ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2010

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____.

Commission File Number 1-6364

SOUTH JERSEY INDUSTRIES, INC.
(Exact name of registrant as specified in its charter)

New Jersey
(State of incorporation)

22-1901645
(IRS employer identification no.)

1 South Jersey Plaza, Folsom, New Jersey 08037
(Address of principal executive offices, including zip code)

(609) 561-9000
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Common Stock
(\$1.25 par value per share)
(Title of each class)

New York Stock Exchange
(Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act:
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Act: Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. x

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer x Accelerated filer o
Non-accelerated filer o (Do not check if a smaller reporting company) Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No x

The aggregate market value of voting stock held by non-affiliates of the registrant as of June 30, 2010 was \$1,277,133,181. As of February 21, 2011, there were 29,883,823 shares of the registrant's common stock outstanding.

Documents Incorporated by Reference:

In Part I of Form 10-K: None

In Part II of Form 10-K: None

In Part III of Form 10-K: Portions of the registrant's proxy statement filed within 120 days of the close of the registrant's fiscal year in connection with the registrant's 2011 annual meeting of shareholders are incorporated by reference into Part III of this Form 10-K.

Forward Looking Statements

Certain statements contained in this Annual Report on form 10-K may qualify as “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact included in this Report should be considered forward-looking statements made in good faith by the Company and are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. When used in this Report, or any other of the Company’s documents or oral presentations, words such as “anticipate,” “believe,” “expect,” “estimate,” “forecast,” “goal,” “objective,” “plan,” “project,” “seek,” “strategy” and similar expressions are intended to identify forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the statements. These risks and uncertainties include, but are not limited to the risks set forth under “Risk Factors” in Part I, Item 1A of this Annual Report on Form 10-K and elsewhere throughout this Report. These cautionary statements should not be construed by you to be exhaustive and they are made only as of the date of this Report. While South Jersey Industries, Inc. (SJI or the Company) believes these forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the expectations derived from them will be realized. Further, SJI undertakes no obligation to update or revise any of its forward-looking statements whether as a result of new information, future events or otherwise.

Available Information

The Company’s Internet address is www.sjindustries.com. We make available free of charge on or through our website SJI’s annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (SEC). The SEC maintains an Internet site that contains these reports at <http://www.sec.gov>. Also, copies of SJI’s annual report will be made available, free of charge, upon written request. The content on any web site referred to in this filing is not incorporated by reference into this filing unless expressly noted otherwise.

Units of Measurement

For Natural Gas:	
1 Bcf	= One billion cubic feet
1dt	= One decatherm
1 MMdts	= One million decatherms
dts/d	= Decatherms per day
MDWQ	= Maximum daily withdrawal quantity

TABLE OF CONTENTS

PART I

Item 1. Business

Description of Business

The registrant, South Jersey Industries, Inc. a New Jersey corporation, was formed in 1969 for the purpose of owning and holding all of the outstanding common stock of South Jersey Gas Company, a public utility, and acquiring and developing non-utility lines of business.

SJI currently provides a variety of energy related products and services primarily through the following subsidiaries:

South Jersey Gas Company (SJG) is a regulated natural gas utility. SJG distributes natural gas in the seven southernmost counties of New Jersey.

South Jersey Resources Group, LLC (SJRG) markets wholesale natural gas storage, commodity and transportation in the mid-Atlantic, Appalachian and southern states.

Marina Energy, LLC (Marina) develops and operates on-site energy-related projects.

South Jersey Energy Company (SJE) acquires and markets natural gas and electricity to retail end users and provides total energy management services to commercial and industrial customers.

South Jersey Energy Service Plus, LLC (SJESP) provides residential and light commercial service and installation of HVAC systems, plumbing services and appliance repair and service/maintenance contracts.

Additional Information on the nature of our business can be found in “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” under Item 7 of this report.

Financial Information About Reportable Segments

Information regarding Reportable Segments is incorporated by reference to Note 8 of the consolidated financial statements included under Item 8 of this report.

Sources and Availability of Raw Materials

South Jersey Gas Company

Transportation and Storage Agreements

SJG has direct connections to the interstate natural gas pipeline systems of both Transcontinental Gas Pipe Line Company, LLC (Transco) and Columbia Gas Transmission, LLC (Columbia). During 2010, SJG purchased and had delivered approximately 35.4 million decatherms (MMdts) of natural gas for distribution to both on-system and off-system customers. Of this total, 24.2 MMdts were transported on the Transco pipeline system while 11.2 MMdts were transported on the Columbia pipeline system. SJG also secures firm transportation and other long term services from one additional pipeline upstream of the Transco and Columbia systems. This upstream pipeline is owned by Dominion Transmission, Inc. (Dominion). Services provided by Dominion are utilized to deliver gas into either the Transco or Columbia systems for ultimate delivery to SJG. Services provided by all of the above-mentioned pipelines are subject to the jurisdiction of the Federal Energy Regulatory Commission (FERC). Unless otherwise indicated, our

intentions are to renew or extend these service agreements before they expire.

Transco:

Transco is SJG's largest supplier of long-term gas transmission services which includes both year-round and seasonal firm transportation (FT) service arrangements. When combined, these FT services enable SJG to purchase gas from third parties and have delivered to its city gate stations by Transco a total of 280,525 dts per day (dts/d). Of this total, 133,917 dts/d is long-haul FT (where gas can be transported from the production areas of the Southwest to the market areas of the Northeast) while 146,608 dts/d is market area FT. The terms of SJG's year-round agreements extend for various periods through 2025. The terms of its seasonal agreements vary in length with the longest extending into 2012.

5

TABLE OF CONTENTS

Of the 280,525 dts/d of Transco services mentioned above, SJG has released a total of 39,800 dts/d of its long-haul FT and 25,565 dts/d of its market area FT service. These releases were made in association with SJG's Conservation Incentive Program (CIP) discussed further under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations. In addition, SJG released 90,000 dts/d of its market area FT service to SJRG as part of an Asset Management Agreement discussed further in this section under "Gas Supplies".

SJG currently has seven long-term gas storage service agreements with Transco that, when combined, are capable of storing approximately 6.3 MMdts. Through these agreements, SJG can inject gas into market and production area storages during periods of low demand and extract gas at a Maximum Daily Withdrawal Quantity (MDWQ) of up to 124,840 dts during periods of high demand. The terms of these storage service agreements extend for various periods from 2010 to 2013. During 2010, SJG released 17,433 dts/d of Transco SS-1 storage demand and 1,307,475 dts of its SS-1 storage capacity (both represent 100 percent of this service) thereby reducing its Transco MDWQ to 107,407 dts/d, and its storage capacity to approximately 5.0 MMdts. Also released was 17,433 dts/d of winter season firm transportation service associated with SS-1 storage service.

Dominion:

SJG had previously subscribed to a single firm transportation service from Dominion under Rate Schedule FTNN. This service facilitated the transportation of up to 5,545 dts/d from various Appalachian aggregation points to Transco's Leidy Line for ultimate delivery to SJG city gate stations during the winter season (November through March) each year. During 2010, this agreement and service was allowed to expire by their terms.

SJG also subscribes to a firm storage service from Dominion, under its Rate Schedule GSS. This storage has a MDWQ of 10,000 dts during the period between November 16 and March 31 of each winter season, with an associated total storage capacity of 423,000 dts. Gas withdrawn from Dominion GSS storage is delivered through both the Dominion and Transco (Leidy Line) pipeline systems for delivery to SJG service territory. The primary term of this agreement extends through March 31, 2015.

Columbia:

SJG has two firm transportation agreements with Columbia which, when combined, provide for 45,022 dts/d of firm deliverability and extend through October 31, 2019. SJG had previously released 14,714 dts/d of this amount to SJRG in conjunction with its CIP thereby reducing the combined availability of firm transportation on the Columbia system to 30,308 dts/d.

SJG also subscribes to a firm storage service with Columbia under its Rate Schedule FSS along with a firm transportation service under Rate Schedule SST. Prior to 2010, these services were each rendered under three separate agreements. In order to reduce both administrative and scheduling burdens associated with multiple contracts, SJG and Columbia agreed to merge the three agreements for each rate schedule into one agreement for each service effective May 1, 2010 and extended both agreements through October 31, 2019. This was accomplished while preserving the Company's total FSS MDWQ of 52,891 dts and related 3,473,022 dts of storage capacity. Moreover, during 2010, SJG released to SJRG 19,029 dts of its FSS MDWQ along with 1,249,485 dts of its storage capacity. Additionally, SJG also released to SJRG 19,029 dts per day of its associated Columbia SST transportation service. Both releases made by SJG were in connection with its CIP and extended through September 30, 2014.

Gas Supplies

SJG has an Asset Management Agreement (AMA) with SJRG that extends through November 30, 2013. Under this agreement SJG has released to SJRG its firm transportation rights equal to 90,000 dth/d of transportation capacity on

Transco. SJRG will manage this capacity and provide SJG with up to 90,000 dth/d of firm deliverability in the summer season and up to 90,000 dth/d of interruptible deliverability in the winter season. SJRG will seek to optimize the capacity released under this AMA and will pay SJG a fee based on a sharing formula in the agreement. Due to increased liquidity in the market place, all other gas supply agreements with third party producer suppliers are short-term agreements and SJG uses financial contracts secured through SJRG to hedge against forward price risk. Short-term agreements typically extend between one day and several months in duration.

TABLE OF CONTENTS

Supplemental Gas Supplies

During 2010, SJG entered into two seasonal Liquefied Natural Gas (LNG) sales agreements with a third party supplier. The term of the first agreement, which was used during the 2010 summer season to refill SJG's storage tank, extended through October 31, 2010, and had an associated contract quantity of 250,000 dts. The second agreement was acquired to replenish LNG in storage during the 2010-2011 winter season. This agreement extends through March 31, 2011 and also provides SJG with up to 250,000 dts of LNG.

SJG operates peaking facilities which can store and vaporize LNG for injection into its distribution system. SJG's LNG facility has a storage capacity equivalent to 434,300 dts of natural gas and has an installed capacity to vaporize up to 96,750 dts of LNG per day for injection into its distribution system.

Peak-Day Supply

SJG plans for a winter season peak-day demand on the basis of an average daily temperature of 2 degrees Fahrenheit (F). Gas demand on such a design day for the 2010-2011 winter season is estimated to be 466,995 dts. SJG projects that it has adequate supplies and interstate pipeline entitlements to meet its design requirements. SJG experienced its highest peak-day demand for calendar year 2010 of 401,761 dts on January 30th while experiencing an average temperature of 16.5 degrees F that day.

Natural Gas Prices

SJG's average cost of natural gas purchased and delivered in 2010, 2009 and 2008, including demand charges, was \$6.64 per dt, \$8.38 per dt and \$9.90 per dt, respectively.

South Jersey Energy Company

Transportation and Storage Agreements – Natural Gas

Access to gas suppliers and cost of gas are significant to the operations of SJE. No material part of the business of SJE is dependent upon a single customer or a few customers. SJE purchases delivered gas only, primarily from SJRG. Consequently, SJE maintains no transportation or storage agreements.

Electric Supply

Due to the liquidity in the market, SJE primarily purchases delivered electric in the day-ahead and real time markets through regional transmission organizations and consequently does not own or operate any generation or transmission assets.

South Jersey Resources Group

Transportation and Storage Agreements

National Fuel Gas Supply Corporation:

SJRG has multiple storage service agreements with National Fuel Gas Supply Corporation (National Fuel). Three contracts totaling 2,451,420 dts of storage space expire March 31, 2011. Two contracts totaling an additional 2,691,740 dts of capacity have evergreen rights that extend year to year. One additional contract covering 224,576 dts of storage capacity extends through March 31, 2018 while a final contract covering 150,040 dts of capacity expires

March 31, 2023. Total injection rights under the combined agreements total 32,398 dts and firm withdrawal rights total 49,859 dts as of December 31, 2010.

SJRG holds long term firm transportation agreements with National Fuel associated with the above-mentioned agreements. Under these agreements, National Fuel will provide SJRG with a maximum daily injection transportation quantity of 32,398 dts with primary receipt points from Tennessee Gas Pipeline for delivery into storage, and 49,859 dts of maximum daily withdrawal transportation quantity with a primary receipt point of storage and a primary delivery point of Transcontinental Gas Pipeline.

TABLE OF CONTENTS

Transcontinental Gas Pipeline:

SJRG has a storage agreement with Transco for storage service at Transco's WSS facility which expires in October 2017. Under this evergreen contract, up to 24,500 dts may be injected and up to 51,837 dts may be withdrawn. Total storage capacity on the agreement is 4,406,000 dts.

SJRG has a storage agreement with Transco for storage service at Transco's SS-1 facility which expires March 31, 2011. Under this evergreen contract, up to 17,433 dts may be withdrawn in the winter period and up to 7,617 dts may be injected during the summer period. Total storage capacity under the agreement is 1,307,475 dts. This service was released to SJRG by SJG as discussed above.

SJRG has a transportation agreement with Transco associated with the SS-1 storage agreement mentioned above. Under this evergreen agreement, Transco will provide SJRG with a maximum transportation quantity of 17,433 dts with receipts at Leidy, Pennsylvania and deliveries in Zone 6 New Jersey. This transportation agreement provides service only during the months of November to March each year. This service was released to SJRG by SJG in 2008.

SJRG also has a firm transportation agreement with Transco which expires September 30, 2013. Under this contract, Transco will provide SJRG with receipts at various production points in Texas and Louisiana and deliveries in New Jersey totaling 19,900 dts. This service was released to SJRG by SJG as discussed above.

Dominion Gas Transmission:

SJRG has a firm transportation agreement with Dominion which expires October 31, 2022. Under this agreement, Dominion will provide SJRG with 5,000 dts of deliveries to Leidy, Pennsylvania and receipts at Lebanon, Ohio.

SJRG also has a firm transportation agreement with Dominion related to SJRG's Transco SS-1 storage. Under this contract, Dominion will provide receipts at Leidy, Pennsylvania and deliveries to storage in the amount of 17,432 dts. This evergreen contract expires March 31, 2011. This service was released to SJRG by SJG in 2008.

Columbia Gas Transmission:

SJRG holds a firm transportation agreement with Columbia. Under this evergreened agreement, Columbia provides receipts at Leach, Kentucky and deliveries of 14,714 dts to New Jersey.

SJRG holds a storage agreement with Columbia for service under Columbia's FSS rate schedule. Under this evergreen agreement which expires October 31, 2011, Columbia will provide SJRG with storage capacity of 1,249,485 dts. Under this agreement, 19,029 dts may be withdrawn from storage and 9,996 dts may be injected.

SJRG holds firm transportation related to the above mentioned storage agreement which provides for receipts at storage and deliveries to New Jersey of 19,029 dts. This evergreen contract expires October 31, 2011. These services with Columbia were released to SJRG by SJG as discussed above.

Columbia Gulf Transmission:

SJRG holds a firm transportation agreement with Columbia Gulf which expires October 31, 2019. Under this evergreen agreement, Columbia provides receipts in Louisiana with deliveries at Leach, Kentucky in the amount of 15,000 dts.

Gas Supplies

SJRG has entered into several long-term natural gas supply agreements to purchase a minimum of 249,000 dts/d and up to 635,000 dts/d, depending upon production levels, for terms ranging from three to ten years at index based prices.

8

TABLE OF CONTENTS

Patents and Franchises

South Jersey Gas Company

SJG holds nonexclusive franchises granted by municipalities in the seven-county area of southern New Jersey that it serves. No other natural gas public utility presently serves the territory covered by SJG's franchises. Otherwise, patents, trademarks, licenses, franchises and concessions are not material to the business of SJG.

Seasonal Aspects

South Jersey Gas Company

SJG experiences seasonal fluctuations in sales when selling natural gas for heating purposes. SJG meets this seasonal fluctuation in demand from its firm customers by buying and storing gas during the summer months, and by drawing from storage and purchasing supplemental supplies during the heating season. As a result of this seasonality, SJG's revenues and net income are significantly higher during the first and fourth quarters than during the second and third quarters of the year.

Non-Utility Companies

Among SJI's non-utility activities, wholesale and retail gas marketing have seasonal patterns similar to SJG's. Activities such as energy services and energy project development do not follow seasonal patterns. Other activities such as retail electric marketing and appliance service can have seasonal earnings patterns that are different from the utility. While growth in the earnings contributions from nonutility operations has improved SJI's second and third quarter net income levels, the first and fourth quarters remain the periods where most of SJI's revenue and net income is produced.

Working Capital Practices

Reference is made to "Liquidity and Capital Resources" included in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," of this report.

Customers

No material part of the Company's business is dependent upon a single customer or a few customers, the loss of which would have a material adverse effect on SJI performance on a consolidated basis. One of SJI's subsidiaries, Marina Energy, does currently receive the majority of its revenues and income from one customer. However, that customer is under a long-term contract through 2027.

Backlog

Backlog is not material to an understanding of SJI's business or that of any of its subsidiaries.

Government Contracts

No material portion of the business of SJI or any of its subsidiaries is subject to renegotiation of profits or termination of contracts or subcontracts at the election of any government.

Competition

Information on competition for SJI and its subsidiaries can be found in Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” of this report.

Research

During the last three fiscal years, neither SJI nor any of its subsidiaries engaged in research activities to any material extent.

TABLE OF CONTENTS

Environmental Matters

Information on environmental matters for SJI and its subsidiaries can be found in Note 15 of the consolidated financial statements included under Item 8 of this report.

Employees

SJI and its subsidiaries had a total of approximately 650 employees as of December 31, 2010. Of that total, approximately 340 employees are unionized. The Company has collective bargaining agreements with two unions that represent these employees: the International Brotherhood of Electrical Workers (IBEW) Local 1293 and the International Association of Machinists and Aerospace Workers (IAM) Local 76. SJG and SJESP employees represented by the IBEW operate under a collective bargaining agreement that runs through February 2013, with the option to extend until February 2014 at the union's election. The remaining unionized employees represented by the IAM operate under a collective bargaining agreement that expires in August 2014.

Financial Information About Foreign and Domestic Operations and Export Sales

SJI has no foreign operations and export sales have not been a significant part of SJI's business.

Item 1A. Risk Factors

SJI and its subsidiaries operate in an environment that involves risks, many of which are beyond our control. SJI has identified the following risk factors that could cause SJI's operating results and financial condition to be materially adversely affected. In addition, new risks may emerge at any time, and SJI cannot predict those risks or the extent to which they may affect SJI's businesses or financial performance.

SJI is a holding company and its assets consist primarily of investments in subsidiaries. Should SJI's subsidiaries be unable to pay dividends or make other payments to SJI for financial, regulatory, legal or other reasons, SJI's ability to pay dividends on its common stock could be limited. SJI's stock price could be adversely affected as a result.

SJI's business activities are concentrated in southern New Jersey. Changes in the economies of southern New Jersey and surrounding regions could negatively impact the growth opportunities available to SJI and the financial condition of customers and prospects of SJI.

Changes in the regulatory environment or unfavorable rate regulation at its utility may have an unfavorable impact on SJI's financial performance or condition. SJI's utility business is regulated by the New Jersey Board of Public Utilities which has authority over many of the activities of the business including, but not limited to, the rates it charges to its customers, the amount and type of securities it can issue, the nature of investments it can make, the nature and quality of services it provides, safety standards and other matters. The extent to which the actions of regulatory commissions restrict or delay SJG's ability to earn a reasonable rate of return on invested capital and/or fully recover operating costs may adversely affect its results of operations, financial condition and cash flows.

SJI may not be able to respond effectively to competition, which may negatively impact SJI's financial performance or condition. Regulatory initiatives may provide or enhance opportunities for competitors that could reduce utility income obtained from existing or prospective customers. Also, competitors in all of SJI's business lines may be able to provide superior or less costly products or services based upon currently available or newly developed technologies.

Warm weather, high commodity costs, or customer conservation initiatives could result in reduced demand for some of SJI's energy products and services. While SJI's utility currently has a conservation incentive program clause that protects its revenues and gross margin against usage per customer that is lower than a set level, the clause is currently approved as a pilot program through 2013. Should this clause expire without replacement, lower customer energy utilization levels would likely reduce SJI's net income.

High natural gas prices could cause more of SJI's receivables to be uncollectible. Higher levels of uncollectibles from either residential or commercial customers would negatively impact SJI's income and could result in higher working capital requirements.

SJI's net income could decrease if it is required to incur additional costs to comply with new governmental safety, health or environmental legislation. SJI is subject to extensive and changing federal and state laws and regulations that impact many aspects of its business; including the storage, transportation and distribution of natural gas, as well as the remediation of environmental contamination at former manufactured gas plant facilities.

TABLE OF CONTENTS

Proposed climate change legislation could impact SJI's financial performance and condition. Climate change is receiving ever increasing attention from scientists and legislators alike. The debate is ongoing as to the extent to which our climate is changing, the potential causes of this change and its potential impacts. Some attribute global warming to increased levels of greenhouse gases, which has led to significant legislative and regulatory efforts to limit greenhouse gas emissions. The outcome of proposed federal and state actions to address global climate change could result in a variety of regulatory programs including additional charges to fund energy efficiency activities or other regulatory actions. These actions could affect the demand for natural gas and electricity, result in increased costs to our business and impact the prices we charge our customers. Because natural gas is a fossil fuel with low carbon content, it is possible that future carbon constraints could create additional demands for natural gas, both for production of electricity and direct use in homes and businesses. Any adoption by federal or state governments mandating a substantial reduction in greenhouse gas emissions could have far-reaching and significant impacts on the energy industry. We cannot predict the potential impact of such laws or regulations on our future consolidated financial condition, results of operations or cash flows.

SJI's wholesale commodity marketing business is exposed to the risk that counterparties that owe money or energy to SJI will not be able to meet their obligations for operational or financial reasons. SJI could be forced to buy or sell commodity at a loss as a result of such failure. Such a failure, if large enough, could also impact SJI's liquidity.

Increasing interest rates will negatively impact the net income of SJI. Several of SJI's subsidiaries are capital intensive, resulting in the incurrence of significant amounts of debt financing. SJI has issued almost all of its existing long-term debt at fixed rates or has utilized interest rate swaps to mitigate changes in variable rates. However, new issues of long-term debt and all variable rate short-term debt are exposed to the impact of rising interest rates.

SJI has guaranteed certain obligations of unconsolidated affiliates and is exposed to the risk that these affiliates will not be able to meet performance and financial commitments. SJI's unconsolidated affiliates develop and operate on-site energy related projects. SJI has guaranteed certain obligations of these affiliates in connection with the development and operation of the facilities. In the event that these projects do not meet specified levels of operating performance or are unable to meet certain financial obligations as they become due, SJI could be required to make payments related to these obligations.

The inability to obtain capital, particularly short-term capital from commercial banks, could negatively impact the daily operations and financial performance of SJI. SJI uses short-term borrowings under committed and uncommitted credit facilities provided by commercial banks to supplement cash provided by operations, to support working capital needs, and to finance capital expenditures, as incurred. If the customary sources of short-term capital were no longer available due to market conditions, SJI may not be able to meet its working capital and capital expenditure requirements and borrowing costs could increase.

A downgrade in SJG's credit rating could negatively affect its ability to access adequate and cost effective capital. SJG's ability to obtain adequate and cost effective capital depends largely on its credit ratings, which are greatly influenced by financial condition and results of operations. If the rating agencies downgrade SJG's credit ratings, particularly below investment grade, SJG's borrowing costs would increase. In addition, SJG would likely be required to pay higher interest rates in future financings and potential funding sources would likely decrease. To the extent that a decline in SJG's credit rating has a negative effect on SJI, SJI could be required to provide additional support to certain counterparties of the wholesale energy operations.

Hedging activities of the company designed to protect against commodity price or interest rate risk may cause fluctuations in reported financial results and SJI's stock price could be adversely affected as a result. Although SJI enters into various contracts to hedge the value of energy assets, liabilities, firm commitments or forecasted transactions, the timing of the recognition of gains or losses on these economic hedges in accordance with accounting principles generally accepted in the United States of America does not always match up with the gains or losses on the items being hedged. The difference in accounting can result in volatility in reported results, even though the expected profit margin is essentially unchanged from the dates the transactions were consummated.

The inability to obtain natural gas would negatively impact the financial performance of SJI. Several of SJI's subsidiaries have businesses based upon the ability to deliver natural gas to customers. Disruption in the production of natural gas or transportation of that gas to SJI from its suppliers, could prevent SJI from completing sales to its

customers.

TABLE OF CONTENTS

Transporting and storing natural gas involves numerous risks that may result in accidents and other operating risks and costs. SJI's gas distribution activities involve a variety of inherent hazards and operating risks, such as leaks, accidents, mechanical problems, natural disasters or terrorist activities which could cause substantial financial losses. In addition, these risks could result in loss of human life, significant damage to property, environmental pollution and impairment of operations, which in turn could lead to substantial losses. In accordance with customary industry practice, SJI maintains insurance against some, but not all, of these risks and losses. The occurrence of any of these events not fully covered by insurance could adversely affect SJI's financial position, results of operations and cash flows.

Adverse results in legal proceedings could be detrimental to the financial condition of SJI. The outcomes of legal proceedings can be unpredictable and can result in adverse judgments.

Renewable energy projects at Marina receive significant benefit from tax and regulatory incentives. A significant portion of the expected return on investment of these renewable energy projects is dependent upon federal investment tax credits (ITCs) and the future market for renewable energy credits (RECs). The benefits from ITCs are typically available when the project is placed in service while the benefits from RECs are produced during the entire life of the project. As a result, earnings from existing projects would be adversely affected without a liquid REC market. In addition, the return on investment from new projects may not be as attractive if ITCs are not available and/or a liquid REC market ceases to exist. Therefore, these projects are exposed to the risk that currently favorable tax and regulatory incentives expire or are adversely modified.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The principal property of SJI consists of SJG's gas transmission and distribution systems that include mains, service connections and meters. The transmission facilities carry the gas from the connections with Transco and Columbia to SJG's distribution systems for delivery to customers. As of December 31, 2010, there were approximately 121.9 miles of mains in the transmission systems and 5,939 miles of mains in the distribution systems.

SJG owns approximately 154 acres of land in Folsom, New Jersey which is the site of SJI's corporate headquarters. Approximately 140 acres of this property is deed restricted. SJG also has office and service buildings at six other locations in the territory. There is a liquefied natural gas storage and vaporization facility at one of these locations.

As of December 31, 2010, SJG's utility plant had a gross book value of \$1.4 billion and a net book value, after accumulated depreciation, of \$1.0 billion. In 2010, \$115.5 million was spent on additions to utility plant and there were retirements of property having an aggregate gross book cost of \$6.4 million.

Virtually all of SJG's transmission pipeline, distribution mains and service connections are under streets or highways or on the property of others. The transmission and distribution systems are maintained under franchises or permits or rights-of-way, many of which are perpetual. SJG's properties (other than property specifically excluded) are subject to a lien of mortgage under which its first mortgage bonds are outstanding. We believe these properties are well maintained and in good operating condition.

Nonutility property and equipment with a net book value of \$146.5 million consists primarily of Marina's energy projects, in particular the thermal energy plant in Atlantic City, N.J.

Energy and Minerals Inc. (EMI) owns 235 acres of land in Vineland, New Jersey.

