6. Net income per ordinary share

Basic net income per ordinary share has been computed by dividing net income available to ordinary shareholders by the weighted average number of ordinary shares outstanding during the period. Diluted net income per ordinary share is computed by adjusting the weighted average number of ordinary shares outstanding during the period for all potentially dilutive ordinary shares outstanding during the period and adjusting net income for any changes in income or loss that would result from the conversion of such potential ordinary shares. There is no difference in net income used for basic and diluted net income per ordinary share.

The reconciliation of the number of shares used in the computation of basic and diluted net income per ordinary share is as follows:

	Three Months Ended		Six Months Ended	
	June 30, 2012	June 30, 2011	June 30, 2012	June 30, 2011

Share Options

On July 21, 2008 the Company adopted the Employee Share Option Plan 2008 (the “2008 Employee Plan”) pursuant to which the Compensation and Organization Committee of the Company’s Board of Directors may grant options to any employee, or any director holding a salaried office or employment with the Company or a Subsidiary for the purchase of ordinary shares. On the same date, the Company also adopted the Consultants Share Option Plan 2008 (the “2008 Consultants Plan”), pursuant to which the Compensation and Organization Committee of the Company’s Board of Directors may grant options to any consultant, adviser or non-executive director retained by the Company or any Subsidiary for the purchase of ordinary shares.

An aggregate of 6.0 million ordinary shares have been reserved under the 2008 Employee Plan as reduced by any shares issued or to be issued pursuant to options granted under the 2008 Consultants Plan, under which a limit of 400,000 shares applies. Further, the maximum number of ordinary shares with respect to which options may be granted under the 2008 Employee Option Plan, during any calendar year to any employee shall be 400,000 ordinary shares. Each grant of an option under the 2003 Share Option Plan will be evidenced by a Stock Option Agreement between the employee and the Company. The exercise price will be specified in each Stock Option Agreement.

An aggregate of 6.0 million ordinary shares have been reserved under the 2003 Share Option Plan; and, in no event will the number of ordinary shares that may be issued pursuant to options awarded under the 2003 Share Option Plan exceed 10% of the outstanding shares, as defined in the 2003 Share Option Plan, at the time of the grant, unless the Board expressly determines otherwise. Further, the maximum number of ordinary shares with respect to which options may be granted under the 2003 Share Option Plan during any calendar year to any employee shall be 400,000 ordinary shares. No options can be granted after January 17, 2013.

Fair value of Stock Options Assumptions

The weighted average fair value of options granted during the period ended June 30, 2012 and June 30, 2011 was calculated using the Black-Scholes option pricing model. The weighted average fair values and assumptions used were as follows:

Three Months Ended	
June 30, 2012	June 30, 2011

Weighted average fair value	\$9.72		\$8.52	
Assumptions:				
Expected volatility	50	%	45	%
Dividend yield	0	%	0	%
Risk-free interest rate	0.84	%	2.3	%
Expected life	5 years		5 years	

Expected volatility is based on the historical volatility of our common stock over a period equal to the expected term of the options; the expected life represents the weighted average period of time that options granted are expected to be outstanding given consideration to vesting schedules, and our historical experience of past vesting and termination patterns. The risk-free rate is based on the U.S. government zero-coupon bonds yield curve in effect at time of the grant for periods corresponding with the expected life of the option.

Restricted Share Units

On July 21, 2008 the Company adopted the 2008 Employees Restricted Share Unit Plan (the “2008 RSU Plan”) pursuant to which the Compensation and Organization Committee of the Company’s Board of Directors may select any employee, or any director holding a salaried office or employment with the Company, or a Subsidiary to receive an award under the plan. An aggregate of 1.0 million ordinary shares have been reserved for issuance under the 2008 RSU Plan.

On November 22, 2011 the Company entered into two separate share repurchase plans of \$10 million each, covering the periods November 23, 2011 to December 31, 2011 and January 1, 2012 to February 20, 2012 respectively. On February 21, 2012 the Company entered into a further share repurchase plan of \$20 million, covering the period February 22, 2012 to April 22, 2012. On April 27, 2012 the Company entered into a fourth share repurchase plan of up to \$20 million, covering the period April 27, 2012 to July 18, 2012. On July 30, 2012 the Company entered into a fifth share repurchase plan of up to \$10 million, covering the period July 30, 2012 to October 26, 2012. The Company intends to enter further share repurchase plans to effect the share repurchase program in accordance with Rule 10b-18 and Rule 10b5-1 of the Securities Exchange Act of 1934, the authorization granted at the Company's annual general meeting, applicable laws and regulations and the Listing Rules of the Irish Stock Exchange.

