NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Three-months ended September 30, 2010 and 2009
(unaudited)

On March 2, 2005, First Federal Savings and Loan Association of Hazard (“First Federal of Hazard” or the “Association”) completed a Plan of Reorganization (the “Plan” or the “Reorganization”) pursuant to which the Association reorganized into the mutual holding company form of ownership with the incorporation of a stock holding company, Kentucky First Federal Bancorp (the “Company”) as parent of the Association. Coincident with the Reorganization, the Association converted to the stock form of ownership, followed by the issuance of all the Association’s outstanding stock to Kentucky First Federal Bancorp. Completion of the Plan of Reorganization culminated with Kentucky First Federal Bancorp issuing 4,727,938 common shares, or 55% of its common shares, to First Federal Mutual Holding Company (“First Federal MHC”), a federally chartered mutual holding company, with 2,127,572 common shares, or 24.8% of its shares offered for sale at \$10.00 per share to the public and a newly formed Employee Stock Ownership Plan (“ESOP”). The Company received net cash proceeds of \$16.1 million from the public sale of its common shares. The Company’s remaining 1,740,554 common shares were issued as part of the \$31.4 million cash and stock consideration paid for 100% of the common shares of Frankfort First Bancorp (“Frankfort First”) and its wholly-owned subsidiary, First Federal Savings Bank of Frankfort (“First Federal of Frankfort”). The acquisition was accounted for using the purchase method of accounting and resulted in the recordation of goodwill and other intangible assets totaling \$15.4 million.

1. Basis of Presentation

The accompanying unaudited consolidated financial statements, which represent the consolidated balance sheets and results of operations of the Company, were prepared in accordance with the instructions for Form 10-Q and, therefore, do not include information or footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with U.S. generally accepted accounting principles. However, in the opinion of management, all adjustments (consisting of only normal recurring adjustments) which are necessary for a fair presentation of the consolidated financial statements have been included. The results of operations for the three-month period ended September 30, 2010, are not necessarily indicative of the results which may be expected for an entire fiscal year. The consolidated balance sheet as of June 30, 2010 has been derived from the audited consolidated balance sheet as of that date. Certain information and note disclosures normally included in the Company’s annual financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s Form 10-K annual report for 2010 filed with the Securities and Exchange Commission.

2. Principles of Consolidation

The consolidated financial statements include the accounts of the Company, Frankfort First, and its wholly-owned banking subsidiaries, First Federal of Hazard and First Federal of Frankfort (collectively hereinafter “the Banks”). All intercompany transactions and balances have been eliminated in consolidation.

3. Earnings Per Share

Diluted earnings per share is computed taking into consideration common shares outstanding and dilutive potential common shares to be issued or released under the Company's share-based compensation plans. There is no adjustment to net earnings for the calculation of diluted earnings per share. The factors used in the basic and diluted earnings per share computations follow:

	Three months ended September 30,	
	2010	2009
Net income (loss)	\$ 333	\$ (362)

Diluted		
Add: Dilutive effect of assumed exercise of stock options	-	-
Weighted-average common shares outstanding (diluted)	7,474,947	7,512,779

There were 325,800 and 339,200 stock option shares outstanding for the three-month periods ended September 30, 2010 and 2009, respectively, which were antidilutive for the respective periods

4. New Accounting Standards

ASC Topic 860, "Transfers and Servicing." Effective July 1, 2010, the Company adopted new accounting guidance under ASC Topic 860, which requires more information about transfers of financial assets, including securitization transactions, and where entities have continuing exposure to the risks related to transferred financial assets. The guidance eliminates the concept of a "qualifying special-purpose entity," changes the requirements for derecognizing financial assets, and requires additional disclosures about continuing involvements with transferred financial assets including information about gains and losses resulting from transfers during the period. The adoption of this accounting guidance did not have a material impact on the Company's consolidated financial position or results of

operations.

4. New Accounting Standards (continued)

ASC Topic 810, "Consolidation." Effective July 1, 2010, the Company adopted new accounting guidance under ASC Topic 810, which amends prior guidance to change how a reporting entity determines when an entity is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a reporting entity is required to consolidate another entity is based on, among other things, the other entity's purpose and design and the reporting entity's ability to direct the activities of the other entity that most significantly impact the other entity's economic performance. The new guidance requires a number of new disclosures about an entity's involvement with variable interest entities and any significant changes in risk exposure due to that involvement. A reporting entity will also be required to disclose how its involvement with a variable interest entity affects the reporting entity's financial statements. The adoption of this accounting guidance did not have a material impact on the Company's consolidated financial position or results of operations.