South Jersey Fuel, Inc., an inactive subsidiary, owns land in Deptford Township and owns real estate in Upper Township, New Jersey.

R&T Castellini, Inc., an inactive subsidiary, owns land and buildings in Vineland, New Jersey.

TABLE OF CONTENTS

Item 3. Legal Proceedings

SJI is subject to claims arising in the ordinary course of business and other legal proceedings. We accrue liabilities related to these claims when we can reasonably estimate the amount or range of amounts of probable settlement costs or other charges for these claims. Among other actions, SJI is named in certain product liability claims related to our former sand mining subsidiary. Management does not currently anticipate the disposition of any known claims to have a material adverse effect on SJI's financial position, results of operations or liquidity.

Item 4. [Removed and Reserved]

Item 4A. Executive Officers of the Registrant

Set forth below are the names, ages and positions of our executive officers along with their business experience during the past five years. All executive officers of SJI are elected annually and serve at the discretion of the Board of Directors. All information is as of the date of the filing of this report.

Name, age and position with the Company	Period Served
Edward J. Graham, Age 53 Chairman Chief Executive Officer President	April 2005 - Present February 2004 - Present January 2003 - Present
David A. Kindlick, Age 56 Chief Financial Officer Vice President	January 2002 - Present June 1997 - Present
Jeffrey E. DuBois, Age 52 Vice President	January 2004 - Present
Michael J. Renna, Age 43 Vice President	January 2004 - Present
Kevin D. Patrick, Age 50 Vice President Albertsons/Super Valu Division CFO – Eastern Region	June 2007 - Present September 2004 – June 2006
Sharon M. Pennington, Age 48 Vice President Vice President (SJI Services LLC)	January 2008 - Present January 2006 – December 2007
Gina M. Merritt-Epps, Age 43 Corporate Counsel and Secretary Assistant General Counsel and Assistant Secretary Director, Legal Affairs (SJI Services LLC)	May 2009 - Present December 2007 - April 2009 June 2006 – November 2007

Atlantic County Department of Law
Assistant County Counsel

October 2002 – May 2006

1) During the first six months of 2010 and 2009, SJI declared quarterly dividends to its common shareholders that were payable in April and July of each year. In June 2010, SJI also declared its normal quarterly dividend that was payable in October 2010. During 2009, SJI did not declare its October dividend until August. Consequently, Dividends Declared per Common Share for the three months ended September 30, 2010 does not include the impact of the October dividend.

These quotations are based on the list of composite transactions of the New York Stock Exchange. Our stock is traded on the New York Stock Exchange under the symbol SJI. We have declared and expect to continue to declare regular quarterly cash dividends. As of December 31, 2010, the latest available date, our records indicate that there were 7,130 shareholders of record.

Stock Performance Graph

The performance graph below illustrates a five year comparison of cumulative total returns based on an initial investment of \$100 in South Jersey Industries, Inc. common stock, as compared with the S&P 500 Stock Index and the S&P Utility Index for the period 2006 through 2010.

This performance chart assumes:

- \$100 invested on December 31, 2005 in South Jersey Industries, Inc. common stock, in the S&P 500 Stock Index and in the S&P Utility Index; and
- All dividends are reinvested.

Information required by this item is also found in Note 6 of the consolidated financial statements included under Item 8 of this report.

SJI has a stated goal of increasing its dividend by at least 6% to 7% annually.

TABLE OF CONTENTS

In January 2010, non-employee members of SJI's Board of Directors received an aggregate of 16,700 shares of unregistered stock, valued at that time at \$631,678, as part of their compensation for serving on the Board.

Issuer Purchases of Equity Securities

The following table presents information about purchases by SJI of its own common stock during the three months ended December 31, 2010:

Period	Total Number of Shares Purchased ¹	Average Price Paid Per Share ¹	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ²	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs ²
October 2010	21,243	\$ 49.86	—	—
November 2010	2,892	\$ 50.86	—	—
December 2010	17,596	\$ 54.14	—	—
Total	41,731		—	—

¹The total number of shares purchased and the average price paid per share represent shares purchased in open market transactions under the South Jersey Industries Dividend Reinvestment Plan (the "DRP") by the administrator of the DRP.

²On September 22, 2008, SJI publicly announced a share repurchase program under which the Company can purchase up to 5% of its currently outstanding common stock over the next four years. As of December 31, 2010, no shares have been purchased under this program.

(4) This section includes the non-generally accepted accounting principles (“non-GAAP”) financial measures of Economic Earnings and Economic Earnings per share. See Management’s Discussion and Analysis of Financial Condition and Results of Operations in Item 7 of this report for a discussion regarding the use of non-GAAP financial measures.

TABLE OF CONTENTS

Item 7. Management's Discussion and Analysis of Financial Condition and
Results of Operations

OVERVIEW —South Jersey Industries, Inc. (SJI or the Company) is an energy services holding company that provides a variety of products and services through the following wholly owned subsidiaries:

South Jersey Gas Company (SJG)

SJG, a New Jersey corporation, is an operating public utility company engaged in the purchase, transmission and sale of natural gas for residential, commercial and industrial use. SJG also sells natural gas and pipeline transportation capacity (off-system sales) on a wholesale basis to various customers on the interstate pipeline system and transports natural gas purchased directly from producers or suppliers to their customers. SJG contributed approximately 65.9% of SJI's net income on a consolidated basis in 2010.

SJG's service territory covers approximately 2,500 square miles in the southern part of New Jersey. It includes 112 municipalities throughout Atlantic, Cape May, Cumberland and Salem Counties and portions of Burlington, Camden and Gloucester Counties, with an estimated permanent population of 1.2 million. SJG benefits from its proximity to Philadelphia, PA and Wilmington, DE on the western side of its service territory and Atlantic City, NJ and the popular shore communities on the eastern side. Economic development and housing growth have long been driven by the development of the Philadelphia metropolitan area. The gradual extension of SJG's infrastructure, particularly in the eastern portion of the service territory, has contributed to SJG's annual customer growth. In the past, economic growth in Atlantic City and the surrounding region has been primarily driven by new and proposed gaming and non-gaming investments that emphasize destination style attractions. While many of these new projects were suspended or postponed due to the current economic environment, the casino industry is expected to remain a significant source of regional economic development going forward. Over the years, the ripple effect from Atlantic City has produced new housing and commercial construction. Combining with the gaming industry catalyst is the ongoing transition of southern New Jersey's oceanfront communities from seasonal resorts to year round economies. New and expanded hospitals, school, and large scale retail developments throughout the service territory have contributed to SJG's growth. Presently, SJG serves approximately 66% of households within its territory with natural gas. SJG also serves southern New Jersey's diversified industrial base that includes processors of petroleum and agricultural products; chemical, glass and consumer goods manufacturers; and high technology industrial parks.

As of December 31, 2010, SJG served a total of 347,725 residential, commercial and industrial customers in southern New Jersey, compared with 343,566 customers at December 31, 2009. No material part of SJG's business is dependent upon a single customer or a few customers. Gas sales, transportation and capacity release for 2010 amounted to 110.8 MMdts (million decatherms), of which 56.6 MMdts were firm sales and transportation, 1.9 MMdts were interruptible sales and transportation, and 52.3 MMdts were off-system sales and capacity release. The breakdown of firm sales and transportation throughput includes 44.3% residential, 21.1% commercial, 22.8% industrial, and 11.8% cogeneration and electric generation. At year-end 2010, SJG served 324,246 residential customers, 23,010 commercial customers and 469 industrial customers. This includes 2010 net additions of 3,956 residential customers and 208 commercial customers.

SJG makes wholesale gas sales to gas marketers for resale and ultimate delivery to end users. These "off-system" sales are made possible through the issuance of the Federal Energy Regulatory Commission (FERC) Orders No. 547 and 636. Order No. 547 issued a blanket certificate of public convenience and necessity authorizing all parties, which are not interstate pipelines, to make FERC jurisdictional gas sales for resale at negotiated rates, while Order No. 636 allowed SJG to deliver gas at delivery points on the interstate pipeline system other than its own city gate stations and release excess pipeline capacity to third parties. During 2010, off-system sales amounted to 6.0 MMdts and capacity release amounted to 46.3 MMdts.

Supplies of natural gas available to SJG that are in excess of the quantity required by those customers who use gas as their sole source of fuel (firm customers) make possible the sale and transportation of gas on an interruptible basis to commercial and industrial customers whose equipment is capable of using natural gas or other fuels, such as fuel oil and propane. The term “interruptible” is used in the sense that deliveries of natural gas may be terminated by SJG at any time if this action is necessary to meet the needs of higher priority customers as described in SJG’s tariffs. In 2010, usage by interruptible customers, excluding off-system customers amounted to 1.9 MMdts, approximately 1.7% of the total throughput.

TABLE OF CONTENTS

South Jersey Energy Solutions, LLC

Effective January 1, 2006, SJI established South Jersey Energy Solutions, LLC, (SJES) as a direct subsidiary for the purpose of serving as a holding company for all of SJI's non-utility businesses. The following businesses are wholly owned subsidiaries of SJES:

South Jersey Resources Group, LLC (SJRG)

SJRG markets natural gas storage, commodity and transportation assets on a wholesale basis. Customers include energy marketers, electric and gas utilities and natural gas producers. SJRG's marketing activities occur mainly in the mid-Atlantic, Appalachian and southern regions of the country. SJRG also conducts price risk management activities by entering into a variety of physical and financial transactions including forward contracts, swap agreements, option contracts and futures contracts. In 2010, SJRG transacted 245.9 Bcf of natural gas. SJRG contributed approximately 6.7% of SJI's net income on a consolidated basis.

Marina Energy, LLC (Marina)

Marina develops and operates energy-related projects. Marina's largest operating project provides cooling, heating and emergency power to the Borgata Hotel Casino & Spa in Atlantic City, NJ. Marina added service to Borgata's new hotel tower completed in June of 2008. Marina also has a 50% equity interest in LVE Energy Partners, LLC (LVE) which has entered into a contract to design, build, own and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada.

Marina's other projects include 50% equity interests in various partnerships that primarily operate landfill gas-fired electric production facilities and solar projects. Marina contributed approximately 14.1% of SJI's net income on a consolidated basis.

South Jersey Energy Company (SJE)

SJE provides services for the acquisition and transportation of natural gas and electricity for retail end users and markets total energy management services. As of December 31, 2010, SJE marketed natural gas and electricity to approximately 13,217 customers, which consist of approximately 54% residential customers and 46% commercial/industrial customers. Most customers served by SJE are located within southern New Jersey, northwestern Pennsylvania and New England. In 2010, SJE contributed approximately 13.3% of SJI's net income on a consolidated basis.

South Jersey Energy Service Plus, LLC (SJESP)

SJESP installs and services residential and light commercial HVAC systems, provides plumbing services, and services appliances via the sale of appliance service programs as well as on a time and materials basis. SJESP serves southern New Jersey where it is the largest local HVAC service company with nearly 50 experienced, NATE certified technicians and installers. As of December 31, 2010, SJESP had approximately 56,000 service contract customers, representing approximately 161,000 service contracts for the repair and maintenance of major appliances, such as house heaters, water heaters, gas ranges, and electric central air conditioning units. SJESP contributed approximately 0.5% of SJI's net income on a consolidated basis.

Other

SJI Services, LLC provides services such as information technology, human resources, government relations, corporate communications, materials purchasing, fleet management and insurance to SJI and its other subsidiaries.

Energy & Minerals, Inc. (EMI) principally manages liabilities associated with its discontinued operations of nonutility subsidiaries.

SJI also has a 50% joint venture investment with Conectiv Solutions, LLC in Millennium Account Services, LLC (Millennium). Millennium provides meter reading services to SJG and Atlantic City Electric Company in southern New Jersey.

TABLE OF CONTENTS

Primary Factors Affecting SJI's Business

SJI's stated long-term goals are to: 1) Grow earnings per share from continuing operations by an average of at least 6% to 7% per year; 2) Increase the dividend on common stock by at least 6% to 7% annually; and 3) Maintain a low-to-moderate risk platform. Management established those goals in conjunction with SJI's Board of Directors based upon a number of different internal and external factors that characterize and influence SJI's current and expected future activities.

The following is a summary of the primary factors we expect to have the greatest impact on SJI's performance and ability to achieve long-term goals going forward:

Business Model — In developing SJI's current business model, our focus has been on our core utility and natural extensions of that business. That focus enables us to concentrate on business activities that match our core competencies. Going forward we expect to pursue business opportunities that fit this model.

Customer Growth — Southern New Jersey, our primary area of operations, has not been immune to the issues impacting the new housing market nationally. However, net customers for SJG still grew 1.2% for 2010 as we increased our focus on customer conversions. In 2010, the 3,271 consumers converting their homes and businesses from other heating fuels, such as electric, propane or oil represented over 54% of the total new customer acquisitions for the year. In comparison, conversions over the past five years averaged 2,697 annually. Customers in our service territory typically base their decisions to convert on comparisons of fuel costs, environmental considerations and efficiencies. As such, SJG began a comprehensive partnership with the State's Office of Clean Energy to educate consumers on energy efficiency and to promote the rebates and incentives available to natural gas users.

Regulatory Environment — SJG is primarily regulated by the New Jersey Board of Public Utilities (BPU). The BPU sets the rates that SJG charges its rate-regulated customers for services provided and establishes the terms of service under which SJG operates. We expect the BPU to continue to set rates and establish terms of service that will enable SJG to obtain a fair and reasonable return on capital invested. The BPU approved a Conservation Incentive Program (CIP) effective October 1, 2006, discussed in greater detail under Results of Operations, that protects SJG's net income from reductions in gas used by residential, commercial and small industrial customers. In addition, in April 2009, the BPU approved the Capital Investment Recovery Tracker (CIRT), accelerated infrastructure investment program and an associated rate tracker, which allows SJG to accelerate \$103.0 million of capital spending into 2009 and 2010. The CIRT allows SJG to earn a return of, and return on, as the capital is spent.

Weather Conditions and Customer Usage Patterns — Usage patterns can be affected by a number of factors, such as wind, precipitation, temperature extremes and customer conservation. SJG's earnings are largely protected from fluctuations in temperatures by the CIP. The CIP has a stabilizing effect on utility earnings as SJG adjusts revenues when actual usage per customer experienced during an annual period varies from an established baseline usage per customer. Our nonutility gas retail marketing business is directly affected by weather conditions, as it does not have regulatory mechanisms that address weather volatility. The impact of different weather conditions on the earnings of our nonutility businesses is dependent on a range of different factors. Consequently, weather may impact the earnings of SJI's various subsidiaries in different, or even opposite, ways. Further, the profitability of individual subsidiaries may vary from year-to-year despite experiencing substantially similar weather conditions.

Changes in Natural Gas Prices — The utility's gas costs are passed on directly to customers without any profit margin added by SJG. The price the utility charges its periodic customers is set annually, with a regulatory mechanism in place to make limited adjustments to that price during the course of a year. In the event that gas cost increases would justify customer price increases greater than those permitted under the regulatory mechanism, SJG can petition the BPU for an incremental rate increase. High prices can make it more difficult for our customers to pay their bills and

may result in elevated levels of bad-debt expense. Among our nonutility activities, the one most likely to be impacted by changes in natural gas prices is our wholesale gas marketing business. Wholesale gas marketing typically benefits from volatility in gas prices during different points in time. The actual price of the commodity does not typically have an impact on the performance of this business line. Our ability to add and retain customers at our retail gas marketing business is affected by the relationship between the price that the utility charges customers for gas and the cost of gas available in the market at specific points in time. However, retail gas marketing accounts for a very small portion of SJI's overall activities.

Energy Project Development — Marina Energy, LLC, SJI's energy project development business, focuses on designing, building, owning and/or operating energy production facilities on, or adjacent to, customer sites. That business is currently involved with several projects that are either operating, or are under development. Based upon our experience to date, market issues that impact the reliability and price of electricity supplied by utilities, and discussions that we are having regarding additional projects, we expect to continue to expand this business. However, the price of natural gas, as well as the availability of various tax incentives and rebates, has a direct effect on the economics of these projects. Further, our largest project opportunities to date have been and are expected to continue to be in the casino gaming industry. Consequently, the economic condition of that industry is important to the near term prospects for obtaining additional projects.

TABLE OF CONTENTS

Changes in Interest Rates — SJI has operated in a relatively low interest rate environment over the past several years. Rising interest rates would raise the expense associated with existing variable-rate debt and all issuances of new debt. We have sought to mitigate the impact of a potential rising rate environment by directly issuing fixed-rate debt, or by entering into derivative transactions to hedge against rising interest rates.

Labor and Benefit Costs — Labor and benefit costs have a significant impact on SJI's profitability. Benefit costs, especially those related to pension and health care, have risen in recent years. We sought to manage these costs by revising health care plans offered to existing employees, capping postretirement health care benefits, and changing health care and pension packages offered to new hires. We expect savings from these changes to gradually increase as new hires replace retiring employees. In an effort to accelerate the realization of those benefits, we offered a voluntary separation program at the beginning of 2010 to our unionized employees. Our workforce totaled approximately 650 employees at the end of 2010, of which approximately 52% of that total are under collective bargaining agreements.

Balance Sheet Strength — Our goal is to maintain a strong balance sheet with an average annual equity-to-capitalization ratio of 50%. Our equity-to-capitalization ratio, inclusive of short-term debt, was 44.8% and 50.0% at the end of 2010 and 2009, respectively. A strong balance sheet permits us to maintain the financial flexibility necessary to take advantage of growth opportunities and to address volatile economic and commodity markets while maintaining a low-to-moderate risk platform.

CRITICAL ACCOUNTING POLICIES — ESTIMATES AND ASSUMPTIONS — As described in the notes to our consolidated financial statements, management must make estimates and assumptions that affect the amounts reported in the consolidated financial statements and related disclosures. Actual results could differ from those estimates. Five types of transactions presented in our consolidated financial statements require a significant amount of judgment and estimation. These relate to regulatory accounting, derivatives, environmental remediation costs, pension and other postretirement benefit costs, and revenue recognition.

Regulatory Accounting — SJI's largest subsidiary, SJG, maintains its accounts according to the Uniform System of Accounts as prescribed by the BPU. As a result of the ratemaking process, SJG is required to follow Financial Accounting Standards Board (FASB) ASC Topic 980 – "Regulated Operations." SJG is required under Topic 980 to recognize the impact of regulatory decisions on its financial statements. SJG is required under its Basic Gas Supply Service clause (BGSS) to forecast its natural gas costs and customer consumption in setting its rates. Subject to BPU approval, SJG is able to recover or return the difference between gas cost recoveries and the actual costs of gas through a BGSS charge to customers. SJG records any over/under recoveries as a regulatory asset or liability on the consolidated balance sheets and reflects it in the BGSS charge to customers in subsequent years. SJG also enters into derivatives that are used to hedge natural gas purchases. The offset to the resulting derivative assets or liabilities is also recorded as a regulatory asset or liability on the consolidated balance sheets.

The CIP is a BPU approved pilot program that is designed to eliminate the link between SJG's profits and the quantity of natural gas sold, and to foster conservation efforts. With the CIP, SJG's profits are tied to the number of customers served and how efficiently we serve them, thus allowing SJG to focus on encouraging conservation and energy efficiency among our customers without negatively impacting net income. The CIP tracking mechanism adjusts earnings based on weather and also adjusts earnings where actual usage per customer experienced during an annual period varies from an established baseline usage per customer. Utility earnings are recognized during current periods based upon the application of the CIP. The cash impact of variations in customer usage will result in cash being collected from, or returned to, customers during the subsequent CIP year, which runs from October 1 to September 30.

In addition to the BGSS and the CIP, other regulatory assets consist primarily of remediation costs associated with manufactured gas plant sites (discussed below under Environmental Remediation Costs), deferred pension and other postretirement benefit cost, and several other assets as detailed in Note 11 to the consolidated financial statements. If

there are changes in future regulatory positions that indicate the recovery of such regulatory assets is not probable, SJG would charge the related cost to earnings. Currently there are no such anticipated changes at the BPU.

TABLE OF CONTENTS

Derivatives — SJI recognizes assets or liabilities for contracts that qualify as derivatives that are entered into by its subsidiaries when contracts are executed. We record contracts at their fair value in accordance with FASB ASC Topic 815 – “Derivatives and Hedging.” We record changes in the fair value of the effective portion of derivatives qualifying as cash flow hedges, net of tax, in Accumulated Other Comprehensive Loss and recognize such changes in the income statement when the hedged item affects earnings. Changes in the fair value of derivatives not designated as hedges are recorded in earnings in the current period. Currently we do not designate energy-related derivative instruments as cash flow hedges. Certain derivatives that result in the physical delivery of the commodity may meet the criteria to be accounted for as normal purchases and normal sales if so designated, in which case the contract is not marked-to-market, but rather is accounted for when the commodity is delivered. Due to the application of regulatory accounting principles generally accepted in the United States of America (GAAP), derivatives related to SJG’s gas purchases that are marked-to-market are recorded through the BGSS. SJG occasionally enters into financial derivatives to hedge against forward price risk. These derivatives are recorded at fair value with an offset to regulatory assets and liabilities through SJG’s BGSS, subject to BPU approval (See Notes 10 and 11 to the consolidated financial statements). We adjust the fair value of the contracts each reporting period for changes in the market. As discussed in Notes 16 and 17 of the consolidated financial statements, energy-related derivative instruments are traded in both exchange-based and non-exchange-based markets. Exchange-based contracts are valued using unadjusted quoted market sources in active markets and are categorized in Level 1 in the fair value hierarchy established by FASB ASC Topic 820 – “Fair Value Measurements and Disclosures.” Certain non-exchange-based contracts are valued using indicative non-binding price quotations available through brokers or from over-the-counter, on-line exchanges and are categorized in Level 2. These price quotations reflect the average of the bid-ask mid-point prices and are obtained from sources that management believes provide the most liquid market. Management reviews and corroborates the price quotations with at least one additional source to ensure the prices are observable market information, which includes consideration of actual transaction volumes, market delivery points, bid-ask spreads and contract duration. Derivative instruments that are used to limit our exposure to changes in interest rates on variable-rate, long-term debt are valued using quoted prices on commonly quoted intervals, which are interpolated for periods different than the quoted intervals, as inputs to a market valuation model. Market inputs can generally be verified and model selection does not involve significant management judgment, as a result, these instruments are categorized in Level 2 in the fair value hierarchy. For non-exchange-based derivatives that trade in less liquid markets with limited pricing information, model inputs generally would include both observable and unobservable inputs. In instances where observable data is unavailable, management considers the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility and contract duration. Such instruments are categorized in Level 3 in the fair value hierarchy as the model inputs generally are not observable. Counterparty credit risk and the credit risk of SJI, are incorporated and considered in the valuation of all derivative instruments as appropriate. The effect of counterparty credit risk and the credit risk of SJI on the derivative valuations is not significant.

Environmental Remediation Costs — We estimate a range of future costs based on projected investigation and work plans using existing technologies. In preparing consolidated financial statements, SJI records liabilities for future costs using the lower end of the range of future costs because a single reliable estimation point is not feasible due to the amount of uncertainty involved in the nature of projected remediation efforts and the long period over which remediation efforts will continue. We update estimates each year to take into account past efforts, changes in work plans, remediation technologies, government regulations and site specific requirements (See Note 15 to the consolidated financial statements).

Pension and Other Postretirement Benefit Costs — The costs of providing pension and other postretirement employee benefits are impacted by actual plan experience as well as assumptions of future experience. Employee demographics, plan contributions, investment performance, and assumptions concerning mortality, return on plan assets, discount rates and health care cost trends all have a significant impact on determining our projected benefit obligations. We evaluate these assumptions annually and adjust them accordingly. These adjustments could result in significant

changes to the net periodic benefit costs of providing such benefits and the related liabilities recognized by SJI. While the discount rate and expected return on plan assets both decreased slightly in the determination of the 2009 benefit costs, the primary cost driver in 2009 was the erosion of plan assets during 2008. The declines in the equity markets during 2008 resulted in significant unrealized losses in the assets of the plans, causing the 2009 cost of providing such benefits to more than double.

The recognition of the unrealized losses originating in 2008 over the average remaining service period of active plan participants continued to cause the cost of providing such plans to remain relatively high in 2010. However, additional pension contributions and improvements in equity markets during both 2009 and 2010 further reduced the cost of providing such benefits in 2010, despite a 50 basis point decrease in the expected return on plan assets.

TABLE OF CONTENTS

Revenue Recognition — Gas and electricity revenues are recognized in the period the commodity is delivered to customers. SJG, SJRG and SJE bill customers monthly. A majority of SJG and SJE customers have their meters read on a cycle basis throughout the month. For SJG and SJE retail customers that are not billed at the end of each month, we record an estimate to recognize unbilled revenues for gas/electricity delivered from the date of the last meter reading to the end of the month. SJG's and SJE's unbilled revenue for natural gas is estimated each month based on monthly deliveries into the system; unaccounted for natural gas based on historical results; customer-specific use factors, when available; actual temperatures during the period; and applicable customer rates. SJE's unbilled revenue for retail electricity is based on customer-specific use factors and applicable customer rates. We bill SJG customers at rates approved by the BPU. SJE and SJRG customers are billed at rates negotiated between the parties.

We recognize revenues related to SJESP's appliance service contracts seasonally over the full 12-month term of the contract. Revenues related to services provided on a time and materials basis are recognized on a monthly basis as the services are provided.

Marina recognizes revenue on a monthly basis as services are provided and for on-site energy production that is delivered to its customers.

The BPU allows SJG to recover gas costs in rates through the BGSS price structure. SJG defers over/under recoveries of gas costs and includes them in subsequent adjustments to the BGSS rate. These adjustments result in over/under recoveries of gas costs being included in rates during future periods. As a result of these deferrals, utility revenue recognition does not directly translate to profitability. While SJG realizes profits on gas sales during the month of providing the utility service, significant shifts in revenue recognition may result from the various recovery clauses approved by the BPU. This revenue recognition process does not shift earnings between periods, as these clauses only provide for cost recovery on a dollar-for-dollar basis (See Notes 10 and 11 to the consolidated financial statements).

In January 2010, the BPU approved an extension of the CIP through 2013. The CIP may be extended for a one year period in the absence of a Board order taking any affirmative action to the contrary. Each CIP year begins October 1 and ends September 30 of the subsequent year. On a monthly basis during the CIP year, SJG records adjustments to earnings based on weather and customer usage factors, as incurred. Subsequent to each year, SJG makes filings with the BPU to review and approve amounts recorded under the CIP. BPU approved cash inflows or outflows generally will not begin until the next CIP year and have no impact on earnings at that time.

NEW ACCOUNTING PRONOUNCEMENTS — See detailed discussions concerning New Accounting Pronouncements and their impact on SJI in Note 1 to the consolidated financial statements.

RATES AND REGULATION — As a public utility, SJG is subject to regulation by the BPU. Additionally, the Natural Gas Policy Act, which was enacted in November 1978, contains provisions for Federal regulation of certain aspects of SJG's business. SJG is affected by Federal regulation with respect to transportation and pricing policies applicable to pipeline capacity from Transcontinental Gas Pipeline Corporation (SJG's major supplier), Columbia Gas Transmission Corporation and Dominion Transmission, Inc., since such services are provided under rates and terms established under the jurisdiction of the FERC. SJG's retail sales are made under rate schedules within a tariff filed with and subject to the jurisdiction of the BPU. These rate schedules provide primarily for either block rates or demand/commodity rate structures. SJG's primary rate mechanisms include base rates, the Basic Gas Supply Service Clause, Capital Investment Recovery Tracker, Energy Efficiency Tracker and the Conservation Incentive Program.

