1. Management Policies

1. Basic management policy

More than a century since its founding, Kubota Corporation and subsidiaries (collectively the Company) has continued to help improve people's quality of life, by offering products and services including farm equipment, pipes for water supply and sewage systems, environmental control plants, industrial castings, and building materials. Through its businesses, the Company has contributed to providing a better future for people, society, and the earth. While adhering to this corporate philosophy, the Company is implementing management policies that are focused on prioritizing allocation of its resources, emphasizing agility in its operations and strengthening consolidated operations. Through these measures, the Company aims to improve its adaptability to respond with flexibility to the changing times, resulting in a high enterprise value.

2. Basic policy related to the Company's profit allocation

The Company's basic policy for the allocation of profit is to maintain stable or increasing dividends. The Company's policy is to determine the most appropriate use of retained earnings, considering requirements of maintaining stable current business operations as well as adapting to the future business environment.

3. The Medium-Term Management Strategy including issues upon which the Company should implement countermeasures

In March 2001, the Company formulated the Medium-Term Management Strategy, which it applied during the three-year ended March 31, 2004, in order to attain further improvement in profitability. The strategy mainly consisted of three principal objectives: Reforming the business structure and profit structure, Reforming operational systems, and Focusing on finance strategy. In fiscal 2004, the final year of three-year period, the Company continued with the forceful implementation of its Medium-Term Management Strategy. Moreover, the Company did its utmost to ensure that the strategy was implemented as quickly as possible and with maximum effectiveness.

During the three-year period, the Company operated under its fundamental management principle that the Company should manage its business based upon a medium-term business strategy. The Company's basic concept of medium-term business strategy is to continually reevaluate the prospective circumstances of its business, determine the measures that should be taken over the medium-term in view of those business prospects, and steadily implement those measures. The Company will continue to manage its business based upon its basic concept of medium-term business strategy, and conduct its business with clarified management objectives and strategy. During the year ended March 2004, the Company reviewed the progress of the Medium-Term Management Strategy. The Company reevaluated its prospective business circumstance, and incorporated major changes and drafted a new version of the Medium-Term Management Strategy (being applied through March 2006), which has succeeded the three principal objectives of the former Medium-Term Management Strategy.

Table of Contents

**Kubota Corporation
and Subsidiaries**

(1) Review of Former Medium-Term Management Strategy (March 2002-March 2004)

1) Financial Targets

The Company originally set its medium-term financial target of ¥1,100 billion in net sales and ¥65.0 billion in operating income for the year ended March 2004. Unfortunately, since then, the Company lowered its medium-term financial targets in net sales to ¥930.0 billion and in operating income to ¥55.0 billion because of deteriorated market conditions for public works spending related businesses. For the year ended March 2004, the Company recorded net sales of ¥930.2 billion and operating income of ¥21.8 billion. The ¥21.8 billion in operating income was significantly lower than the financial targets, because the operating income reflected loss of ¥48.4 billion from special factors. The loss included a huge increase in pension cost (¥43.6 billion increase compared with the base year ended March 2001) due to the recognition of unrecognized actuarial losses during the year ended March 2004. Additionally, it included restructuring expenses of ¥4.8 billion, including the business transfer of the building materials operations to a separate legal entity which is 50% owned by the Company. By the unexpected factors mentioned above, financial targets were not attained partially, however, the Company concluded that it achieved financial target that was aimed at the beginning of the three-year period, to attain further improvement in profitability .

2) Achievement in the Three Principal Objectives

Reforming the business structure and profit structure

The Company has been reforming its business structure and profit structure through classifying each business of the Company into two categories: the Core and Strategic business category which includes domestic and overseas farm equipment, ductile iron pipes, environmental engineering business, etc. and the Reviving business category which includes building materials and industrial castings.

Within the Core and Strategic business category, the domestic farm equipment business in Internal Combustion Engine and Machinery expanded its market share and built a solid foundation for its sustained profitability in spite of continued declining demand in Japan. In overseas markets, most of all, tractor business in North America was supported by favorable market conditions, which allowed the Company to expand its business and enhance its competitiveness through various measures including the expansion of the local production capacity. Accordingly, the overseas business of Internal Combustion Engine and Machinery became a major contributor to improving in the profitability of the Company.

However, in public works spending related businesses, such as ductile iron pipes, PVC pipes, and environmental engineering, profitability deteriorated as a result of unfavorable business conditions, including lackluster demand, increased competition and price increases of raw materials. As a result, in its profit structure, dependency on Internal Combustion Engine and Machinery was intensified, while the whole profitability in the core and strategic businesses was improved

Edgar Filing: KUBOTA CORP - Form 6-K

In the Reviving business category, the Building Materials and Housing segment had been recording an operating loss (before corporate & elimination items) since the year ended March 1998. However, the segment recorded operating income for the year ended March 2003, and improved its break-even point through rigorous cost reduction efforts and restructuring efforts including the divestiture of its prefabricated housing business. With regard to the building materials business, in December 2003, Matsushita Electric Works, Ltd. (MEW) and the Company established and held an equal ownership in Kubota Matsushitadenko Exterior Works, Ltd. (hereinafter KMEW), the joint operation entity, into which the Company transferred its roofing and siding materials business.

