Notes to Consolidated Financial Statements

(Dollar amounts in tables in thousands, except per share data)

Note 1. Basis of Presentation and Nature of Operations

Interim Results

The unaudited consolidated financial statements included in this Quarterly Report on Form 10-Q have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). These rules and regulations permit some of the information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) to be condensed or omitted. In management's opinion, the unaudited consolidated financial statements contain all adjustments, that are of a normal recurring nature, necessary for a fair statement of the Company's results for the three-month and nine-month periods ended September 30, 2007, and September 30, 2006. Operating results for the three-month and nine-month periods ended September 30, 2007, are not necessarily indicative of the results that may be expected for the year ending December 31, 2007. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2006, and the notes thereto included in the Company's Annual Report on Form 10-K, filed with the SEC on March 30, 2007.

Basis of Presentation and Nature of Operations

The accompanying consolidated financial statements include the accounts of ICF International, Inc. (ICFI) and its subsidiaries (collectively, the Company). The Company provides management, technology, and policy professional services in the areas of energy and climate change, environment and infrastructure, health, human services and social programs, and homeland security and defense. The Company's major clients are the State of Louisiana and United States (U.S.) government agencies, especially the Department of Defense, the Environmental Protection Agency, the Department of Health and Human Services, the Department of Homeland Security, the Department of Transportation, and the Department of Justice; commercial entities, particularly electric and gas utilities and other energy market participants; and other government organizations throughout the U.S. and the world. The Company offers a full range of services to these clients, including strategy, analysis, program management, and information technology solutions that combine experienced professional staff, industry and institutional knowledge, and analytical methods.

The Company, incorporated in Delaware, is headquartered in Fairfax, Virginia, with 18 primary domestic regional offices and international offices in London, Moscow, New Delhi, Rio de Janeiro and Toronto.

Note 2. Acquisitions

On June 28, 2007, the Company acquired 100% of the outstanding shares of Z-Tech Corporation (Z-Tech), a privately held company that provides software engineering, web design and development, and scientific computing services in support of federal health agencies. The Company believes that by combining Z-Tech's technology and program support expertise with the Company's established presence in health communications, policy, and clearinghouses, the Company stands to gain a business edge in serving the large federal health care market, which is estimated at more than \$25 billion.

The acquisition was accounted for in accordance with the provisions of SFAS No. 141, *Business Combinations*. The initial purchase price was \$27.6 million including \$27.3 million in cash and \$0.3 million in transaction expenses. In addition to the initial consideration, the purchase agreement provides for additional cash payments of up to \$8.0 million if certain performance criteria are met. If the performance criteria are met, the additional cash payments will be recorded as goodwill. The results of operations for Z-Tech will be included in the Company's statement of operations after June 30, 2007.

The Company has engaged an independent valuation firm to assist management in the allocation of the purchase price to goodwill and to other acquired intangible assets, but this allocation has not yet been finalized. The excess of the purchase price over the estimated fair value of the net tangible assets acquired was \$28.6 million. The Company has preliminarily allocated \$19.6 million to goodwill and \$9.0 million to other intangible assets. For this acquisition, goodwill and intangibles are not deductible for tax purposes. Pursuant to the requirements of SFAS No. 141, the acquisition did not meet the criteria of a material business combination, and therefore, *pro forma* and certain other disclosures are not provided.

During January of 2007, the Company acquired two companies:

Edgar Filing: ICF International, Inc. - Form 10-Q

The Company acquired 100% of the outstanding common stock of Energy and Environmental Analysis, Incorporated (EEA), a privately held company specializing in energy market analyses, modeling, transportation and energy technology, and environmental advisory services. The Company believes that the combination of EEA's modeling framework in the natural gas sector with the Company's modeling framework in the electricity sector will create a unique analytical platform for integrated energy analysis. The Company also believes that EEA's expertise in automotive emissions and fuel efficiency technologies will expand the capabilities of the Company's transportation practice.

Table of Contents

The Company also acquired 100% of the outstanding common stock of Advanced Performance Consulting Group, Inc. (APCG), a privately held company that helps federal organizations develop and implement strategy, improve enterprise performance, manage change, support employee growth, and communicate effectively. APCG enjoys a reputation as a strategic advisor to senior-level federal clients.

The Company believes the acquisition of APCG to be a good strategic fit and that there are growth opportunities in numerous areas for the combined businesses.

Both acquisitions were accounted for in accordance with the provision of SFAS No. 141, Business Combinations. The aggregate purchase price of these acquisitions was \$13.4 million, including \$13.0 million in cash consideration and \$0.4 million in transaction expenses. The results of operations for EEA and APCG have been included in the Company's statement of earnings since January 1, 2007.

The Company engaged an independent valuation firm to assist management in the allocation of the purchase price to goodwill and to other acquired intangible assets. The aggregate excess of the purchase price over the estimated fair value of the net tangible assets acquired was \$11.4 million. The Company has allocated \$8.2 million to goodwill and \$3.2 million to other intangible assets. Both EEA and APCG were purchased under the election provisions of Internal Revenue Code 338(h)(10), and therefore, for these acquisitions, goodwill and intangibles are deductible for tax purposes. Supplemental *pro forma* data for the three-month and nine-month periods ended September 30, 2006, are not presented because the acquired companies' operating results were not material to the consolidated operations of the Company.

Note 3. Contract Receivables

Contract receivables consist of the following (in thousands of dollars):

	September 30, 2007	December 31, 2006
Billed	\$ 104,736	\$ 79,785
Unbilled	55,029	32,110
Allowance for doubtful accounts	(2,576)	(1,347)
Contract receivables, net	\$ 157,189	\$ 110,548

Contract receivables, net of the established allowance, are stated as amounts expected to be realized in future periods. Unbilled receivables result from revenue that has been earned in advance of billing. The unbilled receivables can be invoiced at contractually defined intervals or milestones, as well as upon completion of the contract or U.S. federal government cost audits. The Company anticipates that the majority of unbilled receivables will be substantially billed and collected within one year. Contract receivables are classified as current assets in accordance with industry practice.

The allowance for doubtful accounts is determined based upon management's best estimate of potentially uncollectible contract receivables, taking into account management's expectations of future losses on a contract-by-contract basis. The Company writes off contract receivables when such amounts are determined to be uncollectible. Losses have historically been within management's expectations.

Note 4. Commitments and Contingencies**Litigation and Claims**

Various lawsuits and claims and contingent liabilities arise in the ordinary course of the Company's business. The ultimate disposition of certain of these contingencies is not determinable at this time. The Company's management believes there are no current outstanding matters that will materially affect the Company's financial position or results of operations.

Note 5. Debt

As of September 30, 2007, the Company had no debt outstanding. During the three months ended September 30, 2007, the Company made net repayments of \$5 million on its revolving credit facility. During the nine months ended September 30, 2007, the Company used funds generated from operating activities to finance acquisitions and working capital. The Company amended its credit facility on June 28, 2007, to increase the capacity of its revolving line of credit from \$65 million to \$95 million.

Note 6. Accounting for Stock-Based Compensation

Stock Incentive Plans

Effective with the Company's initial public offering of stock in September 2006, a long-term equity incentive plan (the 2006 Plan) was adopted. The 2006 Plan permits the grant of nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock, performance shares, performance units and other incentive awards, including restricted stock units. Under the 2006 Plan, the Company may make awards of up to 1,000,000 shares, plus an annual increase on the first day of each of the Company's

Table of Contents

fiscal years, beginning in 2007, equal to the lesser of 3% of the number of outstanding shares of common stock outstanding as of January 1 or a lesser amount as determined by the Board of Directors (the evergreen provision). Under this evergreen provision, 416,241 additional shares were made available under the plan as of January 1, 2007, and thereafter registered. Persons eligible to participate in the 2006 Plan include all officers and key employees of the Company, as determined by the Compensation Committee of the Board of Directors, and all non-employee directors.

Stock-Based Compensation

The Company recognized stock-based compensation expense of \$0.8 million and \$0.3 million in the three months ended September 30, 2007, and September 30, 2006, respectively, and \$2.2 million and \$0.6 million in the nine months ended September 30, 2007, and September 30, 2006, respectively, which is included in indirect and selling expenses.

As of September 30, 2007, and September 30, 2006, there was \$7.0 million and \$3.8 million, respectively, of total unrecognized compensation cost related to unvested stock-based compensation agreements. Unrecognized compensation costs are expected to be recognized over a three- to five-year period on a straight-line basis.

Stock Options

All stock options granted through 2006 were granted under an earlier plan. All stock options granted in 2007 are under the 2006 Plan.

