2. Basis of presentation and significant accounting policies

(a) Basis of Presentation

Basis of Presentation – The accompanying condensed unaudited consolidated financial statements include the accounts of the Company and its subsidiaries. The details of subsidiaries are disclosed in Note 1. Significant inter-company balances and transactions have been eliminated upon consolidation. The condensed unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“U.S. GAAP”) for interim financial information and with the instructions in Article 10 of Regulation S-X. Accordingly they do not include all of the information and footnotes required by such accounting principles for complete financial statements. These financial statements should be read in conjunction with the consolidated financial statements and related footnotes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2014.

The accompanying interim condensed consolidated financial statements are unaudited, but in the opinion of the Company’s management, contain all necessary adjustments, which include normal recurring adjustments, for a fair statement of the results of operations, financial position and cash flows for the interim periods presented.

The condensed consolidated balance sheet as of December 31, 2014 is derived from the Company’s audited financial statements at that date but does not include all of the information and footnotes required by U.S. GAAP for complete financial statements.

Certain information and footnote disclosures normally included in financial statements that have been prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission, although the Company’s management believes that the disclosures contained in these financial statements are adequate to make the information presented herein not misleading. For further information, please refer to the financial statements and the notes thereto included in the Company’s 2014 Annual Report on Form 10-K, as filed with the Securities and Exchange Commission.

The results of operations for the three months ended March 31, 2015 are not necessarily indicative of the results of operations to be expected for the full fiscal year ending December 31, 2015.

Estimation - The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the dates of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

(b) Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update No. 2014-09 (“ASU 2014-09”), “Revenue from Contracts with Customers (Topic 606)”. ASU 2014-09 will eliminate transaction-specific and industry-specific revenue recognition guidance under current U.S. GAAP and replace it with a principle-based approach for determining revenue recognition. ASU 2014-09 will require that companies recognize revenue based on the value of transferred goods or services as they occur in the contract. The ASU also will require additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. ASU 2014-09 is effective for reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early adoption is not permitted. Entities can transition to the standard either retrospectively or as a cumulative effect adjustment as of the date of adoption. On April 1, 2015, the FASB voted to propose a one-year deferral of the effective date of ASU 2014-09. If finalized, the Company could elect to adopt the provisions of ASU 2014-09 for annual periods beginning after December 15, 2017, including interim periods within that reporting period. Under this proposal, early adoption for annual periods beginning after December 15, 2016, including interim periods within that reporting period, would also be permissible. Management is currently assessing the impact the adoption of ASU 2014-09 and the effect of the standard on the Company’s ongoing financial reporting.

(c) Significant Accounting Policies

There have been no updates to the significant accounting policies set forth in the notes to the consolidated financial statements for the year ended December 31, 2014.

3. Acquisition

In the second quarter of 2014, the Company acquired a 51.0% ownership interest in Fujian Qiaolong, a special purpose vehicle manufacturer and dealer with automobile repacking qualification, based in Fujian, China. The results of Fujian Qiaolong have been included since the date of acquisition and are reflected in the Company's Condensed Unaudited Consolidated Statements of Operations and Comprehensive Income. The total purchase price was approximately \$3.0 million. The goodwill resulting from the acquisition is not deductible for tax purposes.

The following table summarizes the allocation of consideration and the respective fair values of the assets acquired and liabilities assumed in the Fujian Qiaolong acquisition as of the date of purchase (figures are in thousands of USD):

In accordance with the provisions of *ASC Topic 740, "Income Taxes"*, the Company assesses, on a quarterly basis, its ability to realize its deferred tax assets. Based on the more likely than not standard in the guidance and the weight of available evidence, the Company believes a valuation allowance against its deferred tax assets is necessary. In determining the need for a valuation allowance, the Company considered the following significant factors: an assessment of recent years' profitability and losses by tax authorities; the Company's expectation of profits based on margins and volumes expected to be realized, which are based on current pricing and volume trends; the long period in all significant operating jurisdictions before the expiry of net operating losses, noting further that a portion of the deferred tax asset is composed of deductible temporary differences that are subject to an expiry period until realized under tax law. The Company will continue to evaluate the provision of valuation allowance in future periods.

