NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

GENERAL

1. Basis of Presentation

The information contained herein with respect to the three month period and six month period ended June 30, 2004 and 2003 has been reviewed by the independent auditors and was prepared in conformity with generally accepted accounting principles for interim financial information and instructions for Form 10-QSB and Item 310(b) of Regulation S-B. Accordingly, the condensed consolidated financial statements do not include information and footnotes required by generally accepted accounting principles. Included are the adjustments, which, in the opinion of management, are necessary for a fair presentation of the financial information for the three-month period and six-month period ended June 30, 2004 and 2003. The results are not necessarily indicative of results to be expected for the year.

2. Income Per Common Share

Basic income per share is calculated by dividing net income attributable to common stockholders by the weighted average number of outstanding common shares during the year. Basic income per share excludes any dilutive effects of options, warrants and other stock-based compensation.

3. Stock-Based Compensation

The Company has adopted Statement of Financial Accounting Standards No. 123, "Accounting for Stock Based Compensation" ("SFAS 123"). The provisions of SFAS 123 allow companies to either expense the estimated value of stock options or to continue to follow the intrinsic value method set forth in Accounting Principles Bulletin Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"), but disclose the pro forma effects on net income (loss) had the fair value of the options been expensed. The Company has elected to continue to apply APB 25 in accounting for its employee stock option incentive plans. Under APB 25, where

Edgar Filing: MEDIFAST INC - Form 10QSB

the exercise price of the Company's employee stock options equals the market price of the underlying stock on the date of grant, no compensation is recognized.

If compensation expense for the Company's stock-based compensation plans had been determined consistent with SFAS 123, the Company's net income per share including pro forma results would have been the amounts indicated below:

	Three Months ended June, 30

MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

SIX MONTHS ENDED JUNE 30, 2004 AND JUNE 30, 2003

Revenues for the first six months of 2004 were \$14,174,000, representing an increase of \$1,410,000 (11%) from the \$12,764,000 reported for the six-month period ending June 30, 2003. Domestic sales for the first half of 2004 were up \$2,860,000 (26%) from the same time period last year. The growth in revenue was a result of the success of the Hi-Energy Clinic model, which experienced continuous revenue growth throughout the first half of the year. This was largely attributed to the increase in the number of licensed clinics nationwide, which at the end of the first half of the year totaled over 100 clinics. The Take Shape For Life division continues to experience increased sales due to the success of the newly implemented "Tasting Party Plan", which has proven to be very effective at generating revenues, as well recruiting new Health Advisors and customers. The increase in revenue was also attributable to the Company's extensive national advertising campaign, which consisted of television advertising followed by direct mail and marketing programs. International sales during the first quarter of 2004 attributed to approximately \$50,000, as compared to \$1,500,000 for the same period last year. This large influx was due to delayed product launches throughout multiple countries in the Middle and Far

Edgar Filing: MEDIFAST INC - Form 10QSB

East as a result of the conflict in Iraq. Cost of sales for the first half of 2004 decreased by \$15,000 (1%) from 2003. Gross profit for the first half of 2004 increased by \$1,425,000 (15%) from 2003 due to the increased manufacturing and distribution efficiencies related to the acquired distribution facility located in Ridgley, Maryland. Selling, general and administrative expenses for the first half of 2004 was \$8,977,000 which increased by \$1,939,000 (27%) over the same period of 2003, due to the increased cost of a National television advertising campaign, the expansion of its commissioned sales organization, expenses related to introducing the Hi Energy Clinic model to additional locations, as well as overall corporate infrastructure improvements. Income from Operations was \$1,901,000 a decrease of \$514,000 (21%), due to the increased selling, general and administrative expenses which the Company deemed necessary to allow future growth along with the non existence of the high margin International sales, which attributed to a substantial amount of operational income in the first half of 2003. The Company also had to delay its introduction of Medifast Maintain for people with diabetes because the Johns Hopkins study, which provides significant health improvement outcomes, was not complete until July 2004. Maintain's introduction on a major TV retailer was a tremendous success, and the Company expects a significant boost in revenues as a result of its expanded launch in the next three quarters.

The Company had fully diluted earnings per share of \$0.11 in the first half of 2004, versus \$0.14 in 2003, with a dilution increase of 1.3 million shares, primarily from conversions of preferred stock, the exercise of options and warrants, and the sale of common stock in a capital raising completed in July 2003. The Company has made substantial investments in growing infrastructure and revenues during the 1st half of the year that will have a significant impact on improving revenues, cash flow and operating results in the future. The Company has increased shareholder equity to \$18,405,000, which is \$10,233,000 (125%) greater than the same period last year, and has also increased the Company's asset to liability ratio to 4 to 1, double what it was only one year ago.

7

THREE MONTHS ENDED JUNE 30, 2004 AND JUNE 30, 2003

Second quarter revenues for 2004 of \$7,357,000 increased by \$940,000 (15%) from \$6,417,000 for the three-month period ended June 30, 2003. Cost of sales for the period was \$1,946,000, an increase of \$318,000 (19%) from \$1,628,000 during the same period of 2003. Gross profits of \$5,411,000 for the second quarter of 2004 increased by \$622,000 (13%) from \$4,789,000 in the second quarter of 2003. During the quarter the Company experienced a profit from operations of \$982,000 compared to a profit of \$971,000 for the second quarter of 2003. The income before provision for income taxes for the second quarter of 2004 was \$925,000 compared to \$959,000 in the second quarter of 2003.

SEASONALITY

The Company's weight management products and programs are subject to seasonality. Traditionally the holiday season in November/December of each year is considered poor for diet control products and services. January and February generally show increases in sales, as these months are considered the commencement of the "diet season." The Company will not experience the same degree of seasonality in 2004 because of the introduction of its full line of products that are designed to provide nutritional solutions for people with diabetes, arthritis, coronary health, and menopause.

