Corresponding to the periods beginning on July 1, 2008 and 2007

and ended on September 30, 2008 and 2007

NOTE 1: BASIS OF PRESENTATION OF THE FINANCIAL STATEMENTS

As a consequence of the application of the unifying accounting standards approved by the Comisión Nacional de Valores (C.N.V.), which require that consolidated Financial Statements be presented as established by Technical Resolution No. 21 of the Federación Argentina de Consejos Profesionales de Ciencias Económicas (F.A.C.P.C.E.), the Balance Sheet as of September 30, 2008 and 2007 and the Statements of Operations and the Statements of Cash Flows for the periods ended on those dates were consolidated on a line by line basis with the financial statements of such companies in which it holds a majority of the voting shares (see Note 1.b to the basic financial statements).

The financial statements of the subsidiary companies Inversiones Ganaderas S.A., Futuros y Opciones.Com S.A. and Agropecuaria Cervera S.A. as of September 30, 2008 and 2007 have been used in order to determine line by line consolidation.

Likewise, as the companies Fyo Trading S.A. and Agrology S.A were organized on May 2 and 8, 2008, respectively, their financial statements are only consolidated as of September 30, 2008 and June 30, 2008.

NOTE 3: SIGNIFICANT ACCOUNTING POLICIES

The Financial Statements of the Subsidiary Companies mentioned in Note 2 have been prepared based on accounting principles consistent with those followed by Cresud Sociedad Anónima Comercial, Inmobiliaria, Financiera y Agropecuaria for the preparation of its Financial Statements, as detailed in Note 2 of the basic financial statements.

High relevant valuation and disclosure criteria applied in preparing the financial statements of consolidated companies and not explained in the valuation criteria note of the holding company are as follows:

Valuation criteria - intangible assets

The total price paid for acquiring Agropecuaria Cervera S.A. was allocated to identified individual assets; they include Ps. 22.6 million as concession rights that are booked as intangible assets to these consolidated financial statements.

The amortization of the concession right of Agropecuaria Cervera S.A. is calculated according to its duration, whose remaining time is 30 years.

Valuation criteria - fixed assets

The tree plantations (wood) comprising this account has been valued at cost less respective accumulated depreciation as the Company has no intention to sell it, but use it in the production process.

Its cost was calculated according to a Report on forestry mass increase carried out by a forestry engineer at the request of the preceding shareholders of Agropecuaria Cervera S.A. (ACER).

ACER former board of directors based on such report as well as on owns estimates accepted the value of the tree plantations (wood) in Ps. 4,320,000.

Depreciation for the year was calculated based on the remaining concession term

Other considerations - concessions granted

Among other goods and rights ACER has the concession planning and execution of an integral development project including: biological, economical and social issues on several real estates located in the department of Anta, province of Salta. The company is also duty authorized to perform a significant agricultural, cattle farming and forestry project which was awarded under resolution No. 190/99 and bidding No. 58/98 of the Ministry of Production and Employment.

Such concession was granted for a 35 year term with a postponement option of 29 additional years by ACER.

Among other obligations ACER has to invest Ps. 16 million in agriculture, cattle farming, hydraulic resources, continuing education, forestry development, forest planting, fauna, natural reserve and eco-tourism, and has to pay an annual US\$60,000 cannon to the province of Salta to be paid as from the 20th year as from the commencement of the concession.

On July 2, 2008, a memorandum of understanding was executed by which the concession agreement mentioned in note 13 was renegotiated.

NOTE 7: EXAGRIND S.A. ESTANCIA SAN RAFAEL AGAINST TALI SUMAJ AND OTHER DAMAGES AND LOSSES LAWSUIT

Exagrind S.A. has filed a lawsuit against Inversiones Ganaderas S.A. (IGSA) on claims for damages and losses produced by a fire in Estancia San Rafael, which is close to Tali Sumaj, Province of Catamarca. The fire took place on September 6, 2000.

The estimated amount of the legal action is Ps. 2,914,600 at the date the claim was filed.

Edgar Filing: CRESUD INC - Form 6-K

In turn, IGSA filed an extraordinary appeal with the High Court of the Province of Catamarca, requesting to be given the remainder term to answer the lawsuit as, at the time of revoking the first instance judge decision that postponed the terms to answer until a new notice was dispatched, such period had not yet expired. The management of IGSA is awaiting the decision of the High Court of the Province of Catamarca.

Additionally, in March 2007 -under the request of Exagrind S.A.- the court in charge of the case seized an inhibition of assets. This measure was lifted in June 2007 and a real estate on attachment has been accepted in replacement.

