Table of Contents**DARDEN RESTAURANTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****Note 1. Basis of Presentation**

Darden Restaurants, Inc. (we, our or the Company) owns and operates casual dining restaurants in the United States and Canada under the trade names Red Lobster®, Olive Garden®, LongHorn Steakhouse®, The Capital Grille®, Bahama Breeze®, Smokey Bones Barbeque & Grill®, Seasons 52®, Hemenway's Seafood Grille & Oyster Bar® and The Old Grist Mill Tavern®. We have prepared these consolidated financial statements pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally presented in annual financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal recurring nature. Operating results for the quarter and six months ended November 25, 2007 are not necessarily indicative of the results that may be expected for the fiscal year ending May 25, 2008.

These statements should be read in conjunction with the consolidated financial statements and related notes to consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended May 27, 2007. The accounting policies used in preparing these consolidated financial statements are the same as those described in our Form 10-K, although we are still evaluating the impact of the acquisition of RARE Hospitality International, Inc. (RARE). See Note 2 for further discussion of the RARE acquisition.

We prepare our consolidated financial statements in conformity with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of sales and expenses during the reporting period. Actual results could differ from those estimates.

During the fourth quarter of fiscal 2007, we announced our intent to close or hold for sale all Smokey Bones and Rocky River Grillhouse restaurants and, additionally, we closed nine Bahama Breeze restaurants. Consistent with the discontinued operations reporting provisions of Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets and Emerging Issues Task Force Issue No. 03-13, Applying the Conditions in Paragraph 42 of SFAS No. 144 in Determining Whether to Report Discontinued Operations, we determined that we have discontinued or will discontinue all significant cash flows and continuing involvement with respect to the Smokey Bones, Rocky River Grillhouse and Bahama Breeze operations noted above and consider them to be discontinued operations. Therefore, for the quarters and six months ended November 25, 2007 and November 26, 2006, all impairment charges and disposal costs, along with the sales, costs and expenses and income taxes attributable to these restaurants, have been aggregated in a single caption entitled Losses from discontinued operations, net of tax on our accompanying consolidated statements of earnings. We have not allocated any general corporate overhead to amounts presented in discontinued operations, nor have we elected to allocate interest costs. Assets and liabilities associated with these restaurants that are considered held for sale have been segregated from continuing operations and presented as assets and liabilities held for sale on our accompanying consolidated balance sheets. See Note 3 Discontinued Operations for additional information.

Unless otherwise noted, amounts and disclosures throughout our Notes to Consolidated Financial Statements relate to our continuing operations.

Note 2. Acquisition of RARE

On October 1, 2007, we completed the acquisition of all of the outstanding common stock of RARE for an aggregate purchase price, including fees, expenses, and the fair value of our vested stock options and restricted stock issued to RARE employees in exchange for their outstanding vested stock options and restricted stock, of \$1.27 billion, which is summarized below (amounts in millions):

Payment to RARE shareholders in cash	\$ 1,191.6
Conversion of RARE stock-based awards	43.2
Direct acquisition costs	14.9
Restructuring and other employee costs	10.8
RARE debt settlement costs	9.8

Total \$ 1,270.3

Table of Contents**DARDEN RESTAURANTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

Additionally, as a result of the acquisition, we repaid RARE's 2.5 percent convertible notes for \$134.8 million, including \$9.8 million related to a conversion premium. The acquired operations, which include 288 LongHorn Steakhouse restaurants, 29 The Capital Grille restaurants, one Hemenway's Seafood Grille & Oyster Bar restaurant, and one The Old Grist Mill Tavern, as well as the rights associated with the four franchised LongHorn Steakhouse restaurants, are included in the results of operations of our consolidated financial statements from the date of acquisition and will continue to operate under their trademarked names.

Under the purchase method of accounting, the assets and liabilities of RARE were recorded at their respective fair values as of the date of the merger. The Company is in the process of confirming, through internal studies and third-party valuations, the fair value of these assets, including land, buildings and equipment, intangible assets, and certain liabilities. The fair values set forth below are based on preliminary valuations and, given the size of the merger, are subject to adjustment as additional information is obtained. Such additional information includes, but may not be limited to, the following: valuations and physical counts of land, buildings and equipment, plans relative to the disposition of certain assets acquired, and the involuntary termination of employees. When this process is completed, adjustments to goodwill may result. The following table summarizes the preliminary estimate of fair value assigned to the assets acquired and liabilities assumed and related deferred income taxes as of the date of acquisition (amounts in millions):

Current assets	\$ 73.7
Land, buildings and equipment	644.2
Goodwill (non-amortizable)	520.3
Trademarks (non-amortizable)	455.0
Other assets (including \$12.6 million of non-amortizable liquor licenses)	66.1
Total assets acquired	\$ 1,759.3
Current liabilities	119.6
Other liabilities	369.4
Total liabilities assumed	\$ 489.0
Net assets acquired	\$ 1,270.3

The excess of the purchase price over the aggregate fair value of net assets acquired was allocated to goodwill. Of the \$520.3 million recorded as goodwill, none is expected to be deductible as operating expenses for tax purposes. The acquisition of RARE is a major step in advancing our strategy of growing our portfolio of brands in the casual dining industry through internal development and acquisitions. The portion of the purchase price attributable to goodwill represents benefits expected as a result of the acquisition, including sales growth opportunities and cost synergies, driven primarily by supply chain and purchasing integration, increased advertising effectiveness and consolidation of corporate and restaurant support infrastructure.

Trademarks, which primarily relate to LongHorn Steakhouse and The Capital Grille, have an indefinite life based on the expected use of the assets and the regulatory and economic environment within which they are being used. These trademarks represent highly respected brands with positive connotations and we intend to cultivate and protect the use of these brands. Goodwill and trademarks are not amortized but are reviewed annually for impairment or more frequently if indicators of impairment exist. A portion of the acquired lease portfolio represented favorable operating leases, compared with current market conditions, and a portion represented unfavorable operating leases, compared with current market conditions. The fair value of the favorable leases totaled \$27.6 million, is recorded in other assets and, after considering renewal periods, has an estimated weighted average life of approximately 10 years. The fair value of the unfavorable leases totaled \$15.9 million, is recorded in other liabilities and has an estimated weighted average life of approximately 12 years. The fair value of both the favorable and unfavorable

leases is amortized to rent expense on the straight-line basis over the lives of the related leases.

Table of Contents**DARDEN RESTAURANTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

As a result of the RARE acquisition, we accrued \$4.7 million in employee termination benefits and \$6.1 million in employee relocation benefits, both of which were included in the cost of the acquisition, and are expected to be paid out by the end of fiscal 2008. The following is a reconciliation of accrued employee termination and employee relocation benefit costs from October 1, 2007 (date of acquisition) to November 25, 2007, which are included in other current liabilities on the accompanying consolidated balance sheets:

(in millions)	Balance at			Balance at November 25, 2007
	October 1, 2007	Payments	Adjustments	
Employee terminations	\$ 4.7	\$ (0.5)	\$	\$ 4.2
Employee relocations	6.1	(1.6)		4.5
Total	\$ 10.8	\$ (2.1)	\$	\$ 8.7

Included as part of the purchase price was \$34.2 million and \$9.0 million of fair value related to our stock options and restricted stock, respectively, issued to RARE employees in exchange for their outstanding RARE vested stock options and restricted stock.

The following pro forma information assumes the RARE acquisition occurred as of the beginning of each period presented. The pro forma results are not necessarily indicative of what actually would have occurred had the acquisition been in effect for the periods presented.

Note 3. Discontinued Operations

On April 28, 2007, we closed nine under-performing Bahama Breeze restaurants to focus more on the profitable locations and position the concept for new unit growth. On May 5, 2007, we announced the closure of 54 Smokey Bones and two Rocky River Grillhouse restaurants, as well as our intention to offer for sale the remaining 73 operating Smokey Bones restaurants.

For the quarters and six months ended November 25, 2007 and November 26, 2006, all impairment charges and disposal costs, along with the sales, costs and expenses and income taxes attributable to these restaurants, have been aggregated in a single caption entitled Losses from discontinued operations, net of tax on our consolidated statements of earnings for all periods presented. Losses from discontinued operations, net of tax, on our accompanying consolidated statements of earnings are comprised of the following:

Table of Contents**DARDEN RESTAURANTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

The following is a detail of the assets and liabilities associated with the restaurants reported as discontinued operations and classified as held for sale on our accompanying consolidated balance sheets as of November 25, 2007 and May 27, 2007 at fair value:

(in millions)	November 25, 2007	May 27, 2007
Current assets	\$ 7.5	\$ 44.6
Land, buildings and equipment, net	92.8	97.1
Other assets	2.3	2.3
Total assets	\$ 102.6	\$ 144.0
Current liabilities	\$ 28.8	\$ 37.1
Other liabilities	5.3	5.2
Total liabilities	\$ 34.1	\$ 42.3

The following is a reconciliation of accrued exit and disposal costs from May 27, 2007 to November 25, 2007, which are included in liabilities held for sale on the accompanying consolidated balance sheets and are expected to be paid in fiscal 2008:

(in millions)	Balance at			Balance at
	May 27, 2007	Payments	Adjustments	November 25, 2007
Lease termination costs	\$ 6.2	\$ (1.3)	\$ (0.2)	\$ 4.7
Other exit costs	1.0		(0.7)	0.3
Total	\$ 7.2	\$ (1.3)	\$ (0.9)	\$ 5.0

Note 4. Consolidated Statements of Cash Flows

During the quarter and six months ended November 25, 2007, we paid \$4.7 million and \$17.6 million, respectively, for interest (net of amounts capitalized) and \$29.7 million and \$58.5 million, respectively, for income taxes. Interest income of \$0.3 million and \$0.4 million, respectively, associated with our cash and cash equivalents and short-term investments was recognized in earnings as a component of interest, net, during the quarter and six months ended November 25, 2007. During the quarter and six months ended November 26, 2006, we paid \$7.5 million and \$19.1 million, respectively, for interest (net of amounts capitalized) and \$42.4 million and \$51.0 million, respectively, for income taxes. Interest income of \$0.1 million and \$0.2 million associated with our cash and cash equivalents and short-term investments was recognized in earnings as a component of interest, net, during the quarter and six months ended November 26, 2006.

Note 5. Stock-Based Compensation

Effective May 29, 2006, we adopted the provisions of SFAS No. 123(R), Share-Based Payment, which requires companies to recognize in the financial statements the cost of employee services received in exchange for awards of equity instruments based on the grant date fair value of those awards. We adopted SFAS No. 123(R) according to the modified prospective transition method and use the Black-Scholes option pricing model to estimate the fair value of awards. Under the modified prospective transition method, we recognize compensation expense on a

Edgar Filing: DARDEN RESTAURANTS INC - Form 10-Q

straight-line basis over the remaining employee service period for new awards granted after the effective date of SFAS No. 123(R) and for unvested awards granted prior to the effective date of SFAS No. 123(R). In accordance with the modified prospective transition method, financial statements issued for periods prior to the adoption of SFAS No. 123(R) in fiscal 2007 have not been restated for the effects of the provisions of SFAS No. 123(R).

Table of Contents**DARDEN RESTAURANTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

The weighted-average fair value of options granted and the related assumptions used in the Black-Scholes option pricing model as of November 25, 2007 and November 26, 2006, excluding options issued in connection with the RARE acquisition, were as follows:

	Stock Options Granted	
	During the Six Months Ended	
	November 25, 2007	November 26, 2006
Weighted-average fair value	\$ 14.84	\$ 13.76
Risk-free interest rate	4.63%	5.08%
Expected volatility of stock	32.6%	34.5%
Dividend yield	1.59%	1.30%
Expected option life	6.4 years	6.4 years

The following table presents a summary of our stock-based compensation activity for the six months ended November 25, 2007:

(in millions)	Stock Options	Restricted Stock/ Restricted Stock Units	Darden Stock Units	Performance Stock Units
Outstanding beginning of period	16.1	1.2	1.0	0.3
Awards granted	3.9	0.5	0.3	0.3
Awards exercised	(2.4)	(0.3)		(0.1)
Awards cancelled	(0.2)	(0.1)	(0.1)	
Outstanding end of period	17.4	1.3	1.2	0.5

During the quarters and six months ended November 25, 2007 and November 26, 2006, we recognized expense from stock-based compensation as follows:

(in millions)	Quarter Ended		Six Months Ended	
	November 25, 2007	November 26, 2006	November 25, 2007	November 26, 2006
Stock Options	\$ 12.1	\$ 3.7	\$ 15.3	\$ 7.9
Restricted Stock/Restricted Stock Units	4.6	1.3	5.7	2.8
Darden Stock Units	1.7	2.3	3.1	2.5
Performance Stock Units	1.1	0.2	3.4	2.4
Employee Stock Purchase Plan/Other	1.4	1.3	1.8	1.6
	\$ 20.9	\$ 8.8	\$ 29.3	\$ 17.2

Pursuant to the acquisition of RARE, we converted 2.7 million outstanding RARE employee stock options to 2.4 million options to purchase Darden stock. RARE options converted at approximately an 89 percent ratio based on a formula set forth in the merger agreement governing this

Edgar Filing: DARDEN RESTAURANTS INC - Form 10-Q

acquisition. The total value of the options was \$43.5 million, \$34.2 million of which was included in the cost of the acquisition, as this value related to vested awards as of the acquisition date. The remaining \$9.3 million relates to the incremental value of the new awards as compared with the awards that were replaced and to the value of the unvested awards, and will be charged as an expense subsequent to the acquisition. During the quarter and six months ended November 25, 2007, we recognized \$8.1 million of stock-based compensation expense as a result of the incremental value associated with the vested awards, incremental vesting of the awards and accelerated vesting of certain awards granted in the merger agreement. The remaining \$1.2 million will be recognized as compensation expense over the remaining service period of the related awards.

