CAUTIONARY STATEMENT CONCERNING FORWARD-LOOKING INFORMATION

This report includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve substantial risks and uncertainties. These forward-looking statements are based on the registrant's current expectations, estimates and projections about the registrant's business and industry and its beliefs and assumptions about future events. These forward-looking statements are subject to known and unknown risks, uncertainties and assumptions about the registrant that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. In some cases, investors can identify forward-looking statements by terminology such as may, should, could, would, expect, plan, anticipate, believe, estimate, continue, or the negative of such terms or other similar expressions. Factors that might cause or contribute to such discrepancy include, but are not limited to, those described in this report, including in Item 1A. Risk Factors , and our other Securities and Exchange Commission (the SEC) filings.

Table of Contents

PART I

ITEM 1. BUSINESS

Organization

PowerShares DB Agriculture Fund (the Fund ; Fund may also refer to the Fund and the Master Fund, collectively, as the context requires), a separate series of PowerShares DB Multi-Sector Commodity Trust (the Trust), a Delaware statutory trust organized in seven separate series and its subsidiary, DB Agriculture Master Fund (the Master Fund), a separate series of DB Multi-Sector Commodity Master Trust (the Master Trust), a Delaware statutory trust organized in seven separate series were formed on August 3, 2006. DB Commodity Services LLC, a Delaware limited liability company (DBCS or the Managing Owner), funded both the Fund and the Master Fund with a capital contribution of \$1,000 in exchange for 40 General Shares of each of the Fund and the Master Fund. The fiscal year end of the Fund is December 31st. The term of the Fund is perpetual (unless terminated earlier in certain circumstances) as provided for in the Amended and Restated Declaration of Trust and Trust Agreement of each of the Trust and the Master Trust (each a Trust Agreement , and collectively, the Trust Agreements).

The Fund offers common units of beneficial interest (the Shares) only to certain eligible financial institutions (the Authorized Participants) in one or more blocks of 200,000 Shares, called a Basket. The proceeds from the offering of Shares are invested in the Master Fund. The Fund commenced trading on the American Stock Exchange (now known as the NYSE Alternext US LLC (the NYSE Alternext)) on January 5, 2007 and, as of November 25, 2008, is listed on the NYSE Arca, Inc. (the NYSE Arca). The Fund and the Master Fund commenced investment operations on January 3, 2007 with the initial offering of 1,000,000 Shares to Deutsche Bank Securities Inc. as initial purchaser of the Fund in exchange for \$25,000,000. After the initial offering of the Shares, an additional 34,200,000 Shares were issued to certain Authorized Participants for \$961,237,996 and 1,200,000 Shares were redeemed for \$32,756,920 during the period from January 3, 2007 (commencement of investment operations) to December 31, 2007. During the period from January 1, 2008 to December 31, 2008, an additional 64,600,000 Shares were issued to certain Authorized Participants for \$2,423,747,438 and 57,600,000 Shares were redeemed for \$1,985,424,868.

This Report covers the year ended December 31, 2008 (herein referred to as the Year Ended December 31, 2008) and the period from January 3, 2007 (commencement of investment operations) to December 31, 2007 (herein referred to as the Period Ended December 31, 2007).

Fund Investment Overview

The Master Fund invests with a view to tracking the changes, whether positive or negative, in the level of the Deutsche Bank Liquid Commodity Index Optimum Yield Agriculture Excess Return (DBLCI-OY Agriculture ER , or the Index) plus the excess, if any, of the Master Fund s income from its holdings of United States Treasury Obligations and other high credit quality short-term fixed income securities over the expenses of the Fund and the Master Fund.

The Index is intended to reflect the change in market value of the agricultural sector. The commodities comprising the Index are corn, wheat, soybeans and sugar (the Index Commodities). The Commodity Futures Trading Commission (the CFTC) and commodity exchanges impose position limits on market participants trading in certain commodities included in the Index. The Index is comprised of futures contracts on the Index Commodities that expire in a specific month and trade on a specific exchange (the Index Contracts). As disclosed in the Fund s Prospectus, if the Managing Owner determines in its commercially reasonable judgment that it has become impracticable or inefficient for any reason for the Master Fund to gain full or partial exposure to any Index Commodity by investing in a specific Index Contract, the Master Fund may invest in a futures contract referencing the particular Index Commodity other than the Index Contract or, in the alternative, invest in other futures contracts not based on the particular Index Commodity if, in the commercially reasonable judgment of the Managing Owner, such futures contracts tend to exhibit trading prices that correlate with such Index Commodity. For example, in October 2007, the Master Fund reached position limits with respect to the CBOT July wheat futures contract, which was an Index Contract. Since that time, when required to buy wheat to track the Index, the Master Fund has been purchasing CBOT wheat futures contracts expiring in different months as well as wheat futures trading on other United States futures exchanges. In February 2008, the Master Fund reached position limits with respect to the CBOT corn and CBOT soybean contracts in the Index and, through June, purchased futures contracts in the CBOT soybean complex in lieu of those contracts. Commencing July and continuing to October, when required to buy corn and soybean contracts to track the Index, the Master Fund had been purchasing CBOT corn and soybean contracts expiring in different months.

Table of Contents

The Master Fund also holds United States Treasury Obligations and other high credit quality short-term fixed income securities for deposit with the Master Fund's commodity broker as margin.

The Fund does not employ leverage. As of December 31, 2008 and December 31, 2007, the Fund had \$1,064,540,025 (or 100%) and \$1,174,223,048 (or 100%), respectively, of its holdings of cash, United States Treasury Obligations and unrealized appreciation/depreciation on futures contracts on deposit with its Commodity Broker. Of this, \$98,093,920 (or 9.21%) and \$59,367,840 (or 5.06%), respectively, of the Fund's holdings of cash and United States Treasury Obligations are required to be deposited as margin in support of the Fund's long futures positions. For additional information, please see the audited Consolidated Schedule of Investments as of December 31, 2008 and the audited Consolidated Schedule of Investments as of December 31, 2007 for a breakdown of the Fund's portfolio holdings.

Index Composition

The Index is composed of notional amounts of each of the underlying Index Commodities. The notional amount of each Index Commodity included in the Index is intended to reflect the changes in market value of each such Index Commodity within the Index. The closing level of the Index is calculated on each business day by the Index Sponsor based on the closing price of the futures contracts for each of the underlying Index Commodities and the notional amounts of such Index Commodities.

The Index is rebalanced annually in November to ensure that each of the Index Commodities is weighted in the same proportion that such Index Commodities were weighted on December 2, 1988 (the Base Date). The following table reflects the index base weights (the Index Base Weights) of each Index Commodity on the Base Date:

Index Commodity	Index Base Weight (%)
Corn	25.00
Wheat	25.00
Soybeans	25.00
Sugar	25.00
Closing Level on Base Date:	100.00

The composition of the Index may be adjusted in the event that the Index Sponsor is not able to calculate the closing prices of the Index Commodities.

The Index includes provisions for the replacement of futures contracts as they approach maturity. This replacement takes place over a period of time in order to lessen the impact on the market for the futures contracts being replaced. With respect to each Index Commodity, the Master Fund employs a rule-based approach when it rolls from one futures contract to another. Rather than select a new futures contract based on a predetermined schedule (e.g., monthly), each Index Commodity rolls to the futures contract which generates the best possible implied roll yield. The futures contract with a delivery month within the next thirteen months which generates the best possible implied roll yield will be included in each Index. As a result, each Index Commodity is able to potentially maximize the roll benefits in backwarddated markets and minimize the losses from rolling in contangoed markets.

In general, as a futures contract approaches its expiration date, its price will move towards the spot price in a contangoed market. Assuming the spot price does not change, this would result in the futures contract price decreasing and a negative implied roll yield. The opposite is true in a backwarddated market. Rolling in a contangoed market will tend to cause a drag on an Index Commodity's contribution to the Fund's return while rolling in a backwarddated market will tend to cause a push on an Index Commodity's contribution to the Fund's return.

Edgar Filing: DB Multi-Sector Commodity Master Trust - Form 10-K

The Deutsche Bank Liquid Commodity Index Optimum Yield Agriculture is calculated in USD on both an excess return (unfunded) and total return (funded) basis.

Table of Contents

The futures contract price for each Index Commodity will be the exchange closing price for such Index Commodity on each weekday when banks in New York, New York are open (the Index Business Days). If a weekday is not an Exchange Business Day (as defined in the following sentence) but is an Index Business Day, the exchange closing price from the previous Index Business Day will be used for each Index Commodity. Exchange Business Day means, in respect of an Index Commodity, a day that is a trading day for such Index Commodity on the relevant exchange (unless either an Index disruption event or force majeure event has occurred).

On the first New York business day (the Verification Date) of each month, each Index Commodity futures contract will be tested in order to determine whether to continue including it in the Index. If the Index Commodity futures contract requires delivery of the underlying commodity in the next month, known as the Delivery Month, a new Index Commodity futures contract will be selected for inclusion in the Index. For example, if the first New York business day is May 1, 2009, and the Delivery Month of the Index Commodity futures contract currently in such Index is June 2009, a new Index Commodity futures contract with a later Delivery Month will be selected.

For each underlying Index Commodity of the Index, the new Index Commodity futures contract selected will be the Index Commodity futures contract with the best possible implied roll yield based on the closing price for each eligible Index Commodity futures contract. Eligible Index Commodity futures contracts are any Index Commodity futures contracts having a Delivery Month (i) no sooner than the month after the Delivery Month of the Index Commodity futures contract currently in such Index, and (ii) no later than the 13th month after the Verification Date. For example, if the first New York business day is May 1, 2009 and the Delivery Month of an Index Commodity futures contract currently in the Index is June 2009, the Delivery Month of an eligible new Index Commodity futures contract must be between July 2009 and July 2010. The implied roll yield is then calculated and the futures contract on the Index Commodity with the best possible implied roll yield is then selected. If two futures contracts have the same implied roll yield, the futures contract with the minimum number of months prior to the Delivery Month is selected.

After the futures contract selection, the monthly roll for each Index Commodity subject to a roll in that particular month unwinds the old futures contract and enters a position in the new futures contract. This takes place between the 2nd and 6th Index Business Day of the month.

On each day during the roll period, new notional holdings are calculated. The calculations for the futures contracts on the old Index Commodities that are leaving the Index and the futures contracts on the new Index Commodities are then calculated.

On all days that are not monthly index roll days, the notional holdings of each Index Commodity future remains constant.

The Index is re-weighted on an annual basis on the 6th Index Business Day of each November.

The calculation of the Index is expressed as the weighted average return of the Index Commodities.

General

A description of the business of the Fund and related items is contained in the Prospectus under the sections captioned Summary, Organization Chart, Investment Objective, The Master-Feeder Structure, Description of the Deutsche Bank Liquid Commodity Index-Optimum Yield Excess Return, Information Barriers Between the Index Sponsor and the Managing Owner, Charges, Conflicts of Interest and Description of the Shares and the Master Fund Units; Certain Material Terms of the Trust Declarations, and such description is incorporated herein by reference from the Prospectus.

DBLCI and Deutsche Bank Liquid Commodity Index are trademarks of Deutsche Bank AG London (the Index Sponsor). Trademark applications in the United States are pending with respect to both the Trust and aspects of the Index. Any use of these trademarks must be with the consent of or under license from the Index Sponsor. The Fund, Master Fund and the Managing Owner have been licensed to use DBLCI and Deutsche Bank Liquid Commodity Index . The Index Sponsor is an affiliate of the Trust, the Fund, the Master Trust, the Master Fund and the Managing Owner.

The Index Sponsor obtains information for inclusion in, or for use in the calculation of, the Index from sources the Index Sponsor considers reliable. None of the Index Sponsor, the Managing Owner, the Fund, the Master Fund or any of their respective affiliates accepts responsibility for or guarantees the accuracy and/or completeness of the Index or any data included in the Index.

Table of Contents

A patent application directed to the creation and operation of the Trust is pending at the United States Patent and Trademark Office.

The Trustee

Under the Trust Agreements, Wilmington Trust Company, the Trustee of the Fund and the Master Fund has delegated to the Managing Owner the exclusive management and control of all aspects of the business of the Trust, the Fund, the Master Trust and the Master Fund. The Trustee will have no duty or liability to supervise or monitor the performance of the Managing Owner, nor will the Trustee have any liability for the acts or omissions of the Managing Owner. The Trustee is compensated by the Managing Owner. Under the Trust Agreements, the Managing Owner, from the assets of the Fund or the Master Fund, will indemnify the Trustee for any liability or expense relating to the formation, operations and termination of the Funds incurred without gross negligence or willful misconduct of the Trustee.

The Managing Owner

The Managing Owner was formed on May 23, 2005. The Managing Owner is an indirect wholly owned subsidiary of Deutsche Bank AG. The Managing Owner serves as the commodity pool operator and commodity trading advisor of the Fund and the Master Fund. The Managing Owner and its trading principals have limited experience in operating commodity pools and managing futures trading accounts. The Managing Owner is registered as a commodity pool operator and commodity trading advisor with the CFTC and is a member of the National Futures Association (the "NFA"). As a registered commodity pool operator and commodity trading advisor, with respect to both the Fund and the Master Fund, the Managing Owner must comply with various regulatory requirements under the Commodity Exchange Act (the "CEAct") and the rules and regulations of the CFTC and the NFA, including investor protection requirements, antifraud prohibitions, disclosure requirements, and reporting and recordkeeping requirements. The Managing Owner is also subject to periodic inspections and audits by the CFTC and NFA.

The Managing Owner's main business offices are located at 60 Wall Street, New York, New York 10005, telephone (212) 250-5122.

The Master Fund pays the Managing Owner a management fee (the "Management Fee") monthly in arrears, in an amount equal to 0.75% per annum of the daily net asset value of the Master Fund. No separate fee is paid by the Fund. The Management Fee is paid in consideration of the Managing Owner's commodity futures trading advisory services.

Pursuant to the Trust Agreements, the Fund and the Master Fund will indemnify the Managing Owner against any losses, judgments, liabilities, expenses and amounts paid in settlement of any claims sustained by it in connection with its activities on behalf of the Master Fund and the Fund incurred without negligence or misconduct.

The Commodity Broker

Deutsche Bank Securities Inc., a Delaware corporation, serves as the Master Fund's clearing broker (the "Commodity Broker"). The Commodity Broker is also an indirect wholly-owned subsidiary of Deutsche Bank AG and an affiliate of the Managing Owner. In its capacity as clearing broker, the Commodity Broker executes and clears each of the Master Fund's futures transactions and performs certain administrative services for the Master Fund.

A variety of executing brokers execute futures transactions on behalf of the Master Fund. Such executing brokers "give-up", or transfer for clearing, all such transactions to the Commodity Broker. The Commodity Broker is registered with the CFTC as a futures commission merchant and is a member of the NFA in such capacity.

The Master Fund pays to the Commodity Broker all brokerage commissions, including applicable exchange fees, NFA fees, give-up fees, pit brokerage fees and other transaction related fees and expenses charged in connection with trading activities. The Commodity Broker's brokerage commissions and trading fees are determined on a contract-by-contract basis. Brokerage commissions and fees in any future fiscal year or any part of any future fiscal year may be greater. On average, total charges paid to the Commodity Broker were less than \$10.00 per round-turn trade for the Year Ended December 31, 2008 and the Period Ended December 31, 2007.

Table of Contents

A round-turn trade is a completed transaction involving both a purchase and a liquidating sale, or a sale followed by a covering purchase.

The Administrator

The Managing Owner, on behalf of the Fund and the Master Fund, has appointed The Bank of New York Mellon as the administrator (the Administrator) of the Fund and the Master Fund and has entered into an Administration Agreement in connection therewith. The Bank of New York Mellon serves as custodian (the Custodian) of the Fund and has entered into a Global Custody Agreement (the Custody Agreement) in connection therewith. The Bank of New York Mellon serves as the transfer agent (the Transfer Agent) of the Fund and has entered into a Transfer Agency and Service Agreement in connection therewith.

The Bank of New York Mellon, a banking corporation organized under the laws of the State of New York with trust powers, has an office at 2 Hanson Place, 12th Floor, Brooklyn, New York 11217. The Bank of New York Mellon is subject to supervision by the New York State Banking Department and the Board of Governors of the Federal Reserve System.

Pursuant to the Administration Agreement, the Administrator performs or supervises the performance of services necessary for the operation and administration of the Fund and the Master Fund (other than making investment decisions), including receiving and processing orders from Authorized Participants to create and redeem Baskets, net asset value calculations, accounting and other fund administrative services. The Administrator retains certain financial books and records, including: Basket creation and redemption books and records, fund accounting records, ledgers with respect to assets, liabilities, capital, income and expenses, the registrar, transfer journals and related details, and trading and related documents received from futures commission merchants.

