We also supported the Government's rural economy development strategy and actively participated in the Household Appliance Purchase Subsidy Program. We promoted the Link-up Two Cities roaming package to effectively expand the rural and migrant worker market. CHAIRMAN'S STATEMENT (CONT'D)

Our value-added business enjoyed rapid growth and the value-added business revenue has grown 13.7 per cent. over the same period of last year, bringing a significant contribution to total revenue growth. Well-established businesses such as SMS, Color Ring, MMS, WAP and Mobile Paper sustained growth, while the numbers of Wireless Music Club members, Fetion instant messaging service and 12580 integrated information service customers grew to a significant scale. The 139 Mailbox and Mobile Gaming businesses also showed rapid growth. We also continued to develop and optimize our Mobile Video and Mobile e-Commerce products, enriching our quality value-added products supply. The Group also developed Mobile Market, a new mobile platform that can offer a wide variety of mobile applications. It was introduced to the industry on 17 August 2009.

The Group has also proactively explored the corporate customer market. In the first half of 2009, we continued to position ourselves as Mobile Information Expert, leveraged our competitive advantages and vigorously promoted corporate informatization and industry-specific application solutions. We launched the Intensive Development Project for SMEs and made initial progress in exploring M2M business in the power and financial industries. At the same time, the Group has constantly enhanced service quality to fulfill the needs of customers and strengthened customer relations. As at 30 June 2009, our corporate customer had reached 2.49 million accounts, and individual customers under corporate customer accounts represented 33.8 per cent. of our total customer base.

With our prominent advantages in scale and solid market leading position, the Group is the world's No. 1 mobile telecommunications operator in terms of customer base. In the first half of 2009, our network capability was further enhanced. We maintained our world-class network quality and continued to expand our international roaming services coverage. Our number of base stations exceeded 410 thousand, with a population coverage rate of 98 per cent., while the base station optic fiber access rate grew to 91 per cent.. The Group has almost completed the upgrading of its core network into a fully IP-based core network, laying a solid foundation for a full-service network that is geared to the future needs and capable of providing integrated businesses.

Directed by the needs of our customers, we enhanced our full-service network resources and full-service operational capabilities. We will focus on effectiveness and optimize our existing resource allocation and achieve synergy with our parent company. We will provide access network to the government and enterprise customers who have such needs, to deliver flexible and convenient broadband access. To implement a distinctive, clearly differentiated full-service strategy, we will adopt a TD+WLAN approach to maintain the Group's leading position in the wireless broadband market. These efforts will, in turn, help to solidify our position in the individual customer market, promote digitalization for families, and enhance our ability to deliver integrated information services to corporate customers.

CHAIRMAN'S STATEMENT (CONT'D)

3G Development

In line with the network capacity lease agreement and co-operative arrangements between us and our parent company, we joined hands to build and operate a 3G network swiftly and effectively in the first half of 2009. The second phase of 3G network construction, including the complete integration of the first and second phases of core network, was completed on schedule, enabling the roll-out of a 3G network covering 38 cities. We have also innovatively resolved major technical problems that affected network quality, and significantly improved network quality.

In the first half of 2009, we launched the first ever 3G logo in China and introduced the concept of "3G leads to a 3G life". The Group made good use of its 2G network and its advantages of scale and adopted a 2G/3G network integration strategy. Integration of the two networks enables customers to enjoy 3G services without changing their SIM card or mobile number or requiring re-registration, which significantly lowers the subscription threshold, and favors the promotion of 3G business among individuals, families and corporate customers. Furthermore, by leveraging the bandwidth advantage of 3G network, we have brought customers a brand new mobile online experience, laying the groundwork for them to form new user habits.

In the first half of 2009, our parent company took the innovative step of establishing a TD-SCDMA (TD) Terminal R&D Incentive Fund. The fund is intended to stimulate research and development of TD terminals, aiming at richer design concepts and performance enhancements. We have set up a related terminal library classification management system. We will continue to form broad partnerships within the industry chain and push ahead the development and maturity of the TD industry with the Government's support for homegrown innovations, and fully exploit the 3G market.

Acquisition

The Company signed a share subscription agreement and a strategic co-operation agreement with Far EasTone Telecommunications Co., Ltd. (Far EasTone) on 29 April 2009, to acquire 444,341,020 new shares through a private placement, representing 12 per cent. of its enlarged issued share capital. Upon completion of the transaction, both parties would co-operate closely in a number of areas including procurement, roaming services, value-added services, and network and technology advancement. The internal approval procedures for the proposed transaction have been completed, and the Company and Far EasTone are now actively preparing the application for approvals from the relevant regulatory authorities.