During the nine months ended September 30, 2007, the Company granted stock options to purchase 210,000 shares of the Company's common stock at an exercise price of \$18.31 per share, the fair value of the stock on the date of grant. The Black-Scholes-Merton weighted average fair value of the options granted during the nine months ended September 30, 2007, was \$7.81 per share and was based on the assumptions in the following table:

Dividend yield	0.00%
Expected volatility	41.09%
Risk-free interest rate	4.52%
Expected term (in years)	5

These options expire in ten years and vest over three years. The Company is expensing the value of these option grants over the vesting period. No stock options were granted during the three months ended September 30, 2007. The aggregate intrinsic value of options outstanding and exercisable was approximately \$18.3 million. The intrinsic value of the unvested options granted in the nine months ended September 30, 2007, was approximately \$1.9 million.

In accordance with SFAS No. 123(R), *Share-Based Payment*, for periods beginning on or after January 1, 2006, excess tax benefits from the exercise of stock options are presented as financing cash flows. The excess tax benefits totaled approximately \$0.7 million and \$3.0 million, respectively, for the three months and nine months ended September 30, 2007. There were no excess tax benefits for the three months or nine months ended September 30, 2006.

The following table depicts stock option activity for the nine months ended September 30, 2007:

	Options Outstanding	
	Shares	Weighted-Average Exercise Price
As of December 31, 2006	1,487,082	\$ 6.01
Options granted in 2007	210,000	\$ 18.31
Options forfeited or cancelled		
Options exercised	(640,091)	6.02
As of September 30, 2007	1,056,991	\$ 8.45

Restricted Stock and Restricted Stock Units

Edgar Filing: ICF International, Inc. - Form 10-Q

Pursuant to the 2006 Plan, the Company awarded 56,100 restricted stock units (RSUs) to employees during the nine months ended September 30, 2007. The RSUs vest over three years under varying schedules. Upon vesting, the employee is issued one share of stock for each RSU he or she holds. The RSUs were valued based on the grant date value of a share of common stock. The weighted-average grant date fair value of the RSUs was \$18.67 per share.

Table of Contents

The activity related to RSUs during the nine months ended September 30, 2007, was as follows:

	Shares
Outstanding December 31, 2006	464,000
Granted	56,100
Forfeited	(35,500)
Outstanding September 30, 2007	484,600

Note 7. Income Taxes

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, which prescribes a recognition threshold and measurement process for recording in the financial statements uncertain tax positions taken or expected to be taken in a tax return. In addition, FIN 48 provides guidance on the derecognition, classification, accounting in interim periods, and disclosure requirements for uncertain tax positions. The Company adopted FIN 48 on January 1, 2007, and has developed and implemented a process based on the guidelines of FIN 48 to ensure that uncertain tax positions are identified, analyzed, and properly reported in its financial statements in accordance with SFAS No. 109, *Accounting for Income Taxes*.

Based on currently known facts and circumstances and current tax law, the Company believes that the total amount of unrecognized tax benefits as of September 30, 2007, is \$0.9 million, which includes \$0.1 million of accrued penalties and interest related to the unrecognized tax benefits. The unrecognized tax benefits, including the accrued penalties and interest, were recorded as an increase to income taxes payable and a reduction of retained earnings in the balance sheet. Interest expense and penalty expense related to income taxes, if any, are included in interest expense and indirect and selling expenses, respectively, in the statement of earnings.

The total amount of unrecognized tax benefits as of September 30, 2007, if recognized, would have a \$0.9 million effect on income tax expense and would impact the effective tax rate. There are no tax positions the Company has taken for which it is reasonably possible that the unrecognized tax benefits will significantly increase or decrease over the next 12 months producing individually, or in the aggregate, a material effect on its results of operations, financial condition, or cash flows. The Company remains subject to examination by major tax jurisdictions for tax years 2004 through 2006.

The Company has not yet determined the effect, if any, that the acquisition of Z-Tech will have on the amount of unrecognized tax benefits, but expects to make this determination by the end of 2007.

Note 8. Earnings Per Share

Basic earnings per share (EPS) is computed by dividing reported net income by the weighted-average number of shares outstanding. Diluted EPS considers the potential dilution that could occur if common stock equivalents were exercised or converted into stock. The difference between the basic and diluted weighted-average equivalent shares with respect to the Company's EPS calculation is due entirely to the assumed exercise of stock options and the vesting of restricted stock and RSUs. The dilutive effect of stock options, restricted stock, and RSUs for each period reported is summarized below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	2007	2006
Net Income	\$ 11,094	\$ 2,973	\$ 30,936	\$ 2,661
Weighted-average number of basic shares outstanding during the period	14,299	9,334	14,060	9,242
Dilutive effect of stock options, restricted stock and RSUs	700	1,141	740	1,141
Weighted-average number of diluted shares outstanding during the period	14,999	10,475	14,800	10,383

Edgar Filing: ICF International, Inc. - Form 10-Q

Basic earnings per share	\$ 0.78	\$ 0.32	\$ 2.20	\$ 0.29
Diluted earnings per share	\$ 0.74	\$ 0.28	\$ 2.09	\$ 0.26

Note 9. Recent Pronouncements

On February 15, 2007, the FASB issued FASB Statement No. 159 (SFAS No. 159), *The Fair Value Option for Financial Assets and Liabilities*, including an amendment of FASB Statement No. 115. SFAS No. 159 provides for the option to recognize most financial assets and liabilities and certain other items at fair value. SFAS No. 159 requires each company to provide additional information that will help investors and other users of financial statements more easily understand the effect of the company's choice to use fair value on its earnings. SFAS No. 159 is effective for the Company beginning January 1, 2008. The Company is evaluating the statement to determine its effect, if any, on its future financial statements and related disclosures.

Table of Contents

Note 10. Subsequent Event

On November 9, 2007, the Company entered into a merger agreement with Simat, Helliesen & Eichner, Inc. (SH&E), a consulting firm specializing in air transport, pursuant to which SH&E will become a wholly-owned subsidiary of the Company. The transaction is expected to close by the end of the calendar year. The purchase price will be approximately \$51.0 million, excluding transaction costs, and is subject to adjustments for working capital and indemnification escrows, and certain closing conditions.

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations* **FORWARD-LOOKING STATEMENTS**

Some of the statements in this Quarterly Report on Form 10-Q constitute forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. These statements involve known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. In some cases, you can identify these statements by forward-looking words such as anticipate, believe, could, estimate, expect, intend, may, plan, potential, should, will, would or similar words. Statements that contain these words carefully because they discuss our future expectations, contain projections of our future results of operations or of our financial position, or state other forward-looking information. The factors described in our filings with the SEC, as well as any cautionary language in this Quarterly Report on Form 10-Q, provide examples of risks, uncertainties and events that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements, including but not limited to:

changes in the spending priorities of our clients;

failure by Congress to approve budgets in a timely fashion;

our dependence on contracts with state and federal government agencies and departments for the majority of our revenue and our ability to win large-value procurements;

performance by us and our subcontractors under a major contract with the State of Louisiana, Office of Community Development (The Road Home contract), including exposure to damages, audits, penalties, public scrutiny and adverse publicity;

acceleration of performance and revenues under The Road Home contract, including the effects of the accelerated distribution of available program funds, on the one hand, and significant audit risks associated with, and possible termination of, The Road Home contract, on the other hand;

our possible inability to replace revenue and income generated by The Road Home contract;

results of government audits and investigations;

an economic downturn in the energy sector;

failure to receive the full amount of our backlog;

loss of members of management or other key employees;

difficulties implementing our acquisition strategy; and

difficulties expanding our service offerings and client base.

Additional factors that may affect our results are discussed in our Annual Report on Form 10-K for the year ended December 31, 2006, in Part I, Item 1A, entitled Risk Factors. Although we believe the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance, or achievements. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to update these forward-looking statements, even if our situation changes in the future.

The terms we and our as used throughout this Quarterly Report on Form 10-Q refer to ICF International, Inc. and its consolidated subsidiaries, unless otherwise indicated.

OVERVIEW

We provide management, technology and policy consulting and implementation services to government, commercial and international clients. We help our clients conceive, develop, implement and improve solutions that address complex economic, social and national security issues. Our services primarily address four key markets: energy and climate change; environment and infrastructure; health, human services and social programs; and homeland security and defense.

Table of Contents

Increased government involvement in virtually all aspects of our lives has created opportunities for us to resolve issues at the intersection of the public and private sectors. We believe that demand for our services will continue to grow as government, industry and other stakeholders seek to understand and respond to geopolitical and demographic changes, budgetary constraints, heightened environmental and social concerns, rapid technological changes, and increasing globalization.

