b. Comparative Information

Balances items as of June 30, 2008 shown in these unaudited financial statements for comparative purposes arise from audited annual financial statements for the year then ended.

Balances for the six-month period ended December 31, 2008 of income, and cash flows statements are shown for comparative purposes with the same period of the previous fiscal year.

The financial statements as of June 30, 2008 and as of December 31, 2007 originally issued have been subject to certain reclassifications required in order to present these figures comparatively with those stated as of December 31, 2008.

**NOTE 2: CONSIDERATION OF THE EFFECTS OF INFLATION**

The unaudited financial statements have been prepared in constant monetary units, reflecting the overall effects of inflation through August 31, 1995. From that date and until December 31, 2001 the government discontinued the restatement of the financial statements due to a period of monetary stability. From January 1, 2002 up to February 28, 2003 the effects of inflation were recognized due to the existence of an inflationary period. As from that date again, the restatement of the financial statements was discontinued.

This criterion is not in line with current professional accounting standards, which establish that the financial statements should be restated through September 30, 2003.

**IRSA Inversiones y Representaciones Sociedad Anónima**

**and subsidiaries**

**Notes to the Unaudited Consolidated Financial Statements (Continued)**

In thousand of pesos

**NOTE 2:** (Continued)

However, due to the low level of inflation rates during the period from March to September 2003, this deviation has not had a material effect on the consolidated financial statements taken as a whole.

The rate used for restatement of items was the domestic whole revenue price index published by the National Institute of Statistics and Census.

**NOTE 3: SIGNIFICANT ACCOUNTING POLICIES**

The unaudited financial statements of the subsidiaries mentioned in Note 1, have been prepared on a consistent basis with those applied by IRSA Inversiones y Representaciones Sociedad Anónima. The Note 1 to the Unaudited Basic Financial Statements details the most significant accounting policies applied by the Company. Below are the most relevant accounting policies adopted by the subsidiaries, which are not included in that Note.

a. Revenue recognition

In addition to the description in the Unaudited Basic Financial Statements:

Net income for admission rights and rental of stores and stands

Leases with tenants are accounted for as operating leases. Tenants are generally charged a rent, which consists of the higher of (i) a monthly base rent (the Base Rent ) and (ii) a specified percentage of the tenant's monthly gross sales (the Percentage Rent ) (which generally ranges between 4% and 10% of tenant's gross sales).

Furthermore, pursuant to the rent adjustment clause in most leases, the tenant's Base Rent generally increases between 7% and 12% each year during the term of the lease. Minimum rental income is recognized following the accrue method.

Certain lease agreements contain provisions, which provide for rents based on a percentage of sales or based on a percentage of sales volume above a specified threshold. APSA determines the compliance with specific targets and calculates the additional rent on a monthly basis as provided for in the contracts. Thus, these contingent rents are not recognized until the required thresholds are exceeded.

Generally, APSA's lease agreements vary from 36 to 120 months. Law No. 24,808 provides that tenants may rescind commercial lease agreements after the initial nine-months, upon not less than 60 days' written notice, subject to penalties which vary from one to one and a half months rent if the tenant rescinds during the first year of its lease, and one month of rent if the tenant rescinds after the first year of its lease.

**Notes to the Unaudited Consolidated Financial Statements (Continued)**

**NOTE 3:** (Continued)

a. (Continued)

Additionally, APSA monthly charges its tenants administration fees relating to the administration and maintenance of the common area and the administration of contributions made by tenants to finance promotional efforts for the overall shopping centers operations. These fees are prorated among the tenants according to their leases and varies from shopping center to shopping center.

Administration fees are recognized monthly when accrued. In addition to rent, tenants are generally charged admission rights, that tenants may be required to pay upon entering into a lease or upon lease renewal. Admission right is normally paid in one lump sum or in a small number of monthly installments. Admission rights are recognized in earnings using the straight-line method over the life of the respective lease agreements.

Lease agent operations

Fibesa S.A. and Comercializadora Los Altos S.A. (Altocity.com S.A.'s continuing company), companies in which APSA have shares of 99.9999% and 100% respectively, act as the leasing agents for APSA bringing together that company and potential lessees for the retail space available in certain of APSA's shopping centers. Fibesa S.A.'s and Comercializadora Los Altos S.A.'s revenues are derived primarily from collected commissions calculated as a percentage of the final rental income value. Revenues are recognized at the time the transaction is successfully concluded.

Credit card operations Consumer Financing

Revenues derived from credit card transactions consist commissions, financing income, charges to clients for life and disability insurance and for statements of account, among other. Commissions are recognized at the time the merchants' transactions are processed, while the rest financial income is recognized when accrued. Income generated from granting consumer loans mainly includes financial interest which are recognized by the accrued method during the period irrespective of whether collection has or has not been made.

Hotel operations

The Company recognizes revenues from its rooms, catering and restaurant facilities as accrued on the close of each business day.

Net operating results from each business unit are disclosed in Note 4.

b. Intangible assets, net

Intangible assets are carried at cost restated as mentioned in Note 2, less accumulated amortization and corresponding allowances for impairment in value. Included in the Intangible Assets caption are the following:

Trademarks

Trademarks include the expenses and fees related to their registration.

Pre-operating and organization expenses

This item reflects expenses generated by the opening of shopping malls restated as mentioned in Note 2. Those expenses are amortized by the straight-line method in 3 years, beginning as from the date of opening of the shopping center.

Projects Development Expenses

Intangible assets, related to new projects development expenses, have been valued at acquisition cost and they will be amortized during the period in which the Company starts developing the project.

The value of the intangible assets does not exceed their estimated recoverable value at period end.

c. Negative goodwill, net

i) Negative goodwill: Negative goodwill represents the excess of the market value of net assets of the subsidiaries at the percentage of participation acquired over the acquisition cost. Goodwill has been restated following the guidelines mentioned in Note 2 and amortization has been calculated by the straight-line method based on an estimated useful life, that in no case exceed 20 years, considering the weighted-average of the remaining useful life of identifiable assets acquired subject to depreciation.

Includes goodwill originated from the purchase of shares of Emprendimiento Recoleta S.A., Empalme S.A.I.C.F.A y G. ( Empalme ) and Mendoza Plaza Shopping S.A. (through APSA) and Palermo Invest S.A., Alto Palermo S.A and Tyrus S.A.

ii) Goodwill: The goodwill represents the excess of the acquisition cost over the net assets market value of the business acquired to the share percentage.

Includes the goodwill originated by the purchase of shares of Tarshop S.A. and Fibesa S.A (through APSA) and Alto Palermo S.A.

Additionally, also includes goodwill originated from the purchase of net assets of Museo Renault y Della Paolera 265.

Amortizations were calculated through the straight line method on the basis of an estimated useful life considering the weight average of the remaining useful life of the assets acquired.

The residual value of goodwill arising from acquisition of net assets and shares in companies has been shown in the Negative goodwill, net caption. Amortizations were classified in the Amortization of the Negative Goodwill caption of the statement of income.

Values thus obtained do not exceed the respective estimated recoverable values at period/year end.

d. Liabilities in kind related to barter transactions:

Liabilities in kind corresponding to obligations to deliver units to be built are valued considering the cost of the assets received. The Company estimates that this value does exceed the cost of construction of the units to deliver plus additional costs to transfer the assets to the creditor.

Liabilities in kind have been shown in the Trade account payables .

**NOTE 19: LAWSUITS AND CLAIMS IN COURSE**

Provision for unexpired claims against Llao Llao Holding S.A.

