ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended June 30, 2007

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 0-16538

MAXIM INTEGRATED PRODUCTS, INC.

(Exact name of Registrant as specified in its charter)

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Delaware
(State or other jurisdiction of
Incorporation or organization)

94-2896096
(I.R.S. Employer
Identification No.)

120 San Gabriel Drive
Sunnyvale, California 94086
(Address of Principal Executive Offices) (Zip Code)

Registrant's telephone number, including area code: (408) 737-7600

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
None	None

Securities registered pursuant to Section 12(g) of the Act: None¹

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting stock held by non-affiliates of the Registrant based upon the closing price of the common stock on December 29, 2007 as reported on the Pink OTC Markets was approximately \$4,222,933,000. Shares of voting stock held by executive officers,

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

directors and holders of more than 5% of the outstanding voting stock have been excluded from this calculation because such persons may be deemed to be affiliates. Exclusion of such shares should not be construed to indicate that any of such persons possesses the power, direct or indirect, to control the Registrant, or that any such person is controlled by or under common control with the Registrant.

Number of shares outstanding of the Registrant's Common Stock, \$.001 par value, as of September 1, 2008: 320,553,460

Documents Incorporated By Reference:

None.

¹ The Company's common stock par value \$0.001 per share was suspended from trading on NASDAQ effective as of October 2, 2007. On October 17, 2007, NASDAQ filed a Form 25 to effect the delisting of the Company's common stock from NASDAQ. Currently, the Company's common stock is traded on the Pink OTC Market under the symbol MXIM.PK.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements are based on our current expectations and could be affected by the uncertainties and risk factors described throughout this filing and particularly in Part I, Item 1A Risk Factors and the business outlook section in Part II, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations. These statements relate to, among other things, sales, gross margins, operating expenses, capital expenditures and requirements, liquidity, asset dispositions, product development and R&D efforts, manufacturing plans and pending litigation, and are indicated by words or phrases such as anticipate, expect, outlook, foresee, forecast, believe, could, intend, will, plan, seek, project, and variations of such words and expressions. These statements involve risks and uncertainties that could cause actual results to differ materially from expectations. These forward-looking statements should not be relied upon as predictions of future events as we cannot assure you that the events or circumstances reflected in these statements will be achieved or will occur. For a discussion of some of the factors that could cause actual results to differ materially from our forward-looking statements, see the discussion on Risk Factors that appears in Part I, Item 1A of this 2007 Form 10-K and other risks and uncertainties detailed in this and our other reports and filings with the Securities and Exchange Commission (SEC). We undertake no obligation to update forward-looking statements to reflect developments or information obtained after the date hereof and disclaim any obligation to do so, except as required by federal securities laws.

Table of Contents

PART I

ITEM 1. BUSINESS

Maxim Integrated Products, Inc. (Maxim or the Company and also referred to as we, our or us) designs, develops, manufactures and markets a broad range of linear and mixed-signal integrated circuits, commonly referred to as analog circuits, for a large number of geographically diverse customers. We also provide a range of high-frequency process technologies and capabilities that can be used in custom designs. The analog market is fragmented and characterized by many diverse applications, numerous product variations and, with respect to many circuit types, relatively long product life cycles. Our objective is to develop and market both proprietary and industry-standard analog integrated circuits that meet the increasingly stringent quality and performance standards demanded by customers.

We are a Delaware corporation that was originally incorporated in California in 1983. We are headquartered in Sunnyvale, California. The mailing address for our headquarters is 120 San Gabriel Drive, Sunnyvale, California 94086, and our telephone number is (408) 737-7600. Additional information about us is available on our website at www.maxim-ic.com.

We make available through our website, free of charge, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the Exchange Act) as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. We assume no obligation to update or revise any forward-looking statements in this Annual Report on Form 10-K, whether as a result of new information, future events or otherwise, unless we are required to do so by law. A copy of this Annual Report on Form 10-K is available without charge upon written request to: Investor Relations, Maxim Integrated Products, Inc., 120 San Gabriel Drive, Sunnyvale, California 94086.

The Mixed Signal Analog Integrated Circuit Market

All electronic signals generally fall into one of two categories, linear or digital. Linear (or analog) signals represent real world phenomena, such as temperature, pressure, sound, or speed, and are continuously variable over a wide range of values. Digital signals represent the ones and zeros of binary arithmetic and are either on or off.

Three general classes of semiconductor products arise from this partitioning of signals into linear or digital:

Digital devices, such as memories and microprocessors that operate primarily in the digital domain;

Linear devices such as amplifiers, references, analog multiplexers and switches that operate primarily in the analog domain; and

Mixed-signal devices, such as data converter devices, that combine linear and digital functions on the same integrated circuit and interface between the analog and digital worlds.

Our strategy has been to target both the linear and mixed-signal markets, often collectively referred to as the analog market. In addition, some of our products are exclusively or principally digital. While our focus continues to be on the linear and mixed signal market, our capabilities in the digital domain enable development of new mixed signal and other products with very sophisticated digital characteristics. Risks associated with pursuing this strategy are discussed in Item 1A Risk Factors.

Table of Contents

Our linear and mixed signal products serve four major end-markets. These major end-markets and their primary market segments are noted in the table below:

<u>MAJOR END-MARKET</u>	<u>MARKET SEGMENT</u>
INDUSTRIAL	Automatic Test Equipment (ATE) Automotive Financial Terminals Industrial Control Instrumentation Military Medical Other Industrial
COMMUNICATIONS	Base Stations Networking/ Data Communications Telecommunications Other Communications
CONSUMER	Cell Phones Digital Cameras GPS Handhelds & Media Players Home Entertainment Set-top Boxes Other Consumer
COMPUTING	Notebook & Desktop Computers Peripherals Servers & Workstations Storage Other Computing

Product Quality

We employ a system addressing quality and reliability of our products from initial design through wafer fabrication, assembly, testing and final shipment. We have received ISO 9001/2, TS 16949 and ISO 14001 certifications for all wafer fabrication, assembly, final test and shipping facilities.

Product quality is determined by conformance to predetermined specifications. Specifications are either tested during manufacturing or assured by design. Predetermined specifications assured by design are reliant on the stability of the semiconductor manufacturing processes, the amount of process margin and the completeness of product characterization. Specifications tested during manufacturing are dependent on the integrity of the manufacturing test operation, which includes factors such as test software, stability and repeatability of test systems, test set up issues, human error and other factors and variables.

Reliability testing is done during wafer process development, process release, package development, product release stages and limited ongoing reliability monitors to serve as a control of process consistency. Long term thermal, mechanical and environmental testing is performed on a sampling of products in an effort to detect and accelerate the presence of defects that may arise over the life of a product's use to ensure the reliability of the product. The Company performs infant mortality studies on a limited number of our products. We believe that the above testing regime meets industry standards.

Manufacturing

We primarily manufacture our own wafers and, to a lesser extent, utilize third-party silicon foundries to produce wafers. The majority of processed wafers are subjected to parametric and functional testing at our facilities. The broad range of products demanded by the mixed signal analog integrated circuit market requires multiple manufacturing process technologies. Many different process technologies are currently used

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

for wafer fabrication of our products. Historically, wafer fabrication of analog integrated circuits has not required the state-of-the-art processing equipment necessary for the fabrication of advanced digital integrated circuits, although newer processes do utilize and require these state-of-the-art facilities and equipment. In addition, hybrid and module products are manufactured using a complex multi-chip technology featuring thin-film, thick-film, laser-trimmed resistors and other active or passive components. For the majority of these technologies, we rely on our own fabrication facilities and, to a lesser extent, unaffiliated manufacturing subcontractors.

Table of Contents

During fiscal years 2008, 2007 and 2006, most of our wafer production requirements occurred at one of our four owned wafer fabrication facilities consisting of the following:

Facility Location	Fiscal Year Acquired
Beaverton, Oregon	1994
San Jose, California	1998
Dallas, Texas	2001
San Antonio, Texas	2004

In fiscal year 2007, we entered into a five-year supply agreement with Seiko Epson Corporation (Epson) under which Epson will manufacture some of our mixed signal semiconductor products. These products will be manufactured by Epson under non-exclusive rights and licenses using our proprietary technology at Epson's fabrication facility located in Sakata, Japan. Together with Epson, we will cross-license key mixed-signal process technologies which will be deployed at Epson's Sakata, Japan facility. Additionally in fiscal year 2007, we acquired land and a building located on 39 acres in Irving, Texas for \$38.8 million for future wafer manufacturing capacity requirements.

We have a wafer bump manufacturing facility located in Dallas, Texas. We use this facility to manufacture products that utilize chip scale packaging (CSP) or wafer level packaging (WLP). CSP or WLP (collectively referred to as CSP) enables integrated circuits to be attached directly to a printed circuit board without the use of a traditional plastic package. In addition, we utilize independent subcontractors to perform wafer bump manufacturing to the extent we do not have the internal capacity or capabilities to perform such services.

Once wafer manufacturing has been completed, wafers are generally sorted in order to determine which integrated circuits on each wafer are functional and which are defective. We currently perform wafer sort, final test and shipping activities at two facilities located in Cavite, the Philippines, and Chonburi Province, Thailand. Our finished products ship directly from either Cavite, the Philippines or Chonburi Province, Thailand to customers worldwide or to other Company locations for sale to end customers or distributors.

As is customary in the industry, traditional integrated circuit assembly is performed by foreign assembly subcontractors, located in the Philippines, Malaysia, Thailand, China, Taiwan, Singapore, South Korea and Japan, where wafers are separated into individual integrated circuits and assembled into a variety of packages.

After assembly has been completed, the majority of the assembled product is shipped back to our manufacturing facilities located in Cavite, the Philippines or Chonburi Province, Thailand where the packaged integrated circuits undergo final testing and preparation for customer shipment.

During fiscal year 2007, we completed construction of a module assembly facility in Batangas, the Philippines, on the land we had purchased in fiscal year 2006. We also commenced transition activities of the assembly of certain modules from our subcontractor to this new assembly facility. We completed exit activities and discontinued using the subcontractor during fiscal year 2008. All Company-owned equipment and materials have been transferred back to us by the subcontractor.

Sales and Marketing

We market our products worldwide through a direct-sales and applications organization and through our own and other unaffiliated distribution channels to a broad range of customers in diverse industries. Our products typically require a sophisticated technical sales effort. Our sales organization is divided into domestic and international regions. Distributors and direct customers generally buy on an individual purchase order basis, rather than pursuant to long-term agreements.

Certain distributors have agreements with us which allow for price protection on certain inventory if we lower the price of our products. Certain distributor agreements also generally permit distributors to exchange a portion of certain purchases on a periodic basis. As is customary in the semiconductor industry, our distributors may market products which compete with our products.

Sales to certain international distributors are made under agreements which permit limited stock return privileges but not sales price rebates. The agreements generally permit distributors to exchange a portion of their purchases on a periodic basis. See Critical Accounting Policies in Part II, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 2 of Notes to Consolidated Financial Statements of this Annual Report on Form 10-K, which contains information regarding our revenue recognition policy.

Table of Contents

We operate in one reportable segment – the design, development, marketing and manufacturing of a broad range of linear and mixed signal integrated circuits. No single customer accounted for more than 10% of net revenues in fiscal years 2007, 2006 and 2005. Based on customers ship-to location, international sales accounted for approximately 77%, 78% and 74% of net revenues in fiscal years 2007, 2006 and 2005, respectively. See Note 13, Segment Information in the Notes to Consolidated Financial Statements.

Backlog

At June 28, 2008 and June 30, 2007, our backlog was approximately \$370 million and \$412 million, respectively. At June 24, 2006 and June 25, 2005, our backlog was approximately \$429 million and \$313 million, respectively. We include in our backlog customer-released orders with firm schedules for shipment within the next 12 months. As is customary in the semiconductor industry, these orders may be canceled in most cases without penalty to the customers. In addition, our backlog includes orders from domestic distributors for which revenues are not recognized until the products are sold by the distributors. Accordingly, we believe that our backlog at any time should not be used as a measure of future revenues. All backlog numbers have been adjusted for estimated future U.S. distribution ship and debit pricing adjustments.

Research and Development

We believe that research and development is critical to our future success. Objectives for the research and development function include product definition, design and layout of innovative proprietary products that meet customer needs consistent with their market timing; development of second-source products; design of parts for high yield and reliability; test development; and development of manufacturing processes and advanced packaging to support an expanding product line and customer requirements and development of hardware and software to support the acceptance and design-in of our products in the end customer's system.

Our research and development plans require engineering talent and tools for process technologies, test development, packaging development, product definition, business management, Electronic Design Automation (EDA), circuit design, software development and application support. Research and development expenses were approximately \$659.5 million, \$514.1 million and \$380.4 million in fiscal years 2007, 2006 and 2005, respectively.

Competition

The mixed signal analog integrated circuit industry is intensely competitive, and virtually all major semiconductor companies presently compete with, or conceivably could compete with, some portion of our business.

We believe the principal elements of competition include:

technical innovation, service and support;

time to market;

product performance and features;

quality and reliability;

product pricing and delivery capabilities;

customized design and applications;

business relationship with customers; and

manufacturing competence and inventory management.

Our principal competitors include, but are not limited to, Analog Devices, Inc., Intersil Corporation, Linear Technology Corporation, National Semiconductor Corporation and Texas Instruments Inc. In addition, we expect increased competition in the future from other emerging and established companies.

Patents, Licenses, and Other Intellectual Property Rights

We rely upon both know-how and patents to develop and maintain our competitive position. There can be no assurance that others will not develop or patent similar technology or reverse engineer our products or that the confidentiality agreements with employees, consultants, silicon foundries and other suppliers and vendors will be adequate to protect our interests. Our products interface with other products, which may require us to obtain licenses that we do not have.

Table of Contents

We hold and pursue intellectual property, including patents, trademarks and trade secrets as appropriate for our markets and technologies. It is our policy to seek patent protection for significant inventions that may be patented, though we may elect, in appropriate cases, not to seek patent protection even for significant inventions if other protection, such as maintaining the invention as a trade secret, is considered more advantageous. In addition, we have registered certain of our mask sets under the Semiconductor Chip Protection Act of 1984. We hold a number of patents worldwide with expiration dates ranging from 2008 to 2026.

There can be no assurance that any patent will be issued on pending applications or that any patent issued will provide substantive protection for the technology or product covered by it. We have registered several of our trademarks with the U.S. Patent and Trademark Office and in foreign jurisdictions.

Employees

At June 28, 2008, we had 9,810 employees. At June 30, 2007 and June 24, 2006, we had 10,136 and 9,096 employees, respectively.

Environmental Regulations

To date, our compliance with foreign, federal, state and local laws and regulations that have been enacted to regulate the environment has not had a material adverse effect on our capital expenditures, earnings, competitive or financial position. However, we could be subject to fines, suspension of production, alteration of our manufacturing processes or cessation of our operations if we fail to comply with present or future statutes and regulations governing the use, storage, handling, discharge or disposal of toxic, volatile or otherwise hazardous materials used in our manufacturing processes.

Executive Officers

For information regarding our current executive officers, please see Part III, Item 10 of this Annual Report on Form 10-K.

ITEM 1A. RISK FACTORS

You should carefully consider and evaluate the risk factors described below and those noted in Item 1 Business of this Annual Report on Form 10-K. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that are currently deemed immaterial may also impair our business, financial condition and operating results. If any of these risks occur, our business could be materially harmed. If our business is harmed, the trading price of our common stock could decline. This Annual Report on Form 10-K contains forward-looking statements that involve risks and uncertainties.

Risks Related to the Investigation of our Historical Stock Option Practices and the Resulting Restatement of our Prior Financial Statements

As disclosed in our Annual Report on Form 10-K for the fiscal year ended June 24, 2006, our review of our stock option grant practices resulted in the restatement of certain of our past financial statements. In connection with our past option grant practices, we have been subject to a number of ongoing shareholder derivative litigation, unable to file periodic reports to the SEC on a timely basis and delisted from the NASDAQ Global Select Market (formerly the NASDAQ National Market). We have also been subject to an informal inquiry by the SEC, subject to an investigation by the U.S. Attorney for the Northern District of California (the U.S. Attorney), subject to an ongoing audit by the Internal Revenue Service, and required to suspend the issuing of shares upon the exercise of all of our outstanding stock options and restricted stock units (RSUs) and purchases under our employee stock purchase program inasmuch as our Form S-8 registration statements for our equity plans are not effective because of our delinquent SEC periodic reporting. The informal SEC investigation has subsequently been settled without any admission of wrongdoing on the part of the Company and without any assessment of penalties and the U.S. Attorney subsequently informed us that its office does not intend to pursue any further investigation or action against the Company concerning our option grant practices. As a result of these events, we have been and remain subject to a number of risks, including the following, each of which could result in a material adverse effect to our business, financial condition and results of operations and/or a negative effect on the market for our stock: (i) the commencement of additional regulatory or governmental investigations relating to our restatement or option grant practices, (ii) private litigation relating to our restatement or option grant practices, including the pending or new stockholder litigation or possible litigation by option holders, (iii) currently unanticipated issues with respect to our restatement or our ability to become current in our periodic SEC reports that could materially delay our ability to permit the exercise of

Table of Contents

outstanding options and to achieve relisting on NASDAQ or another national securities exchange, which would likely have a material adverse effect on the liquidity of our common stock and our ability to recruit and retain employees; (iv) additional significant costs in effectuating on-going or additional remedial actions or in dealing with any further litigation or unanticipated problems in attaining relisting of our shares on NASDAQ or another national securities exchange and (v) diversion of the time and attention of members of our management and our board of directors from the management of our business.

Dependence on New Products, Packages and Process Technologies

Our future success will continue to depend on our ability to introduce new products, select and enter new markets and to develop new packages and process technologies. Semiconductor design and package and process technologies are subject to rapid technological change, requiring a high level of expenditures for time consuming research and development. Design and package and process development for the portions of the semiconductor market in which we participate are particularly challenging. The success of new product introductions is dependent on several factors, including proper product features, timely product introduction, achievement of acceptable production test times and yields. From time to time, we have not fully achieved our new product introduction and process development goals. There can be no assurance that we will successfully develop or implement new process technologies or that new products will be introduced on a timely basis or receive sufficient market acceptance. It is difficult to predict a schedule for a new product. If a product is not developed on time or does not meet a customer's specifications, the development can be a complete failure. Additionally, we do not always have the necessary development tools, the number of engineers, product definers or business managers, skill sets or experience required in these areas, which may result in our not meeting our research and development goals. Development tools sometimes require licensing and sometimes become obsolete, which can contribute to higher research and development expenses.

Dependence on New Markets and Consumer Demand

Our growth is dependent on our continued ability to defend our existing market and penetrate new markets. We have limited experience in new markets and competition is intense. Innovation, by its nature, is dependent on applying good judgment to predict future technology trends, often based on little existing data about those new markets. There can be no assurance that the markets we serve will grow (for example, older markets do saturate and decline); that our existing and new products will meet the requirements of such markets; that our products will achieve customer acceptance in such markets; that competitors will not drive prices to an unacceptably low level or take market share from us; or that we can achieve or maintain profitability in these markets. Additionally, we have increased the emphasis on highly-integrated products in our product development plans. Such products are more vulnerable to time-to-market demands, proper new product definitions with the right set of functionalities, development execution delays and gross margin pressure. Delays in product development can significantly reduce return on investment and adversely affect our growth. In addition, highly integrated product lives are generally shorter. Shorter product lives can result in excess inventory which we would have to write down. Such write downs may materially adversely impact our results of operations.

Furthermore, changes in demand in the market could have a negative impact on certain of our products. Such change in demand and resulting restructuring of or changes in our business could lead to the closure or consolidation of facilities. This may result in additional costs which could materially adversely affect our results of operations.

Industry Standard Risks

Many of our products are based on industry standards that are continually evolving. Our ability to compete in the future will depend on our ability to identify and ensure compliance with these evolving industry standards. The emergence of new industry standards could render our products incompatible with products developed by major systems manufacturers. As a result, we could be required to invest significant time and effort and to incur significant expense to redesign our products to ensure compliance with relevant standards. If our products are not in compliance with prevailing industry standards or requirements, we could miss opportunities to achieve crucial design wins which in turn could have a material adverse effect on our business, operating and financial results.

Manufacturing Risks

The fabrication of integrated circuits is a highly complex and precise process. Minute impurities, contaminants in the manufacturing environment, difficulties in the fabrication process, defects in the masks used in the wafer manufacturing process, manufacturing equipment failures, wafer breakage, or other factors can cause a substantial percentage of wafers to be rejected or numerous dice on each wafer to be nonfunctional. We have from time to time experienced reliability problems and lower-than-expected production yields, which have delayed product shipments.

Table of Contents

and adversely affected gross margins. There can be no assurance that we will not experience a decrease in manufacturing yields or reliability or quality problems that could expose us to liability, product returns and product warranty claims. Further, the number of shippable dice per wafer for a given product is critical to our results of operations. To the extent we do not achieve acceptable manufacturing yields or experience delays in wafer fabrication, wafer sort, assembly or final test operations, our results of operations could be adversely affected. During periods of decreased demand, fixed wafer fabrication costs could have an adverse effect on the Company's financial condition, gross margins, and results of operations.

The relatively lengthy manufacturing cycle could result in inventory imbalances. A product or inventory shortage could adversely affect our customer relations, while any excess inventory may ultimately become unsalable. The occurrence of either of such events may adversely affect our financial condition.

We manufacture most of our wafer production requirements internally. Given the nature of our products, it would be very difficult and costly to arrange for independent manufacturing facilities to supply such products. Any prolonged inability to utilize one of our manufacturing facilities as a result of fire, natural disaster, unavailability of electric power or otherwise, would have a material adverse effect on our results of operations and financial condition.

In addition, some of our current manufacturing and test equipment may become excess or obsolete over time due to changes in manufacturing or test processes, technology changes, or changes in demand for our products. Should this occur, we would be required to write down such equipment to its salvage value which could materially adversely affect our results of operations.

Competition

We experience intense competition from a number of companies, some of which have significantly greater financial, manufacturing, and marketing resources than us while others have greater technical resources and proprietary intellectual property rights than us. Our ability to compete successfully depends on factors both within and outside our control. We may be excluded from our customers' product designs because we cannot provide a complete chip set as required by the customer. There can be no assurance that competitive factors will not adversely affect our future business. To the extent that our proprietary products become more successful, competitors will offer second source products or functionally equivalent products for some of those products, which could erode our profit margins. Competitors may develop or acquire intellectual property that can control certain portions of the semiconductor market in which we compete. Our competitors could use this intellectual property to design products that compete more favorably with our products in terms of performance and pricing. Competitors could also use this intellectual property to design products that can be bundled with other products offered by the competitor and thus exclude us from competing on additional products or in other semiconductor markets. Additionally, the development or acquisition by competitors of intellectual property could prevent us from using such intellectual property in the product development process or could cause delays in such development. Certain of our product offerings are an attractive target for smaller competitors with lower gross and operating margin percentage levels than ours. These companies often target our product offerings with direct or functionally-equivalent second-sources and attempt to take market share at gross and operating margin percentage levels that are improvements to their financial performance but which would be detrimental to our objectives.

Dependence on Independent Distributors and Sales Representatives

A portion of our sales is realized through independent electronics distributors that are not under our control. These independent sales organizations generally represent product lines offered by several companies and thus could reduce their sales efforts applied to our products or terminate their representation of us. We generally require foreign distributors to provide a letter of credit to us in an amount equal to the credit limit set for accounts receivable from such foreign distributors. The letter of credit provides for collection on accounts receivable from the foreign distributor should the foreign distributor default on their accounts receivable to us. In limited instances, where credit limits have been established above the amount of the letter of credit, we are exposed for the difference. We do not require letters of credit from any of our domestic distributors and are not protected against accounts receivable default or bankruptcy by these distributors. The inability to collect open accounts receivable could adversely affect our results of operations and financial condition. Termination of a significant distributor, whether at our or the distributor's initiative, could be disruptive to our current business. As previously noted, in fiscal year 2008, we selected one of our distributors, Avnet, Inc., as our primary global distributor and ended our distribution arrangements with Arrow Electronics. Should we not successfully transition end customers currently purchasing product from Arrow Electronics to purchasing product from Avnet or other Company franchised distributors, such customers might begin purchasing our competitor's products. This, along with the inability to find a suitable replacement should a significant distributor or representative terminate their distributor arrangement with us, could have a material adverse impact on our operating results. Additionally, should the intended benefits from selecting Avnet as our primary global distributor not materialize, our results of operations could be adversely affected.

Table of Contents

Dependence on Independent Foundries, Subcontractors, Thailand and Philippines Test and Shipping Facilities

We have an internal capability to fabricate most of our wafers and we remain dependent on outside silicon foundries for a portion of our wafer fabrication. None of the independent foundries currently used by us is affiliated with us. As is typical in the semiconductor industry, from time to time, we have experienced disruptions in the supply of processed wafers from these foundries due to quality problems, unsatisfactory electrical yields, capacity limitations and process obsolescence. Procurement from foundries is done by purchase order and contracts. Should our orders for purchases of integrated circuits manufactured by these silicon foundries not reflect our customers' ultimate demand for related products, we could have either excess inventory or insufficient inventory to satisfy demand. Excess inventory would result in an inventory write off that could materially adversely affect our results of operations. Too little inventory would prevent us from meeting customer demand and could potentially damage customer relationships and future revenue growth from these customers.

We rely on assembly subcontractors located in the Philippines, Malaysia, Thailand, China, Singapore, Taiwan and South Korea to separate wafers into individual integrated circuits and to package them. None of the assembly subcontractors we currently use is affiliated with us. Reliability problems experienced by our assemblers or the inability to replace an assembly subcontractor could cause serious problems in delivery and quality resulting in potential product liability to us. Such problems could impair our ability to meet our revenue plan in the fiscal period impacted by the disruption. Failure to meet the revenue plan may materially adversely impact our results of operations.

We perform substantially all of our final testing at our facilities in the Philippines and Thailand. Any prolonged inability to utilize one of our testing facilities as a result of fire, natural disaster, political instability, unavailability of electric power or otherwise, would have a material adverse effect on our results of operations and financial condition.

In fiscal year 2009, we plan to reduce our wafer sort, final test, and shipping operations in all of our domestic-based facilities in order to reduce manufacturing costs. This production will be transferred to our manufacturing facilities located in Cavite, the Philippines or Chonburi Province, Thailand. Products currently produced at our domestic facilities have a high technical content and are more difficult to manufacture than the products currently tested in our offshore facilities. Failure to successfully transfer manufacturing of these products to our offshore facilities may result in reduced yields and unsatisfactory quality. Failure to successfully transfer this manufacturing to our offshore facilities may adversely affect our ability to supply products to our customers which could materially adversely impact our results of operations.

As previously noted, the majority of our finished products currently ship directly from Cavite, the Philippines or Chonburi Province, Thailand to our customers worldwide or to other Maxim locations for sale to end customers or distributors. Should there be disruption for any reason to either of our shipping operations in Cavite, the Philippines or Chonburi Province, Thailand, we might not be able to meet our revenue plan in the fiscal period impacted by the disruption. Failure to meet the revenue plan may materially adversely impact our results of operations.

We currently expect that in fiscal year 2009 we will need to add additional sort and final test capacity to meet customer demand. In the past, we have generally met increased sort and final test capacity requirements by constructing additional manufacturing space; however, in fiscal year 2009, we also anticipate to enter into outsourcing agreements with major assembly and test subcontractors in Asia. Failure to expand manufacturing space or negotiate an acceptable contract with a suitable subcontractor could result in increased manufacturing costs. Additionally, such failure may result in insufficient internal manufacturing capacity. Given the complexity of our wafer sort and final test operations, it may be difficult to transfer production to a third party without suffering yield, quality, or delivery problems. Failure of the subcontractor to perform satisfactorily may adversely affect our costs and our ability to supply products to our customers which could materially adversely impact our results of operations.

Any disruptions in our sort, assembly, test or shipping operations or in the operations of our manufacturing subcontractors, including, but not limited to, the inability or unwillingness of any of our these subcontractors to produce adequate supplies of processed wafers, integrated circuit packages or tested product conforming to our quality standards or their inability to provide timely delivery of products or services required by us, could adversely affect the continuity of product supply as well as damage our reputation, relationship and goodwill with affected customers. This, in turn, could have a material adverse effect on our results of operations. Furthermore, finding alternate sources of supply or initiating internal wafer processing for these products may not be economically feasible.

Table of Contents

Availability and Quality of Materials, Supplies, and Subcontract Services

The semiconductor industry has experienced a very large expansion of fabrication capacity and production worldwide over time. As a result of increasing demand from semiconductor, solar and other manufacturers, availability of certain basic materials and supplies, such as raw wafers and silicon on insulator wafers, chemicals, gases, polysilicon, silicon wafers, ultra-pure metals, lead frames and molding compounds, and of subcontract services, like epitaxial growth, ion implantation and assembly of integrated circuits into packages, has been limited from time to time over the past several years, and could come into short supply again if overall industry demand exceeds the supply of these materials and services in the future.

We purchase materials and supplies from many suppliers, some of which are sole-sourced. If the availability of these materials and supplies is interrupted, we may not be able to find suitable replacements. In addition, from time to time natural disasters can lead to a shortage of some of the above materials due to disruption of the manufacturer's production. We devote continuous efforts to maintain availability of all required materials, supplies and subcontract services. However, we do not have long-term agreements providing for all of these materials, supplies and services, and shortages could occur as a result of capacity limitations or production constraints on suppliers that could have a material adverse effect on our ability to achieve our planned production.

A number of our products, including nonvolatile Static Random Access Memory products (SRAMs), real time clocks, and iButton products use components such as memory circuits, batteries, PC boards and crystals that are purchased from third parties. We anticipate that, from time to time, supplies of these components may not be sufficient to meet all customer requested delivery dates for products containing the components. As a result of any such shortages, future sales and earnings from products using these components could be adversely affected. Additionally, significant fluctuations in the purchase price for these components could affect gross margins for the products involved. Suppliers could also discontinue the manufacture of such purchased products or could have quality problems that could affect our ability to meet customer commitments.

Quality problems experienced by suppliers may be impossible to reproduce or detect in a controlled environment, or may not be detected by our quality control procedures. Should undetected quality problems occur, such defects may become part of our finished product ultimately sold to customers. If such defects cause quality control problems in the manufacture of customers' end-products or cause direct or indirect damages to either our customers or the ultimate end-user, we may be liable for our customers' increased production costs and both direct and indirect damages caused by the defective product. Such liability could have a material adverse impact on our results of operations and financial condition.

In addition, suppliers of semiconductor manufacturing equipment are sometimes unable to deliver test and/or wafer fabrication equipment to a schedule or equipment performance specification that meets our requirements. Delays in delivery of equipment could adversely affect our ability to achieve our manufacturing and revenue plans in the future.

Environmental Regulation

Various foreign and United States federal, state, and local government agencies impose a variety of environmental regulations on the storage, handling, use, discharge and disposal of certain chemicals, gases and other substances used or produced in the semiconductor manufacturing process. There can be no assurance, however, that interpretation and enforcement of current or future environmental regulations will not impose costly requirements upon us. Any failure by us to not adequately control the storage, handling, use, discharge or disposal of regulated substances could result in fines, suspension of production, alteration of wafer fabrication processes and legal liability, which may materially adversely impact our financial condition, results of operations or liquidity.

Increasing public attention has been focused on the environmental impact of electronic manufacturing operations and waste electronic equipment. While we to date have not experienced any material adverse effects on our business from environmental regulations, there can be no assurance that changes in such regulations will not have a material adverse effect on our financial condition or results of operations. Possible effects include, but are not limited to, making costly changes to manufacturing, waste discharge or disposal processes and purchasing higher cost equipment or materials.

