REFERENCE MATERIALS FOR EXERCISE OF VOTING RIGHTS

1. Number of Voting Rights Held by All Shareholders:

8,862,993 voting rights

2. Propositions and Reference Matters

Item No.1: Approval of the Proposal of Profit Appropriation for the 104th Business Term

Considering further reinforcement of the company organization and expansion of business operations in the future, the Proposal of Profit Appropriation for the 104th Business Term is intended to be as described in the enclosed Report for the 104th Business Term (page 59).

Regarding our year-end dividend, since the Company was able to achieve record high results for this Business Term, both in terms of non-consolidated and consolidated base results, we propose a dividend of 40.00 yen per share, which is an increase by 5.00 yen compared to the dividend for the previous term, in order to respond to the continuing support from our shareholders.

Since we have already paid an interim dividend of 25.00 yen per share, together with the above dividend, the dividend for the entire Business Term will be 65.00 yen per share, an increase of 15.00 yen compared to the dividend for the previous Business Term.

As for the bonus for Directors, it is proposed to be 199,500,000 yen.

In addition, you are requested to approve that, based on the provisions of tax law, Reserve for Deferral of Capital Gain on Property should be reversed and Reserve for Special Depreciation should be reversed and accumulated.

Item No.2: Partial Amendment of the Articles of Incorporation

1. Reason and Purpose of Amendment

To prepare for future expansion of business operations, we propose to insert a new item (8) to Article 2 following the current item (7), and change the item number of all items below the current item (8).

3

Table of Contents

2. Substance of Amendment

The substance of the amendment is as follows:
(The amended parts are underlined.)

Current Articles of Incorporation		Proposed Amendment	
Objects		Objects	
Article 2.	The objects of the Company shall be to engage in the following business:	Article 2.	The objects of the Company shall be to engage in the following business:
(1)	Manufacture and sale of optical machineries and instruments of various kinds.	(1)	(Same as Present Text)
(2)	Manufacture and sale of acoustic, electrical and electronic machineries and instruments of various kinds.	(2)	(Same as Present Text)

To Our Shareholders

We are pleased to present our business report for the 104th business term (from January 1, 2004 to December 31, 2004)

The global economy trended strongly during the first half of the year, supported by strength in the United States and China. However, during the latter half of the year, fears arising from rising crude oil prices and the U.S. twin deficits contributed to a weaker dollar and a slow-down in business activities. Amidst this operating environment, the Canon Group's continuous efforts to implement reforms in product development, manufacturing and marketing allowed us to consecutively achieve record-high levels of sales and profits on both a consolidated and a non-consolidated basis during the term.

At our 104th Ordinary General Meeting of Shareholders, in consideration of our business results for this term, we will propose a dividend payment of 40 yen per share as of the end of the fiscal year to show our sincere appreciation for your loyal support. This is in addition to the interim dividend of 25 yen per share, which will bring the full-year dividend to a total of 65 yen per share, or 15 yen more than in the previous term.

We have now entered the final year of Phase II (2001 to 2005) of our Excellent Global Corporation Plan. In order to create an enduring management platform, we will continue our efforts to implement reforms throughout our businesses.

We look forward to your continued support and encouragement in the future.

March 2005

FUJIO MITARAI
President & C.E.O.

Table of Contents

(Materials attached to the Notice of Convocation of the Ordinary General Meeting of Shareholders for the 104th Business Term)

BUSINESS REPORT

(From January 1, 2004 to December 31, 2004)

1. General Business Outline

(1) Business Progress and Results of the Canon Group

on General Business Conditions

Reviewing conditions in both the domestic and overseas economies during the fiscal year, the U.S. economy trended favorably, despite a slight slowdown during the latter half, largely thanks to strong consumer spending and capital investments brought on by the aggressive fiscal policy and a neutral monetary policy. In Europe, consumer spending and capital investments remained generally weak, but the European economies showed a modest recovery during the first half, which slowed in the second half due to weak exports resulting from the strengthening of the euro. Economies in Asia, particularly China, benefited from strong expansion in both domestic demand and exports, and continued to record strong growth. At the same time, while Japan's economy initially expanded thanks to support from improved corporate earnings and an expansion in capital investments, slowing export growth caused by the weakening of economies around the world and slower consumer spending during the latter half of the year led to a correction towards the yearend. In the foreign exchange markets, the yen strengthened against the U.S. dollar, while it weakened against the euro relative to the previous term.

