NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Table dollars in thousands, except per share data)

(Unaudited)

1. Summary of Significant Accounting Policies

Nature of Operations. We are a provider of enterprise supply chain management solutions, including various supply chain software and service offerings. We operate our business in one business segment. Supply chain management is the set of processes, technology and expertise involved in managing supply, demand and fulfillment throughout divisions within a company and with its customers, suppliers and partners. The goals of our solutions include increasing supply chain efficiency and enhancing customer and supplier relationships by managing variability, reducing complexity, improving operational visibility, increasing operating velocity and integrating planning and execution. Our offerings help customers improve efficiency in relation to spend, production, revenue and profit, fulfillment and logistics performance. Our application software is often bundled with other offerings, including content and services we provide such as business optimization and technical consulting, training, solution maintenance, content management, software upgrades and development.

Basis of Presentation. Our unaudited condensed consolidated financial statements have been prepared by management and reflect all adjustments (all of which are normal and recurring in nature, with the exception of certain accruals discussed in Note 4, *Restructuring Charges and Adjustments* and Note 7, *Commitments and Contingencies*) that, in the opinion of management, are necessary for a fair presentation of the interim periods presented. The results of operations for the interim periods presented are not necessarily indicative of the results to be expected for any subsequent quarter or for the entire year ending December 31, 2004. Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted under the Securities and Exchange Commission's (SEC) rules and regulations. These unaudited condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements and notes thereto, together with management's discussion and analysis of financial condition and results of operations, presented in our Annual Report on Form 10-K/A for the year ended December 31, 2003 filed on March 17, 2004 with the SEC (2003 Annual Report on Form 10-K).

Stock-Based Compensation Plans. Employee compensation expense under stock option plans is reported only if options are granted below market price at the grant date in accordance with the intrinsic value method of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees. Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, requires pro forma disclosures of net income and earnings per share for companies not adopting its fair value accounting method for stock-based employee compensation.

Fair values of options are estimated at the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions for options granted during the three months and nine months ended September 30, 2004; risk-free interest rate of 3.28 % and 2.99%; market price volatility factor of 1.13 and 1.19; a weighted-average expected life of the options of four years; and no dividend yields. For the options granted during the three months and nine months ended September 30, 2003, these values were; risk-free interest rate of 2.6% and 2.4%; market price volatility factor of 1.27 and 1.26; a weighed-average expected life of the options of four years; and no dividend yields.

The following pro forma information presents net income (loss) applicable to common stockholders and income (loss) per common share for the three and nine months ended September 30, 2004 and 2003 had the fair value method under SFAS No. 123 been used to measure compensation

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

cost for stock-based compensation plans. For purposes of these pro forma disclosures, the estimated fair value of the options and stock rights is amortized

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

to expense over the related vesting periods and the estimated fair value of the employee stock purchase plans shares is amortized to expense over the purchase period. During 2002, we ceased recognizing tax benefits for net operating losses for financial reporting purposes. Accordingly, the pro forma adjustments in the table below have not been tax affected for the three and nine months ended September 30, 2004 and 2003.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
	(dollars in thousands)

Pro forma	\$ 0.02	\$ (0.06)	\$ (0.09)	\$ (0.13)

Allowance For Doubtful Accounts. Our allowance for doubtful accounts was \$1.3 million and \$3.1 million at September 30, 2004 and December 31, 2003, respectively. The decrease in our allowance for doubtful accounts is a result of a credit for bad debts charged to expenses of \$1.5 million and write-offs, net of recoveries and other credit adjustments, of \$0.3 million. The credit for bad debts was due to an increased collection of past due receivables. Our provision for doubtful accounts is included as a component of sales and marketing expense and services and maintenance expense in our statement of operations.

2. Investment Securities

Short-term time deposits and other liquid investments in debt securities with remaining maturities of less than three months when acquired by us are classified as available for sale and reported as cash and cash equivalents in the condensed consolidated balance sheets. The estimated fair value of these investments approximates their carrying value. Investment securities reported as cash equivalents were as follows:

September 30, 2004	December 31, 2003
-----------------------	----------------------

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

	_____	_____
	(in thousands)

	_____	_____

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Investments in debt securities with remaining maturities in excess of three months but less than one year when acquired by us are classified as available for sale and reported as short-term investments in the condensed consolidated balance sheets. Short-term investments at December 31, 2003 and September 30, 2004 were as follows:

	<u>Amortized Cost</u>	<u>Unrealized Gains</u>	<u>Unrealized Losses</u>	<u>Estimated Fair Value</u>
(in thousands)				
December 31, 2003				
Obligations of state and local municipalities	\$ 5,000	\$	\$	\$ 5,000
September 30, 2004				
U.S. governmental obligations	\$ 14,705	\$	\$ 60	\$ 14,645

Investments in debt securities with remaining maturities in excess of one year when acquired by us are classified as available for sale and reported as long-term investments in the condensed consolidated balance sheets. All long-term debt securities outstanding at September 30, 2004 will contractually mature within 18 months. We had no long term investments at December 31, 2003. Long-term investments were as follows at September 30, 2004:

	<u>Amortized Cost</u>	<u>Unrealized Gains</u>	<u>Unrealized Losses</u>	<u>Estimated Fair Value</u>
(in thousands)				
September 30, 2004				
U.S. government obligations	\$ 12,002	\$	\$ 49	\$ 11,953

3. Borrowings and Debt Issuance Costs

On August 18, 2004, we retired \$40.0 million of our convertible subordinated notes due on December 15, 2006. We recognized a net \$2.2 million gain for the early retirement of this debt due to a 6.5% purchase discount. This gain is reported in the total non-operating expense, net line item of the condensed consolidated statements of operations and comprehensive income (loss).

The remaining \$310.0 million of outstanding convertible subordinated notes are due to mature on December 15, 2006 and bear interest at a rate of 5.25% per annum, which is payable semi-annually. The notes are convertible at the option of the holder into shares of our common stock at a conversion price of \$38.00 per share at any time prior to maturity. Since December 20, 2002, we have had the option to redeem, in cash, all or a portion of the notes that have not been previously converted. We may also, from time to time, seek to retire the notes through cash repurchases

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

and/or exchanges for equity securities, in open market purchases, privately negotiated transactions or otherwise. Such repurchases or exchanges, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. The amounts involved may be material.

In May 2003, we entered into a lease termination agreement with the owner of one of our headquarter buildings that we vacated in January 2003 as part of a restructuring plan. The lease, originally scheduled to expire in 2011, would have required us to pay approximately \$43.4 million through the lease's original date of termination. In consideration for the early termination of the lease, we paid approximately \$7.6 million in cash and issued a \$6.8 million non-negotiable promissory note due and payable on December 15, 2006. The note bears interest at a rate of 5.25% per annum, payable semi-annually in arrears.

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****4. Restructuring Charges and Adjustments**

2004 Restructuring Plan. In response to our operating losses, in March 2004 we initiated a global workforce reduction plan to further reduce our operating expenses and bring them in line with our current revenue levels. During March 2004, 11 employees were involuntarily terminated. In the second quarter of 2004, we finalized our restructuring plan and an additional 152 employees were involuntarily terminated. These activities are being accounted for in accordance with SFAS 146, Accounting for Costs Associated with Exit or Disposal Activities. During the first quarter of 2004, we recorded restructuring charges totalling approximately \$0.6 million related to the severance payments to be paid to the 11 employees involuntarily terminated during the first quarter. During the second quarter of 2004, severance costs of approximately \$4.4 million were recorded related to the severance payments to be paid to the 152 employees involuntarily terminated. No additional severance costs were incurred during the third quarter of 2004. As of September 30, 2004, an accrual of approximately \$0.1 million for the severance payments remaining to be made in subsequent periods related to the 2004 involuntary terminations remains in accrued liabilities.

2002 Restructuring Plan. In July 2002, we initiated a global restructuring plan to reduce our operating expenses and to bring them into alignment with our revenue levels. Overall expense reductions were necessary to lower our existing cost structure and to realign and reallocate our resources in a manner commensurate with our new operating plan. Declining revenues, gross margins, losses and other performance measures such as revenue per employee during 2002 precipitated the restructuring plan. The plan included the elimination of certain employee positions and the reduction of office space and related overhead expenses. The restructuring charges recorded in the third and fourth quarters of 2002 primarily consisted of severance and termination costs for the involuntarily terminated employees and office closure costs. The majority of the restructuring activity related to the 2002 restructuring charges occurred during 2002 and the remaining actions, such as additional office closures and consolidations and asset disposals, were completed during 2003. During 2002, we recorded restructuring charges totalling \$111.9 million. Of this amount, \$56.8 million related to employee severance and termination, \$35.2 million related to office closure and consolidation and \$19.9 million related to asset disposal losses.

2001 Restructuring Plan. During 2001, we implemented a global restructuring plan to reduce our operating expenses with a goal of improving our financial position. The restructuring plan was initiated in response to poor economic conditions during 2001, which led to increasing net losses and declining gross margins and other performance measures such as revenue per employee. The restructuring plan encompassed terminating employees and reducing office space and related overhead expenses. Charges related to the restructuring plan primarily consisted of severance and termination costs for the involuntarily terminated employees and office closure costs. The majority of the restructuring activity occurred during 2001, with the remaining actions, including closing and consolidating certain offices, completed in 2002. During 2001, we recorded restructuring charges totalling \$113.3 million. Of this amount, \$60.7 million related to employee severance and termination, \$41.6 million related to office closure and consolidation and \$11.0 million related to asset disposal losses. As of September 30, 2004, approximately \$0.4 million of the employee severance and termination portion of the restructuring accrual and all of the office closure and consolidation portion of the restructuring accrual relates to activities initiated in 2001 and 2002.

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Consolidated Restructuring Accrual*

The following table summarizes the 2004 restructuring related payments and accruals, and the components of the remaining restructuring accruals, included in accrued liabilities, at September 30, 2004 and December 31, 2003:

2004 restructuring plan expense	64		64
Adjustment to 2001 and 2002 restructuring plans		(734)	(734)
Cash payments	(736)	(813)	(1,549)
Remaining accrual balance at September 30, 2004	\$ 625	\$ 5,496	\$ 6,121

In May 2003, we entered into a lease termination agreement with the owner of one of our headquarter buildings that we vacated in January 2003 as part of a restructuring plan. This lease, originally scheduled to expire in 2011, would have required us to pay approximately \$43.4 million through the lease's original date of termination. In consideration for the early termination of the lease, we paid approximately \$7.6 million in cash and issued a \$6.8 million non-negotiable promissory note due and payable on December 15, 2006. The note bears interest at a rate of 5.25% per annum, payable semi-annually in arrears. Upon executing this agreement in the second quarter of 2003, the remaining restructuring accrual of \$12.4 million was utilized and an additional charge of \$2.0 million was recorded as a general and administrative expense.

The accrual for office closure and consolidation of \$5.5 million at September 30, 2004 represents future payments to be made for facilities that we have exited as part of our 2001 and 2002 restructuring plans. This accrual is net of estimated sublease income of \$4.6 million. We entered into three additional sublease arrangements during the three months ended September 30, 2004 which are expected to generate additional sublease income of \$0.7 million during the terms of the subleases.

5. Net Income (Loss) Per Common Share

Net Income (Loss) Per Common Share. Basic net income (loss) per common share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding for the reporting period. Diluted earnings (loss) per common share includes the dilutive effect of stock options, share rights awards, and warrants granted and, using the treasury stock method, the effect of contingently issuable shares earned during the period and shares issuable under the conversion feature of our convertible debt and convertible preferred stock using the if-converted method. A loss causes all common stock equivalents to be anti-dilutive due to an increase of the weighted average shares from the potential dilution that could occur if securities or other contracts were exercised or converted into common stock. Therefore, for the

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

nine month period ended September 30, 2004, the basic and dilutive loss per common share are the same. There were 211.2 million and 132.9 million anti-dilutive shares for the three months and nine months ended September 30, 2004, respectively. The anti-dilutive common stock equivalents for the three and nine month periods ended September 30, 2003 were 69.0 million common shares. The following is a reconciliation of the number of shares used in the calculation of basic and diluted earnings per share for the three and nine months ended September 30, 2004 and 2003:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
	(in thousands)			
Basic earnings per share of common stock weighted average common shares outstanding	459,148	433,428	446,054	433,062
Effect of dilutive securities:				
Outstanding stock option, warrant, and stock rights awards	1,956	2,989		2,106
Convertible debt				16,571
Convertible preferred stock				
Diluted earnings per share weighted average common and common equivalent shares outstanding	461,104	436,417	446,054	451,739

6. Segment Information, International Operations and Customer Concentrations

We operate our business in one segment, supply chain management solutions designed to help enterprises optimize business processes both internally and among trading partners. Statement of Financial Accounting Standards (SFAS No. 131), Disclosures About Segments of an Enterprise and Related Information, establishes standards for the reporting of information about operating segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, who is our Chief Executive Officer (CEO), in deciding how to allocate resources and in assessing performance.

We market our software and services primarily through our worldwide sales organization augmented by other service providers, including both domestic and international systems consulting and integration firms and other industry-related partners. Our CEO evaluates resource allocation decisions and our performance based on financial information, presented on a consolidated basis, accompanied by disaggregated information by geographic regions. Sales to our customers generally include products from some or all of our product suites. We have not consistently allocated revenues from such sales to individual products for internal or general-purpose financial statements.

Revenues are attributable to regions based on the locations of the customers' operations. Total revenues by geographic region, as reported to our CEO, were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
	(in thousands)			
United States	\$ 70,912	\$ 72,536	\$ 196,757	\$ 245,344
Non- US Americas	2,483	2,334	7,358	10,589
EMEA	18,644	22,710	53,417	87,844
Greater Asia Pacific (Formerly APAC and Japan)	19,023	19,739	47,781	53,485
	\$ 111,062	\$ 117,319	\$ 305,313	\$ 397,262

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Revenues from international operations totalled \$40.2 million and \$44.8 million during the three months ended September 30, 2004 and 2003, respectively. Revenues from international operations totalled \$108.6 million and \$151.9 million during the nine months ended September 30, 2004 and 2003, respectively.

During the three months ended September 30, 2004, one customer accounted for 17% of total revenues. During the three month and nine month periods ended September 30, 2003, one customer accounted for 13% of total revenues. No other customer accounted for more than 10% of total revenue during the three and nine months ended September 30, 2004 and 2003.