On May 27, 2014, the Company announced a special cash dividend of \$0.18 per common share to the Company's shareholders of record as of the close of business on June 26, 2014. As China Automotive Systems, the parent (1) company, had an accumulated deficit position as of the date of the dividend declaration, the dividends distributed to the Company's common shareholders described above are treated as a return of common shareholders' investment cost.

On August 11, 2014, the Company entered into the Exchange Agreement with Jiulong Machinery Electricity, under which the Company issued 3,260,000 and 818,000 of its common shares in consideration for the acquisition of the 20% and 19% equity interests in Henglong and Jiulong, respectively, held by Jiulong Machinery Electricity. On September 26, 2014, the Company obtained the 20% and 19% equity interests in Henglong and Jiulong, respectively, and completed its share registrations with the local government administrative bureau. The Company owned 100% of the equity interests in both Henglong and Jiulong as of September 30, 2014. The Company's acquisitions of the non-controlling interests were accounted for as equity transactions in the year ended December 31, 2014. The total carrying value for the non-controlling interests in both Henglong and Jiulong was \$34.5 million, including the accumulated other comprehensive income of \$4.7 million related to the noncontrolling (2) interests acquired and other non-controlling interests of \$29.8 million. Therefore, the total carrying value of \$34.5 million for the non-controlling interests acquired was reclassified from non-controlling interests to the controlling interest's equity as of September 30, 2014. On October 13, 2014, the Company completed its issuance of 4,078,000 common shares to nominee holders designated by Jiulong Machinery Electricity. The fair market value of the Company's common stock issued was \$37.3 million or \$9.15 per share, which was determined on the issuance date of the common shares. The difference between the fair market value of \$37.3 million for the Company's common shares issued and the carrying value of \$34.5 million for the non-controlling interest acquired of \$2.8 million was recorded as a reduction of additional paid-in capital. Additional paid-in capital of the Company was also decreased by \$4.7 million and the accumulated other comprehensive income attributable to Henglong and Jiulong was increased by a corresponding amount.

On September 16, 2014 and August 13, 2013, the Company granted 22,500 and 22,500 stock options, respectively, to the Company's independent directors, with the exercise price equal to the closing price of the Company's common stock traded on NASDAQ on the date of grant. The fair value of stock options was determined at the date of grant using the Black-Scholes option pricing model. The Black-Scholes option model requires management to make various estimates and assumptions, including expected term, expected volatility, risk-free rate and dividend (3) yield. The expected term represents the period of time that stock-based compensation awards granted are expected to be outstanding and is estimated based on considerations including the vesting period, contractual term and anticipated employee exercise patterns. Expected volatility is based on the historical volatility of the Company's stock. The risk-free rate is based on the U.S. Treasury yield curve in relation to the contractual life of stock-based compensation instruments. The dividend yield assumption is based on historical patterns and future expectations for the Company's dividends.

Assumptions used to estimate the fair value of stock options on the grant dates are as follows:

Issuance Date	Expected volatility	Risk-free rate	Expected term (years)	Dividend yield
September 16, 2014	120.6	% 1.78	% 5	0.00 %
August 13, 2013	131.5	% 1.49	% 5	0.00 %

The above stock options were vested and exercisable immediately. Their fair value on the grant dates of September 16, 2014 and August 13, 2013 using the Black-Scholes option pricing model was \$0.2 million and \$0.2 million, respectively. For the year ended December 31, 2014, the Company recognized stock-based compensation expenses of \$0.2 million.

The Company's subsidiaries registered in the PRC are subject to national and local income taxes within the PRC at the applicable tax rate of 25% on the taxable income as reported in their PRC statutory financial statements in accordance with the relevant income tax laws applicable to foreign invested enterprise, unless preferential tax treatment is granted by local tax authorities. If the enterprise meets certain preferential terms according to the China income tax law, such as assessment as a "High & New Technology Enterprise" by the government, then, the enterprise will be subject to enterprise income tax at a rate of 15%.

Pursuant to the New China Income Tax Law and the Implementing Rules, "New CIT", which became effective as of January 1, 2008, dividends generated after January 1, 2008 and payable by a foreign-invested enterprise to its foreign investors will be subject to a 10% withholding tax if the foreign investors are considered as non-resident enterprises without any establishment or place within China or if the dividends payable have no connection with the establishment or place of the foreign investors within China, unless any such foreign investor's jurisdiction of incorporation has a tax treaty with China that provides for a different withholding arrangement.