Effective September 17, 2010, the BPU granted SJG a base rate increase of \$42.1 million, which was predicated, in part, upon a 8.21% rate of return on rate base that included a 10.3% return on common equity. The \$42.1 million includes \$16.6 million of revenue previously recovered through the CIP and \$6.8 million of revenues previously recovered through the CIRT, resulting in incremental revenue of \$18.7 million. SJG was permitted to recover

regulatory assets contained in its petition and is allowed to defer certain federally mandated pipeline integrity management program costs for recovery in its next base rate case. In addition, annual depreciation expense will be reduced by \$1.2 million as a result of the amortization of excess cost of removal recoveries. The BPU also authorized a Phase II of the rate proceeding to address the recovery of investment in CIRT not rolled into rate base in this case.

TABLE OF CONTENTS

Basic Gas Supply Service Clause (BGSS) - In December 2002, the BPU approved the BGSS price structure which gave SJG customers the ability to make more informed decisions regarding their choices of an alternate supplier by having a utility price structure that is more consistent with market conditions. The cost of gas purchased from the utility by periodic consumers is set annually by the BPU through a BGSS clause within the tariff. When actual gas costs experienced are less than those charged to customers under the BGSS, customer bills in the subsequent BGSS period(s) are reduced by returning the overrecovery with interest. When actual gas costs are more than is recovered through rates, SJG is permitted to charge customers more for gas in future periods to recover the shortfall.

Capital Investment Recovery Tracker (CIRT) – In April 2009, the BPU approved an accelerated infrastructure investment program and an associated rate tracker, which allowed SJG to accelerate \$103.0 million of capital spending into 2009 and 2010. The BPU authorized Phase II of its rate case proceeding to address the recovery of investments in CIRT not rolled into rate base in its September 2010 rate case settlement. The CIRT allows SJG to earn a return of, and return on, investment as the capital is spent.

Energy Efficiency Tracker (EET) – In July 2009, the BPU approved an energy efficiency program to invest \$17.0 million over two years in energy efficiency programs for residential, commercial and industrial customers. Under this program, SJG can recover incremental operating and maintenance expenses and earn a return of, and return on, program investments.

Conservation Incentive Program (CIP) - The CIP is a BPU approved pilot program that is designed to eliminate the link between SJG profits and the quantity of natural gas SJG sells, and to foster conservation efforts. With the CIP, SJG's profits are tied to the number of customers served and how efficiently SJG serves them, thus allowing SJG to focus on encouraging conservation and energy efficiency among its customers without negatively impacting net income. The CIP tracking mechanism adjusts earnings based on weather, and also adjusts SJG's earnings when actual usage per customer experienced during an annual period varies from an established baseline usage per customer. In January 2010, the BPU approved an extension of the CIP through September 2013. The CIP may be extended for a one year period in the absence of a Board order taking any affirmative action to the contrary with regard to the pilot program.

Utility earnings are recognized during current periods based upon the application of the CIP. The cash impact of variations in customer usage will result in cash being collected from, or returned to, customers during the subsequent CIP year, which runs from October 1 to September 30.

The effects of the CIP on SJG's net income for the last three years and the associated weather comparisons were as follows (\$'s in millions):

	2010	2009	2008
Net Income Benefit:			
CIP – Weather Related	\$ 1.1	\$ 0.8	\$ 1.6
CIP – Usage Related	5.5	8.5	9.2
Total Net Income Benefit	\$ 6.6	\$ 9.3	\$ 10.8
Weather Compared to 20-Year Average	2.2% warmer	1.1% warmer	4.7% warmer
Weather Compared to Prior Year	0.1% warmer	3.9% colder	1.6% warmer

As part of the CIP, SJG is required to implement additional conservation programs including customized customer communication and outreach efforts, targeted upgrade furnace efficiency packages, financing offers, and an outreach

program to speak to local and state institutional constituents. SJG is also required to reduce gas supply and storage assets and their associated fees. Note that changes in fees associated with supply and storage assets have no effect on SJG's net income as these costs are passed through directly to customers on a dollar-for-dollar basis.

Earnings accrued and payments received under the CIP are limited to a level that will not cause SJG's return on equity to exceed 10.3% (excluding earnings from off-system gas sales and certain other tariff clauses) and the annualized savings attained from reducing gas supply and storage assets.

Other Rate Mechanisms - SJG's tariff also contains provisions permitting the recovery of environmental remediation costs associated with former manufactured gas plant sites, energy efficiency and renewable energy program costs, consumer education program costs and low-income program costs. These costs are recovered from customers through the Societal Benefits Clause.

TABLE OF CONTENTS

See additional detailed discussions on Rates and Regulatory Actions in Note 10 to the consolidated financial statements.

ENVIRONMENTAL REMEDIATION — See detailed discussion concerning Environmental Remediation in Note 15 to the consolidated financial statements.

COMPETITION — SJG's franchises are non-exclusive. Currently, no other utility provides retail gas distribution services within SJG's territory. SJG does not expect any other utilities to do so in the foreseeable future because of the extensive investment required for utility plant and related costs. SJG competes with oil, propane and electricity suppliers for residential, commercial and industrial users, with alternative fuel source providers (wind, solar and fuel cells) based upon price, convenience and environmental factors, and with other marketers/brokers in the selling of wholesale natural gas services. The market for natural gas commodity sales is subject to competition due to deregulation. SJG's competitive position against alternate fuels was enhanced while maintaining margins by using an unbundled tariff. This tariff allows full cost-of-service recovery when transporting gas for our customers. Under this tariff, SJG profits from transporting, rather than selling, the commodity. SJG's residential, commercial and industrial customers can choose their supplier while we recover the cost of service through transportation service (See Customer Choice Legislation below).

SJRG competes in the wholesale natural gas market against a wide array of competitors on a cost competitive, term of service, and reliability basis. SJRG has been a reliable energy provider in this arena for 15 years. There has been significant consolidation of energy wholesale operations and large financial institutions have also entered the marketplace. We expect this trend to continue in the near term, which could result in downward pressure on the margins available.

Marina competes with other companies that develop and operate on-site energy production. Marina also faces competition from customers' preferences for alternative technologies for energy production, as well as those customers that address their energy needs internally.

SJE competes with utilities and other third-party marketers to sell the unregulated natural gas and electricity commodity to customers. Marketers compete largely on price, which is driven by the commodity market. While the utilities are typically indifferent as to where customers get their gas or electricity, the price they set for the commodity they sell creates competition for SJE. Based on its market share, SJE is one of the largest marketers of natural gas in southern New Jersey as of December 31, 2010. In addition, similar to SJG, SJE faces competition from other energy products.

SJESP competes primarily with smaller, local contractors in southern New Jersey that install residential and commercial HVAC systems and provide major appliance repair and plumbing services. These contractors typically only serve their local communities and do not serve the entire southern part of New Jersey.

CUSTOMER CHOICE LEGISLATION— All residential natural gas customers in New Jersey can choose their natural gas commodity supplier under the terms of the "Electric Discount and Energy Competition Act of 1999." This bill created the framework and necessary time schedules for the restructuring of the state's electric and natural gas utilities. The Act established unbundling, where redesigned utility rate structures allow natural gas and electric consumers to choose their energy supplier. It also established time frames for instituting competitive services for customer account functions and for determining whether basic gas supply services should become competitive. Customers purchasing natural gas from a provider other than the local utility (the "marketer") are charged for the gas costs by the marketer and charged for the transportation costs by the utility. The total number of customers in SJG's service territory purchasing natural gas from a marketer averaged 30,152, 28,379 and 28,637 during 2010, 2009 and 2008, respectively.

RESULTS OF OPERATIONS:

SJI operates in several different reportable operating segments. Gas Utility Operations (SJG) consists primarily of natural gas distribution to residential, commercial and industrial customers. Wholesale Energy Operations include SJRG's activities. SJE is involved in both retail gas and retail electric activities. Retail Gas and Other Operations include natural gas acquisition and transportation service business lines. Retail Electric Operations consist of electricity acquisition and transportation to commercial and industrial customers. On-Site Energy Production consists of Marina's thermal energy facility and other energy-related projects. Appliance Service Operations includes SJESP's servicing of appliances via the sale of appliance service programs as well as on a time and materials basis, and the installation of residential and small commercial HVAC systems. The Retail Energy Operations caption includes Retail Gas and Other, Retail Electric, On-Site Energy Production and Appliance Service Operations.

TABLE OF CONTENTS

Net Income attributable to SJI for 2010 increased \$8.5 million, or 14.7%, to \$66.7 million compared to 2009 primarily as a result of the following:

The income contribution from SJE for 2010 increased \$13.2 million to \$8.8 million due primarily to the change in unrealized gains and losses on derivatives used to mitigate price risk on electric as discussed below.

The decrease in the effective tax rate in 2010 compared to 2009 is due to the impact of the investment tax credit available on renewable energy facilities at Marina, which resulted in a \$6.4 million decrease in income taxes.

The income contribution from SJG for 2010 increased \$4.7 million, or 12.0%, to \$43.9 million due primarily to the settlement of the base rate case in September 2010.

The income contribution from SJRG for 2010 decreased \$13.4 million, or 75.1%, to \$4.4 million due primarily to the change in unrealized gains and losses on derivatives used by SJRG to mitigate natural gas commodity price risk, as discussed below.

Net Income in 2009 decreased \$18.8 million, or 24.5%, to \$58.1 million compared with 2008. This decrease was primarily due to a 58.6% decrease in income contribution from SJRG and SJE related to the change in unrealized gains and losses on derivatives used to mitigate price risk on natural gas and electric as discussed below.

A significant portion of the volatility in operating results is due to the impact of the accounting methods associated with SJI's derivative activities. The Company uses derivatives to limit its exposure to market risk on transactions to buy, sell, transport and store natural gas and to buy and sell retail electricity. The Company also uses derivatives to limit its exposure to increasing interest rates on variable-rate debt.

The types of transactions that cause the most significant volatility in operating results are as follows:

SJRG purchases and holds natural gas in storage to earn a profit margin from its ultimate sale in the future. SJRG uses derivatives to mitigate commodity price risk in order to substantially lock-in the profit margin that will ultimately be realized. However, gas stored in inventory is accounted for at the lower of average cost or market; the derivatives used to reduce the risk associated with a change in the value of the inventory are accounted for at fair value, with changes in fair value recorded in operating results in the period of change. As a result, earnings are subject to volatility as the market price of derivatives change, even when the underlying hedged value of the inventory is unchanged. This volatility can be significant from period to period. Over time, gains or losses on sale of gas in storage will be offset by losses or gains on the derivatives, resulting in the realization of the profit margin expected when the transactions were initiated.

SJE uses forward contracts to mitigate commodity price risk on fixed price electric contracts with customers. In accordance with GAAP, the forward contracts are recorded at fair value, with changes in fair value recorded in earnings in the period of change. The related customer contracts are not considered derivatives and therefore are not recorded in earnings until the electric is delivered. As a result, earnings are subject to volatility as the market price of the forward contracts change, even when the underlying hedged value of the customer contract is unchanged. Over time, gains or losses on the sale of the fixed price electric under contract will be offset by losses or gains on the forward contracts, resulting in the realization of the profit margin expected when the transactions were initiated.

As a result, management also uses the non-generally accepted accounting principles ("non-GAAP") financial measures of Economic Earnings, Economic Earnings per share, Non-Utility Economic Earnings, Wholesale Energy Economic Earnings and Retail Energy Economic Earnings when evaluating the results of operations for its nonutility operations. These non-GAAP financial measures should not be considered as an alternative to GAAP measures, such as net

income, operating income, earnings per share from continuing operations or any other GAAP measure of liquidity or financial performance.

TABLE OF CONTENTS

We define Economic Earnings as: Income from continuing operations, (1) less the change in unrealized gains and plus the change in unrealized losses, as applicable and in each case after tax, on all commodity derivative transactions and the ineffective portion of interest rate derivative transactions that we are marking to market, and (2) adjusting for realized gains and losses, as applicable and in each case after tax, on all hedges attributed to inventory transactions to align them with the related cost of inventory in the period of withdrawal.

Economic Earnings is a significant performance metric used by our management to indicate the amount and timing of income from continuing operations that we expect to earn after taking into account the impact of derivative instruments on the related transactions. Specifically, we believe that this financial measure indicates to investors the profitability of the entire derivative related transaction and not just the portion that is subject to mark-to-market valuation under GAAP. Considering only the change in market value on the derivative side of the transaction can produce a false sense as to the ultimate profitability of the total transaction as no change in value is reflected for the non-derivative portion of the transaction.

Economic Earnings for 2010 increased \$9.7 million, or 13.7%, to \$81.0 million compared to 2009 primarily as a result of the following:

The decrease in the effective tax rate in 2010 compared to 2009 is due to the impact of the investment tax credit available on renewable energy facilities at Marina, which resulted in a \$6.4 million decrease in income taxes.

The income contribution from SJG for 2010 increased \$4.7 million, or 12.0%, to \$43.9 million due primarily to the settlement of the base rate case in September 2010.

TABLE OF CONTENTS

The following table presents a reconciliation of our income from continuing operations and earnings per share from continuing operations to Economic Earnings and Economic Earnings per share (in thousands except per share data):

	2010	2009	2008
Income from Continuing Operations	\$67,285	\$58,532	\$77,178
Minus/Plus:			
Unrealized Mark-to-Market Losses/(Gains) on Derivatives and Realized (Gains)/Losses on Inventory Injection Hedges	13,698	12,723	(9,302)
Economic Earnings	\$80,983	\$71,255	\$67,876
Earnings per Share from Continuing Operations	\$2.25	\$1.96	\$2.59
Minus/Plus:			
Unrealized Mark-to-Market Losses/(Gains) on Derivatives and Realized (Gains)/Losses on Inventory Injection Hedges	0.45	0.42	(0.32)
Economic Earnings per Share	\$2.70	\$2.38	\$2.27
Non-Utility Income from Continuing Operations	\$23,361	\$19,440	\$37,803
Minus/Plus:			
Unrealized Mark-to-Market Losses/(Gains) on Derivatives and Realized (Gains)/Losses on Inventory Injection Hedges	13,698	12,723	(9,302)
Non-Utility Economic Earnings	\$37,059	\$32,163	\$28,501
Wholesale Energy Income from Continuing Operations	\$4,447	\$17,859	\$29,787
Minus/Plus:			
Unrealized Mark-to-Market Losses/(Gains) on Derivatives and Realized (Gains)/Losses on Inventory Injection Hedges	16,771	6,817	(10,775)
Wholesale Energy Economic Earnings	\$21,218	\$24,676	\$19,012
Retail Energy Income from Continuing Operations	\$18,914	\$1,581	\$8,016
Minus/Plus:			
Unrealized Mark-to-Market Losses/(Gains) on Derivatives and Realized (Gains)/Losses on Inventory Injection Hedges	(3,073)	5,906	1,473
Retail Energy Economic Earnings	\$15,841	\$7,487	\$9,489

TABLE OF CONTENTS

Operating Revenues and Throughput— Utility — The following table summarizes the composition of select gas utility data for the three years ended December 31 (in thousands, except for customer and degree day data):

	2010		2009		2008	
Utility Throughput –						
dth:

* Represents expenses for which there is a corresponding credit in operating revenues. Therefore, such recoveries have no impact on our financial results.

Throughput — Utility - Total gas throughput increased 12.1 MMdts, or 12.3%, from 2009 to 2010. The majority of the increase is attributable to higher capacity release, which increased by 7.9 MMdts over the prior year, as reflected in the table above. More capacity became available during 2010 as capacity previously transferred out of SJG under the provisions of the CIP were returned to the utility. See additional discussion of the CIP under “Rates and Regulation.” In addition, cogeneration and electric generation sales and transportation throughput increased in 2010. As the summer of 2010 was one of the hottest on record, higher electric consumption for air conditioning drove the demand for greater natural gas consumption by the region’s electric utility. In the cogeneration market, a significant increase in transportation throughput was realized as a single customer increased its contract significantly to shift supply from its alternative pipeline supplier to SJG. Firm throughput also increased moderately due to the

addition of 3,956 residential customers in 2010.

27

TABLE OF CONTENTS

Total gas throughput decreased 45.7 MMdts, or 31.6%, from 2008 to 2009. Off-System sales (OSS) and capacity release volume decreased substantially in 2009 as SJG's portfolio of assets available for such activities had been reduced in prior years under the CIP. As the majority of profits from OSS and capacity release are returned to the ratepayers via a BPU-approved sharing formula, the resulting impact of such activity on SJG earnings was greatly mitigated, as reflected in the margin table above. Firm throughput increased in the residential market as a result of 3.9% colder weather and the addition of 3,264 residential customers during 2009 as compared with 2008. Changes in throughput in other customer categories were not significant.

Operating Revenues - Utility— Revenues decreased \$10.9 million, or 2.3%, during 2010 compared with 2009 after eliminating intercompany transactions. Firm revenues decreased \$6.3 million, or 1.4%, primarily as a result of a lower BGSS rate in effect during 2010. While changes in gas costs and BGSS recoveries may fluctuate from period to period, SJG does not profit from the sale of the commodity. Therefore, corresponding fluctuations in Operating Revenue or Cost of Sales have no impact on Company profitability, as further discussed under "Margin." There was also a \$2.2 million decrease in OSS during 2010 versus 2009. This decrease was primarily related to more volume being marketed as capacity release compared with 2009. As reflected in the Margin table above, the impact of lower OSS did not have a material impact on the earnings of the Company, as SJG is required to share 85% of the profits of such activity with the ratepayers.

Revenues for SJG decreased \$79.9 million during 2009, compared with 2008, primarily due to lower OSS revenue after eliminating intercompany transactions.

OSS and capacity release revenue decreased by \$57.5 million and \$11.3 million, respectively, during 2009 compared with 2008. These decreases were primarily related to continued reductions in SJG's portfolio of assets available for such activities under the provisions of the CIP, as noted above under "Throughput," and a significant decrease in the average cost per unit sold during 2009. The OSS unit sales prices declined from an average of \$9.39 per dt during 2008 to \$5.25 per dt during 2009 due to significant declines in the cost of natural gas during 2009. The impact of lower OSS and capacity release did not have a material impact on earnings. Firm sales revenue decreased approximately \$15.0 million during 2009 compared with 2008 also as a result of significantly lower natural gas prices. The average cost of natural gas purchased during 2009 was \$7.52 per dt, representing a 27.5% decrease relative to the average cost of \$10.38 per dt in 2008. This decrease in natural gas costs precipitated a customer refund of over-recovered gas costs through the BPU-approved BGSS in October 2009 totaling approximately \$20.4 million. As previously stated, SJG does not profit from the sale of the commodity. Therefore, corresponding fluctuations in Operating Revenue or Cost of Sales have no impact on Company profitability.

Operating Revenues — Nonutility 2010 vs. 2009 — Combined revenues for SJI's nonutility businesses, net of intercompany transactions, increased by \$90.5 million in 2010, compared with 2009.

SJE's revenues from retail gas, net of intercompany transactions, increased by \$4.4 million, or 4.1%, in 2010, compared with 2009 due mainly to volumetric growth of 13.1% and a 10.8% increase in the average monthly NYMEX settle price. The majority of SJE's natural gas customer contracts are market-priced. As of December 31, SJE was serving the following number of retail gas customers:

	2010	2009
Residential	7,177	8,772
Commercial & Large Volume	1,533	1,415

Sales volumes for the comparative period were as follows (in dekatherms):

	2010	2009
Residential	686,689	826,234
Commercial & Large Volume	17,633,243	15,365,834

Market conditions continue to make it difficult to be competitive in the residential and small commercial markets. We continue to focus our marketing efforts on the pursuit of non-heat-sensitive commercial customers in an effort to mitigate price volatility and weather risk.

TABLE OF CONTENTS

SJE's revenues from retail electricity, net of intercompany transactions, increased \$92.1 million, or 88.2%, in 2010, compared with 2009. Excluding the impact of the net change in unrealized gains/losses recorded on forward financial contracts due to price volatility of \$18.5 million, as discussed above, revenues increased \$73.6 million or 64.0%. A summary of SJE's retail electric revenue is as follows (in millions):

	2010	2009	Change
SJE Retail Electric Revenue	\$ 196.5	\$ 104.4	\$ 92.1
Add: Unrealized Losses (Subtract: Unrealized Gains)	(8.0)	10.5	(18.5)
SJE Retail Electric Revenue, Excluding Unrealized Losses (Gains)	\$ 188.5	\$ 114.9	\$ 73.6

This increase was mainly due to the impact of SJE being the successful bidder on a contract to supply retail electricity to over 400 school districts located throughout the state of New Jersey beginning in April 2009 and a 27.8% increase in the average monthly Locational Marginal Price (LMP) per megawatt hour in 2010 compared with 2009. Excluding the school bid, most of SJE's retail electric customer contracts are market-priced.

SJRG's revenues, net of intercompany transactions, decreased \$8.7 million in 2010, compared with 2009. Excluding the impact of the net change in unrealized gains/losses recorded on forward financial contracts of \$26.6 million due to price volatility and adjusting for realized gains and losses on all hedges attributed to inventory transactions of \$(9.8) million to align them with the related cost of inventory in the period of withdrawal, as discussed above, SJRG's revenues increased \$8.1 million. A summary of SJRG's revenue is as follows (in millions):

	2010	2009	Change
SJRG Revenue	\$ 88.4	\$ 97.1	\$ (8.7)
Add: Unrealized Losses (Subtract: Unrealized Gains)	30.7	4.1	26.6
Add: Realized Losses (Subtract: Realized Gains) on Inventory Injection Hedges	(2.3)	7.5	(9.8)
SJRG Revenue, Excluding Unrealized Losses (Gains) and Realized Losses (Gains) on Inventory Injection Hedges	\$116.8	\$ 108.7	\$8.1

This increase in revenues is mainly attributable to increased marketing of Marcellus area production gas, and a 43.1% increase in sales of storage volumes. As discussed in Note 16 to the consolidated financial statements, revenues and expenses related to the energy trading activities of SJRG are presented on a net basis in Operating Revenues – Nonutility.

Revenues for Marina increased \$1.1 million, or 3.0%, in 2010 compared with 2009, due mainly to higher chilled (23.8%) and hot (34.6%) water volumetric production. Volumetric increases were driven by the impact of improving economic conditions on resort occupancy and the significance of temperature extremes experienced in the summer and winter of 2010 compared with 2009. The increase was partially offset by the impact of the deconsolidation of AC Landfill Energy, LLC (ACLE) and WC Landfill Energy, LLC (WCLE) as discussed in Note 1 to the consolidated financial statements.

Revenues for SJESP increased \$0.8 million, or 4.4%, in 2010, compared with 2009, due mainly to additional installation jobs fueled by the availability of state stimulus incentives which was partially offset by revenues from a large commercial installation job recorded in 2009.

Operating Revenues — Nonutility 2009 vs. 2008 — Combined revenues for SJI's nonutility businesses, net of intercompany transactions, decreased by \$36.6 million in 2009, compared with 2008.

In 2009, SJE's revenues from retail gas, net of intercompany transactions, decreased by \$65.5 million, or 37.8%, in 2009, compared with 2008 due mainly to a 56.1% decrease in the average monthly NYMEX settle price. The majority of SJE's natural gas customer contracts are market-priced. In addition, as of December 31, 2009, SJE was serving 8,772 residential and 871 commercial customers compared with 10,310 residential and 1,089 commercial customers as of December 31, 2008. Market conditions continue to make it difficult to be competitive in these markets. We continue to focus our marketing efforts on the pursuit of non-heat-sensitive commercial customers in an effort to mitigate price volatility and weather risk.

TABLE OF CONTENTS

SJE's revenues from retail electricity, net of intercompany transactions, increased \$57.6 million or 123.2% in 2009, compared with 2008. Excluding the impact of the net change in unrealized losses recorded on forward financial contracts due to price volatility of \$10.5 million, revenues increased \$68.1 million or 145.6%. This increase was mainly due to the impact of SJE being the successful bidder on a contract to supply retail electricity to over 400 school districts located throughout the state of New Jersey beginning in April 2009. Partially offsetting this was a 51.9% decrease in the average monthly LMP per megawatt hour in 2009 compared with 2008. Excluding the school bid, essentially all of SJE's retail electric customer contracts are market-priced.

SJRG's revenues, net of intercompany transactions, decreased \$18.0 million in 2009, compared with 2008. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts of \$13.0 million due to price volatility, SJRG's revenues decreased \$5.0 million. A summary of SJRG's revenue is as follows (in millions):

	2009	2008	Change
SJRG Revenue	\$ 97.1	\$ 115.1	\$ (18.0)
Add: Unrealized Losses (Subtract: Unrealized Gains)	4.1	(8.9)	13.0
SJRG Revenue, Excluding Unrealized Losses (Gains)	\$ 101.2	\$ 106.2	\$ (5.0)

This decrease in revenues is mainly attributable to the timing of realized storage hedge gains and losses. See Gross Margin – Nonutility. The decrease is partially offset by a 9.2% increase in sales of storage volumes. Revenues and expenses related to the energy trading activities of SJRG are presented on a net basis in Operating Revenues – Nonutility.

Revenues for Marina decreased \$9.9 million or 21.2% in 2009, compared with 2008 due mainly to significantly lower sales rates for chilled and hot water. Lower sales rates were driven by lower underlying commodity prices. Volumetric hot water production increased 3.9% and chilled water production increased 1.8% in 2009 compared with 2008. Additional production was mainly attributable to a full year's usage from Borgata's Water Club tower which opened in June 2008. This was offset by lower demand, particularly for chilled water, at Borgata's other facilities mainly driven by the impact of current economic conditions on resort occupancy and significantly cooler temperatures in the summer of 2009 compared with 2008.

Revenues for SJESP decreased \$0.3 million or 1.5% in 2009, compared with 2008 due mainly to lower time and materials, plumbing and installation sales that were negatively impacted by depressed economic conditions. This was mostly offset by revenues from a large commercial installation job and a price increase to our warranty contracts that took effect April 1, 2008.

Margin — Utility — SJG's margin is defined as natural gas revenues less natural gas costs; volumetric and revenue based energy taxes; and regulatory rider expenses. We believe that margin provides a more meaningful basis for evaluating utility operations than revenues since natural gas costs, energy taxes and regulatory rider expenses are passed through to customers, and therefore, have no effect on margin. Natural gas costs are charged to operating expenses on the basis of therm sales at the prices approved by the New Jersey Board of Public Utilities through the BGSS tariff.

Total margin in 2010 increased \$17.2 million, or 10.2%, from 2009 primarily due to the rate case settlement discussed above under "Rates and Regulation", a full year of the CIRT and customer additions. The CIRT allows SJG to earn a return on approved infrastructure investments made under this program.

The CIP protected \$11.1 million of pre-tax margin in 2010 that would have been lost due to lower customer usage, compared to \$15.8 million in 2009. Of these amounts, \$1.9 million and \$1.4 million were related to weather variations and \$9.2 million and \$14.4 million were related to other customer usage variations in 2010 and 2009, respectively.

