RECONCILIATION OF CANADIAN GAAP TO UNITED STATES GAAP

The Company means Shaw Communications Inc. and its subsidiaries.

The annual consolidated financial statements of the Company are prepared in Canadian dollars in accordance with Canadian generally accepted accounting principles (GAAP). This reconciliation of Canadian GAAP to US GAAP should be read in conjunction with the Company's annual consolidated financial statements for the year ended August 31, 2008. The following adjustments and disclosures would be required in order to present the annual consolidated financial statements in accordance with US GAAP.

(a) Reconciliation to US GAAP

Total shareholders' equity	2,255,192	2,076,929	1,994,040	1,756,462

The cumulative effect of these adjustments on consolidated shareholders' equity is as follows:

	2008 \$	2007 \$
Shareholders' equity using Canadian GAAP	2,255,192	1,994,040
Amortization of intangible assets (1)	(130,208)	(130,208)

Capitalized interest (11)	4,623	1,566
Income taxes (12) (13)	9,930	(8,068)
Accumulated other comprehensive loss	(73,024)	(127,058)
Shareholders' equity using US GAAP	2,076,929	1,756,462

Under US GAAP, additional amounts are recorded in other comprehensive income (loss). The Company's accumulated other comprehensive loss is comprised of the following:

2008 \$	2007 \$
------------	------------

Edgar Filing: SHAW COMMUNICATIONS INC - Form 6-K

Fair value of derivatives (8)		(57,169)
Pension liability (10)	(73,024)	(69,889)
Accumulated other comprehensive loss	(73,024)	(127,058)

Areas of material difference between Canadian and US GAAP and their impact on the consolidated financial statements are as follows:

(1) Amortization of intangible assets

Until September 1, 2001, under Canadian GAAP amounts allocated to broadcast rights were amortized using an increasing charge method which commenced in 1992. Under US GAAP, these intangibles were amortized

on a straight-line basis over 40 years. Effective September 1, 2001, broadcast rights are considered to have an indefinite life and are no longer amortized under Canadian and US GAAP.

(2) Deferred charges and credits

The excess of equipment costs over equipment revenues are deferred and amortized under Canadian GAAP. Under US GAAP, these costs are expensed as incurred.

For US GAAP, transaction costs, financing costs and proceeds on bond forward contracts associated with the issuance of debt securities and fair value adjustments on debt assumed in business acquisitions are recorded as deferred charges and deferred credits and amortized to income on a straight-line basis over the period to maturity of the related debt. Effective September 1, 2007 for Canadian GAAP, such amounts are recorded as part of the principal balance of debt and amortized to income using the effective interest rate method.

(3) Foreign exchange gains on hedged long-term debt

Until September 1, 2007, foreign exchange gains on translation of hedged long-term debt were deferred under Canadian GAAP but included in income for US GAAP. Effective September 1, 2007, these foreign exchange gains are included in income for Canadian GAAP.

(4) Equity in loss of investees

The earnings of investees determined under Canadian GAAP have been adjusted to reflect US GAAP. Under Canadian GAAP, the investment in Star Choice was accounted for using the cost method until CRTC approval was received for the acquisition. When the Company received CRTC approval, the amount determined under the cost method became the basis for the purchase price allocation and equity accounting commenced. Under US GAAP, equity accounting for the investment was applied retroactively to the date the Company first acquired shares in Star Choice.

(5) Gain on sale of subsidiary

In 1997, the Company acquired a 54% interest in Star Choice in exchange for the shares of HomeStar Services Inc., a wholly-owned subsidiary at that time. Under Canadian GAAP, the acquisition of the investment in Star Choice was a non-monetary transaction that did not result in the culmination of the earnings process, as it was an exchange of control over similar productive assets. As a result, the carrying value of the Star Choice investment was recorded at the book value of assets provided as consideration on the transaction. Under US GAAP, the transaction would have been recorded at the fair value of the shares in HomeStar Services Inc. This would have resulted in a gain on disposition of the consideration the Company exchanged for its investment in Star Choice and an increase in the acquisition cost for Star Choice.

(6) Gain on sale of cable systems

The gain on sale of cable systems determined under Canadian GAAP has been adjusted to reflect the lower net book value of broadcast rights under US GAAP as a result of item (1) adjustments.

Under Canadian GAAP, no gain was recorded in 1995 on an exchange of cable systems with Rogers Communications Inc. on the basis that this was an exchange of similar productive assets. Under US GAAP the gain net of applicable taxes is recorded and amortization adjusted as a result of the increase in broadcast rights upon the recognition of the gain.