In 2003, the European Union (EU) adopted mandatory restrictions on the use of certain hazardous substances including, but not limited to, cadmium, lead and mercury. The deadline to comply with these restrictions was July 1, 2006. Other countries, including those in Asia, have adopted voluntary programs or are considering legislation to restrict or prohibit the use of certain hazardous substances. We also anticipate that more stringent environmental rules and regulations will come in effect in the future. We have transitioned the manufacturing process of most of our products to eliminate the use of these hazardous substances which are currently prohibited. However, some of our products may still contain lead and other prohibited hazardous substances which continue to be sold under certain authorized exemptions. If our products do not meet the

EU's or our customer's restriction on the use of certain hazardous substances or similar restrictions by other countries which may enact such legislation, it would preclude us

Table of Contents

from selling products containing these substances to customers in these affected locations, and our customers will find alternate suppliers. This could materially impact our results of operations and financial condition. Additionally, we still maintain products in our inventory which contain these substances based on forecasted demand from certain customers. We periodically write off any quantities of such products that are in excess of forecasted demand. Should we be unable to sell any such products remaining in our inventory to locations or customers which do not have such restrictions or if customers revise purchase orders to reduce order quantities of products containing lead and other hazardous substances, we would have to write such inventory off as obsolete. This could materially adversely impact our results of operations. In addition to the above, should we ship product with restrictions on the use of certain hazardous substances into countries which prohibit such substances, we may be subject to fines from government authorities and damage claims from customers. Such fines and damage claims could materially adversely impact our results of operations.

In addition, should we be required to use additional outside subcontractors, due to any environmental restrictions on certain of our products, there can be no guarantee that we would be able to locate an acceptable vendor or successfully transfer the manufacturing of the products containing hazardous substances once an acceptable vendor were located. Our inability to locate an acceptable vendor or effectively transfer production could have a material adverse effect on our results of operations.

Protection of Proprietary Information and Intellectual Property Indemnification

We rely upon both know-how and patents to develop and maintain our competitive position. There can be no assurance that others will not develop or patent similar technology, reverse engineer our products or that the confidentiality agreements upon which we rely will be adequate to protect our interests. Moreover, the laws of foreign countries generally do not protect proprietary rights to the same extent as the United States, and we may encounter problems in protecting our proprietary rights in those foreign countries. Other companies have obtained patents covering a variety of semiconductor designs and processes, and we might be required to obtain licenses under some of these patents or be precluded from making and selling the infringing products, if these patents are found to be valid. There can be no assurance that we would be able to obtain licenses, if required, upon commercially reasonable terms or at all.

From time to time, we have received, and in the future may receive, notice of claims of infringement by our products on intellectual property rights of third parties. If one or more of our products or processes were determined to infringe on any such intellectual property rights of a third party, a court might enjoin us from further manufacture and/or sale of the affected products. We would then need to obtain a license from the holders of the rights and/or to re-engineer our products or processes in such a way as to avoid the alleged infringement. In the past, it has been common in the semiconductor industry for patent holders to offer licenses on reasonable terms and rates. Although the practice of offering licenses appears to be generally continuing, in some situations, typically where the patent directly relates to a specific product or family of products, patent holders have refused to grant licenses. In any of those cases, there can be no assurance that we would be able to obtain any necessary license on commercially reasonable terms acceptable to us or at all or that we would be able to re-engineer our products or processes to avoid infringement. An adverse result in litigation arising from such a claim could involve an injunction to prevent the sales of a material portion of our products, the reduction or elimination of the value of related inventories and the assessment of a substantial monetary award for damages related to past sales, all of which could have a material adverse effect on our results of operations and financial condition.

We provide intellectual property indemnification for certain customers, distributors, suppliers and subcontractors for attorney fees and damages and costs awarded against these parties in certain circumstances in which our products are alleged to infringe third party intellectual property rights, including patents, registered trademarks and copyrights. In certain cases, there are limits on and exceptions to our potential liability for indemnification relating to intellectual property infringement claims. We cannot estimate the amount of potential future payments, if any, that we might be required to make as a result of these agreements. To date, we have not been required to pay significant amounts for intellectual property indemnification claims. However, there can be no assurance that we will not have significant financial exposure under those intellectual property indemnification obligations.

Enterprise Resource Planning System

We currently expect to implement a new enterprise resource planning (ERP) system as part of our ongoing efforts to improve and strengthen our operational and financial processes and our reporting systems. Any difficulties encountered in the implementation or operation of our new ERP system or any difficulties in the operation of our current ERP system could cause us to fail to meet customer demand for our product or could delay our ability to meet our financial reporting obligations which, in turn, could materially adversely affect our results of operations.

Table of Contents

Global Economic and Political Conditions

Our business is increasingly dependent on the global economy. Any global events impacting the world economy or specific regions of the world, such as political instability or terrorist activity, could impact economic activity which, in turn, could lead to a contraction of customer demand or a disruption in our operations. In the past, our assembly contractors in Malaysia, South Korea, Thailand and the Philippines have been impacted by political disorders, labor disruptions, criminal activities and natural disasters. We have been affected by these problems in the past and none has materially affected our results of operations to date. However, similar problems in the future or not-yet-materialized consequences of past problems, could affect deliveries of our product to our customers, possibly resulting in substantially delayed or lost sales and/or increased expenses. The occurrence of political conflicts or economic crises in countries where our sort, assembly, test, shipping operations and manufacturing subcontractors or distribution channels or customers are located could materially adversely affect our financial condition and results of operations.

Natural Disasters

We operate our business in worldwide locations. Our facilities in California, which include our corporate, research and manufacturing facilities, are in close proximity to known earthquake fault zones. In addition, our locations in Southeast Asia are susceptible to damage from earthquakes, tsunamis and other natural disasters. In the event of a natural disaster, we may suffer a disruption in our operations which could adversely affect our results of operations.

Insurance

We are primarily self-insured with respect to most of our risks and exposures. Based on management's assessment and judgment, we have determined that it is generally more cost effective to self-insure these risks. The risks and exposures we self-insure include, but are not limited to, fire, property and casualty, natural disasters, product defects, political risk, general liability, theft, counterfeits, patent infringement, certain employment practice matters and medical benefits for the vast majority of our domestic (United States) employees. We also maintain insurance contracts with independent insurance companies that provide certain of our employees with health (medical and dental) benefits, workers compensation coverage, long-term disability income coverage, life insurance coverage and fiduciary insurance coverage for employee and Company funds invested under the Employee Retirement Income and Security Act. In addition, we maintain officer and director liability coverage and certain property insurance contracts with independent insurance companies. Should there be catastrophic loss from events such as fires, explosions or earthquakes or other natural disasters, among many other risks, or adverse court or similar decisions in any area in which we are self-insured, our financial condition, results of operations and liquidity may be materially adversely affected.

Product Liability

We warrant our products to our customers generally for one year from the date of shipment, but in certain cases for longer periods. Warranty expense to date has been minimal. In certain cases, which are becoming more commonplace, our product warranty may include significant financial responsibility beyond the cost of replacing the product. In the event that significant warranty claims in excess of historical levels are incurred, our results of operations could be materially adversely impacted.

We face an inherent risk of exposure to product liability suits in connection with reliability problems which may be experienced by our customers. Our products are used by varying industries which include the automotive and medical industries. Failure of our products to perform to specifications could lead to substantial damage to both the end product in which our device has been placed and to the user of such end product. If a product liability claim is brought against us, the cost of defending the claim could be significant and any adverse determination could have a material adverse effect on our results of operations.

We manufacture and sell products into many global jurisdictions where our efforts to contractually limit liability for certain damages, including consequential, indirect and non-proximately caused damages may not be enforceable or may not be found by a court to apply in a particular situation. As we continue to partner with certain customers we may be required to accept increasing exposure for liability including product liability. We believe these relationships with key customers will continue to increase. We continue to attempt to structure our relationships to reduce such liability exposures. Additionally, we attempt to mitigate these exposures through our Quality Assurance developing and maintaining closer working relationships with our critical customers. Claims for damages arising in such liability claims could materially impact the Company financially. Should we choose to not enter such relationships, our revenues and financial operations could be materially affected.

Table of Contents

Customer Supply Agreements

We enter into contracts with certain customers whereby we commit to supply quantities of specified parts at a predetermined scheduled delivery date. The number of such arrangements continues to increase as this practice becomes more commonplace. Should we be unable to supply the customer with the specific part at the quantity and product quality desired on the scheduled delivery date, the customer may incur additional production costs. In addition, the customer may incur lost revenues due to a delay in receiving the parts necessary to have the end-product ready for sale to its customers or due to product quality issues which may arise. Under the customer supply agreements, we may be liable for direct additional production costs or lost revenues. If products were not shipped on time or were quality deficient, we may be liable for resulting damages. Such liability, should it arise, and/or our inability to meet these commitments to our customers may have a material adverse impact on our results of operations and financial condition and would damage our relationship, reputation and goodwill with the affected customers.

Vendor Managed Inventory

We enter into arrangements with certain original equipment manufacturers (OEMs) and Electronic Manufacturing Services (EMS) partners to consign quantities of certain products within close proximity of the OEMs and EMS partners' manufacturing location. The inventory is physically segregated at these locations and we retain title and risk of loss related to this inventory until such time as the OEM or EMS partner pulls the inventory for use in their manufacturing process. Once the inventory is pulled by the OEM or EMS partner, title and risk of loss pass to the customer, at which point we relieve inventory, recognize revenue and the related cost of goods sold. The specific quantities to be consigned are based on a forecast provided by the OEM or EMS partner. Generally, the arrangements with the OEMs and EMS partners provide for transfer of title and risk of loss once product has been consigned for a certain length of time.

We believe these arrangements will continue to grow in terms of number of customers and products and will increase in proportion to consolidated net revenues. It is our belief that revenues from such arrangement will eventually become significant to consolidated net revenues. Should we be unable or unwilling to enter into such agreements as requested by OEMs or EMS partners, our results of operations may be materially adversely impacted. Should we be unable to supply the specific product and quantity needed by the OEM or EMS partner as reflected in their forecast, we may be liable for damages, including but not limited to, lost revenues and increased production costs which could have a material adverse impact on our results of operations and financial condition. Should we supply product in excess of the OEMs or EMS partners actual usage, any inventory not consumed may become excess or obsolete which would result in an inventory write off that could materially adversely affect our results of operations.

Volatility of Stock Price

The market price of our common stock has fluctuated significantly. In the future, the market price of our common stock could be subject to significant fluctuations due to general economic and market conditions and in response to quarter-to-quarter variations including but not limited to the following

our anticipated or actual result of operations;

announcements or introductions of new products by us or our competitors;

anticipated or actual operating results of our customers, peers or competitors;

technological innovations or setbacks by us or our competitors;

conditions in our four major markets;

the commencement or outcome of litigation or governmental investigations;

change in ratings and estimates of our performance by securities analysts;

announcements of merger or acquisition transactions;

announcement of a transaction in which employees may exchange their under-water stock options for new equity, cash or a combination of new equity or cash;

dividend changes;

changes in our capital structure, including any decision we make in regard to the repurchase of our common stock;

management changes;

our inclusion in certain stock indices;

our inclusion in a national stock exchange;

Table of Contents

our ability to maintain compliance with the SEC reporting requirements; and

other events or factors beyond our control.

The stock market in recent years has experienced extreme price and volume fluctuations that have affected the market prices of many high technology companies, particularly semiconductor companies. In some instances, these fluctuations appear to have been unrelated or disproportionate to the operating performance of the affected companies. Any such fluctuation could harm the market price of our common stock.

Taxes

A number of factors may increase our future effective tax rates, including:

the jurisdictions in which profits are determined to be earned and taxed;

the resolution of issues arising from tax audits with various tax authorities;

changes in the valuation of our deferred tax assets and liabilities;

adjustments to estimated taxes upon finalization of various tax returns;

increases in expenses not deductible for tax purposes, including write-offs of acquired in-process research and development and impairments of goodwill in connection with acquisitions;

changes in available tax credits;

changes in share-based compensation;

changes in tax laws or the interpretation of such tax laws, and changes in generally accepted accounting principles; and

the repatriation of non-U.S. earnings for which we have not previously provided for U.S. taxes.

We are subject to taxation in various countries and jurisdictions. Significant judgment is required to determine tax liabilities on a worldwide basis. Our future tax rates could be affected by various changes in the composition of earnings in countries with different tax rates, changes in the valuation of our deferred tax assets and liabilities, or changes in the tax laws.

Any significant increase in our future effective tax rates could reduce net income for future periods and may materially adversely impact our results from operations.

Potential Tax Liabilities Under Section 409A of the Internal Revenue Code and Other Tax Penalties

As a result of our investigation into our historical stock option granting practices, we have determined that a number of our outstanding stock option awards were granted at exercise prices below the fair market value of our stock on the appropriate accounting measurement date. A significant adverse tax consequence is that the re-measured options vesting after December 31, 2004 or options that are materially modified after

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

October 3, 2004 are potentially subject to option holder excise tax under Section 409A of the Internal Revenue Code (and, as applicable, similar excise taxes under state law) (Section 409A). Our option holders who hold options which are determined to have been granted with exercise prices below the fair market value of the underlying shares of common stock on the appropriate measurement date would be subject to taxes, penalties and interest under Section 409A if no action is taken to cure the options from exposure under Section 409A before December 31, 2008. We took action in fiscal year 2008 to cure certain options from exposure under Section 409A. There can be no assurance that Maxim's action cured all potential circumstances in which Section 409A would apply. Should it be found that excise taxes under Section 409A apply to option holders subsequent to our ability to cure the options from exposure to Section 409A, and we decide to reimburse our option holders for such taxes, our results of operations may be materially adversely affected.

Also as a result of our investigation into equity awards, we have determined that certain payroll taxes, interest and penalties apply under various sections of the Internal Revenue Code, various state tax statutes, and tax statutes in various foreign jurisdictions. Maxim has reviewed these potential liabilities and accrued the estimated probable amounts of such liabilities. There can be no assurance that Maxim's accruals covered all potential circumstances in which additional payroll taxes, interest and penalties would apply. Should it be found that additional payroll taxes, interest and penalties would apply, our results of operations may be materially adversely affected.

Table of Contents

Foreign Trade and Currency Fluctuations

We conduct our manufacturing and other operations in various worldwide locations. A portion of operating costs and expenses at foreign locations are paid in local currencies. Many of the materials used in our products and much of the manufacturing process for our products are supplied by foreign companies or by our foreign operations, such as our test operations in the Philippines and Thailand. Approximately 77%, 78% and 74% of our net revenues in fiscal years 2007, 2006 and 2005 were shipped to foreign locations. Accordingly, both manufacturing and sales of our products may be adversely affected by political or economic conditions abroad. In addition, various forms of protectionist trade legislation are routinely proposed in the United States and certain foreign countries. A change in current tariff structures or other trade policies could adversely affect our foreign manufacturing or marketing strategies. Currency exchange fluctuations could also increase our operating costs and the cost of components manufactured abroad, and the cost of our products to foreign customers or decrease the costs of products from our foreign competitors.

We are subject to U.S. Customs and Export Regulations, including U.S. International Traffic and Arms Regulations and similar laws, which collectively control import, export and sale of technologies by U.S. companies. Failure to comply with such regulations may result in civil and criminal enforcement, including monetary fines and possible injunctions against shipment of product, which could have a material adverse impact on our results of operations and financial condition.

Dependence on Key Personnel

Our success depends to a significant extent upon the continued service of our chief executive officer, our other executive officers, and key management and technical personnel, particularly our experienced engineers and business unit managers, and on our ability to continue to attract, retain, and motivate qualified personnel. The competition for such employees is intense. We believe our ability to attract, retain and motivate qualified personnel has not been significantly affected by the consequences of the independent stock option review including, but are not limited to, the inability to allow exercise of employee stock options and restricted stock units, inability to participate in the Employee Stock Purchase Plan, delisting of our common stock from trading on NASDAQ and unavailability of financial information regarding our financial performance.

The loss of the services of one or several of our executive officers could have a material adverse effect on us. In addition, there could be a material adverse effect on us should the turnover rates for engineers and other key personnel increase significantly or should we be unable to continue to attract, motivate and retain qualified personnel. Should we lose an engineer who is key to a project's completion during the course of a particular project, the project's completion may be delayed. This delay could negatively affect customer relationships and goodwill and could have a material adverse effect on our results of operations.

We do not maintain any key person life insurance policies on any of our officers or employees.

We are planning to offer our employees the opportunity to exchange their stock options which have an exercise price greater than the Company's stock price (under-water stock options) for equity, cash or some combination thereof, subject to all required approvals. If we are unable to complete such an exchange transaction, it may result in the loss of services of key personnel, low morale and decreased productivity.

Senior Management Changes; Reduced Productivity of New Hires

During fiscal years 2007 and 2008, we experienced significant change in our senior management team and we may continue to experience such changes. Our former Chief Executive Officer (CEO) and our former chief financial officer (CFO) no longer served the Company in any capacity after January 2007. They were immediately replaced by Mr. Doluca, former group president, as the new CEO and member of the Board of Directors and Alan P. Hale, Vice President of Maxim and former chief financial officer of Dallas Semiconductor (acquired by Maxim in fiscal 2001) as Interim Chief Financial Officer and Principal Accounting Officer. In addition, a number of other members of the senior management team were promoted to new roles during fiscal year 2007, principally Matthew Murphy to Vice President of Worldwide Sales and Vijay Ullal to Group President. Later, in September 2007, Mr. Bruce Kiddoo joined the Company as Vice President of Finance. Following the completion of the Company's restatement of previously filed financial statements, Mr. Kiddoo will be appointed Chief Financial Officer and Principal Accounting Officer of the Company.

For new employees or changes in senior management, there may be reduced levels of productivity as recent additions or hires are trained or otherwise assimilate and adapt to our organization and culture. Further, this turnover may also make it difficult to execute on our business plan and achieve our planned financial results.

Table of Contents

Internal Control Over Financial Reporting

Material weaknesses exist in our internal control over financial reporting related to our not maintaining an effective control environment and, separately, not maintaining effective controls over our stock option practices and the related accounting for stock option transactions, which are discussed in further detail in Item 9A Controls and Procedures. As a result of these material weaknesses, our systems of internal controls failed to timely prevent or detect errors which had a material adverse effect on our financial condition and results of operations. There can be no assurance that subsequent to the filing date of this Annual Report on Form 10-K that additional material weaknesses will not be identified which will have a material adverse effect on our financial statements.

Potential Dilutive Effect of Additional Stock Issuance

We have a significant number of authorized but unissued shares of our common stock available. These shares will provide us with the flexibility to issue our common stock for proper corporate purposes, which may include making acquisitions through the use of stock, adopting additional equity incentive plans and raising equity capital. Any issuance of our common stock may result in immediate dilution of our stockholders.

Anti-Takeover Provisions

Our certificate of incorporation permits our Board of Directors to authorize the issuance of up to 2,000,000 shares of preferred stock and to determine the rights, preferences and privileges and restrictions applicable to such shares without any further vote or action by our stockholders. Any such issuance might discourage, delay or prevent a hostile change in control of our company.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table of Contents**ITEM 2. PROPERTIES**

Our headquarters is located in Sunnyvale, California. Manufacturing and other operations are conducted in several locations worldwide. The following table provides certain information regarding our principal owned general offices and manufacturing facilities at June 28, 2008:

Owned Property Location	Use(s)	Approximate Floor Space (sq. ft.)
Sunnyvale, California	Corporate headquarters, office space, engineering, manufacturing, administration, customer services and other	342,000
San Jose, California	Wafer fabrication, office space and administration	78,000
N. Chelmsford, Massachusetts	Engineering, office space and administration	30,000
Beaverton, Oregon	Wafer fabrication, engineering, office space and administration	222,000
Hillsboro, Oregon	Engineering, manufacturing, office space and administration	325,000
Dallas, Texas	Dallas Semiconductor headquarters, office space, engineering, manufacturing, administration, wafer fabrication, customer service, warehousing, shipping and other	657,000
Irving, Texas	Wafer fabrication space, office space and administration	622,000
San Antonio, Texas	Wafer fabrication, office space and administration	381,000
Cavite, the Philippines	Manufacturing, engineering, administration, office space, customer service, shipping and other	237,000
Batangas, the Philippines	Manufacturing, engineering, office space and other	78,000
Chonburi Province, Thailand	Manufacturing, engineering, administration, office space, customer service, shipping and other	144,000
Chandler, Arizona	Office space and engineering	65,000

We purchased land in Bangalore, India in fiscal year 2005. In fiscal year 2006, we purchased land in Batangas, the Philippines, and commenced construction of a module assembly facility at this location. We completed construction of the facility in fiscal year 2007. In addition, we purchased land and a building, located in Sunnyvale, California in fiscal year 2007. We occupied the building in fiscal year 2007 and are using it as engineering, manufacturing and administration space. In May 2007, we announced that we had acquired land and a building in Irving, Texas for future capacity requirements. This facility is not currently operational and will be idle until such time as we need the additional wafer manufacturing capacity. We also purchased a facility in Chandler, Arizona in May 2007; we utilize 25,000 square feet of the facility for engineering and office space and lease the remainder to tenants. We purchased land in Thailand in fiscal year 2008.

In addition to the property listed in the above table, we also lease sales, engineering and manufacturing offices and other premises at various locations in the United States and overseas under operating leases, none of which are material to our future cash flows. These leases expire at various dates through October 2014. We anticipate no difficulty in retaining occupancy of any of our manufacturing, office or sales facilities through lease renewals prior to expiration or through month-to-month occupancy or in replacing them with equivalent facilities.

We expect these facilities to be adequate for our business purposes through at least the next 12 months.

Table of Contents

ITEM 3. LEGAL PROCEEDINGS

Stock Option Litigation

Beginning on or about May 22, 2006, several derivative actions were filed against certain current and former executive officers and directors of the Company. These derivative lawsuits were filed in: (1) the U.S. District Court for the Northern District of California, as *In re Maxim Integrated Products, Inc. Derivative Litigation*, Lead Case No. 5:06-cv-03344-JW, which consolidates *McKinney v. Beck, et al.* (Case No. 06-3344) and *Horkay v. Beck, et al.* (Case No. 06-3395), *City of Pontiac Policemen s and Firemen s Retirement System v. Hood, et al.* (Case No. 06-03754) and *Corey v. Gifford, et al.* (Case No. 06-03755); (2) the California Superior Court, Santa Clara County, as *Louisiana Sheriffs Pension & Relief Fund v. Gifford et al.* (Case No. 1-06-CV-065626); and (3) the Delaware Court of Chancery, as *Ryan v. Gifford, et al.* (Case No. Civ 2213-N). The complaints allege, among other things, that certain of our current and former executive officers and directors breached their fiduciary duties to us by engaging in alleged wrongful conduct of back-dating stock options as well as violating Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The Company is named solely as a nominal defendant against whom the plaintiffs seek no recovery.

The parties to the Delaware derivative litigation entered into a stipulated settlement agreement on September 16, 2008, conditioned upon approval of the Delaware Court of Chancery and subject to dismissal of all other pending derivative lawsuits. Currently, there is no trial date scheduled in any of the other actions.

On February 6, 2008, a class action lawsuit was filed in the United States District Court for the Northern District of California against us and our former chief executive officer and former chief financial officer. The complaint alleges that we and certain of our officers and directors violated the federal securities laws by making false and misleading statements and omissions relating to the grants of stock options. The complaint seeks, on behalf of persons who purchased our common stock during the period from April 29, 2003 to January 17, 2008, unspecified damages, interest and costs and expenses, including attorneys' fees and disbursements. The action has been stayed pending completion of the restatement of our consolidated financial statements.

Stock Option Inquiry by Regulatory Authorities

On June 6, 2006, the Company was contacted by the SEC regarding an informal inquiry relating to the Company's past stock options grants and practices. On December 4, 2007, the Company settled the matter with the SEC without admission of any guilt or wrongdoing and without any assessment of penalties against the Company. On June 29, 2006, the Company received a subpoena from the U.S. Attorney for the Northern District of California (U.S. Attorney) requesting documents relating to its stock option grants and practices. The Company cooperated with the U.S. Attorney and was informed that the U.S. Attorney's office does not intend to pursue the matter.

Other Legal Proceedings

In the third quarter of fiscal year 2007, we settled ongoing litigation involving trade secret allegations brought by Analog Devices, Inc. (ADI) against us, and certain of our employees, relating to analog to digital converters. Under the terms of the settlement agreement, we paid ADI \$19.0 million in fiscal 2007, which amount was accrued in the fourth quarter of fiscal year 2006. We also agreed that for a four year period from the date of settlement, we will not develop new standalone analog to digital converters having certain specified resolutions, speeds and purposes. This restriction does not include the use of analog to digital converters when embedded on the same die with a more comprehensive device, system or functionality.

In December 2005, Master Chips bvba (Master Chips), a former distributor of the Company's products in Belgium, filed a demand for arbitration against the Company before the International Court of Arbitration of the International Chamber of Commerce alleging that the Company failed to give adequate advance notice to Master Chips of termination of the distribution agreement under Belgian law and that the Company failed to pay Master Chips commissions on part sales (Case No. 14 123 RCH/JHN). Master Chips sought the recovery of the alleged value of their entire business at the time of termination which they claimed exceeded \$12 million and an unspecified amount for the alleged underpayment of commissions. In response to the arbitration demand, we asserted a claim against Master Chips alleging that we over-paid commissions on part sales. In July 2008, the arbitrator issued a final award awarding Master Chips approximately \$9.1 million on all claims. The Company accrued for this award in fiscal year 2006.

Following the issuance of the partial arbitration award and before the issuance of the final award, in March 2008 the Company filed a petition to vacate the arbitration award in the U.S. District Court for the Northern District of California alleging that the interim award, along with the final award when so issued, should be vacated (C 08-00721

Table of Contents

JW). In its answer, Master Chips asserted that the partial award (along with any final award) should not be vacated and filed a cross-petition to confirm the arbitration award. In August 2008, the Court denied the Company's petition to vacate the arbitration award and confirmed the arbitration award.

In addition to the above, we are subject to other legal proceedings and claims that arise in the normal course of our business. We do not believe that the ultimate outcome of matters arising in the normal course of our business will have a material adverse effect on the financial position of the Company.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock had been traded on the NASDAQ National Market (NASDAQ), under the symbol, MXIM, since our initial public offering in 1988 until October 2, 2007. Our common stock is currently quoted on the over the counter Pink OTC Markets under the symbol, MXIM.PK. For information regarding the suspension and delisting of our common stock from NASDAQ, please see Item 3 Legal Proceedings. As of July 1, 2008, there were 1,121 stockholders of record of our common stock as reported by Computershare.

The following table sets forth the range of the high and low closing prices by quarter for fiscal years 2007 and 2006:

	High	Low
Fiscal Year 2007		
First Quarter	\$ 32.67	\$ 26.49
Second Quarter	\$ 33.04	\$ 27.73
Third Quarter	\$ 33.63	\$ 30.18
Fourth Quarter	\$ 33.90	\$ 28.86
Fiscal Year 2006		
First Quarter	\$ 45.65	\$ 38.14
Second Quarter	\$ 43.09	\$ 34.60
Third Quarter	\$ 42.26	\$ 35.76
Fourth Quarter	\$ 37.94	\$ 30.31

The following table sets forth the dividends paid per share for fiscal years 2007 and 2006:

	Fiscal Years	
	2007	2006
First Quarter	\$ 0.156	\$ 0.100
Second Quarter	\$ 0.156	\$ 0.125
Third Quarter	\$ 0.156	\$ 0.125
Fourth Quarter	\$ 0.156	\$ 0.125

Issuer Purchases of Equity Securities

From fiscal year 2002 through 2006, the Board of Directors authorized the Company to repurchase up to 53.5 million shares of the Company's common stock from time to time at the discretion of the Company's management. All shares repurchased during fiscal year 2006 and during the three months ended September 23, 2006 were pursuant to the above authorized share repurchase programs, which have no expiration date. The number of shares to be repurchased and the timing of such repurchases will be based on several factors, including the price of our common stock, general market and business conditions and other factors.

During the three months ended September 23, 2006, we repurchased 2.1 million shares of our common stock for \$60.8 million. As of September 23, 2006, approximately 5.7 million shares remained available for repurchase under the repurchase authorizations, which have no expiration date. In connection with the stock options investigation, we suspended repurchases of stock under this program as of September 23, 2006.

Stock Performance Graph

The following line chart compares the cumulative total return on our common stock with the cumulative total return on the NASDAQ Composite Stock Index and the NASDAQ Electronic Components Index. The graph assumes \$100 invested at the indicated starting date in each of the market indices, with the reinvestment of all dividends.

Cumulative total returns are as follows:

Company/index	Base Period		Fiscal Year Ended			
	June 29, 2002	June 28, 2003	June 26, 2004	June 25, 2005	June 24, 2006	June 30, 2007
Maxim Integrated Products, Inc.	\$ 100.00	\$ 90.00	\$ 136.96	\$ 103.22	\$ 86.54	\$ 91.71
NASDAQ Composite	100.00	109.91	139.04	141.74	155.82	191.32
NASDAQ Electronic Components	100.00	106.83	139.17	122.56	116.07	133.48

Table of Contents**Equity Compensation Plan Information**

The following table gives information about the Company's common stock that may be issued upon the exercise of options, warrants and rights under all of the Company's existing equity compensation plans as of June 30, 2007 and the option agreements assumed by the Company pursuant to the terms of Maxim's acquisition of Dallas Semiconductor Corporation (Dallas Semiconductor) on April 11, 2001.

Plan Category	(a) Number of securities to be issued upon exercise of outstanding options, warrants, and rights	(b) Weighted-average exercise price of outstanding options, warrants, and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders(1)	92,359,443(1)	\$ 31.61	3,318,105(2)
Equity compensation plans not approved by security holders(3)	1,370,085	\$ 30.33	
Total	93,729,528	\$ 31.60	3,318,105

- (1) Represents common stock issuable upon the exercise of options granted under our existing stockholder approved equity compensation plans. Includes 6,657,429 restricted stock units which have an exercise price of zero. Excludes purchase rights accruing under the 1987 Employee Stock Participation Plan (the ESP Plan) because the number of shares and weighted average exercise price cannot be determined. Under the ESP Plan, each eligible employee may purchase shares of common stock with accumulated payroll deductions (in an amount not to exceed a percentage determined by the Board of Directors of the employee's eligible compensation, or \$25,000) on March 31, June 30, October 31 and December 31 each year at a purchase price per share equal to 85% of the lower of (i) the closing selling price per share of our common stock on the employee's entry date into the offering period in which that quarterly purchase date occurs or (ii) the closing selling price per share on the quarterly purchase date. The ESP Plan expired on August 25, 2007.
- (2) Includes 1,160,574 shares of common stock available for issuance under the 1996 Stock Incentive Plan; and (ii) 2,157,531 shares of common stock available for issuance under the ESP Plan.
- (3) Represents shares of our common stock pursuant to option agreements assumed pursuant to our acquisition of Dallas Semiconductor. The option agreements were originally issued by Dallas Semiconductor under the Dallas Semiconductor 1984 Stock Option Plan, the Dallas Semiconductor Corporation 1987 Stock Option Plan and the Dallas Semiconductor 1993 Officer and Director Stock Option Plan (collectively, the Dallas Plans).

Upon our acquisition of Dallas Semiconductor, we assumed the option agreements then outstanding under Dallas Plans (the Assumed Options). The Assumed Options are governed by the terms of the respective Dallas Plan under which they were originally issued and no further options will be issued under the Dallas Plans. Options governed by the terms of the Dallas Plans generally are nontransferable and expire no later than ten years from date of grant. Options generally are exercisable upon grant. Shares of common stock issuable and/or exercised under the Dallas Plans vest based upon years of service, generally four years. Upon termination of a participant's employment, we reserve the right to repurchase the unvested portion of the stock held by the employee, at the original option price. The Dallas Plans were duly approved by the stockholders of Dallas Semiconductor prior to its acquisition by Maxim. In addition, any shares or options reserved but not issued under the Dallas Plans as of the date of stockholder approval of the 1996 Plan and any shares returned to such plans as a result of termination of options or repurchase of shares will increase the number of shares available for issuance under the 1996 Plan.

