Table of Contents

ACACIA DIVERSIFIED HOLDINGS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2014 and 2013

NOTE 1 – THE COMPANY AND BASIS OF PRESENTATION

THE COMPANY - Acacia Diversified Holdings, Inc. (“Acacia” or the “Company”) is an entity actively engaged in the citrus byproducts manufacturing industry.

On July 10, 2013 the Company, through its wholly-owned subsidiary Citrus Extracts, Inc., entered into a definitive agreement to acquire certain assets and assumed liabilities related to those assets from Red Phoenix Extracts, Inc. (“RPE” or the “Seller”), a corporation in Fort Pierce, Florida. The assets included, among other things, furnishings, machinery, and equipment. As consideration for the assets, the Company issued RPE nine hundred thousand (900,000) restricted shares of its common stock (the “Shares”).

BASIS OF PRESENTATION - The Company has elected to prepare its financial statements in accordance with generally accepted accounting principles in the United States (GAAP) with December 31, as its year-end. The consolidated financial statements and notes are representations of the Company’s management who are responsible for their integrity and objectivity.

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for annual financial information and with the instructions to Form 10-Q and Article 10 of Regulation SX. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete consolidated financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of the results for the interim period have been included. All such adjustments are of a normal and recurring nature. These interim results are not necessarily indicative of results for a full year. These unaudited consolidated financial statements should be read in connection with the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

CONSOLIDATION – The Company at September 30, 2014, the Company has two wholly owned subsidiaries: Citrus Extracts, Inc. and Acacia Transport Services, Inc. All significant intercompany accounts and transactions are eliminated in consolidation.

NOTE 2 – NEW SUBSIDIARY

On January 15, 2014 formed Acacia Transport Services, Inc. (“ATS”) as a wholly-owned subsidiary, but activity did not begin until July of that year. ATS was formed for the primary purpose of providing transportation and a continuous source of raw citrus peel materials for Citrus Extracts, Inc.’s manufacturing plant, and for the secondary purpose of generating transport revenues in hauling excess raw citrus peel materials to local farmers for use as feed for livestock. On July 2, 2014, that subsidiary entered into an Agreement for Citrus Peel Hauling Services with Lambeth Groves Juice Company, a juice extraction company located in Vero Beach, Florida, some 20 miles from Citrus Extracts, Inc. That contract called for Acacia Transport to assume all responsibilities for hauling the raw, remediated citrus peel products from Lambeth Groves by July 30, 2014. Actual transport operations from Lambeth Groves commenced in early August 2014.

Acacia Transport’s plan was to acquire three tandem-axle road tractors, five tandem-axle aluminum end-dump trailers, one straight truck with a stainless steel tank for small peel-hauling operations, one 53 foot covered van trailer, as well as other support equipment and vehicles to accommodate its obligations to Lambeth Groves. On July 22, 2014 ATS acquired its first trailer, and subsequently finalized its purchase of the other tractors, trailers, and equipment through

the end of August 2014.

NOTE 3 – GOING CONCERN

As of September 30, 2014, the Company had limited liquid assets and had not generated sufficient revenues from its new Citrus Extracts, Inc. operations to achieve profitability on a consolidated basis. As a result, without generating larger revenues or finding new and viable sources of revenue the Company not be able to meet its future obligations as they come due and will have difficulties meeting expenses relating to the expansion of the Company.

F-4

Table of Contents

ACACIA DIVERSIFIED HOLDINGS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2014 and 2013

NOTE 3 – GOING CONCERN (Continued)

The Company has been successful in establishing high production levels with its organic and non-organic peel products, but has been slow to fully develop its market for the more valuable organic products. There is a lag period between production of the newly offered organic and actual sale and delivery of those products. Buyers of the organic products must be identified, contacted, provided with samples for testing, provided with product certifications, milling products and packaging to their specifications, allowed time to gain sales commitments from their own clients, then shipping the products to the buyer and waiting to collect the sales proceeds. Those processes are often lengthy and drawn out, particularly when relating to the food industry. While the Company's Citrus Extracts subsidiary has sold considerable quantities of its organic and non-organic products in subsequent events, it is anticipated that it may take more than a year to develop selling channels sufficient to insure sale of its full production of its products.

As a result, the inability by the Company to currently sell and deliver all its finished peel product inventory without extended holding periods will only serve to exacerbate cash flow concerns until the sales pipeline fills. While the inventory supplies, if sold in a timely manner, are quite sufficient to meet the Company's immediate cash needs, these factors raise some doubt as to the ability of the Company to continue as a going concern. Management's plans include attempting to find new purchasers for its citrus ingredient products, attempting to find new acquisition, merger, or other business combination prospects, and/or attempting to raise funds from the public through the sale of its equity securities in a private offering made pursuant to Regulation D promulgated under the Securities Act of 1933. There can be no assurance that Management's plans will be successful.

Table of Contents

Item 1B. Unresolved Staff Comments

None.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The Company sold its Augusta auction subsidiary, its only revenue-producing operations, on July 31, 2012, and accounted for those operations as discontinued effective with its Annual Report on Form 10-K for the year ended December 31, 2011. The Company had no revenue-producing operations from July 31, 2012 until July 10, 2013 when it acquired assets and launched its new Citrus Extracts, Inc. ("CEI") subsidiary, its only revenue-producing subsidiary until July of 2014. In July of 2014 the Company, through its new Acacia Transport Services, Inc. ("ATS") subsidiary, acquired a fleet of vehicles and began transporting raw citrus peel products on August 7, 2014. Those two subsidiaries were the Company's only revenue-producing units as of September 30, 2014. Accordingly, these comparative results not be reflective of similar results for prior periods or provide a proper basis for review versus those periods.

Forward-Looking Information

The Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of the Form 10-Q contain forward-looking information. The forward-looking information involves risks and uncertainties that are based on current expectations, estimates, and projections about the Company's business, management's beliefs, and assumptions made by management. Words such as "expects", "anticipates", "intends", "plans", "believes", "seeks", "estimates", and variations of such words and similar expressions are intended to identify such forward-looking information. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking information due to numerous factors, including, but not limited to, availability of financing for operations, successful performance of internal operations, impact of competition and other risks detailed below as well as those discussed elsewhere in this Form 10-Q and from time to time in the Company's Securities and Exchange Commission filings and reports. In addition, general economic and market conditions and growth rates could affect such statements.

General

Citrus Extracts, Inc. ("CEI") is a business in the food manufacturing industry subsector that transforms livestock and agricultural products into products for intermediate or final consumption. The industry groups are distinguished by the raw materials (generally of animal or vegetable origin) processed into food products.

