The consolidated unaudited interim financial statements included in this report have been prepared by Washington Federal, Inc. (Company). The September 30, 2006 Consolidated Statement of Financial Condition was derived from audited financial statements.

The information included in this Form 10-Q should be read in conjunction with Company s 2006 Annual Report on Form 10-K (2006 Form 10-K) as filed with the SEC. Interim results are not necessarily indicative of results for a full year.

The Company undertakes no obligation to update or revise any forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results over time.

GENERAL

Washington Federal, Inc. (Company) is a savings and loan holding company. The Company's primary operating subsidiary is Washington Federal Savings.

INTEREST RATE RISK

The Company assumes a high level of interest rate risk as a result of its policy to originate and hold for investment fixed-rate single-family home loans, which are longer-term in nature than the short-term characteristics of its liabilities of customer accounts and borrowed money. At March 31, 2007, the Company had a negative one-year maturity gap of approximately 33% of total assets, compared to a 34% negative one-year maturity gap as of September 30, 2006.

The interest rate spread decreased to 2.13% at March 31, 2007 from 2.18% at September 30, 2006. The spread decreased primarily because weighted average rates on customer accounts increased by 19 basis points since September 30, 2006, however this was partially offset by an increase in the weighted average rates on earning assets of 6 basis points over the same period. As of March 31, 2007, the Company had grown total assets by \$808,775,000, or 8.9%, from \$9,069,020,000 at September 30, 2006, which included \$576,750,000 of assets acquired through the merger with First Federal (see Note B). Cash and cash equivalents increased \$163,778,000, or 358%, during the six months ended March 31, 2007. Loans and mortgage-backed securities increased \$610,389,000, or 7.2%, to \$9,068,148,000 during the six months ended March 31, 2007 as the Company grew long-term assets to mitigate the impact of increasing deposit costs. Included in the

aforementioned \$610,389,000 increase in loans and mortgage-backed securities was \$403,000,000 of loans acquired from First Federal. The remaining \$207,389,000 of loan growth was funded primarily through organic deposit growth of \$287,874,000. Cash and cash equivalents of \$209,500,000 and stockholders' equity of \$1,294,830,000 provides management with flexibility in managing interest rate risk.

LIQUIDITY AND CAPITAL RESOURCES

The Company's net worth at March 31, 2007 was \$1,294,830,000, or 13.11% of total assets. This was an increase of \$32,110,000 from September 30, 2006 when net worth was \$1,262,720,000, or 13.92% of total assets. The increase in the Company's net worth included \$66,867,000 from net income and a \$3,542,000 decrease in accumulated other comprehensive loss as a result of an increase in market value of the Company's available-for-sale investments. Net worth was reduced by \$35,829,000 of cash dividend payments and \$5,850,000 used to repurchase stock.

The Company's percentage of net worth to total assets is among the highest in the industry and is over three times the minimum required under Office of Thrift Supervision regulations. Management believes this strong net worth position will help the Company manage its interest rate risk and enable it to compete more effectively for controlled growth through acquisitions, de novo expansion and increased customer deposits.

CHANGES IN FINANCIAL CONDITION

Available-for-sale and held-to-maturity securities: Available-for-sale securities decreased \$85,138,000, or 5.9%, during the six months ended March 31, 2007. During the same period \$44,041,000 of available-for-sale securities that were acquired in the purchase of First Federal were sold resulting in an \$11,000 gain. There were no purchases or sales of held-to-maturity securities during the current period. As of March 31, 2007, the Company had net unrealized losses on available-for-sale securities of \$2,433,000, net of tax, which were recorded as part of stockholders' equity.