Notes to the Financial Statements

Corresponding to the periods beginning as from July 1, 2008 and 2007

and ended on September 30, 2008 and 2007

NOTE 1: ACCOUNTING STANDARDS

Below is a description of the most relevant accounting standards used by the Company in the preparation of these Financial Statements, which have been applied on a consistent basis from the previous period.

a. Presentation standards

These financial statements are stated in Argentine Pesos (Ps.), and have been prepared in accordance with the disclosure and valuation accounting standards contained in the Technical Resolutions issued by the Federación Argentina de Consejos Profesionales de Ciencias Económicas (F.A.C.P.C.E.), as approved, with resolutions issued by the Consejo Profesional de Ciencias Económicas de la Ciudad Autónoma de Buenos Aires (C.P.C.E.C.A.B.A.) and the Comisión Nacional de Valores (C.N.V.).

b. Unifying of accounting standards

On July 8, 2004, the F.A.C.P.C.E. and the C.P.C.E.C.A.B.A. entered into an agreement with the purpose of unifying technical standards. The latter council issued Resolution CD 93/05 on August 10, 2005 adopting the accounting standards approved by the former including the changes up to April 1, 2005.

The standards referred to above became effective for annual or interim periods financial statements of years started on January 1, 2006. On the other hand, the C.N.V. has adopted the same standards including certain modifications, and has also established their applicability for the years started as from January 1, 2006 as well.

The changes introduced due to the unifying of accounting standards that have generated significant effects on the Company's financial statements are:

In accordance with the new accounting standards, the Company has decided not to recognize the deferred liabilities generated by the adjustment for inflation on fixed assets and other non-monetary assets. Consequently, additional information on this issue is stated in Note 6.

The balance of the Transitory Conversion Differences account has to be shown in the statement of changes in stockholders' equity as from the time the unifying accounting standards became effective.

c. The effects of inflation

The financial statements have been prepared in constant currency units by recognizing the effects of inflation up to August 31, 1995. As from this date and up to December 31, 2001 the restatement of the financial statements has been discontinued due to that period of monetary stability. As from January 1, 2002 and up to March 2003 the effects of inflation were recognized as it was an inflationary period. As from such date, in accordance with Resolution 441 issued on April 8, 2003 by the C.N.V., the Company discontinued the restatement of its financial statements. This criterion does not agree with the terms of Resolution MD 041/2003 of the C.P.C.E.C.A.B.A., by which the restatement of financial

Edgar Filing: CRESUD INC - Form 6-K

statements was discontinued as from October 1, 2003. As of September 30, 2008, this change has not generated any significant effect on the Company's financial statements.

Likewise, as the companies Fyo Trading S.A. and Agrology S.A. were organized on May 2 and 8, 2008, respectively, their financial statements are only consolidated as of September 30, 2008 and June 30, 2008.

2. Acquisitions of equity interests in companies

The acquisitions of companies were booked according to the acquisition method as established by Technical Resolution No. 18. All assets and liabilities acquired from independent third parties were adjusted to reflect their current value.

In such sense, the Company identified assets and liabilities acquired, including intangible assets such as: lease agreements acquired under conditions upper or lower than market; costs of executing lease agreements in effect (the latter being the market cost that the Company avoids to incur for acquiring lease agreement in effect), the value of trademarks acquired, the value of deposits related to the investment in Banco Hipotecario and the intangible value of customer relationships.

This identification process and the respective determination of current values call for complex determinations and significant estimates.

The Company used information contained in valuations carried out by independent experts as primary basis to assign the price paid to plots of land, buildings, shopping malls, inventory and hotels of the acquired companies. The amounts assigned to the rest of assets and liabilities were based on independent valuations or in the Company's own analysis with comparable assets and liabilities.

Notes to the Financial Statements (Continued)**

NOTE 2: (Continued)

The current value of acquired intangible values considers the value of the property as if it were vacant.

As provided by Technical Resolution No. 21, if the value of tangible and intangible assets and liabilities exceeds the price paid, intangible assets acquired are not recognized as they would increase the negative goodwill generated by these acquisitions upon the purchase. If the price paid exceeds the value of identified tangible and intangible assets and liabilities, the surplus is considered to be positive goodwill.

This account includes the increase value paid for the purchase of shares of affiliated and related companies that may be assigned to assets acquired and (positive and negative) goodwill related to the affiliates BrasilAgro and IRSA.

3. Goodwill

Negative goodwill

As provided by Technical Resolution No. 21, the negative goodwill related to the equity interest in the affiliate IRSA has been valued at cost restated as of February 28, 2003 as the case may be, which was calculated as the difference between the value paid for such investment and the current value of the equity interest acquired, the latter being determined as established in note 2.k.2.

IRSA's shares were acquired by means of purchases on the market and converting of bonds into shares and exercising warrants issued by IRSA.

The (negative) goodwill related to acquiring an additional interest in IRSA during the three-month period ended September 30, 2008, resulting from the purchase of shares on the market, has been valued at cost, which was calculated as the difference between the value paid by such investment and the book value of the interest acquired. As to this goodwill, the Company is currently analyzing the book value of assets and liabilities acquired identified as provided by Technical Resolution No. 21, caption 1.3.1.