The food products manufactured in these establishments are typically sold to wholesalers or retailers for inclusion as ingredients into various food products or direct distribution to consumers. The Company's Citrus Extracts subsidiary concentrates its efforts on manufacturing ingredients that are used in foods and beverages, including spices, teas, beers, and other food commodities.

As is common with other businesses, the Company has experienced and expects to continue to experience fluctuations in its quarterly results of operations due to a number of factors, many of which are beyond the Company's control and which are common to the industry.

Acacia Transport Services, Inc. ("ATS") is a business in the transportation industry that transports raw citrus peel to supply the CEI subsidiary's need for raw production materials, and also transports excess peel from the Lambeth Groves Juice Company ("Lambeth") in Vero Beach, Florida to local farmers for use as cattle feed. The availability of raw peel is dependent on the production of citrus juices at Lambeth under ATS's exclusive contract to remove all

remediated biomass peel products from that location.

Generally, the volume of products produced, and therefore available for sale, is highest in the first, second, and fourth calendar quarters of each year and lower in the third quarter. This results primarily from the availability of raw citrus peel for production use during the Florida “citrus season” each year. This seasonality is affected by several factors, most particularly weather conditions that affect the timing of maturity of brix and sugar levels in the fruit, being the determinant as to the suitability of the fruit for juicing operations. The Company’s Citrus Extracts subsidiary relies upon the citrus peel resulting from those juice operations as its source of raw materials for production of its finished products. Among the other factors that have in the past and/or could in the future affect the Company's operating results are: general business conditions; news relating to the healthful benefits of our products; trends in the food industry and changes in personal eating habits; economic conditions, including fuel prices and interest rate fluctuations; the introduction of new competitors; competitive pricing pressures; and costs associated with the acquisition of businesses or technologies; and the contractual relationships of our customers with their end-user clients and the resultant periodic fluctuations in their orders. As a result of the above factors, operations are subject to significant variability and uncertainty from quarter to quarter, and revenues and operating expenses related to volume will fluctuate accordingly on a quarterly basis.

Table of Contents

Background and History of the Company

Acacia Diversified Holdings, Inc. (“we”, “us”, the “Company”, or the “Parent Company”) was incorporated in Texas on October 1, 1984 as Gibbs Construction, Inc. (“Gibbs”). The Company changed its name from Gibbs Construction, Inc. to Acacia Automotive, Inc. effective February 20, 2007, and subsequently changed its name again from Acacia Automotive, Inc. to Acacia Diversified Holdings, Inc. effective October 18, 2012.

In the years following 1984, Gibbs grew to become a full service, national commercial construction company and completed an initial public offering of its common stock pursuant to a registration thereof on Form S-1 in January, 1996, trading on the NASDAQ Exchange under the symbol GBSE.

However, in April, 2000, immediately following a period in which the Federal Reserve raised interest rates six times between June 1999 and May 2000 in an effort to cool the economy, Gibbs faced financial difficulties and was unsuccessful in its efforts to bring the Company back to profitability.

Initial Restructuring of the Company

On August 15, 2006, Steven L. Sample agreed to acquire control of Gibbs Construction, Inc.. To do so, he initially acquired 46.7%, of common stock of Gibbs. In addition Mr. Sample paid substantial expenses of the Company including the costs of audits and legal expenses required to bring the Company’s SEC filings current.

In order to further restructure and rehabilitate the Company such that it could be made to enter the automotive auction business and to satisfy its obligations to Mr. Sample, the shareholders of the Company at a Special Meeting of Shareholders on February 1, 2007 ratified all the actions recommended by the Company’s board of directors, causing the Company to (i) issue new common and preferred shares to Mr. Sample; (ii) amend the Company’s articles of incorporation in setting the par value of the shares at \$0.001 per share; (iii) effect a one for eight reverse stock split; (iv) increase the number of authorized shares of common stock to 150,000,000 and authorize a series of preferred stock with 2,000,000 shares; and, (v) change the Company’s name from Gibbs Construction, Inc. to Acacia Automotive, Inc. Those amendments to the Company’s Articles of Incorporation became effective February 20, 2007. In conjunction with those events, the Company changed its stock-trading symbol to from GBSE to ACCA to better reflect its new name. On May 29, 2007, Mr. Sample exchanged all his preferred shares for an equal number of common shares of the Company and a number of warrants to purchase Common shares. There are no preferred shares issued or outstanding as of December 31, 2014, and no plans to issue any new preferred shares.

In that restructuring the Company retained its substantial tax loss carryforward, which has grown to become approximately \$12,940,000 as of December 31, 2014.

Immediately following the approval of these amendments, the Company adopted its Acacia Automotive, Inc. 2007 Stock Incentive Plan, which was ratified by the Company’s stockholders in its Annual meeting held November 2007, initially reserving 1,000,000 shares thereunder. In subsequent actions, the shareholders of the Company approved amendments to the Acacia Automotive, Inc. 2007 Stock Incentive Plan (the “Plan”), renaming it the Acacia Diversified Holdings, Inc. 2012 Stock Incentive Plan and making that revised plan effective as of January 1, 2012. All material terms of the 2007 Plan remained in full force and effect as they were merged into the revised Plan.

In July 2007, the Company caused to be formed Acacia Augusta Vehicle Auction, Inc., a South Carolina corporation and wholly owned subsidiary of the Company. (“AAVA”), for the sole purposes of acquiring certain assets of the Augusta Auto Auction and operating an auction at that same location. This became the Company’s only revenue-producing operations at that time.

In 2009 the Company caused to be formed Acacia Chattanooga Vehicle Auction, Inc., a Tennessee corporation and wholly owned subsidiary of the Company. (“ACVA”), for the sole purposes of acquiring certain assets of the Chattanooga Auction and operating an auction at that same location. This became the Company’s second revenue-producing operations at that time.

Disputes arose between the Company and the seller of those Chattanooga assets in September of 2010. The Company discontinued operations there effective August 31, 2010, accounting for those operations as discontinued effective that date, and first accounted for those as discontinued operations in its Quarterly Report on Form 10-Q for the period ended June 30, 2010.

In late 2011, after successfully operating the Augusta auction for more than four years, the Company determined that it was in its best interests to sell the Augusta auction and thereafter entered into a Letter of Intent with two individuals for that purpose. The sale transaction was completed on July 31, 2012. Those events were reported in their entirety by the Company on its Current Report on Form 8-K on August 27, 2012, which is incorporated herein by reference.

Table of Contents

Thus, from February 2007 through July of 2012, the Company's primary objective had been to identify, acquire and operate going concerns in the automotive auction industry. Following the sale of its Augusta auction assets, the Company on October 18, 2012 changed its name from Acacia Automotive, Inc. to Acacia Diversified Holdings, Inc. in an effort to exemplify the Company's desire to expand into alternative industries as well as more diversified service and product offerings.

