6. REASONS FOR AND BENEFITS OF THE DISPOSAL

(a) Further improving the Company's operational performance

Since the financial crisis in 2008, global economic growth has slowed down. The global cargo and mail traffic volume has maintained only a modest growth and there has been a decrease in the income generated from freight transportation. At the same time, the transporting capacity of international and domestic air cargo market has grown at substantially faster pace than market demand, resulting in a continuous downturn of market rate of freight transportation and it is unlikely to be a substantial growth of the market in the short term. Traditional air cargo enterprises encounter difficulties in their operations as they only offer airport-to- airport transportation services.

Eastern Logistics has endeavoured to change its business model in recent years. However, due to the relatively low competitiveness and risk resistance, its market share in the freight market has been shrinking and its operational prospect is unclear. As a result, Eastern Logistics has not fully accomplished the goal of its transformation. In particular, China Cargo Airlines, a subsidiary of Eastern Logistics, suffered large amount of cumulative losses during the period from 2011 to 2015, translating to a relatively high debt ratio that affected the overall operating performance of the Company.

Therefore, the implementation of the Disposal is a specific measure and reasonable option for the Company to cope with the poor conditions of the air freight market and is beneficial in improving the overall operational performance of the Company.

(b) Concentrating on the Company's air passenger transportation business

Since it commenced the operation of freight logistics business, the Company has always upheld the strategy of "balancing the development of cargo and passenger services", hoping to drive the growth of freight transportation business by its passenger transport business, and eventually achieve balanced development of both businesses. The Company has invested considerable funds and resources into the freight logistics business sector which, however, failed to meet the expected development goal eventually. The revenue from freight logistics business of Eastern Logistics contributed to a relatively small portion of the Company's overall operating revenue and is showing a decreasing trend. Major international airlines have been withdrawing or reducing their all-cargo flight business gradually in view of the slackening global cargo market.

Therefore, the implementation of the Disposal will be beneficial to the Company in focusing relevant resources on operating its air passenger transportation business in the future and further build up the Company's brand image and competitiveness in the air passenger transportation sector.

(c) Realizing collection of receivables and lowering capital risks

As at 30 June 2016, the aggregate amount of non-operational and operational payables of China Cargo Airlines and Eastern Logistics due to the Company were relatively large. Since China Cargo Airlines is in a state of loss-making, it is not capable of repaying the aforementioned payables to the Company in the short term. This share transfer obliges Eastern Logistics and China Cargo Airlines to repay the aforementioned amount to the Company, which will be favorable to the Company in accelerating the collection of receivables and lowering capital risks.

After considering the abovementioned factors, while the implementation of the Disposal will not have adverse impacts on the Company's overall business development, it is also in line with the overall trend of major international airlines withdrawing from the all- cargo flight business. Upon the completion of the Disposal, the Company will focus on air passenger transportation business, further foster its reform and transformation, improve the operating and management ability of the Company in respect of air passenger transportation business and strive to create better investment returns for shareholders.

The terms of the Disposal Agreement have been agreed on an arm's length negotiations between the parties. The Directors (excluding the independent non-executive Directors) are of the view that that the terms of the Disposal Agreement are on normal commercial terms, fair and reasonable and in the interest of the Company and its Shareholders as a whole.

7. LISTING RULES IMPLICATIONS OF THE DISPOSAL

As at the date of this announcement, the Purchaser is a wholly-owned subsidiary of CEA Holding, the controlling shareholder of the Company. Therefore, the Disposal constitutes a connected transaction of the Company under Chapter 14A of the Listing Rules.

As one or more of the relevant applicable percentage ratios set out in the Listing Rules in respect of the Disposal exceed 5% but are less than 25%, the Disposal will constitute a discloseable and connected transaction of the Company under the Listing Rules. Therefore, the Disposal is subject to the reporting, announcement and Independent Shareholders' approval requirements under Chapter 14 and Chapter 14A of the Listing Rules.

The resolutions regarding the Disposal have been passed at the third ordinary meeting of the eighth session of the Board. As Mr. Liu Shaoyong (a Director and the chairman of the Company), Mr. Xu Zhao (a Director) and Mr. Gu Jiadan (a Director) are members of the senior management of CEA Holding and Mr. Tian Liuwen (a Director and a Vice President of the Company) is a member of the senior management of Eastern Logistics, they may be regarded as

having a material interest in the Disposal. As such, they have abstained from voting at the meeting of the Board convened for the purpose of approving, among others, the Disposal. Save as aforesaid, none of the Directors has any material interests in the Disposal.
