CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This annual report on Form 10-K and other publicly available documents, including the documents incorporated by reference herein, contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). These “forward-looking statements” reflect our current views with respect to, among other things, future events and our financial performance. The words “may,” “plan,” “contemplate,” “anticipate,” “believe,” “intend,” “continue,” “expect,” “project,” “predict,” “estimate,” “could,” “should,” “would,” “will,” and similar expressions are intended to identify such forward-looking statements, but other statements not based on historical information may also be considered forward-looking. All forward-looking statements are subject to risks, uncertainties and other factors that may cause our actual results, performance or achievements to differ materially from any results expressed or implied by such forward-looking statements. These statements should be considered subject to various risks and uncertainties, and are made based upon management’s belief as well as assumptions made by, and information currently available to, management pursuant to “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. Such risks include, without limitation:

- the effects of adverse changes in the economy or business conditions, either nationally or in our market areas;
- credit risks, including the deterioration of the credit quality of our loan portfolio, increased default rates and loan losses or adverse changes in our portfolio or in specific industry concentrations of our loan portfolio;
- the effects of governmental monetary and fiscal policies and legislative, regulatory and accounting changes applicable to banks and other financial service providers, including the impact on us and our customers of the Tax Cuts and Jobs Act;
- the effects of hazardous weather in our markets;
- the effects of competition from other financial institutions and financial service providers;
- our ability to keep pace with technology changes, including with respect to cyber-security and preventing breaches of our and third-party security systems involving our customers and other sensitive and confidential data;
- our ability to attract new or retain existing deposits, or to initiate new or retain current loans;
- the effect of any merger, acquisition or other transaction to which we or any of our subsidiaries may from time to time be a party, including our ability to successfully integrate any business that we acquire;
- the effect of changes in interest rates on the level and composition of deposits, loan demand and the values of loan collateral, securities and interest sensitive assets and liabilities;
- the effects of terrorism and efforts to combat it;
- an increase in the incidence or severity of fraud, illegal payments, security breaches or other illegal acts impacting our customers;
- the results of regulatory examinations;
- the effect of inaccuracies in our assumptions underlying the establishment of our loan loss reserves; and
 - other factors that are discussed in the section titled “Risk Factors” in Item 1A.

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this annual report on Form 10-K. If one or more events related to these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. Accordingly, you should not place undue reliance on any such forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made, and we do not undertake any obligation

to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. New factors emerge from time to time, and it is not possible for us to predict which will arise. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

PART I

Unless this Form 10-K indicates otherwise, the terms “we,” “our,” “us,” “the Company,” “ServisFirst Bancshares” and “ServisFirst” as used herein refer to ServisFirst Bancshares, Inc., and its subsidiaries, including ServisFirst Bank, which sometimes is referred to as “our bank subsidiary,” “our bank” or “the Bank,” and its other subsidiaries. References herein to the fiscal years 2014, 2015, 2016, 2017 and 2018 mean our fiscal years ended December 31, 2014, 2015, 2016, 2017 and 2018, respectively.

ITEM 1. BUSINESS

Overview

We are a bank holding company within the meaning of the Bank Holding Company Act of 1956 and are headquartered in Birmingham, Alabama. Through our wholly-owned subsidiary bank, we operate 20 full-service banking offices located in Jefferson, Shelby, Madison, Montgomery, Houston, Mobile and Baldwin Counties of Alabama, Escambia and Hillsborough Counties of Florida, Cobb and Douglas Counties of Georgia, Charleston County, South Carolina and Davidson County, Tennessee, which are located in the metropolitan statistical areas (“MSAs”) of Birmingham-Hoover, Huntsville, Montgomery, Dothan and Mobile, Alabama, Pensacola-Ferry Pass-Brent and Tampa-St. Petersburg-Clearwater, Florida, Atlanta-Sandy Springs-Roswell, Georgia, Charleston-North Charleston, South Carolina and Nashville-Davidson-Murfreesboro-Franklin, Tennessee. We also operate a loan production office in Fort Walton, Florida. Through our bank, we originate commercial, consumer and other loans and accept deposits, provide electronic banking services, such as online and mobile banking, including remote deposit capture, deliver treasury and cash management services and provide correspondent banking services to other financial institutions. As of December 31, 2018, we had total assets of approximately \$8.0 billion, total loans of approximately \$6.5 billion, total deposits of approximately \$6.9 billion and total stockholders’ equity of approximately \$715.2 million.

We operate our bank using a simple business model based on organic loan and deposit growth, generated through high quality customer service, delivered by a team of experienced bankers focused on developing and maintaining long-term banking relationships with our target customers. We utilize a uniform, centralized back office risk and credit platform to support a decentralized decision-making process executed locally by our regional chief executive officers. This decentralized decision-making process allows individual lending officers varying levels of lending authority, based on the experience of the individual officer. When the total amount of loans to a borrower exceeds an officer’s lending authority, further approval must be obtained by the applicable regional chief executive officer (G. Carlton Barker – Montgomery, Andrew N. Kattos – Huntsville, B. Harrison Morris, III – Dothan, Rex D. McKinney – Pensacola, W. Bibb Lamar, Jr. – Mobile, Thomas G. Trouche – Charleston, J. Harold Clemmer – Atlanta, Bradford A. Vieira – Nashville or Gregory W. Bryant – Tampa Bay) and/or our senior management team. Rather than relying on a

more traditional retail bank strategy of operating a broad base of multiple brick and mortar branch locations in each market, our strategy focuses on operating a limited and efficient branch network with sizable aggregate balances of total loans and deposits housed in each branch office. We believe that this approach more appropriately addresses our customers' banking needs and reflects a best-of-class delivery strategy for commercial banking services.

Our principal business is to accept deposits from the public and to make loans and other investments. Our principal sources of funds for loans and investments are demand, time, savings and other deposits and the amortization and prepayment of loans and borrowings. Our principal sources of income are interest and fees collected on loans, interest and dividends collected on other investments, and service charges. Our principal expenses are interest paid on savings and other deposits, interest paid on our other borrowings, employee compensation, office expenses and other overhead expenses.

Certain of our subsidiaries hold and manage participations in residential mortgages and commercial real estate loans originated by our bank in Alabama, Florida, Georgia and Tennessee, respectively, and have elected to be treated as real estate investment trusts, or REITs, for U.S. income tax purposes. Each of these entities is consolidated into the Company.

As a bank holding company, we are subject to regulation by the Federal Reserve. We are required to file reports with the Federal Reserve and are subject to regular examinations by that agency.

History

Our bank was founded by our President and Chief Executive Officer, Thomas A. Broughton, III, and commenced banking operations in May 2005 following an initial capital raise of \$35 million, the largest capital raise by a *de novo* bank in the history of Alabama. We were incorporated as a Delaware corporation in August 2007 for the purpose of acquiring all of the common stock of our bank and, in November 2007, our holding company became the sole shareholder of the bank by virtue of a plan of reorganization and agreement of merger. In May 2008, following our filing of a registration statement on Form 10 with the SEC, we became a reporting company within the meaning of the Exchange Act. On May 19, 2014, we completed our initial public offering of our common stock.

Business Strategy

We are a full service commercial bank focused on providing competitive products, state of the art technology and quality service. Our business philosophy is to operate as a metropolitan community bank emphasizing prompt, personalized customer service to the individuals and businesses located in our primary markets. We aggressively market to our target customers, which include privately held businesses generally with \$2 million to \$250 million in annual sales, professionals and affluent consumers whom we believe are underserved by the larger regional banks operating in our markets. We also seek to capitalize on the extensive relationships that our management, directors, advisory directors and stockholders have with the businesses and professionals in our markets.

Focus on Core Banking Business. We deliver a broad array of core banking products to our customers. While many large regional competitors and national banks have chosen to develop non-traditional business lines to supplement their net interest income, we believe our focus on traditional commercial banking products driven by a high margin delivery system is a superior method to deliver returns to our stockholders. We emphasize an internal culture of keeping our operating costs as low as practical, which we believe leads to greater operational efficiency. Additionally, our centralized technology and process infrastructure contribute to our low operating costs. We believe this combination of products, operating efficiency and technology make us attractive to customers in our markets. In addition, we provide correspondent banking services to more than 350 community banks located in 16 states throughout the southern United States. We provide a source of clearing and liquidity to our correspondent bank customers, as well as a wide array of account, credit, settlement and international services.

Commercial Bank Emphasis. We have historically focused on people as opposed to places. This strategy translates into a smaller number of brick and mortar branch locations relative to our size, but larger overall branch sizes in terms of total deposits. As a result, as of December 31, 2018, our branches averaged approximately \$345.8 million in total deposits. In the more typical retail banking model, branch banks continue to lose traffic to other banking channels which may prove to be an impediment to earnings growth for those banks that have invested in large branch networks. In addition, unlike many traditional community banks, we place a strong emphasis on originating commercial and industrial loans, which comprised approximately 38% of our total loan portfolio as of December 31, 2018.

Scalable, Decentralized Business Model. We emphasize local decision-making by experienced bankers supported by centralized risk and credit oversight. We believe that the delivery by our bankers of in-market customer decisions, coupled with risk and credit support from our corporate headquarters, allows us to serve our borrowers and depositors directly and in person, while managing risk centrally and on a uniform basis. We intend to continue our growth by repeating this scalable model in each market in which we are able to identify a strong banking team. Our goal in each market is to employ the highest quality bankers in that market. We then empower those bankers to implement our operating strategy, grow our customer base and provide the highest level of customer service possible. We focus on a geographic model of organizational structure as opposed to a line of business model employed by most regional banks. This structure assigns significant responsibility and accountability to our regional chief executive officers, who we believe will drive our growth and success. We have developed a business culture whereby our management team,

from the top down, is actively involved in sales, which we believe is a key differentiator from our competition.

Identify Opportunities in Vibrant Markets. Since opening our original banking facility in Birmingham in 2005, as of December 31, 2018, we had expanded into nine additional markets. Our focus has been to expand opportunistically when we identify a strong banking team in a market with attractive economic characteristics and market demographics where we believe we can achieve a minimum of \$300 million in deposits within five years of market entry. There are two primary factors we consider when determining whether to enter a new market:

- the availability of successful, experienced bankers with strong reputations in the market; and
- the economic attributes of the market necessary to drive quality lending opportunities coupled with deposit-related characteristics of the potential market.

Prior to entering a new market, historically we have identified and built a team of experienced, successful bankers with market-specific knowledge to lead the bank's operations in that market, including a regional chief executive officer. Generally, we or members of our senior management team are familiar with these individuals based on prior work experience and reputation, and strongly believe in the ability of such individuals to successfully execute our business model. We also often assemble a non-voting advisory board of directors in our markets, comprised of members representing a broad spectrum of business experience and community involvement in the market. We currently have advisory boards in each of the Huntsville, Montgomery, Dothan, Mobile, Pensacola, Atlanta and Charleston markets.

In addition to organic expansion, we may seek to expand through targeted acquisitions.

Markets and Competition

Our primary markets are broadly defined as the MSAs of Birmingham-Hoover, Huntsville, Montgomery, Dothan and Mobile, Alabama, Pensacola-Ferry Pass-Brent and Tampa-St. Petersburg-Clearwater, Florida, Atlanta-Sandy Springs-Roswell, Georgia, Charleston-North Charleston, South Carolina and Nashville-Davidson-Murfreesboro-Franklin, Tennessee. We draw most of our deposits from, and conduct most of our lending transactions in, these markets.

According to Federal Deposit Insurance Corporation (“FDIC”) reports, total deposits in each of our primary market areas have expanded from 2008 to 2018 (deposit data reflects totals as reported by financial institutions as of June 30th of each year) as follows:

	2018	2008	Compound Annual Growth Rate	
	(Dollars in Billions)			
Jefferson/Shelby County, Alabama	\$31.6	\$19.3	5.05	%
Madison County, Alabama	7.2	5.2	3.31	%
Montgomery County, Alabama	6.4	5.6	1.34	%
Houston County, Alabama	2.6	1.8	3.75	%
Mobile County, Alabama	7.1	5.4	2.77	%
Escambia County, Florida	5.7	3.8	4.17	%
Hillsborough County, Florida	31.7	20.2	4.61	%
Cobb County, Georgia	15.2	10.7	3.57	%
Douglas County, Georgia	1.6	1.4	1.34	%
Charleston County, South Carolina	11.1	7.3	4.23	%
Davidson County, Tennessee	35.6	16.8	7.80	%

Our bank is subject to intense competition from various financial institutions and other financial service providers. Our bank competes for deposits with other commercial banks, savings and loan associations, credit unions and issuers of commercial paper and other securities, such as money-market and mutual funds. In making loans, our bank competes with other commercial banks, savings and loan associations, consumer finance companies, credit unions, leasing companies, interest-based lenders and other lenders.

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

The following table illustrates our market share, by insured deposits, in our primary service areas at June 30, 2018 (the most recent date such numbers were reported by the FDIC), as reported by the FDIC:

Market	Number of Market Branches	Our Deposits (Dollars in Millions)	Total Market Deposits	Ranking	Market Share Percentage
Alabama:					
Birmingham-Hoover MSA	3	\$2,674.3	\$37,728.1	4	7.09 %
Huntsville MSA	2	762.8	7,961.1	3	9.58 %
Montgomery MSA	2	563.1	7,938.6	6	7.09 %
Dothan MSA	2	511.1	3,280.6	1	15.58 %
Mobile MSA	2	272.6	7,112.7	8	3.83 %
Florida:					
Pensacola-Ferry Pass-Brent MSA	2	366.4	7,191.2	7	5.10 %
Tampa-St. Petersburg-Clearwater MSA	1	128.9	85,159.1	38	0.15 %
Georgia:					
Atlanta-Sandy Springs-Roswell MSA	3	345.1	173,054.6	31	0.20 %
South Carolina:					
Charleston-North Charleston MSA	1	141.2	13,918.5	16	1.01 %
Tennessee:					
Nashville-Davidson-Murfreesboro MSA	1	318.0	61,450.6	25	0.52 %

The following table illustrates the combined total deposits for all financial institutions in the counties in which we operate as a percent of the total of all deposits in each state at June 30, 2018, as reported by the FDIC:

Alabama	54.4%
Florida	6.4 %
Georgia	6.7 %
South Carolina	12.9%
Tennessee	23.0%

Our retail and commercial divisions operate in highly competitive markets. We compete directly in retail and commercial banking markets with other commercial banks, savings and loan associations, credit unions, mortgage brokers and mortgage companies, mutual funds, securities brokers, consumer finance companies, other lenders and insurance companies, locally, regionally and nationally. Many of our competitors compete by using offerings by mail, telephone, computer and/or the Internet. Interest rates, both on loans and deposits, and prices of services are significant competitive factors among financial institutions generally. Providing convenient locations, desired financial products and services, convenient office hours, quality customer service, quick local decision making, a strong community reputation and long-term personal relationships are all important competitive factors that we emphasize.

In our markets, our five largest competitors are Regions Bank, Wells Fargo Bank, BBVA Compass, BB&T and Synovus Bank. These institutions, as well as other competitors of ours, have greater resources, serve broader geographic markets, have higher lending limits, offer various services that we do not offer and can better afford, and make broader use of, media advertising, support services, and electronic technology than we can. To offset these competitive disadvantages, we depend on our reputation for greater personal service, consistency, flexibility and the ability to make credit and other business decisions quickly.

Lending Services

Lending Policy

Our lending policies are established to support the credit needs of our primary market areas. Consequently, we aggressively seek high-quality borrowers within a limited geographic area and in competition with other well-established financial institutions in our primary service areas that have greater resources and lending limits than we have.

Loan Approval and Review

Our loan approval policies set various levels of officer lending authority. When the total amount of loans to a single borrower exceeds an individual officer's lending authority, further approval, up to \$5.0 million secured, must be obtained from the Regional CEO and/or our senior management team, based on our loan policies.

Commercial Loans

Our commercial lending activity is directed principally toward businesses and professional service firms whose demand for funds falls within our legal lending limits. We make loans to small- and medium-sized businesses in our markets for the purpose of upgrading plant and equipment, buying inventory and for general working capital. Typically, targeted business borrowers have annual sales generally between \$2 million and \$250 million. This category of loans includes loans made to individual, partnership and corporate borrowers, and such loans are obtained for a variety of business purposes. We offer a variety of commercial lending products to meet the needs of business and professional service firms in our service areas. These commercial lending products include seasonal loans, bridge loans and term loans for working capital, expansion of the business, or acquisition of property, plant and equipment. We also offer commercial lines of credit. The repayment terms of our commercial loans will vary according to the needs of each customer.

Our commercial loans usually are collateralized. Generally, collateral consists of business assets, including accounts receivable, inventory, equipment, or real estate. Collateral is subject to the risk that we may have difficulty converting it to a liquid asset if necessary, as well as risks associated with degree of specialization, mobility and general collectability in a default situation. To mitigate this risk, we underwrite collateral to strict standards, including valuations and general acceptability based on our ability to monitor its ongoing condition and value.

We underwrite our commercial loans primarily on the basis of the borrower's cash flow, ability to service debt, and degree of management expertise. As a general practice, we take as collateral a security interest in any available real estate, equipment or personal property. Under limited circumstances, we may make commercial loans on an unsecured basis. Commercial loans may be subject to many different types of risks, including fraud, bankruptcy, economic downturn, deteriorated or non-existent collateral, and changes in interest rates. Perceived and actual risks may differ depending on the particular industry in which a borrower operates. General risks to an industry, such as an economic downturn or instability in the capital markets, or to a particular segment of an industry are monitored by senior management on an ongoing basis. When warranted, loans to individual borrowers who may be at risk due to an industry condition may be more closely analyzed and reviewed by the credit review committee or board of directors. Commercial and industrial borrowers are required to submit financial statements to us on a regular basis. We analyze these statements, looking for weaknesses and trends, and will assign the loan a risk grade accordingly. Based on this risk grade, the loan may receive an increased degree of scrutiny by management, up to and including additional loss reserves being required.

Real Estate Loans

We make commercial real estate loans, construction and development loans and residential real estate loans.

Commercial Real Estate. Commercial real estate loans are generally limited to terms of five years or less, although payments are usually structured on the basis of a longer amortization. Interest rates may be fixed or adjustable, although rates generally will not be fixed for a period exceeding five years. In addition, we generally will require personal guarantees from the principal owners of the property supported by a review by our management of the principal owners' personal financial statements.

Commercial real estate lending presents risks not found in traditional residential real estate lending. Repayment is dependent upon successful management and marketing of properties and on the level of expense necessary to maintain the property. Repayment of these loans may be adversely affected by conditions in the real estate market or the general economy. Also, commercial real estate loans typically involve relatively large loan balances to a single borrower. To mitigate these risks, we closely monitor our borrower concentration. These loans generally have shorter maturities than other loans, giving us an opportunity to reprice, restructure or decline renewal. As with other loans, all commercial real estate loans are graded depending upon strength of credit and performance. A higher risk grade will bring increased scrutiny by our management, the credit review committee and the board of directors.

Construction and Development Loans. We make construction and development loans both on a pre-sold and speculative basis. If the borrower has entered into an agreement to sell the property prior to beginning construction, then the loan is considered to be on a pre-sold basis. If the borrower has not entered into an agreement to sell the property prior to beginning construction, then the loan is considered to be on a speculative basis. Construction and development loans are generally made with a term of 12 to 24 months, with interest payable monthly. The ratio of the loan principal to the value of the collateral as established by independent appraisal typically will not exceed 80% of residential construction loans. Speculative construction loans will be based on the borrower's financial strength and cash flow position. Development loans are generally limited to 75% of appraised value. Loan proceeds will be disbursed based on the percentage of completion and only after the project has been inspected by an experienced construction lender or third-party inspector. During times of economic stress, construction and development loans typically have a greater degree of risk than other loan types.

To mitigate the risk of construction loan defaults in our portfolio, the board of directors and management tracks and monitors these loans closely. Total construction loans decreased \$47.7 million to \$533.2 million at December 31, 2018. Our allocation of loan loss reserve for these loans decreased \$1.5 million to \$3.5 million at December 31, 2018 compared to \$5.0 million at the end 2017. There were no charge-offs on construction loans during 2018 compared to \$0.1 million for 2017, and the overall quality of the construction loan portfolio has improved with \$1.4 million rated as substandard at December 31, 2018 compared to \$1.5 million at December 31, 2017.

Residential Real Estate Loans. Our residential real estate loans consist primarily of residential second mortgage loans, residential construction loans and traditional mortgage lending for one-to-four family residences. We will originate fixed-rate mortgages with long-term maturities. The majority of our fixed-rate loans are sold in the secondary mortgage market. All loans are made in accordance with our appraisal policy, with the ratio of the loan principal to the value of collateral as established by independent appraisal generally not exceeding 85%. Risks associated with these loans are generally less significant than those of other loans and involve bankruptcies, economic downturn, customer financial problems and fluctuations in the value of real estate, and homes in our primary service areas may experience significant price declines in the future. We have not made and do not expect to make any “Alt-A” or subprime loans.

Consumer Loans

We offer a variety of loans to retail customers in the communities we serve. Consumer loans in general carry a moderate degree of risk compared to other loans. They are generally more risky than traditional residential real estate loans but less risky than commercial loans. Risk of default is usually determined by the well-being of the local economies. During times of economic stress, there is usually some level of job loss both nationally and locally, which directly affects the ability of the consumer to repay debt. Risk on consumer-type loans is generally managed through policy limitations on debt levels consumer borrowers may carry and limitations on loan terms and amounts depending upon collateral type.

Our consumer loans include home equity loans (open- and closed-end), vehicle financing, loans secured by deposits, and secured and unsecured personal loans. These various types of consumer loans all carry varying degrees of risk.

Commitments and Contingencies

As of December 31, 2018, we had commitments to extend credit beyond current fundings of approximately \$2.0 billion, had issued standby letters of credit in the amount of approximately \$40.6 million, and had commitments for credit card arrangements of approximately \$173.6 million.

Policy for Determining the Loan Loss Allowance

The allowance for loan losses represents our management's assessment of the risk associated with extending credit and its evaluation of the quality of the loan portfolio. In calculating the adequacy of the loan loss allowance, our management evaluates the following factors:

- the asset quality of individual loans;
- changes in the national and local economy and business conditions/development, including underwriting standards, collections, and charge-off and recovery practices;
- changes in the nature and volume of the loan portfolio;
- changes in the experience, ability and depth of our lending staff and management;
- changes in the trend of the volume and severity of past-due loans and classified loans, and trends in the volume of non-accrual loans, troubled debt restructurings and other modifications, as has occurred in the residential mortgage markets and particularly for residential construction and development loans;
- possible deterioration in collateral segments or other portfolio concentrations;
- historical loss experience (when available) used for pools of loans (i.e., collateral types, borrowers, purposes, etc.);
- changes in the quality of our loan review system and the degree of oversight by our board of directors; and
- the effect of external factors such as competition and the legal and regulatory requirement on the level of estimated credit losses in our current loan portfolio.

These factors are evaluated quarterly, and changes in the asset quality of individual loans are evaluated as needed.

We assign all of our loans individual risk grades when they are underwritten. We have established minimum general reserves based on the risk grade of the loan. We also apply general reserve factors based on historical losses, management's experience and common industry and regulatory guidelines.

After a loan is underwritten and booked, it is monitored by the account officer, management, internal loan review, and representatives of our independent external loan review firm over the life of the loan. Payment performance is monitored monthly for the entire loan portfolio; account officers contact customers during the regular course of business and may be able to ascertain whether weaknesses are developing with the borrower; independent loan consultants perform a review annually; and federal and state banking regulators perform annual reviews of the loan portfolio. If we detect weaknesses that have developed in an individual loan relationship, we downgrade the loan and assign higher reserves based upon management's assessment of the weaknesses in the loan that may affect full collection of the debt. We have established a policy to discontinue accrual of interest (non-accrual status) after any loan has become 90 days delinquent as to payment of principal or interest unless the loan is considered to be well collateralized and is actively in process of collection. In addition, a loan will be placed on non-accrual status before it becomes 90 days delinquent if management believes that the borrower's financial condition is such that the collection of interest or principal is doubtful. Interest previously accrued but uncollected on such loans is reversed and charged against current income when the receivable is determined to be uncollectible. Interest income on non-accrual loans is recognized only as received. If a loan will not be collected in full, we increase the allowance for loan losses to reflect our management's estimate of any potential exposure or loss.

Our net loan losses to average total loans decreased to 0.20% for the year ended December 31, 2018 from 0.29% for the year ended December 31, 2017, which was up from 0.11% for the year ended December 31, 2016. Historical performance, however, is not an indicator of future performance, and our future results could differ materially. As of December 31, 2018, we had \$21.9 million of non-accrual loans. We have allocated approximately \$3.5 million of our allowance for loan losses to real estate construction, acquisition and development, and lot loans, \$39.0 million to commercial and industrial loans, \$25.5 million to real estate mortgage loans and \$0.6 million to consumer loans and have a total loan loss reserve as of December 31, 2018 of \$68.6 million. The loan loss reserve methodology incorporates qualitative factors which are based on management's judgment regarding various external and internal factors including macroeconomic trends, management's assessment of the Company's loan growth prospects and evaluations of internal risk controls. Our management believes, based upon historical performance, known factors, overall judgment, and regulatory methodologies, that the current methodology used to determine the adequacy of the allowance for loan losses is reasonable.

Our allowance for loan losses is also subject to regulatory examinations and determinations as to adequacy, which may take into account such factors as the methodology used to calculate the allowance for loan losses and the size of the allowance for loan losses in comparison to a group of peer banks identified by the regulators. During their routine examinations of banks, regulatory agencies may require a bank to make additional provisions to its allowance for loan losses when, in the opinion of the regulators, credit evaluations and allowance for loan loss methodology differ materially from those of management.

While it is our policy to charge off in the current period loans for which a loss is considered probable, there are additional risks of future losses that cannot be quantified precisely or attributed to particular loans or classes of loans. Because these risks include the state of the economy, our management's judgment as to the adequacy of the allowance is necessarily approximate and imprecise.

Investments

In addition to loans, we purchase investments in securities, primarily in mortgage-backed securities and state and municipal securities. No investment in any of those instruments will exceed any applicable limitation imposed by law or regulation. Our board of directors reviews the investment portfolio on an ongoing basis in order to ensure that the investments conform to the policy as set by the board of directors. Our investment policy provides that no more than 60% of our total investment portfolio may be composed of municipal securities. All securities held are traded in liquid markets, and we have no auction-rate securities. We had no investments in any one security, restricted or liquid, in excess of 10% of our stockholders' equity at December 31, 2018.

Deposit Services

We seek to establish solid core deposits, including checking accounts, money market accounts, savings accounts and a variety of certificates of deposit and IRA accounts. To attract deposits, we employ an aggressive marketing plan throughout our service areas that features a broad product line and competitive services. The primary sources of core deposits are residents of, and businesses and their employees located in, our market areas. We have obtained deposits primarily through personal solicitation by our officers and directors, through reinvestment in the community, and through our stockholders, who have been a substantial source of deposits and referrals. We make deposit services accessible to customers by offering direct deposit, wire transfer, night depository, banking-by-mail and remote capture for non-cash items. Our bank is a member of the FDIC, and thus our deposits (subject to applicable FDIC limits) are FDIC-insured.

Other Banking Services

Given client demand for increased convenience and account access, we offer a range of products and services, including 24-hour telephone banking, direct deposit, Internet banking, mobile banking, traveler's checks, safe deposit boxes, attorney trust accounts and automatic account transfers. We also participate in a shared network of automated teller machines and a debit card system that our customers are able to use, and, in certain accounts subject to certain conditions, we rebate to the customer the ATM fees automatically after each business day. Additionally, we offer Visa® credit cards.

Asset, Liability and Risk Management

We manage our assets and liabilities with the aim of providing an optimum and stable net interest margin, a profitable after-tax return on assets and return on equity, and adequate liquidity. These management functions are conducted within the framework of written loan and investment policies. To monitor and manage the interest rate margin and related interest rate risk, we have established policies and procedures to monitor and report on interest rate risk, devise strategies to manage interest rate risk, monitor loan originations and deposit activity and approve all pricing strategies. We attempt to maintain a balanced position between rate-sensitive assets and rate-sensitive liabilities. Specifically, we chart assets and liabilities on a matrix by maturity, effective duration, and interest adjustment period, and endeavor to manage any gaps in maturity ranges.

Seasonality and Cycles

We do not consider our commercial banking business to be seasonal.

Employees

We had 473 employees as of December 31, 2018. We consider our employee relations to be good, and we have no collective bargaining agreements with any employees.

Supervision and Regulation

Both we and our bank are subject to extensive state and federal banking laws and regulations that impose restrictions on, and provide for general regulatory oversight of, our operations. These laws and regulations restrict our permissible activities and investments, impose conditions and requirements on the products and services we offer and the manner in which they are offered and sold, and require compliance with protections for loan, deposit, brokerage, fiduciary, and other customers, among other things. They also restrict our ability to repurchase stock or pay dividends, or to receive dividends from our bank subsidiary, and impose capital adequacy and liquidity requirements. These laws and regulations generally are intended to protect customers (including depositors), the FDIC's Deposit Insurance Fund and the banking system as a whole, and generally is not intended for the protection of stockholders or other investors. The consequences of noncompliance with these, or other applicable laws or regulations, can include substantial monetary and nonmonetary sanctions.

In addition, we are subject to comprehensive supervision and periodic examination by, amount other regulatory bodies, the Federal Reserve, the FDIC and the Alabama State Banking Department (the "Alabama Banking Department"). These examinations consider not only compliance with applicable laws, regulations and supervisory policies of the agency, but also capital levels, asset quality, risk management effectiveness, the ability and performance of management and the board of directors, the effectiveness of internal controls, earnings, liquidity and various other factors.

The results of examination activity by any of our federal bank regulators potentially can result in the imposition of significant limitations on our activities and growth. These regulatory agencies generally have broad discretion to impose restrictions and limitations on the operations of a regulated entity and take enforcement action, including the imposition of substantial monetary penalties and nonmonetary requirements, against a regulated entity where the relevant agency determines, amount other things, that such operations fail to comply with applicable law or regulations or are conducted in an unsafe or unsound manner. This supervisory framework, including the examination reports and supervisory ratings (which are not publicly available) of the agencies, could materially impact the conduct, growth and profitability of our operations.

The following discussion describes select material elements of the regulatory framework that applies to us. The description is not intended to summarize all laws, regulations and supervisory policies applicable to us and is qualified in its entirety by reference to the full text of the statutes, regulations and supervisory policies described.

Bank Holding Company Supervision and Regulation

Since we own all of the capital stock of the bank, we are a bank holding company under the federal Bank Holding Company Act of 1956, as amended (the “BHC Act”). As a result, we are primarily subject to the supervision, examination and reporting requirements of the BHC Act and the regulations of the Board of Governors of the Federal Reserve System (the “Federal Reserve”).

Acquisition of Banks

The BHC Act requires every bank holding company to obtain the Federal Reserve’s prior approval before:

- acquiring direct or indirect ownership or control of any voting shares of any bank if, after the acquisition, the bank holding company will, directly or indirectly, own or control more than 5% of the bank’s voting shares;
- acquiring all or substantially all of the assets of any bank; or
- merging or consolidating with any other bank holding company.

Additionally, the BHC Act provides that the Federal Reserve may not approve any of these transactions if such transaction would result in or tend to create a monopoly or substantially lessen competition or otherwise function as a restraint of trade, unless the anti-competitive effects of the proposed transaction are clearly outweighed by the public interest in meeting the convenience and needs of the community to be served. The Federal Reserve also is required to consider the financial and managerial resources and future prospects of the bank holding companies and banks concerned and the convenience and needs of the community to be served. The Federal Reserve’s consideration of financial resources generally focuses on capital adequacy, which is discussed in the section below titled “*Supervision and Regulation—Bank Supervision and Regulation – Capital Adequacy*” and the consideration of convenience and needs of the community to be served includes the institution’s performance under the Community Reinvestment Act.

Under the interstate banking and branching sections of the BHC Act, if adequately capitalized and adequately managed, we or any other bank holding company located in Alabama may purchase a bank located outside of Alabama. Conversely, an adequately capitalized and adequately managed bank holding company located outside of Alabama may purchase a bank located inside Alabama. In each case, however, restrictions may be placed on the acquisition of a bank that has only been in existence for a limited amount of time or will result in specified concentrations of deposits.

Change in Bank Control

Subject to various exceptions, the BHC Act and the Change in Bank Control Act, together with related regulations, require Federal Reserve approval prior to any person's or company's acquiring "control" of a bank holding company. Under a rebuttable presumption established by the Federal Reserve, the acquisition of 10% or more of a class of voting stock of a bank holding company would, under the circumstances set forth in the presumption, constitute acquisition of control of the bank holding company. In addition, any person or group of persons must obtain the approval of the Federal Reserve before acquiring 25% (5% in the case of an acquirer that is already a bank holding company) or more of the outstanding common stock of a bank holding company, or otherwise obtaining control or a "controlling influence" over the bank holding company.