Table of Contents

Kubota Corporation
and Subsidiaries

Regarding industrial castings and other reviving businesses, the Company experienced a significant improvement in profitability of those operations, and discontinued the trend of persistent low profitability.

In the Other segment, in December 2003, a subsidiary that owned and operated a golf course submitted an application for commencement of civil rehabilitation proceedings, and the Company has decided to exit from the business of operating golf course. Accordingly, the Company believes that significant progress in reforming the business structure and profit structure of its reviving business category has been made during the three-year ended March 31, 2004.

Reforming operational systems

With the intent of establishing an autonomous management organizational structure with speedy and efficient operation, the Company realigned the divisional management organizational structure, transferred the responsibilities and functions of the corporate office, and empowered the divisional management with the authority and responsibility for decision-making. The Company's promotion to the autonomous management organization with clarified authority and responsibility for doing business induced major improvement in employees' minds and attitudes.

At the same time, after reevaluating the responsibilities and functions of the corporate office, the Company made a drastic reduction in expenses and in the number of departments and the head count in its corporate office. In addition, the Company reformed its human resource management system and introduced a new program in April 2002 to promote a competitive and creative corporate culture. The new program includes a performance appraisal plan based upon individual achievement, empowerment of younger employees, and human resource development.

Focusing on finance strategy

The Company has taken measures to strengthen its financial position, primarily through the reduction of interest-bearing debt (*). The Company has made steady progress through initiatives centering on the reduction of inventory levels and the restraint of capital expenditures, in addition to reforming its business structure through the sales of several businesses. As a result, the Company's interest-bearing debt on a consolidated basis which amounted to ¥372.2 billion as of the end of March 2001 has been reduced to ¥266.7 billion at the end of March 2004. Accordingly, the Company attained the Medium-Term Management Strategy target of debt levels at or below ¥300.0 billion.

The Company has been purchasing treasury stock in order to reduce the number of outstanding shares. During the year ended March 2004, the Company purchased 5.3 million shares, and the cumulative number of shares purchased at the end of March 31, 2004 amounted to 68.5 million shares (excluding make-up purchase of less than one share unit shares).

(*) Interest-bearing debt = (Short-term borrowings) + (Current portion of long-term debt) + (Long-term debt)

(2) New Medium-Term Management Strategy (through March 2006)

1) Financial Targets

Under the new Medium-Term Management Strategy, the Company aims to attain net sales of ¥930.0 billion and operating income of ¥75.0 billion or 8 % of its consolidated net sales.

-5-

Table of Contents

Kubota Corporation
and Subsidiaries

2) Three Principal Objectives

Reforming the business structure and profit structure

The Company has acknowledged that the most important management issue is to change its profit structure which is overly dependent on profitability in Internal Combustion Engine and Machinery segment, and to establish a business structure with stability and growth capability. The Company also recognizes that the most important corporate opportunity for further improvement in profitability is to reinforce profitability in the public works spending related businesses, and to strengthen its competitiveness, while implementing an expansion strategy in its overseas markets.

Reinforcing profitability in public works spending related businesses

The Company has set a high priority on reinforcing profitability in the public works spending related businesses (Pipes, Valves, and Industrial Castings segment and Environmental Engineering segment). In the public works spending related businesses, under the assumption that severe business conditions with declining public expenditures will continue, the Company as a whole will take every step to reduce costs and spending and to increase productivity by reviewing all aspects of the business operations. Therefore, the Company will enhance its program by the transferring engineering and manufacturing know-how and systems for cost management from our increasingly strong and successful operations in Internal Combustion Engine and Machinery. Striving to adopt the know-how and systems for cost management, the public works spending related businesses will take measures such as these to reevaluate its manufacturing facilities, production system, engineering and procurement operations in order to boost their productivity and achieve major cost reductions.

Expansion strategy in overseas business markets

Among strategic growth businesses as well as businesses that have already achieved further improvements in profitability, the Company will emphasize the expansion of their businesses through establishing operations in the fields related to its existing technologies, markets and other strengths. Mainly focusing on the overseas business operations including tractors, engines and construction machinery in Internal Combustion Engine and Machinery (its main driving force for expansion), the Company will expand sales and market share of the current businesses as well as developing new and peripheral businesses in the U.S. and EU markets. For example in the U.S., the Company has successfully introduced newly developed utility vehicles in the peripheral market of tractors in 2004, and has been enjoying favorable acceptance from many customers. Additionally, the Company will enter into the growing markets of Asian countries with its comprehensive strategic planning in each country. In the People's Republic of China, the Company already established a sales and manufacturing subsidiary for farm equipment in 1998, and the subsidiary has expanded its business. In December 2003, aiming for market development of its construction machinery, the Company established a sales subsidiary in the People's Republic of China, and also the Company began to operate a sales subsidiary for farm equipment in South Korea in December 2003.