The Company Llao Llao Holding S.A. ( LLH ) (in liquidation process following the merger with and into IRSA), predecessor of Llao Llao Resorts S.A. ( LLR ) as operator of the Llao Llao Hotel, was sued in 1997 by the National Parks Administration seeking collection of the unpaid balance of the additional sale price, in Títulos de la deuda externa argentina ( TDE ) amounting to US\$ 2.9 million. A ruling of the court of original jurisdiction sustained the claim. That ruling was appealed, and the Court of Appeals confirmed the judgment of the court of original jurisdiction, demanding payment from the company of US\$ 3.8 million, plus interest accrued through payment, penalties and attorney's fees. In March 2004, LLH paid Ps. 9,156 in cash and TDE.

The plaintiff requested the court of original jurisdiction to initiate an incidental procedure for execution of sentence by performing a settlement through the Ministry of Economy, the procedure having being questioned by the Company. In view of the fact that the information provided was not sufficient to evaluate the amount settled by the Ministry of Economy, it was requested that the execution be suspended until there is a sentence on the complaint recourse filed with the National Supreme Court for the denial of the extraordinary recourse soliciting that the debt be converted to pesos ( pesification ).

On July 2008 the Court of Appeal notified LLR that by means of a resolution dated June 18, 2008 it had confirmed the settlement approved by the court of original jurisdiction.

In accordance with the information provided by the attorneys in respect of this lawsuit, the amount to be recorded by virtue of the Court sentence amounts to Ps.10,173 as of December 31, 2008, such amount being recorded in Other current liabilities Payables to National Parks Administration.

A. IRSA Inversiones y Representaciones Sociedad Anónima

i) Puerto Retiro S.A.

On April 18, 2000, Puerto Retiro S.A (indirect subsidiary of IRSA) was notified of a filing made by the National Government, through the Ministry of Defense, to extend the petition in bankruptcy of Inversora Dársena Norte S.A. (Indarsa) to Puerto Retiro S.A. Concurrently with the complaint, at the request of plaintiff, the bankruptcy court granted an order restraining the ability of Puerto Retiro S.A. to sell or dispose in any manner the acquired real estate property from Tandanor S.A. in June 1993.

Indarsa had acquired 90% of the capital stock of Tandanor S.A. to a formerly estate owned company privatized in 1991, engaged in the shipyard industry.

**NOTE 20:** (Continued)

Indarsa did not comply with the payment of the outstanding price for the acquisition of the stock of Tandanor, and therefore the Ministry of Defense requested the bankruptcy of Indarsa, pursuing to extend the bankruptcy to Puerto Retiro S.A..

The evidence steps of the legal procedures have been completed. Puerto Retiro S.A. appealed the precautionary measure, being the same confirmed by the Court on December 14, 2000. The parties have submitted their claims in due time. The file was passed for the judge to issue a pronouncement, this being a decree adjourning the summoning of decisions to pronouncement in the understanding that there exists pre-judgment in respect of the penal cause filed against ex-officers of the Ministry of Defense and ex-directors of the Company. Consequently, the matter will not be solved until there is final judgment in penal jurisdiction.

The Management and legal advisors of Puerto Retiro S.A. estimate that there are legal and technical issues sufficient to consider that the request for postponement of bankruptcy will be denied by the court. However, taking the circumstances into account and the progress of the legal action, this position cannot be considered final.

ii) Mortgage guaranteed loan Hoteles Argentinos S.A.

In March 2005, Credit Suisse First Boston International ( CSFB ) acquired the debt for US\$ 11.1 million of Hoteles Argentinos ( HASA ), which had been in non-compliance since January 2002. In April 2006 HASA reduced the capital amount payable to US\$ 6.0 million. The balance will accrue LIBO interest rate 6 months plus 7.0% and will be paid off in installments, being the last of US\$ 5.07 million due in March, 2010.

In addition, two credit default swaps were subscribed. One between IRSA and CSFB for 80% of the restructured debt value, and the other one is between Starwood Hotels and Resorts Worldwide Inc. (Starwood) and CSFB for 20% of the restructured debt value. Under these contracts, both companies (IRSA and Starwood) are able to protect CSFB in case of non-compliance with HASA 's obligations. For valuable consideration, IRSA and Starwood will be paid a coupon on a periodical basis. To support the obligations assumed, the Company deposited as guarantee the amount of US\$ 1.2 million.

5. Capital increase and irrevocable contributions in Tarshop S.A.

As a consequence of the international financial context, a high volatility in interest rates and increases in the so-called systemic default has been noted, both having caused a negative impact on the performance and financing of the consumption financing business. The highest default levels provoked an increase in the subordination of financial trusts that, added to the modification of their tax treatment, to the higher interest rate for risk increasing and to certain deceleration of private consumption, generated the need to review the general and specific economic prospects of Tarshop S.A. activities.

To face the increasing volatility of the international financing market and to provide Tarshop S.A. with a capital base in line with the current market conditions, in September 2008 APSA decided to participate in a capital increase of Tarshop S.A. for up to Ps. 60,000 by increasing the Tarshop S.A. shareholding from 80% to 93.4%. Furthermore, during the present quarter, due to the changing general context and following the strategic plan decided upon and implemented by APSA, funds have been provided and they were later accepted as irrevocable contributions for Ps. 105,000 aiming at strengthening the balance sheet position, reinforcing the financial position, paying for operating expenses and repositioning Tarshop S.A. on the market.

Several measures were implemented since then to complement the financial support via the direct advising from APSA's management to Tarshop S.A. aiming at improving the performance of the latter by lightening the point of sale structure that would lead to 17% decrease of the payroll, the reduction of 13 point of sales and centralized areas leased by 10% of the total. The streamlining of resources included areas such as consulting services.

In line with the commercial actions other measures have been implemented, such as:

- (i) Structure redesigning of distribution channels.
- (ii) Changes in cash and financing plans to stores.
- (iii) Renegotiation of terms and conditions with member stores.

It should also be mentioned that the recent modification of the tax treatment for financial trusts and other changes brought by the national government, forces to perform a constant monetary adjustment focusing the positioning strategy of Tarshop S.A. to face the ups and downs of the current situation.

On January 15, 2007 APSA was notified by the National Commission for the Defense of Competitiveness that two claims had been submitted to the entity, one by a private individual and the other one by the licensee of the commercial center in respect of this operation. On February 1, 2007 APSA responded the claims.

On June 26, 2007, APSA was notified of a resolution issued by such agency by which it was resolved to open the summary proceedings under case file No. 501:0491102/2006 of the Registry to the Ministry of Economy and Production styled Grupo IRSA et al in re. infringement to Law No. 25,156 (C 1163) under section 30 Law No. 25,156.

On September 25, 2007, the transfer deed was signed with the Government of the Province of Córdoba for the building in which Centro Comercial Patio Olmos is currently operating. To date, APSA is awaiting that the Province of Córdoba initiates the respective expropriation trial.

It should be noted that the covenants agreed upon by the Province and APSA upon the acquisition established that the use of the portion of the expropriated property was reserved for the Province of Córdoba through the year 2032 for the use of such rehearsal halls.

1. Investment in Banco Hipotecario

Compensation of the National Government to financial entities as a result of the asymmetric pesification

The National Government, through Decree 905, provided for the issuance of National Government Compensating Bonds, to compensate financial entities for the adverse equity effects generated due to the conversion into pesos, under various exchange ratios, of the credits and obligations denominated in foreign currency as established by Law No. 25,561, Decree 214 and addenda, also provided for covering the negative difference in the net position of foreign currency denominated assets and liabilities resulting from its translation into pesos as established by the above-mentioned regulations, and entitled the Argentine Republic Central Bank to determine the pertinent rules.