Permissible Activities Under the BHC Act

Under the BHC Act, a bank holding company is generally permitted to engage in or acquire direct or indirect control of more than 5% of the voting shares of any company engaged in the following activities:

- banking or managing or controlling banks; and
- any activity that the Federal Reserve determines to be so closely related to banking as to be a proper incident to the business of banking.

Activities that the Federal Reserve has found to be so closely related to banking as to be a proper incident to the business of banking include: factoring accounts receivable; making, acquiring, brokering or servicing loans and usual related activities; leasing personal property; operating a non-bank depository institution, such as a savings association; trust company functions; financial and investment advisory activities; certain agency securities brokerage activities; underwriting and dealing in government obligations and money market instruments; providing specified management consulting and counseling activities; performing selected data processing services and support services; acting as an agent or broker in selling credit life insurance and other types of insurance in connection with credit transactions; and performing selected insurance underwriting activities. Despite prior approval, the Federal Reserve may order a bank holding company or its subsidiaries to terminate any of these activities or to terminate its ownership or control of any

subsidiary when it has reasonable cause to believe that the bank holding company's continued ownership, activity or control constitutes a serious risk to the financial safety, soundness, or stability of it or any of its bank subsidiaries.

In addition to the permissible bank holding company activities listed above, a bank holding company may qualify and elect to become a financial holding company, permitting the bank holding company to engage in activities that are financial in nature or incidental or complementary to financial activity without posing a substantial risk to the safety and soundness of a depository institution or to the financial system generally. The BHC Act expressly lists the following activities as financial in nature: lending, trust and other banking activities; insuring, guaranteeing, or indemnifying against loss or harm, or providing and issuing annuities, and acting as principal, agent, or broker for these purposes, in any state; providing financial, investment, or advisory services; issuing or selling instruments representing interests in pools of assets permissible for a bank to hold directly; underwriting, dealing in or making a market in securities; other activities that the Federal Reserve may determine to be so closely related to banking or managing or controlling banks as to be a proper incident to managing or controlling banks; activities permitted outside of the United States if the Federal Reserve has determined them to be usual in connection with banking operations abroad; merchant banking through securities or insurance affiliates; and insurance company portfolio investments. For us to qualify to become a financial holding company, the bank and any other depository institution subsidiary of ours must be well-capitalized and well-managed and must have a Community Reinvestment Act ("CRA") rating of at least "satisfactory". Additionally, we must file an election with the Federal Reserve to become a financial holding company and must provide the Federal Reserve with 30 days written notice prior to engaging in a permitted financial activity. We have not elected to become a financial holding company at this time.

Support of Subsidiary Institutions

The Federal Deposit Insurance Act and Federal Reserve policy require a bank holding company to act as a source of financial strength to its bank subsidiaries and to take measures to preserve and protect its bank subsidiaries in situations where additional investments in a troubled bank may not otherwise be warranted. In addition, where a bank holding company has more than one bank or thrift subsidiary, each of the bank holding company's subsidiary depository institutions is responsible for any losses to the FDIC as a result of an affiliated depository institution's failure. As a result, a bank holding company may be required to loan money to a bank subsidiary in the form of subordinate capital notes or other instruments which qualify as capital under bank regulatory rules. However, any loans from the holding company to such subsidiary banks likely will be unsecured and subordinated to such bank's depositors and perhaps to other creditors of the bank.

Repurchase or Redemption of Securities

A bank holding company is generally required to give the Federal Reserve prior written notice of any purchase or redemption of its own then-outstanding equity securities if the gross consideration for the purchase or redemption, when combined with the net consideration paid for all such purchases or redemptions during the preceding 12 months, is equal to 10% or more of the company's consolidated net worth. The Federal Reserve may disapprove such a purchase or redemption if it determines that the proposal would constitute an unsafe and unsound practice, or would violate any law, regulation, Federal Reserve order or directive, or any condition imposed by, or written agreement with, the Federal Reserve. The Federal Reserve has adopted an exception to this approval requirement for well-capitalized bank holding companies that meet certain conditions.

Bank Supervision and Regulation

Generally

The bank is an Alabama state-chartered bank and, as such, is subject to examination and regulation by the Alabama Banking Department. The bank is not a member of the Federal Reserve System but is subject to various regulations and requirements promulgated by the Federal Reserve, the Consumer Financial Protection Bureau (the "CFPB"), the Federal Trade Commission, the Financial Crimes Enforcement Network, the Office of Foreign Assets Control ("OFAC"), and other federal regulatory agencies. State non-member banks are, in addition to regulation by the applicable state regulatory authority, subject to supervision and regular examination by the FDIC. The FDIC and the Alabama Banking Department regularly examine the bank's operations and have the authority to approve or disapprove mergers, the establishment of branches and similar corporate actions. Both regulatory agencies have the

power to prevent the development or continuance of unsafe or unsound banking practices or other violations of law. Additionally, the bank's deposits are insured by the FDIC to the maximum extent provided by law. The extensive state and federal banking laws and regulations to which the bank is subject are generally intended to protect the bank's customers (including depositors), the FDIC's Deposit Insurance Fund and the banking system as a whole, and generally is not intended for the protection of stockholders or other investors. The following discussion describes the material elements of the regulatory framework that applies to the bank.

Branching

Under current Alabama law, and subject to applicable FDIC rules and regulations, the bank may open branch offices throughout Alabama with the prior approval of the Alabama Banking Department. In addition, with prior regulatory approval, the bank may acquire branches of existing banks located in Alabama. While prior law imposed various limits on the ability of banks to establish new branches in states other than their home state, the Dodd-Frank Act allows a bank to branch into a new state by acquiring a branch of an existing institution or by setting up a new branch, without merging with an existing institution in the target state, if, under the laws of the state in which the branch is to be located, a bank chartered by that state would be permitted to establish the branch. This makes it much simpler for banks to open *de novo* branches in other states. We opened our initial offices in Pensacola, Florida, Nashville, Tennessee, Charleston, South Carolina, and Tampa Bay, Florida, using this mechanism.

FDIC Insurance Assessments

The bank's deposits are insured by the FDIC to the full extent provided in the Federal Deposit Insurance Act, and the bank pays assessments to the FDIC for that coverage. Under the FDIC's risk-based deposit insurance assessment system, an insured institution's deposit insurance premium is computed by multiplying the institution's assessment base by the institution's assessment rate. An institution's assessment base equals the institution's average consolidated total assets during a particular assessment period, minus the institution's average tangible equity capital (that is, Tier 1 capital) during such period. An institution's assessment rate is assigned by the FDIC on a quarterly basis and is based on a number of factors related to the risk the institution poses to the Deposit Insurance Fund. Those factors include, among other things, the institution's capital adequacy, liquidity, loan and deposit portfolio characteristics, asset quality, earnings, and rate of growth. For the fourth quarter of 2018, the bank's assessment rate was set at \$0.0117, or \$0.0468 annually, per \$100 of assessment base.

In addition to its risk-based insurance assessments, the FDIC also imposes Financing Corporation (“FICO”) assessments to help pay the \$780 million in annual interest payments on the \$8 billion of bonds issued in the late 1980s as part of the government rescue of the savings and loan industry. For the fourth quarter of 2018, the bank’s FICO assessment was equal to \$0.0004, or \$0.0016 annually, per \$100 of assessment base. The last of the remaining FICO bonds are set to mature in September 2019. Current projections indicate that the last FICO assessment will be collected on the March 29, 2019 FDIC invoice. However, it is possible, although unlikely, that FICO may need to conduct another assessment in June 2019, which would only occur if the March collection does not yield sufficient monies to make the remaining interest payment on the FICO bonds.

The FDIC is responsible for maintaining the adequacy of the Deposit Insurance Fund, and the amount the bank pays for deposit insurance is affected not only by the risk the bank poses to the Deposit Insurance Fund, but also by the adequacy of the fund to cover the risk posed by all insured institutions. From 2008 to 2013, the United States experienced an unusually high number of bank failures, resulting in significant losses to the Deposit Insurance Fund. Moreover, the Dodd-Frank Act permanently increased the standard maximum deposit insurance amount from \$100,000 to \$250,000, and raised the minimum required Deposit Insurance Fund reserve ratio (i.e., the ratio of the amount on reserve in the Deposit Insurance Fund to the total estimated insured deposits) from 1.15% to 1.35%. To support the Deposit Insurance Fund in response to those circumstances, the FDIC took several extraordinary actions, including imposing a one-time special assessment on insured institutions and requiring institutions to prepay quarterly assessments attributable to a three-year period. We cannot predict whether, as a result of an adverse change in economic conditions or other reasons, the FDIC will take similar extraordinary actions or otherwise increase deposit insurance assessment levels in the future. Any such future increases could have a negative impact on our bank’s earnings.

On September 30, 2018, the Deposit Insurance Fund reserve ratio reached 1.36 percent. Banks with less than \$10 billion in total assets, such as ServisFirst Bank, will receive assessment credits for the portion of their assessments that grew the reserve ratio from 1.15 percent to 1.35 percent. The credit will be applied when the reserve ratio is at least 1.38 percent.

Termination of Deposit Insurance

The FDIC may terminate its insurance of deposits of a bank if it finds that the bank has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

Liability of Commonly Controlled Depository Institutions

Under the Federal Deposit Insurance Act, an FDIC-insured depository institution can be held liable for any loss incurred by, or reasonably expected to be incurred by, the FDIC in connection with (i) the default of a commonly controlled FDIC-insured depository institution or (ii) any assistance provided by the FDIC to any commonly controlled FDIC-insured depository institution in danger of default. “Default” is defined generally as the appointment of a conservator or receiver, and “in danger of default” is defined generally as the existence of certain conditions indicating that a default is likely to occur in the absence of regulatory assistance. The FDIC’s claim for damage is superior to claims of stockholders of the insured depository institution but is subordinate to claims of depositors, secured creditors, other general and senior creditors, and holders of subordinated debt (other than affiliates) of the institution.

Community Reinvestment Act

The CRA requires that, in connection with examinations of financial institutions within their respective jurisdictions, the Federal Reserve or the FDIC will evaluate the record of each financial institution in meeting the needs of its local community, including low and moderate-income neighborhoods. These factors are also considered in evaluating mergers, acquisitions, and applications to open an office or facility. Failure to adequately meet these criteria could impose additional requirements and limitations on the bank. Additionally, we must publicly disclose the terms of various CRA-related agreements.

Interest Rate Limitations

Interest and other charges collected or contracted for by the bank are subject to state usury laws and federal laws concerning interest rates.

Federal Laws Applicable to Consumer Credit and Deposit Transactions

The bank’s loan and deposit operations are subject to a number of federal consumer protection laws and regulations, including, among others:

• the Truth-In-Lending Act, as implemented by Regulation Z issued by the CFPB, governing, among other things, the disclosure of credit terms to consumers;

- the Real Estate Settlement Procedures Act, as implemented by Regulation X issued by the CFPB, prescribing, among other things, requirements in connection with residential mortgage loan applications, settlements, and servicing;

- the Home Mortgage Disclosure Act, as implemented by Regulation C issued by the CFPB, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

- the Equal Credit Opportunity Act, as implemented by Regulation B issued by the CFPB, prohibiting discrimination on the basis of race, color, religion, national origin, sex, marital status, age, or certain other prohibited factors in all aspects of credit transactions, imposing certain requirements regarding credit applications, and prescribing certain disclosure obligations;

- the Fair Credit Reporting Act, as implemented in part by Regulation V issued by the CFPB, governing the use and provision of information to credit reporting agencies by imposing, among other things, requirements for financial institutions to develop policies and procedures to identify potential identity theft, requirements for entities that furnish information to consumer reporting agencies (which would include the bank) to implement procedures and policies regarding the accuracy and integrity of the furnished information and respond to disputes from consumers regarding credit reporting issues, requirements for mortgage lenders to disclose credit scores to consumers, and limitations on the ability of a business that receives consumer information from an affiliate to use that information for marketing purposes;

- the Fair Debt Collection Practices Act, as implemented in part by Regulation F issued by the CFPB, governing the manner in which consumer debts may be collected by debt collectors;

- the Servicemembers' Civil Relief Act, governing the repayment terms of, and property rights underlying, secured obligations of persons in military service;

- the Right to Financial Privacy Act, which imposes a duty to maintain the confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records;

- the Electronic Funds Transfer Act, as implemented by Regulation E issued by the CFPB, governing automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services; and

- the Truth in Savings Act, as implemented by Regulation DD issued by the CFPB, governing, among other things, the disclosure of deposit terms to consumers.

Additionally, the Dodd-Frank Act permits states to adopt consumer protection laws and standards that are more stringent than those adopted at the federal level and, in certain circumstances, permits state attorneys general to enforce compliance with both the state and federal laws and regulations.

Capital Adequacy

General Information. The federal banking regulators view capital levels as important indicators of an institution's financial soundness. In this regard, we and the bank are required to comply with the capital adequacy standards established by the Federal Reserve (in our case) and the FDIC and the Alabama Banking Department (in the case of the bank). Such standards are based on the December 2010 final capital framework for strengthening international capital standards, known as Basel III, of the Basel Committee on Banking Supervision (the "Basel Committee"). The implementation of Basel III for United States institutions began on January 1, 2015. Prior to that date, the risk-based capital rules applicable to us and the bank were based on the 1988 Capital Accord, known as Basel I, of the Basel Committee

Current capital standards are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies, to account for off-balance-sheet exposure, and to minimize disincentives for holding liquid assets. Assets and off-balance-sheet items, such as letters of credit and unfunded loan commitments, are assigned to broad risk categories, each with appropriate risk weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance-sheet items.

Failure to meet capital guidelines could subject a bank or bank holding company to a variety of enforcement remedies, including issuance of a capital directive, the termination of deposit insurance by the FDIC, a prohibition on accepting brokered deposits, and certain other restrictions on its business. Significant additional restrictions can be imposed on FDIC-insured depository institutions that fail to meet applicable capital requirements.

United States Implementation of Basel III. In July 2013, the federal banking agencies published final rules (the “Basel III Capital Rules”) to implement, in part, the Basel III framework issued by the Basel Committee and certain provisions of the Dodd-Frank Act. The Basel III Capital Rules apply to banking organizations, including us and the bank.

Among other things, the Basel III Capital Rules: (i) emphasize common equity tier 1 capital, or “CET1,” which is predominately made up of retained earnings and common stock instruments; (ii) specify that an institution’s tier 1 capital consists of CET1 and additional financial instruments satisfying specified requirements that permit inclusion in tier 1 capital; (iii) define CET1 narrowly by requiring that most deductions or adjustments to regulatory capital measures be made to CET1 and not to the other components of capital; and (iv) expand the scope of the deductions or adjustments from capital as compared to the previous regulations. The Basel III Capital Rules also provide a permanent exemption from a proposed phase out of existing trust preferred securities and cumulative perpetual preferred stock from regulatory capital for banking organizations with less than \$15 billion in total consolidated assets as of December 31, 2009.

The Basel III Capital Rules provide for the following minimum capital to risk-weighted assets ratios:

- 4.5% based upon CET1;
- 6.0% based upon tier 1 capital; and
- 8.0% based upon total regulatory capital.

A minimum leverage ratio (tier 1 capital as a percentage of total assets) of 4.0% is also required under the Basel III Capital Rules. The Basel III Capital Rules additionally require institutions to retain a capital conservation buffer of 2.5% above these required minimum capital ratio levels. The capital conservation buffer, which must consist of CET1, is designed to absorb losses during periods of economic stress. Banking organizations that fail to maintain the minimum 2.5% capital conservation buffer could face restrictions on capital distributions or discretionary bonus payments to executive officers.

The Basel III Capital Rules became effective as applied to us and the bank on January 1, 2015, with a phase in period that generally extended from January 1, 2015 through January 1, 2019. We and the bank are currently in compliance with Basel III Capital Rules.

The Basel Committee, the U.S. federal banking regulators, and other interested parties may propose changes to the Basel III Capital Rules from time to time based on a number of factors, including prevailing economic conditions and policy initiatives. For example, in September 2017 the U.S. federal banking regulators proposed revisions to the Basel

III Capital Rules to simplify the capital treatment of certain types of assets, including certain types of mortgage servicing rights, tax deferred assets, and commercial real estate loans. If adopted, those revisions could provide regulatory relief to all but the largest and most internationally active U.S. banks and bank holding companies. Similarly, in December 2017, the Basel Committee published revisions to its regulatory framework in an effort to strengthen credibility in the calculation of risk-weighted assets and otherwise improve existing capital rules in certain respects. At this time, it is unknown whether proposals and revisions such as these will become final rules binding upon U.S. bank holding companies and banks, and it is unclear how they may affect us and the bank. We will continue to monitor these and similar proposals and revisions for adoption and implementation.

In December 2017, the Basel Committee published revisions to its regulatory framework that it described as the finalization of the Basel III post-crisis regulatory reforms. Among other things, these revisions are meant to strengthen credibility in the calculation of risk-weighted assets by enhancing the robustness and risk sensitivity of the standardized approaches for credit risk and operational risk and to add new capital requirements for certain “unconditional cancellable commitments,” such as credit card lines. These revisions will be generally effective on January 1, 2022, with an aggregate output floor phasing in through January 1, 2027. Operational risk capital requirements and a capital floor only apply to advanced approaches institutions under current U.S. capital rules.

Prompt Corrective Action. The Federal Deposit Insurance Corporation Improvement Act of 1991 established a system of “prompt corrective action” to resolve the problems of undercapitalized financial institutions. Under this system, which was modified by the Basel III Capital Rules, the federal banking regulators have established five capital categories (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized) into which all institutions are placed. The federal banking agencies have also specified by regulation the relevant capital thresholds for each of those categories. At December 31, 2018, the bank was well-capitalized under the regulatory framework for prompt corrective action. To be categorized as well-capitalized, the bank had to maintain minimum total risk-based, tier 1 risk-based, CET1 risk-based, and tier 1 leverage ratios of 10%, 8%, 6.5% and 5%, respectively.

Federal banking regulators are required to take various mandatory supervisory actions and are authorized to take other discretionary actions with respect to institutions in the three undercapitalized categories. The severity of the action depends upon the capital category in which the institution is placed. Generally, subject to a narrow exception, the banking regulator must appoint a receiver or conservator for an institution that is critically undercapitalized.

An institution that is categorized as undercapitalized, significantly undercapitalized, or critically undercapitalized is required to submit an acceptable capital restoration plan to its appropriate federal banking agency. A bank holding company must guarantee that a subsidiary depository institution meets its capital restoration plan, subject to various limitations. The controlling holding company's obligation to fund a capital restoration plan is limited to the lesser of (i) 5% of an undercapitalized subsidiary's assets at the time it became undercapitalized and (ii) the amount required to meet regulatory capital requirements. An undercapitalized institution also is generally prohibited from increasing its average total assets, making acquisitions, establishing any branches or engaging in any new line of business, except under an accepted capital restoration plan or with FDIC approval. The regulations also establish procedures for downgrading an institution to a lower capital category based on supervisory factors other than capital.

Liquidity

Financial institutions are subject to significant regulatory scrutiny regarding their liquidity positions. This scrutiny has increased during recent years, as the economic downturn that began in the late 2000's negatively affected the liquidity of many financial institutions. Various bank regulatory publications, including FDIC Financial Institution Letter FIL-13-2010 (Funding and Liquidity Risk Management) and FDIC Financial Institution Letter FIL-84-2008 (Liquidity Risk Management), address the identification, measurement, monitoring and control of funding and liquidity risk by financial institutions.

Basel III also addresses liquidity management by proposing two new liquidity metrics for financial institutions. The first metric is the "Liquidity Coverage Ratio", and it aims to require a financial institution to maintain sufficient high quality liquid resources to survive an acute stress scenario that lasts for one month. The second metric is the "Net Stable Funding Ratio," and its objective is to require a financial institution to maintain a minimum amount of stable sources relative to the liquidity profiles of the institution's assets, as well as the potential for contingent liquidity needs arising from off-balance sheet commitments, over a one-year horizon.

In the Basel III Capital Rules, the federal banking regulators did not address either the Liquidity Coverage Ratio or the Net Stable Funding Ratio. However, in September 2014, the federal banking agencies adopted final rules implementing a Liquidity Coverage Ratio requirement in the United States for larger banking organizations. In May 2016, the federal banking agencies issued proposed rules implementing a Net Stable Funding Ratio requirement, also for larger U.S. banking organizations, which proposed rule was still pending final approval as of fall 2018. Neither we nor the bank is subject to either set of rules.

The Liquidity Coverage Ratio and the Net Stable Funding Ratio continue to be monitored for implementation, and we cannot yet provide concrete estimates as to how those requirements, or any other regulatory positions regarding liquidity and funding, might affect us or our bank. However, increased liquidity requirements generally would be expected to cause the bank to invest its assets more conservatively—and therefore at lower yields—than it otherwise might invest. Such lower-yield investments likely would reduce the bank’s revenue stream, and in turn its earnings potential.

Payment of Dividends

We are a legal entity separate and distinct from the bank. Our principal source of cash flow, including cash flow to pay dividends to our stockholders, is dividends the bank pays to us as the bank’s sole shareholder. Statutory and regulatory limitations apply to the bank’s payment of dividends to us as well as to our payment of dividends to our stockholders. The requirement that a bank holding company must serve as a source of strength to its subsidiary banks also results in the position of the Federal Reserve that a bank holding company should not maintain a level of cash dividends to its stockholders that places undue pressure on the capital of its bank subsidiaries or that can be funded only through additional borrowings or other arrangements that may undermine the bank holding company’s ability to serve as such a source of strength. Our ability to pay dividends is also subject to the provisions of Delaware corporate law.

The Alabama Banking Department also regulates the bank’s dividend payments. Under Alabama law, a state-chartered bank may not pay a dividend in excess of 90% of its net earnings until the bank’s surplus is equal to at least 20% of its capital (our bank’s surplus currently exceeds 20% of its capital). Moreover, our bank is also required by Alabama law to obtain the prior approval of the Superintendent of Banks (“Superintendent”) for its payment of dividends if the total of all dividends declared by the bank in any calendar year will exceed the total of (i) the bank’s net earnings (as defined by statute) for that year, plus (ii) its retained net earnings for the preceding two years, less any required transfers to surplus. Based on this, our bank would be limited to paying \$311.9 million in dividends as of December 31, 2018, subject to maintaining certain required capital levels. In addition, no dividends, withdrawals or transfers may be made from the bank’s surplus without the prior written approval of the Superintendent.

The bank's payment of dividends may also be affected or limited by other factors, such as the requirement to maintain adequate capital above regulatory guidelines. The federal banking agencies have indicated that paying dividends that deplete a depository institution's capital base to an inadequate level would be an unsafe and unsound banking practice. Under the Federal Deposit Insurance Corporation Improvement Act of 1991, a depository institution may not pay any dividends if payment would cause it to become undercapitalized or if it already is undercapitalized. Moreover, the federal agencies have issued policy statements that provide that bank holding companies and insured banks should generally only pay dividends out of current operating earnings. If, in the opinion of the federal banking regulators, the bank were engaged in or about to engage in an unsafe or unsound practice, the federal banking regulators could require, after notice and a hearing, that the bank stop or refrain from engaging in the questioned practice.

Restrictions on Transactions with Affiliates and Insiders

We are subject to Section 23A of the Federal Reserve Act, which places limits on the amount of: a bank's loans or extensions of credit to affiliates; a bank's investment in affiliates; assets a bank may purchase from affiliates, except for real and personal property exempted by the Federal Reserve; loans or extensions of credit made by a bank to third parties collateralized by the securities or obligations of affiliates; a bank's guarantee, acceptance or letter of credit issued on behalf of an affiliate; a bank's transactions with an affiliate involving the borrowing or lending of securities to the extent they create credit exposure to the affiliate; and a bank's derivative transactions with an affiliate to the extent they create credit exposure to the affiliate. The total amount of the above transactions is limited in amount, as to any one affiliate, to 10% of a bank's capital and surplus and, as to all affiliates combined, to 20% of a bank's capital and surplus. In addition to the limitation on the amount of these transactions, certain of these transactions must also meet specified collateral requirements. The bank must also comply with other provisions designed to avoid the taking of low-quality assets.

We are also subject to Section 23B of the Federal Reserve Act, which, among other things, prohibits an institution from engaging in these transactions with affiliates unless the transactions are on terms substantially the same, or at least as favorable to the institution or its subsidiaries, as those prevailing at the time for comparable transactions with nonaffiliated companies.

The bank is also subject to restrictions on extensions of credit to its executive officers, directors, principal shareholders and their related interests. These extensions of credit (i) must be made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third parties and (ii) must not involve more than the normal risk of repayment or present other unfavorable features. There is also an aggregate limitation on all loans to insiders and their related interests. These loans cannot exceed the institution's total unimpaired capital and surplus, and the FDIC may determine that a lesser amount is appropriate. Insiders are subject to enforcement actions for knowingly accepting loans in violation of applicable restrictions. Alabama state banking laws also have similar provisions.

Lending Limits

Under Alabama law, the amount of loans which may be made by a bank in the aggregate to one person is limited. Alabama law provides that unsecured loans by a bank to one person may not exceed an amount equal to 10% of the capital and unimpaired surplus of the bank or 20% in the case of secured loans. For purposes of calculating these limits, loans to various business interests of the borrower, including companies in which a substantial portion of the stock is owned or partnerships in which a person is a partner, must be aggregated with those made to the borrower individually. Loans secured by certain readily marketable collateral are exempt from these limitations, as are loans secured by deposits and certain government securities.

Commercial Real Estate Concentration Limits

In December 2006, the U.S. bank regulatory agencies issued guidance entitled “Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices” to address increased concentrations in commercial real estate (“CRE”) loans. The guidance describes the criteria the agencies will use as indicators to identify institutions potentially exposed to CRE concentration risk. An institution that has (i) experienced rapid growth in CRE lending, (ii) notable exposure to a specific type of CRE, (iii) total reported loans for construction, land development, and other land representing 100% or more of the institution’s capital, or (iv) total CRE loans representing 300% or more of the institution’s capital, and the outstanding balance of the institution’s CRE portfolio has increased by 50% or more in the prior 36 months, may be identified for further supervisory analysis of the level and nature of its CRE concentration risk.

In December 2015, the U.S. bank regulatory agencies issued guidance titled “Statement on Prudent Risk Management for Commercial Real Estate Lending” to remind financial institutions of existing guidance on prudent risk management practices for CRE lending activity, including the 2006 guidance described above. In the 2015 guidance, the agencies noted their belief that financial institutions had eased CRE underwriting standards in recent years. The 2015 guidance went on to identify actions that financial institutions should take to protect themselves from CRE-related credit losses during difficult economic cycles. The 2015 guidance also indicated that the agencies would pay special attention in the future to potential risks associated with CRE lending.

Privacy and Data Security

Under federal law as implemented by Regulation P, financial institutions are required to disclose their policies for collecting and protecting the non-public personal information of their consumer customers. Consumer customers generally may prevent financial institutions from sharing non-public personal information with nonaffiliated third parties except under certain circumstances, such as the processing of transactions requested by the consumer or when the financial institution is jointly offering a product or service with a nonaffiliated financial institution. Additionally, financial institutions generally may not disclose consumer account numbers to any nonaffiliated third party for use in telemarketing, direct mail marketing or other marketing to consumers.

The federal banking regulators regularly issue guidance regarding cybersecurity intended to enhance cyber risk management standards among financial institutions. In addition, financial institutions are subject to various state privacy laws that may, among other things, impose data security requirements on all customer information, whether consumer or commercial customer information, and impose data breach notification obligations. The state data breach notification requirements generally apply based on the residence of the consumer and not on the bank’s presence in the state, location of the collateral property, or other variables.

Anti-Terrorism and Money Laundering Legislation

Our bank is subject to federal laws that are designed to counter money laundering and terrorist financing, and transactions with persons, companies, or foreign governments sanctioned by the United States. These include the USA Patriot Act, the Bank Secrecy Act, the Money Laundering Control Act, and the requirements of the United States Treasury Department’s Office of Foreign Assets Control (OFAC). These statutes and related rules and regulations impose requirements and limitations on specified financial transactions and account or other relationships, including obligations of a depository institution to verify customer identity, conduct customer due diligence, report on suspicious activity, file reports of transactions in currency, and conduct enhanced due diligence on certain accounts. They also prohibit us from engaging in transactions with certain designated restricted countries and persons. We are required by our regulators to maintain policies and procedures to comply with the foregoing restrictions.

Failure to comply with these statutes, rules and regulations, or failure to maintain an adequate compliance program, could lead to monetary penalties and reputational damage to our bank. Our banking regulators evaluate the effectiveness of our policies and procedures when determining whether to approve certain proposed banking activities. We believe the policies and procedures implemented by our Board are sufficient to be compliant with these laws.

Effect of Governmental Monetary Policies

Our bank's earnings are affected by domestic economic conditions and the monetary and fiscal policies of the United States government and its agencies. The Federal Reserve's monetary policies have had, and are likely to continue to have, an important impact on the operating results of commercial banks through its power to implement national monetary policy in order, among other things, to curb inflation or combat a recession. The monetary policies of the Federal Reserve affect the levels of bank loans, investments and deposits through its control over the issuance of United States government securities, its regulation of the discount rate applicable to member banks and its influence over reserve requirements to which member banks are subject. We cannot predict, and have no control over, the nature or impact of future changes in monetary and fiscal policies.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act represents a comprehensive revision of laws affecting corporate governance, accounting obligations and corporate reporting. The Sarbanes-Oxley Act is applicable to all companies with equity securities registered, or that file reports, under the Exchange Act. In particular, the act established (i) requirements for audit committees, including independence, expertise and responsibilities; (ii) responsibilities regarding financial statements for the chief executive officer and chief financial officer of the reporting company and new requirements for them to certify the accuracy of periodic reports; (iii) standards for auditors and regulation of audits; (iv) disclosure and reporting obligations for the reporting company and its directors and executive officers; and (v) civil and criminal penalties for violations of the federal securities laws. The legislation also established a new accounting oversight board to enforce auditing standards and restrict the scope of services that accounting firms may provide to their public company audit clients.

Overdraft Fees

Regulation E imposes restrictions on banks' abilities to charge overdraft fees. The rule prohibits financial institutions from charging fees for paying overdrafts on ATM and one-time debit card transactions, unless a consumer consents, or opts in, to the overdraft service for those types of transactions.

Interchange Fees

The Dodd-Frank Act, through a provision known as the Durbin Amendment, required the Federal Reserve to establish standards for interchange fees that are "reasonable and proportional" to the cost of processing a debit card transaction and imposes other requirements on card networks. In June 2011, the Federal Reserve implemented a rule, which includes a cap of 21 cents plus .05% of the transaction on the interchange fee for debit card issuers with \$10 billion or more in assets. Institutions like the bank with less than \$10 billion in assets are exempt. However, while the bank is under the \$10 billion level that caps income per transaction, the bank has been affected by federal regulations that prohibit network exclusivity arrangements and routing restrictions. Essentially, issuers and networks must allow transaction processing through a minimum of two unaffiliated networks.

Incentive-Based Compensation Arrangements

Our compensation practices are subject to guidance provided by federal banking regulators designed to ensure that incentive compensation arrangements at banking organizations take into account risk and are consistent with safe and sound practices. During May 2016, several financial regulators jointly issued a proposed rule designed to prohibit incentive-based compensation arrangements that could encourage inappropriate risks by providing excessive compensation or that could lead to a material financial loss. The proposed rule would require incentive-based compensation arrangements to adhere to three basic principles; (1) a balance between risk and reward, (2) effective risk management and controls, and (3) effective governance. It also would require appropriate board of directors (or committee) oversight and recordkeeping and disclosures to the appropriate agency. The proposed rule uses a tiered approach that applies its provisions to covered financial institutions according to the size of the institution.

The Volcker Rule

In December 2013, five U.S. financial regulators, including the Federal Reserve and the FDIC, adopted a final rule implementing the so-called "Volcker Rule." The Volcker Rule was created by Section 619 of the Dodd-Frank Act and

prohibits “banking entities” from engaging in “proprietary trading” and making investments and conducting certain other activities with “private equity funds and hedge funds.” Although the final rule provides some tiering of compliance and reporting obligations based on size, the fundamental prohibitions of the Volcker Rule apply to banking entities of any size, including us and the bank.

Banking entities that do not engage in any of the activities covered by the Volcker Rule (other than with respect to certain U.S. government, agency, and/or municipal obligations) are not required to adopt any formal compliance program specific to the Volcker Rule. We have concluded that we do not engage in the activities covered by the Volcker Rule and that the Volcker Rule does not impact our operations.