Under the repurchase program, a broker will purchase the Company's American Depositary Shares ("ADSs") from time to time on the open market or in privately negotiated transactions in accordance with agreed terms and limitations. ADSs purchased will be deposited with the Depositary under the Company's ADR facility against delivery of the underlying Ordinary Shares, which will be repurchased by the Company on the Irish Stock Exchange in compliance with the Company's share repurchase authorization and applicable laws and regulations. Separately, Ordinary Shares traded on the Irish Stock Exchange may also be repurchased on behalf of the Company. The program is designed to allow share repurchases during periods when the Company would ordinarily not be permitted to do so because it may be in possession of material non-public or price-sensitive information, applicable insider trading laws or self-imposed trading blackout periods. The Company's instructions to the broker are irrevocable and the trading decisions in respect of the repurchase program will be made independently of and uninfluenced by the Company. The Company confirms that on entering the repurchase plans it had no material non-public, price-sensitive or inside information regarding the Company or its securities. Furthermore, the Company will not enter into additional plans whilst in possession of such information.

The timing and actual number of shares repurchased will be dependent on market conditions, legal and regulatory requirements and the other terms and limitations contained in the plans. In addition, share repurchases may be suspended or discontinued in certain circumstances in accordance with the agreed terms. Therefore, there can be no assurance as to the timing or number of shares that may be repurchased under the repurchase program. All Ordinary Shares repurchased by the Company will be cancelled.

During the six months ended June 30, 2012 738,341 ordinary shares were repurchased by the Company for a total consideration of \$15.6 million. As at June 30, 2012 1,283,938 ordinary shares have been repurchased by the Company for a total consideration of \$24.6 million. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with the unaudited Condensed Consolidated Financial Statements and accompanying notes included elsewhere herein and the Consolidated Financial Statements and related notes thereto included in our Form 20-F for the year ended December 31, 2011. The Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States.

Overview

We are a contract research organization ("CRO"), providing outsourced development services on a global basis to the pharmaceutical, biotechnology and medical device industries. We specialize in the strategic development, management and analysis of programs that support all stages of the clinical development process - from compound selection to Phase I-IV clinical studies. Our vision is to be the Global CRO partner of choice for the Biopharma industry by delivering best in class information, solutions and performance in clinical and outcomes research.

We believe that we are one of a select group of CRO's with the expertise and capability to conduct clinical trials in most major therapeutic areas on a global basis and have the operational flexibility to provide development services on a stand-alone basis or as part of an integrated "full service" solution. At June 30, 2012, we had approximately 8,930 employees, in 82 locations in 40 countries. During the six months ended June 30, 2012 we derived approximately 41.9%, 45.9% and 12.2% of our net revenue in the United States, Europe and Rest of World, respectively.

Revenue consists primarily of fees earned under contracts with third-party clients. In most cases, a portion of the contract fee is paid at the time the study or trial is started, with the balance of the contract fee generally payable in installments over the study or trial duration, based on the achievement of certain performance targets or "milestones". Revenue from contracts is recognized on a proportional performance method based on the relationship between time incurred and the total estimated duration of the trial or on a fee-for-service basis according to the particular circumstances of the contract. As is customary in the CRO industry, we contract with third party investigators in connection with clinical trials. All investigator fees and certain other costs, where reimbursed by clients, are, in accordance with industry practice, deducted from gross revenue to arrive at net revenue. As these costs vary from contract to contract, we view net revenue as our primary measure of revenue growth.

Our backlog consists of potential net revenue yet to be earned from projects awarded by clients. At June 30, 2012 we had a backlog of approximately \$2.5 billion, compared with approximately \$2.3 billion at December 31, 2011. We believe that our backlog as of any date is not necessarily a meaningful predictor of future results, due to the potential for cancellation or delay of the projects underlying the backlog, and no assurances can be given on the extent to which we will be able to realize this backlog as net revenue.

