ITEM 2.02. Results of Operations and Financial Condition

On April 29, 2010, Perrigo Company (Company) released earnings for the third quarter of fiscal year 2010.

The earnings release contains certain non-GAAP measures. A “non-GAAP financial measure” is defined as a numerical measure of a company’s financial performance that excludes or includes amounts different than the most directly comparable measure calculated and presented in accordance with U.S. Generally Accepted Accounting Principles (GAAP) in the statements of income, balance sheets or statements of cash flow of the company. Pursuant to the requirements of Regulation G, the Company has provided a reconciliation for gross profit, operating expenses, operating income, income from continuing operations and earnings per share from continuing operations within its earnings release to the most directly comparable U.S. GAAP measure for these non-GAAP measures.

The Company excludes the items listed below in the applicable period when monitoring and evaluating the on-going financial results and trends of its business due to the unusual nature of these items. The Company believes that presenting operating results excluding these items is also useful for investors since it provides important insight into the Company's on-going core business operations on a normalized basis.