Pursuant to the acquisition of RARE, we converted 0.5 million outstanding shares of RARE employee restricted stock and performance-based restricted stock units to 0.4 million shares of Darden restricted stock. The RARE restricted shares converted at approximately an 89 percent ratio based on a formula set forth in the merger agreement. The total value of the restricted shares was \$16.9 million, \$9.0 million of which was included in the cost of the acquisition as this value related to vested awards as of the acquisition date. The remaining \$7.9 million relates to the value of the unvested awards and will be charged to expense subsequent to the acquisition. During the quarter

Table of Contents

DARDEN RESTAURANTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

and six months ended November 25, 2007, we recognized \$2.2 million of stock-based compensation expense as a result of incremental vesting of the awards and accelerated vesting of certain awards granted in the merger agreement. The remaining \$5.7 million will be recognized as compensation expense over the remaining service period of the related awards.

Note 6. Income Taxes

The effective income tax rate for the quarter and six months ended November 25, 2007 was 25.5 percent and 28.6 percent, respectively, compared to an effective income tax rate of 30.0 percent and 31.8 percent for the quarter and six months ended November 26, 2006, respectively. The rate decrease in fiscal 2008 was primarily attributable to a decrease in our effective federal income tax rate due to an increase in FICA tip and other tax credits. Additionally, our effective state income tax rate decreased from fiscal 2007 to fiscal 2008 because of a decrease in state income tax liabilities during fiscal 2008 related to uncertain income tax positions.

Effective May 28, 2007, we adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 requires that a position taken or expected to be taken in a tax return be recognized (or derecognized) in the financial statements when it is more likely than not (i.e., a likelihood of more than fifty percent) that the position would be sustained upon examination by tax authorities. A recognized tax position is then measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement.

Upon adoption, we recognized an additional liability of \$1.1 million (\$0.7 million after tax) for uncertain tax positions, including interest, which was accounted for as a cumulative decrease to the balance of beginning retained earnings. As of the date of, and after recognizing the impact of, the adoption of FIN 48, we had gross unrecognized tax benefits, which represent the aggregate tax effect of differences between tax return positions and benefits recognized in our consolidated financial statements, totaling \$64.1 million, which were reclassified from income taxes payable to other non-current liabilities upon adoption of FIN 48. Of this total, approximately \$39.6 million, after considering the federal impact of state issues, would favorably affect the effective tax rate if resolved in our favor. During the quarter ended November 25, 2007, the balance of the reserves increased by approximately \$31.0 million, primarily as a result of the acquisition of RARE and the preliminary estimate of the fair value of the liabilities assumed. Pursuant to SFAS No. 141, Business Combinations, and EITF No. 93-7, Uncertainties Related to Income Taxes in a Purchase Business Combination, any income tax adjustments related to RARE's pre-acquisition tax periods will result in modifications to the assets acquired and liabilities assumed.

We recognize accrued interest related to unrecognized tax benefits in interest expense. Penalties, if incurred, would be recognized in income tax expense. We accrued approximately \$5.1 million for the payment of interest as of the date of adoption and after recognizing the impact of FIN 48. No amounts have been accrued for the payment of penalties.

The major jurisdictions in which the Company files income tax returns include the U.S. federal jurisdiction, Canada, and most states in the U.S. that have an income tax. The Company is no longer subject to U.S. federal income tax examinations by tax authorities for fiscal years prior to 2004 and, with a few exceptions, state and local, or non-U.S. income tax examinations by tax authorities for fiscal years prior to 1999.

Included in the balance of unrecognized tax benefits at May 28, 2007 is \$6.4 million related to tax positions for which it is reasonably possible that the total amounts could materially change during the next twelve months based on the outcome of examinations, or as a result of the expiration of statute of limitations for specific jurisdictions.

Note 7. Long-Term Debt

Until September 20, 2007, we maintained a credit facility under a Credit Agreement dated August 16, 2005 (Prior Credit Agreement) with a consortium of banks under which we could borrow up to \$500.0 million. As part of the Prior Credit Agreement, we could request issuance of up to \$100.0 million in letters of credit, the outstanding amount of which reduced the net borrowing capacity under the agreement. The Prior Credit Agreement allowed us to borrow at interest rates that varied based on a spread over (i) LIBOR or (ii) a base rate that was the higher of the prime rate or one-half of one percent above the federal funds rate, at our option. The interest rate spread over LIBOR was determined by our debt

rating. We could also request that loans be made at interest rates offered by one

Table of Contents

DARDEN RESTAURANTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

or more of the banks, which may have varied from the LIBOR or base rate. The Prior Credit Agreement supported our commercial paper borrowing program and would have expired on August 15, 2010, but was terminated on September 20, 2007 in connection with the new credit arrangements described below. As of May 27, 2007, no borrowings were outstanding under the Prior Credit Agreement.

On September 20, 2007, to fund the RARE acquisition, we entered into (i) a \$750.0 million revolving Credit Agreement dated as of September 20, 2007 (New Revolving Credit Agreement) with Bank of America, N.A. (BOA), as administrative agent, and the lenders (Revolving Credit Lenders) and other agents party thereto, and (ii) a \$1.15 billion 364-Day Credit Agreement dated as of September 20, 2007 (Interim Credit Agreement) with BOA, as administrative agent, and the lenders party thereto. The Interim Credit Agreement became available to us upon the consummation of the RARE acquisition. The Interim Credit Agreement and the New Revolving Credit Agreement were used to fund the RARE acquisition. On October 11, 2007, we completed the issuance of \$1.15 billion aggregate principal amount of long-term senior notes described below, the proceeds of which were used to fully repay the Interim Credit Agreement.

The New Revolving Credit Agreement is a senior unsecured debt obligation of the Company and contains customary representations, affirmative and negative covenants (including limitations on liens and subsidiary debt, and a maximum consolidated lease adjusted total debt to total capitalization ratio of 0.75 to 1.00) and events of default usual for credit facilities of this type. As of November 25, 2007, we were in compliance with all covenants under the New Revolving Credit Agreement.

The New Revolving Credit Agreement matures on September 20, 2012, and the proceeds may be used for commercial paper back-up, working capital and capital expenditures, the refinancing of certain indebtedness, the partial financing of the RARE acquisition as well as general corporate purposes. The New Revolving Credit Agreement also contains a sub-limit of \$150.0 million for the issuance of letters of credit. The borrowings and letters of credit obtained under the New Revolving Credit Agreement may be denominated in U.S. Dollars, Euro, Sterling, Yen, Canadian Dollars and each other currency approved by the Revolving Credit Lenders. The Company may elect to increase the commitments under the New Revolving Credit Agreement by up to \$250.0 million (to an aggregate amount of up to \$1.0 billion), subject to the Company obtaining commitments from new and existing lenders for the additional amounts.

Loans under the New Revolving Credit Agreement bear interest at a rate of LIBOR plus a margin determined by reference to a ratings-based pricing grid, or the base rate (which is defined as the higher of the BOA prime rate and the Federal Funds rate plus 0.500 percent). Assuming a BBB equivalent credit rating level, the applicable margin under the New Revolving Credit Agreement will be 0.350 percent. We may also request that loans under the New Revolving Credit Agreement be made at interest rates offered by one or more of the Revolving Credit Lenders, which may vary from the LIBOR or base rate, for up to \$100.0 million of borrowings. The New Revolving Credit Agreement requires that we pay a facility fee on the total amount of such facility (ranging from 0.070 percent to 0.175 percent, based on our credit ratings) and, in the event that the outstanding amounts under the applicable New Revolving Credit Agreement exceeds 50 percent of such New Revolving Credit Agreement, a utilization fee on the total amount outstanding under such facility (ranging from 0.050 percent to 0.150 percent, based on our credit ratings). As of November 25, 2007, \$375.0 million was outstanding under the New Revolving Credit Agreement. In addition, \$17.0 million of commercial paper was outstanding as of November 25, 2007, which is backed by this facility.

On October 11, 2007, we issued \$350.0 million of unsecured 5.625 percent senior notes due October 2012, \$500.0 million of unsecured 6.200 percent senior notes due October 2017 and \$300.0 million of unsecured 6.800 percent senior notes due October 2037 (collectively, the New Senior Notes) under a registration statement filed with the SEC on October 9, 2007. Discount and issuance costs, which were \$4.3 million and \$10.0 million, respectively, are being amortized over the terms of the New Senior Notes using the straight-line method, the results of which approximate the effective interest method. The interest rate payable on each series of the New Senior Notes will be subject to adjustment from time to time if the debt rating assigned to such series of notes is downgraded below a certain rating level (or subsequently upgraded). The maximum adjustment is 2.000 percent above the initial interest rate and the interest rate can not be reduced below the initial interest rate. As of November 25, 2007, no such adjustments to the interest rates had been made. We may redeem any series of the New Senior Notes at any time in whole or from time to time in part, at principal amount plus a make-whole premium. If we experience a change in control triggering event, we may be required to purchase the New Senior Notes from the holders.

Table of Contents**DARDEN RESTAURANTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

During the quarter ended November 25, 2007, we entered into treasury-lock derivative instruments with \$550.0 million of notional value to hedge a portion of the risk of changes in the benchmark interest rate prior to the issuance of the New Senior Notes, as changes in the benchmark interest rate would cause variability in our forecasted interest payments. These instruments were all settled at the issuance of the New Senior Notes for a cumulative gain of \$6.2 million. This amount was recorded in accumulated other comprehensive income and will be reclassified as a reduction to interest expense as interest on the New Senior Notes or similar debt is incurred.

Note 8. Net Earnings per Share

Outstanding stock options and restricted stock granted by us represent the only dilutive effect reflected in diluted weighted average shares outstanding. Options and restricted stock do not impact the numerator of the diluted net earnings per share computation. Options to purchase 3.0 million and 3.7 million shares of our common stock were excluded from the calculation of diluted net earnings per share for the quarters ended November 25, 2007 and November 26, 2006, respectively, because the effect would have been anti-dilutive. Options to purchase 2.8 million and 3.5 million shares of our common stock were excluded from the calculation of diluted net earnings per share for the six months ended November 25, 2007 and November 26, 2006, respectively, for the same reason.

Note 9. Stockholders Equity

Pursuant to the authorization of our Board of Directors to repurchase up to 162.4 million shares of our common stock in accordance with applicable securities law, we repurchased 0.9 million and 1.0 million shares of our common stock for \$36.8 million and \$44.4 million during the quarter and six months ended November 25, 2007, respectively, resulting in a cumulative repurchase of 143.0 million shares as of November 25, 2007.

Note 10. Retirement Plans

Components of net periodic benefit cost are as follows:

(in millions)	Defined Benefit Plans		Postretirement Benefit Plan	
	Quarter Ended		Quarter Ended	
	November 25, 2007	November 26, 2006	November 25, 2007	November 26, 2006
Service cost	\$ 1.5	\$ 1.5	\$ 0.2	\$ 0.2
Interest cost	2.4	2.3	0.3	0.2
Expected return on plan assets	(3.7)	(3.4)		
Amortization of unrecognized prior service cost			0.1	0.1
Recognized net actuarial loss	1.1	1.3	0.1	0.1
Net periodic benefit cost	\$ 1.3	\$ 1.7	\$ 0.6	\$ 0.5

(in millions)	Defined Benefit Plans		Postretirement Benefit Plan	
	Six Months Ended		Six Months Ended	
	November 25, 2007	November 26, 2006	November 25, 2007	November 26, 2006

Edgar Filing: DARDEN RESTAURANTS INC - Form 10-Q

Service cost	\$ 3.1	\$ 3.0	\$ 0.4	\$ 0.3
Interest cost	4.8	4.5	0.6	0.5
Expected return on plan assets	(7.4)	(6.9)		
Amortization of unrecognized prior service cost	0.1	0.1		
Recognized net actuarial loss	2.1	2.7	0.1	0.2
Net periodic benefit cost	\$ 2.7	\$ 3.4	\$ 1.1	\$ 1.0

Note 11. Commitments and Contingencies

As collateral for performance on contracts and as credit guarantees to banks and insurers, we are contingently liable pursuant to guarantees of subsidiary obligations under standby letters of credit. As of November 25, 2007 and May 27, 2007, we had \$58.1 million and \$75.0 million, respectively, of standby letters of credit related to workers' compensation and general liabilities accrued in our consolidated financial statements. As of November 25, 2007 and May 27, 2007, we also had \$9.8 million and \$10.4 million, respectively, of standby letters of credit related to contractual operating lease obligations and other payments. All standby letters of credit are renewable annually.