The Administration Agreement will continue in effect from the commencement of trading operations unless terminated on at least 90 days prior written notice by either party to the other party. Notwithstanding the foregoing, the Administrator may terminate the Administration Agreement upon 30 days prior written notice if the Fund and/or Master Fund has materially failed to perform its obligations under the Administration Agreement.

The Administration Agreement provides for the exculpation and indemnification of the Administrator from and against any costs, expenses, damages, liabilities or claims (other than those resulting from the Administrator's own bad faith, negligence or willful misconduct) which may be imposed on, incurred by or asserted against the Administrator in performing its obligations or duties under the Administration Agreement.

The Administrator's monthly fees are paid on behalf of the Fund and the Master Fund by the Managing Owner out of the Management Fee.

The Administrator and any of its affiliates may from time-to-time purchase or sell Shares for their own account, as agent for their customers and for accounts over which they exercise investment discretion.

The Administrator receives a transaction processing fee in connection with orders from Authorized Participants to create or redeem Baskets in the amount of \$500 per order. These transaction processing fees are paid indirectly by the Authorized Participants and not by the Fund or the Master Fund.

The Distributor

ALPS Distributors, Inc. (the Distributor) provides certain distribution services to the Fund. Pursuant to the Distribution Services Agreement between the Managing Owner, in its capacity as managing owner of the Fund, the Fund and the Distributor, the Distributor assists the Managing Owner and the Administrator with certain functions and duties relating to distribution and marketing services to the Fund including reviewing and approving marketing materials.

Table of Contents

The Distribution Services Agreement is terminable without penalty on sixty days' written notice by the Managing Owner or by the Distributor. The Distribution Services Agreement will automatically terminate in the event of its assignment.

Pursuant to the Distribution Services Agreement, the Fund will indemnify and hold harmless the Distributor and each of its directors and officers and each person, if any, who controls the Distributor within the meaning of Section 15 of the 1933 Act, against any loss, liability, claim, damages or expenses (including the reasonable cost of investigating or defending any alleged loss, liability, claim, damages or expense and reasonable counsel fees incurred in connection therewith) arising by reason of any person acquiring any Shares, based upon the ground that the registration statement, prospectus, statement of additional information, shareholder reports or other information filed or made public by the Fund (as from time-to-time amended) included an untrue statement of a material fact or omitted to state a material fact required to be stated or necessary in order to make the statements not misleading under the 1933 Act or any other statute or the common law.

Invesco Powershares Capital Management LLC

Under the License Agreement among Invesco Powershares Capital Management LLC (formerly known as PowerShares Capital Management LLC) (the "Licensor") and the Managing Owner in its own capacity and in its capacity as managing owner of the Fund (the Fund and the Managing Owner, collectively, the "Licensees"), the Licensor granted to each Licensee a non-exclusive license to use the PowerShares trademark (the "Trademark") anywhere in the world, solely in connection with the marketing and promotion of the Fund and to use or refer to the Trademark in connection with the issuance and trading of the Fund as necessary.

Invesco Aim Distributors, Inc.

Through a marketing agreement between the Managing Owner and Invesco Aim Distributors, Inc. (formerly known as AIM Distributors, Inc.) ("Invesco Aim Distributors"), an affiliate of Invesco PowerShares Capital Management LLC ("Invesco PowerShares"), the Managing Owner, on behalf of the Fund and the Master Fund, has appointed Invesco Aim Distributors as a marketing agent. Invesco Aim Distributors assists the Managing Owner and the Administrator with certain functions and duties such as providing various educational and marketing activities regarding the Fund, primarily in the secondary trading market, which activities include, but are not limited to, communicating the Fund's name, characteristics, uses, benefits, and risks, consistent with the prospectus. Invesco Aim Distributors will not open or maintain customer accounts or handle orders for the Fund. Invesco Aim Distributors engages in public seminars, road shows, conferences, media interviews, and distributes sales literature and other communications (including electronic media) regarding the Fund.

Tax Reporting

The Fund has retained the services of PricewaterhouseCoopers LLP to assist with certain tax reporting requirements of the Fund and its Shareholders.

Regulation

Futures exchanges in the United States are subject to regulation under the CEAct by the CFTC, the governmental agency having responsibility for regulation of futures exchanges and trading on those exchanges. No U.S. governmental agency regulates the over-the-counter (the "OTC") foreign exchange markets.

The CEAct and the CFTC also regulate the activities of commodity trading advisors and commodity pool operators and the CFTC has adopted regulations with respect to certain of such persons' activities. Pursuant to its authority, the CFTC requires a commodity pool operator (such as the Managing Owner) to keep accurate, current and orderly records with respect to each pool it operates. The CFTC may suspend the registration of a commodity pool operator if the CFTC finds that the operator has violated the CEAct or regulations thereunder and in certain other circumstances. Suspension, restriction or termination of the Managing Owner's registration as a commodity pool operator would prevent it, until such time (if any) as such registration were to be reinstated, from managing, and might result in the termination of, the Fund and the Master Fund. The CEAct gives the CFTC similar authority with respect to the activities of commodity trading advisors, such as the Managing Owner. If the registration of a managing owner as a commodity trading advisor were to be terminated,

Table of Contents

restricted or suspended, the managing owner would be unable, until such time (if any) as such registration were to be reinstated, to render trading advice to the Fund and the Master Fund. The Fund and the Master Fund themselves are not registered with the CFTC in any capacity.

The CEAct requires all futures commission merchants, such as the Commodity Broker, to meet and maintain specified fitness and financial requirements, segregate customer funds from proprietary funds and account separately for all customers' funds and positions, and to maintain specified books and records open to inspection by the staff of the CFTC.

The CEAct also gives the states certain powers to enforce its provisions and the regulations of the CFTC.

Shareholders are afforded certain rights for reparations under the CEAct. Shareholders may also be able to maintain a private right of action for certain violations of the CEAct. The CFTC has adopted rules implementing the reparation provisions of the CEAct which provide that any person may file a complaint for a reparations award with the CFTC for violation of the CEAct against a floor broker, futures commission merchant, introducing broker, commodity trading advisor, commodity pool operator, and their respective associated persons.

Pursuant to authority in the CEAct, the NFA has been formed and registered with the CFTC as a registered futures association. At the present time, the NFA is the only non-exchange self-regulatory organization for commodities professionals. NFA members are subject to NFA standards relating to fair trade practices, financial condition, and consumer protection. As the self-regulatory body of the commodities industry, the NFA promulgates rules governing the conduct of commodity professionals and disciplines those professionals who do not comply with such standards. The CFTC has delegated to the NFA responsibility for the registration of commodity trading advisors, commodity pool operators, futures commission merchants, introducing brokers and their respective associated persons and floor brokers. The Commodity Broker and the Managing Owner are members of the NFA (the Fund and the Master Fund themselves are not required to become members of the NFA).

The CFTC has no authority to regulate trading on foreign commodity exchanges and markets.

Employees

The Fund and the Master Fund have no employees.

Available Information

The Fund files with or submits to the SEC annual, quarterly and current reports and other information meeting the informational requirements of the Exchange Act. These reports are available on the Managing Owner's website at <http://dbfunds.db.com>. Investors may also inspect and copy these reports, proxy statements and other information, and related exhibits and schedules, at the Public Reference Room of the SEC at 100 F Street, NE, Washington, D.C. 20549. Investors may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site that contains reports, proxy and information statements and other information filed electronically by us with the SEC which are available on the SEC's Internet site at <http://www.sec.gov>.

The Fund also posts monthly performance reports and its annual report, as required by the CFTC, on the Managing Owner's website at the address listed above.

ITEM 1A. RISK FACTORS

An investment in the securities of the Fund involves a high degree of risk. Investors should consider carefully all of the risks described below, together with the other information contained in this report and the Prospectus, before making a decision to invest in the securities of the Fund. If any of the following risks occur, the business, financial condition and results of operations of the Fund may be adversely affected.

Table of Contents

Investment and Trading Related Risks

The Value of the Shares Relates Directly to the Value of the Futures Contracts and Other Assets Held by the Master Fund and Fluctuations in the Price of These Assets Could Materially Adversely Affect an Investment in the Fund's Shares.

The Shares are designed to reflect as closely as possible the changes, whether positive or negative, in the level of the Index, over time, through the Master Fund's portfolio of exchange traded futures contracts on its Index Commodities. The value of the Shares relates directly to the value of the portfolio of the Master Fund, less the liabilities (including estimated accrued but unpaid expenses) of the Fund and the Master Fund. The prices of the Index Commodities may fluctuate widely. Several factors may affect the prices of the Index Commodities, including, but not limited to:

Global supply and demand of the Index Commodities which may be influenced by such factors as forward selling by the various commodities producers, purchases made by the commodities producers to unwind their hedge positions and production and cost levels in the major markets of the Index Commodities;

Domestic and foreign interest rates and investors' expectations concerning interest rates;

Domestic and foreign inflation rates and investors' expectations concerning inflation rates;

Investment and trading activities of mutual funds, hedge funds and commodity funds; and

Global or regional political, economic or financial events and situations.

Net Asset Value May Not Always Correspond to Market Price and, as a Result, Baskets may be Created or Redeemed at a Value that Differs from the Market Price of the Shares.

The net asset value per Share will change as fluctuations occur in the market value of the Master Fund's portfolio. Investors should be aware that the public trading price of a Basket of Shares may be different from the net asset value of a Basket of Shares (*i.e.*, 200,000 Shares may trade at a premium over, or a discount to, net asset value of a Basket of Shares) and similarly the public trading price per Share may be different from its net asset value per Share. Consequently, an Authorized Participant may be able to create or redeem a Basket of Shares at a discount or a premium to the public trading price per Share. This price difference may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares are closely related, but not identical to, the same forces influencing the prices of the Index Commodities comprising the Index, trading individually or in the aggregate at any point in time. Investors also should note that the size of the Fund in terms of total assets held may change substantially over time and from time-to-time as Baskets are created and redeemed.

Authorized Participants or their clients or customers may have an opportunity to realize a riskless profit if they can purchase a Basket at a discount to the public trading price of the Shares or can redeem a Basket at a premium over the public trading price of the Shares. The Managing Owner expects that the exploitation of such arbitrage opportunities by Authorized Participants and their clients and customers will tend to cause the public trading price to track net asset value per Share closely over time.

The value of a Share may be influenced by non-concurrent trading hours between the NYSE Arca and the various futures exchanges on which the Index Commodities are traded. As a result, during periods when the NYSE Arca is open and the futures exchanges on which the Index Commodities are traded is closed, trading spreads and the resulting premium or discount on the Shares may widen and, therefore, increase the difference between the price of the Shares and the net asset value of the Shares.

Regulatory and Exchange Position Limits and Other Rules May Restrict the Creation of Baskets of the Fund and the Operation of the Master Fund.

Edgar Filing: DB Multi-Sector Commodity Master Trust - Form 10-K

CFTC and commodity exchange rules impose speculative position limits on market participants, including the Master Fund, trading in certain agricultural commodities. These position limits prohibit any person from holding a position of more than a specific number of such futures contracts.

It is possible that in the future, the CFTC may propose new rules with respect to position limits in agricultural commodities for traders engaged in indexed-based trading, such as the trading engaged in by the Master Fund. Depending on the outcome of any future CFTC rulemaking, the rules concerning position limits may be amended in a manner that is either detrimental or favorable to the Fund. For example, if the amended rules are detrimental to the Master Fund, the Fund's ability to issue new Baskets, or the Master Fund's ability to reinvest income in additional corn and wheat futures contracts, may be limited to the extent these activities would cause the Master Fund to exceed the applicable position limits. Limiting the size of the Fund may affect the correlation between the price of the Shares of the Fund, as traded on the NYSE Arca, and the net asset value of the Fund. That is, the inability to create additional Baskets could result in Shares trading at a premium or discount to net asset value of the Fund.

Table of Contents

The Index includes four commodities, corn, wheat, soybeans and sugar, that are subject to position limits imposed by the CFTC and the rules of the exchanges on which the futures contracts for these commodities trade. The Chicago Board of Trade limits are currently for corn futures: 22,000 contracts net all months combined, 13,500 contracts net a single month (other than the spot month), and 600 contracts for a spot month; for wheat futures: 6,500 contracts net all months combined, 5,000 contracts net a single month (other than a spot month), and 220 to 600 contracts for a spot month based on the month and certified stocks; for soybean futures: 5,500 contracts net all months combined, 3,500 contracts net a single month (other than a spot month), and 600 contracts for a spot month. The ICE Futures U.S. limits for sugar #11 futures (also known as NYBOT Sugar No. 11) are currently: 15,000 contracts net all months combined, 10,000 contracts net a single month (other than the spot month), and 5,000 contracts for a spot month.

Because the Master Fund is approaching or has reached position limits with respect to certain futures contracts comprising the Index, the Master Fund has commenced investing in other futures contracts based on commodities that comprise the Index and in futures contracts based on commodities other than commodities that comprise the Index that, in the commercially reasonable judgment of the Managing Owner, tend to exhibit trading prices that correlate with a futures contract that comprises the Index.

The Fund's Performance May Not Always Replicate Exactly the Changes in the Levels of the Index.

It is possible that the Fund's performance may not fully replicate the changes in the levels of the Index due to disruptions in the markets for the Index Commodities, the imposition of speculative position limits (as discussed in the above risk factor "Regulatory and Exchange Position Limits and Other Rules May Restrict the Creation of Baskets of the Fund and the Operation of the Master Fund"), or due to other extraordinary circumstances. As the Master Fund approaches or reaches position limits with respect to certain futures contracts comprising the Index, the Master Fund may commence investing in other futures contracts based on commodities that comprise the Index and in futures contracts based on commodities other than commodities that comprise the Index that, in the commercially reasonable judgment of the Managing Owner, tend to exhibit trading prices that correlate with a futures contract that comprises the Index. In addition, the Fund is not able to replicate exactly the changes in the levels of the Index because the total return generated by the Master Fund is reduced by expenses and transaction costs, including those incurred in connection with the Master Fund's trading activities, and increased by interest income from the Master Fund's holdings of short-term high credit quality fixed income securities. Tracking the Index requires trading of the Master Fund's portfolio with a view to tracking the Index over time and is dependent upon the skills of the Managing Owner and its trading principals, among other factors.

The Master Fund is Not Actively Managed and Tracks the Index During Periods in which the Index Is Flat or Declining as well as when the Index Is Rising.

The Master Fund is not actively managed by traditional methods. Therefore, if positions in any one or more of its Index Commodities are declining in value, the Master Fund will not close out such positions, except in connection with a change in the composition or weighting of the Index. The Managing Owner seeks to cause the net asset value to track the Index during periods in which the Index is flat or declining as well as when the Index is rising.

The NYSE Arca May Halt Trading in the Shares Which Would Adversely Impact Your Ability to Sell Shares.

The Shares are listed for trading on the NYSE Arca under the market symbol "DBA". Trading in Shares may be halted due to market conditions or, in light of NYSE Arca rules and procedures, for reasons that, in the view of the NYSE Arca, make trading in Shares inadvisable. In addition, trading is subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules that require trading to be halted for a specified period based on a specified market decline. There can be no assurance that the requirements necessary to maintain the listing of the Shares will continue to be met or will remain unchanged. The Fund and the Master Fund will be terminated if the Shares are delisted.

The Lack of an Active Trading Market for the Shares May Result in Losses on Your Investment in the Fund at the Time of Disposition of Your Shares.

Although the Shares are listed and traded on the NYSE Arca, there can be no guarantee that an active trading market for the Shares will be maintained. If you need to sell your Shares at a time when no active market for them exists, the price you receive for your Shares, assuming that you are able to sell them, likely will be lower than that you would receive if an active market did exist.

Table of Contents

The Shares Are a New Securities Product and Their Value Could Decrease if Unanticipated Operational or Trading Problems Arise.

The mechanisms and procedures governing the creation, redemption and offering of the Shares have been developed specifically for this securities product. Consequently, there may be unanticipated problems or issues with respect to the mechanics of the operations of the Fund and the Master Fund and the trading of the Shares that could have a material adverse effect on an investment in the Shares. In addition, although the Master Fund is not actively managed by traditional methods, to the extent that unanticipated operational or trading problems or issues arise, the Managing Owner's past experience and qualifications may not be suitable for solving these problems or issues.

As the Managing Owner and its Principals have Only a Limited History of Operating Investment Vehicles like the Fund or the Master Fund, their Experience may be Inadequate or Unsuitable to Manage the Fund or the Master Fund.

The Managing Owner was formed to be the managing owner of investment vehicles such as the Fund and the Master Fund and has only a limited history of past performance. The past performances of the Managing Owner's management of other commodity pools are no indication of its ability to manage an investment vehicle such as the Fund or the Master Fund. If the experience of the Managing Owner and its principals is not adequate or suitable to manage an investment vehicle such as the Fund and the Master Fund, the operations of the Fund and the Master Fund may be adversely affected.