Our clients utilize our services because we combine diverse institutional knowledge and experience in their activities with the deep subject matter expertise of our highly educated staff, which we deploy in multi-disciplinary teams. Our federal government clients have included every cabinet-level department, including the Department of Defense, the Environmental Protection Agency, the Department of Health and Human Services, the Department of Homeland Security, the Department of Transportation, the Department of Justice, and the Department of Energy. U.S. federal government clients generated approximately 26% of our revenue for the nine months ended September 30, 2007, and 49% of our revenue in the full year 2006. We are comparing the breakdown of our year-to-date 2007 revenue in this paragraph to our revenue for the full year 2006 because we were awarded The Road Home contract in June 2006, which substantially increased the revenue generated from our state and local government clients. Our largest state and local government client is the state of Louisiana. State and local government clients generated approximately 67% of our revenue for the nine months ended September 30, 2007, and approximately 40% of our revenue in the full year 2006. The Road Home contract accounted for approximately 65% of our revenue for the nine months ended September 30, 2007, and approximately 35% of our revenue in the full year 2006. We also serve commercial and international clients, primarily in the energy sector, including electric and gas utilities, oil companies and law firms. Our commercial and international clients, including government clients outside the United States, generated approximately 7% of our revenue for the nine months ended September 30, 2007, and 11% of our revenue in the full year 2006. We have successfully worked with many of these clients for decades, with the result that we have a unique and knowledgeable perspective on their needs.

We partner with our clients to solve complex problems and produce mission-critical results. Across our markets, we provide end-to-end services that deliver value throughout the entire life of a policy, program, project or initiative:

Advisory Services. We help our clients analyze the policy, regulatory, technology and other challenges facing them and develop strategies and plans for responding. Our advisory and management consulting services include needs and markets assessment, policy analysis, strategy and concept development, change management strategy, enterprise architecture and program design.

Implementation Services. We implement and manage technological, organizational and management solutions for our clients, often based on the results of our advisory services. Our implementation services include information technology solutions, project and program management, project delivery, strategic communications and training.

Evaluation and Improvement Services. In support of advisory and implementation services, we provide evaluation and improvement services to help our clients increase the future efficiency and effectiveness of their programs. These services include program evaluation, continuous improvement initiatives, performance management, benchmarking and return-on-investment analyses.

We have more than 2,500 employees, including many who are recognized thought leaders in their respective fields. We serve clients globally from our headquarters in the metropolitan Washington, D.C. area, our 18 primary domestic regional offices throughout the United States, and our five international offices in London, Moscow, New Delhi, Rio de Janeiro and Toronto.

On October 3, 2006, we completed our IPO. In connection with the IPO, we issued 3,659,448 shares of common stock at an offering price of \$12 per share. On October 23, 2006, in accordance with the terms of our agreement with the underwriters of the IPO, we sold an additional 700,500 shares at \$12 per share, representing a full exercise of the underwriters' over-allotment option. Including the over-allotment option, we issued a total of 4,359,948 shares of common stock in the IPO for total gross proceeds of \$52.3 million.

Prior to and in connection with the closing of the IPO, on September 26, 2006, the Company increased the amount of authorized common shares from 20,000,000 shares to 70,000,000 shares and changed the par value of common stock from \$.01 per share to \$.001 per share. The Company also amended its Certificate of Incorporation to provide the authority to issue 5,000,000 shares of preferred stock with a par value of \$0.001 per share. Dividends, if any, on outstanding shares of preferred stock shall be paid or declared and set apart for payment before any dividends shall be paid or declared and set apart for payment on shares of common stock with respect to the same dividend period. If upon any liquidation, dissolution or winding up of the Company, assets are insufficient to pay the preferred shareholders the amounts to which they are entitled, any such assets shall be distributed ratably among the shareholders in accordance with their respective priorities and preferential amounts (including

Edgar Filing: ICF International, Inc. - Form 10-Q

unpaid cumulative dividends, if any). No shares of preferred stock had been issued as of September 30, 2007.

OUTLOOK

In June 2006, our subsidiary, ICF Emergency Management Services, LLC, was awarded The Road Home contract described above. As discussed below, The Road Home contract has had a significant impact on our results of operations beginning in the third quarter

Table of Contents

of 2006, accounting for approximately 35% of our revenue for all of 2006 and approximately 65% of our revenue for the nine months ended September 30, 2007. The contract has a stated term of three years. However, due to the acceleration of the program, we expect the portion of the program for which there is funding may be concluded during 2008. The acceleration of the program has also accelerated the pace at which we have earned fees compared to anticipated fee earnings over what had been expected to be a three-year program. This factor, together with the challenges of predicting the future timing of work by our numerous subcontractors, makes it especially difficult for us to forecast the revenues and earnings associated with the contract, and may accelerate to earlier periods our need to win new business to replace the revenues from the contract.

We do not expect to be able to replace the revenues derived from The Road Home contract solely with organic growth in our existing businesses or from different services, clients, practice areas, offices, geographic focus, or otherwise. As a result, our future results will depend in part on the success of our strategy to continue to make strategic acquisitions and successfully integrate those acquisitions. We announced the purchase of SH&E on November 12, 2007. We are continuing to evaluate other acquisition opportunities, and at any given point in time we may be evaluating several such opportunities. There is no assurance that we will be able complete or successfully integrate additional acquisitions.

DESCRIPTION OF CRITICAL ACCOUNTING POLICIES

The preparation of our financial statements in accordance with US GAAP requires that we make estimates and judgments that affect the reported amount of assets, liabilities, revenue, and expenses, as well as the disclosure of contingent assets and liabilities. If any of these estimates or judgments proves to be incorrect, our reported results could be materially affected. Actual results may differ significantly from our estimates under different assumptions or conditions. We believe that the estimates, assumptions and judgments involved in the accounting practices described below have the greatest potential impact on our financial statements and therefore consider them to be critical accounting policies.

Revenue Recognition

We recognize revenue when persuasive evidence of an arrangement exists, services have been rendered, the contract price is fixed or determinable, and collectibility is reasonably assured. We enter into contracts that are either time-and-materials contracts, cost-based contracts or fixed-price contracts.

Time-and-Materials Contracts. Revenue under time-and-materials contracts is recognized as costs are incurred. Revenue for time-and-materials contracts is recorded on the basis of allowable labor hours worked multiplied by the contract-defined billing rates, plus the costs of other items used in the performance of the contract. Profit and losses on time-and-materials contracts result from the difference between the cost of services performed and the contract-defined billing rates for these services.

Cost-Based Contracts. Revenue under cost-based contracts is recognized as costs are incurred. Applicable estimated profit, if any, is included in earnings in the proportion that incurred costs bear to total estimated costs. Incentives, award fees, or penalties related to performance are also considered in estimating revenue and profit rates based on actual and anticipated awards.

Fixed-Price Contracts. Revenue for fixed-price contracts is recognized when earned, generally as work is performed in accordance with the provisions of SEC Staff Accounting Bulletin No. 104, *Revenue Recognition*. Services performed vary from contract to contract and are not uniformly performed over the term of the arrangement. Revenue on certain fixed-price contracts is recorded each period based on contract costs incurred to date compared with total estimated costs at completion (cost-to-cost method). Performance is based on the ratio of costs incurred to total estimated costs where the costs incurred represent a reasonable surrogate for output measures of contract performance, including the presentation of deliverables to the client. Progress on a contract is matched against project costs and costs to complete on a periodic basis. Clients are obligated to pay as services are performed, and in the event that a client cancels the contract, payment for services performed through the date of cancellation is negotiated with the client. Revenue on certain fixed-price contracts is recognized ratably over the period benefited. Revenue on certain other fixed-price contracts is recorded based on units delivered to the customer multiplied by the contract-defined unit price.

Revenue recognition requires us to use judgment relative to assessing risks, estimating contract revenue and costs, and making assumptions for schedule and technical issues. Due to the size and nature of many of our contracts, the estimation of revenue and cost at completion can be complicated and is subject to many variables. Contract costs include labor, subcontracting costs and other direct costs, as well as allocation of allowable indirect costs. We must also make assumptions regarding the length of time to complete the contract because costs also include expected increases in wages, prices for subcontractors and other direct costs. From time to time, facts develop that require us to revise our estimated total costs and revenue on a contract. To the extent that a revised estimate affects contract profit or revenue previously recognized, we record the cumulative effect of the revision in the period in which the facts requiring the revision become known. Provision for the full amount of an anticipated loss on any type of contract is recognized in the period in which it becomes probable and can be reasonably estimated. As a result, operating results could be affected by revisions to prior accounting estimates.

Table of Contents

We generate invoices to clients in accordance with the terms of the applicable contract, which may not be directly related to the performance of services. Unbilled receivables are invoiced based upon the achievement of specific events as defined by each contract including deliverables, timetables and incurrence of certain costs. Unbilled receivables are classified as a current asset. Advanced billings to clients in excess of revenue earned are recorded as deferred revenue until the revenue recognition criteria are met. Reimbursements of out-of-pocket expenses are included in revenue with corresponding costs incurred by us included in cost of revenue.

