SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-QSB

QUARTERLY REPORT UNDER SECTION 13 OR 15(d)
SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTER ENDED JANUARY 31, 2006

Commission file number: 0-13301

RF INDUSTRIES, LTD.

(Exact name of registrant as specified in its charter)

Nevada

88-0168936

(State of Incorporation)

(I.R.S. Employer Identification No.)

7610 Miramar Road, Bldg. 6000, San Diego, California 92126-4202

(Address of principal executive offices)

(Zip Code)

(858) 549-6340

FAX (858) 549-6345

(Issuer's telephone and fax numbers, including area code)

Securities registered pursuant to Section 12(b) of the Act: None

Check whether the issuer (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

State the number of shares outstanding of each of the issuer's classes of common stock at the latest practicable date. As of March 12, 2006, the registrant had 3,209,484 shares of Common Stock, \$.01 par value, issued.

Transitional Small Business Disclosure Format (check one): Yes No

RF INDUSTRIES, LTD.
NOTES TO CONDENSED UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - UNAUDITED INTERIM FINANCIAL STATEMENTS

The accompanying unaudited condensed financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-QSB. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments have been included in order to make the information not misleading. Information included in the balance sheet, as of October 31, 2005 has been derived from, and certain terms used herein are defined in, the audited financial statements of the Company as of October 31, 2005 included in the Company's Annual Report on Form 10-KSB ("10-KSB") for the year ended October 31, 2005 that was previously filed with the Securities and Exchange Commission. Operating results for the three month period ended January 31, 2006, are not necessarily indicative of the results that may be expected for the year ending October 31, 2006. The unaudited condensed financial statements should be read in conjunction with the financial statements and footnotes thereto included in the Company's Annual Report on Form 10-KSB for the year

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

ended October 31, 2005.

Certain amounts in the 2005 unaudited condensed financial statements have been reclassified to conform to the 2006 presentation.

NOTE 2 - INVESTMENTS

Pursuant to Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities," the Company's investments in U.S. Treasury Bills were classified as available-for-sale securities and, accordingly, were valued at fair value at the end of each period. If there is an other than temporary decline in fair value, the cost basis of the individual security would have been written down to fair value via a charge to earnings. Unrealized holding gains and losses as of January 31, 2006 were not material.

NOTE 3 - COMPONENTS OF INVENTORY

Inventories, consisting of materials, labor and manufacturing overhead, are stated at the lower of cost or market. Cost has been determined using the weighted average cost method.

	January 31, 2006	October 31,
	(Unaudited)	
Raw materials and supplies	\$971,964	\$845,3
Work in process	60,230	63,2
Finished goods	3,026,849	3,318,2
Inventory reserve	(46,348)	(46,3
	-----	-----
Total	\$4,012,695	\$4,180,5
	=====	=====

Purchases of connector products from two major vendors in the three month period ended January 31, 2006, represented 43% and 16% compared to 34% and 28% of the total inventory purchases for the same period in fiscal year 2005. The Company has arrangements with these vendors to purchase product based on purchase orders periodically issued by the Company.

6

NOTE 4 - EARNINGS PER SHARE

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net income by the weighted average number of common shares outstanding increased by the effects of assuming that other potentially dilutive securities (such as stock options) outstanding during the period had been exercised and the treasury stock method had been applied. At January 31, 2006, the effects of the assumed exercise of options to purchase 77,366 shares of the Company's common stock, at prices ranging from \$5.12 to \$6.38 per share, were not included in the computation of diluted per share amounts because they were anti-dilutive for that purpose. During the period ended January 31, 2005, all options were considered dilutive and included in the calculation of diluted earnings per share.

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

The following table summarizes the computation of basic and diluted weighted average shares outstanding:

	Three Months Ended January 31	
	2006	2005
Weighted average shares outstanding for basic earnings per share	3,107,732	3,008,765
Add effects of potentially dilutive securities-assumed exercised of stock options	549,125	829,063
Weighted average shares for diluted net earnings per share	3,656,857	3,837,828

NOTE 5 - STOCK OPTION PLAN

During the three month period ended January 31, 2006, no stock options were granted and 84,013 with a weighted average share price of \$1.60 were exercised.

