(5) Financial forecast

The Company revised the anticipated results of operations from those released on July 30, 2004.

(Reason for revision)

Net sales for the six months ending September 30, 2004 are forecasted to be ¥443.0 billion, an increase of ¥6.0 billion from the previous forecast on July 30, 2004, reflecting expanding sales in North America in Internal Combustion Engine and Machinery, and firm domestic sales in Pipes, Valves, and Industrial Castings. Income before income tax is forecasted to be ¥45.0 billion, an increase of ¥6.0 billion from the previous forecast, and net income is also expected to be ¥48.0 billion, an increase of ¥4.0 billion from the previous forecast. These increases are principally due to the sales increase and gradual progress in cost reduction.

The forecast for the year ending March 31, 2005 was revised in accordance with the revision of the forecast for the six months of the first half of the year ending March 31, 2005. The forecast for the six months from September, 2004 to March, 2005 remained unchanged because the volatility of raw material prices or foreign exchanges has intensified.

The Company also revised non-consolidated forecast for the same reason.

<Results of Operations>

During the three months under review, net sales were ¥196.2 billion, a 6.0 % increase from the corresponding period in the prior year, resulting from favorable overseas sales in Internal Combustion Engine and Machinery.

Domestic sales in Internal Combustion Engine and Machinery increased due to aggressive sales campaigns. Domestic sales in Pipes, Valves, and Industrial Castings increased owing to increased sales volume and improvement in sales prices in spite of harsh market conditions. However, domestic sales in Environmental Engineering declined, because fewer sales of large orders were recorded during the period, and domestic sales in Other segment decreased due to the business transfer of building materials operations in the prior year. As a result, total domestic sales decreased 1.7 %, to ¥109.8 billion from the corresponding period in the prior year.

Overseas sales increased 17.6 % to ¥86.4 billion from the corresponding period in the prior year. Though exports of ductile iron pipes declined sharply, sales of tractors in North America rose resulting from the introduction of new models, and sales of engines and construction machinery also expanded especially in the U.S. and EU markets.

Operating income was ¥22.8 billion, a 146.1 % increase from the corresponding period in the prior year. Sharp price increases in raw materials and appreciation of yen negatively affected operating income. However, many factors such as reduction in pension costs, increased overseas sales in Internal Combustion Engine and Machinery, and cost reduction in public works related businesses contributed to the large increase in operating income.

Income before income taxes, minority interests in earnings of subsidiaries, and equity in net income of affiliated companies was ¥25.8 billion, a 123.7 % increase from the corresponding period in the prior year, due to the increase in interest and dividend income as well as an increase in operating income. As a result, after income taxes, minority interests in earnings of subsidiaries and equity in net loss of affiliated companies, net income was ¥14.0 billion, a 294.8 % increase from the corresponding period in the prior year.

<Financial Position>

(Comparison with the end in corresponding period in the prior year)

Total assets at the end of the period under review amounted to ¥1,108.0 billion, ¥47.4 billion more than the corresponding period in the prior year, due mainly to the increase in unrealized gains on securities and increase in notes and accounts receivable. On the other hand, property, plant, and equipment decreased due principally to the business transfer of building materials operation. Other current assets decreased because of the decrease in deferred tax assets.

Edgar Filing: KUBOTA CORP - Form 6-K

The balance of interest-bearing debt decreased by ¥19.5 billion, to ¥273.2 billion. Shareholders' equity increased, resulting from the increase in unrealized gains on securities.

(Comparison with the end in the prior year)

Total assets decreased ¥16.2 billion from the prior year-end, principally due to the decrease in current assets. At the end of the prior year, the Company had large amounts of notes and accounts receivable from government agencies because of rush of shipment at the year-end. Through the collection of such receivables during this period, the balance fell sharply. On the other hand, other current assets increased.

As for interest-bearing debt, the balance increased ¥6.5 billion from the end of the prior year, while the balance deducting the debt related to the sales financing programs declined by ¥19.5 billion, to 164.4 billion. Shareholders' equity increased ¥9.1 billion, and the ratio of shareholders' equity to total liabilities and shareholders' equity was 36.1 %, 1.3 percentage points increase.