National Government Compensation Bond coverage - US\$ 2,012 (section 29 point e). Coverage bond difference between assets and liabilities in US dollars net of the compensating bond: US\$ 832.8 million.

On August 1, 2005, a note was submitted to the Argentine Central Bank stating the acceptance of the number of BODEN verified by the Superintendence of Financial and Exchange Entities.

Finally in September 2005 began the subscription of Coverage BODEN 2012. As of December 31, 2008 the subscription of Boden 2012 amounts to US\$ 773.5 million.

**Exposure to the non-financial public sector**

Banco Hipotecario S.A. keeps recorded in its financial statements assets with the Non-Financial Public Sector amounting to Ps. 2,578,000. On the other hand, liabilities to the Argentine Central Banks recorded as of December 31, 2008 amount to Ps. 205,772 being the credit balance related to advances to subscribe BODEN 2012 in line with sections 28 and 29 of Decree 905/02.

The net exposure with the Public Sector, without considering liquid assets in accounts authorized by the Argentine Central Bank, amounts to Ps. 2,372,228 and Ps. 2,648,293 as of December 31, 2008 and 2007, respectively.

Through Communication A 4546 of July 9, 2006, it was established that as from July 1, 2007, such limit was modified to 35%. The exposure of Banco Hipotecario S.A. to the Public Sector originated in compensations granted by the National Government as a result of year 2002 crisis, principally related to the asymmetric pesification of assets and liabilities. To such extent and considering that assets to the Public Sector exceeded the mentioned limit. On January 19, 2006, Banco Hipotecario S.A. reported to the Argentine Central Bank that it will gradually decrease the proportion of assets subject to the exposure to the Public Sector, in line with the amortization and cancellation made by the Government of the bonds received for asymmetric compensation in the currency of issuance. To date, no objections to this issue have been received.

As of December 31, 2008 and 2007 the assistance to the Public Sector arises 21% and 27%, from total Assets, respectively.

For the fiscal year beginning on July 1, 2008 and 2007

and ended December 31, 2008 and 2007

In thousand of pesos

**NOTE 1: ACCOUNTING STANDARDS**

Below are the most relevant accounting standards used by the Company to prepare these financial statements:

1.1. Preparation and presentation of audited financial statements

These unaudited financial statements are stated in Argentine pesos and were prepared in accordance with disclosure and valuation criteria contained in the Technical Resolutions issued by the Federacion Argentina de Consejos Profesionales de Ciencias Economicas, approved with certain amendments by the Consejo Profesional de Ciencias Economicas de La Ciudad Autonoma de Buenos Aires, in accordance with the resolutions issued by the National Securities Commission.

Unification of professional accounting standards

The National Securities Commission has issued General Resolutions No. 485 and 487 on December 29, 2005 and January 26, 2006, respectively.

Such resolutions have adopted, with certain modifications, the new accounting standards recently issued by the Professional Consejo Profesional de Ciencias Economicas de La Ciudad Autonoma de Buenos Aires through its Resolution CD No 93/2005. These standards are to be obligatorily applied for fiscal years or interim periods corresponding to periods started as from January 1, 2006.

The principal change that the application of these new standards has generated relates to the treatment of the adjustment for inflation in calculating the deferred tax which can be taken as a temporary difference, according to the Company's criteria. At present the adjustment for inflation is considered as a permanent difference in the deferred income tax calculation. The Company in accordance with the new accounting standards has decided not to recognize the deferred liability generated by the effect of the adjustment for inflation on the fixed assets and other non-monetary assets. The estimated effect as of the date of the issuance of these unaudited financial statements that the adoption of the new criteria would have generated would be a decrease in shareholders' equity of approximately Ps. 150.8 million which should be recorded in the income statement accounts of previous periods for Ps. 155.5 million (loss) and in the income statement accounts of the fiscal period Ps. 4.7 million (gain).

In accordance with the Company's Management the potential effect that the new accounting standards would have in its subsidiary Banco Hipotecario S.A. would not be significant on the amount of the Company's investment.

The above-mentioned liability would probably turn to the previous position according to the detail that follows:

**IRSA Inversiones y Representaciones Sociedad Anónima****Notes to the unaudited financial statements (Continued)****NOTE 1:** (Continued)

Item	Up to 12 months	From 1 to 2 years	From 2 to 3 years	Over 3 years	Total
Amount in millions	18.8	9.0	8.6	114.4	150.8

1.2. Use of estimates

The preparation of financial statements requires the Company's Management, at a specific date, to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses for the period. The Company's Management makes estimations to calculate, for example, the allowance for doubtful accounts, depreciation and amortization, the impairment of long-lived assets, income taxes, contingencies allowances, fair value of assets purchased of related parties or net assets, the fulfillment of certain conditions for valuation of inventories to its net realizable value and fair value of transaction of exchanges (barter). Future actual results could differ from the estimates and assumptions made at the date of these unaudited financial statements.

1.3. Recognition of the effects of inflation

The unaudited financial statements have been prepared in constant Argentine Pesos, reflecting the overall effects of inflation through August 31, 1995. From that date and until December 31, 2001 the Company discontinued the restatement of the financial statements due to a period of monetary stability. From January 1, 2002 up to February 28, 2003 the effects of inflation were recognized due to the existence of an inflationary period. As from that date, the restatement of the financial statements was discontinued.

This criterion is not in line with current professional accounting standards, which establish that the financial statements should have been restated through September 30, 2003. However, due to the low level of inflation rates during the period from March to September 2003, this deviation has not had a material effect on the financial statements taken as a whole.

The rate used for restatement of items in these financial statements is the domestic wholesale price index published by the National Institute of Statistics and Census.

1.4. Comparative information

Balances items as of June 30, 2008 shown in these unaudited financial statements for comparative purposes arise from audited annual financial statements for the year then ended.

**IRSA Inversiones y Representaciones Sociedad Anónima**

**Notes to the unaudited financial statements (Continued)**

**NOTE 1:** (Continued)

Balances for the six-month period ended December 31, 2008 of the income, shareholder's equity and cash flows statements are shown for comparative purpose with the same period of the previous fiscal year.

1.5. Valuation criteria

a. Cash and banks

Cash on hand has been valued at face value.

b. Foreign currency assets and liabilities

Foreign currency assets and liabilities were valued at each period/year-end exchange rates.

Operations denominated in foreign currency are converted into pesos at the exchange rates in effect at the date of settlement of the operation.

c. Current investments

Current investments in debt securities and mutual funds were valued at their net realizable value.

d. Accounts receivables, net and trade accounts payable

Mortgages, lease receivables and services and trade accounts payable have been valued at the price applicable to spot operations at the time of the transaction plus interest and implicit financial components accrued at the internal rate of return determined at that moment.

e. Financial receivables and payables

Financial receivables and payables have been valued at the amount deposited and collected, respectively, net of operating costs, plus financial results accrued based on the internal rate of return estimated at that time.

f. Other receivables and liabilities

Certain current receivables and liabilities have been valued at face value plus the financial results accrued at the closing of the corresponding period.

Certain receivables and liabilities (deposits in guarantee, and accounts receivable in trust) disclosed under other current and other non-current receivables and liabilities, were valued based on the best estimate of the amount receivable and payable, respectively, discounted at an interest rate that reflect the value-time of money and the estimate specific transaction risks at the time of incorporation to assets and liabilities, respectively.

g. Balances corresponding to financial transactions and sundry receivables and payables with related parties

Receivables and payables with related parties generated by financial transactions and other sundry transactions were valued in accordance with the terms agreed by the parties.

h. Inventories

A property is classified as inventories upon determination by the Board of Directors that the property is to be marketed for sale in the normal course of business over the next several years.