Long-lived assets by geographic region, as reported to our CEO, were as follows:

	September 30, 2004	December 31, 2003
	(in thousands)	
United States	\$ 48,402	\$ 44,016
Non-US Americas	111	781
EMEA	1,008	1,170
Greater Asia Pacific (Formerly APAC and Japan)	2,392	3,783
	<u>\$ 51,913</u>	<u>\$ 49,750</u>

7. Commitments and Contingencies

We are subject to various claims and legal proceedings that arise in the ordinary course of our business, including claims and legal proceedings which have been asserted against us by former employees and certain customers, and have been in negotiations to settle certain of those contingencies. In addition, a formal investigation was conducted by the SEC, class action securities and shareholder derivative litigation was commenced against us and one additional private securities action was commenced against certain of our current and former officers with respect to whom we may have indemnification obligations, all in connection with matters relating to the 2003 restatement of our consolidated financial statements. As discussed below, we have recently settled the SEC enforcement proceedings against the company and the class action and derivative litigation.

Securities and Exchange Commission Investigation

On or about March 26, 2003, we were advised that the SEC had issued a formal order of investigation to determine whether there had been violations of the federal securities laws by the company and/or others involved with the company in connection with matters relating to the 2003

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

restatement of our consolidated financial statements. Our Board of Directors had previously directed our Audit Committee to conduct an internal investigation of certain allegations made by a former officer during the fall of 2001, relating to revenue recognition and financial reporting, among other things. In November 2002, we reported to the SEC and publicly disclosed the results of that investigation, as well as certain related allegations made during the fall of 2002 by the former officer and another former officer. Thereafter, the staff of the SEC opened an informal inquiry into these allegations and other matters relating to our financial reporting, and the SEC issued its formal order of investigation. As discussed below, we recently settled SEC enforcement proceedings against the company.

Class Action Litigation

Beginning in March 2001, a number of purported class action complaints were filed in the United States District Court for the Northern District of Texas (Dallas Division) against the company and certain of our

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

officers and directors. The cases were consolidated, and in August 2001 the plaintiffs filed a consolidated amended complaint. The consolidated amended complaint alleged that we and certain of our officers and directors violated the federal securities laws, specifically Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, by making purportedly false and misleading statements concerning the characteristics and implementation of certain of our software products. The consolidated amended complaint sought unspecified damages on behalf of a purported class of purchasers of our common stock during the period from May 4, 2000 to February 26, 2001. By stipulation, in December 2002, the court certified the plaintiff class.

Beginning in April 2003, additional purported class action complaints were filed in the United States District Court for the Northern District of Texas (Dallas Division) against the company and certain of our current and former officers and directors. The complaints brought claims under the federal securities laws, specifically Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, relating to the 2003 restatement of our consolidated financial statements. Specifically, these actions alleged that we issued a series of false or misleading statements to the market during the class period that failed to disclose that (i) we had materially overstated our revenue by improperly recognizing revenue on certain customer contracts, (ii) we lacked adequate internal controls and were therefore unable to ascertain our true financial condition, and (iii) as a result of the foregoing, our financial statements issued during the class period were materially false and misleading. Plaintiffs contended that such statements caused our stock price to be artificially inflated. The complaints sought unspecified damages on behalf of a purported class of purchasers of our common stock during the period from April 18, 2000 to January 24, 2003.

In July 2003, all of these class action complaints were consolidated for purposes of pre-trial matters only. As discussed below, we have settled the actions.

Derivative Litigation

In April 2001, a purported shareholder derivative lawsuit was filed in Dallas County, Texas, against certain of our officers and directors, naming the company as a nominal defendant. The complaint alleged that certain of our officers and directors breached their fiduciary duties to the company and our stockholders by (i) selling shares of our common stock while in possession of material adverse non-public information regarding our business and prospects, and (ii) disseminating inaccurate information regarding our business and prospects to the market and/or failing to correct such inaccurate information. This lawsuit was removed to the United States District Court for the Northern District of Texas (Dallas Division). A motion to dismiss the action was filed, and on October 8, 2002, the motion was granted. Plaintiffs filed an appeal of that decision on October 15, 2002 and, following oral arguments, plaintiffs moved for voluntary dismissal of their appeal. On January 5, 2004, the appellate court granted plaintiffs' voluntary dismissal motion and judgment against the plaintiffs became final.

In April and May 2003, two additional purported shareholder derivative lawsuits were filed in the United States District Court for the Northern District of Texas (Dallas Division) against certain of our officers and directors, naming the company as a nominal defendant. The complaints alleged that certain of our officers and directors breached their fiduciary duties to the company and our stockholders by (i) causing us to improperly recognize revenue in violation of generally accepted accounting principles to artificially inflate our stock price in order to complete acquisitions in which our stock was used as consideration, (ii) selling shares of our common stock while in possession of material adverse non-public information regarding our financial statements and (iii) securing personal loans using our allegedly artificially inflated stock price. In July 2003, these lawsuits were consolidated for all purposes. Plaintiffs amended their consolidated complaint to add a claim that our Chief Executive Officer and our former Chief Financial Officer violated Section 304 of the Sarbanes-Oxley Act of 2002, seeking recovery from them of bonuses, equity-based compensation and profits realized from sales of securities of the company. A motion to dismiss the actions was filed,

and on January 26, 2004, the motion was

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

granted and judgment was entered against the plaintiffs. An appeal of that decision was filed on February 24, 2004. In light of the settlement of the class action litigation and derivative litigation discussed below, the Court entered an unopposed motion to stay the appeal pending the entry of a final order approving settlement. The final order and judgment approving settlement was entered on October 1, 2004, and we expect the Court to dismiss the appeal with prejudice. The appeal of the final order and judgment discussed below should not affect the dismissal of the appeal with prejudice as requested by the parties pursuant to the terms of the settlement agreement.

In May 2003, another purported shareholder derivative lawsuit was filed in the United States District Court for the Northern District of Texas (Dallas Division) against our Chief Executive Officer, our former Chief Financial Officer and our directors, naming the company as a nominal defendant. The complaint alleges that our Chief Executive Officer and our former Chief Financial Officer violated Section 304 of the Sarbanes-Oxley Act of 2002, and seeks recovery from them of bonuses, equity-based compensation and profits realized from sales of securities of the company. The lawsuit also names our directors for failing to seek recovery of the aforementioned bonuses, equity-based compensation and trading profits. A motion to dismiss was filed, and on February 26, 2004, the motion was granted and judgment was entered against the plaintiffs. Plaintiffs did not appeal that decision, and the judgment against them is final.

As stated, these lawsuits are or were derivative in nature; they do not and did not seek relief from the company. However, we entered into indemnification agreements in the ordinary course of business with certain of the defendant officers and directors, and we advanced payment of legal fees and costs incurred by the defendants pursuant to our obligations under the indemnification agreements and/or applicable Delaware law. As discussed below, we have settled the actions that had not been previously dismissed.

Settlement of SEC Enforcement Proceedings

On June 9, 2004, the company settled the SEC enforcement proceedings referred to above. Without admitting or denying the SEC's substantive findings against it, the company settled the enforcement proceedings by consenting to a cease-and-desist order requiring future compliance with specific provisions of the federal securities laws, and agreed to pay a \$10 million civil penalty. The penalty was paid in June 2004 and the entire penalty proceeds will be distributed to certain current or former stockholders.

The settlement of the SEC enforcement proceedings covers the company only. The SEC's investigation continues as to other individuals and entities, and the company continues to cooperate with the staff of the SEC in connection with that ongoing investigation. In addition, the company has learned that the U.S. Attorney's Office for the Northern District of Texas has been conducting interviews of certain current and former officers and employees of the company in connection with the matters that are the subject of the SEC's ongoing investigation.

Settlement of Class Action Litigation and Derivative Litigation

On May 7, 2004, we reached a definitive agreement to settle the class action and derivative litigation referred to above. Under the agreement, the total settlement amount was \$85.0 million, which included \$43.0 million that was covered by our insurance policies and \$42.0 million that was paid by the company. To fund a portion of the \$42.0 million payable by the company in connection with this settlement, the company entered

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

into definitive agreements providing for the issuance and sale by the company, after the satisfaction of certain conditions, of \$20.0 million of common stock to Sanjiv Sidhu, our Chairman, Chief Executive Officer and President, and \$2.0 million of common stock to Gregory Brady, our former Chief Executive Officer and President, both of whom were individual defendants in the actions. On May 26, 2004, the sale of common stock to Sanjiv Sidhu closed and funded. The settlement, which does not reflect any admission of wrongdoing by the

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

company or its directors and officers, was subject to certain conditions including approval by the U.S. District Court for the Northern District of Texas following notice to class members of an opportunity to object or exclude themselves from the settlement. On June 24, 2004, the court entered an order, *inter alia*, preliminarily approving the settlement, authorizing the distribution of notice of the settlement to potential class members and setting a hearing for final approval of the settlement for October 1, 2004. On October 1, 2004, the court entered an order and final judgment approving the settlement. Approximately 0.015% of potential class members who claim to have purchased a total of approximately 0.3% of the shares of our stock eligible to participate in the class action, excluded themselves from the settlement. The settlement does not cover the private securities action discussed below. Two parties who objected to the settlement solely on grounds relating to the award of attorneys fees filed a notice of appeal on October 27, 2004. A briefing schedule has not yet been set. As this appeal is at an early stage, we are currently not able to assess an impact, if any, to our condensed consolidated financial statements.

Private Securities Action

On February 13, 2004, a complaint was filed in the United States District Court for the Northern District of Texas (Dallas Division) against certain of our current and former officers and directors with respect to whom we may have indemnification obligations, entitled *Baldrige v. Sidhu*, No. 3:04CV-319-D. Our company is not named as a defendant in this action. The complaint asserts claims under the federal securities laws, specifically Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, relating to the 2003 restatement of our consolidated financial statements. Plaintiffs contend that such consolidated financial statements caused our stock price to be artificially inflated. The complaints seek unspecified damages on behalf of four purported purchasers of a total of 610,250 shares of our common stock from March 2001 through August 2002. On June 24, 2004, plaintiffs filed a first amended complaint seeking substantially the same relief as sought in the original complaint. On August 6, 2004, motions on behalf of all of the defendants to dismiss the first amended complaint were filed. As this action is at an early stage, we are currently not able to assess an impact, if any, to our condensed consolidated financial statements.

Patent Infringement Suit

On April 12, 2004, a complaint was filed in the United States District Court in Marshall, Texas against the company by Sky Technologies. The complaint alleges that we have infringed upon certain of the patents of Sky Technologies and further alleges that we misappropriated certain of the plaintiff's trade secrets. The plaintiff claims an unspecified amount of damages at this time. As this action is at an early stage, we are currently not able to assess an impact, if any, to our condensed consolidated financial statements.

Internal Revenue Service Audit

We are currently being examined by the Internal Revenue Service regarding matters relating to the timing of the company's remittance of withholding taxes, which were previously remitted, associated with the exercise of certain stock options by employees in the 2000 tax year. The IRS has not issued an assessment with respect to any monetary penalties claimed to be owed by the company. Such penalties could be significant, however, and the company presently intends to seek abatement of all or a portion of any such penalties which might be assessed. Since we do not believe it is possible at this time to estimate the amount of penalties the IRS may assess, no accrual for a loss contingency relating to this matter has been recorded.

Customer Litigation

On September 30, 2004, we were served with a complaint in a suit filed in the District Court of Dallas County, Texas by Kmart Corporation against the company, Sanjiv Sidhu, our current Chairman, Chief Executive Officer and President, and Gregory Brady, our former Chief Executive Officer and President. The complaint

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

alleges fraudulent inducement, breach of contract, rescission and unjust enrichment in relation to the license agreement, dated as of September 29, 2000, between the company and Kmart. The complaint states that Kmart paid in excess of \$40.0 million for software and technology and in excess of \$10.0 million for implementation services in connection with the license agreement. The prayer for relief requests rescission of the license agreement, actual and punitive damages, fees, costs and other disbursements. As this action is at an early stage, we are currently not able to assess an impact, if any, to our condensed consolidated financial statements. We intend to vigorously defend the company against this action.

Certain Accruals

We recorded an accrual of \$42.0 million in the fourth quarter of 2003 for estimated losses relating to a possible settlement of the class action and derivative litigation. As described above, we reached a definitive agreement to settle the class action and derivative litigation, and the court entered an order and final judgment approving the settlement on October 1, 2004. In the quarter ended June 30, 2004, we paid \$42.0 million into the registry of the court to fulfill our obligations under the definitive agreement.

We have accrued for estimated losses in the accompanying condensed consolidated financial statements for other matters where we believe the likelihood of an adverse outcome is probable and the amount of the loss is reasonably estimable. The adverse resolution of any one or more of those matters or the matters described in this Note 7 over and above the amount, if any, that has been estimated and accrued in the accompanying condensed consolidated financial statements could have a material adverse effect on our business, financial condition or results of operations.

Indemnification Agreements

We have entered into indemnification agreements with certain of our officers, directors and employees that may require us, among other things, to indemnify such officers, directors and employees against certain liabilities that may arise by reason of their status or service as directors, officers or employees and to advance their expenses incurred as a result of any proceeding against them as to which they could be indemnified. Pursuant to these agreements, we plan to advance or indemnify certain current and former directors, officers and employees for fees and expenses incurred by them in connection with the private securities action resulting from the 2003 restatement of our consolidated financial statements, the related governmental investigations and other matters.

We have also entered into agreements regarding the advancement of costs with certain officers and employees. Pursuant to these agreements, we expect to advance fees and expenses incurred by certain officers and employees in connection with the private securities action resulting from the 2003 restatement of our consolidated financial statements, the related governmental investigations and other matters.

The maximum potential amount of future payments we could be required to make under these indemnification agreements and the agreements for the advancement of costs is unlimited. Additionally, our corporate by-laws allow us to choose to indemnify any employee for certain events or occurrences while the employee is, or was serving, at our request in such capacity. During the three and nine months ended September 30, 2004, we incurred approximately \$1.5 million and \$3.2 million of expense for legal fees and expenses incurred by current and former

employees.