The Company continues to measure compensation cost related to stock options issued to employees using the intrinsic value method of accounting prescribed by Accounting Principles Board Opinion No. 25 ("APB 25"), "Accounting for Stock Issued to Employees." The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards No. 123 ("SFAS 123"), "Accounting for Stock-Based Compensation," as amended by Statement of Financial Accounting Standards No. 148 ("SFAS 148"), "Accounting for Stock-Based Compensation - Transaction Disclosure." Accordingly, no earned or unearned compensation cost was recognized in the accompanying condensed financial statements for the stock options granted by the Company to its employees since all of those options have been granted at exercise prices that equaled or exceeded the market value at the date of grant. The Company's historical net income and earnings per common share and pro forma net income and earnings per share assuming compensation cost had been determined based on the fair value at the grant date for all awards by the Company consistent with the provisions of SFAS 123 are set forth below:

7

	Three Months Ended January 31	
	2006	2005
Net income - as reported	\$265,333	\$206,485
Deduct total stock-based employee compensation expense determined under fair		

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

value-based method for all awards - net of income tax effects	(35,244)	(52,201)
	-----	-----
Net income - pro forma	\$230,089	\$154,284
	=====	=====
Basic earnings per share - as reported	\$0.09	\$0.07
Basic earnings per share - pro forma	\$0.07	\$0.05
Diluted earnings per share - as reported	\$0.07	\$0.05
Diluted earnings per share - pro forma	\$0.06	\$0.04

NOTE 6 - CONCENTRATION OF CREDIT RISK

One customer accounted for approximately 16% and 14% of the Company's net sales for the three month periods ended January 31, 2006 and 2005, respectively. Although this customer has been an on-going major customer of the Company during the past five years, the written agreement with this customer does not have any minimum purchase obligations and the customer could stop buying the Company's products at any time for any reason. A reduction, delay or cancellation of orders from this customer or the loss of this customer could significantly reduce the Company's revenues and profits. The Company cannot provide assurance that this customer or any of its current customers will continue to place orders, that orders by existing customers will continue at current or historical levels or that the Company will be able to obtain orders from new customers.

NOTE 7 - GEOGRAPHICAL INFORMATION

The Company attributes sales to geographic areas based on the location of the customers. The following table presents the sales of the Company by geographic area for the three month period ended January 31, 2006 and 2005:

	----- Three Months Ended January 31 -----	
	2006	2005
	-----	-----
United States	\$3,013,718	\$2,532,925
Foreign countries	361,194	335,177
	-----	-----
	\$3,374,912	\$2,868,102
	=====	=====

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report contains forward-looking statements. These statements relate

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

to future events or the Company's future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "except," "plan," "anticipate," "believe," "estimate," "predict," "potential" or "continue," the negative of such terms or other comparable terminology. These statements are only predictions. Actual events or results may differ materially.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, the Company cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither the Company, nor any other person, assumes responsibility for the accuracy and completeness of the forward-looking statements. The Company is under no obligation to update any of the forward-looking statements after the filing of this Quarterly Report on Form 10-QSB to conform such statements to actual results or to changes in its expectations.

The following discussion should be read in conjunction with the Company's financial statements and the related notes and other financial information appearing elsewhere in this Form 10-QSB. Readers are also urged to carefully review and consider the various disclosures made by the Company which attempt to advise interested parties of the factors which affect the Company's business, including without limitation the disclosures made under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations," under the caption "Risk Factors," and the audited financial statements and related notes included in the Company's Annual Report filed on Form 10-KSB for the year ended October 31, 2005 and other reports and filings made with the Securities and Exchange Commission.

CRITICAL ACCOUNTING POLICIES

The financial statements of RF Industries are prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The preparation of these financial statements requires our management to make estimates and assumptions about future events that affect the amounts reported in the financial statements and related notes. Future events and their effects cannot be determined with absolute certainty. Therefore, the determination of estimates requires the exercise of judgment. The Company believes the following critical accounting policies affect its more significant judgments and estimates used in the preparation of financial statements. The Company's significant accounting policies are summarized in Note 1 to the financial statements contained in its Annual Report on Form 10-KSB filed for the fiscal year ended October 31, 2005.

