**Item 1.02 Termination of a Material Definitive Agreement.**

The Registrant terminated its Second Amended and Restated 2001 Employee Stock Purchase Plan (the Plan) on December 22, 2005. The decision to terminate the Plan was approved by the Board of Directors and was based on a determination that the anticipated benefits from the Plan were not sufficient to justify the ongoing administrative burden and cost of the Plan. The Registrant expects no material costs associated with the termination of the Plan.

**Item 2.05 Costs Associated with Exit or Disposal Activities**

On December 22, 2005, the Board of Directors of the Registrant voted to either sell or close and liquidate the Registrant's Nucleic Acids operating segment. This decision was made after an evaluation of, among other things, short and long-term sales projections for products sold by the Nucleic Acids operating segment, including estimates of 2006 sales to the operating segment's largest customer. While opportunities to sell this operating segment as an ongoing business are being evaluated, the Registrant has commenced procedures, including notification of affected employees, which may lead to closure of the nucleic acids facility in Glasgow, Scotland as early as the first quarter of 2006. Closure of this facility would result in cash closure costs of approximately \$1.0 million in 2006 that relate primarily to statutory payments to affected employees. The Registrant expects to record a charge related to these closure costs in the fourth quarter of 2005.

**Item 2.06 Material Impairments**

Based on short and long-term sales projections for products sold by the Registrant's Nucleic Acids operating segment, including estimates of 2006 sales to the operating segment's largest customer, management of the Registrant has concluded that the assets of this operating segment are impaired as of December 22, 2005 and that a non-cash charge for this impairment is required to be taken in the fourth quarter of 2005. The Registrant estimates that the non-cash impairment charge (related primarily to inventory, property and equipment) will range from \$7.0 million to \$10.0 million.
