Common shareholders' equity.

During the year ended December 31, 2004, the FASB issued SFAS 151, "Inventory Costs". This Statement amends the guidance in Accounting Research Bulletin (ARB) No. 43, Chapter 4, "Inventory Pricing", to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). SFAS 151 requires that those items be recognized as current-period charges regardless of whether they meet the criterion of "abnormal". In addition, this Statement requires that allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. Statement 151 is effective for inventory costs incurred during fiscal years beginning after June 15, 2005, with earlier application permitted in certain circumstances. The Company adopted SFAS 151 on January 1, 2006 and the adoption of this new standard did not have a significant impact on the Company's consolidated financial statements.

- 7 -

Risk Factors

The aviation and aerospace industries as well as markets for the Company's consumer products are facing new and evolving challenges on a global basis. The success of the Company depends upon the trends of the economy, including interest rates, income tax laws, governmental regulation, legislation, and other risk factors. In addition, uncertainties in today's global economy, competition from expanding manufacturing capabilities and technical sophistication of low-cost developing countries, particularly in South and East Asia, currency policies in relation to the U.S. dollar of some major foreign exporting countries so as to maintain or increase a pricing advantage of their exports vis-a-vis U.S. manufactured goods, the effect of terrorism, difficulty in predicting defense and other government appropriations, the vitality of the commercial aviation industry and its ability to purchase new aircraft, the willingness and ability of the Company's customers to fund long-term purchase programs, volatile market demand and the continued market acceptance of the Company's advanced technology and cutlery products make it difficult to predict the impact on future financial results.

Fair Value of Financial Instruments

The carrying amount of cash and cash equivalents, accounts receivable, inventories, accounts payable and accrued expenses are reasonable estimates of

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB

their fair value due to their short maturity. Based on variable interest rates and the borrowing rates currently available to the Company for loans similar to its long-term debt, the fair value approximates its carrying amount.

3. Inventories

	March 31, 2006

Raw materials and common parts	\$ 2,719
Work-in-process	4,098
Finished goods	930

	7,747
Less common parts expected to be used after one year (classified as long-term)	(269)

	\$ 7,478
	=====

4. Property, plant and equipment

	March 31, 2006

Land	\$ 25
Buildings	6,537
Machinery, equipment and tooling	10,772

	17,334
Less accumulated depreciation and amortization	(11,179)

	\$ 6,155
	=====

Property, plant and equipment includes land and building under a \$5,000,000 capital lease which can be purchased for a nominal amount at the end of the lease term. As of March 31, 2006, accumulated amortization on the building amounted to approximately \$1,600,000. The associated current and long-term liabilities are discussed in footnote 5 to the consolidated financial statements. The Company believes that it maintains property and casualty insurance in amounts adequate for the risk and nature of its assets and operations and which are generally customary in its industry.

- 8 -

5. Long-term debt

	March 31, 2006

Industrial Development Revenue Bonds; secured by an equivalent letter of credit from a bank with interest payable monthly at a floating rate (3.39% at March 31, 2006) (A)	\$ 3,980
Term loan payable to a financial institution; interest at LIBOR plus 2% (6.00% at March 31, 2006); quarterly principal payments of \$17,500 commencing January 1, 2005; payable in full in the fourth quarter of 2009	413

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB

Term loan payable to a financial institution; interest at LIBOR plus 2% (6.41% at March 31, 2006) quarterly principal payments of \$26,786 through the fourth quarter of 2011	616
Secured term loan payable to a government agency; monthly payments of approximately \$1,455 with interest waived payable through second quarter of 2012	140
Secured term loan payable to a government agency; monthly payments of \$1,950 including interest fixed at 3% payable through fourth quarter of 2015	196

	5,345
Less current portion	(382)

	\$ 4,963
	=====

(A) Industrial Development Revenue Bonds were issued by a government agency to finance the construction of the Company's headquarters/Advanced Technology facility. Annual sinking fund payments of \$170,000 commenced December 1, 2000 and continue through 2013, with a final payment of \$2,620,000 due December 1, 2014. The Company has agreed to reimburse the issuer of the letter of credit if there are draws on that letter of credit. The Company pays the letter of credit bank an annual fee of 1% of the amount secured thereby and pays the remarketing agent for the bonds an annual fee of .25% of the principal amount outstanding. The Company's interest under the facility capital lease has been pledged to secure its obligations to the government agency, the bank and the bondholders.

The Company also has a \$1,000,000 line of credit on which there is no balance outstanding at March 31, 2006.