Table of Contents

DARDEN RESTAURANTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

We are subject to private lawsuits, administrative proceedings and claims that arise in the ordinary course of our business. A number of these lawsuits, proceedings and claims may exist at any given time. These matters typically involve claims from guests, employees and others related to operational issues common to the restaurant industry and can also involve infringement of, or challenges to, our trademarks. While the resolution of a lawsuit, proceeding or claim may have an impact on our financial results for the period in which it is resolved, we believe that the final disposition of the lawsuits, proceedings and claims in which we are currently involved, either individually or in the aggregate, will not have a material adverse effect on our financial position, results of operations or liquidity. The following is a brief description of the more significant of these matters. In view of the inherent uncertainties of litigation, the outcome of any unresolved matters described below cannot be predicted at this time, nor can the amount of any potential loss be reasonably estimated.

Like other restaurant companies and retail employers, we have been faced in a few states with allegations of purported class-wide wage and hour violations. In January 2004, a former food server filed a purported class action in California state court alleging that Red Lobster's server banking policies and practices (under which servers settle guest checks directly with customers throughout their shifts, and turn in collected monies at the shift's end) improperly required her and other food servers and bartenders to make up cash shortages and walkouts in violation of California law. The case was ordered to arbitration. As a procedural matter, the arbitrator ruled that class-wide arbitration is permissible under our dispute resolution program. In January 2007, plaintiffs' counsel filed in California state court a second purported class action lawsuit on behalf of servers and bartenders alleging that Olive Garden's server banking policy and its alleged failure to pay split shift premiums violated California law. Although we believe that our policies and practices were lawful and that we have strong defenses to both cases, following mediation with the plaintiffs, we have reached a tentative resolution of the matters. As a result, we accrued approximately \$4 million of legal settlement costs for the quarter and six months ended November 25, 2007.

In August 2007, an action was filed in California state court by a former Olive Garden server alleging that Olive Garden's scheduling practices resulted in failure to properly pay reporting time (minimum shift) pay as well as to pay minimum wage, to provide itemized wage statements, and to timely pay employees upon the termination of their employment. The complaint seeks to have the suit certified as a class action; however, no class has been certified to date. We intend to defend ourselves vigorously against this claim and have removed the case to federal court, and filed motions to dismiss the case.

Note 12. Application of New Accounting Standards

In September 2006, the FASB issued SFAS No. 157, Fair Value Measures. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and enhances disclosures about fair value measures required under other accounting pronouncements, but does not change existing guidance as to whether or not an instrument is carried at fair value. SFAS No. 157 is effective for financial assets and liabilities for fiscal years beginning after November 15, 2007, which will require us to adopt these provisions in fiscal 2009. SFAS No. 157 is effective for nonfinancial assets and liabilities for fiscal years beginning after November 15, 2008, which will require us to adopt these provisions in fiscal 2010. We are currently evaluating the impact SFAS No. 157 will have on our consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. SFAS No. 159 provides companies with an option to report selected financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007, which will require us to adopt these provisions in fiscal 2009. We are currently evaluating the impact SFAS No. 159 will have on our consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141R, Business Combinations. SFAS No. 141R provides companies with principles and requirements on how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree as well as the recognition and measurement of goodwill acquired in a business combination. SFAS No. 141R also requires certain

Table of Contents

DARDEN RESTAURANTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

disclosures to enable users of the financial statements to evaluate the nature and financial effects of the business combination. Acquisition costs associated with the business combination will generally be expensed as incurred. SFAS No. 141R is effective for business combinations occurring in fiscal years beginning after December 15, 2008, which will require us to adopt these provisions for business combinations occurring in fiscal 2010 and thereafter. Early adoption of SFAS No. 141R is not permitted. We are currently evaluating the impact SFAS No. 141R will have on any future business combinations we enter into.

Note 13. Subsequent Events

On November 30, 2007, we entered into a definitive agreement to sell the 73 operating Smokey Bones Barbeque & Grill restaurants to Barbeque Integrated, Inc., an affiliate of Sun Capital Partners, Inc., a worldwide private investment firm, for approximately \$84.0 million. On December 31, 2007, we closed with Barbeque Integrated, Inc. on the sale of 62 of the restaurants for approximately \$70.0 million, net of costs associated with the sale. The remaining 11 restaurants are expected to close in fiscal 2008 as the related ownership transfer conditions are satisfied.

On December 14, 2007, the Board of Directors declared a cash dividend of eighteen cents per share to be paid February 1, 2008 to all shareholders of record as of the close of business on January 10, 2008.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The discussion and analysis below for the Company should be read in conjunction with the unaudited financial statements and the notes to such financial statements included elsewhere in this Form 10-Q. The discussion below contains forward looking statements which should be read in conjunction with Forward-Looking Statements included elsewhere in this Form 10-Q. The following table sets forth selected operating data as a percent of sales for the periods indicated. All information is derived from the consolidated statements of earnings for the quarters and six months ended November 25, 2007 and November 26, 2006.

	Quarter Ended		Six Months Ended	
	November 25, 2007	November 26, 2006	November 25, 2007	November 26, 2006
Sales	100.0%	100.0%	100.0%	100.0%
Costs and expenses:				
Cost of sales:				
Food and beverage	30.2	28.9	29.5	28.6
Restaurant labor	33.2	33.5	32.7	32.7
Restaurant expenses	16.1	15.3	15.5	15.2
Total cost of sales, excluding restaurant depreciation and amortization of 3.7%, 3.6%, 3.5% and 3.5%, respectively	79.5%	77.7%	77.7%	76.5%
Selling, general and administrative	11.2	10.3	10.5	10.0
Depreciation and amortization	4.0	3.8	3.7	3.8
Interest, net	1.4	0.8	1.1	0.8

Earnings before income taxes	3.9	7.4	7.0	8.9
Income taxes	(1.0)	(2.2)	(2.0)	(2.8)
Earnings from continuing operations	2.9	5.2	5.0	6.1
Losses from discontinued operations		(0.5)		(0.4)
Net earnings	2.9%	4.7%	5.0%	5.7%

OVERVIEW OF OPERATIONS

On August 16, 2007, we announced that we had entered into an agreement to purchase the common stock of RARE Hospitality International, Inc. (RARE) through a tender offer for \$38.15 per share in cash, to be followed by a merger in which the remaining RARE shareholders would each receive \$38.15 per share in cash, or approximately \$1.27 billion in total purchase price. Additionally, as a result of the acquisition, we repaid RARE's 2.5 percent convertible notes for approximately \$134.8 million, including \$9.8 million related to a conversion premium. RARE owns two principal restaurant concepts, LongHorn Steakhouse and The Capital Grille, of which 288 and 29 locations, respectively, were in operation as of the date of acquisition. The acquisition was completed on October 1, 2007 and the acquired operations are included in our financial statements from the date of acquisition.

Our sales from continuing operations were \$1.52 billion and \$2.99 billion for the second quarter and first six months of fiscal 2008, respectively, compared to \$1.30 billion and \$2.66 billion for the second quarter and first six months of fiscal 2007, respectively. The 17.2 percent and 12.5 percent increase in sales for the second quarter and first six months of fiscal 2008, respectively, were driven primarily by the acquisition of RARE, increased U.S. same-restaurant sales at Olive Garden and a net increase of 33 Olive Garden restaurants since the second quarter of fiscal 2007. For the second quarter of fiscal 2008, our net earnings from continuing operations were \$44.1 million compared to \$67.6 million for the second quarter of fiscal 2007, a 34.8 percent decrease, and our diluted net earnings per share from continuing operations were \$0.30 for the second quarter of fiscal 2008 compared to \$0.45 for the second quarter of fiscal 2007, a 33.3 percent decrease. For the first six months of fiscal 2008, our net earnings from continued operations were \$150.7 million compared to \$160.9 million for the first six months of fiscal 2007, a 6.3 percent decrease, and our diluted net earnings per share were \$1.03 for the first six months of fiscal 2008.

Table of Contents

compared to \$1.07 for the first six months of fiscal 2007, a 3.8 percent decrease. The decrease in net earnings from continuing operations and diluted net earnings per share for the quarter and six month period ended November 25, 2007 compared to the same periods in the prior year was primarily due to fees and expenses related to the RARE acquisition and related integration costs of approximately \$20.5 million. In addition, net earnings from continuing operations and diluted net earnings per share from the quarter and six month period ended November 25, 2007 was adversely impacted by increased legal costs and food and beverage costs.

SALES

Sales from continuing operations were \$1.52 billion and \$1.30 billion for the quarters ended November 25, 2007 and November 26, 2006, respectively. The 17.2 percent increase in sales for the second quarter of fiscal 2008 was primarily due to sales resulting from the acquisition of RARE, increased U.S. same-restaurant sales at Olive Garden and a net increase of 33 net new restaurants since the second quarter of fiscal 2007. Olive Garden's sales of \$716.5 million were 8.2 percent above last year's second quarter, driven primarily by a 3.2 percent increase in U.S. same-restaurant sales and its 33 net new restaurants in operation since the second quarter of last year. Olive Garden achieved its 53rd consecutive quarter of U.S. same-restaurant sales growth primarily as a result of a 3.3 percent increase in average check, which was partially offset by a 0.1 percent decrease in same-restaurant guest counts. Red Lobster's sales of \$600.3 million were 0.6 percent above last year's second quarter, which resulted primarily from a 0.1 percent increase in U.S. same-restaurant sales. The increase in U.S. same-restaurant sales resulted primarily from a 2.6 percent increase in average check, which was partially offset by a 2.5 percent decrease in same-restaurant guest counts. LongHorn Steakhouse's sales for the second quarter of fiscal 2008 (consisting of fiscal October and November only) were 6.4 percent above the comparable prior year period, driven by sales from 30 net new restaurants, partially offset by a decrease in same-restaurant sales of 3.9 percent. The Capital Grille's second quarter sales (consisting of fiscal October and November only) were 11.3 percent above the comparable prior year period driven by sales from four net new restaurants in addition to a same-restaurant sales increase of 0.7 percent. Bahama Breeze sales of \$30.3 million were slightly above last year's second quarter, driven by a 0.1 percent increase in same-restaurant sales.

Sales were \$2.99 billion and \$2.66 billion for the six months ended November 25, 2007 and November 26, 2006, respectively. The 12.5 percent increase in sales for the first six months of fiscal 2008 was primarily due to sales resulting from the acquisition of RARE, increased U.S. same-restaurant sales at Olive Garden and Red Lobster and a net increase of 33 Olive Garden restaurants since the second quarter of fiscal 2007. Olive Garden's sales of \$1.47 billion were 8.9 percent above last year, driven primarily by a 4.0 percent increase in U.S. same-restaurant sales and its 33 net new restaurants in operation since the second quarter of last year. The increase in U.S. same-restaurant sales resulted primarily from a 3.3 percent increase in average check and a 0.7 percent increase in same-restaurant guest counts. Red Lobster sales of \$1.27 billion were 3.5 percent above last year, which resulted primarily from a 3.6 percent increase in U.S. same-restaurant sales. The increase in U.S. same-restaurant sales resulted primarily from a 3.1 percent increase in average check and a 0.5 percent increase in same-restaurant guest counts. Bahama Breeze sales of \$67.5 million were 0.7 percent below last year.

Same-restaurant sales is a year-over-year comparison of each period's sales volumes and is limited to restaurants open at least 16 months, including recently acquired restaurants, absent consideration of the date we acquired the restaurants.

COSTS AND EXPENSES

Quarter Ended November 25, 2007 Compared to Quarter Ended November 26, 2006

Total costs and expenses were \$1.46 billion and \$1.20 billion for the quarters ended November 25, 2007 and November 26, 2006, respectively. As a percent of sales, total costs and expenses increased to 96.1 percent in the second quarter of fiscal 2008 as compared to 92.6 percent in the second quarter of fiscal 2007.