With regard to markets relevant to Canon, demand for our digital cameras and digital video cameras continued to grow strongly. In the area of computer peripherals, notably such devices as networked multifunctional devices and printers, demand for color-capable and multifunctional equipment grew steadily. However, overall business conditions remained severe due to intensified price competition. At the same time, with regard to optical equipment, recoveries in capital investments by semiconductor manufacturers led to growth in demand for semiconductor production equipment. Additionally, an expansion in the large-format liquid crystal display (LCD) television market contributed to increased demand for mirror projection mask aligners for LCDs.

Amid this business environment, the Canon Group entered the fourth year of Phase II (2001 to 2005) of its Excellent Global Corporation Plan. In line with its goals under this plan, it continued to promote measures to establish a

Table of Contents

highly profitable structure that can withstand the current volatile business environment.

Together with other Group companies, Canon actively pressed ahead with reforms in development and production processes to speed up development time. In addition, Canon implemented procurement reform designed to reduce costs. In particular, we enhanced our common technological foundations in regard to measuring, analysis and simulation, and promoted the in-house manufacture of key devices and core components. These efforts enabled us to strengthen our management structure, allowing us to timely bring to market highly competitive products differentiated by our unique technologies. Canon also supplemented its infrastructure, both inside and outside Japan, to strengthen its R&D and production technologies, as well as to expand production capacity.

Reforms undertaken by the Group's marketing companies throughout the world have led to improved marketing strategies in each country we serve, and as a result, our sales have shown robust growth.

In October of 2004, we established a joint venture company with Toshiba Corporation and have started preparations for the full-scale launch of our new Surface-condition Electron-emitter Display (SED) flat-screen display business. Even before the official start of this business, we have already received a favorable response to a prototype flat-screen TV using this SED panel exhibited at a trade show.

As a result, the Canon Group recorded positive results in each of our business segments in both Japanese and overseas markets. During the term we attained, on a consolidated basis, net sales of 3,467.9 billion yen (an 8.4% increase over the previous term), income before income taxes and minority interests of 552.1 billion yen (a 23.2% increase), and net income of 343.3 billion yen (a 24.5% increase). Also, on a non-consolidated basis, we recorded net sales of 2,278.4 billion yen (a 12.6% increase), ordinary profit of 396.3 billion yen (a 23.6% increase), and net income of 249.3 billion yen (a 9.0% increase). All of these figures were record highs.

Table of Contents

20

- Notes: 1. Regarding the segment of Business information products within the Business machines category in the consolidated information above, there were no sales on a non-consolidated basis.
2. From this period, the Company is disclosing in the Office imaging products category of the consolidated information above, the figures related to information system business (including document solution, network integration, etc.), previously classified under Optical and other products, in view of the close

association between the information system business and the office imaging products business. The figures for the previous term have been reclassified, accordingly.

Table of Contents

1 Business Machines Operations

Office Imaging Products

Fierce competition continued in both domestic and overseas markets for products targeting business offices, small business owners, and individual users, due to further progress in the switchover to color machines, high performance and price reduction.

In office-use color machines, we endeavored to expand sales of the iR C3100 medium-speed multifunction device and the iR C6800 high-speed multifunction device launched on overseas markets (they had been launched on the Japanese market in the second half of 2003), as well as the iR C3200/C3200N which remained strong worldwide. In addition, we fortified our product line-up by releasing new products such as the iR C3220/C2620 series. As a result, we were able to increase our sales substantially. In office-use digital black and white machines, we continued to enjoy good sales thanks to persistently strong sales of the iR1600/2000 series, and during the second half of the year, also thanks to our efforts to strengthen our product line-up (from low- to high-speed machines) through the introduction of eight new models (including our high-performance, medium-speed iR4570/3570/2870/2270 series) which feature Canon's unique high-speed on-demand fixing, low power consumption and compact size.