Total margin in 2009 increased \$3.4 million, or 2.1%, from 2008 primarily due to customer additions of 3,430 and approval in 2009 of SJG's CIRT, as discussed above under "Rates and Regulation." The CIRT allows SJG to earn a return on approved infrastructure investments made under this program. Partially offsetting these increases was a decrease in OSS and capacity release margins due to continued reductions in SJG's portfolio of assets available for such activities as discussed above.

TABLE OF CONTENTS

The CIP protected \$15.8 million of pre-tax margin that would have been lost due to lower customer usage, compared with \$18.4 million in 2008. Of these amounts, \$1.4 million and \$2.7 million were related to weather variations and \$14.4 million and \$15.7 million were related to other customer usage variations in 2009 and 2008, respectively.

Gross Margin — Nonutility — Gross margin for the nonutility businesses is defined as revenue less all costs that are directly related to the production, selling and delivery of the company's products and services. These costs primarily include natural gas and electric commodity costs as well as certain payroll and related benefits. On the statements of consolidated income, revenue is reflected in Operating Revenues - Nonutility and the costs are reflected in Cost of Sales - Nonutility. As discussed in Note 16 to the consolidated financial statements, revenues and expenses related to the energy trading activities of SJRG are presented on a net basis in Operating Revenues - Nonutility.

For 2010, combined gross margins for the nonutility businesses, net of intercompany transactions, decreased \$0.9 million to \$60.6 million compared with 2009. This decrease is primarily due to the following:

Gross margin for SJRG decreased \$21.8 million in 2010 compared with 2009. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts and the net change in realized gains and losses on all hedges attributed to inventory transactions as discussed above, gross margin for SJRG decreased \$5.1 million due mainly to tighter spreads attained on our storage and transportation assets. These tighter spreads were partially offset by margins derived from increased marketing of Marcellus production gas. Storage assets allow SJRG to lock in the differential between purchasing natural gas at low current prices and selling equivalent quantities at higher future prices. Gross margin is generated via seasonal pricing differentials. While this margin will be attained over the transaction cycle, the timing of physical injections and withdrawals and related hedge settlements can cause earnings fluctuations for accounting purposes due to the volatile nature of wholesale gas prices. During the injection season of 2009, NYMEX prices decreased significantly. Typical to our business cycle, we entered into financial hedges designed to protect our ultimate injection prices at a time when NYMEX prices were relatively high. These contracts settled in the injection months when the NYMEX had fallen considerably and thus produced significant realized hedge losses which were recorded into earnings. During this period we purchased less expensive physical gas that was injected into storage. During the injection season of 2010, the impact of realized hedge gains/losses recorded into earnings was not significant.

Overall, SJRG's contribution to margin from storage and transportation assets has decreased due to market conditions and we have begun to shed some of these assets. However, we expect to continue to add substantial margin from marketing and related opportunities in the Marcellus region, capitalizing on our established presence in the area. Future margins could fluctuate significantly due to the volatile nature of wholesale gas prices.

Storage and transportation assets under contract as of December 31 are as follows:

	2010	2009	2008
Storage (Bcf)	12.5	12.2	12.2
Transportation (dts/day)	83,115	153,000	124,375

Gross Margin for Marina decreased \$1.3 million in 2010 compared with 2009. Gross margin as a percentage of Operating Revenues decreased 5.1 percentage points due mainly to the deconsolidation of ACLE and WCLE as discussed in Note 1 to the consolidated financial statements and an increase in low-margin electric sales to the Borgata.

Gross margin from SJE's retail gas sales increased \$0.8 million in 2010, compared with 2009. Excluding the impact of a \$0.3 million change in unrealized gains/losses recorded on forward financial contracts as discussed above, gross

margin increased \$0.5 million in 2010, compared with 2009, due mainly to incremental margins from new customers acquired in our Pennsylvania retail book which was partially offset by the impact of lower New Jersey customer counts (See Operating Revenues – Nonutility). Gross margins as a percentage of Operating Revenues did not change significantly in 2010, compared with 2009.

TABLE OF CONTENTS

Gross margin from SJE's retail electricity sales increased \$21.0 million in 2010 compared with 2009. Excluding the impact of a \$18.5 million change in unrealized gains/losses recorded on forward financial contracts, gross margin increased \$2.5 million in 2010 compared with 2009. This increase was mainly due to the impact of the school bid and additional customer growth as mentioned in Operating Revenues - Nonutility. Excluding the impact of the change in unrealized gains/losses, gross margin as a percentage of Operating Revenues did not change significantly in 2010 compared with 2009.

Gross margin for SJESP increased \$0.1 million in 2010 compared with 2009. Gross margin as a percentage of Operating Revenues did not change significantly between years.

For 2009, combined gross margins for the nonutility businesses, net of intercompany transactions, decreased \$36.4 million to \$61.5 million compared with 2008. This decrease is primarily due to the following:

Gross Margin for SJRG decreased \$20.5 million in 2009, compared with 2008. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts as discussed above, gross margin for SJRG decreased \$8.3 million due mainly to the timing of realized hedge gains and losses related to our storage assets. Storage assets allow SJRG to lock in the differential between purchasing natural gas at low current prices and selling equivalent quantities at higher future prices. Gross margin is generated via seasonal pricing differentials. While this margin will be attained over the transaction cycle, the timing of physical injections and withdraws and related hedge settlements can cause earnings fluctuations for accounting purposes due to the volatile nature of wholesale gas prices. During the injection season of 2008, NYMEX prices increased significantly. Typical to our business cycle, we entered into financial hedges designed to protect our ultimate injection prices at a time when NYMEX prices were relatively low. These contracts settled in the injection months when the NYMEX had risen considerable and thus produced significant realized hedge gains which were recorded into earnings. During this period we purchased more expensive physical gas that was injected into storage. During the injection season of 2009, just the opposite occurred as NYMEX prices fell considerably and our hedge contracts were settled at significant losses which were recorded into earnings. However, during this period we were able to purchase physical injection gas at relatively low prices.

Storage and transportation assets under contract as of December 31 are as follows:

	2009	2008	2007
Storage (Bcf)	12.2	12.2	10.0
Transportation (dts/day)	153,000	124,375	69,429

Gross Margin for Marina decreased \$3.8 million in 2009, compared with 2008. Gross margin as a percentage of Operating Revenues increased 3.9 percentage points due mainly to a decrease in low-margin electric sales to Borgata. As per our contract, the billing rates are designed to recover the underlying commodity costs over time. However during interim periods, certain components of the underlying commodity costs are not adjusted proportionately.

Gross margin from SJE's retail gas sales decreased \$2.8 million in 2009, compared with 2008. Excluding the impact of a \$0.6 million change in unrealized gains/losses recorded on forward financial contracts, gross margin decreased \$2.2 million in 2009, compared with 2008 due mainly to lower customer counts (See Operating Revenues - Nonutility) and tighter margins due to increased competition. Also, during the first quarter of 2008, SJE partially recovered losses from a full requirements customer in the commercial market that were recognized in 2006. Gross margin as a percentage of Operating Revenues did not change significantly in 2009, compared with 2008.

Gross margin from SJE's retail electricity sales decreased \$8.9 million in 2009, compared with 2008. Excluding the impact of a \$10.5 million increase in unrealized losses recorded on forward financial contracts, gross margin increased \$1.6 million in 2009, compared with 2008. This increase was mainly due to the impact of the school bid as mentioned in Operating Revenues – Nonutility. Excluding the impact of the unrealized losses, gross margin as a percentage of Operating Revenues decreased 2.1 percentage points in 2009 compared with 2008. Margins as a percentage of Operating Revenues declined due to three main factors. First, we recovered some previously expensed costs in 2008. Second, several of our larger higher margin customers consumed significantly fewer volumes in 2009. Third, charges for transmission and marginal losses were substantially higher in 2009.

TABLE OF CONTENTS

Gross Margin for SJESP decreased \$0.1 million in 2009, compared with 2008. Gross margin as a percentage of Operating Revenues did not change significantly between years.

Operations Expense — A summary of net changes in operations expense follows (in thousands):

	2010 vs. 2009	2009 vs. 2008
Utility	\$ 4,728	\$ 6,422
Nonutility:		
Wholesale Energy	1,625	865
Retail Gas and Other	115	(366)
Retail Electricity	472	584
On-Site Energy Production	(539)	1,311
Appliance Service	1,031	586
Total Nonutility	2,704	2,980
Intercompany Eliminations and Other	(456)	(105)
Total Operations	\$ 6,976	\$ 9,297

Utility Operations expense increased \$4.7 million during 2010, as compared with 2009. This is the result of increases in expense associated with uncollectible customer accounts receivable, higher bank fees required to support credit availability and the Company's variable-rate debt, along with moderate increases in corporate support, governance, compliance and employee compensation costs.

Utility Operations expense increased \$6.4 million during 2009, as compared with 2008. This increase is primarily the result of a \$4.0 million increase in the cost of providing pension and other postretirement benefits plans during 2009 due to significant losses in the assets of those plans during 2008. The Company also experienced moderate increases in insurance, governance, compliance and employee compensation costs during 2009.

Nonutility operations expense increased in 2010 compared with the previous year due mainly to additional personnel, governance and compliance costs to support continued growth. These increases were partially offset by the impact of the deconsolidation of ACLE and WCLE, as discussed in Note 1 to the consolidated financial statements.

Nonutility On-Site Energy Production Operations expense increased in 2009 and 2008 compared with the previous year due mainly to higher labor and operating costs at all active projects, costs related to landfill projects and the thermal plant expansion that began operations during 2008.

Other changes in Operations Expense during 2010 and 2009 were not significant.

Other Operating Expenses — A summary of changes in other consolidated operating expenses (in thousands):

	2010 vs. 2009	2009 vs. 2008
Maintenance	\$ 2,681	\$ 970
Depreciation	\$ 2,738	\$ 2,043
Energy and Other Taxes	\$ 411	\$ (390)

Maintenance – Maintenance expense increased \$2.7 million during 2010, compared with 2009; and \$1.0 million during 2009, compared with 2008; primarily due to higher levels of Remediation Adjustment Clause (RAC) amortization. These costs are recovered from ratepayers; therefore, SJG experienced an offsetting increase in revenue during 2010 and 2009.

Depreciation Expense - Depreciation increased \$2.7 million during 2010 compared with 2009; and \$2.0 million during 2009, compared with 2008; due mainly to the increased investment in property, plant and equipment by SJG and Marina.

Energy and Other Taxes — The change in Energy and Other Taxes in 2010 and 2009 compared with the prior year was not significant.

TABLE OF CONTENTS

Other Income and Expense — Other income and expense increased \$3.1 million and \$0.5 million in 2010 and 2009 compared to the prior year, respectively, due to higher interest income charged for notes receivable advances to affiliates.

Interest Charges — Interest charges increased by \$2.9 million in 2010 as compared with 2009, and decreased \$6.7 million in 2009 as compared with 2008. The increase in 2010 was due primarily to higher average levels of short-term debt during 2010, along with the issuance of long-term debt at SJG (see Note 14 of the consolidated financial statements). The reduction in interest charges in 2009 as compared to 2008 was due to lower interest rates on short and long-term debt that more than offset higher average borrowing levels experienced during 2009. Higher borrowings were incurred in 2010 and 2009 mainly to support increased levels of capital investment.

Income Taxes – Income tax expense decreased by \$5.5 million for 2010 as compared to 2009. The effective tax rate decreased from 37.0% in 2009 to 30.0% in 2010. This decrease is primarily due to the impact of the investment tax credit available on renewable energy facilities at Marina.

Equity in Earnings of Affiliated Companies – Equity in earnings of affiliated companies decreased by \$2.1 million for 2010 as compared to 2009. This decrease in equity in earnings of affiliated companies is primarily due to unrealized losses on interest rate swaps at LVE.

Discontinued Operations — The losses are primarily comprised of environmental remediation and product liability litigation associated with previously disposed of businesses.

LIQUIDITY AND CAPITAL RESOURCES:

Liquidity needs are driven by factors that include natural gas commodity prices; the impact of weather on customer bills; lags in fully collecting gas costs from customers under the Basic Gas Supply Service charge; working capital needs of our energy trading and marketing activities; the timing of construction and remediation expenditures and related permanent financings; the timing of equity contributions to unconsolidated affiliates; mandated tax payment dates; both discretionary and required repayments of long-term debt; and the amounts and timing of dividend payments.

Cash Flows from Operating Activities — Liquidity needs are first met with net cash provided by operating activities. Net cash provided by operating activities totaled \$159.1 million, \$175.2 million and \$26.4 million in 2010, 2009 and 2008, respectively. Net cash provided by operating activities varies from year-to-year primarily due to the impact of weather on customer demand and related gas purchases, customer usage factors related to conservation efforts and the price of the natural gas commodity, inventory utilization and gas cost recoveries. Net cash provided by operating activities declined in 2010 as compared with 2009 due to higher accounts receivable balances at the end of 2010 caused by increased commodity marketing activities and the impact of cold weather on natural gas demand; higher prepaid taxes due to a late year tax law change; and high levels of cash produced in 2009 from the liquidation of high priced natural gas in inventory was not repeated in 2010. These factors more than offset an improved recovery of gas costs from customers under our BGSS clause and higher accounts payable due to the increased commodity sales at year end 2010. Net cash provided by operating activities in 2009 were positively impacted by lower unit gas costs and the impact of those costs on natural gas inventory balances. The Company also incurred lower environmental remediation costs in 2009 as compared with 2008. The lower environmental remediation costs include a decrease in remediation expenditures as well as increased insurance recoveries during 2009.

Cash Flows from Investing Activities — SJI has a continuing need for cash resources and capital, primarily to invest in new and replacement facilities and equipment. Net cash outflows for construction projects for 2010, 2009 and 2008 amounted to \$166.9 million, \$109.3 million and \$62.0 million, respectively. We estimate the net cash outflows for

construction projects for 2011, 2012 and 2013 to be approximately \$145.0 million, \$159.6 million and \$118.0 million, respectively. The increase in the 2010 capital expenditures was a direct result of SJG's CIRT program, which began in 2009. See additional details under "Rates and Regulation." For capital expenditures, including those under SJG's CIRT, the Company will use short-term borrowings under lines of credit from commercial banks to finance capital expenditures as incurred. From time to time, the Company will refinance the short-term debt incurred to support capital expenditures with long-term debt.

TABLE OF CONTENTS

In support of its risk management activities, the Company is required to maintain margin accounts with selected counterparties as collateral for its forward contracts, swap agreements, options contracts and futures contracts. These margin accounts are included in Restricted Investments or Margin Account Liability, depending upon the value of the related contracts, (the change in the Margin Account Liability is reflected in cash flows from Operating Activities) on the consolidated balance sheets. The required amount of restricted investments changes on a daily basis due to fluctuations in the market value of the related outstanding contracts and are difficult to predict. Margin posted by the Company increased by \$3.3 million during 2010, compared with a decrease of \$25.9 million during 2009 and a \$29.7 million increase in 2008.

During 2010, 2009 and 2008 the Company provided net advances to unconsolidated affiliates of \$96.1 million, \$23.9 million and \$7.5 million, respectively. The purpose of the advances was to develop several energy production facilities and to cover certain project related costs of LVE (See Commitments and Contingencies in Note 15 to the consolidated financial statements).

Cash Flows from Financing Activities — Short-term borrowings under lines of credit from commercial banks are used to supplement cash from operations, to support working capital needs and to finance capital expenditures as incurred. From time to time, short-term debt incurred to finance capital expenditures is refinanced with long-term debt.

Credit facilities and available liquidity as of December 31, 2010 were as follows (in thousands):

Company	Total Facility	Usage	Available Liquidity	Expiration Date
SJG:				
Revolving Credit Facility	\$ 100,000	\$ 50,000	\$ 50,000	August 2011(A)
Line of Credit	40,000	—	40,000	August 2011(A)
Uncommitted Bank Lines	40,000	8,900	31,100	Various
Total SJG	180,000	58,900	121,100	
SJI:				
Revolving Credit Facility	200,000	182,793	17,207	August 2011(A), (B)
Term Line of Credit	30,437	30,437	—	October 2011
Uncommitted Bank Lines	95,000	66,150	28,850	Various
Total SJI	325,437	279,380	46,057	
Total	\$ 505,437	\$ 338,280	\$ 167,157	

(A) The Company anticipates extending these lines of credit during the second quarter of 2011.

(B) Includes letters of credit in the amount of \$87.6 million under the SJI revolving credit facility.

The SJG facilities are restricted as to use and availability specifically to SJG; however, if necessary the SJI facilities can also be used to support SJG's liquidity needs. All committed facilities contain one financial covenant regarding the ratio of total debt to total capitalization, measured on a quarterly basis. SJI and SJG were in compliance with this covenant as of December 31, 2010. Borrowings under these credit facilities are at market rates. The weighted average borrowing cost, which changes daily, was 0.99%, 0.77% and 1.16% at December 31, 2010, 2009 and 2008, respectively. Based upon the existing credit facilities and a regular dialogue with our banks, we believe there will continue to be sufficient credit available to meet our business' future liquidity needs.

TABLE OF CONTENTS

SJI supplements its operating cash flow and credit lines with both debt and equity capital. Over the years, SJG has used long-term debt, primarily in the form of First Mortgage Bonds and Medium Term Notes (MTN), secured by the same pool of utility assets, to finance its long-term borrowing needs. These needs are primarily capital expenditures for property, plant and equipment. In September 2009, SJG received approval from the New Jersey Board of Public Utilities to issue up to \$150.0 million in long-term debt by September 2011. During 2010, SJG issued \$115.0 million aggregate principal amount of its MTNs under private placements and retired \$10.0 million of MTNs at par. In November 2009, SJG completed an early redemption of \$9.9 million of 6.50% bonds due in 2016. SJG redeemed this debt early to achieve significant interest expense savings due to the low interest rates available to SJG.

In June 2008, SJG repurchased \$25.0 million of its auction-rate securities at par by drawing under its lines of credit. That action resulted in a \$25.0 million reduction in long-term debt on SJG's balance sheet. SJG converted these repurchased auction-rate securities to variable rate demand bonds and remarketed them to the public during the third quarter of 2008. No other long-term debt was issued during 2008 or 2009.

In 2008, SJI raised equity capital through its Dividend Reinvestment Plan (DRP). Historically, participants in SJI's DRP received newly issued shares. Through the end of March 2008, we offered a 2% discount on DRP investments as it was the most cost-effective way to raise equity capital in the quantities we were seeking. Due to our continued strong equity position, beginning in April 2008, the 2% discount was not offered and DRP participants began receiving shares purchased in the market. Through the DRP, SJI raised \$2.1 million of equity capital by issuing 60,390 shares in 2008. In September 2008, we announced our intent to establish a stock repurchase program for SJI that could result in the repurchase of up to 1.5 million shares of SJI common stock at any time prior to October 2012. No purchases have been made to date.

SJI's capital structure was as follows:

	As of December 31,	
	2010	2009
Equity	44.8%	50.0%
Long-Term Debt	35.5	32.0
Short-Term Debt	19.7	18.0
Total	100.0%	100.0%

The change in the SJI capital structure from 2009 to 2010 is primarily related to an increase in borrowings to support higher accounts receivable balances at the end of 2010 caused by increased commodity marketing activities and the impact of cold weather on natural gas demand; an increase in the 2010 capital expenditures which was a direct result of SJG's CIRT program and an increase in net advances to unconsolidated affiliates to develop several energy production facilities and to cover certain project related costs of LVE as discussed above. A significant portion of these borrowings will be repaid in the first quarter of 2011 as the receivables are collected and the advances to unconsolidated affiliates are replaced with permanent financing.

For 2010, 2009 and 2008, SJI paid quarterly dividends to its common shareholders. SJI has paid dividends on its common stock for 59 consecutive years and has increased that dividend each year for the last ten years. The Company currently looks to grow that dividend by at least 6% to 7% per year and has a targeted payout ratio of between 50% and 60%. In setting the dividend rate, the Board of Directors of SJI considers future earnings expectations, payout ratio, and dividend yield relative to those at peer companies as well as returns available on other income-oriented investments. However, there can be no assurance that the Company will be able to continue to increase the dividend, meet the targeted payout ratio or pay a dividend at all in the future.

COMMITMENTS AND CONTINGENCIES — SJI has a continuing need for cash resources and capital, primarily to invest in new and replacement facilities and equipment and for environmental remediation costs. Cash outflows for capital expenditures for 2010, 2009 and 2008 amounted to \$166.9 million, \$109.3 million and \$62.0 million, respectively. Management estimates net cash outflows for construction projects for 2011, 2012 and 2013 to be approximately \$145.0 million, \$159.6 million and \$118.0 million, respectively. Costs for remediation projects, net of insurance reimbursements for 2010, 2009 and 2008 amounted to net cash outflows of \$3.5 million, \$0.4 million and \$26.2 million, respectively. Total cash outflows for remediation projects are expected to be approximately \$23.7 million, \$11.2 million and \$8.7 million for 2011, 2012 and 2013, respectively. As discussed in Notes 10 and 15 to the consolidated financial statements, certain environmental costs are subject to recovery from insurance carriers and ratepayers.

STANDBY LETTERS OF CREDIT — As of December 31, 2010, SJI provided \$87.6 million of standby letters of credit through SJI's revolving credit facility. Letters of credit in the amount of \$62.3 million support variable-rate demand bonds issued through the New Jersey Economic Development Authority (NJEDA) to finance Marina's initial thermal plant project and \$25.3 million were posted to enable SJE to market retail electricity and for various construction activities. The Company also provided an additional \$25.2 million letter of credit under a separate facility outside of the revolving credit facility to support variable-rate demand bonds issued through the NJEDA to finance the expansion of SJG's natural gas distribution system. This letter of credit expires in August 2011.

TABLE OF CONTENTS

SJG and SJRG have certain commitments for both pipeline capacity and gas supply for which they pay fees regardless of usage. Those commitments as of December 31, 2010, average \$46.1 million annually and total \$243.3 million over the contracts' lives. Approximately 26% of the financial commitments under these contracts expire during the next five years. We expect to renew each of these contracts under renewal provisions as provided in each contract. SJG recovers all prudently incurred fees through rates via the Basic Gas Supply Service clause.

The following table summarizes our contractual cash obligations and their applicable payment due dates as of December 31, 2010 (in thousands):

Contractual Cash Obligations	Total	Up to 1 Year	Years 2 & 3	Years 4 & 5	More than 5 Years
Long-Term Debt	\$ 451,400	\$ 111,400	\$ 29,375	\$ 36,284	\$ 274,341
Interest on Long-Term Debt	295,757	23,762	43,869	39,792	188,334
Construction Obligations	13,277	13,277	—	—	—
Operating Leases	3,078	676	1,106	840	456
Commodity Supply Purchase Obligations	611,798	372,762	132,264	27,745	79,027
New Jersey Clean Energy Program (Note 10)	24,031	11,053	12,978	—	—
Other Purchase Obligations	754	754	—	—	—
Total Contractual Cash Obligations	\$ 1,400,095	\$ 533,684	\$ 219,592	\$ 104,661	\$ 542,158

SJG's variable rate debt of \$25.0 million and Marina's variable rate debt of \$61.4 million have been included in the current portion of long-term debt above because the letters of credit that provide liquidity support expire in 2011 (see Note 14 of the consolidated financial statements). However, interest on long-term debt in the table above includes the related interest obligations through maturity as well as the impact of all interest rate swap agreements. Expected environmental remediation costs, asset retirement obligations and the liability for unrecognized tax benefits are not included in the table above as the total obligation cannot be calculated due to the subjective nature of these costs and the timing of anticipated payments. SJG's regulatory obligation to contribute \$3.6 million annually to its other postretirement benefit plans' trusts, less costs incurred directly by the company, is not included as the duration is indefinite.

Off-Balance Sheet Arrangements — An off-balance sheet arrangement is any contractual arrangement involving an unconsolidated entity under which the company has either made guarantees or has certain other interests or obligations.

The Company has recorded a liability of \$1.9 million which is included in Other Noncurrent Liabilities with a corresponding increase in Investment in Affiliates on the consolidated balance sheets as of December 31, 2010 for the fair value of the following guarantees:

In April 2007, SJI guaranteed certain obligations of LVE, an unconsolidated joint venture in which Marina has a 50% equity interest. LVE entered into a 25-year contract with a resort developer to design, build, own and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada. LVE began construction of the facility in 2007 and expected to provide full energy services in 2010 when the resort was originally scheduled to be completed. LVE suspended construction of the district energy system and central energy center in January 2009 after the resort developer's August 2008 announcement that it was delaying the completion of construction of the resort due to the difficult environment in the capital markets and weak economic conditions. The resort developer had indicated that it was considering different strategies to move its project forward, including opening its project in phases and obtaining a partner, but that it was unlikely construction would resume during 2009. In October 2010, the resort developer announced that they do not expect to resume construction on the project for three to five years. They

stated that they remain committed to having a significant presence on the Las Vegas Strip as part of a long-term growth strategy and continue to view this site as a major strategic asset.

TABLE OF CONTENTS

The district energy system and central energy center are being financed by LVE with debt that is non-recourse to SJI. The outstanding balance of LVE's bank debt is approximately \$220.6 million as of December 31, 2010. In September 2009, LVE reached an agreement with the banks that are financing the energy facilities to address defaults under the financing agreements. These LVE defaults were caused by the resort developer's construction delay and the termination of an energy services agreement by a hotel operator associated with the project. As a result of these defaults, the banks had previously stopped funding the project. The terms of the September 2009 agreement required SJI and its partner in this joint venture to guarantee the payment of future interest costs by LVE through, at the latest, December 2010. In addition, SJI and its partner in this joint venture each committed to provide approximately \$8.9 million of additional capital as of September 2009 to cover costs related to the termination of the energy services agreement by a hotel operator and interest costs incurred since August 2008 when the resort developer suspended construction. Of this amount, \$6.7 million was in the form of an irrevocable letter of credit from a bank and the remaining \$2.2 million was provided in cash in 2009. In turn, the banks waived all existing defaults under the financing agreements and were relieved of their commitment to provide additional funding. The \$6.7 million discussed above, along with the \$30.4 million of capital that Marina originally agreed to contribute as part of its construction period financing, was contributed in December 2010. As a result of the construction delay, the district energy system and central energy center was not completed by the end of 2010 as originally expected. Consequently, the full amount of LVE's debt became due and payable in December 2010. LVE intends to seek additional financing to complete the facility once construction of the resort resumes, however, as of December 31, 2010 LVE was in default under the financing agreements with the banks. The Energy Sales Agreement between LVE and the resort developer includes a payment obligation by the resort developer to pay certain fees and expenses to LVE. A portion of this payment obligation is guaranteed to LVE's lenders by the parent of the resort developer. LVE is currently in discussions with (a) the resort developer to determine the amount and timing of the payments to be made by the resort developer to LVE during the suspension period and (b) the banks that are financing the energy facilities to address the existing default under the financing agreements. As of December 31, 2010, the Company had a net liability of approximately \$1.6 million included in Other Noncurrent Liabilities on the consolidated balance sheets related to this project, in addition to unsecured Notes Receivable – Affiliate of approximately \$52.2 million due from LVE. As of December 31, 2010, SJI's capital at risk is limited to its equity contributions and the unsecured notes receivable totaling approximately \$65.3 million. During 2010, SJI and its partner in this joint venture each provided support to LVE of approximately \$48.5 million to cover interest and other project related costs and capital contribution obligations.