You May Not Rely on Past Performance or Index Results in Deciding Whether to Buy Shares.

The Fund and the Master Fund have a limited performance history upon which to evaluate your investment in the Fund and the Master Fund. Although past performance is not necessarily indicative of future results, if the Fund and the Master Fund had a longer performance history, such performance history might (or might not) provide you with more information on which to evaluate an investment in the Fund and the Master Fund. Likewise, the Index has a limited history which might not be indicative of future Index results, or of the future performance of the Fund or the Master Fund. Therefore, you will have to make your decision to invest in the Fund on the basis of limited information.

Fewer Representative Commodities May Result In Greater Index Volatility.

The Index is concentrated in terms of the number of commodities represented. The Fund is concentrated in 5 or fewer commodities. You should be aware that other commodities indexes are more diversified in terms of both the number and variety of commodities included. Concentration in fewer commodities may result in a greater degree of volatility in an Index and the net asset value of the Fund and Master Fund which track the Index under specific market conditions and over time.

Price Volatility May Possibly Cause the Total Loss of Your Investment.

Futures contracts have a high degree of price variability and are subject to occasional rapid and substantial changes. Consequently, you could lose all or substantially all of your investment in the Fund.

The following table* reflects various measures of volatility** of the Index as calculated on an excess return basis:

Volatility Type	Volatility
Daily volatility over full history	16.02%
Average rolling 3 month daily volatility	15.07%
Monthly return volatility	15.90%
Average annual volatility	15.03%

Table of Contents

The following table reflects the daily volatility on an annual basis of the Index:

Year	Daily Volatility
1988***	9.60%
1989	15.30%
1990	12.77%
1991	15.70%
1992	12.02%
1993	12.81%
1994	13.20%
1995	11.56%
1996	14.73%
1997	12.85%
1998	14.13%
1999	17.49%
2000	15.71%
2001	14.55%
2002	15.07%
2003	12.47%
2004	19.40%
2005	16.31%
2006	16.57%
2007	14.65%
2008*	28.74%

Past Index results are not necessarily indicative of future changes, positive or negative, in the Index levels.

* As of December 31, 2008.

**Volatility, for these purposes means the following:

Daily Volatility: The relative rate at which the price of the Index moves up and down, found by calculating the annualized standard deviation of the daily change in price.

Monthly Return Volatility: The relative rate at which the price of the Index moves up and down, found by calculating the annualized standard deviation of the monthly change in price.

Average Annual Volatility: The average of yearly volatilities for a given sample period. The yearly volatility is the relative rate at which the price of the Index moves up and down, found by calculating the annualized standard deviation of the daily change in price for each business day in the given year.

*** As of July 31, 1988.

Unusually Long Peak-to-Valley Drawdown Periods With Respect To the Index May Be Reflected in Equally Long Peak-to-Valley Drawdown Periods with Respect to the Performance of the Shares.

Although past Index levels are not necessarily indicative of future Index levels, the peak-to-valley drawdown periods that the Index has experienced has been unusually long and has lasted for multi-year drawdown periods.

Because it is expected that the Fund's performance will track the performance of the Index, the Fund would suffer a continuous drawdown during the period that the Index suffers such a drawdown period, and in turn, the value of your Shares will also suffer.

Fees and Commissions are Charged Regardless of Profitability and May Result in Depletion of Assets.

Edgar Filing: DB Multi-Sector Commodity Master Trust - Form 10-K

The Fund is indirectly subject to the fees and expenses described herein which are payable irrespective of profitability. Such fees and expenses include asset-based fees of 0.75% per annum. Additional charges include brokerage fees of approximately 0.16% per annum in the aggregate and selling commissions. The Fund is expected to earn interest income at an annual rate of 0.29% per annum, based upon the yield on 3-month U.S. Treasury bills as of February 18, 2009. Because the Fund's current interest income does not exceed its fees and expenses (other than selling commissions), the Fund

Table of Contents

will need to have a positive performance that exceeds the difference between the Fund's interest income and its fees and expenses (other than selling commissions) in order to break even. If the aggregate of the Fund's performance and interest income do not exceed the Fund's fees and expenses described herein, then the expenses of the Master Fund could, over time, result in losses to your investment therein. You may never achieve profits, significant or otherwise.

You Cannot Be Assured of the Managing Owner's Continued Services, Which Discontinuance May Be Detrimental to the Fund.

You cannot be assured that the Managing Owner will be willing or able to continue to service the Fund and the Master Fund for any length of time. If the Managing Owner discontinues its activities on behalf of the Fund and the Master Fund, the Fund and the Master Fund may be adversely affected.

Possible Illiquid Markets May Exacerbate Losses.

Futures positions cannot always be liquidated at the desired price. It is difficult to execute a trade at a specific price when there is a relatively small volume of buy and sell orders in a market. A market disruption, such as when foreign governments may take or be subject to political actions which disrupt the markets in their currency or major exports, can also make it difficult to liquidate a position.

There can be no assurance that market illiquidity will not cause losses for the Fund. The large size of the positions which the Master Fund may acquire on behalf of the Fund increases the risk of illiquidity by both making its positions more difficult to liquidate and increasing the losses incurred while trying to do so.

You May Be Adversely Affected by Redemption Orders that Are Subject To Postponement, Suspension or Rejection Under Certain Circumstances.

The Fund may, in its discretion, suspend the right of redemption or postpone the redemption settlement date, (1) for any period during which an emergency exists as a result of which the redemption distribution is not reasonably practicable, or (2) for such other period as the Managing Owner determines to be necessary for the protection of the Shareholders. In addition, the Fund will reject a redemption order if the order is not in proper form as described in the participant agreement among the Authorized Participant, the Managing Owner and the Managing Owner in its capacity as managing owner of the Fund or if the fulfillment of the order, in the opinion of its counsel, might be unlawful. Any such postponement, suspension or rejection could adversely affect a redeeming Authorized Participant. For example, the resulting delay may adversely affect the value of the Authorized Participant's redemption proceeds if the net asset value of the Fund declines during the period of delay. The Fund disclaims any liability for any loss or damage that may result from any such suspension or postponement.

Because the Futures Contracts Have No Intrinsic Value, the Positive Performance of Your Investment Is Wholly Dependent Upon an Equal and Offsetting Loss.

Futures trading is a risk transfer economic activity. For every gain there is an equal and offsetting loss rather than an opportunity to participate over time in general economic growth. Unlike most alternative investments, an investment in Shares does not involve acquiring any asset with intrinsic value. Overall stock and bond prices could rise significantly and the economy as a whole prosper while Shares trade unprofitably.

Failure of Commodity Futures Markets to Exhibit Low to Negative Correlation to General Financial Markets Will Reduce Benefits of Diversification and May Exacerbate Losses to Your Portfolio.

Historically, commodity futures' returns have tended to exhibit low to negative correlation with the returns of other assets such as stocks and bonds. Although commodity futures trading can provide a diversification benefit to investor portfolios because of its low to negative correlation with other financial assets, the fact that the Index is not 100% negatively correlated with financial assets such as stocks and bonds means that the Fund cannot be expected to be automatically profitable during unfavorable periods for the stock or bond market, or vice-versa. If the Shares perform in a manner that correlates with the general financial markets or do not perform successfully, you will obtain no diversification benefits by investing in the Shares and the Shares may produce no gains to offset your losses from other investments.

Table of Contents

Shareholders Will Not Have the Protections Associated With Ownership of Shares in an Investment Company Registered Under the Investment Company Act of 1940.

Neither the Fund nor the Master Fund is registered as an investment company under the Investment Company Act of 1940, and is not required to register under such Act. Consequently, Shareholders do not have the regulatory protections provided to the investors in registered and regulated investment companies.

Various Actual and Potential Conflicts of Interest May Be Detrimental to Shareholders.

The Fund and the Master Fund are subject to actual and potential conflicts of interest involving the Managing Owner, various commodity futures brokers and Authorized Participants. The Managing Owner and its principals, all of whom are engaged in other investment activities, are not required to devote substantially all of their time to the business of the Fund and the Master Fund, which also presents the potential for numerous conflicts of interest with the Fund and the Master Fund. As a result of these and other relationships, parties involved with the Fund and the Master Fund have a financial incentive to act in a manner other than in the best interests of the Fund, the Master Fund and the Shareholders. The Managing Owner has not established any formal procedure to resolve conflicts of interest. Consequently, investors are dependent on the good faith of the respective parties subject to such conflicts to resolve them equitably. Although the Managing Owner attempts to monitor these conflicts, it is extremely difficult, if not impossible, for the Managing Owner to ensure that these conflicts do not, in fact, result in adverse consequences to the Shareholders.

The Fund and the Master Fund may be subject to certain conflicts with respect to the Commodity Broker, including, but not limited to, conflicts that result from receiving greater amounts of compensation from other clients, or purchasing opposite or competing positions on behalf of third party accounts traded through the Commodity Broker.

Tax Related Risks

Shareholders of the Fund Will Be Subject to Taxation on Their Share of the Fund's Taxable Income (Including the Fund's Share of the Master Fund's Taxable Income), Whether or Not They Receive Cash Distributions.

Shareholders of the Fund will be subject to U.S. federal income taxation and, in some cases, state, local, or foreign income taxation on their share of the Fund's taxable income (including the Master Fund's taxable income allocable to the Fund), whether or not they receive cash distributions from the Fund. Shareholders of the Fund may not receive cash distributions equal to their share of the Fund's taxable income (including the Master Fund's taxable income) or even the tax liability that results from such income.

Items of Income, Gain, Loss and Deduction with respect to Shares could be Reallocated if the IRS does not Accept the Assumptions or Conventions Used by the Fund or the Master Fund in Allocating Such Tax Items.

U.S. federal income tax rules applicable to partnerships are complex and often difficult to apply to publicly traded partnerships. The Fund and the Master Fund will apply certain assumptions and conventions in an attempt to comply with the applicable rules and to report items of income, gain, loss and deduction to Shareholders of the Fund in a manner that reflects the Shareholders' beneficial interest in such tax items, but these assumptions and conventions may not be considered to be in compliance with all aspects of the applicable tax requirements. It is possible that the IRS will successfully assert that the conventions and assumptions used by the Fund or the Master Fund do not satisfy the technical requirements of the Code and/or Treasury Regulations and could require that items of income, gain, loss or deduction be adjusted or reallocated in a manner that adversely affects one or more Shareholders.

The Current Treatment of Long Term Capital Gains Under Current U.S. Federal Income Tax Law May Be Adversely Affected, Changed or Repealed in the Future.

Under current law, long term capital gains are taxed to non-corporate investors at a maximum U.S. federal income tax rate of 15%. This tax treatment may be adversely affected, changed or repealed by future changes in tax laws at any time and is currently scheduled to expire for tax years beginning after December 31, 2010.

PROSPECTIVE INVESTORS ARE STRONGLY URGED TO CONSULT THEIR OWN TAX ADVISERS AND COUNSEL WITH RESPECT TO THE POSSIBLE TAX CONSEQUENCES TO THEM OF AN INVESTMENT IN THE SHARES; SUCH TAX CONSEQUENCES MAY DIFFER IN RESPECT OF DIFFERENT INVESTORS.

Table of Contents

Other Risks

Failure of Futures Commission Merchants or Commodity Brokers to Segregate Assets May Increase Losses; Despite Segregation of Assets, the Master Fund Remains at Risk of Significant Losses Because the Master Fund May Only Receive a Pro-Rata Share of the Assets, or No Assets at All.

The CEAct requires a clearing broker to segregate all funds received from customers from such broker's proprietary assets. If the Commodity Broker fails to do so, the assets of the Master Fund might not be fully protected in the event of the Commodity Broker's bankruptcy. Furthermore, in the event of the Commodity Broker's bankruptcy, the Master Fund Units could be limited to recovering either a pro rata share of all available funds segregated on behalf of the Commodity Broker's combined customer accounts or the Master Fund Units may not recover any assets at all, even though certain property specifically traceable to the Master Fund was held by the Commodity Broker. The Commodity Broker may, from time-to-time, have been the subject of certain regulatory and private causes of action.

In the event of a bankruptcy or insolvency of any exchange or a clearing house, the Master Fund could experience a loss of the funds deposited through its Commodity Broker as margin with the exchange or clearing house, a loss of any unrealized profits on its open positions on the exchange, and the loss of profits on its closed positions on the exchange.

Regulatory Changes or Actions May Alter the Nature of an Investment in the Fund.

Considerable regulatory attention has been focused on non-traditional investment pools which are publicly distributed in the United States. There is a possibility of future regulatory changes altering, perhaps to a material extent, the nature of an investment in the Fund or the ability of the Fund to continue to implement its investment strategy.

The futures markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the retroactive implementation of speculative position limits or higher margin requirements, the establishment of daily price limits and the suspension of trading. The regulation of futures transactions in the United States is a rapidly changing area of law and is subject to modification by government and judicial action. The effect of any future regulatory change on the Fund is impossible to predict, but could be substantial and adverse.

Lack of Independent Advisers Representing Investors.

The Managing Owner has consulted with counsel, accountants and other advisers regarding the formation and operation of the Fund and the Master Fund. No counsel has been appointed to represent you in connection with the offering of the Shares. Accordingly, you should consult your own legal, tax and financial advisers regarding the desirability of an investment in the Shares.

Possibility of Termination of the Fund or Master Fund May Adversely Affect Your Portfolio.

The Managing Owner may withdraw from the Fund upon 120 days' notice, which would cause the Fund and the Master Fund to terminate unless a substitute managing owner were obtained. Owners of 50% of the Shares have the power to terminate the Fund. If it is so exercised, investors who may wish to continue to invest in the Fund's Index through a fund vehicle will have to find another vehicle, and may not be able to find another vehicle that offers the same features as the Fund. Such detrimental developments could cause you to liquidate your investments and upset the overall maturity and timing of your investment portfolio. If the registrations with the CFTC or memberships in the NFA of the Managing Owner or the Commodity Broker were revoked or suspended, such entity would no longer be able to provide services to the Fund and the Master Fund.

Shareholders Do Not Have the Rights Enjoyed by Investors in Certain Other Vehicles.

As interests in separate series of a Delaware statutory trust, the Shares have none of the statutory rights normally associated with the ownership of shares of a corporation (including, for example, the right to bring oppression or derivative actions). In addition, the Shares have limited voting and distribution rights (for example, Shareholders do not have the right to elect directors and the Fund is not required to pay regular distributions, although the Fund may pay distributions at the discretion of the Managing Owner).

Table of Contents

An Investment in the Shares May Be Adversely Affected by Competition From Other Methods of Investing in Commodities.

The Fund and the Master Fund constitute a relatively new, and thus initially untested, type of investment vehicle. They compete with other financial vehicles, including other commodity pools, hedge funds, traditional debt and equity securities issued by companies in the commodities industry, other securities backed by or linked to such commodities, and direct investments in the underlying commodities or commodity futures contracts. Market and financial conditions, and other conditions beyond the Managing Owner's control, may make it more attractive to invest in other financial vehicles or to invest in such commodities directly, which could limit the market for the Shares and reduce the liquidity of the Shares.

Competing Claims Over Ownership of Intellectual Property Rights Related to the Fund Could Adversely Affect the Fund and an Investment in the Shares.

While the Managing Owner believes that all intellectual property rights needed to operate the Fund and the Master Fund are either owned by or licensed to the Managing Owner or have been obtained, third parties may allege or assert ownership of intellectual property rights which may be related to the design, structure and operations of the Fund and the Master Fund. To the extent any claims of such ownership are brought or any proceedings are instituted to assert such claims, the negotiation, litigation or settlement of such claims, or the ultimate disposition of such claims in a court of law if a suit is brought, may adversely affect the Fund and the Master Fund and an investment in the Shares, for example, resulting in expenses or damages or the termination of the Fund and the Master Fund.

The Value of the Shares Will be Adversely Affected if the Fund or the Master Fund is Required to Indemnify the Trustee or the Managing Owner.

Under the Trust Agreements, the Trustee and the Managing Owner have the right to be indemnified for any liability or expense either incurs without negligence or misconduct. That means the Managing Owner may require the assets of the Master Fund to be sold in order to cover losses or liability suffered by it or by the Trustee. Any sale of that kind would reduce the net asset value of the Master Fund and the value of the Shares.

The Net Asset Value Calculation of the Master Fund May Be Overstated or Understated Due to the Valuation Method Employed When a Settlement Price is not Available on the Date of Net Asset Value Calculation.