From time to time, we may proceed with work based on client direction prior to the completion and signing of formal contract documents. We have a formal review process for approving any such work. Revenue associated with such work is recognized only when it can reliably be estimated and realization is probable. We base our estimates on a variety of factors, including previous experiences with the client, communications with the client regarding funding status, and our knowledge of available funding for the contract.

Goodwill and the Amortization of Intangible Assets

Costs in excess of the fair value of tangible and identifiable intangible assets acquired and liabilities assumed in a business combination are recorded as goodwill, in accordance with SFAS No. 141, *Business Combinations*. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but are instead reviewed annually (or more frequently if impairment indicators arise) for impairment in accordance with the provisions of SFAS No. 142, *Goodwill and Other Intangible Assets*. SFAS No. 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-lived Assets*.

We have elected to perform the annual goodwill impairment review as of September 30 of each year during the fourth quarter. Based upon management's most recent review, including a valuation report issued by an investment bank, we determined that no goodwill impairment charge was required for 2006. Historically, there have been no goodwill impairment charges recorded by the Company.

We follow the provisions of SFAS No. 144 in accounting for impairment or disposal of long-lived assets. SFAS No. 144 requires that long-lived assets and certain identifiable intangibles be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset might not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of are reported at the lower of the carrying amount or fair value, less cost to sell.

New Accounting Standards

On February 15, 2007, the FASB issued FASB Statement No. 159 (SFAS No. 159), *The Fair Value Option for Financial Assets and Liabilities*, including an amendment of FASB Statement No. 115. SFAS No. 159 provides for the option to recognize most financial assets and liabilities and certain other items at fair value. SFAS No. 159 requires each company to provide additional information that will help investors and other users of financial statements more easily understand the effect of the company's choice to use fair value on its earnings. SFAS No. 159 is effective for us beginning January 1, 2008. We are evaluating the statement to determine its effect, if any, on our future financial statements and related disclosures.

DIRECT COSTS

Direct costs consist primarily of costs incurred to provide services to clients, the most significant of which include employee salaries and wages, plus associated fringe benefits, relating to specific client engagements. Direct costs also include the costs of subcontractors and outside consultants, third-party materials and any other related direct costs, such as travel expenses.

We generally expect the ratio of direct costs as a percentage of revenue to decline when our own labor increases relative to subcontracted labor or outside consultants. Conversely, as subcontracted labor or outside consultants for clients increase relative to our own labor, we expect the ratio to increase. This increase has in fact occurred, primarily due to the relatively high level of subcontractor costs associated with The Road Home contract.

Changes in the mix of services and other direct costs provided under our contracts can result in variability in our direct costs as a percentage of revenue. For example, if we are successful in our strategy to increase the proportion of our work in the area of implementation (as in the case of The Road Home contract), we expect that more of our services will be performed in client-provided facilities and/or with dedicated staff. Such work generally has a higher proportion of direct costs than much of our current advisory work, and we anticipate that higher utilization of such staff will decrease the amount of indirect expenses. In addition, to the extent we are successful in winning larger contracts, our own labor

Edgar Filing: ICF International, Inc. - Form 10-Q

services component could decrease because larger contracts typically are broader in scope and require more diverse capabilities, potentially resulting in more subcontracted labor, increased other direct costs

Table of Contents

and lower margins. Although these factors could lead to a higher ratio of direct costs as a percentage of revenue, the economics of these larger jobs are nonetheless generally favorable because they increase income, broaden our revenue base, and have a favorable return on invested capital.

OPERATING COSTS AND EXPENSES

Our operating costs and expenses consist of indirect and selling expenses, including non-cash compensation, and depreciation and amortization.

Indirect and Selling Expenses

Indirect and selling expenses include our management, facilities and infrastructure costs for all employees, as well as salaries and wages, plus associated fringe benefits, not directly related to client engagements. Among the functions covered by these expenses are marketing, business and corporate development, bids and proposals, facilities, information technology and systems, contracts administration, accounting, treasury, human resources, legal, corporate governance and executive and senior management. We include all of our cash incentive compensation in this item, as well as non-cash incentive compensation such as stock-based compensation provided to employees whose compensation and other benefit costs are included in both direct costs and indirect and selling expenses.

Non-Cash Compensation

The Company recognized stock-based compensation expense of \$0.8 million and \$0.3 million in the three months ended September 30, 2007, and September 30, 2006, respectively, and \$2.2 million and \$0.6 million in the nine months ended September 30, 2007, and September 30, 2006, respectively, which is included in indirect and selling expenses.

As of September 30, 2007, there was \$7.0 million of total unrecognized compensation cost related to unvested stock-based compensation. These unrecognized compensation costs are expected to be recognized over a three- to five-year period on a straight-line basis.

Depreciation and Amortization

Depreciation and amortization include the depreciation of computers, furniture, and other equipment; the amortization of the costs of software we use internally; leasehold improvements; and the amortization of intangible assets arising from acquisitions.

INCOME TAX EXPENSE

Our effective tax rate of 40.7% for the nine months ended September 30, 2007, was higher than the statutory tax rate primarily due to permanent tax differences related to expenses not deductible for tax purposes and prior year adjustments, decreased by a federal tax credit.

RESULTS OF OPERATIONS

Three Months ended September 30, 2007, compared to Three Months ended September 30, 2006

The following table sets forth certain items from our unaudited consolidated statements of operations and the period-over-period rate of change in each of them and expresses these items as a percentage of revenue for the periods indicated.

Table of Contents

	Three Months Ended September 30,				Year-to-Year Change Three Months Ended September 30, 2006 to 2007	
	2007	2006	2007	2006	Dollars	
	Dollars		Dollars		Dollars	
	(In Thousands)		Percentages		(In Thousands)	Percent
Revenue	\$ 198,813	\$ 107,801	100.0%	100.0%	\$ 91,012	84.4%
Direct Costs	147,468	73,213	74.2%	67.9%	74,255	101.4%
Operating Expenses						
Indirect and selling expenses	29,639	27,299	14.9%	25.3%	2,340	8.6%
Depreciation and amortization	1,879	949	0.9%	0.9%	930	98.0%
Total Operating Expenses	31,518	28,248	15.8%	26.2%	3,270	11.6%
Earnings from Operations	19,827	6,340	10.0%	5.9%	13,487	212.7%
Other (Expense) Income						
Interest expense, net	(600)	(1,181)	(0.3)%	(1.1)%	581	(49.2)%
Other		290	0.0%	0.3%	(290)	
Income before Income Taxes	19,227	5,449	9.7%	5.1%	13,778	252.9%
Income Tax Expense	8,133	2,476	4.1%	2.3%	5,657	228.5%
Net Income	\$ 11,094	\$ 2,973	5.6%	2.8%	\$ 8,121	273.2%

Revenue. Revenue for the three months ended September 30, 2007, was \$198.8 million, compared to \$107.8 million for the three months ended September 30, 2006, representing an increase of \$91.0 million or 84.4%. The increase was primarily due to increased revenue associated with The Road Home contract for the three months ended September 30, 2007.

Direct costs. Direct costs for the three months ended September 30, 2007, were \$147.5 million, or 74.2% of revenue, compared to \$73.2 million, 67.9% of revenue, for the three months ended September 30, 2006. This increase resulted primarily from the corresponding increase in activities under The Road Home contract, which included an increase in subcontracted costs to other parties.

Indirect and selling expenses. Indirect and selling expenses for the three months ended September 30, 2007, were \$29.6 million, or 14.9% of revenue, compared to \$27.3 million, or 25.3% of revenue for the three months ended September 30, 2006. The increase in indirect and selling expenses was due principally to indirect costs associated with the operations of Z-Tech. The decrease in indirect costs as a percentage of revenue for the three months ended September 30, 2007, was primarily attributable to the large increase in revenue on The Road Home contract. Given the significance of subcontracted work on The Road Home project, there has not been a substantial increase in indirect costs to support the current revenue volume.

Depreciation and amortization. Depreciation and amortization for the three months ended September 30, 2007, was \$1.9 million, or 0.9% of revenue, compared to \$0.9 million, or 0.9% of revenue for the three months ended September 30, 2006. This 98% increase in depreciation and amortization resulted primarily from the amortization of intangible assets recorded as a result of our January 2007 and June 2007 acquisitions.

Earnings from Operations. For the three months ended September 30, 2007, earnings from operations were \$19.8 million, or 10.0% of revenue, compared to \$6.3 million, or 5.9% of revenue for the three months ended September 30, 2006. Earnings from operations increased primarily due to the increased volume of services from The Road Home contract for the three months ended September 30, 2007, and the non-recurring \$2.7 million charge to earnings for a one-time bonus accrued in the third quarter of 2006.