As a result of the construction delay, management has evaluated the investment in LVE and concluded that the fair value of this investment continues to be in excess of the carrying value as of December 31, 2010.

In 2007, SJI issued a performance guaranty for up to \$180.0 million to the resort developer to ensure that certain construction milestones relating to the development of the thermal facility are met. As a result of the resort developer not achieving certain milestones, SJI was no longer obligated under this guaranty as of December 31, 2010. SJI has also guaranteed certain performance obligations of LVE under the operating agreements between LVE and the resort developer, up to \$20.0 million each year for the term of the agreement, commencing with the first year of operations. SJI and its partner in this joint venture have entered into reimbursement agreements that secure reimbursement for SJI of a proportionate share of any payments made by SJI on these guarantees.

TABLE OF CONTENTS

SJI has guaranteed certain obligations of BC Landfill Energy, LLC (BCLE) and WC Landfill Energy, LLC (WCLE), unconsolidated joint ventures in which Marina has a 50% equity interest. BCLE and WCLE have entered into agreements ranging from 15-20 years with the respective county governments to lease and operate facilities that will produce electricity from landfill methane gas. Although unlikely, the maximum amount that SJI could be obligated for, in the event that BCLE and WCLE do not meet minimum specified levels of operating performance and no mitigating action is taken, or are unable to meet certain financial obligations as they become due, is approximately \$4.2 million each year. SJI and its partner in these joint ventures have entered into reimbursement agreements that secure reimbursement for SJI of a proportionate share of any payments made by SJI on these guarantees. SJI holds variable interests in BCLE and WCLE but is not the primary beneficiary.

SJI has guaranteed the long-term debt obligations of ACLE, an unconsolidated joint venture in which Marina has a 50% equity interest. ACLE has entered into a long-term agreement with a county government to lease and operate a facility that will produce electricity from landfill methane gas. Although unlikely, the maximum amount that SJI could be obligated for, in the event that ACLE is unable to meet certain financial obligations as they become due, is approximately \$1.5 million. SJI and its partner in this joint venture have entered into a reimbursement agreement that secures reimbursement for SJI of a proportionate share of any payments made by SJI on this guarantee. SJI holds a variable interest in ACLE but is not the primary beneficiary.

As of December 31, 2010, SJI had issued \$4.4 million of parental guarantees on behalf of an unconsolidated subsidiary. These guarantees generally expire within the next two years and were issued to enable our subsidiary to market retail natural gas.

Pending Litigation — SJI is subject to claims arising in the ordinary course of business and other legal proceedings. We accrue liabilities related to claims when we can reasonably estimate the amount or range of amounts of probable settlement costs or other charges. SJI has been named in, among other actions, certain product liability claims related to our former sand mining subsidiary. Management does not currently anticipate the disposition of any known claims to have a material adverse effect on SJI's financial position, results of operations or liquidity.

MARKET RISKS:

Commodity Market Risks — Certain regulated and nonregulated SJI subsidiaries are involved in buying, selling, transporting and storing natural gas and buying and selling retail electricity for their own accounts as well as managing these activities for other third parties. These subsidiaries are subject to market risk due to price fluctuations. To hedge against this risk, we enter into a variety of physical and financial transactions including forward contracts, swaps, futures and options agreements. To manage these transactions, SJI has a well-defined risk management policy approved by our Board of Directors that includes volumetric and monetary limits. Management reviews reports detailing activity daily. Generally, the derivative activities described above are entered into for risk management purposes.

SJG and SJE transact commodities on a physical basis and typically do not enter into financial derivative positions directly. SJRG manages risk in the natural gas markets for these entities as well as for its own portfolio by entering into the types of transactions noted above. As part of its gas purchasing strategy, SJG uses financial contracts through SJRG to hedge against forward price risk. These contracts are recoverable through SJG's BGSS, subject to BPU approval. It is management's policy, to the extent practical, within predetermined risk management policy guidelines, to have limited unmatched positions on a deal or portfolio basis while conducting these activities. As a result of holding open positions to a minimal level, the economic impact of changes in value of a particular transaction is substantially offset by an opposite change in the related hedge transaction.

TABLE OF CONTENTS

SJI has entered into certain contracts to buy, sell, and transport natural gas and to buy and sell retail electricity. For those derivatives not designated as hedges, we recorded the net unrealized pre-tax (loss) gain of \$(22.6) million, \$(14.8) million and \$9.3 million in earnings during the years 2010, 2009 and 2008, respectively, which are included with realized gains and losses in Operating Revenues — Nonutility. The fair value and maturity of these energy-trading contracts determined under the mark-to-market method as of December 31, 2010 is as follows (in thousands):

Assets

Source of Fair Value	Maturity < 1 Year	Maturity 1 - 3 Years	Maturity Beyond 3 Years	Total
Prices actively quoted	\$ 18,143	\$ 3,061	\$ —	\$ 21,204
Prices provided by other external sources	19,515	5,363	—	24,878
Prices based on internal models or other valuation methods	1,855	3,132	—	4,987
Total	\$ 39,513	\$ 11,556	\$ —	\$ 51,069

Liabilities

Source of Fair Value	Maturity < 1 Year	Maturity 1 - 3 Years	Maturity Beyond 3 Years	Total
Prices actively quoted	\$ 17,569	\$ 1,944	\$ —	\$ 19,513
Prices provided by other external sources	17,680	5,325	270	23,275
Prices based on internal models or other valuation methods	7,048	1,102	—	8,150
Total	\$ 42,297	\$ 8,371	\$ 270	\$ 50,938

NYMEX (New York Mercantile Exchange) is the primary national commodities exchange on which natural gas is traded. Basis represents the price of a NYMEX natural gas futures contract adjusted for the difference in price for delivering the gas at another location. Contracted volumes of our NYMEX contracts are 6.6 million dekatherms (dts) with a weighted-average settlement price of \$5.31 per dt. Contracted volumes of our basis contracts are 5.9 million dts with a weighted average settlement price of \$0.52 per dt. Contracted volumes of electric are 2.2 million mwh with a weighted average settlement price of \$56.72 per mwh.

A reconciliation of SJI's estimated net fair value of energy-related derivatives follows (in thousands):

Net Derivatives — Energy Related Assets, January 1, 2010	\$ 8,906
Contracts Settled During 2010, Net	(8,252)
Other Changes in Fair Value from Continuing and New Contracts, Net	(523)
Net Derivatives — Energy Related Assets, December 31, 2010	\$ 131

TABLE OF CONTENTS

Interest Rate Risk — Our exposure to interest-rate risk relates primarily to short-term, variable-rate borrowings. Short-term, variable-rate debt outstanding at December 31, 2010 was \$250.7 million and averaged \$191.6 million during 2010. A hypothetical 100 basis point (1%) increase in interest rates on our average variable-rate debt outstanding would result in a \$1.1 million increase in our annual interest expense, net of tax. The 100 basis point increase was chosen for illustrative purposes, as it provides a simple basis for calculating the impact of interest rate changes under a variety of interest rate scenarios. Over the past five years, the change in basis points (b.p.) of our average monthly interest rates from the beginning to end of each year was as follows: 2010 - 13 b.p. decrease; 2009 - 29 b.p. decrease; 2008 - 397 b.p. decrease; 2007 - 45 b.p. decrease; and 2006 - 67 b.p. increase. For December 2010, our average interest rate on variable-rate debt was 0.86%.

We issue long-term debt either at fixed rates or use interest rate derivatives to limit our exposure to changes in interest rates on variable-rate, long-term debt. As of December 31, 2010, the interest costs on all but \$7.1 million of our long-term debt was either at a fixed-rate or hedged via an interest rate derivative. Consequently, interest expense on existing long-term debt is not significantly impacted by changes in market interest rates.

As of December 31, 2010, SJI's active interest rate swaps were as follows:

Amount	Fixed Interest		Start Date	Maturity	Type	Obligor
	Rate					
\$3,900,000	4.795	%	12/01/2004	12/01/2014	Taxable	Marina
\$8,000,000	4.775	%	11/12/2004	11/12/2014	Taxable	Marina
\$20,000,000	4.080	%	11/19/2001	12/01/2011	Tax-exempt	Marina
\$14,500,000	3.905	%	03/17/2006	01/15/2026	Tax-exempt	Marina
\$500,000	3.905	%	03/17/2006	01/15/2026	Tax-exempt	Marina
\$330,000	3.905	%	03/17/2006	01/15/2026	Tax-exempt	Marina
\$7,100,000	4.895	%	02/01/2006	02/01/2016	Taxable	Marina
\$12,500,000	3.430	%	12/01/2006	02/01/2036	Tax-exempt	SJG
\$12,500,000	3.430	%	12/01/2006	02/01/2036	Tax-exempt	SJG

Credit Risk - As of December 31, 2010, approximately \$17.0 million, or 33.2%, of the current and noncurrent Derivatives – Energy Related Assets are with a single retail counterparty. This counterparty has contracts with a large number of diverse customers which minimizes the concentration of this risk. A portion of these contracts may be assignable to SJI in the event of a default by the counterparty.

As of December 31, 2010, SJRG had \$102.9 million of Accounts Receivable under sales contracts. Of that total, 86% were with regulated utilities or companies rated investment-grade or guaranteed by an investment-grade-rated parent or were with companies where we have a collateral arrangement or insurance coverage. The remainder of the Accounts Receivable were within approved credit limits.

Item 7A. Quantitative and Qualitative Disclosures about Market Risks

Information required by this item can be found in the section entitled “Market Risks” on page 39 of this report.

TABLE OF CONTENTS

Item 8. Financial Statements and Supplementary Data

Statements of Consolidated Income
(In Thousands Except for Per Share Data)

	South Jersey Industries, Inc. and Subsidiaries Year Ended December 31,		
	2010	2009	2008

TABLE OF CONTENTS

Notes to Consolidated Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

General – South Jersey Industries, Inc. (SJI or the Company) currently provides a variety of energy related products and services primarily through the following subsidiaries:

South Jersey Gas Company (SJG) is a regulated natural gas utility. SJG distributes natural gas in the seven southernmost counties of New Jersey.

South Jersey Resources Group, LLC (SJRG) markets wholesale natural gas storage, commodity and transportation in the mid-Atlantic, Appalachian and southern states.

Marina Energy, LLC (Marina) develops and operates on-site energy-related projects.

South Jersey Energy Company (SJE) acquires and markets natural gas and electricity to retail end users and provides total energy management services to commercial and industrial customers.

South Jersey Energy Service Plus, LLC (SJESP) installs residential and small commercial HVAC systems, provides plumbing services and services appliances via the sale of appliance service programs.

BASIS OF PRESENTATION — The consolidated financial statements include the accounts of SJI, its wholly owned subsidiaries and subsidiaries in which we have a controlling interest. We eliminate all significant intercompany accounts and transactions. In management’s opinion, the consolidated financial statements reflect all normal and recurring adjustments needed to fairly present SJI’s financial position and operating results at the dates and for the periods presented. Marina and a joint venture partner formed AC Landfill Energy, LLC (ACLE) and WC Landfill Energy, LLC (WCLE) to develop and install methane-to-electric power generation systems at certain county-owned landfills. Prior to January 1, 2010, the Company accounted for these entities as consolidated subsidiaries. In June 2009, the Financial Accounting Standards Board (FASB) issued new accounting guidance on the consolidation of variable interest entities (VIEs) which was effective for fiscal years beginning after November 15, 2009. The new accounting guidance for VIEs considers if a company has a controlling financial interest in a VIE. A controlling financial interest will have both (a) the power to direct the activities of a VIE that most significantly impact the VIE’s economic performance and (b) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. Entities are required to consolidate a VIE when it is determined that they have a controlling financial interest in a VIE and therefore, are the primary beneficiary of that VIE.

Marina and the joint venture partner of ACLE and WCLE share the executive board seats and their voting rights equally and equally approve the annual budgets of both entities. Based on the shared control of operations, management concluded as of January 1, 2010 that the Company is no longer the primary beneficiary of ACLE and WCLE as defined by the new accounting guidance. As a result, ACLE and WCLE are no longer accounted for as consolidated subsidiaries. As of December 31, 2010, ACLE and WCLE are included with other equity investments in Investment in Affiliates on the consolidated balance sheet. The results of operations of ACLE and WCLE for the year ended December 31, 2010 are included in Equity in Loss of Affiliated Companies on the consolidated statements of income. The adoption of this guidance modified our financial statement presentation, but did not have an impact on our financial statement results.

EQUITY INVESTMENTS — Marketable equity securities that are purchased as long-term investments are classified as Available-for-Sale Securities and carried at their fair value on our consolidated balance sheets. Any unrealized gains or losses are included in Accumulated Other Comprehensive Loss. SJI, through wholly owned subsidiaries, holds significant variable interests in several companies but is not the primary beneficiary. Consequently, these investments are accounted for under the equity method. In the event that losses and/or distributions from these equity method investments exceed the carrying value, and the Company is obligated to provide additional financial support, the excess will be recorded as either a current or non-current liability on the consolidated balance sheets. We include the

operations of these affiliated companies on a pre-tax basis in the statements of consolidated income under Equity in Affiliated Companies (See Note 3). An impairment loss is recorded when there is clear evidence that a decline in value is other than temporary. An insignificant impairment loss on Available-for-Sale Securities was recorded in 2008. No impairment losses were recorded on Investments during 2010 or 2009.

TABLE OF CONTENTS

ESTIMATES AND ASSUMPTIONS — We prepare our consolidated financial statements to conform with accounting principles generally accepted in the United States of America (GAAP). Management makes estimates and assumptions that affect the amounts reported in the consolidated financial statements and related disclosures.

Therefore, actual results could differ from those estimates. Significant estimates include amounts related to regulatory accounting, energy derivatives, environmental remediation costs, pension and other postretirement benefit costs, and revenue recognition.

REGULATION — SJG is subject to the rules and regulations of the New Jersey Board of Public Utilities (BPU). See Note 10 for a detailed discussion of SJG's rate structure and regulatory actions. SJG maintains its accounts according to the BPU's prescribed Uniform System of Accounts. SJG follows the accounting for regulated enterprises prescribed by FASB ASC Topic 980 - "Regulated Operations." In general, Topic 980 allows for the deferral of certain costs (regulatory assets) and creation of certain obligations (regulatory liabilities) when it is probable that such items will be recovered from or refunded to customers in future periods. See Note 11 for a detailed discussion of regulatory assets and liabilities.

OPERATING REVENUES — Gas and electric revenues are recognized in the period the commodity is delivered to customers. For SJG and SJE retail customers that are not billed at the end of the month, we record an estimate to recognize unbilled revenues for gas and electricity delivered from the date of the last meter reading to the end of the month. SJRG's gas revenues are recognized in the period the commodity is delivered. Unrealized gains and losses on energy related derivative instruments are also recognized in operating revenues for SJRG. See further discussion under Derivative Instruments. We recognize revenues related to SJESP appliance service contracts seasonally over the full 12-month terms of the contracts. Revenue related to services provided on a time and materials basis is recognized on a monthly basis as the jobs are completed. Marina recognizes revenue on a monthly basis as services are provided, as lease income is earned, and for on-site energy production that is delivered to its customers.

REVENUE BASED TAXES — SJI collects certain revenue-based energy taxes from customers. Such taxes include New Jersey State Sales Tax, Transitional Energy Facility Assessment (TEFA) and Public Utilities Assessment (PUA). State sales tax is recorded as a liability when billed to customers and is not included in revenue or operating expenses. TEFA and PUA are included in both utility revenue and cost of sales and totaled \$8.6 million, \$8.8 million and \$8.7 million in 2010, 2009 and 2008, respectively.

ACCOUNTS RECEIVABLE AND PROVISION FOR UNCOLLECTIBLE ACCOUNTS — Accounts receivable are carried at the amount owed by customers. A provision for uncollectible accounts is established based on our collection experience and an assessment of the collectibility of specific accounts.

PROPERTY, PLANT AND EQUIPMENT — For regulatory purposes, utility plant is stated at original cost, which may be different than SJG's cost if the assets were acquired from another regulated entity. Nonutility plant is stated at cost. The cost of adding, replacing and renewing property is charged to the appropriate plant account.

ASSET RETIREMENT OBLIGATIONS — The amounts included under Asset Retirement Obligations (ARO) are primarily related to the legal obligations the Company has to cut and cap gas distribution pipelines when taking those pipelines out of service in future years. These liabilities are generally recognized upon the acquisition or construction of the asset. The related asset retirement cost is capitalized concurrently by increasing the carrying amount of the related asset by the same amount as the liability. Changes in the liability are recorded for the passage of time (accretion) or for revisions to cash flows originally estimated to settle the ARO.

ARO activity was as follows (in thousands):

	2010	2009
--	------	------

ARO's as of January 1,	\$	23,229	\$	22,553
Accretion		481		507
Additions		242		193
Settlements		(29)		(24)
Revisions in Estimated Cash Flows ¹		4,273		—
Deconsolidation ²		(231)		—
ARO's as of December 31,	\$	27,965	\$	23,229

¹A corresponding increase was made to Regulatory Assets, thus having no impact on earnings.

²Reduction resulting from the deconsolidation of ACLE and WCLE as discussed above.

TABLE OF CONTENTS

DEPRECIATION — We depreciate utility plant on a straight-line basis over the estimated remaining lives of the various property classes. These estimates are periodically reviewed and adjusted as required after BPU approval. The composite annual rate for all depreciable utility property was approximately 2.4% in 2010 and 2.3% in both 2009 and 2008. The actual composite rate may differ from the approved rate as the asset mix changes over time. Except for retirements outside of the normal course of business, accumulated depreciation is charged with the cost of depreciable utility property retired, less salvage. Nonutility property depreciation is computed on a straight-line basis over the estimated useful lives of the property, ranging up to 50 years. Gain or loss on the disposition of nonutility property is recognized in operating income.

CAPITALIZED INTEREST — SJG capitalizes interest on construction at the rate of return on the rate base utilized by the BPU to set rates in its last base rate proceeding (See Note10). Marina capitalizes interest on construction projects in progress based on the actual cost of borrowed funds. SJG's amounts are included in Utility Plant and Marina's amounts are included in Nonutility Property and Equipment on the consolidated balance sheets. Interest Charges are presented net of capitalized interest on the consolidated statements of income. The amount of interest capitalized by SJI for the years ended December 31, 2010, 2009 and 2008 was not significant.

IMPAIRMENT OF LONG-LIVED ASSETS — We review the carrying amount of long-lived assets for possible impairment whenever events or changes in circumstances indicate that such amounts may not be recoverable. For the years ended 2010, 2009 and 2008, no significant impairments were identified.

DERIVATIVE INSTRUMENTS - SJI accounts for derivative instruments in accordance with FASB ASC Topic 815 – “Derivatives and Hedging.” We record all derivatives, whether designated in hedging relationships or not, on the consolidated balance sheets at fair value unless the derivative contracts qualify for the normal purchase and sale exemption. In general, if the derivative is designated as a fair value hedge, we recognize the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk in earnings. We currently have no fair value hedges. If the derivative is designated as a cash flow hedge, we record the effective portion of the hedge in Accumulated Other Comprehensive Loss and recognize it in the income statement when the hedged item affects earnings. We recognize ineffective portions of the cash flow hedges immediately in earnings. Currently, we do not designate energy-related derivative instruments as cash flow hedges. We formally document all relationships between hedging instruments and hedged items, as well as our risk management objectives, strategies for undertaking various hedge transactions and our methods for assessing and testing correlation and hedge ineffectiveness. All hedging instruments are linked to the hedged asset, liability, firm commitment or forecasted transaction. Due to the application of regulatory accounting principles under FASB ASC Topic 980, gains and losses on derivatives related to SJG's gas purchases are recorded through the Basic Gas Supply Service (BGSS) clause.

Initially and on an ongoing basis, we assess whether derivatives designated as hedges are highly effective in offsetting changes in cash flows or fair values of the hedged items. We discontinue hedge accounting prospectively if we decide to discontinue the hedging relationship; determine that the anticipated transaction is no longer likely to occur; or determine that a derivative is no longer highly effective as a hedge. In the event that hedge accounting is discontinued, we will continue to carry the derivative on the balance sheet at its current fair value and recognize subsequent changes in fair value in current period earnings. Unrealized gains and losses on the discontinued hedges that were previously included in Accumulated Other Comprehensive Loss will be reclassified into earnings when the forecasted transaction occurs, or when it is probable that it will not occur.

GAS EXPLORATION AND DEVELOPMENT - The Company capitalizes all costs associated with gas property acquisition, exploration and development activities under the full cost method of accounting. Capitalized costs include costs related to unproved properties, which are not amortized until proved reserves are found or it is determined that the unproved properties are impaired. All costs related to unproved properties are reviewed quarterly to determine if impairment has occurred. As of December 31, 2010 and 2009, \$3.3 million and \$3.5 million, respectively, related to

interests in proved and unproved properties in Pennsylvania, net of amortization, are included with Nonutility Property and Equipment on the consolidated balance sheets.

TREASURY STOCK — SJI uses the par value method of accounting for treasury stock. As of December 31, 2010 and 2009, SJI held 143,546 and 146,028 shares of treasury stock respectively. These shares are related to deferred compensation arrangements where the amounts earned are held in the stock of SJI.

TABLE OF CONTENTS

INCOME TAXES — Deferred income taxes are provided for all significant temporary differences between the book and taxable basis of assets and liabilities in accordance with FASB ASC Topic 740 - “Income Taxes” (See Note 4). A valuation allowance is established when it is determined that it is more likely than not that a deferred tax asset will not be realized. Investment tax credits related to renewable energy facilities of the non-regulated entities are recognized on the flow through method.

CASH AND CASH EQUIVALENTS — For purposes of reporting cash flows, highly liquid investments with original maturities of three months or less are considered cash equivalents.

NEW ACCOUNTING PRONOUNCEMENTS — Other than as described below, no new accounting pronouncement issued or effective during 2009 and 2010 had, or are expected to have, a material impact on the consolidated financial statements.

In June 2009, the FASB issued new accounting guidance on the consolidation of VIEs. Accordingly, companies needed to carefully reconsider previous conclusions, including (1) whether an entity is a VIE, (2) whether the company is the VIE’s primary beneficiary, and (3) what type of financial statement disclosures are required. The new guidance was effective for fiscal years beginning after November 15, 2009. As a result of adopting this guidance, we have deconsolidated ACLE and WCLE as of January 1, 2010 due to the shared control between the Company and the joint venture partner as discussed under “Basis of Presentation” above. Beginning January 1, 2010, ACLE and WCLE are reported using the equity method of accounting. The adoption of this guidance modified our financial statement presentation, but did not have an impact on our financial statement results.

HEALTH CARE LEGISLATION – In March of 2010, the President of the United States signed into law comprehensive health care reform legislation under the Patient Protection and Affordable Care Act (HR 3590) and the Health Care Education and Affordability Reconciliation Act (HR 4872) (the “Acts”). The Acts contain provisions which could have impacted our accounting for retiree medical benefits in future periods. However, based on our analysis of the provisions in the Acts, a re-measurement of our Other Postretirement Benefits liability is not required at this time due to the retiree medical benefit plan design, which includes benefit caps and cost sharing provisions. The Acts also contain provisions that will increase the cost of providing medical benefits to active employees and their dependents. This increase is not expected to be material to the financial results of the Company.

2. STOCK-BASED COMPENSATION PLAN

Under the Amended and Restated 1997 Stock-Based Compensation Plan, no more than 2,000,000 shares in the aggregate may be issued to SJI’s officers (Officers), non-employee directors (Directors) and other key employees. The plan will terminate on January 26, 2015, unless terminated earlier by the Board of Directors. No options were granted or outstanding during the years ended December 31, 2010, 2009 and 2008 and no stock appreciation rights have been issued under the plan. During the years ended December 31, 2010, 2009 and 2008, SJI granted 52,940, 41,437, and 45,241 restricted shares to Officers and other key employees, respectively. These restricted shares vest over a three-year period and are subject to SJI achieving certain market based performance targets as compared to a peer group average, which can cause the actual amount of shares that ultimately vest to range from between 0% to 150% of the original share units granted. SJI granted 16,700, 9,559 and 8,667 restricted shares to Directors in January 2010, 2009 and 2008 respectively. These shares vest over a three-year service period and contain no performance conditions. As a result, 100% of the shares granted generally vest.

As the vesting requirements for officers and other key employees under the plan are contingent upon market and service conditions, SJI is required to measure and recognize stock-based compensation expense based on the fair value at the date of grant for its share-based awards on a straight-line basis over the requisite service period of each award. In addition, SJI identifies specific forfeitures of share-based awards and compensation expense is adjusted accordingly

over the requisite service period. Compensation expense is not adjusted based on the actual achievement of performance goals. The Company estimated the fair value of Officers' restricted stock awards on the date of grant using a Monte Carlo simulation model.

TABLE OF CONTENTS

The following table summarizes the nonvested restricted stock awards outstanding at December 31, 2010 and the assumptions used to estimate the fair value of the awards:

	Grant Date	Shares Outstanding	Fair Value Per Share	Expected Volatility	Risk-Free Interest Rate
Officers & Key Employees	Jan. 2009	37,748	\$ 39.350	28.6%	1.20%
	Jan. 2010	52,940	\$ 39.020	29.0%	1.65%
Directors -	Jan. 2009	8,690	\$ 40.265	—	—
	Jan. 2010	16,700	\$ 37.825	—	—

Expected volatility is based on the actual volatility of SJI's share price over the preceding three-year period as of the valuation date. The risk-free interest rate is based on the zero-coupon U.S. Treasury Bond, with a term equal to the three-year term of the Officers' and other key employees' restricted shares. As notional dividend equivalents are credited to the holders, during the three-year service period, no reduction to the fair value of the award is required. As the Directors' restricted stock awards contain no performance conditions and dividends are paid or credited to the holder during the three-year service period, the fair value of these awards are equal to the market value of shares on the date of grant.

The following table summarizes the total stock based compensation cost for the years ended December 31, (in thousands):

	2010	2009	2008
Officers & Key Employees	\$ 1,628	\$ 1,322	\$ 1,144
Directors	394	330	268
Total Cost	2,022	1,652	1,412
Capitalized	(202)	(171)	(149)
Net Expense	\$ 1,820	\$ 1,481	\$ 1,263

As of December 31, 2010, there was \$2.4 million of total unrecognized compensation cost related to nonvested share-based compensation awards granted under the restricted stock plans. That cost is expected to be recognized over a weighted average period of 1.7 years.

The following table summarizes information regarding restricted stock award activity during 2010 excluding accrued dividend equivalents:

	Officers & Key Employees	Directors	Weighted Average Grant Date Fair Value
Nonvested Shares Outstanding, January 1, 2010	80,281	16,394	\$ 36.874
Granted	52,940	16,700	\$ 38.733
Vested*	(42,144)	(7,704)	\$ 34.389
Cancelled/Forfeited	(389)	—	\$ 39.350
Nonvested Shares Outstanding, December 31, 2010	90,688	25,390	\$ 39.049

*Actual shares expected to be awarded to officers and other key employees during the first quarter of 2011, including dividend equivalents and adjustments for performance measures, total 69,271 shares.