Recent Activities of the Company

The Company was without revenue-producing operations from July 31, 2012 until July 10, 2013, when it, through its new wholly-owned subsidiary Citrus Extracts, Inc., entered into a definitive agreement to acquire certain assets and assumed liabilities related to those assets from Red Phoenix Extracts, Inc. ("RPE"), a corporation located in Fort Pierce, Florida. The assets included, among other things, furnishings, machinery, and equipment. As consideration for the assets, the Company issued to the holders of RPE nine hundred thousand (900,000) restricted shares of its common stock. There was no cash consideration in the transaction, which was more particularly described in the Company's Current Report on Form 8-K dated July 10, 2013.

In that transaction, the Company also assumed certain liabilities of RPE, including indebtedness and trade payables in the amount of \$519,493 for certain loan and payable obligations and responsibility for a forklift lease in the amount of \$465 per month for the remaining 16 months of the lease. That forklift lease expired in October of 2014, and the Company exercised its option to purchase at that time. As a part of the assumed indebtedness the Company accepted responsibility for payment of the remaining \$226,100 due on an SBA equipment loan at \$5,205.46 per month.

In that same transaction, the Company also assumed responsibility for two leases for a facility of approximately 14,525 square feet consisting of two adjacent building units located at 3495 S. U.S. Hwy.1, Bldgs. 12-E and 12-W. The Company pays a combined \$4,691 per month for the two leased units to the to the Fort Pierce State Farmer's Market in Fort Pierce, Florida. The Farmers Market is owned and operated by the State of Florida, and the leases are subject to additional 1-year lease renewals, that being the maximum term allowed by the Florida authority operating the facility.

On July 2014, RPE reacquired \$113,597 of the original debt transferred to the Company in the asset acquisition agreement and reacquired the \$69,950 in trade obligations, thereafter becoming a creditor to the Company in those amounts replacing others. It further extended a new advance to the Company in the amount of \$65,000 cash, resulting in total obligations to RPE of \$248,547.

Following those actions, on August 20, 2014 the Company issued 108,597 new common shares to RPE in extinguishment of a portion of its obligations, those shares being valued at \$1.00 each. Following the issuance of those shares, the Company's debt obligation to RPE from the original acquisition transaction was reduced to \$139,950 and its remaining debt obligations to others from that transaction was reduced to \$109,846.

Thus, in 2013 the Company issued 934,285 new restricted shares of its Common stock. Of those shares issued in 2013, 900,000 shares were issued to RPE for assets acquired, 20,000 shares were issued to the Company's securities attorney for services, and 14,285 shares were issued for services related to website and logo design. In 2014 the Company issued 238,597 new restricted shares of its Common stock. Of those shares issued in 2014, 108,597 shares were issued in extinguishment of obligations to RPE, 20,000 shares were issues for services related to the company's computer servers and websites, 5,000 shares were issued for legal services, and 105,000 shares were issued to others for miscellaneous services.

The Company on January 15, 2014 formed Acacia Transport Services, Inc. ("ATS") as a wholly-owned subsidiary. That subsidiary was formed for the primary purpose of providing a continuous source of raw citrus peel

materials for the Company's Citrus Extracts, Inc. manufacturing plant, and for the secondary purpose of generating transport revenues by hauling excess raw citrus peel materials to local farmers for use as feed for livestock. On July 2, 2014, ATS entered into an Agreement for Citrus Peel Hauling Services with Lambeth Groves Juice Company, a juice extraction company located in Vero Beach, Florida, some 20 miles from Citrus Extracts, Inc. That contract called for ATS to assume all responsibilities for hauling the raw, remediated citrus peel products from Lambeth Groves by July 30, 2014, which it did, and actual transport operations from Lambeth Groves commenced on August 7, 2014 and transported subsequent loads going forward from that date, becoming the Company's second revenue-producing subsidiary at that time in conjunction with the Citrus Extracts subsidiary. Full-scale transport operations finally began with the onset of the 2015 citrus season that again started later than anticipated at approximately the beginning of December, 2014, with the number of loads transported "in season" generally being maximized during the period of mid-to-late December through March or April.

In July and August of 2014 Acacia Transport acquired three tandem-axle diesel road tractors, five tandem-axle aluminum end-dump trailers, one 53 foot tandem axle closed van trailer, one straight truck with a stainless steel tank for small peel-hauling operations, as well as other spare parts and support equipment to accommodate its obligations to Lambeth Groves and Citrus Extracts.

Table of Contents

On March 1, 2014 the Company began performing milling operations using the trade name Acacia Milling Services at the Fort Pierce location for its Citrus Extracts subsidiary. Milling is the term applied to grinding or refining the finished citrus ingredient products rendered by Citrus Extracts into smaller, finer particles. These services vary from simple sifting operations that separate the various sizes of materials to creating specific cuts from the original material, such as “tea bag cut” size, granulated materials of various sizes, or “powders” of various mesh sizes. Generally the greater the mesh size (finer, smaller, particle size) requested by the customer, the higher the milling charges per pound. The Company does not currently maintain separate accounting functions for its new milling operations, but intends to further segregate those milling operations in 2015 and to implement a new system of segregated financial reporting for those operations. The Company also intends to expand its offerings of those milling services to outside parties for the generation of additional revenues in the future.

Thus, Acacia Diversified Holdings, Inc., now (i) through its Citrus Extracts, Inc. subsidiary is now engaged in operating an agricultural processing and manufacturing business concentrating on optimizing citrus biomass (waste) materials into food, beverage, spice, nutraceutical, skin care, cosmetics, and botanical products; (ii) through its wholly-owned Acacia Transport Services, Inc. subsidiary in Fort Pierce, Florida is now engaged in the transportation industry; and, (iii) through its Acacia Milling Services operations is engaged in milling finished products for the Company’s Citrus Extracts, Inc. subsidiary and ultimately other clients.

In addition to the foregoing, the Company will continue to seek and evaluate other acquisition, business combination or merger opportunities. Such opportunities need not be in our current area of operations and may be more consistent with our objective to become a holding company with a diverse array of businesses. There can be no assurance that any such evaluations will result in viable acquisition opportunities, or that any viable acquisition opportunities could result in a formal business combination or relationship. Moreover, there can be no assurances that if we are able to identify a suitable opportunity, that we will have the financial ability to close such contemplated transaction or that the target will accept any bona fide offer made by us. Should the Company require additional capital to close such a transaction, that may require us to offer to sell and sell either our debt or equity securities. There can be no assurances, however, that any such efforts would be successful. There have been no tentative or definitive plans for acquisition or merger agreements resulting from any evaluations.

