IMA EXPLORATION INC
Form 6-K
October 30, 2002

FORM 6-K
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Report of Foreign Private Issuer
Pursuant to Rule 13a-16 or 15d-16 of
the Securities Exchange Act of 1934

For the month of OCTOBER , 2002

IMA Exploration Inc.
(Translation of registrant's name into English)

0-30464
(SEC File Number)

#709 - 837 West Hastings Street, Vancouver, British Columbia, V6C 3N6
(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports
under cover Form 20-F or Form 40-F.

Form 20-F X Form 40-F

Indicate by check mark whether the registrant by furnishing the information
contained in this Form is also thereby furnishing the information to the
Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No X

If "Yes" is marked, indicate below the file number assigned to the registrant in
connection with Rule 12g3-2(b): 82-_____

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the
registrant has duly caused this report to be signed on its behalf by the
undersigned, thereunto duly authorized.

IMA Exploration Inc.
(Registrant)

Date October 25, 2002

By /s/ William Lee

Securities Act

MATERIAL CHANGE REPORT

Section 85(1) of the Securities Act, British Columbia
(the "British Columbia Act")
Section 118(1) of the Securities Act, Alberta (the "Alberta Act")
Section 75(2) of the Securities Act, Ontario (the "Ontario Act")

1. Reporting Issuer

The full name of the Issuer is IMA Exploration Inc. (the "Issuer"). The address and telephone number of the principal office in Canada of the Issuer is as follows:

#709 - 837 West Hastings Street
Vancouver, BC
V6C 3N6
Phone: (604) 687-1828

2. Date of Material Change

October 25, 2002

3. Press Release

A press release dated October 25, 2002, a copy of which is attached, was released through various approved public media and filed with the TSX Venture Exchange and the British Columbia, Alberta and Ontario Securities Commissions.

4. Summary of Material Change(s)

Please see attached press release for details.

5. Full Description of Material Change

Please see attached press release for full details.

6. Reliance on Section 85(2) of the British Columbia Act, Section 118(2) of the Alberta Act and Section 75(3) of the Ontario Act

Not Applicable

- 2 -

7. Omitted Information

NEWS RELEASE

October 25, 2002

IMA's Las Bayas Program Completed
Patagonia, Argentina

IMA Exploration Inc. is pleased to announce that Phase I exploration has been completed on its Las Bayas gold project. The work program on Las Bayas focused on a 4.5 x 1.5 kilometer area of intense quartz veining within a gold mineralized corridor that extends over 10 kilometers in length. The mineralized area identified fits the well defined Esquel geological model for the upper levels of a high-grade low-sulphidation epithermal gold vein system. The Esquel gold deposit in Patagonia is 3.8 million ounces of gold and 6.9 million ounces of silver, and was purchased in July 2002 for US\$230M by Meridian Gold.

The exploration program consisted of detailed geological mapping of the epithermal system, rock chip sampling of outcropping veins, and an extensive soil grid over the entire 4.5 x 1.5 km area. More than 30 individual veins, with varying widths up to 22 metres, have been located to date, and all of these have

Edgar Filing: IMA EXPLORATION INC - Form 6-K

potential to host significant gold concentrations at depth. The surface geological environment that has been identified on Las Bayas, is typical of regional high-grade low-sulphidation epithermal gold vein systems, as evidenced by values of gold, silver, and pathfinder elements.

At Las Bayas high pathfinder element values (As up to 1,146 ppm, Hg up to 23,700 ppb), combined with vein textures mapped and defined petrographically, indicate a present erosional surface above the predicted gold zone within the epithermal system. The Company's geologists believe that the boiling level and associated 'Bonanza-style' precious metal mineralization can be intersected 50 to 100 metres below the present surface. Geologically, the veins at Las Bayas show strong similarities to many surface exposures at the Esquel deposit where much of its resource has been defined at depths of 50 to 150 metres.

Samples from a high priority target within Las Bayas, the "Bola Vein", have been submitted for re-assay, and these results will be released as soon as they become available. Highlights from Las Bayas rock sampling (excluding the Bola Vein) are outlined below:

Sample	Width (m)	Gold (g/t)	Silver (g/t)	Gold Equivalent (Au+Ag/70)
2487	1.65	1.56	16.4	1.79
2493	1.25	4.20	7.6	4.31
2497	1.05	2.83	6.6	2.92
2500	2.0	1.33	13.8	1.53
M96	grab	3.79	71.9	4.82
M521	3.75	2.96	10.4	3.11
M524	grab	1.73	12.7	1.91

The Company's geological team conducting the exploration program in the region are highly experienced, and have an intimate knowledge of the local geology. The exploration team includes: Paul Lhotka, Ph.D., P.Geo., who has extensive experience in low sulphidation epithermal gold vein systems; Sergio Kain, B.Sc., who was a member of Brancote Holdings PLC's geological team that made the Esquel discovery; and Daniel Bussandri, B.Sc., a local Argentine geologist with substantial experience in the Patagonia region.

The Esquel and Cerro Vanguardia gold deposits in Patagonia, both of which are large low sulphidation epithermal gold vein systems, have highlighted the potential for discoveries of similar styles of mineralization within this largely unexplored region. IMA has been evaluating exploration prospects in Patagonia since July 2000, and now holds a 100% interest with no underlying royalties in 750 square kilometres of highly prospective gold projects in Patagonia.

IMA is a pioneer and veteran of Argentina's mining exploration industry and is well positioned to take advantage of highly prospective gold projects as they become available. The Company's network of contacts has been developed over the past 10 years, enabling IMA to quickly identify new opportunities and negotiate advantageous terms.

ON BEHALF OF THE BOARD

"Dr. Gerald Carlson"