Calculating the net asset value of the Master Fund (and, in turn, the Fund) includes, in part, any unrealized profits or losses on open commodity futures contracts. Under normal circumstances, the net asset value of the Master Fund reflects the settlement price of open commodity futures contracts on the date when the net asset value is being calculated. However, if a commodity futures contract traded on an exchange (both U.S. and, to the extent it becomes applicable, non-U.S. exchanges) could not be liquidated on such day (due to the operation of daily limits or other rules of the exchange upon which that position is traded or otherwise), the settlement price on the most recent day on which the position could have been liquidated will be the basis for determining the market value of such position for such day. In such a situation, there is a risk that the calculation of the net asset value of the Master Fund on such day will not accurately reflect the realizable market value of such commodity futures contract. For example, daily limits are generally triggered in the event of a significant change in market price of a commodity futures contract. Therefore, as a result of the daily limit, the current settlement price is unavailable. Because the settlement price on the most recent day on which the position could have been liquidated would be used in lieu of the actual settlement price on the date of determination, there is a risk that the resulting calculation of the net asset value of the Master Fund (and, in turn, the Fund) could be under or overstated, perhaps to a significant degree.

Although the Shares are Limited Liability Investments, Certain Circumstances such as Bankruptcy of the Fund or Indemnification of the Fund by the Shareholders will Increase the Shareholders' Liability.

The Shares are limited liability investments; investors may not lose more than the amount that they invest plus any profits recognized on their investment. However, Shareholders could be required, as a matter of bankruptcy law, to return to the estate of the Fund any distribution they received at a time when the Fund was in fact insolvent or in violation of its Trust Agreement. In addition, although the Managing Owner is not aware of this provision ever having been invoked in the case of any public futures fund, Shareholders agree in the Trust Agreement that they will indemnify the Fund for any harm suffered by it as a result of:

Shareholders' actions unrelated to the business of the Fund, or

Table of Contents

Taxes imposed on the Shares by the states or municipalities in which such investors reside.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Fund and the Master Fund do not own or use physical properties in the conduct of their business. Their assets consist of futures contracts, cash, United States Treasury Obligations and may consist of other high credit quality short-term fixed income securities. The Managing Owner's headquarters are located at 60 Wall Street, New York, New York 10005.

ITEM 3. LEGAL PROCEEDINGS

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

The Shares of the Fund traded on the NYSE Alternext from January 5, 2007 to November 25, 2008 and have been trading on the NYSE Arca since November 25, 2008 under the symbol DBA.

The following table sets forth, for the calendar quarters indicated, the high and low sales prices per Share, as reported on the applicable exchange.

Quarter ended	Shares	
	High	Low
March 31, 2008	\$42.98	\$33.43
June 30, 2008	\$42.41	\$35.35
September 30, 2008	\$42.09	\$30.21
December 31, 2008	\$30.00	\$21.97
Quarter ended	High	Low
March 31, 2007 (from commencement of investment trading on January 5, 2007)	\$27.50	\$24.66
June 30, 2007	\$28.15	\$24.72
September 30, 2007	\$29.95	\$25.60
December 31, 2007	\$33.54	\$27.78

Holdings

Edgar Filing: DB Multi-Sector Commodity Master Trust - Form 10-K

As of December 31, 2008, the Fund had 81,116 holders of record of its Shares.

Distributions

The Managing Owner has sole discretion in determining what distributions, if any, the Fund will make to Shareholders.

Table of Contents

On December 30, 2008, the Fund paid \$0.45 per General Share, to the Managing Owner, a total distribution of \$18.00. On December 30, 2008, the Fund paid \$0.45 per Share to each Shareholder of record on December 17, 2008, a total distribution of \$18.1 million. All distributions were made from net investment income.

On December 28, 2007, the Fund paid \$0.45 per General Share, to the Managing Owner, a total distribution of \$18.00. On December 28, 2007, the Fund paid \$0.45 per Share to each Shareholder of record on December 19, 2007, a total distribution of \$13.7 million. Prior to this, no distributions had been paid on the Fund's Shares or General Shares. All distributions were made from net investment income.

Sales of Unregistered Securities and Use of Proceeds of Registered Securities

(a) There have been no unregistered sales of the Fund's securities. No Fund securities are authorized for issuance by the Fund under equity compensation plans.

(b) The Registrant's Registration Statement on Form S-1 (Registration No. 333-135422-15) was declared effective on January 3, 2007 with information with respect to the use of proceeds from the sale of Shares being disclosed therein. A Registration Statement on Form S-1 was declared effective on May 15, 2007 (Registration No. 333-142163-09) and on January 15, 2008 (File No. 333-148613-13) with information with respect to the use of proceeds from the sale of Shares being disclosed therein. A Registration Statement on Form S-1 was declared effective on July 14, 2008 (Registration No. 333-150501-09) with information with respect to the use of proceeds from the sale of Shares being disclosed therein. Accordingly, upon effectiveness, the Registrant's Registration Statement on Form S-1 (Registration No. 333-150501-09) also acts as Post-Effective Amendment No. 1 to File No. 333-148613-13, Post-Effective Amendment No. 2 to File No. 333-142163-09 and acts as Post-Effective Amendment No. 3 to the Registrant's Registration Statement on Form S-1 File No. 333-135422-15, which also contained this information. The Shares commenced trading on the NYSE Alternext on January 5, 2007 and, as of November 25, 2008, are listed for trading on the NYSE Arca.

The proceeds from the sale of the Shares are used to purchase Master Fund Limited Units. The Master Fund uses the proceeds from the sale of the Master Fund Limited Units for general corporate purposes in accordance with its investment objectives and policies.

For the Year Ended December 31, 2008, 64.6 million Shares were created for \$2,423.7 million and 57.6 million Shares were redeemed for \$1,985.4 million. For the Three Months Ended December 31, 2008, 3.4 million Shares were created for \$84.5 million and 12.6 million Shares were redeemed for \$313.3 million. On December 31, 2008, 41.0 million Shares were outstanding for a market capitalization of \$1,073.4 million.

For the Period Ended December 31, 2007, 35.2 million Shares were created for \$986.2 million and 1.2 million Shares were redeemed for \$32.8 million. For the Three Months Ended December 31, 2007, 13.0 million Shares were created for \$401.3 million and 0.2 million Shares were redeemed for \$6.6 million. On December 31, 2007, 34.0 million Shares were outstanding for a market capitalization of \$1,121.7 million.

(c) The following table summarizes the redemptions by Authorized Participants during the Year Ended December 31, 2008 and the Period Ended December 31, 2007:

Period of Redemption	Total Number of Shares Redeemed	Average Price Paid per Share
Year Ended December 31, 2008	57,600,000	\$34.47
Period Ended December 31, 2007	1,200,000	\$27.30

ITEM 6. SELECTED FINANCIAL DATA

The following table summarizes the relevant 2008 and 2007 financial data for the Fund and should be read in conjunction with the Fund's financial statements, and the notes and schedules related thereto, which are included in this report. The Fund commenced investment operations on January 3, 2007; therefore, no operating results occurred prior to that date. As a result, there is no comparable financial data presented below

for 2006, 2005 and 2004.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This information should be read in conjunction with the consolidated financial statements and notes included in Item 8 of Part I of this Annual Report (the "Report"). The discussion and analysis which follows may contain trend analysis and other forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 which reflect our current views with respect to future events and financial results. Words such as anticipate, expect, intend, plan, believe, seek, outlook and estimate as well as similar words and phrases signify forward-looking statements. PowerShares DB Agriculture Fund's forward-looking statements are not guarantees of future results and conditions and important factors, risks and uncertainties may cause our actual results to differ materially from those expressed in our forward-looking statements.

You should not place undue reliance on any forward-looking statements. Except as expressly required by the Federal securities laws, DB Commodity Services LLC (the "Managing Owner") undertakes no obligation to publicly update or revise any forward-looking statements or the risks, uncertainties or other factors described in this Report, as a result of new information, future events or changed circumstances or for any other reason after the date of this Report.

Overview / Introduction

The Fund and the Master Fund seek to track changes, whether positive or negative, in the level of the Deutsche Bank Liquid Commodity Index Optimum Yield Agriculture Excess Return (DBLCI-OY Agriculture ER, or the Index), over time, plus the excess, if any, of the Master Fund's interest income from its holdings of United States Treasury Obligations and other high credit quality short-term fixed income securities over the expenses of the Fund and the Master Fund. The Shares are designed for investors who want a cost-effective and convenient way to invest in a group of commodity futures on U.S. and non-U.S. markets.

The Fund pursues its investment objective by investing substantially all of its assets in the Master Fund. The Master Fund pursues its investment objective by investing in a portfolio of exchange traded futures contracts that expire in a specific month and trade on a specific exchange (the Index Contracts) in the commodities comprising the Index (the Index Commodities). The Index Commodities are corn, wheat, soybeans and sugar. The Index is composed of notional amounts of each of the Index Commodities. The Master Fund's portfolio also includes United States Treasury Obligations and other high credit quality short-term fixed income securities for deposit with the Master Fund's Commodity Broker as margin.

The Commodity Futures Trading Commission (the CFTC) and commodity exchanges impose position limits on market participants trading in certain commodities included in the Index. As disclosed in the Fund's Prospectus, if the Managing Owner determines in its commercially reasonable judgment that it has become impracticable or inefficient for any reason for the Master Fund to gain full or partial exposure to any Index Commodity by investing in a specific Index Contract, the Master Fund may invest in a futures contract referencing the particular Index Commodity other than the Index Contract or, in the alternative, invest in other futures contracts not based on the particular Index Commodity if, in the commercially reasonable judgment of the Managing Owner, such futures contracts tend to exhibit trading prices that correlate with such Index Commodity. For example, in October 2007, the Master Fund reached position limits with respect to the CBOT July wheat futures contract, which was an Index Contract. Since that time, when required to buy wheat to track the Index, the Master Fund has been purchasing CBOT wheat futures contracts expiring in different months as well as wheat futures trading on other United States futures exchanges.

The sponsor of the Index (the Index Sponsor) is Deutsche Bank AG London. DBLCI and Deutsche Bank Liquid Commodity Index are trademarks of Deutsche Bank AG. Trademark applications in the United States are pending with respect to both the Fund and the Index. Deutsche Bank AG London is an affiliate of the Trust, the Fund, the Master Trust, the Master Fund and the Managing Owner.

Under the Trust Agreements of the Trust and the Master Trust, Wilmington Trust Company, the Trustee of the Trust and the Master Trust, has delegated to the Managing Owner the exclusive management and control of all aspects of the business of the Trust, the Fund and the Master Trust and Master Fund. The Trustee will have no duty or liability to supervise or monitor the performance of the Managing Owner, nor will the Trustee have any liability for the acts or omissions of the Managing Owner.

Table of Contents

The Index Sponsor obtains information for inclusion in, or for use in the calculation of, the Index from sources the Index Sponsor considers reliable. None of the Index Sponsor, the Managing Owner, the Trust, the Fund, the Master Trust, the Master Fund or any of their respective affiliates accepts responsibility for or guarantees the accuracy and/or completeness of the Index or any data included in the Index.

The Shares are intended to provide investment results that generally correspond to the changes, positive or negative, in the levels of the Index over time. The value of the Shares is expected to fluctuate in relation to changes in the value of the Master Fund's portfolio. The market price of the Shares may not be identical to the net asset value per Share, but these two valuations are expected to be very close.

Performance Summary

This Report covers the three months ended December 31, 2008 and 2007 (herein referred to as the Three Months Ended December 31, 2008 and the Three Months Ended December 31, 2007), the year ended December 31, 2008 (herein referred to as the Year Ended December 31, 2008) and the period from January 3, 2007 (commencement of investment operations) to December 31, 2007 (herein referred to as the Period Ended December 31, 2007). The Fund commenced trading on the American Stock Exchange (now known as the NYSE Alternext US LLC (the NYSE Alternext)) on January 5, 2007, and, as of November 25, 2008, is listed on the NYSE Arca, Inc. (the NYSE Arca).

Performance of the Fund and the exchange traded Shares are detailed below in Results of Operations. Past performance of the Fund is not necessarily indicative of future performance.

The Index is intended to reflect the change in market value of the Index Commodities. In turn, the Index is intended to reflect the agriculture sector. The Deutsche Bank Liquid Commodity Index-Optimum Yield Agriculture Total Return (the DBLCI-OY Agriculture TR) consists of the Index plus 3 month United States Treasury Obligations returns. Past Index results are not necessarily indicative of future changes, positive or negative, in the Index closing levels.

The section Summary of DBLCI-OY Agriculture TR and Underlying Index Commodity Returns for the Three Months Ended December 31, 2008 and 2007 and the Year Ended December 31, 2008 and the Period Ended December 31, 2007 below provides an overview of the changes in the closing levels of DBLCI-OY Agriculture TR by disclosing the change in market value of each underlying component Index Commodity through a surrogate (and analogous) index plus 3 month United States Treasury Obligations returns. Please note also that the Fund's objective is to track the Index (not DBLCI-OY Agriculture TR) and the Fund does not attempt to outperform or underperform the Index. The Index employs the optimum yield roll method with the objective of mitigating the negative effects of contango, the condition in which distant delivery prices for futures exceed spot prices, and maximizing the positive effects of backwardation, a condition opposite of contango.

Table of Contents

Summary of DBLCI-OY Agriculture TR and Underlying Index Commodity Returns for the Three Months Ended
December 31, 2008 and 2007 and the Year Ended December 31, 2008 and the Period Ended December 31, 2007.

Underlying Index	Total returns for index in the DBLCI-OY Agriculture TR			
	Three Months Ended	Year Ended	Three Months Ended	Period Ended
	December 31, 2008	December 31, 2008	December 31, 2007	December 31, 2007
DB Corn Indices	(20.77)%	(17.35)%	13.75%	21.42%
DB Wheat Indices	(12.97)%	(25.43)%	14.87%	63.02%
DB Soybean Indices	(7.40)%	(12.50)%	14.58%	62.00%
DB Sugar Indices	(9.31)%	(20.62)%	12.88%	(8.11)%
TOTAL RETURN	(12.59)%	(18.75)%	13.60%	34.71%

If the Fund's interest income from its holdings of fixed income securities were to exceed the Fund's fees and expenses, the total return on an investment in the Fund is expected to outperform the Index and underperform the DBLCI-OY Agriculture TR. The only difference between the Index and the DBLCI-OY Agriculture TR is that the Index does not include interest income from a hypothetical basket of fixed income securities while the DBLCI-OY Agriculture TR does include such a component. The difference between the Index and the DBLCI-OY Agriculture TR is attributable entirely to the hypothetical interest income from this hypothetical basket of fixed income securities. If the Fund's interest income from its holdings of fixed-income securities exceeds the Fund's fees and expenses, then the amount of such excess is expected to be distributed periodically. The market price of the Shares is expected to closely track the Index. The total return on an investment in the Fund over any period is the sum of the capital appreciation or depreciation of the Shares over the period, plus the amount of any distributions during the period. Consequently the Fund's total return is expected to outperform the Index by the amount of the excess, if any, of its interest income over its fees and expenses but, as a result of the Fund's fees and expenses, the total return on the Fund is expected to underperform the DBLCI-OY Agriculture TR. If the Fund's fees and expenses were to exceed the Fund's interest income from its holdings of fixed income securities, the total return on an investment in the Fund is expected to underperform the Index.

Net Asset Value

Net asset value means the total assets of the Master Fund, including, but not limited to, all futures, cash and investments less total liabilities of the Master Fund, each determined on the basis of U.S. generally accepted accounting principles, consistently applied under the accrual method of accounting. In particular, net asset value includes any unrealized appreciation or depreciation on open commodity futures contracts, and any other credit or debit accruing to the Master Fund but unpaid or not received by the Master Fund. All open commodity futures contracts will be calculated at their then current market value, which will be based upon the settlement price for that particular commodity futures contract traded on the applicable exchange on the date with respect to which net asset value is being determined; provided, that if a commodity futures contract could not be liquidated on such day, due to the operation of daily limits or other rules of the exchange upon which that position is traded or otherwise, the settlement price on the most recent day on which the position could have been liquidated will be the basis for determining the

Edgar Filing: DB Multi-Sector Commodity Master Trust - Form 10-K

market value of such position for such day. The Managing Owner may in its discretion (and only under extraordinary circumstances, including, but not limited to, periods during which a settlement price of a futures contract is not available due to exchange limit orders or force majeure type events such as systems failure, natural or man-made disaster, act of God, armed conflict, act of terrorism, riot or labor disruption or any similar intervening circumstance) value any asset of the Master Fund pursuant to such other principles as the Managing Owner deems fair and equitable so long as such principles are consistent with normal industry standards. Interest earned on the Master Fund's brokerage account is accrued monthly. The amount of any distribution is a liability of the Master Fund from the day when the distribution is declared until it is paid.