Investments:

Pursuant to Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities," the Company's investments in U.S. Treasury Bills were classified as available-for-sale securities, and, accordingly, were valued at fair value at the end of each period. If there is an other than temporary decline in fair value, the cost basis of the individual security would have been written down to fair value via a charge to earnings. Unrealized holding gains and losses as of January 31, 2006 were not material.

EXECUTIVE OVERVIEW

RF Industries markets connectors and cables to numerous industries for use in thousands of products, primarily for the wireless marketplace. In addition, to a limited extent, the Company also markets wireless products that incorporate connectors and cables. In the past, RF Industries has reported results of operations in three segments that, in general terms, defined the primary markets. However, since sales of connectors and cable assemblies represent over

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

89% of the Company's net sales during the three month period ended January 31, 2006, and since the operations to all of the Company's smaller business units effectively operate as subunits of the Company's principal business unit, the Company no longer reports the results of these other, smaller business units as separate business segments.

9

LIQUIDITY AND CAPITAL RESOURCES

Management believes that existing current assets and the amount of cash it anticipates it will generate from current operations will be sufficient to fund the anticipated liquidity and capital resource needs of the Company for at least twelve months. The Company does not, however, currently have any commercial banking arrangements providing for loans, credit facilities or similar matters should the Company need to obtain additional capital. Management's beliefs that its existing assets and the cash expected to be generated from operations will be sufficient during the current fiscal year are based on the following:

- o As of January 31, 2006, the amount of cash and cash equivalents was equal to \$4,664,153 in the aggregate.
- o As of January 31, 2006, the Company had \$11,672,771 in current assets, and \$683,887 in current liabilities.
- o As of January 31, 2006, the Company had no outstanding indebtedness (other than accounts payable and accrued expenses).

The Company does not believe it will need material additional capital equipment in the next twelve months. In the past, the Company has financed some of its equipment and furnishings requirements through capital leases. No additional capital equipment purchases have been currently identified that would require significant additional leasing or capital expenditures during the next twelve months. Management also believes that based on the Company's current financial condition, the absence of outstanding bank debt and recent operating results, the Company would be able to obtain bank loans to finance its expansion, if necessary, although there can be no assurance any bank loan would be obtainable or, if obtained, would be on favorable terms or conditions.

The Company recognized net income of \$265,333 for the three months ended January 31, 2006 and realized cash flow of \$1,039,262 from its operating activities. The Company's overall cash position increased by \$156,934 during the three month period ended January 31, 2006. Contributing to the amount of net cash provided by operations were depreciation and decreases in accounts receivable, inventories, and income tax refund receivable.

Trade accounts receivable (net of allowances for doubtful accounts) at January 31, 2006 decreased approximately 27%, or by \$501,553, to \$1,389,147 compared to the October 31, 2005 balance of \$1,890,700. The decrease in accounts receivable in relation to the 18% increase in net sales for the first fiscal quarter of 2006 compared with the same period in the prior year is due to improved receivables management and collection efforts by the Company.

Inventories at January 31, 2006 decreased 4%, or \$167,805 to \$4,012,695 compared to \$4,180,500 on October 31, 2005 due to increased sales of 18% for the quarter compared to the same period last year. The Company maintains its inventory levels based on anticipated customer demand for certain of its products. Since the Company considers its ability to fill customer orders on short notice to be an important aspect of its marketing strategy, the Company normally increases inventory need. Accordingly, the Company may increase its inventory levels in future periods if sales continue to rise.

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

The Company's cash increase of \$156,934 was affected by an increase in other current assets, including prepaid expenses and deposits, of \$132,865 to \$230,221 as of January 31, 2006, from \$97,356 on October 31, 2005. This increase in prepaid expenses and deposits was primarily due to annual payments made in the quarter for all the Company's business insurances and worker's compensation premiums.

10

Accounts payable at January 31, 2006 decreased \$104,892 to \$229,857 from \$334,749 on October 31, 2005 primarily due to lower inventory receipts during the quarter from its overseas suppliers.