Certain lenders require the Company to comply with debt covenants as described in the specific loan documents, including a debt service ratio. At March 31, 2006, the Company was in compliance with all of its debt covenants.

Balance March 31, 2006	2,614,506	\$523	\$13,033	\$3,880	(\$ 2,034)	(\$ 786)	
	=====						

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB

In January of 2006, the Company's Board of Directors authorized the purchase by the Company of up to 250,000 shares of its common stock in the open market or in privately negotiated transactions. As of March 31, 2006, the Company has purchased, or committed to purchase, 81,557 shares under this program.

In December 2004, the Financial Accounting Standards Board issued SFAS 123R, Share-Based Payment ("SFAS 123R"). SFAS 123R supersedes SFAS 123, Accounting for Stock Based Compensation, and Accounting Principles Board Opinion 25, Accounting for Stock Issued to Employees ("APB 25") and its related implementation guidance. On January 1, 2006, the Company adopted the provisions of SFAS 123R using the modified prospective transition method. Under this method, the Company is required to record compensation expense for all stock based awards granted after the date of adoption and for the unvested portion of previously granted awards that remain outstanding as of the beginning of the adoption and prior periods that have not been restated. Under SFAS 123R, compensation expense related to stock based payments are recorded over the requisite service period based on the grant date fair value of the awards.

Prior to the adoption of SFAS 123R, the Company accounted for employee stock options using the intrinsic value method in accordance with APB 25. Accordingly, no compensation expense was recognized for stock options issued to employees as long as the exercise price is greater than or equal to the market value of the common stock at the date of grant. In accordance with SFAS 123, the Company disclosed the summary of pro forma effects to reported net loss as if the Company had elected to recognize compensation costs based on the fair value of the awards at the grant date.

There were no options granted or exercised in the three month periods ended March 31, 2006 or 2005. As of March 31, 2006, there was \$3,900 of total unrecognized compensation cost related to non-vested options granted under the plan. That cost is expected to be recognized over a weighted average period of three years. No shares vested during the three month periods ended March 31, 2006 or 2005. The pro forma effect on earnings for the three month period ended March 31, 2005 had the Company accounted for options under the fair value method in accordance with FAS 123R was not material.

- 10 -

Earnings per share

Basic earnings per share are computed by dividing net earnings by the weighted average number of shares outstanding during the period. Diluted earnings per share are computed by dividing net earnings by the weighted average number of shares outstanding during the period plus the number of shares of common stock that would be issued assuming all contingently issuable shares having a dilutive effect on earnings per share were outstanding for the period. Incremental shares from assumed conversions are calculated as the number of shares that would be issued, net of the number of shares that could be purchased in the marketplace with the cash received upon stock option exercise.

	Three Months Ended March 31,

	=====	=====

7. Business segments

The Company operates in two business segments, Advanced Technology Group (ATG) and Consumer Products Group (CPG). The Company's reportable segments are strategic business units that offer different products and services. The segments are composed of separate corporations and are managed separately. Operations in ATG involve the design, manufacture, and marketing of servo-control components (i.e., control valves, actuators, etc.) for government, commercial and industrial applications. CPG's operations involve the design, manufacture and marketing of a variety of cutlery products for use by consumers and government agencies. The Company derives its primary sales revenue from domestic customers, although a significant portion of finished products are for foreign end use.

Management Discussion

During the three month period ended March 31, 2006 and for the comparable period ended March 31, 2005, approximately 28% and 45% respectively, of the Company's revenues were derived from contracts with agencies of the U.S. Government or their prime contractors and their subcontractors. Sales of products sold for government applications have decreased as the result of the previously reported scheduled completion of a significant order to the CPG. The Company believes that government involvement in military operations overseas will continue to have a direct impact on the financial results in both the Advanced Technology and Consumer Products markets. While the Company remains optimistic in relation to these opportunities, it recognizes that sales to the government are affected by defense budgets, the foreign policies of the U.S. and other nations, the level of military operations and other factors and, as such, it is difficult to predict the impact on future financial results. The Company's commercial business is affected by such factors as uncertainties in today's global economy, global competition, the vitality and ability of the commercial aviation industry to purchase new aircraft, market demand and acceptance both for the Company's products and its customers' products which incorporate Company-made components.

Results of Operations

The following table sets forth for the period indicated the percentage relationship of certain items in the consolidated statement of operations to net revenues, and the period to period dollar and percentage increase or decrease of such items as compared to the indicated prior period.