8. Stock Transactions

On June 3, 2004, we sold 100,000 shares of 2.5% Series B Convertible Preferred Stock of i2 Technologies, Inc. to R² Investments, LDC, an affiliate of Q Investments, pursuant to a Preferred Stock Purchase Agreement, dated April 27, 2004. The purchase price for the Series B preferred stock was \$1,000 per Series B share, or

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

\$100.0 million in the aggregate. Pursuant to the terms of the Preferred Stock Purchase Agreement, R² Investments, LDC has certain preemptive rights upon the issuance of certain of our securities during the three-year period ending June 3, 2007. Dividends on the Series B preferred stock, which may be paid in cash or in additional shares of Series B preferred stock, will be payable semi-annually at the rate of 2.5% per year. The Series B preferred stock will automatically convert into shares of our common stock on June 3, 2014 and will be convertible into shares of common stock at the option of the holder at any time prior thereto. The conversion price, which is initially \$.926 per share, is subject to certain adjustments, including but not limited to adjustments for certain issuances of our equity securities at a price per share that is less than the conversion price then in effect during the two year period ending June 3, 2006. Under certain circumstances, we will also have the right to redeem the Series B preferred stock. Upon a change of control of the company, unless otherwise agreed to by holders of a majority of outstanding Series B shares, the company will be required to redeem the outstanding shares of Series B preferred stock for cash at 110% of face value plus all accrued but unpaid dividends. The Series B preferred stock is recorded net of \$4.7 million of issuance costs, consisting of legal and investment banking fees incurred to complete the transaction. The issuance costs are being accreted over a ten-year period through the date of automatic conversion. For the three months ended September 30, 2004, we recorded issuance cost accretion of approximately \$0.1 million and we accrued \$0.6 million related to our Series B preferred stock dividend that will be settled semi-annually beginning in December 2004.

On May 26, 2004, a \$19.7 million (net of issuance costs of \$0.3 million) common stock investment in the company by Sanjiv Sidhu, our Chairman, Chief Executive Officer and President, closed and was funded at a price of \$.926 per share.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical or current facts, including, without limitation, statements about our business strategy, plans, objectives and future prospects, are forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from these expectations, which could have a material adverse effect on our business and thereby cause our stock price to decline. Such risks and uncertainties include, without limitation, the following:

We have experienced substantial negative cash flows and we may not achieve a return to positive cash flow. The inability to stabilize or grow revenues, control expenses and achieve positive cash flows could impair our ability to support our operations, adversely affect our liquidity, and, eventually, threaten our solvency and our ability to repay debts when they come due.

We may not benefit from increased demand in the market for information technology and an improving macroeconomic environment if we are unable to maintain or grow our market share, which would negatively impact our revenues and stock price.

We face risks related to ongoing governmental investigations and litigation that could have a material adverse effect on our relationships with customers and our business, financial condition and results of operations. We may face additional litigation in the future that could also harm our business and impair our liquidity.

We may not be competitive and increased competition could seriously harm our business.

Further loss of key personnel, including customer-facing employees, or our failure to attract a suitable candidate for our Chief Executive Officer position, may negatively affect our operating results and revenues and seriously harm our company.

In the future, we may seek additional private or public debt or equity financing, which could also have a dilutive effect on our stockholders. Any future financings may not be available on advantageous terms or may not be available at all.

We have been and continue to be subject to claims pertaining to the quality of our products and services, and questions regarding our financial viability. These claims and perceptions, if unresolved or not addressed, could seriously harm our business and our stock price.

Our financial results have varied and may continue to vary significantly from quarter to quarter and we may again fail to meet expectations, which might negatively impact the price of our stock.

Other risks indicated below under the section captioned "Factors that May Affect Future Results" and in our other filings with the SEC.

Many of these risks and uncertainties are beyond our control and, in many cases, we cannot accurately predict the risks and uncertainties that could cause our actual results to differ materially from those indicated by the forward-looking statements. When used in this document, the

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

words believes, plans, expects, anticipates, intends, continue, may, will, should or the negative of such terms and similar expressions relate to us, our customers or our management are intended to identify forward-looking statements.

References in this report to the terms optimal and optimization and words to that effect are not intended to connote the mathematically optimal solution, but may connote near-optimal solutions, which reflect practical considerations such as customer requirements as to response time, precision of the results and other commercial factors.

Table of Contents**Overview**

We are a provider of enterprise supply chain management solutions, including various supply chain software and service offerings. We operate our business in one business segment. Supply chain management is the set of processes, technology and expertise involved in managing supply, demand and fulfillment throughout divisions within a company and with its customers, suppliers and partners. The goals of our solutions include increasing supply chain efficiency and enhancing customer and supplier relationships by managing variability, reducing complexity, improving operational visibility, increasing operating velocity and integrating planning and execution. Our offerings help customers improve efficiency in relation to sourcing, supply, demand, fulfillment and logistics performance. Our application software is often licensed in conjunction with other offerings including content and services we provide such as business optimization and technical consulting, training, solution maintenance, content management, software upgrades and development.

Application of Critical Accounting Policies and Accounting Estimates

There have been no changes during the third quarter of 2004 to our critical accounting policies, as described in our 2003 Annual Report on Form 10-K/A filed on March 17, 2004.

Revenues

The following table sets forth revenues and the percentages of total revenues of selected items reflected in our condensed consolidated statements of operations and comprehensive income (loss). The period-to-period comparisons of financial results are not necessarily indicative of future results.

	Three Months Ended September 30, 2004	Percent of Total Revenue	Three Months Ended September 30, 2003	Percent of Total Revenue	Nine Months Ended September 30, 2004	Percent of Total Revenue	Nine Months Ended September 30, 2003	Percent of Total Revenue

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

Total revenues decreased \$6.3 million, or 5%, for the three months ended September 30, 2004 as compared to the three months ended September 30, 2003. Total revenues decreased \$92.0 million, or 23%, for the nine months ended September 30, 2004 compared to the nine months ended September 30, 2003. Details of our revenues are presented below.

Software Licenses. Software license revenue includes amounts related to software product sales, content subscriptions and other revenues classified as license revenue. Software license revenue totalled \$17.4 million, or 16% of total revenues, for the three months ended September 30, 2004, increasing \$3.2 million, or 23%, from the same period in 2003. Software license revenue totalled \$41.9 million, or 14% of total revenues, for the nine months ended September 30, 2004, decreasing \$8.8 million, or 17%, from the same period in 2003.

Revenue from software product sales totalled \$6.0 million, or 34%, of our total software license revenue, for the three months ended September 30, 2004. Software product sales revenue increased \$1.4 million, or 29%, for

Table of Contents

the three months ended September 30, 2004 as compared to the three months ended September 30, 2003. The increase in revenue from software product sales in the three months ended September 30, 2004 compared to the three months ended September 30, 2003 is primarily related to a recent increase in sales activity as well as an increase in the sale of software to customers not requesting customization. Revenue from software product sales totalled \$12.3 million, or 30%, of our total software license revenue for the nine months ended September 30, 2004. Software product sales revenue decreased \$8.6 million, or 41%, for the nine months ended September 30, 2004 as compared to the nine months ended September 30, 2003. The decrease in revenue from software products sales in the nine months ended September 30, 2004 as compared to the comparable period in 2003 resulted from a decline in sales arising from deal execution challenges, reduction in sales and marketing capacity, increased competition and related pricing pressures and an increasing number of transactions sold with development services that will be recognized as development services revenue in future periods. Our recent financial performance, negative cash flow, the 2003 restatement of our consolidated financial statements, the related SEC investigation and securities class action lawsuits and the de-listing of our common stock from The NASDAQ National Market have led our customers and prospects to voice concerns about our continued financial viability, which has continued to contribute to our revenue decline. Despite our efforts to generate demand and develop growth, our success has been limited, and there can be no assurance that our business will stabilize or that we will be able to develop revenue growth from software product sales.

Revenue from content subscriptions and other recurring revenue classified as software license revenue increased \$1.9 million, or 20%, for the three months ended September 30, 2004 versus the comparable period in 2003. Revenue from content subscriptions and other recurring revenue classified as software license revenue decreased \$0.1 million, or 0.5%, for the nine months ended September 30, 2004 versus the comparable period in 2003. The decrease in the nine months ended September 30, 2004 compared to the comparable period in 2003 is primarily due to a decline in the market for content and content services and increased competition, which has resulted in downward price pressure and a decline in content subscription renewals. Partially offsetting the decrease associated with content subscriptions for the nine months ended September 30, 2004, and resulting in an increase for the three months ended September 30, 2004 compared to the comparable period in 2003 was revenue related to three large recurring revenue transactions entered into during the second quarter of 2004. These three transactions resulted in recurring revenues of \$2.4 million and \$3.5 million during the three and nine months ended September 30, 2004, respectively. These transactions, which each carry terms of three years or more, include rights to all current and future products that become available during the term of each respective contract. The revenues related to our subscription arrangements are recognized ratably over the term of the arrangement. Although we may pursue additional transactions of this nature, there can be no assurance their impact will offset any further declines in revenue from content subscriptions.

Our account teams, led by sales representatives and consulting managers, are responsible for generating most of our software license and development services revenue. Although we believe direct sales will continue to account for most of our software license and development services revenue for the foreseeable future, we plan to continue developing indirect sales through, or in conjunction with, sales alliances, distributors, resellers and other indirect channels. There can be no assurance that our efforts to further expand indirect sales of our software products and content subscriptions will be successful or will continue in the future.

Development Services. Development services revenue includes our license of software products and our agreement with customers to provide services to customize or enhance the software in accordance with specific customer requirements and/or other services associated with implementations that we have determined are essential to the functionality of the software as defined in SOP 97-2, *Software Revenue Recognition*. Under these circumstances, our services are essential to provide the required functionality, and we therefore recognize revenue in accordance with SOP 81-1 using either the percentage-of-completion method or the completed contract method. Revenue from development services projects increased \$2.3 million, or 45%, during the three months ended September 30, 2004 over the comparable period in 2003. Revenue from development services projects increased \$3.3 million, or 16%, during the nine months ended September 30, 2004 over the comparable period in 2003. Based on our historical trends, we expect development services to continue to fluctuate on a

Table of Contents

quarterly basis due to the timing of revenue recognition on these projects. In any period, development services revenue is dependent upon a variety of factors, including:

the volume of development services transactions booked during the current and preceding periods;

the number and availability of our internal developers actively engaged on billable projects;

the timing of milestone acceptance for engagements contractually requiring customer sign-off; and

the timing of cash payments when collectibility is uncertain.

Contract. Contract revenue consists of fees generated from certain license, services and maintenance revenue from those transactions for which we determined to change the accounting from revenue recognition under SOP 97-2 to contract accounting under SOP 81-1 in connection with the 2003 restatement of our consolidated financial statements. Contract revenues are recognized when the related underlying obligations are satisfied and typically are not associated with current quarter business and cash collections. Contract revenues decreased \$1.9 million, or 6%, for the three months ended September 30, 2004 compared to the same period in 2003 and decreased \$45.5 million, or 40%, for the nine months ended September 30, 2004 compared to the same period in 2003. As of September 30, 2004, the deferred contract revenue balance was \$56.8 million. We expect contract revenues to continue to fluctuate significantly on a quarterly basis due to the timing of contract negotiations and other revenue recognition events.

Services. Services revenue consists of fees generated by providing services to customers, including consulting and training. Services revenue decreased \$2.1 million, or 7%, during the three months ended September 30, 2004 compared to the same period in 2003 and decreased \$23.0 million, or 23%, during the nine months ended September 30, 2004 compared to the same period in 2003. The decrease in services revenue during the 2004 periods was primarily due to the lower volume of license sales, which led to fewer implementations, and competitive rate pressures on consulting engagements. Additionally, as we focus on new technologies that may involve providing services to customize or enhance the software requested by our customers, fees received in conjunction with providing those services are classified as development services revenue as described above.

During the three and nine months ended September 30, 2004, we continued to see downward trends in consulting rates due in part to pressure from offshore competition and the reduced information technology spending of our customers. Additionally, the increased use of our consultants in India has caused our global blended consulting rates to continue to decrease during 2004. There can be no assurance that the rates we charge for consulting and implementation services will improve, or even remain at current levels. The market for information technology consulting services is challenging and we are affected by these market conditions. Accordingly, we expect services revenue to continue to decline unless and until we experience a sustained increase in our software product licenses. We also expect that services revenue will continue to fluctuate on a quarter-to-quarter basis, as revenue from the implementation of software is not generally recognized in the same period as the related license revenue. In any period, services revenue is dependent on a variety of factors, including:

the volume of license transactions closed during the current and preceding periods;

our customers on previous software versions upgrading to a more recent version;

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

customer decisions regarding implementations of licensed software, including utilization of internal resources or third-party systems integration firms;

the number and availability of our internal service providers and consultants actively engaged on billable projects;

the timing of milestone acceptance for engagements contractually requiring customer sign-off; and

the timing of cash payments when collectibility is uncertain.

Table of Contents

Reimbursable Expenses. The decrease in reimbursable expenses during the three and nine months ended September 30, 2004 as compared to the comparable periods in 2003 is consistent with the decrease in our services revenue in the three and nine months ended September 30, 2004 as compared to the comparable periods in 2003. Reimbursable expenses will generally fluctuate in direct relation to our services revenue.

Maintenance. Maintenance revenue consists of fees generated by providing software maintenance, upgrades and support to customers, such as telephone support and new releases of software and updated user documentation. Maintenance revenue decreased \$7.4 million and \$15.5 million, or 21% and 15%, for the three and nine months ended September 30, 2004, respectively, compared to the same periods in 2003. The decrease in maintenance revenue during the 2004 periods resulted from a continued decline in both the number and dollar amount of maintenance renewals mainly due to cost cutting efforts by our customers, less favorable renewal terms and lower volumes and dollar amounts of software license bookings. In addition, three large recurring revenue transactions closed during the second quarter of 2004 with customers that had previously utilized our software through perpetual license agreements and annual maintenance contracts. The license and maintenance fees recognized from these transactions is accounted for as license subscription revenue which is reported in our condensed consolidated statement of operations as software license revenue. The associated decrease in maintenance revenue for the three months ended September 30, 2004 and for future quarters during the terms of these transactions is approximately \$1.0 million. There can be no assurance that the number of maintenance renewals will improve, or even remain at current levels. We expect maintenance revenue to continue to decline unless and until we experience a sustained increase in our software license bookings.

