CORNERSTONE BANCORP, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (UNAUDITED)

(dollars in thousands)

NOTE A BASIS OF FINANCIAL STATEMENT PRESENTATION

The accompanying unaudited interim consolidated financial statements include the accounts of Cornerstone Bancorp, Inc., its subsidiary Cornerstone Bank (the "Bank") and the Bank's subsidiary Cornerstone Business Credit, Inc. ("CBC"), collectively the "Company". The interim consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America for interim financial statements and the instructions to Form 10-QSB, and, accordingly, do not include all of the information and footnotes required by generally accepted accounting principles for a complete set of financial statements. While management believes that the disclosures presented are adequate so as not to make the information misleading, it is suggested that these interim consolidated financial statements be read in conjunction with the annual consolidated financial statements and notes included in the Form 10-KSB for the year ended December 31, 2002. The interim results of operations for the period ended March 31, 2003 are not necessarily indicative of the results to be expected for the year ending December 31, 2003 or for any other interim period.

In the opinion of management, the accompanying unaudited consolidated financial statements reflect all adjustments, consisting only of normal recurring accruals, necessary to present fairly the financial position, results of operations, changes in stockholders' equity and cash flows at the dates and for the periods presented. In preparing the interim consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statement of condition and revenues and expenses for the period. Actual results could differ significantly from those estimates, as a result of changing conditions and future events. An estimate that is particularly critical and susceptible to significant near-term change is the allowance for loan losses.

Prior period amounts are reclassified, whenever necessary, to conform to the current period presentation. All per share data has been adjusted for the effect of the stock dividend described in Note B.

NOTE B EARNINGS PER SHARE

Basic earnings per share ("EPS") excludes dilution and is computed by dividing income available to common stockholders (net income less dividends on preferred stock, if any) by the weighted average number of common shares outstanding during the period. For this purpose, unvested shares of restricted stock are not considered to be outstanding. Diluted EPS is computed in a similar manner, except that the weighted average number of common shares is increased (using the treasury stock method) by additional common shares that would have been outstanding if all potentially dilutive securities (such as stock options and unvested restricted stock awards) were exercised or vested during the period. For the three month periods ended March 31, 2003 and 2002, the number of shares for diluted EPS exceeded the number of shares for basic EPS due to the dilutive effect of outstanding stock options and unvested restricted stock. For purposes of computing basic EPS, net income applicable to common stock equaled net income for these periods.

A 10% common stock dividend was announced April 2, 2002 and distributed on June 14, 2002 to stockholders of record as of the close of business on May 31, 2002. A total of 109,123 shares were

5

Table of Contents

distributed. As a result of the stock dividend, earnings per share data presented herein has been adjusted to reflect the increase in average shares outstanding.

NOTE C STOCK-BASED COMPENSATION

The Company accounts for stock-based compensation in accordance with Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations. Accordingly, compensation expense is not recognized for fixed stock options if the exercise price of the option equals the fair value of the underlying stock at the grant date. The fair value of restricted stock awards, measured at the grant date, is recognized as unearned compensation (a component of stockholders' equity) and amortized to compensation expense over the vesting period.

Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock-Based Compensation*, encourages the use of a fair-value-based method of accounting for employee stock compensation plans, but permits the continued use of the intrinsic-value-based method of accounting prescribed by APB Opinion No. 25. Under SFAS No. 123, the grant-date fair value of options is recognized as compensation expense over the vesting period (if any). The Company has elected to continue to apply APB Opinion No. 25 and disclose the pro forma information required by SFAS No. 123. Had stock-based compensation expense been recognized in accordance with SFAS No. 123, the Company's net income and earnings per common share would have been adjusted to the following pro forma amounts:

	Three Months Ended March 31,	
	2003	2002
	(In thousands, except per share data)	
Net income, as reported	\$ 413	\$ 463
Add restricted stock expense included in reported net income, net of related tax effects	11	5
Deduct restricted stock and stock option expense determined under the fair-value-based method, net of related tax effects	(11)	(22)
Pro forma net income	\$ 413	\$ 446
Basic earnings per common share:		
As reported	\$ 0.34	\$ 0.39
Pro forma	0.34	0.37
Diluted earnings per common share:		
As reported	\$ 0.33	\$ 0.37
Pro forma	0.33	0.36

Table of Contents**NOTE D COMPREHENSIVE INCOME (LOSS)**

Comprehensive income (loss) includes net income or loss, and any changes in stockholders' equity from non-owner sources that are not recognized in the income statement (such as changes in net unrealized gains and losses on securities available for sale). Other comprehensive loss reported in the statements of stockholders' equity for the three months ended March 31, 2003 and 2002 represents the change during those periods in the after-tax net unrealized gain on securities available for sale.