The Dodd-Frank Act

The Dodd-Frank Act was signed into law in July 2010 and has significantly changed the bank regulatory environment and the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act required various federal agencies to adopt a broad range of new implementing rules and regulations and to prepare numerous studies and reports for Congress. The federal agencies were given significant discretion in drafting the implementing rules and regulations. Although many of the final rules and regulations called for by the Dodd-Frank Act have been adopted, the implementation of some of those rules and regulations is in its early stages, and rulemaking has not yet become final for certain Dodd-Frank Act provisions. As a result, the full impact of the Dodd-Frank Act may not be known for many years.

In May 2018, the Economic Growth, Regulatory Relief and Consumer Protection Act (“EGRRCPA”) was signed into law. In many instances the EGRRCPA increased the Dodd-Frank mandated asset thresholds, to which enhanced supervision and prudential standards are applied. Previously, bank holding companies with assets of \$10 billion or more were subject to stress testing. The asset threshold has been increased to \$250 billion.

A number of the effects of the Dodd-Frank Act are described or otherwise accounted for in various parts of this *Supervision and Regulation* section. The following items provide a brief description of certain other provisions of the Dodd-Frank Act that may be relevant to us and the bank.

The Dodd-Frank Act created the CFPB and gave it broad powers to supervise and enforce consumer protection laws. The CFPB now has broad rule-making authority for a wide range of consumer protection laws that apply to all banks, including the authority to prohibit “unfair, deceptive or abusive” acts and practices. The CFPB has examination and enforcement authority over all banks with more than \$10 billion in assets. Institutions with less than \$10 billion in assets will continue to be examined for compliance with consumer laws by their primary bank regulator.

The Dodd-Frank Act imposed new requirements regarding the origination and servicing of residential mortgage loans. The law created a variety of new consumer protections, including limitations on the manner by which loan originators may be compensated and an obligation on the part of lenders to verify a borrower’s “ability to repay” a residential mortgage loan.

The Dodd-Frank Act imposes many investor protection, corporate governance and executive compensation rules that have affected most U.S. publicly traded companies. The Dodd-Frank Act (i) requires publicly traded companies to give stockholders a non-binding vote on executive compensation and golden parachute payments; (ii) enhances independence requirements for compensation committee members; (iii) requires companies listed on national securities exchanges to adopt incentive-based compensation clawback policies for executive officers; (iv) authorizes the SEC to promulgate rules that would allow stockholders to nominate their own candidates using a company’s proxy materials; and (v) directs the federal banking regulators to issue rules prohibiting incentive compensation that encourages inappropriate risks.

Although insured depository institutions have long been subject to the FDIC’s resolution process, the Dodd-Frank Act creates a new mechanism for the FDIC to conduct the orderly liquidation of certain “covered financial companies,” including bank holding companies and systemically significant non-bank financial companies. Upon certain findings being made, the FDIC may be appointed receiver for a covered financial company, and would conduct an orderly liquidation of the entity. The FDIC liquidation process is modeled on the existing Federal Deposit Insurance Act bank resolution process, and generally gives the FDIC more discretion than in the traditional bankruptcy context.

As noted above, the implementation of the Dodd-Frank Act is ongoing, and certain provisions of the Dodd-Frank Act are still subject to rulemaking. As a result, it is difficult to anticipate the overall financial impact of the Dodd-Frank Act on the bank and us. However, compliance with the Dodd-Frank Act and its implementing regulations has resulted in, and is expected to continue to result in, additional operating and compliance costs that could have a material adverse effect on our business, financial condition and results of operations.

Regulation of Other Agencies

In addition to regulations issued by the Alabama Banking Department and federal banking regulators, we are subject to regulations issued by other state and federal agencies with respect to certain financial products and services we offer and our operations generally. These include, for example, the SEC, various taxing authorities, and various state insurance regulators.

Other Legislation and Regulatory Action relating to Financial Institutions

Government efforts made over the last decade to strengthen the United States financial system, including the Dodd-Frank Act and its related rules and regulations, subject us and the bank to a number of new regulatory compliance obligations, many of which may impose additional fees, costs, requirements, and restrictions. These fees, costs, requirements, and restrictions, as well as any others that may be imposed in the future, may have a material adverse effect on our business, financial condition, and results of operations.

New proposals to change the laws and regulations governing the banking industry are frequently introduced in the United States Congress, in the state legislatures and before the various bank regulatory agencies. The likelihood and timing of any such changes and the impact such changes might have on us and the bank, however, cannot be determined at this time. In this regard, bills are presently pending before Congress and certain state legislatures, and additional bills may be introduced in the future in Congress and state legislatures, to alter the structure, regulation and competitive relationships of financial institutions. We cannot predict whether or in what form any of these proposals will be adopted or the extent to which our business may be affected by any new regulation or statute.

Available Information

Our corporate website is www.servisfirstbank.com. We have direct links on this website to our Code of Ethics and the charters for our Audit, Compensation and Corporate Governance and Nominations Committees by clicking on the “Investor Relations” tab. We also have direct links to our filings with the Securities and Exchange Commission (SEC), including, but not limited to, our annual reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements and any amendments to these filings, which are available free of charge through our corporate website as soon as reasonably practicable after they are electronically filed with, or furnished to, the SEC.

Executive Officers of the Registrant

A brief description of the background of each of our named executive officers is set forth below.

Thomas A. Broughton, III (63) – Mr. Broughton has served as our President and Chief Executive Officer and a director since 2007 and as President, Chief Executive Officer and a director of the Bank since its inception in May 2005. Mr. Broughton was appointed Chairman of the Board effective January 1, 2019, following the retirement of our former Chairman. Mr. Broughton has spent the entirety of his banking career in the Birmingham area. In 1985, Mr. Broughton was named President of the de novo First Commercial Bank. When First Commercial Bank was acquired by Synovus Financial Corp. in 1992, Mr. Broughton continued as President and was named Chief Executive Officer of First Commercial Bank. In 1998, he became Regional Chief Executive Officer of Synovus Financial Corp., responsible for the Alabama and Florida markets. In 2001, Mr. Broughton’s Synovus region shifted, and he became Regional Chief Executive Officer for the markets of Alabama, Tennessee and parts of Georgia. He continued his work in this position until his retirement from Synovus in August 2004. Mr. Broughton’s experience in banking has afforded him opportunities to work in many areas of banking and has given him exposure to all bank functions. Mr. Broughton served on the Board of Directors of Cavalier Homes, Inc. from 1986 until 2009, when the company was sold to a subsidiary of Berkshire Hathaway.

Clarence C. Pouncey, III (62) – Mr. Pouncey has served as our Executive Vice President and Chief Operating Officer since 2007 and Executive Vice President and Chief Operating Officer of the Bank since November 2006. Prior to joining the Company, Mr. Pouncey was employed by SouthTrust Bank (subsequently, Wachovia Bank and now Wells Fargo Bank) at its corporate headquarters in Birmingham, in various capacities from 1978 to 2006, most recently as the Senior Vice President and Regional Manager of Real Estate Financial Services. During his employment with SouthTrust, Mr. Pouncey oversaw various operational and production functions in its nine-state footprint of Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Texas and Virginia, and while employed by Wachovia, Mr. Pouncey oversaw various operational and production functions in Alabama, Arizona, Tennessee and Texas.

William M. Foshee (64) – Mr. Foshee has served as our Executive Vice President, Chief Financial Officer, Treasurer and Secretary since 2007 and as Executive Vice President, Chief Financial Officer, Treasurer and Secretary of the Bank since 2005. Mr. Foshee served as the Chief Financial Officer of Heritage Financial Holding Corporation, a publicly traded bank holding company headquartered in Decatur, Alabama, from 2002 until it was acquired in 2005. Mr. Foshee is a Certified Public Accountant.

Rodney E. Rushing (61) – Mr. Rushing has served as the Executive Vice President and Executive for Correspondent Banking for us and the bank since 2011. Prior to joining us, Mr. Rushing was employed at BBVA Compass from 1982 to 2011, most recently serving as Executive Vice President of Correspondent Banking. At the time of his departure in March 2011, the correspondent banking division of BBVA Compass provided correspondent banking services to over 600 financial institutions.

Henry Abbott (38) – Mr. Abbott has served as Senior Vice President and Chief Credit Officer for us and the bank since April 2018. From 2013 to 2018, he served as Senior Vice President and Chief Credit Officer for our Correspondent Banking Division. Prior to joining us, Mr. Abbott was employed at BB&T from 2004 to 2013 in various senior lending and credit administration roles.

A brief description of the background of each of our regional chief executive officers is set forth below.

J. Harold Clemmer (50) – Mr. Clemmer has served as Executive Vice President and Atlanta President and Chief Executive Officer of the Bank since March, 2018. Prior to joining the Company, Mr. Clemmer held several leadership positions with Fifth Third Bank including Regional President of Tennessee and Regional President of Georgia. Mr. Clemmer has over 25 years of commercial banking experience.

G. Carlton Barker (70) – Mr. Barker has served as Executive Vice President and Montgomery President and Chief Executive Officer of the Bank since February 1, 2007. Prior to joining the Company, Mr. Barker was employed by Regions Bank for 19 years in various capacities, most recently as the Regional President for the Southeast Alabama Region. Mr. Barker serves on the Huntingdon College Board of Trustees.

Gregory W. Bryant (55) – Mr. Bryant has served as Executive Vice President and Tampa Bay Area President and Chief Executive Officer of the Bank since January 2016. Previously, Mr. Bryant was the President and CEO of Bay Cities Bank in Tampa, Florida from 2000 until its sale to Centennial Bank in October 2015. While at Bay Cities, Mr. Bryant was a member of the bank's loan committee, compensation committee, audit committee, and ALCO committee. Mr. Bryant also served as the President of Florida Business BancGroup, the parent company of Bay Cities Bank. From 2005 to 2015, Mr. Bryant served as a Director of the Independent Banker's Bank (Lake Mary, FL), a correspondent bank serving over 100 banks in Florida and South Georgia. While at IBB, Mr. Bryant served on the loan and executive committees. Prior to Bay Cities Bank, Mr. Bryant worked in various management capacities with GE Capital and SouthTrust Bank. Mr. Bryant served as Chair of the Florida Banker's Association in 2012, and is active in the CEO Council of Tampa Bay and the Greater Tampa Chamber of Commerce.

Andrew N. Kattos (49) – Mr. Kattos has served as Executive Vice President and Huntsville President and Chief Executive Officer of the Bank since April 2006. Prior to joining the Company, Mr. Kattos was employed by First Commercial Bank for 14 years, most recently as an Executive Vice President and Senior Lender in the Commercial Lending Department. Mr. Kattos also serves on the Advisory Board for the Junior League as a Board Member and Finance Committee Member for the Huntsville Hospital Foundation, a member of the University of Alabama in Huntsville College of Business Executive Advisory Board, and a board member for the National Children's Advocacy Center.

William Bibb Lamar, Jr. (74) – Mr. Lamar has served as the Mobile Regional Chief Executive Officer of the bank since March 2013. Mr. Lamar is a seasoned Mobile banker with over 40 years of leadership responsibilities. Mr. Lamar graduated from the University of Mobile. Mr. Lamar began his banking career with Merchants National, now Regions Bank where he spent more than 20 years in various leadership roles. Most recently, Mr. Lamar was the CEO of BankTrust for over 20 years. Mr. Lamar has served on the State Banking Board for 16 years and was formerly President of the Alabama Bankers Association.

Rex D. McKinney (56) – Mr. McKinney has served as Executive Vice President and Pensacola President and Chief Executive Officer of the Bank since January 2011. Prior to joining the Company, Mr. McKinney held several leadership positions, including the senior lender position, at First American Bank/Coastal Bank and Trust (owned by Synovus Financial Corporation) starting in 1997. Mr. McKinney is a Past Board Member of the Rotary Club of Pensacola. He is Past President of the Pensacola Sports Association, a Past President of the Irish Politicians Club, a Member of the Pensacola Sports Association Foundation, Vice President of the Pensacola Country Club Board of Directors and also a Board Member of the Florida Bankers Association.

B. Harrison Morris, III (42) – Mr. Morris has served as Dothan Regional Chief Executive Officer since February 2015 when the outgoing CEO, Ronald DeVane, retired from the Company. Prior to his promotion, Mr. Morris served as Executive Vice President and Dothan President since June 2010, following his promotion from Senior Lending Officer of the Dothan Region. Mr. Morris joined the Company in September 2008. Prior to joining the Company, Mr. Morris held various positions with Wachovia Bank and SouthTrust Bank since 1998. Mr. Morris is a trustee of the Wallace Community College Foundation Board, a member of the Dothan Area Chamber of Commerce Board, a member of the Wiregrass United Way Board and a member of the Wiregrass Chapter of the American Red Cross.

Thomas G. Trouche (54) – Mr. Trouche has served as Executive Vice President and Charleston President and Chief Executive Officer of the Bank since December 2014. Prior to joining the Company, Mr. Trouche served in various roles with First Citizens Bank for over 13 years, most recently as their Coastal Division Executive. Mr. Trouche currently serves on the Board of Directors for the American Red Cross, and previously served as Chairman of the Board for Mason Preparatory School in Charleston.

Bradford A. Vieira (43) – Mr. Vieira has served as Executive Vice President and Nashville President and Chief Executive Officer of the Bank since June 2017 and as Senior Vice President and Nashville President since 2013 until his promotion to Nashville CEO. Mr. Vieira began his career in banking with SouthTrust Bank and held several positions in lending and credit. He also was with Fifth Third Bank as a commercial middle market sales manager. Mr. Vieira has been named Power Leader in Finance by the Nashville Business Journal. Under his leadership, ServisFirst Bank was also named a 2017 Best Place to work by the Nashville Business Journal.

ITEM 1A. RISK FACTORS.

Our business, financial condition and results of operations could be harmed by any of the following risks or by other risks identified in this annual report, as well as by other risks we may not have anticipated or viewed as material. Such risks and uncertainties could cause actual results to differ materially from those contained in forward-looking statements presented elsewhere by management. The following list identifies and briefly summarizes certain risk factors. This list should not be viewed as complete or comprehensive, and the risks identified below are not the only risks facing our company. See also “Cautionary Note Regarding Forward-Looking Statements.”

Risks Related To Our Business

As a business operating in the financial services industry, our business and operations may be adversely affected in numerous and complex ways by weak economic conditions.

Our businesses and operations are sensitive to general business and economic conditions in the United States. If the U.S. economy weakens, our growth and profitability could be constrained. Uncertainty about the federal fiscal policymaking process and the medium and long-term fiscal outlook of the federal government is a concern for businesses, consumers and investors in the United States. In addition, economic conditions in foreign countries could affect the stability of global financial markets, which could hinder U.S. economic growth. Weak economic conditions are characterized by deflation, fluctuations in debt and equity capital markets, a lack of liquidity and/or depressed prices in the secondary market for mortgage loans, increased delinquencies on mortgage, consumer and commercial loans, residential and commercial real estate price declines and lower home sales and commercial activity. The current economic environment is characterized by rising interest rates, though rates currently remain relatively low, which may impact our ability to attract deposits and to generate attractive earnings through our investment portfolio. An increase in interest rates could increase competition for deposits, decrease customer demand for loans due to the higher cost of obtaining credit, result in an increased number of delinquent loans and defaults or reduce the value of securities held for investment. All of these factors can individually or in the aggregate be detrimental to our business, and the interplay between these factors can be complex and unpredictable. Our business also is significantly affected by monetary and related policies of the U.S. federal government and its agencies. Changes in any of these policies are influenced by macroeconomic conditions and other factors that are beyond our control. Adverse economic conditions and government policy responses to such conditions could have a material adverse effect on our business, financial condition, results of operations and prospects.

We are dependent on the services of our management team and board of directors, and the unexpected loss of key officers or directors may adversely affect our business and operations.

We are led by an experienced core management team with substantial experience in the markets that we serve, and our operating strategy focuses on providing products and services through long-term relationship managers. Accordingly, our success depends in large part on the performance of our key personnel, as well as on our ability to attract, motivate and retain highly qualified senior and middle management. Competition for employees is intense, and the process of locating key personnel with the combination of skills and attributes required to execute our business plan may be lengthy. If any of our or the bank's executive officers, other key personnel, or directors leaves us or the bank, our operations may be adversely affected. In particular, we believe that our named executive officers and our regional chief executive officers are extremely important to our success and the success of our bank. If any of them leaves for any reason, our results of operations could suffer in such markets. With the exception of the key officers in charge of our Atlanta, Huntsville and Montgomery banking offices, we do not have employment agreements or non-competition agreements with any of our executive officers, including our named executive officers. In the absence of these types of agreements, our executive officers are free to resign their employment at any time and accept an offer of employment from another company, including a competitor. Additionally, our directors' and advisory board members' community involvement and diverse and extensive local business relationships are important to our success. Any material change in the composition of our board of directors or the respective advisory boards of the bank could have a material adverse effect on our business, financial condition, results of operations and prospects.

We may not be able to expand successfully into new markets.

We have opened new offices and operations in five primary markets (Mobile, Alabama, Atlanta, Georgia, Nashville, Tennessee, Charleston, South Carolina and Tampa Bay, Florida) in the past four years. We may not be able to successfully manage this growth with sufficient human resources, training and operational, financial and technological resources. Any such failure could limit our ability to be successful in these new markets and may have a material adverse effect on our business, financial condition, results of operations and prospects.

A prolonged downturn in the real estate market, especially in our primary markets, could result in losses and adversely affect our profitability.

As of December 31, 2018, 52.4% of our loan portfolio was composed of commercial and consumer real estate loans, of which 60.9% was owner-occupied commercial or 1-4 family mortgage loans. The real estate collateral in each case provides an alternate source of repayment in the event of default by the borrower and may deteriorate in value after the time the credit is initially extended. A decline in real estate values, either in the regions we serve or across the country as occurred in the U.S. recession from 2007 to 2009, could impair the value of our collateral and our ability to sell the collateral upon foreclosure, which would likely require us to increase our provision for loan losses. In the event of a default with respect to any of these loans, the amounts we receive upon sale of the collateral may be insufficient to recover the outstanding principal and interest on the loan. If we are required to re-value the collateral securing a loan to satisfy the debt during a period of reduced real estate values or to increase our allowance for loan losses, our profitability could be adversely affected, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our largest loan relationships currently make up a significant percentage of our total loan portfolio.

As of December 31, 2018, our 10 largest borrowing relationships totaled \$308.5 million in commitments (including unfunded commitments), or approximately 5% of our total loan portfolio. The concentration risk associated with having a small number of relatively large loan relationships is that, if one or more of these relationships were to become delinquent or suffer default, we could be at risk of material losses. The allowance for loan losses may not be adequate to cover losses associated with any of these relationships, and any loss or increase in the allowance could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our decisions regarding credit risk could be inaccurate and our allowance for loan losses may be inadequate, which could have a material adverse effect on our business, financial condition, results of operations and future prospects.

Our earnings are affected by our ability to make loans, and thus we could sustain significant loan losses and consequently significant net losses if we incorrectly assess either the creditworthiness of our borrowers resulting in loans to borrowers who fail to repay their loans in accordance with the loan terms or the value of the collateral securing the repayment of their loans, or we fail to detect or respond to a deterioration in our loan quality in a timely manner. Management makes various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. We maintain an allowance for loan losses that we consider adequate to absorb losses inherent in the loan portfolio based on our assessment of the information available. In determining the size of our allowance for loan losses, we rely on an analysis of our loan portfolio based on historical loss experience, volume

and types of loans, trends in classification, volume and trends in delinquencies and non-accruals, national and local economic conditions and other pertinent information. We target small and medium-sized businesses as loan customers. Because of their size, these borrowers may be less able to withstand competitive or economic pressures than larger borrowers in periods of economic weakness. Also, as we expand into new markets, our determination of the size of the allowance could be understated due to our lack of familiarity with market-specific factors. Despite the effects of sustained economic weakness, we believe our allowance for loan losses is adequate. Our allowance for loan losses as of December 31, 2018 was \$68.6 million, or 1.05% of total gross loans. If our assumptions are inaccurate, we may incur loan losses in excess of our current allowance for loan losses and be required to make material additions to our allowance for loan losses, which could have a material adverse effect on our business, financial condition, results of operations and prospects. However, even if our assumptions are accurate, federal and state regulators periodically review our allowance for loan losses and could require us to materially increase our allowance for loan losses or recognize further loan charge-offs based on judgments different than those of our management. Any material increase in our allowance for loan losses or loan charge-offs as required by these regulatory agencies could have a material adverse effect on our business, financial condition, results of operations and prospects. In addition, the adoption of ASU 2016-13, as amended, on January 1, 2020 could result in an increase in the allowance for loan losses as a result of changing from an “incurred loss” model, which encompasses allowances for current known and inherent losses within the portfolio, to an “expected loss” model, which encompasses allowances for losses expected to be incurred over the life of the portfolio. Furthermore, ASU 2016-13 will necessitate that we establish an allowance for expected credit losses for certain debt securities and other financial assets. Although we are currently unable to reasonably estimate the impact of adopting ASU 2016-13, we expect that the impact of adoption will be significantly influenced by the composition, characteristics and quality of our loan and securities portfolios as well as the prevailing economic conditions and forecasts as of the adoption date. In December 2018, the federal banking regulators issued a final rule that would provide an optional three-year phase-in period for the day-one regulatory capital effects of the adoption of ASU 2016-13. The impact of this rule on the Company will depend on whether we elect to phase in the impact of the standard. See Note 1 – Summary of Significant Accounting Policies in the notes to consolidated financial statements included in Item 8. Financial Statements and Supplementary Data elsewhere in this report.

The internal controls that we have implemented in order to mitigate risks inherent to the business of banking might fail or be circumvented, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Management regularly reviews and updates our internal controls and procedures that are designed to manage the various risks in our business, including credit risk, operational risk, and interest rate risk. No system of controls, however well-designed and operated, can provide absolute assurance that the objectives of the system will be met. If there were a failure of such a system, or if a system were circumvented, there could be a material adverse effect on our business, financial condition, results of operations and prospects.

Our corporate structure provides for decision-making authority by our regional chief executive officers and banking teams. Our business, financial condition, results of operations and prospects could be negatively affected if our employees do not follow our internal policies or are negligent in their decision-making.

We attract and retain our management talent by empowering them to make certain business decisions on a local level. Lending authorities are assigned to regional chief executive officers and their banking teams based on their experience. Additionally, all loans in excess of \$5.0 million and every loan internally risk-graded as special mention or below are reviewed by our centralized credit administration department in Birmingham, Alabama. Moreover, for decisions that fall outside of the assigned authorities, our regional chief executive officers are required to obtain approval from our senior management team. Our local bankers may not follow our internal procedures or otherwise act in our best interests with respect to their decision-making. A failure of our employees to follow our internal policies, or actions taken by our employees that are negligent could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our business strategy includes the continuation of our growth plans, and our business, financial condition, results of operations and prospects could be negatively affected if we fail to grow or fail to manage our growth effectively.

Our current strategy is to grow organically and, if appropriate, supplement that growth with select acquisitions. Our ability to grow organically depends primarily on generating loans and deposits of acceptable risk and expense, and we may not be successful in continuing this organic growth. Our ability to identify appropriate markets for expansion, recruit and retain qualified personnel, and fund growth at a reasonable cost depends upon prevailing economic conditions, maintenance of sufficient capital, competitive factors, and changes in banking laws, among other factors. Failure to manage our growth effectively could adversely affect our ability to successfully implement our business strategy, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our continued pace of growth may require us to raise additional capital in the future to fund such growth, and the unavailability of additional capital on terms acceptable to us could adversely affect our growth and/or our financial condition and results of operations.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. To support our recent and ongoing growth, we have completed a series of capital transactions during the past four years, including:

- the sale of \$34,750,000 in 5% subordinated notes due July 15, 2025 to accredited investor purchasers in July 2015;
- and
- the sale of \$30,000,000 in 4.5% subordinated notes due November 8, 2027 to accredited investor purchasers in November 2017 and concurrent redemption of \$20,000,000 in 5.5% subordinated notes due November 9, 2022.

After giving effect to these transactions, we believe that we will have sufficient capital to meet our capital needs for our immediate growth plans. However, we will continue to need capital to support our longer-term growth plans. Our ability to access the capital markets, if needed, on a timely basis or at all will depend on a number of factors, such as the state of the financial markets, including prevailing interest rates, a loss of confidence in financial institutions generally, negative perceptions of our business or our financial strength, or other factors that would increase our cost of borrowing. If capital is not available on favorable terms when we need it, we will either have to issue common stock or other securities on less than desirable terms or reduce our rate of growth until market conditions become more favorable. Either of such events could have a material adverse effect on our business, financial condition, results of operations and prospects.

Impacts of the Tax Cuts and Jobs Act (the “Tax Act”) may create uncertainty related to our customers’ future demand for credit and our future results.

The passage of the Tax Act in December 2017 has decreased tax rates on businesses and generally spurred economic growth in our markets. However, some of our customers may decide to use their increased cash flow from lower income taxes to pay off debt or to fund their existing business activity internally, negating the need for additional debt. Further, the elimination of federal income tax deductibility of business interest expense could effectively increase the cost of borrowing and make equity or other types of funding more attractive for our customers. These effects could have a negative impact on our ability to make loans to our customers. A significant increase in our after-tax net income in 2018 was the result of lower corporate income tax rates resulting from the Tax Act but there is no guarantee that such lower rates will benefit us in future periods or that the lower enacted rates will not be repealed as a result of future tax legislation.

Competition from financial institutions and other financial service providers may adversely affect our profitability.

The banking business is highly competitive, and we experience competition in our markets from many other financial institutions. We compete with these other financial institutions both in attracting deposits and in making loans. In addition, we must attract our customer base from other existing financial institutions and from new residents. Many of these competitors have substantially greater financial resources, larger lending limits, larger branch networks and less regulatory oversight than we do, and are able to offer a broader range of products and services than we can. Our profitability depends upon our continued ability to successfully compete with an array of financial institutions in our service areas.

Our ability to compete successfully will depend on a number of factors, including, among other things:

- our ability to build and maintain long-term customer relationships while ensuring high ethical standards and safe and sound banking practices;
- the scope, relevance and pricing of products and services that we offer;
- customer satisfaction with our products and services;
- industry and general economic trends; and
- our ability to keep pace with technological advances and to invest in new technology.

Increased competition could require us to increase the rates that we pay on deposits or lower the rates that we offer on loans, which could reduce our profitability. Our failure to compete effectively in our markets could restrain our growth or cause us to lose market share, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Unpredictable economic conditions or a natural disaster in any of our market areas may have a material adverse effect on our financial performance.

Substantially all of our borrowers and depositors are individuals and businesses located and doing business in our markets. Therefore, our success will depend on the general economic conditions in these areas, which we cannot predict with certainty. Unlike with many of our larger competitors, the majority of our borrowers are commercial firms, professionals and affluent consumers located and doing business in such local markets. As a result, our operations and profitability may be more adversely affected by a local economic downturn or natural disaster in such markets than those of larger, more geographically diverse competitors. Our entry into Pensacola and Tampa Bay, Florida, Mobile, Alabama and Charleston, South Carolina increased our exposure to potential losses associated with hurricanes and similar natural disasters that are more common in coastal areas than in our other markets. Accordingly, any regional or local economic downturn, or natural or man-made disaster, that affects any of the markets in which we

operate, including existing or prospective property or borrowers in such markets may affect us and our profitability more significantly and more adversely than our more geographically diversified competitors, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

We encounter technological change continually and have fewer resources than many of our competitors to invest in technological improvements.

The banking and financial services industries are undergoing rapid technological changes, with frequent introductions of new technology-driven products and services. In addition to serving customers better, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our success will depend in part on our ability to address our customers' needs by using technology to provide products and services that will satisfy customer demands for convenience, as well as to create additional efficiencies in our operations. Many of our competitors have greater resources to invest in technological improvements, and we may not be able to implement new technology-driven products and services, which could reduce our ability to effectively compete or increase our overall expenses and have a material adverse effect on our net income.

Our information systems may experience a failure or interruption.

We rely heavily on communications and information systems to conduct our business. Any failure or interruption in the operation of these systems could impair or prevent the effective operation of our customer relationship management, general ledger, deposit, lending, or other functions. While we have policies and procedures designed to prevent or limit the effect of a failure or interruption in the operation of our information systems, there can be no assurance that any such failures or interruptions will not occur or, if they do occur, that they will be adequately addressed. The occurrence of any failures or interruptions impacting our information systems could damage our reputation, result in a loss of customer business, and expose us to additional regulatory scrutiny, civil litigation, and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

We use information technology in our operations and offer online banking services to our customers. Unauthorized access to our or our customers' confidential or proprietary information could expose us to reputational harm and litigation and adversely affect our ability to attract and retain customers.

Information security risks for financial institutions have increased in recent years, in part because of the proliferation of new technologies, the use of the internet and telecommunications technologies to conduct financial transactions, and the increased sophistication and activities of organized crime, hackers, terrorists, activists, and other external parties. We are under continuous threat of loss due to hacking and cyber-attacks. Our risk and exposure to these matters remains heightened because of the evolving nature and complexity, and the increasing frequency, of these threats from cybercriminals and hackers, our plans to continue to provide internet banking and mobile banking channels, and our plans to continue to develop additional remote connectivity solutions to serve our customers. Therefore, the secure processing, transmission, and storage of information in connection with our online banking services are critical elements of our operations. However, our network could be vulnerable to unauthorized access, computer viruses and other malware, phishing schemes, human error or other security failures. In addition, our customers may use personal smartphones, tablet PCs, or other mobile devices that are beyond our control systems in order to access our products and services. Our technologies, systems and networks, and our customers' devices, may become the target of cyber-attacks, electronic fraud, or information security breaches that could result in the unauthorized release, gathering, monitoring, misuse, loss, or destruction of our or our customers' confidential, proprietary, and other information, or otherwise disrupt our or our customers' or other third parties' business operations. As cyber threats continue to evolve, we may be required to spend significant capital and other resources to protect against these threats or to alleviate or investigate problems caused by such threats. To the extent that our activities or the activities of our customers involve the processing, storage, or transmission of confidential customer information, any breaches or unauthorized access to such information could present significant regulatory costs and expose us to litigation and other possible liabilities. Any inability to prevent these types of security threats could also cause existing customers to lose confidence in our systems and could adversely affect our reputation and ability to generate deposits. While we have not experienced any material losses relating to cyber-attacks or other information security breaches to date, we may suffer such losses in the future. The occurrence of any cyber-attack or information security breach could result in potential liability to clients, reputational damage, damage to our competitive position, and the disruption of our operations, all of which could adversely affect our financial condition or results of operations.

We are dependent upon outside third parties for the processing and handling of our records and data.

We rely on software developed by third-party vendors to process various transactions. In some cases, we have contracted with third parties to run their proprietary software on our behalf. These systems include, but are not limited to, general ledger, payroll, employee benefits, loan and deposit processing, and securities portfolio accounting. While we perform a review of controls instituted by the applicable vendors over these programs in accordance with industry standards and perform our own testing of user controls, we must rely on the continued maintenance of controls by these third-party vendors, including safeguards over the security of customer data. In addition, we maintain, or contract with third parties to maintain, daily backups of key processing outputs in the event of a failure on the part of any of these systems. Nonetheless, we may incur a temporary disruption in our ability to conduct business or process transactions, or incur damage to our reputation, if the third-party vendor fails to adequately maintain internal controls or institute necessary changes to systems. Such a disruption or breach of security may have a material adverse effect on our business.

Our recent results may not be indicative of our future results, and may not provide guidance to assess the risk of an investment in our common stock.

We may not be able to sustain our historical rate of growth and may not be able to further expand our business. In addition, our recent growth may distort some of our historical financial ratios and statistics. Various factors, such as economic conditions, regulatory and legislative considerations and competition, may impede or prohibit our ability to expand our market presence. We have different lending risks than larger banks. We provide services to our local communities; thus, our ability to diversify our economic risks is limited by our own local markets and economies. We lend primarily to small to medium-sized businesses, which may expose us to greater lending risks than those faced by banks lending to larger, better-capitalized businesses with longer operating histories. We manage our credit exposure through careful monitoring of loan applicants and loan concentrations in particular industries, and through our loan approval and review procedures. Our use of historical and objective information in determining and managing credit exposure may not be accurate in assessing our risk. Our failure to sustain our historical rate of growth or adequately manage the factors that have contributed to our growth could have a material adverse effect on our business, financial condition, results of operations and prospects.

We engage in lending secured by real estate and may be forced to foreclose on the collateral and own the underlying real estate, subjecting us to the costs associated with the ownership of the real property.