International Revenue. Our international revenues, included in the categories discussed above, are primarily generated from customers located in Europe, Asia and Canada. International revenue totalled \$40.2 million, or 36% of total revenue, and \$108.6 million, or 36% of total revenue, during the three and nine month periods ended September 30, 2004, respectively, compared to \$44.7 million, or 38%, and \$151.9 million, or 38%, during the comparable three and nine month periods in 2003. The decrease in international revenue during the 2004 periods, were the result of deal execution challenges, reduction in sales and marketing capacity, increased competition and related pricing pressures. Our recent financial performance, negative cash flow, the 2003 restatement of our consolidated financial statements, the related SEC investigation and securities class action lawsuits and the de-listing of our common stock from The NASDAQ National Market have also caused our international customers and prospects to voice concerns about our continued financial viability, which has continued to contribute to our revenue decline. Despite our efforts to generate demand and develop growth, our success has been limited and there can be no assurance that our business will stabilize or that we will be able to develop revenue growth.

During the three months ended September 30, 2004, one individual customer accounted for 17% of total revenues. During the three and nine month periods ended September 30, 2003, one customer accounted for 13% of total revenues. No other customer accounted for more than 10% of total revenues during the three and nine months ended September 30, 2004 and 2003.

Table of Contents**Costs of Revenues**

The following table sets forth cost of revenues and the gross margins of selected items reflected in our condensed consolidated statements of operations and comprehensive income (loss). The period-to-period comparisons of financial results are not necessarily indicative of future results.

	Three Months Ended September 30, 2004	Gross Margin	Three Months Ended September 30, 2003	Gross Margin	Nine Months Ended September 30, 2004	Gross Margin	Nine Months Ended September 30, 2003	Gross Margin
(dollars in thousands)								
Software Licenses	\$ 3,816	78%	\$ (693)	105%	\$ 7,189	83%	\$ 2,160	96%
Development services	3,353	55%	5,697	-10%	14,004	40%	11,406	43%
Contract	2,079	93%	4,078	87%	3,210	95%	17,232	85%
Amortization of acquired technology	90		145		369		435	
Reimbursable expenses	2,458		2,900		8,206		10,670	
Service and maintenance	25,915	52%	31,982	50%	82,413	50%	103,424	49%
Total cost of revenue	\$ 37,711		\$ 44,109		\$ 115,391		\$ 145,327	

Cost of Software Licenses. Cost of software licenses consists of:

Commissions paid to non-customer third parties in connection with joint marketing and other related agreements. Such commissions are expensed when the associated revenue transactions are recognized;

Royalty fees associated with third-party software utilized with our technology. Such royalties are generally expensed when the products are shipped; however, royalties associated with fixed cost arrangements are generally expensed over the period of the arrangement;

Costs related to user documentation;

Costs related to reproduction and delivery of software;

Provisions to our reserve for estimated costs to service customer claims. We accrue for customer claims on a case-by-case basis.

Cost of software licenses increased \$4.5 million, or 650%, for the three months ended September 30, 2004 compared to the same period in 2003. The increase is mainly due to the \$1.8 million reversal of third party commission accruals in the third quarter of 2003 that were no longer payable, a royalty payment of approximately \$0.5 million related to one transaction in the third quarter of 2004, and a general increase in the fixed cost portion of our cost of license. Excluding the effect of the accrual reversal, software license margin decreased from 92% to 78%. Cost of software licenses increased \$5.0 million, or 233%, for the nine months ended September 30, 2004 compared to the same period in 2003. The

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

increase was mainly caused by \$1.0 million of net additional reversals of accruals for third party commissions and royalties in 2003 compared to 2004, royalty payments of approximately \$0.5 million related to one transaction during each of the second and third quarters of 2004, and a general increase in the fixed cost portion of our cost of license. The software license margin for the nine months ended September 30, 2004 decreased to 83% from 96% for the comparable period in 2003. Excluding the effects of any accrual reversals, we expect the gross margin on software license sales to remain relatively consistent over the near term.

Cost of Development Services. The cost of development services includes the salary and other related costs of the employees or third parties that provide our services to customize or enhance the software for the customer. Cost of development services decreased \$2.3 million, or 41%, for the three months ended September 30, 2004

Table of Contents

compared to the same period in 2003. Cost of development services increased \$2.6 million, or 23%, for the nine months ended September 30, 2004 compared to the same period in 2003. The gross margin on this business will vary as a result of the timing of revenue recognition, which in some arrangements is impacted by the attainment of contractual milestones. During the three months ended September 30, 2004 as compared to the same period in 2003, the gross margin on this business increased from a negative margin to 55%, which is primarily the result of the termination of a large development services project during the first quarter of 2004 that had a low gross margin.

Cost of Contract. Cost of contract includes costs associated with those transactions for which we determined to change the accounting from revenue recognition under SOP 97-2 to contract accounting under SOP 81-1 in connection with the 2003 restatement of our consolidated financial statements. Cost of contract decreased \$2.0 million, or 49%, for the three months ended September 30, 2004 compared to the same period in 2003 and decreased \$14.0 million, or 81%, for the nine months ended September 30, 2004 compared to the same period in 2003. As of September 30, 2004, we had \$3.8 million remaining in deferred contract costs. The timing of recognizing the remaining contract costs is uncertain, and is dependent upon the timing of recognition of the related deferred contract revenues. Consistent with contract revenue, these costs typically are not associated with current quarter business or cash payments.

Cost of Services and Maintenance. Cost of services and maintenance includes costs associated with providing services to customers, including implementation and training, in addition to the cost of providing software maintenance to customers such as telephone support, upgrades and updated user documentation. The total cost of services and maintenance decreased \$6.1 million, or 19%, and \$21.0 million, or 20%, for the three and nine months ended September 30, 2004 compared to the same periods in 2003. Service and maintenance headcount decreased 14% during the 2004 periods, which contributed to a significant decrease in compensation-related expenses incurred by the services and maintenance organization. In addition, our increased utilization of India-based personnel to provide services and maintenance has also caused a decrease in this expense.

Reimbursable Expenses. The decrease in reimbursable expenses during the three and nine months ended September 30, 2004 as compared to the comparable periods in 2003 is consistent with the decrease in our services revenue in the corresponding periods. Reimbursable expenses will generally fluctuate in direct relation to our services revenue.

Amortization of Acquired Technology. In connection with our acquisitions in 2001 and 2000, we acquired developed technology that we offer as a part of our solutions. In accordance with applicable accounting standards, the amortization of acquired technology is included as a part of our cost of revenues because it relates to software products that are marketed to potential customers. Amortization of acquired technology decreased by approximately \$55,000 and \$65,000 for the three and nine months ended September 30, 2004 as compared to the comparable periods in 2003. Our acquired technology is fully amortized as of September 30, 2004.

Table of Contents**Operating Expenses**

The following table sets forth operating expenses and the percentage of total revenue for these operating expenses in our condensed consolidated statements of operations and comprehensive income (loss). The period-to-period comparisons of financial results are not necessarily indicative of future results.

	Three Months Ended September 30, 2004	Percentage of total Revenue	Three Months Ended September 30, 2003	Percentage of total Revenue	Nine Months Ended September 30, 2004	Percentage of total Revenue	Nine Months Ended September 30, 2003	Percentage of total Revenue
(dollars in thousands)								
Sales & marketing	\$ 19,326	17%	\$ 20,915	18%	\$ 60,838	20%	\$ 68,042	17%
Research & development	16,612	15%	20,318	17%	55,418	18%	62,676	16%
General & administrative	17,253	16%	12,708	11%	55,467	18%	50,703	13%
Amortization of intangible assets			39	0%	39	0%	501	0%
Total operating expenses	\$ 53,191	48%	\$ 53,980	46%	\$ 171,762	56%	\$ 181,922	46%

Sales and Marketing Expense. Sales and marketing expense consists primarily of personnel costs, commissions, office facilities, travel, and promotional events such as trade shows, seminars, technical conferences, advertising and public relations programs.

Sales and marketing expense decreased \$1.6 million and \$7.2 million, or 8% and 11%, for the three and nine months ended September 30, 2004 compared to the same periods in 2003. The decrease was primarily due to a 6% decrease in the average number of sales and marketing personnel between September 30, 2003 and September 30, 2004.

Research and Development Expense. Research and development expense consists of costs related to development of new software products and enhancements to existing software and also includes the continued development of our content databases. Software development costs are expensed as incurred until technological feasibility has been established, at which time such costs are capitalized until the product is available for general release to customers. To date, the establishment of technological feasibility of our products and general release of such software has substantially coincided. As a result, software development costs qualifying for capitalization have been insignificant; therefore, we have not capitalized any software development costs other than those recorded in connection with our acquisitions.

Research and development expenses decreased \$3.7 million and \$7.3 million, or 18% and 12%, for the three and nine months ended September 30, 2004 compared to the same periods in 2003. The decrease was caused by a 20% decrease in the number of our research and development personnel between September 30, 2003 and September 30, 2004 and the continuation of our initiative to have the majority of our development personnel located in India. As of September 30, 2004, approximately 59% of our research and development employees were located in India.

General and Administrative Expense. General and administrative expense includes the personnel and other costs of our finance, legal, accounting, human resources, information systems and executive departments. General and administrative expense increased \$4.5 million, or

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

36%, for the three months ended September 30, 2004 compared to the same period in 2003. The increase is primarily due to the increase in accounting and other professional fees incurred in connection with our Sarbanes-Oxley compliance project, and legal fees associated with the on-going governmental investigations. General and administrative expense increased \$4.8 million, or 9%, for the nine months ended September 30, 2004 compared to the same period in 2003. In addition to the

Table of Contents

factors described above associated with the third quarter, the nine month period ended September 30, 2004 also included the \$10.0 million accrual recorded in the first quarter of 2004 related to the settlement of the SEC enforcement proceedings against the company. This increase is offset by a decrease in legal and auditing expenses of approximately \$11.0 million for the first six months of 2004 compared to the same period of 2003 associated with our restatement.

Over the near term and perhaps for much longer, and regardless of the outcome, we expect to incur significant fees and expenses relating to the on-going governmental investigations, the private securities action and the other litigation we face.

Amortization of Intangibles and Impairment of Intangibles. From time to time, we have sought to supplement our product offerings through technology or business acquisitions. When an acquisition of a business is accounted for using the purchase method, the amount of the purchase price is allocated to the fair value of assets acquired, net of liabilities assumed. Any excess purchase price is allocated to goodwill. Intangible assets are amortized over their estimated useful lives, while goodwill is only written down when it is deemed to be impaired.

In accordance with Statement of Financial Accounting Standards (SFAS) No. 142, *Goodwill and Other Intangible Assets*, we test goodwill for impairment semi-annually, at the end of our second and fourth quarter. An impairment is deemed to exist if the net book value of a reporting unit exceeds its estimated fair value. In the second quarter of 2004, we performed a semi-annual review for impairment of goodwill related to the IBM, Trade Service Corporation, and RightWorks acquisitions. We concluded that there was no evidence of impairment related to the goodwill of approximately \$2.3 million recorded for IBM, \$7.7 million recorded for Trade Service Corporation and \$6.6 million recorded for the RightWorks acquisitions.

Restructuring Charges

SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146), requires that a liability for a cost associated with an exit or disposal activity be recognized and measured initially at fair value only when the liability is incurred. The statement applies to costs associated with an exit activity that does not involve an entity newly acquired in a business combination. An exit activity includes but is not limited to a restructuring, which is defined as a program that is planned and controlled by management, and materially changes either (a) the scope of a business undertaken by an enterprise, or (b) the manner in which the business is conducted.

2004 Restructuring Plan. In response to our recent operating losses, in March 2004, we initiated a global workforce reduction plan to further reduce our operating expenses and bring them in line with our current revenue levels. During March 2004, 11 employees were involuntarily terminated. In the second quarter of 2004, 152 employees were involuntarily terminated. These activities are being accounted for in accordance with SFAS 146. During the first quarter of 2004, we recorded restructuring charges totalling approximately \$0.6 million related to the severance payments to be paid to the 11 employees involuntarily terminated during the first quarter. During the second quarter of 2004, severance costs of approximately \$4.4 million were recorded related to the severance payments to be paid to the 152 employees involuntarily terminated.

As of September 30, 2004, an accrual of approximately \$0.6 million for employee severance and termination payments and \$5.5 million related to office closure and consolidation payments to be made in subsequent periods remains in accrued liabilities

Additional details of the restructuring charge and remaining accruals are presented in Note 4 *Restructuring Charges and Adjustments* in the accompanying notes to condensed consolidated financial statements.

Table of Contents**Non-operating Expense, Net**

Non-operating expense, net, was as follows:

	Three Months Ended September 30, 2004	Three Months Ended September 30, 2003	Nine Months Ended September 30, 2004	Nine Months Ended September 30, 2003
(in thousands)				
Interest income	\$ (1,180)	\$ (920)	\$ (2,840)	\$ (4,054)
Interest expense	4,479	4,716	13,867	15,956
Foreign currency hedge and transaction losses, net	225	(176)	1,478	418
Gain on early retirement of debt, net	(2,223)			
Other expense (income), net	487	506	(1,248)	(1,669)
Total non-operating expense, net	\$ 1,788	\$ 4,126	\$ 11,257	\$ 10,651

The \$0.3 million, or 28%, increase in interest income for the three month period ended September 30, 2004 compared to the same period in 2003 resulted from the increase in interest rates and amounts of short-term investments held during the period. The decline in interest income over the comparable nine month periods is primarily the result of the lower average balances of invested funds and lower market interest rates. Total non-operating expense, net, for the three and nine months ended September 30, 2004 included a net gain of \$2.2 million from the early retirement of \$40.0 million of our convertible subordinated notes due December 15, 2006. The gain was due to a 6.5% purchase discount. Additionally, the early retirement of the debt has reduced interest expense by approximately \$0.2 million for the three and nine months ended September 30, 2004 as compared to the same periods in 2003.

The market interest rates on investments and the relative exchange values of foreign currencies are influenced by the monetary and fiscal policies of the governments in the countries in which we operate. The nature, timing and extent of any impact on our financial statements resulting from changes in those governments' policies are not predictable. Risks associated with market interest rates and foreign exchange rates are discussed below under the section captioned "Sensitivity to Market Risks."

