144A Security that may be sold to qualified institutional buyers under Rule 144A of the Securities Act of 1933, as amended. This security has been determined to be liquid under guidelines established by the Board of Trustees, unless otherwise noted.

Security which has defaulted on payment of interest and/or principal. The Fund has stopped accruing interest on this security.

+ Security is deemed illiquid.

The rate shown is the stated rate at the current period end.

@ Security is currently paying interest in-kind.

Security initially issued in zero coupon form which converts to coupon form at a specified rate and date. An effective interest rate is applied to recognize interest income daily for the bond. This rate is based on total expected interest to be earned over the life of the bond which consists of the aggregate coupon-interest payments and discount at acquisition. The rate shown is the stated rate at the current period end.

o Security is valued at fair value as determined by the investment advisor in good faith, according to procedures approved by the Board of Trustees.

< All or a portion of the position represents an unfunded loan commitment.

q Rate shown is the 7-day annualized yield at period end.

ø Evergreen Investment Management Company, LLC is the investment advisor to both the Fund and the money market fund.

## All or a portion of this security has been segregated for when-issued, delayed delivery securities and/or unfunded loans.

Forward Foreign Currency Exchange Contracts to Sell:

Exchange Date	Contracts to Deliver	U.S. Value at January 31, 2010	In Exchange for U.S. \$	Unrealized Gain (Loss)
03/01/2010	41,260,000 JPY	\$ 457,138	\$ 457,519	\$ 381
03/22/2010	15,200,000 EUR	21,072,311	21,548,736	476,425
04/15/2010	115,715 EUR	160,410	172,276	11,866
04/15/2010	1,848,700 EUR	2,562,759	2,750,755	187,996

The Fund had average contract amounts of \$110,731,823 and \$18,078,665 in forward foreign currency exchange contracts to buy and forward foreign currency exchange contracts to sell, respectively, for the period from November 1, 2009 through January 31, 2010.

At January 31, 2010, the Fund had the following credit default swap contracts outstanding:

Credit default swaps on debt obligations Buy protection

Expiration	Counterparty	Reference Debt	Rating of Reference Debt	Obligation* Amount	Fixed Payments Made by the Fund	Frequency of Payments	Market Value	Upfront Premiums Paid/(Received)	Unrealized Gain (Loss)
06/20/2014	Goldman Sachs	Expedia, Inc., 7.46%, 08/15/2018	BBB-	\$975,000	5.00%	Quarterly	\$(162,632)	\$(78,458)	\$(84,110)
06/20/2014	UBS	Expedia, Inc., 7.46%, 08/15/2018	BBB-	415,000	5.00%	Quarterly	(69,223)	(11,125)	(58,098)

Credit default swaps on an index Sell protection

Expiration	Counterparty	Index	Rating of Reference Index*	Amount	Fixed Payments Received by the Fund	Frequency of Payments	Market Value	Upfront Premiums Paid/(Received)	Unrealized Gain (Loss)
12/13/2049	Credit Suisse	Markit CMBX North America	AAA	\$1,015,000	0.08%	Monthly	\$(176,813)	\$(274,073)	\$ 97,260

12/13/2049	Goldman Sachs	AAA.3 # Markit CMBX North America AAA.3 #	AAA	750,000	0.08%	Monthly	(130,650)	(278,695)	148,04
------------	---------------	--	-----	---------	-------	---------	-----------	-----------	--------

\* Reflects the ratings of a nationally recognized ratings agency at period end. A rating of D would most likely indicate a trigger event of default has occurred although circumstances including bankruptcy, failure to pay, obligation default, obligation acceleration, repudiation/moratorium and restructuring may also cause a credit event to take place.

@ Rating represents an average rating for the underlying securities within the index.

# The Fund entered into the swap contract for speculative purposes.

The Fund had an average notional balance on credit default swaps of \$6,013,797 for the period from November 1, 2009 through January 31, 2010.

As of January 31, 2010, reverse repurchase agreements outstanding were as follows:

<u>Repurchase Amount</u>	<u>Counterparty</u>	<u>Interest Rate</u>	<u>Maturity Date</u>
	Credit		
\$33,951,162	Suisse	0.29%	02/18/2010
	Goldman		
33,744,269	Sachs	0.25%	02/18/2010
	Morgan		
32,640,582	Stanley	0.25%	02/18/2010

On January 31, 2010, the aggregate cost of securities for federal income tax purposes was \$853,190,624. The gross unrealized appreciation and depreciation on securities based on tax cost was \$43,560,047 and \$24,364,225, respectively, with a net unrealized appreciation of \$19,195,822.

### Valuation of investments

Portfolio debt securities acquired with more than 60 days to maturity are fair valued using matrix pricing methods determined by an independent pricing service which takes into consideration such factors as similar security prices, yields, maturities, liquidity and ratings. Securities for which valuations are not readily available from an independent pricing service may be valued by brokers which use prices provided by market makers or estimates of fair market value obtained from yield data relating to investments or securities with similar characteristics.

Listed equity securities are usually valued at the last sales price or official closing price on the national securities exchange where the securities are principally traded.

