GOLDEN ENTERPRISES, INC. AND SUBSIDIARY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. The accompanying unaudited condensed consolidated financial statements of Golden Enterprises, Inc. (the "Company") have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 to Regulation S-X. Accordingly, they do not include all information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments consisting of normal recurring accruals considered necessary for a fair presentation have been included. For further information, refer to the consolidated financial statements and footnotes included in the Golden Enterprises, Inc. and subsidiary ("the Company") Annual Report on Form 10-K for year ended June 3, 2005.
2. The consolidated results of operations for the twenty-six weeks ended December 2, 2005 are not necessarily indicative of the results to be expected for the fifty-two week fiscal year ending June 2, 2006. Certain prior year amounts have been reclassified to conform to the current year presentation.
3. The Company changed its accounting policy in the fourth quarter of fiscal 2005 with regard to casualty insurance reserves. The effect of this accounting change was to adopt this policy as of the beginning of fiscal 2005 (May 29, 2004). Previously, casualty insurance reserves were calculated using the case reserves method. The Company changed this accounting policy to the fully developed actuarial method of estimating insurance reserves. This change in accounting policy was made to improve the quality of the accounting estimate. The fully developed method reflects future costs inherent in the total population of claims including claims reported and IBNR (incurred but not reported). The estimate includes the recognition of inflation trends and the fact that injuries may become more severe over time. The cumulative effect of this change in accounting policy did not have a material effect on the financial statements. For further information, refer to the consolidated financial statements and footnotes included in the Golden Enterprises, Inc. and subsidiary ("the Company") Annual Report on Form 10-K for year ended June 3, 2005.
4. The following tables summarize the prepaid assets accounts:

7

5. The principal raw materials used in the manufacture of the Company's snack food products are potatoes, corn, vegetable oils and seasoning. The principal supplies used are flexible film, cartons, trays, boxes and bags. These raw materials and supplies are generally available in adequate quantities in the open market from sources in the United States and are generally contracted up to a year in advance.

6. In December 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure-an amendment of FASB Statement No. 123." SFAS No. 148. amends SFAS No. 123, "Accounting for Stock-Based Compensation" to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS No. 148 amends the disclosure requirements of SFAS No.123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The Company has adopted the disclosure requirements of SFAS No. 148 effective May 31, 2003 in its consolidated financial statements. The Company will continue to account for stock-based compensation using the methods described in Note 8 below.

7. The following table provides a reconciliation of the denominator used in computing basic earnings per share to the denominator used in computing diluted earnings per share for the twenty-six weeks ended December 2, 2005 and November 26, 2004:

December 2, 2005 No

9. The Company entered into a five year term product purchase commitment during the year ending May 31, 2001 with a supplier. Under the terms of the

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-Q

agreement the minimum purchase quantity and the unit purchase price were fixed resulting in a minimum first year commitment of approximately \$2,171,000. After the first year, the minimum purchase quantity was fixed and the purchase unit price was negotiable, based on current market. Subsequently, in September 2002, the product purchase agreement was amended to fix the purchase unit price and establish specific annual quantities. The purchase commitment with the supplier, based on a specific purchase price and specific annual quantities, ended as of October 25, 2005. The Company is prohibited from purchasing the product from any other vendor until October 25, 2006.

10. The interest rate on the Company's bank debt is reset monthly to reflect the 30 days LIBOR rate. Consequently, the carrying value of the bank debt approximates fair value. During the twenty-six weeks ended December 2, 2005 the Company's bank debt was increased by \$.71 million compared to an increase of \$1.33 million last year. The interest rate at December 2, 2005 was 5.83% compared to 3.96% at November 26, 2004.
11. The Company has a letter of credit in the amount of \$3,084,365 outstanding at December 2, 2005 to support the Company's commercial self-insurance program.
12. Currently, the company has a line-of-credit agreement with a local bank that permits borrowing up to \$2 million, compared to \$1 million at this time last year. The line-of-credit is subject to the Company's continued credit worthiness and compliance with the terms and conditions of the advance application. The Company's line-of-credit debt as of December 2, 2005 was \$1,584,446 with an interest rate of 7.00%, leaving the Company with \$415,554 of credit availability. The Company's line-of-credit debt as of November 26, 2004 was \$188,564 with an interest rate of 5.00%, leaving the Company with \$811,436 of credit availability.
13. The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of cash equivalents and trade receivables.