Provision (Benefit) for Income Taxes

We recognized income tax expense, primarily foreign taxes, of \$1.2 million and \$2.8 million during the three months ended September 30, 2004 and 2003, respectively; and \$3.3 million and \$4.3 million during the nine months ended September 30, 2004 and 2003, respectively, representing effective income tax rates of 6.2% for the three months ended September 30, 2004 and 28% for the same period in 2003. The decrease in the effective rate resulted primarily from our utilization of net operating loss carryforwards.

Table of Contents**Contractual Obligations**

The following table summarizes our significant contractual obligations at September 30, 2004, and the effect such obligations are expected to have on our liquidity and cash flows in future periods. With the exception of restructuring related accruals, this table excludes amounts already recorded on our balance sheet as current liabilities at September 30, 2004.

	<u>Total</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>Thereafter</u>
	(in thousands)						
Operating lease obligations (excluding restructured facilities)	\$ 49,087	\$ 4,778	\$ 16,296	\$ 9,777	\$ 6,205	\$ 5,552	\$ 6,479
Operating leases for restructured facilities	9,265	1,969	3,413	1,759	692	286	1,146
Estimated sublease income related to restructured facilities	(4,607)	(571)	(1,320)	(720)	(564)	(286)	(1,146)
Long-term debt obligations ¹	354,228	4,160	16,634	333,434			
Other purchase obligations ²	16,796	2,259	6,612	3,800	3,800	325	
Total	\$ 424,769	\$ 12,595	\$ 41,635	\$ 348,050	\$ 10,133	\$ 5,877	\$ 6,479

¹ Included in long-term debt obligations are semi-annual interest payments through December 15, 2006.

² Other purchase obligations include payments due under various types of licenses and maintenance obligations and purchase commitments.

The expected timing of payment of the obligations discussed above is estimated based on current information. Timing of payments and actual amounts paid may be different depending on the time of receipt of goods or services or changes to agreed-upon amounts for some obligations.

Off-Balance-Sheet Arrangements

As of September 30, 2004, we did not have any significant off-balance-sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Liquidity and Capital Resources

Historically, we have financed our operations and met our capital expenditure requirements primarily through cash flows provided from operations, long-term borrowings and sales of equity securities. Our working capital was \$85.0 million at September 30, 2004 compared to working capital of \$10.1 million at December 31, 2003, an increase of \$74.9 million or 742%. The increase in working capital was primarily the result of a net decrease of \$58.4 million in accrued liabilities due to the settlement of the class action litigation and derivative litigation and SEC enforcement proceedings against the company and a \$59.1 million decrease in deferred revenue offset by a decrease in cash and cash equivalents of \$42.8 million.

Cash and cash equivalents were \$246.0 million at September 30, 2004, a decrease of \$42.8 million from December 31, 2003. The decrease was the result of \$99.4 million in cash used in operating activities, and \$22.7 million of cash used in investing activities, which were partially offset by \$80.1 million in cash provided by the financing activities. The main sources of cash from the financing activities were the sale of 100,000 shares of 2.5% Series B convertible preferred stock for \$100.0 million in the aggregate and the sale of \$20.0 million in common stock to our Chairman and Chief Executive Officer (*See Note 8 - Stock Transactions* in the accompanying condensed consolidated financial statements), partially offset by the use of \$37.4 million to retire \$40.0 million in aggregate principal amount of our convertible subordinated notes due December 15, 2006 (*See Note 3- Borrowings and Debt Issuance Costs* in the accompanying condensed consolidated financial statements).

Table of Contents

At September 30, 2004, restricted cash totalled \$8.8 million, of which \$7.1 million was pledged as collateral for outstanding letters of credit, \$0.7 million was pledged as bank guarantees and \$1.0 million was pledged as collateral for outstanding foreign currency exchange contracts. At December 31, 2003, restricted cash totalled \$15.5 million, of which \$12.6 million was pledged as collateral for outstanding letters of credit, \$2.2 million was pledged as bank guarantees and \$0.7 million was pledged as collateral for outstanding foreign currency exchange contracts.

In addition to our cash and cash equivalents, we typically maintain a portfolio of investment securities to supplement our liquidity needs. At September 30, 2004, we had \$14.6 million of short-term investments and \$12.0 million of long-term investments. At December 31, 2003, short-term investments totalled \$5.0 million and we had no long-term investments. Short-term investments consist primarily of highly rated corporate debt securities and obligations of municipalities and agencies of the U.S. government that have remaining maturities of less than one year. Long-term investments include similar debt security investments with remaining maturities in excess of one year but not more than two years, as well as common stock and warrants of public companies. Investments in common stock and warrants of public companies were not significant at September 30, 2004 or December 31, 2003.

On a combined basis, cash and cash equivalents, restricted cash and short and long-term investments totalled \$281.4 million at September 30, 2004 compared to \$309.4 million at December 31, 2003.

The most significant adjustments to reconcile net loss to net cash from operations during the nine months ended September 30, 2004 were the net decrease in accrued liabilities of \$59.2 million, and the decrease in deferred revenue of \$58.9 million. The decrease in accrued liabilities is mainly due to the \$42.0 million payment related to the recent settlement of the class action and derivative litigation against the company and the \$10.0 million payment to settle the SEC enforcement proceedings against the company, both of which were paid in the second quarter of 2004. The decrease in deferred revenue is mainly due to the recognition of \$67.0 million of contract revenue, partially offset by increases in other deferred revenues.

The most significant use of net cash used in investing activities during the nine months ended September 30, 2004 was the \$56.7 million used for the purchase of short and long-term investments, which was partially offset by the \$35.0 million of proceeds received from the sale of short-term investments.

The most significant sources of net cash provided by financing activities during the nine months ended September 30, 2004 were the \$95.3 million of proceeds from the sale of Series B preferred stock (net of issuance costs of \$4.7 million) and the \$19.7 million of proceeds from the sale of common stock (net of issuance costs of \$0.3 million), which were partially offset by the use of \$37.4 million for the retirement of \$40.0 million in aggregate principal amount of our convertible subordinated notes due December 15, 2006.

Accounts receivable, net of allowance for doubtful accounts, increased 19% during the three months ended September 30, 2004. Days sales outstanding (DSO) in receivables increased to 33 days as of September 30, 2004 from 27 days as of June 30, 2004, which is mainly attributable to a delay in collection of a major account, which has been collected in the fourth quarter of 2004. We anticipate DSO to return to our historic trends in the 2005 fiscal year.

On August 18, 2004, we retired \$40.0 million in aggregate principal amount of our convertible subordinated notes due December 15, 2006. We recognized a net \$2.2 million gain for the early retirement of this debt. This gain is reported in the total non-operating expense, net line item in the condensed consolidated statement of operations and comprehensive income (loss).

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

The remaining \$310.0 million of outstanding convertible subordinated notes are due to mature on December 15, 2006 and bear interest at a rate of 5.25% per annum, which is payable semi-annually. The notes are convertible at the option of the holder into shares of our common stock at a conversion price of \$38.00 per

Table of Contents

share at any time prior to maturity. Since December 20, 2002, we have had the option to redeem, in cash, all or a portion of the notes that have not been previously converted. We may also, from time to time, seek to retire the notes through cash repurchases and/or exchanges for equity securities, in open market purchases, privately negotiated transactions or otherwise. Such repurchases or exchanges, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. The amounts involved may be material.

We maintain a \$15.0 million letter of credit line and as of September 30, 2004, \$5.5 million in letters of credit were outstanding under this line and \$7.1 million in restricted cash was pledged as collateral. As of September 30, 2004, we also had an additional \$0.7 million in restricted cash pledged as collateral for bank guarantees and \$1.0 million pledged as collateral for outstanding foreign currency exchange contracts.

We have experienced substantial negative cash flows during the three years ended December 31, 2003 and the nine months ended September 30, 2004, primarily due to sharp declines in our revenues and our inability to reduce our expenses to a level at or below the level of our revenues. Our continued inability to stabilize or grow revenues, control expenses and achieve positive cash flows could impair our ability to support our operations, adversely affect our liquidity and, eventually, threaten our solvency and ability to repay our debts when they come due.

On June 3, 2004, we sold 100,000 shares of 2.5% Series B Convertible Preferred Stock of i2 Technologies, Inc. to R² Investments, LDC, an affiliate of Q Investments, pursuant to a Preferred Stock Purchase Agreement, dated April 27, 2004. The purchase price for the Series B preferred stock was \$1,000 per Series B share, or \$100.0 million in the aggregate. Pursuant to the terms of the Preferred Stock Purchase Agreement, R² Investments, LDC has certain preemptive rights upon the issuance of certain of our securities during the three year period ending June 3, 2007. Dividends on the Series B preferred stock, which may be paid in cash or in additional shares of Series B preferred stock, will be payable semi-annually at the rate of 2.5% per year. The Series B preferred stock will automatically convert into shares of our common stock on June 3, 2014 and will be convertible into shares of common stock at the option of the holder at any time prior thereto. The conversion price, which is initially \$.926 per share, is subject to certain adjustments, including but not limited to adjustments for certain issuances of our equity securities at a price per share that is less than the conversion price then in effect during the two year period ending June 3, 2006. Under certain circumstances, we will also have the right to redeem the Series B preferred stock. Upon a change of control of the company, unless otherwise agreed to by holders of a majority of the outstanding Series B shares, the company will be required to redeem the outstanding shares of Series B preferred stock for cash at 110% of face value plus all accrued but unpaid dividends. The Series B preferred stock is recorded net of \$4.7 million of issuance costs, consisting of legal and investment banking fees incurred to complete the transaction. These costs are being accreted over a ten-year period through the date of automatic conversion. For the three months ended September 30, 2004, we recorded issuance cost accretion of approximately \$0.1 million and we accrued \$0.6 million related to our Series B preferred stock dividend that will be settled semi-annually beginning in December 2004.

On May 26, 2004, a \$19.7 million (net of issuance costs of \$0.3 million) common stock investment in the company by Sanjiv Sidhu, our Chairman, Chief Executive Officer and President, closed and was funded at a price of \$.926 per share.

Although we expect that existing cash, cash equivalents and short-term investment balances will satisfy our working capital and capital expenditure requirements for at least the next 12 months, there can be no assurance that in the longer term we will be successful in maintaining an adequate level of cash resources, and we may be forced to act more aggressively in the future in the area of expense reduction in order to conserve cash as we look for alternative liquidity solutions.

Table of Contents**Sensitivity to Market Risks**

Foreign Currency Risk. Revenues originating outside of the United States accounted for 36% of total revenues during the three and nine months ended September 30, 2004 and 38% for the three and nine months ended September 30, 2003. Since we conduct business on a global basis in various foreign currencies, we are exposed to adverse movements in foreign currency exchange rates. In January 2001, we established a foreign currency hedging program utilizing foreign currency forward exchange contracts to hedge various nonfunctional currency exposures. The objective of this program is to reduce the effect of changes in foreign currency exchange rates on our results of operations. Furthermore, our goal is to offset foreign currency transaction gains and losses recorded for accounting purposes with gains and losses realized on the forward contracts. Our hedging activities cannot completely protect us from the risk of foreign currency losses as our currency exposures are constantly changing and not all of these exposures are hedged.

Interest Rate Risk. Our investments are subject to interest rate risk. Interest rate risk is the risk that our financial condition and results of operations could be adversely affected due to movements in interest rates. We invest our cash in a variety of interest-earning financial instruments, including bank time deposits, money market funds and taxable and tax-exempt variable-rate and fixed-rate obligations of corporations, municipalities and local, state and national governmental entities and agencies. These investments are primarily denominated in U.S. Dollars. Cash balances in foreign currencies overseas are primarily operating balances and are generally invested in short-term time deposits of the local operating bank.

Due to the demand nature of our money market funds and the short-term nature of our time deposits and debt securities portfolio, these assets are particularly sensitive to changes in interest rates. As of September 30, 2004, 85% of our debt securities and time deposits had remaining maturities of three months or less, while \$14.6 million, which includes an unrealized loss of approximately \$60,000, or 8%, of our short-term investments had remaining maturities between three months and one year. The Federal Reserve Board influences the general direction of market interest rates. The Federal Reserve Board increased the discount rate by 75 basis points between December 31, 2003 and September 30, 2004. As of September 30, 2004, the weighted-average yield on time deposits and debt securities we held was 1.83% compared to 1.12% for debt securities held as of December 31, 2003. During the third quarter, we purchased no additional long-term securities. The long term investments fair value is \$11.9 million, which includes an unrealized loss of approximately \$49,000 as of September 30, 2004.

Credit Risk. Financial assets that potentially subject us to a concentration of credit risk consist principally of investments and accounts receivable. Cash on deposit is held with financial institutions with high credit standings. Debt security investments are generally in highly-rated corporations and municipalities as well as agencies of the U.S. government; however, a significant portion of these investments are in corporate debt securities, which carry a higher level of risk compared to municipal and U.S. government-backed securities. Our customer base consists of large numbers of geographically diverse enterprises dispersed across many industries. As a result, concentration of credit risk with respect to accounts receivable is not significant. However, we periodically perform credit evaluations for most of our customers and maintain reserves for potential losses. In certain situations we may seek letters of credit to be issued on behalf of some customers to mitigate our exposure to credit risk. We currently use foreign exchange contracts to hedge the risk associated with receivables denominated in foreign currencies. Risk of non-performance by counterparties to such contracts is minimal due to the size and credit standings of the financial institutions involved.

Market Price Risk. We maintain minority equity investments in various publicly traded companies for business and strategic purposes. We have realized no gain or loss on these investments during the three and nine months ended September 30, 2004 and 2003. The remaining carrying value of minority equity investments was zero at September 30, 2004.

We have also invested in several privately held companies, many of which can still be considered in the start-up or development stages or may no longer be viable or operational. As a result of significant declines in the

Table of Contents

expected realizable amounts of these investments, in previous periods, we wrote off the book value of all these investments as the decline in fair value was considered other than temporary.

Inflation. Inflation has not had a material impact on our results of operations or financial condition.

Factors That May Affect Future Results

Any investment in our company will be subject to risks inherent to our business. Before making an investment decision, you should carefully consider the risks described below together with all of the other information included in this report. The risks and uncertainties described below are not the only ones facing our company. Additional risks and uncertainties that we are not aware of or focused on or that we currently deem immaterial may also impair our business operations. This report is qualified in its entirety by these risk factors.