Since we originate loans secured by real estate, we may have to foreclose on the collateral property to protect our investment and may thereafter own and operate such property, in which case we are exposed to the risks inherent in the ownership of real estate. As of December 31, 2018, we held \$5.2 million in other real estate owned. The amount that we, as a mortgagee, may realize after a default is dependent upon factors outside of our control, including, but not limited to: general or local economic conditions; environmental cleanup liability; neighborhood assessments; interest rates; real estate tax rates; operating expenses of the mortgaged properties; supply of, and demand for, rental units or properties; ability to obtain and maintain adequate occupancy of the properties; zoning laws; governmental and regulatory rules; fiscal policies; and natural disasters. Our inability to manage the amount of costs or size of the risks associated with the ownership of real estate could have a material adverse effect on our business, financial condition, results of operations and prospects.

Regulatory requirements affecting our loans secured by commercial real estate could limit our ability to leverage our capital and adversely affect our growth and profitability.

The federal bank regulatory agencies have indicated their view that banks with high concentrations of loans secured by commercial real estate are subject to increased risk and should hold higher capital than regulatory minimums to maintain an appropriate cushion against loss that is commensurate with the perceived risk. Because a significant portion of our loan portfolio is dependent on commercial real estate, a change in the regulatory capital requirements applicable to us as a result of these policies could limit our ability to leverage our capital, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

We are subject to interest rate risk, which could adversely affect our profitability.

Our profitability, like that of most financial institutions, depends to a large extent on our net interest income, which is the difference between our interest income on interest-earning assets, such as loans and investment securities, and our interest expense on interest-bearing liabilities, such as deposits and borrowings. We have positioned our asset portfolio to benefit in a higher or lower interest rate environment, but this may not remain true in the future. Our interest sensitivity profile was somewhat liability sensitive as of December 31, 2018, generally meaning that our net interest income would decrease more from rising interest rates than from falling interest rates. Interest rates are highly sensitive to many factors that are beyond our control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System (or, the “Federal Reserve”). Changes in monetary policy, including changes in interest rates, could influence not only the interest we receive on loans and securities and the interest we pay on deposits and borrowings, but such changes could also affect our ability to originate loans and obtain or retain deposits, customer demand for loans, the fair value of our

financial assets and liabilities, and the average duration of our assets. If the interest rates paid on deposits and other borrowings increase at a faster rate than the interest rates received on loans and other investments, our net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings. Any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on our business, financial condition, results of operations and prospects.

In addition, an increase in interest rates could also have a negative impact on our results of operations by reducing the ability of borrowers to repay their current loan obligations. These circumstances could not only result in increased loan defaults, foreclosures and charge-offs, but also necessitate further increases to the allowance for loan losses which could have a material adverse effect on our business, results of operations, financial condition and prospects.

Liquidity risk could impair our ability to fund operations and meet our obligations as they become due.

Liquidity is essential to our business. Liquidity risk is the potential that we will be unable to meet our obligations as they come due because of an inability to liquidate assets or obtain adequate funding. An inability to raise funds through deposits, borrowings, the sale of loans and other sources could have a substantial negative effect on our liquidity. In particular, approximately 86% of the bank's liabilities as of December 31, 2018 were checking accounts and other liquid deposits, which are payable on demand or upon several days' notice, while by comparison, 81% of the assets of the bank were loans, which cannot be called or sold in the same time frame. Our access to funding sources in amounts adequate to finance our activities or on terms that are acceptable to us could be impaired by factors that affect us specifically or the financial services industry or economy in general. Market conditions or other events could also negatively affect the level or cost of funding, affecting our ongoing ability to accommodate liability maturities and deposit withdrawals, meet contractual obligations, satisfy regulatory capital requirements, and fund asset growth and new business transactions at a reasonable cost, in a timely manner and without adverse consequences. Any substantial, unexpected or prolonged change in the level or cost of liquidity could have a material adverse effect on our ability to meet deposit withdrawals and other customer needs, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

The fair value of our investment securities can fluctuate due to factors outside of our control.

As of December 31, 2018, the fair value of our investment securities portfolio was approximately \$596.2 million. Factors beyond our control can significantly influence the fair value of securities in our portfolio and can cause potential adverse changes to the fair value of these securities. These factors include, but are not limited to, rating agency actions in respect of the securities, defaults by the issuer or with respect to the underlying securities, and changes in market interest rates or instability in the capital markets. Any of these factors, among others, could cause other-than-temporary impairments and realized and/or unrealized losses in future periods and declines in other comprehensive income, which could materially and adversely affect our business, results of operations, financial condition and prospects. The process for determining whether impairment of a security is other-than-temporary usually requires complex, subjective judgments about the future financial performance and liquidity of the issuer and any collateral underlying the security in order to assess the probability of receiving all contractual principal and interest payments on the security. Our failure to assess any currency impairments or losses with respect to our securities could have a material adverse effect on our business, financial condition, results of operations and prospects.

Deterioration in the fiscal position of the U.S. federal government and downgrades in Treasury and federal agency securities could adversely affect us and our banking operations.

The long-term outlook for the fiscal position of the U.S. federal government is uncertain, as illustrated by the 2011 downgrade by certain rating agencies of the credit rating of the U.S. government and federal agencies and questions concerning the impact of the Tax Cuts and Jobs Act on the long-term fiscal position of the U.S. federal government. However, in addition to causing economic and financial market disruptions, any future downgrade, failure to continue to raise the U.S. statutory debt limit as needed, or deterioration in the fiscal outlook of the U.S. federal government, could, among other things, materially adversely affect the market value of the U.S. and other government and governmental agency securities that we hold, the availability of those securities as collateral for borrowing, and our ability to access capital markets on favorable terms. In particular, it could increase interest rates and disrupt payment systems, money markets, and long-term or short-term fixed income markets, adversely affecting the cost and availability of funding, which could negatively affect our profitability. Also, the adverse consequences of any downgrade could extend to those to whom we extend credit and could adversely affect their ability to repay their loans. Any of these developments could have a material adverse effect on our business, financial condition, results of operations and prospects.

We may be adversely affected by the soundness of other financial institutions.

Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services companies are interrelated as a result of trading, clearing, counterparty, and other relationships. We have exposure to different industries and counterparties, and through

transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, and other institutional clients. As a result, defaults by, or even rumors or questions about, one or more financial services companies, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by us or by other institutions. These losses or defaults could have a material adverse effect on our business, financial condition, results of operations and prospects.

We are subject to environmental liability risk associated with our lending activities.

In the course of our business, we may purchase real estate, or we may foreclose on and take title to real estate. As a result, we could be subject to environmental liabilities with respect to these properties. We may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination or may be required to investigate or clean up hazardous or toxic substances or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. In addition, if we are the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. Any significant environmental liabilities could have a material adverse effect on our business, financial condition, results of operations and prospects.

Risks Related to Our Industry

We are subject to extensive regulation in the conduct of our business, which imposes additional costs on us and adversely affects our profitability.

As a bank holding company, we are subject to federal regulation under the BHC Act, as amended, and the examination and reporting requirements of various federal and state agencies, including the FDIC and the Alabama Banking Department. Federal regulation of the banking industry, along with tax and accounting laws, regulations, rules, and standards, may limit our operations significantly and control the methods by which we conduct business, as they limit those of other banking organizations. Banking regulations are primarily intended to protect depositors, deposit insurance funds, and the banking system as a whole, and not stockholders or other creditors. These regulations affect lending practices, capital structure, investment practices, dividend policy, and overall growth, among other things. For example, federal and state consumer protection laws and regulations limit the manner in which we may offer and extend credit. In addition, the laws governing bankruptcy generally favor debtors, making it more expensive and more difficult to collect from customers who become subject to bankruptcy proceedings.

We also may be required to invest significant management attention and resources to evaluate and make any changes necessary to comply with applicable laws and regulations, particularly as a result of regulations adopted under the Dodd-Frank Act. This allocation of resources, as well as any failure to comply with applicable requirements, may negatively impact our financial condition and results of operations.

Changes in laws, government regulation, monetary policy or accounting standards may have a material adverse effect on our results of operations.

Financial institutions have been the subject of significant legislative and regulatory changes and may be the subject of further significant legislation or regulation in the future, none of which is within our control. New proposals for legislation could be introduced in the United States Congress that could substantially increase regulation of the bank and non-bank financial services industries and impose restrictions on the operations and general ability of firms within the industry to conduct business consistent with historical practices. Federal and state regulatory agencies also frequently adopt changes to their regulations or change the manner in which existing regulations are applied. Changes to statutes, regulations, accounting standards or regulatory policies, including changes in their interpretation or implementation by regulators, could affect us in substantial and unpredictable ways. Such changes could, among other things, subject us to additional costs and lower revenues, limit the types of financial services and products that we may offer, ease restrictions on non-banks and thereby enhance their ability to offer competing financial services and products, increase compliance costs, and require a significant amount of management's time and attention. Changes in accounting standards could materially impact, potentially even retroactively, how we report our financial condition and results of our operations. Failure to comply with statutes, regulations, or policies could result in sanctions by

regulatory agencies, civil monetary penalties, or reputational damage, each of which could have a material adverse effect on our business, financial condition, and results of operations.

Additionally, like all regulated financial institutions, we are affected by monetary policies implemented by the Federal Reserve and other federal instrumentalities. A primary instrument of monetary policy employed by the Federal Reserve is the restriction or expansion of the money supply through open market operations. This instrument of monetary policy frequently causes volatile fluctuations in interest rates, and it can have a direct, material adverse effect on the operating results of financial institutions including our business. Borrowings by the United States government to finance government debt may also cause fluctuations in interest rates and have similar effects on the operating results of such institutions. We do not have any control over monetary policies implemented by the Federal Reserve or otherwise and any changes in these policies could have a material adverse effect on our business, financial condition, results of operations and prospects.

Federal and state regulators periodically examine our business and we may be required to remediate adverse examination findings.

The Federal Reserve, the FDIC and the Alabama Banking Department periodically examine our business, including our compliance with laws and regulations. If, as a result of an examination, a federal or state banking agency were to determine that our financial condition, capital resources, asset quality, earnings prospects, management, liquidity, compliance with various regulations or other aspects of any of our operations had become unsatisfactory, or that we were in violation of any law or regulation, it may take a number of different remedial actions as it deems appropriate. These actions include the power to enjoin “unsafe or unsound” practices, to require affirmative action to correct any conditions resulting from any violation or practice, to issue an administrative order that can be judicially enforced, to direct an increase in our capital, to restrict our growth, to assess civil monetary penalties against our officers or directors, to remove officers and directors and, if it is concluded that such conditions cannot be corrected or there is an imminent risk of loss to depositors, to terminate our deposit insurance and place us into receivership or conservatorship. Any regulatory action against us could have a material adverse effect on our business, results of operations, financial condition and prospects.

FDIC deposit insurance assessments may materially increase in the future, which would have an adverse effect on earnings.

As an FDIC-insured institution, the bank is assessed a quarterly deposit insurance premium. The amount of the premium is affected by a number of factors, including the risk the bank poses to the Deposit Insurance Fund and the adequacy of the fund to cover the risk posed by all insured institutions. If either the bank or insured institutions as a whole present a greater risk to the Deposit Insurance Fund in the future than they do today, if the Deposit Insurance Fund becomes depleted in any material respect, or if other circumstances arise that lead the FDIC to determine that the Deposit Insurance Fund should be strengthened, the bank could be required to pay significantly higher deposit insurance premiums and/or additional special assessments to the FDIC. Those premiums and/or assessments could have a material adverse effect on the bank's earnings, thereby reducing the availability of funds to pay dividends to us.

We are subject to numerous laws designed to protect consumers, including the Community Reinvestment Act and fair lending laws, and failure to comply with these laws could lead to a wide variety of sanctions.

The CRA, the Equal Credit Opportunity Act, the Fair Housing Act and other fair lending laws and regulations impose nondiscriminatory lending requirements on financial institutions. The CFPB, the U.S. Department of Justice and other federal agencies are responsible for enforcing these laws and regulations. A successful regulatory challenge to an institution's performance under the CRA or fair lending laws and regulations could result in a wide variety of sanctions, including damages and civil money penalties, injunctive relief, restrictions on mergers and acquisitions activity, restrictions on expansion, and restrictions on entering new business lines. Private parties may also have the ability to challenge an institution's performance under fair lending laws in private class action litigation. Such actions could have a material adverse effect on our business, financial condition, results of operations and prospects.

Legal and regulatory proceedings and related matters with respect to the financial services industry, including those directly involving the Company or the Bank, could adversely affect us or the financial services industry in general.

We have been, and may in the future be, subject to various legal and regulatory proceedings. It is inherently difficult to assess the outcome of these matters, and there can be no assurance that we will prevail in any proceeding or litigation. Any such matter could result in substantial cost and diversion of our management's efforts, which could have a material adverse effect on our financial condition and operating results. Further, adverse determinations in such matters could result in actions by our regulators that could materially adversely affect our business, financial condition or results of operations.

We establish reserves for legal claims when payments associated with the claims become probable and the costs can be reasonably estimated. We may still incur legal costs for a matter even if we have not established a reserve. In addition, due to the inherent subjectivity of the assessments and unpredictability of the outcome of legal proceedings, the actual cost of resolving a legal claim may be substantially higher than any amounts reserved for that matter. The ultimate resolution of a pending legal proceeding, depending on the remedy sought and granted, could adversely affect our financial condition and results of operations.

We face a risk of noncompliance and enforcement action with the Bank Secrecy Act and other anti-money laundering statutes and regulations.

The Bank Secrecy Act, the USA Patriot Act, and other laws and regulations require financial institutions, among other duties, to institute and maintain an effective anti-money laundering program and file suspicious activity and currency transaction reports as appropriate. The Federal Financial Crimes Enforcement Network is authorized to impose significant civil money penalties for violations of those requirements and has engaged in coordinated enforcement efforts with the individual federal banking regulators, as well as the U.S. Department of Justice, Drug Enforcement Administration, and Internal Revenue Service. We are also subject to increased scrutiny of compliance with the rules enforced by the OFAC. If our policies, procedures and systems are deemed deficient, we would be subject to liability, including fines and regulatory actions, which may include restrictions on our ability to pay dividends and the necessity to obtain regulatory approvals to proceed with certain aspects of our business plan, including our acquisition plans. Failure to maintain and implement adequate programs to combat money laundering and terrorist financing could also have serious reputational consequences for us. Any of these results could have a material adverse effect on our business, financial condition, results of operations and prospects.

Risks Related to Our Common Stock

The market price of our common stock may be subject to substantial fluctuations, which may make it difficult for you to sell your shares at the volume, prices and times desired.

The market price of our common stock may be highly volatile, which may make it difficult for you to resell your shares at the volume, prices and times desired. There are many factors that may impact the market price and trading volume of our common stock, including, without limitation:

- actual or anticipated fluctuations in our operating results, financial condition or asset quality;
- changes in economic or business conditions;
- the effects of, and changes in, trade, monetary and fiscal policies, including the interest rate policies of the Federal Reserve;
- publication of research reports about us, our competitors, or the financial services industry generally, or changes in, or failure to meet, securities analysts' estimates of our financial and operating performance, or lack of research reports by industry analysts or ceasing of coverage;
- operating and stock price performance of companies that investors deemed comparable to us;
- future issuances of our common stock or other securities;
- additions to or departures of key personnel;
- proposed or adopted changes in laws, regulations or policies affecting us;
- perceptions in the marketplace regarding our competitors and/or us;
- significant acquisitions or business combinations, strategic partnerships, joint ventures or capital commitments by or involving our competitors or us;
- other economic, competitive, governmental, regulatory and technological factors affecting our operations, pricing, products and services; and
- other news, announcements or disclosures (whether by us or others) related to us, our competitors, our core market or the financial services industry.

The stock market and, in particular, the market for financial institution stocks, may experience substantial fluctuations, which may be unrelated to the operating performance and prospects of particular companies. In addition, significant fluctuations in the trading volume in our common stock may cause significant price variations to occur. Increased market volatility may materially and adversely affect the market price of our common stock, which could make it difficult to sell your shares at the volume, prices and times desired.

The rights of our common stockholders are subordinate to the rights of the holders of our outstanding debt and will be subordinate to the rights of the holders of any preferred securities or any debt that we may issue in the future.

Our board of directors has the authority to issue in the aggregate up to 1,000,000 shares of preferred stock, and to determine the terms of each issue of preferred stock, without stockholder approval. Accordingly, you should assume that any shares of preferred stock that we may issue in the future will also be senior to our common stock. Because our decision to issue debt or equity securities or incur other borrowings in the future will depend on market conditions and other factors beyond our control, the amount, timing, nature or success of our future capital raising efforts is uncertain. Because our ability to pay dividends on our common stock in the future will depend on our and our bank's financial condition as well as factors outside of our control, our common stockholders bear the risk that no dividends will be paid on our common stock in future periods or that, if paid, such dividends will be reduced or eliminated, which may negatively impact the market price of our common stock.

We and our bank are subject to capital and other requirements which restrict our ability to pay dividends.

In 2014, we began paying quarterly cash dividends. Future declarations of quarterly dividends will be subject to the approval of our board of directors, subject to limits imposed on us by our regulators. In order to pay any dividends, we will need to receive dividends from our bank or have other sources of funds. Under Alabama law, a state-chartered bank may not pay a dividend in excess of 90% of its net earnings until the bank's surplus is equal to at least 20% of its capital (our bank's surplus currently exceeds 20% of its capital). Moreover, our bank is also required by Alabama law to obtain the prior approval of the Superintendent for its payment of dividends if the total of all dividends declared by our bank in any calendar year will exceed the total of (1) our bank's net earnings (as defined by statute) for that year, plus (2) its retained net earnings for the preceding two years, less any required transfers to surplus. In addition, the bank must maintain certain capital levels, which may restrict the ability of the bank to pay dividends to us and our ability to pay dividends to our stockholders. As of December 31, 2018, our bank could pay approximately \$311.9 million of dividends to us without prior approval of the Superintendent. However, the payment of dividends is also subject to declaration by our board of directors, which takes into account our financial condition, earnings, general economic conditions and other factors, including statutory and regulatory restrictions. There can be no assurance that dividends will in fact be paid on our common stock in future periods or that, if paid, such dividends will not be reduced or eliminated.

Alabama and Delaware law limit the ability of others to acquire the bank, which may restrict your ability to fully realize the value of your common stock.

In many cases, stockholders receive a premium for their shares when one company purchases another. Alabama and Delaware law make it difficult for anyone to purchase the bank or us without approval of our board of directors. Thus, your ability to realize the potential benefits of any sale by us may be limited, even if such sale would represent a greater value for stockholders than our continued independent operation.

An investment in our common stock is not an insured deposit and is subject to risk of loss.

Our common stock is not a bank deposit and, therefore, is not insured against loss by the FDIC, any deposit insurance fund or by any other public or private entity. Investment in our common stock is inherently risky for the reasons described in this “*Risk Factors*” section and is subject to the same market forces that affect the price of common stock in any company. As a result, an investor may lose some or all of such investor’s investment in our common stock.

Our corporate governance documents, and certain corporate and banking laws applicable to us, could make a takeover more difficult.

Certain provisions of our certificate of incorporation, as amended (or our “charter”), and bylaws, as amended, and corporate and federal banking laws, could make it more difficult for a third party to acquire control of our organization, even if those events were perceived by many of our stockholders as beneficial to their interests. These provisions, and the corporate and banking laws and regulations applicable to us:

- provide that special meetings of stockholders may be called at any time by the Chairman of our board of directors, by the President or by order of the board of directors;
- enable our board of directors to issue preferred stock up to the authorized amount, with such preferences, limitations and relative rights, including voting rights, as may be determined from time to time by the board;
- enable our board of directors to increase the number of persons serving as directors and to fill the vacancies created as a result of the increase by a majority vote of the directors present at the meeting;
- enable our board of directors to amend our bylaws without stockholder approval; and
- do not provide for cumulative voting rights (therefore allowing the holders of a majority of the shares of common stock entitled to vote in any election of directors to elect all of the directors standing for election, if they should so choose).

These provisions may discourage potential acquisition proposals and could delay or prevent a change in control, including under circumstances in which our stockholders might otherwise receive a premium over the market price of our shares.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

As of December 31, 2018, we operated through 20 banking offices and one loan production office. Our Woodcrest Place office also includes our corporate headquarters. We believe that our banking offices are in good condition, are suitable to our needs and, for the most part, are relatively new or refurbished. The following table gives pertinent details about our banking offices.

35

(1) Offices relocated to this address. Original offices opened on date indicated.

(2) Property serves as a loan production office.

ITEM 3. LEGAL PROCEEDINGS.

Neither we nor the bank is currently subject to any material legal proceedings. In the ordinary course of business, the bank is involved in routine litigation, such as claims to enforce liens, claims involving the making and servicing of real property loans, and other issues incident to the bank's business. Management does not believe that there are any threatened proceedings against us or the bank which will have a material effect on our or the bank's business, financial position or results of operations.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Our common stock is listed on the NASDAQ Global Select Market under the symbol "SFBS." As of February 25, 2019, there were 532 holders of record of our common stock. As of the close of business on February 25, 2019, the price of our common stock was \$35.67 per share. All share and per share data in this Annual Report on Form 10-K is adjusted to reflect our two-for-one stock split in the form of a stock dividend effective on December 20, 2016 for stockholders of record on December 5, 2016.

Dividends

On December 17, 2018, our board of directors increased our quarterly cash dividend from \$0.11 per share to \$0.15 per share. Subject to the board of directors' approval and applicable regulatory requirements, we expect to continue paying cash dividends on a quarterly basis.

The principal source of our cash flow, including cash flow to pay dividends, comes from dividends that the bank pays to us as its sole shareholder. Statutory and regulatory limitations apply to the bank's payment of dividends to us, as well as our payment of dividends to our stockholders. For a more complete discussion on the restrictions on dividends, see "Supervision and Regulation - Payment of Dividends" in Item 1.

Recent Sales of Unregistered Securities

We had no sales of unregistered securities in 2018 other than those previously reported in our reports filed with the Securities and Exchange Commission.

Purchases of Equity Securities by the Registrant and Affiliated Purchasers

We made no repurchases of our equity securities, and no “affiliated purchasers” (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934) purchased any shares of our equity securities during the fourth quarter of the fiscal year ended December 31, 2018.

Equity Compensation Plan Information

The following table sets forth certain information as of December 31, 2018 relating to stock options granted under our 2005 Amended and Restated Stock Incentive Plan and our 2009 Amended and Restated Stock Incentive Plan and other options or warrants issued outside of such plans, if any.

Plan Category	Number of Securities To Be Issued Upon Exercise of Outstanding Awards	Weighted-average Exercise Price of Outstanding Awards	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans
Equity Compensation Plans Approved by Security Holders	1,238,748	\$ 13.02	3,248,774
Equity Compensation Plans Not Approved by Security Holders	-	-	-
Total	1,238,748	\$ 13.02	3,248,774

ITEM 6. SELECTED FINANCIAL DATA.

The following table sets forth selected historical consolidated financial data from our consolidated financial statements and should be read in conjunction with our consolidated financial statements including the related notes and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” which are included below. Except for the data under “Selected Performance Ratios,” “Performance Data-adjusted for non-recurring items,” “Asset Quality Ratios,” “Liquidity Ratios,” “Capital Adequacy Ratios” and “Growth Ratios,” the selected historical consolidated financial data as of and for the years ended December 31, 2018, 2017, 2016, 2015 and 2014 are derived from our audited consolidated financial statements and related notes.

(1) Net interest margin is the net yield on interest earning assets and is the difference between the interest yield earned on interest-earning assets and interest rate paid on interest-bearing liabilities, divided by average earning assets.

(2) Efficiency ratio is the result of noninterest expense divided by the sum of net interest income and noninterest income.

(3) Financial measures, adjusted for non-recurring items for 2017 exclude the impact of expenses attributable to our net deferred tax asset revaluation due to lower corporate income tax rates provided by the Tax Cuts and Jobs Act passed into law in December 2017, and lease termination and moving expenses associated with our move to our new headquarters building in 2017. Financial measures, adjusted for non-recurring items for 2015 exclude expenses related to our acquisition of Metro Bancshares, Inc. and the merger of Metro Bank with and into the Bank, and a non-recurring expense resulting from the initial funding of reserves for unfunded loan commitments consistent with guidance provided in the Federal Reserve Bank's Interagency Policy Statement SR 06-17. Financial measures, adjusted for non-recurring items for 2014 exclude a non-recurring expense related to the correction of our accounting for vested stock options granted to our advisory board members in our Huntsville, Montgomery and Dothan, Alabama

markets, and a non-recurring expense related to the acceleration of vesting of stock options previously granted to our advisory board members in our Mobile, Alabama and Pensacola, Florida markets. For a reconciliation of these non-GAAP measures to the most comparable GAAP measure, see "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures." None of the other periods included in our selected consolidated financial information are affected by such non-routine expenses.

(4) CET1 capital ratio includes common stockholders' equity excluding unrealized gains/(losses) on securities available for sale, net of taxes, and intangible assets divided by total risk-weighted assets.

(5) Tier 1 capital ratio includes CET1 and qualifying minority interest divided by total risk-weighted assets.

(6) Total capital ratio includes Tier 1 capital plus qualifying portions of subordinated debt and allowance for loan losses (limited to 1.25% of risk-weighted assets) divided by total risk-weighted assets.

(7) Tier 1 leverage ratio includes Tier 1 capital divided by average assets less intangible assets.

GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures

We recorded \$3.1 million of additional tax expense as a result of revaluing our net deferred tax assets at December 31, 2017 due to lower corporate income tax rates provided by the Tax Cuts and Jobs Act passed into law in December 2017. The revaluation adjustment of our net deferred tax asset position was impacted by a number of factors, including increased loan charge-offs, in the fourth quarter of 2017, increases in deferred tax liabilities relating to depreciation expense on our new headquarters building, and dividends from our captive real estate investment trusts. We also recorded expenses of \$347,000 related to terminating the lease agreement on our previous headquarters building in Birmingham, Alabama and expenses of moving into our new headquarters building. We recorded expenses of \$2.1 million for the first quarter of 2015 related to the acquisition of Metro Bancshares, Inc. and the merger of Metro Bank with and into the bank, and recorded an expense of \$500,000 resulting from the initial funding of reserves for unfunded loan commitments for the first quarter of 2015, consistent with guidance provided in the Federal Reserve Bank's Interagency Policy Statement SR 06-17. We recorded expenses of \$703,000 for the first quarter of 2014 resulting from the correction of our accounting for vested stock options previously granted to members of our advisory boards in our Huntsville, Montgomery and Dothan, Alabama markets, and we recorded expenses of \$1.8 million for the second quarter of 2014 resulting from an acceleration of vesting of stock options previously granted to members of our advisory boards in our Mobile, Alabama and Pensacola, Florida markets. This change in accounting treatment is a non-cash item and does not impact our operating activities or cash from operations. We consider all of the expenses in 2017, 2015 and 2014 discussed above to be non-recurring in nature. The non-GAAP financial measures included in this annual report on Form 10-K for the year ended December 31, 2018 are "net income available to common stockholders, adjusted for non-recurring items," "earnings per share, basic, adjusted for non-recurring items," "earnings per share, diluted, adjusted for non-recurring items" "return on average assets, adjusted for non-recurring items," "return on average stockholders' equity, adjusted for non-recurring items," "return on average common stockholders' equity, adjusted for non-recurring items" and "efficiency ratio, adjusted for non-recurring items." Each of these seven financial measures excludes the impact of the non-recurring expense attributable to the revaluing of our net deferred tax assets, lease termination, moving expenses, expenses related to the acquisition of Metro and the initial funding of reserves for unfunded loan commitments. None of the other periods included in our selected financial data are affected by such non-recurring items.

"Net income available to common stockholders, adjusted for non-recurring items" is defined as net income available to common stockholders, adjusted by the net effect of the non-recurring expenses discussed above.

"Earnings per share, basic, adjusted for non-recurring items" is defined as net income available to common stockholders, adjusted by the net effect of the non-recurring expenses discussed above, divided by weighted average shares outstanding.

"Earnings per share, diluted, adjusted for non-recurring items" is defined as net income available to common stockholders, adjusted by the net effect of the non-recurring expenses discussed above, divided by weighted average diluted shares outstanding.

“Return on average assets, adjusted for non-recurring items” is defined as net income, adjusted by the net effect of the non-recurring expenses discussed above, divided by average total assets.

“Return of average stockholders’ equity, adjusted for non-recurring items” is defined as net income, adjusted by the net effect of the non-recurring expenses discussed above, divided by average total stockholders’ equity.

“Return of average common stockholders’ equity, adjusted for non-recurring items” is defined as net income, adjusted by the net effect of the non-recurring expenses discussed above, divided by average common stockholders’ equity.

“Efficiency ratio, adjusted for non-recurring items” is defined as non-interest expense, adjusted by the effect of the non-recurring expenses discussed above, divided by the sum of net interest income and non-interest income.

We believe these non-GAAP financial measures provide useful information to management and investors that is supplementary to our financial condition, results of operations and cash flows computed in accordance with GAAP; however, we acknowledge that these non-GAAP financial measures have a number of limitations. As such, you should not view these disclosures as a substitute for results determined in accordance with GAAP, and they are not necessarily comparable to non-GAAP financial measures that other companies, including those in our industry, use. The following reconciliation table provides a more detailed analysis of the non-GAAP financial measures for the years ended December 31, 2017, 2015 and 2014. All amounts are in thousands, except share and per share data.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a narrative discussion and analysis of significant changes in our results of operations and financial condition. The purpose of this discussion is to focus on information about our financial condition and results of operations that is not otherwise apparent from the audited financial statements. This discussion should be read in conjunction with the financial statements and selected financial data included elsewhere in this report.

Overview

We are a bank holding company within the meaning of the BHC Act headquartered in Birmingham, Alabama. Through our wholly-owned subsidiary bank, we operate 20 full service banking offices located in Jefferson, Shelby, Madison, Montgomery, Mobile and Houston Counties in Alabama, Escambia and Hillsborough Counties in Florida, Cobb and Douglas Counties in Georgia, Charleston County in South Carolina and Davidson County in Tennessee. These offices operate in the Birmingham-Hoover, Huntsville, Montgomery, Mobile and Dothan, Alabama MSAs, the Pensacola-Ferry Pass-Brent and Tampa-St. Petersburg-Clearwater, Florida MSAs, the Atlanta-Sandy Springs-Roswell, Georgia MSA, the Charleston-North Charleston, South Carolina MSA and the Nashville-Davidson-Murfreesboro-Franklin, Tennessee MSA. We also operate 1 loan production office in Fort Walton, Florida. Our principal business is to accept deposits from the public and to make loans and other investments. Our principal source of funds for loans and investments are demand, time, savings, and other deposits and the amortization and prepayment of loans and borrowings. Our principal sources of income are interest and fees collected on loans, interest and dividends collected on other investments and service charges. Our principal expenses are interest paid on savings and other deposits, interest paid on our other borrowings, employee compensation, office expenses and other overhead expenses.

Critical Accounting Policies

Our consolidated financial statements are prepared based on the application of certain accounting policies, the most significant of which are described in the Notes to the Consolidated Financial Statements. Certain of these policies require numerous estimates and strategic or economic assumptions that may prove inaccurate or subject to variation and may significantly affect our reported results and financial position for the current period or in future periods. The use of estimates, assumptions, and judgments are necessary when financial assets and liabilities are required to be recorded at, or adjusted to reflect, fair value. Assets carried at fair value inherently result in more financial statement volatility. Fair values and information used to record valuation adjustments for certain assets and liabilities are based on either quoted market prices or are provided by other independent third-party sources, when available. When such information is not available, management estimates valuation adjustments. Changes in underlying factors, assumptions or estimates in any of these areas could have a material impact on our future financial condition and results of operations.

Allowance for Loan Losses

The allowance for loan losses, sometimes referred to as the “ALLL,” is established through periodic charges to income. Loan losses are charged against the ALLL when management believes that the future collection of principal is unlikely. Subsequent recoveries, if any, are credited to the ALLL. If the ALLL is considered inadequate to absorb future loan losses on existing loans for any reason, including but not limited to, increases in the size of the loan portfolio, increases in charge-offs or changes in the risk characteristics of the loan portfolio, then the provision for loan losses is increased. Our management reviews the adequacy of the ALLL on a quarterly basis. The ALLL calculation is segregated into various segments that include classified loans, loans with specific allocations and pass rated loans. A pass rated loan is generally characterized by a very low to average risk of default and in which management perceives there is a minimal risk of loss. Loans are rated using a nine-point risk grade scale with loan officers having the primary responsibility for assigning risk grades and for the timely reporting of changes in the risk grades. Based on these processes, and the assigned risk grades, the criticized and classified loans in the portfolio are segregated into the following regulatory classifications: Special Mention, Substandard, Doubtful or Loss, with some general allocation of reserve based on these grades. Reserve percentages assigned to non-impaired loans are based on historical charge-off experience adjusted for other risk factors. To evaluate the overall adequacy of the allowance to absorb losses inherent in our loan portfolio, our management considers historical loss experience based on volume and types of loans, trends in classifications, volume and trends in delinquencies and nonaccruals, economic conditions and other pertinent information. Based on future evaluations, additional provisions for loan losses may be necessary to maintain the allowance for loan losses at an appropriate level.