During the years ended December 31, 2010, 2009 and 2008, SJI awarded 59,893 shares at a market value of \$2.3 million, 57,976 shares at a market value of \$2.3 million, and 51,838 shares at a market value of \$1.9 million, respectively, to its Officers and other key employees. Also, during the years ended December 31, 2010, 2009 and 2008, SJI awarded 16,700, 9,559 and 8,667 shares to its Directors at a market value of \$0.6 million, \$0.4 million and \$0.3 million, respectively. The Company has a policy of issuing new shares to satisfy its obligations under these plans; therefore, there are no cash payment requirements resulting from the normal operation of this plan. However, a change in control could result in such shares becoming nonforfeitable or immediately payable in cash. At the discretion of the officers and other key employees, the receipt of vested shares can be deferred until future periods. These deferred shares are included in Treasury Stock on the Consolidated Balance Sheet.

TABLE OF CONTENTS

3. DISCONTINUED OPERATIONS AND AFFILIATIONS:

DISCONTINUED OPERATIONS — Discontinued Operations consist of the environmental remediation activities related to the properties of South Jersey Fuel, Inc. (SJF) and the product liability litigation and environmental remediation activities related to the prior business of The Morie Company, Inc. (Morie). SJF is a subsidiary of Energy & Minerals, Inc. (EMI), an SJI subsidiary, which previously operated a fuel oil business. Morie is the former sand mining and processing subsidiary of EMI. EMI sold the common stock of Morie in 1996.

SJI conducts tests annually to estimate the environmental remediation costs for these properties.

Summarized operating results of the discontinued operations for the years ended December 31, were (in thousands, except per share amounts):

	2010	2009	2008
Loss before Income Taxes:			
Sand Mining	\$ (440)	\$ (289)	\$ (227)
Fuel Oil	(530)	(362)	(149)
Income Tax Benefits	337	224	129
Loss from Discontinued Operations	\$ (633)	\$ (427)	\$ (247)
Earnings Per Common Share from Discontinued Operations			
Basic	\$ (0.02)	\$ (0.02)	\$ (0.01)
Diluted	\$ (0.03)	\$ (0.02)	\$ (0.01)

AFFILIATIONS — The following affiliated entities are accounted for under the equity method:

SJI and Conectiv Solutions, LLC formed Millennium Account Services, LLC in which SJI has a 50% equity interest, to provide meter reading services in southern New Jersey.

Marina and a joint venture partner formed the following entities of which Marina has a 50% equity interest:

LVE Energy Partners, LLC (LVE), which has entered into a contract to design, build, own and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada.

Energenic – US, LLC (Energenic), which develops and operates on-site, self contained, energy related projects.

During 2010, 2009, and 2008 the Company provided advances to unconsolidated affiliates of \$102.0 million, \$26.8 million, and \$7.5 million, respectively. The purpose of the advances was to cover certain project related costs of LVE (See Note 15), to provide a portion of the financing needed to acquire a central utility plant at a new casino in Pennsylvania and develop several landfill gas-fired electric production facilities and solar projects. As of December 31, 2010 and 2009, the outstanding balance on these Notes Receivable – Affiliate was \$127.9 million and \$31.3 million respectively. Approximately \$63.0 million of these notes are secured by property, plant and equipment of the affiliates, accrue interest at 7.5% and are to be repaid through 2025. The remaining \$64.9 million of these notes are unsecured, and are either non-interest bearing or accrue interest at variable rates and are to be repaid when the affiliate secures permanent financing.

SJI holds significant variable interests in these entities, but is not the primary beneficiary. Consequently, these entities are accounted for under the equity method because SJI does not have both a) the power to direct the activities of the entity that most significantly impact the entity's economic performance and b) the obligation to absorb losses of the

entity that could potentially be significant to the entity or the right to receive benefits from the entity that could potentially be significant to the entity. As of December 31, 2010, the Company had a net asset of approximately \$6.0 million included in Investment in Affiliates and Other Noncurrent Liabilities on the consolidated balance sheets related to Millennium, LVE and Energenic, in addition to Notes Receivable – Affiliate as discussed above. SJI's maximum exposure to loss from these entities as of December 31, 2010 is limited to its combined equity contributions and the Notes Receivable-Affiliate in the amount of \$138.4 million.

TABLE OF CONTENTS

SJRG and a joint venture partner formed Potato Creek, LLC (Potato Creek) in which SJRG has a 30% equity interest. Potato Creek owns and manages the oil, gas and mineral rights of certain real estate in Pennsylvania. The mineral rights have been leased to a third party production company.

4. INCOME TAXES:

SJI files a consolidated federal income tax return. State income tax returns are filed on a separate company basis in states where SJI has operations and/or a requirement to file. Total income taxes applicable to operations differ from the tax that would have resulted by applying the statutory Federal income tax rate to pre-tax income for the following reasons (in thousands):

	2010	2009	2008
Tax at Statutory Rate	\$ 33,634	\$ 32,492	\$ 45,194
Increase (Decrease) Resulting from:			
State Income Taxes	5,669	6,079	8,291
ESOP	(971)	(894)	(818)
Amortization of Investment Tax Credits	(310)	(314)	(318)
Amortization of Flowthrough Depreciation	664	664	664
Energy Tax Credits	(10,107)	(3,660)	(391)
Other - Net	232	(65)	(674)
Income Taxes:			
Continuing Operations	28,811	34,302	51,948
Discontinued Operations	(337)	(224)	(129)
Net Income Taxes	\$ 28,474	\$ 34,078	\$ 51,819

The provision for Income Taxes is comprised of the following (in thousands):

	2010	2009	2008
Current:			
Federal	\$ (7,527)	\$ 7,396	\$ 19,684
State	7,753	5,303	9,568
Total Current	226	12,699	29,252
Deferred:			
Federal	27,927	17,867	19,839
State	968	4,050	3,175
Total Deferred	28,895	21,917	23,014
Investment Tax Credits	(310)	(314)	(318)
Income Taxes:			
Continuing Operations	28,811	34,302	51,948
Discontinued Operations	(337)	(224)	(129)
Net Income Taxes	\$ 28,474	\$ 34,078	\$ 51,819

Investment Tax Credits attributable to SJG are deferred and amortized at the annual rate of 3%, which approximates the life of related assets.

TABLE OF CONTENTS

The net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting and income tax purposes resulted in the following net deferred tax liabilities (assets) at December 31 (in thousands):

	2010	2009
Current:		
Deferred Gas Costs - Net	\$ —	\$ 4,122
Derivatives / Unrealized Gain	(272)	8,818
Conservation Incentive Program	5,408	7,396
Other	(1,854)	(439)
Current Deferred Tax Liability - Net	\$ 3,282	\$ 19,897
Noncurrent:		
Book versus Tax Basis of Property	\$ 263,429	\$ 212,452
Deferred Gas Costs - Net	2,955	7,567
Environmental	14,953	15,712
Deferred Regulatory Costs	3,278	1,259
Deferred State Tax	(9,839)	(9,369)
Investment Tax Credit Basis Gross-Up	(622)	(782)
Deferred Pension & Other Post Retirement Benefits	27,885	28,783
Pension & Other Post Retirement Benefits	(26,261)	(25,776)
Deferred Revenues	(15,769)	(14,924)
Derivatives / Unrealized Gain	(1,740)	(2,545)
Other	133	2,969
Noncurrent Deferred Tax Liability – Net	\$ 258,402	\$ 215,346

The total unrecognized tax benefits as of December 31, 2010, 2009, and 2008 were \$0.8 million, \$1.1 million, and \$1.7 million, respectively, which excludes \$0.7 million, \$1.0 million, and \$1.0 million of accrued interest and penalties, respectively.

A reconciliation of the beginning and ending amount of unrecognized tax benefits for the years ended December 31, is as follows (in thousands):

	2010	2009	2008
Balance at January 1,	\$ 1,098	\$ 1,722	\$ 1,926
Increase as a result of tax positions taken in prior years	—	59	253
Decrease due to a lapse in the statute of limitations	(85)	(683)	(457)
Settlements	(220)	—	—
Balance at December 31,	\$ 793	\$ 1,098	\$ 1,722

The amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate is not significant. The Company's policy is to record interest and penalties related to unrecognized tax benefits as interest expense and other expense respectively. These amounts were not significant in 2010, 2009 or 2008. There have been no significant changes to the unrecognized tax benefits during 2010, 2009 or 2008 and the Company does not anticipate any significant changes in the total unrecognized tax benefits within the next 12 months.

The unrecognized tax benefits are primarily related to an uncertainty of state income taxes. Federal income tax returns from 2007 forward and state income tax returns primarily from 2006 forward are open and subject to examination.

TABLE OF CONTENTS

5. PREFERRED STOCK:

REDEEMABLE CUMULATIVE PREFERRED STOCK — SJI has 2,500,000 authorized shares of Preference Stock, no par value, which has not been issued.

6. COMMON STOCK:

The following shares were issued and outstanding at December 31:

	2010	2009	2008
Beginning of Year	29,796,232	29,728,697	29,607,802
New Issues During Year:			
Dividend Reinvestment Plan	—	—	60,390
Stock-Based Compensation Plan	76,593	67,535	60,505
End of Year	29,872,825	29,796,232	29,728,697

The par value (\$1.25 per share) of stock issued was recorded in Common Stock and the net excess over par value of approximately \$2.8 million, \$2.0 million and \$4.0 million, respectively, was recorded in Premium on Common Stock.

EARNINGS PER COMMON SHARE (EPS) — Basic EPS is based on the weighted-average number of common shares outstanding. The incremental shares required for inclusion in the denominator for the diluted EPS calculation were 112,551, 107,333 and 136,123 shares for the years ended December 31, 2010, 2009 and 2008, respectively. These shares relate to SJI's restricted stock as discussed in Note 2.

DIVIDEND REINVESTMENT PLAN (DRP) — Through April 2008, shares of common stock offered through the DRP have been new shares issued directly by SJI. Beginning in April 2008, shares of common stock offered by the DRP have been purchased in open market transactions.

7. FINANCIAL INSTRUMENTS:

RESTRICTED INVESTMENTS — In accordance with the terms of the Marina and certain SJG loan agreements, unused proceeds are required to be escrowed pending approved construction expenditures. As of December 31, 2010 and 2009, the escrowed proceeds, including interest earned, totaled \$1.3 million and \$1.4 million, respectively.

The Company maintains margin accounts with selected counterparties to support its risk management activities. The balances required to be held in these margin accounts increase as the net value of the outstanding energy related contracts with the respective counterparties decrease. As of December 31, 2010 and 2009, the balances in these accounts totaled \$7.1 million and \$3.8 million, respectively. The carrying amounts of the Restricted Investments approximate their fair values at December 31, 2010 and 2009.

LONG-TERM RECEIVABLES — SJG provides financing to customers for the purpose of attracting conversions to natural gas heating systems from competing fuel sources. The terms of these loans call for customers to make monthly payments over a period of up to five years with no interest. The carrying amounts of such loans were \$10.4 million and \$10.8 million as of December 31, 2010 and 2009, respectively. The current portion of these receivables is reflected in Accounts Receivable and the non-current portion is reflected in Contract Receivables on the consolidated balance sheets. The carrying amounts noted above are net of unamortized discounts resulting from imputed interest in the amount of \$1.2 million as of both December 31, 2010 and 2009. The annual amortization to interest is not material to the Company's consolidated financial statements. The carrying amounts of these receivables approximate their fair value at December 31, 2010 and 2009.

CONCENTRATION OF CREDIT RISK - As of December 31, 2010, approximately \$17.0 million, or 33.2%, of the current and noncurrent Derivatives – Energy Related Assets are with a single retail counterparty. This counterparty has contracts with a large number of diverse customers which minimizes the concentration of this risk. A portion of these contracts may be assigned to SJI in the event of a default by the counterparty.

OTHER FINANCIAL INSTRUMENTS — The carrying amounts of SJI's other financial instruments approximate their fair values at December 31, 2010 and 2009.

8. SEGMENTS OF BUSINESS:

SJI operates in several different reportable operating segments. Gas Utility Operations (SJG) consists primarily of natural gas distribution to residential, commercial and industrial customers. Wholesale Energy Operations include SJRG's activities. SJE is involved in both retail gas and retail electric activities. Retail Gas and Other Operations include natural gas acquisition and transportation service business lines. Retail Electric Operations consist of electricity acquisition and transportation to commercial and industrial customers. On-Site Energy Production consists of Marina's thermal energy facility and other energy-related projects. Appliance Service Operations includes SJESP's servicing of appliances via the sale of appliance service programs as well as on a time and materials basis, and the installation of residential and small commercial HVAC systems. The Retail Energy Operations caption includes Retail Gas and Other, Retail Electric, On-Site Energy Production and Appliance Service Operations. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Intersegment sales and transfers are treated as if the sales or transfers were to third parties, that is, at current market prices.

TABLE OF CONTENTS

Information about SJI's operations in different reportable operating segments is presented below (in thousands):

	2010	2009	2008
Operating Revenues:			
Gas Utility Operations	\$ 475,982	\$ 484,376	\$ 568,046
Wholesale Energy Operations	88,729	97,475	115,550
Retail Energy Operations			
Retail Gas and Other Operations	114,536	109,414	177,342
Retail Electric Operations	207,576	113,606	60,046
On-Site Energy Production	38,138	37,031	46,980
Appliance Service Operations	19,735	18,900	19,184
Subtotal Retail Energy Operations	379,985	278,951	303,552
Corporate & Services	22,468	19,948	18,221
Subtotal	967,164	880,750	1,005,369
Intersegment Sales	(42,097)	(35,306)	(43,392)
Total Operating Revenues	\$ 925,067	\$ 845,444	\$ 961,977
Operating Income:			
Gas Utility Operations	\$ 90,700	\$ 81,439	\$ 84,417

TABLE OF CONTENTS

9. LEASES:

The Company is considered to be the lessor of certain thermal energy generating property and equipment under an operating lease which expires in May 2027. As of December 31, 2010 and 2009 the carrying costs of this property and equipment under operating lease was \$73.6 million and \$75.3 million, respectively, (net of accumulated depreciation of \$15.0 million and \$12.6 million, respectively) and is included in Nonutility Property and Equipment in the consolidated balance sheets.

Minimum future rentals to be received on non-cancelable leases as of December 31, 2010 for each of the next five years and in the aggregate are (in thousands):

Year ended December 31,		
2011	\$	5,396
2012		5,396
2013		5,396
2014		5,396
2015		5,396
Thereafter		61,606
Total minimum future rentals	\$	88,586

Minimum future rentals do not include additional amounts to be received based on actual use of the leased property.

TABLE OF CONTENTS

10. RATES AND REGULATORY ACTIONS:

BASE RATES — SJG is subject to the rules and regulations of the BPU. In July 2004 the BPU approved SJG's rate structure based on a 7.97% rate of return on rate base that included a 10.0% return on common equity. SJG was also permitted to recover regulatory assets contained in the petition and to reduce the composite depreciation rate from 2.9% to 2.4%. Included in the base rate increase was also a change to the sharing of pre-tax margins on interruptible, off system sales, and transportation. The sharing of pre-tax margins begins from dollar one, with SJG retaining 15% of such margins. SJG filed a new base rate case in January 2010. Effective September 17, 2010, the BPU granted SJG a base rate increase of \$42.1 million, which was predicated in part upon a 8.21% rate of return on rate base that included a 10.3% return on common equity. The \$42.1 million includes \$16.6 million of revenue previously recovered through the Conservation Incentive Program (CIP) and \$6.8 million of revenues previously recovered through the Capital Investment Recovery Tracker (CIRT), resulting in incremental revenue of \$18.7 million. SJG was permitted to recover regulatory assets contained in its petition and defer certain federally mandated pipeline integrity management program costs for recovery in its next base rate case. In addition, annual depreciation expense will be reduced by \$1.2 million as a result of the amortization of excess cost of removal recoveries. The BPU also authorized a Phase II of the base rate proceeding to review the costs of CIRT projects not rolled into rate base in the September 2010 settlement.

RATE MECHANISMS — SJG's tariff, a schedule detailing the terms, conditions and rate information applicable to the various types of natural gas service, as approved by the BPU, has several primary rate mechanisms as discussed in detail below:

Basic Gas Supply Service (BGSS) Clause — The BGSS price structure was approved by the BPU in January 2003, and allows SJG to recover all prudently incurred gas costs. BGSS charges to customers can be either monthly or periodic (annual). Monthly BGSS charges are applicable to large use customers and are referred to as monthly because the rate changes on a monthly basis pursuant to a BPU-approved formula based on commodity market prices. Periodic BGSS charges are applicable to lower usage customers, which include all of SJG's residential customers, and are evaluated at least annually by the BPU. However, to some extent, more frequent rate changes to the periodic BGSS are allowed. SJG collects gas costs from customers on a forecasted basis and defers periodic over/underrecoveries to the following BGSS year, which runs from October 1 through September 30. If SJG is in a net cumulative undercollected position, gas costs deferrals are reflected on the balance sheet as a regulatory asset. If SJG is in a net cumulative overcollected position, amounts due back to customers are reflected on the balance sheet as a regulatory liability. SJG pays interest on net overcollected BGSS balances at the rate of return on rate base utilized by the BPU to set rates in the last base rate proceeding.

TABLE OF CONTENTS

Regulatory actions regarding the BGSS were as follows:

May 2008 – SJG made its annual periodic BGSS filing with the BPU requesting a \$73.7 million, or 23%, increase in gas cost recoveries in response to increasing wholesale gas costs.

November 2008 – The BPU approved, on a provisional basis, a \$38.0 million, or 12%, increase in gas costs recoveries reflecting a lower increase in gas costs than originally projected in our May 2008 filing.

December 2008 – As part of a global settlement, the BPU approved, on a provisional basis, a decrease in gas cost recoveries of \$9.0 million, or 3%, due to the continued decline in projections in the wholesale gas market.

June 2009 - SJG made its annual BGSS filing to the BPU requesting a \$54.7 million reduction, or 17.5% decrease, in gas cost recoveries in response to projected decreases in wholesale gas costs.

August 2009 - The BPU issued an Order finalizing the 2008-2009 provisional BGSS costs.

September 2009 - The BPU approved, on a provisional basis, SJG's request for a \$54.7 million, or 17.5%, reduction in gas cost recoveries.

June 2010 – SJG made its annual BGSS filing to the BPU requesting a \$38.0 million, or a 13.9%, reduction in gas cost recoveries in response to projected decreases in wholesale gas costs.

September 2010 – The BPU approved, on a provisional basis, SJG's request for a \$38.0 million, or 13.9%, reduction in gas cost recoveries.

Conservation Incentive Program (CIP) - The primary purpose of the CIP is to promote conservation efforts, without negatively impacting financial stability and to base SJG's profit margin on the number of customers rather than the amount of natural gas distributed to customers. In October 2006, the BPU approved SJG's CIP as a three year pilot program. In January 2010, the BPU approved an extension of this program through September 2013. Each CIP year begins October 1 and ends September 30 of the subsequent year. On a monthly basis during the CIP year, SJG records adjustments to earnings based on weather and customer usage factors, as incurred. Subsequent to each year, SJG will make filings with the BPU to review and approve amounts recorded under the CIP. BPU approved cash inflows or outflows generally will not begin until the next CIP year.

Regulatory actions regarding the CIP were as follows:

May 2008 – SJG made its annual CIP filing requesting recovery of \$19.1 million, of which \$14.1 million was non-weather related.

December 2008 – As part of a global settlement, the BPU approved, on a provisional basis, the recovery of CIP revenue of \$20.4 million, of which \$16.4 million was non-weather related.

June 2009 - SJG made its annual CIP filing to the BPU requesting recovery of \$13.4 million, which included a \$13.7 million non-weather related recovery, partially offset by a credit of \$0.3 million which was weather related.

August 2009 - The BPU issued an Order finalizing the 2008-2009 provisional CIP rates.

September 2009 - The BPU approved, on a provisional basis, the recovery of CIP revenue of \$13.4 million.

June 2010 – SJG made its annual CIP filing to the BPU requesting recovery of \$20.0 million which included a \$14.4 million non-weather related recovery and \$5.6 million which was weather related. The BGSS savings to be applied as an offset to the non-weather related recovery totaled \$8.9 million. As a result, SJG will carry forward \$5.5 million to be recovered from customers in the next CIP year.

September 2010 – The BPU approved, on a provisional basis, the recovery of CIP revenue of \$14.5 million.

Capital Investment Recovery Tracker (CIRT) - In January 2009, SJG made a filing with the BPU requesting approval for an accelerated infrastructure investment program. The purpose of the CIRT was to accelerate \$103.0 million of capital expenditures from five years to two years. The petition requested that the Company be allowed to earn a return of, and a return on, its investment. Under the CIRT, 2009 spending was projected to be \$70.5 million and 2010 spending was projected to be \$32.5 million. On a monthly basis during the CIRT year, SJG records adjustments to earnings based on actual CIRT program expenditures, as incurred. Annually, SJG makes a filing to the BPU for

review and approval of expenditures recorded under the CIRT.

TABLE OF CONTENTS

Regulatory actions regarding the CIRT were as follows:

- January 2009 - SJG filed a petition with the BPU for approval of an accelerated infrastructure investment program and associated rate tracker as discussed above.
- April 2009 – The BPU approved SJG’s petition for the CIRT, including a first year estimated capital expenditure level of \$70.5 million and estimated revenue of \$3.2 million.
 - November 2009 - SJG made its annual CIRT filing, requesting \$10.6 million in additional revenue.
- December 2009 – The BPU approved, on a provisional basis, recovery of an additional \$9.9 million in CIRT revenue.
 - September 2010 – The BPU authorized \$81.3 million of CIRT-related expenditures to be rolled into rate base and also authorized that the remaining balance of CIRT-related expenditures continue to be recovered. These remaining expenditures will be reviewed and rolled into rate base during Phase II of the base rate case in 2011.
- October 2010 – SJG made its annual CIRT filing, requesting approval to earn a return of, and a return on, \$150.0 million in additional CIRT-related expenditures during 2011, 2012 and 2013.

Energy Efficiency Tracker (EET) - In January 2009, SJG filed a petition with the BPU requesting approval of an energy efficiency program for residential, commercial and industrial customers. Under this program, SJG can invest \$17.0 million over two years in energy efficiency measures to be installed in customer homes and businesses. SJG can recover incremental operating and maintenance expenses and earn a return of, and return on, program investments.

Regulatory actions regarding the EET were as follows:

- January 2009 – SJG filed a petition with the BPU for approval of an energy efficiency program as noted above, with a projected 2009 revenue of \$1.7 million.
 - July 2009 - The BPU approved SJG’s petition for the EET with a revenue recovery of \$1.3 million.
- July 2010 - SJG filed a petition with the BPU requesting a reallocation of investment dollars between the EET programs to fund the more popular programs.
 - November 2010 - SJG filed a petition with the BPU requesting a one year extension of the program.
 - January 2011 - SJG’s request was approved by the BPU.

Societal Benefits Clause (SBC) - The SBC allows SJG to recover costs related to several BPU-mandated programs. Within the SBC are a Remediation Adjustment Clause (RAC), a New Jersey Clean Energy Program (NJCEP), a Universal Service Fund (USF) program and a Consumer Education Program (CEP).

Regulatory actions regarding the SBC, with the exception of USF which requires separate regulatory filings, were as follows:

- December 2008 – As part of a global settlement, the BPU approved an increase in the RAC portion of the SBC, resulting in an increase in revenue of \$8.5 million. In addition, the BPU approved a reduction in the interest rate utilized to calculate deferred tax on the RAC.
 - January 2009 - SJG made its annual 2008-2009 SBC filing requesting \$7.9 million increase in SBC recoveries.
- August 2009 - SJG made its annual 2009-2010 SBC filing, requesting a \$15.5 million increase in SBC recoveries which includes a net increase in Remediation Adjustment Clause, Clean Energy Program Clause and Transportation Initiation Clause.
- September 2010 – SJG made its annual 2010-2011 SBC Filing, requesting a \$21.5 million increase in SBC recoveries, which includes a net increase in Remediation Adjustment Clause, Clean Energy Program Clause and Transportation Initiation Clause.

Remediation Adjustment Clause (RAC) - The RAC recovers environmental remediation costs of 12 former gas manufacturing plants (See Note15). The BPU allows SJG to recover such costs over seven year amortization periods. The net between the amounts actually spent and amounts recovered from customers is recorded as a regulatory asset, Environmental Remediation Cost Expended - Net. Note that RAC activity affects revenue and cash flows but does not directly affect earnings because of the cost recovery over seven year amortization periods. As of December 31, 2010 and 2009, SJG reflected the unamortized remediation costs of \$39.1 million and \$42.9 million, respectively, on the consolidated balance sheets under Regulatory Assets (See Note 11). Since implementing the RAC in 1992, SJG has recovered \$50.1 million through rates as of December 31, 2010.

TABLE OF CONTENTS

New Jersey Clean Energy Program (NJCEP) - This mechanism recovers costs associated with SJG's energy efficiency and renewable energy programs. In August 2008, the BPU approved the statewide funding of the NJCEP of \$1.2 billion for the years 2009 through 2012. Of this amount SJG will be responsible for approximately \$41.5 million over the four-year period. NJCEP adjustments affect revenue and cash flows but do not directly affect earnings as related costs are deferred and recovered through rates on an on-going basis.

Universal Service Fund (USF) - The USF is a statewide program through which funds for the USF and Lifeline Credit and Tenants Assistance Programs are collected from customers of all New Jersey electric and gas utilities. USF adjustments affect cash flows but do not directly affect revenue or earnings as related costs are deferred and recovered through rates on an on-going basis.

Separate regulatory actions regarding the USF were as follows:

June 2008 – SJG made its annual USF filing, along with the state's other electric and gas utilities, proposing to increase annual statewide gas revenues to \$97.3 million. This proposal is designed to increase the annual USF revenue by \$2.6 million for SJG.

October 2008 – The BPU approved the statewide budget of \$96.7 million for all of the State's gas utilities. SJG's portion of this total is approximately \$8.8 million and increased rates were implemented effective October 27, 2008 resulting in a \$2.5 million increase to SJG's annual USF recoveries.

June 2009 - SJG made its annual USF filing, along with the state's other electric and gas utilities, proposing to decrease annual statewide gas revenues by \$39.1 million. This proposal was designed to decrease SJG's annual USF revenue by \$4.9 million.

October 2009 – The BPU approved the statewide budget of \$60.1 million for all of the State's gas utilities. SJG's portion of this total is approximately \$5.1 million and decreased rates were implemented effective October 12, 2009 resulting in a \$4.1 million decrease to SJG's annual USF recoveries.

July 2010 – SJG made its annual USF filing, along with the state's other electric and gas utilities, proposing to increase annual statewide gas revenues by \$3.4 million. This proposal was designed to increase SJG's annual USF revenue by \$0.4 million.

August 2010 – SJG updated its July 2010 filing to reflect actual data through June 2010.