The Fund invests substantially all of its assets in the Master Fund in a master-feeder structure. The Fund holds no investment assets other than Master Fund Limited Units. The Fund is the majority Master Fund Limited Unit owner and the Managing Owner holds a minority interest in the Master Fund. Each Share issued by the Fund correlates with the Master Fund Limited Unit issued by the Master Fund and held by the Fund.

Table of Contents

Net asset value per Master Fund Limited Unit and Master Fund General Unit (collectively, Master Fund Units) is the net asset value of the Master Fund divided by the number of outstanding Master Fund Units. Because there is a one-to-one correlation between Shares and the Master Fund Limited Units, the net asset value per Share and the net asset value per Master Fund Limited Unit are equal.

Critical Accounting Policies

The Fund s and Master Fund s critical accounting policies are as follows:

Preparation of the financial statements and related disclosures in conformity with U.S. generally accepted accounting principles requires the application of appropriate accounting rules and guidance, as well as the use of estimates, and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expense and related disclosure of contingent assets and liabilities during the reporting period of the consolidated financial statements and accompanying notes. Both the Fund s and the Master Fund s application of these policies involve judgments and actual results may differ from the estimates used.

The Master Fund holds a significant portion of its assets in futures contracts and United States Treasury Obligations, both of which are recorded on a trade date basis and at fair value in the consolidated financial statements, with changes in fair value reported in the consolidated statement of income and expenses.

The use of fair value to measure financial instruments, with related unrealized gains or losses recognized in earnings in each period is fundamental to the Fund s financial statements. The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (the exit price).

In determining fair value of United States Treasury Obligations and commodity futures contracts, the Fund uses unadjusted quoted market prices in active markets. FASB Statement No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The objective of a fair value measurement is to determine the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The hierarchy gives the highest priority to unadjusted quoted prices for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. See Note 4(c) within the financial statements in Item 8 for further information regarding FASB Statement No. 157.

When market closing prices are not available, the Managing Owner may value an asset of the Master Fund pursuant to policies the Managing Owner has adopted, which are consistent with normal industry standards.

Realized gains (losses) and changes in unrealized gain (loss) on open positions are determined on a specific identification basis and recognized in the consolidated statement of income and expenses in the period in which the contract is closed or the changes occur, respectively.

Interest income on United States Treasury Obligations is recognized on an accrual basis when earned. Premiums and discounts are amortized or accreted over the life of the United States Treasury Obligations.

Market Risk

Trading in futures contracts involves the Master Fund entering into contractual commitments to purchase a particular commodity at a specified date and price. The market risk associated with the Master Fund s commitments to purchase commodities is limited to the gross or face amount of the contracts held.

Table of Contents

The Master Fund's exposure to market risk is also influenced by a number of factors including the volatility of interest rates and foreign currency exchange rates, the liquidity of the markets in which the contracts are traded and the relationships among the contracts held. The inherent uncertainty of the Master Fund's trading as well as the development of drastic market occurrences could ultimately lead to a loss of all or substantially all of the investors' capital.

Credit Risk

When the Master Fund enters into futures contracts, the Master Fund will be exposed to credit risk that the counterparty to the contract will not meet its obligations. The counterparty for futures contracts traded on United States and on most foreign futures exchanges is the clearing house associated with the particular exchange. In general, clearing houses are backed by their corporate members who may be required to share in the financial burden resulting from the nonperformance by one of their members and, as such, should significantly reduce this credit risk. In cases where the clearing house is not backed by the clearing members (*i.e.*, some foreign exchanges), it may be backed by a consortium of banks or other financial institutions. There can be no assurance that any counterparty, clearing member or clearinghouse will meet its obligations to the Master Fund.

The Commodity Broker, when acting as the Master Fund's futures commission merchant in accepting orders for the purchase or sale of domestic futures contracts, is required by CFTC regulations to separately account for and segregate as belonging to the Master Fund all assets of the Master Fund relating to domestic futures trading and the Commodity Broker is not allowed to commingle such assets with other assets of the Commodity Broker. In addition, CFTC regulations also require the Commodity Broker to hold in a secure account assets of the Master Fund related to foreign futures trading. Also, see Item 1A. Risk Factors Failure of Futures Commission Merchants or Commodity Brokers to Segregate Assets May Increase Losses; Despite Segregation of Assets, the Master Fund Remains at Risk of Significant Losses Because the Master Fund May Only Receive a Pro-rata Share of the Assets.

Liquidity

All of the Master Fund's source of capital is derived from the Fund through the Fund's offering of Shares to Authorized Participants. Authorized Participants may then subsequently redeem such Shares. The Master Fund in turn allocates its net assets to commodities trading. A significant portion of the net asset value is held in United States Treasury Obligations and cash, which is used as margin for the Master Fund's trading in commodities. The percentage that United States Treasury Obligations bear to the total net assets will vary from period to period as the market values of the Master Fund's commodity interests change. The balance of the net assets is held in the Master Fund's commodity trading account. Interest earned on the Master Fund's interest-bearing funds is paid to the Master Fund.

The Master Fund's commodity contracts may be subject to periods of illiquidity because of market conditions, regulatory considerations or for other reasons. For example, commodity exchanges generally have the ability to limit fluctuations in certain commodity futures contract prices during a single day by regulations referred to as daily limits. During a single day, no trades may be executed at prices beyond the daily limit. Once the price of a particular futures contract for a particular commodity has increased or decreased by an amount equal to the daily limit, positions in the commodity can neither be taken nor liquidated unless the traders are willing to effect trades at or within the limit. Commodity futures prices have occasionally moved the daily limit for several consecutive days with little or no trading. Such market conditions could prevent the Master Fund from promptly liquidating its commodity futures positions.

Because the Master Fund trades futures contracts, its capital is at risk due to changes in the value of future contracts (market risk) or the inability of counterparties (including exchange clearinghouses) to perform under the terms of the contracts (credit risk).

On any business day, an Authorized Participant may place an order with the Managing Owner to redeem one or more Baskets. Redemption orders must be placed by 10:00 a.m., New York time. The day on which the Managing Owner receives a valid redemption order is the redemption order date. Redemption orders are irrevocable. The redemption procedures allow Authorized Participants to redeem Baskets. Individual Shareholders may not redeem directly from the Fund. By placing a redemption order, an Authorized Participant agrees to deliver the Baskets to be redeemed through DTC's book-entry system to the Fund no later than noon, New York time, on the business day immediately following the redemption order date. By placing a redemption order, and prior to receipt of the redemption proceeds, an Authorized Participant's DTC account is charged the non-refundable transaction fee due for the redemption order.

Table of Contents

Cash Flows

The primary cash flow activities of the Fund is to raise capital from Authorized Participants through the issuance of Shares. This cash is invested into the Master Fund where it is used to invest in United States Treasury Obligations and to meet margin requirements as a result of the positions taken in futures contracts to match the fluctuations of the Index the Fund is tracking.

Operating Activities

Net cash flow provided by (used for) operating activities was \$312.6 million and \$(939.8) million for the Year Ended December 31, 2008 and the Period Ended December 31, 2007, respectively. This amount primarily includes net purchases and sales of United States Treasury Obligations which are held at fair value on the statement of financial condition.

During the Year Ended December 31, 2008, \$8,329.4 million was paid to purchase United States Treasury Obligations and \$8,996.3 million was received from sales and maturing contracts. During the Period Ended December 31, 2007, \$2,241.6 million was paid to purchase United States Treasury Obligations and \$1,224.9 million was received from sales and maturing contracts. Unrealized appreciation on United States Treasury Obligations and futures decreased by \$212.7 million and increased by \$139.5 million during the Year Ended December 31, 2008 and the Period Ended December 31, 2007, respectively.

Financing Activities

The Fund's net cash flow provided by financing activities was \$420.2 million and \$939.8 million during the Year Ended December 31, 2008 and the Period Ended December 31, 2007, respectively. This included \$2,423.7 million and \$986.2 million from the sale of Shares to Authorized Participants during the Year Ended December 31, 2008 and the Period Ended December 31, 2007, respectively.

Results of Operations

FOR THE THREE MONTHS ENDED DECEMBER 31, 2008 AND 2007, THE YEAR ENDED DECEMBER 31, 2008 AND THE PERIOD ENDED DECEMBER 31, 2007

The Fund was launched on January 3, 2007 at \$25.00 per Share. The Shares of the Fund traded on the NYSE Alternext from January 5, 2007 to November 25, 2008 and have been trading on the NYSE Arca since November 25, 2008.

The Fund and the Master Fund seek to track changes in the closing levels of the Deutsche Bank Liquid Commodity Index Optimum Yield Agriculture Excess Return (DBLCI-OY Agriculture ER , or the Index) over time, plus the excess, if any, of the Master Fund's interest income from its holdings of United States Treasury Obligations and other high credit quality short-term fixed income securities over the expenses of the Fund and the Master Fund. The following graphs illustrate changes in (i) the price of the Shares (as reflected by the graph DBA), (ii) the Fund's NAV (as reflected by the graph DBANAV), and (iii) the closing levels of the Index (as reflected by the graph DBAGIX). The price of the Shares generally has exceeded the levels of the Index primarily because the Share price reflects interest income from the Master Fund's collateral holdings whereas the Index does not consider such interest income. There can be no assurances that the price of the Shares will continue to exceed the Index levels.

Table of Contents

COMPARISON OF DBA, DBANAV AND DBAGIX FOR THE YEAR ENDED DECEMBER 31, 2008, THE PERIOD ENDED DECEMBER 31, 2007 AND THE THREE MONTHS ENDED DECEMBER 31, 2008 AND 2007

Additional Legends

Deutsche Bank Liquid Commodity Index Optimum Yield Agriculture Excess Return is an index and does not reflect (i) actual trading and (ii) any fees or expenses.

WHILE THE FUND'S OBJECTIVE IS NOT TO GENERATE PROFIT THROUGH ACTIVE PORTFOLIO MANAGEMENT, BUT IS TO TRACK THE INDEX, BECAUSE THE INDEX WAS ESTABLISHED IN JULY 2006, CERTAIN INFORMATION RELATING TO THE INDEX CLOSING LEVELS MAY BE CONSIDERED TO BE HYPOTHETICAL. HYPOTHETICAL INFORMATION MAY HAVE CERTAIN INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW.

WITH RESPECT TO INDEX DATA, NO REPRESENTATION IS BEING MADE THAT THE INDEX WILL OR IS LIKELY TO ACHIEVE ANNUAL OR CUMULATIVE CLOSING LEVELS CONSISTENT WITH OR SIMILAR TO THOSE SET FORTH HEREIN. SIMILARLY, NO REPRESENTATION IS BEING MADE THAT THE FUND WILL GENERATE PROFITS OR LOSSES SIMILAR TO THE FUND'S PAST PERFORMANCE OR THE HISTORICAL ANNUAL OR CUMULATIVE CHANGES IN THE INDEX CLOSING LEVELS. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY INVESTMENT METHODOLOGIES, WHETHER ACTIVE OR PASSIVE.

WITH RESPECT TO INDEX DATA, ONE OF THE LIMITATIONS OF HYPOTHETICAL INFORMATION IS THAT IT IS GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. TO THE EXTENT THAT INFORMATION PRESENTED HEREIN RELATES TO THE PERIOD DECEMBER 1988 THROUGH JUNE 2006, THE INDEX CLOSING LEVELS REFLECT THE APPLICATION OF THE INDEX'S METHODOLOGY, AND SELECTION OF INDEX COMMODITIES, IN HINDSIGHT.

NO HYPOTHETICAL RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THERE ARE NUMEROUS FACTORS, INCLUDING THOSE DESCRIBED UNDER ITEM 1A: RISK FACTORS HEREIN, RELATED TO THE COMMODITIES MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF THE FUND'S EFFORTS TO TRACK THE INDEX OVER TIME WHICH CANNOT BE, AND HAVE NOT BEEN, ACCOUNTED FOR IN THE PREPARATION OF THE INDEX INFORMATION SET FORTH ON THE FOLLOWING PAGES, ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL PERFORMANCE RESULTS FOR THE FUND. FURTHERMORE, THE INDEX INFORMATION DOES NOT INVOLVE FINANCIAL RISK OR ACCOUNT FOR THE IMPACT OF FEES AND COSTS ASSOCIATED WITH THE FUND.

THE MANAGING OWNER HAS HAD LIMITED EXPERIENCE IN TRADING ACTUAL ACCOUNTS FOR ITSELF OR FOR CLIENTS. BECAUSE THERE ARE LIMITED ACTUAL TRADING RESULTS TO COMPARE TO THE INDEX CLOSING LEVELS SET FORTH HEREIN, PROSPECTIVE INVESTORS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THE ANNUAL OR CUMULATIVE INDEX RESULTS.

FOR THE YEAR ENDED DECEMBER 31, 2008 AND THE PERIOD ENDED DECEMBER 31, 2007

Fund Share Price Performance

On December 30, 2008, the Fund made a \$0.45 per Share distribution to Shareholders of record as of December 17, 2008.

For the Year Ended December 31, 2008, the NYSE Arca market value of each Share decreased 20.64% from \$32.99 per Share to \$26.18 per Share. The Share price high and low for the Year Ended December 31, 2008 and related change from the Share price on December 31, 2007 was as follows: Shares traded from a high of \$42.98 per Share (+30.28%) on February 26, 2008 to a low of \$21.97 per Share (-33.40%) on December 5, 2008. Therefore, the total return for the Fund, on a market value basis was -19.28%, including the above noted distribution for the period.

The Fund was launched on January 3, 2007 at \$25.00 per Share and listed for trading on the NYSE Alternext on January 5, 2007.

On December 28, 2007, the Fund made a \$0.45 per Share distribution to Shareholders of record as of December 19, 2007.

Table of Contents

For the Period Ended December 31, 2007, the NYSE Alternext market value of each Share increased 31.96% from \$25.00 per Share to \$32.99 per Share. The Share price low and high for the Period Ended December 31, 2007 and related change from the Share price on January 3, 2007 (commencement of investment operations) was as follows: Shares traded from a low of \$24.66 per Share (-1.36%) on January 9, 2007 to a high of \$33.54 per Share (+34.16%) on December 26, 2007. Therefore, the total return for the Fund, on a market value basis was 33.76%, including the above noted distribution for the period.

Fund Share Net Asset Performance

For the Year Ended December 31, 2008, the net asset value of each Share decreased 20.91% from \$32.81 per Share to \$25.95 per Share. A decline in the futures contract prices of corn, wheat, soybeans and sugar during the Year Ended December 31, 2008, resulted in an overall 18.75% decrease in the level of the DBLCI-OY Agriculture TR . On December 30, 2008, the Fund made a \$0.45 per Share distribution to Shareholders of record as of December 17, 2008. Therefore, the total return for the Fund on a net asset value basis, including the above noted distribution was -19.54%.

Net loss for the Year Ended December 31, 2008 was \$472.0 million, resulting from \$36.8 million of interest income, net realized losses of \$279.4 million, net unrealized losses of \$212.7 million and operating expenses of \$16.7 million.

For the Period Ended December 31, 2007, the net asset value of each Share increased 31.24% from \$25.00 per Share to \$32.81 per Share. An increase in the futures contract prices of corn, wheat and soybeans more than offset a decline in the price of sugar futures contracts during the Period Ended December 31, 2007, resulting in an overall 34.71% increase in the level of the DBLCI-OY Agriculture TR . On December 28, 2007, the Fund made a \$0.45 per Share distribution to Shareholders of record as of December 19, 2007. Therefore, the total return for the Fund on a net asset value basis, including the above noted distribution was 33.04%.

Net income for the Period Ended December 31, 2007 was \$175.9 million, resulting from \$18.7 million of interest income supplemented by net realized gains of \$21.3 million and net unrealized gains of \$139.5 million and operating expenses of \$3.6 million.

FOR THE THREE MONTHS ENDED DECEMBER 31, 2008 AND 2007

Fund Share Price Performance

On December 30, 2008, the Fund made a \$0.45 per Share distribution to Shareholders of record as of December 17, 2008.

For the Three Months Ended December 31, 2008, the NYSE Arca market value of each Share decreased 13.34% from \$30.21 per Share to \$26.18 per Share. The Share price high and low for the Three Months Ended December 31, 2008 and related change from the Share price on September 30, 2008 was as follows: Shares traded from a high of \$30.00 per Share (-0.70%) on October 1, 2008 to a low of \$21.97 per Share (-27.28%) on December 5, 2008. Therefore, the total return for the Fund, on a market value basis was -11.85% including the above noted distribution, for the period.

On December 28, 2007, the Fund made a \$0.45 per Share distribution to Shareholders of record as of December 19, 2007.