(7) Gains (losses) on investments

Under US GAAP, equity securities having a readily determinable fair value and not classified as trading securities are classified as available-for-sale securities and reported at fair value, with unrealized gains and losses included in comprehensive income and reported as a separate component of shareholders' equity net of related future income taxes. Gains and losses on the sale of available-for-sale securities are determined using

the specific identification method. Declines in the fair value of individual available-for-sale securities below their cost that are other than temporary result in write-downs of the individual securities to their fair value. The related write-downs are included in earnings as realized losses.

Until September 1, 2007, under Canadian GAAP, available-for-sale securities were carried at cost and written down only when there was evidence that a decline in value, that was other than temporary, had occurred.

(8) Derivative instruments and hedging activities

Under US GAAP, all derivatives are recognized in the Consolidated Balance Sheet at fair value. Derivatives that are not hedges are adjusted to fair value through income. Derivatives that are hedges are adjusted through income or other comprehensive income until the hedged item is recognized in income depending on the nature of the hedge.

Until September 1, 2007 under Canadian GAAP, only speculative derivative financial instruments and those that did not qualify for hedge accounting were recognized in the Consolidated Balance Sheet.

(9) Subscriber connection fee revenue and related costs

Subscriber connection fee revenue and related costs are deferred and amortized under Canadian GAAP. Under US GAAP, connection revenues are recognized immediately to the extent of related costs, with any excess deferred and amortized.

(10) Pension liability

Effective August 31, 2007, the Company adopted FASB Statement No. 158 Employers Accounting for Defined Benefit Pension and Other Postretirement Benefit Plans . Under Statement No. 158, the Company is required to recognize the funded status of the non-contributory defined benefit pension plan on the Consolidated Balance Sheet and to recognize changes in the funded status in other comprehensive income (loss).

Prior to the adoption of Statement No. 158, an additional minimum liability was recorded for the difference between the accumulated benefit obligation and the accrued pension liability. The additional liability was offset in deferred charges up to an amount not exceeding the unamortized past service costs and the remaining difference was recognized in other comprehensive income, net of tax.

Under Canadian GAAP, the over or under funded status of defined benefit plans is not recognized on the Consolidated Balance Sheet.

(11) Under US GAAP, interest costs are capitalized as part of the historical cost of acquiring certain qualifying assets which require a period of time to prepare for their intended use. Interest capitalization is not required under Canadian GAAP.

(12) Income taxes reflects the impact of future income tax rate reductions on the differences identified above and an adjustment for the tax benefit related to capital losses that cannot be recognized for US GAAP.

(13) The Company adopted FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No 109 effective September 1, 2007. This interpretation clarifies the accounting for uncertainty in income taxes by prescribing a minimum recognition threshold that a tax position is required to meet before being recognized for US GAAP. The adoption of this interpretation did not have a

material impact on the results of the Company for US GAAP purposes. The Company records interest and penalties related to income tax positions in income tax expense. The Company and its subsidiaries file income tax returns in either Canadian federal and provincial jurisdictions or United States federal and state jurisdictions. With few exceptions, the Company is no longer subject to income tax examinations for the years before 1998.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2008
	\$
September 1, 2007	25,600
Decrease for tax positions related to prior years	(2,600)
Increase for tax positions related to current year	2,400
August 31, 2008	25,400

(b) Stock-based compensation

For all common share options granted to employees up to August 31, 2003 the Company applied APB Opinion 25

Accounting for Stock Issued to Employees in accounting for common share options granted to employees and officers for US GAAP purposes. Pro forma disclosures of net income and net income per share are presented below as if the Company had adopted the cost recognition requirements under FASB Statement No. 123, Accounting for Stock-Based Compensation. Pro forma disclosures are not likely to be representative of the effects on reported income for future years.

		2007	2006
		\$	\$
Net income, US GAAP	As reported	385,934	464,622
	Pro forma	385,815	462,752
Net income per share, US GAAP	As reported	0.89	1.07
	Pro forma	0.89	1.06

(c) Advertising costs

Advertising costs are expensed when incurred for both Canadian and US GAAP and for 2008, amounted to \$47,656 (2007 \$43,210; 2006 \$35,464).

(d) Recent accounting pronouncements

(i) Fair Value Measurements

In September 2006, the FASB issued SFAS No. 157 Fair Value Measurements. This statement provides a common definition of fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, this Statement does not require any new fair value measurements. SFAS 157 is effective for the Company's 2009 fiscal year. The Company is currently assessing the impact of the adoption of this new accounting standard.

(ii) Business Combinations

In December 2007, the FASB issued SFAS 141R Business Combinations. This revised statement requires assets and liabilities acquired in a business combination, contingent consideration, and certain acquired contingencies to be measured at their fair values as of the date of acquisition. In addition, acquisition-related and restructuring costs are to be recognized separately from the business combination. SFAS 141R will impact the accounting treatment of business combinations entered into after September 1, 2009.