Loans are considered impaired when, based on current information and events, it is probable that the bank will be unable to collect all amounts due according to the original terms of the loan agreement. The collection of all amounts due according to contractual terms means that both the contractual interest and principal payments of a loan will be collected as scheduled in the loan agreement. Impaired loans are measured based on the present value of expected

future cash flows discounted at the loan's effective interest rate, or, as a practical expedient, at the loan's observable market price, or the fair value of the underlying collateral. The fair value of collateral, reduced by costs to sell on a discounted basis, is used if a loan is collateral-dependent.

Income Taxes

Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

The Company follows the provisions of ASC 740-10, *Income Taxes*. ASC 740-10 establishes a single model to address accounting for uncertain tax positions. ASC 740-10 clarifies the accounting for income taxes by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. ASC 740-10 also provides guidance on derecognition measurement classification interest and penalties, accounting in interim periods, disclosure, and transition. ASC 740-10 provides a two-step process in the evaluation of a tax position. The first step is recognition. A Company determines whether it is more likely than not that a tax position will be sustained upon examination, including a resolution of any related appeals or litigation processes, based upon the technical merits of the position. The second step is measurement. A tax position that meets the more likely than not recognition threshold is measured at the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

Results of Operations

Net Income Available to Common Stockholders

Net income available to common stockholders was \$136.9 million for the year ended December 31, 2018, compared to \$93.0 million for the year ended December 31, 2017. This increase in net income is primarily attributable to an increase in net interest income, which increased \$35.3 million, or 15.5%, to \$262.7 million in 2018 from \$227.4 million in 2017 and a decrease in income tax expense, which decreased from \$44.3 million in 2017 to \$31.9 million in 2018 resulting from lower corporate income tax rates from the passage of the Tax Cut and Jobs Act in December 2017. Noninterest income increased \$2.0 million, or 12.0%, to \$19.4 million in 2018 from \$17.4 million in 2017. Noninterest expense increased by \$7.7 million, or 9.1%, to \$91.9 million in 2018 from \$84.2 million in 2017. Basic and diluted net income per common share were \$2.57 and \$2.53, respectively, for the year ended December 31, 2018, compared to \$1.76 and \$1.72, respectively, for the year ended December 31, 2017. Return on average assets was 1.88% in 2018, compared to 1.43% in 2017, and return on average stockholders' equity was 20.96% in 2018, compared to 16.38% in 2017.

Net income available to common stockholders was \$93.0 million for the year ended December 31, 2017, compared to \$81.4 million for the year ended December 31, 2016. This increase in net income is primarily attributable to an increase in net interest income, which increased \$40.3 million, or 21.5%, to \$227.4 million in 2017 from \$187.1 million in 2016. Noninterest income increased \$0.4 million, or 2.1%, to \$17.4 million in 2017 from \$17.0 million in 2016. Noninterest expense increased by \$4.3 million, or 5.4%, to \$84.2 million in 2017 from \$79.9 million in 2016. Basic and diluted net income per common share were \$1.76 and \$1.72, respectively, for the year ended December 31, 2017, compared to \$1.55 and \$1.52, respectively, for the year ended December 31, 2016. Return on average assets was 1.43% in 2017, compared to 1.42% in 2016, and return on average stockholders' equity was 16.38% in 2017, compared to 16.64% in 2016.

The following table presents some ratios of our results of operations for the years ended December 31, 2018, 2017 and 2016.

	For the Years Ended		
	December 31,		
	2018	2017	2016
Return on average assets	1.88 %	1.43 %	1.42 %
Return on average stockholders' equity	20.96 %	16.38 %	16.64 %
Dividend payout ratio	15.04 %	11.64 %	10.53 %
Average stockholders' equity to average total assets	8.98 %	8.75 %	8.52 %

The following tables present a summary of our statements of income, including the percent change in each category, for the years ended December 31, 2018 compared to 2017, and for the years ended December 31, 2017 compared to 2016, respectively.

	Year Ended December 31,		Change from the Prior Year
	2018	2017	
	(Dollars in Thousands)

Noninterest income	17,361	17,007	2.08%
Noninterest expense	84,209	79,888	5.41%
Income before income taxes	137,350	110,818	23.94%
Income taxes	44,258	29,339	50.85%
Net income	93,092	81,479	14.25%
Dividends on preferred stock	62	47	31.91%
Net income available to common stockholders	\$93,030	\$81,432	14.24%

Net Interest Income

Net interest income is the difference between the income earned on interest-earning assets and interest paid on interest-bearing liabilities used to support such assets. The major factors which affect net interest income are changes in volumes, the yield on interest-earning assets and the cost of interest-bearing liabilities. Our management's ability to respond to changes in interest rates by effective asset-liability management techniques is critical to maintaining the stability of the net interest margin and the momentum of our primary source of earnings.

Net interest income increased \$35.3 million, 15.5%, to \$262.7 million for the year ended December 31, 2018 from \$227.4 million for the year ended December 31, 2017. Total interest income increased \$63.9 million, or 24.3%, to \$326.6 million from \$262.8 million year-over-year, while total interest expense increased \$28.6 million, or 81.0%, to \$63.9 million from \$35.3 million year-over-year. Average earning assets increased \$781.7 million, or 12.5%, to \$7.01 billion in 2018 from \$6.23 billion in 2017. All but one of our regional markets grew loans during 2018.

Net interest income increased \$40.3 million, 21.5%, to \$227.4 million for the year ended December 31, 2017 from \$187.1 million for the year ended December 31, 2016. Total interest income increased \$49.9 million, or 23.4%, to \$262.8 million from \$212.9 million year-over-year, while total interest expense increased \$9.5 million, or 36.9%, to \$35.3 million from \$25.8 million year-over-year. Average earning assets increased \$706.8 million, or 12.8%, to \$6.23 billion in 2017 from \$5.23 billion in 2016. All of our regional markets grew loans during 2017.

Net Interest Margin Analysis

The net interest margin is impacted by the average volumes of interest-sensitive assets and interest-sensitive liabilities and by the difference between the yield on interest-sensitive assets and the cost of interest-sensitive liabilities (spread). Loan fees collected at origination represent an additional adjustment to the yield on loans. Our spread can be affected by economic conditions, the competitive environment, loan demand, and deposit flows. The net yield on earning assets is an indicator of effectiveness of our ability to manage the net interest margin by managing the overall yield on assets and cost of funding those assets.

The following table shows, for the years ended December 31, 2018, 2017 and 2016, the average balances of each principal category of our assets, liabilities and stockholders' equity, and an analysis of net interest revenue, and the change in interest income and interest expense segregated into amounts attributable to changes in volume and changes in rates. This table is presented on a taxable equivalent basis, if applicable.

Non-interest-bearing checking	1,480,827			1,351,112			1,190,372			
Other liabilities	21,170			16,501			13,582			
Stockholders' equity	660,304			567,741			485,543			
Unrealized gains on securities	(6,914)			487			4,097			
Total liabilities and stockholders' equity	\$7,276,084			\$6,495,067			\$5,745,683			
Net interest income		\$263,135			\$229,441			\$189,130		
Net interest spread			3.41	%		3.47	%		3.25	
Net interest margin			3.75	%		3.68	%		3.42	

(1) Non-accrual loans are included in average loan balances in all periods. Loan fees of \$3,733, \$3,259 and \$2,273 are included in interest income in 2018, 2017 and 2016, respectively.

(2) Accretion on acquired loan discounts of \$163, \$464 and \$980 are included in interest income in 2018, 2017 and 2016, respectively.

(3) Interest income and yields are presented on a fully taxable equivalent basis using a tax rate of 21% in 2018 and 35% in 2017 and 2016.

(4) Unrealized (losses) gains of \$(8,808), \$755 and \$6,301 are excluded from the yield calculation in 2018, 2017 and 2016, respectively.

(5) Accretion on acquired CD premiums of \$32 and \$237 are included in interest expense in 2017 and 2016, respectively.

The following table reflects changes in our net interest margin as a result of changes in the volume and rate of our interest-bearing assets and liabilities.

	For the Year Ended December 31,					
	2018 Compared to 2017			2017 Compared to 2016		
	Increase (Decrease) in Interest Income and Expense Due to Changes in:			Increase (Decrease) in Interest Income and Expense Due to Changes in:		
	Volume	Rate	Total	Volume	Rate	Total
Interest-earning assets:						
Loans, net of unearned income:						
Taxable	\$38,265	\$20,595	\$58,860	\$38,976	\$6,721	\$45,697
Tax-exempt	(148)	(364)	(512)	791	17	808
Total loans, net of unearned income	38,117	20,231	58,348	39,767	6,738	46,505
Mortgage loans held for sale	(83)	16	(67)	(35)	(5)	(40)
Debt securities:

Total interest-bearing liabilities	4,726	23,889	28,615	2,775	6,753	9,528
Increase (decrease) in net interest income	\$33,963	\$(269)	\$33,694	\$38,004	\$2,307	\$40,311

In the table above, changes in net interest income are attributable to (a) changes in average balances (volume variance), (b) changes in rates (rate variance), or (c) changes in rate and average balances (rate/volume variance). The volume variance is calculated as the change in average balances times the old rate. The rate variance is calculated as the change in rates times the old average balance. The rate/volume variance is calculated as the change in rates times the change in average balances. The rate/volume variance is allocated on a pro rata basis between the volume variance and the rate variance in the table above.

From 2017 to 2018, growth in loans was the primary driver of our volume component change and overall favorable change. The rate component was unfavorable as average rates paid on interest-bearing liabilities increased 47 basis points while loan yields increased 36 basis points. Increased rates and yields were primarily the result of increases in rates by the Federal Reserve Bank during 2018. Growth in non-interest-bearing deposits and equity also contributed to the improvement in net interest margin in 2018.

From 2016 to 2017, our growth in loans was the primary driver of our volume component change and overall favorable change. The rate component was modestly net favorable as loan yields increased 15 basis points compared to a 12 basis-point increase in interest-bearing deposit cost. Growth in non-interest-bearing deposits and equity also contributed to the improvement in net interest margin in 2017.

The two primary factors that make up the spread are the interest rates received on loans and the interest rates paid on deposits. We have been disciplined in raising interest rates on deposits only as the market demanded and thereby managing our cost of funds. Also, we have not competed for new loans on interest rate alone, but rather we have relied significantly on effective marketing to business customers.

Our net interest spread and net interest margin were 3.41% and 3.75%, respectively, for the year ended December 31, 2018, compared to 3.47% and 3.68%, respectively, for the year ended December 31, 2017. The increase in net interest spread and net interest margin in 2018 primarily resulted from growth in average interest-earning assets. Our average interest-earning assets for the year ended December 31, 2018 increased \$781.7 million, or 12.5%, to \$7.01 billion from \$6.23 billion for the year ended December 31, 2017. This increase in our average interest-earning assets was due to continued core growth in our markets and increased loan production. Our average interest-bearing liabilities increased \$561.5 million, or 12.3%, to \$5.12 billion for the year ended December 31, 2018 from \$4.56 billion for the year ended December 31, 2017. All but one of our markets had an increase in total deposits during 2018. The ratio of our average interest-earning assets to average interest-bearing liabilities was 136.9% and 136.7% for the years ended December 31, 2018 and 2017, respectively, as average noninterest-bearing deposits grew by \$129.7 million, or 9.6%, from 2017 to 2018.

Our average interest-earning assets produced a taxable equivalent yield of 4.66% for the year ended December 31, 2018, compared to 4.25% for the year ended December 31, 2017. The average rate paid on interest-bearing liabilities was 1.25% for the year ended December 31, 2018, compared to 0.77% for the year ended December 31, 2017.

Our net interest spread and net interest margin were 3.47% and 3.68%, respectively, for the year ended December 31, 2017, compared to 3.25% and 3.42%, respectively, for the year ended December 31, 2016. The increase in net interest spread and net interest margin in 2017 primarily resulted from growth in average interest-earning assets. Our average interest-earning assets for the year ended December 31, 2017 increased \$706.8 million, or 12.8%, to \$6.23 billion from \$5.53 billion for the year ended December 31, 2016. This increase in our average interest-earning assets was due to continued core growth in all of our markets and increased loan production. Our average interest-bearing liabilities increased \$507.1 million, or 12.5%, to \$4.56 billion for the year ended December 31, 2017 from \$4.05 billion for the year ended December 31, 2016. All of our markets had an increase in total deposits during 2017. The ratio of our average interest-earning assets to average interest-bearing liabilities was 136.7% and 136.4% for the years ended December 31, 2017 and 2016, respectively, as average noninterest-bearing deposits grew by \$160.7 million, or 13.5%, from 2016 to 2017.

Our average interest-earning assets produced a taxable equivalent yield of 4.25% for the year ended December 31, 2017, compared to 3.89% for the year ended December 31, 2016. The average rate paid on interest-bearing liabilities was 0.77% for the year ended December 31, 2017, compared to 0.64% for the year ended December 31, 2016.

Provision for Loan Losses

The provision for loan losses represents the amount determined by management to be necessary to maintain the ALLL at a level capable of absorbing inherent losses in the loan portfolio. See the section captioned “Allowance for Loan Losses” located elsewhere in this item for additional discussion related to provision for loan losses.

The provision expense for loan losses was \$21.4 million for the year ended December 31, 2018, a decrease of \$1.8 million from \$23.2 million in 2017. Nonperforming loans increased to \$27.8 million, or 0.43% of total loans, at December 31, 2018 from \$10.8 million, or 0.19% of total loans, at December 31, 2017. During 2018, we had net charged-off loans totaling \$12.2 million, compared to net charged-off loans of \$15.7 million for 2017. The ratio of net charged-off loans to average loans was 0.20% for 2018 compared to 0.29% for 2017. The ALLL totaled \$68.6 million, or 1.05% of loans, net of unearned income, at December 31, 2018, compared to \$59.4 million, or 1.02% of loans, net of unearned income, at December 31, 2017.

The provision expense for loan losses was \$23.2 million for the year ended December 31, 2017, an increase of \$9.8 million from \$13.4 million in 2016. This increase in provision expense for loan losses for 2017 is primarily attributable to a \$5.8 million charge-off on one commercial relationship as well as the impact of loan growth. Nonperforming loans decreased to \$10.8 million, or 0.19% of total loans, at December 31, 2017 from \$16.9 million, or 0.34% of total loans, at December 31, 2016. During 2017, we had net charged-off loans totaling \$15.7 million, compared to net charged-off loans of \$4.9 million for 2016. The ratio of net charged-off loans to average loans was 0.29% for 2017 compared to 0.11% for 2016. The ALLL totaled \$59.4 million, or 1.02% of loans, net of unearned income, at December 31, 2017, compared to \$51.9 million, or 1.06% of loans, net of unearned income, at December 31, 2016.

Noninterest Income

Noninterest income increased \$2.0 million, or 12.0%, to \$19.4 million in 2018 from \$17.4 million in 2017. Service charges on deposit accounts increased \$0.8 million, or 14.8%, to \$6.5 million in 2018 compared to 2017 due to increases in the number of accounts. Mortgage banking income decreased \$1.0 million, or 35.7%, to \$2.8 million in 2018 compared to 2017, as increases in interest rates drove lower loan volumes. Credit card income increased \$2.0 million, or 54.4%, to \$5.6 million in 2018 compared to 2017, primarily due to a 33% increase in the number of accounts and a 26% increase in the amount of spending on cards during 2018. The increase in cash surrender value of bank-owned life insurance contracts was flat at \$3.1 million in 2018 compared to 2017. We have not purchased life insurance contracts since May 2017. Other operating income increased \$0.1 million, or 12.7%, to \$1.2 million in 2018 compared to 2017.

Noninterest income increased \$0.4 million, or 2.1%, to \$17.4 million in 2017 from \$17.0 million in 2016. Service charges on deposit accounts increased \$0.3 million, or 6.5%, to \$5.7 million in 2017 compared to 2016 due to increases in the number of accounts. Mortgage banking income increased \$0.1 million, or 3.0%, to \$3.8 million in 2017 compared to 2016. Credit card income increased \$1.1 million, or 46.8%, to \$3.6 million in 2017 compared to 2016, primarily due to a 78% increase in number of accounts and a 61% increase in total spending. The cash surrender value of bank-owned life insurance contracts increased \$0.3 million, or 12.1%, to \$3.1 million in 2017 compared to 2016 which is the result of additional investment of \$10.0 million in such contracts in May of 2017. Other operating income decreased by \$1.5 million, or 48.5%, to \$1.6 million in 2017 compared to 2016. A gain on sale of fixed assets of \$1.4 million was recognized during 2016. Excluding this gain, other operating income decreased \$0.2 million in 2017 compared to 2016.

Noninterest Expense

Noninterest expenses increased \$7.7 million, or 9.1%, to \$91.9 million for the year ended December 31, 2018 from \$84.2 million for the year ended December 31, 2017. Salary and employee benefits expenses increased \$4.2 million, or 8.9%, to \$51.8 million in 2018 compared to 2017. We had 468 full-time equivalent employees at December 31, 2018 compared to 428 at December 31, 2017, a 9.3% increase. Of the 40 new employees added during 2018, 13 were in operation support positions. The remaining 27 were in sales and customer service positions. Equipment and occupancy expense increased \$0.4 million, or 5.1%, to \$8.4 million in 2018 compared to 2017. We moved into our new headquarters building in Birmingham, Alabama, which is owned by us, during the fourth quarter of 2017. Depreciation expense increased \$0.9 million year-over-year while building rental expense decreased \$1.1 million year-over-year. Professional services expense increased \$0.4 million, or 13.3%, to \$3.6 million in 2018 compared to 2017. Most of this increase is the result of expenses associated with compliance and our new loan operations system. FDIC assessments were flat at \$3.9 million from 2017 to 2018. Expenses on other real estate owned increased \$0.5 million to \$0.8 million in 2018 compared to \$0.3 million 2017, primarily the result of increased write-downs on properties owned during 2018 and expenses associated with subdividing and performing site preparation on a piece of land. Other operating expenses increased \$2.2 million, or 10.4%, to \$23.3 million in 2018 compared to 2017. Increased data processing and loan expenses continue to be driven by growth in loans and increases in transactions on loan and deposit accounts. Increased service charges from the Federal Reserve Bank of Atlanta are the result of increased processing of transactions by us for our correspondent banking clients. Changes in other operating expenses from 2017 to 2018 are detailed in Note 15, “*Other Operating Income and Expenses*,” to the Consolidated Financial Statements.

Noninterest expenses increased \$4.3 million, or 5.4%, to \$84.2 million for the year ended December 31, 2017 from \$79.9 million for the year ended December 31, 2016. Higher salary and employee benefits expenses, FDIC and regulatory assessments and other operating expenses drove this increase in total noninterest expense. Salary and employee benefits expenses increased \$3.6 million, or 8.3%, to \$47.6 million in 2017 compared to 2016. We had 428 full-time equivalent employees at December 31, 2017 compared to 412 at December 31, 2016, a 3.9% increase. Staffing Tampa Bay, Florida, our newest market, and new hires in operations staffing in our Birmingham headquarters drove this increase in the number of employees during 2017. Equipment and occupancy expense only increased \$33,000, or 0.4%, to \$8.0 million in 2017 compared to 2016. We moved into our new headquarters building in Birmingham, Alabama, which is owned by us, during the fourth quarter of 2017. We anticipate the cost of operating this new larger facility will be approximately the same as operating our previous headquarters office, which was leased by us. Professional services expense decreased \$0.8 million, or 19.1%, to \$3.2 million in 2017 compared to 2016. Most of this decrease is the result of lower legal accruals related to pending litigation. FDIC assessments were up \$0.5 million, or 15.2%, to \$3.9 million in 2017 from \$3.4 million in 2016, a result of increases in total assets, which is the major component of our assessment base, and higher assessment rates implemented by the FDIC starting with the second quarter of 2016 assessment. Expenses on other real estate owned decreased \$0.4 million, or 57.4%, to \$0.3 million in 2017 compared to 2016, primarily the result of fewer write-downs on properties owned during 2017. Other operating expenses increased \$1.3 million, or 6.6%, to \$21.1 million in 2017 compared to 2016. Higher data processing and loan expenses were the result of growth in loans and increases in transactions on loan and deposit accounts. Higher state sales taxes resulted from our new headquarters building in Birmingham, Alabama. Higher service charges from the Federal Reserve Bank of Atlanta were the result of increased processing of transactions by us for our correspondent banking clients. Changes in other operating expenses from 2016 to 2017 are detailed in Note 15,

“*Other Operating Income and Expenses*,” to the Consolidated Financial Statements.

Income Tax Expense

Income tax expense was \$31.9 million for the year ended December 31, 2018 compared to \$44.3 million in 2017 and \$29.3 million in 2016. Our effective tax rates for 2018, 2017 and 2016 were 18.89%, 32.22% and 26.47%, respectively. Lower federal tax rates resulting from the passage of the Tax Cuts and Jobs Act, discussed further below, took effect January 1, 2018 and have driven our effective tax rate lower. The higher effective tax rate for 2017 is due to \$3.1 million of additional tax expense resulting from revaluing our net deferred tax assets as of December 22, 2017 in connection with the Tax Cuts and Jobs Act. The revaluation adjustment required of our net deferred tax asset position was impacted by a number of factors, including increased loan charge-offs, in the fourth quarter of 2017, increases in deferred tax liabilities relating to depreciation expense on our new headquarters building, and dividends from our captive real estate investment trusts. We recognized historic rehabilitation tax credits during 2015 and 2016, resulting in lower effective tax rates in those years. Our primary permanent differences are related to tax exempt income on debt securities, state income tax benefit on real estate investment trust dividends, various qualifying tax credits and change in cash surrender value of bank-owned life insurance.

We have invested \$130.6 million in bank-owned life insurance for certain named officers of the Bank. The periodic increases in cash surrender value of those policies are tax exempt and therefore contribute to a larger permanent difference between book income and taxable income.

We own real estate investment trusts for the purpose of holding and managing participations in residential mortgages and commercial real estate loans originated by the bank. The trusts are majority-owned subsidiaries of a trust holding company, which in turn is an indirect, wholly-owned subsidiary of the bank. The trusts earn interest income on the loans they hold and incur operating expenses related to their activities. They pay their net earnings, in the form of dividends, to the bank, which receives a deduction for state income taxes.

Tax Cuts and Jobs Act. The Tax Cuts and Jobs Act was enacted on December 22, 2017. Among other things, the new law (a) established a new, flat corporate federal statutory income tax rate of 21%, (b) eliminated the corporate alternative minimum tax and allows the use of any such carryforwards to offset regular tax liability for any taxable year, (c) limits the deduction for net interest expense incurred by U.S. corporations, (d) allows businesses to immediately expense, for tax purposes, the cost of new investments in certain qualified depreciable assets, (e) eliminated or reduced certain deductions related to meals and entertainment expenses, (f) modifies the limitation on excessive employee remuneration to eliminate the exception for performance-based compensation and clarifies the definition of a covered employee, and (g) limits the deductibility of deposit insurance premiums. The Tax Cuts and Jobs Act also significantly changes U.S. tax law related to foreign operations, however, such changes do not currently impact us.

Financial Condition

Assets

Total assets at December 31, 2018, were \$8.0 billion, an increase of \$0.9 billion, or 12.7%, over total assets of \$7.1 billion at December 31, 2017. Average assets for the year ended December 31, 2018 were \$7.3 billion, an increase of \$0.8 billion, or 12.3%, over average assets of \$6.5 billion for the year ended December 31, 2017. Loan growth was the primary reason for the increase in ending and average total assets. Year-end 2018 loans were \$6.5 billion, up \$0.6 billion, or 18.4%, over year-end 2017 total loans of \$5.0 billion.

Total assets at December 31, 2017, were \$7.1 billion, an increase of \$0.7 billion, or 10.9%, over total assets of \$6.4 billion at December 31, 2016. Average assets for the year ended December 31, 2017 were \$6.5 billion, an increase of \$0.7 billion, or 12.3%, over average assets of \$5.7 billion for the year ended December 31, 2016. Loan growth was the primary reason for the increase in ending and average total assets. Year-end 2017 loans were \$5.9 billion, up \$0.9

billion, or 18.4%, over year-end 2016 total loans of \$4.9 billion.

Earning assets include loans, securities, short-term investments and bank-owned life insurance contracts. We maintain a higher level of earning assets in our business model than do our peers because we allocate fewer of our resources to facilities, ATMs, and cash and due-from-bank accounts used for transaction processing. Earning assets at December 31, 2018 were \$7.7 billion, or 96.3% of total assets of \$8.0 billion. Earning assets at December 31, 2017 were \$6.9 billion, or 97.2% of total assets of \$7.1 billion. We believe this ratio is expected to generally continue at these levels, although it may be affected by economic factors beyond our control.

Investment Portfolio

We view the investment portfolio as a source of income and liquidity. Our investment strategy is to accept a lower immediate yield in the investment portfolio by targeting shorter term investments. Our investment policy provides that no more than 60% of our total investment portfolio should be composed of municipal securities. At December 31, 2018, mortgage-backed securities represented 51.6% of the investment portfolio, state and municipal securities represented 18.0% of the investment portfolio, U.S. Treasury and government agencies represented 13.0% of the investment portfolio, and corporate debt represented 17.4% of the investment portfolio.

All of our investments in mortgage-backed securities are pass-through mortgage-backed securities. We do not have currently, and did not have at December 31, 2018, any structured investment vehicles or any private-label mortgage-backed securities. The amortized cost of securities in our portfolio totaled \$596.2 million at December 31, 2018, compared to \$538.4 million at December 31, 2017.

In the fourth quarter of 2017, we transferred certain of our held-to-maturity securities to available-for-sale in order to provide more flexibility managing our investment portfolio. As a result of this transfer, we will be prohibited from classifying any investment securities as held-to-maturity for two years from the date of the transfer.

The following table presents the amortized cost of securities available for sale and held to maturity by type at December 31, 2018, 2017 and 2016.

	December 31,		
	2018	2017	2016
	(In Thousands)		
Debt Securities Available for Sale			
U.S. Treasury and government sponsored agencies	\$77,534	\$55,567	\$45,998
Mortgage-backed securities	309,244	278,177	228,843
State and municipal securities	106,465	134,641	139,504
Corporate debt	102,982	69,996	8,985
Total	\$596,225	\$538,381	\$423,330
Debt Securities Held to Maturity			
State and municipal securities	\$-	\$250	\$19,164
	-	-	5,888
	-	-	37,512
Total	\$-	\$250	\$62,564

The following table presents the amortized cost of our securities as of December 31, 2018 by their stated maturities (this maturity schedule excludes security prepayment and call features), as well as the taxable equivalent yields for each maturity range.

Maturity of Debt Securities - Amortized Cost

	Less Than One Year	One Year through Five Years	Six Years through Ten Years	More Than Ten Years	Total
	(In Thousands)				
Securities Available for Sale:					
U.S. Treasury and government agencies	\$9,958	\$67,576	\$-	\$-	\$77,534

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

Mortgage-backed securities	72	14,197	100,127	194,849	309,245
State and municipal securities	18,324	80,381	4,805	2,954	106,464

Total	\$38,416	\$182,068	\$177,938	\$197,803	\$596,225
Tax-equivalent Yield (1)					
U.S. Treasury and government agencies	1.91	% 2.28	% -	% -	% 1.98 %
Mortgage-backed securities	4.33	2.27	2.15	2.95	2.66
State and municipal securities	2.40	2.42	3.34	4.54	2.52
Corporate debt	3.60	2.97	5.07	-	4.52
Weighted average yield	2.59	% 2.42	% 3.38	% 2.97	% 2.87 %

(1) Yields are presented on a fully-taxable equivalent basis using a tax rate of 21%.

At December 31, 2018, we had \$223.8 million in federal funds sold, compared with \$239.5 million at December 31, 2017. At year-end 2018, there were no holdings of securities of any issuer, other than the U.S. government and its agencies, in an amount greater than 10% of stockholders' equity.

The objective of our investment policy is to invest funds not otherwise needed to meet our loan demand to earn the maximum return, yet still maintain sufficient liquidity to meet fluctuations in our loan demand and deposit structure. In doing so, we balance the market and credit risks against the potential investment return, make investments compatible with the pledge requirements of any deposits of public funds, maintain compliance with regulatory investment requirements, and assist certain public entities with their financial needs. The investment committee has full authority over the investment portfolio and makes decisions on purchases and sales of securities. The entire portfolio, along with all investment transactions occurring since the previous board of directors meeting, is reviewed by the board at each monthly meeting. The investment policy allows portfolio holdings to include short-term securities purchased to provide us with needed liquidity and longer term securities purchased to generate level income for us over periods of interest rate fluctuations.

Loan Portfolio

We had total loans of approximately \$6.5 billion at December 31, 2018. The following table shows the percentage of our total loan portfolio assigned to each of our markets. A large majority of our loan customers are located within our market MSAs, as is the collateral for their loans. With our loan portfolio concentrated in a limited number of markets, there is a risk that our borrowers' ability to repay their loans from us could be affected by changes in local and regional economic conditions.

	Percentage of Total Loans Assigned to Market	
Birmingham, AL	42	%
Huntsville, AL	9	%
Dothan, AL	10	%
Montgomery, AL	5	%
Mobile, AL	7	%
Total Alabama Markets	73	%
Pensacola, FL	6	%
Tampa Bay, FL	3	%

Allowance for loan losses as a percentage of:					
Year-end loans	1.05 %	1.02 %	1.06 %	1.03 %	1.06 %
Nonperforming assets	208.26 %	338.96 %	237.23 %	329.96 %	210.95 %

The allowance for loan losses is established and maintained at levels needed to absorb anticipated credit losses from identified and otherwise inherent risks in the loan portfolio as of the balance sheet date. In assessing the adequacy of the allowance for loan losses, management considers its evaluation of the loan portfolio, past due loan experience, collateral values, current economic conditions and other factors considered necessary to maintain the allowance at an adequate level. Our management feels that the allowance was adequate at December 31, 2018.

The following table presents the allocation of the allowance for loan losses for each respective loan category with the corresponding percent of loans in each category to total loans.

	For the Years Ended December 31,											
	2018		2017		2016		2015		2014			
	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans
(Dollars in Thousands)

We target small and medium-sized businesses as loan customers. Because of their size, these borrowers may be less able to withstand competitive or economic pressures than larger borrowers in periods of economic weakness. If loan losses occur at a level where the loan loss reserve is not sufficient to cover actual loan losses, our earnings will decrease. We use an independent consulting firm to review our loans annually for quality in addition to the reviews that may be conducted by bank regulatory agencies as part of their examination process.

As of December 31, 2018, we had impaired loans of \$38.6 million, a decrease of \$1.9 million from \$40.5 million as of December 31, 2017. We allocated \$8.1 million of our allowance for loan losses at December 31, 2018 to these impaired loans compared to \$5.6 million at December 31, 2017. We had previous write-downs against impaired loans of \$8.1 million at December 31, 2018, compared to \$7.2 million at December 31, 2017. The recorded investment in impaired loans at December 31, 2018 is also inclusive of a purchase loan discount associated with the acquisition of Metro Bank totaling \$0.2 million. The average recorded balance for 2018 of impaired loans was \$43.0 million. A loan is considered impaired, based on current information and events, if it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the original loan agreement. Impairment does not always indicate credit loss, but provides an indication of collateral exposure based on prevailing market conditions and third-party valuations. Impaired loans are measured by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral-dependent. The amount of any initial impairment and subsequent changes in impairment are included in the allowance for loan losses. Our credit administration group performs verification and testing to ensure appropriate identification of impaired loans and that proper reserves are allocated to these loans.

Interest on accruing impaired loans is recognized as long as such loans do not meet the criteria for nonaccrual status. If further credit deterioration occurs and the criteria for nonaccrual status is met, all interest accrued but not collected is reversed against current interest income. Loans included as impaired and in nonaccrual status totaled \$21.9 million at December 31, 2018, an increase of \$11.1 million compared to \$10.8 million at December 31, 2017. The increase in nonaccrual loans is primarily attributable to one commercial relationship totaling \$10.4 million being placed on nonaccrual status during the fourth quarter of 2018. Interest income foregone throughout the year on nonaccrual loans was \$976,000, and we recognized \$871,000 of interest income on nonaccrual loans for the year ended December 31, 2018, compared to interest income foregone in 2017 of \$1,012,000 and \$506,000 of interest income recognized on nonaccrual loans for the year ended December 31, 2017.

At December 31, 2018, total loans rated Special Mention, Substandard, and Doubtful were \$139.0 million, or 2.1% of total loans, compared to \$99.8 million, or 1.7% of total loans, at December 31, 2017.