Direct costs consist primarily of compensation, associated fringe benefits and share based compensation expense for project-related employees and other direct project driven costs. Selling, general and administrative expenses comprise primarily of compensation, related fringe benefits and share based compensation expense for non project-related employees, recruitment expenditure, professional service costs, advertising costs and all costs related to facilities and information systems.

As the nature of our business involves the management of projects having a typical duration of one to four years, the commencement or completion of projects in a fiscal year can have a material impact on revenues earned with the relevant clients in such years. In addition, as we typically work with some, but not all, divisions of a client,

fluctuations in the number and status of available projects within such divisions can also have a material impact on revenues earned from such clients from year to year.

Although we are domiciled in Ireland, we report our results in U.S. dollars. As a consequence the results of our non-U.S. based operations, when translated into U.S. dollars, could be materially affected by fluctuations in exchange rates between the U.S. dollar and the currencies of those operations.

In addition to translation exposures, we are also subject to transaction exposures because the currency in which contracts are priced can be different from the currencies in which costs relating to those contracts are incurred. Our operations in the United States are not materially exposed to such currency differences as the majority of our revenues and costs are in U.S. dollars. However, outside the United States the multinational nature of our activities means that contracts are usually priced in a single currency, most often U.S. dollars, Euros or pounds Sterling, while costs arise in a number of currencies, depending, among other things, on which of our offices provide staff for the contract and the location of investigator sites. Although many such contracts benefit from some degree of natural hedging, due to the matching of contract revenues and costs in the same currency, where costs are incurred in currencies other than those in which contracts are priced, fluctuations in the relative value of those currencies could have a material effect on our results of operations. We regularly review our currency exposures and usually negotiate currency fluctuation clauses in our contracts which allow for price negotiation if changes in the relative value of those currencies exceed predetermined tolerances.

As we conduct operations on a global basis, our effective tax rate has depended and will depend on the geographic distribution of our revenue and earnings among locations with varying tax rates. Our results therefore may be affected by changes in the tax rates of the various jurisdictions. In particular, as the geographic mix of our results of operations among various tax jurisdictions changes, our effective tax rate may vary significantly from period to period.

As a percentage of net revenue direct costs in our central laboratory business have decreased from 72.2% for the three months ended June 30, 2011 to 65.4% for the three months ended June 30, 2012, a result of ongoing cost management and improved resource utilization in this business.

Selling, general and administrative expenses for the period increased by \$12.1 million, or 21.0%, from \$57.3 million for the three months ended June 30, 2011 to \$69.4 million for the three months ended June 30, 2012. The increase in selling, general and administration expenses for the period arose primarily from an increase in personnel related expenditure of \$4.1 million, an increase in facilities and related costs of \$0.4 million and an increase in other general overhead costs of \$7.6 million. General overhead costs for the three months ended June 30, 2011 included \$6.0 million in relation to the release of certain non-recurring tax provisions in both our clinical research and central laboratory business, arising from the receipt of additional information in relation to these items. The increase in the amortization expense in the current period is primarily a result of intangible assets acquired from the acquisitions of Firecrest in July 2011 and the acquisitions of BeijingWits Medical and PriceSpective in February 2012. As a percentage of net revenue, amortization expense increased from 0.3% of net revenues for the three months ended June 30, 2011 to 0.7% of net revenues for the three months ended June 30, 2012.

Restructuring and other non-recurring items of \$5.6 million were recorded during the three months ended June 30, 2012 (inclusive of the release of \$0.1 million relating to the 2011 Restructuring Plans). During the three months ended June 30, 2012 the Company completed a review of its operations to improve resource utilization throughout the business. This review resulted in the adoption of a restructuring plan, to include resource rationalizations in certain areas of the business and a re-organization of available office space at the Company's Philadelphia facility. A restructuring charge of \$4.6 million was recognized during the three months ended June 30, 2012; \$3.4 million in respect of resource rationalizations and \$1.2 million in respect of lease termination and exit costs. Liquidity and Capital Resources

The CRO industry is generally not capital intensive. The Group's principal operating cash needs are payment of salaries, office rents, travel expenditures and payments to investigators. Investing activities primarily reflect capital expenditures for facilities and information systems enhancements, the purchase and sale of short term investments and acquisitions.