For the Three Months Ended December 31, 2007, the NYSE Alternext market value of each Share increased 11.83 % from \$29.50 per Share to \$32.99 per Share. The Share price low and high for the Three Months Ended December 31, 2007 and related change from the Share price on September 30, 2007 was as follows: Shares traded from a low of \$27.78 per Share (-5.83%) on October 8, 2007 to a high of \$33.54 per Share (+13.69%) on December 26, 2007. Therefore, the total return for the Fund, on a market value basis was 13.36% including the above noted distribution, for the period.

Fund Share Net Asset Performance

For the Three Months Ended December 31, 2008, the net asset value of each Share decreased 14.04% from \$30.19 per Share to \$25.95 per Share. A decline in the futures contract prices of corn, wheat, soybeans and sugar futures contracts

Table of Contents

during the Three Months Ended December 31, 2008, resulted in an overall 12.59% decrease in the level of the DBLCI-OY Agriculture TR . On December 30, 2008, the Fund made a \$0.45 per Share distribution to Shareholders of record as of December 17, 2008. Therefore, the total return on a net asset value basis for the Fund including the above noted distribution, was

-12.55%.

Net loss for the Three Months Ended December 31, 2008 was \$204.9 million, resulting from \$2.5 million of interest income, net realized losses of \$191.6 million, net unrealized losses of \$13.5 million and operating expenses of \$2.3 million.

For the Three Months Ended December 31, 2007, the net asset value of each Share increased 11.64% from \$29.39 per Share to \$32.81 per Share. An increase in the futures contract price of corn, wheat, soybeans and sugar futures contracts during the Three Months Ended December 31, 2007, resulted in an overall 13.60% increase in the level of the DBLCI-OY Agriculture TR . On December 28, 2007, the Fund made a \$0.45 per Share distribution to Shareholders of record as of December 19, 2007. Therefore, the total return on a net asset value basis for the Fund including the above noted distribution, was 13.17%.

Net income for the Three Months Ended December 31, 2007 was \$111.6 million, resulting from \$7.8 million of interest income supplemented by net realized gain of \$23.6 million and net unrealized gains of \$81.8 million and operating expenses of \$1.6 million.

Off-Balance Sheet Arrangements and Contractual Obligations

In the normal course of its business, the Master Fund is party to financial instruments with off-balance sheet risk. The term off-balance sheet risk refers to an unrecorded potential liability that, even though it does not appear on the balance sheet, may result in a future obligation or loss. The financial instruments used by the Master Fund are commodity futures, whose values are based upon an underlying asset and generally represent future commitments which have a reasonable possibility to be settled in cash or through physical delivery. The financial instruments are traded on an exchange and are standardized contracts.

The Fund and the Master Fund have not utilized, nor do they expect to utilize in the future, special purpose entities to facilitate off-balance sheet financing arrangements and have no loan guarantee arrangements or off-balance sheet arrangements of any kind, other than agreements entered into in the normal course of business noted above, which may include indemnification provisions related to certain risks service providers undertake in performing services which are in the best interests of the Fund and the Master Fund. While the Fund s and the Master Fund s exposure under such indemnification provisions cannot be estimated, these general business indemnifications are not expected to have a material impact on either the Fund s or the Master Fund s financial position.

The Fund and Master Fund s contractual obligations are with the Managing Owner and the Commodity Broker. Management Fee payments made to the Managing Owner are calculated as a fixed percentage of the Master Fund s net asset value. Commission payments to the Commodity Broker are on a contract-by-contract, or round-turn, basis. As such, the Managing Owner cannot anticipate the amount of payments that will be required under these arrangements for future periods as net asset values are not known until a future date. These agreements are effective for one year terms, renewable automatically for additional one year terms unless terminated. Additionally, these agreements may be terminated by either party for various reasons.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
INTRODUCTION

The Fund is designed to replicate positions in a commodity index. The market sensitive instruments held by it are subject to the risk of trading loss. Unlike an operating company, the risk of market sensitive instruments is integral, not incidental, to the Fund s main line of business.

Market movements can produce frequent changes in the fair market value of the Fund s open positions and, consequently, in its earnings and cash flow. The Fund s market risk is primarily influenced by changes in the price of commodities.

Table of Contents

Value at Risk is a measure of the maximum amount which the Fund could reasonably be expected to lose in a given market sector. However, the inherent uncertainty in the markets in which the Fund trades and the recurrence in the markets traded by the Fund of market movements far exceeding expectations could result in actual trading or non-trading losses far beyond the indicated Value at Risk or the Fund's experience to date (i.e., risk of ruin). In light of this, as well as the risks and uncertainties intrinsic to all future projections, the inclusion of the quantification included in this section should not be considered to constitute any assurance or representation that the Fund's losses in any market sector will be limited to Value at Risk or by the Fund's attempts to manage its market risk.

Standard of Materiality

Materiality as used in this section, Quantitative and Qualitative Disclosures About Market Risk, is based on an assessment of reasonably possible market movements and the potential losses caused by such movements, taking into account the leverage, and multiplier features of the Fund's market sensitive instruments.

QUANTIFYING THE FUND'S TRADING VALUE AT RISK

Quantitative Forward-Looking Statements

The following quantitative disclosures regarding the Fund's market risk exposures contain forward-looking statements within the meaning of the safe harbor from civil liability provided for such statements by the Private Securities Litigation Reform Act of 1995 (set forth in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934). All quantitative disclosures in this section are deemed to be forward-looking statements for purposes of the safe harbor, except for statements of historical fact (such as the dollar amount of maintenance margin required for market risk sensitive instruments held at the end of the reporting period).

The Fund's risk exposure in the various market sectors traded by the Fund is quantified below in terms of Value at Risk. Exchange maintenance margin requirements have been used by the Fund as the measure of its Value at Risk. Maintenance margin requirements are set by exchanges to equal or exceed 95-99% of the maximum one-day losses at fair value of any given contract incurred during the time period over which historical price fluctuations are researched for purposes of establishing margin levels. The maintenance margin levels are established by exchanges using historical price studies as well as an assessment of current market volatility and economic fundamentals to provide a probabilistic estimate of the maximum expected near-term one-day price fluctuation.

THE FUND'S TRADING VALUE AT RISK IN DIFFERENT MARKET SECTORS

The following table indicates the trading Value at Risk associated with the Fund's open positions by market category as of December 31, 2008.

Market Sector	Delivery Month	Value at Risk	Value at Risk (VaR)*	Number of times
		(VaR) \$ Value*	% of Net Assets	VaR Exceeded
Corn	December 2009	16,675,043	1.57%	1
Wheat	July - December 2009	19,551,004	1.84%	19
Soybeans	November 2009	15,692,160	1.47%	3
Sugar	June 2009	18,185,217	1.71%	12
Aggregate/Total		55,098,007	5.18%	6

The following table indicates the trading Value at Risk associated with the Fund's open positions by market category as of December 31, 2007.

Market Sector	Delivery Month	Value at Risk	Value at Risk (VaR)*	Number of times
		(VaR) \$ Value*	% of Net Assets	VaR Exceeded
Corn	December 2008	13,003,919	1.17%	6
Wheat	July - December 2008	13,306,338	0.80%	5

Table of Contents

Soybeans	November 2008	8,828,453	0.89%	8
Sugar	September 2008	9,861,242	1.20%	11
Aggregate/Total		36,642,774	2.76%	5

* The VaR for a contract represents the one day, downside risk, under normal market conditions, with a 99% confidence level. It is calculated using historical market moves for the contract and uses a one year look-back. The aggregate VaR for the fund represents the VaR of the Fund's open positions across all contracts, and is less than the sum of VaRs for each individual contract due to the diversification benefit across the contracts.

NON-TRADING RISK

The Fund has non-trading market risk as a result of investing in short-term United States Treasury Obligations. The market risk represented by these investments is expected to be immaterial.

QUALITATIVE DISCLOSURES REGARDING PRIMARY TRADING RISK EXPOSURES

The following qualitative disclosures regarding the Fund's market risk exposures—except for those disclosures that are statements of historical fact—constitute forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act. The Fund's primary market risk exposures are subject to numerous uncertainties, contingencies and risks. Government interventions, defaults and expropriations, illiquid markets, the emergence of dominant fundamental factors, political upheavals, changes in historical price relationships, an influx of new market participants, increased regulation and many other factors could result in material losses as well as in material changes to the risk exposures of the Fund. There can be no assurance that the Fund's current market exposure will not change materially. Investors may lose all or substantially all of their investment in the Fund.

The following were the primary trading risk exposures of the Fund as of December 31, 2008 by Index Commodities:

Corn

The price of corn is volatile. The price movement of corn may be influenced by three primary supply factors: farmer planting decisions, climate, and government agricultural policies and three major market demand factors: livestock feeding, shortages or surpluses of world grain supplies, and domestic and foreign government policies and trade agreements. Additionally, the price movement of corn may be influenced by a variety of other factors, including weather conditions, disease, transportation costs, political uncertainties and economic concerns.

Wheat

The price of wheat is volatile. The price movement of wheat may be influenced by three primary supply factors: farmer planting decisions, climate, and government agricultural policies and three major market demand factors: food, shortages or surpluses of world grain supplies, and domestic and foreign government policies and trade agreements. Additionally, the price movement of wheat may be influenced by a variety of other factors, including weather conditions, disease, transportation costs, political uncertainties and economic concerns.

Soybeans

The price of soybeans is volatile. The price movement of soybeans may be influenced by a variety of factors, including demand, weather conditions, disease, crop production, transportation costs, political uncertainties and economic concerns.

Sugar

The price of sugar is volatile. The price movement of sugar may be influenced by a variety of factors, including demand, weather conditions, disease, crop production, transportation costs, political uncertainties and economic concerns.

Table of Contents

QUALITATIVE DISCLOSURES REGARDING NON-TRADING RISK EXPOSURE

General

The Fund is unaware of any (i) anticipated known demands, commitments or capital expenditures; (ii) material trends, favorable or unfavorable, in its capital resources; or (iii) trends or uncertainties that will have a material effect on operations.

QUALITATIVE DISCLOSURES REGARDING MEANS OF MANAGING RISK EXPOSURE

Under ordinary circumstances, the Managing Owner's discretionary power is limited to determining whether the Fund will make a distribution. Under emergency or extraordinary circumstances, the Managing Owner's discretionary powers increase, but remain circumscribed. These special circumstances, for example, include the unavailability of the Index or certain natural or man-made disasters. The Managing Owner does not apply risk management techniques. The Fund initiates positions only on the long side of the market and does not employ stop-loss techniques.

Report of Management on Internal Control

Over Financial Reporting

Management of DB Commodity Services LLC, as managing owner (the **Managing Owner**) of PowerShares DB Agriculture Fund and Subsidiary (the **Fund**), is responsible for establishing and maintaining adequate internal control over financial reporting, as defined under Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended (the **Exchange Act**). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Fund; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that the Fund's receipts and expenditures are being made only in accordance with appropriate authorizations of management; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Fund's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements, errors or fraud. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We, Kevin Rich, Chief Executive Officer, and Michael Gilligan, Principal Financial Officer of the Managing Owner, assessed the effectiveness of the Fund's internal control over financial reporting as of December 31, 2008. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (**COSO**) in *Internal Control - Integrated Framework*. The assessment included an evaluation of the design of the Fund's internal control over financial reporting and testing of the operational effectiveness of its internal control over financial reporting. Based on our assessment and those criteria, we have concluded that the Fund maintained effective internal control over financial reporting as of December 31, 2008.

The Fund's independent registered public accounting firm, KPMG LLP, has audited the Fund's internal control over financial reporting as of December 31, 2008, as stated in their report on page 35 of the Fund's Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

The Board of Managers of DB Commodity Services LLC, and

The Shareholders of PowerShares DB Agriculture Fund and Subsidiary:

We have audited PowerShares DB Agriculture Fund and Subsidiary's (the Fund) internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Fund's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on the Fund's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, PowerShares DB Agriculture Fund and Subsidiary maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition, including the consolidated schedules of investments of PowerShares DB Agriculture Fund and Subsidiary as of December 31, 2008 and 2007, and the related consolidated statements of income and expenses, changes in shareholders' equity, and cash flows for the year ended December 31, 2008, and the period from January 3, 2007 (commencement of investment operations) to December 31, 2007, and our report dated February 23, 2009 expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm

The Board of Managers of DB Commodity Services LLC, and

The Shareholders of PowerShares DB Agriculture Fund and Subsidiary:

We have audited the accompanying consolidated statements of financial condition, including the consolidated schedules of investments of PowerShares DB Agriculture Fund and Subsidiary (the Fund) as of December 31, 2008 and 2007, and the related consolidated statements of income and expenses, changes in shareholders' equity, and cash flows for the year ended December 31, 2008, and the period from January 3, 2007 (commencement of investment operations) to December 31, 2007. These consolidated financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of PowerShares DB Agriculture Fund and Subsidiary as of December 31, 2008 and 2007, and the results of their operations and their cash flows for the year ended December 31, 2008 and the period from January 3, 2007 (commencement of investment operations) to December 31, 2007, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), PowerShares DB Agriculture Fund and Subsidiary's internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 23, 2009 expressed an unqualified opinion on the effectiveness of the Fund's internal control over financial reporting.

PowerShares DB Agriculture Fund and Subsidiary

Notes to Consolidated Financial Statements

December 31, 2008

(1) Organization

PowerShares DB Agriculture Fund (the Fund ; Fund may also refer to the Fund and the Master Fund, collectively, as the context requires), a separate series of PowerShares DB Multi-Sector Commodity Trust (the Trust), a Delaware statutory trust organized in seven separate series, and its subsidiary, DB Agriculture Master Fund (the Master Fund), a separate series of DB Multi-Sector Commodity Master Trust (the Master Trust), a Delaware statutory trust organized in seven separate series were formed on August 3, 2006. DB Commodity Services LLC, a Delaware limited liability company, (DBCS or the Managing Owner) funded both the Fund and the Master Fund with a capital contribution of \$1,000 in exchange for 40 General Shares of each of the Fund and the Master Fund. The fiscal year end of the Fund is December 31st. The term of the Fund is perpetual (unless terminated earlier in certain circumstances) as provided in the Amended and Restated Declaration of Trust and Trust Agreement of the Trust and the Master Trust (each a Trust Agreement , and collectively, the Trust Agreements).

The Fund offers common units of beneficial interest (the Shares) only to certain eligible financial institutions (the Authorized Participants) in one or more blocks of 200,000 Shares, called a Basket. The proceeds from the offering of Shares are invested in the Master Fund. The Fund commenced trading on the American Stock Exchange (now known as the NYSE Alternext US LLC (the NYSE Alternext)) on January 5, 2007 and, as of November 25, 2008, is listed on the NYSE Arca, Inc. (the NYSE Arca). The Fund and the Master Fund commenced investment operations on January 3, 2007 with the initial offering of 1,000,000 Shares to Deutsche Bank Securities Inc. as initial purchaser of the Fund in exchange for \$25,000,000. After the initial offering of the Shares, an additional 34,200,000 Shares were issued to certain Authorized Participants for \$961,237,996 and 1,200,000 Shares were redeemed for \$32,756,920 during the period from January 3, 2007 (commencement of investment operations) to December 31, 2007. During the period from January 1, 2008 to December 31, 2008, an additional 64,600,000 Shares were issued to certain Authorized Participants for \$2,423,747,438 and 57,600,000 Shares were redeemed for \$1,985,424,868.

This Report covers the year ended December 31, 2008 (herein referred to as the Year Ended December 31, 2008) and the period from January 3, 2007 (commencement of investment operations) to December 31, 2007 (herein referred to as the Period Ended December 31, 2007).

(2) Fund Investment Overview

The Master Fund invests with a view to tracking the changes, whether positive or negative, in the level of the Deutsche Bank Liquid Commodity Index Optimum Yield Agriculture Excess Return (DBLCI-OY Agriculture ER , or the Index) plus the excess, if any, of the Master Fund s income from its holdings of United States Treasury Obligations and other high credit quality short-term fixed income securities over the expenses of the Fund and the Master Fund.

The Index is intended to reflect the change in market value of the agricultural sector. The commodities comprising the Index are corn, wheat, soybeans and sugar (the Index Commodities). The Commodity Futures Trading Commission (the CFTC) and commodity exchanges impose position limits on market participants trading in certain commodities included in the Index. The Index is comprised of futures contracts on the Index Commodities that expire in a specific month and trade on a specific exchange (the Index Contracts). As disclosed in the Fund s Prospectus, if the Managing Owner determines in its commercially reasonable judgment that it has become impracticable or inefficient for any reason for the Master Fund to gain full or partial exposure to any Index Commodity by investing in a specific Index Contract, the Master Fund may invest in a futures contract referencing the particular Index Commodity other than the Index Contract or, in the alternative, invest in other futures contracts not based on the particular Index Commodity if, in the commercially reasonable judgment of the Managing Owner, such futures contracts tend to exhibit trading prices that correlate with such Index Commodity. In October 2007, the Master Fund reached position limits with respect to the CBOT July wheat futures contract, which was an Index Contract. Since that time, when required to buy wheat to track the Index, the Master Fund has been purchasing CBOT wheat futures contracts expiring in different months as well as wheat futures trading on other United States futures exchanges. In February 2008, the Master Fund reached position limits with respect to the CBOT corn and CBOT soybean contracts in the Index and, through June, purchased futures contracts in the CBOT soybean complex in lieu of those contracts. Commencing July and continuing to October, when required to buy corn and soybean contracts to track the Index, the Master Fund had been purchasing CBOT corn and soybean contracts expiring in different months.