Business Overview - Citrus Extracts, Inc.

In addition to our line of non-organic citrus ingredient products, our Citrus Extracts subsidiary began manufacturing organic citrus ingredient products in limited quantities in 2013 and in substantially larger quantities beginning in January of 2014. The Company secures its source of fresh non-organic citrus peel directly from the normal operations of a citrus juice processor less than 20 miles from our manufacturing facility, also obtaining its fresh organic peel from that plant in conjunction with its special juice extraction operations for Uncle Matt’s Organic Juice Company-Florida’s largest and most respected organic juice manufacturer. All our food grade products are gluten free, non-gmo, certified Kosher, and in the case our organic products, bear the USDA National Organic Certification.

Citrus Extracts utilizes our confidential and proprietary chemical-free, 100% natural processes in the manufacturing, sale, and distribution of all-natural, food-grade ingredients from raw, fresh, natural citrus peel resulting from citrus juicing operations. Through these controlled methods, CEI processes and dehydrates orange, lemon, grapefruit and tangerine peel into its CitraBlend and CitraBlend Organic products and then mills those products to varying sizes ranging from larger “cut & sift flakes” to 40+ mesh powders (or smaller sizes for custom orders). These ingredients, both organic and non-organic, find their way into many regional and national brand-name products commonly found on America’s kitchen tables in the form of spices, teas and otherwise. Our CitraBlend products are also utilized in brewing many local and regional craft beers in addition to nationally-recognized beer brands, and because we have only recently addressed that market it remains largely untapped. At this time CitraBlend is primarily sold through a distributor network with emphasis on those industries.

As with other industries in the food-manufacturing subsector, CEI transforms raw agricultural products into products for intermediate or final consumption. The groups composing this industry are distinguished by the type of raw materials they process into food products, (generally of animal or vegetable origin). Our manufacturing plant currently specializes in natural citrus products. The food products manufactured in these establishments are typically sold to wholesalers or retailers for inclusion as ingredients into various food products or direct distribution to consumers. The Company's Citrus Extracts subsidiary concentrates its efforts on manufacturing food grade ingredients that are used in foods and beverages, including spices, teas, beers, and other food commodities, but can also effectively and efficiently transform this fresh, raw citrus peel material into highly saleable by-products for use in the nutraceutical, skin care, cosmaceutical and botanical industries.

Table of Contents

The Company has experienced and expects to continue to experience fluctuations in its quarterly results of operations due to a number of factors, many of which are beyond the Company's control and which are common to the industry. Generally, the volume of products produced, and therefore available for sale, is highest in the first, second, and fourth calendar quarters of each year and lower in the third quarter. This results primarily from the availability of raw citrus peel for production use during the Florida "citrus season" each year, generally from about November through May. This seasonality is affected by several factors, most particularly weather conditions that affect the timing of maturity of brix and sugar levels in the fruit, being the determinant as to the suitability of the fruit for juicing operations. The Company's Citrus Extracts subsidiary relies upon the citrus peel resulting from those juice operations as its source of raw materials for production of its finished ingredient products. Among the other factors that have in the past and/or could in the future affect the Company's operating results are: general business conditions; news relating to the healthful benefits of our products; trends in the food industry and changes in personal eating habits; economic conditions, including fuel prices and interest rate fluctuations; the introduction of new competitors; competitive pricing pressures; and costs associated with the acquisition of businesses or technologies; and the contractual relationships of our customers with their end-user clients and the resultant periodic fluctuations in their orders. As a result of the above and other factors, operations are subject to significant variability and uncertainty from quarter to quarter, and revenues and operating expenses related to volume will fluctuate accordingly on a quarterly basis.

Discussion Regarding Citrus Products

Citrus possesses a unique, modular construction. Its many beneficial components are located in the parts that most consumers would throw away. The outer skin, or flavedo, contains pigments that give each fruit its distinctive color. This exterior surface also is dotted with oil glands. Just underneath is the white portion of the peel, or the albedo. Under the albedo lie the familiar citrus segments. Each of these is made up of several membrane-encased juice vesicles. Each segment's collection of juice vesicles is further surrounded by an outer membrane known as the lamella. In seeded fruit, the seeds are found toward the center of the segments. Beyond that, citrus fruits have a core made of a soft, spongy material that visually resembles the albedo.

Citrus fruits are about 50% to 60% juice. Not only does juice make up the majority of the fruit, it also is the largest consumer market for citrus — with orange juice the clear leader. Juice processing originated as a way to use fruit that was deemed unsuitable for the fresh market. Now, more than 80% of the oranges grown in Florida are pressed for juice. First, mature fruit is washed and graded before stainless-steel juice extractors press out the juice. After extraction, the juice passes through a finisher which, using various means, removes excess pulp and seeds.

Juice may be the primary component of citrus processing, but the non-juice material is valuable and loaded with beneficial properties. Most juice processors elect to do little more than find a cost-effective way of disposing of it. Often, the peel and other residue is treated with lime, pressed to remove fluids and dehydrated to around 10% for use as animal feed.

Although the term citrus peel "waste" is commonly used, in reality citrus peel is extremely clean and rich in valuable nutrients. The actual components of citrus peel include:

- sugar (amounting to approximately 10% of the peel);
- citrus oils (d-limonene and cold press oils) at appropriately 3%;
- seeds (for spices and nutraceuticals) at approximately 1%;
- fiber solids (primary ingredient) approximately 50%, and,
 - water, which constitutes the remainder of the peel.

Over 7 billion pounds of citrus peel material is created each year in Florida alone as a result of the production of orange, grapefruit, and lemon juice processing companies. These companies, such as Lambeth Groves Juice Company

(the source of CEI's fresh, raw citrus peel), Tropicana (Pepsico), Florida's Natural, Minute Maid (Coca-Cola) and others are required by the EPA to remediate their residual citrus peel "waste" material in an effort to eliminate pollutive dumping that was previously allowed.

Citrus Extracts processes that remediated peel with processes that have the following advantages:

- No waste water or volatile organic compound ("VOC") air emissions are generated as a result of our process.
 - Every part of the waste peel material is utilized as food grade products with no remaining residue.
 - All natural processes with no additives.

Table of Contents

Consumer products that focus on nutritionally beneficial ingredients such as rutin, d-limonene, hesperiden, potassium, Vitamin C, iron and Vitamin A, which have strong application uses for nutraceuticals, skin care, cosmetics and certain industrial uses, are found in abundance in our CitraBlend products. This product retains the valuable oils, sugars and citrus bioflavonoids that are most functional for these applications. In addition to its progressive growth in conventional citrus products, the Company entered into an exclusive agreement in August 2013 with Uncle Matt's Organic Juice to begin selling organic certified citrus products.