Of the \$38.6 million of impaired loans reported as of December 31, 2018, \$18.4 million were commercial and industrial loans, \$18.6 million were real estate mortgage loans, \$1.5 million were real estate construction loans and \$49,000 were consumer loans.

The bank has procedures and processes in place intended to ensure that losses do not exceed the potential amounts documented in the bank's impairment analyses and reduce potential losses in the remaining performing loans within our real estate construction portfolio. These include the following:

- We closely monitor the past due and overdraft reports on a weekly basis to identify deterioration as early as possible and the placement of identified loans on the watch list.
- We perform extensive monthly credit reviews for all watch list/classified loans, including formulation of aggressive workout or action plans. When a workout is not achievable, we move to collection/foreclosure proceedings to obtain control of the underlying collateral as rapidly as possible to minimize the deterioration of collateral and/or the loss of its value.
- We require updated financial information, global inventory aging and interest carry analysis for existing customers to help identify potential future loan payment problems.
- We generally limit loans for new construction to established builders and developers that have an established record of turning their inventories, and we restrict our funding of undeveloped lots and land.

Nonperforming Assets

The table below summarizes our nonperforming assets at December 31, 2018, 2017, 2016, 2015 and 2014:

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

Interest income recognized on nonaccrual loans throughout year	\$871		\$506		\$629		\$602		\$255	
Ratios:										
Nonperforming loans to total loans	0.43	%	0.19	%	0.34	%	0.18	%	0.30	%

Nonperforming assets to total loans plus other real estate owned and repossessions	0.50 %	0.30 %	0.44 %	0.31 %	0.50 %
Nonperforming assets and restructured accruing loans to total loans plus other real estate owned and repossessions	0.55 %	0.59 %	0.46 %	0.47 %	0.75 %

The balance of nonperforming assets can fluctuate due to changes in economic conditions. We have established a policy to discontinue accruing interest on a loan (i.e., place the loan on nonaccrual status) after it has become 90 days delinquent as to payment of principal or interest, unless the loan is considered to be well-collateralized and is actively in the process of collection. In addition, a loan will be placed on nonaccrual status before it becomes 90 days delinquent unless management believes that the collection of interest is expected. Interest previously accrued but uncollected on such loans is reversed and charged against current income when the receivable is determined to be uncollectible. Interest income on nonaccrual loans is recognized only as received. If we believe that a loan will not be collected in full, we will increase the allowance for loan losses to reflect management's estimate of any potential exposure or loss. Generally, payments received on nonaccrual loans are applied directly to principal. There are not any loans, outside of those included in the table above, that cause management to have serious doubts as to the ability of borrowers to comply with present repayment terms.

Deposits

We rely on increasing our deposit base to fund loan and other asset growth. Each of our markets is highly competitive. We compete for local deposits by offering attractive products with competitive rates. We expect to have a higher average cost of funds for local deposits than competitor banks due to our lack of an extensive branch network. Our management's strategy is to offset the higher cost of funding with a lower level of operating expense and firm pricing discipline for loan products. We have promoted electronic banking services by providing them without charge and by offering in-bank customer training. The following table presents the average balance and average rate paid on each of the following deposit categories at the bank level for years ended December 31, 2018, 2017 and 2016:

Types of Deposits:	Average Deposits					
	Average for Years Ended December 31, 2018		2017		2016

Total deposits	\$6,265,902		\$5,541,557		\$4,753,250	

The following table presents the maturities of our certificates of deposit as of December 31, 2018 and 2017.

At December 31, 2018	Over \$250,000	Less than or equal to \$250,000	Total
Maturity	(In Thousands)		
Three months or less	\$ 46,890	\$ 35,634	\$ 82,524
Over three through six months	58,153	47,187	105,340
Over six months through one year	117,692	81,379	199,071
Over one year	198,918	93,725	292,643
Total	\$ 421,653	\$ 257,925	\$ 679,578

At December 31, 2017	Over \$250,000	Less than or equal to \$250,000	Total
Maturity	(In Thousands)		
Three months or less	\$ 46,778	\$ 41,772	\$ 88,550
Over three through six months	37,759	36,805	74,564
Over six months through one year	124,188	66,111	190,299
Over one year	133,977	83,852	217,829
Total	\$ 342,702	\$ 228,540	\$ 571,242

Total average deposits for the year ended December 31, 2018 were \$6.3 billion, an increase of \$0.7 billion, or 13.1%, over total average deposits of \$5.5 billion for the year ended December 31, 2017. Average noninterest-bearing deposits increased by \$0.1 billion, or 9.6%, from \$1.35 billion for the year ended December 31, 2017 to \$1.48 billion for the year ended December 31, 2018.

Total average deposits for the year ended December 31, 2017 were \$5.5 billion, an increase of \$0.8 billion, or 16.6%, over total average deposits of \$4.8 billion for the year ended December 31, 2016. Average noninterest-bearing deposits increased by \$0.2 billion, or 13.5%, from \$1.2 billion for the year ended December 31, 2016 to \$1.35 billion for the year ended December 31, 2017.

Borrowed Funds

We had available \$562.0 million in unused federal funds lines of credit with regional banks as of December 31, 2018, compared to \$468.0 million as of December 31, 2017. The increase was attributable to additional lines of credit initiated with new banks during 2018. These lines are subject to certain restrictions and in some cases collateral

requirements.

Federal funds purchased from correspondent banks averaged \$270.9 million, \$312.2 million and \$433.7 million for 2018, 2017 and 2016, respectively. We paid average interest rates on these funds of 1.96%, 1.15% and 0.64% for the same three years, respectively. The maximum amount outstanding at month-end during 2018 and 2017 was \$326.4 million and \$394.1 million, respectively.

Stockholders' Equity

Stockholders' equity increased \$107.8 million during 2018, to \$715.2 million at December 31, 2018 from \$607.6 million at December 31, 2017. The increase in stockholders' equity resulted primarily from net income of \$136.9 million during the year ended December 31, 2018, less dividends paid or declared on our common stock of \$25.6 million during the year ended December 31, 2018.

Stockholders' equity increased \$84.7 million during 2017, to \$607.6 million at December 31, 2017 from \$522.9 million at December 31, 2016. The increase in stockholders' equity resulted primarily from net income of \$93.1 million during the year ended December 31, 2017, less dividends paid or declared on our common stock of \$10.6 million during the year ended December 31, 2017.

Off-Balance Sheet Arrangements

In the normal course of business, we are a party to financial credit arrangements with off-balance sheet risk to meet the financing needs of our customers. These financial credit arrangements include commitments to extend credit beyond current fundings, credit card arrangements, standby letters of credit and financial guarantees. Those credit arrangements involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheet. The contract or notional amounts of those instruments reflect the extent of involvement we have in those particular financial credit arrangements. All such credit arrangements bear interest at variable rates and we have no such credit arrangements which bear interest at fixed rates.

Our exposure to credit loss in the event of non-performance by the other party to the financial instrument for commitments to extend credit, credit card arrangements and standby letters of credit is represented by the contractual or notional amount of those instruments. We use the same credit policies in making commitments and conditional obligations as we do for on-balance sheet instruments.

The following table sets forth our credit arrangements and financial instruments whose contract amounts represent credit risk as of December 31, 2018, 2017 and 2016:

	2018	2017	2016
	(In Thousands)		
Commitments to extend credit	\$1,985,801	\$1,945,171	\$1,667,015

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

Credit card arrangements	173,613	128,149	100,678
Standby letters of credit and financial guarantees	40,590	41,654	40,991
Total	\$2,200,004	\$2,114,974	\$1,808,684

Commitments to extend credit beyond current fundings are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Such commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained if deemed necessary by us upon extension of credit is based on our management's credit evaluation. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, and income-producing commercial properties.

Standby letters of credit are conditional commitments issued by us to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. All letters of credit are due within one year or less of the original commitment date. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

Derivatives

The bank has entered into agreements with secondary market investors to deliver loans on a "best efforts delivery" basis. When a rate is committed to a borrower, it is based on the best price that day and locked with our investor for our customer for a 30-day period. In the event the loan is not delivered to the investor, the bank has no risk or exposure with the investor. The interest rate lock commitments related to loans that are originated for later sale are classified as derivatives. The fair values of our agreements with investors and rate lock commitments to customers as of December 31, 2018 and 2017 were not material.

Asset and Liability Management

The matching of assets and liabilities may be analyzed by examining the extent to which such assets and liabilities are “interest rate sensitive” and by monitoring an institution’s interest rate sensitivity “gap.” An asset or liability is said to be interest rate sensitive within a specific time period if it will mature or reprice within that time period. The interest rate sensitivity gap is defined as the difference between the dollar amount of rate-sensitive assets repricing during a period and the volume of rate-sensitive liabilities repricing during the same period. A gap is considered positive when the amount of interest rate-sensitive assets exceeds the amount of interest rate-sensitive liabilities. A gap is considered negative when the amount of interest rate-sensitive liabilities exceeds the amount of interest rate-sensitive assets. During a period of rising interest rates, a negative gap would tend to adversely affect net interest income while a positive gap would tend to result in an increase in net interest income. During a period of falling interest rates, a negative gap would tend to result in an increase in net interest income while a positive gap would tend to adversely affect net interest income.

Our asset liability and investment committee is charged with monitoring our liquidity and funds position. The committee regularly reviews the rate sensitivity position on a three-month, six-month and one-year time horizon; loans-to-deposits ratios; and average maturities for certain categories of liabilities. The asset liability committee uses a model to analyze the maturities of rate-sensitive assets and liabilities. The model measures the “gap” which is defined as the difference between the dollar amount of rate-sensitive assets repricing during a period and the volume of rate-sensitive liabilities repricing during the same period. Gap is also expressed as the ratio of rate-sensitive assets divided by rate-sensitive liabilities. If the ratio is greater than “one,” then the dollar value of assets exceeds the dollar value of liabilities and the balance sheet is “asset sensitive.” Conversely, if the value of liabilities exceeds the dollar value of assets, then the ratio is less than one and the balance sheet is “liability sensitive.” Our internal policy requires our management to maintain the gap such that net interest margins will not change more than 10% if interest rates change by 100 basis points or more than 15% if interest rates change by 200 basis points. As of December 31, 2018, our gap was within such ranges. See “—Quantitative and Qualitative Analysis of Market Risk” below in Item 7A for additional information.

Liquidity and Capital Adequacy

Liquidity

Liquidity is defined as our ability to generate sufficient cash to fund current loan demand, deposit withdrawals, or other cash demands and disbursement needs, and otherwise to operate on an ongoing basis.

Liquidity is managed at two levels. The first is the liquidity of the Company. The second is the liquidity of the bank. The management of liquidity at both levels is critical, because the Company and the bank have different funding needs and sources, and each are subject to regulatory guidelines and requirements. We are subject to general FDIC guidelines which require a minimum level of liquidity. Management believes our liquidity ratios meet or exceed these guidelines. Our management is not currently aware of any trends or demands that are reasonably likely to result in liquidity increasing or decreasing in any material manner.

The retention of existing deposits and attraction of new deposit sources through new and existing customers is critical to our liquidity position. In the event of compression in liquidity due to a run-off in deposits, we have a liquidity policy and procedure that provides for certain actions under varying liquidity conditions. These actions include borrowing from existing correspondent banks, selling or participating loans and the curtailment of loan commitments and funding. At December 31, 2018, our liquid assets, represented by cash and due from banks, federal funds sold and unpledged available-for-sale securities, totaled \$973.7 million. Additionally, at such date we had available to us approximately \$562.0 million in unused federal funds lines of credit with regional banks, subject to certain restrictions and collateral requirements, to meet short term funding needs. We believe these sources of funding are adequate to meet immediate anticipated funding needs. Our management meets on a weekly basis to review sources and uses of funding to determine the appropriate strategy to ensure an appropriate level of liquidity, and we have increased our focus on the generation of core deposit funding to supplement our liquidity position. At the current time, our long-term liquidity needs primarily relate to funds required to support loan originations and commitments and deposit withdrawals.

Our regular sources of funding are from the growth of our deposit base, repayment of principal and interest on loans, the sale of loans and the renewal of time deposits. We also may continue periodic offerings of debt and equity securities.

The following table reflects the contractual maturities of our term liabilities as of December 31, 2018. The amounts shown do not reflect any early withdrawal or prepayment assumptions.

	<u>Payments due by Period</u>				
	Total	less than 1 year	1 - 3 years	3 - 5 years	Over 5 years
Contractual Obligations (1)					
Deposits without a stated maturity	\$6,236,130	\$6,236,130	\$-	\$-	\$-
Certificates of deposit (2)	679,578	386,936	187,063	105,530	49
Federal funds purchased	288,725	288,725	-	-	-
Other borrowings	65,000	-	-	-	65,000
Operating lease commitments	16,576	3,084	5,454	4,463	3,575
Total	\$7,286,009	\$6,914,875	\$192,517	\$109,993	\$68,624

(1) Excludes interest.

(2) Certificates of deposit give customers the right to early withdrawal. Early withdrawals may be subject to penalties.

The penalty amount depends on the remaining time to maturity at the time of early withdrawal.

Capital Adequacy

As of December 31, 2018, our most recent notification from the FDIC categorized us as well-capitalized under the regulatory framework for prompt corrective action. To remain categorized as well-capitalized, we must maintain minimum common equity tier 1 risk-based, Tier 1 risk-based, total risk-based, and Tier 1 leverage ratios as disclosed in the table below. Our management believes that we are well-capitalized under the prompt corrective action provisions as of December 31, 2018. In addition, the Alabama Banking Department has required that the bank maintain a leverage ratio of 8.00%.

The following table sets forth (i) the capital ratios of the bank required by the FDIC to maintain “well-capitalized” status and (ii) our actual ratios of capital to total regulatory or risk-weighted assets, as of December 31, 2018.

Well-	Actual at
Capitalized	December 31,

			2018	
CET 1 Capital Ratio	6.50	%	11.03	%
Tier 1 Capital Ratio	8.00	%	11.04	%
Total Capital Ratio	10.00	%	12.03	%
Leverage ratio	5.00	%	9.89	%

For a description of capital ratios see Note 14 to “Notes to Consolidated Financial Statements.”

Impact of Inflation

Our consolidated financial statements and related data presented herein have been prepared in accordance with generally accepted accounting principles which require the measure of financial position and operating results in terms of historic dollars, without considering changes in the relative purchasing power of money over time due to inflation.

Inflation generally increases the costs of funds and operating overhead, and to the extent loans and other assets bear variable rates, the yields on such assets. Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates generally have a more significant effect on the performance of a financial institution than the effects of general levels of inflation. In addition, inflation affects financial institutions’ cost of goods and services purchased, the cost of salaries and benefits, occupancy expense, and similar items. Inflation and related increases in interest rates generally decrease the market value of investments and loans held and may adversely affect liquidity, earnings and stockholders’ equity. Mortgage originations and refinancing tend to slow as interest rates increase, and likely will reduce our volume of such activities and the income from the sale of residential mortgage loans in the secondary market.

Adoption of Recent Accounting Pronouncements

New accounting standards are discussed in Note 1 to “Notes to Consolidated Financial Statements.”

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Like all financial institutions, we are subject to market risk from changes in interest rates. Interest rate risk is inherent in the balance sheet due to the mismatch between the maturities of rate-sensitive assets and rate-sensitive liabilities. If rates are rising, and the level of rate-sensitive liabilities exceeds the level of rate-sensitive assets, the net interest margin will be negatively impacted. Conversely, if rates are falling, and the level of rate-sensitive liabilities is greater than the level of rate-sensitive assets, the impact on the net interest margin will be favorable. Managing interest rate risk is further complicated by the fact that all rates do not change at the same pace; in other words, short term rates may be rising while longer term rates remain stable. In addition, different types of rate-sensitive assets and rate-sensitive liabilities react differently to changes in rates.

To manage interest rate risk, we must take a position on the expected future trend of interest rates. Rates may rise, fall, or remain the same. Our Asset Liability Committee (“ALCO”) develops its view of future rate trends and strives to manage rate risk within a targeted range by monitoring economic indicators, examining the views of economists and other experts, and understanding the current status of our balance sheet. Our annual budget reflects the anticipated rate environment for the next twelve months. The asset liability committee conducts a quarterly analysis of the rate sensitivity position and reports its results to our board of directors.

The ALCO uses modeling techniques to analyze the maturities of rate-sensitive assets and liabilities. The model measures the “gap” which is defined as the difference between the dollar amount of rate-sensitive assets repricing during a period and the volume of rate-sensitive liabilities repricing during the same period. The gap is also expressed as the ratio of rate-sensitive assets divided by rate-sensitive liabilities. If the ratio is greater than “one,” the dollar value of assets exceeds the dollar value of liabilities; the balance sheet is “asset sensitive.” Conversely, if the value of liabilities exceeds the value of assets, the ratio is less than one and the balance sheet is “liability sensitive.”

The ALCO employs simulations using interest rate ramps and shocks, parallel and non-parallel yield curve shifts, a set of “benchmark” rate scenarios, and a set of alternative rate scenarios over varying magnitudes and time horizons to measure net interest income at risk. Policy limits for changes in net interest income are established for one and two-year time horizons. If a measure of risk produced by the simulations violates policy guidelines, such violation is reported to the Board of Directors along with a plan to bring the measure back within the guideline.

The model measures scheduled maturities in periods of three months, four to twelve months, one to five years and over five years. The chart below illustrates our rate-sensitive position at December 31, 2018. Management uses the one-year gap as the appropriate time period for setting strategy.

Rate Sensitive Gap Analysis

	1-3 Months (Dollars in Thousands)	4-12 Months	1-5 Years	Over 5 Years	Total
Interest-earning assets:					
Loans, including mortgages held for sale	\$2,928,333	\$768,110	\$2,581,556	\$255,620	\$6,533,619
Securities	32,714	79,589	367,949	110,826	591,078
Federal funds sold	223,845	-	-	-	223,845
Interest bearing balances with banks	244,916	1,240	5,460	-	251,616
Total interest-earning assets	\$3,429,808	\$848,939	\$2,954,965	\$366,446	\$7,600,158
Interest-bearing liabilities:					
Deposits:					
Interest-bearing checking	\$964,144	\$-	\$-	\$-	\$964,144
Money market and savings	3,714,645	-	-	-	3,714,645
Time deposits	82,523	304,412	292,595	48	679,578
Federal funds purchased	-	-	-	64,666	64,666
Other borrowings	288,725	-	-	-	288,725
Total interest-bearing liabilities	5,050,037	304,412	292,595	64,714	5,711,758
Interest sensitivity gap	\$(1,620,229)	\$544,527	\$2,662,370	\$301,732	\$1,888,400
Cumulative sensitivity gap	\$(1,620,229)	\$(1,075,702)	\$1,586,668	\$1,888,400	\$-
Percent of cumulative sensitivity Gap to total interest-earning assets	(21.32)%	(14.15)%	20.88 %	24.85 %	%

The interest rate risk model that defines the gap position also performs a “rate shock” test of the balance sheet. The rate shock procedure measures the impact on the economic value of equity (EVE) which is a measure of long term interest rate risk. EVE is the difference between the market value of our assets and the liabilities and is our liquidation value. In this analysis, the model calculates the discounted cash flow or market value of each category on the balance sheet. The percentage change in EVE is a measure of the volatility of risk. Regulatory guidelines specify a maximum change of 30% for a 200 basis points rate change. Short term rates dropped to historically low levels during 2009 and remained at those low levels until the Federal Reserve started increasing its target rate in December 2015. Since the first increase, the Federal Reserve has raised its targeted federal funds rate by 225 basis points to its current rate of 2.50%. At December 31, 2018, the model shows an increase in our EVE for all upward shifts in rates.

The chart below identifies the EVE impact of a downward shift in rates of 100 and 200 basis points and an upward shift in rates of 100, 200, 300 and 400 basis points.

Economic Value of Equity Under Rate Shock
At December 31, 2018

	0 bps	-200 bps	-100 bps	+100 bps	+200 bps	+300 bps	+400 bps
	(Dollars in Thousands)						
Economic value of equity	\$715,203	\$582,890	\$660,848	\$741,666	\$758,115	\$771,704	\$782,432
Actual dollar change		\$(132,313)	\$(54,355)	\$26,463	\$42,912	\$56,501	\$67,229
Percent change		(18.50)%	(7.60)%	3.70 %	6.00 %	7.90 %	9.40 %

The one-year gap ratio of negative 14.2% indicates that we would show a decrease in net interest income in a rising rate environment, and the EVE rate shock shows that the EVE would increase in a rising rate environment. The EVE simulation model is a static model which provides information only at a certain point in time. For example, in a rising rate environment, the model does not take into account actions which management might take to change the impact of rising rates on us. Given that limitation, it is still useful in assessing the long-range impact of unanticipated movements in interest rates.

The above analysis may not on its own be an entirely accurate indicator of how net interest income or EVE will be affected by changes in interest rates. Income associated with interest earning assets and costs associated with interest bearing liabilities may not be affected uniformly by changes in interest rates. In addition, the magnitude and duration of changes in interest rates may have a significant impact on net interest income. Interest rates on certain types of assets and liabilities fluctuate in advance of changes in general market rates, while interest rates on other types may lag behind changes in general market rates. Our asset liability committee develops its view of future rate trends by monitoring economic indicators, examining the views of economists and other experts, and understanding the current status of our balance sheet and conducts a quarterly analysis of the rate sensitivity position. The results of the analysis are reported to our board of directors.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of

ServisFirst Bancshares, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of ServisFirst Bancshares, Inc. and subsidiaries (the "Company") as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows, for each of the three years in the period ended December 31, 2018, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 28, 2019, expressed an unqualified opinion thereon.

Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, the Company early adopted the provisions of Accounting Standards Update 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting during the year ended December 31, 2016.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Dixon Hughes Goodman LLP

We have served as the Company's auditor since 2014.

Atlanta, Georgia

February 28, 2019

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders

ServisFirst Bancshares, Inc.

Opinion on Internal Control Over Financial Reporting

We have audited ServisFirst Bancshares, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, ServisFirst Bancshares, Inc. and subsidiaries (the "Company") maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated financial statements of ServisFirst Bancshares, Inc. as of December 31, 2018 and 2017 and for each of the three years in the period ended December 31, 2018, and our report dated February 28, 2019, expressed an unqualified opinion on those consolidated financial statements and included an explanatory paragraph regarding the Company's early adoption of the provisions of Accounting Standards Update 2016-09, *Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* during the year ended December 31, 2016.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

SERVISFIRST BANCSHARES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

ServisFirst Bancshares, Inc. (the “Company”) was formed on August 16, 2007 and is a bank holding company whose business is conducted by its wholly-owned subsidiary ServisFirst Bank (the “Bank”). The Bank is headquartered in Birmingham, Alabama, and has provided a full range of banking services to individual and corporate customers throughout the Birmingham market since opening for business in May 2005. The Bank has since expanded into the Huntsville, Montgomery, Dothan and Mobile, Alabama, Pensacola and Tampa Bay, Florida, Atlanta, Georgia, Charleston, South Carolina and Nashville, Tennessee markets. The Bank owns all of the stock of SF Intermediate Holding Company, Inc., which, in turn, owns all of the stock of SF Holding 1, Inc., which, in turn, owns all of the common stock of the Company’s real estate investment trusts, SF Realty 1, Inc., SF FLA Realty, Inc., SF GA Realty, Inc. and SF TN Realty, Inc. More details about SF Intermediate Holding Company, Inc. and its subsidiaries are included in Note 10.

Reclassification

Certain amounts reported in prior years have been reclassified to conform to the current year’s presentation. These reclassifications had no effect on the Company’s results of operations, financial position, or net cash flow.

Basis of Presentation and Accounting Estimates

To prepare consolidated financial statements in conformity with U.S. generally accepted accounting principles, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided, and future results could differ. The allowance for loan losses, valuation of foreclosed real estate, goodwill and other intangible assets and fair values of financial instruments are particularly subject to change. All numbers are in thousands except share and per share data.

Cash, Due from Banks, Interest-Bearing Balances due from Financial Institutions

Cash and due from banks includes cash on hand, cash items in process of collection, amounts due from banks and interest bearing balances due from financial institutions. For purposes of cash flows, cash and cash equivalents include cash and due from banks and federal funds sold. Generally, federal funds are purchased and sold for one-day periods. Cash flows from loans, mortgage loans held for sale, federal funds sold, and deposits are reported net.

The Bank is required to maintain reserve balances in cash or on deposit with the Federal Reserve Bank based on a percentage of deposits. The total of those reserve balances was approximately \$51.0 million at December 31, 2018 and \$51.8 million at December 31, 2017.

Debt Securities

Securities are classified as available-for-sale when they might be sold before maturity. Unrealized holding gains and losses, net of tax, on securities available for sale are reported as a net amount in a separate component of stockholders' equity until realized. Gains and losses on the sale of securities available for sale are determined using the specific-identification method. The amortization of premiums and the accretion of discounts are recognized in interest income using methods approximating the interest method over the period to maturity.

Declines in the fair value of available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses. Securities are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. Held-to-maturity securities are reported at amortized cost. In determining the existence of other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Investments in Equity Securities Carried at Cost

Investments in restricted equity securities without a readily determinable market value are carried at cost.

Mortgage Loans Held for Sale

The Company classifies certain residential mortgage loans as held for sale. Typically mortgage loans held for sale are sold to a third party investor within a very short time period. The loans are sold without recourse and servicing is not retained. Net fees earned from this banking service are recorded in noninterest income.

In the course of originating mortgage loans and selling those loans in the secondary market, the Company makes various representations and warranties to the purchaser of the mortgage loans. Each loan is underwritten using government agency guidelines. Any exceptions noted during this process are remedied prior to sale. These representations and warranties also apply to underwriting the real estate appraisal opinion of value for the collateral securing these loans. Under the representations and warranties, failure by the Company to comply with the underwriting and/or appraisal standards could result in the Company being required to repurchase the mortgage loan or to reimburse the investor for losses incurred (make whole requests) if such failure cannot be cured by the Company within the specified period following discovery. The Company continues to experience an insignificant level of investor repurchase demands. There were no expenses incurred as part of these buyback obligations for the years ended December 31, 2018 and 2017.

Loans

Loans are reported at unpaid principal balances, less unearned fees and the allowance for loan losses. Interest on all loans is recognized as income based upon the applicable rate applied to the daily outstanding principal balance of the loans. Interest income on nonaccrual loans is recognized on a cash basis or cost recovery basis until the loan is returned to accrual status. A loan may be returned to accrual status if the Company is reasonably assured of repayment of principal and interest and the borrower has demonstrated sustained performance for a period of at least six months. Loan fees, net of direct costs, are reflected as an adjustment to the yield of the related loan over the term of the loan. The Company does not have a concentration of loans to any one industry.

The accrual of interest on loans is discontinued when there is a significant deterioration in the financial condition of the borrower and full repayment of principal and interest is not expected or the principal or interest is more than 90 days past due, unless the loan is both well-collateralized and in the process of collection. Generally, all interest accrued but not collected for loans that are placed on nonaccrual status are reversed against current interest income. Interest collections on nonaccrual loans are generally applied as principal reductions. The Company determines past due or delinquency status of a loan based on contractual payment terms.

A loan is considered impaired when it is probable the Company will be unable to collect all principal and interest payments due according to the contractual terms of the loan agreement. Individually identified impaired loans are measured based on the present value of expected payments using the loan's original effective rate as the discount rate, the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. If the recorded investment in the impaired loan exceeds the measure of fair value, a valuation allowance may be established as part of the allowance for loan losses. Changes to the valuation allowance are recorded as a component of the provision for loan losses.

Impaired loans also include troubled debt restructurings ("TDRs"). In the normal course of business management grants concessions to borrowers, which would not otherwise be considered, where the borrowers are experiencing financial difficulty. The concessions granted most frequently for TDRs involve reductions or delays in required payments of principal and interest for a specified time, the rescheduling of payments in accordance with a bankruptcy plan or the charge-off of a portion of the loan. In some cases, the conditions of the credit also warrant nonaccrual status, even after the restructure occurs. As part of the credit approval process, the restructured loans are evaluated for adequate collateral protection in determining the appropriate accrual status at the time of restructure. TDR loans may be returned to accrual status if there has been at least a six month sustained period of repayment performance by the borrower.

Acquired loans are recorded at fair value at the date of acquisition, and accordingly no allowance for loan losses is transferred to the acquiring entity in connection with acquisition accounting. The fair values of loans with evidence of credit deterioration (purchased, credit impaired loans) are initially recorded at fair value, but thereafter accounted for differently than purchased, non-credit impaired loans. For purchased credit impaired loans, cash flows are estimated at Day 1 and discounted at a market interest rate which creates accretable yield to be recognized over the life of the loan. Contractual principal and interest payments not expected to be collected are considered non-accretable difference. Subsequent to the acquisition date, management continues to monitor cash flows on a quarterly basis, to determine the performance of each purchased credit impaired loan in comparison to management's initial performance expectations.

Subsequent decreases to the expected cash flows will generally result in a provision for loan losses. Subsequent significant increases in cash flows result in a reversal of the provision for loan losses to the extent of prior provisions or a reclassification of amount from non-accretable difference to accretable yield, with a positive impact on the accretion of interest income in future periods.

Acquired performing loans are accounted for using the contractual cash flows method of recognizing discount accretion based on the acquired loans' contractual cash flows. Acquired performing loans are recorded as of the acquisition date at fair value, considering credit and other risks, with no separate allowance for loan losses account. Credit losses on the acquired performing loans are estimated in future periods based on analysis of the performing portfolio. A provision for loan losses is recognized for any further credit deterioration that occurs in these loans subsequent to the acquisition date. Fair value discounts on Day 1 are accreted as interest income over the life of the loans.

Allowance for Loan Losses

The allowance for loan losses is maintained at a level which, in management's judgment, is adequate to absorb credit losses inherent in the loan portfolio. The amount of the allowance is based on management's evaluation of the collectability of the loan portfolio, including the nature of the portfolio, credit concentrations, trends in historical loss experience, specific impaired loans, economic conditions, and other risks inherent in the portfolio. Allowances for impaired loans are generally determined based on collateral values or the present value of the estimated cash flows. The allowance is increased by a provision for loan losses, which is charged to expense, and reduced by charge-offs, net of recoveries. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the allowance for losses on loans. Such agencies may require the Company to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

Foreclosed Real Estate

Foreclosed real estate includes both formally foreclosed property and in-substance foreclosed property. At the time of foreclosure, foreclosed real estate is recorded at fair value less cost to sell, which becomes the property's new basis. Any write downs based on the asset's fair value at date of acquisition are charged to the allowance for loan losses. After foreclosure, these assets are carried at the lower of their new cost basis or fair value less cost to sell. Costs incurred in maintaining foreclosed real estate and subsequent adjustments to the carrying amount of the property are included in other operating expenses.

Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation. Expenditures for additions and major improvements that significantly extend the useful lives of the assets are capitalized. Expenditures for repairs and maintenance are charged to expense as incurred. Assets which are disposed of are removed from the accounts and the resulting gains or losses are recorded in operations. Depreciation is calculated on a straight-line basis over the

estimated useful lives of the related assets (3 to 39.5 years).

Leasehold improvements are amortized on a straight-line basis over the lesser of the lease terms or the estimated useful lives of the improvements.

Goodwill and Other Identifiable Intangible Assets

Other identifiable intangible assets include a core deposit intangible recorded in connection with the acquisition of Metro Bancshares, Inc. The core deposit intangible is being amortized over 7 years and the estimated useful life is periodically reviewed for reasonableness.

The Company has recorded \$13.6 million of goodwill at December 31, 2018 in connection with the acquisition of Metro Bancshares, Inc. in 2015. The Company tests its goodwill for impairment annually unless interim events or circumstances make it more likely than not that an impairment loss has occurred. Impairment is defined as the amount by which the implied fair value of the goodwill is less than the goodwill's carrying value. Impairment losses, if incurred, would be charged to operating expense. For the purposes of evaluating goodwill, the Company has determined that it operates only one reporting unit.

Derivatives and Hedging Activities

As part of its overall interest rate risk management, the Company uses derivative instruments, which can include interest rate swaps, caps, and floors. Financial Accounting Standards Board ("FASB") ASC 815-10, Derivatives and Hedging, requires all derivative instruments to be carried at fair value on the balance sheet. This accounting standard provides special accounting provisions for derivative instruments that qualify for hedge accounting. To be eligible, the Company must specifically identify a derivative as a hedging instrument and identify the risk being hedged. The derivative instrument must be shown to meet specific requirements under this accounting standard.