Looking to the Future

The impact of the global financial crisis on China's economy, changes in the competitive environment of the telecommunications industry and the continuing increase of the mobile communications penetration rate are key factors that affect the future development of the Group. At the same time, economic development is driving a tremendous demand for information services. China's economy is stabilizing and continues to grow. This, together with the Chinese Government's implementation of a series of measures to counter the impact of the global financial crisis and its efforts in maintaining economic recovery and achieving a stable and relatively rapid growth in the national economy, create development opportunities for us.

Facing this new business environment, we will continue to uphold our Blue Ocean Strategy and insist on rational competition. We will maintain our robust market leading position without compromising the value of the telecommunications industry as a whole.

NOTES TO THE UNAUDITED INTERIM FINANCIAL REPORT (CONT D)

(Expressed in Renminbi)

2. SIGNIFICANT ACCOUNTING POLICIES (CONT D)

(ii) IFRIC/HK(IFRIC) Interpretation 13, *Customer loyalty programmes*

The Group launches a customer point reward program (Reward Program) to its subscribers, which provides subscribers the option of electing to receive free telecommunications services or other gifts. The level of bonus points earned by subscribers under the Reward Program varies depending on the subscribers' services consumption, years in services and payment history.

In prior years, the Group accounted for the obligation to provide free or discounted services or goods offered to the customers under the Reward Program using the incremental costs method. The estimated incremental cost to provide free or discounted services or goods was recognized as expenses and accrued as a current liability when customers were entitled to bonus points. When customers redeemed awards or their entitlements expired, the incremental cost liability was reduced accordingly to reflect the outstanding obligations.

With effective from 1 January 2009, as a result of adoption of IFRIC/HK(IFRIC) Interpretation 13, the point reward is accounted for as a separately identifiable component of the sales transactions in which the points are granted. The consideration received in relation to the sales transactions is allocated to points reward by reference to the estimated fair value of the points as revenue and is deferred until such reward is redeemed by the customers or the points are expired.

The new accounting policy has been adopted retrospectively and the comparative amounts have been restated. The effect on the Group's unaudited consolidated statement of comprehensive income for the six months ended 30 June 2008 is a decrease in operating revenue, other operating expenses, taxation and profit for the period of RMB1,000,000,000, RMB594,000,000, RMB103,000,000 and RMB303,000,000, respectively. The effect on the basic earnings per share and diluted earnings per share for the six months ended 30 June 2008 is a decrease of RMB0.02 and RMB0.01, respectively.

The effect on the consolidated balance sheet as at 31 December 2008 is an increase in deferred tax assets, an increase in deferred revenue, a decrease of accrued expenses and other payables and a decrease in total equity of RMB730,000,000, RMB6,841,000,000, RMB3,855,000,000 and RMB2,256,000,000, respectively.

The estimated effect on the Group's revenue and profit for the period for the six months ended 30 June 2009 and net assets as at 30 June 2009 is an increase of RMB399,000,000, RMB206,000,000 and RMB2,462,000,000, respectively, had the previous policy still been applied in the current period.

The IFRSs and HKFRSs that will be effective or are available for voluntary early adoption in the annual financial statements for the year ending 31 December 2009 may be affected by the issuance of additional interpretations or other changes announced by the IASB and HKICPA subsequent to the date of issuance of the interim financial report. Therefore the policies that will be applied in the Group's financial statements for the year ending 31 December 2009 cannot be determined with certainty at the date of issuance of the interim financial report.

Table of Contents**NOTES TO THE UNAUDITED INTERIM FINANCIAL REPORT (CONT'D)***(Expressed in Renminbi)***3. SEGMENT REPORTING**

An operating segment is a component of the Group that engages in business activities from which the Group may earn revenues and incur expenses, and is identified on the basis of the internal financial reports that are provided to and regularly reviewed by the Group's chief operating decision makers in order to allocate resource and assess performance of the segment. For the periods presented, chief operating decision makers have determined that the Group has no operating segments as the Group is only engaged in mobile telecommunication and related business which is the basis to allocate resources and assess performance. No Group's geographical information has been disclosed as the majority of the Group's operating activities are carried out in Mainland China. The Group's assets located and operating revenues derived from activities outside the Mainland China are less than 10 per cent. of the Group's assets and operating revenues, respectively.

4. OPERATING REVENUE (TURNOVER)

Turnover represents usage fees, monthly fees, value-added services fees and other operating revenue derived from the Group's mobile telecommunications networks, net of PRC business tax. No business tax is charged on the revenue generated from the Group's mobile telecommunications and related services in Hong Kong.