Reforming operational systems

The Company has established an autonomous divisional management system. As a further development step of autonomous management, the Company will proceed with building of a new business model and systems adopted to the needs of the individual businesses field. As a primary example, the Company established a joint operation for building materials business with MEW. The Company will promote each of its business divisions to design the best models and systems for its own operation, as necessary, apart from the traditional business structure and system, aiming to further increase profitability of each business division.

Table of Contents

Kubota Corporation
and Subsidiaries

As a newly assigned task for this principal objective, the Company will strengthen its corporate governance in order to gain further confidence of all stakeholders, including customers, shareholders, employees and business partners. The Company will focus mainly on enhancing its internal control system and risk management system as a step for strengthening its corporate governance, and improve transparency and efficiency of its corporate management.

Focusing on finance strategy

The Company plans to continue strengthening its balance sheet so that the Company will be able to provide funding for its future business expansion and cope with rapidly changing environment. The Company will also continue to streamline its balance sheet, and reduce interest-bearing debt. Additionally, the Company will take measures to increase its shareholders' equity ratio representing the ratio of shareholders' equity to total assets, and aim to attain the ratio at 40% or more.

At the same time, the Company will continue to purchase treasury stock in order to reduce the number of outstanding shares. Moreover, regarding the cumulative number of shares purchased at the end of March 2004, the Company has decided to retire 69.0 million shares during the year ending March 2005.

4. Corporate governance: policy and implementation

The Company is undertaking an extensive work to create an appropriate business model and systems for each business, which includes systems both for decision-making and for managing operations, in order to adapt to the needs of individual business field. At the same time, the Company is making efforts to enhance and improve its corporate governance in order to establish an optimum corporate management structure for entire group of the Company working together in good coordination.

(1) Current Structure of Corporate Governance

The Company has been working to enhance its corporate governance mainly through further strengthening the Board of Directors System, the Corporate Auditors System, and its internal control system.

The number of the board of directors has been reduced to accelerate and enhance the decision-making process and the number of the directors is 19, which is half compared to the number of directors six years ago (In June 2004, the number of the directors will become 20 at the ordinary general meeting of shareholders). At present, the Company has not adopted an outside director system. The president and two vice presidents are the representative directors. The two vice presidents support the president from a comprehensive, company-wide perspective, while one of the two vice presidents oversees marketing operations, and the other vice president oversees engineering and R&D operations. Furthermore, various

Edgar Filing: KUBOTA CORP - Form 6-K

corporate management advisory committees hold meetings to address important management themes such as Medium-Term Management Strategy and principal capital expenditure projects. Each committee serves to accelerate and rationalize the decision-making process while supplementing the divisional management structure and performing an oversight function.

The Company will continue to practice the Corporate Auditors System based upon the Commercial Code of Japan. The Company has been strengthening its Corporate Auditors System, and has been making efforts to have outside corporate auditors who can apply their respective legal and financial expertise to guide management. At present our board of corporate auditors consists of four members, and one of them is an outside corporate auditor, who is a legal expert. The Company will propose an agenda at the ordinary general meeting of shareholders to be held in June 2004 to newly elect an outside corporate auditor, who is a financial expert. The Company's board of corporate auditors will consist of five members, and two of them will be outside corporate auditors in June 2004.

-7-

Table of Contents

**Kubota Corporation
and Subsidiaries**

The Company has acknowledged the importance of both operational auditing and compliance management activities in its internal control system. Corporate Compliance Headquarters was established in 2001, and with the assistance of knowledgeable independent advisors, the Company has been able to further strengthen business ethics as well as compliance management. Moreover, in November 2002, the Company established the Kubota Group Charter of Business Conduct and also set up a counseling hot line for employees to get consultation on any breaches of policy.

The Company has been working to establish better communications with shareholders and investors, and is making efforts for improvement on its timely and adequate disclosure. From the year under review, the Company began quarterly financial disclosure. The Company will make efforts to enhance quarterly financial disclosure next fiscal year and attain further improvements in its financial disclosure.

(2) Relationship between the Company and outside corporate auditors in regard to personal, capital, and business interests

Currently, there are no special interests between the Company and Mr. Teisuke Sono, its outside corporate auditor.

(3) Measures implemented over the past year for better corporate governance

At the ordinary general meeting of shareholders held in June 2003, the term of office of the board of directors was reduced from two years to one year in order to increase the clarity of management responsibility. In June 2003, the Company established a disclosure committee under the U.S. Sarbanes-Oxley Act. The disclosure committee began its activities with the director in charge of finance and accounting as the chairman. Furthermore, to meet requirements of reinforcing the independence of the accounting firms, internal regulations related to prior approval policies and procedures for auditing and services provided by accounting firms have been implemented.

2. Review of Operations and Financial Condition

1. Review of operations

(1) Summary of the results of operations for the year under review

During the year ended March 31, 2004, the Japanese economic recovery continued at a gradual pace, supported by a steady growth in private capital expenditure and export. However, public investment remained weak, resulting in harsh business conditions for the Company. Overseas, in the U.S., brisk private consumption continued, housing investment remained favorable, private capital expenditures expanded and signs of an

economic upturn prevailed.