The Company designates the derivative on the date the derivative contract is entered into as (1) a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (a “fair-value” hedge) or (2) a hedge of a forecasted transaction of the variability of cash flows to be received or paid related to a recognized asset or liability (a “cash-flow” hedge). Changes in the fair value of a derivative that is highly effective as a fair-value hedge, and that is designated and qualifies as a fair-value hedge, along with the loss or gain on the hedged asset or liability that is attributable to the hedged risk (including losses or gains on firm commitments), are recorded in current-period earnings. The effective portion of the changes in the fair value of a derivative that is highly effective and that is designated and qualifies as a cash-flow hedge is recorded in other comprehensive income, until earnings are affected by the variability of cash flows (e.g., when periodic settlements on a variable-rate asset or liability are recorded in earnings). The remaining gain or loss on the derivative, if any, in excess of the cumulative change in the present value of future cash flows of the hedged item is recognized in earnings.

The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives that are designated as fair-value or cash-flow hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. The Company also formally assessed, both at the hedge’s inception and on an ongoing basis (if the hedges do not qualify for short-cut accounting), whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, the Company discontinues hedge accounting prospectively, as discussed below. The Company discontinues hedge accounting prospectively when: (1) it is determined that the derivative is no longer effective in offsetting changes in the fair value or cash flows of a hedged item (including firm commitments or forecasted transactions); (2) the derivative expires or is sold, terminated, or exercised; (3) the derivative is re-designated as a hedge instrument, because it is unlikely that a forecasted transaction will occur; (4) a hedged firm commitment no longer meets the definition of a firm commitment; or (5) management determines that designation of the derivative as a hedge instrument is no longer appropriate.

When hedge accounting is discontinued because it is determined that the derivative no longer qualifies as an effective fair-value hedge, hedge accounting is discontinued prospectively and the derivative will continue to be carried on the balance sheet at its fair value with all changes in fair value being recorded in earnings but with no offsetting being recorded on the hedged item or in other comprehensive income for cash flow hedges.

The Company uses derivatives to hedge interest rate exposures associated with mortgage loans held for sale and mortgage loans in process. The Company regularly enters into derivative financial instruments in the form of forward contracts, as part of its normal asset/liability management strategies. The Company’s obligations under forward contracts consist of “best effort” commitments to deliver mortgage loans originated in the secondary market at a future date. Interest rate lock commitments related to loans that are originated for later sale are classified as derivatives. In the normal course of business, the Company regularly extends these rate lock commitments to customers during the loan origination process. The fair values of the Company’s forward contract and rate lock commitments to customers as of December 31, 2018 and 2017 were not material and have not been recorded.

Revenue Recognition

Accounting Standards Codification (“ASC”) Topic 606, *Revenue from Contracts with Customers* (“ASC 606”), provides guidance for reporting revenue from the entity’s contracts to provide goods or services to customers. The guidance requires recognition of revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration that it expects to be entitled to receive in exchange for those goods or services recognized as performance obligations are satisfied.

The majority of revenue-generating transactions are excluded from the scope of ASC 606, including revenue generated from financial instruments, such as securities and loans. Revenue-generating transactions that are within the scope of ASC 606, classified within non-interest income, are described as follows:

Deposit account service charges – represent service fees for monthly activity and maintenance on customer accounts. Attributes can be transaction-based, item-based or time-based. Revenue is recognized when our performance obligation is completed which is generally monthly for maintenance services or when a transaction is processed. Payment for such performance obligations are generally received at the time the performance obligations are satisfied.

Credit card rewards program membership fees – represent memberships in our credit card rewards program and are paid annually by our cardholders at the time they open an account and on each anniversary. Revenue is recognized ratably over the membership period.

Other non-interest income primarily includes income on bank owned life insurance contracts, letter of credit fees and gains on sale of loans held for sale, none of which are within the scope of ASC 606.

Adoption of ASC 606

The Company adopted ASC 606 as of January 1, 2018 for all contracts as of the effective date. Prior period amounts were reclassified to conform to the guidance requirements related to the net presentation of certain costs associated with interchange fees for credit and debit cards. The reclassification of prior period amounts reduced noninterest income and noninterest expense by \$1.7 million and \$1.1 million for the years ended December 31, 2017 and 2016, respectively, and had no impact on net income in either year. There was no cumulative adjustment made to opening retained earnings as of January 1, 2018.

Income Taxes

Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

;

The Company follows the provisions of ASC 740-10, *Income Taxes*. ASC 740-10 establishes a single model to address accounting for uncertain tax positions. ASC 740-10 clarifies the accounting for income taxes by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. ASC 740-10 also provides guidance on derecognition measurement classification interest and penalties, accounting in interim periods, disclosure, and transition. ASC 740-10 provides a two-step process in the evaluation of a tax position. The first step is recognition. A Company determines whether it is more likely than not that a tax position will be sustained upon examination, including a resolution of any related appeals or litigation processes, based upon the technical merits of the position. The second step is measurement. A tax position that meets the more likely than not recognition threshold is measured at the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

Stock-Based Compensation

At December 31, 2018, the Company had two stock-based compensation plans for grants of equity compensation to key employees and directors. These plans have been accounted for under the provisions of FASB ASC 718-10, Compensation – Stock Compensation with respect to employee stock options and under the provisions of FASB ASC 505-50, Equity-Based Payments to Non-Employees, with respect to non-employee stock options. Specifically, awards to employees are accounted for using the fair value based method of accounting. Stock compensation costs are recognized prospectively for all new awards granted under the stock-based compensation plans. Compensation expense related to share options is calculated using a method that is based on the underlying assumptions of the Black-Scholes-Merton option pricing model and is charged to expense over the requisite service period (e.g. vesting period). Compensation expense related to restricted stock awards is based upon the fair value of the awards on the date of grant and is charged to earnings over the requisite service period of the award.

Earnings per Common Share

Basic earnings per common share are computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per common share include the dilutive effect of additional potential common shares issuable under stock options and warrants.

Loan Commitments and Related Financial Instruments

Financial instruments, which include credit card arrangements, commitments to make loans and standby letters of credit, are issued to meet customer financing needs. The face amount for these items represents the exposure to loss before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded. Instruments such as stand-by letters of credit are considered financial guarantees in accordance with FASB ASC 460-10. The fair value of these financial guarantees is not material.

Fair Value of Financial Instruments

Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in Note 21. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates.

Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Accumulated comprehensive income, which is recognized as a separate component of equity, includes unrealized gains and losses on securities available for sale.

Advertising

Advertising costs are expensed as incurred. Advertising expense for the years ended December 31, 2018, 2017 and 2016 was \$557,000, \$716,000 and \$544,000, respectively. Advertising typically consists of local print media aimed at businesses that the Company targets as well as sponsorships of local events in which the Company's clients and prospects are involved.

Recently Adopted Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU replaces most existing revenue recognition guidance in GAAP. The new standard was effective for the Company on January 1, 2018. Adoption of ASU 2014-09 did not have a material impact on the Company's consolidated financial statements and related disclosures as the Company's primary sources of revenues are derived from interest and dividends earned on loans, investment securities, and other financial instruments that are not within the scope of ASU 2014-09. The Company's revenue recognition pattern for revenue streams within the scope of ASU 2014-09, including but not limited to service charges on deposit accounts and credit card fees, did not change significantly from current practice.

In January 2017, the FASB issued ASU 2017-03, *Accounting Changes and Error Corrections (Topic 250)* and *Investments – Equity Method and Joint Ventures (Topic 323) – Amendments to SEC Paragraphs Pursuant to Staff Announcements at the September 22, 2016 and November 17, 2016 EITF Meetings*. ASU 2017-03 provides amendments that add paragraph 250-10-S99-6 which includes the text of "SEC Staff Announcement: Disclosure of the Impact That Recently Issued Accounting Standards Will Have on the Financial Statements of a Registrant When Such Standards Are Adopted in a Future Period" (in accordance with Staff Accounting Bulletin (SAB) Topic 11.M). Registrants are required to disclose the effect that recently issued accounting standards will have on their financial statements when adopted in a future period. In cases where a registrant cannot reasonably estimate the impact of the adoption, then additional qualitative disclosures should be considered to assist the reader in assessing the significance of the standard's impact on its financial statements. The Company has enhanced its disclosures regarding the impact recently issued accounting standards adopted in a future period will have on its accounting and disclosures.

In February 2018, the FASB issued ASU 2018-02, *Income Statement - Reporting Comprehensive Income (Topic 220); Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*. The amendments in this ASU require a reclassification from / to accumulated other comprehensive income and to / from retained earnings for stranded tax effects resulting from the change in the newly enacted federal corporate income tax rate. Consequently, the amendments in this ASU eliminate the stranded tax effects associated with the change in the federal corporate income tax rate in the Tax Cuts and Jobs Act of 2017. The amendments in this ASU are effective for all entities for

fiscal years beginning after December 15, 2018 with early adoption allowed. The Bank elected to early adopt this ASU as of December 31, 2017. The effect of the adoption of this ASU was to decrease accumulated other comprehensive income by \$43,000 with the offset to retained earnings as recorded in the statement of changes in stockholders' equity. This represents the difference between the historical corporate income tax rate and the newly enacted 21% corporate income tax rate.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments Overall (Topic 825): Recognition and Measurement of Financial Assets and Financial Liabilities*. The amendments in ASU 2016-01: (a) require equity investments (except for those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; (b) simplify the impairment assessment of equity securities without readily determinable fair values by requiring a qualitative assessment to identify impairment; (c) eliminate the requirement for public business entities to disclose the method and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; (d) require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (e) require an entity to present separately in other comprehensive income, the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments; (f) require separate presentation of financial assets and financial liabilities by measurement category and form of financial assets on the balance sheet or the notes to the financial statements; and (g) clarify that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. The amendments in this ASU became effective for the Company on January 1, 2018. Accordingly, the calculation of fair value of the loan portfolio was refined to incorporate exit pricing, but had no material impact on our fair value disclosures. See Note 21 – Fair Value Measurement.

In March 2016, the FASB issued ASU 2016-09, *Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* (“ASU 2016-09”), which is intended to simplify several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. ASU 2016-09 is effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption was permitted. The Company elected to early adopt the provisions of this ASU during the second quarter of 2016, and retrospectively apply the changes in accounting for stock compensation back to the first quarter of 2016. Accordingly, the Company recognized a reduction in its provision for income taxes for 2018, 2017 and 2016 of \$3.9 million, \$4.6 million and \$4.8 million, respectively. Prior to the adoption of ASU 2016-09, such tax benefits were recorded as an increase to additional paid-in capital.

In March 2016, the FASB issued ASU 2016-07, *Investments – Equity Method and Joint Ventures (Topic 323), Simplifying the Transition to the Equity Method of Accounting*. The amendments eliminate the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor’s previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. The amendments require that an entity that has an available-for-sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. The amendments became effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. The amendments should be applied prospectively upon their effective date to increase the level of ownership interest or degree of influence that result in the adoption of the equity method. Adoption of this standard has not affected the consolidated financial statements.

Recent Accounting Pronouncements

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)*. The FASB issued this ASU to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet by lessees for those leases classified as operating leases under current U.S. GAAP and disclosing key information about leasing arrangements. The amendments in this ASU are effective for public business entities for annual periods and interim periods within those annual periods beginning after December 15, 2018. Early application of this ASU is permitted for all entities. The Company will adopt the amendments in this ASU by applying the alternative transition method allowing comparative periods to not be restated and any cumulative effect adjustment to the opening balance of retained earnings to be recognized as of January 1, 2019. The Company will elect the three practical expedients allowed by the amendments as follows: 1) forego an assessment of whether any existing contracts are or contain leases, 2) forego an assessment of the classification of existing leases as to whether they are operating leases or capital leases, and 3) forego an assessment of direct costs for any existing leases. The Company continues to assess and implement changes to its accounting processes and internal controls for leases to help ensure that it meets

the reporting and disclosure requirements of this ASU. Upon adoption on January 1, 2019 the Company expects to record right-of-use assets and related lease liabilities in the range of \$13 to \$16 million. The Company believes the impact of the additional right-of-use assets will decrease its capital ratios by approximately 3 basis points.

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*, which is essentially the final rule on use of the so-called CECL model, or current expected credit losses. Among other things, the amendments in this ASU require the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. Many of the loss estimation techniques applied today will still be permitted, although the inputs to those techniques will change to reflect the full amount of expected credit losses. In addition, the ASU amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. For SEC filers, the amendments in this ASU are effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2019, with later effective dates for non-SEC registrant public companies and other organizations. Early adoption will be permitted for all organizations for fiscal years and interim periods within those fiscal years beginning after December 15, 2018. The Company has contracted with a third-party provider for enhanced modeling techniques that incorporate the loss measurement requirements in these amendments. The Company is currently working through its implementation plan and is near completion of an initial CECL estimate and plans to test the effectiveness of the new model through analytics and comparison with its existing incurred loss model throughout 2019.

In March 2017, the FASB issued ASU 2017-08, *Receivables – Nonrefundable Fees and Other Costs (Subtopic 310-20), Premium Amortization on Purchased Callable Debt Securities*. The amendments shorten the amortization period for certain callable debt securities held at a premium. Specifically, the amendments require the premium to be amortized to the earliest call date. The amendments do not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. The amendments in this ASU are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted. The amendments should be applied on a modified retrospective basis, with a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. The amendments in this ASU will not impact the Company's Consolidated Financial Statements, as it has always amortized premiums to the first call date.

In June 2018, the FASB issued ASU 2018-07, *Compensation – Stock Compensation (Topic 718), Improvements to Nonemployee Share-Based Payment Accounting*. These amendments expand the scope of Topic 718, Compensation - Stock Compensation, which currently only includes share-based payments to employees, to include share-based payments issued to nonemployees for goods or services. Consequently, the accounting for share-based payments to nonemployees and employees will be substantially aligned. The ASU supersedes Subtopic 505-50, Equity – Equity-Based Payments to Non-Employees. The amendments in this ASU are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted, but no earlier than a company’s adoption date of Topic 606, Revenue from Contracts with Customers. The Company will adopt this ASU effective January 1, 2019. The amendments will not have an impact on the Company’s Consolidated Financial Statements because it does not have any stock-based payment awards currently outstanding to nonemployees.

In July 2018, the FASB issued ASU 2018-10, *Codification Improvements to Topic 842, Leases (Topic 842)*. These amendments affect narrow aspects of the guidance issued in ASU 2016-02, including those regarding residual value guarantees, rate implicit in the lease, lessee reassessment of lease classification, lessor reassessment of lease term and purchase option, variable lease payments that depend on an index or a rate, investment tax credits, lease term and purchase option, transition guidance for amounts previously recognized in business combinations, certain transition adjustments, transition guidance for leases previously classified as capital leases under Topic 840, transition guidance for modifications to leases previously classified as direct financing or sales-type leases under Topic 840, transition guidance for sale and leaseback transactions, impairment of net investment in the lease, unguaranteed residual asset, effect of initial direct costs on rate implicit in the lease, and failed sale and leaseback transactions. For entities that early adopted Topic 842, the amendments are effective upon issuance of ASU 2018-10, and the transition requirements are the same as those in Topic 842. For entities that have not adopted Topic 842, the effective date and transition requirements will be the same as the effective date and transition requirements in Topic 842. Management is reviewing the amendments to determine what impact, if any, they will have beyond the impact that existing, but not-yet-adopted, amendments under Topic 842 will have on the Company’s Consolidated Financial Statements.

In July 2018, the FASB issued ASU 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement*. This ASU eliminates, adds and modifies certain disclosure requirements for fair value measurements. Among the changes, entities will no longer be required to disclose the amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy, however, entities will be required to disclose the range and weighted average used to develop significant unobservable inputs for Level 3 fair value measurements. ASU No. 2018-13 is effective for interim and annual reporting periods beginning after December 15, 2019; early adoption is permitted. Entities are also allowed to elect early adoption of the eliminated or modified disclosure requirements and delay adoption of the new disclosure requirements until their effective date. As ASU No. 2018-13 only revises disclosure requirements, it will not have a material impact on the Company’s Consolidated Financial Statements.

NOTE 2. DEBT SECURITIES

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

The amortized cost and fair values of available-for-sale and held-to-maturity debt securities at December 31, 2018 and 2017 are summarized as follows:

	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Loss	Market Value
December 31, 2018				
Securities Available for Sale				
U.S. Treasury and government sponsored agencies	\$77,534	\$ 78	\$ (619)	\$76,993
Mortgage-backed securities	309,244	591	(5,531)	304,304
State and municipal securities	106,465	208	(679)	105,994
Corporate debt	102,982	668	(757)	102,893
Total	\$596,225	\$ 1,545	\$ (7,586)	\$590,184
December 31, 2017				
Securities Available for Sale				
U.S. Treasury and government sponsored agencies	\$55,567	\$ 38	\$ (249)	\$55,356
Mortgage-backed securities	278,177	1,006	(2,685)	276,498
State and municipal securities	134,641	761	(553)	134,849
Corporate debt	69,996	1,416	(35)	71,377
Total	\$538,381	\$ 3,221	\$ (3,522)	\$538,080
Securities Held to Maturity				
State and municipal securities	250	-	-	250
Total	\$250	\$ -	\$ -	\$250

All mortgage-backed debt securities are with government sponsored enterprises (GSEs) such as Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Bank, and Federal Home Loan Mortgage Corporation.

At year-end 2018 and 2017, there were no holdings of debt securities of any issuer, other than the U.S. government and its agencies, in an amount greater than 10% of stockholders' equity.

In the fourth quarter of 2017, the Company transferred its held-to-maturity investment portfolio to available-for-sale in order to provide more flexibility managing its investment portfolio. As a result, the Company is prohibited from classifying any investment securities bought during the two years following the transfer as held-to-maturity.

The amortized cost and fair value of debt securities as of December 31, 2018 and 2017 by contractual maturity are shown below. Actual maturities may differ from contractual maturities because the issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

	December 31, 2018		December 31, 2017	
	Amortized Cost	Market Value	Amortized Cost	Market Value
	(In Thousands)			
Debt securities available for sale				
Due within one year	\$ 38,343	\$ 38,225	\$ 22,122	\$ 22,172
Due from one to five years	167,873	166,380	160,773	160,563
Due from five to ten years	77,811	78,276	73,362	74,684
Due after ten years	2,954	2,999	3,947	4,163
Mortgage-backed securities	309,244	304,304	278,177	276,498
	\$ 596,225	\$ 590,184	\$ 538,381	\$ 538,080
Debt securities held to maturity				
Due from one to five years	\$ -	\$ -	\$ 250	\$ 250
	\$ -	\$ -	\$ 250	\$ 250

The following table shows the gross unrealized losses and fair value of debt securities, aggregated by category and length of time that securities have been in a continuous unrealized loss position at December 31, 2018 and 2017. In estimating other-than-temporary impairment losses, management considers, among other things, the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer and the intent and ability of the Company to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value. The unrealized losses shown in the following table are primarily due to increases in market rates over the yields available at the time of purchase of the underlying securities and not credit quality.

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

Because the Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell the securities before recovery of their amortized cost basis, which may be maturity, the Company does not consider these securities to be other-than-temporarily impaired at December 31, 2018. There were no other-than-temporary impairments for the years ended December 31, 2018, 2017 and 2016.

	Less Than Twelve Months		Twelve Months or More		Total	
	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value
	(In Thousands)					
December 31, 2018						
U.S. Treasury and government sponsored agencies	\$(8) \$1,001	\$(611) \$50,878	\$(619) \$51,879
Mortgage-backed securities	(539) 67,721	(4,992) 204,260	(5,531) 271,981
State and municipal securities	(101) 20,821	(578) 52,190	(679) 73,011

Total	\$(963) \$125,788	\$(6,623) \$320,802	\$(7,586) \$446,590
December 31, 2017						
U.S. Treasury and government sponsored agencies	\$(151) \$33,401	\$(98) \$2,926	\$(249) \$36,327
Mortgage-backed securities	(986) 140,432	(1,699) 75,903	(2,685) 216,335
State and municipal securities	(450) 66,637	(103) 6,648	(553) 73,285
Corporate debt	(35) 6,955	-	-	(35) 6,955
Total	\$(1,622) \$247,425	\$(1,900) \$85,477	\$(3,522) \$332,902

At December 31, 2018, 373 of the Company's 729 debt securities were in an unrealized loss position for more than 12 months.

The following table summarizes information about sales of debt securities available for sale.

	Years Ended December		
	31,		
	2018	2017	2016
	(In Thousands)		
Sale proceeds	\$5,736	\$3,500	\$6,085
Gross realized gains	\$15	\$-	\$4
Gross realized losses	-	-	(7)
Net realized gain (loss)	\$15	\$-	\$(3)

The carrying value of debt securities pledged to secure public funds on deposits and for other purposes as required by law as of December 31, 2018 and 2017 was \$281.9 million and \$284.2 million, respectively.

Equity securities include (1) a restricted investment in Federal Home Loan Bank of Atlanta stock for membership requirement and to secure available lines of credit, (2) an investment in First National Bankers Bank stock, (3) an investment in a Community Reinvestment Act ("CRA")-qualified mutual fund, and (4) an investment in common stock of a bank holding company. The Company terminated its membership in the Federal Home Loan Bank of Atlanta effective November 11, 2016. Membership stock of the Federal Home Loan Bank of Atlanta was redeemed in 2018 after the Company paid off the remaining balance of its borrowing. The amount of investment in the First National Bankers Bank stock was \$400,000 at December 31, 2018 and 2017. The amount of investment in the CRA-qualified mutual fund was \$500,000 at December 31, 2018 and 2017. The amount of the investment in common stock of the bank holding company was \$100,000 at December 31, 2017. This stock was sold during 2018 resulting in a gain on sale of \$175,000.

NOTE 3. LOANS

The composition of loans at December 31, 2018 and 2017 is summarized as follows:

December 31,	
2018	2017

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

	(In Thousands)	
Commercial, financial and agricultural	\$2,513,225	\$2,279,366
Real estate - construction	533,192	580,874
Real estate - mortgage:		
Owner-occupied commercial	1,463,887	1,328,666
1-4 family mortgage	621,634	603,063
Other mortgage	1,337,068	997,079
Total real estate - mortgage	3,422,589	2,928,808
Consumer	64,493	62,213
Total Loans	6,533,499	5,851,261
Less: Allowance for loan losses	(68,600)	(59,406)
Net Loans	\$6,464,899	\$5,791,855

Changes in the allowance for loan losses during the years ended December 31, 2018, 2017 and 2016, respectively are as follows:

	Years Ended December 31,		
	2018	2017	2016
	(In Thousands)		
Balance, beginning of year	\$59,406	\$51,893	\$43,419
Loans charged off	(12,753)	(16,332)	(5,198)
Recoveries	545	620	274
Provision for loan losses	21,402	23,225	13,398
Balance, end of year	\$68,600	\$59,406	\$51,893

The Company assesses the adequacy of its allowance for loan losses at the end of each calendar quarter. The level of the allowance is based on management's evaluation of the loan portfolios, past loan loss experience, current asset quality trends, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payment), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, industry and peer bank loan quality indications and other pertinent factors, including regulatory recommendations. This evaluation is inherently subjective as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. Loan losses are charged off when management believes that the full collectability of the loan is unlikely. A loan may be partially charged-off after a "confirming event" has occurred which serves to validate that full repayment pursuant to the terms of the loan is unlikely. Allocation of the allowance is made for specific loans, but the entire allowance is available for any loan that in management's judgment deteriorates and is uncollectible. The portion of the reserve classified as qualitative factors, is management's evaluation of potential future losses that would arise in the loan portfolio should management's assumption about qualitative and environmental conditions materialize. This qualitative factor portion of the allowance for loan losses is based on management's judgment regarding various external and internal factors including macroeconomic trends, management's assessment of the Company's loan growth prospects, and evaluations of internal risk controls. Inherent risks in the loan portfolio will differ based on type of loan. Specific risk characteristics by loan portfolio segment are listed below:

Commercial and industrial loans include risks associated with borrower's cash flow, debt service coverage and management's expertise. These loans are subject to the risk that the Company may have difficulty converting collateral to a liquid asset if necessary, as well as risks associated with degree of specialization, mobility and general collectability in a default situation. These commercial loans may be subject to many different types of risks, including fraud, bankruptcy, economic downturn, deteriorated or non-existent collateral, and changes in interest rates.

Real estate construction loans include risks associated with the borrower's credit-worthiness, contractor's qualifications, borrower and contractor performance, and the overall risk and complexity of the proposed project. Construction lending is also subject to risks associated with sub-market dynamics, including population, employment trends and household income. During times of economic stress, this type of loan has typically had a greater degree of risk than other loan types.

Real estate mortgage loans consist of loans secured by commercial and residential real estate. Commercial real estate lending is dependent upon successful management, marketing and expense supervision necessary to maintain the property. Repayment of these loans may be adversely affected by conditions in the real estate market or the general economy. Also, commercial real estate loans typically involve relatively large loan balances to a single borrower. Residential real estate lending risks are generally less significant than those of other loans. Real estate lending risks include fluctuations in the value of real estate, bankruptcies, economic downturn and customer financial problems.

Consumer loans carry a moderate degree of risk compared to other loans. They are generally more risky than traditional residential real estate loans but less risky than commercial loans. Risk of default is usually determined by

the well-being of the local economies. During times of economic stress, there is usually some level of job loss both nationally and locally, which directly affects the ability of the consumer to repay debt.

The following table presents an analysis of the allowance for loan losses by portfolio segment as of December 31, 2018 and 2017. The total allowance for loan losses is disaggregated into those amounts associated with loans individually evaluated and those associated with loans collectively evaluated.

Changes in the allowance for loan losses, segregated by loan type, during the years ended December 31, 2018 and 2017, respectively, are as follows:

	Commercial, financial and agricultural	Real estate - construction	Real estate - mortgage	Consumer	Total
(In Thousands)					
Year Ended December 31, 2018					
Allowance for loan losses:					
Balance at December 31, 2017	\$32,880	\$4,989	\$21,022	\$515	\$59,406

The credit quality of the loan portfolio is summarized no less frequently than quarterly using categories similar to the standard asset classification system used by the federal banking agencies. The following table presents credit quality

indicators for the loan loss portfolio segments and classes. These categories are utilized to develop the associated allowance for loan losses using historical losses adjusted for current economic conditions defined as follows:

• Pass – loans which are well protected by the current net worth and paying capacity of the obligor (or obligors, if any) or by the fair value, less cost to acquire and sell, of any underlying collateral.

Special Mention – loans with potential weakness that may, if not reversed or corrected, weaken the credit or inadequately protect the Company's position at some future date. These loans are not adversely classified and do not expose an institution to sufficient risk to warrant an adverse classification.

Substandard – loans that exhibit well-defined weakness or weaknesses that presently jeopardize debt repayment. These loans are characterized by the distinct possibility that the institution will sustain some loss if the weaknesses are not corrected.

Doubtful – loans that have all the weaknesses inherent in loans classified substandard, plus the added characteristic that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions, and values highly questionable and improbable.

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

Loans by credit quality indicator as of December 31, 2018 and 2017 were as follows:

December 31, 2018	Pass	Special Mention	Substandard	Doubtful	Total
	(In Thousands)				
Commercial, financial and agricultural	\$2,447,052	\$47,754	\$ 18,419	\$ -	\$2,513,225

Fair value estimates for specifically impaired loans are derived from appraised values based on the current market value or as is value of the property, normally from recently received and reviewed appraisals. Appraisals are obtained from state-certified appraisers and are based on certain assumptions, which may include construction or development status and the highest and best use of the property. These appraisals are reviewed by our credit administration department to ensure they are acceptable, and values are adjusted down for costs associated with asset disposal. Once this estimated net realizable value has been determined, the value used in the impairment assessment is updated. As subsequent events dictate and estimated net realizable values decline, required reserves may be established or further

adjustments recorded.

The following table presents details of the Company's impaired loans as of December 31, 2018 and 2017, respectively. Loans which have been fully charged off do not appear in the tables.

Troubled Debt Restructurings (“TDR”) at December 31, 2018 and 2017 totaled \$14.6 million and \$20.6 million, respectively. The Company had a related allowance for loan losses of \$4.3 million allocated to these TDRs at December 31, 2018 and 2017, respectively. The Company’s TDRs for the years ended December 31, 2018 and 2017 have all resulted from term extensions rather than from interest rate reductions or debt forgiveness. The following tables present loans modified in a TDR during the periods presented by portfolio segment and the financial impact of those modifications. The tables include modifications made to new TDRs, as well as renewals of existing TDRs.

	Year Ended December 31, 2018		
		Pre- Modification Outstanding	Post- Modification Outstanding

The following table presents TDRs by portfolio segment which defaulted during the years ended December 31, 2018 and 2017, and which were modified in the previous twelve months (i.e., the twelve months prior to default). For purposes of this disclosure default is defined as 90 days past due and still accruing or placement on nonaccrual status.

	Year Ended	
	December 31, 2018	2017
Defaulted during the period, where modified in a TDR twelve months prior to default		
Commercial, financial and agricultural	\$6,900	\$ -
Real estate - construction	997	-
Real estate - mortgage:		
Owner occupied commercial	3,664	-
1-4 family mortgage	850	-
Other mortgage	-	-
Total real estate - mortgage	4,514	-
Consumer	-	-
	\$12,411	\$ -

In the ordinary course of business, the Company has granted loans to certain related parties, including directors, and their affiliates. The interest rates on these loans were substantially the same as rates prevailing at the time of the transaction and repayment terms are customary for the type of loan. Changes in related party loans for the years ended December 31, 2018 and 2017 are as follows:

	Years Ended	
	December 31, 2018	2017
	(In Thousands)	
Balance, beginning of year	\$8,440	\$10,806
Additions	4,174	-
Advances	3,657	7,351
Repayments	(10,843)	(9,717)
Balance, end of year	\$5,428	\$8,440

NOTE 4. FORECLOSED PROPERTIES

Other real estate and certain other assets acquired in foreclosure are carried at the lower of the recorded investment in the loan or fair value less estimated costs to sell the property.

An analysis of foreclosed properties for the years ended December 31, 2018, 2017 and 2016 follows:

	2018	2017	2016
	(In Thousands)		
Balance at beginning of year	\$6,701	\$4,988	\$5,392
Transfers from loans and capitalized expenses	3,087	4,685	4,112
Foreclosed properties sold	(3,934)	(2,982)	(3,931)
Writedowns and partial liquidations	(685)	10	(585)
Balance at end of year	\$5,169	\$6,701	\$4,988

NOTE 5. PREMISES AND EQUIPMENT

Premises and equipment are summarized as follows:

	December 31,	
	2018	2017
	(In Thousands)	
Land	\$5,489	\$5,468
Building	36,337	36,259
Furniture and equipment	24,774	23,297
Leasehold improvements	10,190	9,599
Construction in progress	200	88
Total premises and equipment, cost	76,990	74,711
Accumulated depreciation	(19,168)	(15,811)
Total premises and equipment, net	\$57,822	\$58,900

The provisions for depreciation charged to occupancy and equipment expense for the years ended December 31, 2018, 2017 and 2016 were \$3.4 million, \$2.6 million and \$2.7 million, respectively.

The Company leases land and building space under non-cancellable operating leases. Future minimum lease payments under non-cancellable operating leases at December 31, 2018 are summarized as follows:

	(In Thousands)
2019	\$ 3,084
2020	3,028
2021	2,426
2022	2,455
2023	2,008
Thereafter	3,575
Total	\$ 16,576

For the years ended December 31, 2018, 2017 and 2016, annual rental expense on operating leases was \$3.2 million, \$4.3 million, and \$3.8 million, respectively.

NOTE 6. VARIABLE INTEREST ENTITIES (VIEs)

The Company utilizes special purpose entities (SPEs) that constitute investments in limited partnerships that undertake certain development projects to achieve federal and state tax credits. These SPEs are typically structured as VIEs and are thus subject to consolidation by the reporting enterprise that absorbs the majority of the economic risks and rewards of the VIE. To determine whether it must consolidate a VIE, the Company analyzes the design of the VIE to identify the sources of variability within the VIE, including an assessment of the nature of risks created by the assets and other contractual obligations of the VIE, and determines whether it will absorb a majority of that variability.

The Company has invested in limited partnerships as a funding investor. The partnerships are single purpose entities that lend money to real estate investors for the purpose of acquiring and operating, or rehabbing, commercial property. The investments qualify for New Market Tax Credits under Internal Revenue Code Section 45D, as amended, or Historic Rehabilitation Tax Credits under Code Section 47, as amended, or Low-Income Housing Tax Credits under Code Section 42, as amended. For each of the partnerships, the Company acts strictly in a limited partner capacity. The Company has determined that it is not the primary beneficiary of these partnerships because it does not have the power to direct the activities of the entity that most significantly impact the entities' economic performance. The

amount of recorded investment in these partnerships as of December 31, 2018 and 2017 was \$18.9 million and \$21.1 million, respectively, of which \$12.8 million and \$13.6 million as of December 31, 2018 and 2017, respectively, are included in loans of the Company. The remaining amounts are included in other assets.