Food and beverage costs were \$459.1 million during the second quarter of fiscal 2008, an increase of \$83.6 million, or 22.3 percent, from food and beverage costs of \$375.5 million during the second quarter of fiscal 2007. Food and beverage costs, as a percent of sales, increased primarily as a result of the acquisition of RARE, whose concepts have historically had higher food and beverage costs, as a percent of sales, compared to our consolidated average. As a percent of sales, food and beverage costs also increased in the second quarter of fiscal 2008 as a result of an increase in food costs, such as dairy, non-perishables and seafood, and menu mix changes related to the timing of Olive Garden and Red Lobster promotions, partially offset by pricing increases. Restaurant labor costs were \$505.4 million during the second quarter of fiscal 2008, an increase of \$71.1 million, or 16.4 percent, from restaurant labor costs of \$434.3 million during the second quarter of fiscal 2007. Restaurant labor costs, as a percent

Table of Contents

of sales, decreased primarily as a result of the acquisition of RARE, whose concepts have historically had lower restaurant labor, as a percent of sales, compared to our consolidated average. As a percent of sales, this decrease in restaurant labor costs was partially offset by an increase in wage rates and manager compensation. Restaurant expenses (which include lease, property tax, maintenance, credit card, utility, workers compensation, insurance, new restaurant pre-opening and other restaurant-level operating expenses) were \$245.0 million during the second quarter of fiscal 2008, an increase of \$46.8 million, or 23.6 percent, from restaurant expenses of \$198.2 million during the second quarter of fiscal 2007. As a percent of sales, restaurant expenses increased in the second quarter of fiscal 2008 primarily as a result of favorable workers compensation and general liability experience in the second quarter of fiscal 2007.

Selling, general and administrative expenses were \$170.4 million during the second quarter of fiscal 2008, an increase of \$37.0 million, or 27.7 percent, from selling, general and administrative expenses of \$133.4 million during the second quarter of fiscal 2007. As a percent of sales, selling, general and administrative expenses increased in the second quarter of fiscal 2008 primarily as a result of the RARE acquisition and integration related costs and increased legal costs, partially offset by increased sales leverage at Olive Garden and Red Lobster.

Depreciation and amortization expense was \$60.3 million during the second quarter of fiscal 2008, an increase of \$10.5 million, or 21.1 percent, from depreciation and amortization expense of \$49.8 million during the second quarter of fiscal 2007. As a percent of sales, depreciation and amortization expense increased slightly between the second quarter of fiscal 2008 and the second quarter of fiscal 2007 as new restaurant activity was largely offset by increased sales leverage at Olive Garden and Red Lobster.

Net interest expense was \$22.6 million during the second quarter of fiscal 2008, an increase of \$12.3 million, or 119.5 percent, from interest expense of \$10.3 million during the second quarter of fiscal 2007. As a percent of sales, net interest expense increased between the second quarter of fiscal 2008 and the second quarter of fiscal 2007 due to an increase in average debt balances, primarily as a result of the RARE acquisition.

Six Months Ended November 25, 2007 Compared to Six Months Ended November 26, 2006

Total costs and expenses were \$2.78 billion and \$2.42 billion for the six months ended November 25, 2007 and November 26, 2006, respectively. As a percent of sales, total costs and expenses increased to 93.0 percent in the first six months of fiscal 2008 as compared with 91.1 percent in the first six months of fiscal 2007.

Food and beverage costs were \$882.9 million during the first six months of fiscal 2008, an increase of \$121.5 million, or 16.0 percent, from food and beverage costs of \$761.4 million during the first six months of fiscal 2007. As a percent of sales, food and beverage costs increased in the first six months of fiscal 2008 primarily as a result of an increase in food costs, such as dairy, non-perishables and seafood, and menu mix changes related to the timing of Olive Garden and Red Lobster promotions. Food and beverage costs, as a percent of sales, also increased as a result of the acquisition of RARE, whose concepts have historically had higher food and beverage costs, as a percent of sales, compared to our consolidated average. Restaurant labor costs were \$977.0 million during the first six months of fiscal 2008, an increase of \$107.0 million, or 12.3 percent, from restaurant labor costs of \$870.0 million during the first six months of fiscal 2007. Restaurant labor costs, as a percent of sales, decreased primarily as a result of the acquisition of RARE, whose concepts have historically had lower restaurant labor, as a percent of sales, compared to our consolidated average. As a percent of sales, this decrease in restaurant labor costs was partially offset by an increase in wage rates and manager compensation. Restaurant expenses (which include lease, property tax, maintenance, credit card, utility, workers compensation, insurance, new restaurant pre-opening and other restaurant-level operating expenses) were \$461.9 million during the first six months of fiscal 2008, an increase of \$59.0 million, or 14.6 percent, from restaurant expenses of \$402.9 million during the first six months of fiscal 2007. As a percent of sales, restaurant expenses increased in the first six months of fiscal 2008 primarily as a result of insurance recoveries received in fiscal 2007 and an increase in credit card and gift card fees, partially offset by increased sales leverage.

Selling, general and administrative expenses were \$313.4 million during the first six months of fiscal 2008, an increase of \$46.3 million, or 17.3 percent, from selling, general and administrative expenses of \$267.1 million during the first six months of fiscal 2007. As a percent of sales, selling, general and administrative expenses increased in the first six months of fiscal 2008 primarily as a result of the RARE acquisition and integration related costs, increased advertising to generate awareness of the availability of fresh fish at Red Lobster and increased legal costs, partially offset by increased sales leverage.

Table of Contents

Depreciation and amortization expense was \$110.9 million during the first six months of fiscal 2008, an increase of \$11.2 million, or 11.2 percent, from depreciation and amortization expense of \$99.7 million during the first six months of fiscal 2007. As a percent of sales, depreciation and amortization expense decreased slightly between the first six months of fiscal 2008 and the first six months of fiscal 2007 as new restaurant activity was offset by increased sales leverage.

Net interest expense was \$32.3 million during the first six months of fiscal 2008, an increase of \$11.7 million, or 56.8 percent, from interest expense of \$20.6 million during the first six months of fiscal 2007. As a percent of sales, net interest expense increased between the first six months of fiscal 2008 and the first six months of fiscal 2007 due mainly to an increase in average debt balances, primarily as a result of the RARE acquisition.

INCOME TAXES

The effective income tax rate for the second quarter and first six months of fiscal 2008 was 25.5 percent and 28.6 percent, respectively, compared to an effective income tax rate of 30.0 percent and 31.8 percent, respectively, in the second quarter and first six months of fiscal 2007. The rate decrease in fiscal 2008 was primarily attributable to a decrease in our effective federal income tax rate due to an increase in FICA tip and other tax credits. Additionally, our effective state income tax rate decreased from fiscal 2007 to fiscal 2008 because of a decrease in state income tax liabilities during fiscal 2008 related to uncertain income tax positions.

NET EARNINGS AND NET EARNINGS PER SHARE FROM CONTINUING OPERATIONS

For the second quarter of fiscal 2008, our net earnings from continuing operations were \$44.1 million compared to \$67.6 million in the second quarter of fiscal 2007, a 34.8 percent decrease, and our diluted net earnings per share from continuing operations were \$0.30 compared to \$0.45 in the second quarter of fiscal 2007, a 33.3 percent decrease. At Olive Garden, increased sales and lower selling, general and administrative expenses as a percent of sales partially offset increased food and beverage costs, restaurant labor costs, restaurant expenses and depreciation and amortization expenses as a percent of sales. As a result, operating profit decreased for Olive Garden in the second quarter of fiscal 2008, compared to the second quarter of fiscal 2007. At Red Lobster, increased sales partially offset increased food and beverage costs, restaurant labor costs, restaurant expenses, selling, general and administrative expenses and depreciation and amortization expenses as a percent of sales. As a result, operating profit decreased for Red Lobster in the second quarter of fiscal 2008 compared to the second quarter of fiscal 2007. The decrease in both our net earnings and diluted net earnings per share for the second quarter of fiscal 2008 was primarily due to approximately \$20.5 million in fees and expenses related to the RARE acquisition and related integration efforts, in addition to increased legal and food and beverage costs.

For the first six months of fiscal 2008, our net earnings from continuing operations were \$150.7 million compared to \$160.9 million in the first six months of fiscal 2007, a 6.3 percent decrease, and our diluted net earnings per share from continuing operations were \$1.03 compared to \$1.07 in the first six months of fiscal 2007, a 3.8 percent decrease. At Olive Garden, increased sales and lower selling, general and administrative expenses and depreciation and amortization expenses as a percent of sales partially offset increased food and beverage costs, restaurant labor costs and restaurant expenses as a percent of sales. While operating profit increased for Olive Garden in the first six months of fiscal 2008, as a percent of sales, operating profit decreased from fiscal 2007. At Red Lobster, increased sales and lower depreciation and amortization expenses as a percent of sales partially offset higher food and beverage costs, restaurant labor costs, restaurant expenses and selling, general and administrative expenses as a percent of sales. As a result, operating profit for Red Lobster decreased in the first six months of fiscal 2008 compared to the first six months of fiscal 2007. The decrease in both our net earnings and diluted net earnings per share for the first six months of fiscal 2008 was primarily due to approximately \$21.0 million in fees and expenses related to the RARE acquisition and related integration efforts, in addition to increased legal and food and beverage costs.

Table of Contents**LOSSES FROM DISCONTINUED OPERATIONS**

On an after-tax basis, losses from discontinued operations for the second quarter and first six months of fiscal 2008 were \$0.6 million (\$0.00 per diluted share) and \$1.3 million (\$0.01 per diluted share), respectively, compared with losses from discontinued operations for the second quarter and first six months of fiscal 2007 of \$5.9 million (\$0.04 per diluted share) and \$10.7 million (\$0.07 per diluted share). During the second quarter of fiscal 2007, we recorded \$4.1 million of long-lived asset impairment charges related to three Smokey Bones restaurants based on an evaluation of cash flows.

SEASONALITY

Our sales volumes fluctuate seasonally. During fiscal 2007, 2006 and 2005, our sales were highest in the spring and winter, followed by the summer, and lowest in the fall. Holidays, severe weather and similar conditions may impact sales volumes in some operating regions. Because of the seasonality of our business, results for any quarter are not necessarily indicative of the results that may be achieved for the full fiscal year.

NUMBER OF RESTAURANTS

The following table details the number of restaurants currently reported in continuing operations that were open at the end of the second quarter of fiscal 2008, compared with the number open at the end of fiscal 2007 and the end of the second quarter of fiscal 2007.

	November 25, 2007	May 27, 2007	November 26, 2006
Red Lobster USA	651	651	651
Red Lobster Canada	29	29	30
Total	680	680	681
Olive Garden USA	622	608	589
Olive Garden Canada	6	6	6
Total	628	614	595
LongHorn Steakhouse ⁽¹⁾	295		
The Capital Grille ⁽¹⁾	30		
Bahama Breeze	23	23	23
Seasons 52	7	7	6
Other ⁽¹⁾	2		
Total	1,665	1,324	1,305

⁽¹⁾ 288 LongHorn Steakhouse's, 29 The Capital Grille's and two specialty restaurants (Hemenway's Seafood Grille & Oyster Bar and The Old Grist Mill Tavern) were acquired in the acquisition of RARE on October 1, 2007.

LIQUIDITY AND CAPITAL RESOURCES

Cash flows generated from operating activities provide us with a significant source of liquidity, which we use to finance the purchases of land, buildings and equipment, to pay dividends and to repurchase shares of our common stock. Since substantially all of our sales are for cash and cash equivalents and accounts payable are generally due in five to 30 days, we are able to carry current liabilities in excess of current assets. In addition to cash flows from operations, we use a combination of long-term and short-term borrowings to fund our capital needs.

We currently manage our business and financial ratios to maintain an investment grade bond rating, which allows flexible access to financing at reasonable costs. Currently, our publicly issued long-term debt carries Baa3 (Moody's Investors Service), BBB+ (Standard & Poor's) and BBB (Fitch) ratings. Our commercial paper has ratings of P-3 (Moody's Investors Service), A-2 (Standard & Poor's) and F-2 (Fitch). These ratings are as of the date of the filing of this report and have been obtained with the understanding that Moody's Investors Service, Standard & Poor's and Fitch will continue to monitor our credit and make future adjustments to these ratings to the extent warranted. The ratings are not a

Edgar Filing: DARDEN RESTAURANTS INC - Form 10-Q

recommendation to buy, sell or hold our securities, may be changed, superseded or withdrawn at any time and should be evaluated independently of any other rating.