5. Investment Securities

The amortized cost, gross unrealized gains, gross unrealized losses and estimated fair values of investment securities are summarized as follows:

9. Disclosures About Fair Value of Assets and Liabilities

ASC topic 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in active markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Following is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Securities

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics. Level 2 securities include agency mortgage-backed securities.

Impaired Loans

The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent independent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for difference between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Independent appraisals for collateral-dependent loans are updated periodically (usually every 9-12 months).

Financial assets measured at fair value on a recurring basis are summarized below:

The following disclosure of the fair value of financial instruments, both assets and liabilities, whether or not recognized in the consolidated statement of financial condition, for which it is practicable to estimate that value. 9. Disclosures About Fair Value of Assets and Liabilities (continued)

The methods used are greatly affected by the assumptions applied, including the discount rate and estimates of future cash flows. Therefore, the fair values presented may not represent amounts that could be realized in an exchange for certain financial instruments.

The following methods were used to estimate the fair value of all other financial instruments recognized in the accompanying statements of financial condition at amounts other than fair value at September 30, 2010 and June 30, 2010:

Cash and cash equivalents and interest-bearing deposits: The carrying amounts presented in the consolidated statements of financial condition for cash and cash equivalents are deemed to approximate fair value.

Held-to-maturity securities: For held-to-maturity securities, fair value is estimated by using pricing models, quoted price of securities with similar characteristics, which is level 2 pricing.

Loans held for sale: Loans originated and intended for sale in the secondary market are determined by FHLB pricing schedules.

Loans: The loan portfolio has been segregated into categories with similar characteristics, such as one- to four-family residential, multi-family residential and nonresidential real estate. These loan categories were further delineated into fixed-rate and adjustable-rate loans. The fair values for the resultant loan categories were computed via discounted cash flow analysis, using current interest rates offered for loans with similar terms to borrowers of similar credit quality. For loans on deposit accounts and consumer and other loans, fair values were deemed to equal the historic carrying values.

Federal Home Loan Bank stock: It is not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Accrued interest receivable: The carrying amount is the estimated fair value.

Deposits: The fair value of NOW accounts, passbook accounts, and money market deposits are deemed to approximate the amount payable on demand. Fair values for fixed-rate certificates of deposit have been estimated using a discounted cash flow calculation using the interest rates currently offered for deposits of similar remaining maturities.

Advances from the Federal Home Loan Bank: The fair value of these advances is estimated using the rates currently offered for similar advances of similar remaining maturities or, when available, quoted market prices.

Advances by borrowers for taxes and insurance and accrued interest payable: The carrying amount presented in the consolidated statement of financial condition is deemed to approximate fair value.

9. Disclosures About Fair Value of Assets and Liabilities (continued)

Commitments to extend credit: For fixed-rate and adjustable-rate loan commitments, the fair value estimate considers the difference between current levels of interest rates and committed rates. The fair value of outstanding loan commitments at September 30, 2010 and June 30, 2010, was not material.

Based on the foregoing methods and assumptions, the carrying value and fair value of the Company's financial instruments at September 30, 2010 and June 30, 2010 are as follows:

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (continued)

Discussion of Financial Condition Changes from June 30, 2010 to September 30, 2010

Assets: At September 30, 2010, the Company's assets totaled \$236.3 million, a decrease of \$648,000, or 0.3%, from total assets at June 30, 2010. This decrease was attributed primarily a decrease in investment securities and cash and equivalents.

Cash and cash equivalents: Cash and cash equivalents decreased by \$273,000 to \$8.1 million at September 30, 2010. It is management's intention to continue deploying excess liquidity into mortgage loans to the extent possible, while maintaining adequate liquidity at all times.

Loans: Loans receivable, net, increased by \$43,000 or 0.02% to \$190.7 million at September 30, 2010, despite a \$25,000 provision for allowance for loan losses during the quarter. Management continues to look for high-quality loans to add to its portfolio and will continue to emphasize loan originations to the extent that it is profitable and prudent.

Non-Performing Loans: At September 30, 2010, the Company had non-performing loans of approximately \$6.9 million, or 3.60% of total loans, compared to \$7.8 million or 4.05%, of total loans at June 30, 2010. At September 30, 2010, the Company's allowance for loan losses of \$1.5 million represented 21.98% of nonperforming loans and 0.79% of total loans compared to a similar allowance balance of \$1.5 million at June 30, 2010, representing 19.72% of nonperforming loans and 0.8% of total loans.