LIQUIDITY AND CAPITAL RESOURCES

The Company had stockholders' equity of \$18,405,000 and working capital of

Edgar Filing: MEDIFAST INC - Form 10QSB

\$10,483,000 on June 30, 2004 compared with \$8,172,000 and \$2,996,000 at June 30, 2003, respectively. The \$10,233,000 net increase in stockholder's equity and the \$7,487,000 net increase in working capital reflects the profits and equity contributions in the first six months from operations.

INFLATION

To date, inflation has not had a material effect on the Company's business.

ITEM 5. OTHER INFORMATION

Litigation: On December 16, 2003 John Donavin, on behalf of the General Public, filed suit, against Jason Pharmaceuticals, Inc. in the Superior Court of the State of California, City and County of San Francisco. The suit alleges that Medifast bars contain Vitamin D3 or Vitamin D in violation of Federal laws and regulations, and asks for equitable relief and damages. The Company's general council believes that the Company's formulation used in its "meal replacement" bars for over 20 years has been and is in conformity with current and past FDA regulations. The Company believes that the plaintiff's claim lacks merit and may even be considered frivolous. The suit has been stayed upon appeal to the FDA to clarify its regulations.

In January, Mr. Leonard Z. Sotomayor, former associate of Mr. David Scheffler, a financial consultant for the Company, filed a complaint against Medifast, Inc., David Scheffler and T-1 Holdings LLC. The Company's counsel has filed a motion to dismiss based on the facts of law. The Company believes the complaint has no merit and in fact has been drawn into a personal dispute between two former business associates.

8

Other: On April 8, 2004, the Company announced that it had initiated a clinical study with Johns Hopkins Bloomberg School of Public Health in Baltimore, Maryland to test the efficacy of Medifast meal replacements versus a standard reference diet on weight loss and weight maintenance in a joint parent-child plan approach. The 18-month study will consist of 80 overweight or obese boys and girls between the ages of 8 and 15 along with 40 of their parents. The clinical study will examine whether a joint parent-child approach using Medifast engineered foods will result in greater weight loss than children dieting alone, and examine the positive impact of restricting and controlling the caloric intake of adolescent patients which will provide clinical evidence to support this therapy to pediatricians.

On April 15, 2004 The Company announced that its Medifast Plus for Diabetics Shakes received an official patent (patent number 6,706,697) from the United States Patent and Trademark Office.

On June 7, 2004 the Board of Directors authorized a stock buyback of up to 200,000 shares of its common stock. The buyback authorization allows the Company to make purchases from time to time on the open market at prevailing prices or in privately negotiated transactions. At the close of the quarter ending June 30, 2004 the Company had purchased 1,500 on the open market.

Earnings Per Share: The Company follows the provisions of Statement of Financial Accounting Standards No. 128, "Earnings Per Share." The calculation of basic and diluted earnings per share ("EPS") is reflected on the accompanying Consolidated Statement of Operations.

Edgar Filing: MEDIFAST INC - Form 10QSB

Issuance of Common Stock: Due to the conversion of Series "B" preferred stock and the exercising of warrants and options by investors, consultants, directors and employees, the Company issued 315,427 shares of common stock throughout the second quarter of 2004. Of these shares issued, 295,640 were from the conversion of Series "B" convertible preferred stock.

Code of Ethics: In September 2002, the Company implemented a Code of Ethics by which directors, officers and employees commit and undertake to personal and corporate growth, dedicate themselves to excellence, integrity and responsiveness to the marketplace, and work together to enhance the value of the Company for the shareholders, vendors, and customers.

Trading Policy: In March 2003, the Company implemented a Trading Policy whereby if a director, officer or employee has material non-public information relating to the Company, neither that person nor any other related person may buy or sell securities of the Company or engage in any other action to take advantage of, or pass on to others, that information. Additionally, insiders may purchase or sell MED securities if such purchase or sale is made within 30 days after an earnings or special announcement to include the 10-KSB, 10-QSB and 8-K in order to insure that investors have available the same information necessary to make investment decisions as insiders.

Internal Control Policy: In April 2003, the Company implemented an Internal Control Policy allowing for the confidential receipt and treatment of complaints in regards to the Company's internal accounting controls and auditing matters. A director, officer or employee may file a confidential and anonymous concern regarding questionable accounting or auditing matters to an independent representative of the Medifast Audit Committee through the provided "Whistleblower Hotline". As of June 30, 2004, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the Chief Executive Officer and the Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of June 30, 2004. There have been no significant changes in the Company's internal controls or in other factors that could significantly affect internal controls subsequent to June 30, 2004.

9

Significant Subsequent Events: In July 2004, The Company announced the successful launch of Maintain by Medifast(TM), a line of low-calorie, low-carbohydrate, diabetic friendly products, on a National Multi-Channel Television Retailer. The line of low-glycemic shakes, bars and soups is backed by an ongoing clinical study whereby participants achieved a weight loss of up to 2 pounds per week by incorporating the products into a 1200 to 1500 calorie per day meal plan. The Company will continue to roll-out and expand the sale of Maintain by Medifast(TM) throughout 2004.

Forward Looking Statements: Some of the information presented in this quarterly report constitutes forward-looking statements within the meaning of the private Securities Litigation Reform Act of 1995. Statements that are not historical facts, including statements about management's expectations for fiscal year 2003 and beyond, are forward-looking statements and involve various risks and uncertainties. Although the Company believes that its expectations are based on reasonable assumptions within the bounds of its knowledge, there can be no assurance that actual results will not differ materially from the Company's expectations. The Company cautions investors not to place undue reliance on forward-looking statements which speak only to management's experience on this