In addition, by taking advantage of our Multifunctional Embedded Application Platform (MEAP) incorporated in our imageRUNNER series machines, and our line-up of imageWARE series software, which offer users an expanded range of functions, we were able to strengthen our solutions business by aggressively developing workflow solutions to match client needs.

In the field of products targeting individuals and small-business owners, we saw the shift in customer demand to multifunctional digital devices as a good business opportunity, to which we responded by launching our Satera MF5730/5750 and Satera MF3110 black and white machines (for the Japanese market), and the imageCLASS MF8170c, the world's first A4-size-capable color machine (for the North American market), in addition to other efforts to fortify our product line-up and to increase sales.

As a result of the above-described measures, sales for this segment grew by 3.6% on a consolidated basis and 5.3% on a non-consolidated basis, compared with the previous term.

Table of Contents

Table of Contents

Computer Peripherals

In inkjet printers, amid a market in which demand is polarized between high-performance printers dedicated to digital photo printing and low-priced products, Canon aggressively marketed new products that incorporated new technologies under the brand name of PIXUS for the Japanese market and PIXMA for overseas markets. These technologies included FINE, a high-precision print head that enables the use of extremely fine ink droplets;

ChromaLife 100, an ink with improved print quality and longer life; and PictBridge, an industry standard that enables easy printing directly from digital cameras. Furthermore, as there was a notable demand shift to multifunctional inkjet machines in major markets, the strength of well-received PIXUS MP300 series, introduced in the previous year, and the market launching of PIXUS MP900/770 (for the Japanese market) and PIXUS MP790/780 resulted in favorable sales of multifunctional inkjet machines.

Turning to laser beam printers, our OEM-brand color printers grew strongly in volume, and sales of black-and-white printers increased due to strong demand stimulated by declining prices. As for Canon-brand products, sales of black-and-white printers, such as the newly-introduced A3-size-capable Satera LBP-3600, were strong in Japan, and we actively promoted color printers like the Satera LBP-2410 and Satera LBP5000 series.

With regard to image scanners, our efforts to increase sales in various global markets by the introduction of our flagship model CanoScan 9950F and the slim CanoScan LiDE35 (for overseas markets) with a contact image sensor, resulted in bigger shares in the major overseas markets. However, our sales volumes fell, due partly to the shift in demand towards multifunctional printers.

As a result, this segment recorded an increase in sales of 5.6% on a consolidated basis and 6.3% on a non-consolidated basis, compared with the previous term.

Table of Contents

Table of Contents

Business Information Products

The demand for commercial-use document scanners marketed by Canon Electronics, Inc. is expanding in major markets around the world due to the trend toward the replacement of paper documents by electronic ones. In particular, we recorded strong sales of our DR Scanner series, including the high-speed DR-9080C/6080 launched on the market in the second half of 2003.

Sales of calculators marketed by Canon Electronics Business Machines (H.K.) Co., Ltd. remained flat due to the negative impact of price declines, despite retaining the top share in the U.S. market for print-capable calculators and the launching on the Japanese market of a desktop calculator that can also function as a plug-in 10-key pad for laptops and notebook computers. Sales of electronic dictionaries targeting the Japanese market increased through the new introduction of wordtank V80 (Chinese) and wordtank V30 (English), incorporating unique functions for learners such as pen-touch input, animation displays of how to write Chinese characters, and pronunciation.

With regard to servers and personal computers handled by Canon Sales Co., Inc., demand from corporate clients on the Japanese market held steady, but a decline in sales was caused by our change in marketing strategy from selling single products to a solutions business involving the proposal of unique combinations of various products.

Consequently, sales decreased 5.2% on a consolidated basis from the previous term.

Note: For this segment, there were no sales on a non-consolidated basis.