Loans receivable: During the six months ended March 31, 2007, the balance of loans receivable increased 9.8% to \$7,773,994,000 compared to \$7,078,443,000 at September 30, 2006. Included in this growth was \$403,000,000 of loans acquired from First Federal (see Note B). Those loans, in conjunction with the \$292,551,000 of organic growth, was consistent with Management's strategy to grow the loan portfolio to mitigate rising deposit costs. Permanent single-family residential loans as a percentage of total loans decreased to 69.3% at March 31, 2007 compared to 70.3% at September 30, 2006. The aggregate of construction and land loans (gross of loans in process) as a percentage of total loans decreased to 22.6% at March 31, 2007 compared to 22.8% at September 30, 2006. Included in the period end gross loans balance was \$138,906,000 of commercial real estate loans and other loans (non-real estate commercial loans and consumer loans) acquired through the merger with First Federal, which represented 1.7% of the total loan balance.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

RESULTS OF OPERATIONS

Net Income: The quarter ended March 31, 2007 produced net income of \$33,483,000 compared to \$36,340,000 for the same quarter one year ago, a 7.9% decrease. Net income for the six months ended March 31, 2007 was \$66,867,000 compared to \$72,486,000 for the six months ended March 31, 2006, a 7.8% decrease. The decrease for the quarter ended March 31, 2007 resulted primarily from a 42.4% increase in interest expense on customer accounts, which was partially offset by an 18.1% increase in total interest income. The decrease for the six months ended March 31, 2007 resulted primarily from a 43.2% increase in interest expense on customer accounts, which was partially offset by a 17.5% increase in total interest income.

Net Interest Income: The largest component of the Company's earnings is net interest income, which is the difference between the interest and dividends earned on loans and other investments and the interest paid on customer deposits and borrowings. Net interest income is impacted primarily by two factors; first, the volume of earning assets and liabilities and second, the rate earned on those assets or the rate paid on those liabilities.

The following table sets forth certain information explaining changes in interest income and interest expense for the periods indicated compared to the same periods one year ago. For each category of interest-earning asset and interest-bearing liability, information is provided on changes attributable to (1) changes in volume (changes in volume multiplied by old rate) and (2) changes in rate (changes in rate multiplied by old volume). The change in interest income and interest expense attributable to changes in both volume and rate has been allocated proportionately to the change due to volume and the change due to rate.

decrease. Total other income for the quarter and six months ended March 31, 2007 included a \$121,000 and \$695,000 gain on the sale of real estate held for investment, respectively, while total other income for the quarter and six months ended March 31, 2006 included a \$577,000 and \$1,073,000 gain on the sale of real estate held for investment, respectively.

Other Expense: The quarter ended March 31, 2007 produced total other expense of \$16,057,000 compared to \$13,515,000 for the same quarter one year ago, an 18.8% increase. Total other expense for the six months ended March 31, 2007 was \$30,008,000 compared to \$26,186,000 for the six months ended March 31, 2006, a 14.6% increase. The increase in total other expense over the same comparable periods one year ago was primarily the result of compensation costs related to the additional 180 employees brought on through the acquisition with First Federal, as well as higher organic payroll expenses. Additionally, general occupancy expenses increased due to the 13 branches acquired from First Federal. Total other expense for the quarter and six months ended March 31, 2007 equaled .67% and .64%, respectively, of average assets, compared to .64% and .63%, respectively, for the same periods one year ago. The number of staff, including part-time employees on a full-time equivalent basis, was 911 at March 31, 2007 and 751 at March 31, 2006; the increase primarily due to the acquisition of First Federal (see Note B).

Taxes: Income taxes decreased \$230,000, or 1.2%, and \$633,000, or 1.7%, for the quarter and six months ended March 31, 2007 when compared to the same periods one year ago. While the taxable income base for the quarter and six months ended March 31, 2007 was \$3,087,000, or 5.6%, and \$6,252,000, or 5.7%, respectively, lower than the comparable periods one year ago, the Company settled a claim with the Internal Revenue Service during the six months ended March 31, 2006 over the deductibility of supervisory goodwill that resulted in a reduction of income tax expense for that period. As a result, the effective tax rate for the quarter and six months ended March 31, 2007 increased to 35.85% and 35.68%, respectively, from 34.20% for the same periods one year ago. The Company expects a 35.85% effective tax rate going forward for the remainder of the fiscal year.