Table of Contents**Kubota Corporation
and Subsidiaries**

Under such conditions, net sales of the Company during the year under review, were ¥930.2 billion, an increase of ¥4.1 billion (0.4%) from the prior year. Domestic sales were ¥643.3 billion, a decrease of ¥40.9 billion (6.0%) from the prior year, resulting principally from persistent sluggish sales of public works spending related products, and the sale of Kubota Lease Corporation, and the business transfer of the roofing and siding materials operations which became an affiliated company (the Company has applied the equity method of accounting to the affiliated company). Overseas sales were ¥286.9 billion, an increase of ¥45.0 billion (18.6%) from the prior year, mainly due to the strong sales of tractors in North America and brisk export of ductile iron pipes to Middle East countries. As the increase in overseas sales exceeded the decrease in domestic sales, total sales increased. The percentage of overseas sales to total sales was 30.8%, 4.7 percentage points higher than the prior year.

Operating income was ¥21.8 billion, a decrease of ¥7.8 billion (26.2%) from the prior year. The decrease was mainly due to a significant increase in pension cost from the prior year (an increase of ¥43.4 billion from the prior year) and the losses during the fiscal year under review (¥4.8 billion), including the one-time charges resulting from the reorganization of the building materials business. During the prior year, the Company recognized losses from an impairment loss on its golf course (¥16.8 billion), and the expense associated with a voluntary early retirement program (¥4.6 billion).

Income before income taxes, minority interest in earnings of subsidiaries, and equity in net income of affiliated companies was ¥27.1 billion, an increase of ¥20.9 billion (340.2%). The increase is largely due to a ¥28.7 billion improvement in other income-net as a result of a large decrease of valuation losses on short-term and other investments from the prior year when the Company recorded valuation losses of ¥24.8 billion. Accordingly, after ¥13.7 billion of income taxes, ¥1.7 billion of minority interests in earnings of subsidiaries and equity in net income of affiliated companies, net income during the year under review was ¥11.7 billion, an increase of ¥19.7 billion from the prior year's loss of ¥8.0 billion.

(2) Review of operations by product group**1) Internal Combustion Engine and Machinery**

Sales in Internal Combustion Engine and Machinery were ¥501.6 billion, an increase of ¥57.4 billion (12.9%) from the prior year, comprising 53.9% of consolidated net sales. Domestic sales were ¥243.0 billion, an increase of ¥17.5 billion (7.7%), and overseas sales were ¥258.6 billion, an increase of ¥39.9 billion (18.3%) from the prior year. This segment consists of farm equipment and engines and construction machinery.

Sales of farm equipment and engines were ¥450.7 billion, an increase of ¥51.4 billion (12.9%) from the prior year. Domestic sales were ¥219.8 billion, an increase of ¥15.6 billion (7.6%), and overseas sales were ¥231.0 billion, an increase of ¥35.8 billion (18.3%) from the prior year. In domestic markets, the Company has aggressively conducted sales promotion campaign in connection with introducing new models of farm equipment with improved performance and price competitiveness, and thus stimulated the market and increased its market share. As a result, sales of farm equipment increased from the prior year. In overseas markets, sales of tractors in North America had a significant increase resulting from sales campaigns including zero percent promotional interest rate offered by its retail finance subsidiary and introduction of new models, such as full model changes of the L-series tractors. In the Asian market, sales of farm equipment grew favorably especially in China and South Korea.

Table of Contents

**Kubota Corporation
and Subsidiaries**

Sales of engines increased owing principally to growing sales to original equipment manufacturers in EU markets as well as in U.S. markets.

Sales of construction machinery were ¥50.8 billion, an increase of ¥6.0 billion (13.4%) from the prior year. Domestic sales were ¥23.2 billion, an increase of ¥1.9 billion (8.8%), and overseas sales were ¥27.6 billion, an increase of ¥4.1 billion (17.6 %) from the prior year. While demand for construction machinery in the Japanese market recovered, the Company made successful marketing effort to major rental companies, and recorded a sales increase. Overseas, while demand in EU markets was recovering, and demand in North America was strong, the Company achieved sales increases by introducing new models and executing effective sales campaigns.

2) Pipes, Valves and Industrial Castings

Sales in Pipes, Valves and Industrial Castings were ¥175.2 billion, a decrease of ¥2.0 billion (1.2%) from the prior year, comprising 18.8% of consolidated net sales. Domestic sales were ¥152.5 billion, a decrease of ¥6.5 billion (4.1%), and overseas sales were ¥22.7 billion, an increase of ¥4.5 billion (24.6 %) from the prior year. This segment consists of pipes and valves and industrial castings .

Sales in pipes and valves were ¥143.8 billion, a decrease of ¥1.8 billion (1.2%) from the prior year. Domestic sales were ¥130.7 billion, a decrease of ¥4.8 billion (3.6%), and overseas sales were ¥13.1 billion, an increase of ¥3.0 billion (30.1%) from the prior year. While domestic sales of ductile iron pipes decreased slightly from the prior year, domestic sales of PVC pipes remained at the same level as in the prior year in spite of a reduction in public works spending and the financial difficulties of local governments. However, sales of spiral-welded steel pipes and valves declined significantly, and thus total domestic sales of this sub-segment decreased. Overseas sales surged as a result of the brisk export of ductile iron pipes to Middle East countries.

