Symantec To Acquire Altiris

2

Forward Looking Statements

This presentation contains forward-looking statements regarding the financial and business results of Symantec and Altiris, including statements of expectations regarding consummation of the merger, projected growth for computing devices, benefits to Symantec from combining the Altiris

and Symantec businesses

and

cost savings opportunities for the combined company. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause each company's actual results, levels of activity, performance or achievements to differ materially from results expressed in or implied by this presentation, including, among others: whether the companies can successfully develop new products and the degree to which these gain market acceptance; the sustainability of recent growth rates, particularly in consumer products; the anticipation of the growth of certain market segments; the positioning of the companies' products in those segments; the competitive environment in the software industry; general market conditions; acquisition-related risks, particularly risks relating to integrating the two companies; fluctuations in currency exchange rates; and changes to operating systems and product strategy by vendors of operating systems.

Additional information concerning these and other risk factors is contained in the Risk Factors sections of Symantec's Form 10-K for the year ended March 31, 2006, and in its Form 10-Q for the quarter ended September 29, 2006, and of Altiris's Form 10-K for the year ended December 31, 2005 and its Form 10-Q for the quarter ended September 30, 2006, each filed with the Securities and Exchange Commission.

We assume no obligation to update any forward-looking information contained in this presentation.

3
GAAP to Non-GAAP Reconciliation

In addition to reporting financial results in accordance with generally accepted accounting principles,

or
GAAP,
Symantec
and
Altiris
report
non-GAAP financial results.

Investors are encouraged to review the reconciliation of these non-GAAP financial measures to the comparable GAAP results, which can be found in the exhibits at the end of this presentation and on the investor relations websites of Symantec and Altiris.

Symantec's non-GAAP information excludes amortization of all acquisition-related intangibles, restructuring charges and certain stock-based compensation expenses. In addition, Symantec's combined non-GAAP financial results include the historical results for Symantec and Veritas for comparative fiscal periods, deferred revenue that has been eliminated from Symantec's GAAP results as part of the purchase accounting for the acquisition of Veritas, and adjustments related to the fair value of the assets acquired and liabilities assumed as part of the acquisition, and exclude certain non-GAAP expenses, net of tax.

Altiris
non-GAAP information excludes amortization of acquired core technology, amortization of intangible assets, restructuring charges and stock-based compensation expenses, net of tax.

Strategic Rationale

Leverages core competitive strengths

The most secure endpoint is a well-managed endpoint

A shared focus on the endpoint (desktops, laptops, servers, converged devices)

Complementary channels

Targets same IT buyer

Strengthens SME presence

Respective OEM partnerships with HP and Dell are complementary

Capitalizes on future technology trends

Virtualization, Intel vPro, mobile devices, Software-as-a-service

Protecting
Information

Protecting
Interactions

The endpoint is a critical component of IT infrastructure; virtualization and mobile device growth will increase endpoint proliferation

The endpoint is a main point of vulnerability and data leakage

The endpoint is the primary portal to the enterprise