Genesis, the Company's wholly-owned subsidiary and the direct holder of the equity interests in the Company's subsidiaries in China, is incorporated in Hong Kong. According to PRC tax regulation, the Company should withhold income taxes for the profit distributed from the PRC subsidiaries to Genesis, the subsidiaries' holding company incorporated in Hong Kong. For the profit that the PRC subsidiaries intended to distribute to Genesis, the Company accrues the withholding income tax as deferred tax liabilities. As of March 31, 2015, the Company has recognized deferred tax liabilities of \$0.15 million for the remaining undistributed profits to Genesis of \$3.0 million. The Company intended to re-invest the remaining undistributed profits generated from the PRC subsidiaries in those subsidiaries permanently. Had the undistributed earnings been distributed to Genesis and not permanently reinvested, the tax provision as of March 31, 2015 and December 31, 2014 of approximately \$9.9 million and \$9.4 million, respectively, would have been recorded. Such undistributed profits will be reinvested in Genesis and not further distributed to the parent company incorporated in the United States going forward.

26. Income per share

Basic income per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted income per share is calculated using the weighted average number of ordinary shares and dilutive ordinary share equivalents outstanding during the period. The dilutive effect of outstanding stock options is determined based on the treasury stock method.

27. Significant concentrations

A significant portion of the Company's business is conducted in China where the currency is the RMB. Regulations in China permit foreign owned entities to freely convert the RMB into foreign currency for transactions that fall under the "current account," which includes trade related receipts and payments, interest and dividends. Accordingly, the Company's Chinese subsidiaries may use RMB to purchase foreign exchange for settlement of such "current account" transactions without pre-approval. However, pursuant to applicable regulations, foreign-invested enterprises in China may pay dividends only out of their accumulated profits, if any, determined in accordance with the PRC law. In calculating accumulated profits, foreign investment enterprises in China are required to allocate at least 10% of their

annual net income each year, if any, to fund certain reserve funds, including mandated employee benefits funds, unless these reserves have reached 50% of the registered capital of the enterprises.

Transactions other than those that fall under the "current account" and that involve conversion of RMB into foreign currency are classified as "capital account" transactions; examples of "capital account" transactions include repatriations of investment by or loans to foreign owners, or direct equity investments in a foreign entity by a China domiciled entity. "Capital account" transactions require prior approval from China's State Administration of Foreign Exchange, or SAFE, or its provincial branch to convert a remittance into a foreign currency, such as USD, and transmit the foreign currency outside of China.

This system could be changed at any time and any such change may affect the ability of the Company or its subsidiaries in China to repatriate capital or profits, if any, outside China. Furthermore, SAFE has a significant degree of administrative discretion in implementing the laws and has used this discretion to limit convertibility of current account payments out of China. Whether as a result of a deterioration in the Chinese balance of payments, a shift in the Chinese macroeconomic prospects or any number of other reasons, China could impose additional restrictions on capital remittances abroad. As a result of these and other restrictions under the laws and regulations of the PRC, the Company's PRC subsidiaries are restricted in their ability to transfer a portion of their net assets to the parent. The Company has no assurance that the relevant Chinese governmental authorities in the future will not limit further or eliminate the ability of the Company's PRC subsidiaries to purchase foreign currencies and transfer such funds to the Company to meet its liquidity or other business needs. Any inability to access funds in China, if and when needed for use by the Company outside of China, could have a material and adverse effect on the Company's liquidity and its business.

The Company grants credit to its customers including Xiamen Joylon, Xiamen Automotive Parts, Shanghai Fenglong and Jiangling Yude, which are related parties of the Company. The Company's customers are mostly located in the PRC.

The accounting policies of the product sectors are the same as those described in the summary of significant accounting policies except that the disaggregated financial results for the product sectors have been prepared using a management approach, which is consistent with the basis and manner in which management internally disaggregates financial information for the purposes of assisting them in making internal operating decisions. Generally, the Company evaluates performance based on stand-alone product sector operating income and accounts for inter segment sales and transfers as if the sales or transfers were to third parties, at current market prices.