Net cash used in investing activities was \$1,016,825 for the three months ended January 31, 2006 as a result of payments of \$2,500 of notes receivable, \$29,750 payments on notes receivable from related parties less \$27,251 of capital expenditures and purchases of \$1,021,824 of available-for-sale securities made by the Company.

Net cash provided by financing activities was \$134,497 for the three months ended January 31, 2006, and was attributable to proceeds received from the exercise of stock options.

As of January 31, 2006, the Company had a total of \$4,664,153 of cash and cash equivalents compared to a total of \$4,507,219 of cash and cash equivalents on October 31, 2005. The \$1,039,262 in cash provided by operating activities, together with the use of cash of \$1,016,825 for investing activities and an increase in cash of \$134,497 from financing activities resulted in the Company's overall cash and cash equivalent position increasing by \$156,934 during the past three months.

RESULTS OF OPERATIONS

THREE MONTHS 2006 VS. THREE MONTHS 2005

Net sales in the current fiscal quarter ended January 31, 2006, increased 18%, or \$506,810 to \$3,374,912 from \$2,868,102 in the comparable fiscal quarter in the prior year, due to increased demand for the Company's connector, cable assembly and Bioconnect products plus additional revenues of \$132,000 generated from the Worswick division acquired by the Company in September 2005. The increase in sales reflects a general increase in demand for wireless connectors and cable products. The Company believes this increase is due, in part, to a revival in some sectors of the telecommunication industries and the continuing overall market increase in the demand for wireless products plus additional order demand for its Bioconnect products.

The Company's gross profit as a percentage of sales declined from 49% to 46% during the current fiscal quarter compared to the same fiscal quarter last year. The decline in gross margins during the current quarter resulted from higher labor costs in its Bioconnect division and also increased costs in benefits for all divisions from the comparable period in 2005. Overall, the Company's four smaller divisions have significantly lower gross margins than the RF Connector and Cable Assembly division. Since the connector and cable assembly products net sales decreased as a percentage of the Company's net sales (overall connector and cable sales represented 89% of net sales in the current three month period, compared with 90% in the comparable period of the prior year), the increase in sales of lower margin divisions reduced the combined gross margins in the current period.

Engineering expenses increased 9%, or \$12,106, to \$149,346 from \$137,240

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

in the comparable quarter of the prior year due to development costs for new product enhancements. Engineering expenses fluctuate based on design engineering expenses incurred by the Company at the request of its customers.

Selling and general expenses increased 6% or \$61,602 to \$1,020,402 from \$958,800 in the comparable quarter of the prior fiscal year. Selling and general expenses were higher in the first quarter of the current fiscal year due primarily to a one time increase in administrative expense for year end audit costs, plus amortization of intangible assets, additional bad debt reserve and the increase in compensation expenses (including the salaries of the additional personnel retained to improve the Company's reporting systems). Due to the increase in net sales, the selling and general expenses for the current period as a percentage of sales, were 30% compared with 33% in the prior year.

11

Other income for the first quarter of 2006 increased \$56,544 over the same period in the prior year due to higher investment interest income.

RISK FACTORS

Investors should carefully consider the risks described below and in the Company's Annual Report on Form 10-KSB for the fiscal year ended October 31, 2005. The risks and uncertainties described below and in the Annual Report are not the only ones facing the Company. If any of the following risks actually occur, the Company's business, financial condition or results of operations could be materially adversely affected.

Dependence On RF Connector and Cable Assembly Products

Of the Company's five operating divisions, the three RF Connector and Cable Assembly product divisions account for approximately 83% of the Company's net sales for the fiscal year ended October 31, 2005, and approximately 89% of net sales during the three month period ended January 31, 2006, respectively. The Company expects the RF Connector and Cable Assembly products will continue to account for the majority of the Company's revenues for the near future. Accordingly, an adverse change in the operations of the RF Connector and Cable Assembly divisions could materially adversely affect the Company's business, operating results and financial condition. Factors that could adversely affect the RF Connector and Cable Assembly divisions are described below.

The Company Depends On Third-Party Contract Manufacturers For Substantially All Of Its Connector Manufacturing Needs.