Our clinical research and development contracts are generally fixed price with some variable components and range in duration from a few weeks to several years. Revenue from contracts is generally recognized as income on the basis of the relationship between time incurred and the total estimated contract duration or on a fee-for-service basis. The cash flow from contracts typically consists of a small down payment at the time the contract is entered into, with the balance paid in installments over the contract's duration, in some cases on the achievement of certain milestones. Accordingly, cash receipts do not correspond to costs incurred and revenue recognized on contracts.

The Company's cash and short term investment balances at June 30, 2012 amounted to \$168.0 million compared with cash and short term investment balances of \$174.1 million at December 31, 2011. The Company's cash and short term investment balances at June 30, 2012 comprised cash and cash equivalents \$94.9 million and short-term investments \$73.1 million. The Company's cash and short-term investment balances at December 31, 2011 comprised cash and cash equivalents \$119.2 million and short-term investments \$54.9 million.

On July 20, 2011 the Company entered into a three year committed multi currency revolving credit facility for \$150.0 million with Citibank, JP Morgan, Ulster Bank, Deutsche Bank and Barclays Bank. Each bank subject to the agreement has committed \$30 million to the facility, with equal terms and conditions in place with all institutions. The facility bears interest at LIBOR plus a margin and includes certain composite guarantees, indemnities and pledges in favor of the banks. Amounts available to the Group under the facility amounted to \$150.0 million at June 30, 2012 compared with \$150.0 million at December 31, 2011.

Net cash provided by operating activities was \$72.2 million for the six months ended June 30, 2012 compared with cash used in operating activities of \$11.7 million for the six months ended June 30, 2011. The most significant influence on our operating cash flow is revenue outstanding, which comprises accounts receivable and unbilled revenue, less payments on account. The dollar values of these amounts and the related days revenue outstanding can vary due to the achievement of contractual milestones, including contract signing, and the timing of cash receipts. The increase in cash flow from operating activities during the six months ended June 30, 2012 arose primarily from a decrease in the number of days revenue outstanding during the period. The number of days revenue outstanding at June 30, 2012 was 36 days compared to 47 days at December 31, 2011. The number of days revenue outstanding at June 30, 2011 was 49 days compared to 37 days at December 31, 2010.

Net cash used in investing activities was \$82.3 million for the six months ended June 30, 2012 compared to net cash used in investing activities of \$80.0 million for the six months ended June 30, 2011. Net cash used in the six months ended June 30, 2012 arose principally from cash paid for acquisitions, capital expenditures and the purchase of short-term investments.

During the six months ended June 30, 2012 the Company completed the acquisition of BeijingWits Medical for an initial cash consideration of \$9.0 and the acquisition of PriceSpective for an initial cash consideration of \$37.1 million. Cash received on the acquisitions of BeijingWits Medical and PriceSpective amounted to \$0.6 million and \$2.3 million respectively. The Company also paid \$1.2 million during the six months ended June 30, 2012 in respect of certain working capital targets for Oxford Outcomes and \$4.5 million in respect of certain performance milestones and working capital targets for Firecrest. Additional amounts payable at June 30, 2012 in relation to acquisitions include \$0.3 million in respect of Timaq Medical Imaging and \$64.4 million potentially payable contingent upon the

results of acquired businesses; including PriceSpective (\$15.0 million); BeijingWits Medical (\$7.0 million); Firecrest (\$36.2 million - €10 million (\$12.5 million) of which was paid in July 2012 in respect of certain elements of the additional consideration) and Oxford Outcomes (\$6.2 million). (See note 3 Business Combinations for further information relating to acquisitions and amounts potentially payable contingent upon the future results of acquired businesses).

Capital expenditure for the six months ended June 30, 2012 amounted to \$15.7 million, and comprised mainly of expenditure on global infrastructure and information technology systems to support the Company's growth. During the six months ended June 30, 2012 the Company invested a net \$17.8 million in short-term investments.

Net cash used by financing activities during the six months ended June 30, 2012 amounted to \$11.7 million compared with net cash provided by financing activities of \$2.6 million for the six months ended June 30, 2011. Net cash used by financing activities during the six months ended June 30, 2012 arose primarily from cash paid to repurchase ordinary shares under the Company's share repurchase program. During the six months ended June 30, 2012 the Company repurchased 738,341 ordinary shares for a total consideration of \$15.6 million.
