A MESSAGE FROM THE PRESIDENT

We are pleased to present the results for Makita's 95th interim period, ended September 30, 2006.

■ Consolidated net sales reached a record high for two consecutive terms.

Regarding consolidated results of operations for the interim period under review, net sales rose 23.7% over the same period of the previous year, to 131,891 million yen. Sales in Japan rose 14.5% to 22,927 million yen compared with the same period of the previous year, as a result of the added sales from the air tools related business which Makita acquired in January of this year. Meanwhile, overseas sales posted a 25.8% increase to 108,964 million yen due primarily to the introduction of new products in response to the market needs, enhanced sales activities, expansion of emerging markets including the Eastern European and Russian markets, as well as the foreign exchange market that transitioned toward depreciation of the yen. As a result, overseas sales accounted for 82.6% of net sales for the period. Examining overseas sales by individual region, sales in Europe were up 35.3%, to 56,558 million yen, while sales in North America expanded 18.7%, to 24,513 million yen. Sales in Asia rose 15.4%, to 9,776 million yen, and sales in other regions increased 15.4%, to 18,117 million yen.

With regard to earnings, operating income amounted to 21,387 million yen (ratio of operating income to net sales; 16.2%), down 17.4% from the same period of the previous year, income before income taxes amounted to 21,796 million yen (ratio of income before income taxes to net sales; 16.5%), down 17.8% and net income for the interim period amounted to 15,390 million yen (ratio of net income to net sales; 11.7%), down 40.4%. These decreases from the same period of the previous year were mainly due to a special factor of a gain from the sale of the Company's golf course management subsidiary following the completion of the civil rehabilitation proceedings in May 2005. The gain of transfer of its ownership interests in the subsidiary resulted in approximately 8.5 billion yen in operating income and 11.9 billion yen in net income for the interim period of 2005.

■ Issues to Be Addressed

As to our opinions on what lies ahead, while the domestic economy is expected to stay on a gradual recovery path, the price of raw materials does not allow for optimism. The outlook for the environment in which the company does business is somewhat opaque, considering the worldwide trend toward rising interest rates as well as some concerns over the outlook for both the American and the Asian economy.

In light of this outlook, Makita will be striving to further improve its results by aggressively addressing such tasks as the continuous introduction of new products that will lead the industry, further improvement in the productivity of its Chinese factories, a smooth startup of the Romanian factory, which is Makita's new production base, improvement in brand equity in the U.S., enhancement of the air tool category, etc.

Table of Contents

n The Interim Dividends of 19 Yen Per Share

Makita's basic policy on the distribution of profits is to maintain a dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 18 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on consolidated net income after certain adjustments. For the interim period under review, Makita will pay a dividend of 19 yen per share of the same amount as the interim period of 2005, as announced in April 2006.

Based on its dividend policy, Makita's Board of Directors will decide on proposals for the dividend for the end of the fiscal year at their meeting to approve the financial statements after they are finalized near the end of April 2007. Their proposals will be presented for discussion and final approval at the Ordinary General Meeting of Shareholders.

We look forward to the continuing support and cooperation of our shareholders.

November 2006

Masahiko Goto
President and Representative Director

The highest price per share: 3,830 yen marked on May 11 and July 10, 2006

The lowest price per share: 2,995 yen marked on June 14, 2006

Total volume of shares traded: 80,798 thousand shares

Basic policy regarding profit distribution

Makita's basic policy on the distribution of profits is to maintain a dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 18 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on consolidated net income after certain adjustments. With respect to repurchases of its outstanding shares, Makita aims to implement a flexible capital policy, augment the efficiency of its capital employment, and thereby boost shareholder profit. Also Makita continues to consider execution of own share repurchases in light of trends in stock prices.