The Company maintains deposit relationships with high credit quality financial institutions. The Company's trade receivables result primarily from its snack food operations and reflect a broad customer base, primarily large grocery store chains located in the Southeastern United States. The Company routinely assesses the financial strength of its customers. As a consequence, concentrations of credit risk are limited.

The Company's notes receivable requires collateral and buyer investment and management believes they are well secured.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have reviewed the accompanying interim consolidated balance sheet of Golden Enterprises, Inc. and subsidiary as of December 2, 2005 and the related interim consolidated statements of income and cash flows for the twenty-six week period then ended. These financial statements are the responsibility of the Company's

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-Q

management.

We conducted our review in accordance with standards established by the Public Accounting Oversight Board (United States). A review of interim financial statements consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expressions of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of June 3, 2005 and the related consolidated statements of operations, changes in stockholders' equity and cash flows for the fiscal year then ended (not presented herein), and in our report dated August 5, 2005 we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of June 3, 2005, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

As discussed in Note 3 to the accompanying consolidated financial statements, the Company has changed its accounting policy with respect to the casualty insurance liability.

ITEM 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The purpose of this discussion is to provide additional information about Golden Enterprises, Inc., its financial condition and the results of its operations. Readers should refer to the consolidated financial statements and other financial data presented throughout this report to fully understand the following discussion and analysis.

OVERVIEW

The Company manufactures and distributes a full line of snack items, such as potato chips, tortilla chips, corn chips, fried pork skins, baked and fried cheese curls, onion rings and puff corn. The products are all packaged in flexible bags or other suitable wrapping material. The Company also sells a line of cakes and cookie items, canned dips, pretzels, peanut butter crackers, cheese crackers, dried meat products and nuts packaged by other manufacturers using the Golden Flake label.

No single product or product line accounts for more than 50% of the Company's

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-Q

sales, which affords some protection against loss of volume due to a crop failure of major agricultural raw materials. Raw materials used in manufacturing and processing the Company's snack food products are purchased on the open market and under contract through brokers and directly from growers. A large part of the raw materials used by the Company consists of farm commodities which are subject to precipitous changes in supply and price. Weather varies from season to season and directly affects both the quality and supply available. The Company has no control of the agricultural aspects and its profits are affected accordingly.

The Company sells its products through its own sales organization and independent distributors to commercial establishments that sell food products primarily in the Southeastern United States. The products are distributed by approximately 439 route representatives who are supplied with selling inventory by the Company's trucking fleet. All of the route representatives are employees of the Company and use the Company's direct-store delivery system.

BASIS OF PRESENTATION

The Company's discussion and analysis of its financial condition and results of operations are based upon the accompanying unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 to Regulation S-X. Accordingly, they do not include all information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments consisting of normal recurring accruals considered necessary for a fair presentation have been included.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company's discussion and analysis of its financial condition and results of operations are based upon the Company's unaudited condensed consolidated financial statements. The preparation of which, in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that in certain circumstances affect amounts reported in the consolidated financial statements. In preparing these financial statements, management has made its best estimates and judgments of certain amounts included in the financial statements, giving due considerations to materiality. The Company does not believe there is a great likelihood that materially different amounts would be reported under different conditions or using different assumptions related to the accounting policies described below. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates.

11

The Company believes the following to be critical accounting policies. That is, they are both important to the portrayal of the company's financial condition and results and they require management to make judgments and estimates about matters that are inherently uncertain.

Revenue Recognition

The Company recognizes sales and related costs upon delivery or shipment of products to its customers. Sales are reduced by returns and allowances to customers.