October 2010 – The BPU approved the statewide budget of \$64.8 million for all of the State's gas utilities. SJG's portion of the total is approximately \$6.6 million and increased rates were implemented effective November 1, 2010 resulting in a \$0.4 million increase to SJG's annual USF recoveries.

Other Regulatory Matters -

Unbundling - Effective January 10, 2000, the BPU approved full unbundling of SJG's system. This allows all natural gas consumers to select their natural gas commodity supplier. As of December 31, 2010, 33,762 of SJG's residential customers were purchasing their gas commodity from someone other than SJG. Customers choosing to purchase natural gas from providers other than the utility are charged for the cost of gas by the marketer. The resulting decrease in utility revenues is offset by a corresponding decrease in gas costs. While customer choice can reduce utility revenues, it does not negatively affect SJG's net income or financial condition. The BPU continues to allow for full recovery of prudently incurred natural gas costs through the BGSS. Unbundling did not change the fact that SJG still recovers cost of service, including certain deferred costs, through base rates.

Pipeline Integrity - In October 2005, SJG filed a petition with the BPU to implement a Pipeline Integrity Management Tracker (Tracker). The purpose of this Tracker was to recover incremental costs to be incurred by SJG as a result of new federal regulations, which are aimed at enhancing public safety and reliability. The regulations require that utilities use a comprehensive analysis to assess, evaluate, repair and validate the integrity of certain transmission lines in the event of a leak or failure. As part of SJG's September 2010 base rate increase, SJG was permitted to recover

previously deferred pipeline integrity costs incurred through September 2010. In addition, SJG is authorized to defer future program costs, and related carrying costs, for recovery in the next base rate proceeding, subject to review by the BPU. Accordingly, SJG withdrew its petition for the Pipeline Integrity Management Tracker. As of December 31, 2010 and 2009, deferred pipeline integrity costs totaled \$1.7 million and \$1.2 million, respectively, and are included in other regulatory assets.

Filings and petitions described above are still pending unless otherwise indicated.

TABLE OF CONTENTS

11. REGULATORY ASSETS & REGULATORY LIABILITIES:

The discussion under Note 10, Rates and Regulatory Actions, is integral to the following explanations of specific regulatory assets and liabilities.

Regulatory Assets at December 31 consisted of the following items (in thousands):

	2010	2009
Environmental Remediation Costs:		
Expended - Net	\$ 39,056	\$ 42,924
Liability for Future Expenditures	87,393	69,056
Income Taxes-Flowthrough Depreciation	774	1,752
Deferred Asset Retirement Obligation Costs	24,247	22,438
Deferred Gas Costs - Net	—	6,519
Deferred Pension and Other Postretirement Benefit Costs	69,017	71,192
Conservation Incentive Program Receivable	12,291	16,672
Societal Benefit Costs Receivable	4,216	1,872
Premium for Early Retirement of Debt	699	1,046
Other Regulatory Assets	10,720	6,991
Total Regulatory Assets	\$ 248,413	\$ 240,462

Except where noted below, all regulatory assets are or will be recovered through utility rate charges as detailed in the following discussion. SJG is currently permitted to recover interest on Environmental Remediation Costs and Societal Benefit Costs Receivable while the other assets are being recovered without a return on investment.

Environmental Remediation Costs - SJG has two regulatory assets associated with environmental costs related to the cleanup of 12 sites where SJG or their predecessors previously operated gas manufacturing plants. The first asset, Environmental Remediation Cost: Expended - Net, represents what was actually spent to clean up the sites, less recoveries through the RAC and insurance carriers. These costs meet the deferral requirements of GAAP as the BPU allows SJG to recover such expenditures through the RAC. The other asset, Environmental Remediation Cost: Liability for Future Expenditures, relates to estimated future expenditures required to complete the remediation of these sites. SJG recorded this estimated amount as a regulatory asset with the corresponding current and noncurrent liabilities reflected on the consolidated balance sheets under the captions Current Liabilities and Deferred Credits and Other Noncurrent Liabilities. The BPU allows SJG to recover the deferred costs over seven-year periods after they are spent.

Income Taxes - Flowthrough Depreciation - This regulatory asset was created upon the adoption of FASB ASC Topic 740 "Income Taxes" in 1993. The amount represents unamortized excess tax depreciation over book depreciation on utility plant because of temporary differences for which, prior to adoption, deferred taxes previously were not provided. SJG previously passed these tax benefits through to ratepayers and are recovering the amortization of the regulatory asset through rates until 2011.

Deferred Asset Retirement Obligation Costs - This regulatory asset was created with the adoption of FASB ASC Topic 440 "Commitments" in 2005. This resulted in the recording of ARO's and additional utility plant, primarily related to a legal obligation SJG has for certain safety requirements upon the retirement of its gas distribution and transmission system. SJG recovers asset retirement costs through rates charged to customers. All related accumulated accretion and depreciation amounts for these ARO's represent timing differences in the recognition of retirement costs that SJG is currently recovering in rates and, as such, SJG is deferring such differences as regulatory assets.

Deferred Gas Costs - Net - Over/under collections of gas costs are monitored through the BGSS mechanism. Net undercollected gas costs are classified as a regulatory asset and net overcollected gas costs are classified as a regulatory liability. Derivative contracts used to hedge SJG's natural gas purchases are also included in the BGSS, subject to BPU approval. See detailed discussion under Derivative Instruments in Note 16.

TABLE OF CONTENTS

Deferred Pension and Other Postretirement Benefit Costs - The BPU authorized SJG to recover costs related to postretirement benefits under the accrual method of accounting consistent with GAAP. SJG deferred amounts accrued prior to that authorization and are amortizing them as allowed by the BPU over 15 years through 2012. The unamortized balance was \$0.8 million at December 31, 2010. Upon the adoption of FASB ASC Topic 715 “Compensation – Retirement Benefits” in 2006, SJG’s regulatory asset was increased by \$37.1 million representing the recognition of underfunded positions of SJG’s pension and other postretirement benefit plans. Subsequent adjustments to this balance occur annually to reflect changes in the funded positions of these benefit plans caused by changes in actual plan experience as well as assumptions of future experience (See Note 12).

Conservation Incentive Program Receivable - The impact of the CIP is recorded as an adjustment to earnings as incurred. The first year of cash recovery under the CIP began October 2007.

Societal Benefit Costs Receivable - At both December 31, 2010 and 2009, this regulatory asset primarily represents cumulative costs less recoveries under the USF program.

Premium for Early Retirement of Debt - At December 31, 2010, this regulatory asset represents unamortized debt issuance costs related to long-term debt refinancings and a call premium of \$0.2 million associated with the retirement of debt, all occurring in 2005 and 2004. Unamortized debt issuance costs are being amortized over the term of the new debt issue pursuant to regulatory approval by the BPU. As part of our September 2010 base rate increase, the call premium was transferred to unamortized debt issuance costs and is being amortized over the term of the new debt issue.

Other Regulatory Assets - Some of the assets included in Other Regulatory Assets are currently being recovered from ratepayers as approved by the BPU. Management believes the remaining deferred costs are probable of recovery from ratepayers through future utility rates.

Regulatory Liabilities at December 31 consisted of the following items (in thousands):

	2010	2009
Excess Plant Removal Costs	\$ 48,409	\$ 48,715
Deferred Revenues - Net	20,179	—
Other	660	1,478
Total Regulatory Liabilities	\$ 69,248	\$ 50,193

Excess Plant Removal Costs – Represents amounts accrued in excess of actual utility plant removal costs incurred to date. As part of our September 2010 base rate increase, we are required to start amortizing approximately \$1.2 million of this balance to depreciation expense each year.

Deferred Revenues – Net – See previous discussion under “Deferred Gas Costs – Net.”

Other Regulatory Liabilities – All other regulatory liabilities are subject to being returned to ratepayers in future rate proceedings.

12. PENSION AND OTHER POSTRETIREMENT BENEFITS:

SJI has several defined benefit pension plans and other postretirement benefit plans. The pension plans provide annuity payments to the majority of full-time, regular employees upon retirement. Participation in the Company’s qualified defined benefit pension plans was closed to new employees beginning in 2003; however, employees who are

not eligible for these pension plans are eligible to receive an enhanced version of SJI's defined contribution plan. Certain SJI officers also participate in a non-funded supplemental executive retirement plan (SERP), a non-qualified defined benefit pension plan. The other postretirement benefit plans provide health care and life insurance benefits to some retirees.

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

Net periodic benefit cost related to the employee and officer pension and other postretirement benefit plans consisted of the following components (in thousands):

	Pension Benefits			Other Postretirement Benefits		
	2010	2009	2008	2010	2009	2008
Service Cost	\$ 3,426	\$ 3,225	\$ 3,198	\$ 920	\$ 893	\$ 968
Interest Cost	9,197	8,694	8,320	3,267	3,208	2,957
Expected Return on Plan Assets	(8,402)	(7,553)	(10,417)	(1,937)	(1,551)	(2,195)
Amortization:						
Prior Service Cost (Credits)	280	278	292	(355)	(355)	(355)
Actuarial Loss	4,751	5,405	1,608	1,495	1,896	744
Net Periodic Benefit Cost	9,252	10,049	3,001	3,390	4,091	2,119
Capitalized Benefit Costs	(3,445)	(3,798)	(1,073)	(1,295)	(1,676)	(765)
Total Net Periodic Benefit Expense	\$ 5,807	\$ 6,251	\$ 1,928	\$ 2,095	\$ 2,415	\$ 1,354

Capitalized benefit costs reflected in the table above relate to SJG's construction program.

Companies with publicly traded equity securities that sponsor a postretirement benefit plan are required to fully recognize, as an asset or liability, the overfunded or underfunded status of its benefit plans and recognize changes in the funded status in the year in which the changes occur. Changes in funded status are generally reported in Other Comprehensive Loss; however, since SJG recovers all prudently incurred pension and postretirement benefit costs from its ratepayers, a significant portion of the charges resulting from the recording of additional liabilities under this statement are reported as regulatory assets (See Note 11).

Details of the activity within the Regulatory Asset and Accumulated Other Comprehensive Loss associated with Pension and Other Postretirement Benefits are as follows (in thousands):

	Regulatory Assets		Accumulated Other Comprehensive Loss (pre-tax)	
	Pension Benefits	Other Postretirement Benefits	Pension Benefits	Other Postretirement Benefits
Balance at January 1, 2009	\$ 55,774	\$ 22,876	\$ 21,108	\$ 2,374
Amounts Arising during the Period:				
Net Actuarial (Gain) Loss	(4,188)	610	(357)	72
Prior Service Cost	347	—	60	—
Amounts Amortized to Net Periodic Costs:				
Net Actuarial Loss	(3,641)	(1,746)	(1,729)	(142)
Prior Service (Cost) Credit	(228)	254	(48)	94
Balance at December 31, 2009	48,064	21,994	19,034	2,398
Amounts Arising during the Period:				
Net Actuarial (Gain) Loss	2,300	167	6,569	818
Amounts Amortized to Net Periodic Costs:				
Net Actuarial Loss	(2,935)	(1,351)	(1,793)	(144)

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

Prior Service (Cost) Credit	(232)	254	(47)	94
Balance at December 31, 2010	\$ 47,197	\$ 21,064	\$ 23,763	\$ 3,166

64

The estimated costs that will be amortized from Regulatory Assets into net periodic benefit costs in 2011 are as follows (in thousands):

	Pension Benefits	Other Postretirement Benefits
Prior Service Costs (Credits)	\$ 220	\$ (254)
Net Actuarial Loss	\$ 2,980	\$ 1,337

The estimated costs that will be amortized from Accumulated Other Comprehensive Loss into net periodic benefit costs in 2011 are as follows (in thousands):

	Pension Benefits	Other Postretirement Benefits
Prior Service Costs (Credits)	\$ 47	\$ (101)
Net Actuarial Loss	\$ 2,173	\$ 214

A reconciliation of the plans' benefit obligations, fair value of plan assets, funded status and amounts recognized in SJI's consolidated balance sheets follows (in thousands):

	Pension Benefits		Other Postretirement Benefits	
	2010	2009	2010	2009
Change in Benefit Obligations:				
Benefit Obligation at Beginning of Year	\$ 149,008	\$ 142,672	\$ 56,138	\$ 50,842

	\$ 23,763	\$ 19,034	\$ 3,166	\$ 2,398

The projected benefit obligation (PBO) and accumulated benefit obligation (ABO) of SJI's qualified employee pension plans were \$142.4 million and \$128.8 million, respectively, as of December 31, 2010, and \$130.5 million and \$117.4 million, respectively, as of December 31, 2009. The ABO of these plans exceeded the value of the plan assets as of December 31, 2010 and December 31, 2009. The value of these assets can be seen in the table above. The PBO and ABO for SJI's non-funded SERP were \$25.1 million and \$24.7 million, respectively, as of December 31, 2010, and \$18.5 million and \$18.3 million, respectively, as of December 31, 2009. The SERP is reflected in the tables above and has no assets.

The weighted-average assumptions used to determine benefit obligations at December 31 were:

	Pension Benefits		Other Postretirement Benefits	
	2010	2009	2010	2009
Discount Rate	5.78%	6.22%	5.55%	6.22%
Rate of Compensation Increase	3.25%	3.60%	—	—

The weighted-average assumptions used to determine net periodic benefit cost for years ended December 31 were:

	Pension Benefits			Other Postretirement Benefits		
	2010	2009	2008	2010	2009	2008
Discount Rate	6.22%	6.24%	6.36%	6.22%	6.24%	6.36%
Expected Long-Term Return on Plan Assets	7.75%	8.25%	8.50%	6.80%	6.80%	7.00%
Rate of Compensation Increase	3.60%	3.60%	3.60%	—	—	—

All obligations disclosed herein reflect the use of the RP 2000 mortality tables.

The discount rates used to determine the benefit obligations at December 31, 2010 and 2009, which are used to determine the net periodic benefit cost for the subsequent year, were based on a portfolio model of high-quality instruments with maturities that match the expected benefit payments under our pension and other postretirement benefit plans.

The expected long-term return on plan assets ("return") has been determined by applying long-term capital market projections provided by our pension plan Trustee to the asset allocation guidelines, as defined in the Company's investment policy, to arrive at a weighted average return. For certain other equity securities held by an investment manager outside of the control of the Trustee, the return has been determined based on historic performance in combination with long-term expectations. The return for the other postretirement benefits plan is determined in the same manner as discussed above; however, the expected return is reduced based on the taxable nature of the underlying trusts.

The assumed health care cost trend rates at December 31 were:

	2010	2009
Medical Care and Drug Cost Trend Rate Assumed for Next Year	8.25%	9.00%
Dental Care Cost Trend Rate Assumed for Next Year	4.75%	4.75%
Rate to which Cost Trend Rates are Assumed to Decline (the Ultimate Trend Rate)	4.75%	4.75%
Year that the Rate Reaches the Ultimate Trend Rate	2019	2019

Assumed health care cost trend rates have a significant effect on the amounts reported for SJI's postretirement health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects (in thousands):

	1-Percentage- Point Increase	1-Percentage- Point Decrease
Effect on the Total of Service and Interest Cost	\$ 252	\$ (197)
Effect on Postretirement Benefit Obligation	\$ 2,305	\$ (2,104)

PLAN ASSETS — The Company's overall investment strategy for pension plan assets is to achieve a diversification by asset class, style of manager, and sector and industry limits to achieve investment results that match the actuarially assumed rate of return, while preserving the inflation adjusted value of the plans. The Company has implemented this diversification strategy primarily with commingled common/collective trust funds. The target allocations for pension plan assets are 35-46 percent U.S. equity securities, 12-18 percent international equity securities, 31-43 percent fixed income investments, and 2-17 percent to all other types of investments. Equity securities include investments in commingled common/collective trust funds as well as large-cap and mid-cap companies. Fixed income securities include commingled common/collective trust funds, group annuity contracts for pension payments, and hedge funds. Other types of investments include investments in private equity funds and real estate funds that follow several different strategies.

The strategy recognizes that risk and volatility are present to some degree with all types of investments. We seek to avoid high levels of risk at the total fund level through diversification by asset class, style of manager, and sector and industry limits. Specifically prohibited investments include, but are not limited to, venture capital, margin trading, commodities and securities of companies with less than \$250.0 million capitalization (except in the small-cap portion of the fund where capitalization levels as low as \$50.0 million are permissible). These restrictions are only applicable to individual investment managers with separately managed portfolios and do not apply to mutual funds or commingled trusts.

SJI evaluated its pension and other postretirement benefit plans' asset portfolios for the existence of significant concentrations of credit risk as of December 31, 2010. Types of concentrations that were evaluated include, but are not limited to, investment concentrations in a single entity, type of industry, foreign country, and individual fund. As of December 31, 2010, there were no significant concentrations (defined as greater than 10 percent of plan assets) of risk in SJI's pension and other postretirement benefit plan assets.

GAAP establishes a hierarchy that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques. This hierarchy groups assets into three distinct levels, as fully described in Note 17, that will serve as the basis for presentation throughout the remainder of this Note.

The fair values of SJI's pension plan assets at December 31, 2010 by asset category are as follows (in thousands):

Asset Category	Total	Level 1	Level 2	Level 3
Cash / Cash Equivalents:				
Common/Collective Trust Funds (a)	\$ 465	\$ —	\$ 465	\$ —
STIF-Type Instrument (b)	1,073	—	1,073	—
Equity securities:				
Common/Collective Trust Funds – U.S. (a)	35,717	—	35,717	—
Common/Collective Trust Funds - International (a)	19,361	—	19,361	—
U.S. Large-Cap (c)	6,338	6,338	—	—
U.S. Mid-Cap (c)	6,104	6,104	—	—
International (c)	1,403	1,403	—	—
Fixed Income:				
Common/Collective Trust Funds (a)	29,678	—	29,678	—
Guaranteed Insurance Contract (d)	12,561	—	—	12,561
Hedge Funds (e)	124	—	—	124
Other types of investments:				
Private Equity Fund (f)	3,152	—	—	3,152
Common/Collective Trust Fund – Real Estate (g)	4,624	—	—	4,624
Total	\$ 120,600	\$ 13,845	\$ 86,294	\$ 20,461

- (a) This category represents common/collective trust fund investments through a commingled employee benefit trust (excluding real estate). These commingled funds are not traded publicly; however, the majority of the underlying assets held in these funds are stocks and bonds that are traded on active markets and prices for these assets are readily observable. Also included in these funds are interest rate swaps, asset-backed securities, mortgage-backed securities and other investments with observable market values. Holdings in these commingled funds are classified as Level 2 investments.
- (b) This category represents short-term investment funds held for the purpose of funding disbursement payment arrangements. Underlying assets are valued based on quoted prices in active markets, or where quoted prices are not available, based on models using observable market information. Since not all values can be obtained from quoted prices in active markets, these funds are classified as Level 2 investments.
- (c) This category of equity investments represents a managed portfolio of common stock investments in five sectors: telecommunications, electric utilities, gas utilities, water and energy. These common stocks are actively traded on exchanges and price quotes for these shares are readily available. These common stocks are classified as Level 1 investments.
- (d) This category represents SJI's Group Annuity contracts with a nationally recognized life insurance company. The contracts are the assets of the plan, while the underlying assets of the contracts are owned by the contract holder. Valuation is based on a formula and calculation specified within the contract. Since the valuation is based on the reporting entity's own assumptions, these contracts are classified as Level 3 investments.
- (e) This category represents a collection of underlying funds which are all domiciled outside of the United States. Most of the underlying fund managers are based in the U.S.; however, they do not necessarily trade only in U.S. markets. It is important to note that the SJI Pension Funds are in the process of divesting investments from this fund of funds. The fair value of these funds is determined by the underlying fund's general partner or manager. These funds are classified as Level 3 investments.
- (f) This category represents a limited partnership which includes several investments in U.S. leveraged buyout, venture capital, and special situation funds. Fund valuations are reported on a 90 day lag and, therefore, the value reported herein represents the market value as of September 30, 2010. The fund's investments are stated at fair value, which is generally based on the valuations provided by the general partners or managers of such investments. Fund investments are illiquid and resale is restricted. These funds are classified as Level 3

investments.

- (g) This category represents real estate common/collective trust fund investments through a commingled employee benefit trust. These commingled funds are part of a direct investment in a pool of real estate properties. These funds are valued by investment managers on a periodic basis using pricing models that use independent appraisals from sources with professional qualifications. Since these valuation inputs are not highly observable, the real estate funds are classified as Level 3 investments.

Fair Value Measurement Using Significant
Unobservable Inputs (Level 3)
(In thousands)

	Guaranteed Insurance Contract	Hedge Funds	Private Equity Funds	Real Estate	Total
Balance at December 31, 2009	\$ 11,677	\$ 1,101	\$ 2,704	\$ 4,407	\$ 19,889
Actual return on plan assets:					
Relating to assets still held at the reporting date	2,077	(289)	440	217	2,445
Relating to assets sold during the period	14	(266)	—	—	(252)
Purchases, Sales and Settlements	(1,207)	(422)	8	—	(1,621)
Balance at December 31, 2010	\$ 12,561	\$ 124	\$ 3,152	\$ 4,624	\$ 20,461

As with the pension plan assets, the Company's overall investment strategy for post-retirement benefit plan assets is to achieve a diversification by asset class, style of manager, and sector and industry limits to achieve investment results that match the actuarially assumed rate of return, while preserving the inflation adjusted value of the plans. The Company has implemented this diversification strategy entirely with mutual funds. The target allocations for post-retirement benefit plan assets are 48 percent U.S. equity securities, 15 percent international equity securities, and 37 percent fixed income investments. Equity securities include investments in large-cap, mid-cap and small-cap companies. Fixed income securities include both investment grade and strategic bond mutual funds.

The fair values of SJI's other postretirement benefit plan assets at December 31, 2010 by asset category are as follows (in thousands):

Asset Category	Total	Level 1	Level 2	Level 3
Equity Securities:				
U.S. Large-Cap	\$ 11,589	\$ 11,589	\$ —	—
U.S. Mid & Small-Cap	4,498	4,498	—	—
International	4,632	4,632	—	—
Fixed Income:				
Corporate Bonds	11,400	11,400	—	—
Total	\$ 32,119	\$ 32,119	\$ —	—

All investments above are holdings in mutual funds and actively traded on major stock exchanges.

FUTURE BENEFIT PAYMENTS — The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid during the following years (in thousands):

	Pension Benefits	Other Postretirement Benefits
2011	\$ 8,077	\$ 4,249
2012	\$ 8,338	\$ 4,242
2013	\$ 8,562	\$ 4,314
2014	\$ 8,858	\$ 4,240
2015	\$ 9,400	\$ 4,317

CONTRIBUTIONS — SJI made a contribution of \$8.0 million to its qualified employee pension plans in 2010. SJI has no obligation to make a contribution in 2011. Payments related to the unfunded SERP plan are expected to approximate \$1.2 million in 2011. SJG has a regulatory obligation to contribute approximately \$3.6 million annually to its other postretirement benefit plans' trusts, less costs incurred directly by the Company.

DEFINED CONTRIBUTION PLAN — SJI offers an Employees' Retirement Savings Plan (Savings Plan) to eligible employees. For employees eligible for participation in SJI's defined benefit pension plan, SJI matches 50% of participants' contributions up to 6% of base compensation. For employees who are not eligible for participation in SJI's defined benefit pension plans, SJI matches 50% of participants' contributions up to 8% of base compensation. Employees not eligible for the pension plans also receive a year-end contribution of \$1,000 if 10 or fewer years of service or \$1,500 if more than 10 years of service. The amount expensed and contributed for the matching provision of the Savings Plan approximated \$1.3 million, \$1.0 million, and \$1.0 million for the years ended December 31, 2010, 2009 and 2008, respectively.

13. UNUSED LINES OF CREDIT:

Credit facilities and available liquidity as of December 31, 2010 were as follows (in thousands):

Company	Total Facility	Usage	Available Liquidity	Expiration Date
SJG:				
Revolving Credit Facility	\$ 100,000	\$ 50,000	\$ 50,000	August 2011(A)
Line of Credit	40,000	—	40,000	August 2011(A)
Uncommitted Bank Lines	40,000	8,900	31,100	Various
Total SJG	180,000	58,900	121,100	
SJI:				
Revolving Credit Facility	200,000	182,793	17,207	August 2011(A), (B)
Term Line of Credit	30,437	30,437	—	October 2011
Uncommitted Bank Lines	95,000	66,150	28,850	Various
Total SJI	325,437	279,380	46,057	
Total	\$ 505,437	\$ 338,280	\$ 167,157	

(A) The Company anticipates extending these lines of credit during the second quarter of 2011.

(B) Includes letters of credit in the amount of \$87.6 million under the SJI revolving credit facility.

The SJG facilities are restricted as to use and availability specifically to SJG; however, if necessary the SJI facilities can also be used to support SJG's liquidity needs. All committed facilities contain one financial covenant regarding the ratio of total debt to total capitalization, measured on a quarterly basis. SJI and SJG were in compliance with this covenant as of December 31, 2010. Borrowings under these credit facilities are at market rates. The weighted average borrowing cost, which changes daily, was 0.99%, 0.77% and 1.16% at December 31, 2010, 2009 and 2008, respectively.

TABLE OF CONTENTS

14. LONG-TERM DEBT:

Outstanding Long-Term Debt at December 31 consisted of the following:

		2010	2009
Long-Term Debt (A):			
South Jersey Gas Company:			
First Mortgage Bonds: (B)			
6.12%	Series due 2010(C)	\$ —	\$ 10,000
6.74%	Series due 2011	10,000	10,000

	Less Current Maturities	(111,400)	(35,119)
	Total Long-Term Debt	\$ 340,000	\$ 312,793

(A) Long-term debt maturities and sinking funds requirements for the succeeding five years are as follows (in thousands): 2011, \$25,000; 2012, \$2,187; 2013, \$27,187; 2014, \$23,188; 2015, \$13,097.

(B)Our First Mortgage dated October 1, 1947, as supplemented, securing the First Mortgage Bonds constitutes a direct first mortgage lien on substantially all utility plant.

71

TABLE OF CONTENTS

- (C) On October 21, 2010, SJG retired its 6.12% Medium Term Notes, at par.
- (D) During 2010, SJG made the following private placement issuances under its MTN Program: \$15.0 million on March 1, 2010, due 2026; \$45.0 million on June 30, 2010, due 2026; \$10.0 million on December 30, 2010, due 2025, requiring annual principal payments of \$0.9 million beginning December 2015; and \$45.0 million on December 30, 2010, due 2027, requiring annual principal payments of \$9.0 million beginning December 2023. As of December 31, 2010, \$35.0 million remains available under this program.
- (E) These variable rate demand bonds bear interest at a floating rate that resets weekly. The interest rate as of December 31, 2010 was 0.35%. Liquidity support on these bonds is provided by a letter of credit from a commercial bank that expires in August 2011, and as such, these bonds are included in the current portion of long-term debt. These notes contain no financial covenants.
- (F) Marina has issued \$61.4 million of unsecured variable-rate revenue bonds through the New Jersey Economic Development Authority (NJEDA). The variable rates at December 31, 2010 for the Series A 2001, Series B 2001, and Series A 2006 bonds were 0.37%, 0.57% and 0.37% respectively. The interest rate on all but \$1.1 million of the bonds has been effectively fixed via interest rate swaps at 3.91% until January 2026. These bonds contain no financial covenants. Liquidity support on these bonds is provided by letters of credit from a commercial bank that expire in 2011, and as such, these bonds are included in the current portion of long-term debt.
- (G) AC Landfill Energy, LLC is no longer consolidated into SJI beginning in 2010 as discussed in Note 1.