The Company had \$7.4 million in assets classified as substandard for regulatory purposes at September 30, 2010, including loans and real estate acquired through foreclosure ("REO"). Classified assets as a percentage of net loans was 3.9% and 4.3% at September 30, 2010 and June 30, 2010, respectively. REO at September 30, 2010, included six single-family homes and one 8-plex with an aggregate carrying value of \$820,000. All substandard loans were secured by residential property on which the banks have priority lien position. The table below summarizes substandard loans at September 30, 2010:

	Number of Loans	Carrying Value
1-4 family, owner occupied	32	\$ 1,880
1-4 family, non-owner occupied	22	4,856
Multi-family, non-owner occupied	1	667
Total substandard loans	55	\$ 7,403

Included in classified loans is one credit relationship which was determined to be impaired during the three-month period ended September 30, 2009. Since that time foreclosure action has been commenced against the borrower and for the three months ended September 30, 2010, the Company has been overseeing the rental units under its assignment of rents. At September 30, 2010, loans to this borrower totaled \$4.7 million, which had been written down to their estimated fair value of \$3.8 million and have underlying collateral of 1-4 family residential rental units.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (continued)

Discussion of Financial Condition Changes from June 30, 2010 to September 30, 2010 (continued)

At September 30 2010, the Company had \$184,000 of loans classified as special mention compared to \$269,000 at June 30, 2010. This category includes assets which do not currently expose us to a sufficient degree of risk to warrant classification, but do possess credit deficiencies or potential weaknesses deserving our close attention. At September 30, 2010, no loans were classified as doubtful or loss for regulatory purposes.

Investment and Mortgage-Backed Securities: At September 30, 2010, the Company's investment and mortgage-backed securities had decreased \$616,000 or 6.4% to \$9.1 million.

Liabilities: At September 30, 2010, the Company's liabilities totaled \$178.6 million, a decrease of \$607,000, or 0.3%, from total liabilities at June 30, 2010. The decrease in liabilities was attributed primarily to a \$716,000, or 2.2%, decrease in Federal Home Loan Bank advances, which decreased to \$31.3 million at September 30, 2010, while deposits decreased \$321,000 or 0.2% to \$144.6 million at September 30, 2010. Approximately \$6.9 million in FHLB advances will mature within the next twelve months. Management plans to refinance a portion of its advances utilizing longer-term products at prevailing interest rates, which are lower than the rates currently being paid on the advances.

Shareholders' Equity: At September 30, 2010, the Company's shareholders' equity totaled \$57.7 million, a decrease of \$41,000 or 0.1% from the June 30, 2010 total. The primary reason for the decline was the repurchase of the Company's stock. The Company purchased 20,000 shares of its own common stock for \$171,000.

The Company paid a dividend of \$278,000 or 83.4% of net income for the quarter just ended. First Federal MHC has waived its right to dividends on its common shares of the Company. The Company believes that a strong dividend is appropriate in light of the high level of capital that both banks now have. At September 30, 2010, capital on a consolidated basis and at each of the banks exceeded the level necessary to be considered "well capitalized" and was sufficient, in management's opinion, to support foreseeable growth. Management believes that a relatively high dividend yield is beneficial in that it makes the Company's stock attractive in the market and helps in the retention of long-term investors. Management cannot speculate on future dividend levels. Various factors, including capital levels, income levels, liquidity levels, regulatory requirements and overall financial condition of the Company are considered before dividends are declared. However, management continues to believe that a strong dividend is consistent with the Company's long-term capital management strategy.

Comparison of Operating Results for the Three-Month Periods Ended September 30, 2010 and 2009

General

Net income totaled \$333,000 for the three months ended September 30, 2010, an increase of \$695,000 from the net loss of \$362,000 for the same period in 2009. The increase was primarily attributable to a decrease of \$943,000 in the provision for loan loss from \$968,000 for the prior year period to \$25,000 during the current period. Also contributing to the increase in net income was an increase in net interest income from period to period.

Net Interest Income

Edgar Filing: Kentucky First Federal Bancorp - Form 10-Q

Net interest income increased \$236,000 or 15.4% to \$1.8 million for the three month period ended September 30, 2010, compared to the 2009 period, due to interest expense decreasing at a faster pace than interest income. Interest income decreased by \$148,000, or 5.1%, to \$2.7 million, while interest expense decreased \$384,000 or 28.1% to \$982,000 for the three months ended September 30, 2010.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (continued)

Comparison of Operating Results for the Three-Month Periods Ended September 30, 2010 and 2009 (continued)

Net Interest Income (continued)

Interest income on loans decreased \$66,000 or 2.5% to \$2.6 million, due primarily to a decrease in the average rate earned on the loan portfolio. The average balance of loans outstanding for the three month period ended September 30, 2010, increased \$2.1 million or 1.1% to an average of \$192.5 million for the three months just ended, while the average rate earned declined 20 basis points to 5.36%. Interest income on investments and mortgage-backed securities decreased \$75,000 or 42.6% to \$101,000 for the three months ended September 30, 2010, primarily as a result of maturity of the investment securities. The average balance of other securities outstanding declined from \$5.5 million for the three months ended September 30, 2009 to zero for the current period ended, while mortgage-backed residential securities decreased \$2.7 million or 21.7% to \$9.5 million for the three month period ended September 30, 2010, while the average rate earned on those assets remained at 4.27%.