NOTE E STANDBY LETTERS OF CREDIT

Edgar Filing: CORNERSTONE BANCORP INC - Form 10QSB

The Company had outstanding letters of credit of \$1,062 and \$1,650 at March 31, 2003 and December 31, 2002, respectively. Substantially all of the Company's outstanding standby letters of credit are performance standby letters of credit within the scope of FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others* (FIN 45). These are irrevocable undertakings by the Company, as guarantor, to make payments in the event a specified third party fails to perform under a nonfinancial contractual obligation. Most of the Company's performance standby letters of credit arise in connection with lending relationships and have terms of one year or less. The maximum potential future payments the Company could be required to make equals the contract amount of the standby letters of credit referred to above. FIN 45 also requires the recognition, at fair value, of a liability by a guarantor at the inception of certain guarantees issued or modified after December 31, 2002. The Company's recognized liability for performance standby letters of credit was insignificant at March 31, 2003.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

(dollars in thousands)

FORWARD-LOOKING STATEMENTS

The statements contained in this report that are not historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Examples of such forward-looking statements include, without limitation, statements regarding expectations for earnings, credit quality, and other financial and business matters. When used in this report, the words anticipate, plan, believe, estimate, expect and similar expressions as they relate to the Company or its management are intended to identify forward-looking statements. All forward-looking statements involve risks and uncertainties. Actual results may differ materially from those discussed in, or implied by, the forward-looking statements as a result of certain factors, including but not limited to, competitive pressures on loan and deposit product pricing; other actions of competitors; changes in economic conditions; technological changes; the extent and timing of actions of the Federal Reserve Board, including changes in monetary policies and interest rates; customer deposit disintermediation; changes in customers' acceptance of the Bank's products and services; and the extent and timing of legislative and regulatory actions and reforms. The forward-looking statements contained in this report speak only as of the date on which such statements are made. By making any forward-looking statements, the Company assumes no duty to update them to reflect new, changing or unanticipated events or circumstances.

7

Table of Contents

FINANCIAL CONDITION

General

Total assets increased to \$225,309 at March 31, 2003 from \$212,054 at December 31, 2002, an increase of \$13,255 (or 6%). Increases in cash and cash equivalents of \$16,939 and held to maturity securities of \$6,834 were funded by an increase in deposits of \$14,122 and decreases in net loans of \$3,974 and loans held for sale of \$5,899.

Loans

The net loan portfolio (excluding loans held for sale) decreased to \$117,501 at March 31, 2003 from \$121,475 at December 31, 2002, a decrease of \$3,974. The 3% decrease in the loan portfolio in the first quarter of 2003 reflected decreases in all loan types as refinance activity, principal repayments and scheduled payoffs by consumers and commercial customers exceeded new loan originations.

Major classifications of loans at March 31, 2003 and December 31, 2002 were as follows:

	<u>March 31, 2003</u>	<u>December 31, 2002</u>	<u>Dollar Change</u>	<u>Percent Change</u>
Loans secured by real estate:				
Residential	\$ 44,254	\$ 46,085	\$ (1,831)	(4)%
Non-residential	49,115	49,977	(862)	(2)
Construction	10,388	11,429	(1,041)	(9)
Commercial loans	13,905	14,024	(119)	(1)
Consumer and other loans	2,232	2,259	(27)	(1)

Edgar Filing: CORNERSTONE BANCORP INC - Form 10QSB

Total loans	119,894	123,774	(3,880)	(3)
Allowance for loan losses	(2,347)	(2,234)	113	5
Deferred loan fees, net	(46)	(65)	19	29
Total loans, net	\$ 117,501	\$ 121,475	\$ (3,974)	(3)%

Residential mortgage loans held for sale at March 31, 2003 and December 31, 2002 were \$477 and \$7,057, respectively. Small Business Administration (SBA) loans held for sale at March 31, 2003 and December 31, 2002 were \$868 and \$187, respectively.