The amortization of the negative goodwill is recognized over a period equal to the weighted average of the remaining useful life of IRSA's identifiable assets that are subject to depreciation, which ranges from 20 to 29 years or in an accelerated manner, the party proportional to the negative goodwill so long as IRSA carries its identifiable assets. Amortizations have been classified in the account Loss from interests in controlled and related companies in the Statement of Operations.

Positive goodwill

As provided by Technical Resolution No. 21, the positive goodwill related to the equity interest in the affiliates IRSA and BrasilAgro has been valued at cost, which was calculated as the difference between the value paid for such investments and the current value of the equity interests acquired, the latter being determined as established in note 2.k.2. IRSA and BrasilAgro shares were acquired by means purchases on the market.

Table of Contents

**Cresud Sociedad Anónima, Comercial,
Inmobiliaria, Financiera y Agropecuaria
Notes to the Financial Statements (Continued)**

NOTE 2: (Continued)

The positive goodwill has not been amortized as it has an undefined useful life.

Upon refining the useful life, the following factors have been considered: (i) nature and expected life of acquired businesses; (ii) stability and expected life of the respective industry branch; (iii) effects that the obsolescence of products, changes in demand and other economic factors may have on the acquired business; (iv) feasibility of maintaining the required disbursement value to obtain future economic benefits from the acquired business and (v) the control period over the acquired business and legal or contractual provisions that may affect its useful life.

Based on these factors, the Company has estimated that it is not possible to estimate the specific useful life for the positive goodwill related to equity interests in the affiliates IRSA and BrasilAgro generated by applying the acquisition method provided by Technical Resolution No. 18, and it has therefore determined that they shall have an undefined useful life.

As provided by Technical Resolution No. 18, if the Company determines that the goodwill has an undefined useful life, its amortization will not be computed and its recoverable value should be compared at each year-end to verify whether its value has decreased, allocating losses for impairment in value to income for the year in which such losses were determined.

l. Other investments

Investments in debt securities

IRSA's Convertible Notes were valued at quotation value at period-end or year-end

Other investments

The remaining investments correspond to non-listed securities and were valued at their restated cost as of February 28, 2003 (Note 1.c.) or at their cost for acquisitions made after such date.

m. Fixed assets

Purchase value: valued at cost restated applying the coefficients mentioned in Note 1.c., based on the corresponding dates of origin.

Depreciation: calculated by the straight-line method based on the estimated useful lives of the assets as from the month of the fiscal year of addition.

Edgar Filing: CRESUD INC - Form 6-K

Net carrying value: the net carrying value of fixed assets does not exceed their recoverable value at the end of the period or the fiscal year.

Likewise, the common stock account was debited for the face value of repurchased shares and the inflation adjustment of common stock account, for the proportional portion of the adjustment for inflation related to the shares acquired. In turn, the accounts Treasury stock and inflation adjustment of treasury stock account were respectively credited.

p. Paid-in capital

Related Companies Law No. 19,550 Section 33: Increases or decreases of the equity value of investments in IRSA Inversiones y Representaciones S.A. and Cactus Argentina S.A. generated on the basis of changes in their shareholders equity, arising from transactions of shareholders different from the Company and its subsidiaries, were included in this caption as established in captions 9 second part of Technical Resolution 17 of the F.A.C.P.C.E. and Resolution CD 243/01 of the C.P.C.E.C.A.B.A.

Options issued: the value of options issued by the Company, which was determined as provided in note 16, has been allocated to the account Additional Paid-in Capital.

q. Transitory Conversion Differences - Current translation adjustment

These transitory differences result from the exchange differences shown in the conversion of the financial statements of BrasilAgro from Brazilian Reais to Argentine Pesos.

r. Results for the period

Production income has been determined based on quantitative and qualitative changes of stocks subject to the biological transformation process measured from the beginning of the year through the closing date of these financial statements.

Cattle and grain production cost calculated to reflect production income is reflected in Schedule F.2.

Edgar Filing: CRESUD INC - Form 6-K

Cost of sales is calculated by inventory difference and the income for the production of meat, grain and milk is disclosed in the statement of income.

Notes to the Financial Statements (Continued)**

NOTE 2: (Continued)

The adjustment for valuation to the net realization value of grain has been calculated as the difference between the production value at net realization value (NRV) upon harvesting and the value of the same production valued at net realization value (NRV) as of the closing date of these financial statements.

Cattle holding gain is disclosed in a line of the statement of operations and Schedule F and is calculated as stated in Note 2.j.

The results generated by futures and options on the Futures Market are recognized under Holding gain Crops, raw materials and MAT on the statement of operations. The closed positions are recognized as a difference between the exercise price and their close price; and the opens positions at the end of the period, as the difference between their exercise price and the market value price for futures, and as a difference between the premium and the market value premium for options.