Properties classified as inventories have been valued at acquisition or construction cost restated as mentioned in Note 1.3., or estimated market value, whichever is lower. Costs include land and land improvements, direct construction costs, construction overhead costs, financial costs and real estate taxes.

Inventories on which advance payments that establish price have been received, and the operation's contract terms and conditions assure that the sale will be effectively accomplished and that the income will be realized, are valued at its fair market value. Profits arising from such valuation are shown in the Gain from recognition of inventories at net realizable value caption of the Statements of Income.

Properties held for sale are classified as current or non-current based on the estimated date of sale and the time at which the related receivable is expected to be collected by the Company.

The amount recorded in inventories, net of allowances set up, does not exceed their estimated recoverable value at the end of the period/year.

Credits in kind:

The Company has credits in kinds related to rights to receive certain property units to be built. The units have been valued according to the accounting measuring standards corresponding to inventories receivables and there have been disclosed under Inventories .

i. Non-current investments

Investments in debt securities:

Investments in debt securities were valued based on the best estimate of the discounted amount receivable, applying the corresponding internal rate of return estimated at the time of incorporation to assets, as the Company will hold them to maturity. The value thus obtained does not exceed the respective estimated recoverable value at the end of the period/year.

Investments in subsidiaries and affiliated companies:

Long term investments in subsidiaries and affiliated companies detailed in Exhibit C, have been valued by using the equity method of accounting based on the unaudited financial statements at December 31, 2008 issued by them. The accounting standards used by the subsidiaries to prepare their unaudited financial statements are the same as those used by the Company. The accounting standards used by the related companies to prepare their unaudited financial statements are those currently in effect.

The Financial Statements of Banco Hipotecario S.A. and Banco de Crédito y Securitización S.A. are prepared in accordance with the Central Bank of the Argentine Republic ( BCRA ) standards. For the purpose of the valuation of the investment in the Company, adjustments necessary to adequate the financial statements to the professional accounting standards have been considered.

This item also includes the lower or higher value paid for the purchase of shares in subsidiaries and affiliated companies assignable to the assets acquired, and goodwill related to the subsidiary Alto Palermo S.A., Palermo Invest S.A., Pereiraola S.A.I.C.I.F.y A., Hoteles Argentinos S.A., Rummaala S.A., Manibil S.A., Canteras Natal Crespo S.A., Tyrus S.A. and the related company, Banco Hipotecario S.A.

**Banco Hipotecario S.A.**

The Company has an important investment in Banco Hipotecario S.A. This investment is valued according to the equity method due to the significant influence of the economic group on the decisions of Banco Hipotecario S.A. and to the intention of keeping said investment on a permanent basis.

As of December 31, 2008, the equity method was applied on preliminary figures because as of the time of issuance of these financial statements, Banco Hipotecario S.A. had not yet concluded with the preparation and subsequent approval of its financial statements. In accordance with the regulations of the BCRA and the contracts signed as a result of Banco Hipotecario S.A.'s financial debt restructuring process, there are certain restrictions on the distribution of profits by Banco Hipotecario S.A. to the Company.

**Tyrus S.A.**

Uruguay-based Tyrus S.A. has been classified as not integrated into the Company's operations because it is a company engaged in holding the shares pertaining to the investment in Metropolitan (See Note 21 A.5.) whose operations are carried out fully abroad. The Company does not control foreign operations, which are conducted with autonomy with respect to the Company's own operations. Besides, such operations are mainly financed with funds originating in its own transactions or in local loans.

Given that Tyrus S.A.'s assets and liabilities are located outside Argentina, they were converted into Pesos at the exchange rate in force at the close of the period. The Statement of Income accounts have been converted into Pesos at the exchange rates in force at the time of each transaction. Foreign exchange gains/losses arising from the conversion have been charged to the Shareholders' equity caption, in the line "Temporary translation differences" and they amounted to \$ 9,361 as of December 31, 2008.

The goodwill corresponding to the acquisition of the controlled company Tyrus S.A. has been measured at cost value, which was calculated as the difference between the amount paid for such investment and the book value of the ownership interest acquired. The Company is now following the procedures to analyze the current value of the assets and liabilities acquired for purposes of allocating the purchase value, in conformity with Technical Resolution No. 21.

Certificates of participation in IRSA I financial trust:

The certificates of participation in IRSA I financial trust have been valued at the amount resulting from apportioning the participation certificate holding to the trust assets.

Undeveloped parcels of lands:

The Company acquires undeveloped land in order to provide an adequate and well-located supply for its residential and office building operations. The Company's strategy for land acquisition and development is dictated by specific market conditions where the Company conducts its operations.

Land held for development and sale and improvements are stated at cost restated as mentioned in Note 1.3. or market value, whichever is lower. As of June 30, 2008 the Company maintained allowances for impairment of certain parcels of undeveloped land for which their market value is lower than cost. (See Exhibit E).

Land and land improvements are transferred to inventories or fixed assets when construction commences or their trade is decided.

The values thus obtained, net of the allowances recorded, do not exceed their respective estimated recoverable values at the end of the period.

j. Fixed assets, net

Fixed assets comprise primarily of rental properties and other properties and equipment held for use by the Company.

Fixed assets value, net of allowances set up, does not exceed estimated recoverable value at the end of the period/year.

Rental properties

Rental properties are carried at acquisition and/or construction cost, restated as mentioned in Note 1.3., less accumulated depreciation and allowance for impairment at the end of the period. The Company capitalizes the financial costs accrued costs associated with long-term construction projects. During the period/year ended December 31 and June 30, 2008 financial costs were capitalized in the building known as DIQUE IV for Ps 6,999 and Ps 109, respectively.

Accumulated depreciation is computed under the straight-line method over the estimated useful lives of each asset. Expenditures for ordinary maintenance and repairs are charged to results in the period incurred. The Company has allowances for impairment of certain rental properties as disclosed in Exhibit A. Increases and decreases of such allowances are disclosed in Exhibit E.

Significant renovations and improvements, which improve or extend the useful life of the asset are capitalized and depreciated over its estimated remaining useful life. At the time depreciable assets are retired or otherwise disposed of, the cost and the accumulated depreciation of the assets are eliminated from the accounts and the resulting gain or loss is disclosed in the unaudited statement of income.

**Other properties and equipment**

Other properties and equipment properties are carried at cost, restated as mentioned in Note 1.3., less accumulated depreciation at the end of the period. Accumulated depreciation is computed under the straight-line method over the estimated useful lives of the assets, as specified below:

<b>Assets</b>	<b>Estimated useful life (years)</b>
Leasehold improvements	On contract basis
Furniture and fixtures	10
Vehicles	5
Machinery and equipment	10
Computer equipment	3

The cost of maintenance and repairs is charged to expense as incurred.

The cost of significant renewals and improvements are added to the carrying amount of the respective assets. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts.

k. Intangible assets

Intangible assets correspond to expenses that the Company avoids incurring as a result of acquiring effective rent contracts and the estimated costs of entering into rent contracts acquired (see Note 1.5.1.). These are shown net of their accumulated amortization.

k. (Continued)

Intangible assets are amortized during the average initial remaining useful life of the rent contracts acquired.

The value of these assets does not exceed its estimated recoverable value as of period/year-end.

l. Business combinations

Entities purchased by the Company were recorded in line with the acquisition method set forth in Technical Resolution No. 18. All assets and liabilities acquired to third independent parties were adjusted to show their fair value. In To such extent, the Company identified the assets and liabilities acquired including intangible assets such as:

The estimated current value of the costs that the Company avoids incurring as a result of acquiring effective rent contracts, for which the estimated costs of entering into similar contracts were taken into account as well as other factors such as the geographical location and the size of the area rented. The value of the effective rent contracts is included in intangibles and it is amortized as a rental cost in the remaining initial term of each contract.