Interest expense, net. For the three months ended September 30, 2007, net interest expense was \$0.6 million, compared to \$1.2 million for the three months ended September 30, 2006. The 49.2% decrease was due primarily to lower levels of debt resulting from the completion of our initial public offering in September of 2006 and improved operating cash flows.

Income tax expense. Our effective income tax rate for the three months ended September 30, 2007, was 42.3% compared to 45.4% for the three months ended September 30, 2006. The effective tax rate decreased due to a significant decrease in the ratio of non-tax-deductible expenses to estimated income.

Edgar Filing: ICF International, Inc. - Form 10-Q

Nine Months ended September 30, 2007, compared to Nine Months ended September 30, 2006

The following table sets forth certain items from our unaudited consolidated statements of operations and the period-over-period rate of change in each of them and expresses these items as a percentage of revenue for the periods indicated.

Table of Contents

	Nine Months Ended September 30,				Year-to-Year Change

	Dollars				Dollars	
	(In Thousands)		Percentages		(In Thousands)	Percent
Revenue	\$ 540,697	\$ 217,394	100.0%	100.0%	\$ 323,303	148.7%
Direct Costs	398,260	139,675	73.7%	64.3%	258,585	185.1%
Operating Expenses						
Indirect and selling expenses	85,107	67,160	15.7%	30.9%	17,947	26.7%
Depreciation and amortization	4,220	2,615	0.8%	1.2%	1,605	61.4%
Total Operating Expenses	89,327	69,775	16.5%	32.1%	19,552	28.0%
Earnings from Operations	53,110	7,944	9.8%	3.6%	45,166	568.6%
Other (Expense) Income						
Interest expense, net	(928)	(3,346)	(0.2)%	(1.5)%	2,418	(72.3)%
Other	26	290	0.0%	0.1%	(264)	(91.0)%
Income (loss) before Income Taxes	52,208	4,888	9.6%	2.2%	47,320	968.1%
Income Tax Expense	21,272	2,227	3.9%	1.0%	19,045	855.2%
Net Income	\$ 30,936	\$ 2,661	5.7%	1.2%	\$ 28,275	1062.6%

Revenue. Revenue for the nine months ended September 30, 2007, was \$540.7 million, compared to \$217.4 million for the nine months ended September 30, 2006, representing an increase of \$323.3 million, or 148.7%. The increase was primarily due to revenue of \$350.6 million associated with The Road Home contract for the nine months ended September 30, 2007, compared to revenue of \$55.5 million for the nine months ended September 30, 2006.

Direct costs. Direct costs for the nine months ended September 30, 2007, were \$398.3 million, or 73.7% of revenue, compared to \$139.7 million, or 64.3% of revenue, for the nine months ended September 30, 2006. This increase resulted primarily from the corresponding increase in activities under The Road Home contract. The increase in direct costs as a percentage of revenue was primarily attributable to the large percentage of work that was subcontracted to other parties on The Road Home contract.

Indirect and selling expenses. Indirect and selling expenses for the nine months ended September 30, 2007, were \$85.1 million, or 15.7% of revenue, compared to \$67.2 million, or 30.9% of revenue, for the nine months ended September 30, 2006. The 26.7% increase in indirect and selling expenses was due principally to compensation expense. The decrease in indirect costs as a percentage of revenue for the nine months ended September 30, 2007, was primarily attributable to the large increase in revenue on The Road Home contract (primarily from increased subcontractor activities).

Depreciation and amortization. Depreciation and amortization for the nine months ended September 30, 2007, was \$4.2 million, or 0.8% of revenue, compared to \$2.6 million, or 1.2% of revenue, for the nine months ended September 30, 2006. This 61.4% increase in depreciation and amortization resulted primarily from the amortization of intangible assets recorded as a result of our January 2007 and June 2007 acquisitions.

Earnings from Operations. For the nine months ended September 30, 2007, earnings from operations were \$53.1 million, or 9.8% of revenue, compared to \$7.9 million, or 3.6% of revenue, for the nine months ended September 30, 2006. Earnings from operations increased primarily due to the increased volume of services from The Road Home contract for the nine months ended September 30, 2007, and the non-recurring \$4.3 million charge to earnings for the abandonment of space in Lexington and San Francisco in the second quarter ended June 30, 2006, and a \$2.7 million one-time charge for a bonus accrued in the third quarter of 2006.

Interest expense, net. For the nine months ended September 30, 2007, net interest expense was \$0.9 million, compared to \$3.3 million for the nine months ended September 30, 2006. The 72.3% decrease was due primarily to lower levels of debt resulting from the completion of our initial public offering in the fall of 2006 and improved operating cash flows.

Edgar Filing: ICF International, Inc. - Form 10-Q

Income tax expense. Our effective income tax rate for the nine months ended September 30, 2007, was 40.7% compared to 45.6% for the nine months ended September 30, 2006. The effective tax rate decreased due to a significant decrease in the ratio of non-tax-deductible expenses to estimated income and the use of a federal tax credit.

SELECTED KEY METRICS

Revenue

We earn revenue from services that we provide to government and commercial clients in four key markets:

energy and climate change;

environment and infrastructure;

Table of Contents

health, human services and social programs; and

homeland security and defense.

The following table shows our revenue from each of our four markets as a percentage of total revenue for the periods indicated. For each client, we have attributed all revenue from that client to the market we consider to be the client's primary market, even if a portion of that revenue relates to a different market. The Road Home contract is classified in our health, human services and social programs market.

	Three Months Ended		Nine Months Ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
Energy and climate change	8%	9%	8%	13%
Environment and infrastructure	9%	14%	8%	21%
Health, human services and social programs	75%	64%	76%	45%
Homeland security and defense	8%	13%	8%	21%
Total	100%	100%	100%	100%

Our primary clients are the State of Louisiana and agencies and departments of the U.S. federal government. The following table shows our revenue by type of client as a percentage of total revenue for the periods indicated.

	Three Months Ended		Nine Months Ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
U.S. state and local government	65%	55%	67%	32%
U.S. federal government	28%	36%	26%	56%
Domestic commercial	5%	6%	5%	8%
International	2%	3%	2%	4%
Total	100%	100%	100%	100%

Revenue generated from our state and local government clients has increased in 2007, due primarily to our work in connection with The Road Home contract.

Contract Mix

Our contracts with clients include time-and-materials contracts, cost-based contracts (including cost-based fixed fee, cost-based award fee and cost-based incentive fee, as well as grants and cooperative agreements), and fixed-price contracts. Our contract mix varies from year to year due to numerous factors, including our business strategies and the procurement activities of our clients. Unless the content requires otherwise, we use the term "contracts" to refer to contracts and any task orders or delivery orders issued under a contract. The following table shows our revenue from each of these types of contracts as a percentage of total revenue for the periods indicated.

	Three Months Ended		Nine Months Ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
Time-and-materials	57%	43%	54%	43%
Cost-based	9%	15%	8%	24%
Fixed-price	34%	42%	38%	33%

Edgar Filing: ICF International, Inc. - Form 10-Q

Total 100% 100% 100% 100%

Time-and-materials contracts. Under time-and-materials contracts, we are paid for labor at fixed hourly rates and generally reimbursed separately for allowable materials, other direct costs and out-of-pocket expenses. Our actual labor costs may vary from the expected costs that formed the basis for our negotiated hourly rates if we utilize different employees than anticipated, need to hire additional employees at higher wages, increase the compensation paid to existing employees, or are able to hire employees at lower-than-expected rates. Our non-labor costs, such as fringe benefits, overhead and general and administrative costs, also may be higher or lower than we anticipated. To the extent that our actual labor and non-labor costs under a time-and-materials contract vary significantly from the negotiated hourly rates, we can generate more or less than the targeted amount of profit or, perhaps, a loss.

Table of Contents

Cost-based contracts. Under cost-based contracts, we are paid based on the allowable costs we incur, and usually receive a fee. All of our cost-based contracts reimburse us for our direct labor and fringe-benefit costs that are allowable under the contract, but many limit the amount of overhead and general and administrative costs we can recover, which may be less than our actual overhead and general and administrative costs. In addition, our fees are constrained by fee ceilings and in certain cases, such as with grants and cooperative agreements, we may receive no fee. Because of these limitations, our cost-based contracts, on average, are our least profitable type of contract and we may generate less than the expected return. Cost-based fixed fee contracts specify the fee to be paid. Cost-based incentive fee and cost-based award fee contracts provide for increases or decreases in the contract fee, within specified limits, based upon actual results as compared to contractual targets for factors such as cost, quality, schedule and performance.