The charges for consumption of assets were determined based on the values of such assets.

The rest of income for the year is disclosed at incurred cost.

Financial income segregated into that generated by assets and by liabilities is disclosed in the statement of operations.

s. **Income tax**

The Company has recognized the income tax on the basis of the deferred tax liability method, thus considering temporary differences between registration of assets and liabilities for accounting and tax purposes. The principal temporary differences originate in the valuation of beef cattle and the sale and replacement of fixed assets.

In order to determine deferred assets and liabilities the tax rate expected to be in effect at the temporary of reversal or use has been applied on the temporary differences identified and tax loss carryforwards, considering the laws enacted as of the date of issuance of these financial statements (35%).

Assets and liabilities generated by the application of the deferred tax method have been valued at face value.

t. **Tax on minimum presumed income**

The company determines the tax on minimum presumed income applying the prevailing rate of 1% on computable assets at fiscal year-end. This tax is supplementary to the income tax. The Company's tax liability for each fiscal year will be the higher of these two taxes.

However, if the tax on minimum presumed income exceeds the income tax in any fiscal year, such excess may be computed as payment on account of the income tax that may be payable in any of the following 10 (ten) fiscal years.

Participation and contributions to the Plan are on a voluntary basis. Once the beneficiary (the Participant) has accepted, he will be able to make two types of contributions: a monthly one (based on the salary) and an extraordinary one (based on the annual bonus). The suggested contribution is up to 2.5% of the salary and up to 15% of the annual bonus. On the other hand, the Company contribution will be 200% of the monthly contributions and 300% of the employee's extraordinary contributions.

Funds collected from participants' contributions will initially be sent to an independent financial means especially created for such purpose and placed in Argentina as a Common Investment Fund, which will be approved by the C.N.V. Such funds will be freely redeemed under the requirement of the participants.

The funds arising from the Company contributions will flow to other independent financial means separated from the previous one.

The participants or their successors will have access to 100% of the Program (that is, including Company contributions made in favor of the financial means especially created) under the circumstances that follow:

ordinary retirement in line with the applicable working regulations

total or permanent disability or inability

death.

In case of resignation or discharge without legal justification, the participant will obtain the amounts contributed by the Company only if he has participated in the plan during a minimum term of 5 (five) years, provided certain conditions were complied with.

As of September 30, 2008 the Company had made contributions to the Program that amount Ps. 691,808.

Within such context, Cresud participates together with Carlos Casado (with a 50% interest each) in a stock company organized under the law of the Republic of Paraguay, (the Company) under which Cresud will assume the capacity of advisor under an advisory agreement, for the agricultural, livestock and forestry exploitation of an important rural area in Paraguay (hereinafter the Property) and possibly of up to 100,000 hectares also located in Paraguay, derived from the option exercised by the Company, granted by Carlos Casado S.A. NOTE 21: FINANCIAL CAPITAL MARKET SITUATION

Over the last few months, the financial markets of the main countries in the world have been affected by volatility, illiquidity and lack of credit, hence resulting in a significant drop in international stock exchange indexes and a world economic deceleration started to be surface. In spite of the measures taken by the main countries, the future evolution of international markets is uncertain, affecting in direct form the market value of financial assets, particularly shares, bonds and investment funds.

As regards Argentina, stock markets showed pronounced drops in the prices of public and private securities, as well as a hike in interest rates, country-risk premium and exchange rates. This worsened after closing these financial statements and it is ongoing as of their issuance date.

The Company's Management is in the process of monitoring and constantly evaluating the effects derived from the previously mentioned situations on the Company itself as well as affiliates aiming at adopting in real time those required measures to cushion the effects of the global conjuncture.

As regards the listed price of issued shares, the Company's Management states that such price has also been affected, understanding that such drop does not respond to the its equity situation or the Company's course of business but is an immediate consequence of the process the domestic and international markets are going through.

Business Highlight

Buenos Aires, November 11, 2008 - Cresud S.A.C.I.F. y A. (Nasdaq: CRESY BCBA: CRES), one of the leading agricultural companies in Argentina, announces today its results for the first quarter of Fiscal Year 2009 ended September 30, 2008.

Results for the first quarter of fiscal year 2009 showed a net loss of Ps. 37.4 million compared to a Ps. 12.6 million loss posted the same period of the previous fiscal year. The decrease in net results is mainly explained by the operating losses and interests in Related Companies.

Consolidated sales for the period amounted to Ps. 74.7 million, 95.1% higher than those posted for the same period of the previous fiscal year. Noteworthy in this respect is the increase in crop sales, in excess of 173.6% when compared to the first quarter of fiscal year 2008.