The value of the rent contracts acquired, for which the market conditions to the date of acquisition were taken into account as well as other factors including geographical location, size and location of the area rented in the building, profile and credit risk conditions of the lessees to determine if the rental contracts acquired have higher or lesser conditions to those of the market at the time of the acquisition. The current value of the difference between the contracts acquired under the terms of the contracts and the market conditions were taken into account, disclosing an asset or a liability (shown in Other liabilities) depending if the contracts acquired are higher or lesser to the market values.

The values thus determined should be amortized as an increase or decrease of the income for rentals during the remaining term of the respective contracts, including any renewal considered in the valuation. If a lessee terminates its rent contract, the non-amortized portion of the intangible assets will be recorded in the statement of income.

Relationships with clients. The items that the Company considered to assign value to such relationships include the nature and extension of the commercial relationships currently existing with lessees, growth prospects for development of new business, lessee's credit qualities and renewal prospects. The Company has not identified any lessee with whom it has developed a type of relationship allowing the recognition of an intangible asset.

**NOTE 1:** (Continued)

1.5. (Continued)

1. (Continued)

The process of identification and the determination of the price paid is a matter that requires complex judgments and significant estimates.

The Company used the information contained in valuations estimated by independent appraisers as primary base for assigning the price paid for the land and the building acquired. The amounts assigned to all the other assets and liabilities were based on independent valuations or on the Company's own analysis on comparable assets and liabilities. The current value of tangible assets acquired considers the property value as if it was empty.

In accordance with the terms of Technical Resolution 21, the difference between the price paid and the addition of the current values of the net assets acquired generate goodwill. If the value of identified tangible and intangible assets and liabilities exceeds the price paid, the intangible assets acquired are not recognized as they would cause an increase of the negative goodwill generated by these acquisitions at the time of the purchase. The goodwill generated due to an acquisition of net assets is shown in line with the tangible asset acquired. Amortizations have been calculated by the straight line method on the basis of the estimated useful life considering the weight average of the remaining useful life of the tangible assets acquired.

m. Deferred financing cost

Expenses incurred in connection with the issuance of Negotiable Obligations and proceeds of loans are amortized over the life of the related issuances. In the case of redemption or conversion of these notes, the related expenses are amortized using the accelerated depreciation method.

Amortization has been recorded under Financial results, net in the statements of income as a greater financing expense.

n. Customer advances

Customer advances represent payments received in advance in connection with the sale and rent of properties.

o. Income tax

The Company has recognized the charge for income tax by the deferred tax liability method, recognizing timing differences between measurements of accounting and tax assets and liabilities (see Note 14).

To determine deferred assets and liabilities, the tax rate expected to be in effect at the time of reversal or use has been applied to timing differences identified and tax loss carry forwards, considering the legal regulations approved at the date of issuance of these unaudited financial statements.

p. Minimum Presumed Income Tax (MPIT)

The Company calculates MPIT by applying the current 1% rate on computable assets at the end of the period/year. This tax complements income tax. The Company's tax obligation in each period will coincide with the higher of the two taxes. However, if MPIT exceeds income tax in a given period, that amount in excess will be computable as payment on account of income tax arising in any of the following ten years.

q. Allowances and Provisions

Allowance for doubtful accounts: the Company provides for losses relating to mortgages, lease and other accounts receivable. The allowance for losses is recognized when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the terms of the agreements. The allowance is determined on a one-by-one basis considering the present value of expected future cash flows. While Management uses the information available to make assessments, future adjustments to the allowance may be necessary if future economic conditions differ substantially from the assumptions used in making the assessments. Management has considered all events and/or transactions that are subject to reasonable and normal methods of estimations, and the unaudited financial statements reflect that consideration.

For impairment of assets: the Company regularly assesses its non-current assets for recoverability at the end of every period.

The Company has estimated the recoverable value of rental properties based on their economic use value, which is determined based on estimated future cash flows discounted. For the rest of the assets (inventories and undeveloped parcels of land) the Company makes a comparison with market values based on values of comparable properties. If the recoverable value of assets, which had been impaired in prior years, increases, the Company records the corresponding reversals of impairment loss as required by accounting standards.

**NOTE 1:** (Continued)

1.5. (Continued)

q. (Continued)

Increases and decreases of allowances for impairment of assets during the period/year ended December 31, 2008 and are detailed in Exhibit E.

For lawsuits: the Company has certain contingent liabilities with respect to existing or potential claims, lawsuits and other proceedings, including those involving labor. The Company accrues liabilities when it is probable that future costs will be incurred and such costs can be reasonably estimated. Such accruals are based on developments to date, the Company's estimates of the outcomes of these matters and the Company's lawyers' experience in contesting, litigating and settling other matters.

As the scope of the liabilities becomes better defined, there may be changes in the estimates of future costs, which could have an effect on the Company's future results of operations and financial condition or liquidity.

At the date of issuance of these unaudited financial statements, Company's Management understands that there are no elements to foresee other potential contingencies having a negative impact on these unaudited financial statements.

r. Shareholders' equity accounts

Amounts of shareholders' equity accounts have been restated following the guidelines detailed in Note 1.3. until February 28, 2003. Subsequent movements are stated in the currency of the month to which they correspond.

Common stock account was stated at historical nominal value. The difference between value stated in constant currency, following the guidelines detailed in Note 1.3., and historical nominal value is shown under Inflation adjustment of common stock forming part of the shareholders' equity.

Temporary translation differences correspond to the exchange gains/losses arising from the conversion of Tyrus S.A.'s financial statements.

s. Results accounts

The results for the period are shown as follows:

Amounts included in Unaudited Statements of Income are shown in currency of the month to which they correspond.

Charges for assets consumed (fixed asset depreciation, intangible asset amortization and cost of sales) were determined based on the values recorded for such assets.

s. (Continued)

Results from investments in subsidiary and affiliated companies was calculated under the equity method, by applying the percentage of the Company's equity interest to the results of such companies, with the adjustments for application of Technical Resolution No. 21.

t. Pension information

The Company does not maintain any pension plans. Argentine laws provide for pension benefits to be paid to retired employees from government pension plans and/or privately managed funds plan to which employees may elect to contribute.

u. Revenue recognition

u.1. Sales of properties

The Company records revenue from the sale of properties when all of the following criteria are met:

The sale has been consummated.

There is sufficient evidence to demonstrate the buyer's ability and commitment to pay for the property.

The Company's receivable is not subject to future subordination.

The Company has transferred the property to the buyer.

The Company uses the percentage-of-completion method of accounting with respect to sales of development properties under construction. Under this method, revenue is recognized based on the ratio of costs incurred to total estimated costs according to budgeted costs. The Company does not commence revenue and cost recognition until such time as the decision to proceed with the project is made and construction activities have begun. The percentage-of-completion method of accounting requires the Company's Management to prepare budgeted costs in connection with sales of properties/units. All changes to estimated costs of completion are incorporated into revised estimates during the contract period.

u.2 Revenues from leases

Revenues from leases are recognized on a straight line basis over the life of the related lease contracts.