Non-performing Loans and the Allowance for Loan Losses

It is the Bank's policy to manage its loan portfolio to facilitate early recognition of problem loans. The Bank commences internal collection efforts once a loan payment is more than 15 days past due. The Bank's data processing system generates delinquency reports on all of the Bank's loans weekly, and management reviews the loan portfolio to determine if past due loans should be placed on non-accrual status. Unless the customer is working with the Bank toward repayment, once a loan payment is 90 days past due, the Bank generally initiates appropriate collection or legal action.

8

Table of Contents

The following table summarizes, by type of loan, the recorded investment in non-performing loans at March 31, 2003 and December 31, 2002. Amounts are shown for (i) loans that were past due 90 days or more, segregated between those on non-accrual status and those that were still accruing interest, and (ii) loans that were current or past due less than 90 days for which interest payments were being applied to reduce principal balances.

	March 31, 2003	December 31, 2002
Loans on non-accrual status:		
Loans secured by real estate	\$ 149	\$ 149
Loans on accrual status:		
Loans secured by real estate	867	1,480
Commercial loans	12	122
Consumer and other loans	178	7
	1,057	1,609
Total loans past due 90 days or more	1,206	1,758
Loans current or past due less than 90 days for which interest payments were being applied to reduce principal balances:		
Loans secured by real estate	10	11
Commercial loans	127	
	137	11
Total non-performing loans	\$ 1,343	\$ 1,769
Ratio of total non-performing loans to total loans outstanding	1.12%	1.43%

During the quarter ended March 31, 2003, loans past due greater than 90 days and secured by real estate decreased by \$613. Repayments of approximately \$1,292 on loans past due 90 days or more in accrual status at December 31, 2002 were received in January 2003 and were partially offset by the addition of a \$642 loan to another borrower which became more than 90 days delinquent in the first quarter of 2003.

Edgar Filing: CORNERSTONE BANCORP INC - Form 10QSB

During the quarter ended March 31, 2003, approximately \$26 in collected interest on a former non-accrual loan was applied to income due to the payoff of the loan. During the quarter ended March 31, 2002, the Bank recovered all principal and other amounts due on four non-accrual loans to one borrower. This recovery resulted in additional loan interest income of \$175 (a recovery of interest previously applied to reduce principal on the aforementioned loans) and an additional \$8 in late charge income.

9

Table of Contents

The following table sets forth changes in the allowance for loan losses for the periods indicated.

	Three Months Ended March 31,	
	2003	2002
Balance at beginning of period	\$ 2,234	\$ 1,848
Provision for loan losses	105	48
Loan charge-offs		(14)
Recoveries	8	1
	\$ 2,347	\$ 1,883

The ratios of the allowance for loan losses to total loans and to non-performing loans were 1.96% and 175% respectively, at March 31, 2003, compared to 1.81% and 126%, respectively, at December 31, 2002.

In addition to non-performing loans, the Company had non-performing assets at March 31, 2003 and December 31, 2002, in the form of repossessed aircraft with a carrying amount of \$81 (included in other assets in the consolidated statements of condition). Total non-performing assets of \$1,424 represented 0.63% of total assets at March 31, 2003, compared to \$1,850 or 0.87% of total assets at December 31, 2002.

Securities

Total securities increased to \$43,987 at March 31, 2003 from \$38,150 at December 31, 2002, an increase of \$5,837 (or 15%). The increase in the securities portfolio was primarily due to purchases of \$7,990 in securities held to maturity and \$2,529 in purchases of available for sale securities, which were partially offset by maturities and principal paydowns totaling \$2,087. These purchases were transacted to balance the maturity distribution (laddered maturities) of the securities portfolio and reduce the balance of lower yielding federal funds.

10

Table of Contents

The following table sets forth the amortized cost and estimated fair value of the securities portfolio at the dates indicated.