On or about September 22, 2006, we suspended our the issuance of shares pursuant to the exercise of stock options and restricted stock units and purchases under our employee stock purchase program under our Form S-8 registration statements pending the completion of the Special Committee investigation and filing of all of our delayed periodic reports with the SEC. As a result, no stock options and restricted stock units can be issued pursuant to the above-described plans until our Registration Statement on Form S-8 becomes effective.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

Set forth below is a summary of certain consolidated financial information with respect to the Company as of the dates and for the periods indicated. The data set forth below as of June 30, 2007 and June 24, 2006 and for each of the three years in the period ended June 30, 2007 are derived from and should be read in conjunction with, and are qualified by reference to, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 8 Financial Statements and Supplementary Data, and notes thereto included elsewhere in this Form 10-K. The following selected financial data as of June 25, 2005, June 26, 2004 and June 28, 2003 and each of the two years in the period ended June 26, 2004 is derived from our consolidated financial statements not included herein.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis in conjunction with our Consolidated Financial Statements and notes thereto included in Part II, Item 8 of this report and the risk factors included in Part I, Item 1A of this report, as well as forward-looking statements and other risks described herein and elsewhere in this report, before making an investment decision regarding our common stock.

Overview

We are a global company with manufacturing facilities in the United States, testing facilities in the Philippines and Thailand, and sales offices and design centers throughout the world. We design, develop, manufacture and market linear and mixed-signal integrated circuits, commonly referred to as analog circuits, for a large number of geographically diverse customers and are incorporated in the state of Delaware. We also provide a range of high-frequency process technologies and capabilities that can be used in custom designs. The analog market is fragmented and characterized by many diverse applications, a great number of product variations and, with respect to many circuit types, relatively long product life cycles. The major end-markets in which we sell our products are the communications, computing, consumer and industrial markets.

Critical Accounting Policies

The methods, estimates and judgments we use in applying our most critical accounting policies have a significant impact on the results we report in our financial statements. The SEC has defined the most critical accounting policies as the ones that are most important to the portrayal of our financial condition and results of operations, and that require us to make our most difficult and subjective accounting judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Based on this definition, our most critical accounting policies include revenue recognition and accounts receivable allowances, which impact the recording of revenues; valuation of inventories, which impacts costs of goods sold and gross margins; the assessment of recoverability of long-lived assets, which impacts write-offs of fixed assets; accounting for stock-based compensation, which impacts cost of goods sold, gross margins and operating expenses; accounting for income taxes, which impacts the income tax provision; and assessment of contingencies, which impacts charges recorded in cost of goods sold, selling, general and administrative expenses and income taxes. These policies and the estimates and judgments involved are discussed further below. We have other significant accounting policies that either do not generally require estimates and judgments that are as difficult or subjective, or it is less likely that such accounting policies would have a material impact on our reported results of operations for a given period. Our significant accounting policies are described in Note 2 to the Consolidated Financial Statements.

Revenue Recognition

We recognize revenue for sales to direct customers and sales to international distributors upon shipment, provided that persuasive evidence of a sales arrangement exists, the price is fixed or determinable, risk of loss has transferred, collectibility of the resulting receivable is reasonably assured, there are no customer acceptance requirements and we do not have any significant post-shipment obligations. We estimate returns for sales to direct customers and international distributors based on historical returns rates applied against current period gross revenues. Specific customer returns and allowances are considered within this estimate.

Sales to certain U.S. distributors are made pursuant to agreements allowing for the possibility of certain sales price rebates and for non-warranty product return privileges. The non-warranty product return privileges include allowing certain U.S. distributors to return a small portion of our products in their inventory based on their previous 90 days of purchases. Given the uncertainties associated with the levels of non-warranty product returns and sales price rebates that could be issued to U.S. distributors, we defer recognition of such revenue and related cost of goods sold until the product is sold by the U.S. distributors to their end customers. Accounts receivable from direct customers, domestic distributors and international distributors are recognized and inventory is relieved upon shipment as title to inventories generally transfers upon shipment at which point we have a legally enforceable right to collection under normal terms. Accounts receivable related to consigned inventory is recognized when the customer takes possession of such inventory from its consigned location at which point inventory is relieved, title transfers, and we have a legally enforceable right to collection under the terms of our agreement with the related customers.

We make estimates of potential future returns and sales allowances related to current period product revenue. Management analyzes historical returns, changes in customer demand and acceptance of products when evaluating the adequacy of returns and sales allowances. Estimates made by us may differ from actual returns and sales allowances.

Table of Contents

These differences may materially impact reported revenue and amounts ultimately collected on accounts receivable. Historically, such differences have not been material. At June 30, 2007 and June 24, 2006, the Company had \$12.4 million and \$14.1 million accrued for returns and allowances, respectively. During fiscal years 2007 and 2006, the Company recorded \$79.2 million and \$86.3 million for estimated returns and allowances against revenues, respectively. These amounts were offset by \$80.9 million and \$78.7 million actual returns and allowances given during fiscal years 2007 and 2006, respectively.

Inventories

Inventories are stated at the lower of standard cost, which approximates actual cost on a first-in-first-out basis, or market value. Our standard cost revision policy is to continuously monitor manufacturing variances and revise standard costs when necessary. Because of the cyclical nature of the market, inventory levels, obsolescence of technology, and product life cycles, we generally write down inventories to net realizable value based on forecasted product demand. Actual demand and market conditions may be lower than those projected by us. This difference could have a material adverse effect on our gross margin should inventory write downs beyond those initially recorded become necessary. Alternatively, should actual demand and market conditions be more favorable than those estimated by us, gross margin could be favorably impacted. Historically, such differences have not been material. During fiscal years 2007, 2006 and 2005, we had inventory write downs of \$35.6 million, \$9.0 million and \$19.9 million, respectively, due primarily to inventory in excess of forecasted demand.

Long-Lived Assets

We evaluate the recoverability of property, plant and equipment in accordance with Statement of Financial Accounting Standards (SFAS) No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. We perform periodic reviews to determine whether facts and circumstances exist that would indicate that the carrying amounts of property, plant and equipment might not be fully recoverable. If facts and circumstances indicate that the carrying amount of property, plant and equipment might not be fully recoverable, we compare projected undiscounted net cash flows associated with the related asset or group of assets over their estimated remaining useful lives against their respective carrying amounts. In the event that the projected undiscounted cash flows are not sufficient to recover the carrying value of the assets, the assets are written down to their estimated fair values based on the expected discounted future cash flows attributable to the assets. Evaluation of impairment of property, plant and equipment requires estimates in the forecast of future operating results that are used in the preparation of the expected future undiscounted cash flows. Actual future operating results and the remaining economic lives of our property, plant and equipment could differ from our estimates used in assessing the recoverability of these assets. These differences could result in impairment charges, which could have a material adverse impact on our results of operations. We recorded a \$10.2 million impairment of long-lived assets due to the transfer of certain wafer manufacturing production from our San Jose, California wafer manufacturing facility to an independent wafer manufacturing facility in fiscal year 2007. Actual results and the remaining economic lives of our property, plant and equipment did not vary materially from our estimates used in assessing the recoverability of these assets.

Stock-Based Compensation

Effective June 26, 2005, we adopted the fair value recognition provision of SFAS 123(R). SFAS 123(R) requires the recognition of the fair value of stock-based compensation for all stock-based payment awards, including grants of stock options and other awards made to our employees and directors in exchange for services, in the income statement. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. Accordingly, stock-based compensation cost is measured at grant date, based on the fair value of the awards ultimately expected to vest and is recognized as an expense, on a straight-line basis, over the requisite service period. We use the Black-Scholes valuation model to measure the fair value of our stock-based awards utilizing various assumptions with respect to expected holding period, risk-free interest rates, stock price volatility, dividend yield and forfeiture rates. SFAS 123(R) also requires forfeitures to be estimated at the time of grant and revised if necessary in subsequent periods if actual forfeitures differ from those estimates. The assumptions we use in the valuation model are based on subjective future expectations combined with management judgment. If any of the assumptions used in the Black-Scholes model changes significantly, stock-based compensation on future awards may differ materially from that recorded in the current period.

Table of Contents

Higher volatility and longer expected lives result in an increase to share-based compensation determined at the date of grant. The effect that changes in the volatility and the expected life would have on the weighted average fair value of option awards and the increase in total fair value during fiscal year 2007 and fiscal year 2006 were as follows:

	Fiscal Year 2007		Fiscal Year 2006	
	Weighted Average Fair Value (1) Per Share	Increase in Total Fair Value (1) (in thousands)	Weighted Average Fair Value (1) Per Share	Increase in Total Fair Value (1) (in thousands)
As reported:	\$ 9.17		\$ 11.43	
Hypothetical:				
Increase expected volatility by 5 percentage points (2)	\$ 10.30	\$ 5,600	\$ 12.82	\$ 18,200
Increase expected life by 1 year	\$ 9.78	\$ 3,100	\$ 11.97	\$ 7,000

(1) Amounts represent the hypothetical increase in the total fair value determined at the date of grant, which would be amortized over the service period, net of estimated forfeitures.

(2) For example, an increase from the 31% reported volatility for fiscal year 2007 to a hypothetical 36% volatility.

The Company previously applied Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and its related interpretations and had adopted the disclosure-only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS 123) and SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure an Amendment of FASB Statement No. 123* (SFAS 148).

The Company adopted SFAS 123(R) using the modified prospective method, and, accordingly, financial statements for prior periods have not been restated to reflect the effect of SFAS 123(R). The Company records compensation costs as the requisite service is rendered for the unvested portion of previously issued awards that remain outstanding at the initial date of adoption and any awards issued, modified, repurchased, or cancelled after the effective date of SFAS 123(R). Upon the adoption of SFAS 123(R) on June 26, 2005, the Company recognized a cumulative effect of change in accounting principle of \$1.6 million, net of tax, related to previously recognized compensation cost of unvested awards that are not expected to vest based on the Company's estimate of forfeitures as of the date of adoption of SFAS 123(R). Under APB 25, the Company had accounted for actual forfeitures as they occurred.

Accounting for Income Taxes

We must make certain estimates and judgments in the calculation of income tax expense and in the determination of whether deferred tax assets are more likely than not to be realized. The calculation of our income tax expense and income tax liabilities involves dealing with uncertainties in the application of complex tax laws and regulations. We recognize potential liabilities for anticipated income tax audit issues in the U.S. and other tax jurisdictions based on an estimate of whether, and the extent to which, additional income tax payments are probable and whether the amount of such loss can be estimated. Should a loss be probable and estimable, we record a contingent loss in accordance with SFAS No. 5, *Accounting for Contingencies* (SFAS 5). Although we believe that the estimates are reasonable, no assurance can be given that the final outcome of these matters will not be different from what was reflected in our historical income tax provisions and accruals. Such differences could have a material impact on our net income and operating results in the period in which such determination is made.

On an annual basis, we evaluate our deferred tax asset balance for realizability and record a valuation allowance to reduce the net deferred tax assets to the amount that is more likely than not to be realized. In the event it is determined that the deferred tax assets to be realized in the future would be in excess of the net recorded amount, an adjustment to the deferred tax asset valuation allowance would be recorded. This adjustment would increase income, or additional paid in capital, as appropriate, in the period such determination was made. Likewise, should it be determined that all or part of the net deferred tax asset would not be realized in the future, an adjustment to increase the deferred tax asset valuation allowance would be charged to income in the period such determination is made. In assessing the need for a valuation allowance, historical levels of income, expectations and risks associated with estimates of future taxable income and ongoing prudent and practicable tax planning strategies are considered. Realization of our deferred tax assets is dependent primarily upon future U.S. taxable income. Our judgments regarding future profitability may change due to future market conditions, changes in U.S. or international tax laws and other factors. These changes, if any, may require possible material adjustments to deferred tax assets and an accompanying reduction or increase in net income in the period in which such determinations are made.

Litigation and Contingencies

From time to time, we receive notices that our products or manufacturing processes may be infringing the patent or intellectual property rights of others, notices of stockholder litigation or other lawsuits or claims against us. We periodically assess each matter in order to determine if a contingent liability in accordance with SFAS 5 should be recorded. In making this determination, management

Table of Contents

may, depending on the nature of the matter, consult with internal and external legal counsel and technical experts. We expense legal fees associated with consultations and defense of lawsuits as incurred. Based on the information obtained combined with management's judgment regarding all the facts and circumstances of each matter, we determine whether a contingent loss is probable and whether the amount of such loss can be estimated. Should a loss be probable and estimable, we record a contingent loss in accordance with SFAS 5. In determining the amount of a contingent loss, we take into consideration advice received from experts in the specific matter, current status of legal proceedings, settlement negotiations which may be ongoing, prior case history and other factors. Should the judgments and estimates made by management be incorrect, we may need to record additional contingent losses that could materially adversely impact our results of operations. Alternatively, if the judgments and estimates made by management are incorrect and a particular contingent loss does not occur, the contingent loss recorded would be reversed thereby favorably impacting our results of operations.

Pursuant to the Company's charter documents and indemnification agreements, we have certain indemnification obligations to our officers, directors, and certain former officers and directors. Pursuant to such obligations, we have incurred substantial expenses related to legal fees for certain former officers of the Company who are or were subject to pending civil charges by the SEC and other governmental agencies in connection with Maxim's historical stock option granting practices. We have also incurred substantial expenses related to legal fees and expenses advanced to certain current and former officers and directors who are defendants in the civil actions described above. We expense legal fees as incurred.

Subsequent Events

Please see Note 16, Subsequent Events in the Notes to the Consolidated Financial Statements for more information regarding events occurring after June 30, 2007.

Table of Contents**Results of Operations**

The following table sets forth certain Consolidated Statements of Income data expressed as a percentage of net revenues for the periods presented:

	For the Year Ended		
	June 30, 2007	June 24, 2006	June 25, 2005
Net revenues	100.0%	100.0%	100.0%
Cost of goods sold	39.5%	34.4%	29.9%
Gross margin	60.5%	65.6%	70.1%
Operating expenses:			
Research and development	32.8%	27.7%	22.8%
Selling, general and administrative	10.2%	9.6%	7.3%
Total operating expenses	43.0%	37.3%	30.1%
Operating income	17.5%	28.3%	40.0%
Interest income and other, net	3.0%	2.5%	1.8%
Income before provision for income taxes and cumulative effect of a change in accounting principle	20.5%	30.8%	41.8%
Provision for income taxes	6.3%	10.0%	14.2%
Income before cumulative effect of a change in accounting principle	14.2%	20.8%	27.6%
Cumulative effect of a change in accounting principle, net of tax	0.0%	0.1%	0.0%
Net income	14.2%	20.9%	27.6%

The following table shows stock-based compensation included in the components of the Consolidated Statements of Income reported above as a percentage of net revenues for the periods presented:

	For the Year Ended		
	June 30, 2007	June 24, 2006	June 25, 2005
Cost of goods sold	4.0%	3.3%	1.5%
Research and development	10.8%	7.4%	3.1%
Selling, general and administrative	2.8%	2.7%	0.9%
	17.6%	13.4%	5.5%

Net Revenues

We reported net revenues of \$2,009.1 million, \$1,856.9 million and \$1,671.7 million in fiscal years 2007, 2006 and 2005, respectively. Net revenues in fiscal years 2007 increased by 8.2% compared to net revenues in fiscal year 2006 primarily due to an increase in unit shipments of approximately 18%. Net revenues in fiscal year 2006 increased by 11.1% compared with net revenues in fiscal year 2005 due to an increase of approximately 20% in unit shipments. The increase in unit shipments and net revenues noted above was offset somewhat by a change in product mix related to increased sales of products with lower average selling prices.

Approximately 77%, 78% and 74% of the Company's net revenues in fiscal years 2007, 2006, and 2005, respectively, were derived from customers located outside the United States, primarily in the Pacific Rim, Europe, and Japan. While the majority of these sales are denominated

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

in U.S. dollars, the Company enters into foreign currency forward contracts to mitigate its risks on firm commitments and net monetary assets denominated in foreign currencies. The impact of changes in foreign exchange rates on net revenues and the Company's results of operations for fiscal years 2007, 2006, and 2005 was immaterial.

Table of Contents*Gross Margin*

Our gross margin as a percentage of net revenues was 60.5% in fiscal year 2007 compared to 65.6% in fiscal year 2006. The gross margin percentage decreased in fiscal year 2007 from fiscal year 2006 primarily due to increased stock-based compensation, increased inventory write downs and fixed assets impairment charges related to our manufacturing fab located in San Jose, California. Stock-based compensation increased by \$19.0 million for fiscal year 2007 as compared to fiscal year 2006 primarily due to the extension of the terms of vested stock options that expire during the blackout as a result of the expiration of the 10 year contractual term and the resulting modification charge. We recorded a \$10.2 million charge in the fourth quarter of fiscal year 2007 due to our decision to transfer certain wafer manufacturing production from our San Jose, California facility to an independent wafer manufacturing facility resulting in the impairment of certain fixed assets. During fiscal year 2007, inventory write-downs increased by \$26.6 million compared with fiscal year 2006. Inventory write downs were \$35.6 million in fiscal year 2007 compared with \$9.0 million in fiscal year 2006. The above decreases to gross margin were offset by a decrease of approximately \$4.9 million in defective product liability related to certain previously accrued costs which were no longer required. In addition to the above, while unit sales volume increased year-over-year, product mix combined with decreased average unit selling prices contributed to an unfavorable impact on gross margin percentage in fiscal year 2007 from fiscal year 2006.

Our gross margin as a percentage of net revenues was 65.6% in fiscal year 2006 compared to 70.1% in fiscal year 2005. The gross margin percentage decreased in fiscal year 2006 from fiscal year 2005 primarily due to an increase of \$37.8 million in stock-based compensation resulting from the adoption of SFAS 123(R). Although unit sales volume increased year-over-year, product mix combined with decreased average unit selling prices contributed to an unfavorable impact on gross margin percentage in fiscal year 2006 from fiscal year 2005. The above decreases to gross margin were offset by a decrease of \$10.9 million in inventory write downs for inventory in excess of demand in fiscal year 2006 as compared to fiscal year 2005. Inventory write downs were \$9.0 million in fiscal year 2006 as compared to \$19.9 million in fiscal year 2005.

Research and Development

Research and development expenses were \$659.5 million and \$514.1 million for fiscal years 2007 and 2006, respectively, which represented 32.8% and 27.7% of net revenues, respectively. The increase in research and development expenses in absolute dollars was primarily due to an increase of stock-based compensation, increased salary and related expenses and payroll and related taxes which resulted from liabilities incurred related to improper accounting for stock option grants and cash exercises. Stock-based compensation increased by \$78.4 million for fiscal year 2007 as compared to fiscal year 2006 due to the extension of the terms of vested stock options that expire during the blackout as a result of the expiration of the 10 year contractual term and the resulting modification charge. Salary and related expenses for fiscal year 2007 as compared to fiscal year 2006 increased by \$41.7 million due to salary increases and hiring additional engineers to support our research and development and process development efforts. In addition to the above, we recorded \$18.5 million in expense to reflect payroll and withholding tax related liabilities related to improperly accounted for stock option grants and cash exercises.

Research and development expenses were \$514.1 million and \$380.4 million for fiscal years 2006 and 2005, respectively, which represented 27.7% and 22.8% of net revenues, respectively. The increase in research and development expenses in absolute dollars was primarily due to an increase of \$86.9 million in stock-based compensation resulting from the adoption of SFAS 123(R). We recorded \$138.3 million and \$51.4 million in stock-based compensation charges for fiscal years 2006 and 2005, respectively. In addition, research and development expenses for fiscal year 2006 as compared to fiscal year 2005 increased due to \$33.3 million of salary and related expenses primarily from salary increases and hiring additional engineers to support the Company's research and development and process development efforts.

The level of research and development expenditures as a percentage of net revenues will vary from period to period, depending, in part, on the level of net revenues and, in part, on our success in recruiting the technical personnel needed for our new product introductions and process development and, on the level of stock-based compensation expense. We view research and development expenditures as critical to maintaining a high level of new product introductions, which in turn are critical to our plans for future growth.

Selling, General and Administrative

Selling, general and administrative expenses were \$204.5 million and \$178.8 million in fiscal years 2007 and 2006, respectively, which represented 10.2% and 9.6% of net revenues, respectively. The increase in selling, general, and administrative expenses in absolute dollars for fiscal year 2007 as compared to fiscal year 2006 is primarily due to increased stock-based compensation, salary and related expenses, legal and accounting expenses. Stock-based

Table of Contents

compensation increased by \$17.6 million for fiscal year 2007 as compared to fiscal year 2006 primarily due to the extension of the terms of vested stock options that expire during the blackout as a result of the expiration of the 10 year contractual term and the resulting modification charges which was offset by \$12.7 million of previously recognized stock-based compensation which was reversed due to the forfeiture of our former Chief Executive Officer's unvested stock options upon his retirement. We also recorded in fiscal year 2007 a \$3.1 million charge to reflect the net present value of termination benefits given to our former Chief Executive Officer upon his retirement. Salary and related expenses increased by \$15.7 million due to salary increases and increased headcount in fiscal 2007 as compared to fiscal 2006. Legal and accounting expenses associated with our stock option investigation, subsequent restatement of our previously filed financial statements, private litigation and other associated activities increased by \$22.6 million in fiscal year 2007 as compared to fiscal year 2006. The above increases were offset by a legal settlement of \$19.0 million with Analog Devices, Inc., recorded in fiscal 2006 and an arbitrator's award related to a terminated sales representative of the Company which resulted in a charge recorded of \$6.3 million in fiscal year 2006.

Selling, general and administrative expenses mainly include expenditures for salary and benefits, stock-based compensation expense, advertising and marketing costs, accounting, legal and other professional fees, facilities and depreciation expenses. Selling, general and administrative expenses were \$178.8 million and \$122.8 million in fiscal years 2006 and 2005, respectively, which represented 9.6% and 7.3% of net revenues, respectively. The increase in selling, general, and administrative expenses in absolute dollars for fiscal year 2007 as compared to fiscal year 2006 is primarily due to \$36.4 million of stock-based compensation recorded resulting from the adoption of SFAS 123(R). In addition, we incurred increased legal expenses of \$25.3 million year-over-year which resulting from a \$19.0 million legal settlement with Analog Devices, Incorporated and an arbitrator's ruling related to claims by a former representative, Master Chips bvba, which resulted in a \$6.3 million charge being recorded. The above increases were offset by a \$4.6 million decrease in salary and related expenses due primarily to charges recorded in fiscal year 2005 resulting from payroll related liabilities incurred related to improper accounting for stock option grants and cash exercises.

The level of selling, general and administrative expenditures as a percentage of net revenues will vary from period to period, depending on the level of net revenues, our success in recruiting sales and administrative personnel needed to support our operations, and the level of stock-based compensation expense. We experienced a significant increase in selling, general and administrative expenditures in fiscal years 2007 and 2008 for expenses associated with our stock option investigation, subsequent restatement of our previously filed financial statements, private litigation and other associated activities, particularly, for accounting, legal and other professional service fees. These expenditures since the commencement of the stock option investigation at the end of June 2006 through fiscal year 2008 are approximately \$91.9 million. We expect to incur significant expenses for these and related matters beyond fiscal year 2008.

Interest Income and Other, Net

Interest income and other, net was \$61.3 million, \$46.4 million, and \$30.1 million in fiscal years 2007, 2006, and 2005, respectively. The increases in interest income from fiscal years 2005 through 2007 is due primarily to higher average interest rates combined with higher average levels of invested cash, cash equivalents, and short-term investments.

Provision for Income Taxes

Our annual income tax expense was \$127.5 million, \$185.8 million, and \$236.6 million, in fiscal years 2007, 2006, and 2005, respectively. The effective tax rate was 30.8%, 32.5% and 33.9% for fiscal years 2007, 2006 and 2005, respectively. The fiscal years 2007, 2006 and 2005 effective rates were lower than the U.S. federal and state combined statutory rate primarily due to tax benefits on export sales, the research credit, and the manufacturing deduction. The effective tax rate decreased from 2006 to 2007 primarily due to the extension of the Federal research tax credit, which had expired on December 31, 2005, and the release of tax reserves due to the expiration of the statute of limitations for the years to which the reserves related. The effective tax rate decreased from 2005 to 2006 primarily due to the domestic production activities deduction that was enacted as part of the American Jobs Creation Act of 2004 and benefited the Company for the first time in fiscal 2006.

Table of Contents*Stock-based compensation*

The following table shows stock-based compensation by type of award for the periods presented:

	For the Year Ended		
	June 30, 2007	June 24, 2006	June 25, 2005
(In thousands)			
Cost of goods sold			
Stock options	\$ 60,527	\$ 59,096	\$ 24,342
Restricted stock units	19,228	501	
Employee stock purchase plan	1,431	2,543	
	81,186	62,140	24,342
Research and development expense			
Stock options	162,330	119,442	51,435
Restricted stock units	49,727	10,586	
Employee stock purchase plan	4,672	8,299	
	216,729	138,327	51,435
Selling, general and administrative expense			
Stock options	42,474	46,051	14,537
Restricted stock units	11,941	2,353	
Employee stock purchase plan	1,431	2,543	
	55,846	50,947	14,537
Total stock-based compensation expense			
Stock options	265,331	224,589	90,314
Restricted stock units	80,896	13,440	
Employee stock purchase plan	7,534	13,385	
Pre-tax stock-based compensation expense	353,761	251,414	90,314
Less: Income tax effect	121,539	83,391	29,300
Net stock-based compensation expense	\$ 232,222	\$ 168,023	\$ 61,014

Recently Issued Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109* (FIN 48), which prescribes comprehensive guidelines for recognizing, measuring, presenting and disclosing in the financial statements tax positions taken or expected to be taken on tax returns. FIN 48, effective for fiscal years beginning after December 15, 2006, seeks to reduce the diversity in practice associated with certain aspects of the recognition and measurement related to accounting for income taxes. The Company adopted the provisions of FASB Interpretation No. 48 on July 1, 2007 and applied the provisions of FIN 48 to all income tax positions. The cumulative effect of applying FIN 48 is expected to result in a \$9.4 million and \$19.2 million decrease in retained earnings and additional-paid-in-capital, respectively, at the beginning of fiscal year 2008.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with GAAP, and expands disclosures about fair value measurements. The statement clarifies that the exchange price is the price in an orderly transaction between market participants to sell an asset or transfer a liability at the measurement date. The statement emphasizes that fair value is a market-based measurement and not an entity-specific measurement. It also establishes a fair value hierarchy used in fair value measurements and expands the required disclosures of assets and liabilities measured at fair value. SFAS 157

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company does not believe the adoption of SFAS 157 will have a material impact on its consolidated financial condition, results of operations or liquidity.

In September 2006, the FASB issued SFAS No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans* (SFAS 158). SFAS 158 amends SFAS No. 87, *Employers Accounting for Pensions*, SFAS

Table of Contents

No. 88, *Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, SFAS No. 106, *Employers Accounting for Postretirement Benefits Other Than Pensions*, and SFAS No. 132 (revised 2003), *Employers Disclosures about Pensions and Other Postretirement Benefits*. SFAS 158 requires employers to recognize in the statement of financial position an asset for a plan's overfunded status or a liability for a plan's underfunded status. It also requires employers to measure plan assets and obligations that determine the funded status as of the end of the fiscal year. Lastly, employers are required to recognize changes in the funded status of a defined benefit postretirement plan in the year that the changes occur with the changes reported in comprehensive income. SFAS 158 is required to be adopted by entities with fiscal years ending after December 15, 2006. The adoption of SFAS 158 in fiscal year 2007 did not have a material impact on the Company's consolidated financial condition, results of operations or liquidity.

In September 2006, the SEC released Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108), which addresses how uncorrected errors in previous years should be considered when quantifying errors in current year financial statements. SAB 108 requires registrants to consider the effect of all carry over and reversing effects of prior-year misstatements when quantifying errors in current year financial statements. SAB 108 does not change the SEC staff's previous guidance on evaluating the materiality of errors. It allows registrants to record the effects of adopting SAB 108 guidance as a cumulative-effect adjustment to retained earnings. This adjustment must be reported in the annual financial statements of the first fiscal year ending after November 15, 2006. The adoption of this standard did not have a material impact on the Company's consolidated financial condition, results of operations or liquidity.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. The Company is required to adopt the provisions of SFAS 159 as of the beginning of the fiscal year that begins after November 15, 2007, although earlier adoption is permitted. The adoption of SFAS 159 is not expected to have a material impact on the Company's consolidated financial position, results of operations or liquidity.

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10, *Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements* (EITF 06-10). EITF 06-10 provides guidance for determining a liability for the post-retirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007, although earlier adoption is permitted. We early adopted EITF 06-10 during the three months ended September 29, 2007 and recorded a cumulative effect adjustment as a net reduction to retained earnings of approximately \$14.1 million. No corporate income tax benefit was netted against the charge to retained earnings because the liabilities being accrued are not deductible for corporate income tax purposes.

In June 2007, the FASB ratified Emerging Issues Task Force Issue No. 07-3, *Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities* (EITF 07-3). EITF 07-3 requires nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities to be deferred and capitalized. Such amounts should be recognized as an expense as the related goods are delivered or the related services are performed. Entities should continue to evaluate whether they expect the goods to be delivered or services to be rendered. If an entity does not expect the goods to be delivered or services to be rendered, the capitalized advance payment should be charged to expense. EITF 07-3 applies prospectively for new contractual arrangements entered into in fiscal years beginning after December 15, 2007. Earlier adoption is not permitted. The adoption of EITF 07-3 is not expected to have a material effect on the Company's consolidated financial position or results of operations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51* (SFAS 160). SFAS 160 amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. SFAS 160 improves the relevance, comparability and transparency of financial statements and eliminates diversity in practice that currently exists in accounting for transactions between an entity and noncontrolling interests. This standard is effective for annual periods beginning after December 15, 2008. Earlier adoption is prohibited. The adoption of SFAS 160 is not expected to have a material effect on our consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141(R)) which replaces SFAS No. 141, *Business Combinations*. SFAS 141(R) requires the acquiring entity in a business combination

Table of Contents

to recognize all (and only) the assets acquired and liabilities assumed in the transaction; establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. This standard is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company is currently evaluating the impact of adopting SFAS 141(R) on the Company's consolidated financial position or results of operations.

In December 2007, the FASB ratified EITF Issue No. 07-1, *Accounting for Collaborative Arrangements* (EITF 07-01). EITF 07-1 provides guidance on the classification, income statement presentation and disclosure associated with collaborative arrangements involving parties considered to be active participants to an activity and are exposed to significant risks and rewards which are dependent on the commercial success of the activity. EITF 07-1 is effective for fiscal years beginning after December 15, 2008. The adoption of EITF 07-01 is not expected to have a material impact on our consolidated financial position, results of operations or cash flows.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities – an amendment of SFAS No. 133* (SFAS 161) which changes the disclosure requirements for derivative instruments and hedging activities. SFAS 161 requires the Company to provide enhanced disclosures about (a) how and why the Company uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and its related interpretations, and (c) how derivative instruments and related hedged items affect our financial position, financial performance and cash flows. These disclosure requirements are effective for fiscal years and interim periods beginning after November 15, 2008. We are currently evaluating the impact of adopting SFAS 161 on our consolidated financial position, results of operations and cash flows.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS 162). SFAS 162 identifies the sources of accounting consistent with GAAP. SFAS 162 is effective sixty days following the SEC's approval of the Public Company Accounting Oversight Board's amendments to AU Section 411 on September 16, 2008, *The Meaning of Present fairly in conformity with generally accepted accounting principles*. We are currently evaluating the potential impact, if any, of the adoption of SFAS 162 on our consolidated financial statements.