Fixed-price contracts. Under fixed-price contracts, we perform specific tasks for a pre-determined price. Compared to time-and-materials and cost-based contracts, fixed-price contracts involve greater financial risk because we bear the full impact of labor and non-labor costs that exceed our estimates, in terms of costs per hour, number of hours, and all other costs of performance, in return for the full benefit of any cost savings. We therefore may generate more or less than the targeted amount of profit or, perhaps, a loss.

Contract Backlog

We define *total backlog* as the future revenue we expect to receive from our contracts and other engagements. We generally include in backlog the estimated revenue represented by contract options that have been priced, though not exercised. We do not include any estimate of revenue relating to potential future delivery orders that might be awarded under our General Services Administration Multiple Award Schedule contracts, other Indefinite Delivery/Indefinite Quantity (IDIQ) contracts, or other contract vehicles that are also held by a large number of firms, and under which potential future delivery orders or task orders might be issued by any of a large number of different agencies and are likely to be subject to a competitive bidding process. We do, however, include potential future work expected to be awarded under IDIQ contracts that are available to be utilized by a limited number of potential clients and are held either by us alone or by a limited number of firms.

We include expected revenue in *funded backlog* when we have been authorized by the client to proceed under a contract up to the dollar amount specified by our client, and this amount will be owed to us under the contract after we provide the services pursuant to the authorization. If we do not provide services authorized by a client prior to the expiration of the authorization, we remove amounts corresponding to the expired authorization from backlog. We do include expected revenue under an engagement in funded backlog when we do not have a signed contract if we have received client authorization to begin or continue working and we expect to sign a contract for the engagement. In this case, the amount of funded backlog is limited to the amount authorized. Our funded backlog does not represent the full revenue potential of our contracts because government clients, and sometimes other clients, generally authorize work under a particular contract on a yearly or more frequent basis, even though the contract may extend over a number of years. Most of the services we provide to commercial clients are provided under contracts with relatively short durations that authorize us to provide services and, as a consequence, our backlog attributable to these clients is typically reflected in funded backlog and not in unfunded backlog.

We define *unfunded backlog* as the difference between total backlog and funded backlog. Our revenue estimates for purposes of determining unfunded backlog for a particular contract are based, to a large extent, on the amount of revenue we have recently recognized on that contract, our experience in utilizing contract capacity on similar types of contracts, and our professional judgment. Our revenue estimate for a contract included in backlog is sometimes lower than the revenue that would result from our client utilizing all remaining contract capacity.

Although we expect our contract backlog to result in revenue, the timing of revenue associated with both funded and unfunded backlog will vary based upon a number of factors, and we may not recognize revenue associated with a particular component of backlog when anticipated, or at all. Our government clients generally have the right to cancel any contract, or ongoing or planned work under any contract, at any time. In addition, there can be no assurance that revenue from funded or unfunded backlog will have similar profitability to previous work or will be profitable at all. Generally speaking, we believe the risk that a particular component of backlog will not result in future revenue is higher for unfunded backlog than for funded backlog.

Our estimates of funded, unfunded and total backlog at the dates indicated were as follows:

	September 30,	
	2007	2006
	(in millions)	
Funded	\$ 508.2	\$ 154.1
Unfunded	\$ 300.3	\$ 163.3

Edgar Filing: ICF International, Inc. - Form 10-Q

Total	\$ 808.5	\$ 317.4
-------	----------	----------

The backlog estimates at September 30, 2007, include an estimated funded backlog of \$289.4 million associated with The Road Home contract, and \$65.5 of total backlog associated with Z-Tech.

Table of Contents**FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES**

Financial Condition. Contract receivables, net, increased to \$157.2 million as of September 30, 2007, compared to \$110.5 million as of December 31, 2006, due to growth in revenue, most significantly under The Road Home contract. The other significant change in our assets from December 31, 2006, was an increase in goodwill from \$83.8 million to \$111.7 million as of September 30, 2007, resulting from our acquisitions of EEA, APCG, and Z-Tech.

Our current liabilities increased to \$140.8 million as of September 30, 2007, from \$96.3 million as of December 31, 2006, due primarily to an \$18.2 million increase in accounts payable and an \$21.0 million increase in accrued expenses. Both of these increases were primarily attributable to activity levels (including those of subcontractors) under The Road Home contract. There was no net increase in long-term debt from December 31, 2006 to September 2007.

Liquidity. Short-term liquidity requirements are created by our use of funds for working capital, capital expenditures, and the need to provide debt service. We expect to meet these requirements through a combination of cash flow from operations and borrowings under our Amended and Restated Credit Agreement.

We anticipate that our long-term liquidity requirements, including any further acquisitions, will be funded through a combination of cash flow from operations, borrowings under our Amended and Restated Credit Agreement, additional secured or unsecured debt, or the issuance of common or preferred stock, each of which may be initially funded through borrowings under our Amended and Restated Credit Agreement.

Under the terms of our Amended and Restated Credit Agreement, we are required to comply with financial and non-financial covenants. We were in compliance with all such covenants as of September 30, 2007.

Cash and Cash Equivalents. We consider cash on deposit and all highly liquid investments with original maturities of three months or less to be cash and cash equivalents. Cash and cash equivalents, including marketable securities, was \$2.1 million and \$3.0 million on September 30, 2007, and December 31, 2006, respectively.

Credit Facility and Borrowing Capacity. We amended our Amended and Restated Credit Agreement on June 28, 2007, to increase the capacity of our revolving line of credit from \$65 million to \$95 million. In this amendment, our lenders also consented to our acquisition of Z-Tech. As of September 30, 2007, we had a borrowing base of \$95 million, with \$0 million outstanding on our revolving line of credit and letters of credit outstanding totaling \$0.5 million, resulting in a borrowing availability of \$94.5 million.

Cash Flow. The following table sets forth our sources and uses of cash for the nine months ended September 30, 2007, and September 30, 2006:

	Nine Months Ended	
	September 30, 2007	September 30, 2006
	(in thousands)	
Net cash provided by operations	\$ 35,558	\$ 39,172
Net cash used in investing activities	(43,742)	(2,612)
Net cash provided by financing activities	7,064	(35,419)
Effect of exchange rate on cash	197	(45)
Net (decrease) increase in cash	\$ (923)	\$ 1,096

Our operating cash flow is primarily affected by the overall profitability of our contracts, our ability to invoice and collect from our clients in a timely manner, and our ability to manage our vendor payments. We bill most of our clients monthly after services are rendered. Operating activities provided cash of \$35.6 million in the nine months ended September 30, 2007; operating activities provided \$39.2 million of cash in the nine months ended September 30, 2006. Cash flows from operating activities for the first nine months of 2007 were positively impacted by increased profitability and the timing of subcontract and vendor payments, which largely offset an increase in contract receivables.

Investing activities used cash of \$43.7 million for the nine months ended September 30, 2007, compared to \$2.6 million for the nine months ended September 30, 2006. The cash used in investing activities for the first nine months of 2007 was primarily for payments for business acquisitions. The cash used in investing activities for the first nine months of 2006 was primarily for capital expenditures.

Edgar Filing: ICF International, Inc. - Form 10-Q

For the nine months ended September 30, 2007, cash flow provided by financing activities of \$7.1 million was attributable primarily to \$6.8 million in net proceeds from the exercise of stock options, including the tax benefits associated with exercising the options. For the nine months ended September 30, 2006, cash flow used in financing activities was attributable primarily to a \$35.3 million in net debt payments.

Table of Contents

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

For the nine months ended September 30, 2007, we did not have any off-balance sheet arrangements. Information relating to payments due under contractual obligations is presented in our Annual Report on Form 10-K for the year ended December 31, 2006. There were no material changes in our payments due under contractual obligations during the first nine months of 2007.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in the disclosures discussed in the section entitled "Quantitative and Qualitative Disclosures About Market Risk" in Part II, Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2006.

Item 4. Controls and Procedures

Disclosure Controls and Procedures and Internal Controls Over Financial Reporting. As of September 30, 2007, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (Exchange Act). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in our reports filed with the SEC under the Exchange Act is (1) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and (2) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. There have been no significant changes in our internal controls over financial reporting during the period covered by this Quarterly Report on Form 10-Q or, to our knowledge, in other factors that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Limitations on the Effectiveness of Controls. Control systems, no matter how well conceived and operated, are designed to provide a reasonable, but not an absolute, level of assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are involved in various legal matters and proceedings concerning matters arising in the ordinary course of business. We currently believe that any ultimate liability arising out of these matters and proceedings will not have a material adverse effect on our financial position, results of operations, or cash flows.