We estimated the fair values of SJI's long-term debt, including current maturities, as of December 31, 2010 and 2009, to be \$517.0 million and \$394.5 million, respectively. Carrying amounts as of December 31, 2010 and 2009, were \$451.4 million and \$347.9 million, respectively. We based the estimates on interest rates available to SJI at the end of each year for debt with similar terms and maturities. SJI retires debt when it is cost effective as permitted by the debt agreements.

TABLE OF CONTENTS

15. COMMITMENTS AND CONTINGENCIES:

GAS SUPPLY CONTRACTS — In the normal course of business, SJG and SJRG have entered into long-term contracts for natural gas supplies, firm transportation and gas storage service. The earliest that any of these contracts expire is March 2011. The transportation and storage service agreements with interstate pipeline suppliers were made under FERC approved tariffs. SJRG's cumulative obligation for demand charges and reservation fees paid to suppliers for these services is approximately \$0.2 million per month. SJG's cumulative obligation for demand charges and reservation fees paid to suppliers for these services averages approximately \$3.7 million per month and is recovered on a current basis through the BGSS. SJRG has also committed to purchase a minimum of 249,000 dts/d and up to 635,000 dts/d of natural gas, from various suppliers, for terms ranging from three to ten years at index based prices.

PENDING LITIGATION — SJI is subject to claims arising in the ordinary course of business and other legal proceedings. We accrue liabilities related to these claims when we can reasonably estimate the amount or range of amounts of probable settlement costs or other charges for these claims. SJI has been named in, among other actions, certain product liability claims related to our former sand mining subsidiary. Management does not currently anticipate the disposition of any known claims to have a material adverse effect on SJI's financial position, results of operations or liquidity.

COLLECTIVE BARGAINING AGREEMENTS — Unionized personnel represent approximately 52% of our workforce at December 31, 2010. The Company has collective bargaining agreements with two unions that represent these employees: the International Brotherhood of Electrical Workers (IBEW) Local 1293 and the International Association of Machinists and Aerospace Workers (IAM) Local 76. SJG and SJESP employees represented by the IBEW operate under a collective bargaining agreement that runs through February 2013, with the option to extend until February, 2014 at the union's election. The remaining unionized employees represented by the IAM operate under a collective bargaining agreement that runs through August 2014.

GUARANTEES — As of December 31, 2010, SJI had issued \$594.5 million of parental guarantees on behalf of its subsidiaries. Of this total, \$505.9 million expire within one year, and \$88.6 million expire after one year or have no expiration date. These guarantees were issued to guarantee payment to third parties with whom our subsidiaries have commodity supply contracts and for Marina's construction and operating activities. As of December 31, 2010, these guarantees support future firm commitments and \$119.2 million of the Accounts Payable recorded on our consolidated balance sheet.

The Company has recorded a liability of \$1.9 million which is included in Other Noncurrent Liabilities with a corresponding increase in Investment in Affiliates on the consolidated balance sheets as of December 31, 2010 for the fair value of the following guarantees:

In April 2007, SJI guaranteed certain obligations of LVE an unconsolidated joint venture in which Marina has a 50% equity interest. LVE entered into a 25-year contract with a resort developer to design, build, own and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada. LVE began construction of the facility in 2007 and expected to provide full energy services in 2010 when the resort was originally scheduled to be completed. LVE suspended construction of the district energy system and central energy center in January 2009 after the resort developer's August 2008 announcement that it was delaying the completion of construction of the resort due to the difficult environment in the capital markets and weak economic conditions. The resort developer had indicated that it was considering different strategies to move its project forward, including opening its project in phases and obtaining a partner, but that it was unlikely construction would resume during 2009. In October 2010, the resort developer announced that they do not expect to resume construction on the project for three to five years. They stated that they remain committed to having a significant presence on the Las Vegas Strip as part of a long-term growth strategy and continue to view this site as a major

strategic asset.

73

TABLE OF CONTENTS

The district energy system and central energy center are being financed by LVE with debt that is non-recourse to SJI. The outstanding balance of LVE's bank debt is approximately \$220.6 million as of December 31, 2010. In September 2009, LVE reached an agreement with the banks that are financing the energy facilities to address defaults under the financing agreements. These LVE defaults were caused by the resort developer's construction delay and the termination of an energy services agreement by a hotel operator associated with the project. As a result of these defaults, the banks had previously stopped funding the project. The terms of the September 2009 agreement required SJI and its partner in this joint venture to guarantee the payment of future interest costs by LVE through, at the latest, December 2010. In addition, SJI and its partner in this joint venture each committed to provide approximately \$8.9 million of additional capital as of September 2009 to cover costs related to the termination of the energy services agreement by a hotel operator and interest costs incurred since August 2008 when the resort developer suspended construction. Of this amount, \$6.7 million was in the form of an irrevocable letter of credit from a bank and the remaining \$2.2 million was provided in cash in 2009. In turn, the banks waived all existing defaults under the financing agreements and were relieved of their commitment to provide additional funding. The \$6.7 million discussed above, along with the \$30.4 million of capital that Marina originally agreed to contribute as part of its construction period financing, was contributed in December 2010. As a result of the construction delay, the district energy system and central energy center was not completed by the end of 2010 as originally expected. Consequently, the full amount of LVE's debt became due and payable in December 2010. LVE intends to seek additional financing to complete the facility once construction of the resort resumes, however, as of December 31, 2010 LVE was in default under the financing agreements with the banks. The Energy Sales Agreement between LVE and the resort developer includes a payment obligation by the resort developer to pay certain fees and expenses to LVE. A portion of this payment obligation is guaranteed to LVE's lenders by the parent of the resort developer. LVE is currently in discussions with (a) the resort developer to determine the amount and timing of the payments to be made by the resort developer to LVE during the suspension period and (b) the banks that are financing the energy facilities to address the existing default under the financing agreements. As of December 31, 2010, the Company had a net liability of approximately \$1.6 million included in Other Noncurrent Liabilities on the consolidated balance sheets related to this project, in addition to unsecured Notes Receivable – Affiliate of approximately \$52.2 million due from LVE. As of December 31, 2010, SJI's capital at risk is limited to its equity contributions and the unsecured notes receivable totaling approximately \$65.3 million. During 2010, SJI and its partner in this joint venture each provided support to LVE of approximately \$48.5 million to cover interest and other project related costs and capital contribution obligations.

As a result of the construction delay, management has evaluated the investment in LVE and concluded that the fair value of this investment continues to be in excess of the carrying value as of December 31, 2010.

In 2007, SJI issued a performance guaranty for up to \$180.0 million to the resort developer to ensure that certain construction milestones relating to the development of the thermal facility are met. As a result of the resort developer not achieving certain milestones, SJI was no longer obligated under this guaranty as of December 31, 2010. SJI has also guaranteed certain performance obligations of LVE under the operating agreements between LVE and the resort developer, up to \$20.0 million each year for the term of the agreement, commencing with the first year of operations. SJI and its partner in this joint venture have entered into reimbursement agreements that secure reimbursement for SJI of a proportionate share of any payments made by SJI on these guarantees.

SJI has guaranteed certain obligations of BC Landfill Energy, LLC (BCLE) and WC Landfill Energy, LLC (WCLE), unconsolidated joint ventures in which Marina has a 50% equity interest. BCLE and WCLE have entered into agreements ranging from 15-20 years with the respective county governments to lease and operate facilities that will produce electricity from landfill methane gas. Although unlikely, the maximum amount that SJI could be obligated for, in the event that BCLE and WCLE do not meet minimum specified levels of operating performance and no mitigating action is taken, or are unable to meet certain financial obligations as they become due, is approximately \$4.2 million each year. SJI and its partner in these joint ventures have entered into reimbursement agreements that

secure reimbursement for SJI of a proportionate share of any payments made by SJI on these guarantees. SJI holds variable interests in BCLE and WCLE but is not the primary beneficiary.

TABLE OF CONTENTS

SJI has guaranteed the long-term debt obligations of ACLE, which has entered into a long-term agreement with a county government to lease and operate a facility that will produce electricity from landfill methane gas. Although unlikely, the maximum amount that SJI could be obligated for, in the event that ACLE is unable to meet certain financial obligations as they become due, is approximately \$1.5 million. SJI and its partner in this joint venture have entered into a reimbursement agreement that secures reimbursement for SJI of a proportionate share of any payments made by SJI on this guarantee. SJI holds a variable interest in ACLE but is not the primary beneficiary.

As of December 31, 2010, SJI had issued \$4.4 million of parental guarantees on behalf of an unconsolidated subsidiary. These guarantees generally expire within the next two years and were issued to enable our subsidiary to market retail natural gas.

STANDBY LETTERS OF CREDIT — As of December 31, 2010, SJI provided \$87.6 million of standby letters of credit through SJI's revolving credit facility. Letters of credit in the amount of \$62.3 million support variable-rate demand bonds issued through the NJEDA to finance Marina's initial thermal plant project and \$25.3 million were posted to enable SJE to market retail electricity and for various construction activities. The Company also provided an additional \$25.2 million letter of credit under a separate facility outside of the revolving credit facility to support variable-rate demand bonds issued through the NJEDA to finance the expansion of SJG's natural gas distribution system. This letter of credit expires in August 2011.

ENVIRONMENTAL REMEDIATION COSTS — SJI incurred and recorded costs for environmental cleanup of 12 sites where SJG or its predecessors operated gas manufacturing plants. SJG stopped manufacturing gas in the 1950s. SJI and some of its nonutility subsidiaries also recorded costs for environmental cleanup of sites where SJF previously operated a fuel oil business and Morie maintained equipment, fueling stations and storage.

SJI successfully entered into settlements with all of its historic comprehensive general liability carriers regarding the environmental remediation expenditures at the SJG sites. Also, SJG purchased a Cleanup Cost Cap Insurance Policy limiting the amount of remediation expenditures that SJG will be required to make at 11 of its sites. This policy will be in force until 2024 at 10 sites and until 2029 at one site. The future cost estimates discussed hereafter are not reduced by projected insurance recoveries from the Cleanup Cost Cap Insurance Policy. The policy is limited to an aggregate amount of \$50.0 million, of which SJG has recovered \$43.1 million through December 31, 2010. As discussed in Note 10, the BPU allows SJG to recover environmental remediation costs through the RAC.

Since the early 1980s, SJI accrued environmental remediation costs of \$267.6 million, of which \$175.8 million was spent as of December 31, 2010.

The following table details the amounts expended and accrued for SJI's environmental remediation during the last two years (in thousands):

	2010	2009
Beginning of Year	\$ 73,442	\$ 68,165
Accruals	27,371	16,975
Expenditures	(8,980)	(11,698)
End of Year	\$ 91,833	\$ 73,442

The balances are segregated between current and noncurrent on the consolidated balance sheets under the captions Current Liabilities and Deferred Credits and Other Noncurrent Liabilities.

Management estimates that undiscounted future costs to clean up SJG's sites will range from \$87.4 million to \$237.4 million. Six of SJG's sites comprise the majority of these estimates, ranging from a low of \$68.5 million to a high of

\$189.3 million. SJG recorded the lower end of this range as a liability because a single reliable estimation point is not feasible due to the amount of uncertainty involved in the nature of projected remediation efforts and the long period over which remediation efforts will continue. Recorded amounts include estimated costs based on projected investigation and remediation work plans using existing technologies. Actual costs could differ from the estimates due to the long-term nature of the projects, changing technology, government regulations and site-specific requirements. Significant risks surrounding these estimates include unforeseen market price increases for remedial services, property owner acceptance of remedy selection, regulatory approval of selected remedy and remedial investigative findings.

TABLE OF CONTENTS

The remediation efforts at SJG's six most significant sites include the following:

Site 1 – Remediation of the site is currently underway in accordance with the remedial action work plan approved by the New Jersey Department of Environmental Protection (NJDEP). Remaining steps to complete the remedy include continued excavation of impacted soil and river sediments as well as groundwater monitoring and sampling.

Site 2 – Various remedial investigation and action activities are ongoing at this site. An interim remedial measure has been implemented and a remedial action work plan has been prepared and submitted to the NJDEP for an offsite interim remedial measure. Remaining steps to remediate soil and groundwater include completing the remedial investigation of impacted soil and groundwater in preparation for selecting the appropriate action and implementation and gaining regulatory and property owner approval of the selected remedy.

Site 3 - Various remedial investigation and action activities are ongoing at this site. Remaining steps include completion of an interim remedial action at one off site property and final remedy selection for the remaining impacts at the site, regulatory approval of the final remedy, and implementation of the selected remedy to address remaining impacted soil and groundwater.

Site 4 - Remedial investigation activities are ongoing at this site including pilot studies of potential remedial alternatives and continued soil and groundwater investigation. Remaining steps to remediate the site include completing the investigation of impacted soil and groundwater in preparation for selecting the appropriate action, gaining regulatory and property owner approval of the selected remedy and implementation of the remedy once approved.

Site 5 – Remedial investigation activities are ongoing at this site. Remaining steps include completing the remedial investigation of impacted soil and groundwater in preparation for selecting the appropriate action and implementation and gaining regulatory and property owner approval of the selected remedy.

Site 6 – Remedial investigation activities are ongoing at this site. Remaining steps to remediate include completing the remedial investigation of impacted soil and groundwater in preparation for selecting the appropriate action and implementation and gaining regulatory approval of the selected remedy.

With Morie's sale, EMI assumed responsibility for environmental liabilities currently estimated between \$2.7 million and \$8.5 million. The information available on these sites is sufficient only to establish a range of probable liability and no point within the range is more likely than any other. Therefore, EMI has accrued the lower end of the range. Changes in the accrual are included in the statements of consolidated income under Loss from Discontinued Operations.

SJI and SJF estimate their potential exposure for the future remediation of six sites where fuel oil operations existed years ago to range from \$1.7 million to \$4.0 million. The lower end of this range has been recorded under Current Liabilities and Deferred Credits and Other Noncurrent Liabilities as of December 31, 2010.

16. DERIVATIVE INSTRUMENTS:

Certain SJI subsidiaries are involved in buying, selling, transporting and storing natural gas and buying and selling retail electricity for their own accounts as well as managing these activities for other third parties. These subsidiaries are subject to market risk on expected future purchases and sales due to commodity price fluctuations. The Company uses a variety of derivative instruments to limit this exposure to market risk in accordance with strict corporate guidelines. These derivative instruments include forward contracts, swap agreements, options contracts and futures contracts. As of December 31, 2010, the Company had outstanding derivative contracts intended to limit the exposure

to market risk on 22.3 MMdts of expected future purchases of natural gas, 19.1 MMdts of expected future sales of natural gas, 2.3 MMmwh of expected future purchases of electricity, and 0.1 MMmwh of expected future sales of electricity. These contracts, which have not been designated as hedging instruments under GAAP, are measured at fair value and recorded in Derivatives — Energy Related Assets or Derivatives — Energy Related Liabilities on the consolidated balance sheets. The net unrealized pre-tax gains and losses for these energy related commodity contracts are included with realized gains and losses in Operating Revenues – Nonutility.

TABLE OF CONTENTS

SJI structured its subsidiaries so that SJG and SJE transact commodities on a physical basis and typically do not directly enter into positions that financially settle. SJRG performs this risk management function for these entities and enters into the types of financial transactions noted above. As part of its gas purchasing strategy, SJG uses financial contracts through SJRG to hedge against forward price risk. The costs or benefits of these short-term contracts are recoverable through SJG's BGSS clause, subject to BPU approval. As of December 31, 2010 and 2009, SJG had \$5.0 million and \$9.2 million of costs, respectively, included in its BGSS related to open financial contracts.

Management takes an active role in the risk management process and has developed policies and procedures that require specific administrative and business functions to assist in identifying, assessing and controlling various risks. Management reviews any open positions in accordance with strict policies to limit exposure to market risk.

SJI presents revenues and expenses related to its energy trading activities on a net basis in Operating Revenues — Nonutility in the consolidated statements of income consistent with GAAP. This net presentation has no effect on operating income or net income.

The Company has also entered into interest rate derivatives to hedge exposure to increasing interest rates and the impact of those rates on cash flows of variable-rate debt. These interest rate derivatives, some of which have been designated as hedging instruments under GAAP, are measured at fair value and recorded in Derivatives-Other on the consolidated balance sheets. The fair value represents the amount SJI would have to pay the counterparty to terminate these contracts as of those dates. As of December 31, 2010, SJI's active interest rate swaps were as follows:

Notional Amount	Fixed Interest Rate	Start Date	Maturity	Type of Debt	Obligor
\$ 3,900,000	4.795 %	12/01/2004	12/01/2014	Taxable	Marina
\$ 8,000,000	4.775 %	11/12/2004	11/12/2014	Taxable	Marina
\$ 20,000,000	4.080 %	11/19/2001	12/01/2011	Tax-exempt	Marina
\$ 14,500,000	3.905 %	03/17/2006	01/15/2026	Tax-exempt	Marina
\$ 500,000	3.905 %	03/17/2006	01/15/2026	Tax-exempt	Marina
\$ 330,000	3.905 %	03/17/2006	01/15/2026	Tax-exempt	Marina
\$ 7,100,000	4.895 %	02/01/2006	02/01/2016	Taxable	Marina
\$ 12,500,000	3.430 %	12/01/2006	02/01/2036	Tax-exempt	SJG
\$ 12,500,000	3.430 %	12/01/2006	02/01/2036	Tax-exempt	SJG

The interest rate derivatives that are currently designated as cash flow hedges have been determined to be highly effective. Therefore, the changes in fair value of the effective portion of these swaps along with the cumulative unamortized costs, net of taxes, have been recorded in Accumulated Other Comprehensive Loss. These unrealized gains and losses will be reclassified into earnings when the forecasted cash flows of the related variable-rate debt affects earnings, or when it is probable that it will not occur. The ineffective portion of these swaps have been included in Interest Charges.

The unrealized gains and losses on the interest rate derivatives that have not been designated as cash flow hedges have also been included in Interest Charges. However, for selected interest rate derivatives at SJG, management believes that, subject to BPU approval, the market value upon termination can be recovered in rates and therefore these unrealized losses have been included in Other Regulatory Assets in the consolidated balance sheets.

TABLE OF CONTENTS

The fair values of all derivative instruments, as reflected in the consolidated balance sheets as of December 31, are as follows (in thousands):

Derivatives not designated as hedging instruments under GAAP

	2010		2009	
	Assets	Liabilities	Assets	Liabilities
Energy related commodity contracts:				
Derivatives – Energy Related – Current	\$ 39,513	\$ 42,297	\$ 36,512	\$ 28,260
Derivatives – Energy Related – Non-Current	11,556	8,641	11,585	10,931
Interest rate contracts:				
Derivatives - Other	—	5,539	—	3,704
Total derivatives not designated as hedging instruments under GAAP	51,069	56,477	48,097	42,895

Derivatives designated as hedging instruments under GAAP

Interest rate contracts:

Derivatives - Other	—	1,865	—	2,119
Total derivatives designated as hedging instruments under GAAP	—	1,865	—	2,119

Total Derivatives	\$ 51,069	\$ 58,342	\$ 48,097	\$ 45,014
-------------------	-----------	-----------	-----------	-----------

The effect of derivative instruments on the consolidated statements of income and comprehensive income for the year ended is as follows (in thousands):

Derivatives in Cash Flow Hedging Relationships

Interest Rate Contracts:

Gains or (losses) recognized in OCI on effective portion	\$ (1,063)	\$ 164	\$ (2,739)
Losses reclassified from accumulated OCI into income (a)	\$ (1,486)	\$ (1,462)	\$ (936)
Gains or (losses) recognized in income on ineffective portion (a)	\$ —	\$ —	\$ —

(a) Included in Interest Charges

Derivatives Not Designated as Hedging Instruments under GAAP

	2010	2009	2008
Gains (losses) on Energy related commodity contracts (a)	\$ (22,624)	\$ (14,815)	\$ 9,318
Gains (losses) on Interest rate contracts (b)	(641)	1,210	(2,173)
Total	\$ (23,265)	\$ (13,605)	\$ 7,145

(a) Included in Operating Revenues - Non Utility

(b) Included in Interest Charges

Net realized (losses) gains associated with SJG's energy related financial commodity contracts of \$(23.5) million, \$(51.9) million and \$6.2 million for 2010, 2009 and 2008, respectively, are not included in the above table. As of

December 31, 2010 and 2009, SJG had \$5.0 million and \$9.2 million of unrealized losses on energy related financial commodity contracts, respectively, included in its BGSS which are also not included in the above table. These contracts are part of SJG's regulated risk management activities that serve to mitigate BGSS costs passed on to its customers. As these transactions are entered into pursuant to, and recoverable through, regulatory riders, any changes in the value of SJG's energy related financial commodity contracts are deferred in Regulatory Assets or Liabilities and there is no impact to earnings.

TABLE OF CONTENTS

Certain of the Company's derivative instruments contain provisions that require immediate payment or demand immediate and ongoing collateralization on derivative instruments in net liability positions in the event of a material adverse change in the credit standing of the Company. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on December 31, 2010, is \$19.8 million. If the credit-risk-related contingent features underlying these agreements were triggered on December 31, 2010, the Company would have been required to settle the instruments immediately or post collateral to its counterparties of approximately \$13.2 million after offsetting asset positions with the same counterparties under master netting arrangements.

17. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES:

GAAP establishes a hierarchy that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques. The levels of the hierarchy are described below:

Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; these include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of financial assets and financial liabilities and their placement within the fair value hierarchy.

For financial assets and financial liabilities measured at fair value on a recurring basis, information about the fair value measurements for each major category as of December 31, 2010 is as follows (in thousands):

	Total	Level 1	Level 2	Level 3
Assets				
Available-for-Sale Securities (A)	\$ 6,720	\$ 6,720	\$ —	\$ —
Derivatives – Energy Related Assets (B)	51,069	21,204	24,878	4,987
	\$ 57,789	\$ 27,924	\$ 24,878	\$ 4,987
Liabilities				
Derivatives – Energy Related Liabilities (B)	\$ 50,938	\$ 19,513	\$ 23,275	\$ 8,150
Derivatives – Other (C)	7,404	—	7,404	—
	\$ 58,342	\$ 19,513	\$ 30,679	\$ 8,150

(A) Available-for-Sale Securities are valued using the quoted principal market close prices that are provided by the trustees of these securities.

(B) Derivatives – Energy Related Assets and Liabilities are traded in both exchange-based and non-exchange-based markets. Exchange-based contracts are valued using unadjusted quoted market sources in active markets and are categorized in Level 1 in the fair value hierarchy. Certain non-exchange-based contracts are valued using indicative price quotations available through brokers or over-the-counter, on-line exchanges and are categorized in Level 2. These price quotations reflect the average of the bid-ask mid-point prices and are obtained from sources that management believes provide the most liquid market. For non-exchange-based derivatives that trade in less liquid markets with limited pricing information, model inputs generally would include both observable and unobservable inputs. In instances where observable data is unavailable, management considers the assumptions that market

participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility and contract duration. Such instruments are categorized in Level 3 as the model inputs generally are not observable. Management reviews and corroborates the price quotations to ensure the prices are observable which includes consideration of actual transaction volumes, market delivery points, bid-ask spreads and contract duration.

TABLE OF CONTENTS

(C) Derivatives – Other, include interest rate swaps that are valued using quoted prices on commonly quoted intervals, which are interpolated for periods different than the quoted intervals, as inputs to a market valuation model. Market inputs can generally be verified and model selection does not involve significant management judgment.

Transfers between different levels of the fair value hierarchy may occur based on the level of observable inputs used to value the instruments from period to period. During the year ended December 31, 2010, there were no transfers between levels within the fair value hierarchy, including no transfers in or out of Level 3.

The changes in fair value measurements of Derivatives – Energy Related Assets and Liabilities at December 31, 2010 using significant unobservable inputs (Level 3) are as follows (in thousands):

Balance at January 1, 2010	\$ (10,299)
Total gains and losses (realized/unrealized) included in earnings	(774)
Transfers in and/or out of Level 3, net	—
Settlements	7,910
Balance at December 31, 2010	\$ (3,163)

Total losses for 2010 included in earnings, that are attributable to the change in unrealized losses relating to those assets and liabilities still held as of December 31, 2010, are \$0.8 million. These losses are included in Operating Revenues-Nonutility on the statement of consolidated income.

18. SUBSEQUENT EVENT:

In February 2011, ACR Energy Partners, LLC (ACR), a joint venture in which Marina has a 50% equity interest, entered into a 20 year contract with a developer to build, own and operate a central energy center and energy distribution system for a planned hotel, casino and entertainment complex in Atlantic City, New Jersey. ACR expects to provide construction energy to the complex in 2011 and provide full energy services when the complex is completed in 2012. Marina is obligated to contribute approximately \$21.0 million to ACR, provided the developer has met certain conditions. These conditions include, among others, substantial completion of the complex and demonstration of adequate financial resources to operate the complex.

TABLE OF CONTENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
South Jersey Industries, Inc.
Folsom, New Jersey

We have audited the accompanying consolidated balance sheets of South Jersey Industries, Inc. and subsidiaries (the “Company”) as of December 31, 2010 and 2009, and the related statements of consolidated income, cash flows, changes in equity and comprehensive income for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of South Jersey Industries, Inc. and subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2010, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of December 31, 2010, based on the criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2011 expressed an unqualified opinion on the Company’s internal control over financial reporting.

Item 9. Changes in and Disagreements with Accountants on
Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of its chief executive officer and chief financial officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of December 31, 2010. Based on that evaluation, the Company's chief executive officer and chief financial officer concluded that the disclosure controls and procedures employed at the Company are effective.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined under Exchange Act Rules 13a-15(f). The Company's internal control system is designed to provide reasonable assurance to its management and board of directors regarding the preparation and fair presentation of published financial statements. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under that framework, management concluded that our internal control over financial reporting was effective as of December 31, 2010.

The effectiveness of our internal control over financial reporting as of December 31, 2010 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report which is included under this Item 9A.

Changes in Internal Control over Financial Reporting

There has not been any change in the Company's internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during the fiscal quarter ended December 31, 2010 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

TABLE OF CONTENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
South Jersey Industries, Inc.
Folsom, New Jersey

We have audited the internal control over financial reporting of South Jersey Industries, Inc. and subsidiaries (the “Company”) as of December 31, 2010, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2010 of the Company and our report dated February 28, 2011 expressed an unqualified opinion on those financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
South Jersey Industries, Inc.
Folsom, New Jersey

We have audited the consolidated financial statements of South Jersey Industries, Inc. and subsidiaries (the “Company”) as of December 31, 2010 and 2009, and for each of the three years in the period ended December 31, 2010, and the Company’s internal control over financial reporting as of December 31, 2010, and have issued our reports thereon dated February 28, 2011; such consolidated financial statements and reports are included in this Form 10-K. Our audits also included the consolidated financial statement schedules of the Company listed in Item 15(a)2. These consolidated financial statement schedules are the responsibility of the Company’s management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.