	March 31, 2003		December 31, 2002	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
<u>Available for sale</u>

Deposits

Deposits are the primary source of funds for the Company. Deposits are obtained from individuals, partnerships, small and medium size businesses and professionals in the Company's market area. The Company does not accept brokered deposits.

The following table indicates the composition of deposits at the dates indicated.

	March 31, 2003	December 31, 2002	Dollar Change	Percent Change
Demand (non-interest bearing)	\$ 52,343	\$ 46,610	\$ 5,733	12%

11

Table of Contents

Increases in demand, regular, club, money market savings and time deposits were partially offset by declines in money market demand and NOW accounts. The increase in demand deposits was primarily related to the increased balances held by one demand deposit account with a balance of \$17,122 at March 31, 2003 and \$12,839 at December 31, 2002. During the first three months of 2003, increases in time deposits were primarily attributable to growth of \$8,028 and \$2,678 in 12-17 month and 18-23 month certificates of deposit, respectively. This growth was partially offset by decreases of \$1,337 in 36-47 month certificates of deposit, \$1,013 in 91-180 day certificates of deposit and \$917 in 24-30 month certificates of deposits. The 11% increase in time deposits reflects the competitive rates offered by the Bank during 2002 and 2003, as well as national economic uncertainty, particularly in the equity markets, which prompted customers to seek bank deposits as an alternative to investing in the equity markets. Certificates of deposit in denominations of \$100 or more were \$20,396 at March 31, 2003 compared to \$18,415 at December 31, 2002, an increase of \$1,981 (or 11%).

Liquidity and Capital Resources

At March 31, 2003, total short-term investments, which are made up of federal funds sold, available for sale securities and held to maturity securities maturing in three months or less, totaled \$52,702. The primary liquidity of the Company is measured by the ratio of net cash, short-term investments, and other marketable securities (non-U.S. agency securities) to deposits and short-term liabilities. The primary liquidity ratio at March 31, 2003 was 27.16% compared to 17.89% at December 31, 2002. The Bank also calculates a secondary liquidity ratio which contemplates the maturity of held to maturity securities beyond three months. The Bank's secondary liquidity ratio at March 31, 2003 was 44.41%, compared to 34.92% at December 31, 2002. The increases in primary and secondary liquidity ratios in 2003 are primarily a result of the Bank's increased federal fund position and to a lesser extent an increase in investment securities at March 31, 2003 as compared to December 31, 2002. These increases were partially offset by an increase in deposits and short-term liabilities at March 31, 2003 compared to December 31, 2002. The Company's internal guideline is to generally maintain a primary liquidity ratio of 10 to 15% and a secondary liquidity ratio of 20% or more, although a higher primary ratio may be maintained from time to time depending on cash flow patterns and loan demand.

Net cash provided by operating activities was \$7,015 for the three months ended March 31, 2003 as compared to \$1,089 for the three months ended March 31, 2002, reflecting the decrease in loans held for sale in the first quarter of 2003. Compared to the first three months of 2002, cash used in investing activities increased \$727, primarily due to cash used to fund increased purchases of securities held to maturity and securities available for sale. These factors were substantially offset by the effect of net loan receipts of \$3,447 during the three months ended March 31, 2003 as compared to net loan disbursements of \$6,381 during the three months ended March 31, 2002. The increase in net cash provided by financing activities of \$17,390 for the three months ended March 31, 2003, primarily resulted from an increase in cash provided by

deposits. Cash and cash equivalents increased \$16,939 for the three months ended March 31, 2003, compared to a decrease of \$5,650 in the first quarter of 2002.

At March 31, 2003, the Company had outstanding loan commitments under unused lines of credit approximating \$14,384 and outstanding letters of credit approximating \$1,062.

At March 31, 2003 and December 31, 2002, the Company's consolidated leverage capital ratio was 9.0% and 9.2%, respectively. At March 31, 2003 and December 31, 2002, the Company's consolidated Tier 1 risk-based capital ratio was 13.4% and 13.0%, respectively. The Company's consolidated total risk-based capital ratio at March 31, 2003 and December 31, 2002 was 14.7% and 14.2%, respectively.

Table of Contents

The Bank's regulatory capital ratios at these dates were substantially the same as the consolidated ratios, and the Bank was classified as a well-capitalized institution for regulatory purposes.