Change in Accounting Policy

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-Q

The Company is self-insured for certain casualty losses relating to automobile liability, general liability, workers' compensation, property losses and medical claims. The Company also has stop loss coverage to limit the exposure arising from these claims. Automobile liability, general liability, workers' compensation, and property losses costs are covered by letters of credit with the Company's claim administrators.

The Company changed its accounting policy in the fourth quarter of fiscal 2005 with regard to the casualty insurance obligations. The Company adopted the use of a third-party actuary to estimate the casualty insurance obligations on an annual basis. This change in accounting policy was made to determine the ultimate loss and reserve requirements through actuarial assumptions including compensation trends, health care cost trends and discount rates. The third-party actuary also uses historical information for claims frequency and severity in order to establish loss development factors. The cumulative effect of this change in accounting policy did not have a material effect on the financial statements.

Accounts Receivable

The Company records accounts receivable at the time revenue is recognized. Amounts for bad debt expense are recorded in selling, general and administrative expenses on the Consolidated Statements of Operations. The amount of the allowance for doubtful accounts is based on management's estimate of the accounts receivable amount that is uncollectible. Management records a general reserve based on analysis of historical data. In addition, management records specific reserves for receivable balances that are considered high-risk due to known facts regarding the customer. The allowance for bad debts is reviewed quarterly, and it is determined whether the amount should be changed. Failure of a major customer to pay the Company amounts owed could have a material impact on the financial statements of the Company. At December 2, 2005 and June 3, 2005 the Company had accounts receivables in the amount of \$7.4 million and \$7.7 million, net of an allowance for doubtful accounts of \$0.1 million and \$0.2 million, respectively.

The following table summarizes the Company's customer accounts receivable profile as of December 2, 2005:

Amount Range	No. of Customers
Less than \$1,000.00.....	1,39
\$1,001.00-\$10,000.00.....	54
\$10,001.00-\$100,000.00.....	9
\$100,001.00-\$500,000.00.....	
\$500,001.00-\$1,000,000.00.....	
\$1,000,001.00-\$2,500,000.00.....	
 Total All Accounts.....	 2,04
	====

Inventories

Inventories are stated at the lower of cost or market. Cost is computed on the first-in, first out method.

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-Q

Accrued Expenses

Management estimates certain material expenses in an effort to record those expenses in the period incurred. The most material accrued estimates relate to a salary continuation plan for certain key executives of the Company, and to insurance-related expenses, including self-insurance. In 2005, the Company adopted the use of a third-party actuary to estimate the casualty insurance obligations on an annual basis. In determining the ultimate loss and reserve requirements, the third-party actuary uses various actuarial assumptions including compensation trends, health care cost trends and discount rates. The third-party actuary also uses historical information for claims frequency and severity in order to establish loss development factors.

OTHER MATTERS

Transactions with related parties, reported in Note 14 of the Notes to Consolidated Financial Statements in the Annual Report to Stockholders for fiscal year ended June 3, 2005, are conducted on an arm's-length basis in the ordinary course of business.

LIQUIDITY AND CAPITAL RESOURCES

Working Capital was \$5.3 million at June 3, 2005 and \$4.0 million at the end of the twenty-six weeks. Net cash provided by operating activities amounted to \$0.6 million for the twenty-six weeks this year compared to \$1.60 million for last year's twenty-six weeks.

Additions to property, plant and equipment, net of disposals, were \$0.63 million this year and \$1.71 million last year. Cash dividends of \$0.37 million were paid during this year's twenty-six weeks compared to \$0.37 million last year. No cash was used to purchase treasury stock this year, and no cash was used to increase investment securities this year. The Company's current ratio was 1.36 to 1.00 at December 2, 2005.