If any of the following risks actually occur, they could materially adversely affect our business, financial condition, liquidity or results of operations. In that case, the trading price of our securities could decline and you may lose all or part of your investment.

Risks Related To Our Business

We Have Experienced Substantial Negative Cash Flows And May Continue to Experience Such Negative Cash Flows, Which Would Have A Further Significant Adverse Effect On Our Business And Could Threaten Our Solvency.

We have experienced substantial negative cash flows during the three years ended December 31, 2003 and the nine months ended September 30, 2004, primarily due to sharp declines in our revenues and our inability to reduce our expenses to a level at or below the level of our revenues. The inability to stabilize or grow revenues, control expenses and achieve positive cash flows could impair our ability to support our operations, adversely affect our liquidity, and, eventually, threaten our solvency and our ability to repay our debts when they come due, which would have a material adverse effect on our business, results of operations and financial condition as well as our stock price. Additionally, we continue to be obligated to pay approximately \$16.6 million annually in interest on our \$310.0 million of convertible subordinated notes and \$6.8 million non-negotiable promissory note, all maturing in December 2006. While the company has recently made efforts to strengthen its financial position by obtaining \$120.0 million of equity financing in the second quarter of 2004 and retiring \$40.0 million of indebtedness in the third quarter of 2004, continuing negative cash flows and the adverse market perception associated therewith may continue to negatively affect our ability to sell our products and may adversely affect our ability to obtain additional debt or equity financing on advantageous terms. There can be no assurance that we will be successful in maintaining an adequate level of cash resources and we may be forced to act more aggressively in the future in the area of expense reduction in order to conserve cash resources.

We May Not Benefit From Increased Demand In The Market For Information Technology And The Improving Macroeconomic Environment If We Are Unable To Maintain Or Grow Our Market Share, Which Would Negatively Impact Our Operating Revenues And The Price Of Our Stock.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

The macroeconomic environment appears to be improving and capital spending on information technology appears to have increased; however, our operating revenues have not correspondingly increased. Although the operating results of our business are often influenced by the overall demand for computer software and services, particularly in the areas in which we compete, if we continue to fail to capitalize on improvements in demand for computer software and services our revenues will decrease in comparison to current levels and our stock price may suffer. Further, the recovery in the macroeconomic environment is still in its early stages and the geopolitical situation has remained unstable, resulting in continued uncertainty. In the event that the rate of growth in the global economy slows or reverses or the geopolitical situation deteriorates, customers may again defer or reconsider purchasing products, potentially resulting in a continued reduction in our software license revenues and corresponding revenues from consulting and maintenance.

Table of Contents

We Face Risks Related To Ongoing Governmental Investigations And Litigation That Could Have A Material Adverse Effect On Our Relationships With Customers And Our Business, Financial Condition And Results Of Operations And We May Face Additional Litigation In The Future That Could Also Harm Our Business.

The SEC issued a formal order of investigation to determine whether there had been violations of the federal securities laws by us and/or others involved with us in connection with matters relating to the 2003 restatement of our consolidated financial statements. The settlement of the SEC enforcement proceedings, announced on June 9, 2004 and described in *Note 7 Commitments and Contingencies* in the accompanying notes to condensed consolidated financial statements, covers the company only. The SEC's investigation continues as to other individuals and entities, and we have learned that the U.S. Attorney's Office for the Northern District of Texas has been conducting interviews of certain current and former officers and employees of the company in connection with the matters that are the subject of the SEC's ongoing investigation.

We currently face a lawsuit recently brought against us by Kmart, obligations relating to a private securities action filed as a result of our 2003 restatement of our consolidated financial statements that is not covered by the recent settlement of the class action and derivative lawsuits, a potential assessment by the Internal Revenue Service relating to the timing of the company's remittance of withholding taxes associated with the exercise of stock options by employees in the 2000 tax year and potential litigation in relation to the termination of the license and development agreement between Shell Global Solutions International B.V. and i2 Technologies (Netherlands) B.V. We may face additional litigation in the future that could harm our business and impair our liquidity.

We are generally obligated, to the extent permitted by law, to indemnify our current and former directors and officers who are named as defendants in some of these lawsuits. Defending against existing and potential litigation and other proceedings may continue to require significant attention and resources of our management. We cannot assure you that the significant time and effort spent will not adversely affect our business, financial condition and results of operations.

We May Not Be Competitive, And Increased Competition Could Seriously Harm Our Business.

Relative to us, many of our competitors have one or more of the following advantages:

Longer operating history.

Greater financial, technical, marketing, sales and other resources.

Positive cash flow.

More profitable operations.

Superior product functionality in certain areas.

Greater name recognition.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

A broader range of products to offer.

Better software performance.

A larger installed base of customers.

Current and potential competitors have established, or may establish, cooperative relationships among themselves or with third parties to enhance their products, which may result in increased competition. In addition, we expect to experience increasing price competition as we compete for market share. We understand that some competitors may even be offering enterprise application software at no charge as components of product bundles. Further, traditional enterprise resource planning vendors such as SAP have focused more resources on the development and marketing of enterprise application software, particularly in the product and industry segments in which we compete. As a result of these and other factors, we may be unable to compete successfully with our existing or new competitors.

Table of Contents

The Loss Of Certain Of Our Key Personnel And Any Future Potential Losses Of Key Personnel Or Our Failure To Attract Additional Personnel, Such As A Suitable Chief Executive Officer Candidate, Could Seriously Harm Our Company.

We rely upon the continued service of a relatively small number of key technical, sales and senior management personnel. We have lost a number of key personnel as a result of our performance and our restructurings, among other reasons, and we believe our voluntary attrition rate is generally higher than the software industry's average. Our workforce reductions have impacted employees directly responsible for sales, which may affect our ability to close revenue transactions with our customers and prospects. Our future success depends on retaining our key employees and our ability to retain, attract and train other highly qualified technical, sales and managerial personnel, which may be increasingly difficult given our recent financial performance and employee layoffs. In July 2004, we announced that we were seeking a Chief Executive Officer candidate to replace Sanjiv Sidhu, our current CEO. We may not be successful in securing a suitable candidate for this position. Further, additional restructuring activity may be required in the future that may result in further voluntary and involuntary attrition and loss of key personnel. Our employees can typically resign with little or no prior notice. Our loss of any more of our key technical, sales and senior management personnel, and the intellectual capital that they possess, or our inability to retain, attract and train additional qualified personnel, such as a suitable CEO candidate, could have a material adverse effect on our business, results of operations and financial condition.

We May Seek Additional Public Debt or Equity Financing, And Any Future Financing May Only Be Available On Disadvantageous Terms And Could Have A Dilutive Effect On The Holdings Of Existing Stockholders, Or May Not Be Available At All.

In the future, we may seek additional private or public debt or equity financing, which could have a dilutive effect on our stockholders. Any future financings may not be available on advantageous terms, or may not be available at all.

We Have Been And Continue To Be Subject To Claims Pertaining To The Quality Of Our Products And Services, And Questions Regarding Our Financial Viability, Which Claims And Perceptions, If Unresolved Or Not Addressed, Could Seriously Harm Our Business And Our Stock Price.

From time to time, customers make claims pertaining to the quality and performance of our software and services, citing a variety of issues. Our recent operating performance, the decline in our stock price and the existing and potential litigation and other proceedings against us have led to questions in the market regarding our financial viability. Whether customer claims regarding the quality and performance of our products and services or concerns about our financial viability are founded or unfounded, if such claims and perceptions are not resolved in a manner favorable to us they may affect the market perception of our company, our products and our services. Any such damage to our reputation could have a material adverse effect on our business, results of operations and financial condition, and could negatively affect the price of our stock.

If We Are Unable To Develop Acceptable Products And Generate Demand For Such Products, Additional Serious Harm Could Result To Our Business.

We have invested significant resources in developing and marketing our products and services. The demand for, and market acceptance of, our products and services are subject to a high level of uncertainty. Adoption of software solutions, particularly by those individuals and enterprises that have historically relied upon traditional means of commerce and communication, requires a broad acceptance of substantially different methods of conducting business and exchanging information. Our products and services are often considered complex and may involve a new approach to the conduct of business by our customers. As a result, intensive marketing and sales efforts may be necessary to educate prospective customers regarding the uses and benefits of these products and services in order to generate demand. The market for our products and services may continue to weaken,

Table of Contents

competitors may develop superior products and services or we may fail to develop acceptable solutions to address new market conditions. Any one of these events could have a material adverse effect on our business, results of operations and financial condition. In addition, questions regarding our viability, our de-listing from The NASDAQ National Market and the existing and potential litigation and other proceedings against us may continue to adversely impact customer demand.

Our Financial Results Have Varied And May Continue To Vary Significantly From Quarter To Quarter And We May Again Fail To Meet Expectations, Which Might Negatively Impact The Price Of Our Stock.

Our operating results have varied significantly from quarter to quarter in the past, and we expect our operating results to continue to vary from quarter to quarter in the future due to a variety of factors, many of which are outside of our control. Although our revenues are subject to fluctuation, significant portions of our expenses are not variable in the short term, such as our annual debt servicing expense of approximately \$16.6 million, and we cannot reduce them quickly to respond to decreases in revenues. Therefore, if revenues are below expectations, this shortfall is likely to adversely and disproportionately affect our operating results. These factors have caused our operating results to be below the expectations of securities analysts and investors in the past and may do so again in the future. Our failure to meet or exceed analyst and investor expectations might negatively affect the price of our common stock.

Because Our Software Products Are Intended To Work Within Complex Business Processes, Implementation Or Upgrades Of Our Products Can Be Difficult, Time-Consuming And Expensive, And Customers May Be Unable To Implement Or Upgrade Our Products Successfully Or Otherwise Achieve The Benefits Attributable To Our Products. This May Result In Customer Dissatisfaction, Harm To Our Reputation And Cause Non-Payment Issues.

Our products typically must integrate with the many existing computer systems and software programs of our customers. This can be complex, time-consuming and expensive, and may cause delays in the deployment of our products. As a result, some customers may have difficulty or be unable to implement our products successfully or otherwise achieve the benefits attributable to our products. Delayed or ineffective implementation or upgrades of our software and services may limit our sales opportunities, result in customer dissatisfaction and harm to our reputation, or cause non-payment issues.

Continued Decreased Levels Of Demand For Our Enterprise Products And Services Could Significantly Reduce Our Revenues.

Historically, we have derived a substantial portion of our revenues from licenses of our enterprise products and related services. Our enterprise products principally include solutions to address supply optimization, sourcing optimization, demand optimization, fulfillment optimization and logistics optimization. We expect license revenues and maintenance and consulting contracts related to our enterprise products to continue to account for a substantial portion of our revenues for the foreseeable future. We have experienced a sharp decrease in the demand for our enterprise products and related services due to a number of factors, including sales execution, product competitiveness and questions regarding our viability, which have led to a decline in our revenues. Other factors, such as competition and technological change as well as our de-listing from The NASDAQ National Market and the existing and potential litigation and other proceedings against us, could also adversely impact demand for, or market acceptance of, these applications.

Failure To Complete Development Services Projects As Planned Could Harm Our Operating Results And Create Business Distractions And Negative Publicity That Could Harm Our Business.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

Risks associated with our development services projects include, but are not limited to:

Customers may withhold cash payments or cancel contracts if we fail to meet our delivery commitments, the customers have financial difficulties or change strategy, or the functionality delivered

Table of Contents

is not acceptable to the customers. We are particularly susceptible to this with respect to arrangements where payments are scheduled to occur later in the engagement.

The cancellation or scaling back of one or more of our larger development services projects, such as the purported termination by Shell Global Solutions International B.V. of our license and development agreement with Shell, could have a material adverse impact on future development services revenues.

We may be unable to recognize revenue associated with development services projects in accordance with expectations. We generally recognize revenue from custom software development projects over time using the contract method of accounting. Failure to complete project phases in accordance with the overall project plan can create variability in our expected revenue streams if we are not able to recognize revenues related to particular projects because of delays in development.

Many of our development services projects are fixed-price arrangements. If we fail to accurately estimate the resources required for a fixed-price project or the customer attempts to change the scope of the project, the profit, if any, realized from the project would be adversely affected to the extent that we have to add additional resources to complete the project.

If We Fail To Adequately Protect Our Intellectual Property Rights Or Face A Claim Of Intellectual Property Infringement By A Third Party, We Could Lose Our Intellectual Property Rights Or Be Liable For Significant Damages.

We rely primarily on a combination of copyright, trademark and trade secret laws, confidentiality procedures and contractual provisions to protect our proprietary rights. However, unauthorized parties may attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. Policing unauthorized use of our products is difficult, and we cannot be certain that the steps we have taken will prevent misappropriation of our intellectual property. This is particularly true in India, where a significant portion of our solution operations are located, and other foreign countries such as China and Russia where the laws do not protect proprietary rights to the same extent as the laws of the United States and may not provide us with an effective remedy against piracy. The misappropriation or duplication of our intellectual property could disrupt our ongoing business, distract our management and employees, reduce our revenues and increase our expenses. Any litigation to defend our intellectual property rights could be time-consuming and costly.

There has been a substantial amount of litigation in the software industry regarding intellectual property rights. As a result, we may be subject to claims of intellectual property infringement such as the lawsuit brought by Sky Technologies in April 2004. Although we are not aware that any of our products infringe upon the proprietary rights of third parties, third parties such as Sky Technologies may claim infringement by us with respect to current or future products. Any infringement claims, with or without merit, could be time-consuming, result in costly litigation or damages, cause product shipment delays or the loss or deferral of sales, or require us to enter into royalty or licensing agreements. If we enter into royalty or licensing agreements in settlement of any litigation or claims, these agreements may not be on terms favorable to us. Unfavorable royalty and licensing agreements could have a material adverse effect on our business, results of operations and financial condition.

Recent Restructuring Initiatives Have Been Executed, and Such Activities Pose Significant Risks to Our Business.