NOTE 7. DEPOSITS

Deposits at December 31, 2018 and 2017 were as follows:

	December 31,	
	2018	2017
	(In Thousands)	
Noninterest-bearing demand	\$ 1,557,341	\$ 1,440,326
Interest-bearing checking	4,624,909	4,029,147
Savings	53,880	50,959
Time deposits, \$250,000 and under	257,925	228,540
Time deposits, over \$250,000	421,653	342,702
	\$6,915,708	\$6,091,674

The scheduled maturities of time deposits at December 31, 2018 were as follows:

	(In Thousands)
2019	\$ 386,936
2020	126,817
2021	60,246
2022	34,950
2023	70,580
Thereafter	49
Total	\$ 679,578

At December 31, 2018 and 2017, overdraft deposits reclassified to loans were \$10.9 million and \$1.7 million, respectively.

NOTE 8. FEDERAL FUNDS PURCHASED

At December 31, 2018, the Company had \$288.7 million in federal funds purchased from its correspondent banks that are clients of its correspondent banking unit, compared to \$301.8 million at December 31, 2017. Rates paid on these funds were between 2.50% and 2.65% as of December 31, 2018 and 1.55% and 1.70% as of December 31, 2017.

At December 31, 2018, the Company had available lines of credit totaling approximately \$562.0 million with various financial institutions for borrowing on a short-term basis, with no amount outstanding. Available lines totaled approximately \$468.0 million at December 31, 2017. These lines are subject to annual renewals with varying interest rates.

NOTE 9. OTHER BORROWINGS

Other borrowings are comprised of:

\$34.75 million of the Company's 5% Subordinated Notes due July 15, 2025, which were issued in a private placement in July 2015 and pay interest semi-annually. The Notes may not be prepaid by the Company prior to July 15, 2020.

\$30.0 million on the Company's 4.5% Subordinated Notes due November 8, 2027, which were issued in a private placement in November 2017 and pay interest semi-annually. The Notes may not be prepaid by the Company prior to November 8, 2022.

Debt is reported net of unamortized issuance costs of \$84,000 and \$118,000 as of December 31, 2018 and 2017, respectively.

NOTE 10. SF INTERMEDIATE HOLDING COMPANY, INC., SF HOLDING 1, INC., SF REALTY 1, INC., SF FLA REALTY, INC., SF GA REALTY, INC. AND SF TN REALTY, INC.

In January 2012, the Company formed SF Holding 1, Inc., an Alabama corporation, and its subsidiary, SF Realty 1, Inc., an Alabama corporation. In September 2013, the Company formed SF FLA Realty, Inc., an Alabama corporation and a subsidiary of SF Holding 1, Inc. In May 2014, the Company formed SF GA Realty, Inc., an Alabama corporation and a subsidiary of SF Holding 1, Inc. In February 2016, the Company formed SF TN Realty, Inc., an Alabama corporation and a subsidiary of SF Holding 1, Inc. Also in February 2016, the Company formed SF Intermediate Holding Company, Inc., an Alabama corporation. Immediately following the formation of SF Intermediate Holding Company, Inc., ServisFirst Bank assigned all of the outstanding capital stock of SF Holding 1, Inc. to SF Intermediate Holding Company, Inc., such that SF Holding 1, Inc. now is a wholly-owned first tier subsidiary of SF Intermediate Holding Company, Inc. SF Realty 1, SF FLA Realty, SF GA Realty and SF TN Realty all hold and manage participations in residential mortgages and commercial real estate loans originated by ServisFirst Bank and have elected to be treated as real estate investment trusts ("REIT") for U.S. income tax purposes. SF Intermediate Holding Company, Inc., SF Holding 1, Inc., SF Realty 1, Inc., SF FLA Realty, Inc., SF GA Realty, Inc. and SF TN Realty, Inc. are all consolidated into the Company.

NOTE 11. DERIVATIVES

The Company has entered into agreements with secondary market investors to deliver loans on a "best efforts delivery" basis. When a rate is committed to a borrower, it is based on the best price that day and locked with the investor for the customer for a 30-day period. In the event the loan is not delivered to the investor, the Company has no risk or exposure with the investor. The interest rate lock commitments related to loans that are originated for later sale are classified as derivatives. The fair values of the Company's agreements with investors and rate lock commitments to customers as of December 31, 2018 and December 31, 2017 were not material.

NOTE 12. EMPLOYEE AND DIRECTOR BENEFITS

At December 31, 2018, the Company has two stock incentive plans, which are described below. The compensation cost that has been charged against income for the plans was approximately \$851,000, \$1,170,000 and \$1,198,000 for the years ended December 31, 2018, 2017 and 2016, respectively.

Stock Incentive Plans

The Company's 2005 Stock Incentive Plan (the "2005 Plan"), originally permitted the grant of stock options to its officers, employees, directors and organizers of the Company for up to 3,150,000 shares of common stock. However, upon stockholder approval during 2006, the 2005 Plan was amended in order to allow the Company to grant stock options for up to 6,150,000 shares of common stock. Both incentive stock options and non-qualified stock options may be granted under the 2005 Plan. Option awards are generally granted with an exercise price equal to the estimated fair market value of the Company's stock at the date of grant; those option awards vest in varying amounts through 2019 and are based on continuous service during that vesting period and have a ten-year contractual term. Dividends are not paid on unexercised options and dividends are not subject to vesting. The 2005 Plan provides for accelerated vesting if there is a change in control (as defined in the 2005 Plan).

On March 23, 2009, the Company's board of directors adopted the 2009 Stock Incentive Plan (the "2009 Plan"), which was effective upon approval by the stockholders at the 2009 Annual Meeting of Stockholders. The 2009 Plan originally permitted the grant of up to 2,550,000 shares of common stock. However, upon stockholder approval during 2014, the 2009 Plan was amended in order to allow the Company to grant stock options for up to 5,550,000 shares of common stock. The 2009 Plan authorizes the grant of stock appreciation rights, restricted stock, incentive stock options, non-qualified stock options, non-stock share equivalents, performance shares or performance units and other equity-based awards. Option awards are generally granted with an exercise price equal to the estimated fair market value of the Company's stock at the date of grant.

As of December 31, 2018, there are a total of 3,248,774 shares available to be granted under the 2005 and 2009 Plans.

Stock-based compensation expense for stock-based compensation awards granted is based on the grant-date fair value. For stock option awards, the fair value is estimated at the date of grant using the Black-Scholes-Merton valuation model. This model requires the input of highly subjective assumptions, changes to which can materially affect the fair value estimate. The fair value of each option granted is estimated on the date of grant using the Black-Scholes-Merton model based on the weighted-average assumptions for expected dividend yield, expected stock price volatility, risk-free interest rate and expected life of options granted.

The assumptions used in determining the fair value of 2018, 2017 and 2016 stock option grants were as follows:

	2018	2017	2016
Expected price volatility	35.39 %	29.00 %	29.00 %
Expected dividend yield	1.24 %	0.44 %	0.64 %
Expected term (in years)	6	6	6
Risk-free rate	2.90 %	2.08 %	1.85 %

The weighted average grant-date fair value of options granted during the years ended December 31, 2018, 2017 and 2016 was \$12.76, \$11.82 and \$6.00, respectively.

The following tables summarize stock option activity:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (In Thousands)
Year Ended December 31, 2018:				
Outstanding at beginning of year	1,666,834	\$ 10.68	5.5	\$ 51,377
Granted	42,250	37.21	9.6	-
Exercised	(414,336)	5.73	2.8	10,832
Forfeited	(56,000)	15.40	6.2	912
Outstanding at end of year	1,238,748	\$ 13.02	5.2	\$ 23,355
Exercisable at December 31, 2018	510,100	\$ 7.08	3.5	\$ 12,645
Year Ended December 31, 2017:				
Outstanding at beginning of year	2,026,334	\$ 9.00	6.2	\$ 57,636
Granted	58,000	37.59	9.1	227
Exercised	(385,500)	4.96	4.0	14,087
Forfeited	(32,000)	21.96	8.1	625
Outstanding at end of year	1,666,834	\$ 10.68	5.5	\$ 51,377
Exercisable at December 31, 2017	808,236	\$ 5.22	3.9	\$ 29,321
Year Ended December 31, 2016:				
Outstanding at beginning of year	2,498,834	\$ 6.66	6.3	\$ 42,746
Granted	241,000	20.15	9.1	4,166
Exercised	(682,500)	4.28	3.9	22,629
Forfeited	(31,000)	11.04	6.8	818
Outstanding at end of year	2,026,334	\$ 9.00	6.2	\$ 57,636
Exercisable at December 31, 2016	928,536	\$ 5.08	4.8	\$ 30,051

Exercisable options at December 31, 2018 were as follows:

Range of Shares Exercise Price	Weighted Average Exercise Price	Weighted Average Remaining Term	Aggregate Intrinsic Value
--------------------------------------	--	--	---------------------------------

	Price		Contractual Term (years)	(In Thousands)
\$ 4.17	27,500	\$ 4.17	0.8	\$ 762
5.00	244,000	5.00	2.6	6,556
5.50	120,000	5.50	4.2	3,164
6.92	45,000	6.92	5.0	1,123
15.74	21,600	15.74	6.1	348
18.57	52,000	18.57	4.5	692
	510,100	\$ 7.08	3.5	\$ 12,645

As of December 31, 2018, there was \$1.7 million of total unrecognized compensation cost related to non-vested stock options. As of December 31, 2018, non-vested stock options had a weighted average remaining time to vest of 2.0 years.

Restricted Stock

The Company periodically grants restricted stock awards that vest upon service conditions. Dividend payments are made during the vesting period. The value of restricted stock is determined to be the current value of the Company's stock, and this total value will be recognized as compensation expense over the vesting period. As of December 31, 2018, there was \$1.2 million of total unrecognized compensation cost related to non-vested restricted stock. As of December 31, 2018, non-vested restricted stock had a weighted average remaining time to vest of 3.1 years.

Retirement Plans

The Company has a retirement savings 401(k) and profit-sharing plan in which all employees age 21 and older may participate after completion of one year of service. For employees in service with the Company at June 15, 2005, the length of service and age requirements were waived. The Company matches employees' contributions based on a percentage of salary contributed by participants and may make additional discretionary profit sharing contributions. The Company's expense for the plan was \$1.5 million, \$1.4 million and \$1.3 million for 2018, 2017 and 2016, respectively.

NOTE 13. COMMON STOCK

On November 16, 2016, the Company declared a two-for-one split of its common stock in the form of a stock dividend. On December 20, 2016, stockholders of record as of the close of business on December 5, 2016 received a

distribution of one additional share of Company common stock for each common share owned. All share and per share amounts for all periods presented are reported giving effect to this two-for-one stock split and the three-for-one stock split described below.

On January 31, 2015, the Company completed its acquisition of Metro Bancshares, Inc. and Metro Bank, its wholly-owned bank subsidiary, for an aggregate of \$20.9 million in cash and 1,273,184 shares of Company common stock.

On June 16, 2014, the Company declared a three-for-one split of its common stock in the form of a stock dividend. On July 16, 2014, stockholders of record as of the close of business on July 9, 2014 received a distribution of two additional shares of Company common stock for each common share owned.

On May 19, 2014, the Company completed its initial public offering of 3,750,000 shares of common stock at a public offering price of \$15.167 per share. The Company received net proceeds of approximately \$52.1 million from the offering, after deducting the underwriting discount and offering expenses.

NOTE 14. REGULATORY MATTERS

The Bank is subject to dividend restrictions set forth in the Alabama Banking Code and by the Alabama State Banking Department. Under such restrictions, the Bank may not, without the prior approval of the Alabama State Banking Department, declare dividends in excess of the sum of the current year's earnings plus the retained earnings from the prior two years. Based on these restrictions, the Bank would be limited to paying \$311.9 million in dividends as of December 31, 2018.

The Bank is subject to various regulatory capital requirements administered by the state and federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank and the financial statements. Under regulatory capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines involving quantitative measures of the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification under the prompt corrective guidelines are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of common equity Tier 1 capital, total risk-based capital and Tier 1 capital to risk-weighted assets (as defined in the regulations), and Tier 1 capital to adjusted total assets (as defined). Management believes, as of December 31, 2018, that the Bank meets all capital adequacy requirements to which it is subject.

In July 2013, the Federal Reserve announced its approval of a final rule to implement the regulatory capital reforms developed by the Basel Committee on Banking Supervision (“Basel III”), among other changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The new rules became effective January 1, 2015, subject to a phase-in period for certain aspects of the new rules. In order to avoid restrictions on capital distributions and discretionary bonus payments to executives, under the new rules a covered banking organization will also be required to maintain a “capital conservation buffer” in addition to its minimum risk-based capital requirements. This buffer will be required to consist solely of common equity Tier 1, and the buffer will apply to all three risk-based measurements (CET1, Tier 1 capital and total capital). The capital conservation buffer will be phased in incrementally over time, beginning January 1, 2016 and becoming fully effective on January 1, 2019, and will ultimately consist of an additional amount of Tier 1 common equity equal to 2.5% of risk-weighted assets. The applicable capital conservation buffer at December 31, 2018 was 1.875% and the Company and bank exceeded such requirement.

As of December 31, 2018, the most recent notification from the Federal Deposit Insurance Corporation categorized ServisFirst Bank as well capitalized under the regulatory framework for prompt corrective action. To remain categorized as well capitalized, the Bank will have to maintain minimum CET1, total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as disclosed in the table below. Management believes that it is well capitalized under the prompt corrective action provisions as of December 31, 2018.

The Company's and Bank's actual capital amounts and ratios are presented in the following table:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2018:						
CET I Capital to Risk Weighted Assets:

NOTE 15. OTHER OPERATING INCOME AND EXPENSES

The major components of other operating income and expense included in noninterest income and noninterest expense are as follows:

	Years Ended December 31,		
	2018	2017	2016
	(In Thousands)		
Other Operating Income			
ATM fee income	\$876	\$711	\$715
Gain (loss) on sale of other real estate owned	(21)	33	18
Gain (loss) on sale of fixed assets	-	1	1,399
Other	384	354	556
Total other operating income	\$1,239	\$1,099	\$2,688
Other Operating Expenses			
Data processing	\$6,667	\$5,454	\$4,832
Other loan expenses	2,711	2,170	1,510
Customer and public relations	2,182	2,008	1,890
Bank service charges	2,004	1,522	1,341
Sales and use tax	733	1,167	781
Write-down investment in tax credit partnerships	750	1,081	2,519
Telephone	919	990	740
Donations and contributions	859	744	769
Marketing	557	716	544
Supplies	550	595	555
Fraud and forgery losses	464	515	206
Directors fees	467	472	407
Postage	439	441	377
Other operational losses	519	167	264
Other	3,477	3,087	3,077
Total other operating expenses	\$23,298	\$21,129	\$19,812

NOTE 16. INCOME TAXES

The components of income tax expense are as follows:

	Year Ended December 31,		
	2018	2017	2016
	(In Thousands)		
Current tax expense:			
Federal	\$43,207	\$27,952	\$29,813
State	2,950	2,258	1,254
Total current tax expense	46,157	30,210	31,067
Deferred tax (benefit) expense:			
Federal	(12,636)	17,073	(662)
State	(1,619)	(3,025)	(1,066)
Total deferred tax (benefit) expense	(14,255)	14,048	(1,728)
Total income tax expense	\$31,902	\$44,258	\$29,339

The Company's total income tax expense differs from the amounts computed by applying the Federal income tax statutory rates to income before income taxes. A reconciliation of the differences is as follows:

	Year Ended December 31, 2018	
	% of	
	Amount	Pre-tax Earnings
	(In Thousands)	
Income tax at statutory federal rate	\$35,457	21.00%
Effect on rate of:		
State income tax, net of federal tax effect	808	0.48 %
Tax-exempt income, net of expenses	(655)	(0.39)%
Bank owned life insurance contracts	(657)	(0.39)%
Excess tax benefit from stock compensation	(3,118)	(1.84)%
Federal tax credits	(113)	(0.07)%
Other	180	0.10 %
Effective income tax and rate	\$31,902	18.89%

Year Ended
December 31, 2017

Edgar Filing: ServisFirst Bancshares, Inc. - Form 10-K

	Amount	% of Pre-tax Earnings
	(In Thousands)	
Income tax at statutory federal rate	\$48,073	35.00 %
Effect on rate of:		
State income tax, net of federal tax effect	43	0.03 %
Tax-exempt income, net of expenses	(1,356)	(0.99)%
Bank owned life insurance contracts	(1,096)	(0.80)%
Excess tax benefit from stock compensation	(4,278)	(3.11)%
Federal tax credits	(234)	(0.17)%
Enacted tax rate change	3,108	2.26
Other	(2)	- %
Effective income tax and rate	\$44,258	32.22 %

	Year Ended December 31, 2016	
	Amount	% of Pre-tax Earnings
	(In Thousands)	
Income tax at statutory federal rate	\$38,786	35.00 %
Effect on rate of:		
State income tax, net of federal tax effect	254	0.23 %
Tax-exempt income, net of expenses	(1,322)	(1.20)%
Bank owned life insurance contracts	(978)	(0.88)%
Incentive stock option expense	(4,788)	(4.32)%
Federal tax credits	(2,652)	(2.40)%
Other	39	0.04 %
Effective income tax and rate	\$29,339	26.47 %

The components of net deferred tax asset are as follows:

	December 31,	
	2018	2017
	(In Thousands)	
Deferred tax assets:		
Allowance for loan losses	\$17,212	\$14,905
Other real estate owned	317	232
Nonqualified equity awards	788	927
Nonaccrual interest	311	178
State tax credits	6,791	5,688
Investments	1,130	1,296
Deferred loan fees	804	866
Reserve for unfunded commitments	135	125
Accrued bonus	2,025	1,521
Differences in amounts reflected in financial statements and income tax basis of assets acquired and liabilities assumed in acquisition	139	175
Net unrealized loss on securities available for sale	1,273	65
Other deferred tax assets	669	431
Total deferred tax assets	31,594	26,409
Deferred tax liabilities:		
REIT dividend	-	9,706
Depreciation	3,732	3,240
Prepaid expenses	376	164
Acquired intangible assets	209	277
Total deferred tax liabilities	4,317	13,387
Net deferred tax assets	\$27,277	\$13,022

The Company believes its net deferred tax asset is recoverable as of December 31, 2018 based on the expectation of future taxable income and other relevant considerations.

Pursuant to ASC 740-10-30-2 *Income Taxes*, deferred tax assets and liabilities are measured using enacted tax rates applicable to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. On December 22, 2017, the President of the United States signed the "Act to provide for reconciliation pursuant to titles II and V of the concurrent resolution on the budget for fiscal year 2018" (referred to as the "Tax Cuts and Jobs Act" or the Act). The Act provided for a reduction in the corporate tax rate from a maximum tax rate of 35% to a flat tax rate of 21% effective for tax years beginning after December 31, 2017. As a result, the Company revalued its deferred tax assets and liabilities as of December 31, 2017, and recorded the effect of this change as a component of tax expense. Tax expense recorded related to the change in the enacted federal tax rate was \$3,108,000 in 2017.

The Company and its subsidiaries file a consolidated U.S. Federal income tax return and various consolidated and separate company state income tax returns. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service for the years ended December 31, 2015 through 2018. The Company is also currently open to audit by several state departments of revenue for the years ended December 31, 2015 through 2018. The audit periods differ depending on the date the Company began business activities in each state. Currently, there are no years for which the Company filed a federal or state income tax return that are under examination by the IRS or any state department of revenue.

Accrued interest and penalties on unrecognized income tax benefits totaled \$106,000 and \$116,000 as of December 31, 2018 and 2017, respectively. Unrecognized income tax benefits as of December 31, 2018 and December 31, 2017, that, if recognized, would impact the effective income tax rate totaled \$2,133,000 and \$1,779,000 (net of the federal benefit on state income tax issues), respectively. The Company does not expect any of the uncertain tax positions to be settled or resolved during the next twelve months.

The following table presents a summary of the changes during 2018, 2017 and 2016 in the amount of unrecognized tax benefits that are included in the consolidated balance sheets.

	2018	2017	2016
	(In Thousands)		
Balance, beginning of year	\$1,779	\$1,375	\$1,173
Increases related to prior year tax positions	799	365	364
Decreases related to prior year tax positions	-	-	-
Increases related to current year tax positions	-	-	-
Settlements	-	-	-
Enacted tax rate change	-	315	-
Lapse of statute	(445)	(276)	(162)
Balance, end of year	\$2,133	\$1,779	\$1,375

NOTE 17. COMMITMENTS AND CONTINGENCIES

Loan Commitments

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, credit card arrangements, and standby letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheets. A summary of the Company's approximate commitments and contingent liabilities is as follows:

	2018	2017	2016
	(In Thousands)		
Commitments to extend credit	\$1,985,801	\$1,945,171	\$1,667,015
Credit card arrangements	173,613	128,149	100,678
Standby letters of credit and financial guarantees	40,590	41,654	40,991
Total	\$2,200,004	\$2,114,974	\$1,808,684

Commitments to extend credit, credit card arrangements, commercial letters of credit and standby letters of credit all include exposure to some credit loss in the event of nonperformance of the customer. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet financial instruments. Because these instruments have fixed maturity dates, and because many of them expire without being drawn upon, they do not generally present any significant liquidity risk to the Company.

NOTE 18. CONCENTRATIONS OF CREDIT

The Company originates primarily commercial, residential, and consumer loans to customers in the Company's market area. The ability of the majority of the Company's customers to honor their contractual loan obligations is dependent on the economy in the market area.

The Company's loan portfolio is concentrated primarily in loans secured by real estate, principally secured by real estate in the Company's primary market areas. In addition, a substantial portion of the other real estate owned is located in that same market. Accordingly, the ultimate collectability of the loan portfolio and the recovery of the carrying amount of other real estate owned are susceptible to changes in market conditions in the Company's primary market area.

NOTE 19. EARNINGS PER COMMON SHARE

Basic earnings per common share are computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per common share include the dilutive effect of additional potential common shares issuable under stock options. The difference in earnings per share under the two-class method was not significant at December 31, 2018, 2017 and 2016.

	Year Ended December 31,		
	2018	2017	2016
	(Dollar Amounts In Thousands Except Per Share Amounts)		
Earnings Per Share			
Weighted average common shares outstanding	53,172,695	52,887,359	52,450,896
Net income available to common stockholders	\$136,877	\$93,030	\$81,432
Basic earnings per common share	\$2.57	1.76	\$1.55
Weighted average common shares outstanding	53,172,695	52,887,359	52,450,896
Dilutive effects of assumed conversions and exercise of stock options and warrants	997,184	1,236,598	1,157,476
Weighted average common and dilutive potential common shares outstanding	54,169,879	54,123,957	53,608,372
Net income available to common stockholders	\$136,877	\$93,030	\$81,432
Diluted earnings per common share	\$2.53	\$1.72	\$1.52

NOTE 20. RELATED PARTY TRANSACTIONS

As more fully described in Note 3, the Company had outstanding loan balances to related parties as of December 31, 2018 and 2017 in the amount of \$5.4 million and \$8.4 million, respectively. Related party deposits totaled \$-6.7 million and \$7.0 million at December 31, 2018 and 2017, respectively.

NOTE 21. FAIR VALUE MEASUREMENT

Measurement of fair value under U.S. GAAP establishes a hierarchy that prioritizes observable and unobservable inputs used to measure fair value, as of the measurement date, into three broad levels, which are described below:

Level 1: Quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.

Level 2: Observable prices that are based on inputs not quoted on active markets, but corroborated by market data.

Level 3: Unobservable inputs are used when little or no market data is available. The fair value hierarchy gives the lowest priority to Level 3 inputs.

In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible and also considers counterparty credit risk in its assessment of fair value.

Debt Securities. Where quoted prices are available in an active market, securities are classified within Level 1 of the hierarchy. Level 1 securities include highly liquid government securities such as U.S. Treasuries and exchange-traded equity securities. For securities traded in secondary markets for which quoted market prices are not available, the Company generally relies on pricing services provided by independent vendors. Such independent pricing services are to advise the Company on the carrying value of the securities available for sale portfolio. As part of the Company's procedures, the price provided from the service is evaluated for reasonableness given market changes. When a questionable price exists, the Company investigates further to determine if the price is valid. If needed, other market participants may be utilized to determine the correct fair value. The Company has also reviewed and confirmed its

determinations in discussions with the pricing service regarding their methods of price discovery. Securities measured with these techniques are classified within Level 2 of the hierarchy and often involve using quoted market prices for similar securities, pricing models or discounted cash flow calculations using inputs observable in the market where available. Examples include U.S. government agency securities, mortgage-backed securities, obligations of states and political subdivisions, and certain corporate, asset-backed and other securities. In cases where Level 1 or Level 2 inputs are not available, as in the case of certain corporate securities, these securities are classified in Level 3 of the hierarchy.

Impaired Loans. Impaired loans are measured and reported at fair value when full payment under the loan terms is not probable. Impaired loans are carried at the present value of expected future cash flows using the loan's existing rate in a discounted cash flow calculation, or the fair value of the collateral if the loan is collateral-dependent. Expected cash flows are based on internal inputs reflecting expected default rates on contractual cash flows. This method of estimating fair value does not incorporate the exit-price concept of fair value described in ASC 820-10 and would generally result in a higher value than the exit-price approach. For loans measured using the estimated fair value of collateral less costs to sell, fair value is generally determined based on appraisals performed by certified and licensed appraisers using inputs such as absorption rates, capitalization rates and market comparables, adjusted for estimated costs to sell. Management modifies the appraised values, if needed, to take into account recent developments in the market or other factors, such as changes in absorption rates or market conditions from the time of valuation, and anticipated sales values considering management's plans for disposition. Such modifications to the appraised values could result in lower valuations of such collateral. Estimated costs to sell are based on current amounts of disposal costs for similar assets. These measurements are classified as Level 3 within the valuation hierarchy. Impaired loans are subject to nonrecurring fair value adjustment upon initial recognition or subsequent impairment. A portion of the allowance for loan losses is allocated to impaired loans if the value of such loans is deemed to be less than the unpaid balance. Impaired loans are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly based on the same factors identified above. The amount recognized as an impairment charge related to impaired loans that are measured at fair value on a nonrecurring basis was \$14,942,000 and \$13,253,000 during the years ended December 31, 2018 and 2017, respectively.

Other Real Estate Owned. Other real estate assets (“OREO”) acquired through, or in lieu of, foreclosure are held for sale and are initially recorded at the lower of cost or fair value, less selling costs. Any write-downs to fair value at the time of transfer to OREO are charged to the allowance for loan losses subsequent to foreclosure. Values are derived from appraisals of underlying collateral and discounted cash flow analysis. Appraisals are performed by certified and licensed appraisers. Subsequent to foreclosure, valuations are updated periodically and assets are marked to current fair value, not to exceed the new cost basis. In the determination of fair value subsequent to foreclosure, management also considers other factors or recent developments, such as changes in absorption rates and market conditions from the time of valuation, and anticipated sales values considering management’s plans for disposition, which could result in adjustment to lower the property value estimates indicated in the appraisals. These measurements are classified as Level 3 within the valuation hierarchy. Net losses on the sale and write-downs of OREO of \$775,000 and \$227,000 was recognized during the years ended December 31, 2018 and 2017, respectively. These charges were for write-downs in the value of OREO subsequent to foreclosure and losses on the disposal of OREO. OREO is classified within Level 3 of the hierarchy.

There was one residential real estate loan foreclosure for \$360,000 classified as OREO as of December 31, 2018, compared to none as of December 31, 2017.

One residential real estate loan for \$173,000 was in the process of being foreclosed as of December 31, 2018.

The following table presents the Company’s financial assets and financial liabilities carried at fair value on a recurring basis as of December 31, 2018 and December 31, 2017:

Assets Measured on a Recurring Basis:	Fair Value Measurements at December 31, 2018 Using			
	Quoted Prices in Active Markets for Identifiable Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Available-for-sale securities:

Impaired loans	\$ -	\$ -	\$ 34,901	\$ 34,901
Other real estate owned	-	-	6,701	6,701
Total assets at fair value	\$ -	\$ -	\$ 41,602	\$ 41,602

The fair value of a financial instrument is the current amount that would be exchanged in a sale between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. Current U.S. GAAP excludes certain financial instruments and all nonfinancial instruments from its fair value disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Debt securities: Where quoted prices are available in an active market, securities are classified within Level 1 of the hierarchy. Level 1 securities include highly liquid government securities such as U.S. treasuries and exchange-traded equity securities. For securities traded in secondary markets for which quoted market prices are not available, the Company generally relies on prices obtained from independent vendors. Such independent pricing services are to advise the Company on the carrying value of the securities available for sale portfolio. As part of the Company's procedures, the price provided from the service is evaluated for reasonableness given market changes. When a questionable price exists, the Company investigates further to determine if the price is valid. If needed, other market participants may be utilized to determine the correct fair value. The Company has also reviewed and confirmed its determinations in discussions with the pricing service regarding their methods of price discovery. Securities measured with these techniques are classified within Level 2 of the hierarchy and often involve using quoted market prices for similar securities, pricing models or discounted cash flow calculations using inputs observable in the market where available. Examples include U.S. government agency securities, mortgage-backed securities, obligations of states and

political subdivisions, and certain corporate, asset-backed and other securities. In cases where Level 1 or Level 2 inputs are not available, securities are classified in Level 3 of the fair value hierarchy.

Equity securities: Fair values for other investments are considered to be their cost as they are redeemed at par value.

Mortgage loans held for sale: Loans are committed to be delivered to investors on a “best efforts delivery” basis within 30 days of origination. Due to this short turn-around time, the carrying amounts of the Company’s agreements approximate their fair values.

Bank owned life insurance contracts: The carrying amounts in the statements of condition approximate these assets’ fair value.

The carrying amount, estimated fair value and placement in the fair value hierarchy of the Company’s financial instruments as of December 31, 2018 and December 31, 2017 are presented in the following table. This table includes those financial assets and liabilities that are not measured and reported at fair value on a recurring basis or nonrecurring basis.

	December 31, 2018		2017	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In Thousands)			
Financial Assets:

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

There were no disagreements with accountants regarding accounting and financial disclosure matters during the year ended December 31, 2018.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, under supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures, as defined under Exchange Act Rule 13a-15(e). Based upon that evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2018.

Changes in Internal Control over Financial Reporting

The Chief Executive Officer and Chief Financial Officer have concluded that there were no changes in our internal control over financial reporting identified in the evaluation of the effectiveness of our disclosure controls and procedures that occurred during the fiscal quarter ended December 31, 2018, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined under Exchange Act Rules 13a-15(f) and 14d-14(f). Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

All internal controls systems, no matter how well designed, have inherent limitations and may not prevent or detect misstatements in the Company's financial statements, including the possibility of circumvention or overriding of controls. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As of December 31, 2018, management assessed the effectiveness of our internal control over financial reporting based on criteria for effective internal control over financial reporting established in "Internal Control – Integrated Framework (2013)," issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on the assessment, management determined that the Company maintained effective internal control over financial reporting as of December 31, 2018, based on those criteria.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2018, has been audited by Dixon Hughes Goodman LLP, an independent registered public accounting firm, as stated in their report herein — "Report of Independent Registered Public Accounting Firm."

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

We respond to this Item by incorporating by reference the material responsive to this Item in our definitive proxy statement to be filed with the Securities and Exchange Commission in connection with our 2019 Annual Meeting of Stockholders. Information regarding the Company's executive officers is provided in Part I, Item 1 of this Form 10-K.

Code of Ethics

Our Board of Directors has adopted a Code of Ethics that applies to all of our employees, officers and directors. The Code of Ethics covers compliance with law; fair and honest dealings with us, with competitors and with others; fair and honest disclosure to the public; and procedures for compliance with the Code of Ethics. A copy of the Code of Ethics is available on our website at www.servisfirstbank.com. We will disclose any amendments or waivers, including implicit waivers, of the Code of Ethics applicable to our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, on our website.

ITEM 11. EXECUTIVE COMPENSATION

We respond to this Item by incorporating by reference the material responsive to this Item in our definitive proxy statement to be filed with the Securities and Exchange Commission in connection with our 2019 Annual Meeting of Stockholders.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

We respond to this Item by incorporating by reference the material responsive to this Item in our definitive proxy statement to be filed with the Securities and Exchange Commission in connection with our 2019 Annual Meeting of Stockholders. The information called for by this item relating to "Securities Authorized for Issuance Under Equity Compensation Plans" is provided in Part II, Item 5 of this Form 10-K.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

We respond to this Item by incorporating by reference the material responsive to this Item in our definitive proxy statement to be filed with the Securities and Exchange Commission in connection with our 2019 Annual Meeting of Stockholders.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

We respond to this Item by incorporating by reference the material responsive to this Item in our definitive proxy statement to be filed with the Securities and Exchange Commission in connection with our 2019 Annual Meeting of Stockholders.