Substantially all of the Company's RF Connector and Cable Assembly products are manufactured by third-party contract manufacturers. The Company relies on them to procure components for RF Connector and Cable Assembly and in certain cases to design, assemble and test its products on a timely and cost-efficient basis. If the Company's contract manufacturers are unable to complete design work on a timely basis, the Company will experience delays in product development and its ability to compete may be harmed. In addition, because some of the Company's manufacturers have manufacturing facilities in Taiwan and Korea, their ability to provide the Company with adequate supplies of high-quality products on a timely and cost-efficient basis is subject to a number of additional risks and uncertainties, including earthquakes and other natural disasters and political, social and economic instability. If the Company's manufacturers are unable to provide it with adequate supplies of high-quality products on a timely and cost-efficient basis, the Company's operations would be disrupted and its net revenue and profitability would suffer. Moreover, if the Company's third-party contract manufacturers cannot consistently produce high-quality products that are free of defects, the Company

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

may experience a higher rate of product returns, which would also reduce its profitability and may harm the Company's reputation and brand.

The Company does not currently have any agreements with any of its contract manufacturers, and such manufacturers could stop manufacturing products for the Company at any time. Although the Company believes that it could locate alternate contract manufacturers if any of its manufacturers terminated their business, the Company's operations could be impacted until alternate manufacturers are found.

The Company's Dependence On Third-Party Manufacturers Increases The Risk That It Will Not Have An Adequate Supply Of Products Or That Its Product Costs Will Be Higher Than Expected.

The risks associated with the Company's dependence upon third parties that develop and manufacture and assemble the Company's products include:

- o reduced control over delivery schedules and quality;
- o risks of inadequate manufacturing yields and excessive costs;

12

- o the potential lack of adequate capacity during periods of excess demand; and
- o potential increases in prices.

These risks may lead to increased costs or delay product delivery, which would harm the Company's profitability and customer relationships.

Dependence Upon Independent Distributors To Sell And Market The Company's Products

The Company's sales efforts are primarily conducted through independent distributors. Sales through independent distributors accounted for approximately 62% of the net sales of the Company for the fiscal year ended October 31, 2005, and approximately 65% for the three month period ended January 31, 2006. Although the Company has entered into written agreements with most of the distributors, the agreements are nonexclusive and generally may be terminated by either party upon 30-60 days written notice. The Company's distributors are not within the control of the Company, are not obligated to purchase products from the Company, and may also sell other lines of products. There can be no assurance that these distributors will continue their current relationships with the Company or that they will not give higher priority to the sale of other products, which could include products of competitors. A reduction in sales efforts or discontinuance of sales of the Company's products by its distributors would lead to reduced sales and could materially adversely affect the Company's financial condition, results of operations and business. Selling through indirect channels such as distributors may limit the Company's contact with its ultimate customers and the Company's ability to assure customer satisfaction.

Dependence On Principal Customer

One customer accounted for approximately 15% of the net sales of the Company's RF Connector and Cable Assembly division for the fiscal year ended October 31, 2005 and 16% of net sales for the three month period ended January 31, 2006. Although this customer has been an on-going major customer of the Company during the past five years, the Company does have a written distributor agreement with this customer. However, this customer does not have any minimum purchase obligations and could stop buying the Company's products at any time.

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

Accordingly, the Company's largest customer could stop buying the Company's products at any time. A reduction, delay or cancellation of orders from this customer or the loss of this customer could significantly reduce the Company's revenues and profits. The Company cannot provide assurance that this customer or any of its current customers will continue to place orders, that orders by existing customers will continue at current or historical levels or that the Company will be able to obtain orders from new customers.

Certain Of The Company's Markets Are Subject to Rapid Technological Change, So The Company's Success In These Markets Depends On Its Ability To Develop And Introduce New Products.

Although most of the Company's products have a stable market and are only gradually phased out, certain of the new and emerging market, such as the wireless digital transmission markets, are characterized by:

- o rapidly changing technologies;
 - o evolving and competing industry standards;
 - o short product life cycles;
 - o changing customer needs;
 - o emerging competition;
- 13
- o frequent new product introductions and enhancements; and
 - o rapid product obsolescence.