Production revenues amounted to Ps. 14.5 million in the first quarter of fiscal year 2009, 28.3% up from those recorded in the same quarter of the previous fiscal year. This improvement resulted mainly from a Ps. 3.3 million increase in the Crops segment and a Ps. 1.8 million increase in the Milk segment.

Gross profit during the first quarter of fiscal year 2009 amounted to Ps. 10.4 million as compared to the Ps. 1.4 million gross profit posted during the same period of the previous year. This increase mainly results from a higher gross profit from the crops segment, which amounted to Ps. 9.5 million in the first quarter of fiscal year 2009 compared to a loss of Ps. 0.5 million in the same period of the previous fiscal year. The Others segment also contributed to this result, as the gross profit from this segment increased to Ps. 3.1 million in the first quarter of fiscal year 2009 from Ps. 1.4 million in the first quarter of fiscal year 2008.

Operating results for the quarter ended September 30, 2008 showed a Ps. 8.0 million loss compared to a loss of Ps. 7.2 million recorded in the same period of the previous fiscal year. This result is mainly due to an increase in gross profit of Ps. 9.0 million, higher selling expenses of Ps. 4.9 million, an increase of Ps. 2.1 million in administrative expenses, a Ps. 1.6 million reduction in the result from holdings of cattle and a Ps. 1.2 million reduction in adjustment for valuation of crops at net realizable value and forward market sales.

Results from related companies showed a Ps. 34.1 million loss mainly due to the results of our interest in IRSA Inversiones y Representaciones S.A. as of September 30, 2008.

Summary of Operations

Crops

Crops sales for the quarter totaled Ps. 50.8 million, compared to sales for Ps. 18.6 million in the previous fiscal year. The increase in sales is mainly due to the volume of crops sold and higher commodity prices, which amounted to 76,352 tons at an average price per ton of Ps. 670.7 compared to the 37,625 tons sold at an average price of Ps. 508.0 in the same period of the previous fiscal year. The higher sales volume was also favored by the increase in crop production and larger stock of crops at the beginning of the first quarter of fiscal year 2009.

The stock of crops as of the end of the quarter totaled 52,299 tons, 26,321 of which were corn, 13,834 were soybean, 6,131 were wheat, and 6,013 were other crops.

Gross results in the segment for the period ended September 30, 2008 were a Ps. 9.0 million profit, compared to the Ps. 0.5 million loss for the same period of the previous fiscal year.

Business Highlight (Continued)

For the current season we have allocated 104,563 hectares to agriculture, 63,387 of which are leased from third parties and 8,064 are operated under concession. Compared to the same period of the previous fiscal year, we have increased the number of total hectares allocated to agriculture by 44,385.

Beef Cattle

As of September 30, 2008, the Company's cattle stock was 79,788 head, with a total of 128,917 hectares allocated to beef cattle activities.

Beef cattle sales amounted to Ps. 5.7 million for the first quarter of fiscal year 2009, when a total of 1,923 tons were sold, whilst during the first quarter of fiscal year 2008 the tons sold had amounted to 4,669.

The gross result from the beef cattle segment was a Ps. 2.7 million loss and beef cattle production amounted to 830 tons for the first quarter of fiscal year 2009, compared to a Ps. 0.7 million loss yet with a production of 1,249 tons in the same period of the previous fiscal year. The decrease in production volumes was mainly due to scarce rainfall in certain areas, which led us to sell animals prematurely and to relocate cattle in other farms in certain cases, causing delays in the fattening process.

Milk

Milk production increased by 9.0% in the quarter, from 5.0 million liters as of September 30, 2007 to 5.4 million as of September 30, 2008. This increase was mainly due to the higher number of milking cows.

The gross result went down from a profit of Ps. 1.2 million in the first quarter of fiscal year 2008 to a profit of Ps. 1.1 million in the first quarter of fiscal year 2009.

During the first quarter of fiscal year 2008 we had 7,276 cattle head in 3,723 hectares allocated to milk production, whereas in the first quarter of fiscal year 2009 this figure increased to 8,534 head in 4,106 hectares. On average, there are 3,223 milking cows per day, 13.2% higher than for the same period of the previous year.

At present, the Company has three dairy facilities, two in the La Juanita farm and one in El Tigre, a dairy farm equipped with state-of-the-art technology.

Purchase and Sale of Farms

In July 2008, the sales deed was executed for the conveyance of two parcels of land in El Recreo farm (1,829 hectares) located in the Province of Catamarca. The transaction was closed at US\$ 0.36 million, which were paid as follows: US\$ 0.12 million at the time of the sales deed and the balance of US\$ 0.24 million to be paid in two annual and consecutive installments plus interest equivalent to the Libor rate plus 3%.