RESULTS OF OPERATIONS

General

The Company's results of operations depend primarily on its net interest income, which is the difference between the interest income on earning assets, such as loans and securities, and the interest expense paid on deposits and borrowings. Results of operations are also affected by non-interest income and expense, the provision for loan losses and income tax expense. Non-interest income includes banking service fees and charges, income on bank-owned life insurance, and gains and losses on sales of securities available for sale and loans held for sale. The Company's non-interest expense consists primarily of salaries and employee benefits, occupancy and equipment expenses, data processing expenses and professional fees. Results of operations are also significantly affected by general economic and competitive conditions, particularly changes in market interest rates, government policies and actions of regulatory authorities.

Critical Accounting Policies

In the course of the Company's normal business activity, management must select and apply many accounting policies and methodologies that lead to the financial results presented in the consolidated financial statements of the Company. Some of these policies are more critical than others. Management considers the accounting policy relating to the allowance for loan losses to be a critical accounting policy because of the uncertainty and subjectivity inherent in estimating the levels of allowance needed to cover probable credit losses within the loan portfolio and the material effect that these estimates can have on the Company's results of operations. While management uses the best available information to determine the allowance for loan losses, future adjustments to the allowance may be necessary based on a variety of factors, including changes in economic and real estate market conditions, particularly in Southwestern Fairfield County, Connecticut.

All accounting policies are important and readers of this report should review these policies, as included in Note 1 to the Consolidated Financial Statements in the 2002 Annual Report on Form 10-KSB, to gain a greater understanding of how the Company's financial performance is reported.

Comparative Analysis of Operating Results for the Three Months Ended March 31, 2003 and March 31, 2002

Net Income. Net income was \$413 for the three months ended March 31, 2003 compared to \$463 for the three months ended March 31, 2002, a decrease of \$50 (or 11%). Diluted earnings per common share were \$0.33 for the three months ended March 31, 2003 and \$0.37 for the three months ended March 31, 2002 based on weighted average common shares of 1,239,815 and 1,239,291, respectively. The annualized return on average common stockholders' equity was 8.59% and 10.25% for the three months ended March 31, 2003 and 2002, respectively. The annualized return on average assets was 0.77% for the three months ended March 31, 2003 and 1.03% for the three months ended March 31, 2002.

Table of Contents

The lower net income for the three months ended March 31, 2003 was attributable to increased non-interest expense and the provision for loan losses which was partially offset by increased non-interest income and, to a lesser extent, a decrease in income tax expense. Although net interest income was relatively unchanged, the first quarter of 2002 included much larger recoveries of interest on non-accrual loans compared to the current quarter.

Net Interest Income. Net interest income is the difference between the interest income the Company earns on its loans, securities and other earning assets, and the interest cost of deposits and other interest-bearing liabilities necessary to fund these earning assets. It is the primary component of the Company's earnings.

Net interest income was \$2,089 for the three months ended March 31, 2003, a decrease of \$10 from the \$2,099 reported for the three months ended March 31, 2002. During the quarter ended March 31, 2002, the Bank recognized interest income of \$175 due to the recovery of interest previously applied against principal on four non-accrual loans to one borrower. Similar recoveries of non-accrual interest were \$26 in the current quarter. Accordingly, factors other than recoveries of non-accrual interest resulted in a net increase of \$139 in net interest income during the first quarter of 2003, as the effect of higher earning assets and interest-bearing liabilities more than offset the narrower net interest margin.

The average yield on interest-earning assets decreased 127 basis points for the quarter ended March 31, 2003 compared to March 31, 2002, while the average rate paid on interest-bearing liabilities decreased 48 basis points. Declining interest rates during 2002 which continued in 2003 directly impacted the yields on the Company's variable rate loans tied to the prime rate and on federal funds sold, and indirectly impacted the yields on other interest-earning assets as a result of the general decline in market interest rates. The previously-described recoveries of interest on non-accrual loans were also a primary factor in the higher yields in the first quarter of 2002. The increased volume of loans and federal funds offset the general decline in market rates. These declining market rates also contributed to the decline in the average rate paid on interest-bearing liabilities which was only partially offset by the increased volume of deposits. These changes resulted in an 83 basis point decrease in the net interest margin to 4.29% for the quarter ended March 31, 2003 compared to 5.12% for the quarter ended March 31, 2002.