Investments in open-end mutual funds are valued at net asset value. Securities for which market quotations are not readily available or not reflective of current fair value are valued at fair value as determined by the investment advisor in good faith, according to procedures approved by the Board of Trustees.

The valuation techniques used by the Fund to measure fair value are consistent with the market approach, income approach and/or cost approach, where applicable, for each security type.

**Reverse repurchase agreements**

To obtain short-term financing, the Fund may enter into reverse repurchase agreements with banks and other financial institutions, which are deemed by the investment advisor to be creditworthy. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing qualified assets having a value not less than the repurchase price, including accrued interest. If the counterparty to the transaction is rendered insolvent, the Fund may be delayed or limited in the repurchase of the collateral securities.

**Foreign currency translation**

All assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the date of valuation. Purchases and sales of portfolio securities and income items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions. The Fund does not separately account for that portion of the results of operations resulting from changes in foreign exchange rates on investments and the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gains or losses on investments.

**Forward foreign currency contracts**

The Fund is subject to foreign currency exchange rate risk in the normal course of pursuing its investment objectives. A forward foreign currency contract is an agreement between two parties to purchase or sell a specific currency for an agreed-upon price at a future date. The Fund enters into forward foreign currency contracts to facilitate transactions in foreign-denominated securities and to attempt to minimize the risk to the Fund from adverse changes in the relationship between currencies. Forward foreign currency contracts are recorded at the forward rate and marked-to-market daily. When the contracts are closed, realized gains and losses arising from such transactions are recorded as realized gains or losses on foreign currency related transactions. The Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts or if the value of the foreign currency changes unfavorably. This risk is mitigated by having a master netting arrangement between the Fund and the counterparty and by having the counterparty post collateral to cover the Fund's exposure to the counterparty.

**When-issued and delayed delivery transactions**

The Fund records when-issued or delayed delivery securities as of trade date and maintains security positions such that sufficient liquid assets will be available to make payment for the securities purchased. Securities purchased on a when-issued or delayed delivery basis are marked-to-market daily and begin earning interest on the settlement date. Losses may occur on these transactions due to changes in market conditions or the failure of counterparties to perform under the contract.

**Loans**

The Fund may purchase loans through an agent, by assignment from another holder of the loan or as a participation interest in another holder's portion of the loan. Loans are purchased on a when-issued or delayed delivery basis. Interest income is accrued based on the terms of the securities. Fees earned on loan purchasing activities are recorded as income when earned. Loans involve interest rate risk, liquidity risk and credit risk, including the potential default or insolvency of the borrower.

As of January 31, 2010, the Fund had unfunded loan commitments of \$6,250,485.

### **Credit default swaps**

The Fund is subject to credit risk in the normal course of pursuing its investment objectives. The Fund may enter into credit default swap contracts for hedging or speculative purposes to provide or receive a measure of protection against default on a referenced entity, obligation or index or for investment gains. Credit default swaps involve an exchange of a stream of payments for protection against the loss in value of an underlying security or index. Under the terms of the swap, one party acts as a guarantor (referred to as the seller of protection) and receives a periodic stream of payments, provided that there is no credit event, from another party (referred to as the buyer of protection) that is a fixed percentage applied to a notional principal amount over the term of the swap. An index credit default swap references all the names in the index, and if a credit event is triggered, the credit event is settled based on that name's weight in the index. A credit event includes bankruptcy, failure to pay, obligation default, obligation acceleration, repudiation/moratorium, and restructuring. The Fund may enter into credit default swaps as either the seller of protection or the buyer of protection. As the seller of protection, the Fund is subject to investment exposure on the notional amount of the swap and has assumed the risk of default of the underlying security or index. As the buyer of protection, the Fund could be exposed to risks if the seller of the protection defaults on its obligation to perform, or if there are unfavorable changes in the fluctuation of interest rates or in the price of the underlying security or index. The maximum potential amount of future payments (undiscounted) that the Fund as the seller of protection could be required to make under the credit default swap contract would be an amount equal to the notional amount of the swap contract. The Fund's maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the fair value of the contract. This risk is mitigated by having a master netting arrangement between the Fund and the counterparty and by having the counterparty post collateral to cover the Fund's exposure to the counterparty.

If the Fund is the seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will pay to the buyer of protection the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index. If the Fund is the buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will receive from the seller of protection the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index.

Any premiums paid or received on the transactions are recorded as an asset or liability on the Statement of Assets and Liabilities and amortized. The value of the swap contract is marked-to-market daily based on quotations from an independent pricing service or market makers and any change in value is recorded as an unrealized gain or loss. Periodic payments made or received are recorded as realized gains or losses. In addition, payments received or made as a result of a credit event or termination of the contract are recognized as realized gains or losses.

Certain credit default swap contracts entered into by the Fund provide for conditions that result in events of default or termination that enable the counterparty to the agreement to cause an early termination of the transactions under those agreements. Any election by the counterparty to terminate early may impact the amounts reported on the financial statements.

### **Valuation hierarchy**

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. These inputs are summarized into three broad levels as follows:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.