Table of Contents

Our commercial paper program serves as our primary source of short-term financing. To support our commercial paper program, until September 20, 2007, we maintained a credit facility under a Credit Agreement dated August 16, 2005 (Prior Credit Agreement) with a consortium of banks under which we could borrow up to \$500.0 million. As part of the Prior Credit Agreement, we could request issuance of up to \$100.0 million in letters of credit, the outstanding amount of which reduced the net borrowing capacity under the Prior Credit Agreement. The Prior Credit Agreement allowed us to borrow at interest rates that varied based on a spread over (i) LIBOR or (ii) a base rate that was the higher of the prime rate or one-half of one percent above the federal funds rate, at our option. The interest rate spread over LIBOR was determined by our debt rating. We could also request that loans be made at interest rates offered by one or more of the banks, which may have varied from the LIBOR or base rate. The Prior Credit Agreement supported our commercial paper borrowing program and would have expired on August 15, 2010, but was terminated on September 20, 2007 in connection with the new credit arrangements described below. We were required to pay a facility fee of 10 basis points per annum on the average daily amount of loan commitments by the consortium. The amount of interest and annual facility fee were subject to change based on our maintenance of certain debt ratings and financial ratios, such as maximum debt to capital ratios. Advances under the Prior Credit Agreement were unsecured. At May 27, 2007, no borrowings under the Prior Credit Agreement were outstanding.

On September 20, 2007, to fund the RARE acquisition, we entered into (i) a \$750.0 million revolving Credit Agreement dated as of September 20, 2007 (New Revolving Credit Agreement) with Bank of America, N.A. (BOA), as administrative agent, and the lenders (Revolving Credit Lenders) and other agents party thereto, and (ii) a \$1.15 billion 364-Day Credit Agreement dated as of September 20, 2007 (Interim Credit Agreement) with BOA, as administrative agent, and the lenders party thereto. The Interim Credit Agreement became available to us upon the consummation of the RARE acquisition. The Interim Credit Agreement and the New Revolving Credit Agreement were used to fund the RARE acquisition. On October 11, 2007, we completed the issuance of \$1.15 billion aggregate principal amount of long-term senior notes described below, the proceeds of which were used to fully repay the Interim Credit Agreement.

The New Revolving Credit Agreement is a senior unsecured debt obligation of the Company and contains customary representations, affirmative and negative covenants (including limitations on liens and subsidiary debt, and a maximum consolidated lease adjusted total debt to total capitalization ratio of 0.75 to 1.00) and events of default usual for credit facilities of this type. As of November 25, 2007, we were in compliance with all covenants under the New Revolving Credit Agreement.

The New Revolving Credit Agreement matures on September 20, 2012, and the proceeds may be used for commercial paper back-up, working capital and capital expenditures, the refinancing of certain indebtedness, the partial financing of the RARE acquisition as well as general corporate purposes. The New Revolving Credit Agreement also contains a sub-limit of \$150.0 million for the issuance of letters of credit. The borrowings and letters of credit obtained under the New Revolving Credit Agreement may be denominated in U.S. Dollars, Euro, Sterling, Yen, Canadian Dollars and each other currency approved by the Revolving Credit Lenders. The Company may elect to increase the commitments under the New Revolving Credit Agreement by up to \$250.0 million (to an aggregate amount of up to \$1.0 billion), subject to the Company obtaining commitments from new and existing lenders for the additional amounts.

Loans under the New Revolving Credit Agreement bear interest at a rate of LIBOR plus a margin determined by reference to a ratings-based pricing grid, or the base rate (which is defined as the higher of the BOA prime rate and the Federal Funds rate plus 0.500 percent). Assuming a BBB equivalent credit rating level, the applicable margin under the New Revolving Credit Agreement will be 0.350 percent. We may also request that loans under the New Revolving Credit Agreement be made at interest rates offered by one or more of the Revolving Credit Lenders, which may vary from the LIBOR or base rate, for up to \$100.0 million of borrowings. The New Revolving Credit Agreement requires that we pay a facility fee on the total amount of such facility (ranging from 0.070 percent to 0.175 percent, based on our credit ratings) and, in the event that the outstanding amounts under the applicable New Revolving Credit Agreement exceeds 50 percent of such New Revolving Credit Agreement, a utilization fee on the total amount outstanding under such facility (ranging from 0.050 percent to 0.150 percent, based on our credit ratings). As of November 25, 2007, \$375.0 million was outstanding under the New Revolving Credit Agreement. In addition, \$17.0 million of commercial paper was outstanding as of November 25, 2007, which is backed by this facility.

Table of Contents

On October 11, 2007, we issued \$350.0 million of unsecured 5.625 percent senior notes due October 2012, \$500.0 million of unsecured 6.200 percent senior notes due October 2017 and \$300.0 million of unsecured 6.800 percent senior notes due October 2037 (collectively, the New Senior Notes) under a registration statement filed with the SEC on October 9, 2007. Discount and issuance costs, which were \$3.8 million, \$4.9 million and \$5.6 million, respectively, are being amortized over the terms of the New Senior Notes using the straight-line method, the results of which approximates the effective interest method. The interest rate payable on each series of the New Senior Notes will be subject to adjustment from time to time if the debt rating assigned to such series of notes is downgraded below a certain rating level (or subsequently upgraded). The maximum adjustment is 2.000 percent above the initial interest rate and the interest rate can not be reduced below the initial interest rate. As of November 25, 2007, no such adjustments to the interest rates had been made. We may redeem any series of the New Senior Notes at any time in whole or from time to time in part, at principal amount plus a make-whole premium. If we experience a change in control triggering event, we may be required to purchase the New Senior Notes from the holders.

During the quarter ended November 25, 2007, we entered into treasury-lock derivative instruments with \$550.0 million of notional value to hedge a portion of the risk of changes in the benchmark interest rate prior to the issuance of the New Senior Notes, as changes in the benchmark interest rate would cause variability in our forecasted interest payments. These instruments were all settled at the issuance of the New Senior Notes for a cumulative gain of \$6.2 million. This amount was recorded in accumulated other comprehensive income (loss) and will be reclassified to interest expense as interest on the New Senior Notes or similar debt is incurred.

At November 25, 2007, our long-term debt consisted principally of:

\$150.0 million of unsecured 4.875 percent senior notes due in August 2010;

\$75.0 million of unsecured 7.450 percent medium-term notes due in April 2011;

\$350.0 million of unsecured 5.625 percent senior notes due in October 2012;

\$100.0 million of unsecured 7.125 percent debentures due in February 2016;

\$500.0 million of unsecured 6.200 percent senior notes due in October 2017;

\$150.0 million of unsecured 6.000 percent senior notes due in August 2035;

\$300.0 million of unsecured 6.800 percent senior notes due in October 2037; and

An unsecured, variable rate \$16.9 million commercial bank loan due in December 2018 that is used to support two loans from us to the Employee Stock Ownership Plan portion of the Darden Savings Plan.

A summary of our contractual obligations and commercial commitments at November 25, 2007, is as follows:

(in millions)	Total	Payments Due by Period			More than 5 Years
		Less than 1 Year	1-3 Years	3-5 Years	
Contractual Obligations					
Short-term debt	\$ 392.0	\$ 392.0	\$	\$	\$

- 1) Includes interest payments associated with existing long-term debt, including the current portion. Variable-rate interest payments associated with the ESOP loan were estimated based on the interest rate in effect at November 25, 2007 (5.441 percent). Excludes issuance discount of \$6.6 million.
- 2) Includes commitments for food and beverage items and supplies, capital projects and other miscellaneous commitments.
- 3) Includes imputed interest of \$45.0 million.
- 4) Includes expected payments associated with our defined benefit plans, postretirement benefit plan and our non-qualified deferred compensation plan through fiscal 2016.
- 5) Includes letters of credit for \$58.1 million of workers' compensation and general liabilities accrued in our consolidated financial statements, letters of credit for \$3.2 million of lease payments included in contractual operating lease obligation payments noted above and other letters of credit totaling \$6.6 million.
- 6) Consists solely of guarantees associated with leased properties that have been assigned to third parties. We are not aware of any non-performance under these arrangements that would result in us having to perform in accordance with the terms of the guarantees.

Our Board of Directors has authorized us to repurchase up to an aggregate of 162.4 million shares of our common stock. Net cash flows used in financing activities included our repurchase of 0.9 million shares of our common stock for \$36.8 million in the second quarter of fiscal 2008, compared to 1.6 million shares for \$67.0 million in the second quarter of fiscal 2007. For the first six months of fiscal 2008, net cash flows used by financing activities included our repurchase of 1.0 million shares of our common stock for \$44.4 million compared to 3.9 million shares for \$150.2 million for the first six months of fiscal 2007. As of November 25, 2007, we have repurchased a total of 143.0 million shares of our common stock. The repurchased common stock is reflected as a reduction of stockholders' equity.

Net cash flows provided by operating activities from continuing operations increased to \$74.8 million and \$235.9 million in the second quarter and first six months of fiscal 2008, respectively, from \$36.9 million and \$144.5 million in the second quarter and first six months of fiscal 2007, respectively, primarily as a result of the timing of purchases of inventories and restaurant level services and payments made for income taxes.

Net cash flows used in investing activities from continuing operations included the acquisition of RARE and capital expenditures incurred principally for building new restaurants, replacing equipment and technology initiatives. Cash used in the acquisition of RARE was \$1.20 billion, net of \$27.1 million of cash acquired. Capital expenditures were \$114.8 million and \$201.4 million in the second quarter and first six months of fiscal 2008, respectively, compared to \$85.6 million and \$178.0 million in the second quarter and first six months of fiscal 2007, respectively. The increased expenditures in the second quarter and first six months of fiscal 2008 resulted primarily from increased spending associated with new restaurants and restaurant replacement assets. During the second quarter and first six months of fiscal 2007, we also received \$36.8 and \$49.5 million, respectively, in cash in connection with the sale and leaseback of our current Restaurant Support Center.

Net cash flows used in financing activities included \$25.5 million and \$50.8 million in dividends paid in the second quarter and first six months of fiscal 2008, compared to \$33.5 million in dividends for the same periods in fiscal 2007. On June 15, 2007 and September 15, 2007, the Board of Directors declared a cash dividend of eighteen cents per share to be paid on August 1, 2007 and November 1, 2007, respectively, to all shareholders of record as of the close of business on July 10, 2007 and October 10, 2007, respectively. Based on these eighteen cent quarterly dividends, our indicated annual dividend is seventy-two cents per share. In fiscal 2007, we paid semi-annual dividends of twenty-three cents per share. Purchases of treasury stock were \$36.8 million and \$44.4 million during

Table of Contents

the second quarter and first six months of fiscal 2008, respectively, a decrease from purchases of \$67.0 million and \$150.2 million during the second quarter and first six months of fiscal 2007, respectively. Cash flows provided by financing activities for the second quarter and first six months of fiscal 2008 were primarily driven by the \$1.14 billion in net proceeds from the issuance of the New Senior Notes. These proceeds were used to repay borrowings under the Interim Credit Agreement, which funded the acquisition of RARE during the second quarter of fiscal 2008. Proceeds received from the New Revolving Credit Agreement of \$212.5 million during the second quarter of fiscal 2008 were used to partially fund the acquisition of RARE and to repay the \$125.0 million 2.5 percent convertible notes assumed from RARE.

We are not a party to any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our financial condition, changes in financial condition, sales or expenses, results of operations, liquidity, capital expenditures or capital resources. We are not aware of any trends or events that would materially affect our capital requirements or liquidity. We believe that our New Revolving Credit Agreement and internal cash generating capabilities will be sufficient to finance our ongoing capital expenditures, dividends, stock repurchase program and other operating activities through fiscal 2008.

FINANCIAL CONDITION

Our current assets totaled \$631.3 million at November 25, 2007, compared to \$545.4 million at May 27, 2007. The increase resulted primarily from an increase in inventories which were \$294.9 million at November 25, 2007 compared to \$209.6 million at May 27, 2007, principally due to the acquisition of RARE and seasonality. Land, buildings and equipment, net totaled \$2.93 billion at November 25, 2007, compared to \$2.18 billion at May 27, 2007. Goodwill totaled \$520.3 million at November 25, 2007, compared to zero at May 27, 2007. Trademarks totaled \$455.0 million at November 25, 2007, compared to zero at May 27, 2007. Other assets totaled \$222.5 million at November 25, 2007, compared to \$151.0 million at May 27, 2007. Increases in land, buildings and equipment, net, goodwill, trademarks and other assets were primarily attributable to the RARE acquisition.