As of March 31, 2015, the Company had 13 product sectors, five of which were principal profit makers and were reported as separate sectors and engaged in the production and sales of power steering (Henglong, Jiulong, Shenyang, Wuhu and Hubei Henglong), and one holding company (Genesis). Since the revenues, net income and net assets of these eight sectors collectively are less than 10% of consolidated revenues, net income and net assets, respectively, in the condensed unaudited consolidated financial statements, the Company incorporated these eight sectors into “Other Sectors.”

Critical Accounting Estimates

The Company prepares its condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amount of revenues and expenses during the reporting periods. Management periodically evaluates the estimates and judgments made. Management bases its estimates and judgments on historical experience and on various factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates as a result of different assumptions or conditions. The following critical accounting policies affect the more significant judgments and estimates used in the preparation of the Company’s condensed consolidated financial statements.

The Company considers an accounting estimate to be critical if:

It requires the Company to make assumptions about matters that were uncertain at the time it was making the estimate, and

Changes in the estimate or different estimates that the Company could have selected would have had a material impact on the Company's financial condition or results of operations.

The table below presents information about the nature and rationale for the Company's critical accounting estimates:

Balance Sheet Caption	Critical Estimate Item	Nature of Estimates Required	Assumptions/Approaches Used	Key Factors
Accrued liabilities and other long-term liabilities	Warranty obligations	Estimating warranty requires the Company to forecast the resolution of existing claims and expected future claims on products sold. OEMs (Original Equipment Manufacturers) are increasingly seeking to hold suppliers responsible for product warranties, which may impact the Company's exposure to these costs.	The Company bases its estimate on historical trends of units sold and payment amounts, combined with its current understanding of the status of existing claims and discussions with its customers.	<ul style="list-style-type: none"> ·OEM sourcing ·OEM policy decisions regarding warranty claims
Property, plant and equipment, intangible assets and other long-term assets	Valuation of long-lived assets and investments	The Company is required from time to time to review the recoverability of certain of its assets based on projections of anticipated future cash flows, including future profitability assessments of various product lines.	The Company estimates cash flows using internal budgets based on recent sales data, independent automotive production volume estimates and customer commitments.	<ul style="list-style-type: none"> ·Future production estimates ·Customer preferences and decisions
Inventory	Write-down of inventory	The Company is required from time to time to review the cashability of inventory based on projections of anticipated future cash flows, including write-down of inventory for prices that are higher than market price and undesirable inventories.	The Company estimates cash flows using internal budgets based on recent sales data, independent automotive production volume estimates and customer commitments.	<ul style="list-style-type: none"> ·Future production estimates ·Customer preferences and decisions

Deferred income taxes	Recoverability of deferred tax assets	The Company is required to estimate whether recoverability of its deferred tax assets is more likely than not based on forecasts of taxable earnings in the related tax jurisdiction.	The Company uses historical and projected future operating results, based upon approved business plans, including a review of the eligible carry forward period, tax planning opportunities and other relevant considerations.	<ul style="list-style-type: none"> ·Tax law changes ·Variances in future projected profitability, including by taxing entity
Tax payable and deferred tax assets/liabilities	Uncertain tax positions	The Company is required to determine and assess all material positions, including all significant uncertain positions in all tax years that are still subject to assessment or challenge under relevant tax statutes.	The Company applies a more likely than not threshold and a two-step approach for tax position measurement and financial statement recognition. For the two-step approach, the first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon settlement.	<ul style="list-style-type: none"> ·An allocation or a shift of income between jurisdictions ·The characterization of income or a decision to exclude reporting taxable income in a tax return ·A decision to classify a transaction, entity, or other position in a tax return as tax exempt

In addition, there are other items within the Company's financial statements that require estimation, but are not as critical as those discussed above, including provision of accounts and notes receivable. Although not significant in recent years, changes in estimates used in these and other items could have a significant effect on the Company's consolidated financial statements.

Net Product Sales

Net product sales were \$123.4 million for the three months ended March 31, 2015, compared to \$114.3 million for the same period in 2014, representing an increase of \$9.1 million, or 8.0%. The increase was mainly due to the continuing growth of automotive market demand in China and North America. During the three months ended March 31, 2015, the Company made a \$2.4 million payment to a customer for new product testing services provided by the customer. As the Company cannot reasonably demonstrate that such payment amount represents the fair value of the services provided by its customer, the payment was recorded as a reduction of net sales in accordance with U.S. GAAP.