Table of Contents

Table of Contents

1 Camera Operations

In digital cameras, we enjoyed a large sales increase, thanks particularly to expanded demand in the area of single lens reflex (SLR) cameras. We expanded sales of the newly introduced, EOS-1Ds Mark II and EOS-1D Mark II, our flagship models, and the EOS-20D for high-end amateur demand, in addition to our affordable EOS Kiss Digital, which enjoyed a favorable market response. Demand for our EF lens series of products was also firm. In compact digital cameras, growth in the Japanese market subsided, but it remained high in overseas markets, and the introduction of ten new products in our PowerShot series including the PowerShot Pro1, and six new products in the IXY DIGITAL series including the IXY DIGITAL 50, during the reporting term caused a strong growth in sales. In response to market needs for digital photo printers, we adopted a strategy of seeking synergies with our digital cameras. With this aim in mind, we introduced five new products in the SELPHY series, including the CP-330 compact photo printer, which utilizes the industry-standard PictBridge technology.

In digital video cameras, we fortified our lineup worldwide and expanded sales with the addition of our XL2 KIT, professional-use flagship model, and the IXY DV M3 KIT and FV M20 KIT which feature sophisticated video and still-image recording functions.

In film cameras, we launched two new affordable SLR cameras, including the EOS Kiss 7, and three new compact cameras, including the high-end Autoboy 180. In spite of these initiatives, however, film camera sales declined as global demand continued its shift toward digital cameras.

We saw strong sales of our newly-released Power Projector SX50 LCD projector, which utilizes our AISYS reflective liquid crystal optical engine to achieve high resolution and brightness in a compact, low-cost unit.

As a result, this segment recorded an increase in sales of 16.8% on a consolidated basis and 24.3% on a non-consolidated basis, compared with the previous term.

Table of Contents

1 Optical and Other Products Operations

Strength was seen in the semiconductor devices markets, mostly due to strong demand for cellular phones and digital consumer products, as well as replacement demand for personal computers. Device manufacturers made large investments in production facilities, primarily in Japan and other parts of Asia. Amidst this trend, demand for our semiconductor production equipment grew briskly and sales rose significantly, partly due to the introduction of new products like FPA-6000ES6, which uses krypton fluoride (KrF) excimer lasers as the light source. In the LCD panel market, growth in demand for panels used in television and personal computer applications has stimulated panel makers to continue panel manufacturers' vigorous capital investments. In particular, many inquiries were made by manufacturers in Taiwan and Korea for mirror projection mask aligners for large panels. Our efforts to sell more units of our MPA-8000, which is capable of handling sixth-generation-sized panels (1,500 by 1,850 mm) and the MPA-7800 series, capable of handling fifth-generation panels, proved successful, with sales volume increasing dramatically.

Although there were no significant changes in the size of the market for television broadcasting lenses, the shift towards digital broadcasting equipment, which began in 2002, has contributed to replacement demand and recoveries in capital investments, allowing sales to stay firm. During this term, we introduced 13 new products, including lenses for High Definition Television (HDTV) cameras, and we focused on increasing sales of J17ex7.7B and other handy-type products in our high-grade ENG lens series. As a result, we successfully expanded sales not only in Japan and the United States, but also in many countries in Europe and Asia as well.

In medical equipment, sales of X-ray digital cameras in our CXDI series utilizing Canon's unique sensor technology achieved solid growth, not only in Europe and the United States, but also in Asia. Furthermore, sales of our CR-DGi non-mydiatic retinal digital camera introduced during the previous term remained robust.

Our sales efforts caused this business segment to record an increase in sales of 26.9% on a consolidated basis and 37.7% on a non-consolidated basis, compared with the previous term.

n Facilities Investment by the Canon Group

The investment in facilities during this term totaled 318.7 billion yen (209.5 billion yen by the Company).

Main facilities completed during this term

Fukushima Canon Inc.: New Computer Peripherals Manufacturing Plant*
(Business Machines Operations)

Location: Fukushima-shi, Fukushima Pref.