Backlog

At the end of the fourth quarter of fiscal year 2007, backlog shippable within the next 12 months was approximately \$412 million (compared to \$429 million at the end of fiscal year 2006), including approximately \$350 million (compared to \$366 million at the end of fiscal year 2006) requested for shipment in the next fiscal quarter. Because our backlog of orders at any point is not necessarily based on firm, non-cancelable orders and because our customers do in fact routinely cancel orders for their own convenience with little notice, backlog has limited value as a predictor of future revenues.

Financial Condition, Liquidity and Capital Resources

Our primary sources of funds for fiscal years 2007, 2006, and 2005 have been net cash provided by operating activities of approximately \$616.6 million, \$619.1 million and \$727.1 million, respectively. In addition, we received approximately \$25.7 million, \$148.8 million and \$106.0 million of proceeds from the exercise of stock options and purchases of common stock under the Employee Stock Participation Plan during fiscal years 2007, 2006 and 2005, respectively.

Prior to adopting SFAS 123(R), we presented all excess tax benefits resulting from the exercise of stock options as operating cash flows in the Statements of Cash Flows. SFAS 123(R) requires excess realized tax benefits generated by stock based employee awards to be classified as cash flows from financing activities. Since we adopted the alternative transition method, described in FASB Staff Position (FSP) SFAS 123(R)-3, 100% of the realized tax benefits generated by employee awards that were fully vested and outstanding upon the adoption of SFAS 123(R) are classified as excess tax benefits. Stock based employee awards partially vested upon, or granted after, the adoption of SFAS 123(R) generate excess tax benefits to the extent that realized tax benefits exceed the deferred tax asset and proforma deferred tax asset attributable to such awards. As a result of adopting SFAS 123(R), \$8.2 million and \$44.7 million of excess tax benefits for fiscal years 2007 and 2006, respectively, have been classified as financing cash inflows.

Total assets increased to \$3,606.8 million at the end of fiscal year 2007, up from \$3,286.5 million at the end of fiscal year 2006. Cash, cash equivalents and short-term investments decreased to \$1,299.4 million in fiscal year 2007 from

Table of Contents

\$1,342.7 million in fiscal year 2006, due primarily to the purchase of \$401.7 million of property, plant and equipment reflecting our recent investments in manufacturing capacity expansion and productivity tools; the payment of \$200.1 million of dividends; and the repurchase of 2.1 million shares of our common stock for \$60.8 million. The above decreases were offset by cash generated from operations of \$616.6 million. Accounts receivable decreased to \$245.0 million in fiscal year 2007 from \$297.3 million in fiscal year 2006 primarily due to more linearity in sales during fourth quarter of fiscal year 2007 as compared to the fourth quarter of fiscal year 2006. Net inventories increased to \$262.7 million in fiscal year 2007 from \$210.9 million in fiscal year 2006 primarily due our effort to increase die bank inventories and finished goods in order to be in a better position to ship product under a reduced lead time environment and due to stock based compensation cost capitalized as part of inventories. Accounts payable decreased to \$93.8 million in fiscal year 2007 from \$127.1 million in fiscal year 2006 primarily due to decrease in amounts accrued for capital additions year over year.

The principal uses of funds for fiscal years 2007, 2006, and 2005 were income tax payments of \$229.3 million, \$191.1 million and \$93.6 million; repurchases of \$60.8 million, \$580.4 million, and \$168.5 million of our common stock, purchases of property, plant and equipment of \$401.7 million, \$201.2 million and \$162.3 million and dividends paid of \$200.1 million, \$153.0 million and \$123.9 million, respectively. In fiscal year 2007, in connection with the stock option investigation and the restatement to correct our past accounting for stock options, we suspended the issuance of shares pursuant to the exercise of stock options and RSUs, as well as purchases under our stock purchase program under our Registration Statement on Form S-8 pending the completion of the Special Committee investigation and filing of all of our delayed periodic reports with the SEC.

We are subject to pending legal proceedings. See Item 3 Legal Proceedings in Part I of this report and Note 9, Commitments and Contingencies in the Notes to Consolidated Financial Statements for information regarding pending stock option litigation and patent litigation. Although the results of such legal proceedings are unpredictable, we do not believe that any pending legal proceedings will have a material adverse impact on our liquidity or financial position.

As of June 30, 2007, our available funds consisted of \$1,299.4 million in cash, cash equivalents, and highly liquid investment securities. We anticipate that the available funds and cash generated from operations will be sufficient to meet cash and working capital requirements, including our anticipated level of capital expenditures, common stock repurchases, and dividend payments for the next twelve months.

During fiscal year 2008, our cash expenditures included dividends paid of approximately \$240.4 million, \$215.9 million for property, plant and equipment acquisitions, \$202.3 million for income tax payments, and \$64.1 million for the acquisition of storage products division from Vitesse Semiconductor Corporation.

Significant Cash Outlays Resulting From the Restatement of Previously Reported Financial Statements

Since the beginning of the stock option investigation through June 28, 2008, we have incurred significant cash outlays as noted below:

We have incurred \$91.9 million for expenses associated with the investigation, subsequent restatement of our previously filed financial statements, private litigation and other associated activities, particularly, for accounting, legal and other professional service fees. We will incur significant expenses for these in fiscal year 2009.

We have paid \$117.3 million to individual option holders to compensate them for stock options that contractually expired subsequent to the suspension of the Company's S-8 Registration Statement at which time employees were no longer able to exercise their vested stock options (the Blackout Period). We will incur significant cash payments for certain stock options that expire subsequent to June 28, 2008.

We have issued \$54.8 million in non-recourse loans to individuals holding RSUs that vested during the Blackout Period. We will loan additional amounts subsequent to June 28, 2008 for RSUs that vest during the Blackout Period and such amounts may be significant.

We have paid \$10.0 million to international employees for RSUs which vested during the Blackout Period for which we were unable to deliver shares of common stock. We will pay additional amounts subsequent to June 28, 2008 to certain international employees

for RSUs which vest during the Blackout Period.

In addition to the above, while we intend to vigorously defend against lawsuits related to our past stock options

Table of Contents

granting practices, we do not presently know whether we will be successful in such lawsuits. If we are not successful, we may be required to pay substantial cash settlement expenses which could have a material adverse impact on our results of operations and liquidity.

See Note 16, "Subsequent Events" in the Notes to Consolidated Financial Statements for additional information.

Contractual Obligations

The following table summarizes the Company's significant contractual obligations at June 30, 2007, and the effect such obligations are expected to have on the Company's liquidity and cash flows in future periods. This table excludes amounts already recorded on our consolidated balance sheet as current liabilities at June 30, 2007:

	Total	Less than 1 year	2-3 years	4-5 years	More than 5 years
(Amounts in thousands)					
Operating lease obligations (1)	\$ 31,268	\$ 6,865	\$ 10,875	\$ 7,755	\$ 5,773
Royalty obligations (2)	60,000	10,000	20,000	20,000	10,000
Capital equipment and inventory related purchase obligations (3)	56,000	39,077	3,062	3,103	10,758
Total	\$ 147,268	\$ 55,942	\$ 33,937	\$ 30,858	\$ 26,531

- (1) The Company leases some facilities under non-cancelable operating lease agreements that expire at various dates through October 2014.
- (2) Royalty obligations represent payments for licensed patents.
- (3) Capital equipment purchase obligations represent commitments for purchase of plant and equipment. The Company orders some materials and supplies in advance or with minimum purchase quantities. The Company is obligated to pay for the materials and supplies when received.

Off-Balance-Sheet Arrangements

As of June 30, 2007, the Company did not have any material off-balance-sheet arrangements, as defined in Item 303 (a) (4) (ii) of SEC Regulation S-K.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*Interest Rate Risk*

Our exposure to market risk for changes in interest rates relates primarily to our investment portfolio, which includes U.S. Treasury and Federal Agency debt securities, and repurchase agreements relating to such securities or money market funds restricted to investment in these instruments. Investments mature at frequent intervals during the year, at which time the funds are available for use in the business, or for reinvestment, as cash demands dictate. We place our investments only in high-quality financial instruments, limit the amount invested in any one institution or instrument, and limit portfolio duration. This policy is intended to reduce default risk, market risk and reinvestment risk. We do not use derivative financial instruments in our investment portfolio. The fair value of our investment portfolio would vary by approximately \$3 million by a change in market interest rates of 100 basis points as of June 30, 2007. Exposure to interest rate fluctuations is mitigated by maintaining a laddered portfolio of investment instruments that mature at regular intervals over a three-year investment horizon. By creating a steady stream of cash from maturing investments, we intend to generate cash to meet business needs without liquidating investments. At June 30, 2007, our investment portfolio had an expected weighted average return of 4.5% (3.2% at June 24, 2006) and a weighted maturity of 137 days (222 days at June 24, 2006).

Foreign Currency Risk

We transact business in various non-U.S. currencies, primarily the Japanese Yen, British Pound, and the Euro. We are exposed to fluctuations in foreign currency exchange rates on accounts receivable from sales in these foreign currencies and the net monetary assets and liabilities of the

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

related foreign subsidiary. We have established risk management strategies designed to reduce the impact of reductions in value and volatility of future cash flows caused by changes in these exchange rates. These strategies reduce, but do not always entirely eliminate, the impact of currency exchange movements. We also incur expenses in Philippine Peso and Thailand Baht related to our testing facility at those locations. We have not hedged these exposures as of June 30, 2007.

Table of Contents

Currency forward contracts are used to offset the currency risk of non-U.S. dollar-denominated assets and liabilities. Changes in fair value of the underlying assets and liabilities are generally offset by the changes in fair value of the related currency forward contract. The net realized and unrealized gains or losses from hedging non-U.S. dollar denominated assets and liabilities were immaterial in fiscal years 2007, 2006 and 2005. We had forward contracts to sell foreign currencies for \$58.8 million and \$76.6 million at June 30, 2007 and June 24, 2006, respectively. The fair market value of these forward contracts was zero and \$0.5 million at June 30, 2007 and June 24, 2006, respectively. A hypothetical 10% favorable or unfavorable change in foreign currency exchange rates compared to rates at June 30, 2007 and June 24, 2006 would not have a material impact on our financial position or results of operations.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements and supplementary data required by this item are set forth at the pages indicated in Item 15 (a) of this Report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our current chief executive officer (CEO) and our interim chief financial officer (CFO), evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act as of June 30, 2007. The purpose of these controls and procedures is to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules, and that such information is accumulated and communicated to our management, including our CEO and our CFO, to allow timely decisions regarding required disclosures. As set forth in our Annual Report on Form 10-K for the fiscal year ended June 24, 2006, our management determined that material weaknesses existed in our control environment and controls over stock option practices and the related accounting for stock option transactions as of June 24, 2006. As discussed in more detail below, our management, including the CEO and the CFO, has concluded that the Company's disclosure controls and procedures were not effective as of June 30, 2007 due to the continuing presence of the material weaknesses or ongoing implementation of remedial actions as of June 30, 2007.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Internal control over financial reporting is a process designed by, or under the supervision of, the Company's CEO and CFO and effected by the Company's Board of Directors, management, and others to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. Our management, with the participation of our CEO and our CFO, assessed the effectiveness of our internal control over financial reporting as of June 30, 2007. Management's assessment of internal control over financial reporting was conducted using the criteria in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In performing the assessment, our management concluded that two material weaknesses existed in our internal control over financial reporting as of June 30, 2007, due to the effect of not maintaining an effective control environment and, separately, not maintaining effective controls over our stock option practices and the related accounting for stock option transactions. A material weakness is a deficiency, or combination of deficiencies, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. The material weaknesses relate to not maintaining an effective control environment and, separately, not maintaining effective controls over our stock option practices and the related accounting for stock option transactions, and are described in more detail as follows:

Control Environment

As set forth in Management's Annual Report on Internal Control over Financial Reporting in Item 9A of our Annual Report on Form 10-K for the fiscal year ended June 24, 2006, our management determined that the control environment constituted a material weakness in internal control as of June 24, 2006, due to the Company's failure to maintain proper tone and control consciousness at the executive management level, effective

policies and procedures for monitoring our stock administration department, effective monitoring controls to detect or prevent non-compliance with the Company's policies regarding option grants, and proper lines of communication

Table of Contents

regarding identification and processing of stock option transactions. Due to the ongoing implementation of remedial actions as of June 30, 2007, management has concluded that the Company's control environment was not effective and therefore a material weakness in internal control continued to exist.

Stock Option Practices and Related Accounting for Stock Option Transactions

As set forth in Management's Annual Report on Internal Control over Financial Reporting in Item 9A of our Annual Report on Form 10-K for the fiscal year ended June 24, 2006, our management determined that the recording of additional stock-based compensation for fiscal years 1997 through 2005 due to errors in accounting for stock option transactions constituted a material weakness, due to the Company's failure to maintain sufficient procedures and controls over granting and accounting of stock options, lack of sufficient staffing, accounting knowledge and training among the personnel dealing with stock options, and lack of complete and consistent documentation for stock option transactions. Due to the continuing presence of the material weaknesses or ongoing implementation of remedial actions as of June 30, 2007, management has concluded that the Company's internal control over financial reporting was not effective as of June 30, 2007.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of June 30, 2007 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report which is included in Item 9A of this Annual Report on Form 10-K.

Changes in Internal Control Over Financial Reporting

Other than the activities to remediate our material weaknesses as described further below, that took place or that were ongoing during the three months ended June 30, 2007, there were no changes in our internal control over financial reporting during the three months ended June 30, 2007 that have materially affected or are reasonably likely to materially affect, our internal control over financial reporting.

Remediation of Material Weaknesses in Internal Control Over Financial Reporting

Subsequent to June 24, 2006 through the filing date of this Annual Report on Form 10-K, the Company has undertaken the following actions to remediate the material weaknesses in our internal control over financial reporting discussed above:

Our former CEO and former CFO no longer served the Company in any capacity after January 2007. Additionally, our former Treasurer and Manager of Stock Administration, each of whom had responsibilities over stock option administration during the Review Period, are no longer with the Company.

The Option Committee, of which the former CEO of the Company was the single member, was effectively abolished on December 19, 2006.

The Board of Directors separated the role and responsibility of Chairman of the Board and Chief Executive Officer in January 2007, which were previously combined (however, the Board retains the authority to combine such positions at anytime).

In January 2007, Mr. Hale, Vice President of Maxim and the former CFO of Dallas Semiconductor, a company acquired by Maxim in fiscal 2001, was appointed as interim CFO. Mr. Hale has expertise in, and his responsibilities include, the supervision of the establishment and improvement of internal controls and procedures to allow for the timely and accurate accounting for stock-based compensation in conformity with applicable accounting standards.

On April 6, 2007 the Board of Directors adopted a revised Compensation Committee Charter which authorizes the Compensation Committee to (i) grant stock options and other equity-based awards to individuals eligible for such grants (including the CEO, officers, and employees but excluding the non-employee members of the Board of Directors), (ii) interpret the terms of the plans and award agreements issued hereunder, and (iii) modify or waive any condition of outstanding awards issued under the plans. The

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Compensation Committee may form and delegate authority to one or more subcommittees where appropriate, including but not limited to a subcommittee comprised of at least two members of the Compensation Committee to approve equity awards under the Company's Equity Award Grant Policy (discussed below).

Table of Contents

In June 2007, we adopted an Equity Award Grant Policy which improved and formalized our procedures for the grant of stock options and other equity awards and provides the following:

Only the Compensation Committee or the Board of Directors may approve the grant of equity awards under the 1996 Plan (or any future successor plan). In addition, pursuant to the Compensation Committee Charter, the Compensation Committee may delegate the authority to approve the grant of equity awards to a subcommittee comprised of at least two members of the Compensation Committee (Equity Grant Subcommittee).

The grant date for an equity award is the date on which the Compensation Committee or Equity Grant Subcommittee of the Board of Directors meets and approves the number of shares of an individual s equity award.

The exercise price for all stock options will not be less than the closing sales price as reported by NASDAQ (or other national market, including over-the-counter markets) of the Company s common stock on the grant date.

Other than non-employee members of the Board of Directors and independent contractors, equity awards may only be granted to individuals who are employees of the Company on the grant date of the award. Equity awards to independent contractors may only be granted if the independent contractor is rendering services to the Company.

Amendments or modifications to outstanding equity awards require approval by the Compensation Committee or Equity Grant Subcommittee.

Equity award notifications are promptly distributed to grantees by the stock administration department after the grant date and grantees are directed to the Company s captive broker s website which contains forms of equity grant agreements and information on specific equity award packages.

The Compensation Committee approves annual, new hire and special recognition (e.g., promotions) grants on the first Tuesday of each month.

In order to help reasonably ensure proper application and financial reporting for equity awards, as well as to improve supervision of stock administration, in September, 2007, the Company hired a new vice president of finance with substantial accounting and finance expertise. In the hiring process for our new vice president of finance, who will be appointed CFO upon completion of the financial restatement, we set criteria to include applicable experience and expertise in designing, improving, implementing and maintaining an effective control environment, stock option practices and accounting for stock option transactions.

In October 2007, the Company completed the restaffing of the Company s Stock Administration department with a management team experienced in designing, implementing and maintaining effective control environments.

The Company adopted procedures to improve coordination and communication among accounting, human resources, stock administration and legal functions to identify, approve and document non-routine stock transactions, such as modifications of key terms that require accounting recognition and disclosure.

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

In March 2008, our CEO established a policy to hold quarterly conference calls with all salaried employees to respond to their questions concerning the Company and the business.

In April 2008, the Company created and filled a new position within finance, Director of Technical Accounting, who has the responsibility to provide independent monitoring of Stock Administration and stock option accounting.

In May 2008, the Company revised and implemented procedures to enhance the controls over the stock option exercise process to include cash exercises. The new procedures require all stock option exercises to be administered and executed through the Company's exclusive, captive broker. Furthermore, the exercise date for cash exercises is clarified to be the day the captive broker receives the individual's completed Notice of Exercise with payment equal to the aggregate option exercise price and withholding tax liability.

Table of Contents

In May 2008, the Company revised and implemented internal guidelines relating to equity awards for leaves of absence, part-time employees and independent contractors (consultants). These guidelines provide for certain approval and documentation requirements, as well as, specifically addressing vesting of equity awards, cancellations and the 90-day post-termination period to exercise vested options. Also, in November, 2007, Joseph R. Bronson was appointed to the Board of Directors, and Mr. Bronson was subsequently appointed to the Audit Committee in May 2008. Mr. Bronson has extensive executive management and industry expertise, and has added a valuable perspective on how to enhance the Committee's role of oversight and monitoring of the Company's internal control over financial reporting. Upon completion of the restatement of our financial statements, Mr. Bronson will be named Chairman of the Audit Committee.

As of the date of this filing, the Company has completed its evaluation of the design of the new policies, procedures and controls it has instituted, which have been in place for a sufficient period of time, and tested their operating effectiveness. The Company considers that the corrective steps identified have improved the effectiveness of the Company's internal control over financial reporting and have remediated the material weaknesses discussed above.

Inherent Limitations on the Effectiveness of Internal Controls

A system of internal control over financial reporting is intended to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with GAAP and no control system, no matter how well designed and operated, can provide absolute assurance. The design of any control system is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of its inherent limitations, internal control over financial reporting may not prevent or detect financial statement errors and misstatements. Also, projection of any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Maxim Integrated Products, Inc.:

We have audited management's assessment, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting (Management's Report), that Maxim Integrated Products, Inc. and subsidiaries (collectively, the Company) did not maintain effective internal control over financial reporting as of June 30, 2007 because of the effect of the material weaknesses identified in management's assessment, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or combination of deficiencies, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. The following material weaknesses have been identified and included in management's assessment:

Control Environment

As set forth in Management's Annual Report on Internal Control over Financial Reporting included in the Annual Report on Form 10-K for the fiscal year ended June 24, 2006, management determined that the control environment constituted a material weakness in internal control as of June 24, 2006, due to the Company's failure to maintain proper tone and control consciousness at the executive management level, effective policies and procedures for monitoring the stock administration department, effective monitoring controls to detect or prevent non-compliance with the Company's policies regarding option grants, and proper lines of communication regarding identification and processing of stock option transactions. Due to the ongoing implementation of remedial actions as of June 30, 2007, this material weakness in internal control continues to exist.

Stock Option Practices and Related Accounting for Stock Option Transactions

As set forth in Management's Annual Report on Internal Control over Financial Reporting included in the Annual Report on Form 10-K for the fiscal year ended June 24, 2006, management determined that the errors in accounting for stock option transactions that resulted in the recording of additional stock-based compensation for fiscal years 1997 through 2005 were due to the Company's failure to maintain sufficient procedures and controls over granting and accounting of stock options, lack of sufficient staffing, accounting knowledge and

Table of Contents

training among the personnel dealing with stock options, and lack of complete and consistent documentation for stock option transactions. The deficiencies in controls over stock option practices and the related accounting for stock option transactions described above constituted a material weakness. Due to the ongoing implementation of remedial actions as of June 30, 2007, this material weakness in internal control continues to exist.

These material weaknesses were considered in determining the nature, timing and extent of audit tests applied in our audit of the consolidated financial statements and financial statement schedule as of and for the year ended June 30, 2007 of the Company, and this report does not affect our report on such financial statements and financial statement schedule.

In our opinion, management's assessment that the Company did not maintain effective internal control over financial reporting as of June 30, 2007, is fairly stated, in all material respects, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, because of the effect of the material weaknesses described above on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of June 30, 2007, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedule as of and for the year ended June 30, 2007 of the Company and our report dated September 30, 2008 expressed an unqualified opinion on those financial statements and financial statement schedule.

ITEM 9B. OTHER INFORMATION

None.

Table of Contents**PART III****ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE****Directors of the Registrant**

The name, age and principal occupation of each of our directors as of July 1, 2008, are set forth in the table below. Except as described below, each of the nominees has been engaged in his principal occupation during the past five years. There are no family relationships among any of our directors or executive officers.

Name	Age	Principal Occupation and Business Experience
B. Kipling Hagopian	66	Mr. Hagopian has served as a director of the Company since 1997. Mr. Hagopian was a founder of Brentwood Associates, a venture capital investment company, and was a general partner of all of the funds started by Brentwood from inception in 1972 until 1989. He was a General Partner of Brentwood until 1996. He has been a Special Limited Partner of each of the five Brentwood funds started since 1989, and is a Special Advisory Partner to Redpoint Ventures I which is a successor to Brentwood's information technology funds. Mr. Hagopian is also Chairman and President of Segue Productions, a feature film production company, and a Managing Director of Apple Oaks Partners LLC, a private investment company which manages his own capital and the capital of one other individual. Mr. Hagopian serves as Interim Chairman of the Company's Board of Directors.
A. R. Frank Wazzan	72	Dr. Wazzan has served as a director of the Company since 1990. Dr. Wazzan is Distinguished Professor and Dean (1986-2001) Emeritus of the School of Engineering and Applied Science, University of California, Los Angeles. Dr. Wazzan has served as consultant to Douglas Aircraft, Hughes Electroynamics, North American Rockwell, the U.S. Atomic Energy Commission, Westinghouse Oceanics Division, Honeywell, the Department of Defense while at Rand Corporation where he contributed to work on the design of underwater weapon systems, the effect of nuclear radiation on the performance of electronic materials and communication satellites, and methods of hardening boosters and satellites to laser and microwave weapons. Dr. Wazzan is a member of the American Institute of Aeronautics and Astronautics, a Guggenheim Fellow, and a Fellow of the American Nuclear Society. He is recipient of the Gold Medal Award at the First International Meeting on Nuclear Power Plants in Commercial Operations.
James R. Bergman	66	Mr. Bergman has served as a director of the Company since 1988. Mr. Bergman was a founder and general partner of DSV Associates since 1974 and a founder and general partner of its successors, DSV Partners III and DSV Partners IV. These firms provided venture capital and management assistance to emerging companies, primarily in high technology. Since August 1996, Mr. Bergman has been a limited partner of Brantley Venture Management, L.P., the General Partner of Brantley Venture Partners III and IV which are private venture capital partnerships. Since July 1997, he has also served as a special limited partner of Cardinal Health Partners and Cardinal Partners II, which are also private venture capital funds.
Joseph R. Bronson	59	Mr. Bronson has served as a director of the Company since November 2007. Mr. Bronson is President and Chief Operating Officer at Sanmina-SCI, a world wide contract manufacturer and a member of its board, and serves on the board of directors of Jacobs Engineering Group Inc. Before joining Sanmina-SCI, Mr. Bronson served as President and a director of FormFactor, Inc., a manufacturer of advanced semiconductor wafer probe cards. Mr. Bronson also spent 20 years at Applied Materials in senior level operations management positions concluding with Executive Vice President and Chief Financial Officer of the company.
Tunc Doluca	50	Mr. Doluca has served as a director of the Company as well as the President and Chief Executive Officer since January 2007. He joined Maxim in October 1984 and served as Vice President from 1994 to 2005. He was promoted to Senior Vice President in 2004 and Group President in May 2005. Prior to 1994, he served in a number of integrated circuit development positions.

Table of Contents

In addition, on August 5, 2008, we appointed Robert E. Grady and William D. Watkins to our Board of Directors.

Executive Officers of the Registrant

The following is information regarding our executive officers, including their positions and their ages as July 1, 2008.

Name	Age	Position
Tunc Doluca	50	President and Chief Executive Officer
Alan P. Hale	47	Vice President, Interim Chief Financial Officer and Principal Accounting Officer
Richard C. Hood	58	Vice President
Bruce E. Kiddoo	47	Vice President of Finance
Matthew J. Murphy	35	Vice President, Worldwide Sales
Christopher J. Neil	42	Vice President
Pirooz Parvarandeh	48	Group President
Charles G. Rigg	64	Senior Vice President
Vijay Ullal	49	Group President

Mr. Doluca Please see Mr. Doluca s biography under Directors of the Registrant, above.

Mr. Hale has served as Vice President and Interim Chief Financial Officer since January 31, 2007. He joined Dallas Semiconductor Corporation in June 1987 and served in various financial management positions including Vice President and Chief Financial Officer when Dallas Semiconductor was acquired by Maxim in 2001. From 2001 until 2005, Mr. Hale continued in his capacity at Dallas Semiconductor and also served as a Vice President for Maxim. In July 2005, following Mr. Hale s request, his responsibilities were redistributed and reassigned. From July 2005 until January 2007, Mr. Hale assisted Maxim with its investor relations program and special projects on a part-time basis until agreeing to serve as Interim CFO in January 2007.

Mr. Hood, a founder of the Company, joined the Company in May 1983 and was promoted to Vice President in February 1997. Prior to February 1997, he served in a number of engineering and manufacturing positions.

Mr. Kiddoo joined the Company in September 2007 as Vice President of Finance. Following the completion of the Company s restatement of previously filed financial statements, Mr. Kiddoo will be appointed Chief Financial Officer and Principal Accounting Officer of the Company. Prior to joining Maxim, Mr. Kiddoo held various positions at Broadcom Corporation, a global semiconductor company, beginning in December 1999. Mr. Kiddoo served as Broadcom s Corporate Controller and Principal Accounting Officer from July 2002 and served as Vice President from January 2003. He also served as Broadcom s Acting Chief Financial Officer from September 2006 through March 2007.

Mr. Murphy joined Maxim in July 1994 and was promoted to Vice President in November 2006. Prior to 2006, he served in a number of business unit and executive management positions.

Mr. Neil joined Maxim in September 1990 and was promoted to Vice President in April 2006. Prior to 2006, he held several engineering and executive management positions.

Mr. Parvarandeh joined Maxim in July 1987 and served as Vice President from 1997 to 2005. He was promoted to Senior Vice President in 2004 and Group President in May 2005. Prior to 1997, he served in a number of integrated circuit development positions.

Mr. Rigg joined Maxim in August 1996 as Managing Director and General Counsel. He was promoted to Vice President in April 1999 and Senior Vice President in January 2007. Prior to joining Maxim, he was with Ropers, Majeski, Kohn and Bentley from 1970 to 1996 where he held various positions, including director.

Mr. Ullal joined Maxim in December 1989 and served as Vice President from 1996 to 2004. He was promoted to Senior Vice President in 2004 and Group President in January 2007. Prior to 2004, he served in a number of wafer fabrication operation and management positions.

Corporate Governance

Information Regarding the Board and Its Committees

Board of Directors

At the end of fiscal year 2007, the members of the Board of Directors (the Board) consisted of James R. Bergman, Michael J. Byrd, Tunc Doluca, Peter de Roeth, B. Kipling Hagopian and A. R. Frank Wazzan.

During fiscal year 2007, John F. Gifford retired from the positions of President, Chief Executive Officer and Chairman of the Board effective January 1, 2007, and Mr. Doluca was appointed to replace Mr. Gifford as our Chief Executive Officer and as a member of the Board of Directors. After the completion of fiscal year 2007, Mr. Byrd and Mr. de Roeth resigned from their respective positions on our Board on August 29, 2007 and February 8, 2008, respectively.

Audit Committee and Audit Committee Financial Expert

The Audit Committee, which has been established in accordance with Section 3(a)(58)(A) of the Exchange Act, is currently comprised of directors Bergman, Bronson and Wazzan, each of whom is independent within the meaning of the NASDAQ director independence standards as currently in effect. Since March 2007, Mr. Bergman has been the Chairman of the Audit Committee. The Board has determined that each member of the Audit Committee is an audit committee financial expert as defined under the rules of the SEC. The Audit Committee has a written charter adopted on June 8, 2000 and most recently amended on April 6, 2007.

From the start of fiscal year 2007 and until March 1, 2007, Mike Byrd, a former director, served as the Chairman of the Audit Committee, and Mr. Bergman was appointed to the Audit Committee and to serve as its Chairman on March 1, 2007 at the time Mr. Byrd resigned from the Audit Committee. On May 15, 2008, Mr. Hagopian resigned from the Audit Committee due to time limitations and Mr. Bronson was appointed to fill the vacancy as a result of Mr. Hagopian's resignation. Mr. Bronson will become the Chairman of the Audit Committee upon completion of the Company's restatement.

Compensation Committee

The Compensation Committee is currently comprised of directors Bergman, Hagopian and Wazzan each of whom is independent within the meaning of the NASDAQ director independence standards as currently in effect. Since March 2007, Dr. Wazzan has been Chairman of the Compensation Committee. Among other tasks, the Compensation Committee (i) annually reviews and approves corporate goals and objectives relevant to the compensation of the Chief Executive Officer and annually reviews and evaluates the Company's Chief Executive Officer against such approved goals and objectives, (ii) in consultation with the Chief Executive Officer, reviews and approves the compensation of our officers, (iii) administers our 1996 Stock Incentive Plan (the 1996 Stock Plan), (iv) makes recommendations to the Board with respect to compensation of our directors and committee members, (v) prepares the Compensation Discussion and Analysis and issues the Compensation Committee Report in accordance with the rules of the SEC to be included in the Company's proxy statement or annual report on Form 10-K, and (vi) performs such functions regarding compensation as the Board may delegate.

Pursuant to its charter, on June 30, 2007, the Compensation Committee established a two-person sub-committee that is comprised of two directors on the Compensation Committee, which sub-committee is referred to as the Equity Award Grant Sub-Committee. The Equity Award Grant Sub-Committee's purpose is to make equity awards under the Company's Equity Award Grant Policy.

Interim Option Committee

On December 19, 2006, the Company's Interim Option Committee (IOC), which was comprised of the then-Chairman of the Board and then-Chief Executive Officer, John F. Gifford, was effectively abolished. Prior to being abolished, the IOC had the authority to make stock option grants and restricted stock unit awards other than to executive officers and to otherwise administer the 1996 Stock Plan.

Nominating and Governance Committee

On March 1, 2007, the Board established a Nominating and Governance Committee (the Governance Committee) that consisted of directors Bergman, de Roeth and Hagopian as its members. Currently, the Governance Committee consists of directors Bergman and Hagopian. Each of the members of the Governance Committee is independent.