-That the balance of the income accounts of the year be carried forward, entitling the Board of Directors to use the balance and free availability reserves for the purposes that follow, among other: appropriate dividends or provide for the acquisition of own shares. All this due to the financial crisis shown in the national and international markets from were it is clear the impact on the quotation prices of the Company values, which certainly do not agree with the Company's reality. It is, therefore, essential to protect the shareholders' interests from the sudden fluctuations of quotation prices;

-That the tax on personal assets levied on the shareholders and paid by the Company in its capacity as substitute responsible for up to \$ 5,433, be fully absorbed by the Company as long as such decision is not modified by virtue of a meeting of shareholders;

**NOTE 27: FINANCIAL AND CAPITAL MARKET SITUATION**

During the last months, the world's principal financial markets have suffered the impact of volatility conditions as well as lack of liquidity, credit and uncertainty. Consequently, stock-market rates showed a significant fall worldwide together with an evident economic deceleration also at world level. Although the central countries took immediate action on the matter, the future evolution of the international markets is uncertain, which produce direct effects on the quotation of financial assets, particularly shares, debt titles and investment funds.

As regards the Argentine Republic, stock-markets showed a pronounced downward trend in the price of public and private bonds and a rise in interest rates, country risk and rates of exchange.

The Company's management is monitoring and evaluating the effects derived from the situations referred to above on the Company and subsidiaries in order to adopt in real time the necessary measures to soften the effects of the global situation.

In connection with the quotation value of shares issued of the Company and its subsidiary's, the Company's management reported that the quotation price of its shares has also been affected, in the understanding that such fall does not coincide with the Company's equity reality or with its true economic situation but that it is a consequence of the current process through which national and international markets are undergoing.

Banco Hipotecario sustained significant losses in the period. However, as of the date hereof, it is in full compliance with the capital requirements laid down in the regulations that govern its functioning. Although Banco Hipotecario's listed shares have shown a decline in value in the period, Management estimates that such decrease is not an indication of Banco Hipotecario's current operating performance.

**IRSA Inversiones y Representaciones Sociedad Anónima**

**Notes to the unaudited financial statements (Continued)**

**NOTE 27:** (Continued)

The factors considered by the Company include the following: (i) the reasons for such decrease in the quoted value (and whether they concern loan policies, interest rates or the market), (ii) the Company's ability and willingness to maintain the investment for a period long enough to recover value, (iii) whether such decrease in value is significant to the Company, (iv) the historical behavior of the variables that caused such decline in value and (v) the Company's business fundamentals. Testing for non-temporary impairments in value entails qualitative and quantitative processes subject to several risks and uncertainties. As of the date of these financial statements, Management estimates that the drop in the quoted value of shares is temporary.

**NOTE 28** **SALES OF REAL ESTATE**

Having monitored the ordinary course of the Company's businesses, and in order to tap the market for the best realization opportunities regarding its non-strategic assets for purposes of reinvestment, the Board resolved to survey the real estate market and it obtained an optimum response with respect to the disposal of some of such assets.

As a result, the Company proceeded with the execution and delivery of deeds in several deals (both during the quarter and as subsequent events) in connection with the sale of office properties representative of 4,352 square meters of gross leasable area in IRSA's portfolio for a total of US\$ 12.3 million.

Thanks to this decision, not only will the Company be able to increase its financial strength but also re-focus on taking advantage of potential business opportunities arising in this new market juncture.

This decision has not altered the Company's goals in the field of acquisition of properties or real estate development both within and outside Argentina. Rather, it has left the Company in a better place to face opportunities which might be appealing in terms of growth or which might represent value propositions for its shareholders. Besides, the proceeds of these deals will be applied in the future in conformity with the commitments undertaken by the Company, which include those concerning the Company's notes (negotiable obligations) maturing in 2017.

## 6. Brief comment on the outlook for the coming year.

See Attached.

**SUMMARY as of DECEMBER 31, 2008**

**Macroeconomic Context**

Given the deteriorated international financial conditions seen in recent months, the scenario appears to be one of reduced liquidity in the global economy, that in turn requires an adjustment to the prospects for global economic growth, which circumstances have started to impact on the level of economic activity in Argentina. Within this context, the Shopping Center segment is well positioned to face a scenario of reduced growth thanks to the flexibility of its business model and low indebtedness levels.

Regarding the performance of economic activity in Argentina, according to official data for the month of December 2008, the Monthly Estimate of Economic Activities (*Estimador Mensual de la Actividad Económica, EMAE*) pointed to 7.1% growth compared to the twelve months of the year 2007. Therefore, though some signs of a slow-down in the rate of growth in economic activity have started to be perceived, the data released by the INDEC as of the month of December 2008 shows six years of expansion in a row.

When it comes to Public Finances, fiscal accounts, foreign trade current account balances and the reserves held by the Central Bank of Argentina (*Banco Central de la República Argentina, BCRA*), they have performed favorably during calendar year 2008. Argentina's primary fiscal surplus showed a year-on-year 26.5% change driven by high tax revenues, offset, however, by higher fiscal expenditures. As regards the country's external accounts, Argentina posted a US\$ 13,176 million trade surplus during calendar year 2008. As a result, the Central Bank has a strong reserve position, as it has succeeded to accumulate a level of US\$ 46,967 million as of December 31, 2008, which allows it to manage the increase in volatility in the inflows and outflows of capital caused by the special current financial markets environment.

As concerns the construction industry, according to the data shown by the Summary Indicator of Construction Activities (*Indicador Sintético de la Actividad de la Construcción, ISAC*) prepared by the National Institute of Statistics and Censuses (*Instituto Nacional de Estadísticas y Censos, INDEC*), for the first eleven months of calendar 2008 this index has shown a 5.1% increase compared to the same period of the previous year. Compared to the same month of the previous year, during the month of November, the index has shown a negative 5.8% change without accounting for seasonality and an 8.8% change in the series that accounts for seasonality.

As regards the demand for homes in the residential real estate market, on one hand it be influenced by the impact of a cooler economy and on the other hand, it may be pushed by the impact of local investors' preference for channeling their savings to the real estate sector in times of volatility in financial markets. What seems to be more apparent, is that our market should not expect to see a crisis in sub-prime mortgage loans affecting the value of homes as has been the case in other economies basically because home mortgage loans in the Argentine market remain at hardly 2% of the country's GDP.

According to the Argentine Chamber of Medium Sized Companies (*Cámara Argentina de la Mediana Empresa, CAME*) in December 2008 retail sales dropped by 5.8% compared to the same month of 2007 as a result of the uncertain global and local economic conditions. In contrast, our Shopping Center segment continued to show signs of robustness, as evidenced by its ongoing income generation capacity.

As concerns the office market in Buenos Aires, rental prices have still not shown a downward trend, mainly due to the absence of available top-quality space. According to Richard Ellis, the rental prices for AAA class offices in the areas of Plaza San Martín, Catalinas and Plaza Roma are on average above US\$35/square meter/month, and the rentals charged in the Plaza Roma area have reached approximately US\$40/square meter/month.

In connection with the Hotel market, the inflow of tourists between January and November 2008 has remained unchanged compared to the same period of 2007, although total inbound tourist expenditures increased by 10% in terms of dollars, according to data resulting from the International Tourism Poll (*Encuesta de Turismo Internacional, ETI*) released by the Tourism Office on January 15, 2009.

Broadly speaking, the Company's segments continue to show a robust position within the current macroeconomic juncture. Although there has been a change in outlook given the cash flows that the Company has been showing and the long-term financing basis attained in previous fiscal years, we are capable of sustaining our leading market position.

#### **Comment on operations during the quarter ended December 31, 2008**

Our revenues rose by 9.0%, from Ps.496.6 million as of December 31, 2007 to Ps.541.4 million as of December 31, 2008. The share of the Company's various segments in net revenues was as follows: sales and developments increased 1.1% to Ps.63.7 million, offices and other rental properties increased 55.7% to Ps.69.8 million, shopping centers increased 13.2% to Ps.195.3 million, hotels increased 15.8% to Ps.88.0 million, consumer finance decreased 11.7% to Ps.123.6 million, and financial operations and others recorded revenues of Ps.1.1 million.

