Diageo issues pre-closed period statement

Diageo will announce preliminary results for the year ended 30 June 2004 on 2 September 2004 and has today issued the following statement.

Diageo's scale, geographic diversity and outstanding collection of brands are now driving more consistent performance. Trading in the second half of the financial year to 30 June 2004 was broadly in line with expectations as outlined at the time of the interim results. Consequently performance trends for the full year are expected to be similar to those delivered in the first half. Then organic volume grew 3% and organic growth of net sales (after deducting excise duties) was 6%. As in the first half, organic growth in marketing investment is expected to be above growth of net sales (after deducting excise duties).

During the year Diageo has undertaken a series of initiatives to drive greater cost efficiency across the business. These projects have given rise to restructuring costs in the full year, which have not been treated as exceptional items, of approximately £50 million before tax. Organic operating profit growth for the full year is still expected to be 6% continuing the trend of the first half. However, as previously advised adverse exchange rates are expected to impact reported profit before exceptionals and tax for the full year by c£95 to £100 million.

Diageo has repurchased a further 43 million shares for cancellation in the financial year and therefore the number of shares in issue at the end of the year was 3057 million. The weighted average number of shares used to calculate eps in the year ended 30 June 2004 is estimated to be approximately 3030 million shares. Eps before exceptional charges is expected to be approximately 48 pence per share. Free cash flow before dividends is expected to be in excess of £1 billion for another year.

Looking forward to the new financial year Diageo expects that organic growth in volume, net sales (after deducting excise duties) and operating profit will be similar to those achieved in the year ended 30 June 2004.

Based on current exchange rates, the adverse impact of exchange rate movements on profit before exceptionals and tax in fiscal 2005 is estimated to be £100 million mainly due to year on year weakness in the dollar and currencies such as the Nigerian Naira and the Venezuelan Bolivar which cannot be hedged.

On 23 June 2004 Diageo announced that General Mills had filed a universal shelf registration statement which included approximately 50 million common stock owned by Diageo and that its board representatives, Paul Walsh and Jack Keenan had resigned from the General Mills board. Consequently Diageo will no longer account for General Mills as an associate from the end of June 2004. Reported eps for the year ending 30 June 2005 will be adversely affected by this change, the impact of which on a proforma basis for fiscal 2004 is estimated at 3.0 pence per share. Following this change in accounting treatment Diageo expects that its effective tax rate will continue to be 25%.

Paul Walsh, CEO of Diageo, said:

Diageo's outstanding collection of brands and our geographic reach have created the platform from which we can deliver the consistent performance which we know our shareholders value. As we drive the growth of our priority

brands, mix improvement together with robust pricing on an increasing number of brands has led to net sales growth substantially above volume growth. While the costs of our restructuring programmes adversely impact margins, we believe improved efficiency when these initiatives are completed will lead to margin expansion. After a number of years in which we have funded the costs of our strategic realignment to focus on premium drinks, the strong cash generative characteristics of this business are becoming increasingly apparent. Free cash flow will continue to fund both growth in dividends and our on market share buy back programme.

The share buy back programme together with the potential to monetise our stake in General Mills means that our already strong return on invested capital can be further enhanced .

The group has adopted the reporting requirements of *FRS 17 Retirement benefits* in its primary financial statements from 1 July 2003. The restatements also comply from 1 July 2003 with the following requirements issued by the UK Accounting Standards Board: *UITF abstract 38 Accounting for ESOP trusts* and the amendment to *FRS 5 Reporting the substance of transactions*.

FRS 17 Retirement benefits. This standard replaces the use of the actuarial values for assets in a pension scheme in favour of a market-based approach. In order to cope with the volatility inherent in this measurement basis, the standard requires that the profit and loss account shows

Table of Contents

the relatively stable ongoing service cost, finance charge and expected return on assets. Differences between expected and actual returns, and changes in actuarial assumptions, are reflected in the statement of total recognised gains and losses.

The adoption of FRS 17 has decreased the reported operating profit for the year ended 30 June 2003 by £88 million. This charge has been offset by a decrease in exceptional charges of £14 million and an increase in other finance income of £36 million, giving a net decrease in the profit for the year of £38 million. In addition, the adoption of the standard has reduced shareholders' funds at 30 June 2003 by £1,865 million.

UITF abstract 38 Accounting for ESOP trusts. This abstract changes the presentation of an entity's own shares held in an employee share trust from requiring them to be recognised as assets to requiring them to be deducted in arriving at shareholders' funds. It also requires that the minimum expense to the profit and loss account should be the difference between the fair value of the shares at the date of award and the amount that an employee may be required to pay for the shares (i.e. the intrinsic value of the award).

The impact of the adoption of UITF 38 in the year ended 30 June 2003 has been to increase operating profit by £14 million and increase the tax charge by £4 million. In addition, exceptional charges were reduced by £2 million, giving a net increase in the profit for the year of £12 million. The reclassification of shares acquired by the share trust (own shares) from fixed assets and debtors to equity has reduced shareholders' funds by £288 million at 30 June 2003. In addition, the net cash outflow arising from the purchase of shares by the share trusts has been reclassified from capital expenditure and financial investment to financing. This reclassification has increased free cash flow for the year ended 30 June 2003 by £65 million.

FRS 5 Reporting the substance of transactions. The amendment to the standard added a new application note (G) on revenue recognition. This requires that revenue should be stated at fair value of the right to consideration. Diageo incurs certain promotional expenditure that is not wholly independent of the invoiced product price. Such expenditure is now deducted from turnover. The change, which has no impact on operating profit, reduced turnover and operating costs by £159 million in the year ended 30 June 2003.