Date of Completion: June 2004

* Leased to Fukushima Canon Inc. by the Company

Optics R&D Center: New R&D Building
(Optical Products Operations)

Location: Utsunomiya-shi, Tochigi Pref.

Date of Completion: August 2004

Hiratsuka Development Center: New R&D Building
(Headquarters Operations)

Location: Hiratsuka-shi, Kanagawa Pref.

Date of Completion: December 2004

Main facilities under construction for establishment/expansion as of the end of this term

Yakou Project (tentative name): New R&D Building
(Business Machines Operations)

Location: Kawasaki-shi, Kanagawa Pref.

Canon Inc. Headquarters: New R&D Building
(Headquarters Operations)

Location: Ohta-ku, Tokyo

Canon Inc.: Land for new Production Technology Base
(Headquarters Operations)

Location: Kawasaki-shi, Kanagawa Pref.

Oita Canon Inc.: Camera Manufacturing Plant/New Logistics Building*
(Camera Operations)

Location: Oita-shi, Oita Pref.

* To be leased to Oita Canon Inc. by the Company

(2) Management Perspectives of the Canon Group

The world economy is expected to expand gradually, but we must be prepared to deal with a number of factors surrounding the Canon Group that may create an unpredictable operating environment, such as signs of a slowdown in economic growth observed since the latter half of 2004, and the uncertain situation in the Middle East.

Against this backdrop, the Canon Group is entering the final year of Phase II (2001 to 2005) of its Excellent Global Corporation Plan, and we will emphasize the implementation of the following measures.

In order for the Group to be able to maintain sustained growth despite rapid changes in the global situation, we need to be acutely conscious of manufacturing processes when developing products. We also need to exhaustively strengthen the manufacturing technologies used in our production facilities and raise the level of employees manufacturing skills. To this end, we will strengthen collaboration between development and manufacturing departments. In addition to implementing reforms that will enable us to create products without the need for prototypes throughout the various stages of the product development process, we need to expand the in-house manufacture of key components of our products, and also the devices and molds used to manufacture them and to automate our assembly processes. In this way, we aim to further lower our manufacturing cost rate and accumulate our manufacturing technologies.

We plan to create and strengthen new businesses for the next generation. Among these, we have selected the display business, commencing with SED (Surface-condition Electron-emitter Display), as the next main earnings driver. In order to achieve quick realization of mass production, we have to establish its manufacturing technologies and reduce costs as soon as possible. Furthermore, we plan to bolster our ability to develop key components to supply sophisticated products that depend on our unique technologies, which can be unrivaled. At the same time, we are fostering new business developments by subsidiaries, by supporting their technologies.

We also need to develop an infrastructure that will contribute to the creation of highly advanced and efficient R & D and manufacturing operations.

Finally, because our ability to achieve these goals will depend upon the capabilities of each and every one of our employees, we will place even greater emphasis on the cultivation of human resources and the development of individual skills. With regard to compliance issues, we will make our best efforts to ensure a full understanding of the issues by all employees of Canon Group companies.

Table of Contents**(3) Business Results and Status of Assets of the Canon Group****Consolidated**

	100th Business Term (Jan. 1, 2000-Dec. 31, 2000)	101st Business Term (Jan. 1, 2001-Dec. 31, 2001)
Net Sales (100 millions of yen)	26,964	29,075
Income before Income Taxes and Minority Interests (100 millions of yen)	2,271	2,815
Net Income (100 millions of yen)	1,340	1,675
Basic Net Income Per Share (yen)	153.66	191.29
Total Assets (100 millions of yen)	28,321	28,447
Net Assets (Total Stockholders' Equity) (100 millions of yen)	12,989	14,584

- Notes: 1. Canon's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America.
2. Basic net income per share is calculated based on the weighted average number of outstanding shares during the term.