The Company's CitraBlend ingredient products are made from 100% fresh, clean, citrus peel with no chemicals or additives and provide not only a high fiber additive (over 45% fiber), but also combines a highly functional hydrocolloid (pectin) in a single product. In addition to these benefits, CitraBlend is 100% gluten free. The high concentration of pectin (over 9%) in CitraBlend makes it a truly unique and multifunctional natural product.

The following chart reflects the beneficial components in our CitraBlend and CitraBlend Organic products. You can see below that our CitraBlend and CitraBlend Organic ingredient products have more natural fiber than rye, oats, carrots, wheat, and lintel; natural hydrocolloids as in alginate, carrageenan, xanthan, guar gum, and locust beans; and more antioxidants than apples, blueberries, guava, pears, and pistachio nuts. With such an outstanding array of beneficial components, our CitraBlend products are perfectly suited as ingredients for the food and beverage industry.

COMPARISON CHART: FIBER, HYDROCOLLOIDS, AND ANTIOXIDANTS CITRABLEND AND CITRABLEND ORGANIC INGREDIENTS

CitraBlend Organic ingredient products also contain no genetically modified organisms (GMO), and most importantly, all of our Company's citrus products are 100% natural with no chemicals added and are manufactured in south Florida in the heart of the United States citrus industry.

The Company is seeking to identify buyers for its products. Once identified, and assuming an interest is present in purchasing our ingredient products, the potential buyer will generally request samples of our products which they will test in determining the suitability for their specific applications. Following a finding of suitability, the potential buyer will query its buyers to see if a market exists. Upon a positive finding, the buyer can then open discussions for its future purchasing needs and engage in a purchase order for product. This process can be rather slow and tedious, particularly in the food and beverage industries, resulting in long interludes between initial sales contacts and final purchase understandings. As a result of this process, the Company believes growth will be slower than originally anticipated. The Company's products are laboratory tested and certified in each required category, and the company holds proper certifications for its organic and kosher ratings.

Business of the Company's New Acacia Transport Services, Inc.

On January 15, 2014 formed Acacia Transport Services, Inc. ("ATS") as a wholly-owned subsidiary, but activity did not begin until July of that year. ATS was formed for the primary purpose of providing transportation and a continuous source of raw citrus peel materials for its sister Citrus Extracts, Inc. manufacturing plant, and for the secondary purpose of generating transport revenues in hauling excess raw citrus peel materials to local farmers for use as feed for livestock. On July 2, 2014, that subsidiary entered into an Agreement for Citrus Peel Hauling Services with Lambeth Groves Juice Company, a citrus juice extraction company located in Vero Beach, Florida, some 20 miles from Citrus Extracts, Inc. That contract called for Acacia Transport to assume all responsibilities for hauling the raw, remediated citrus peel products from Lambeth Groves by July 30, 2014. Actual transport operations from Lambeth Groves commenced in early August 2014.

During July of 2014, ATS acquired three tandem-axle diesel road tractors, five tandem-axle aluminum end-dump trailers, one 53 foot tandem axle closed van trailer, one straight truck with a stainless steel tank for small peel-hauling operations, as well as other spare parts and support equipment to accommodate its obligations to Lambeth Groves and Citrus Extracts.

Table of Contents

In a departure from the off-season lack of availability of raw citrus peel material for its production processes, Lambeth Groves generally acquires various supplies of fresh citrus products citrus products during the citrus season as supplies to support its own juice extraction operations during the off-season. The peel resulting from those off-season juice production operations becomes a source of off-season raw materials for production at the Company's Citrus Extracts operations, and the transport of that peel is accommodated by ATS. Thus, ATS, through its agreement with Lambeth Groves, has obtained a source of peel in limited quantities for its revenue-generating operations during the off-season in addition to the larger volumes of peel generated in the normal citrus season, while at the same time providing a supply of off-season raw peel to its sister Citrus Extracts, Inc. subsidiary for its food-grade ingredient product manufacturing. The Company anticipates seeing a benefit from this opportunity in the off-season occurring during the summer of 2015.

Acacia Transport Services transported its first load of raw peel from Lambeth Groves on August 7, 2014 and transported subsequent loads going forward from that date. Full-scale transport operations finally began with the onset of the 2015 citrus season that again started later than anticipated at approximately the beginning of December, 2014, the number of loads transported "in season" generally being maximized during the period of December through March or April.

In addition to the foregoing, the Company will continue to seek and evaluate other acquisition, business combination or merger opportunities. Such opportunities need not be in our current area of operations and may be more consistent with our objective to become a holding company with a diverse array of businesses. There can be no assurance that any such evaluations will result in viable acquisition opportunities, or that any viable acquisition opportunities could result in a formal business combination or relationship. Moreover, there can be no assurances that if we are able to identify a suitable opportunity, that we will have the financial ability to close such contemplated transaction or that the target will accept any bona fide offer made by us. Should the Company require additional capital to close such a transaction, that may require us to offer to sell and sell either our debt or equity securities. There can be no assurances, however, that any such efforts would be successful. There have been no tentative or definitive plans for acquisition or merger agreements resulting from any evaluations.

Recent Events and Direction of the Company in 2014

The Company's immediate objective is to operate in the citrus extract manufacturing industry by and through its wholly-owned subsidiary, Citrus Extracts, Inc. ("CEI"). As an integral part of that plan, the Company formed Acacia Transport Services, Inc. ("ATS") in subsequent events as a transport subsidiary that arranged for a contracted source of raw peel and for the means to transport it to the Company's CEI subsidiary. On March 1, 2014 the Company began performing milling operations using the trade name Acacia Milling Services at the Fort Pierce location for its Citrus Extracts subsidiary. Milling is the term applied to grinding or refining the finished citrus ingredient products rendered by Citrus Extracts into smaller, finer particles. These services vary from simple sifting operations that separate the various sizes of materials to creating specific cuts from the original material, such as "tea bag cut" size, granulated materials of various sizes, or "powders" of various mesh sizes. Generally the greater the mesh size (finer, smaller, particle size) requested by the customer, the higher the milling charges per pound. The Company does not currently maintain separate accounting functions for its new milling operations, but intends to further segregate those milling operations in 2015 and to implement a new system of segregated financial reporting for those operations. The Company also intends to expand its offerings of those milling services to outside parties for the generation of additional revenues in the future.