Table of Contents

within the meaning of the NASDAQ director independence standards, as currently in effect. Since March 2007, Mr. Bergman has been the Chairman of the Governance Committee. Among other tasks, the Governance Committee assists the Board by identifying and recommending prospective director candidates, develops and recommends to the Board the governance principles applicable to the Company and oversees the evaluation of the Board and the Board's evaluation of management.

Nominations of Director Candidates by Stockholders

On April 6, 2007, the Board approved Corporate Governance Guidelines. These guidelines, in conjunction with the Company's Certificate of Incorporation, Bylaws and Board committee charters, form the framework for the governance of the Company. Pursuant to our Corporate Governance Guidelines, the Board's policy is to have the Governance Committee consider all bona fide director candidates nominated by stockholders of the Company. More specifically, the Board has established the following procedures by which stockholders may submit nominations of director candidates:

To nominate a candidate for election to the Board, a stockholder must have held at least 100,000 shares of the Company for at least twelve (12) consecutive months leading up to the date of the recommendation and must notify the Governance Committee by writing to the General Counsel of the Company;

The stockholder's notice shall set forth the following information;

- (i) To the extent reasonably available, information relating to such director nominee as would be required to be disclosed in a proxy statement pursuant to Regulation 14A under the Securities Exchange Act of 1934, as amended, in which such individual is a candidate for election to the Board;
- (ii) The director nominee's written consent to (A) if selected by the Governance Committee as a director candidate, be named in the Company's proxy statement and proxy, and (B) if elected, serve on the Board; and
- (iii) Any other information that such stockholder believes is relevant in considering the director nominee.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act, as amended (the Exchange Act), requires our directors and officers, and persons who own more than ten percent (10%) of a registered class of the Company's equity securities, to file with the Securities and Exchange Commission (the SEC) initial reports of ownership and reports of changes in ownership of common stock and other equity securities of the Company. Officers, directors and greater than ten (10%) percent stockholders are required by SEC regulation to furnish us with copies of all Section 16(a) forms they file.

To the best of our knowledge, based solely on a review of the copies of such reports furnished to the Company and written representations that no other reports were required, during the fiscal year ended June 30, 2007, all Section 16(a) filing requirements applicable to its officers, directors and greater than ten percent beneficial owners were complied with except that a Form 4 was not timely filed by Matthew Murphy in connection with the award of restricted stock units granted in January 2007 as part of his promotion to Vice President of Worldwide Sales due to administrative errors. A corrective filing reporting this award was made in April 2007.

Code of Business Conduct and Ethics

We have a Code of Business Conduct and Ethics (the Code of Ethics), which applies to all directors and employees, including but not limited to our principal executive officer, principal financial officer and principal accounting officer. The Code of Ethics is designed to promote: (i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest arising from personal and professional relationships, (ii) full, fair, accurate, timely and understandable disclosure in reports and documents that we are required to file with the SEC and in other public communications, (iii) compliance with applicable governmental laws, rules and regulations, (iv) the prompt internal reporting of violations of the Code of Ethics to an appropriate person or entity, and (v) accountability for adherence to the Code of Ethics. A copy of Code of Ethics is available on our website at <http://www.maxim-ic.com/company/policy>. A hard copy of the Code of Ethics will be sent free of charge upon request.

Table of Contents

ITEM 11. EXECUTIVE COMPENSATION COMPENSATION DISCUSSION AND ANALYSIS

This Compensation Discussion and Analysis provides a review of our executive compensation philosophy, policies and practices with respect to the following current and former executive officers of Maxim: the Chief Executive Officer, the Chief Financial Officer, the other three most highly compensated executive officers during fiscal year 2007, and our former Chief Executive Officer and former Chief Financial Officer, both of whom departed during fiscal year 2007 (the Named Executive Officers).

Executive Compensation Philosophy and Components

The objectives of our executive compensation program are as follows:

To attract, retain, motivate and reward the best and brightest executives who have the talent and experience required to achieve our goals;

To align the short-term and long-term interests and objectives of our executive officers with stockholders and customers;

To create a high-performance culture by linking total rewards to company performance, including performance relative to our peers; and

To recognize executives for their contributions to our success by rewarding individual performance.

We accomplish these objectives by providing our executives with compensation components that are specifically linked to either short-term or long-term corporate and executive performance. The principal components of our executive compensation are:

Base salary;

Cash performance bonuses;

Stock options and restricted stock units; and

Benefits.

Each of these components is intended to achieve one or more of our compensation objectives. The mix of compensation components is designed to reward recent performance with cash compensation and to motivate long-term performance and retention through equity awards. The Compensation Committee relies on its judgment in determining the appropriate mix of cash and equity compensation.

Governance of Executive Officer Compensation Program

Role and Members of the Compensation Committee

The Compensation Committee of the Board of Directors is responsible for determining executive officer compensation. The Committee is currently comprised of three members of the Board of Directors, Messrs. James R. Bergman, B. Kipling Hagopian and A. R. Frank Wazzan, each of whom is an independent, non-employee director. Peter de Roeth was also a member of the Compensation Committee during a portion of fiscal years 2007 and 2008 until his resignation from the Board of Directors (and all committees) on February 6, 2008 for family medical

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

reasons. Since March 1, 2007, Dr. Wazzan has, and continues to, serve as Chairman of the Compensation Committee.

The primary purpose of the Compensation Committee is to:

Review and approve corporate goals and objectives relevant to the compensation of the Company's Chief Executive Officer (the CEO), evaluate CEO performance, and determine CEO compensation based on this evaluation;

Approve and oversee, in consultation with our Chief Executive Officer (the CEO) the total compensation package for our officers including their base salaries, bonus, equity-based compensation, severance benefits and change-in-control benefits (if any);

Review the CEO's performance evaluation of all officers and approve compensation decisions;

Review periodically and make recommendations to the Board regarding any equity or long-term compensation plans, and administer these plans; and

Make recommendations to the Board with respect to compensation for Board members and Board committee members.

The Compensation Committee operates according to a charter that details its specific duties and responsibilities. The Compensation Committee periodically reviews the charter and recommends proposed changes to the Board for

Table of Contents

approval (most recently on April 6, 2007). The Compensation Committee Charter is available on our website in the Corporate Governance section at <http://www.maxim-ic.com/company/investor/governance>. The charter sets forth the membership requirements, authority and duties of the Compensation Committee, which shall consist of no fewer than two members, all of whom (i) meet the independence requirements of the NASDAQ Marketplace Rules, (ii) are non-employee directors under the definition of Rule 16b-3 promulgated under Section 16 of the Exchange Act, and (iii) are outside directors for purposes of the regulations promulgated under Section 162(m) of the Internal Revenue Code. During fiscal year 2007, and currently, all members of the Compensation Committee met these criteria.

Process for Evaluating Executive Officer Performance and Compensation

The Compensation Committee generally holds at least two scheduled meetings during the year and holds additional meetings periodically to review and discuss executive compensation issues. In addition, certain members of the Compensation Committee generally communicate on an informal basis concerning Compensation Committee matters throughout the fiscal year. The Compensation Committee may also consider and take certain actions by unanimous written consent.

Our Corporate Secretary, along with other individuals in the Company, supports the Compensation Committee in its work. The Compensation Committee also has the authority to engage the services of outside advisors, experts and others for assistance.

Outside Compensation Consultant

In fiscal year 2007, the Compensation Committee did not engage an independent compensation consulting firm to advise it and the Board on executive equity and cash compensation matters. However, the Compensation Committee Chairman devoted a substantial amount of time and effort in obtaining and analyzing peer group data and advising the Compensation Committee and the Board on such data.

In fiscal year 2008, the Compensation Committee engaged an independent compensation consulting firm, Compensia LLC, to advise the Compensation Committee and the Board on executive cash and equity compensation matters, including the Company's new Officer Compensation Plan for fiscal years 2008 and 2009. The consulting firm reports directly to the Compensation Committee, and the Compensation Committee has sole authority to hire, terminate and direct the work of the consulting firm.

Role of Management in Executive Compensation Process

The Compensation Committee seeks input from our Chief Executive Officer and/or other senior executives, to obtain recommendations with respect to Company compensation programs, practices and packages for executives and other employees. Our Chief Executive Officer's role in the compensation-setting process consists of (i) evaluating executive and employee performance; (ii) assisting in the establishment of business performance targets and objectives; and (iii) recommending salary levels and equity awards. While the Compensation Committee may discuss our CEO's compensation package with him, it meets in executive session in his absence to determine his compensation.

Executive Compensation Benchmark and Minimum Levels of Guaranteed Compensation

During fiscal year 2007, the Compensation Committee examined the compensation practices of a peer group to assess the competitiveness of our executive officer compensation practices and levels. The peer group for fiscal year 2007 included Analog Devices, Inc., Broadcom Corporation, Linear Technology Corporation, National Semiconductor Corporation and Texas Instruments Inc. These companies were selected by the Compensation Committee because they are in the same industry as the Company, some are of comparable size in terms of revenues, and they are all companies with which we compete for executive talent. The peer group will be reviewed annually by the Compensation Committee, and adjustments are made as necessary to ensure the peer group is appropriate and continues to properly reflect the market in which Maxim competes for talent.

Previously, our Compensation Committee authorized, at the recommendation of John F. Gifford, our then Chief Executive Officer, an offer of a minimum amount of total compensation for each officer of the Company to make, excluding Mr. Gifford, for fiscal year 2007 and 2008 service. For fiscal 2007, this amount was derived by adding base salary, the cash performance bonus awarded in fiscal year 2007 for fiscal year 2006 performance, and any assumed gain in all equity awards vesting in fiscal 2007. To the extent a short-fall existed between the guaranteed minimum amount and the sum of these three components, then the Company would pay a special bonus equal to the difference. The Compensation Committee authorized such minimum compensation arrangements primarily for retention purposes. In light of the pendency of the Company's financial restatement, the Chief Executive Officer and three other most highly compensated officers subsequently declined to accept such guaranteed minimum amount, and the guaranteed amount was not paid, believing that such a bonus was not appropriate given that the Company's financial restatement had not been completed.

Table of Contents

Evaluation of Named Executive Officer Compensation

Base Salary

Base salaries are used to attract, motivate and retain highly qualified executives. Base salary is the primary fixed component of compensation in the executive compensation program and is determined by:

Level of responsibility;

Expertise and experience of the executive; and

Competitive conditions in the industry.

Annual base salary increases, if any, are a reflection of:

The individual's performance for the preceding year;

The individual's pay level relative to similar positions in our peer group;

Anticipated future contributions of the executives; and

Competitive conditions in the industry.

Fiscal 2007 Base Salary Actions

As part of an annual process, Mr. Gifford, the then-CEO of Maxim, presented his recommendations for executive officer base salary increases to the Compensation Committee on November 15, 2006 for the fiscal year ended June 30, 2007. After the Compensation Committee evaluated Company performance, individual performance and data related to market practices for executive compensation, the Compensation Committee then approved the following salary increases for the Named Executive Officers, except for Mr. Gifford's base salary which was left unchanged, effective as of the start of fiscal year 2007:

Named Executive Officer	Title	Annualized 2007 Base Salary	% Increase from 2006
John F. Gifford	Former President and Chief Executive Officer*	\$ 500,000	0
Tunc Doluca	President and Chief Executive Officer**	\$ 500,000***	25
Carl Jasper	Former Chief Financial Officer	\$ 300,000	50
Alan Hale	Interim Chief Financial Officer	\$ 300,000	
Richard C. Hood	Vice President	\$ 300,000	50
Pirooz Parvarandeh	Group President	\$ 400,000	33.33
Vijay Ullal	Group President	\$ 400,000	33.33

* Mr. Gifford retired from his position as Maxim's President and Chief Executive Officer and Chairman of the Board effective as of December 31, 2006.

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

- ** Mr. Doluca was appointed as Maxim's President and Chief Executive Officer and member of the Board effective as of January 1, 2007.
- *** Prior to his appointment as President and Chief Executive Officer, Mr. Doluca's annualized base salary as a Group President was \$400,000. On July 18, 2007, the Compensation Committee increased Mr. Doluca's annualized base salary retro-active to January 1, 2007, the date on which he was appointed President and Chief Executive Officer.
- Mr. Jasper resigned from his position as Maxim's Chief Financial Officer as of January 31, 2007.
- Mr. Hale was appointed as Maxim's Interim Chief Financial Officer effective as of January 31, 2007.
- Mr. Ullal was appointed as a Group President effective January 1, 2007. Prior to this appointment, Mr. Ullal was a Senior Vice President.

Table of Contents

2007 Base Salary for Tunc Doluca

After considering peer group data, on July 18, 2007, the Compensation Committee increased Mr. Doluca's annualized base salary to \$500,000 retro-active to January 1, 2007, the date on which he was appointed President and Chief Executive Officer.

2007 Compensation for John F. Gifford: Separation Agreement

The Compensation Committee did not increase Mr. Gifford's base salary from fiscal year 2006 to fiscal year 2007. Due to Mr. Gifford's retirement from his positions effective December 31, 2006, he only received approximately one-half of his annualized base salary for fiscal year 2007.

On January 5, 2007, we entered into a binding memorandum of understanding (MOU) with Mr. Gifford. The MOU fully supersedes and replaces prior employment agreements entered into between the Company and Mr. Gifford. Under the MOU, Mr. Gifford was employed by us on a part-time basis devoting up to 24 hours of service per week on matters assigned to him by the Company. Mr. Gifford's part-time service lasted approximately three and one-half weeks until Mr. Gifford resigned from part-time service on January 26, 2007.

Under the MOU, Mr. Gifford was entitled to an annual base salary of \$300,000 payable ratably in proportion to hours worked based upon full-time service and he was eligible to be awarded, in the sole and absolute discretion of the Compensation Committee, up to one-half of bonus for fiscal year 2007. No bonus was awarded by the Compensation Committee to Mr. Gifford for fiscal 2007 service. Under the MOU, Mr. Gifford was no longer eligible to participate in our officer or employee bonus program for services rendered in his part-time capacity. Although the MOU provided that Mr. Gifford would continue to vest in his outstanding stock options and restricted stock units in proportion to the hours worked during his part-time employment, no equity vested during his part-time service and all unvested equity awards have been cancelled. Under the Retirement Agreement, Mr. Gifford and his spouse receive health insurance coverage at the Company's cost for the remainder of each of their lives, which is consistent with the terms of Mr. Gifford's employment agreement entered into on February 17, 1994, and the Company reimburses him for the cost of an office and an assistant to Mr. Gifford. The Company may cease providing health insurance coverage benefits and the office space and administrative assistant in the event Mr. Gifford competes with the Company. Under the MOU, the Board of Directors also further accelerated amounts deferred by Mr. Gifford under his deferred compensation plan with the Company such that amounts deferred at December 31, 2004 were distributed in January 2007 and the amounts deferred in 2005, 2006 and 2007 were distributed in 2008.

2007 Base Salary for Alan Hale

The Compensation Committee approved the hiring of Mr. Hale as the Interim Chief Financial Officer at an annualized base salary of \$300,000, the same annualized rate paid to our prior Chief Financial Officer. The Compensation Committee not only considered the base salary paid to our prior Chief Financial Officer in making its determination but also peer company data.

2007 Base Salary for Carl Jasper: Separation Agreement

Due to Mr. Jasper's resignation as Chief Financial Officer effective January 31, 2007, he only received a portion of his \$300,000 annualized base salary for fiscal year 2007 for the period he worked. On February 2, 2007, we entered into a severance and release agreement with Mr. Jasper, and paid Mr. Jasper \$482,400, less required withholdings, in exchange for a release of all claims against the Company. The amount paid to Mr. Jasper was equal to the pro-rata amount Mr. Jasper claimed he was entitled to receive as a minimum performance bonus for fiscal year 2007. All of Mr. Jasper's unvested stock options and restricted stock units were immediately cancelled. Mr. Jasper will have ninety (90) days after the Company becomes current with its reporting obligations with the Securities and Exchange Commission to exercise stock options vested on his termination date unless such stock options have reached their maximum 10-year term without being exercised in which case they will expire without remuneration or other payment to Mr. Jasper.

Table of Contents

2007 Base Salary for Other Named Executives

The base salary increases for Messrs. Doluca (in his capacity as Group President), Hood, Parvarandeh and Ullal are based on the peer group analysis conducted by the Compensation Committee Chairman and considered by the Compensation Committee and the Board.

Fiscal 2008 Base Salary Actions

The Compensation Committee, after a review of individual and Company performance, as well as market practices for executive compensation, did not approve base salary increases for our Named Executive Officers for fiscal year 2008 and no such increases were proposed or recommended by the Chief Executive Officer. Accordingly, the base salaries for our executive officers were not changed.

Cash Bonus

In 1997, the Company adopted, and our stockholders approved, a cash bonus plan (the Bonus Plan) for the Company's officers, including the Named Executive Officers, which was in effect during fiscal year 2007. Under the Bonus Plan, a bonus pool for distribution to all officers of up to a maximum of 3% of the Company's pre-tax earnings will be created, with the specific amount of the pool determined by equal weighting of two performance criteria: (a) up to 1 1/2% of such earnings tied to the year-to-year rate of growth in the Company's earnings per share and (b) up to 1 1/2% of such earnings tied to the year-to-year increase in the market price of its stock. The bonus pool will be based on the Company's actual achievement related to these objective performance criteria versus a target growth of 30% per year for each criterion. From this pool, each officer will receive a bonus in respect of each fiscal year, in an amount to be approved by the Compensation Committee based on the same objective performance criteria and the analysis and recommendations of the Chief Executive Officer based upon individual performance. The maximum bonus that may be paid in any fiscal year to any officer, including the Chief Executive Officer, is one-half of the pool.

After the end of each fiscal year, the Compensation Committee is to determine and certify the Company's performance as compared to the criteria set for that fiscal year, and to determine the amount of each officer's bonus for such year. The Compensation Committee reserves the right to pay any officer less than the maximum bonus determined under the objective performance criteria based upon the Compensation Committee's determination of that officer's individual performance during the year and on all other relevant factors, including other compensation received during the year, such as stock option grants and restricted stock units.

In addition to bonuses paid pursuant to the Bonus Plan, the Company has the authority to give bonuses to officers outside the terms of the Bonus Plan. Bonuses given outside the Bonus Plan may be based on specific officer-group achievements or for individual reasons.

For fiscal year 2007, there was an aggregate amount of approximately \$969,000 earned under the Bonus Plan and available for distribution to all of the Company's 13 officers. This amount was derived based upon a 13% increase in the market price of the Company's stock based on the closing price of the stock on the last trading day of fiscal year 2007 as compared to the last trading day of fiscal year 2006 and our pre-tax earnings. Fiscal year 2007 pre-tax earnings per share decreased as compared to fiscal year 2006, and therefore, no amount was earned under the Bonus Plan using these criteria.

The Compensation Committee, with the recommendation of the Chief Executive Officer, determined not to pay the amount earned under the Bonus Plan for fiscal year 2007 because such amount would be inadequate and not meaningful. However, the Compensation Committee determined to award bonuses for fiscal year 2007 performance outside of the Bonus Plan.

In November 2007, the Chief Executive Officer, made recommendations to the Compensation Committee with respect to the amount of performance bonus to pay each officer for fiscal 2007 service, including the Named Executive Officers with the exception of himself and Mr. Hale. The recommendations were based upon his assessment of their actual performance to defined quarterly goals (prior to the start of each fiscal quarter, each officer, establishes a number of goals to achieve in the quarter), time commitment, and vision and creativity. In addition, a total of 225 points were allocated among officers based upon their respective strategic importance to the Company during fiscal year 2007. The aggregate bonus pool for fiscal 2006 service was also used as a benchmark for determining the aggregate amount of bonuses paid for fiscal year 2007 service.

The Compensation Committee reviewed and discussed the Chief Executive Officer's recommendations during its meeting on November 15, 2007 and requested that the Chief Executive Officer make modifications to his recommendations for certain individuals. The Compensation Committee also reviewed and discussed a proposed bonus for the Chief Executive Officer during its executive session based upon the similar criteria used for other officers. Thereafter, the Compensation Committee approved performance bonuses by action by unanimous written consent on November 21, 2007 to all officers except for Mr. Hale after the Chief Executive Officer modified his recommendations. In awarding bonuses, the Compensation Committee considered Company performance, market data from the five peer group companies as well as individual

performance.

Table of Contents

Mr. Hale's performance bonus for his service in fiscal year 2007 was approved by the Compensation Committee on June 7, 2007 in connection with his hiring as the Interim Chief Financial Officer and was set at \$394,615 and due on July 1, 2007, provided he satisfactorily made successful progress towards the completion of the restatement as determined by the Board of Directors.

Bonus Payouts for Fiscal 2007 Performance

The Compensation Committee approved the following 2007 bonus payments for the Named Executive Officers, based on corporate and individual performance:

Named Executive Officer	2007 Bonus Paid
Tunc Doluca	\$ 825,000
John F. Gifford	\$ 0
Alan Hale	\$ 394,615
Carl Jasper	\$ 0
Richard C. Hood	\$ 398,159
Pirooz Parvarandeh	\$ 541,938
Vijay Ullal	\$ 680,644

Target Bonus for Fiscal 2008 Performance and New Bonus Plan for Officers

At the March 1, 2007 meeting of the Board of Directors, the Chief Executive Officer recommended to the Board and the Compensation Committee that a new compensation plan for the Company's officers, including the Named Executive Officers, be adopted to replace the existing Bonus Plan and offered suggestions on what the new compensation plan should encompass. After receiving feedback from the Board, the Chief Executive Officer, together with the Compensation Committee Chairman, developed a proposed compensation plan for officers for fiscal years 2008 and 2009 that they presented to the Board and the Compensation Committee at meeting held on May 24, 2007. After additional input and feedback was given by the Compensation Committee and incorporated into the proposed compensation plan, the Compensation Committee met on July 18, 2007 and approved a new compensation model in principle for officers, including the Named Executive Officers, excluding Mr. Hale, for fiscal years 2008 and 2009.

Cash Incentive Compensation – Short Term Incentives

Under the compensation plan for officers for fiscal years 2008 and 2009, the aggregate annual target cash bonus pool is 1.2% of the Company's non-GAAP operating profit before taxes (excluding stock-based compensation) and the pool floor and maximum are 0.6% and 1.8%, respectively, of the Company's non-GAAP operating profit before taxes. The annual bonus pool is dependent upon (i) the achievement of growth targets for non-GAAP operating profit before taxes (excluding stock-based compensation), (ii) the Company's stock price performance relative to the Philadelphia Semiconductor Index (SOX), and (iii) the achievement of targets for return on invested capital. Each officer's share of the bonus pool is dependent upon his or her position points and performance relative to the other executives.

Equity Compensation – Long Term Incentives

The bonus plan also contains an equity compensation component that is comprised of a mixture of stock options, restricted stock units and performance shares (restricted stock units that vest upon the attainment of milestones). The number of restricted stock units to be awarded to all officers is 200,000, which will vest over four consecutive quarters based upon continued service starting in the second quarter of fiscal 2009. The aggregate target number of performance shares to be granted to all officers over a two-year measurement period (fiscal year 2008 and 2009) is 200,000 shares per each fiscal year, with a range from zero to 400,000 shares per fiscal year. For business unit executives, vesting of performance shares are tied to business unit operating profit targets and operating margin targets. For non-business unit executives, vesting of performance shares is tied to (i) achievement of Company growth targets for non-GAAP operating profit before taxes (excluding stock-based compensation), (ii) the Company's stock price performance relative to the Philadelphia Semiconductor Index (SOX), and (iii) the achievement of targets for return on invested capital. The aggregate target number of stock options to be awarded to all officers each year is 1,140,000 shares, none of which have been granted.

Table of Contents

Additional information and details regarding the officer compensation plan for fiscal year 2008 and 2009 will be described in the proxy statement for the Company's 2008 annual meeting of stockholders.

Equity Compensation

We believe equity compensation is an effective way to align the interests of our executive officers with those of our stockholders in order to achieve long-term stock price growth. In designing the equity compensation program, we take into account stockholder concerns about stock usage and dilution.

Equity Awards for Fiscal Year 2007 and 2008 Performance

In fiscal years 2007 and 2008, we did not make any equity awards to any of the Named Executive Officers primarily because the Board of Directors and management believed that it would be inappropriate to grant equity awards to them before the completion of our restatement of our consolidated financial statements.

However, the new bonus plan covering officers, including the Named Executive Officers, provides for (i) an aggregate of 200,000 restricted stock units to be awarded to all officers each fiscal year that will vest based upon continued service, and (ii) an aggregate number of performance shares will range from zero to 400,000 depending on performance. The performance shares vest upon the metrics discussed above. The aggregate target number of stock options to be awarded to all officers each year is 1,140,000 shares. No performance shares or stock options have been granted to officers under this plan as of the date hereof. An award of restricted stock units that vest over eight consecutive quarters starting on November 15, 2008 was made to officers, excluding the Named Executive Officers, on September 2, 2008.

Employee Stock Purchase Plan

The Company's Employee Stock Purchase Plan (ESPP) in which all employees (subject to limited exceptions), including executives, are eligible to participate, was suspended for all of fiscal year 2007 as a result of the stock option review described below. In addition, the term of the Company's ESPP expired in August 2007, and as such, the Company currently does not have an ESPP to offer. Management and the Board of Directors are contemplating a new ESPP, and once approved by the Company's stockholders, it would enable participants to purchase Company Common Stock at a discount of up to 15% from the market price. Employee contributions would be made through payroll deductions.

Benefits and Perquisites

The Company's philosophy regarding benefits for our employees, including executives, is that they should be competitive with the market in order to attract and retain a high quality workforce, meet the needs of our employees, encourage employee well-being, and provide protection from catastrophic events. We provide medical, dental and vision insurance coverage to executives that are generally available to other full-time employees, including basic group life insurance and disability insurance. For all management employees, including our officers, we pay the premiums for executive life insurance, executive disability and umbrella liability insurance plans. We also offer a tax qualified 401(k) plan in which all U.S. based employees, including officers, are eligible to participate. All of our Named Executive Officers participated in our 401(k) plan during fiscal year 2007. Starting on January 1, 2008, employees are eligible to receive a matching contribution from the Company equal to 100% of the before-tax contributions made by the employee up to 3% of total cash compensation. Starting January 1, 2009 the matching contribution will be increased to 100% of the before-tax contributions made by the employee up to 3% of total cash compensation plus fifty percent of before tax contributions exceeding 3% of total cash compensation but not to exceed 5% of total cash compensation. Under certain circumstances we have provided reimbursement of expenses for tax preparation for certain executives.

The Compensation Committee reviews the perquisites provided to executive officers as part of its overall review of executive compensation. The Compensation Committee has determined the type and amount paid in perquisites to be within the appropriate range of competitive compensation practices. Details about the named executive officer's perquisites, including fiscal year 2007 cost to the Company, are shown in the Summary Compensation Table under the All Other Compensation column and the accompanying narrative.

Table of Contents

Employment Agreements

Several years ago we entered into at-will employment agreements with each of Messrs. Doluca, Hood, Parvarandeh and Ullal that contain substantially the same terms. The agreements do not grant the executive officers any right to be retained by us, and we may terminate employment of each executive officer either with or without cause. In the event of termination of employment by the Company with or without cause, all compensation and benefits, except benefits provided by law (e.g., COBRA health insurance continuation benefits) immediately cease to accrue. However, in the event of termination of employment by the Company without cause, severance payments are to be made in accordance with our normal policy then in effect, if any, or as otherwise mutually agreed between the Company and the executive officer.

If the executive officer terminates his full-time employment with us and his written notice of termination provides that he is willing to provide certain consulting services to us, we will make health insurance coverage available to the executive officer and his family during the period of provision of such services (or willingness to provide services) by the executive officer. The terms of his service, unless otherwise agreed, will provide for part-time services (up to one day per month) and annual compensation equal to at least 5% of the executive officer's base salary at the time of termination provided services are rendered. Health insurance coverage means coverage under any group health plan we maintain for our employees.

During the ten-year period following the notice of termination, the executive officer pays the same amount for health coverage as a similarly situated full-time employee is required to pay for coverage under our group health plan. After the ten-year period, the executive officer pays us the cost of the coverage, which is the cost of COBRA health insurance continuation benefits. In the event of the executive officer's death while receiving health insurance coverage, the executive officer's spouse is eligible for health insurance coverage until her death so long as she pays for the coverage in an amount equal to the cost for an employee with identical coverage. In the event the executive officer becomes disabled while receiving health insurance coverage, he is deemed to have met his service obligations to us during the disability.

Pursuant to the terms of the Dallas Semiconductor acquisition in April 2001, we assumed the liabilities and obligations of Dallas Semiconductor under certain agreements between Dallas Semiconductor and Alan P. Hale, the current Interim Chief Financial Officer and Principal Accounting Officer of the Company, including (i) the Dallas Executives Retiree Medical Plan, as amended, in which Mr. Hale and his spouse are participants, (ii) a split-dollar insurance agreement, and (iii) an agreement that provides Mr. Hale with certain benefits following a change-of-control transaction (the Change-in-Control Agreement).

Under the Dallas Executives Retiree Medical Plan, Mr. Hale and his spouse are eligible to receive medical care benefits at no cost during the period Mr. Hale renders services to the Company and thereafter for the remainder of their lives.

Under the Split-Dollar Insurance Agreement, which was originally entered into in February 1994 and amended in July 2000 and January 2001, the Company is required to pay cash premiums for a life insurance policy on the life of Mr. Hale, and the policy provides for the recovery of the cost of premiums paid from the cash value or death benefits collaterally assigned to the Company by Mr. Hale to the extent such premiums are recoverable. In fiscal year 2007, \$4,596 was attributed to Mr. Hale on his split-dollar life insurance policy.

Under the Change-in-Control Agreement, Mr. Hale will be entitled to receive a retirement benefit of \$65,000, commencing on his 55th birthday and payable annually thereafter until his death. In addition, Mr. Hale and his spouse have a right under this agreement to continue to participate, at no cost to either of them, in all health, dental, disability, accident and life insurance plans or arrangements that were in effect at Dallas Semiconductor immediately prior to the acquisition of Dallas Semiconductor. Upon the acquisition of Dallas Semiconductor in April 2001, Mr. Hale received certain other benefits under the Change-in-Control Agreement as well.

Post-Employment Obligations

The at-will employment agreements with Messrs. Doluca, Hood, Parvarandeh and Ullal provide that in the event of termination of employment by the Company without cause, severance payments are to be made in accordance with our normal policy then in effect, if any, or as otherwise mutually agreed between the Company and the individual. The Company does not have any normal policy with respect to severance payments of former executives.

In addition to the post-retirement benefit payable to Mr. Hale pursuant to the Change-in-Control Agreement described above, our offer letter agreement with Mr. Hale provides that we would pay Mr. Hale the pro rata share of his bonus in the event his employment was terminated before the end of fiscal year 2007.

Table of Contents

Reasonableness of Compensation

The Compensation Committee believes it is fulfilling our compensation objectives and in particular, rewarding executive officers in a manner that supports our strong pay-for-performance philosophy. Executive compensation is tied to our performance and is structured to ensure that there is an appropriate balance between our long-term and short-term performance, and also a balance between our operational performance and stockholder return. The Compensation Committee believes the average target pay position relative to market and pay mix are reasonable and appropriate.

Other Considerations

Equity Grant Practices

During fiscal year 2007 the Company changed the processes and procedures in which it grants equity awards. Prior to December 19, 2006, equity awards could be made to employees and outside members of the Board of Directors by the Company's Interim Option Committee (IOC) which was comprised of John F. Gifford, our prior Chief Executive Officer. The equity awards made by the IOC were then reviewed and ratified by the Compensation Committee at a subsequent meeting. Equity awards to officers could be only made by the Compensation Committee, which continues to be the case. On December 19, 2006, the IOC was effectively abolished and the Board determined that all equity awards should be made by the full Board of Directors until the Company developed and instituted an entirely new process to make equity awards. During the remainder of fiscal year 2007, equity awards were made by the Board of Directors using the fair market value of the Company's Common Stock on the date of grant pursuant to an award list that was circulated to the Board by the Company's Secretary in advance of the meeting.