Non-Consolidated

	100th Business Term (Jan. 1, 2000-Dec. 31, 2000)	101st Business Term (Jan. 1, 2001-Dec. 31, 2001)
Net Sales (100 millions of yen)	16,842	17,074
Ordinary Profit (100 millions of yen)	1,559	2,111
Net Income (100 millions of yen)	884	391
Net Income Per Share (yen)	101.32	44.71

Total Assets (100 millions of yen)	15,812	16,580
Net Assets (Total Stockholders' Equity) (100 millions of yen)	10,956	11,184

- Notes: 1. Net income per share is calculated based on the weighted average number of outstanding shares during the term. However from the 101st business term the treasury stock is excluded upon calculation. In addition, from the 103rd business term, upon calculation of net income per share, the amount of directors bonuses shown in the Proposal of Profit Appropriation is deducted from the net income.
2. Net income and net income per share for the 101st business term decreased significantly from the 100th business term due to a one-time amortization of unrecognized net pension obligations.

Table of Contents

102nd Business Term (Jan. 1, 2002-Dec. 31, 2002)	103rd Business Term (Jan. 1, 2003-Dec. 31, 2003)	104th Business Term (Jan. 1, 2004-Dec. 31, 2004)
29,401	31,981	34,679
3,300	4,482	5,521
1,907	2,757	3,433
217.56	313.81	387.80
29,427	31,821	35,870
15,919	18,655	22,099
102nd Business Term (Jan. 1, 2002-Dec. 31, 2002)	103rd Business Term (Jan. 1, 2003-Dec. 31, 2003)	104th Business Term (Jan. 1, 2004-Dec. 31, 2004)
17,890	20,237	22,784
2,409	3,206	3,963
1,441	2,287	2,493
164.46	260.03	281.30
18,481	20,593	23,848
12,353	14,442	16,514

3. Net income and net income per share for the 103rd business term increased significantly from the 102nd business term due to gain on exemption from the substitutional portion of the employees' pension fund.

Table of Contents

**BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS
SIGNIFICANT ACCOUNTING POLICIES**

1. Basis of Presentation

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) pursuant to the provision of paragraph 1 of Article 179 of the Enforcement Regulations for the Japanese Commercial Code. However, certain disclosures required under US GAAP are omitted pursuant to the same provision.

2. Cash Equivalents

Canon considers all highly-liquid instruments purchased with an original maturity of three months or less to be cash equivalents.

3. Translation of Foreign Currencies

Assets and liabilities denominated in foreign currencies are translated at the rate of exchange in effect at the balance sheet date. Exchange differences are charged or credited to income. Assets and liabilities of subsidiaries located outside Japan are translated into Japanese yen at the rates of exchange in effect at the balance sheet date and income and expense items are translated at the average exchange rates prevailing during the year. The resulting translation adjustments are reported in other comprehensive income (loss).

4. Inventories

Inventories are stated at the lower of cost or market value. Cost is determined principally by the average method for domestic inventories and the first-in, first-out method for overseas inventories.

5. Marketable Securities

Canon accounts for its debt and equity securities in accordance with Statement of Financial Accounting Standards No.115, Accounting for Certain Investments in Debt and Equity Securities . Held-to-maturity securities are recorded at amortized cost, adjusted for the amortization or accretion of premiums or discounts. Available-for-sale securities are recorded at fair value. Unrealized holding gains and losses, net of the related tax effect, on available-for-sale securities are excluded from earnings and are reported in other comprehensive income (loss) until realized. Realized gain and losses are determined on the average cost method.

6. Property, Plant and Equipment

Property, plant and equipment are depreciated principally by the declining-balance method.

48

Table of Contents

7. Goodwill and Other Intangible Assets

Goodwill and intangible assets with an indefinite useful life are not amortized, but instead tested for impairment at least annually in accordance with Statement of Financial Accounting Standards No.142, Goodwill and Other Intangible Assets . Intangible assets with estimate useful lives are amortized over the respective estimated useful lives.

8. Impairment of Long-Lived Assets

In accordance with Statement of Financial Accounting Standards No.144, Accounting for the Impairment or Disposal of Long-Lived Assets , long-lived assets, such as property, plant and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset.