The Company intends to continue to expand its current revenue-producing capabilities as well as seek and evaluate other acquisitions, business combinations and merger opportunities. The Company anticipates that it will need substantial working capital to provide for expenses related to the recent start-up of its manufacturing operations, extinguishment of certain debt it incurred in conjunction with the acquisition of the Red Phoenix Extracts assets, and

to cover general overhead expenses in the short term. The Company anticipates that it will require additional capital to meet its short-term business objectives. There can be no assurance, however, that the Company will be successful in its efforts to raise capital, or if it is successful that the amounts of capital raised will be sufficient to meet its needs and obligations.

Discussion Regarding Cost of Revenues (Same as “Costs of Goods Sold”, “Costs of Fees Earned” or “Costs of Services”)

As is generally consistent with reporting in most industries, the Company has designed its financial reports to reflect total revenues less cost of revenues (sometimes indicated in our financial reports as “Costs of Goods Sold”, “Costs of Fees Earned” or “Costs of Services”) in arriving at a gross profit before deducting operating expenses. Costs of goods sold include costs similar to “production costs”, including certain subscribed services; labor and contract labor for operations; outside services, pick up and delivery, rental of vehicles or equipment to facilitate operations, direct tools/supplies/equipment; fuel expense; maintenance; parts; shipping costs; discounts; policy allowance; return allowances; and, miscellaneous operations expenses. The Company’s independent accountants have elected to class the salaries, including related taxes, of production personnel to the “salary” classification in its consolidated reports, rather than as costs of revenues.

Table of Contents

Discussion Regarding the Company's Operations

The Company sold its Augusta auction operations in the Augusta, Georgia area, its only revenue-producing operations, on July 31, 2012, and has accounted for those operations as discontinued effective with its Annual Report on Form 10-K for the year ended December 31, 2012. The Company resumed revenue-producing operations following its acquisition of the certain assets of Red Phoenix Extracts, Inc. on July 10, 2013, which were placed into its new Citrus Extracts, Inc. subsidiary. The Company had no revenue-producing operations from August 1, 2012 until July 10, 2013, and then its operations were very limited as it awaited the 2014 Florida citrus season to come into play in December of 2013. As such, there were no revenue-producing operations at all during Q1, Q2 and the first portion of Q3 of 2013. Accordingly, the Company's discussion and analysis of financial condition and results of operations may not provide an adequate basis for comparative review.

The Company uses the average cost method to value its inventory and products sold, including a per pound depreciation charge. The average cost increased during the 2014 fiscal year as: (i) certain costs are fixed in relation to seasonal fluctuation in quantities of peel available and processed; (ii) the Company anticipates utilizing additional warehousing space as it grows its sales and inventories; and (iii) certain products sold require additional processing to meet customer requests.

Three months ended September 30, 2014

In the third quarter of 2014, Acacia Transport Services, Inc. became the Company's second revenue-producing subsidiary with only limited activity as in became operational in the citrus "off season" in August. Citrus Extracts, Inc. remained the Company's main revenue-producing subsidiary. The sale of citrus byproducts began on a limited basis in the third quarter of 2013. Accordingly, no revenues were derived from the sale of citrus byproducts for the three-month period ended September 30, 2013.

In order to generate its finished, food-grade, dehydrated ingredient products, the Company utilizes raw, wet citrus peel in its confidential production processes. Generally speaking, each pound of our finished, dehydrated ingredient products requires approximately five to seven pounds of raw peel to complete that transformation process. In the three months ended September 30, 2014, the Company transported and processed approximately one quarter million pounds of raw, fresh citrus peel in producing approximately 40,000 pounds of finished ingredient products, and sold about 154,000 pounds of finished ingredient products at an average price of about \$2.36 per pound.

Operating costs and expenses were about \$168,000 in the three months ended September 30, 2014, in addition to costs of revenues of about \$225,000, for total costs and expenses of about \$393,000 as compared to total operating costs (and no costs of revenues) of about \$110,000 in the same period of 2013. This increase of about 257% in total costs and expenses is caused by approximately \$36,000 increase in employee compensation related to the Company's subsidiary that was not in full operation at September 30, 2013, an increase in parent company employee compensation of about \$43,000, and the costs of revenues related to manufacturing operations that were also not present in the third quarter of 2013, offset by a small decrease in consulting expense and professional fees.

The consolidated net loss decreased from \$182,896 to become a profit of \$4,210 in the three-month period ended September 30, 2013 and 2014, respectively. This \$187,106 decline in the net loss is the result of the gross profit of \$139,392 recognized on 2014 sales as compared to a \$66,927 gross loss in 2013, offset by general and administrative cost increases in employee compensation.

Nine months ended September 30, 2014

In the first nine months of 2014, Citrus Extracts, Inc. was the Company's only revenue-producing subsidiary until Acacia Transport Services, Inc. initiated limited activity as in became operational in the citrus "off season" in August. The sale of citrus byproducts began on a limited basis in the third quarter of 2013. Accordingly, only limited revenues were derived from the sale of citrus byproducts for the nine-month period ended September 30, 2013. In the nine months ended June 30, 2014, the Company transported and processed approximately 5.7 million pounds of raw, fresh citrus peel in producing over 1,000,000 pounds of finished ingredient products, and sold about 688,000 pounds of finished ingredient products at an average price of about \$1.44 per pound.

In the nine months ended September 30, 2014, total costs and expenses were about \$1,100,000, including operating costs and expenses of about \$582,000 and cost of revenues of about \$518,000 as compared to total costs and expenses of about \$543,000 in the same period of 2013 consisting of operating costs of about \$430,000 and cost of revenues of about \$112,000. This increase of about \$557,000, or about 103% in operating costs and expenses in the nine months ended September 30, 2014 versus the same period in 2013 is caused by approximately \$95,000 increase in employee compensation related to the Company's subsidiary that was not in existence until July 10, 2013, and an increase in parent company employee compensation of about \$100,000, all of which was offset by a small decrease in consulting expense and professional fees.

Table of Contents

The consolidated net loss decreased from \$497,501 to \$91,118 in the nine months ended September 30, 2013 and 2014, respectively. This \$406,383 decline in the net loss is the result of the gross profit of \$470,526 recognized on 2014 sales offset by general and administrative cost increases in employee compensation.

Discussion Regarding EBITDA

EBITDA, as presented herein, is a supplemental measure of our performance that is not required by, or presented in accordance with, generally accepted accounting principles in the United States, or GAAP. It is not a measurement of our financial performance under GAAP and should not be considered as a substitute for net income (loss) or any other performance measures derived in accordance with GAAP or as substitutes for cash flow from operating activities as measures of our liquidity.

EBITDA is defined as net income (loss), plus interest expense net of interest income, depreciation and amortization. Use of EBITDA as an evaluation of performance is commonly used in the vehicle auction industry.