To develop new products for the connector and wireless digital transmission markets, the Company must develop, gain access to and use new technologies in a cost-effective and timely manner. In addition, the Company must maintain close working relationship with key customers in order to develop new products that meet customers' changing needs. The Company also must respond to changing industry standards and technological changes on a timely and cost-effective basis.

Products for connector applications are based on industry standards that are continually evolving. The Company's ability to compete in the future will depend on its ability to identify and ensure compliance with these evolving industry standards. If the Company is not successful in developing or using new technologies or in developing new products or product enhancements, its future revenues may be materially affected. The Company's attempt to keep up with technological advances may require substantial time and expense.

The Markets In Which The Company Competes Are Highly Competitive.

The markets in which the Company operates are highly competitive and the Company expects that competition will increase in these markets. In particular, the connector and communications markets in which the Company's products are sold are intensely competitive. Because the Company does not own any proprietary property that can be used to distinguish the Company from its competitors, the Company's ability to compete successfully in these markets depends on a number of factors, including:

- o success in subcontracting the design and manufacture of existing and new products that implement new technologies;

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

- o product quality;
- o reliability;
- o customer support;
- o time-to-market;
- o price;
- o market acceptance of competitors' products; and
- o general economic conditions.

In addition, the Company's competitors or customers may offer enhancements to its existing products or offer new products based on new technologies, industry standards or customer requirements that have the potential to replace or provide lower-cost or higher performance alternatives to the Company's products. The introduction of enhancements or new products by the Company's competitors could render its existing and future products obsolete or unmarketable.

Many of the Company's competitors have significantly greater financial and other resources. In certain circumstances, the Company's customers or potential customers have internal manufacturing capabilities with which the Company may compete.

14

If The Industries Into Which The Company Sells Its Products Experience Recession Or Other Cyclical Effects Impacting The Budgets Of Its Customers, The Company's Operating Results Could Be Negatively Impacted.

The primary customers for the Company's coaxial connectors are in the connector and communications industries. Any significant downturn in the Company's customers' markets, in particular, or in general economic conditions that result in the cut back of budgets would likely result in a reduction in demand for the Company's products and services and could harm the Company's business. Historically, the communications industry has been cyclical, affected by both economic conditions and industry-specific cycles. Depressed general economic conditions and cyclical downturns in the communications industry have each had an adverse effect on sales of communications equipment, OEMs and their suppliers, including the Company. No assurance can be given that the connector industry will not experience a material downturn in the near future. Any cyclical downturn in the connector and/or communications industry could have a material adverse effect on the Company.

The Company May Make Future Acquisitions That Will Involve Numerous Risks.

Since August 2004, the Company has purchased the operations of two smaller businesses (Aviel Electronics in Las Vegas, Nevada, August 2004, and Worswick Industries, Inc. in San Diego, California, September 2005). The Company periodically may make acquisitions of other companies that could expand the Company's product line or customer base. The risks involved with both the recent acquisitions and with any possible future acquisitions include:

- o diversion of management's attention;
- o the affect on the Company's financial statements of the amortization of acquired intangible assets;

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

- o the cost associated with acquisitions and the integration of acquired operations; and
- o the assumption of unknown liabilities, or other unanticipated events or circumstances.

Any of these risks could materially harm the Company's business, financial condition and results of operations. There can be no assurance that any business that the Company acquires will achieve anticipated revenues or operating results.

International Sales And Operations

Sales to customers located outside the United States, either directly or through U.S. and foreign distributors, accounted for approximately 11% of net sales during the three month period ended January 31, 2006, and approximately 12% for the comparable periods in 2005. However, the \$26,017 increase in foreign sales in the 2006 period was due to increased cooperative advertising, primarily in Mexico. International revenues are subject to a number of risks, including:

- o longer accounts receivable payment cycles;
- o difficulty in enforcing agreements and in collecting accounts receivable;
- o tariffs and other restrictions on foreign trade;
- o economic and political instability; and
- o the burdens of complying with a wide variety of foreign laws.