Our current liabilities totaled \$1.30 billion at November 25, 2007, compared to \$1.07 billion at May 27, 2007. Accounts payable and short-term debt totaled \$257.7 million and \$392.0 million at November 25, 2007, respectively, compared to \$178.0 million and \$211.4 million at May 27, 2007, respectively, principally due to the acquisition of RARE, the timing and terms of seasonal inventory purchases, share repurchases, capital expenditures and related payments during the first six months and the use of commercial paper to manage to desired debt leverage targets. Accrued payroll of \$102.9 million at November 25, 2007, decreased from \$108.5 million at May 27, 2007, principally due to the payout of fiscal 2007 incentive compensation during the first quarter of fiscal 2008, which is partially offset by the amounts accrued for fiscal 2008 incentive compensation, and payroll liabilities assumed from RARE. Accrued income taxes decreased to a \$12.1 million receivable at November 25, 2007 from a \$75.9 million payable at May 27, 2007 primarily due to a reclassification of gross unrecognized tax benefits to non-current liabilities in connection with the adoption of Financial Accounting Standards Board (FASB) Interpretation No. 48 (FIN 48) effective May 28, 2007, tax benefits related to stock option exercises and refundable income taxes acquired from RARE. Unearned revenues of \$125.8 million at November 25, 2007 increased from \$109.9 million at May 27, 2007 principally due to gift card liabilities assumed from RARE and seasonal fluctuations in sales and redemptions of our gift cards. Long-term debt increased to \$1,635.4 million at November 25, 2007, from \$491.6 million at May 27, 2007 due to the issuance of the New Senior Notes, which were used to repay borrowings under the Interim Credit Agreement, which was used to fund the acquisition of RARE. Deferred income taxes increased to \$145.4 million at November 25, 2007, from \$25.8 million at May 27, 2007 due principally to deferred income taxes related to the RARE acquisition. Obligations under capital leases, net of current installments increased to \$50.7 million due to capital leases acquired from RARE. Other liabilities increased to \$186.7 million at November 25, 2007 from \$67.4 million at May 27, 2007 principally due to the FIN 48 reclassification noted above.

CRITICAL ACCOUNTING POLICIES

We prepare our consolidated financial statements in conformity with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of sales and expenses during the reporting period (see Note 1, Summary of Significant Accounting Policies under Notes to Consolidated Financial Statements included in Item 8, Financial Statements and Supplementary Data of our Annual Report on Form 10-K for the fiscal year ended May 27, 2007). Actual results could differ from those estimates.

Table of Contents

Critical accounting policies are those we believe are both most important to the portrayal of our financial condition and operating results and require our most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Judgments and uncertainties affecting the application of those policies may result in materially different amounts being reported under different conditions or using different assumptions. As discussed more fully in Note 2 to the Consolidated Financial Statements, we acquired RARE during the second quarter of fiscal 2008. As a function of accounting for the business combination, we are still in the process of evaluating the impact of the acquisition on our critical accounting policies. We consider the following policies to be most critical in understanding the judgments that are involved in preparing our consolidated financial statements.

Land, Buildings and Equipment

Land, buildings and equipment are recorded at cost less accumulated depreciation. Building components are depreciated over estimated useful lives ranging from seven to 40 years using the straight-line method. Leasehold improvements, which are reflected on our consolidated balance sheets as a component of buildings, are amortized over the lesser of the expected lease term, including cancelable option periods, or the estimated useful lives of the related assets using the straight-line method. Equipment is depreciated over estimated useful lives ranging from two to 10 years, also using the straight-line method.

Our accounting policies regarding land, buildings and equipment, including leasehold improvements, include our judgments regarding the estimated useful lives of these assets, the residual values to which the assets are depreciated or amortized, the determination of what constitutes expected lease term and the determination as to what constitutes enhancing the value of or increasing the life of existing assets. These judgments and estimates could produce materially different amounts of reported depreciation and amortization expense if different assumptions were used. As discussed further below, these judgments may also impact our need to recognize an impairment charge on the carrying amount of these assets as the cash flows associated with the assets are realized, or as our expectations of estimated future cash flows change.

Leases

We are obligated under various lease agreements for certain restaurants. For operating leases, we recognize rent expense on a straight-line basis over the expected lease term, including option periods as described below. Capital leases are recorded as an asset and an obligation at an amount equal to the present value of the minimum lease payments during the lease term.

Within the provisions of certain of our leases, there are rent holidays and/or escalations in payments over the base lease term, as well as renewal periods. The effects of the holidays and escalations have been reflected in rent expense on a straight-line basis over the expected lease term, which includes option periods we are reasonably assured to exercise because failure to exercise such options would result in an economic penalty to the Company. The lease term commences on the date when we have the right to control the use of the leased property, which is typically before rent payments are due under the terms of the lease. The leasehold improvements and property held under capital leases for each restaurant facility are amortized on the straight-line method over the shorter of the estimated life of the asset or the same expected lease term used for lease accounting purposes. Many of our leases have renewal periods totaling five to 20 years, exercisable at our option, and require payment of property taxes, insurance and maintenance costs in addition to the rent payments. The consolidated financial statements reflect the same lease term for amortizing leasehold improvements as we use to determine capital versus operating lease classifications and in calculating straight-line rent expense for each restaurant. Percentage rent expense is generally based upon sales levels and is accrued at the point in time we determine that it is probable that such sales levels will be achieved.

Our judgments related to the probable term for each restaurant affect the classification and accounting for leases as capital versus operating, the rent holidays and escalation in payments that are included in the calculation of straight-line rent and the term over which leasehold improvements for each restaurant facility are amortized. These judgments may produce materially different amounts of depreciation, amortization and rent expense than would be reported if different assumed lease terms were used.

Table of Contents***Impairment of Long-Lived Assets***

Land, buildings and equipment and certain other assets, including capitalized software costs and liquor licenses, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the assets to the future undiscounted net cash flows expected to be generated by the assets. Identifiable cash flows are measured at the lowest level for which they are largely independent of the cash flows of other groups of assets and liabilities, generally at the restaurant level. If these assets are determined to be impaired, the amount of impairment recognized is the amount by which the carrying amount of the assets exceeds their fair value. Fair value is generally determined by appraisals or sales prices of comparable assets. Restaurant sites and certain other assets to be disposed of are reported at the lower of their carrying amount or fair value, less estimated costs to sell. Restaurant sites and certain other assets to be disposed of are included in assets held for sale when certain criteria are met. These criteria include the requirement that the likelihood of disposing of these assets within one year is probable. For assets that meet the held for sale criteria, we separately evaluate whether those assets also meet the requirements to be reported as discontinued operations. Principally, if we discontinue cash flows and no longer have any significant continuing involvement with respect to the operations of the assets, we classify the assets and related results of operations as discontinued. We consider guest transfer (an increase in guests at another location as a result of the closure of a location) as continuing cash flows and evaluate the significance of expected guest transfer when evaluating a restaurant for discontinued operations reporting. To the extent we dispose of enough assets where classification between continuing operations and discontinued operations would be material to our consolidated financial statements, we utilize the reporting provisions for discontinued operations. Assets whose disposal is not probable within one year remain in land, buildings and equipment until their disposal is probable within one year.

The judgments we make related to the expected useful lives of long-lived assets and our ability to realize undiscounted cash flows in excess of the carrying amounts of these assets are affected by factors such as the ongoing maintenance and improvements of the assets, changes in economic conditions, changes in usage or operating performance, desirability of the restaurant sites and other factors, such as our ability to sell our assets held for sale, as in the case of the Smokey Bones restaurants. As we assess the ongoing expected cash flows and carrying amounts of our long-lived assets, significant adverse changes in these factors could cause us to realize a material impairment charge.

Insurance Accruals

Through the use of insurance program deductibles and self-insurance, we retain a significant portion of expected losses under our workers compensation, employee medical and general liability programs. However, we carry insurance for individual claims that generally exceed \$0.25 million for workers compensation and general liability claims. Accrued liabilities have been recorded based on our estimates of the anticipated ultimate costs to settle all claims, both reported and not yet reported.

Our accounting policies regarding these insurance programs include our judgments and independent actuarial assumptions regarding economic conditions, the frequency or severity of claims and claim development patterns and claim reserve, management and settlement practices. Unanticipated changes in these factors may produce materially different amounts of reported expense under these programs.

Stock-Based Compensation

We account for stock-based compensation in accordance with the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) No. 123R. We use the Black-Scholes option pricing model, which requires the input of subjective assumptions. These assumptions include estimating the length of time employees will retain their vested stock options before exercising them (expected term), the volatility of our common stock price over the expected term and the number of options that will ultimately not complete their vesting requirements (forfeitures). From year to year, our determination of these subjective assumptions can materially affect the estimate of fair value of stock-based compensation and consequently, the related amount recognized in our consolidated statements of earnings during each period.

Table of Contents

Income Taxes

We estimate certain components of our provision for income taxes. These estimates include, among other items, depreciation and amortization expense allowable for tax purposes, allowable tax credits for items such as taxes paid on reported employee tip income, effective rates for state and local income taxes and the tax deductibility of certain other items. We adjust our annual effective income tax rate as additional information on outcomes or events becomes available.

Effective May 28, 2007 we adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109. FIN 48 requires that a position taken or expected to be taken in a tax return be recognized (or derecognized) in the financial statements when it is more likely than not (i.e., a likelihood of more than fifty percent) that the position would be sustained upon examination by tax authorities. A recognized tax position is then measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement.

Our estimates are based on the best available information at the time that we prepare the income tax provision. We generally file our annual income tax returns several months after our fiscal year-end. Income tax returns are subject to audit by federal, state and local governments, generally years after the returns are filed. These returns could be subject to material adjustments or differing interpretations of the tax laws.

APPLICATION OF NEW ACCOUNTING STANDARDS

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measures*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and enhances disclosures about fair value measures required under other accounting pronouncements, but does not change existing guidance as to whether or not an instrument is carried at fair value. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, which will require us to adopt these provisions in fiscal 2009. We are currently evaluating the impact SFAS No. 157 will have on our consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 provides companies with an option to report selected financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings at each subsequent reporting date. SFAS No. 159 is effective for financial assets and liabilities for fiscal years beginning after November 15, 2007, which will require us to adopt these provisions in fiscal 2009. SFAS No. 157 is effective for nonfinancial assets and liabilities for fiscal years beginning after November 15, 2008, which will require us to adopt these provisions in fiscal 2010. We are currently evaluating the impact SFAS No. 159 will have on our consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations*. SFAS No. 141R provides companies with principles and requirements on how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree as well as the recognition and measurement of goodwill acquired in a business combination. SFAS No. 141R also requires certain disclosures to enable users of the financial statements to evaluate the nature and financial effects of the business combination. Acquisition costs associated with the business combination will generally be expensed as incurred. SFAS No. 141R is effective for business combinations occurring in fiscal years beginning after December 15, 2008, which will require us to adopt these provisions for business combinations occurring in fiscal 2010 and thereafter. Early adoption of SFAS No. 141R is not permitted. We are currently evaluating the impact SFAS No. 141R will have on any future business combinations we enter into.

Table of Contents

FORWARD-LOOKING STATEMENTS

Certain statements included in this report and other materials filed or to be filed by us with the SEC (as well as information included in oral or written statements made or to be made by us) may contain statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995, as codified in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Words or phrases such as believe, plan, will, expect, intend, estimate and project, and similar expressions are intended to identify forward-looking statements. All of these statements, and any other statements in this report that are not historical facts, are forward-looking. These forward-looking statements are based on assumptions concerning important factors, risks and uncertainties that could significantly affect anticipated results in the future and, accordingly, could cause the actual results to differ materially from those expressed in the forward-looking statements. These factors, risks and uncertainties include, but are not limited to those discussed below and in Part II, Item 1A Risk Factors in this Form 10-Q:

The intensely competitive nature of the restaurant industry, especially pricing, service, location, personnel and type and quality of food;

Economic and business factors, both specific to the restaurant industry and generally, that are largely out of our control, including changes in consumer preferences, demographic trends, severe weather conditions including hurricanes, a protracted economic slowdown or worsening economy, energy prices, interest rates, industry-wide cost pressures and public safety conditions, including actual or threatened armed conflicts or terrorist attacks;

The price and availability of food, ingredients and utilities, including the general risk of inflation;

Labor and insurance costs, including increased labor costs as a result of federal and state-mandated increases in minimum wage rates and increased insurance costs as a result of increases in our current insurance premiums;

Increased advertising and marketing costs;

Higher-than-anticipated costs to open, close, relocate or remodel restaurants;

Litigation by employees, consumers, suppliers, shareholders or others, regardless of whether the allegations made against us are valid or we are ultimately found liable;

Unfavorable publicity relating to food safety or other concerns;

A lack of suitable new restaurant locations or a decline in the quality of the locations of our current restaurants;

Federal, state and local regulation of our business, including laws and regulations relating to our relationships with our employees, zoning, land use, environmental matters and liquor licenses;

Growth objectives, including lower-than-expected sales and profitability of newly-opened restaurants, our expansion of newer concepts that have not yet proven their long-term viability, our ability to develop new concepts, risks associated with growth through acquisitions, and our ability to manage risks relating to the opening of new restaurants, including real estate development and construction activities, union

Edgar Filing: DARDEN RESTAURANTS INC - Form 10-Q

activities, the issuance and renewal of licenses and permits, the availability and cost of funds to finance growth and our ability to hire and train qualified personnel;

Our plans to expand newer concepts like Bahama Breeze and Seasons 52 that have not yet proven their long-term viability;

Our ability to close the sale of our Smokey Bones restaurants;

Our ability to combine and integrate the business of RARE into our operations in a successful and timely manner and to achieve synergies following the completion of the acquisition, including the ultimate realization of goodwill; and

The impact of the substantial indebtedness we incurred in connection with the acquisition of RARE.
Since it is not possible to foresee all such factors, risks and uncertainties, investors should not consider these factors to be a complete list of all risks or uncertainties.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to a variety of market risks, including fluctuations in interest rates, foreign currency exchange rates and commodity prices. To manage this exposure, we periodically enter into interest rate, foreign currency exchange and commodity instruments for other than trading purposes.