Management uses the EBITDA measure to evaluate our performance, to compare our performance to major auction companies' results, and to evaluate our results relative to certain incentive compensation targets. Management believes its inclusion is appropriate to provide additional information to investors for purposes of comparisons. EBITDA has limitations as analytical tools, and should not be considered in isolation, or as a substitute for analysis of the results as reported under GAAP. While the Company believes that EBITDA may be a useful tool in comparing the financial performance of the Company to other auto auction entities, it may not be comparable to similarly titled measures reported by other companies.

Further, the Company believes that EBITDA is more accurately illustrated for the Company's operating units before the deduction for Management Fees as Intercompany Charges. Those fees fall below the operating profit (loss) line in the Statement of Operations and are not reflective of operating results. Therefore, the EBITDA tables below do not include charges for Management Fees to the Company's Citrus Extracts subsidiary.

The Company's Citrus Extracts subsidiary, its only revenue-producing subsidiary in the first six months and a portion of the third quarter ending September 30 of 2014, had no revenue-producing operations in Q1 and Q2 and a portion of Q3 of 2013. The Company's Acacia Transport Services subsidiary had no revenue-producing operations at all in 2013 and only operated for a portion of the third quarter of 2014. As such, there is no reasonable basis for comparing the EBITDA results for the current three-month and nine-month periods ended September 30, 2014, versus the same periods ended September 30, 2013.

Discussion Regarding Citrus Extracts, Inc. EBITDA

The following table represents the EBITDA results for Citrus Extracts, Inc. during the three months ended September 30, 2014:

Citrus Extracts, Inc.	Three Months Ended September 30, 2014 (Unaudited)
Net income	\$ 121,381
Add back:	
Income taxes	-
Interest expense, net of interest income	2,393

Depreciation	20,899
EBITDA	\$ 144,673

Table of Contents

The following table represents the EBITDA results for the Citrus Extracts, Inc. during the nine months ended September 30, 2014:

Citrus Extracts, Inc.	Nine Months Ended September 30, 2014 (Unaudited)
Net income	\$ 357,982
Add back:	
Income taxes	-
Interest expense, net of interest income	9,403
Depreciation	61,855
EBITDA	\$ 429,240

Discussion Regarding Acacia Transport Services, Inc. EBITDA

Since the Company's Acacia Transport Services subsidiary had no operations at all in 2013, no operations in Q1 or Q2 of 2014, and revenue-producing operations for only a portion of the third quarter of 2014, the Company has elected to eliminate that subsidiary from this EBITDA discussion.

Discussion Regarding Consolidated EBITDA

The following table represents the consolidated EBITDA results for the Company during the three months ended September 30, 2014:

Acacia Diversified Holdings, Inc.	Three Months Ended September 30, 2014 (Unaudited)
Net income	\$ 4,210
Add back:	
Income taxes	-
Interest expense, net of interest income	8,796
Depreciation	26,313
EBITDA	\$ 39,319

The following table represents the consolidated EBITDA results for the Company during the nine months ended September 30, 2014:

Acacia Diversified Holdings, Inc.	Nine Months Ended September 30, 2014 (Unaudited)
Net (loss)	\$ (91,118)
Add back:	
Income taxes	-

Edgar Filing: Acacia Diversified Holdings, Inc. - Form 10-Q

Interest expense, net of interest income	21,198
Depreciation	71,789
EBITDA	\$ 1,869

Table of Contents

Liquidity and Capital Resources

Our accountants have issued, in their prior audit report, a going concern opinion reflecting a conclusion that our operations may not be able to continue because of a lack of financial resources.

The Company's liquidity in 2014 was provided by management fee revenues assessed to the Company's subsidiary operations, by loans to the Company, and by personal financial support from the Company's CEO. The Company's liquidity during 2013 was provided in part from proceeds of the 2012 sale of its Augusta auction, by loans to the Company, and by personal financial support from the Company's CEO.

From July 10, 2007, until July 31, 2012, the Company looked to its auto auction operations to provide cash flow and cash return on our investment. From January 1, 2013 until July 10, 2013, following the Company's sale of its Augusta assets, the Company had no revenue-producing operations and no cash flow from operations, relying upon its existing cash reserves and from financial assistance of its CEO for liquidity. Since the acquisition of certain assets of Red Phoenix Extracts on July 10, 2013 by the Company's Citrus Extracts subsidiary and the initiation of manufacturing operation there in December of 2013, and implementing operations at its new Acacia Transport Services subsidiary in July of 2014, the Company has generated revenues. Those revenues during the three month period ended September 30, 2014 were sufficient for the Company to generate a consolidated net operating profit of approximately \$4,200 on revenues of \$364,730, being the first period the Company was profitable as a consolidated entity, excepting those periods with gains resulting from discontinued operations, since the first quarter of 2009. However, the revenues for the nine month period were not sufficient to provide an operating profit for the longer period. This is reflective of improved revenues for the Company, and hence an improved opportunity for profitability. Similarly, the Company enjoyed a consolidated positive cash flow of about \$7,300 for the nine months ended September 30, 2014 after paying the costs of the Parent Company's corporate activity, essentially our executive officers, administrative overhead, and overhead that includes the cost of lawyers and accountants required to be publicly held. As a result of those deficiencies and the loss of its revenue-producing operations for the greater part of the year-to-date, the Company will have to increase its revenues, raise capital or institute or acquire additional operations with revenues sufficient to cover the costs of overheads.

As of September 30, 2014, the Company had a positive consolidated cash flow of about \$7,300 for the year to date. This resulted from negative net cash flow of approximately \$77,000 used in operating activities and about \$58,000 used in investing activities, and about \$143,000 provided by financing activities.

Cash Balances

The Company will require substantial infusions of working capital or a substantial increase in the cash generated from new operations to insure long-term liquidity, and may seek infusions of working capital in the form of equity or debt capital, the former being considered most beneficial to the Company. There is no assurance the Company can be successful in obtaining infusions of capital to fuel its operations or further growth.

Financing of Planned Expansions and Other Expenditures

The Company plans to make upgrades and improvements to its manufacturing facilities and vehicle fleet in the normal course and to grow through acquisitions, mergers, or other business combinations, and anticipates that it will need to raise additional capital to do so, probably through a private placement offering of its common stock. There can be no assurance the Company will be successful in its efforts to do so.

Dependence on Key Personnel

Our future performance depends in significant part upon the continued service of our Chief Executive Officer, Steven L. Sample and now upon the continued service of William J. Howe, the President of the Company's new Citrus Extracts, Inc. subsidiary in Fort Pierce, Florida. The loss of either of their services could have a material adverse effect on our business, prospects, financial condition and results of operations. The Company does not presently maintain key man life insurance on Mr. Sample or Mr. Howe, but may obtain such insurance at the discretion of its board of directors for such term as it may deem suitable or desirable. Our future success may depend on our ability to attract and retain highly qualified technical, sales and managerial personnel. The competition for such personnel can be intense, and there can be no assurance that we can attract, assimilate or retain highly qualified technical, sales and managerial personnel for favorable compensations in the future.