Recent restructuring initiatives have been executed by us in an effort to achieve our profitability objectives. The restructuring in March and April of 2004 involved, among other things, reducing our workforce and ceasing continued development of functionality for certain of our products. These activities pose significant risks to our business, including the risk that terminated employees will disparage the company, file legal claims against us related to their termination of employment, become employed by competitors or share our intellectual property or other sensitive information with others. The failure to retain and effectively manage our remaining employees could increase our costs, adversely affect our development efforts and impact the quality of our products and

Table of Contents

customer service. If customers become dissatisfied with the results of our product decisions or service, our business could be adversely impacted, our maintenance renewals may decrease, our customers may take legal action against us and our sales to existing customers could decline, leading to reduced revenues. Failure to achieve the desired results of our strategic initiatives would harm our business, results of operations and financial condition.

Certain Of Our Customers Purchase Our Software, But Delay Or Terminate Its Implementation. If This Type Of Activity Becomes Significant, It Could Harm Our Ability To Sell To Existing Customers And Impact Our Maintenance and Services Revenues.

Certain of our existing customers delay or terminate implementations of our software due to budgetary constraints related to economic uncertainty, dissatisfaction with product quality, the difficulty of prioritizing a surplus of information technology projects, changes in business strategy, personnel or priorities or for other reasons. Such customers may be less likely to invest in additional software in the future and to continue to pay for software maintenance. Since our business relies to a large extent upon sales to existing customers and since maintenance and services revenues are key elements of our revenue base, any reduction in these sales or these maintenance and services payments could have a material adverse effect on our business, results of operations and financial condition.

Our Software May Contain Errors Which Could Result In The Loss Of Customers And Reputation, Adverse Publicity, Loss Of Revenues, Delays In Market Acceptance, Diversion of Development Resources And Claims Against Us By Customers.

Our software programs may contain errors or bugs. Although we conduct testing and quality assurance through a release management process, we may not discover bugs until our customers install and use a given product or until the volume of services that a product provides increases. On occasion, we have experienced delays in the scheduled introduction of new and enhanced products because of bugs. Errors could result in loss of customers and reputation, adverse publicity, loss of revenues, delays in market acceptance, diversion of development and consulting resources and claims against us by customers.

Failure or Circumvention of Our Controls and Procedures Or Failure To Comply With Regulations Related To Controls And Procedures Could Seriously Harm our Business.

We have made significant changes in and may consider making additional changes to our internal controls, our disclosure controls and procedures, and our corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, and not absolute, assurances that the objectives of the system are met. Any failure of our controls, policies and procedures could have a material adverse effect on our business, results of operations and financial condition.

We May Have Difficulty Obtaining And Maintaining Cost-Effective Insurance, Which May Have A Material Adverse Effect On Our Business, Results Of Operations and Financial Condition.

We obtain insurance to cover a variety of potential risks and liabilities. In the future, it may become more difficult to maintain insurance coverage at reasonable levels, or if such coverage is available, the cost to obtain or maintain it may increase substantially. This may result in our being forced to bear the burden of an increased portion of risks for which we have traditionally been covered by insurance, which could have a material adverse effect on our business, results of operations and financial condition.

Table of Contents

We May Not Be Successful In Convincing Customers To Migrate To Current Or Future Releases Of Our Products, Which May Lead To Reduced Consulting And Maintenance Revenues And Less Future Business From Existing Customers.

Our customers may not be willing to incur the costs or invest the resources necessary to complete upgrades to current or future releases of our products. This may lead to our loss of consulting and maintenance revenues and future business from customers that continue to operate prior versions of our products or choose to no longer use our products.

If We Fail To Derive Benefits From Our Existing And Future Strategic Relationships, Our Business Will Suffer.

From time to time, we have collaborated with other companies in areas such as marketing, distribution or implementation. Maintaining these and other relationships is a meaningful part of our business strategy. However, some of our current and potential strategic partners are either actual or potential competitors, which may impair the viability of these relationships. In addition, some of our relationships have failed to meet expectations and may fail to meet expectations in the future. A failure by us to maintain existing strategic relationships or enter into successful new strategic relationships in the future could have a material adverse effect on our business, results of operations and financial condition.

Serious Harm To Our Business Could Result If Our Encryption Technology Fails To Ensure The Security Of Our Customers' Online Transactions.

The secure exchange of confidential information over public networks is a significant concern of consumers engaging in on-line transactions and interaction. Some of our software applications use encryption technology to provide the security necessary to effect the secure exchange of valuable and confidential information. Advances in computer capabilities, new discoveries in the field of cryptography or other events or developments could result in a compromise or breach of the algorithms that these applications use to protect customer transaction data. If any compromise or breach were to occur, it could have a material adverse effect on our business, results of operation and financial condition.

We Are Dependent On Third-Party Software That We Incorporate Into And Include With Our Products And Solutions And Impaired Relations With These Third Parties, Defects In Third-Party Software Or The Inability To Enhance Their Software Over Time Could Harm Our Business.

We incorporate and include third-party software into and with certain of our products and solutions. Additionally, we may incorporate and include additional third-party software into and with our products and solutions in future product offerings. The operation of our products could be impaired if errors occur in the third-party software that we utilize. It may be more difficult for us to correct any defects in third-party software because the development and maintenance of the software is not within our control. Accordingly, our business could be adversely affected in the event of any errors in this software. There can be no assurance that these third parties will continue to make their software available to us on acceptable terms, to invest the appropriate levels of resources in their products and services to maintain and enhance the software capabilities, or to remain in business.

Further, it may be difficult for us to replace any third-party software if a vendor seeks to terminate our license to the software or our ability to license the software to customers. Any impairment in our relationship with these third parties could have a material adverse effect on our business, results of operations and financial condition.

We Face Risks Associated With International Sales And Operations That Could Harm Our Company.

International revenues accounted for approximately 36% of our total revenues during the third quarter of 2004, and we expect to continue to generate a significant portion of our revenues from international sales in the

Table of Contents

future. Our international operations are subject to risks inherent in international business activities, including the tendency of markets outside of the U.S. to be more volatile and difficult to forecast than the U.S. market. Any of the following factors, among other things, could adversely affect the success of our international operations:

Difficulties and costs of staffing and managing geographically disparate operations.

Extended accounts receivable collection cycles in certain countries.

Compliance with a variety of foreign laws and regulations.

Overlap of different tax structures.

Meeting import and export licensing requirements.

Trade restrictions.

Changes in tariff rates.

Changes in general economic and political conditions in international markets.

The Expansion Of Our Operations In India Poses Significant Risks That Could Impair Our Ability To Develop Our Products, Implement Our Products Or Put Our Products At A Competitive Disadvantage.

We have shifted a large portion of our development and services capacity to India. However, we may not fully achieve the cost savings and other benefits that we anticipate from this program and we may not be able to attract or retain sufficient numbers of developers and consultants with the necessary skill sets in India to meet our needs. The distributed nature of our development and consulting resources could create further operational challenges and complications. Additionally, we have a heightened risk exposure to changes in the economic, security and political conditions of India. Operational issues, recruiting and retention issues, ability to obtain work permits, economic and political instability, military actions and other unforeseen occurrences in India could impair our ability to develop and introduce new software applications and functionality in a timely manner, or hinder our ability to provide cost-competitive services, either of which could put our products at a competitive disadvantage and cause us to lose existing customers or fail to attract new customers.

We May Not Successfully Integrate The Products, Technologies Or Businesses From, Or Realize The Intended Benefits Of, Acquisitions, And We May Make Future Acquisitions Or Enter Into Joint Ventures That Are Not Successful, Which Could Seriously Harm Our Business.

Historically, although not recently, we have acquired technology or businesses to supplement and expand our product offerings. In the future, we could acquire additional products, technologies or businesses, or enter into joint venture arrangements, for the purpose of complementing or expanding our business. Negotiation of potential acquisitions or joint ventures and our integration of acquired products, technologies or businesses could divert management's time and resources. Future acquisitions could cause us to issue equity securities that would dilute your ownership of us, incur debt or contingent liabilities, amortize intangible assets, or write off in-process research and development and other

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

acquisition-related expenses that could have a material adverse affect on our business, results of operation and our financial condition. We may not be able to properly integrate acquired products, technologies or businesses with our existing products and operations, train, retain and motivate personnel from the acquired businesses, or combine potentially different corporate cultures. Failure to do so could deprive us of the intended benefits of those acquisitions. In addition, we may be required to write-off acquired research and development if further development of purchased technology becomes unfeasible, which may adversely affect our business, results of operation and our financial condition.

Changes In The Value Of The U.S. Dollar, As Compared To The Currencies Of Foreign Countries Where We Transact Business, Could Harm Our Operating Results.

To date, our international revenues have been denominated primarily in U.S. Dollars. However, the majority of our international expenses, including the wages of approximately 58% of our employees, have been

Table of Contents

denominated in currencies other than the U.S. Dollar. Therefore, changes in the value of the U.S. Dollar as compared to these other currencies may adversely affect our operating results. We have implemented limited hedging programs to mitigate our exposure to currency fluctuations affecting international accounts receivable, cash balances and intercompany accounts, but we do not hedge our exposure to currency fluctuations affecting future international revenues and expenses and other commitments. For the foregoing reasons, currency exchange rate fluctuations have caused, and likely will continue to cause, variability in our foreign currency denominated revenue streams and our cost to settle foreign currency denominated liabilities.

We May Become Subject To Product Liability Claims That Could Seriously Harm Our Business.

Our software products generally are used by our customers in mission critical applications where component failures could cause significant damages. To mitigate this exposure, our license agreements typically seek to limit our exposure to product liability claims from our customers. However, these contract provisions may not preclude all potential claims. Additionally, our insurance policies may be inadequate to protect us from all liability that we may face. Product liability claims could require us to spend significant time and money in litigation or to pay significant damages. As a result, any claim, whether or not successful, could harm our reputation and have a material adverse effect on our business, results of operations and financial condition.

We May Not Be Able to Realize The Benefits Of Our Deferred Tax Assets.

If we do not achieve sufficient federal taxable income in future years to utilize our net operating loss carryforwards, they will expire, and we will be unable to realize the benefits of our deferred tax assets.

Risks Related To Our Industry

If Our Products Are Not Able To Deliver Fast, Demonstrable Value To Our Customers, Our Business Could Be Seriously Harmed.

Enterprises are requiring their application software vendors to provide faster time to value on their technology investments. We must continue to improve the speed of our implementations and the pace at which our products deliver value or our competitors may gain important strategic advantages over us. If we cannot successfully respond to these market demands, or if our competitors do so more effectively than we do, our business, results of operations and financial condition could be materially and adversely affected.

Releases Of And Problems With New Products May Cause Purchasing Delays, Which Would Harm Our Revenues.

Our practice and the practice in the industry are to periodically develop and release new products and enhancements. As a result, customers may delay their purchasing decisions in anticipation of our new or enhanced products, or products of competitors. Delays in customer purchasing decisions could seriously harm our business and operating results. Moreover, significant delays in the general availability of new releases, significant problems in the installation or implementation of new releases, or customer dissatisfaction with new releases could have a material adverse effect on our business, results of operations and financial condition.

Risks Related To Our Stock

Our Inability To List Our Common Stock On The NASDAQ National Market May Make Our Common Stock More Difficult To Trade, Harm Our Business Reputation and Adversely Affect Our Ability To Raise Funds In The Capital Markets.

The de-listing of our common stock from The NASDAQ National Market may have made our common stock more difficult to trade, may have harmed our general business reputation and may be a consideration for investors when considering an investment in us, which could have a material adverse effect on our business,

Table of Contents

results of operations and financial condition. We may not be able to satisfy NASDAQ's initial listing requirements to be eligible to re-apply for listing on The NASDAQ National Market. If we are successful in obtaining such approval and are accepted for listing on The NASDAQ National Market, there is still a risk that our common stock price will decline to levels that would again cause us not to comply with NASDAQ listing standards.

Our Executive Officers And Directors, In Particular Sanjiv Sidhu, And An Affiliate Of Q Investments Have Significant Influence Over Stockholder Votes.

As of October 18, 2004, our current executive officers and directors together beneficially owned approximately 24.5% of the total voting power of our company, approximately 24.2% of which was beneficially owned by Sanjiv Sidhu, our Chairman, Chief Executive Officer and President, and entities that he controls. Further, an affiliate of Q Investments beneficially owns approximately 24.7% of the voting power of the company, and has the right to appoint two directors to our Board of Directors. Accordingly, Mr. Sidhu, the Q Investments affiliate and our officers and directors holding or controlling holdings of stock in our company have had and will have significant influence in determining the composition of our Board of Directors and other significant matters requiring stockholder approval or acquiescence, including amendments to our certificate of incorporation, a substantial sale of assets, a merger or similar corporate transaction or a non-negotiated takeover attempt. Such concentration of ownership may discourage a potential acquirer from making an offer to buy our company that other stockholders might find favorable, which in turn could adversely affect the market price of our common stock.

Our Charter And Bylaws Have Anti-Takeover Provisions And We Have A Stockholder Rights Plan Which, In Combination, Effectively Inhibit A Non-Negotiated Merger Or Business Combination.

Provisions of our certificate of incorporation and our bylaws, Delaware law and our stockholder rights plan could make it more difficult for a third party to acquire us, even if doing so would be beneficial to our stockholders. We are subject to the provisions of Section 203 of the Delaware General Corporation Law, which restricts certain business combinations with interested stockholders. The combination of these provisions effectively inhibits a non-negotiated merger or other business combination.

Our Stock Price Historically Has Been Volatile, Which May Make It More Difficult For You To Resell Common Stock When You Want, At Prices You Find Attractive.

The market price of our common stock has been highly volatile in the past, and may continue to be volatile in the future. For example, during the first nine months of 2004 the market price of our common stock on the over-the-counter Pink Sheets fluctuated between \$0.62 and \$2.45. The following factors could significantly affect the market price of our common stock:

Continued negative cash flows.

Additional equity or debt financing transactions.

Continued quarterly variations in our results of operations.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

If approved, a reverse split of our common stock.

The market or system on which our common stock trades.

Announcement of new customers, new products, product enhancements, joint ventures and other alliances by our competitors or us.

Technological innovations by our competitors or us.

Stock valuations or performance of our competitors.

Table of Contents

General market conditions, geopolitical events or market conditions specific to particular industries.

Perceptions in the marketplace of performance problems involving our products and services.