Table of Contents

The Master Fund also holds United States Treasury Obligations and other high credit quality short-term fixed income securities for deposit with the Master Fund's commodity broker as margin and for investment.

The Fund does not employ leverage. As of December 31, 2008 and December 31, 2007, the Fund had \$1,064,540,025 (or 100%) and \$1,174,223,048 (or 100%), respectively, of its holdings of cash, United States Treasury Obligations and unrealized appreciation/depreciation on futures contracts on deposit with its Commodity Broker. Of this, \$98,093,920 (or 9.21%) and \$59,367,840 (or 5.06%), respectively, of the Fund's holdings of cash and United States Treasury Obligations are required to be deposited as margin in support of the Fund's long futures positions. For additional information, please see the audited Consolidated Schedule of Investments as of December 31, 2008 and the audited Consolidated Schedule of Investments as of December 31, 2007 for a breakdown of the Fund's portfolio holdings.

DBLCI and Deutsche Bank Liquid Commodity Index are trademarks of Deutsche Bank AG London (the Index Sponsor). The Index Sponsor is an affiliate of the Fund, the Master Fund and the Managing Owner.

(3) Service Providers and Related Party Agreements

The Trustee

Under the Trust Agreements, Wilmington Trust Company, the Trustee of the Fund and the Master Fund has delegated to the Managing Owner the exclusive management and control of all aspects of the business of the Trust, the Fund, the Master Trust and the Master Fund. The Trustee will have no duty or liability to supervise or monitor the performance of the Managing Owner, nor will the Trustee have any liability for the acts or omissions of the Managing Owner.

The Managing Owner

The Managing Owner serves the Fund and Master Fund as commodity pool operator, commodity trading advisor and managing owner, and is an indirect wholly-owned subsidiary of Deutsche Bank AG. During the Year Ended December 31, 2008, the Fund and the Master Fund incurred Management Fees of \$15,159,629, of which \$627,835 was payable at December 31, 2008. During the Period Ended December 31, 2007, the Fund and Master Fund incurred Management Fees of \$3,200,976 of which \$610,088 was payable at December 31, 2007.

The Commodity Broker

Deutsche Bank Securities Inc., a Delaware corporation, serves as the Master Fund's clearing broker (the Commodity Broker). The Commodity Broker is an indirect wholly-owned subsidiary of Deutsche Bank AG. In its capacity as clearing broker, the Commodity Broker executes and clears each of the Master Fund's futures transactions and performs certain administrative services for the Master Fund. The Commodity Broker is an affiliate of the Managing Owner. For the Year Ended December 31, 2008, the Fund and Master Fund incurred brokerage fees of \$1,548,579 of which \$15,537 was payable at December 31, 2008. For the Period Ended December 31, 2007, the Fund and Master Fund incurred brokerage fees of \$412,875 of which \$32,991 was payable at December 31, 2007.

The Administrator

The Bank of New York Mellon (the Administrator) has been appointed by the Managing Owner as the administrator, custodian and transfer agent of the Master Fund and the Fund, and have entered into separate administrative, custodian, transfer agency and service agreements (collectively referred to as the Administration Agreement).

Pursuant to the Administration Agreement, the Administrator performs or supervises the performance of services necessary for the operation and administration of the Fund and the Master Fund (other than making investment decisions), including receiving and processing orders from Authorized Participants to create and redeem Baskets, net asset value calculations, accounting and other fund administrative services. The Administrator retains certain financial books and records, including: Basket creation and redemption books and records, fund accounting records, ledgers with respect to assets, liabilities, capital, income and expenses, the registrar, transfer journals and related details, and trading and related documents received from futures commission merchants.

The Administration Agreement will continue in effect from the commencement of trading operations unless terminated on at least 90 days' prior written notice by either party to the other party. Notwithstanding the foregoing, the Administrator may terminate the administrative portion of the Administration Agreement upon 30 days' prior written notice if the Fund and/or Master Fund has materially failed to perform its obligations

under the Administration Agreement.

Table of Contents

The Distributor

ALPS Distributors, Inc. (the Distributor) provides certain distribution services to the Fund. Pursuant to the Distribution Services Agreement between the Managing Owner in its capacity as managing owner of the Fund, the Fund and the Distributor, the Distributor assists the Managing Owner and the Administrator with certain functions and duties relating to distribution and marketing services to the Fund including reviewing and approving marketing materials.

The Distribution Services Agreement is terminable without penalty on sixty days written notice by the Managing Owner or by the Distributor. The Distribution Services Agreement will automatically terminate in the event of its assignment.

Invesco Powershares Capital Management LLC

Under the License Agreement among Invesco Powershares Capital Management LLC (formerly known as PowerShares Capital Management LLC) (the Licensor) and the Managing Owner in its own capacity and in its capacity as managing owner of the Fund (the Fund and the Managing Owner, collectively, the Licensees), the Licensor granted to each Licensee a non-exclusive license to use the PowerShare[®] trademark (the Trademark) anywhere in the world, solely in connection with the marketing and promotion of the Fund and to use or refer to the Trademark in connection with the issuance and trading of the Fund as necessary.

Invesco Aim Distributors, Inc.

Through a marketing agreement between the Managing Owner and Invesco Aim Distributors, Inc. (formerly known as A I M Distributors, Inc.) (Invesco Aim Distributors), an affiliate of Invesco PowerShares Capital Management LLC (Invesco PowerShares), the Managing Owner, on behalf of the Fund and the Master Fund, has appointed Invesco Aim Distributors as a marketing agent. Invesco Aim Distributors assists the Managing Owner and the Administrator with certain functions and duties such as providing various educational and marketing activities regarding the Fund, primarily in the secondary trading market, which activities include, but are not limited to, communicating the Fund s name, characteristics, uses, benefits, and risks, consistent with the prospectus. Invesco Aim Distributors will not open or maintain customer accounts or handle orders for the Fund. Invesco Aim Distributors engages in public seminars, road shows, conferences, media interviews, and distributes sales literature and other communications (including electronic media) regarding the Fund.

(4) Summary of Significant Accounting Policies

(a) Basis of Presentation and Consolidation

The consolidated financial statements of the Fund have been prepared using U.S. generally accepted accounting principles, and they include the consolidated financial statement balances of the Fund and the Master Fund. Upon the initial offering of the Shares on January 3, 2007, the capital raised by the Fund was used to purchase 100% of the common units of beneficial interest of the Master Fund (the Master Fund Limited Units) (excluding common units of beneficial interest of the Master Fund held by the Managing Owner (the Master Fund General Units)). The Master Fund Limited Units owned by the Fund provide the Fund and its investors certain controlling rights and abilities over the Master Fund. Consequently, the financial statement balances of the Master Fund have been consolidated with the Fund s financial statement balances beginning January 3, 2007 (commencement of investment operations), and all significant inter-company balances and transactions have been eliminated.

(b) Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosure of contingent assets and liabilities during the reporting period of the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

(c) Financial Instruments and Fair Value

United States Treasury Obligations and commodity futures contracts are recorded in the consolidated statements of financial condition on a trade date basis at fair value with changes in fair value recognized in earnings in each period. The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (the exit price).

Table of Contents

The Fund adopted FASB Statement No. 157, Fair Value Measurements (Statement No. 157), effective January 1, 2008. Statement No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under Statement No. 157 are described below:

Basis of Fair Value Measurement

- Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
 - Level 2: Quoted prices in markets that are not active or financial instruments for which all significant inputs are observable, either directly or indirectly;
 - Level 3: Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.
- A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

In determining fair value of United States Treasury Obligations and commodity futures contracts, the Fund uses unadjusted quoted market prices in active markets. United States Treasury Obligations and commodity futures contracts are classified within Level 1 of the fair value hierarchy. The Fund does not adjust the quoted prices for United States Treasury Obligations and commodity futures contracts.

(d) Deposits with Broker

The Fund deposits cash and United States Treasury Obligations with its Commodity Broker subject to CFTC regulations and various exchange and broker requirements. The combination of the Fund's deposits with its Commodity Broker of cash and United States Treasury Obligations and the unrealized profit or loss on open futures contracts (variation margin) represents the Fund's overall equity in its broker trading account. To meet the Fund's initial margin requirements, the Fund holds United States Treasury Obligations. The Fund uses its cash held by the Commodity Broker to satisfy variation margin requirements. The Fund earns interest on its cash deposited with the Commodity Broker.

(e) United States Treasury Obligations

The Fund records purchases and sales of United States Treasury Obligations on a trade date basis. These holdings are marked to market based on quoted market closing prices. The Fund holds United States Treasury Obligations for deposit with the Master Fund's Commodity Broker to meet margin requirements and for trading purposes. Interest income is recognized on an accrual basis when earned. Premiums and discounts are amortized or accreted over the life of the United States Treasury Obligations. Included in the United States Treasury Obligations as of December 31, 2008 was \$98,093,920 which is restricted and held against initial margin of the open futures contracts. Included in the United States Treasury Obligations as of December 31, 2007 was \$59,367,840 which is restricted and held against initial margin of the open futures contracts. The Fund purchased \$6,000,000 notional of United States Treasury Obligations for \$5,956,083, which was unpaid as of December 31, 2007. As a result, a payable for securities purchased was recorded for \$5,956,083 as of December 31, 2007.

(f) Cash Held by Broker

The Fund's arrangement with the Commodity Broker requires the Fund to meet its variation margin requirement related to the price movements, both positive and negative, on futures contracts held by the Fund by keeping cash on deposit with the Commodity Broker. The Fund defines cash and cash equivalents to be highly liquid investments, with original maturities of three months or less when purchased. As of December 31, 2008 the Fund had cash held by the Commodity Broker of \$732,849,487 of which \$73,202,267 was on deposit to satisfy the Fund's negative variation margin on open futures contracts. As of December 31, 2007 the Fund held no cash. There were no cash equivalents held by the Fund as of December 31, 2008 and December 31, 2007.

Table of Contents**(g) Payable to Broker**

Balances in the Fund's variation margin account that are in excess of minimums required by the CFTC regulations and various exchanges and the Commodity Broker requirements, are available to the Fund. As of December 31, 2008, the futures contracts held by the Fund were in an unrealized depreciation position of \$73,202,267. As of December 31, 2007, the futures contracts held by the Fund were in an unrealized appreciation position of \$139,389,550, of which the Fund utilized \$58,523,025 to purchase United States Treasury Obligations. No interest expense was incurred by the Fund as unrealized appreciation on open positions of future contracts exceeded the payable to broker by \$80,866,525.

(h) Income Taxes

The Fund and the Master Fund are classified as partnerships for U.S. federal income tax purposes. Accordingly, neither the Fund nor the Master Fund will incur U.S. federal income taxes. No provision for federal, state, and local income taxes has been made in the accompanying consolidated financial statements, as investors are individually liable for income taxes, if any, on their allocable share of the Fund's share of the Master Fund's income, gain, loss, deductions and other items.

The following are the major tax jurisdictions for the Fund and the earliest tax year subject to examination:

Jurisdiction	Tax Year
US Federal	2007
State of New York	2007
New York City	2007
State of Florida	2007
State of Georgia	2007
State of Maine	2007
State of Oregon	2007
State of Utah	2007
State of West Virginia	2007

(i) Futures Contracts

All commodity futures contracts are held and used for trading purposes. The commodity futures are recorded on a trade date basis and open contracts are recorded in the consolidated statement of financial condition at fair value on the last business day of the period, which represents market value for those commodity futures for which market quotes are readily available. However, when market closing prices are not available, the Managing Owner may value an asset of the Master Fund pursuant to policies the Managing Owner has adopted, which are consistent with normal industry standards. Realized gains (losses) and changes in unrealized appreciation (depreciation) on open positions are determined on a specific identification basis and recognized in the consolidated statement of income and expenses in the period in which the contract is closed or the changes occur, respectively. As of December 31, 2008 and 2007, the futures contracts held by the Fund were in an unrealized depreciation position of \$73,202,267 and an unrealized appreciation position of \$139,389,550, respectively.

(j) Management Fee

The Master Fund pays the Managing Owner a management fee (the Management Fee), monthly in arrears, in an amount equal to 0.75% per annum of the daily net asset value of the Master Fund. No separate Management Fee is paid by the Fund. The Management Fee is paid in consideration of the Managing Owner's commodity futures trading advisory services.

(k) Brokerage Commissions and Fees

The Master Fund incurs all brokerage commissions, including applicable exchange fees, NFA fees, give-up fees, pit brokerage fees and other transaction related fees and expenses charged in connection with trading activities by the Commodity Broker. These costs are recorded as brokerage commissions and fees in the consolidated statement of income and expenses as incurred. The Commodity Broker's brokerage

Edgar Filing: DB Multi-Sector Commodity Master Trust - Form 10-K

commissions and trading fees are determined on a contract-by-contract basis. On average, total charges paid to the Commodity Broker were less than \$10.00 per round-turn trade for the Year Ended December 31, 2008 and the Period Ended December 31, 2007.

Table of Contents**(l) Routine Operational, Administrative and Other Ordinary Expenses**

The Managing Owner assumes all routine operational, administrative and other ordinary expenses of the Fund and the Master Fund, including, but not limited to, computer services, the fees and expenses of the Trustee, legal and accounting fees and expenses, tax preparation expenses, filing fees and printing, mailing and duplication costs. Accordingly, all such expenses are not reflected in the consolidated statement of income and expenses of the Fund.

(m) Organizational and Offering Costs

All organizational and offering expenses of the Fund and its Master Fund are incurred and assumed by the Managing Owner. Expenses incurred in connection with the continuous offering of Shares also will be paid by the Managing Owner.

(n) Non-Recurring and Unusual Fees and Expenses

The Master Fund pays all fees and expenses, if any, of the Fund and the Master Fund, which are non-recurring and unusual in nature. Such expenses include legal claims and liabilities, litigation costs or indemnification or other unanticipated expenses. Such fees and expenses, by their nature, are unpredictable in terms of timing and amount. For the Year Ended December 31, 2008 and the Period Ended December 31, 2007, the Fund and the Master Fund did not incur such expenses.

(5) Fair Value Measurements

The Fund's assets and liabilities recorded at fair value have been categorized based upon a fair value hierarchy in accordance with Statement No. 157. See Note 4(c) for discussion of the Fund's policies regarding this hierarchy.

Assets and Liabilities Measured at Fair Value as of December 31, 2008:

United States Treasury Obligations (Level 1)	\$404,892,805
Commodity Futures Contracts (Level 1)	\$(73,202,267)

There were no Level 2 or Level 3 holdings as of December 31, 2008.

(6) Financial Instrument Risk

In the normal course of its business, the Master Fund is party to financial instruments with off-balance sheet risk. The term off-balance sheet risk refers to an unrecorded potential liability that, even though it does not appear on the balance sheet, may result in a future obligation or loss. The financial instruments used by the Master Fund are commodity futures, whose values are based upon an underlying asset and generally represent future commitments that have a reasonable possibility of being settled in cash or through physical delivery. The financial instruments are traded on an exchange and are standardized contracts.

Market risk is the potential for changes in the value of the financial instruments traded by the Master Fund due to market changes, including fluctuations in commodity prices. In entering into these futures contracts, there exists a market risk that such futures contracts may be significantly influenced by adverse market conditions, resulting in such futures contracts being less valuable. If the markets should move against all of the futures contracts at the same time, the Master Fund could experience substantial losses.

Credit risk is the possibility that a loss may occur due to the failure of an exchange clearinghouse to perform according to the terms of a futures contract. Credit risk with respect to exchange-traded instruments is reduced to the extent that an exchange or clearing organization acts as a counterparty to the transactions. The Master Fund's risk of loss in the event of counterparty default is typically limited to the amounts recognized in the consolidated statement of financial condition and not represented by the futures contract or notional amounts of the instruments.

Edgar Filing: DB Multi-Sector Commodity Master Trust - Form 10-K

The Fund and the Master Fund have not utilized, nor do they expect to utilize in the future, special purpose entities to facilitate off-balance sheet financing arrangements and have no loan guarantee arrangements or off-balance sheet arrangements of any kind, other than agreements entered into in the normal course of business noted above.