Our operating income decreased by 65.5% to Ps.48.9 million for the six months ended December 31, 2008 compared to Ps.141.9 million as of December 31, 2007, mainly due to the operating losses recorded in the consumer finance segment. Excluding the effect of this segment, the operating income of the other segments increased 23.9% from Ps.128.0 million to Ps.158.6 million.

Net income for the six months ended December 31, 2008 decreased significantly, totaling a loss of Ps.99.0 million compared to an income of Ps.5.8 million posted during the same period of fiscal year 2008.

As regards financial results, they entailed a Ps.139.0 million loss for the six months ended December 31, 2008, compared to a loss of Ps.54.9 million in the same period of fiscal year 2007, largely explained by the fluctuations in the exchange rate applied for valuing the Company's stock of debt as of the closing date.

Finally, the results from related companies showed a loss of Ps.47.3 million during the first six months of fiscal year 2009 compared to a loss of Ps.9.1 million in the same period of fiscal year 2008, due to losses in our related company Banco Hipotecario S.A. caused mainly by the decrease in the valuation of its portfolio of financial assets resulting from the current financial conditions.

#### **Second quarter of fiscal year 2009 highlights, including significant operations occurred after the end of the period**

##### **I. Offices and Other Rental Properties**

During the first half of fiscal year 2009, income from rental properties totaled Ps.69.8 million, a 55.7% increase compared to the figure of Ps.44.8 million recorded in the same period of fiscal year 2008.

We have grown significantly in this segment in recent years, as shown by the noteworthy increase in leaseable areas and low vacancy rates, combined with higher lease rates. The acquisitions made have helped us gain a strong leading position in the Buenos Aires office rental market, which we intend to maintain and keep developing.

Our offices posted occupancy levels of 92.8% during the second quarter of fiscal year 2009 including Edificio República, which has been recently added to our portfolio and is in process of absorption. At the closing of the first six months of fiscal year 2009 Edificio República had an occupancy rate of 64.8% compared to 30.2% at the closing of the first three months of the same fiscal period.

**Sale of Properties.** During the second quarter of fiscal year and after its closing we sold certain non-strategic office properties, which accounted for a gross leaseable area of 4,352 square meters in our portfolio, for a total of US\$ 12.3 million. These transactions involve four functional units in Edificio Dock del Plata together with their related supplementary units, representing 1600 sqm of GLA, for a total of US\$ 4.4 million; three functional units in Edificio Libertador 498 together with their related supplementary

Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

units, representing 1,860 sqm of GLA, for a total of US\$ 5.9 million; one functional unit in the property located at Av. Madero 942 together with its related supplementary units, representing 768 sqm, for a total of US\$ 1.9 million, and a land reserve located at Padilla 902 street, representing 125 sqm of our portfolio, for a total of US\$ 0.9 million. These decisions not only allow the company to increase its financial strength, but also allow it to refocus in the execution of potential business opportunities.

**Dique IV, Puerto Madero.** As of the date of this earnings release, we had completed the construction of 11,000 square meters of gross leaseable area in Dique IV, Puerto Madero, and we are holding negotiations with prospects for their imminent lease.

**Edificio República.** We continue the process of absorption of the square meters added to our portfolio as a result of the acquisition of Edificio República. At the closing of the second quarter of fiscal year 2009, its occupancy rate was 64.8%, 34.6% higher than at the closing of the previous quarter.

**PAMSA Offices.** Our subsidiary APSA is developing an office building in the intersection of Av. Gral Paz and Panamericana through Panamerican Mall S.A. as referenced later on in this document.

Below is detailed information on our office space as of December 31, 2008:

**II. Alto Palermo S.A. ( APSA ): Shopping Centers and Consumer Finance**

The following information relates to data extracted from the balance sheet of our subsidiary Alto Palermo S.A. (APSA), the company that operates our shopping center business, in which we had a 63.3% interest as of December 31, 2008.

For the six month period ended December 31, 2008 our tenants sales have continued to grow, reaching Ps. 2,202.4 million, 18.4% higher in nominal terms than those recorded in the same period of the previous year.

The business success of our tenants allows us to maintain the occupancy rates at our Shopping Centers at 98.4%. Although this percentage is lower than the one recorded as of September 30, 2008, the variation reflects a series of reforms under way in a store in Patio Bullrich Shopping Center, in the City of Buenos Aires.

**Panamerican Mall Project, City of Buenos Aires.** This is one of the Company s most important projects, and it includes the construction of a shopping center, a hypermarket, a cinema complex and an office building in the district of Saavedra, City of Buenos Aires, to be developed by Panamerican Mall S.A. During this quarter the shopping center s name, **Dot Baires**, was announced. The choice of this name suggests a meeting point, the entry and exit door to the City of Buenos Aires. Dot Baires will be the largest shopping center in the City of Buenos Aires in terms of square meters. The project will have 13,000 square meters for a hypermarket and 37,855 square meters of leaseable area, including a 9,000 square meters anchor store.

At present we are in the last construction stages, and we expect to open Dot Baires during the last quarter of fiscal year 2009.

**Coto Residential Project.** On September 24, 1997 we executed a public deed whereby we acquired the rights to receive parking spaces and to perform additional construction works in the real property located on the intersection of Agüero, Lavalle, Guardia Vieja and Gallo streets, in the Abasto neighborhood. On July 31, 2008, we executed a conditional barter agreement whereby we would transfer to CYRSA S.A. (CYRSA) 112 parking spaces and the right to perform additional construction works for developing two tower buildings in the property mentioned above, subject to the satisfaction of certain conditions. As consideration, Cyrsa would deliver to us an amount to be determined in the future of the units comprising the building that would be constructed equivalent to 25% of the square meters, totaling not less than four thousand and five three units with an exclusive area of fifty square meters each. The consummation of this barter is conditioned to the performance of certain material acts by Coto. Possession of the property will be delivered simultaneously with the deed of conveyance of title, which will take place 30 days after the date we give notice to CYRSA of the satisfaction of the conditions precedent. The total amount of the transaction between Cyrsa and the Company amounts to US\$ 5.9 million.

**Torres Rosario, City of Rosario.** On November 27, 2008 we executed a barter agreement as a result of the exercise of an option over parcel 2h that APSA had granted to Condominios del Alto S.A. Under this agreement the Company transferred to Condominios del Alto S.A. parcel 2h with an area of 11,686 square meters, and will receive 42 housing functional units and 47 parking spaces, which will represent 22% of the total area to be built. The total nominal value of this transaction is US\$ 2.3 million.

**Beruti Plot.** Before the closing of the previous fiscal year, Alto Palermo S.A. acquired a plot of land located in Beruti 3351/9, in the neighborhood of Palermo, City of Buenos Aires. The plot has an area of 3,207 sqm and was purchased for US\$ 17.8 million. The importance of this acquisition relies on the property s strategic location, as it is very close to our major shopping center, Shopping Alto Palermo. At present we are evaluating the different uses that may be given to this property.

**Consumer Finance Tarshop S.A. Subsidiary**

As a result of the current international financial scenario, a high volatility has been observed in interest rates and systemic delinquency has increased, affecting the performance and financing of the consumer finance business. The higher delinquency levels have led to an increase in the subordination of financial trusts which, added to the changes in their tax treatment, the higher interest rates resulting from higher risk and a slight deceleration in private consumption, have resulted in the need to review the general economic and the business specific prospects of the Company.

In spite of the factors mentioned above, the credit portfolio, including securitized coupons as of December 31, 2008, amounted to Ps.749.0 million, 13.7% lower than the portfolio of Ps.852.1 million as of December 31, 2007.