On June 4, 2007, the Board of Directors adopted a new and comprehensive Equity Award Grant Policy governing the processes and procedures for the grant of equity awards. With respect to all equity awards including those to officers, such awards may only be made at a meeting (and not be unanimous written consent) of the Compensation Committee (or a 2-person Sub-Committee comprised of at least 2 members of the Compensation Committee). Meetings for the grant of equity to new employees and promotional awards are made on the first Tuesday of each month. The meeting in which equity will be granted to continuing officers will be held during an open trading window under the Company's Insider Trading Policy. The Company's independent registered accounting firm, along with the Company's Chief Executive Officer, is provided the list of proposed equity awards in advance of the meeting in which any award will be made and are invited to attend each such meeting.

With respect to officers, the Compensation Committee will be provided with a written recommendation from the Company's Chief Executive Officer regarding the proposed terms of equity awards to each officer (excluding himself), including the number and type of award to be considered for grant and vesting schedule. The Compensation Committee shall independently arrive at a recommendation with respect to the equity award for the Chief Executive Officer, based upon several factors, including but not limited to, Company performance and individual performance relevant to the compensation of the Company's Chief Executive Officer. Once the Compensation Committee approves the number, type of award and vesting schedule of equity awards for officers (including the Chief Executive Officer), the Compensation Committee will grant the equity awards at a duly called meeting held during an open trading window under the Company's Insider Trading Policy at which the independent registered accounting firm and the Chief Executive Officer have been invited to attend. The Company's legal counsel and Controller will also attend the meeting and each will certify that the grant was in fact made on such date.

Tax Considerations

Section 162(m) of the Internal Revenue Code states that public companies cannot deduct compensation paid to certain of its top executive officers in excess of \$1 million per officer per year. We believe it is in our best interest, to the extent practical, to have executive officer compensation be fully deductible under Section 162(m). However, the Compensation Committee also retains the discretion, for competitive reasons, to provide compensation that may not be fully deductible. In a few instances, a portion of our annual bonus payments to certain of our executive officers does not currently qualify as deductible under Section 162(m). The Compensation Committee will continue to evaluate whether it is in the Company's best interest to qualify future incentive awards under Section 162(m). Our 1996 Stock Incentive Plan has been structured with the intention that stock options and performance shares granted under the plan be qualified as performance-based compensation not subject to Section 162(m), however improperly accounted for stock options and performance shares granted under this plan may not qualify as performance-based compensation.

Stock Ownership Guidelines

The Company does not currently have any stock ownership guidelines for its executive officers or members of its Board of Directors.

Table of Contents**Summary Compensation Table**

The compensation for the Chief Executive Officer, Interim Chief Financial Officer, the three most highly compensated executive officers, and the Company's former Chief Executive Officer and former Chief Financial Officer, both of whom departed from the Company during the fiscal year (together "Named Executive Officers"), for all services rendered in all capacities to the Company and its subsidiaries during the fiscal year ended June 30, 2007 is set forth below. Please note that the Company did not grant any equity awards to Named Executive Officers during fiscal year 2007 except Alan Hale who was granted 3,900 restricted stock units prior to the time he was appointed Interim Chief Financial Officer.

Fiscal Year 2007 Summary Compensation Table

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Restricted Stock Unit Awards \$(1)	Option Awards \$(2)	Change in non-qualified deferred compensation earnings (\$)	All Other Compensation (\$)	Total (\$)
Tunc Doluca President and CEO	2007	448,077	825,000	354,392	8,252,442		10,110 (5)	9,890,021
Alan P. Hale Vice President, Interim Chief Financial Officer	2007	118,346	416,718 (3)	23,844	774,025		5,926 (6)	1,338,859
Richard C. Hood Vice President	2007	298,077	398,159	70,878	6,734,693		2,229 (7)	7,504,036
Pirooz Parvarandeh Group President	2007	398,077	541,938	329,870	6,253,104		1,417 (7)	7,524,406
Vijay Ullal Group President	2007	398,077	680,644	336,673	7,700,548		1,552 (7)	9,117,494
John F. Gifford Former President, Chief Executive Officer and Chairman of the Board	2007	312,884			9,154,050	799,605 (4)	28,694,403 (8)	38,960,942
Carl W. Jasper Former Vice President and Chief Financial Officer	2007	228,232		36,394	5,233,278		503,587 (9)	6,001,491

- (1) Reflects the dollar amount recognized for financial statement reporting purposes for restricted stock unit awards in accordance with SFAS 123(R), whether granted to the Named Executive Officers in fiscal year 2007 or 2006 (the first year that restricted stock units were granted), and disregarding an estimate of forfeitures related to service-based vesting conditions. The assumptions used in the valuation of these awards are set forth in Note 3, "Stock-Based Compensation" of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.
- (2) Reflects the dollar amount of stock-based compensation expense recognized for financial statement reporting purposes for (i) historical stock option awards granted in prior fiscal years, including under-water options, in accordance with SFAS 123(R), and (ii) compensation charges incurred in connection with the modification of expiring options. See Note 3 to the Consolidated Financial Statements. The assumptions used in the valuation of these awards are set forth in Note 3, "Stock-Based Compensation" of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.
- (3) Includes \$22,103 cash bonus earned by Mr. Hale during fiscal year 2007 in connection with his regular part-time employment (prior to his becoming a Named Executive Officer) and his cash bonus earned as Interim Chief Financial Officer.
- (4) Reflects interest earned on Mr. Gifford's deferred compensation balance at a rate equal to the interest rate (as adjusted from time to time) that employees of the Company are required to pay the Company under the Company's employee loan program (4% in fiscal year 2007). See Deferred Compensation table later in this discussion.

Table of Contents

- (5) Reflects premiums of \$2,765, \$3,865 and \$3,480 paid by us for Mr. Doluca's executive life insurance, executive disability and umbrella liability insurance plans, respectively.
- (6) Reflects (a) \$4,596 attributed to Mr. Hale on his split-dollar life insurance policy and (b) imputed interest of \$1,330 on an amount loaned by the Company to Mr. Hale (prior to his becoming a Named Executive Officer) for his RSUs that vested following the suspension of the issuance of shares under our Form S-8 registration statement as a result of our stock option review. The loan was secured by the vested RSUs. Mr. Hale paid off the loan and interest thereon immediately after assuming his responsibilities as Vice President and Interim Chief Financial Officer of the Company on February 1, 2007. In addition, we agreed to pay an amount that is not determinable yet for tax preparation for fiscal year 2007.
- (7) Reflects premiums paid by us for executive life insurance.
- (8) Reflects (a) premiums of \$3,741, \$5,943 and \$3,480 paid by us for Mr. Gifford's executive life insurance, executive disability and umbrella liability insurance plans, respectively and (b) \$25,533,355 distributed to Mr. Gifford from his deferred compensation balance (see Deferred Compensation table later in this discussion) and a post retirement obligation estimate of \$3,147,884 recorded by the Company in fiscal year 2007 for Mr. Gifford in connection with his Retirement Agreement.
- (9) Reflects premium of \$1,694 paid by us for Mr. Jasper's executive life insurance for the benefit of Mr. Jasper. Mr. Jasper resigned from the Company on January 31, 2007. On February 2, 2007, the Company and Mr. Jasper entered into a severance and release agreement with respect to Mr. Jasper's resignation from the Company. Under the agreement, Mr. Jasper released all claims against the Company. The Company paid Mr. Jasper's a lump sum severance payment of \$482,400, less required withholdings lump sum (consisting of \$432,400 base salary and pro-rated bonus; \$50,000 to settle claims that Mr. Jasper contended was owed to him under a severance arrangement) and \$19,493 paid by the Company for medical premiums under COBRA for continued health coverage for Mr. Jasper and his family under the Company's health insurance plans until his eligibility ceases in accordance with the terms of the agreement.

Table of Contents**Grants of Plan-Based Awards**

The following table shows certain information regarding grants of plan-based awards to the Named Executive Officers for the fiscal year ended June 30, 2007; the Company did not make equity awards to any of the Named Executive Officers during fiscal year 2007, except to an award of 3,900 restricted stock units to Mr. Hale, as noted below, in connection with his regular part-time employment prior to his becoming a Named Executive Officer:

Grants of Plan-Based Awards in Fiscal Year 2007

Name	Grant Date	All Other Stock Awards: Number of Restricted Stock Units (#)	All Other Option Awards: Number of Underlying Securities (#)	Exercise or base price of option awards (\$/Sh)	Grant date fair value of stock and option awards (\$)
Tunc Doluca					5,389,140 (2)
Alan P. Hale	8/7/2006	3,900 (1)			103,311
Richard C. Hood					5,395,471 (2)
Pirooz Parvarandeh					3,444,172 (2)
Vijay Ullal					5,021,898 (2)
John F. Gifford					5,591,560 (2)
Carl W. Jasper					4,162,441 (2)

- (1) These RSUs vest at the following rates: 634 shares on November 15, 2006, 202 shares on February 15, 2007, 48 shares on May 15, 2007, 325 shares each quarterly beginning on February 15, 2009 through November 15, 2010 and 416 shares on February 15, 2011.
- (2) In September 2006, the Company approved the extension of the terms of vested stock options that expire during the blackout as a result of the expiration of the 10-year contractual term. The extension was considered a modification under SFAS 123(R). The incremental compensation expense of the modification was based on the fair value of the option at the modification date after the extension. The Company recognized additional compensation expense totaling \$118.9 million for 8.3 million options in the three months ended September 23, 2006 including the amounts disclosed for Messrs. Doluca, Hood, Parvarandeh, Ullal, Gifford and Jasper in the table above. The stock-based compensation expense adjustment was based on modified vested options held by employees that expired during the period from September 22, 2006 through the end of the Blackout Period. See Note 3, Stock-Based Compensation of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Table of Contents**Outstanding Equity Awards at June 30, 2007**

The following table shows certain information regarding outstanding equity awards at June 30, 2007 for the Named Executive Officers:

Table of Contents**Option Exercises and Stock Vested**

The following table shows certain information regarding option exercises and stock vested during the last fiscal year with respect to the Named Executive Officers during fiscal year 2007:

Option Exercises and Stock Vested in Fiscal Year 2007

Name	Option Awards		Restricted Stock Unit Awards	
	Number of shares acquired on exercise (#) (1)	Value realized on exercise	Number of shares acquired on vesting (#) (2)	Value realized on vesting
Tunc Doluca	20,000	\$ 368,800	10,000	\$ 306,950
Alan P. Hale			38,821	1,188,688
Richard C. Hood			2,000	61,390
Pirooz Parvarandeh	64,000	1,217,357	10,000	306,950
Vijay Ullal	170,524	3,326,250	5,000	153,475
John F. Gifford				
Carl W. Jasper			1,500	44,528

- (1) Stock options were exercised prior to the Blackout Period which commenced on September 22, 2006.
(2) Includes vested but unexercised restricted stock units due to the Blackout Period.

Table of Contents**Non-Qualified Deferred Compensation**

The following table shows certain information regarding non-qualified deferred compensation for and as of the year ended June 30, 2007 with respect to Mr. Gifford (none of the other Named Executive Officers had a deferred compensation arrangement with the Company during fiscal year 2007):

Non-Qualified Deferred Compensation for Fiscal Year 2007

Name	Executive s contributions in last fiscal year (\$)	Registrant s contributions in last fiscal year (\$)	Aggregate earnings in last fiscal year (\$)	Aggregate withdrawals/ distributions (\$)	Aggregate balance at June 30, 2007 (\$)
Tunc Doluca					
Alan P. Hale					
Richard C. Hood					
Pirooz Parvarandeh					
Vijay Ullal					
John F. Gifford	2,030,682(1)		799,605(2)	25,533,355	6,874,972
Carl W. Jasper					

(1) Includes amounts deferred for Mr. Gifford's fiscal year 2007 salary and Mr. Gifford's bonus earned in fiscal year 2006.

(2) Deferred payments bear interest at a rate equal to the interest rate (as adjusted from time to time) that employees of the Company are required to pay the Company under the Company's employee loan program (4% in fiscal year 2007).

Director Compensation

The following table shows certain information regarding director compensation for the year ended June 30, 2007 (except as otherwise noted):

Director Compensation for Fiscal Year 2007

Name	Fees earned or paid in cash (\$)	Restricted Stock Unit Awards (\$)	Option Awards (\$)(1)	All other compensation (\$)	Total (\$)
James R. Bergman	60,000		277,332 (2)	115,603 (3) (4)	452,935
Michael J. Byrd	56,000		155,445	21,617 (4)	233,062
Peter de Roethth	102,000 (5)		211,637		313,637
B. Kipling Hagopian	56,000		277,332 (2)	61,560 (3)	394,892
A.R. Frank Wazzan	62,000		277,332 (2)	61,560 (3)	400,892

Table of Contents

- (1) Reflects the dollar amount recognized for financial statement reporting purposes in accordance with SFAS 123(R) for option awards granted to the director in a prior fiscal year that vested during fiscal year 2007 disregarding an estimate of forfeitures related to service-based vesting conditions. The assumptions used in the valuation of these awards are set forth in Note 3, Stock-Based Compensation of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.
- (2) Reflects non-cash compensation expense for the extension of the term of 12,000 stock options from five years to 10 years due to the stock option exercise suspension.
- (3) Reflects income of \$61,560 under Section 409A of the Internal Revenue Code for vested discount stock options outstanding at December 31, 2007. These amounts were included in the respective directors 1099 forms for calendar 2007.
- (4) Reflects \$54,043 and \$21,617 premium for medical insurance coverage, for Messrs. Bergman and Byrd, respectively, which is also offered to each member of the Board of Directors in connection with their Board service.
- (5) Includes \$50,000 that was paid for Special Committee service.

During the fiscal year ended June 30, 2007, each non-employee member of the Board of Director was paid an annual retainer of \$50,000 payable in quarterly installments of \$12,500. In addition, each non-employee director was paid an annual retainer in the amount of (i) \$4,000 for services provided as a member of the Compensation Committee of the Board, and (ii) \$8,000 for services provided as a member of the Audit Committee of the Board, each payable in equal quarterly installments. The sole member of the Special Committee during fiscal year 2007 was paid \$50,000 in a single payment during the year for his extra-ordinary services. The Company reimburses each director for reasonable expenses incurred in attend meetings of the Board of Directors or its committees. In addition, the Company makes medical insurance coverage available to each non-employee Board member in connection with each individual s service as a director of the Company.

Non-employee directors participate in the 1996 plan. However, in fiscal year 2007 the Company did not grant stock options or other equity awards to the non-employee Board members. In September 2006, the Interim Option Committee extended the 5-year term of stock options exercisable for 12,000 shares of Common Stock to a term of 10-years that were granted to James Bergman, B. Kipling Hagopian and A.R. Frank Wazzan in 2001 in connection with their Board service. The extension was made because the options could not be exercised before expiring as a result of the Company s equity exercise suspension as a result of its historical stock option review.

Employment Contracts and Change in Control Arrangements

Each of Messrs. Doluca, Hood, Parvarandeh and Ullal is a party to an agreement with us, pursuant to which each such officer may entitled to certain severance payments and benefits under the specified circumstances. Mr. Hale is party to the Change-in-Control Agreement, split-dollar insurance agreement and the Dallas Executives Retiree Medical Plan, pursuant to which he is entitled to certain severance and retirement benefits. Each of Messrs. Gifford and Jasper are parties to agreements specifying the terms of their separation from us. For further information and detail regarding the above-mentioned agreements and change in control arrangements, please see Item 11 Compensation Discussion and Analysis contained in this Annual Report on Form 10-K.

Other Potential Post-Employment Payments

Each of Messrs. Doluca, Hood, Parvarandeh, Ullal and Hale is party to an agreement that may entitle each such officer to certain post-employment payments from us under the specified circumstances. For a detailed discussion of such potential post-employment obligations of the Company, please see Item 11 Compensation Discussion and Analysis contained in this Annual Report on Form 10-K.

Compensation Committee Interlocks and Insider Participation

No member of the Company s Compensation Committee is, or ever has been, an executive officer or employee of the Company or any of its subsidiaries. No interlocking relationship exists, or during fiscal year 2007 existed, between the Company s Board of Directors or Compensation Committee and the board of directors or compensation committee of any other company.

All executive officers and directors as a group (15 persons) (19)	12,599,212	3.8%

* Less than one percent

- (1) This table is based upon information supplied by officers, directors, principal stockholders and the Company's transfer agent, and contained in Schedules 13G filed with the SEC. Unless otherwise indicated, the address of each person or entity listed is c/o Maxim Integrated Products, Inc., 120 San Gabriel Drive, Sunnyvale, California 94086. Unless otherwise indicated in the footnotes to this table and subject to community property laws where applicable, each of the stockholders named in this table has sole voting and investment power with respect to the shares indicated as beneficially owned. Applicable percentages are based on 320,553,460 shares outstanding on July 1, 2008 adjusted as required under rules promulgated by the SEC. For disclosure purposes, the information includes the Company's executive officers who were Named Executive Officers of the Company in either fiscal year 2006 or 2007 or both.
- (2) Based solely on information provided by Capital Research and Management Company (CRMC) in a Schedule 13G/A filed with the SEC on February 8, 2008. Capital Research Global Investors (CRGI) and Capital World Investors (CWI) are divisions of CRMC which manages equity assets for various investment companies through its divisions, CRGI and CWI. These divisions generally function separately from each other with respect to investment research activities and they make investment decisions and proxy decisions for the investment companies on a separate basis. The investment operations of CRGI and CWI are such that beneficial ownership should be attributed to CRGI and CWI separately from each other.
- (3) Based solely on information provided by CWI in a Schedule 13G/A filed with the SEC on February 12, 2008. CWI does not own any shares of the Company for its own account; the shares reported are owned by accounts under the discretionary investment management of CWI. CWI has no voting power and sole dispositive power over all shares shown. The address of CWI is 333 South Hope Street, Los Angeles, CA 90071.

Table of Contents

- (4) Based solely on information provided by CRGI in a Schedule 13G/A filed with the SEC on February 12, 2008. CRGI does not own any shares of the Company for its own account; the shares reported are owned by accounts under the discretionary investment management of CRGI. CRGI has no voting power and sole dispositive power over all shares shown. The address of CRGI is 333 South Hope Street, Los Angeles, CA 90071.
- (5) Based solely on information provided by Fidelity Management & Research Company LLC (FMR LLC) in a Schedule 13G/A filed with the SEC on February 14, 2008. The address of FMR LLC is 82 Devonshire Street, Boston, MA 02109.
- (6) Based solely on information supplied by Dodge & Cox in a Schedule 13G filed with the SEC on February 13, 2008. The address of Dodge & Cox is 555 California Street, 40th Floor, and San Francisco, CA 94104.
- (7) Includes (i) 3,092,716 shares subject to options exercisable within 60 days of July 1, 2008 and (ii) 100,000 shares held by the Gifford Foundation for which Mr. Gifford disclaims beneficial ownership.
- (8) Includes (i) 54,000 shares subject to options exercisable within 60 days of July 1, 2008 and (ii) 41,000 shares held by the Bergman Family Foundation for which Mr. Bergman disclaims beneficial ownership.
- (9) Includes 62,000 shares subject to options exercisable within 60 days of July 1, 2008.
- (10) Includes (i) 54,000 shares subject to options exercisable within 60 days of July 1, 2008 and (ii) 2,000 shares held by a family foundation for which Mr. Hagopian disclaims beneficial ownership.
- (11) Includes (i) 9,000 shares subject to options exercisable within 60 days of July 1, 2008 and (ii) 250 restricted stock units that vest within 60 days of July 1, 2008.
- (12) Includes (i) 875,934 shares subject to options exercisable within 60 days of July 1, 2008 and (ii) 5,400 shares owned by Mr. Doluca's two daughters, of which each daughter owns 2,700 shares.
- (13) Includes (i) 547,449 shares subject to options exercisable within 60 days of July 1, 2008 and (ii) 883,382 shares held in a family trust.
- (14) Includes 944,211 shares subject to options exercisable within 60 days of July 1, 2008.
- (15) Includes 867,449 shares subject to options exercisable within 60 days of July 1, 2008.
- (16) Includes 238,000 shares subject to options exercisable within 60 days of July 1, 2008.
- (17) Includes 109,377 shares subject to options exercisable within 60 days of July 1, 2008.
- (18) Includes vested but unexercised RSUs due to the suspension of the issuance of shares under our Form S-8 registration statements; these shares are assumed to be net of federal and state income payroll taxes.
- (19) Includes 7,583,413 shares subject to options exercisable within 60 days of July 1, 2008 and 7,937 restricted stock units that vest within 60 days of July 1, 2008.

Equity Compensation Plan Information

The required information concerning our equity compensation plans is contained in Item 5 Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities in Part II of this Annual Report on Form 10-K.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Related Party Transactions

The Company employs Kevin Lynch, the son-in-law of Mr. Gifford, former Chief Executive Officer of the Company, Robert Bergman, the son of James R. Bergman, a director of the Company, Brian Hood, the son of Richard C. Hood, a Vice President of the Company, Michelle Hood, the daughter-in-law of Richard C. Hood, and Becky Tanner, the daughter of Richard C. Hood. Each of these individuals receives compensation and other benefits commensurate with other employees at similar levels within the Company.

The Company has entered into indemnification agreements with its directors and certain of its officers. The indemnification agreements provide, among other things, that the Company will indemnify each of its directors and officers, under the circumstances and to the extent provided therein, for expenses, damages, judgments, fines and

Table of Contents

settlements each may be required to pay in actions or proceedings to which he or she may be made a party by reason of his or her position or positions as a director, officer or other agent of the Company, and otherwise to the fullest extent permitted under Delaware law and the Company's bylaws.

For any continuing transactions with any of the above related parties after the end of fiscal year 2007, please see the Company's Annual Report on Form 10-K for the fiscal year ended June 28, 2008 being filed immediately after the filing of this report.

Review, Approval or Ratification of Related Party Transactions

The Audit Committee Charter provides that the Audit Committee will review all related party transactions for potential conflict of interest situations on an ongoing basis and approve all such transactions (if such transactions are not approved by another independent body of the Board). Any related party transaction will be disclosed in an applicable SEC filing as required by the rules of the SEC.

The Audit Committee has had knowledge of the employment of the individuals listed above, as each has been employed by the Company for several years. However, the Audit Committee has not and did not specifically approve the compensation for each individual because the employment and compensation of each such individual is consistent and commensurate with those of individuals in similarly situated positions.

Independence of the Board of Directors

The Board has determined that, with the exception of Tunc Doluca, the Company's Chief Executive Officer and John Gifford, the Company's former Chief Executive Officer, all of its members during fiscal year 2007 are or, at the time of their service independent directors as that term is defined in the NASDAQ listing standards, including for the purposes of the Audit Committee composition requirements. Such independence definition includes a series of objective tests, including that the director is not an employee of the Company and has not engaged in certain types of business transactions or dealings with the Company. In addition, as further required by the NASDAQ listing standards, the Board has made a subjective determination that no relationships exist which, in the opinion of the Board of Directors, would interfere with the exercise of independent judgment in carrying out his responsibilities as director.

Table of Contents**ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES****Audit and Non-Audit Fees**

The following table presents fees for professional services rendered by Deloitte & Touche LLP for the audit of the Company's annual financial statements for the fiscal years ended June 30, 2007 and June 24, 2006, respectively, and fees billed for other services rendered by Deloitte & Touche LLP during such fiscal years. All fees set forth below are exclusive of any value-added tax (VAT) or GST.

	Fiscal 2007	Fiscal 2006
Audit Fees(1)	\$ 1,798,044	\$ 1,144,515
Audit-Related Fees(2)		14,400
Tax Fees(3)	9,164	20,090
All Other Fees(4)	5,006	
	\$ 1,812,214	\$ 1,179,005

- (1) Audit Fees consist of fees billed for professional services rendered in connection with the audit of the Company's consolidated annual financial statements and review of the interim consolidated financial statements included in quarterly reports and audit services that are normally provided by Deloitte & Touche LLP in connection with statutory and regulatory filings. Fees for fiscal year 2007 also included fees of \$0.4 million for services rendered during fiscal year 2007 in connection with the restatement of previously filed financial statements to correct past accounting for stock options.
- (2) Audit-Related Fees consist of fees billed for assurance and related services that are reasonably related to the performance of the audit or review of the Company's consolidated financial statements and not reported under Audit Fees.
- (3) Tax Fees consist of fees billed for professional services rendered for tax compliance, tax advice and federal, state and international tax planning. These services include assistance regarding federal, state and international tax compliance and tax planning.
- (4) All Other Fees consist of fees for products and services other than the services reported above. There were no such fees incurred in fiscal year 2006.

Audit Committee Pre-Approval Policies and Procedures

The Audit Committee pre-approves all audit and permissible non-audit services provided by the independent auditors. These services may include audit services, audit-related services, tax services and other services. The Audit Committee has adopted a policy for the pre-approval of services provided by the independent auditors. Under the policy, pre-approval is generally provided for up to one (1) year and any pre-approval is detailed as to the particular service or category of services and is subject to a specific budget. In addition, the Audit Committee may also provide pre-approval for particular services on a case-by-case basis. For each proposed service, the independent auditor is required to provide detailed back-up documentation at the time of approval. For fiscal year 2007, there were no audit-related fees, tax fees, or any other fees that were approved by the Audit Committee pursuant to the de minimus exception under Regulation S-X Rule 2-01(c)(7)(i)(C).

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The following are filed as part of this Report:

Page

(1) *Financial Statements.*

Consolidated Balance Sheets at June 30, 2007 and June 24, 2006 71

Consolidated Statements of Income for each of the three years in the period ended June 30, 2007 72

Consolidated Statements of Stockholders' Equity for each of the three years in the period ended June 30, 2007 73

Consolidated Statements of Cash Flows for each of the three years in the period ended June 30, 2007 74

Notes to Consolidated Financial Statements 75

Report of Independent Registered Public Accounting Firm 102

(2) *Financial Statement Schedule.*

The following financial statement schedule is filed as part of this Annual Report on Form 10-K and should be read in conjunction with the financial statements.

Schedule II - Valuation and Qualifying Accounts 103

All other schedules are omitted because they are not applicable, or because the required information is included in the consolidated financial statements or notes thereto.

(3) The Exhibits filed as a part of this Report are listed in the attached Index to Exhibits.

(b) *Exhibits.*

See attached Index to Exhibits.

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: NATURE OF OPERATIONS

Maxim Integrated Products, Inc. (Maxim or the Company and also referred to as we, our or us) designs, develops, manufactures, and markets a broad range of linear and mixed-signal integrated circuits, commonly referred to as analog circuits, for a large number of geographically diverse customers and is incorporated in the state of Delaware. The Company also provides a range of high-frequency process technologies and capabilities that can be used in custom designs. The analog market is fragmented and characterized by many diverse applications, a great number of product variations and, with respect to many circuit types, relatively long product life cycles. The Company is a global company with manufacturing facilities in the United States, testing facilities in the Philippines and Thailand, and sales and circuit design offices throughout the world. The major end-markets the Company's products are sold in are the communications, computing, consumer and industrial markets.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Fiscal Year

The Company has a 52-to-53-week fiscal year that ends on the last Saturday of June. Accordingly, every sixth or seventh year will be a 53-week fiscal year. Fiscal year 2007 is a 53-week fiscal year. Fiscal years 2006 and 2005 were 52-week fiscal years.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Such estimates relate to the useful lives and fair value of fixed assets, valuation allowance for deferred tax assets, reserves relating to income tax audits, allowances for doubtful accounts, customer returns and allowances, inventory valuation, reserves relating to litigation matters, accrued liabilities and reserves and assumptions related to the calculation of stock-based compensation. The Company bases its estimates and judgments on its historical experience, knowledge of current conditions and its beliefs of what could occur in the future given available information. Actual results may differ from those estimates, and such differences may be material to the financial statements.

Basis of Presentation

The consolidated financial statements include the accounts of the Company and all of its majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. The condition for control of entities is the ownership of a majority voting interest and ability to otherwise exercise control over the entity.

Cash Equivalents and Short-term Investments

The Company considers all highly liquid debt instruments purchased with an original maturity of three months or less at the date of purchase to be cash equivalents. Cash and cash equivalents consist of demand accounts, government securities, and money market funds. Short-term investments consist primarily of U.S. Treasury and Federal Agency debt securities with original maturities beyond three months at the date of purchase.

The Company's cash equivalents and short-term investments are considered available-for-sale. Such securities are carried at fair market value based on market quotes. Unrealized gains and losses, net of tax, on securities in this category are reported as a separate component of stockholders' equity. Realized gains and losses on sales of investment securities are determined based on the specific identification method and are included in Interest income and other, net in the Consolidated Statements of Income.

Derivative Instruments

The Company transacts business in various non-U.S. currencies, primarily the Japanese Yen, British Pound, and the Euro. The Company is exposed to fluctuations in foreign currency exchange rates on accounts receivable from sales

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

in these foreign currencies and the net monetary assets and liabilities of the related foreign subsidiary. The Company has established risk management strategies designed to reduce the impact of reductions in value and volatility of future cash flows caused by changes in these exchange rates. These strategies reduce, but do not always entirely eliminate, the impact of currency exchange movements. We also incur expenses in Philippine Peso and Thailand Baht related to our testing facility at those locations. We have not hedged these exposures as of June 30, 2007.

The Company uses currency forward contracts to hedge exposure to variability in anticipated non-U.S.-dollar-denominated cash flows. These contracts are designated as cash flow hedges and recorded on the Consolidated Balance Sheets at their fair market value. The maturities of these instruments are generally less than 6 months. The Company had forward contracts to sell foreign currencies with a U.S. dollar equivalent of \$58.8 million and \$76.6 million at June 30, 2007 and June 24, 2006, respectively. For these derivatives, the effective portion of the gain or loss is reported as a component of accumulated other comprehensive income (loss) in stockholders' equity and is reclassified into earnings in the same period or periods in which the hedged transaction affects earnings. The ineffective portion of the gain or loss on the derivative in excess of the cumulative change in the present value of future cash flows of the hedged item, if any, is recognized in earnings during the period of change. The ineffective portion of the gains and losses on the derivatives has been immaterial in all periods presented. The net value of all contracts which hedge transactions that have affected earnings is classified within current assets. For contracts which hedge transactions that have not affected earnings (primarily backlog), a net gain is classified within current assets and a net loss is classified within current liabilities.

For currency forward contracts, effectiveness of the hedge is measured using forward rates to value the forward contract and the underlying hedged transaction. Any ineffective portions of the hedge, as well as amounts not included in the assessment of effectiveness, are recognized currently in Interest and other income, net in the Consolidated Statements of Income. If a cash flow hedge were to be discontinued because it is probable that the original hedged transaction will not occur as anticipated, the unrealized gains or losses would be reclassified into earnings. Subsequent gains or losses on the related derivative instrument would be recognized in earnings in each period until the instrument matures, is terminated or is sold. In fiscal years 2007 and 2006, no cash flow hedges were discontinued as a result of forecasted transactions that did not occur. Fair value of the contracts is determined by reference to liquidation value.

Fair Value of Financial Instruments

The Company's financial instruments consist principally of cash and cash equivalents, short-term investments, accounts receivable, accounts payable and other current liabilities. The fair value of the Company's financial instruments approximate carrying values due to their short-term nature.