Table of Contents**(7) Share Purchases and Redemptions****(a) Purchases**

Shares may be purchased from the Fund only by Authorized Participants in one or more blocks of 200,000 Shares, called a Basket. The Fund issues Shares in Baskets only to Authorized Participants continuously as of noon, New York time, on the business day immediately following the date on which a valid order to create a Basket is accepted by the Fund, at the net asset value of 200,000 Shares as of the closing time of the NYSE Arca or the last to close of the exchanges on which the Master Fund's assets are traded, whichever is later, on the date that a valid order to create a Basket is accepted by the Fund.

(b) Redemptions

On any business day, an Authorized Participant may place an order with the Managing Owner to redeem one or more Baskets. Redemption orders must be placed by 10:00 a.m., New York time. The day on which the Managing Owner receives a valid redemption order is the redemption order date. Redemption orders are irrevocable. The redemption procedures allow Authorized Participants to redeem Baskets. Individual shareholders may not redeem directly from the Fund.

By placing a redemption order, an Authorized Participant agrees to deliver the Baskets to be redeemed through The Depository Trust Company's (the "DTC") book-entry system to the Fund not later than noon, New York time, on the business day immediately following the redemption order date. By placing a redemption order, and prior to receipt of the redemption proceeds, an Authorized Participant's DTC account is charged the non-refundable transaction fee due for the redemption order.

The redemption proceeds from the Fund consist of the cash redemption amount. The cash redemption amount is equal to the net asset value of the number of Basket(s) requested in the Authorized Participant's redemption order as of the closing time of the NYSE Arca or the last to close of the exchanges on which the Master Fund's assets are traded, whichever is later, on the redemption order date. The Fund will distribute the cash redemption amount at noon, New York time, on the business day immediately following the redemption order date through DTC to the account of the Authorized Participant as recorded on DTC's book-entry system.

The redemption proceeds due from the Fund are delivered to the Authorized Participant at noon, New York time, on the business day immediately following the redemption order date if, by such time on such business day immediately following the redemption order date, the Fund's DTC account has been credited with the Baskets to be redeemed. If the Fund's DTC account has not been credited with all of the Baskets to be redeemed by such time, the redemption proceeds are delivered to the extent of whole Baskets received. Any remainder of the redemption proceeds are delivered on the next business day to the extent of remaining whole Baskets received if the Managing Owner receives the fee applicable to the extension of the redemption distribution date which the Managing Owner may, from time-to-time, determine and the remaining Baskets to be redeemed are credited to the Fund's DTC account by noon, New York time, on such next business day. Any further outstanding amount of the redemption order will be canceled. The Managing Owner is also authorized to deliver the redemption proceeds notwithstanding that the Baskets to be redeemed are not credited to the Fund's DTC account by noon, New York time, on the business day immediately following the redemption order date if the Authorized Participant has collateralized its obligation to deliver the Baskets through DTC's book-entry system on such terms as the Managing Owner may from time-to-time agree upon.

(c) Share Transactions

The Fund and the Master Fund commenced investment operations on January 3, 2007 with the initial offering of 1,000,000 Shares to Deutsche Bank Securities Inc. as Initial Purchaser of the Fund in exchange for \$25,000,000. The Shares commenced trading on the NYSE Alternext on January 5, 2007 and, as of November 25, 2008, are listed for trading on the NYSE Arca.

Summary of Share Transactions for the Year Ended December 31, 2008 and the Period Ended December 31, 2007

Shares Year Ended December 31,	Amount Year Ended December 31, 2008	Shares Period Ended December 31,	Amount Period Ended December 31,
---	--	---	---

Edgar Filing: DB Multi-Sector Commodity Master Trust - Form 10-K

	2008		2007	2007
Shares Sold	64,600,000	\$ 2,423,747,438	35,200,000	\$ 986,237,996
Shares Redeemed	(57,600,000)	\$ (1,985,424,868)	(1,200,000)	\$ (32,756,920)

Table of Contents

(8) Profit and Loss Allocations and Distributions

Pursuant to the Amended and Restated Declaration of Trust and Trust Agreement of the Master Trust, income and expenses are allocated pro rata to the Managing Owner as holder of the General Shares and the Shareholders monthly based on their respective percentage interests as of the close of the last trading day of the preceding month. Any losses allocated to the Managing Owner (the owner of the General Shares) which are in excess of the Managing Owner's capital balance are allocated to the Shareholders in accordance with their respective interest in the Master Fund as a percentage of total shareholders' equity. Distributions (other than redemption of units) may be made at the sole discretion of the Managing Owner on a pro rata basis in accordance with the respective capital balances of the shareholders.

A distribution of \$0.45 per Share from net investment income was declared on December 12, 2008 to Shareholders of record as of the close of business on December 17, 2008, payable on December 30, 2008. On December 30, 2008, the total distribution of \$18,090,000 was paid to Shareholders. On December 30, 2008, the Fund paid \$0.45 per General Share, a total distribution of \$18.00.

A distribution of \$0.45 per Share from net investment income was declared on December 14, 2007 to Shareholders of record as of the close of business on December 19, 2007, payable on December 28, 2007. On December 28, 2007, the total distribution of \$13,680,000 was paid to Shareholders. On December 28, 2007, the Fund paid \$0.45 per General Share, a total distribution of \$18.00.

(9) Commitments and Contingencies

The Managing Owner, either in its own capacity or in its capacity as the Managing Owner and on behalf of the Fund and the Master Fund, has entered into various service agreements that contain a variety of representations, or provide indemnification provisions related to certain risks service providers undertake in performing services which are in the best interests of the Funds. As of December 31, 2008 no claims had been received by the Fund or the Master Fund and it was therefore not possible to estimate the Fund's and the Master Fund's potential future exposure under such indemnification provisions.

(10) Net Asset Value and Financial Highlights

The Fund is presenting the following net asset value and financial highlights related to investment performance and operations for a Share outstanding for the Year Ended December 31, 2008 and the Period Ended December 31, 2007. The net investment income and total expense ratios are calculated using average net asset value. The net asset value presentation is calculated using daily Shares outstanding. The net investment income and total expense ratios have been annualized. The total return is based on the change in net asset value of the Shares during the period. An individual investor's return and ratios may vary based on the timing of capital transactions.

The Fund invests substantially all of its assets in the Master Fund in a master-feeder structure. The Fund holds no investment assets other than Master Fund Limited Units. The Fund is the majority Master Fund Limited Unit owner and the Managing Owner holds a minority interest in the Master Fund. Each Share issued by the Fund correlates with the Master Fund Limited Unit issued by the Master Fund and held by the Fund.

Net asset value per Master Fund Limited Unit and Master Fund General Unit (collectively, Master Fund Units) is the net asset value of the Master Fund divided by the number of outstanding Master Fund Units. Because there is a one-to-one correlation between Shares and the Master Fund Limited Units, the net asset value per Share and the net asset value per Master Fund Limited Unit are equal.

Table of Contents

	Year Ended December 31, 2008		Period Ended December 31, 2007	
Net Asset Value				
Initial offering price per Share	\$	-	\$	25.00

Total expenses		0.83	%	0.84
Total Return, at net asset value **		(19.54)	%	33.04
Total Return, at market value **		(19.28)	%	33.76

* Percentages are annualized.

** Percentages are not annualized for the Period Ended December 31, 2007 and are calculated based on initial offering price upon commencement of investment operations of \$25.00.

(11) Recently Issued Accounting Standards

In December 2007, the Financial Accounting Standards Board released FASB Statement No. 160, Noncontrolling Interests in Consolidated Financial Statements – an amendment to ARB No. 51 (Statement No. 160). Statement No. 160 requires noncontrolling interests (previously referred to as minority interests) to be reported as a component of equity, which changes the accounting for transactions with noncontrolling interest holders. Statement No. 160 is effective for periods beginning on or after December 15, 2008 and earlier adoption is prohibited. Statement No. 160 will be applied prospectively to all noncontrolling interests including any that arose before the effective date and presentation and disclosure requirements shall be applied retrospectively for all periods presented.

On March 19, 2008, the Financial Accounting Standards Board released FASB Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities (Statement No. 161). Statement No. 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of Statement No. 161 is required for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years.

At this time, management is evaluating the implications of these Statements and their impact on the financial statements has not yet been determined.

Table of Contents

(12) Recently Adopted Accounting Standards

In September 2006, the Financial Accounting Standards Board issued FASB Statement No. 157, Fair Value Measurement (Statement No. 157). Statement No. 157 defines fair value, establishes a framework for the measurement of fair value, and enhances disclosures about fair value measurements. The Statement does not require any new fair value measures. The Fund adopted Statement No. 157 on January 1, 2008, and has determined that the application of this Statement did not have any impact on its results of operation and financial position.

In July 2006, the Financial Accounting Standards Board issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements and prescribes a threshold of more-likely-than-not for recognition of tax benefits of uncertain tax positions taken or expected to be taken in a tax return. FIN 48 also provides related guidance on measurement, derecognition, classification, interest and penalties, and disclosure. The Fund adopted FIN 48 on January 3, 2007, and has determined that the application of this Statement did not have any impact on its results of operations and financial position.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of the management of the Managing Owner, including Kevin Rich, its Chief Executive Officer and Michael Gilligan, its Principal Financial Officer, the Fund carried out an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this annual report, and, based upon that evaluation, Kevin Rich, the Chief Executive Officer and Michael Gilligan, the Principal Financial Officer of the Managing Owner, concluded that the Fund s disclosure controls and procedures were effective to ensure that information the Fund is required to disclose in the reports that it files or submits with the Securities and Exchange Commission (the SEC) under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC s rules and forms, and to ensure that information required to be disclosed by the Fund in the reports that it files or submits under the Exchange Act is accumulated and communicated to management of the Managing Owner, including its Chief Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There has been no change in internal control over financial reporting (as defined in the Rules 13a-15(f) and 15d-15(f) of the Exchange Act) that occurred during the Fund s last fiscal quarter that has materially affected or is reasonably likely to materially affect, the Fund s internal control over financial reporting.

Management s Annual Report on Internal Control Over Financial Reporting

Management of the Managing Owner is responsible for establishing and maintaining adequate internal control over financial reporting, as defined under Rules 13a-15(f) and 15d-15(f) of the Exchange Act, for the Fund. Kevin Rich, the Chief Executive Officer, and Michael Gilligan, the Principal Financial Officer, of the Managing Owner, assessed the effectiveness of the Fund s internal control over financial reporting as of December 31, 2008. Their reports in connection with their assessment may be found in the Report of Management on Internal Control Over Financial Reporting on page 34 of this Form 10-K.

The Fund s independent registered public accounting firm, KPMG LLP, has audited the Fund s internal control over financial reporting as of December 31, 2008, as stated in their report on page 35 of this Form 10-K.

ITEM 9B. OTHER INFORMATION

Table of Contents**PART III****ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT AND CORPORATE GOVERNANCE**
Board of Directors and Executive Officers

The Fund has no directors or executive officers and also does not have any employees. It is managed by the Managing Owner.

The current board of managers and executive officers of the Managing Owner are as follows:

<i>Name</i>	<i>Age</i>	<i>Position</i>
Kevin Rich	48	Managing Director, Chief Executive Officer and Member of the Board of Managers
Michael Gilligan	42	Principal Financial Officer
Martin Kremenstein	32	Chief Operating Officer, Chief Investment Officer, Vice President and Member of the Board of Managers
Hans Ephraimson	44	Member of the Board of Managers

Kevin Rich joined Deutsche Bank AG in June 2003 and serves as a Managing Director in the Global Markets Investment Products Group with responsibility for providing currency and commodity-based investor solutions to the DB sales force in the Americas. Mr. Rich serves as an associated person, principal, Managing Director, and Chief Executive Officer of the Managing Owner and as an associated person of Deutsche Bank Securities Inc. Mr. Rich has been a principal and associated person of the Managing Owner since June 3, 2005 and June 10, 2005, respectively, and a member of the NFA since June 16, 2005. Mr. Rich served as the Principal Financial Officer of the Managing Owner from April 2007 through April 2008. Prior to joining Deutsche Bank, Mr. Rich was a Regional Vice President from November 2002 through May 2003 in Product Distribution for Claymore Securities, Inc. (Claymore), responsible for distribution of closed-end funds and unit investment trusts in the State of New York. Mr. Rich acted as an independent product development consultant prior to joining Claymore (August through October, 2002). From January 2000 through July 2002, Mr. Rich worked at Lehman Brothers, Inc. Mr. Rich served in several roles supporting the equities, fixed income and investment banking product lines. Mr. Rich received his MBA in Finance from the New York University Leonard N. Stern School of Business in 1996 and his Bachelors of Science in Business Administration from Taylor University in Upland, Indiana in 1983.

Michael Gilligan joined Deutsche Bank AG in March 2008 and is a Director in the Finance Group. Mr. Gilligan serves as a principal and Principal Financial Officer of the Managing Owner. Mr. Gilligan has been a principal of the Managing Owner since April 29, 2008. Prior to joining Deutsche Bank, Mr. Gilligan worked for Credit Suisse from September 1998 to March 2008 and held a number of positions in finance; immediately prior to joining Deutsche Bank, Mr. Gilligan was the Chief Operating Officer of the Americas Credit Trading Group from May 2007 to March 2008. Mr. Gilligan is a Chartered Accountant and received his Bachelors of Science in Management from Trinity College in 1989 and his Post Graduate Diploma in Professional Accounting from University College Dublin in 1990.

Martin Kremenstein joined Deutsche Bank AG in August 2006, and serves as a Vice President in the Global Markets Investment Products Group with responsibility for providing currency and commodity-based investor solutions to the DB sales force in the Americas. Mr. Kremenstein serves as the Chief Operating Officer, Chief Investment Officer and Vice President of the Managing Owner. Mr. Kremenstein has been a principal and associated person of the Managing Owner since November 1, 2006 and November 3, 2006, respectively, and a member of the NFA since November 3, 2006. Prior to joining Deutsche Bank, Mr. Kremenstein worked for JPMorgan Chase from September 1998 to August 2006, initially in London and then, from June 2003, in New York. From February 2005 to August 2006, Mr. Kremenstein worked in Market Risk Management, covering the Credit Portfolio division initially as an Associate, and later as a Vice President. From

Table of Contents

September 1998 to February 2005, Mr. Kremenstein worked in various roles in Operations at JPMorgan Chase, including managing the Credit Portfolio Credit Hedge Analysis team, managing projects for the Credit Portfolio Market Hedge team, and managing P&L production for the Counterparty Risk Book (London). Mr. Kremenstein received his B.A. from the University of Leeds in 1998.

Hans Ephraimson joined Deutsche Bank AG in June 1986 and is a Managing Director in the North American Structured Sales and Global Markets Investment Products Group. Mr. Ephraimson has also been a Desk Head for foreign exchange in Deutsche Bank AG's Institutional Clients Group for North America since January 1999. Mr. Ephraimson serves as a member of the Board of Managers of the Managing Owner. Mr. Ephraimson has been a principal of the Managing Owner since July 9, 2008. Mr. Ephraimson received his Bachelors of Science from Syracuse University in 1986 and an MBA from Columbia University in 1995.

Code of Ethics

The Fund has no officers or employees and is managed by DB Commodity Services LLC. DB Commodity Services LLC has adopted the code of ethics of its parent, Deutsche Bank AG, which applies to all of its employees and is available at <http://sec.gov/Archives/edgar/data/1159508/000095012306003563/y18643e20vf.htm>.

ITEM 11. EXECUTIVE COMPENSATION
Executive Compensation

The Fund has no employees, officers or directors and is managed by DB Commodity Services LLC. None of the directors or officers of DB Commodity Services LLC receive compensation from the Fund. DB Commodity Services LLC receives a monthly Management Fee of 1/12th of 0.75% (0.75% annually) of the daily net asset value per Share at the end of each month. In addition, Deutsche Bank Securities Inc., an affiliate of DB Commodity Services LLC, serves as the futures commission merchant and receives brokerage commissions paid by the Fund in connection with its futures trading.

As of the Year Ended December 31, 2008, the Fund has incurred Management Fees of \$15,159,629 to DB Commodity Services LLC of which \$14,531,794 had been paid at December 31, 2008.

As of the Period Ended December 31, 2007, the Fund has incurred Management Fees of \$3,200,976 to DB Commodity Services LLC of which \$2,590,888 had been paid at December 31, 2007.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The Fund has no officers or directors. The following table sets forth certain information regarding beneficial ownership of our General Shares and Shares as of December 31, 2008, by management. No person is known by us to own beneficially more than 5% of the outstanding shares of such class.

Title of Class	Name and Address of Beneficial Owner	Amount and Nature of Beneficial Ownership	Percent of Class
General Shares	DB Commodity Services LLC 60 Wall Street New York, New York 10005	40	100%
