IMA EXPLORATION INC
Form 6-K
July 08, 2004

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16 UNDER
THE SECURITIES EXCHANGE ACT OF 1934

For the month of JULY, 2004.

Commission File Number: 0-30464

IMA EXPLORATION INC.

(Translation of registrant's name into English)

#709 - 837 West Hastings Street, Vancouver, British Columbia, V6C 3N6, Canada

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports
under cover of Form 20-F or Form 40-F: FORM 20-F FORM 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as
permitted by Regulation S-T Rule 101(b)(1): _____

Indicate by check mark if the registrant is submitting the Form 6-K in paper as
permitted by Regulation S-T Rule 101(b)(7): _____

Indicate by check mark whether the registrant by furnishing the information
contained in this Form, is also thereby furnishing the information to the
Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.
YES NO

If "Yes" is marked, indicate below the file number assigned to the registrant in
connection with Rule 12g3-2(b): 82-_____

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the
registrant has duly caused this report to be signed on its behalf of the
undersigned, thereunto duly authorized.

NEWS RELEASE

JULY 08, 2004

PHASE II DRILLING INCREASES SIZE POTENTIAL OF IMA'S NAVIDAD SILVER DISCOVERY

IMA EXPLORATION INC. (IMA-TSX.V, IMXPF-OTC.BB) is pleased to announce results of the first 11 drill holes from the ongoing Phase II drill program at the Company's 100% owned Navidad Project. To date about 4500 metres (m) have been drilled in 24 drill holes testing several targets outside of the Galena Hill deposit where an Indicated Resource of 207 million ounces of silver (63.6 Million tonnes grading 101 g/t silver and 1.76% lead) has been identified (see May 25, 2004 release).

Drilling at Navidad Hill returned excellent intersections of 104.6M OF 126G/T SILVER including 35.5M OF 295 G/T SILVER from hole NV04-54, which adds significant additional width to the northwest trending mineralized zone at Navidad Hill (see attached map for drill hole locations and the attached table for a summary of drill results). Eight new drill holes have been collared to date at Navidad Hill testing potential both along strike and to increase the width of the known mineralized zone where previous drilling intersected 68.6m of 275g/t silver (NV03-08) and 37.8m of 475 g/t silver (NV03-07).

At the 6 km Esperanza Trend, results include 2.7M OF 831 G/T SILVER in hole 62 and 800m to the northwest hole 63 intersected 45.8M OF 94 G/T SILVER, including 4.0M OF 246 G/T SILVER. These results confirm the high grades and potential for a significant structurally controlled zone at Esperanza.

Six drill holes have been completed to date at Barite Hill. The first three holes (NV04-58 through 60) contain significant near surface intersections of galena matrix breccia similar in style to that at Galena hill, but with generally lower silver and lead values.

Two drill holes were completed at Galena Hill within the indicated resource to obtain core for metallurgical test work. These two holes (NV04-56 and 57) cored long intersections of good silver grades as expected. Quarter core for metallurgical testing has been received by PRA Laboratories in Vancouver, and testing is now underway.

Dr. Paul Lhotka is IMA's Qualified Person for the Navidad project and has overseen all aspects of the current program.

IMA Exploration Inc. has over 10 years experience in Argentina and is focused on the exploration and development of its 100% owned Navidad discovery and its property portfolio in the region.

ON BEHALF OF THE BOARD

/s/ Joseph Grosso

Mr. Joseph Grosso, President & CEO

Edgar Filing: IMA EXPLORATION INC - Form 6-K

NV04-59	Barite Hill	148.70	152.40	3.70	23	0.00
NV04-60	Barite Hill			no	significant	results
NV04-61	Esperanza Trend	52.50	55.50	3.00	353	0.03
NV04-62	Esperanza Trend	7.20	9.90	2.70	831	0.09
NV04-63	Esperanza Trend	31.60	77.40	45.80	94	0.01
including		33.55	37.50	3.95	246	0.01
NV04-64	Esperanza Trend	69.20	102.10	32.90	47	0.03
including		69.20	70.60	1.40	101	0.00
and		96.65	102.10	5.45	153	0.17

Notes:

1. All length weighted averages (LWA) results are "uncut".
2. Galena Hill holes drilled in order to obtain samples for metallurgical testing.
3. Galena Hill results are reported as length-density weighted averages (LDWA) as sufficient data is now available to allow the calculation of model densities for each samples within the Galena Hill Deposit.
4. A table with full results to date and drill hole locations, orientations, and lengths is available at IMA's website: www.imaexploration.com
5. True thicknesses in the case of Navidad Hill are approximately 70% of the intercept length; in the case of Barite Hill they are close to 100% of the intercept length, while at Esperanza the relationship is a yet undetermined.
