Item 1.01 Entry into a Material Definitive Agreement.

On July 10, 2013 (the date of “Closing”), Acacia Diversified Holdings, Inc. (the “Company” or “Acacia”) entered into a definitive agreement to acquire substantially all of the assets of Red Phoenix Extracts, Inc., a Florida corporation (the “Assets”) (“RPE” or the “Seller”). The Assets include, among other things, property, plant and equipment, intellectual property, including trade secrets, and customer lists. As consideration for the Assets, the Company issued RPE nine hundred thousand (900,000) shares of its common stock (the “Shares”) The Shares are restricted within the meaning provided in the Securities Act of 1933, and Rule 144 promulgated by Section 5 thereof. A true and accurate copy of the definitive agreement is included as Exhibit 10.01 to this Report.

In addition to acquiring the Assets, the Company assumed certain liabilities of RPE. Specifically, the Company assumed two leases for RPE’s facility consisting of two adjacent units located at 3495 S. U.S. Hwy.1, Bldgs. 12-E and 12-W, Ft. Pierce, FL 34982 (the “Leases”). The leased facility consists of approximately 14,525 square feet and contains an array of capital equipment Acacia acquired in the transaction, making the facility fully functional and operational for the Company’s immediate needs.

The Company will pay a combined \$4,691 per month for the two leased units, after qualifying for Florida agricultural lease credits, to the Florida State Farmer’s Market in Fort Pierce, Florida. The Farmers Market is owned and operated by the State of Florida. The leases are subject to additional 1-year lease renewals, that being the maximum allowed by the Florida authority operating the facility.

True and accurate copies of the Leases are included as Exhibit 10.02 to this Report.

The Company will also assume responsibility for a forklift lease in the amount of \$465 per month for the remaining 16 months of the lease. A true and accurate copy of the Lease is included as Exhibit 10.03 to this lease.

Moreover, the Company assumed debt in the amount of \$449,543 (the “Debt”) and obligations for trade payables in the amount of \$69,950 (the “Trade Payables”). The Debt and Trade Payables represent obligations incurred by RPE in its Business operations.

Prior to Closing, RPE operated a manufacturing business at its leased premises in Fort Pierce, Florida. Those operations centered on producing products from citrus peel material obtained from the citrus juice industry in the area. Concomitant with the Closing, RPE will discontinue such operations.

The Company expects to utilize the Red Phoenix name and brand properties and the other Assets in its new manufacturing operations. The Company’s management will seek to commence partial operations in the near term during the summer “off season” for citrus production, and will seek to institute full manufacturing operations coincidental with the beginning of the fall citrus season at approximately the beginning of November.

In the transaction, Acacia had the option to, and did, retain a number of the original Red Phoenix employees, including, among others, its President, William J. Howe, and its Operations Manager, Clarence Shivers, now appointed to serve as President and Vice President, respectively, of the new Acacia subsidiary.

The Seller also executed a non-competition agreement with the Company limiting the Seller’s involvement in restricted competitive ventures with the Buyer for five years following the Closing.

Background and History of Red Phoenix Extracts, Inc.

Red Phoenix Extracts, Inc. was originally formed as a Florida corporation on April 5, 2007 to exploit certain methods, processes and systems which were devised, created and designed with particular application to innovations in the citrus industry. While the industry struggled for years to find a solution to the significant citrus waste problem resulting from juice production, Red Phoenix developed a process that utilized citrus peel material in its processes while simultaneously eliminating the current negative options available for citrus waste remediation. Specifically, Red Phoenix developed a process which allowed the citrus peel material to be re-processed into highly desirable ingredients for use as spices, teas and ground citrus additives for food, beverages, nutraceuticals and cosmaceuticals. The process does not introduce any chemicals or foreign substances into the citrus material or its finished products. This trade-secreted technology not only allowed Red Phoenix to generate significant revenues from those finished products, but also provided a valuable service to processors through safe, efficient, and cost-effective disposal of their citrus peel material.

Contemplated Business of Acacia's New Red Phoenix Subsidiary

The Company, through its new wholly-owned citrus extracts subsidiary, intends to utilize the trade secreted processes and the acquired assets in its bid to fill existing and new sales contracts and orders with current and future clients as it seeks to implement its new production procedures and efficiencies later this year. The Company will seek to initiate full production at the facility in conjunction with the beginning of the fall citrus season following RPE's seasonal discontinuation of its business and manufacturing operations at the end of June 2013 and prior to Closing of the acquisition transaction.

Item 2.01 Completion of Acquisition or Disposal of Assets.

On July 10, 2013, the Company entered into an agreement to acquire substantially all the Assets of Red Phoenix Extracts, Inc., a Florida corporation. A true and accurate copy of such agreement is included as Exhibit 10.01 of this Report.