In addition, as regards collections, 90-day delinquency rate as of December 31, 2008 was 8.8%

## Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

Net revenues showed a 11.7% reduction, from Ps.139.9 million during the six-month period ended December 31, 2007, to Ps.123.6 million in the same period of this fiscal year. Gross profit stood at Ps.48.2 million, and operating loss was Ps.110.8 million, down from the Ps.13.8 million gain recorded in the same period of the previous fiscal year. Net loss stood at Ps.57.6 million.

To face the growing volatility in the international financial scenario and to provide Tarshop S.A. with a suitable capital base taking into account the current market conditions, in September 2008 APSA decided to take part in Tarshop S.A.'s capital increase for up to Ps.60 million, and increased its equity stake in Tarshop S.A. from 80% to 93.4%.

To supplement the financial support given, several actions were taken since then through the direct counseling provided to Tarshop S.A. by APSA's management. These actions are aimed at improving Tarshop S.A.'s performance, and include a 17% downward revision in the point of sale structure, 13 less points of sale and a cut on leased centralized areas by 10% of the total.

In line with the commercial actions, various other measures have been implemented, including:

- (i) Redesign of the distribution channel structure.
- (ii) Changes in cash lending plans and merchant financing.
- (iii) Renegotiation of conditions with merchants.
- (iv) Streamlining of lending and collection policies.
- (v) Revision of provisioning policies, aimed at establishing an even stricter criterion than the one suggested by the Central Bank.

During the second quarter of fiscal year 2009, in the light of the general changing scenario and in compliance with the strategic plan devised and implemented by APSA, Tarshop received financial assistance for an amount of Ps. 105 million, subsequently accepted as irrevocable contribution, for the purpose of strengthening its equity position, improving its financial position and repositioning Tarshop S.A., given the complex situation prevailing in the financial trust market in which part of its activity is engaged and its extremely low capitalization relative to its competitors.

### III. Sales and Developments

In the six months ended on December 31, 2008, the sales and developments segment recorded revenues for Ps. 63.7 million, compared to Ps. 63.0 million for the same period of the previous fiscal year. The following paragraphs describe the Company's major developments:

**Caballito.** On May 4, 2006 we entered into a US\$ 7.5 million swap agreement with Koad S.A. (Koad) whereby we transferred title of block 36 of the property Terrenos de Caballito to Koad in order for it to develop at its sole expense, cost and risk, a complex known as Caballito Nuevo. The construction works have already started, and include two apartment towers of 34 floors each, with 1, 2 and 3 room units of 40 to 85 sqm. surface area, including a wide variety of amenities and services. In consideration for it, Koad paid to us US\$ 0.05 million while the US\$ 7.45 million balance will be repaid through the delivery of 118 apartment units and 55 parking spaces. The final number of units to be received will depend on the date of actual delivery by Koad, as the agreement provides for rewards based on terms of delivery. At present, the works are in the last development stages. Marketing started in December 2008, and from January 2009 to the date of this release, preliminary sales agreements for 22 units have been executed.

**Solares de Santa Maria, City of Buenos Aires, (formerly Santa María del Plata).** The Urban Development Solares de Santa María has reached the Draft Project level, and feasibility studies have been filed with the utility companies. An agreement is being reached with the Government of the City of Buenos Aires to send a mutually acceptable Bill of Law and Agreement to the Legislature of the City of Buenos Aires for its consideration and approval.

**Horizons residential project.** IRSA-CYRELA are developing one of the most significant developments in Greater Buenos Aires in a plot made up by two adjacent blocks located in the Vicente López neighborhood, which will entail a new concept in residential complexes given its emphasis on the use of common spaces. This project includes two complexes with a total of six buildings; a complex facing the river with three 14-floor buildings and another complex on Avenida del Libertador with three 17-floor buildings, totaling 59,000 sqm of construction distributed in 467 units. The showroom was opened to the public in March 2008 quite successfully as the units have all been reserved. As of December 31, 2008, preliminary sales agreements had been executed for 99% of the own units subject to sale and results will be reflected as progress is made in the execution of the works, consolidated at 50%. The units will be completed and delivered by early 2011.

At present, the degree of work in progress is approximately of 8.5%.

In addition, we are also evaluating the execution times of other projects jointly with CYRELA.

**Terreno Caballito, CYRSA.** As of the closing of fiscal year 2008, we and CYRSA executed a barter deed pursuant to which we transferred to CYRSA under a swap agreement the property described below, which has a total surface area of 9,784 square meters: plot of land, designated as Parcel ONE L, in block 35, facing Méndez de Andes street between Rojas and Colpayo streets in the Caballito neighborhood.

In turn, CYRSA agreed to carry out in the property a real estate development for residential use, which shall comprise a first stage of two free-perimeter towers and a third building to be developed in a second stage at the option of CYRSA. In exchange for the transfer of the property, CYRSA paid to IRSA US\$ 0.12 million and agreed to make a non-cash consideration consisting in transferring under barter to IRSA certain home units in the buildings to be built which will represent 25% of the meters. Furthermore, as security for the performance of its obligations, CYRSA has created a security interest over the property by mortgaging it in favor of IRSA in the amount of US\$ 12.6 million.

On July 31, 2008, the deed of conveyance of title to the land was executed.

The following is a detail of the properties being developed by IRSA as of December 31, 2008.

Income from the hotel segment rose by 15.8%, up from Ps. 76.0 million for the first six months of fiscal 2008 to Ps.88.0 million for the same period in fiscal 2009.

This was mainly due to the increase in the average rate, which in the first six months of fiscal 2009 performed quite favorably with an average per room of Ps. 642 compared to Ps. 549 for the previous period. In addition, occupancy levels remain high and reached 75.1% in the second quarter of fiscal year 2009, compared to 79.5% in the same period of the previous fiscal year.

**VII. Brief comment on prospects for the next quarter**

The deceleration of the economy has started to take its toll on the level of income derived from business activities in general, and our business segments are not aloof from this reality.

However, as concerns our Shopping Center segment in particular, our various shopping centers are uniquely attractive to our tenants, as has been shown by their willingness to join the new project that we expect to launch in the last quarter of this fiscal year: more than 90% of the leaseable area of Dot Baires (the shopping center at Av. Gral. Paz. and Panamericana) has already been taken. We believe that given its location and commercial proposal, Dot Baires will add substantial value to our portfolio.

Another important component of our commercial strategy for maintaining the attractiveness of our shopping centers is the presence of nationally and internationally recognized tenants. Therefore, we will continue to promote tenant diversification and to promote the participation of top brands in our shopping centers so as to offer our consumers the best products in the market. In this way, brands such as Salvatore Ferragamo, North Face and Starbucks have recently joined our proposal.

As concerns our Consumer Finance business, we will continue to take actions on those areas that call for an improvement in this segment's operating and financing performance, taking measures aimed at stabilizing the business in light of the present economic scenario.

As concerns our lease office segment in Buenos Aires, we have recently noted certain caution among potential lessees regarding decisions to lease larger areas. However, we have made progress in the absorption of Edificio República, achieving an occupancy rate of almost two thirds at high prices compared to those polled in the market. Vacancy levels in premium offices in the City of Buenos Aires are extremely low, and our portfolio particularly attracts high-end tenants for whom availability of these kind of properties is scarce. In the next months we will continue to optimize our office portfolio, and among these actions we expect to turn operational Edificio Dique IV, in which construction works have already been completed.

Regarding the Sales and Development segment, we will continue to make progress in the execution of the first project launched through the IRSA-CYRELA vehicle, in which sales have been booked for almost 100% of the units and work progress may be already perceived. As concerns our other future ventures, we will continue to work in all the preliminary activities aimed at launching these projects.