Interest Income. Average earning assets for the three months ended March 31, 2003 were \$197,459 compared to \$166,101 for the three months ended March 31, 2002, an increase of \$31,358 (or 19%). Total interest income, which is a function of the volume of interest-earning assets and their related rates, was \$2,851 for the three months ended March 31, 2003 compared to \$2,921 for the three months ended March 31, 2002, representing a decrease of \$70 (or 2%).

Loans represent the largest component of interest-earning assets. Average loans outstanding in the three months ended March 31, 2003 were \$125,087 compared to \$109,785 during the three months ended March 31, 2002, an increase of \$15,302 (or 14%). Interest income on loans was \$2,326 for the three months ended March 31, 2003 compared to \$2,317 for the three months ended March 31, 2002, an increase of \$9. Average loan volume increased during the quarter ended March 31, 2003 compared to March 31, 2002 but was substantially offset by declining yields on the Company's loan portfolio. Loan income for the quarter ended March 31, 2002 also reflects the aforementioned recovery of \$175 in interest on non-accrual loans, compared to only \$26 for the first quarter of 2003.

Table of Contents

Average investments in securities and federal funds sold were \$72,372 for the three months ended March 31, 2003 compared to \$56,316 for the three months ended March 31, 2002, an increase of \$16,056 (or 29%). Related income decreased to \$525 for the three months ended March 31, 2003 from \$604 for the three months ended March 31, 2002, a decrease of \$79 (or 13%). Average investments in securities, not including federal funds sold, decreased by \$5,196 (or 12%) during the three months ended March 31, 2003. The decrease in income from securities was due to a decrease in the yield on new securities purchased, as well as the volume of securities, as maturing investments were re-deployed into the loan portfolio during 2002. Average federal funds sold increased by \$21,251 (or 172%). The increase in federal funds is primarily due to management's review of the appropriate level of funds necessary to meet liquidity needs. The decline in the volume and yield on the Company's investment securities and the yield on federal funds sold was partially offset by the increased volume of federal funds sold.

Interest Expense. Interest expense was \$762 for the three months ended March 31, 2003 compared to \$822 for the three months ended March 31, 2002, a 7% decrease. Interest expense is a function of the volume of interest-bearing liabilities and their related rates. Average interest-bearing liabilities during the three months ended March 31, 2003 were \$142,959 compared to \$126,125 during the three months ended March 31, 2002, an increase of \$16,834 (or 13%). The decrease in market interest rates resulted in a decline in the average rate paid on interest-bearing liabilities of 48 basis points for the three months ended March 31, 2003 compared to the quarter ended March 31, 2002. This decrease was partially offset by additional interest expense due to the increase in the volume of deposits.

Provision for Loan Losses. The periodic provision for loan losses represents the amount necessary to adjust the allowance for loan losses to management's estimate of probable credit losses inherent in the existing loan portfolio at the reporting date. Management's determination of the allowance for loan losses is based on the results of continuing reviews of individual loans and borrower relationships, particularly in the commercial and commercial real estate loan portfolios. A review of the quality of the loan portfolio is conducted internally by management on a quarterly basis, using a consistently-applied methodology, and the results are presented to the Board of Directors for approval. The evaluation covers individual borrowers whose aggregate loans are greater than \$100, as well as all adversely-classified loans. Management also considers factors such as the borrower's financial condition, historical and expected ability to make loan payments and underlying collateral values. The determination of the allowance for loan losses also considers the level of past due loans, the Bank's historical loan loss experience, changes in loan portfolio mix, geographic and borrower concentrations and current economic conditions. The allowance for loan losses is also reduced by charge-offs and increased by recoveries. The provision for loan losses was \$105 for the three months ended March 31, 2003 and \$48 for the three months ended March 31, 2002. The increase in the provision for the three months ended March 31, 2003 compared to March 31, 2002 reflects management's current assessment of credit risk in the portfolio, particularly the continued concern related to the economy. Net loan recoveries were \$8 in the quarter ended March 31, 2003 compared to net loan charge-offs of \$13 in the first quarter last year.