Sales of industrial castings were ¥31.4 billion, a decrease of ¥0.3 billion (0.8%) from the prior year. Domestic sales were ¥21.8 billion, a decrease of ¥1.7 billion (7.2%), and overseas sales were ¥9.6 billion, an increase of ¥1.4 billion (17.7 %) from the prior year. Domestic sales declined mainly due to the weak demand for ductile tunnel segment in construction markets, although the demand in steel industries recovered. Overseas sales increased due to the rising demand for reformer tubes in petrochemical industries.

3) Environmental Engineering

Sales in Environmental Engineering were ¥115.7 billion, a decrease of ¥20.7 billion (15.1%) from the prior year, comprising 12.4% of consolidated net sales. Domestic sales were ¥112.4 billion, a decrease of ¥22.1 billion (16.5%), and overseas sales were ¥3.3 billion, an increase of ¥1.5 billion (79.6 %) from the prior year. This segment consists of environmental control plants and pumps.

Edgar Filing: KUBOTA CORP - Form 6-K

Due to prolonged sluggish public works spending and fierce competition, domestic sales in the Solid Waste Engineering division, the Water Environment Engineering division and in the Pumps division fell. As a result, domestic sales of this segment deteriorated significantly from the prior year, although sales in the Water & Sewage Engineering division increased due to high level orders received in the prior year. Regarding the Solid Waste Engineering division, the sales decreased sharply, because the increase in demand for rebuilding incinerators to prevent dioxin emissions has passed, and fewer sales of large orders were recorded during the current fiscal year resulting from the very low level of orders received during the prior year. On the other hand, overseas sales increased due to the growing export of pumps to the African and the South East Asian markets.

and Subsidiaries**

4) Building Materials and Housing

Sales in Building Materials and Housing were ¥51.8 billion, a decrease of ¥12.5 billion (19.5%) from the prior year, comprising 5.6% of consolidated net sales. This segment consists mainly of building materials (roofing materials, siding materials and septic tanks) and sales of condominiums.

Sales of building materials were ¥42.8 billion, a decrease of ¥14.6 billion (25.5%) from the prior year. On December 1, 2003, Matsushita Electric Works, Ltd. (MEW) and the Company established and held a 50% ownership in Kubota Matsushitadenko Exterior Works, Ltd. (hereinafter KMEW), the joint operation entity, into which the Company transferred its roofing and siding materials business. The Company has applied the equity method of accounting to KMEW due to its 50% ownership in the entity, and has excluded the sales of roofing and siding materials during the period from December 1, 2003 through March 31, 2004 from its consolidated operations. Accordingly, sales of building materials fell sharply. Sales of septic tanks remained at the same level as in the prior year, owing to the focus of marketing efforts on expansion of market share while experiencing a slight recovery.

Sales of condominiums were ¥9.1 billion, an increase of ¥2.1 billion (29.7%) from the prior year. Sales of condominiums surged from the prior year due to the completion of large orders during the year under review.

5) Other

Sales of Other were ¥86.0 billion, a decrease of ¥18.1 billion (17.4%) from the prior year, comprising 9.3% of consolidated net sales. Domestic sales were ¥83.7 billion, a decrease of ¥17.2 billion (17.1%), and overseas sales were ¥2.3 billion, a decrease of ¥0.9 billion (27.2 %) from the prior year. This segment consists of vending machines, electronic-equipped machinery, air-conditioning equipment, construction and so forth.

Sales of the Other segment decreased sharply, because, at the beginning of the year under review, the Company sold its leasing subsidiary, which had sales of ¥13.4 billion in the prior year. Although sales of electronic-equipped machinery increased due to a recovery of private capital expenditures, sales of vending machines decreased because of increasing price competition. Sales of construction decreased mainly due to the reduction in public works spending.

2. Financial condition

Net cash provided by operating activities during the year under review was ¥75.7 billion, an increase of ¥11.4 billion from the prior year. The Company recorded net income of ¥11.7 billion, which was relatively low owing to the increase in pension cost related to the recognition of unrecognized actuarial losses which did not require the use of cash. Thus, the increased accrued retirement and pension cost did not affect the

Edgar Filing: KUBOTA CORP - Form 6-K

Company's cash position. Moreover, both the sale of its leasing business and the transfer of its building materials business during the year under review induced the material changes on the accounts, including depreciation, receivables and payables. But, those changes as a whole did not affect its cash position. The large increase in net cash provided by operating activities was mainly due to the favorable performance of business operations, especially due to operations in Internal Combustion Engine and Machinery.

Net cash used in investing activities was ¥6.5 billion, a decrease of ¥21.1 billion from the prior year. Purchases of fixed assets decreased as a result of restrained capital expenditures, and sale of the leasing business. Increases in proceeds from sales of investments, and the proceeds from sale of real estate contributed to reduce net cash used in investing activities. Moreover, the decrease in purchase of investments and change in advance resulted from the Company's intent to reduce net cash used in investing activities.