Inventories

Inventories are stated at the lower of standard cost, which approximates actual cost on a first-in-first-out basis, or market value. Because of the cyclical nature of the market, inventory levels, obsolescence of technology, and product life cycles, the Company generally writes down inventories to net realizable value based on forecasted product demand.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Depreciation is primarily computed on the straight-line method over the estimated useful lives of the assets, which range from 2 to 15 years for machinery and equipment and up to 40 years for buildings and building improvements. Leasehold improvements are amortized over the lesser of their useful lives or the remaining term of the related lease. When assets are retired or otherwise disposed of, the cost and accumulated depreciation or amortization is removed from the accounts and any resulting gain or loss is reflected in operating expense in the Consolidated Statements of Income in the period recognized.

The Company evaluates the recoverability of property, plant and equipment in accordance with Statement of Financial Accounting Standards (SFAS) No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. The Company performs periodic reviews to determine whether facts and circumstances exist that would indicate that the carrying amounts of property, plant and equipment exceeds their fair values. If facts and circumstances indicate that the carrying amount of property, plant and equipment might not be fully recoverable, projected undiscounted net cash flows associated with the related asset or group of assets over their estimated remaining useful lives are compared against

their respective carrying amounts. In the event that the projected undiscounted cash flows are not sufficient to recover the carrying value of the assets, the assets are written down to their estimated fair values. All long-lived assets to be disposed of are reported at the lower of carrying amount or fair market value, less expected selling costs.

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Income Taxes

The Company accounts for income taxes using an asset and liability approach as prescribed in SFAS No. 109, *Accounting for Income Taxes*. The Company records the amount of taxes payable or refundable for the current year and deferred tax assets and liabilities for the future tax consequences of events that have been recognized in the Company's financial statements or tax returns. A valuation allowance is recorded to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized.

Revenue Recognition

The Company recognizes revenue for sales to direct customers and sales to international distributors upon shipment, provided that persuasive evidence of a sales arrangement exists, the price is fixed or determinable, risk of loss has transferred, collectability of the resulting receivable is reasonably assured, there are no customer acceptance requirements and the Company does not have any significant post-shipment obligations. The Company estimates returns for sales to direct customers and international distributors based on historical returns rates applied against current period gross revenues. Specific customer returns and allowances are considered in this estimate.

Sales to certain U.S. distributors are made pursuant to agreements allowing for the possibility of certain sales price rebates and for non-warranty product return privileges. The non-warranty product return privileges include allowing certain U.S. distributors to return a small portion of the Company's products in their inventory based on their previous 90 days of purchases. Given the uncertainties associated with the levels of non-warranty product returns and sales price rebates that could be issued to U.S. distributors, the Company defers recognition of such revenue and related cost of goods sold until the product is sold by the U.S. distributors to their end customers. Accounts receivable from direct customers, domestic distributors and international distributors are recognized and inventory is relieved upon shipment as title to inventories generally transfers upon shipment at which point the Company has a legally enforceable right to collection under normal terms. Accounts receivable related to consigned inventory is recognized when the customer takes possession of such inventory from its consigned location at which point inventory is relieved, title transfers, and the Company has a legally enforceable right to collection under the terms of our agreement with the related customers.

The Company makes estimates of potential future returns and sales allowances related to current period product revenue. Management analyzes historical returns, changes in customer demand, and acceptance of products when evaluating the adequacy of returns and sales allowances. Estimates made by the Company may differ from actual returns and sales allowances. These differences may materially impact reported revenue and amounts ultimately collected on accounts receivable. In addition, the Company monitors collectability of accounts receivable primarily through review of the accounts receivable aging. When facts and circumstances indicate the collection of specific amounts or from specific customers is at risk, the Company assesses the impact on amounts recorded for bad debts and, if necessary, will record a charge in the period such determination is made. At June 30, 2007 and June 24, 2006, the Company had \$12.4 million and \$14.1 million accrued for returns and allowances, respectively. During fiscal years 2007 and 2006, the Company recorded \$79.2 million and \$86.3 million for estimated returns and allowances against revenues, respectively. These amounts were offset by \$80.9 million and \$78.7 million actual returns and allowances given during fiscal years 2007 and 2006, respectively.

Research and Development Costs

Research and development costs are expensed as incurred. Such costs consist of expenditures for labor and benefits, masks, prototype wafers and depreciation.

Other Liabilities

Included in other liabilities on the Consolidated Balance Sheet at June 30, 2007 and June 24, 2006 were \$14.1 million and \$16.7 million of deferred license revenues, respectively. See Note 15 in these Notes to Consolidated Financial Statements for additional amounts accrued in other liabilities at June 30, 2007.

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Advertising

Advertising costs are expensed as incurred and included in selling, general and administrative expenses in the Consolidated Statements of Income. Advertising expenses were \$9.2 million, \$9.3 million, and \$11.3 million in fiscal years 2007, 2006, and 2005, respectively.

Shipping Costs

Shipping costs billed to customers are included in net revenues and the related shipping costs are included in cost of goods sold.

Foreign Currency Translation and Remeasurement

The U.S. dollar is the functional currency for the Company's foreign operations. Using the U.S. dollar as the functional currency, monetary assets and liabilities are remeasured at the year-end exchange rates. Certain non-monetary assets and liabilities are remeasured using historical rates. Statements of Income are remeasured at the average exchange rates during the year.

Stock-Based Compensation

Prior to June 26, 2005, the Company previously applied Accounting Principles Board (APB) APB Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and its related interpretations and had adopted the disclosure-only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS 123) and SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure an Amendment of FASB Statement No. 123* (SFAS 148). In accordance with APB 25, a non-cash, stock-based compensation expense was recognized for any options for which the exercise price was below the market price on the actual grant date. The charge for the options with an exercise price below the market price on the actual grant date was equal to the number of options multiplied by the difference between the exercise price and the market price of the option shares on the actual grant date. That expense was amortized over the vesting period of the option.

Effective June 26, 2005, the Company adopted the fair value recognition provision of SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS 123(R)), which requires the recognition of the fair value of stock-based compensation for all stock-based payment awards, including grants of stock options and other awards made to the Company's employees and directors in exchange for services, in the income statement. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. Accordingly, stock-based compensation cost is measured at grant date, based on the fair value of the awards ultimately expected to vest and is recognized as an expense, on a straight-line basis, over the requisite service period. The Company uses the Black-Scholes valuation model to measure the fair value of its stock-based awards utilizing various assumptions with respect to expected holding period, risk-free interest rates, stock price volatility, dividend yield and forfeiture rates.

The Company adopted SFAS 123(R) using the modified prospective method, and, accordingly, financial statements for prior periods have not been restated to reflect the effect of SFAS 123(R). The Company records compensation costs as the requisite service is rendered for the unvested portion of previously issued awards that remain outstanding at the initial date of adoption and any awards issued, modified, repurchased, or cancelled after the effective date of SFAS 123(R). Upon the adoption of SFAS 123(R) on June 26, 2005, the deferred stock-based compensation balance of \$166.7 million was reclassified into additional paid-in capital, reflecting the cumulative effect of adopting SFAS 123(R). The Company also recognized a cumulative effect of change in accounting principle of \$1.6 million, net of tax, on June 26, 2005 related to previously recognized compensation cost of unvested awards that are not expected to vest based on the Company's estimate of forfeitures as of the date of adoption of SFAS 123(R). Previously, under APB 25, the Company had accounted for actual forfeitures as they occurred.

401(k) Retirement Plan

The Company sponsors a 401(k) retirement plan (401(k) Plan) through Fidelity Investments, under which full-time U.S. employees may contribute, on a pretax basis, between 1% and 20% of their total annual income from the Company, subject to a maximum aggregate annual contribution imposed by the Internal Revenue Code. The administration expense charged by Fidelity Investments, which the Company pays, was immaterial for fiscal years 2007, 2006 and 2005, respectively. Company contributions to the 401(k) Plan were \$0.8 million, \$0.7 million, and

\$0.5 million in fiscal years 2007, 2006 and 2005, respectively.

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Earnings Per Share

Basic earnings per share are computed using the weighted average number of common shares outstanding during the period. Diluted earnings per share incorporate the incremental shares issuable upon the assumed exercise of stock options and restricted stock units. The number of incremental shares from the assumed issuance of stock options is calculated applying the treasury stock method. See Note 4 Earnings Per Share of these Notes to Consolidated Financial Statements.

Litigation and Contingencies

From time to time, the Company receives notices that its products or manufacturing processes may be infringing the patent or intellectual property rights of others, notices of stockholder litigation or other lawsuits or claims against the Company. The Company periodically assesses each matter in order to determine if a contingent liability in accordance with SFAS No. 5, *Accounting for Contingencies* (SFAS 5), should be recorded. In making this determination, management may, depending on the nature of the matter, consult with internal and external legal counsel and technical experts. The Company expenses legal fees associated with consultations and defense of lawsuits as incurred. Based on the information obtained combined with management's judgment regarding all the facts and circumstances of each matter, the Company determines whether a contingent loss is probable and whether the amount of such loss can be estimated. Should a loss be probable and estimable, the Company records a contingent loss in accordance with SFAS 5. In determining the amount of a contingent loss, the Company takes into consideration advice received from experts in the specific matter, current status of legal proceedings, settlement negotiations which may be ongoing, prior case history and other factors. Should the judgments and estimates made by management be incorrect, the Company may need to record additional contingent losses that could materially adversely impact its results of operations. Alternatively, if the judgments and estimates made by management are incorrect and a particular contingent loss does not occur, the contingent loss recorded would be reversed thereby favorably impacting the Company's results of operations.

Pursuant to the Company's charter documents and indemnification agreements, the Company has certain indemnification obligations to its officers, directors, and certain former officers and directors. Pursuant to such obligations, the Company has incurred substantial expenses related to legal fees and expenses for certain former officers of the Company who are subject to pending civil charges by the SEC and other governmental agencies in connection with Maxim's historical stock option granting practices. The Company has also incurred substantial expenses related to legal fees and expenses advanced to certain current and former officers and directors who are defendants in the civil actions described above. The Company expenses such amounts as incurred.

Product Warranty

The Company warrants its products to its customers generally for one year from the date of shipment, but in certain cases for longer periods. In certain other cases, the Company's product warranty may include significant financial responsibility beyond the cost of replacing the product. If there is a material increase in the rate of customer claims or the Company's estimates of probable losses relating to specifically identified warranty exposures are inaccurate, the Company may record a charge against future cost of sales. Warranty expense has historically been immaterial to the Company's financial statements.

Self-Insurance Accruals

The Company is self-insured with respect to defective product claims, employment practice claims, property and casualty and general liability. The Company's workers' compensation insurance has a \$1.0 million deductible per case. Accruals are primarily based on the actuarially estimated, undiscounted cost of claims, which includes incurred-but-not-reported claims. Amounts accrued for defective product claims, employment practice claims, workers' compensation claims, property and casualty and general liability of \$14.5 million and \$11.7 million are included in accrued expenses as of June 30, 2007 and June 24, 2006, respectively.

In addition to the above, the Company is primarily self-insured with respect to healthcare benefits for most of its domestic employees. Accruals are primarily based on estimated incurred-but-not-reported claims. Amounts accrued for employee healthcare claims are included in accrued salary and related expenses and were not material as of June 30, 2007 and June 24, 2006, respectively.

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Post-employment Benefits

Post-employment benefits accrued for health benefits provided to former employees are accounted for under SFAS No. 112, *Employer's Accounting for Post-employment Benefits* (SFAS 112). A liability for post-employment benefits is recorded when payment is probable and the amount is reasonably estimable.

Concentration of Credit Risk

Due to the Company's credit evaluation and collection process, bad debt expenses have not been significant. Credit risk with respect to trade receivables is limited because a large number of geographically diverse customers make up the Company's customer base, thus spreading the credit risk. While a significant portion of the Company's revenues is made through domestic and international distributors, no single customer has accounted for more than 10% of net revenues in the last three fiscal years.

The Company maintains cash, cash equivalents, and short-term investments with various high credit quality financial institutions, limits the amount of credit exposure to any one financial institution or instrument, and is exposed to credit risk in the event of default by these institutions to the extent of amounts recorded at the balance sheet date. To date, the Company has not incurred losses related to these investments.

Concentration of Other Risks

The semiconductor industry is characterized by rapid technological change, competitive pricing pressures, and cyclical market patterns. The Company's results of operations are affected by a wide variety of factors, including general economic conditions, both in the United States and abroad; economic conditions specific to the semiconductor industry and to the analog and mixed signal portion of that industry; demand for the Company's products; the timely introduction of new products; implementation of new manufacturing technologies; manufacturing capacity; the ability to manufacture efficiently; the availability of materials, supplies, machinery and equipment; competition; the ability to safeguard patents and intellectual property in a rapidly evolving market; and reliance on assembly and, to a small extent, wafer fabrication subcontractors and on independent distributors and sales representatives. As a result, the Company may experience substantial period-to-period fluctuations in future operating results due to the factors mentioned above or other factors.

Recently Issued Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109* (FIN 48), which prescribes comprehensive guidelines for recognizing, measuring, presenting and disclosing in the financial statements tax positions taken or expected to be taken on tax returns. FIN 48, effective for fiscal years beginning after December 15, 2006, seeks to reduce the diversity in practice associated with certain aspects of the recognition and measurement related to accounting for income taxes. The Company adopted the provisions of FASB Interpretation No. 48 on July 1, 2007 and applied the provisions of FIN 48 to all income tax positions. The cumulative effect of applying FIN 48 is expected to result in a \$9.4 million and \$19.2 million decrease in retained earnings and additional-paid-in-capital, respectively, at the beginning of fiscal year 2008.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with GAAP, and expands disclosures about fair value measurements. The statement clarifies that the exchange price is the price in an orderly transaction between market participants to sell an asset or transfer a liability at the measurement date. The statement emphasizes that fair value is a market-based measurement and not an entity-specific measurement. It also establishes a fair value hierarchy used in fair value measurements and expands the required disclosures of assets and liabilities measured at fair value. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company does not believe the adoption of SFAS 157 will have a material impact on its consolidated financial condition, results of operations or liquidity.

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other*

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Postretirement Plans (SFAS 158). SFAS 158 amends SFAS No. 87, *Employers' Accounting for Pensions*, SFAS No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, SFAS No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, and SFAS No. 132 (revised 2003), *Employers' Disclosures about Pensions and Other Postretirement Benefits*. SFAS 158 requires employers to recognize in the statement of financial position an asset for a plan's overfunded status or a liability for a plan's underfunded status. It also requires employers to measure plan assets and obligations that determine the funded status as of the end of the fiscal year. Lastly, employers are required to recognize changes in the funded status of a defined benefit postretirement plan in the year that the changes occur with the changes reported in comprehensive income. SFAS 158 is required to be adopted by entities with fiscal years ending after December 15, 2006. The adoption of SFAS 158 in fiscal year 2007 did not have a material impact on the Company's consolidated financial condition, results of operations or liquidity.

In September 2006, the SEC released Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108), which addresses how uncorrected errors in previous years should be considered when quantifying errors in current year financial statements. SAB 108 requires registrants to consider the effect of all carry over and reversing effects of prior-year misstatements when quantifying errors in current year financial statements. SAB 108 does not change the SEC staff's previous guidance on evaluating the materiality of errors. It allows registrants to record the effects of adopting SAB 108 guidance as a cumulative-effect adjustment to retained earnings. This adjustment must be reported in the annual financial statements of the first fiscal year ending after November 15, 2006. The adoption of this standard did not have a material impact on the Company's consolidated financial condition, results of operations or liquidity.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. The Company is required to adopt the provisions of SFAS 159 as of the beginning of the fiscal year that begins after November 15, 2007, although earlier adoption is permitted. The adoption of SFAS 159 is not expected to have a material impact on the Company's consolidated financial position, results of operations or liquidity.

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10, *Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements* (EITF 06-10). EITF 06-10 provides guidance for determining a liability for the post-retirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007, although earlier adoption is permitted. The Company early adopted EITF 06-10 during the three months ended September 29, 2007 and recorded a cumulative effect adjustment as a net reduction to retained earnings of approximately \$14.1 million. No corporate income tax benefit was netted against the charge to retained earnings because the liabilities being accrued are not deductible for corporate income tax purposes.

In June 2007, the FASB ratified Emerging Issues Task Force Issue No. 07-3, *Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities* (EITF 07-3). EITF 07-3 requires nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities to be deferred and capitalized. Such amounts should be recognized as an expense as the related goods are delivered or the related services are performed. Entities should continue to evaluate whether they expect the goods to be delivered or services to be rendered. If an entity does not expect the goods to be delivered or services to be rendered, the capitalized advance payment should be charged to expense. EITF 07-3 applies prospectively for new contractual arrangements entered into in fiscal years beginning after December 15, 2007. Earlier adoption is not permitted. The adoption of EITF 07-3 is not expected to have a material effect on the Company's consolidated financial position or results of operations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51* (SFAS 160). SFAS 160 amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. SFAS 160 improves the relevance, comparability and transparency of financial statements and eliminates diversity in practice that currently exists in accounting for transactions between an entity and noncontrolling interests. This standard is

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

effective for annual periods beginning after December 15, 2008. Earlier adoption is prohibited. The adoption of SFAS 160 is not expected to have a material effect on the Company's consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141(R)) which replaces SFAS No. 141, *Business Combinations*. SFAS 141(R) requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction; establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. This standard is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company is currently evaluating the impact of adopting SFAS 141(R) on the Company's consolidated financial position or results of operations.

In December 2007, the FASB ratified EITF Issue No. 07-1, *Accounting for Collaborative Arrangements* (EITF 07-01). EITF 07-1 provides guidance on the classification, income statement presentation and disclosure associated with collaborative arrangements involving parties considered to be active participants to an activity and are exposed to significant risks and rewards which are dependent on the commercial success of the activity. EITF 07-1 is effective for fiscal years beginning after December 15, 2008. The adoption of EITF 07-01 is not expected to have a material impact on our consolidated financial position, results of operations or cash flows.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities – an amendment of SFAS No. 133* (SFAS 161) which changes the disclosure requirements for derivative instruments and hedging activities. SFAS 161 requires the Company to provide enhanced disclosures about (a) how and why the Company uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and its related interpretations, and (c) how derivative instruments and related hedged items affect our financial position, financial performance and cash flows. These disclosure requirements are effective for fiscal years and interim periods beginning after November 15, 2008. The Company is currently evaluating the impact of adopting SFAS 161 on its consolidated financial position, results of operations and cash flows.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS 162). SFAS 162 identifies the sources of accounting consistent with GAAP. SFAS 162 is effective sixty days following the SEC's approval of the Public Company Accounting Oversight Board's amendments to AU Section 411 on September 16, 2008, *The Meaning of Present fairly in conformity with generally accepted accounting principles* . The Company is currently evaluating the potential impact, if any, of the adoption of SFAS 162 on its consolidated financial statements.

NOTE 3: STOCK-BASED COMPENSATION

The Company adopted SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS 123(R)) in fiscal year 2006. The Company adopted SFAS 123(R) using the modified prospective method, and, accordingly, financial statements for prior periods have not been restated to reflect the effect of SFAS 123(R). The Company records compensation costs as the requisite service is rendered for the unvested portion of previously issued awards that remain outstanding at the initial date of adoption and any awards issued, modified, repurchased, or cancelled after the effective date of SFAS 123(R). In March 2005, the SEC issued SEC SAB No. 107 (SAB 107) relating to SFAS 123(R). The Company has applied SAB 107 in its adoption of SFAS 123(R). In November 2005, the FASB issued FASB Staff Position (FSP) SFAS 123(R)-3, *Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards*. The Company elected to adopt the alternative transition method in its adoption of SFAS 123(R). The Company previously applied APB Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and related interpretations and had adopted the disclosure-only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS 123) and SFAS No. 148, *Accounting for Stock-Based Compensation – Transition and Disclosure – an Amendment of FASB Statement No. 123*.

At June 30, 2007, the Company had five stock option plans and one employee stock participation plan, including the Company's 1996 Stock Incentive Plan (the 1996 Plan), 1993 Officer and Director Stock Option Plan, 1987 Stock Option Plan, 1987 Supplemental Stock Option Plan, 1987 Employee Stock Participation Plan (the ESP Plan), and

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Supplemental Non-employee Stock Option Plan. In November 2005, the stockholders approved amendments to the 1996 Plan (1) to increase the authorized shares by 9.5 million shares (2) to provide the ability to grant awards of restricted stock units and restricted stock and (3) to extend the term of the plan through 2015.

The Company's aggregate stock-based compensation cost for fiscal year 2007 was \$353.8 million after accounting for estimated forfeitures and resulted primarily from awards of stock options and restricted stock units under the Company's 1996 Plan and the extension of terms of certain options and newly granted restricted stock units. Stock-based compensation cost capitalized into inventory was \$15.0 million and \$17.5 million as of June 30, 2007 and June 24, 2006, respectively.

The following table shows total stock-based compensation expense by type of award and resulting tax effect included in the Consolidated Statements of Income for fiscal years 2007, 2006 and 2005:

	For the Year Ended		
	June 30, 2007	June 24, 2006	June 25, 2005
	(In thousands)		
Cost of goods sold			
Stock options	\$ 60,527	\$ 59,096	\$ 24,342
Restricted stock units	19,228	501	
Employee stock purchase plan	1,431	2,543	
	81,186	62,140	24,342
Research and development expense			
Stock options	162,330	119,442	51,435
Restricted stock units	49,727	10,586	
Employee stock purchase plan	4,672	8,299	
	216,729	138,327	51,435
Selling, general and administrative expense			
Stock options	42,474	46,051	14,537
Restricted stock units	11,941	2,353	
Employee stock purchase plan	1,431	2,543	
	55,846	50,947	14,537
Total stock-based compensation expense			
Stock options	265,331	224,589	90,314
Restricted stock units	80,896	13,440	
Employee stock purchase plan	7,534	13,385	
Pre-tax stock-based compensation expense	353,761	251,414	90,314
Less: Income tax effect	121,539	83,391	29,300
Net stock-based compensation expense	\$ 232,222	\$ 168,023	\$ 61,014

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Prior to adopting SFAS 123(R), the Company presented all excess tax benefits resulting from the exercise of stock options as operating cash flows in the Statements of Cash Flows. SFAS 123(R) requires excess tax benefits generated by stock based employee awards to be classified as cash flows from financing activities. Since the Company has adopted the alternative transition method, described in FSP SFAS 123(R)-3, 100% of the realized tax benefits generated by employee awards that were fully vested and outstanding upon the adoption of SFAS 123(R) are treated as excess tax benefits and classified as cash flows from financing activities. Stock based employee awards partially vested upon, or granted after, the adoption of SFAS 123(R) generate excess tax benefits to the extent that realized tax benefits exceed the deferred tax asset and proforma deferred tax asset attributable to such awards. As a result of adopting SFAS 123(R), \$8.2 and \$44.7 million of realized tax benefits for fiscal years ended June 30, 2007 and June 24, 2006, respectively, have been classified as a financing cash inflow.

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Employee Stock Participation Plan (ESPP)

The Company's ESPP, which was previously approved by the Company's stockholders, permits the grant of up to 18.1 million shares. Under the ESPP, the Company offers stock purchase rights to purchase shares of the Company's stock at three to twenty-four month intervals at a price not less than the lesser of 85% of the fair market value of the stock on the date the purchase right is granted or the date the right is exercised. Each offering can be no longer than 27 months. The Company's ESPP does not permit employees to buy more than \$25,000 worth of stock annually.

1996 Stock Incentive Plan

The Company's 1996 Plan, which was previously approved by the Company's stockholders, permits the grant of up to 127.1 million shares. The 1996 Plan provides for the grant of stock options, restricted stock units and restricted stock. To date, the Company has only issued stock options and restricted stock units. The Company initially granted restricted stock units in fiscal year 2006. Under the 1996 Plan, the exercise price for all stock options will not be less than the fair market value of the Company's common stock on the date of grant. Options granted under the 1996 Plan, as well as under the Company's other stock plans described above, generally vest over five years and expire from five to ten years from the date of the grant or such shorter term as may be provided in the agreement.

Restricted Stock Units

Restricted stock units (RSUs) generally vest on a quarterly basis over a service period of 12 to 18 months from the issuance date. The restricted stock units represent a promise by the Company to the employees to issue shares of its common stock in the future, provided the vesting criteria have been satisfied. RSUs granted reduce the total number of shares available to grant under the 1996 Plan by a factor of two. To the extent RSUs are returned back to the 1996 Plan, for example, due to cancellations, such RSUs would increase the number of shares available to grant by a factor of two.

On February 1, 2006, the Company filed with the SEC a tender offer statement allowing employees, excluding officers, to exchange outstanding, vested and unexercised employee stock options, granted under the Company's stock option plans, with an exercise price equal to or greater than \$35 per share for RSUs vesting quarterly in four equal installments over the approximate 12-month period from issuance date at a specified exchange rate derived using the Black-Scholes valuation model. In some cases, employees could elect to exchange vested options for RSUs at a specified exchange rate greater than that derived using the Black-Scholes valuation model and these RSUs will vest quarterly in six equal installments over the approximate 18-month period from issuance date. The restricted stock units represent a promise by the Company to the employees to issue shares of its Common Stock in the future, provided the vesting criteria have been satisfied.

On March 1, 2006, the tender offer expired and approximately 11.8 million vested options were exchanged for approximately 2.4 million RSUs in this program. The Company accounted for the exchange as a modification under the provisions of SFAS 123(R). Incremental stock-based compensation expense resulting from the exchange was \$20.3 million and is being amortized as a charge to earnings over service periods of 12 to 18 months.

Share-Based Compensation and Other Adjustments resulting from the Blackout Period

On September 8, 2006, the SEC was notified that the Company would delay filing its Annual Report on Form 10K for the fiscal year ended June 24, 2006 due September 23, 2006 as a result of the ongoing stock option investigation into the Company's stock option granting practices. As a result of such delay, the Company has suspended the issuance of shares to employees upon exercise of stock options, vesting of restricted stock units or pursuant to planned purchases of stock under the Employee Stock Participation Plan until the Company becomes current with all of its required SEC filings and its registration statements on Form S-8 is declared effective (Blackout Period). The Company instituted multiple programs in an attempt to compensate employees during this period, as described below.

RSU Loan Program

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

In October 2006, the Company offered certain domestic employees an opportunity to receive cash in the form of a non-recourse loan RSU Loan for common stock that they would have otherwise been able to receive in settlement

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for RSUs that vested during the Blackout Period. The program was not offered to executive officers or the Board of Directors. Employees accepting the offer were also entitled to additional shares of common stock if the Company's stock price appreciates (SAR) between the vest date and the settlement date at the end of the Blackout Period. Employees foregoing the loan would receive shares of common stock at the conclusion of the Blackout Period. The Company also offered to cash-settle restricted stock units vesting during the Blackout Period held by foreign employees. These programs were considered a modification of the restricted stock units triggering a change in the classification from equity to a liability instrument for all eligible awards vesting during the Blackout Period. The Company recorded a reclassification from additional paid in capital to accrued salary and related expenses of \$19.4 million on the modification date and incremental compensation expenses of \$2.2 million from the modification. Vesting of eligible awards and changes in stock price will result in additional reclassifications from additional paid in capital to accrued salary and related expenses and additional compensation expenses in periods they occur. The Company recorded \$38.0 million of additional compensation expense in fiscal year 2007. During fiscal year 2007, the Company made cash payments under these programs totaling \$35.2 million. The SAR given to domestic employees accepting the loan offer was valued using a Black-Scholes model. The Company recorded additional compensation of \$7.7 million from SARs issued in the twelve months ended June 30, 2007.

Other Modifications

Employee Stock Participation Plan

As a result of the aforementioned suspension of the issuance of shares under our Form S-8 registration statements, the September 30, 2006 planned stock purchases under the Company's ESPP did not occur and all employee contributions made during the September 30, 2006 purchase period were refunded on or about September 28, 2006. The Company ceased withholdings as no future stock purchases can be made until the Company is current with all of its required SEC filings.

The Company had unrecognized compensation expenses of \$6.2 million at June 24, 2006 related to its ESPP. In addition, the Company began a new offering period on July 3, 2006 for new plan participants with a fair value of \$1.3 million. The Company determined that the contribution refund results in a cancellation of all awards associated with the respective offerings without a concurrent offer to grant a replacement award, which is considered a repurchase for no consideration under SFAS 123(R). Accordingly, the Company recognized compensation expense including the acceleration of all unrecognized compensation expense totaling \$7.5 million in the three months ended September 23, 2006. The weighted average grant date fair value of the ESPP awards was \$10.38 and \$11.99 for fiscal years 2006 and 2005, respectively. At June 30, 2007, a total of 2.2 million shares were reserved and available for issuance under the Company's ESPP. The Company may not begin a new offering period until it becomes current in filing its periodic reports with the SEC.

Extension of Options that Expire after Reaching 10-Year Contractual Term and Cash Settlements of Expired Options

In September 2006, the Company approved the extension of the terms of vested stock options that expire during the blackout as a result of the expiration of the 10-year contractual term. The extension was considered a modification under SFAS 123(R). The incremental compensation expense of the modification was based on the fair value of the option at the modification date after the extension compared to the fair value of the option prior to modification. The Company recognized additional compensation expense totaling \$118.9 million for 8.3 million options in the three months ended September 23, 2006. The stock-based compensation expense adjustment was based on modified vested options held by employees that expired during the period from September 22, 2006 through the end of the Blackout Period.

Extension of Post-Termination Exercise Period

In September 2006, the Company also decided to extend the post-termination exercise period for employees holding vested options granted under the Dallas Semiconductor stock option plans which were assumed by the Company as part of the acquisition of Dallas Semiconductor Corporation, who terminated after September 22, 2006 and whose stock options would expire prior to reaching the 10 year contractual term during the Blackout Period. The extension provided these employees with 90 days to exercise vested options from the end of the Blackout Period. The Company calculated the incremental compensation expense of this modification in accordance with SFAS 123(R) and recognized compensation expense in the quarter ended September 23, 2006 totaling \$0.8 million for 0.2 million options for the extension of the options held by these employees terminating employment during the Blackout Period.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***Valuation Assumptions*

The fair value of awards granted under the Company's 1996 Plan and ESP Plan is estimated on the date of grant using the Black-Scholes valuation model. The Company estimates expected volatility based on market-based implied volatility from traded options on the Company's stock and its historical stock prices. The Company analyzes historical exercise patterns of relatively homogeneous groups of employees to estimate the expected holding period. The risk-free interest rate is based on the U.S. Treasury yield. The Company determines dividend yield by dividing the annualized dividends per share by the quarter's average stock price. The result is analyzed by the Company to decide whether it represents expected future dividend yield. Assumptions are revised as necessary. As required by SFAS 123(R), the Company also estimates forfeitures at the time of grant and makes revisions if the estimate changes or actual differs from those estimates. When estimating forfeitures, the Company considers voluntary termination behaviors as well as trends of actual forfeitures of vested stock options.

The fair value of each award granted in fiscal years 2007, 2006 and 2005 has been estimated at the date of grant using the Black-Scholes option pricing model with the following assumptions (the weighted average assumptions for fiscal year 2005 were used in determining amounts for pro forma disclosures under SFAS 123):

	Stock Option Plan		
	2007	2006	2005
Expected option holding period (in years)	6.2	5.1	4.5
Risk-free interest rate	4.8%	4.3%	3.3%
Stock price volatility	31%	28%	33%
Dividend yield	2.04%	1.22%	0.90%
	ESP Plan		
	2007	2006	2005
Expected option holding period (in years)	n/a	1.1	1.1
Risk-free interest rate	n/a	4.3%	2.5%
Stock price volatility	n/a	29%	33%
Dividend yield	n/a	1.30%	1.00%

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

As required under the disclosure-only provisions of SFAS 123, the reported net income and earnings per share for fiscal year 2005 has been presented to reflect the impact had the Company been required to include the amortization of the Black-Scholes option value as an expense.