Following its international expansion strategy, Cresud has entered into a series of agreements aimed at strengthening its position in the South American region. In July 2008, the Company executed various preliminary purchase agreements involving an aggregate surface area of 12,166 hectares located in the Republic of Bolivia for a total of US\$ 28.9 million, 11.8% of which has been already paid. These transactions include:

Preliminary purchase agreement for 4,566 hectares of the Las Londras farm located in the Province of Guarayos. The agreed price was US\$ 11.4 million.

Preliminary purchase agreement for 883 and 2,969 hectares of the San Cayetano and San Rafael farms, respectively, located in the Province of Guayayos. The agreed price was US\$ 8.9 million.

Preliminary purchase agreement for 3,748 hectares of the La Fon Fon farm located in the Province of Obispo Santiesteban. The agreed price was US\$ 8.6 million.

In addition, in September 2008, Cresud executed a preliminary purchase agreement, on an agency basis, for a 50% interest in 41,931 hectares in Paraguay owned by Carlos Casado S.A. for US\$ 5.2 million in order to contribute them in kind to a company organized as a result of the agreements executed with Carlos Casado S.A., with a view to developing the agriculture and forestry businesses in Paraguay. The title deed to this property will be executed during the third quarter of this fiscal year. (see International Expansion).

In September 2008 we signed the deed of conveyance for the purchase of 10,910 hectares of the Estancia Carmen farm, located in the Province of Santa Cruz, adjacent to our 8 de Julio farm. The transaction was agreed for a price of US\$ 0.7 million, which have been fully paid.

After the closing of the first quarter of fiscal year 2009, we executed a preliminary sales agreement without transfer of possession in connection with 1,658 hectares of the Los Pozos establishment located in the Province of Salta. The agreed sales price was US\$ 0.5 million, i.e. US\$ 320.0 per hectare, US\$ 0.3 million of which have been already paid. The balance is payable upon execution of the title deed, scheduled for April 1, 2009.

Development of marginal lands

We consider the potential offered by the sector to lie on the development of marginal areas, where with current state-of-the-art technology, similar yields to those registered in core areas can be obtained with larger profits.

During the first quarter of fiscal 2009, we continued with the development of our Los Pozos farm located in the Province of Salta. As of September 30, 2008, we had approximately 62,000 hectares of prairies sown, 38,800 of which were allocated to beef cattle production. In the first quarter of fiscal year 2009, 389 hectares were used for agricultural production. In turn, we expect to end this fiscal year with approximately 4,200 hectares allocated to agricultural production and 43,000 hectares to beef cattle production.

In addition, in the first quarter of 2009 progress was also made in the development of Agropecuaria Cervera S.A. By the end of fiscal year 2009, we anticipate that approximately 8,000 hectares will be devoted to our own production and that 5,132 hectares will be leased to third parties.

As of September 30, 2008, Cresud held own land reserves amounting to over 217,915 hectares. In addition, we have a concession over 148,788 hectares reserved for future development. We believe that there are technological tools available to improve productivity in these farms and, therefore, achieve appreciation in the long term. However, current or future environmental regulations could prevent us from fully developing our land reserves by requiring that we maintain part of this land as natural woodland not to be used for production purposes.

BrasilAgro will maintain its focus on the agricultural real estate business and will look for new business opportunities that allow it to consolidate a significant property portfolio, as well as the development of its four business lines: sugar cane, grains and cotton, forestry, and livestock.

Cactus Argentina S.A.

Cactus Argentina S.A., our feedlot and packing plant operator in which we hold a 24.0% interest, continued consolidating its growth and playing a major role in our Company's cattle beef production. Cactus Argentina S.A. holds 98.04% of the shares in the Exportaciones Agroindustriales Argentina S.A. Carnes Pampeanas' packing plant.

Cactus Argentina S.A. has thus achieved a vertical integration in the cattle beef industry. The feedlot cattle beef production is processed in the Exportaciones Agroindustriales Argentina S.A. packing plant for the Argentine and export markets. Feedlot cattle beef production with a corn-based diet has been growing at a very dynamic pace. The company has gained market reputation thanks to the uniform final product offered by feedlot-finished animals, which provides purchasers with high-quality products and has succeeded in offering differential sales prices.

During the period ended September 30, 2008, Cactus Argentina S.A. recorded a consolidated gross profit of Ps. 7.0 million, compared to a gross profit of Ps. 5.7 million obtained in the same quarter of the previous fiscal year. However, its net result for the quarter was a loss of Ps. 2.2 million, mainly due to the markdowns resulting from the fall in the international prices of products marketed by the packing plant and the volatility in delivery caused by the local conditions.

With respect to the Argentine beef cattle market, despite the Government intervention, there was a recovery in beef cattle exports compared to the preceding months. Although the prices are lower than the ones recorded in the same period of the previous fiscal year, there was a 178.6% increase in exports (measured in product weight tons) during the July-September 2008 quarter, according to the IPCVA report.