Item 1A. Risk Factors

Other than those risks outlined below, there have been no material changes in those risk factors discussed in the section entitled "Risk Factors" disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2006. The portion of our "Risk Factors" section in our Annual Report on Form 10-K entitled "Risks Related to The Road Home Contract" has been updated and is replaced in its entirety by the below section:

Risks Related to The Road Home Contract

In June 2006, our subsidiary, ICF EMS, was awarded a contract by the State of Louisiana, Office of Community Development, to manage a program designed primarily to help homeowners and landlords of small rental properties affected by Hurricanes Rita and Katrina by providing them compensation for the repair, rebuilding, or relocation of homes and small rental properties for uninsured, uncompensated damages. The contract has a stated term of three years. However, due to the acceleration of the program, we expect the portion of the program for which there is funding may be concluded during 2008. The acceleration of the program has also accelerated the pace at which we have earned revenues compared to the revenue anticipated over what had been expected to be a three-year program. This factor, together with the challenges of predicting the future timing of work by our numerous subcontractors, makes it especially difficult for us to forecast the revenues and earnings associated with the contract, and may accelerate to earlier periods our need to win new business to replace the revenues from the contract.

The Road Home contract accounted for approximately 35% of our revenue for all of 2006 and approximately 65% of our revenue for the nine months ended September 30, 2007. We expect it to continue to be our largest contract over the remaining life of the program.

The State of Louisiana originally envisioned The Road Home program as requiring \$8.1 billion of funding. As the program has been implemented, it has become apparent that supplemental funds will be required to respond to the needs addressed by the program. This is for two primary reasons: (i) there were significantly more applicants to the program than originally anticipated; and (ii) the average amount of funding provided to each applicant has been higher than expected. The funding shortfall is currently estimated at approximately \$4 billion. Should additional funding be made available to complete The Road Home program, there is no assurance that our Road Home contract will be amended to provide for additional revenue payable to us or our subcontractors.

The Road Home contract has provided us with significant opportunities, but it has also created substantial risks, including those described below. If we are unable to satisfy the requirements of The Road Home contract, our profitability could be reduced and we could suffer a loss. It is also possible that the contract could be terminated for a number of reasons, including for cause, for convenience or for lack of availability of additional grant monies. Adverse publicity surrounding this contract, or its premature termination, could damage our reputation and our ability to win future assignments, and could adversely affect our stock price. In short, The Road Home contract substantially increases the risk profile of our business.

The Road Home Contract entails substantial funding and performance risks.

The contract contemplates three phases of work. Phase One ran from June through October 2006. Although we entered into a contract for Phases Two and Three in October 2006, there is no assurance the State of Louisiana will continue to fund the contract, particularly if the State is not satisfied with our performance and our subcontractors' performance. Further, as discussed above, it is currently estimated that the program will not have sufficient funding to satisfy its goals.

The project's complexity presents a number of performance and management risks. For example, we have to manage a large number of staff working under difficult deadlines and intense public scrutiny. We must also manage a large number of subcontractors who collectively perform a substantial portion of the work on the contract. Effectively organizing and managing these subcontractors presents an ongoing performance

challenge.

Table of Contents

Other performance challenges include ensuring that the applications are processed and funds are disbursed in a timely fashion, developing and implementing means of detecting and deterring fraud and theft by actual and purported beneficiaries of the program and others without unduly delaying program implementation, insuring the physical safety of all those working on the program, including the home evaluators and others in the field, and complying with a significant number of federal and state legal requirements, some of which have changed since the contract began. Processing each application from a homeowner involves many different, inter-related steps for which we are responsible, including: meeting with each applicant in person to ensure that the required information has been provided; visiting each property; determining the pre-storm value and extent of damage; obtaining information from numerous sources concerning insurance benefits and other compensation already received by each applicant; verifying that the applicant owned and occupied the home as his or her main residence at the time of the storm; calculating benefits under the different options available to each applicant; handling any applicant concerns; and conducting a closing to disburse the funds based on the option selected by the homeowner. To accomplish all these steps, we have had to develop, implement, and maintain a reliable, secure management information system. An entirely separate process is used for the Small Rental Property Program.

The State of Louisiana has the right to cancel The Road Home contract, a right it could exercise at any time, but particularly if we fail to perform or are simply perceived as failing to perform under the contract, whether or not we are actually in compliance with the terms of the contract. Any termination of the contract or significant implementation change could have an adverse effect on our operating results and stock price. Any termination of the contract would also likely result in substantial disputes and litigation with the State of Louisiana and others and would divert management attention from other matters. Even a threat or perceived threat of such action would adversely affect our stock price and be a distraction to management.

The Road Home Contract presents both pricing and financial risks.

The Road Home contract has a fixed-price component. There is no assurance that this component will yield any profit, and it could result in a loss. In addition, the State of Louisiana is compensating us for services being provided under the contract based on hourly rates or unit prices, and there can be no assurance that we can profitably perform these services for such rates or unit prices. Some of these hourly rates and unit prices have been lowered during the course of the performance of the contract, and we expect future negotiations with the State could result in additional changes in such rates and prices during the remainder of the contract, further increasing this risk.

The Road Home contract has been amended to include performance measures, with financial penalties for failure to achieve these measures. In the future, the contract could be further amended in ways that prove to be unfavorable to us. There is, therefore, no assurance that this contract can be performed profitably. Because of the size of The Road Home contract, poor financial results from this contract would adversely affect our overall operating results and the value of our stock.

The Road Home Contract exposes us to numerous different types of liability, some of which could be very substantial.

Homeowners or rental housing owners or others dissatisfied with the amount of money they have received from, or their treatment under, this program may take action against the State of Louisiana and us, including possible class action or other litigation. These actions could disrupt the program significantly by diverting substantial amounts of management time and resources and could result in substantial liability for us. Such lawsuits have been filed. However, to date such suits have not disrupted the program.

Due to the acceleration of the program and uncertainties as to further funding, we may be forced to terminate employees working under The Road Home contract earlier than initially anticipated. If and when the terminations occur, those former employees may take action against us, whether or not merited, including possible class action or other litigation.

Although much of the work under the contract will be performed by subcontractors, the State of Louisiana will consider us responsible for timely, satisfactory performance of all aspects of the contract.

We and our subcontractors gather and maintain sensitive information concerning potential and actual program participants. Failure to maintain and secure such information properly and failure to take appropriate actions to prevent fraud could result in substantial liability for us.

Edgar Filing: ICF International, Inc. - Form 10-Q

Although the contract provides that, with several exceptions, we may charge as an expense under the contract reasonable costs and fees incurred in defending and paying claims brought by third parties arising out of our performance, there can be no assurance that all of our costs and fees will be reimbursed. The contract also provides that we will indemnify the State of Louisiana for certain liabilities. Such liabilities could be substantial and exceed the amounts of, or may not be covered by, available insurance.

Table of Contents

Because of its size and scope, The Road Home contract subjects us to increased public scrutiny and pressure, as well as to numerous additional audits, reviews and investigations, all of which will divert management attention and increase our costs.

The Road Home contract may be the largest non-construction contract ever awarded by the State of Louisiana. As a result, members of both the executive and legislative branches of the State of Louisiana government have paid, and will continue to pay, substantial attention to this contract. Both houses of the state legislature have held numerous hearings at which our management has been asked to testify. Recent elections in Louisiana have resulted in a new Governor-elect and changes in the state legislature. We are uncertain of the positions of the new legislature and administration on, and anticipated scrutiny of, The Road Home contract and our efforts in connection therewith. We expect that there will continue to be intense public and political pressure associated with The Road Home contract.

In addition, the contract has been, and we expect it to continue to be, audited, investigated, reviewed and monitored frequently by federal and state authorities and other organizations. These activities consume significant management time and effort. Despite our best efforts, there is no assurance that these activities will not yield adverse results or publicity. The high level of, and number of parties engaged in, scrutiny of our performance under The Road Home contract significantly heightens the risk of adverse findings. Such findings from an audit, investigation, monitoring or similar activity could subject us to civil and criminal penalties and administrative sanctions from state or federal authorities, including partial or complete termination of The Road Home contract, repayments of amounts already received under the contract, forfeiture of profits, suspension of payments, fines, claims for reimbursement for the costs resulting from any errors or omissions in our performance under the contract, and suspension or debarment from doing business with the State of Louisiana or federal agencies and departments, any of which could substantially adversely affect our reputation, our revenue and operating results, and the value of our stock.

The work to be performed under this contract is of significant public interest: encouraging homeowners and rental housing landlords to rebuild in Louisiana. The media in Louisiana, especially newspapers and radio networks, have covered this program closely. Adverse publicity associated with complaints from homeowners, rental housing owners, terminated employees under the program, or others is likely to harm our reputation even if we are implementing the contract consistent with contract terms and conditions. This publicity might bring, as it has in the past, increased public pressure on state officials and disrupt contract implementation while senior management deals with the effects of such publicity. In the past, negative publicity has had an adverse effect on our stock price.