15

The Company's foreign sales are also affected by general economic conditions in its international markets. A prolonged economic downturn in its foreign markets could have a material adverse effect on the Company's business. There can be no assurance that the factors described above will not have an adverse material effect on the Company's future international revenues and, consequently, on the financial condition, results of operations and business of the Company.

Since sales made to foreign customers or foreign distributors have historically been in U.S. dollars, the Company has not been exposed to the risks of foreign currency fluctuations. However, if the Company in the future is required to accept sales denominated in the currencies of the countries where sales are made, the Company thereafter may also be exposed to currency fluctuation risks.

Changes in stock option accounting rules may adversely affect our reported operating results, our stock price, and our ability to attract and retain employees

In the first quarter of the fiscal year ending October 31, 2007 the Company will be required, under the new rules of the Financial Accounting Standards Board, SFAS No. 123, "Accounting for Stock-Based Compensation," to record all stock-based employee compensation as an expense. The new rules apply to stock options grants, as well as a wide range of other share-based compensation arrangements. As a small company with limited financial resources, the Company has depended upon compensating its officers, directors, employees and consultants with such stock based compensation awards in the past in order to limit its cash expenditures and to attract and retain officers, directors,

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

employees and consultants. Accordingly, if the Company continues to grant stock options or other stock based compensation awards to its officers, directors, employees, and consultants, its future earnings, if any, will be reduced (or our future losses will be increased) by the expenses recorded for those grants. Since the Company is a small company, the expenses it may have to record as a result of future options grants may be significant and may materially negatively affect its reported financial results. The adverse effects that the new accounting rules may have on the Company's future financial statements, should it continue to rely heavily on stock-based compensation, may reduce the Company's stock price and make it more difficult for it to attract new investors.

The Company Has No Exclusive Intellectual Property Rights In The Technology Employed In Its Products, Which May Limit the Company's Ability To Compete.

The Company does not hold any United States or foreign patents and does not have any patents pending. In addition, the Company does not have any other exclusive intellectual property rights in the technology employed in its products. The Company does not actively seek to protect its rights in the technology that it develops or that the Company's third-party contract manufacturers develop. In addition, these parties share the technologies with other parties, including some of the Company's competitors. Accordingly, competitors can and do sell the same products as the Company, and the Company cannot prevent or restrict such competition.

Volatility of Trading Prices

In the past several years the market price of the Company's common stock has varied greatly, and the volume of the Company's common stock traded has fluctuated greatly as well. These fluctuations often occur independently of the Company's performance or any announcements by the Company. Factors that may result in such fluctuations include:

- o any shortfall in revenues or net income from revenues or net income expected by securities analysts

16

- o fluctuations in the Company's financial results or the results of other connector and communications-related companies, including those of the Company's direct competitors
- o changes in analysts' estimates of the Company's financial performance, the financial performance of the Company's competitors, or the financial performance of connector and communications-related public companies in general
- o general conditions in the connector and communications industries
- o changes in the Company's revenue growth rates or the growth rates of the Company's competitors
- o sales of large blocks of the Company's common stock
- o conditions in the financial markets in general

In addition, the stock market may from time to time experience extreme price and volume fluctuations, which may be unrelated to the operating performance of any specific company. Accordingly, the market prices of the Company's common stock may be expected to experience significant fluctuations in the future.

ITEM 3. CONTROLS AND PROCEDURES

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to this company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by Securities and Exchange Commission Rule 13a-15(b), we carried out an evaluation, under the supervision and with the participation of the Company's management, including our Chief Executive Officer and the Company's Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the quarter covered by this report. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in ensuring that the information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

During the quarter ended January 31, 2006, the Company has undertaken additional actions to improve the Company's internal controls over financial reporting, including the following:

- o Replaced certain of its accounting personnel.
- o Hired a degreed Director of Accounting with experience with accounting principles generally accepted in the United States and Sarbanes-Oxley 404 compliance.
- o Implemented additional internal control policies and procedures to bring the Company's controls and procedures into compliance with accounting principles generally accepted in the United States and Section 404 of the Sarbanes-Oxley Act of 2002 within the time frame required under the Act.