Table of Contents**Kubota Corporation
and Subsidiaries**

Net cash used in financing activities was ¥55.1 billion, an increase of ¥25.1 billion from the prior year. The Company used net cash provided by operating activities for repayment of interest-bearing debt consistent with the prior year. The Company spent ¥44.5 billion on repayment of short-term borrowings and long-term debt and, additionally, the Company spent ¥2.2 billion on the purchase of treasury stock.

As a result, including the effect of exchange rate, cash and cash equivalents at the end of March 2004 was ¥81.2 billion, an increase of ¥13.9 billion from the prior year.

Cash flow indices

	Year ended	Year ended
	<u>March 31, 2004</u>	<u>March 31, 2003</u>
Equity ratio (%)	34.8	27.7
Equity ratio based on market capitalization (%)	59.1	35.2
Interest-bearing debt / Net cash provided by operating activities (year)	3.5	5.1
Interest coverage ratio (times)	17.0	13.5

(Notes)

Equity ratio : shareholders equity / total assets

Equity ratio based on market capitalization : market capitalization / total assets

Interest coverage ratio : cash flows provided by operating activities / interest paid

Each ratio is calculated based on the figures in the consolidated financial statements. Market capitalization is calculated based on closing price at the end of the fiscal year multiplied by the number of shares outstanding at the end of fiscal year, excluding treasury stock. Cash flows provided by operating activities are the amount of operating cash flows in the consolidated statements of cash flows. Interest-bearing debt includes short-term borrowings, current portion of long-term debt, and long-term debt in the consolidated balance sheets. Additionally, interest paid is the amount of interest paid in the consolidated statements of cash flows.

3. Matter concerning profit allocation for this fiscal year

The Company plans to pay year-end cash dividends of ¥15 per ADS. Together with the interim cash dividends of ¥15 per ADS, total dividends per ADS for the entire fiscal year will amount to ¥30 per ADS.

3. Prospect for the Next Fiscal Year

1. General outlook

Although the Japanese economy will have an opportunity for building a sustained growth, public investment will continue declining, and the appreciation of yen against the U.S. dollar may have a negative impact on both exports and capital expenditures which have contributed to the recovery of the Japanese economy. Moreover, while price increase of raw materials may cause damages to corporate profitability, there is concern that the U.S. and Euro economies may slow down. All things considered, the Company expects the difficult economic conditions to continue.

Table of Contents

**Kubota Corporation
and Subsidiaries**

Under such conditions, the Company will make every effort to overcome the difficult business environment, continue to work hard towards the vigorous and steady implementation of the new version of the Medium-Term Management Strategy, and establish the business structure and profit structure with stability and growth capability. In the public works spending related business (Pipes, Valves, and Industrial Castings segment and Environmental Engineering segment), the Company will make rigorous efforts for cost reduction and spending control. At the same time, in overseas businesses in Internal Combustion Engine and Machinery, which is the driving force for the growth of the Company, the Company will implement expansion strategies by taking measures such as continuous new products introduction, and development of peripheral businesses.

Looking ahead, the Company forecasts consolidated net sales for the year ending March 31, 2005 at ¥915.0 billion, down by ¥15.2 billion from the prior year. The sales decrease is mainly due to the business transfer of the building materials operation, which causes the negative effect of ¥33.0 billion.

The Company forecasts operating income at ¥65.0 billion, an increase of ¥43.2 billion from the prior year. The pension cost for the year ended March 31, 2004 increased ¥43.4 billion from the prior year due to the recognition of the unrecognized actuarial losses. The Company forecasts the pension cost for next fiscal year will return to a normal level (a decrease of approximately ¥44.4 billion from the year ended March 2004).

The Company expects income before income taxes, minority interest in earnings of subsidiaries, and equity in net income of affiliated companies for next fiscal year to be ¥127.0 billion, a large increase of ¥99.9 billion from the prior year. The increase is expected due to the significant improvement of the other income-net as a result of gains related to the transfer to the government of the substitutional portion of the benefit obligation and related plan assets (approximately ¥57.6 billion). Accordingly, net income is forecasted to be ¥90.0 billion, up ¥78.3 billion from the prior year. (These forecasts anticipate an exchange rate of ¥105=US\$1.)

Note : Pension cost on consolidated basis

The Company recognizes actuarial gains and losses in excess of 20 percent of the larger of the benefit obligation or plan assets, and amortizes actuarial gains and losses between 10 and 20 percent over the average participants' remaining service period (approximately 15 years).

The Company recognized expense of ¥52.1 billion for the actuarial losses for the year ended March 31, 2004, which was an increase of ¥46.5 from the prior year when the Company recognized expenses of ¥5.6 billion.

The Company was given approval for its application for an exemption from the obligation to pay benefits for future employee service related to the substitutional portion of its employee benefit pension plan on January 30, 2003. During the next fiscal year, the Company will recognize the gains related to the transfer when the Company completes the transfer to the government of the substitutional portion of the benefit obligation and related plan assets based upon U.S. GAAP. The forecasts include total gains of ¥55.2 billion which consists of losses of ¥2.4 billion applied to operating income, and gains of ¥57.6 billion applied to other income-net. The ¥2.4 billion losses is due to an recognition of actuarial loss on the substitutional portion for the transfer, and the ¥57.6 billion gain represents the difference between the benefit obligation and related plan

assets of the substitutional portion for the transfer.