Financial and Capital Market Situation

During the last months, the financial markets of the major countries of the world have been affected by volatility, illiquidity, credit shortage and uncertainty conditions, resulting in a significant decline in the international markets. In addition, an economic slowdown started to be observed around the world. In spite of the actions taken by central countries, the future evolution of the international markets is uncertain, directly affecting the price levels of financial assets, in particular, shares, debt securities and investment funds.

Regarding Argentina, the markets experienced steep drops in the prices of government and corporate securities, as well as an increase in interest rates, country risk index and foreign exchange rates, which worsened after these financial statements closing date and continue in place to date.

The Company is permanently monitoring and assessing the effects caused by the situations above mentioned on the Company itself as well as on its controlled companies, so as to swiftly adopt any measures that may be necessary to cushion the upshot of the global conjuncture.

Concerning the shares quotation prices, the Company's management represents that although the listed price of the Company's shares has also been affected, this fall is not motivated by the Company's actual financial or business condition, but is an immediate consequence of the current process undergone by the national and international markets.

Capital Increase and Exercise of warrants

During March 2008 we completed our capital increase for 180 million shares of Ps.1.0 nominal value and one vote each, in which 100% of the shares offered were subscribed locally and internationally at a subscription price of US\$ 1.60 or Ps.5.0528 per share. In addition, each shareholder received for each share subscribed, without additional cost, one warrant entitling the holder thereof to acquire 0.33333333 new shares at US\$ 1.68 each, i.e. 180 million warrants were granted entitling the holders thereof to purchase an aggregate of 60 million additional shares at the above mentioned price. The warrants expire on May 22, 2015 and are listed on the Buenos Aires Stock Exchange with the symbol CREW2 , and after obtaining the relevant authorizations, they are also listed on Nasdaq with the symbol CRESW .

During the first quarter of fiscal year 2009, certain holders of warrants exercised their right to purchase additional shares. Consequently, the Company issued an aggregate of 4,416 common shares of Ps.1.0 nominal value each, and 13,250 warrants were cancelled. The Company received US\$ 0.007 million as proceeds from these transactions.

As of September 30, 2008, the amount of outstanding warrants was 177.7 million, whereas the capital stock was represented by 501,536,281 common shares.

Repurchase of shares

On August 26, 2008, the Company announced the potential repurchase of its own shares in order to help reduce the drop and lessen the fluctuations of the Company's shares' quotation prices and strengthen their value in the market. There are signs of distortion in the price of shares when considering the Company's financial strength based on the quality of its assets, including the lands of great productive value and appreciation potential, and the productive business developed by Cresud in Argentina and Brazil. Cresud announced that it will use up to Ps.30.0 million for the share repurchase and that it might acquire up to 10.0 million common shares, in the form of shares or ADS (American Depositary Shares), at a price ranging from Ps.3.0 to Ps.3.5 each. After the closing of the quarter, in the light of the market's atypical behavior, the Company has amended certain of the terms and conditions of its plan for repurchase of its own shares:

On October 8, 2008, it was resolved to fix the minimum price at Ps.2.40.

On October 10, 2008 it was resolved to fix the minimum price at Ps.2.13.

On October 23, 2008, the Argentine Securities Commission resolved to temporarily suspend the validity of the cap established in subsection e) of Section 11, Chapter I - Shares and other Negotiable Instruments, which provided that the treasury stock of a Company could not exceed 10% of its capital stock. Following such resolution, the maximum number of shares subject to purchase was increased to up to 30.0 million common shares of stock, in the form of shares or ADS, at a price per share ranging from Ps.1 to Ps.3.5. The minimum price will be adjusted, in turn, based on the changes in the U.S. dollar exchange rate.

During the first quarter of fiscal year 2009, purchases of own shares amounted to 206,020 ADRs and 93,686 common shares, for which the Company paid US\$ 2.2 million and Ps. 0.3 million, respectively. After the closing of the quarter, until November 7, 2008, Cresud had additionally acquired 1,049,654 ADRs and 127,178 common shares for US\$ 6.4 million and Ps.0.3 million, respectively. Therefore, the Company's investment in own shares accounts for 2.55% of its total equity.

International Expansion: Paraguay

In the context of operations that represent a new expansion of Cresud's agricultural and livestock business in South America, in September 2008, the Company entered into several agreements to carry out real estate and agricultural, livestock and forestry activities in the Republic of Paraguay. Under these agreements, a new corporation was organized with Carlos Casado S.A., in which Cresud holds a 50% interest and acts in the capacity as adviser for the agricultural, livestock and forestry development of a rural property and of a potential area of up to 100,000 hectares located in Paraguay to result from the exercise of an option. In turn, Cresud has executed a preliminary purchase agreement for a 50% interest in 41,931 hectares in Paraguay owned by Carlos Casado S.A. for US\$ 5.2 million, in order to contribute them to the new company recently organized. The title deed to this property will be executed during the third quarter of this fiscal year.