For the three months ended March 31, 2015, there was an increase in sales of passenger vehicle power steering gears compared with the same period last year, mainly due to the introduction of certain new products to the market, such as sales of EPS for mid-size cars, and improvement in the quality of some of the old products, such as improvement of the quality of power steering gear for MPVs and SUVs, which resulted in the expansion of the Company's market share in China, especially among the joint-venture brands' auto customers.

From January 1, 2015, the National IV emission standard for commercial vehicles has been implemented in China. To meet the upgraded standard, certain OEMs transformed and renovated their existing products which, together with China's economic slowdown, led to a significant decrease in the production and sales volume of China's commercial vehicles. Accordingly, the Company's sales of steering gears for commercial vehicles decreased.

In summary, the Company had an increase in sales volume leading to a sales increase of \$7.3 million, an increase in selling price of steering gears leading to a sales increase of \$1.6 million, and the effect of foreign currency translation of the RMB against the U.S. dollar, which led to a sales increase of \$0.2 million.

Further analysis by segment (before elimination) is as follows:

Net product sales for Henglong were \$83.8 million for the three months ended March 31, 2015, compared with \$71.4 million for the three months ended March 31, 2014, representing an increase of \$12.4 million, or 17.3%, which was mainly due to an increase in sales volume for passenger vehicles in the China market and the higher selling price of middle-level electric power steering compared with low-level electric power steering. An increase in sales volume led to a sales increase of \$11.3 million, an increase in selling price led to a sales increase of \$1.0 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales increase of \$0.1 million.

Net product sales for Jiulong were \$17.8 million for the three months ended March 31, 2015, compared with \$21.6 million for the three months ended March 31, 2014, representing a decrease of \$3.9 million, or 17.8%, mainly due to China's economic slowdown and the adoption of the National IV emission standard for commercial vehicles, as Jiulong's main products and sales are steering gears for commercial vehicles. A decrease in sales volume led to a sales decrease of \$3.1 million, a decrease in selling price led to a sales decrease of \$0.9 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$0.1 million.

Net product sales for Shenyang were \$8.0 million for the three months ended March 31, 2015, compared to \$11.9 million for the same period in 2014, representing a decrease of \$3.9 million, or 33.1%. Jinbei transformed and renovated its production line to meet the new upgrade standard, which led to a significant decrease in production and sales volumes of Jinbei, and sales volumes of Shenyang decreased accordingly. A decrease in sales volumes led to a sales decrease of \$4.5 million, and an increase in selling price led to a sales increase of \$0.6 million.

Net product sales for Wuhu were \$6.2 million for the three months ended March 31, 2015, compared to \$6.5 million for the same period in 2014, representing a decrease of \$0.4 million, or 5.9%. A decrease in sales volumes led to a sales decrease of \$0.7 million, and an increase in selling price led to a sales increase of \$0.3 million.

Net product sales for Hubei Henglong were \$14.9 million for the three months ended March 31, 2015, compared to \$13.6 million for the same period in 2014, representing an increase of \$1.3 million, or 9.5%. Hubei Henglong's products were all sold to the United States. The net product sales increase was mainly due to the growth of automotive market demand in North America. An increase in sales volumes led to a sales increase of \$0.8 million, and an increase in selling price led to a sales increase of \$0.5 million.

Net product sales for Other Sectors were \$8.9 million for the three months ended March 31, 2015, consistent with \$9.0 million for the same period in 2014.

An increase in sales volumes led to a cost of products sold increase of \$10.0 million, an increase in unit cost led to a cost of products sold increase of \$1.2 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a cost of products sold increase of \$0.1 million.

Liquidity and Capital Resources

Capital Resources and Use of Cash

The Company has historically financed its liquidity requirements from a variety of sources, including short-term borrowings under bank credit agreements, bankers' acceptances, issuances of capital stock and notes and internally generated cash. As of March 31, 2015, the Company had cash and cash equivalents and short-term investments (excluding pledged deposit) of \$99.6 million, compared to \$109.5 million as of December 31, 2014, representing a decrease of \$4.5 million, or 4.1%.

The Company had working capital of \$203.3 million as of March 31, 2015, compared to \$198.1 million as of December 31, 2014, representing an increase of \$5.2 million, or 2.6%.

The Company intends to indefinitely reinvest the funds in subsidiaries established in the PRC.