**Kubota Corporation
and Subsidiaries**

2. Prospect with regard to the profit allocation for the next fiscal year

In accordance with the previously described basic policy related to the Company's profit allocation of maintaining stable or raising dividends, the Company is considering paying cash dividends per ADS for the next fiscal year of ¥30, including the expected interim cash dividends of ¥15 per ADS.

< Cautionary Statements with Respect to Forward-Looking Statements >

Projected results of operations and other future forecasts contained in this report are the estimates of the Company based on information available to the Company as of this published date. Therefore, those projections include certain potential risks and uncertainties. Accordingly, the users of this information are requested to note that the actual results could differ materially from those future projections. Major factors that could influence the ultimate outcome include the economic condition surrounding the Company, foreign exchange rates, agricultural policy in Japan, the trend of public investment and private capital expenditure in Japan, the price-competitive pressure in the market, the ability for the Company to manufacture or innovate the products which will be accepted in the market. The user of the information should be aware that factors that could influence the ultimate outcome of the Company are not limited to the factors above.

Notice on amendment of its Articles of Incorporation

regarding purchase of treasury stock

Please be advised that Kubota Corporation (the Company), at its board of directors meeting held on May 14, 2004, resolved to propose an agenda at the ordinary general meeting of shareholders to be held on June 25, 2004, to amend its Articles of Incorporation. The proposed amendment will enable the Company to purchase treasury stock by resolution of its board of directors pursuant to Article 211-3, paragraph 1, Item 2 of the Commercial Code of Japan. The Company believes that this amendment will support its execution of flexible capital management in a rapidly changing business environment.

The above amendment is subject to shareholder approval at the ordinary general meeting of shareholders to be held on June 25, 2004.

Notice on the business division and integration

of plastic pipes and fittings

Kubota Corporation (hereinafter "Kubota") resolved at the board of directors' meeting held on May 27, 2004 that Kubota would divide and transfer its plastic pipes and fittings business on April 1, 2005 in order to integrate the business operation with C.I. Kasei Company Limited (hereinafter "C.I. Kasei"). Following such division and transfer, Kubota-C.I. Co., Ltd., which will be jointly established by Kubota and C.I. Kasei, will become a succeeding company for the business integration effective on April 1, 2005.

The above business division and integration is subject to an approval of Fair Trade Commission of Japan and an approval of shareholders of C.I. Kasei.

1. Background of business division and integration

Edgar Filing: KUBOTA CORP - Form 6-K

Plastic pipes including polyvinyl chloride pipes (hereinafter "PVC pipes"), its main product, have wide variety of use, such as pipes for water supply and drainage for housing, pipes for drinking water, sewage pipes and pipes for agricultural use. Unfortunately, since 1997, demands for those pipes have been declining due to sluggish new housing construction starts and gradually shrinking public works spending.

Moreover, a price hike of polyvinyl chloride resin, its raw material, resulting from the resin manufacturers' reorganization and rising demand for the resin in Chinese markets has become a major factor to deteriorate profitability in the business operation of plastic pipes and fittings.

Plastic pipes including polyvinyl chloride pipes are key industrial products supporting a lifeline for people, and some level of constant demand is expected to continue in the future, although the demands from a medium-term perspective are projected declining.

In April 2002, both Kubota and C.I. Kasei concluded a contract of comprehensive cooperation for PVC pipes business including all business aspects except for sales, and have been making efforts to improve profitability in their business operations through cooperative purchasing of parts and cooperative productions on OEM basis. However, business situations have become more difficult, and benefits from the contract of comprehensive cooperation remained at a marginal degree. Both Kubota and C.I. Kasei have shared common views that the contract of comprehensive cooperation would provide merely a limited level of benefits, and should not be a fundamental solution from their long-term business perspectives. Accordingly, both Kubota and C. I. Kasei resolved that they would divide and integrate their business operations and establish a joint operation.

2. Objective of business integration (a joint operation)

The new joint operation to be established in April 2005 will be a leading manufacturer of PVC pipes in Japan with annual production capacity of 220,000 tons. Both Kubota and C. I. Kasei will anticipate having approximate rationalization effects of ¥2.6 billion, by taking measures such as to eliminate overlapping functions for increasing labor productivity, to improve distribution and logistics, and to centralize procurement operations.

Table of Contents

3. Outline of business division

1) Schedule:

May 27, 2004 :	Board resolution to approve business division
May 27, 2004 :	Signing of the business division agreement
June 29, 2004 :	C.I. Kasei s shareholders approval on business division (*)
April 1, 2005 (planned) :	Business division and transfer
April 1, 2005 (planned) :	Registration of business division and transfer

(*) At Kubota, pursuant to Article 374-6-1 of the Commercial Code, the shareholders approval is not required for the authorization of the business division agreement.

2) Method of business division and transfer :

(1) Method :

Kubota and C. I. Kasei will divide a part of their businesses, and Kubota-C. I. Co., Ltd. (to be established) will succeed the divided businesses. The succeeding company will issue new shares of common stock, and allot such shares to Kubota and C.I. Kasei.