In particular, the stock prices of many companies in the technology and emerging growth sectors have fluctuated widely, often due to events unrelated to their operating performance. These fluctuations may harm the market price of our common stock.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

This information is included in the section captioned "Sensitivity to Market Risks," included in Item 2 "Management's Discussion and Analysis of Financial Condition and Results of Operations."

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures. As required by Rule 13a-15(b) under the Exchange Act, our management, including our Chief Executive Officer and Chief Financial Officer, carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. As defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, disclosure controls and procedures are controls and other procedures of our company that are designed to ensure that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is accumulated and communicated to our company's management, including our Chief Executive Officer and Chief Financial Officer as appropriate to allow timely decisions regarding required disclosure. We formed a disclosure committee in 2002 that includes senior financial, operational and legal personnel charged with assisting our Chief Executive Officer and Chief Financial Officer in overseeing the accuracy and timeliness of our periodic reports filed under the Exchange Act and in evaluating regularly our disclosure controls and procedures.

Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report in that they were reasonably designed to ensure that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. It should be noted that any system of controls, however well designed and operated, is based in part upon certain assumptions and can provide only reasonable, and not absolute, assurance that the objectives of the system are met.

Changes in Internal Control Over Financial Reporting. As required by Rule 13a-15(d) under the Exchange Act, our management, including our Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of our internal control over financial reporting to determine whether any change occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Based on that evaluation, during our most recent fiscal quarter there has been no change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

We continue to consider further actions to improve the effectiveness of our control processes and procedures.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are subject to various claims and legal proceedings that arise in the ordinary course of our business, including claims and legal proceedings which have been asserted against us by former employees and certain customers, and have been in negotiations to settle certain of those contingencies. In addition, a formal investigation was conducted by the SEC, class action securities and shareholder derivative litigation was commenced against us and one additional private securities action was commenced against certain of our current and former officers with respect to whom we may have indemnification obligations, all in connection with matters relating to the 2003 restatement of our consolidated financial statements. As discussed below, we recently settled the SEC enforcement proceedings against the company and the class action and derivative litigation.

Securities and Exchange Commission Investigation

On or about March 26, 2003, we were advised that the SEC had issued a formal order of investigation to determine whether there had been violations of the federal securities laws by the company and/or others involved with the company in connection with matters relating to the 2003 restatement of our consolidated financial statements. Our Board of Directors had previously directed our Audit Committee to conduct an internal investigation of certain allegations made by a former officer during the fall of 2001 relating to revenue recognition and financial reporting, among other things. In November 2002, we reported to the SEC and publicly disclosed the results of that investigation, as well as certain related allegations made during the fall of 2002 by the former officer and another former officer. Thereafter, the staff of the SEC opened an informal inquiry into these allegations and other matters relating to our financial reporting, and the SEC issued its formal order of investigation. As discussed below, we recently settled SEC enforcement proceedings against the company.

Class Action Litigation

Beginning in March 2001, a number of purported class action complaints were filed in the United States District Court for the Northern District of Texas (Dallas Division) against the company and certain of our officers and directors. The cases were consolidated, and in August 2001 the plaintiffs filed a consolidated amended complaint. The consolidated amended complaint alleged that we and certain of our officers and directors violated the federal securities laws, specifically Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, by making purportedly false and misleading statements concerning the characteristics and implementation of certain of our software products. The consolidated amended complaint sought unspecified damages on behalf of a purported class of purchasers of our common stock during the period from May 4, 2000 to February 26, 2001. By stipulation, in December 2002, the court certified the plaintiff class.

Beginning in April 2003, additional purported class action complaints were filed in the United States District Court for the Northern District of Texas (Dallas Division) against the company and certain of our current and former officers and directors. The complaints brought claims under the federal securities laws, specifically Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, relating to the 2003 restatement of our consolidated financial statements. Specifically, these actions alleged that we issued a series of false or misleading statements to the market during the class period that failed to disclose that (i) we had materially overstated our revenue by improperly recognizing revenue on certain customer contracts, (ii) we lacked adequate internal controls and were therefore unable to ascertain our true financial condition, and (iii) as a result of the foregoing, our financial statements issued during the class period were materially false and misleading. Plaintiffs contended that such statements caused our stock price to be artificially inflated. The complaints sought unspecified damages on behalf of a purported class of purchasers of our common stock during the period from April 18, 2000 to January 24, 2003.

Table of Contents

In July 2003, all of these class action complaints were consolidated for purposes of pre-trial matters only. As discussed below, we have settled the actions.

Derivative Litigation

In April 2001, a purported shareholder derivative lawsuit was filed in Dallas County, Texas, against certain of our officers and directors, naming the company as a nominal defendant. The complaint alleged that certain of our officers and directors breached their fiduciary duties to the company and our stockholders by (i) selling shares of our common stock while in possession of material adverse non-public information regarding our business and prospects, and (ii) disseminating inaccurate information regarding our business and prospects to the market and/or failing to correct such inaccurate information. This lawsuit was removed to the United States District Court for the Northern District of Texas (Dallas Division). A motion to dismiss the action was filed, and on October 8, 2002, the motion was granted. Plaintiffs filed an appeal of that decision on October 15, 2002 and, following oral arguments, plaintiffs moved for voluntary dismissal of their appeal. On January 5, 2004, the appellate court granted plaintiffs' voluntary dismissal motion and judgment against the plaintiffs became final.

In April and May 2003, two additional purported shareholder derivative lawsuits were filed in the United States District Court for the Northern District of Texas (Dallas Division) against certain of our officers and directors, naming the company as a nominal defendant. The complaints alleged that certain of our officers and directors breached their fiduciary duties to the company and our stockholders by (i) causing us to improperly recognize revenue in violation of generally accepted accounting principles to artificially inflate our stock price in order to complete acquisitions in which our stock was used as consideration, (ii) selling shares of our common stock while in possession of material adverse non-public information regarding our financial statements and (iii) securing personal loans using our allegedly artificially inflated stock price. In July 2003, these lawsuits were consolidated for all purposes. Plaintiffs amended their consolidated complaint to add a claim that our Chief Executive Officer and our former Chief Financial Officer violated Section 304 of the Sarbanes-Oxley Act of 2002, seeking recovery from them of bonuses, equity-based compensation and profits realized from sales of securities of the company. A motion to dismiss the actions was filed, and on January 26, 2004, the motion was granted and judgment was entered against the plaintiffs. An appeal of that decision was filed on February 24, 2004. In light of the settlement of the class action litigation and derivative litigation discussed below, the Court entered an unopposed motion to stay the appeal pending the entry of a final order approving settlement. The final order and judgment approving settlement was entered on October 1, 2004, and we expect the Court to dismiss the appeal with prejudice. The appeal of the final order and judgment discussed below should not affect the dismissal of the appeal with prejudice as requested by the parties pursuant to the terms of the settlement agreement.

In May 2003, another purported shareholder derivative lawsuit was filed in the United States District Court for the Northern District of Texas (Dallas Division) against our Chief Executive Officer, our former Chief Financial Officer and our directors, naming the company as a nominal defendant. The complaint alleges that our Chief Executive Officer and our former Chief Financial Officer violated Section 304 of the Sarbanes-Oxley Act of 2002, and seeks recovery from them of bonuses, equity-based compensation and profits realized from sales of securities of the company. The lawsuit also names our directors for failing to seek recovery of the aforementioned bonuses, equity-based compensation and trading profits. A motion to dismiss was filed, and on February 26, 2004, the motion was granted and judgment was entered against the plaintiffs. Plaintiffs did not appeal that decision, and the judgment against them is final.

As stated, these lawsuits are or were derivative in nature; they do not and did not seek relief from the company. However, we entered into indemnification agreements in the ordinary course of business with certain of the defendant officers and directors, and we advanced payment of legal fees and costs incurred by the defendants pursuant to our obligations under the indemnification agreements and/or applicable Delaware law. As discussed below, we have settled the actions that had not been previously dismissed.

Table of Contents

Settlement of SEC Enforcement Proceedings

On June 9, 2004, the company settled the SEC enforcement proceedings referred to above. Without admitting or denying the SEC's substantive findings against it, the company settled the enforcement proceedings by consenting to a cease-and-desist order requiring future compliance with specific provisions of the federal securities laws, and agreed to pay a \$10 million civil penalty. The penalty was paid in June 2004 and the entire penalty proceeds will be distributed to certain current or former stockholders.

The settlement of the SEC enforcement proceedings covers the company only. The SEC's investigation continues as to other individuals and entities, and the company continues to cooperate with the staff of the SEC in connection with that ongoing investigation. In addition, the company has learned that the U.S. Attorney's Office for the Northern District of Texas has been conducting interviews of certain current and former officers and employees of the company in connection with the matters that are the subject of the SEC's ongoing investigation.

Settlement of Class Action Litigation and Derivative Litigation

On May 7, 2004, we reached a definitive agreement to settle the class action and derivative litigation referred to above. Under the agreement, the total settlement amount was \$85.0 million, which included \$43.0 million that was covered by our insurance policies and \$42.0 million that will be paid by the company. To fund a portion of the \$42.0 million payable by the company in connection with this settlement, the company entered into definitive agreements providing for the issuance and sale by the company, after the satisfaction of certain conditions, of \$20.0 million of common stock to Sanjiv Sidhu, our Chairman, Chief Executive Officer and President, and \$2.0 million of common stock to Gregory Brady, our former Chief Executive Officer and President, both of whom were individual defendants in the actions. On May 26, 2004, the sale of common stock to Sanjiv Sidhu closed and funded.

The settlement, which does not reflect any admission of wrongdoing by the company or its directors and officers, was subject to certain conditions including approval by the U.S. District Court for the Northern District of Texas following notice to class members of an opportunity to object or exclude themselves from the settlement. On June 24, 2004, the court entered an order, *inter alia*, preliminarily approving the settlement, authorizing the distribution of notice of the settlement to potential class members and setting a hearing for final approval of the settlement for October 1, 2004. On October 1, 2004, the court entered an order and final judgment approving the settlement. Approximately 0.015% of potential class members, who claim to have purchased a total of approximately 0.3% of the shares of our stock eligible to participate in the class action, excluded themselves from the settlement. The settlement does not cover the private securities action discussed below. Two parties who objected to the settlement solely on grounds relating to the award of attorneys' fees filed a notice of appeal on October 27, 2004. A briefing schedule has not yet been set. As this appeal is at an early stage, we are currently not able to assess an impact, if any, to our condensed consolidated financial statements.

Private Securities Action

On February 13, 2004, a complaint was filed in the United States District Court for the Northern District of Texas (Dallas Division) against certain of our current and former officers and directors with respect to whom we may have indemnification obligations, entitled *Baldrige v. Sidhu*, No. 3:04CV-319-D. Our company is not named as a defendant in this action. The complaint asserts claims under the federal securities laws, specifically Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, relating to the 2003 restatement of our consolidated financial statements. Plaintiffs contend that such consolidated financial statements caused our stock price to be artificially inflated. The complaints seek unspecified damages on behalf of four purported purchasers of a total of 610,250 shares of our common stock from March 2001 through August 2002. On June 24, 2004, plaintiffs filed a first amended complaint seeking substantially the same relief as sought in the original complaint. On

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-Q

August 6, 2004, motions on behalf of all of the defendants to dismiss the first amended complaint were filed. As this action is at an early stage, we are currently not able to assess an impact, if any, to our condensed consolidated financial statements.

Table of Contents

Patent Infringement Suit

On April 12, 2004, a complaint was filed in the United States District Court in Marshall, Texas against the company by Sky Technologies. The complaint alleges that we have infringed upon certain of the patents of Sky Technologies and further alleges that we misappropriated certain of the plaintiff's trade secrets. The plaintiff claims an unspecified amount of damages at this time. As this action is at an early stage, we are currently not able to assess an impact, if any, to our condensed consolidated financial statements.

Internal Revenue Service Audit

We are currently being examined by the Internal Revenue Service regarding matters relating to the timing of the company's remittance of withholding taxes, which were previously remitted, associated with the exercise of certain stock options by employees in the 2000 tax year. The IRS has not issued an assessment with respect to any monetary penalties claimed to be owed by the company. Such penalties could be significant, however, and the company presently intends to seek abatement of all or a portion of any such penalties which might be assessed. Since we do not believe it is possible at this time to estimate the amount of penalties the IRS may assess, no accrual for a loss contingency relating to this matter has been recorded.

Customer Litigation

On September 30, 2004, we were served with a complaint in a suit filed in the District Court of Dallas County, Texas by Kmart Corporation against the company, Sanjiv Sidhu, our current Chairman, Chief Executive Officer and President, and Gregory Brady, our former Chief Executive Officer and President. The complaint alleges fraudulent inducement, breach of contract, rescission and unjust enrichment in relation to the license agreement, dated as of September 29, 2000, between the company and Kmart. The complaint states that Kmart paid in excess of \$40 million for software and technology and in excess of \$10 million for implementation services in connection with the license agreement. The prayer for relief requests rescission of the license agreement, actual and punitive damages, fees, costs and other disbursements. As this action is at an early stage, we are currently not able to assess an impact, if any, to our condensed consolidated financial statements. We intend to vigorously defend the company against this action.

Certain Accruals

We recorded an accrual of \$42.0 million in the fourth quarter of 2003 for estimated losses relating to a possible settlement of the class action and derivative litigation. As described above, we reached a definitive agreement to settle the class action and derivative litigation, and the court entered an order and final judgment approving the settlement on October 1, 2004. In the quarter ended June 30, 2004, we paid \$42.0 million into the registry of the court to fulfill our obligations under the definitive agreement.

We have accrued for estimated losses in the accompanying condensed consolidated financial statements for other matters where we believe the likelihood of an adverse outcome is probable and the amount of the loss is reasonably estimable. The adverse resolution of any one or more of those matters or the matters described in this Item 1 over and above the amount, if any, that has been estimated and accrued in the accompanying condensed consolidated financial statements could have a material adverse effect on our business, financial condition or results of operations. See *Note 7 Commitments and Contingencies* in the accompanying notes to condensed consolidated financial statements.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

During the third quarter of 2004, we issued an aggregate of 9,336 shares of our common stock to employees pursuant to exercises of stock options that were granted prior to April 26, 1996 with an exercise price of \$0.01657 per share. These issuances were deemed exempt from registration under Section 5 of the Securities Act of 1933 in reliance upon Rule 701 thereunder, and appropriate legends were affixed to the share certificates issued in each such transaction.