9. Standard for allowances

(Allowance for doubtful accounts)

An allowance for doubtful accounts is provided based on credit loss history and an evaluation of any specific doubtful accounts.

(Accrued pension and severance cost)

In accordance with Statement of Financial Accounting Standards No.87, Employers Accounting for Pensions , pension and severance cost is accrued based on the projected benefit obligations and the fair value of plan assets at the balance sheet date. If the accumulated benefit obligation (i.e., obligations deducting an effect of future compensation levels from projected benefit obligations) exceeds the fair value of plan assets, a minimum pension liability equal to this difference is reflected in the consolidated balance sheets by recognizing an additional minimum pension liability. Unrecognized prior service cost is amortized by the straight-line method over the average remaining service period of employees. Unrecognized actuarial loss is recognized by amortizing a portion in excess of a corridor (i.e., 10% of the greater of the projected benefit obligations or the fair value of plan assets) by the straight-line method over the average remaining service period of employees.

10. Earnings per Share

Basic earnings per share have been computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding during each year. Diluted earnings per share reflect the potential dilution and have been computed on the basis that all convertible debentures were converted at beginning of the year or at time of issuance (if later).

We have examined the consolidated financial statements of Canon Inc. for the 104th business term from January 1, 2004 to December 31, 2004, namely, the consolidated balance sheets and the consolidated statements of income, for the purpose of reporting under the provisions of Article 19-2, Paragraph 3 of the Law regarding Exceptional Rules of the Commercial Code concerning Auditing, etc. of Stock Corporations. Responsibility as to the preparation of such consolidated financial statements lies with the management of the Company, and the responsibility of our Audit Corporation is to express our opinion on the consolidated financial statements from an independent position.

50

Table of Contents

We conducted our audit in accordance with the auditing standards generally accepted in Japan. The auditing standards require that our Audit Corporation obtain reasonable assurance that there are no material false representations in the consolidated financial statements. The audit is conducted on a test basis and includes the examination of representations in the consolidated financial statements as a whole, including the examination of the accounting principles adopted by the management and the method of application thereof and the evaluation of the estimate by the management. Our Audit Corporation has determined that, as a result of the audit, we have obtained a reasonable basis for giving an opinion. Also, the audit includes the examination of the subsidiary or affiliated corporations, which we considered to be necessary.

As a result of the audit, our opinion is that the above consolidated financial statements present fairly the status of assets and earnings of the Company and its consolidated subsidiaries in conformity with laws, regulations and the Articles of Incorporation of the Company.

Our Audit Corporation or Partners in Charge have no financial or other interest in the Company required to be stated by the provisions of the Certified Public Accountant Law.

Balance Sheets and Consolidated Statements of Income
(Certified Copy)

Audit Report on the consolidated financial statements

The Board of Corporate Auditors has received reports from each Corporate Auditor on the auditing methods and the auditing results regarding consolidated financial statements (the consolidated balance sheets and the consolidated statement of income) during the 104th business term from January 1, 2004 to December 31, 2004, and has prepared this Audit Report upon deliberation, and hereby report as follows:

1. Outline of Corporate Auditors Auditing Methods

In accordance with the auditing policies, share of assignment, etc. stipulated by the Board of Corporate Auditors, each Corporate Auditor received reports and explanations of the consolidated financial statements from the Directors, etc. and the accounting auditors, and conducted the audit.

2. Results of Audit

The methods and results of the audit made by the accounting auditor, Shin Nihon & Co., an incorporated auditing firm, are found to be proper.

We have examined the financial statements of Canon Inc. for the 104th business term from January 1, 2004 to December 31, 2004, namely, the balance sheets, the statements of income, the business report (limited to matters concerning accounting), the proposal of profit appropriation, and the accompanying detailed statements (limited to matters concerning accounting), for the purpose of reporting under the provisions of Article 2, Paragraph 1 of the Law regarding Exceptional Rules of the Commercial Code concerning Auditing, etc. of Stock Corporations. With respect to the aforementioned business report and the accompanying detailed statements, our examination was limited to those matters based on the accounting records of the Company. Responsibility as to the preparation of such financial statements and the accompanying detailed statements lies with the management of the Company,

Table of Contents

and the responsibility of our Audit Corporation is to express our opinion on the financial statements and the accompanying detailed statements from an independent position.