(2) Reason for selecting this method :

This method was chosen because of the following reason :

The business division is a part of the process to establish a joint business operation of plastic pipes and fittings between Kubota and C.I. Kasei. Therefore, this method, under which Kubota-C.I. Co., Ltd. (the succeeding company) would issue new shares of common stock, and allot such shares to Kubota, was selected.

3) Allotment of shares :

(1) Share allotment ratio :

The succeeding company will allot 42,000 new shares of common stock to Kubota, and allot 18,000 new shares of common stock to C.I. Kasei. Kubota will hold 70% share and C.I. Kasei will hold 30% share in the succeeding company, respectively.

(2) Calculation method for share allotment ratio :

In order to secure fair and objective valuation of the business to be divided, Kubota and C.I Kasei retained the service of Nomura Securities Co., Ltd., and the service of Mizuho Investors Securities Co., Ltd. respectively, acting as an outside financial advisor. Nomura Securities Co., Ltd. has applied the discounted cash flow method for the valuation, and Kubota used the results of these calculations as a basis for its comprehensive business judgment, and negotiated with C.I Kasei. Accordingly Kubota and C.I. Kasei decided the share allotment ratio.

4) Cash distribution upon business division and transfer :

There will be no cash distribution.

5) Rights and obligations to be transferred (succeeded) :

Assets, liabilities, rights, and obligations involved in the business will be divided and transferred.

Table of Contents

6) Prospect of paying debt obligations :

Kubota believes that both Kubota and the succeeding company can pay the debt obligations to be incurred as a result of the business division and transfer.

7) Directors and Corporate Auditors of the succeeding company to be newly appointed :

Number of Directors : 6

Number of Corporate Auditors : 3

Mr. Osamu Takagi (Representative Director and Senior Managing Executive Officer, Pipes & Civil Engineering Materials Division of C.I. Kasei) will be appointed as the chairman and representative director, and Mr. Tadahiko Urabe (Managing Director, General Manager of Plastic Pipe Division of Kubota) will be appointed as the president and representative director.

(2) Principal line of business :

Manufacture and sale of PVC pipes and fittings, polyethylene pipe and fittings and associated products.

(3) Date of Incorporation : April 1, 2005

(4) Principal office : Sakai-shi, Osaka, Japan

(5) Representative :

Chairman and representative director Osamu Takagi (C.I. Kasei)

President and representative director Tadahiko Urabe (Kubota)

(6) Capital Stock : ¥3.0 billion (Ownership %: Kubota 70%, C.I Kasei 30%)

(7) Share issued : 60,000 shares

(8) Projected Sales : ¥45.0 billion (for the first fiscal year ending March 2006)

(9) Number of Employee : approximately 800.

5. Description of the business to be divided from Kubota (non-consolidated basis)

1) Business to be divided :

Plastic pipes and fittings business including manufacture, sales, and R&D

2) Operating results of the business to be divided for the year ended March 2004 :

Net sales of the business to be divided (a) : ¥36,556 million

Net sales of Kubota (b) : ¥663,827 million

Ratio (a / b) : 5.51%

3) Assets and liabilities of the business to be divided (As of March 31, 2004) :

Assets (book value) : ¥6,927 million

Liabilities (book value) : ¥2,322 million

6. Status of Kubota after the business division

Edgar Filing: KUBOTA CORP - Form 6-K

1) Trade name : Kubota Corporation

2) Principal line of business :

Manufacture and sale of farm machinery, construction machinery, engines, pipes, pumps, environmental control plants, etc and related works and services of the above products.

Table of Contents

3) Principal office : Naniwa-ku Osaka, Japan

4) Representative : Daisuke Hatakake, President and Representative Director

5) Capital stock : ¥78.1billion

6) Total assets :

There will be a change resulting from a difference in the values between the assets to be divided and transferred to Kubota-C.I. Co., Ltd., and the new shares of common stock allotted to Kubota.

7) Annual financial closing date : March 31

8) Effect on financial results :

Kubota currently expects that the business division will have no significant effect on its operating results and financial position, because the assets and liabilities of the business to be divided is quite small compared to the total assets and liabilities of Kubota. Kubota currently plans to announce, in May 2005, the forecasts for consolidated and non-consolidated financial results for the fiscal year ending March 31, 2006, incorporating the effects on this business division.

< Cautionary Statements with Respect to Forward-Looking Statements >

Projected results of operations and other future forecasts contained in this report are the estimates of the Company based on information available to the Company as of this published date. Therefore, those projections include certain potential risks and uncertainties. Accordingly, the users of this information are requested to note that the actual results could differ materially from those future projections. Major factors that could influence the ultimate outcome include the economic condition surrounding the Company, foreign exchange rates, agricultural policy in Japan, the trend of public investment and private capital expenditure in Japan, the price-competitive pressure in the market, the ability for the Company to manufacture or innovate the products which will be accepted in the market. And the user of the information should be aware that factors that could influence the ultimate outcome of the Company are not limited to the factors above.