At March 31, 2003, the Company had \$1,343 of non-performing loans, including \$149 of non-accrual loans and \$1,057 of accruing loans greater than 90 days past due. Loans less than 90 days past due for which interest payments are being applied to reduce principal balances were \$137 at March 31, 2003. At December 31, 2002, the Company had \$1,769 of non-performing loans, including \$149 of non-accrual

Table of Contents

loans and \$1,609 of accruing loans greater than 90 days past due. Loans less than 90 days past due for which interest payments are being applied to reduce principal balances were \$11 at December 31, 2002.

Non-interest Income. Non-interest income was \$586 for the three months ended March 31, 2003 compared to \$338 for the three months ended March 31, 2002, an increase of \$248 (or 73%). The \$195 increase in the net gain on sale of loans and loan servicing for the three months ended March 31, 2003 compared to March 31, 2002 relates to the increased volume of sales of (i) participating interests in Small Business Administration loans and (ii) newly-originated residential mortgage loans and the related servicing rights. Income on bank-owned life insurance increased by \$50 compared to the first quarter of 2002, due to a significant purchase made at the end of the first quarter of 2002.

Non-interest Expense. Total non-interest expense was \$1,909 for the three months ended March 31, 2003 and \$1,618 for the three months ended March 31, 2002, an increase of \$291 (or 18%).

The following table summarizes the dollar amounts for each category of non-interest expense, and the dollar and percent changes:

Category	Three Months Ended March 31,		Increase (Decrease) 2003 vs 2002	
	2003	2002	\$ Change	% Change
Salaries and employee benefits	\$ 1,104	\$ 899	\$ 205	23%
Occupancy	183	183		
Furniture and equipment	102	90	12	13
Data processing	142	138	4	3
Professional fees	93	72	21	29
Advertising and promotion	46	42	4	10
Other	239	194	45	23
Total non-interest expense	\$ 1,909	\$ 1,618	\$ 291	18%

The increase in salaries and employee benefits includes the addition of one employee, salary increases for existing staff, executive bonus increases and current-year quarterly expense of \$48 for the salary continuation plan adopted at the end of the first quarter of 2002. Increased furniture and equipment expense is primarily due to increased depreciation resulting from the purchase of new bank-owned vehicles in 2002. The increase in professional fees reflects increases in audit, consulting and legal expenses. Increased other non-interest expense primarily relates to increased donations, armored car fees and insurance expense.

Table of Contents

The following table summarizes dollar amounts for each category of non-interest expense as a percentage of total operating income (interest income plus non-interest income). Operating income increased by \$178 (or 5%) in the first quarter of 2003 compared to the same period in 2002.

Category	Three Months Ended March 31,	
	2003	2002
Salaries and employee benefits	32.12%	27.59%
Occupancy	5.32	5.62
Furniture and equipment	2.97	2.76
Data processing	4.13	4.23
Professional fees	2.71	2.21
Advertising and promotion	1.34	1.29
Other	6.95	5.95
Total non-interest expense	55.54%	49.65%

Income Taxes. The provision for income taxes decreased to \$248 for the three months ended March 31, 2003 from \$308 for the three months ended March 31, 2002. This reflects the decrease in pre-tax income, as well as a lower effective tax rate in 2003 attributable to factors such as the increase in non-taxable income on bank-owned life insurance.

Item 3. Controls and Procedures

Within 90 days of the filing of this report, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures was conducted under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were adequate and designed to ensure that information required to be disclosed by the Company in this report is recorded, processed, summarized and reported in a timely manner, including that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There were no significant changes in internal controls or in other factors that could significantly affect internal controls, including any corrective actions with regard to significant deficiencies and material weaknesses in internal controls, subsequent to the evaluation described above.

Reference is made to the Certifications of the Chief Executive Officer and Chief Financial Officer about these and other matters following the signature page of this report.

Table of Contents**PART II - Other Information****Item 6. Exhibits and Reports on Form 8-K**

(a) Exhibits:

Exhibit 99.1-Certification pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

(b) Reports on Form 8-K

The Company did not file any reports on Form 8-K during the quarter ended March 31, 2003.