	Year Ended June 25, 2005 (In thousands, except per share data)
Net income as reported	\$ 462,277
Add: Total stock-based compensation expense determined under the intrinsic value method, net of tax	59,700

\$45.25 - \$87.06	8,967,618	5.1	49.36	6,132,348	50.21
	87,072,099	5.2	34.01	48,239,426	31.57

During fiscal years 2007 and 2006, the Company received cash of \$25.7 million and \$148.8 million from the exercise of stock options and equity awards. The Company issues new shares upon the exercise of options. During fiscal year 2007, the Company granted approximately 5.0 million stock options from its 1996 Plan with an estimated total grant date fair value of \$45.9 million. The weighted average grant date fair values of stock options granted during fiscal years 2007, 2006 and 2005 were \$9.17, \$11.43 and \$13.03, respectively. The total intrinsic value of options exercised during fiscal years 2007, 2006 and 2005 was \$25.6 million, \$147.4 million and \$192.3 million, respectively. As of June 30, 2007, there was \$238.6 million of total unrecognized compensation costs related to 38.8 million unvested stock options expected to be recognized over a weighted average period of approximately 2.2 years.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The following table summarizes outstanding RSUs at June 30, 2007 and RSU activity during fiscal years 2007 and 2006:

	Outstanding RSU Awards	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (1)
Balance at June 26, 2005			
Awards granted	6,786,463		
Awards released	(562,601)		
Awards cancelled	(148,271)		
Balance at June 24, 2006	6,075,591		
Awards granted	1,982,802		
Awards released	(773,238)		
Awards cancelled	(627,726)		
Balance at June 30, 2007	6,657,429	1.6	\$ 222,424,703
Expected to vest at June 30, 2007	4,346,341	1.5	\$ 145,211,263

(1) Aggregate intrinsic value for RSUs represents the closing price per share of the Company's common stock on June 29, 2007, the last business day preceding the fiscal year end, multiplied by the number of RSUs outstanding, or expected to vest as of June 30, 2007.

The weighted average grant-date fair value of RSUs granted during fiscal years 2007 and 2006 was \$29.54 and \$26.38, respectively. No restricted stock units were granted prior to fiscal year 2006. As of June 30, 2007, there was \$17.4 million of unrecognized compensation cost related to 4.7 million unvested RSUs, not subject to the RSU Loan Program, which is expected to be recognized over a weighted average period of approximately 2.4 years.

NOTE 4: EARNINGS PER SHARE

Basic earnings per share are computed using the weighted average number of common shares outstanding during the period. For purposes of computing basic earnings per share, the weighted average number of outstanding common shares excludes unvested RSUs. Diluted earnings per share incorporates the incremental shares issuable upon the assumed exercise of stock options, assumed vesting of outstanding RSUs and assumed issuance of stock under the ESPP using the treasury stock method. As discussed in Note 3, the Company will cash settle vested RSUs during the Blackout Period. These RSUs are considered liability instruments under SFAS 123(R) and as such are excluded from the diluted earnings per share calculation.

The following table sets forth the computation of basic and diluted earnings per share:

	For the Year Ended		
	June 30, 2007	June 24, 2006	June 25, 2005
Numerator for basic earnings per share and diluted earnings per share			
Net income	\$ 286,227	\$ 387,701	\$ 462,277

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Denominator for basic earnings per share	320,434	323,460	326,239
Effect of dilutive securities:			
Stock options, RSUs, and ESPP	9,449	15,167	16,227
Denominator for diluted earnings per share	329,883	338,627	342,466
Earnings per share:			
Basic	\$ 0.89	\$ 1.20	\$ 1.42
Diluted	\$ 0.87	\$ 1.14	\$ 1.35

Approximately 63.3 million, 34.4 million, and 27.5 million of the Company's stock options were excluded from the calculation of diluted earnings per share for fiscal years 2007, 2006, and 2005, respectively. These options were excluded, as they were antidilutive; however, such options could be dilutive in the future.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE 5: FINANCIAL INSTRUMENTS***Investments*

In accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, the Company recorded a net unrealized loss of \$1.6 million and \$11.7 million on available-for-sale investments at June 30, 2007 and June 24, 2006, respectively. There are 20 investments that are in an unrealized loss position at June 30, 2007. The unrealized loss resulted from an increase in interest rates that occurred during fiscal years 2007 and 2006. The Company believes the unrealized loss is temporary as most of the related available-for-sale investments will be held to maturity resulting in cash flow equal to face value. Fair market values are calculated based upon prevailing market quotes at the end of each fiscal year.

Available-for-sale investments at June 30, 2007 were as follows:

	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
U.S. Treasury securities	\$ 245,470	\$	\$ (1,249)	\$ 244,221
Federal Agency Debt securities	478,448	1	(384)	478,065
Total available-for-sale investments	\$ 723,918	\$ 1	\$ (1,633)	\$ 722,286

The following table shows the gross unrealized losses and fair value of Company's investments with unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at June 30, 2007.

	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(In thousands)					
U.S. Treasury securities	\$	\$	\$ 244,221	\$ (1,249)	\$ 244,221	\$ (1,249)
Federal Agency Debt securities	478,065	(383)			478,065	(383)
	\$ 478,065	\$ (383)	\$ 244,221	\$ (1,249)	\$ 722,286	\$ (1,632)

Available-for-sale investments at June 24, 2006 were as follows:

	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
U.S. Treasury securities	\$ 680,846	\$	\$ (11,102)	\$ 669,744
Federal Agency Debt securities	251,212		(639)	250,573

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Total available-for-sale investments	\$ 932,058	\$	\$ (11,741)	\$ 920,317
--------------------------------------	------------	----	-------------	------------

The Company's interest income and other, net of \$61.3 million, \$46.4 million and \$30.1 million in fiscal years 2007, 2006 and 2005, respectively, includes interest income and amortization and accretion of discounts and premiums, as well as realized gains and losses.

Gross gains and losses realized upon the sale of marketable securities were immaterial during fiscal years 2007, 2006 and 2005, respectively.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The Company's portfolio of marketable securities by contractual maturity is as follows:

	June 30, 2007	June 24, 2006
	(In thousands)	
Due in one year or less	\$ 722,286	\$ 682,164
Due after one year through three years		238,153
Total	\$ 722,286	\$ 920,317

Foreign exchange contracts

At June 30, 2007, and June 24, 2006, the Company held forward exchange contracts, all having maturities of less than six months, to exchange various foreign currencies for U.S. dollars in the amount of \$58.8 million and \$76.6 million, respectively. The table below summarizes, by currency, the notional amounts of the Company's forward exchange contracts and net unrealized gain or loss at the end of fiscal years 2007 and 2006. The net unrealized gain or loss approximates the fair market value of these contracts.

	June 30, 2007		June 24, 2006	
	Notional Amounts	Unrealized Gains (Losses)	Notional Amounts	Unrealized Gains (Losses)
	(In thousands)			
Currency:				
Japanese Yen	\$ 30,961	\$ 424	\$ 48,487	\$ 470
British Pound Sterling	12,667	(222)	11,812	166
Euro	14,057	(203)	15,287	(99)
Swiss Franc	1,140	(19)	1,056	6
	\$ 58,825	\$ (20)	\$ 76,642	\$ 543

The net unrealized gain or loss, if any, is potentially subject to market and credit risk as it represents appreciation (decline) of the hedge position against the spot exchange rates at year-end. The Company attempts to control credit risk through credit approvals and monitoring procedures. The net realized and unrealized gains or losses from hedging foreign currency denominated assets and liabilities were immaterial in fiscal years 2007, 2006 and 2005.

NOTE 6: INVENTORIES

The components of inventories consist of:

	June 30, 2007	June 24, 2006
	(In thousands)	
Raw materials	\$ 24,117	\$ 15,963
Work-in-process	175,746	144,501
Finished goods	62,850	50,431

\$ 262,713 \$ 210,895

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE 7: PROPERTY, PLANT AND EQUIPMENT**

Property, plant and equipment, net consist of:

	June 30, 2007	June 24, 2006
	(In thousands)	
Land	\$ 90,955	\$ 76,596
Buildings and building improvements	367,298	327,877
Machinery and equipment	1,969,353	1,671,552
	2,427,606	2,076,025
Less accumulated depreciation	(996,333)	(911,541)
	\$ 1,431,273	\$ 1,164,484

The Company recorded \$101.0 million, \$85.2 million and \$74.0 million of depreciation expense in fiscal years 2007, 2006 and 2005, respectively.

NOTE 8: IMPAIRMENT OF LONG-LIVED ASSETS

During the fourth quarter of fiscal year 2007, the Company announced it would be transferring certain wafer manufacturing production from its San Jose, California wafer manufacturing facility to Epson's Sakata, Japan facility. In connection with this move, the Company incurred an asset impairment charge of \$10.2 million in the fourth quarter of fiscal year 2007 and in the first quarter of fiscal year 2008 recognized \$2.4 million in severance and benefits costs for employee terminations resulting from this decision. These costs were expensed in cost of goods sold in the Company's consolidated statements of income. The transfer was completed in the second quarter of fiscal year 2008. The Company reached its conclusion regarding the asset impairment after conducting an evaluation of the recoverability of the related manufacturing assets in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. The Company considered projected future undiscounted cash flows, trends and other factors in its assessment of whether impairment conditions exist. The Company also utilized available data in its assessment of fair values for the assets being evaluated for impairment and estimated the fair value of the manufacturing tools after consideration of various factors including prices on tools lists for wafer manufacturing facilities on sale, tools available on the open market at various resellers, availability of tools in the marketplace, configuration of the respective tools and the age of the tools prior to writing down the related manufacturing assets to their estimated fair values.

NOTE 9: OTHER ASSETS

Other assets consist of:

	June 30, 2007	June 24, 2006
	(in thousands)	
Deferred tax assets	\$ 61,027	\$ 36,410
Deposits for property, plant and equipment	17,709	
Other	26,202	33,527
	\$ 104,938	\$ 69,937

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Included in other assets on the Consolidated Balance Sheet at June 30, 2007 was \$4.9 million of intellectual property, net of \$9.1 million of accumulated amortization and adjustments. Amortization expenses and adjustments for the intellectual property were \$1.4 million, \$1.4 million and \$2.7 million for fiscal years 2007, 2006 and 2005, respectively. The gross carrying amount of the intellectual property is \$14.0 million and it is being amortized over ten years, which is its estimated useful life. The intellectual property acquired by the Company is being used to design and develop new products as well as in some products currently in production. As required by SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the Company assesses the recoverability of the intellectual property whenever an indicator of impairment exists. There were no indicators of impairment as of June 30, 2007.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Based on the carrying amount of identified assets recorded at June 30, 2007 and assuming no subsequent impairment of the underlying assets, the future amortization expense are expected to be as follows:

(In thousands)	2008	2009	2010	2011	2012
Intellectual property assets:	\$ 1,400	\$ 1,400	\$ 1,400	\$ 734	\$

Should it be determined in a future period that the projected remaining discounted cash flows attributable to products designed and developed with the acquired intellectual property are less than the net book value represented by the intellectual property, the Company's results of operations could be adversely impacted in the period in which such determination is made.

Also included in other assets in the Consolidated Balance Sheet at June 30, 2007 and June 24, 2006 are loans to employees of approximately \$8.4 million and \$7.5 million, respectively. These loans are collateralized mainly by employees' stock options and RSUs. To the extent such collateral is not sufficient to cover the amounts owed, there is risk of loss to the Company. To date, the Company has not experienced any material losses related to these employee loans. These loans are not made to officers of the Company nor for the purchase or exercise of stock options.

NOTE 10: COMMITMENTS AND CONTINGENCIES*Stock Option Litigation*

Beginning on or about May 22, 2006, several derivative actions were filed against certain current and former executive officers and directors of the Company. These derivative lawsuits were filed in: (1) the U.S. District Court for the Northern District of California, as *In re Maxim Integrated Products, Inc. Derivative Litigation*, Lead Case No. 5:06-cv-03344-JW, which consolidates *McKinney v. Beck, et al.* (Case No. 06-3344) and *Horkay v. Beck, et al.* (Case No. 06-3395), *City of Pontiac Policemen's and Firemen's Retirement System v. Hood, et al.* (Case No. 06-03754) and *Corey v. Gifford, et al.* (Case No. 06-03755); (2) the California Superior Court, Santa Clara County, as *Louisiana Sheriff's Pension & Relief Fund v. Gifford et al.* (Case No. 1-06-CV-065626); and (3) the Delaware Court of Chancery, as *Ryan v. Gifford, et al.* (Case No. Civ 2213-N). The complaints allege, among other things, that certain of the Company's current and former executive officers and directors breached their fiduciary duties to Maxim by engaging in alleged wrongful conduct of back-dating stock options as well as violating Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The Company is named solely as a nominal defendant against whom the plaintiffs seek no recovery.

The parties to the Delaware derivative litigation entered into a stipulated settlement agreement on September 16, 2008, conditioned upon approval of the Delaware Court of Chancery and subject to dismissal of all other pending derivative lawsuits. Currently, there is no trial date scheduled in any of the other actions.

On February 6, 2008, a class action lawsuit was filed in the United States District Court for the Northern District of California against us and our former chief executive officer and former chief financial officer. The complaint alleges that we and certain of our officers and directors violated the federal securities laws by making false and misleading statements and omissions relating to the grants of stock options. The complaint seeks, on behalf of persons who purchased our common stock during the period from April 29, 2003 to January 17, 2008, unspecified damages, interest and costs and expenses, including attorneys' fees and disbursements. The action has been stayed pending completion of the restatement of the Company's consolidated financial statements.

Stock Option Inquiry by Regulatory Authorities

On June 6, 2006, the Company was contacted by the SEC regarding an informal inquiry relating to the Company's past stock options grants and practices. On December 4, 2007, the Company settled the matter with the SEC without admission of any guilt or wrongdoing and without any assessment of penalties against the Company. On June 29, 2006, the Company received a subpoena from the U.S. Attorney for the Northern District of California (U.S. Attorney) requesting documents relating to its stock option grants and practices. The Company cooperated with the U.S. Attorney and was informed that the U.S. Attorney's office does not intend to pursue the matter.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***Other Legal Proceedings*

In the third quarter of fiscal year 2007, we settled ongoing litigation involving trade secret allegations brought by Analog Devices, Inc. (ADI) against us, and certain of our employees, relating to analog to digital converters. Under the terms of the settlement agreement, we paid ADI \$19.0 million in fiscal year 2007, which amount was accrued in the fourth quarter of fiscal year 2006. We also agreed that for a four year period from the date of settlement, we will not develop new standalone analog to digital converters having certain specified resolutions, speeds and purposes. This restriction does not include the use of analog to digital converters when embedded on the same die with a more comprehensive device, system or functionality.

In December 2005, Master Chips bvba (Master Chips), a former distributor of the Company's products in Belgium, filed a demand for arbitration against the Company before the International Court of Arbitration of the International Chamber of Commerce alleging that the Company failed to give adequate advance notice to Master Chips of termination of the distribution agreement under Belgian law and that the Company failed to pay Master Chips commissions on part sales (Case No. 14 123 RCH/JHN). Master Chips sought the recovery of the alleged value of their entire business at the time of termination which they claimed exceeded \$12 million and an unspecified amount for the alleged underpayment of commissions. In response to the arbitration demand, we asserted a claim against Master Chips alleging that we over-paid commissions on part sales. In July 2008, the arbitrator issued a final award awarding Master Chips approximately \$9.1 million on all claims. The Company accrued for this award in fiscal year 2006.

Following the issuance of the partial arbitration award and before the issuance of the final award, in March 2008 the Company filed a petition to vacate the arbitration award in the U.S. District Court for the Northern District of California alleging that the interim award, along with the final award when so issued, should be vacated (C 08-00721 JW). In its answer, Master Chips asserted that the partial award (along with any final award) should not be vacated and filed a cross-petition to confirm the arbitration award. In August 2008, the Court denied the Company's petition to vacate the arbitration award and confirmed the arbitration award.

In addition to the above, we are subject to other legal proceedings and claims that arise in the normal course of our business. The Company does not believe that the ultimate outcome of matters arising in the normal course of business will have a material adverse effect on the financial position of the Company.

Commitments

The Company leases certain of its facilities under various operating leases that expire at various dates through October 2014. The lease agreements generally include renewal provisions and require the Company to pay property taxes, insurance, and maintenance costs.

Future annual minimum lease payments for all leased facilities are as follows:

Fiscal Years	(In thousands)
2008	\$ 6,865
2009	6,189
2010	4,686
2011	4,148
2012	3,607
Thereafter	5,773
	\$ 31,268

Rental expense amounted to approximately \$4.5 million, \$4.2 million, and \$4.6 million in fiscal years 2007, 2006, and 2005.

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Other commitments as of June 30, 2007 totaled approximately \$116.0 million mainly consist of royalty obligations for licensed patents and purchase obligations for plant and equipment and certain materials and supplies.

Potential Tax Liabilities Under Section 409A of the Internal Revenue Code and Other Tax Penalties

As a result of the investigation into its historical stock option granting practices, the Company has determined that a number of its outstanding stock option awards were granted at exercise prices below the fair market value of the Company's stock on the

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

appropriate accounting measurement date. A significant adverse tax consequence is that the re-measured options vesting after December 31, 2004 or options that are materially modified after October 3, 2004 are potentially subject to option holder excise tax under Section 409A of the Internal Revenue Code (and, as applicable, similar excise taxes under state law) (Section 409A). Maxim's option holders who hold options which are determined to have been granted with exercise prices below the fair market value of the underlying shares of common stock on the appropriate measurement date would be subject to taxes, penalties and interest under Section 409A if no action is taken to cure the options from exposure under Section 409A before December 31, 2008. The Company took action in fiscal year 2008 to cure certain options from exposure under Section 409A. There can be no assurance that Maxim's action cured all potential circumstances in which Section 409A would apply. Should it be found that excise taxes under Section 409A apply to option holders subsequent to Maxim's ability to cure the options from exposure to Section 409A, and the Company decides to reimburse option holders for such taxes, its results of operations may be materially adversely affected.

Also as a result of its investigation into equity awards, the Company has determined that certain payroll taxes, interest and penalties apply under various sections of the Internal Revenue Code, various state tax statutes, and tax statutes in various foreign jurisdictions. Maxim has reviewed these potential liabilities and accrued the estimated probable amount of the liability. There can be no assurance that Maxim's accruals covered all potential circumstances in which additional payroll taxes, interest and penalties would apply. Should it be found that additional payroll taxes, interest and penalties would apply, the Company's results of operations may be materially adversely affected.

Indemnifications

The Company indemnifies certain customers, distributors, suppliers, and subcontractors for attorney fees and damages and costs awarded against these parties in certain circumstances in which the Company's products are alleged to infringe third party intellectual property rights, including patents, registered trademarks, or copyrights. The terms of the Company's indemnification obligations are generally perpetual from the effective date of the agreement. In certain cases, there are limits on and exceptions to the Company's potential liability for indemnification relating to intellectual property infringement claims. The Company is required by law in certain jurisdictions to indemnify employees from attorney's fees and claims for damages arising from claims in the course and scope of their employment. The Company also indemnifies its directors and executive officers to the maximum extent permitted under the laws of the State of Delaware. Pursuant to such obligations, the Company has incurred substantial expenses related to legal fees and expenses advanced to certain former officers of the Company who are subject to pending civil charges by the SEC and other governmental agencies in connection with Maxim's historical stock option granting practices. The Company has also incurred substantial expenses related to legal fees and expenses advanced to certain current and former officers and directors who are defendants in the civil actions described above. We expense such amounts as incurred.

NOTE 11: COMPREHENSIVE INCOME

Comprehensive income consists of net income and net unrealized gains (losses) on available-for-sale investments and forward exchange contracts, and deferred income taxes on unrealized exchange gains (losses) on intercompany receivables. The components of comprehensive income and related tax effects were as follows:

	June 30, 2007	For the Year Ended June 24, 2006 (In thousands)	June 25, 2005
Net income	\$ 286,227	\$ 387,701	\$ 462,277
Change in unrealized gains (losses) on investments, net of tax benefit (expense) of \$(3,790) in 2007, \$823 in 2006, and \$691 in 2005	6,432	(1,401)	(361)
Change in unrealized gains (losses) on forward exchange contracts, net of tax benefit (expense) of \$46 in 2007, \$111 in 2006, and \$(423) in 2005	(79)	(188)	795
Deferred tax on unrealized exchange gain (loss) on intercompany receivables	(6,505)		
Total comprehensive income	\$ 286,075	\$ 386,112	\$ 462,711

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Accumulated other comprehensive gains (losses) presented in the Consolidated Balance Sheets at June 30, 2007 and June 24, 2006 consist of net unrealized gains (losses) on available-for-sale investments of \$(0.4) million and \$(6.8) million,

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

respectively, net unrealized gains (losses) on forward exchange contracts of \$0.1 million and \$0.2 million, respectively, net foreign currency translation adjustments of \$(1.5) million and \$(1.5) million, respectively and deferred income tax of \$(6.5) million and \$0.0 million, respectively on unrealized exchange gains related to an intercompany receivable that is of a long-term investment nature.

NOTE 12: INCOME TAXES

The provision for income taxes consisted of the following:

	June 30, 2007	For the Year Ended June 24, 2006 (In thousands)	June 25, 2005
Federal			
Current	\$ 224,026	\$ 243,747	\$ 203,562
Deferred	(108,487)	(68,291)	16,907
State			
Current	9,812	9,305	11,637
Deferred	(3,669)	(2,213)	1,066
Foreign			
Current	5,596	4,119	3,384
Deferred	175	(871)	
	\$ 127,453	\$ 185,796	\$ 236,556

Pretax income from the Company's foreign subsidiaries was approximately \$18.1 million, \$9.6 million and \$14.3 million for the years ended June 30, 2007, June 24, 2006 and June 25, 2005, respectively.

The Company has tax holidays with respect to certain operations in Thailand. The Thailand tax holidays will expire in fiscal year 2012. The impact of the tax holidays on net income was not material for fiscal years 2007, 2006 and 2005.

As of June 30, 2007 the Company's foreign subsidiaries have accumulated undistributed earnings of approximately \$5.9 million that are intended to be indefinitely reinvested outside the U.S. and, accordingly, no provision for U.S. federal and state tax has been made for the distribution of these earnings. At June 30, 2007 the amount of the unrecognized deferred tax liability on the indefinitely reinvested earnings was \$1.5 million

The provision for income taxes differs from the amount computed by applying the statutory rate as follows:

	June 30, 2007	For the Year Ended June 24, 2006	June 25, 2005
Federal statutory rate	35.0%	35.0%	35.0%
State tax, next of federal benefit	0.7	0.7	1.2
General business credits	(1.7)	(0.4)	(0.5)
Export sales benefit	(2.0)	(3.5)	(2.9)
Domestic production deduction benefits	(1.6)	(1.2)	
Stock-based compensation	1.2	1.2	0.2
Other	(0.8)	0.7	0.9

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Income tax rate	30.8%	32.5%	33.9%
-----------------	-------	-------	-------

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The components of the Company's deferred tax assets and liabilities are as follows:

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

	June 30, 2007	June 24, 2006
	(In thousands)	
Deferred tax assets:		
Inventory valuation and reserves	\$ 81,967	\$ 65,463
Distributor related accruals and sales return and allowance accruals	16,384	15,172
Deferred revenue	6,061	7,037
Accrued compensation	46,889	46,740
Stock-based compensation	308,278	205,048
Net operating loss carryovers	2,003	2,930
Tax credit carryovers	36,767	40,520
Impairment charge	5,390	6,054
Other reserves and accruals not currently deductible for tax reporting	17,979	22,021
Other	5,310	5,383
Total deferred tax assets	527,028	416,368
Deferred tax liabilities:		
Fixed assets cost recovery	(170,454)	(155,122)
Other	(10,686)	(4,061)
Net deferred tax assets before valuation allowance	345,888	257,185
Valuation allowance	(36,911)	(41,480)
Net deferred tax assets	\$ 308,977	\$ 215,705

The decrease in the valuation allowance of \$4.6 million in fiscal year 2007 is primarily due to the utilization and recognition of loss and credit carryovers attributable to stock option deductions, the benefit of which was credited to additional paid-in capital when recognized.

The valuation allowance of \$36.9 million is primarily attributable to the tax benefits of income tax deductions realized from the exercise of stock options, and when realized, will be recorded as a credit to additional paid-in-capital.

As of June 30, 2007, the Company has \$31.8 million of state net operating loss carryforwards expiring at various dates between fiscal years 2018 and 2022, \$7.1 million of state credit carryforwards expiring at various dates between fiscal years 2007 and 2026 and \$49.4 million of state credit carryforwards with no expiration date.

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation Number 48, Accounting for Income Tax Uncertainties (FIN 48). FIN 48 clarifies the accounting for income taxes, by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognizing, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. We adopted the provisions of FIN 48 on July 1, 2007 and applied the provisions of FIN 48 to all income tax positions. The cumulative effect of applying FIN 48 was a \$9.4 and \$19.2 million decrease to retained earnings and additional paid in capital, respectively, at the beginning of fiscal year 2008.

The Internal Revenue Service (IRS) is conducting an audit of our fiscal year 2005 and 2006 income tax returns. The IRS has requested information related to our stock option investigation and we will comply with this request and address any issues that are raised in a timely manner. While the Company believes that it has adequately provided for all tax positions, amounts asserted by tax authorities could be greater or less than our accrued position. Accordingly, the Company's provisions on federal, state and foreign tax-related matters to be recorded in the future may change as revised estimates are made or the underlying matters are settled or otherwise resolved.

NOTE 13: SEGMENT INFORMATION

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

The Company operates and tracks its results in one reportable segment. The Company designs, develops, manufactures and markets a broad range of linear and mixed-signal integrated circuits. The Chief Executive Officer has been identified as the Chief Operating Decision Maker as defined by SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information* (SFAS 131).

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Enterprise-wide information is provided in accordance with SFAS 131. Geographical revenue information is based on customers' ship-to location. Long-lived assets consist of property, plant and equipment. Property, plant and equipment information is based on the physical location of the assets at the end of each fiscal year.

Net revenues from unaffiliated customers by geographic region were as follows:

	For the Year Ended		
	June 30, 2007	June 24, 2006	June 25, 2005
	(In thousands)		
United States	\$ 463,106	\$ 417,529	\$ 441,948
China	581,882	505,933	373,890
Japan	194,811	177,984	165,409
Rest of Asia	366,064	376,312	329,305
Europe	360,669	328,369	316,136
Rest of World	42,592	50,818	45,046
	\$ 2,009,124	\$ 1,856,945	\$ 1,671,734

Net long-lived assets by geographic region were as follows:

	June 30, 2007	June 24, 2006
	(In thousands)	
United States	\$ 1,107,743	\$ 908,552
Philippines	204,354	178,502
Rest of World	119,176	77,430
	\$ 1,431,273	\$ 1,164,484

NOTE 14: COMMON STOCK REPURCHASES

From fiscal years 2002 through 2006, the Board of Directors authorized the Company to repurchase up to 53.5 million shares of the Company's common stock from time to time at the discretion of the Company's management. During fiscal years 2006 and 2005, the Company repurchased its common stock approximately 15.6 million and 4.1 million shares, respectively, for \$580.4 million and \$168.5 million, respectively. As of June 24, 2006, approximately 7.8 million shares remained available under the repurchase authorization.

During fiscal year 2007, the Company repurchased approximately 2.1 million shares of its common stock for \$60.8 million. As of June 30, 2007 approximately 5.7 million shares remained available for repurchase under the repurchase authorizations, which have no expiration date. In connection with the stock options investigation, the Company suspended repurchases of stock under this program as of September 23, 2006.

NOTE 15: BENEFITS

The Company and its former CEO, Mr. Gifford, have entered into a deferred compensation plan, pursuant to which the Mr. Gifford deferred receipt of a portion of his cash compensation. Deferred compensation bears interest at a rate equal to the interest rate that employees of the Company are required to pay the Company under the Company's employee loan program (4% in fiscal year 2007). Compensation deferred on or prior to December 31, 2004, including interest, is payable (i) upon the Mr. Gifford's termination as an employee or service provider to the

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-K

Company, in approximately equal quarterly installments over a five-year period, (ii) upon his death, to his designated beneficiary, in a lump sum payment as soon as administratively possible, or (iii) in the event of an unforeseeable emergency. In addition, the Board of Directors of the Company have the discretion to accelerate the distribution of the portion of the Mr. Gifford's account that was earned and vested as of December 31, 2004 with the written consent of Mr. Gifford. In June 2006, the Board of Directors, with Mr. Gifford's consent, authorized the acceleration of the distribution of amounts deferred in the Mr. Gifford's account on December 31, 2004 such that it would be paid in 15 quarterly

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

installments starting on September 21, 2006 through March 18, 2010. Compensation deferred after December 31, 2004, including interest, is payable under the same terms and conditions as compensation deferred on or prior to December 31, 2004, except to the extent that those terms and conditions would cause a violation of Section 409A of the Internal Revenue Code, as supplemented by any guidance issued by the Internal Revenue Service thereunder. Mr. Gifford resigned from the Company on December 31, 2006. He continued his employment with the Company as a part-time strategic advisor until January 26, 2007. During fiscal year 2007, the Company distributed \$25.5 million from his deferred compensation balance to Mr. Gifford. As of June 30, 2007 and June 24, 2006, Mr. Gifford's deferred compensation balances, including interest thereon, totaled \$6.9 million and \$29.6 million, respectively, which is included in accrued salary and related expenses in the Consolidated Balance Sheets.

The Company's former CEO resigned in fiscal year 2007. As part of his resignation, he was provided with certain retirement benefits which included office space, administrative assistance, and health benefits. In accordance with SFAS No. 112, *Employers' Accounting for Postemployment Benefit (SFAS 112)*, the Company recorded a charge for the net present value of these benefits of \$3.1 million in fiscal year 2007. Accrued in other liabilities in the Consolidated Balance Sheet at June 30, 2007 is \$3.0 million for such benefits.

NOTE 16: SUBSEQUENT EVENTS

In September 2007, as a result of changes in NASDAQ regulations, the Company decided to cash settle all options expiring as a result of the expiration of the 10 year contractual term during the Blackout Period (goodwill payment) based a price determined by a formula approved by the Board of Directors. The cash payment is subject to the option holder executing a release of all claims relating to the option. The goodwill payment modification changed the classification of the associated awards from equity to liability instruments. The modification resulted in a reclassification from additional paid in capital to accrued salaries and related expenses of \$126.8 million and incremental compensation expenses of \$27.5 million during the first fiscal quarter of 2008. The Company made goodwill payments totaling \$117.3 million in fiscal 2008.

In October 2007, the Company acquired the storage products business from Vitesse Semiconductor Corporation for approximately \$64.1 million in cash (including direct costs) and agreed to pay up to an additional \$12 million if the acquired business meets certain financial goals through the period ended October 28, 2008.

In January 2008, the Company announced the wind down and eventual closure of its wafer manufacturing facility in Dallas over an 18-month time period and the restructuring of certain businesses including the cancellation of research and development for the handset radio frequency transceiver product line. Restructuring costs associated with these actions will be \$6.2 million over the 18 month time period for severance and benefits for the employees to be terminated. In connection with the closure of the Dallas facility, the Company also reevaluated the useful lives and salvage values of the fixed assets used in the facility based on the new period of intended use. As a result, the Company changed its depreciable lives and salvage values resulting in the recognition of additional depreciation of \$22.6 million in fiscal year 2008.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Maxim Integrated Products, Inc.

Sunnyvale, California

We have audited the accompanying consolidated balance sheets of Maxim Integrated Products, Inc. and subsidiaries (the Company) as of June 30, 2007 and June 24, 2006, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended June 30, 2007. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Maxim Integrated Products Inc. and subsidiaries as of June 30, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended June 30, 2007, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

As discussed in Note 3, on June 26, 2005 the Company adopted the provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of June 30, 2007, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated September 30, 2008 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an adverse opinion on the effectiveness of the Company's internal control over financial reporting.