The Company believes that, in view of its current cash position as of March 31, 2015, the cash expected to be generated from the operations and funds available from bank borrowings as detailed in subsequent paragraphs will be sufficient to meet its working capital and capital expenditure requirements, including the repayment of bank loans, for at least twelve months commencing from March 31, 2015.

Capital Source

The Company's capital source is multifaceted, such as bank loans and banker's acceptance facilities. In financing activities and operating activities, the Company's banks require the Company to sign line of credit agreements and repay all existing borrowings under such facilities within one year. On the condition that the Company can provide adequate mortgage security and has not violated the terms of the line of credit agreement, such one year facilities can be extended for another year.

The Company had short-term bank loans of \$41.2 million and bankers' acceptances of \$75.7 million (See Note 14) as of March 31, 2015.

The Company currently expects to be able to obtain similar bank loans, i.e., RMB loans, and bankers' acceptance facilities in the future if it can provide adequate mortgage security following the termination of the above-mentioned agreements, see the table under "Bank Arrangements" below for more information. If the Company is not able to do so, it will have to refinance such debt as it becomes due or repay that debt to the extent it has cash available from operations or from the proceeds of additional issuances of capital stock. Owing to depreciation, the value of the mortgages securing the above-mentioned bank loans and banker's acceptances will be lowered by approximately \$10.5 million over the next 12 months. If the Company wishes to obtain the same amount of bank loans and banker's acceptances, it will have to provide additional mortgages of \$14.0 million as of the maturity date of such line of credit agreements, see the table under "Bank Arrangements" below for more information. The Company can still obtain a reduced line of credit with a reduction of \$10.5 million, which is 74.94%, the mortgage rate, of \$14.0 million, if it cannot provide additional mortgages. The Company expects that the reduction in bank loans will not have a material adverse effect on its liquidity.

Cash Flows

(a)Operating activities

Net cash provided by operations during the three months ended March 31, 2015 was \$4.9 million, compared to net cash used in operations of \$8.4 million for the same period of 2014, representing an increase of \$13.3 million.

During the three months ended March 31, 2015, the increase in net cash provided by operations was mainly due to the net effect of:

(1) The decrease in net income (excluding non-cash items) by \$0.4 million;

(2) The change in balance of pledge deposits which led to an increase in net cash provided by operations of \$1.6 million;

(3) A decrease in the growth rate of balance of accounts and notes receivable which led to an increase in net cash provided by operations of \$5.4 million, which was mainly due to the sales of the Company's goods always being on credit terms ranging from 4 to 6 months. During the three months ended March 31, 2015, there was a smaller increase in sales revenue of the Company's products compared with the same period last year while there was a significant decrease in the growth rate of the ending balance of accounts receivable compared with the same period last year as a result of the Company strengthening its collections;

(4) The change in balance of inventories led to a decrease in net cash provided by operations of \$0.7 million, which was mainly due to an increase in inventory in anticipation of sales growth in the future. The Company has actively adjusted its production plan to decrease inventory;

(5) The change in balance of accounts and notes payable which led to an increase in net cash provided by operations of \$9.3 million, which was mainly due to the Company having paid less accounts and notes payable as a result of more accounts and notes payable being not yet due and not payable in the current period;

(6) The change in taxes payable which led to a decrease in net cash provided by operations of \$1.5 million, which was mainly due to the Company paying certain value-added tax that accrued in the prior year during the current period; and

(7) The change of balance of customer deposits, which led to a decrease in net cash provided by operations of \$0.8 million.

(b) Investing activities

The Company used net cash of \$3.6 million in investment activities during the three months ended March 31, 2015, compared to \$4.1 million during the same period of 2014, representing a decrease of \$0.5 million, which was mainly due to a net decrease in time deposits in the current period of \$2.5 million, offset by an increase in purchase of equipment of \$2.2 million (See Note 5).

(c) Financing activities

During the three months ended March 31, 2015, the Company used net cash in financing activities of \$3.7 million, compared to net cash provided by financing activities of \$1.9 million for the same period of 2014, representing a decrease of \$5.6 million, which was mainly due to the net effect of (1) \$4.9 million for repayments of government loans and (2) the payment of dividends to non-controlling interest holders having increased by \$0.8 million and payment of dividends on common stock having increased by \$0.3 million.