We use the variance/covariance method to measure value at risk, over time horizons ranging from one week to one year, at the 95 percent confidence level. As of November 25, 2007, our potential losses in future net earnings resulting from changes in foreign currency exchange rate instruments, commodity instruments and floating rate debt interest rate exposures were approximately \$11.3 million over a period of one year. The value at risk from an increase in the fair value of all of our long-term fixed rate debt, over a period of one year, was approximately \$163.1 million. The fair value of our long-term fixed rate debt during the first six months of fiscal 2008 averaged \$790.5 million, with a high of \$1.68 billion and a low of \$468.4 million.

During the quarter ended November 25, 2007, we entered into treasury-lock derivative instruments with \$550.0 million of notional value to hedge a portion of the risk of changes in the benchmark interest rate prior to the issuance of the New Senior Notes that replaced our interim financing that was used to fund the RARE acquisition, as changes in the benchmark interest rate would cause variability in our forecasted interest payments. These instruments were settled at the time of the issuance of our New Senior Notes for \$6.2 million.

Our interest rate risk management objective is to limit the impact of interest rate changes on earnings and cash flows by targeting an appropriate mix of variable and fixed rate debt.

Item 4. Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of November 25, 2007, the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of November 25, 2007.

Except as discussed below, during the fiscal quarter ended November 25, 2007, there was no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

During the quarter ended November 25, 2007, we acquired RARE. Refer to Note 2 of Notes to Consolidated Financial Statements for additional information regarding this acquisition. We are currently in the process of evaluating RARE's internal controls and the impact of the acquisition on our internal controls over financial reporting. We have implemented internal controls over the accounting for the acquisition of RARE during the quarter ended November 25, 2007 to ensure our internal control over financial reporting remains effective.

Table of Contents

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

We are subject to private lawsuits, administrative proceedings and claims that arise in the ordinary course of our business. A number of these lawsuits, proceedings and claims may exist at any given time. These matters typically involve claims from guests, employees and others related to operational issues common to the restaurant industry and can also involve infringement of, or challenges to, our trademarks. While the resolution of a lawsuit, proceeding or claim may have an impact on our financial results for the period in which it is resolved, we believe that the final disposition of the lawsuits, proceedings and claims in which we are currently involved, either individually or in the aggregate, will not have a material adverse effect on our financial position, results of operations or liquidity. The following is a brief description of the more significant of these matters. In view of the inherent uncertainties of litigation, the outcome of any unresolved matters described below cannot be predicted at this time, nor can the amount of any potential loss be reasonably estimated.

Like other restaurant companies and retail employers, we have been faced in a few states with allegations of purported class-wide wage and hour violations. In January 2004, a former food server filed a purported class action in California state court alleging that Red Lobster's server banking policies and practices (under which servers settle guest checks directly with customers throughout their shifts, and turn in collected monies at the shift's end) improperly required her and other food servers and bartenders to make up cash shortages and walkouts in violation of California law. The case was ordered to arbitration. As a procedural matter, the arbitrator ruled that class-wide arbitration is permissible under our dispute resolution program. In January 2007, plaintiffs' counsel filed in California state court a second purported class action lawsuit on behalf of servers and bartenders alleging that Olive Garden's server banking policy and its alleged failure to pay split shift premiums violated California law. Although we believe that our policies and practices were lawful and that we have strong defenses to both cases, following mediation with the plaintiffs, we have reached a tentative resolution of the matters. As a result, we accrued approximately \$4 million of legal settlement costs for the quarter and six months ended November 25, 2007.

In August 2007, an action was filed in California state court by a former Olive Garden server alleging that Olive Garden's scheduling practices resulted in failure to properly pay reporting time (minimum shift) pay as well as to pay minimum wage, to provide itemized wage statements, and to timely pay employees upon the termination of their employment. The complaint seeks to have the suit certified as a class action; however, no class has been certified to date. We intend to defend ourselves vigorously against this claim and have removed the case to federal court, and filed motions to dismiss the case.

Item 1A. Risk Factors

Various risks and uncertainties could affect our business. Any of the risks described below or elsewhere in this report or our other filings with the Securities and Exchange Commission could have a material impact on our business, financial condition or results of operations. It is not possible to predict or identify all risk factors. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also impair our business operations. Therefore, the following is not intended to be a complete discussion of all potential risks or uncertainties.

We face intense competition, and if we are unable to continue to compete effectively, our business, financial condition and results of operations would be adversely affected.

The casual dining sector of the restaurant industry is intensely competitive with respect to pricing, service, location, personnel and type and quality of food, and there are many well-established competitors. We compete within each market with national and regional restaurant chains and locally-owned restaurants. We also face growing competition as a result of the trend toward convergence in grocery, deli and restaurant services, particularly in the supermarket industry which offers convenient meals in the form of improved entrées and side dishes from the deli section. We compete primarily on the quality, variety and value perception of menu items. The number and location of restaurants, type of concept, quality and efficiency of service, attractiveness of facilities and effectiveness of advertising and marketing programs are also important factors. We anticipate that intense competition will continue with respect to all of these factors. If we are unable to continue to compete effectively, our business, financial condition and results of operations would be adversely affected.

Table of Contents

Certain economic and business factors specific to the restaurant industry and certain general economic factors including energy prices and interest rates that are largely out of our control may adversely affect our results of operations.

Our business results depend on a number of industry-specific and general economic factors, many of which are beyond our control. The casual dining sector of the restaurant industry is affected by changes in national, regional and local economic conditions, seasonal fluctuation of sales volumes, consumer spending patterns and consumer preferences, including changes in consumer tastes and dietary habits, the level of consumer acceptance of our restaurant concepts and health concerns. For example, health concerns relating to the consumption of beef or to specific events such as the outbreak of mad cow disease may adversely impact sales at the LongHorn Steakhouse and The Capital Grille restaurants that offer beef as a primary menu item. In addition, public concern over avian flu may cause fear about the consumption of chicken, eggs and other products derived from poultry. The inability to serve beef or poultry-based products would restrict our ability to provide a variety of menu items to our guests. If we change a restaurant concept or menu in response to such concerns, we may lose customers who do not prefer the new concept or menu, and we may not be able to attract a sufficient new customer base to produce the revenue needed to make the restaurant profitable. We also may have different or additional competitors for our intended customers as a result of such a concept change and may not be able to successfully compete against such competitors. The performance of individual restaurants may also be adversely affected by factors such as demographic trends, severe weather including hurricanes, traffic patterns and the type, number and location of competing restaurants.

General economic conditions may also adversely affect our results of operations. Recessionary economic cycles, a protracted economic slowdown, a worsening economy, increased energy prices, rising interest rates or other industry-wide cost pressures could affect consumer behavior and spending for restaurant dining occasions and lead to a decline in sales and earnings. When gasoline, natural gas, electricity and other energy costs increase, and credit card, home mortgage and other borrowing costs increase with rising interest rates, our guests may have lower disposable income and reduce the frequency with which they dine out, or may choose more inexpensive restaurants when eating outside the home. Furthermore, we cannot predict the effects of actual or threatened armed conflicts or terrorist attacks, efforts to combat terrorism, military action against any foreign state or group located in a foreign state or heightened security requirements on the economy or consumer confidence in the United States. Any of these events could also affect consumer spending patterns or result in increased costs for us due to security measures.

Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could increase our costs, reduce traffic in some or all of our restaurants or impose practical limits on pricing, any of which could lower our profit margins and have a material adverse effect on our financial condition and results of operations.

The price and availability of food, ingredients and utilities used by our restaurants could adversely affect our revenues and results of operations.

Our results of operations depend significantly on our ability to anticipate and react to changes in the price and availability of food, ingredients, utilities and other related costs over which we may have little control. Operating margins for our restaurants are subject to changes in the price and availability of food commodities, including shrimp, lobster, crab and other seafood, as well as beef, pork, chicken, cheese and produce. The introduction of or changes to tariffs on imported shrimp or other food products could increase our costs and possibly impact the supply of those products. We are subject to the general risks of inflation. Our restaurants' operating margins are also affected by fluctuations in the price of utilities such as electricity and natural gas, whether as a result of inflation or otherwise, on which the restaurants depend for their energy supply. Our inability to anticipate and respond effectively to an adverse change in any of these factors could have a significant adverse effect on our results of operations.

Table of Contents

We may lose revenue or incur increased costs if our restaurants do not receive frequent deliveries of food and other supplies.

Possible shortages or interruptions in the supply of food items and other supplies to our restaurants caused by inclement weather or other conditions beyond our control could adversely affect the availability, quality and cost of the items we buy and the operations of our restaurants. In addition, the distribution of most meat, food and other supplies for our LongHorn Steakhouse and The Capital Grille restaurants is handled by a single distributor. If this distributor does not perform adequately or otherwise fails to distribute product or supplies to these restaurants, our inability to replace this distributor in a short time frame on acceptable terms could increase our costs or could cause shortages of food and other items at these restaurants which may cause us to remove certain items from a restaurant's menu or temporarily close a restaurant. If we temporarily close a restaurant or remove popular items from a restaurant's menu, that restaurant may experience a significant reduction in revenue during the time affected by the shortage or thereafter as a result of our customers changing their dining habits.

We may be subject to increased labor and insurance costs.

Our restaurant operations are subject to federal and state laws governing such matters as minimum wages, working conditions, overtime and tip credits. As federal and state minimum wage rates increase, we may need to increase not only the wages of our minimum wage employees but also the wages paid to employees at wage rates that are above minimum wage. Labor shortages and increased employee turnover could also increase our labor costs. If competitive pressures or other factors prevent us from offsetting increased labor costs by increases in prices, our profitability may decline. In addition, the current premiums that we pay for our insurance (including workers' compensation, general liability, property, health, and directors' and officers' liability) may increase at any time, thereby further increasing our costs. The dollar amount of claims that we actually experience under our workers' compensation and general liability insurance, for which we carry high per-claim deductibles, may also increase at any time, thereby further increasing our costs. Further, the decreased availability of property and liability insurance has the potential to negatively impact the cost of premiums and the magnitude of uninsured losses.

Increased advertising and marketing costs could adversely affect our results of operations.

If our competitors increase their spending on advertising and promotions, if our advertising, media or marketing expenses increase, or if our advertising and promotions become less effective than that of our competitors, we could experience a material adverse effect on our results of operations.

We may experience higher-than-anticipated costs associated with the opening of new restaurants or with the closing, relocating and remodeling of existing restaurants, which may adversely affect our results of operations.

Our revenues and expenses can be impacted significantly by the number and timing of the opening of new restaurants and the closing, relocating and remodeling of existing restaurants. We incur substantial pre-opening expenses each time we open a new restaurant and other expenses when we close, relocate or remodel existing restaurants. The expenses of opening, closing, relocating or remodeling any of our restaurants may be higher than anticipated. An increase in such expenses could have an adverse effect on our results of operations.

Litigation may adversely affect our business, financial condition and results of operations.

Our business is subject to the risk of litigation by employees, consumers, suppliers, shareholders or others through private actions, class actions, administrative proceedings, regulatory actions or other litigation. The outcome of litigation, particularly class action lawsuits and regulatory actions, is difficult to assess or quantify. Plaintiffs in these types of lawsuits may seek recovery of very large or indeterminate amounts, and the magnitude of the potential loss relating to such lawsuits may remain unknown for substantial periods of time. The cost to defend future litigation may be significant. There may also be adverse publicity associated with litigation that could decrease customer acceptance of our services, regardless of whether the allegations are valid or whether we are ultimately found liable. As a result, litigation may adversely affect our business, financial condition and results of operations.

Table of Contents

Unfavorable publicity could harm our business.