The following table summarizes the significant contractual obligations of the Company as of December 2, 2005:

Contractual Obligations -----	Total -----	2006 ----	2007-2008 -----	2009-2010 -----
Long-Term Debt	\$ 1,355,708	\$ 732,422	\$ 384,372	\$ 238,914

	=====	=====	=====	=====

OFF-BALANCE SHEET ARRANGEMENT

The Company entered into a five-year term product purchase commitment during the year ending May 31, 2001 with a supplier. Under the terms of the agreement the minimum purchase quantity and the unit purchase price were fixed resulting in a minimum first year commitment of approximately \$2,171,000. After the first year,

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-Q

the minimum purchase quantity was fixed and the purchase unit price was negotiable, based on current market. Subsequently, in September 2002, the product purchase agreement was amended to fix the purchase unit price and establish specific annual quantities. The purchase commitment with the supplier, based on a specific purchase price and specific annual quantities, ended as of October 25, 2005. The Company is prohibited from purchasing the product from any other vendor until October 25, 2006.

Other Commitments

Available cash, cash from operations and available credit under the line-of-credit are expected to be sufficient to meet anticipated cash expenditures and normal operating requirements for the foreseeable future.

OPERATING RESULTS

For the thirteen weeks ended December 2, 2005, net sales increased 2.33% from the comparable period in fiscal 2005. For the year-to-date, twenty-six weeks ended December 2, 2005, net sales increased 3.72% from the comparable period in fiscal 2005. This year's thirteen weeks cost of sales was 54.3% of net sales compared to 53.4% last year, and selling, general, and administrative expenses were 47.5% of net sales this year and 46.7% last year. The year-to-date cost of sales was 54.5% of net sales compared to 53.0% last year, and selling, general, and administrative expenses were 46.7% of net sales this year and 46.7% last year.

	-----		-----	
Total	\$23,432,505	45.5%	\$23,317,123	47.0%

The Company's gain on sales of assets for the thirteen weeks ended in the amount of \$20,320 was from the sale of used transportation equipment.

For last year's thirteen weeks the gain on sale of assets was \$26,216 from the sale of used transportation equipment for cash.

The Company's investment income decreased 4.7% from last year. For the twenty-six weeks ended investment income was down 3.2%.

The Company's effective tax rate for the thirteen weeks was -37.0% compared to -62.7% for the last year's thirteen weeks and -37.0% for the twenty-six weeks this year and 35.2% last year.

MARKET RISK

The principal market's risks (i.e., the risk of loss arising from adverse changes in market rates and prices), to which the Company is exposed, are interest rates on its investment securities, bank loans, and commodity prices, affecting the cost of its raw materials.

The Company's investment securities consist of short-term marketable securities. Presently, these are variable rate money market mutual funds. Assuming December, 2005 variable rate investment levels and bank loan balances, a one-point change in interest rates would impact interest income by \$60 on an annual basis and interest expense by \$13,557.

The Company is subject to market risk with respect to commodities because its ability to recover increased costs through higher pricing may be limited by the competitive environment in which it operates. The Company purchases its raw materials on the open market under contract through brokers and directly from growers. Future contracts have been used occasionally to hedge immaterial amounts of commodity purchases, but none are presently being used.

INFLATION

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-Q

Certain costs and expenses of the Company are affected by inflation. The Company's prices for its products over the past several years have remained relatively flat. The Company will contend with the effect of further inflation through efficient purchasing, improved manufacturing methods, pricing and by monitoring and controlling expenses.

ENVIRONMENTAL MATTERS

There have been no material effects of compliance with governmental provisions regulating discharge of materials into the environment.

FORWARD-LOOKING STATEMENTS

This discussion contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those forward-looking statements. Factors that may cause actual results to differ materially include price competition, industry consolidation, raw material costs and effectiveness of sales and marketing activities, as described in the Company's filings with the Securities and Exchange Commission.

ITEM 3

QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Included in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations- Market Risk beginning on page 15.

ITEM 4

CONTROLS AND PROCEDURES

The Company performed an evaluation, under the supervision and with the participation of the Company's management (including the Company's Chief Executive Officer and Chief Financial Officer), of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this quarterly report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of the end of the period covered by this quarterly report, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed in reports that the Company files or submits under the Securities and Exchange Act of 1934 is recorded, processed, summarized and reported within the specified time periods.

There were no changes in the Company's internal control over financial reporting which occurred during the period covered by this report which have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II OTHER INFORMATION