Interest expense on deposits and borrowings both declined period to period. Interest expense on deposits decreased \$211,000 or 22.2% to \$739,000 for the three month period ended September 30, 2010, while interest expense on borrowings declined \$173,000 or 41.6% to \$243,000 for the same period. The decline in interest expense on deposits was attributed primarily to a reduction in the average rate paid on the deposits, as the average balance of deposits increased period to period. The average rate paid on deposits decreased 66 basis points to 2.05% for the most recent period, while the average balance of interest-bearing deposits increased \$3.8 million or 2.7% to \$143.9 million. The decline in interest expense on borrowings was attributed both to lower interest rates paid and lower average borrowings outstanding. The average balance of borrowings declined \$3.3 million or 9.3% to \$32.5 million for the most recent period, while the average rate paid on borrowings decreased 165 basis points to 2.99% for the recently ended three-month period.

The following table represents key portfolio performance metrics:

	For the Three Months Ended	
	September 30, 2010	September 30, 2009
Interest rate spread	2.85%	2.21%
Net interest margin	3.27%	2.81%

Provision for Losses on Loans

The Company charges a provision for losses on loans to earnings to bring the total allowance for loan losses to a level considered appropriate by management based on historical experience, the volume and type of lending conducted by the Banks, the status of past due principal and interest payments, general economic conditions, particularly as such conditions relate to the Banks' market areas and other factors related to the collectibility of the Banks' loan portfolio. The Company recorded a provision for losses on loans of \$25,000 during the three months ended September 30, 2010, compared to a provision of \$968,000 for the three months ended September 30, 2009. As discussed previously, the large provision in the year-ago period was primarily attributable to one borrower. There can be no assurance that the

loan loss allowance will be adequate to absorb unidentified losses on loans in the portfolio, which could adversely affect the Company's results of operations.

Kentucky First Federal Bancorp

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (continued)

Comparison of Operating Results for the Three-Month Periods Ended September 30, 2010 and 2009 (continued)

Non-interest Income

Non-interest income totaled \$80,000 for the three months ended September 30, 2010, an increase of \$13,000 from the same period in 2009, primarily as a result of gain versus loss on sale of other real estate owned ("OREO"). The gain on sale of OREO was \$2,000 for the three month period just ended compared with a loss of \$12,000 for the prior year period.

Non-interest Expense

Non-interest expense totaled \$1.3 million for the three months ended September 30, 2010, an increase of \$149,000, or 12.7%, compared to the same period in 2009. The increase was due primarily to an increase in employee compensation and benefits and other operating expenses. Employee compensation and benefits increased 7.1% or \$53,000 to \$798,000 for the three month period just ended as a result of higher retirement plan contributions. Retirement contributions increased \$52,000 or 66.7% to \$130,000 for the three month period just ended to increase funding levels in response to decreased earnings on plan assets in recent years. Other operating expense totaled \$208,000 for the three months ended September 30, 2010, an increase of \$55,000, or 35.9%, from the same period in 2009, primarily as a result of increased foreclosure and legal fees. Foreclosure costs were \$21,000 for the most recent quarterly period, while legal fees increased \$19,000 or 147.5% to \$32,000 for the quarter just ended. The increase in legal fees was primarily attributed to the Company's efforts to obtain a refund of federal income taxes, which had been previously denied by the Internal Revenue Service.

Federal Income Tax Expense

The provision for federal income taxes totaled \$160,000 for the three months ended September 30, 2010, compared to a credit of \$188,000 claimed for federal income tax expense in the same period in 2009. The effective tax rates were 32.5% and 34.2% for the three month periods ended September 30, 2010 and 2009, respectively.

ITEM 3: Quantitative and Qualitative Disclosures About Market Risk

This item is not applicable as the Company is a smaller reporting company.

ITEM 4: Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the Company's disclosure controls and procedures (as defined under Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based upon that evaluation and a material weakness identified as of June 30, 2010 (see the Company's Form 10-K filed October 6, 2010), the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were ineffective. In response to the material weakness the Company is working with its external audit firm to revise its procedures. Notwithstanding the evaluation and initiation of the necessary remedial actions, the material weakness in our internal controls over financial reporting will not be considered remediated until the new controls are fully implemented, in operation for a sufficient period of time, tested, and concluded by management to be operating effectively.