Multi-unit restaurant businesses such as ours can be adversely affected by publicity resulting from complaints or litigation alleging poor food quality, food-borne illness, personal injury, adverse health effects (including obesity) or other concerns. Negative publicity may also result from actual or alleged violations by our restaurants of dram shop laws which generally provide an injured party with recourse against an establishment that serves alcoholic beverages to an intoxicated party who then causes injury to himself or to a third party. Regardless of whether the allegations or complaints are valid, unfavorable publicity relating to a limited number of our restaurants, or only to a single restaurant, could adversely affect public perception of the entire brand. Adverse publicity and its effect on overall consumer perceptions of food safety could have a material adverse effect on our business.

A lack of availability of suitable locations for new restaurants or a decline in the quality of the locations of our current restaurants may adversely affect our revenues and results of operations.

The success of our restaurants depends in large part on their location. As demographic and economic patterns change, current locations may not continue to be attractive or profitable. Possible declines in neighborhoods where our restaurants are located or adverse economic conditions in areas surrounding those neighborhoods could result in reduced revenues in those locations. In addition, desirable locations for new restaurant openings or for the relocation of existing restaurants may not be available at an acceptable cost when we identify a particular opportunity for a new restaurant or relocation. The occurrence of one or more of these events could have a significant adverse effect on our revenues and results of operations.

We are subject to a number of risks relating to federal, state and local regulation of our business that may increase our costs and decrease our profit margins.

The restaurant industry is subject to extensive federal, state and local laws and regulations, including those relating to building and zoning requirements and those relating to the preparation and sale of food. The development and operation of restaurants depend to a significant extent on the selection and acquisition of suitable sites, which are subject to zoning, land use, environmental, traffic and other regulations and requirements. We are also subject to licensing and regulation by state and local authorities relating to health, sanitation, safety and fire standards and liquor licenses, federal and state laws governing our relationships with employees (including the Fair Labor Standards Act of 1938, the Immigration Reform and Control Act of 1986 and applicable requirements concerning the minimum wage, overtime, family leave, tip credits, working conditions, safety standards and immigration status), federal and state laws which prohibit discrimination and other laws regulating the design and operation of facilities, such as the Americans With Disabilities Act of 1990. In addition, we are subject to a variety of federal, state and local laws and regulations relating to the use, storage, discharge, emission and disposal of hazardous materials. The impact of current laws and regulations, the effect of future changes in laws or regulations that impose additional requirements and the consequences of litigation relating to current or future laws and regulations could increase our compliance and other costs of doing business and therefore have an adverse effect on our results of operations. Failure to comply with the laws and regulatory requirements of federal, state and local authorities could result in, among other things, revocation of required licenses, administrative enforcement actions, fines and civil and criminal liability.

Our growth through the opening of new restaurants and the development or acquisition of new dining concepts may not be successful and could result in poor financial performance.

As part of our business strategy, we intend to continue to expand our current portfolio of restaurant concepts and to develop or acquire additional concepts that can be expanded profitably. This strategy involves numerous risks, and we may not be able to achieve our growth objectives. We may not be able to open all of our planned new restaurants, and the new restaurants that we open may not be profitable or as profitable as our existing restaurants. New restaurants typically experience an adjustment period before sales levels and operating margins normalize, and even sales at successful newly-opened restaurants generally do not make a significant contribution to profitability in their initial months of operation. The opening of new restaurants can also have an adverse effect on sales levels at existing restaurants. Furthermore, we may not be able to develop or acquire additional concepts that are as profitable as our existing restaurants. Growth through acquisitions may involve additional risks. For example, we may pay too much for a concept relative to the actual economic return, be required to borrow funds to make our acquisition (which would increase our interest expense) or be unable to integrate an acquired concept into our operations.

Table of Contents

The ability to open and profitably operate restaurants is subject to various risks, such as the identification and availability of suitable and economically viable locations, the negotiation of acceptable lease or purchase terms for new locations, the need to obtain all required governmental permits (including zoning approvals and liquor licenses) on a timely basis, the need to comply with other regulatory requirements, the availability of necessary contractors and subcontractors, the ability to meet construction schedules and budgets, the ability to manage union activities such as picketing or hand billing which could delay construction, increases in labor and building material costs, the availability of financing at acceptable rates and terms, changes in weather or other acts of God that could result in construction delays and adversely affect the results of one or more restaurants for an indeterminate amount of time, our ability to hire and train qualified management personnel and general economic and business conditions. At each potential location, we compete with other restaurants and retail businesses for desirable development sites, construction contractors, management personnel, hourly employees and other resources. If we are unable to successfully manage these risks, we could face increased costs and lower than anticipated revenues and earnings in future periods.

Our plans to expand our newer concepts Bahama Breeze and Seasons 52 that have not yet proven their long-term viability may not be successful, which could require us to make substantial further investments in those concepts and result in further losses and impairments.

While each of our restaurant concepts, as well as each of our individual restaurants, are subject to the risks and uncertainties described above, there is an enhanced level of risk and uncertainty related to the operation and expansion of our newer concepts such as Bahama Breeze and Seasons 52. These concepts have not yet proven their long-term viability or growth potential. We have made substantial investments in the development and expansion of each of these concepts, and further investment is required. While we have implemented a number of changes to operations at Bahama Breeze, and believe we have improved the guest experience and unit economics sufficiently to restart modest unit growth in fiscal 2009, there can be no assurance that these changes will continue to be successful or that new unit growth will occur. Seasons 52 also is in the very early stages of its development and will require additional resources to support further growth. In each case, these brands will continue to be subject to the risks and uncertainties that accompany any emerging restaurant concept.

Our efforts to sell our Smokey Bones restaurants may not be successful, which could result in further losses and impairments.

On May 5, 2007, we closed 54 Smokey Bones and two Rocky River Grillhouse restaurants, indicated our intention to operate the remaining 73 Smokey Bones while seeking a buyer, and incurred non-cash impairment charges relating to these actions. On November 30, 2007, we entered into an agreement to sell the remaining 73 Smokey Bones restaurants to Barbeque Integrated, Inc., an affiliate of Sun Capital Partners, Inc., a worldwide private investment firm, for approximately \$80 million. On December 31, 2007, we closed with Barbeque Integrated, Inc. on the sale of 62 of the restaurants for approximately \$70.0 million, net of costs associated with the sale. The remaining 11 restaurants are expected to close in fiscal 2008 as the related ownership transfer conditions are satisfied. If the sale of the remaining 11 restaurants does not close for any reason, we may have to close these restaurants, which could result in further losses and impairment charges.

Failure to combine and integrate the business of RARE into our operations in a successful and timely manner could adversely affect our business.

We closed the acquisition of RARE on October 1, 2007. Our integration of RARE's business into our operations will be a complex and time-consuming process which will require significant efforts and expenses. Prior to the merger, the two companies operated independently, each with its own business, customers, employees, culture and systems. We may experience material unanticipated difficulties or expenses in connection with the integration of the business of RARE. The difficulties of combining the business of RARE with our operations may include, among others:

retaining and integrating management and other key employees;

Table of Contents

coordinating marketing functions;

unanticipated issues in integrating information, communications and other systems;

unanticipated incompatibility of purchasing, logistics, marketing and administration methods;

consolidating corporate and administrative infrastructures;

minimizing the diversion of management's attention from ongoing business concerns; and

failure to manage successfully and coordinate the growth of the combined company.

Many of these factors are outside of our control and any one of them could result in increased costs, decreases in the amount of expected revenues and diversion of management's time and energy, which could materially impact our business, financial condition and results of operations.

Even if we successfully integrate the business of RARE into our operations, we may not realize the anticipated benefits of the RARE acquisition.

Even if we successfully integrate the business of RARE into our operations, there can be no assurance that the acquisition will result in the realization of the anticipated benefits. We acquired RARE with the expectation that the acquisition will result in various benefits for the combined company including, among others, business and growth opportunities and significant synergies from increased efficiency and effectiveness in purchasing, distribution and other restaurant and corporate support. However, we may not be able to realize the synergies, goodwill, business opportunities and growth prospects anticipated in connection with the acquisition. We may experience increased competition that limits our ability to expand our business, we may not be able to capitalize on expected business opportunities or general industry and business conditions may deteriorate. Achieving the anticipated benefits of the acquisition is subject to a number of uncertainties and other factors. If these factors limit our ability to achieve the anticipated benefits of the acquisition, our expectations of future results of operations, including the synergies expected to result from the acquisition, may not be met. If such difficulties are encountered or if such synergies, business opportunities and growth prospects are not realized, our business, financial condition and results of operations could be adversely affected.

We incurred substantial additional indebtedness to finance the RARE acquisition, which may decrease our business flexibility and increase our borrowing costs.

Our consolidated indebtedness following the RARE acquisition is substantially greater than our indebtedness prior to the acquisition. The increased indebtedness and higher debt-to-equity ratio of our company, as compared to that which existed on a historical basis, will have the effect, among other things, of reducing our flexibility to respond to changing business and economic conditions and increasing borrowing costs.

Our level of indebtedness could have important consequences. For example, it may:

require a substantial portion of our cash flow from operations for the payment of principal of, and interest on, our indebtedness and reducing our ability to use our cash flow to fund working capital, capital expenditures and general corporate requirements;

limit our ability to obtain additional financing to fund working capital, capital expenditures, additional acquisitions or general corporate requirements, particularly if the ratings assigned to our debt securities by rating organizations were revised downward; and

Edgar Filing: DARDEN RESTAURANTS INC - Form 10-Q

limit our flexibility to adjust to changing business and market conditions and make us more vulnerable to a downturn in general economic conditions as compared to our competitors.

Table of Contents

There are various financial covenants and other restrictions in our debt instruments. If we fail to comply with any of these requirements, the related indebtedness (and other unrelated indebtedness) could become due and payable prior to its stated maturity. A default under our debt instruments may also significantly affect our ability to obtain additional or alternative financing.

Our ability to make scheduled payments or to refinance our obligations with respect to indebtedness will depend on our operating and financial performance, which in turn, is subject to prevailing economic conditions and to financial, business and other factors beyond our control.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below provides information concerning our repurchase of shares of our common stock during the quarter ended November 25, 2007. Since commencing repurchases in December 1995, we have repurchased a total of 143.0 million shares through November 25, 2007 under authorizations from our Board of Directors to repurchase an aggregate of 162.4 million shares.

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs (2)
August 27, 2007 through September 30, 2007	387,401	\$ 43.32	387,401	19,912,970
October 1, 2007 through October 28, 2007	310,816	\$ 43.19	310,816	19,602,154
October 29, 2007 through November 25, 2007	156,724	\$ 41.97	156,724	19,445,430
Total	854,941	\$ 43.03	854,941	19,445,430

- (1) All of the shares purchased during the quarter ended November 25, 2007 were purchased as part of our repurchase program, the most recent increased authority for which was announced in a press release issued on June 20, 2006. There is no expiration date for our program. The number of shares purchased includes shares withheld for taxes on vesting of restricted stock, shares delivered or deemed to be delivered to us on tender of stock in payment for the exercise price of options, and shares reacquired pursuant to tax withholding on option exercises. These shares are included as part of our repurchase program and deplete the repurchase authority granted by our Board. The number of shares repurchased excludes shares we reacquired pursuant to forfeiture of restricted stock.
- (2) Repurchases are subject to prevailing market prices, may be made in open market or private transactions and may occur or be discontinued at any time. There can be no assurance that we will repurchase any shares.

Table of Contents**Item 4. Submission of Matters to a Vote of Security Holders**

- (a) Our Annual Meeting of Shareholders was held on September 14, 2007.
- (b) The name of each director elected at the meeting is provided in Item 4(c) of this report. There are no other directors with a term of office that continued after the Annual Meeting.
- (c) At the Annual Meeting, the shareholders took the following actions:
- (i) Elected the following twelve directors:

	For	Withheld
Leonard L. Berry	109,871,148	11,426,250
Odie C. Donald	103,025,080	18,272,318
David H. Hughes	109,900,253	11,397,145
Charles A. Ledsinger, Jr.	109,034,698	12,262,700
William M. Lewis, Jr.	109,906,339	11,391,059
Senator Connie Mack, III	107,374,553	13,922,845
Andrew H. Madsen	109,940,642	11,356,755
Clarence Otis, Jr.	104,304,496	16,992,901
Michael D. Rose	100,910,496	20,386,902
Maria A. Sastre	109,872,567	11,424,831
Jack A. Smith	105,453,691	15,843,707
Rita P. Wilson	109,717,358	11,580,040

- (ii) Ratified the appointment of KPMG LLP as our independent registered public accounting firm for the fiscal year ending May 25, 2008.

For	114,429,508
Against	5,846,316
Abstain	1,021,573
Broker Non-Vote	0