The Road Home contract has increased our working capital needs, and failure by the State of Louisiana to pay our invoices in a timely manner could further increase these needs.

Although The Road Home contract includes payment provisions that we believe are reasonable, the contract has increased our working capital needs. The contract contemplates that we will provide invoices twice per month and that the state will make every reasonable effort to make payments within 25 days after receipt of an invoice. Because of the extraordinary nature of the contract, however, we cannot predict the effect of the contract on our working capital. Our future working capital needs could vary greatly depending on the timing of payments by the state or our need to pay the Road Home staff and subcontractors. In addition to possible payment processing delays, the state has not formally accepted all of our deliverables made to date under the contract. It is possible that objections to such deliverables could be raised in the future and result in payment delays. Particularly if there is an early termination of the program due to lack of funding or other reasons, we would anticipate an increased likelihood of dispute regarding payment terms and amounts as the parties approach the end of the contract. Such disputes and termination risks would serve to exacerbate our working capital needs in the event of de-mobilizing to exit the contract.

As revenue from The Road Home contract decreases over time, our operating results will be adversely affected if we cannot replace that revenue, either by organic growth, acquisitions, or other investments.

In October 2006, we began work on Phase Two, the production phase, of The Road Home contract. Subsequently, the State of Louisiana has demanded that we accelerate our efforts on The Road Home contract in order for applications to be processed more quickly. The start-up of production, together with this acceleration, resulted in increased revenue in the fourth quarter of 2006 and the nine months ended September 30, 2007. As applications are processed, however, we expect revenue from this contract to decline in 2008 and beyond. Additionally, as outlined above, there is funding uncertainty for the program. If we are unable to replace this revenue with new contracts (whether in our existing businesses or from different services, clients, practice areas, offices, geographic focus, or otherwise) or from acquisitions or other investments, our operating results will be adversely affected and our stock price could decline.

The Road Home contract is vulnerable to fraud.

As with any housing program, The Road Home contract is susceptible to fraud by both employees and applicants, and our failure to take appropriate actions to prevent fraud could result in substantial liability. Although we have identified some employees and some applicants who have attempted to defraud the program, none of those actions have, in management's opinion, been material to date. We have promptly

Edgar Filing: ICF International, Inc. - Form 10-Q

terminated each employee found to be attempting to defraud the program and the government may take further action against those individuals. This has had no significant effect on the Company's financial reporting.

Table of Contents

We face uncertainty with a new legislature and administration in the State of Louisiana.

Recently, Louisiana conducted its statewide election, resulting in changes to its legislature and a new Governor-elect. We are uncertain of the positions of the new legislature and administration on, and anticipated scrutiny of, The Road Home contract and our efforts in connection therewith. It is possible that the new members of the legislative and executive branches may demand that new studies and research be conducted regarding the hurricane destruction and rebuilding efforts, resulting in work delays, stop-work and/or payment delays.

Risks Related to Acquisitions

The risk factor in our Annual Report entitled "We may not be successful in identifying acquisition candidates, and if we undertake acquisitions, they could fail to perform as we expect, increase our costs and liabilities, and disrupt our business," is replaced by the below risk factors:

Growing through acquisitions is a key element of our business strategy, and we are constantly reviewing acquisition opportunities. These activities may involve significant costs, be disruptive and not be successful, and will divert the attention of management from existing operations.

One of our strategies is to grow through selected acquisitions. We believe this is necessary for a public company of our size in our business, particularly given the risks associated with, and the limited life of, The Road Home contract and the related revenue stream. As a result, at any given point in time we may be evaluating several acquisition opportunities. We may also have outstanding at a given point in time one or more expressions of interest, agreements in principle or letters of intent with respect to potential acquisitions, which are subject to completion of due diligence and other significant conditions as well as confidentiality agreements with the targets. Our experience is that acquisition targets demand confidentiality as a matter of course and allow relatively little diligence before entering into a preliminary agreement in principle. We insist on including diligence and other conditions in such preliminary agreements and engage in what we believe is thorough due diligence with respect to potential acquisitions. We find that potential acquisitions subject to preliminary agreements in principle often are not consummated, or are consummated on terms materially different than those initially agreed to. Accordingly, our normal practice is not to disclose potential acquisitions until definitive agreements are achieved and, in some cases, material conditions precedent are satisfied.

When we are able to identify an appropriate acquisition candidate, we may not be able to negotiate the price and other terms of the acquisition successfully or finance the acquisition on terms satisfactory to us. Our out-of-pocket expenses in identifying, researching and negotiating potential acquisitions will likely be significant, even if we do not ultimately acquire identified businesses. In addition, negotiations of potential acquisitions and the integration of acquired business operations will divert management attention away from day-to-day operations and may reduce staff utilization during a transition period.

When we undertake acquisitions, they may present integration challenges, fail to perform as we expect, increase our liabilities, and reduce our earnings.

When we complete acquisitions, it may be difficult and costly to integrate the acquired businesses due to geographic differences in the locations of personnel and facilities, differences in corporate cultures, disparate business models or other reasons. If we are unable to integrate companies we acquire successfully, our revenue and operating results could suffer. In addition, we may not be successful in achieving the anticipated cost efficiencies and synergies from these acquisitions, including our strategy of offering our services to existing clients of acquired companies to increase our revenue and profit. In fact, our costs for managerial, operational, financial and administrative systems may increase and be higher than anticipated. In addition, we may experience attrition, including key employees of acquired and existing businesses, during and following the integration of an acquired business into our Company. This attrition could adversely affect our future revenue and operating results and prevent us from achieving the anticipated benefits of the acquisition. Acquisitions of businesses or other material operations may require additional debt or equity financing or both, resulting in additional leverage or dilution of ownership, or both. Moreover, we may need to record write-downs from future impairments of identified intangible assets and goodwill, which could reduce our future reported earnings.

Risks Related to Sarbanes-Oxley Act of 2002

The risk factor in our Annual Report regarding Section 404 of the Sarbanes-Oxley Act of 2002 has been updated, as shown below:

Table of Contents

Section 404 of the Sarbanes-Oxley Act of 2002 will require us to document and test our internal controls over financial reporting during fiscal 2007 and beyond and to report on our assessment as to the effectiveness of these controls. Any delays or difficulty in satisfying these requirements or negative reports concerning our internal controls could adversely affect our future results of operations and our stock price.

Section 404 of the Sarbanes-Oxley Act of 2002 requires us to document and test the effectiveness of our internal controls over financial reporting in accordance with an established internal control framework and to report on our conclusion as to the effectiveness of our internal controls. It also may require our independent registered public accounting firm to test our internal controls over financial reporting and report on the effectiveness of such controls for our fiscal year ending December 31, 2007, and subsequent years. In addition, we are required under the Securities Exchange Act of 1934, as amended, to maintain disclosure controls and procedures and internal control over financial reporting. Moreover, it may cost us more than we expect to comply with these control- and procedure-related requirements.

We may in the future discover areas of our internal controls that need improvement, particularly with respect to businesses that we have recently acquired or may acquire in the future. The adequacy of our disclosure controls and procedures and internal control over financial reporting is challenged by the size, complexity and acceleration of, as well as the number of subcontractors, changes and scrutiny under, The Road Home contract. We cannot be certain that any remedial measures we take, in response to challenges under The Road Home contract or otherwise, will ensure that we implement and maintain adequate internal controls over our financial processes and reporting in the future. Any failure to implement required new or improved controls, or difficulties encountered in their implementation could harm our operating results or cause us to fail to meet our reporting obligations. If we are unable to conclude that we have effective internal controls over financial reporting, or if our independent auditors are unable to provide us with an unqualified report regarding the effectiveness of our internal controls over financial reporting as of December 31, 2007, and in future periods as required by Section 404, investors could lose confidence in the reliability of our financial statements, which could result in a decrease in the value of our common stock. Failure to comply with Section 404 could potentially subject us to sanctions or investigations by the SEC, the Nasdaq Global Select Market or other regulatory authorities, which could also result in a decrease in the value of our common stock.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There have been no changes to the Recent Sales of Unregistered Securities disclosed in Part II, Item 5 of our Annual Report on Form 10-K for the year ended December 31, 2006, our Form 10-Q for the periods ended March 31, 2007 and June 30, 2007, other than a total of 1,199 shares of unregistered stock, valued at approximately \$24,472, issued to three directors of the Company on July 2, 2007, in lieu of cash for director fee compensation. The issuance of these shares is exempt under Section 4(2) of the Securities Act of 1933, as amended.

There have been no purchases of equity securities by the issuer during the three months ended September 30, 2007.

Item 3. Defaults Upon Senior Securities

None

Item 4. Submission of Matters to a Vote of Security Holders

None

Item 5. Other Information

None