Agropecuaria Cervera S.A.

On July 2, 2008, a memorandum of agreement was entered into whereby changes were introduced in certain provisions of the concession agreement for the northern region and the concession agreement for part of the southern region of the properties of Salta Forestal S.A. were renegotiated. Under the above mentioned memorandum of agreement, the concession holder shall pay an annual concession fee in

US\$ equivalent to one soybean quintal per harvested hectare of any crops in the northern and southern regions. The annual concession fee shall be paid until July 1 each year as from 2009. For purposes of determination of the concession fee, the area comprising 2,000 hectares in the southern region has not been taken into consideration, as these hectares are leased to Compañía Argentina de Granos.

In addition, Agropecuaria Cervera S.A. agreed to reduce the area under concession by returning 30,000 hectares, the location of which will be defined in a sketch to be mutually agreed between the parties. On August 29, 2008, the Executive Branch of the Province of Salta passed Decree No. 3,766 whereby it approved the memorandum of agreement. Therefore, its provisions have become effective since that date.

Acquisition of IRSA s shares and consolidation of financial statements

After the closing of the quarter, Cresud acquired 34,396,820 additional shares of IRSA in the market for US\$ 17.4 million. Therefore, the Company s interest in IRSA amounts to approximately 53.70%. As a result, in the next quarter Cresud will consolidate its financial statements with IRSA s.

Financial Debt

As of September 30, 2008 our total loan indebtedness amounted to Ps.106.6 million. Such indebtedness is composed of a loan granted by Credit Suisse for the purpose of financing our investment in BrasilAgro for Ps. 25.3 million and Ps.22.8 million for the purpose of financing our crop production, while the balance, i.e. Ps.69.0 million, is concentrated in the short term.

Type of indebtedness	Currency	Amount (Million Ps.)	Term
Short term	Ps.	69.0	Up to 90 days
Crop production financing	Ps.	22.8	Up to 168 days
Financing of BrasilAgro investment	Ps.	25.3	Up to 30 days

Note: The exchange rate considered for loans denominated in US\$ was US\$ 1= Ps. 3.135, the seller's exchange rate quoted by Banco de la Nación Argentina as of September 30, 2008.

As of September 30, 2008, Cash amounted to Ps. 329.7 (including the Assets items: Cash and Banks and Temporary Investments).

After the closing of the first quarter of fiscal year 2009, the Company repaid its indebtedness incurred with Credit Suisse Internacional (CSI) on its maturity date, May 2, 2006. Therefore, Cresud repaid all amounts owed to CSI, for a principal amount of US\$ 8.0 million. Simultaneously, Cresud received from CSI 1,834,860 GDRs of IRSA, held as collateral for the transaction.

Prospects for the coming quarter

We believe that in the new world scenario, companies such as Cresud, with a long track record and deep knowledge of the business, will have a position favorable to taking advantage of opportunities that may arise in the market. Despite the distortion in the prices of commodities due to the current financial situation, the demand for crops continues to be firm and global stocks remain at low levels.

For the coming quarter, our strategy is to continue developing our production activities. As concerns crops, we have very good prospects regarding the progress in the harvest of wheat and sowing of corn, soybean and sunflower during the next quarter. The status of sown wheat is optimal compared to budget, as 5% of the soybean, 65% of the corn, 67% of the sorghum and 85% of the sunflower have been already sown, all of them under excellent conditions.

As concerns marginal area development, we shall make progress in the development of new hectares for agricultural and livestock production in our Los Pozos farm. In addition, we plan to add more land for agricultural production in the concession over Agropecuaria Cervera's farm.

Continuing with our regional expansion strategy, we are currently analyzing new alternatives in other Latin American countries which have conditions suited to agricultural development. We aim at developing a regional portfolio with major appreciation potential. So that its positioning in the region could be formalized, in the first quarter of fiscal year 2009, the Company entered into a number of agreements that will allow it to conduct business in the real estate, agricultural, livestock and forestry industries in the Republic of Paraguay and executed a series of preliminary purchase agreements for the purchase of an aggregate of 12,166 hectares in the Republic of Bolivia.

Another of the Company's strategies is to continue increasing our investment in IRSA. We believe that IRSA is the best vehicle for accessing the urban real estate market given its substantial and diversified portfolio of residential and commercial properties, the strength of its management and what we believe are its attractive prospects for future growth and profitability.

Faced with the new scenario, Cresud is evaluating various possibilities aimed at preserving the Company's strength and value, which rely on the quality of its assets, including its farms with substantial production value and appreciation potential, and its productive transactions carried out in various regions of Latin America. One of these alternatives, which we are already rolling out, is our plan to repurchase our own shares, whose purpose is to contribute to strengthen our shares in the market.