	Relationship to net revenues		Period to period \$ increase (decrease)
	three months ended March 31,		
	2006	2005	06-05

	2.9	1.4	83
	---	---	--
Net income	4.8%	2.4%	\$ 140
	===	===	=====

The Company's consolidated net revenues for the three month period ended

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB

March 31, 2006 remained consistent when compared to the same three month period of 2005. Revenues at the Company's ATG increased by approximately \$836,000. Such increases are attributed to an increase in commercial shipments and price increases under certain long-term agreements. Revenues at the Company's CPG decreased by approximately \$841,000, primarily due to a decrease in government shipments as the result of the aforementioned scheduled completion of a significant government order.

Gross margins for the three month period ended March 31, 2006 increased as a percentage of sales when compared to the same period in 2005 primarily due to the mix of products sold in the comparable periods with a larger percentage of sales coming from the ATG.

- 12 -

Selling, general and administrative (SG&A) costs decreased approximately 12.1% when compared to the same three month period in 2005. This decrease is primarily due to cost containment efforts for variable administrative related expenses. These cost efforts include, but are not limited to, a restructure of the administrative organization and procedure enhancements.

Interest expense increased for the quarter ended March 31, 2006 when compared to the same period in 2005 due to an increase in market driven interest rates.

The Company's effective tax rate continues to be approximately 37% of pretax profits.

Net income increased \$140,000 due to the positive effects of increases in profit margin, price increases, successful cost containment activities and net proceeds received related to the previously reported defalcation.

Liquidity and Capital Resources

The Company's primary liquidity and capital requirements relate to the Company's working capital needs; primarily inventory, accounts receivable, capital investments in facilities, machinery, tools/dies and equipment and principal/interest payments on indebtedness. The Company had a use of cash of \$627,000 from operations which was primarily related to the payment of income taxes and the increase in inventory levels. A significant part of the inventory increase is associated with U. S. Government Purchase orders that were shipped before the end of the first quarter but because they were not yet received at the U. S. government F.O.B. destination until after March 31, 2006, they were, consistent with accounting pronouncements, classified as inventory in lieu of accounts receivable at March 31, 2006. Also, certain current government contracts required significant deliveries of raw material (i.e., steel, etc.) and certain custom made parts in quantities that support extended periods of production. These factors combine to represent 75% of the net inventory increase. At March 31, 2006 the Company has working capital of approximately \$13.4 million of which \$3.6 million was comprised of cash and cash equivalents.

As of March 31, 2006 there are no material commitments for capital expenditures.

The Company also has a \$1,000,000 line of credit on which there was no balance outstanding at March 31, 2006. The Company's projected debt maturities are consistent with prior years.

In January of 2006, the Company's Board of Directors authorized the purchase by the Company of up to 250,000 shares of its common stock in the open market or in privately negotiated transactions. As of March 31, 2006, the Company has purchased, or committed to purchase, 81,557 shares under this

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB

program. The Company has financed this purchase program through its cash reserves.

Item 3. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

The Company carried out an evaluation under the supervision and with the participation of its management, including the Company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the Company's disclosure controls and procedures as of March 31, 2006. Based upon that evaluation, the CEO and CFO concluded that the Company's disclosure controls and procedures are effective in timely alerting them to the material information relating to the Company (or the Company's consolidated subsidiaries) required to be included in the Company's periodic filings with the SEC, such that the information relating to the Company, required to be disclosed in SEC reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

- 13 -

(b) Changes in Internal Controls

During the three month period ended March 31, 2006, there were no changes in internal controls over financial reporting that have materially affected, or is reasonably likely to affect, our internal control over financial reporting.

| 32.2 | Certification of Chief Executive Officer pursuant to 18 U.S.C. 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |

FORWARD-LOOKING STATEMENTS

In addition to historical information, certain sections of this Form 10-QSB contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, such as those pertaining to the Company's capital resources and profitability. Forward-looking statements involve numerous risks and uncertainties. The Company derives a material portion of its revenues from contracts with agencies of the U.S. Government or their prime contractors. The Company's business is performed under fixed price contracts and the following factors, among others discussed herein, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: uncertainties in today's global economy and global competition, and difficulty in predicting defense appropriations, the vitality of the commercial aviation industry and its ability to purchase new aircraft, the willingness and ability of the Company's customers to fund long-term purchase programs, and market demand and acceptance both for the Company's products and its customers' products which incorporate Company-made components. The success of the Company also depends upon the trends of the economy, including interest rates, income tax laws, governmental regulation, legislation, population changes and those risk factors discussed elsewhere in this Form 10-QSB. Readers are cautioned not to place undue reliance on forward-looking statements, which reflect management's analysis only as of the date hereof. The Company assumes no obligation to update forward-looking statements.