Basis of Services Rendered and Contemplated Business

To better reflect the Company's determination to employ a broader scope and direction in expanding its business model into more diversified service and product offerings, the Company changed its name from Acacia Automotive, Inc. to Acacia Diversified Holdings, Inc. effective October 18, 2012.

The Company entered the citrus byproducts manufacturing industry in July of 2013 through its Citrus Extracts, Inc. subsidiary. Citrus Extracts utilizes our confidential and proprietary chemical-free, 100% natural processes in the manufacturing, sale, and distribution of all-natural, food-grade ingredients from raw, fresh, natural citrus peel resulting from citrus juicing operations. Through these controlled methods, CEI processes and dehydrates orange, lemon, grapefruit and tangerine peel into its CitraBlend and CitraBlend Organic products and then mills those products to varying sizes ranging from larger "cut & sift flakes" to 40+ mesh powders (or smaller sizes for custom orders). These ingredients, both organic and non-organic, find their way into many regional and national brand-name products commonly found on America's kitchen tables in the form of spices, teas and otherwise. Our CitraBlend products are also utilized in brewing many local and regional craft beers in addition to nationally-recognized beer brands, and because we have only recently addressed that market it remains largely untapped. At this time CitraBlend is primarily sold through a distributor network with emphasis on those industries.

On January 15, 2014 formed Acacia Transport Services, Inc. ("ATS") as a wholly-owned subsidiary, but activity did not begin until July of that year. ATS was formed for the primary purpose of providing transportation and a continuous source of raw citrus peel materials for its sister Citrus Extracts, Inc. manufacturing plant, and for the secondary purpose of generating transport revenues in hauling excess raw citrus peel materials to local farmers for use as feed for livestock. On July 2, 2014, that subsidiary entered into an Agreement for Citrus Peel Hauling Services with Lambeth

On March 1, 2014 the Company began performing milling operations using the trade name Acacia Milling Services at the Fort Pierce location for its Citrus Extracts subsidiary. Milling is the term applied to grinding or refining the finished citrus ingredient products rendered by Citrus Extracts into smaller, finer particles. These services vary from simple sifting operations that separate the various sizes of materials to creating specific cuts from the original material, such as "tea bag cut" size, granulated materials of various sizes, or "powders" of various mesh sizes. Generally the greater the mesh size (finer, smaller, particle size) requested by the customer, the higher the milling charges per pound. The Company does not currently maintain separate accounting functions for its new milling operations, but intends to further segregate those milling operations in 2015 and to implement a new system of segregated financial reporting for those operations. The Company also intends to expand its offerings of those milling services to outside parties for the generation of additional revenues in the future.

All these operations now form the new consolidated basis of services rendered.

The Company continues to consider other merger, acquisition, or business combination opportunities in any industry.

Implementation of Business Plan

The Company currently does not have sufficient working capital to pursue its business plans in their entirety as described herein. The Company's ability to implement its business plans will depend on its ability to find new mergers, acquisitions, or business combinations or to obtain sufficient working capital to execute its business plans. No assurance can be given that we will be able to obtain additional capital, or, if available, that such capital will be available at terms acceptable to us, or that we will be able to generate profit from new operations, or if profits are generated, that they will be sufficient to carry out our business plans, or that the plans will not be modified. Moreover, the Company has sought, and may continue to seek, working capital through the sale of its debt and equity securities. There can be no assurance that any such efforts will be successful in providing the Company with adequate

working capital to execute its business plan.

Conflicts of Interest.

The Company is or may be subject to various conflicts of interest. The Company does not have a fully independent management staff, and will be relying on its management for the day-to-day management and operations of the Company and the Company's assets. As such, certain employees may have conflicts of interest in allocating time, services and functions to the Company in deference to their other activities.

The Company's Secretary, a non-salaried position with the Company, is employed full-time in Nashville, Tennessee in a diverse business. The Secretary is not expected devote substantial time to the affairs of the Company.

The Parent Company has no full-time corporate officer serving as managerial staff except for its President and CEO, who devotes the majority of his business time and efforts to the management and direction of the Company. As such, there is not now, nor has there previously been considered to be, any material conflict of interest on his part.

Table of Contents

The Company has no other full-time corporate officer except for its President and CEO, who devotes the majority of his business time and efforts to the management and direction of the Company and its subsidiaries. The President and CEO of the Company also serves as a director of the Company as well as having served as an officer and director of the Company's subsidiary corporations. Service in those capacities with the subsidiaries is not considered to constitute a conflict of interest on the part of employees, managers, or directors. The Company's President and CEO continues to serve in those capacities as of December 31, 2013. As such, there is not now, nor has there previously been considered to be, any material conflict of interest on his part. However, the CEO of the Company may reasonably be expected to have or gain other affiliations, associations, or ownership interests in other entities which could under certain conditions be considered to be conflicts of interest.

Investment in the Company will not carry with it the right to invest in any other property or venture of the CEO or other officers, employees, and directors of the Company.

Item 4T. Controls and Procedures

Management's Report on Internal Control over Financial Reporting

As is typical with many enterprises, our control processes are oriented toward operations, and production of financial statements reflects an outgrowth of operations and results of those operations. Internally, financial statements are a management tool to evaluate the operations and not an end of those operations. We closely monitor the daily results of our cash position and attempt to make certain that our cash position is adequate for the foreseeable future. Our financial statements are generated as part of the reporting on our operations, one metric of our operations, and as part of our obligations as a public entity.

Management, including our Chief Executive Officer who acts as our Principal Financial Officer, does not expect that our disclosure controls and procedures will prevent all errors and fraud, and our present efforts are oriented on improving the availability and thoroughness of information to management and its efficient reduction to generate financial statements. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, not absolute, assurance of achieving the desired control objectives. Further, the design of a control system must reflect the fact that there are resource constraints, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management's override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Disclosure Controls and Procedures

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, particularly our Chief Executive Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework set forth in Internal Control—Integrated Framework issued by

the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's Securities Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer who acts as our Principal Financial Officer to allow timely decisions regarding required disclosure. During the 90-day period prior to the date of this report, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures to provide reasonable assurance of achieving their objective pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Chief Executive Officer concluded that the Company's disclosure controls and procedures were not effective as of September 30, 2014.

Changes in Internal Control over Financial Reporting

During the third quarter of 2014 the Company did not make changes in its internal control.