We conducted our audit in accordance with the auditing standards generally accepted in Japan. The auditing standards require that our Audit Corporation obtain reasonable assurance that there are no material false representations in the financial statements and the accompanying detailed statements. The audit is conducted on a test basis and includes the examination of representations in the financial statements and the accompanying detailed statements as a whole, including the examination of the accounting principles adopted by the management and the method of application thereof and the evaluation of the estimate by the management. Our Audit Corporation has determined that, as a result of the audit, we have obtained a reasonable basis for giving an opinion. Also, the audit includes the examination of the subsidiary corporations, which we considered to be necessary.

As a result of the audit, our opinion is as follows.

- (1) The balance sheets and the statements of income present fairly the status of assets and earnings of the Company in conformity with laws, regulations and the Articles of Incorporation of the Company.
- (2) The business report, as far as the accounting data included in such report are concerned, presents fairly the status of the Company in conformity with laws, regulations and the Articles of Incorporation of the Company.
- (3) The proposal of profit appropriation has been prepared in conformity with laws, regulations and the Articles of Incorporation of the Company.
- (4) With respect to the accompanying detailed statements, as far as the accounting data included in such accompanying detailed statements are concerned, there are none to be pointed out under the provisions of the Commercial Code.

Our Audit Corporation or Partners in Charge have no financial or other interest in the Company required to be stated by the provisions of the Certified Public Accountant Law.

Audit Report of Board of Corporate Auditors
(Certified Copy)

Audit Report

The Board of Corporate Auditors, has received reports from each Corporate Auditor on the auditing methods and the auditing results regarding the performance by the Directors of their duties during the 104th business term from January 1, 2004 to December 31, 2004, and has prepared this Audit Report upon deliberation, and hereby report as follows:

1. Outline of Corporate Auditors Auditing Methods

In accordance with the auditing policies, share of assignment, etc. stipulated by the Board of Corporate Auditors, each Corporate Auditor attended meetings of the Board of Directors and other important meetings; received reports of execution of duty from Directors, etc.; inspected important decision documents, etc.; investigated the activities and assets of the headquarters and of other principal places of business; and also demanded the subsidiaries, as the occasion demands, to render reports on their business operations. In addition, we also received reports and explanations from accounting auditors and examined the accounting documents and accompanying detailed statements.

Regarding competitive transactions by Directors, transactions between Directors and the Company bearing a conflict of interests, gratuitous offering of proprietary profit by the Company, any transaction not customary in nature between the Company and its subsidiaries or shareholders, and the acquisition, disposal, and other transactions involving the Company's own shares, we made detailed investigations and demanded reports to the Directors, etc., as the occasion demands, in addition to methods of audit mentioned above.

2. Results of Audit

- (1) The methods and results of the audit made by the accounting auditor, Shin Nihon & Co., an incorporated auditing firm, are found to be proper.
- (2) The business report is found to accurately present the status of the Company in conformity with the laws, regulations and Articles of Incorporation.
- (3) The proposition of profit appropriation is found to have nothing to be pointed out in light of the status of corporate assets and other circumstances.

62

Table of Contents

- (4) The accompanying detailed statements are found to accurately present the matters to be stated therein and to have nothing to be pointed out.
- (5) In connection with the performance by the Directors of their duties, including the duties relating to the subsidiaries, no dishonest act or significant fact of a violation of laws, regulations, or the Articles of Incorporation is found to exist.

Regarding competitive transactions by Directors, transactions between Directors and the Company bearing a conflict of interests, gratuitous offering of proprietary profit by the Company, any transaction not customary in nature between the Company and its subsidiaries or shareholders, and the acquisition, disposal, and other transactions involving the Company's own shares, we find that there is no breach of duties on the part of the Directors.
