FORWARD-LOOKING STATEMENTS

Certain of the statements included in this Quarterly Report on Form 10-Q, including but not limited to those in Management's Discussion and Analysis of Financial Condition and Results of Operations, constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as expects, believes, anticipates, includes, plans, assumes, estimates, projects, should, will, shall or variations of such words are generally part of forward-looking statements. Forward-looking statements are made based on management's current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. There can be no assurance that future developments affecting Prudential Financial, Inc. and its subsidiaries will be those anticipated by management. These forward-looking statements are not a guarantee of future performance and involve risks and uncertainties, and there are certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements, including, among others: (1) general economic, market and political conditions, including the performance and fluctuations of fixed income, equity, real estate and other financial markets, particularly in light of severe economic conditions and the severe stress experienced by the global financial markets since the second half of 2007; (2) the availability and cost of external financing for our operations, which has been affected by the stress experienced by the global financial markets; (3) interest rate fluctuations; (4) reestimates of our reserves for future policy benefits and claims; (5) differences between actual experience regarding mortality, morbidity, persistency, surrender experience, interest rates or market returns and the assumptions we use in pricing our products, establishing liabilities and reserves or for other purposes; (6) changes in our assumptions related to deferred policy acquisition costs, valuation of business acquired or goodwill; (7) changes in our claims-paying or credit ratings; (8) investment losses, defaults and counterparty non-performance; (9) competition in our product lines and for personnel; (10) changes in tax law; (11) economic, political, currency and other risks relating to our international operations; (12) fluctuations in foreign currency exchange rates and foreign securities markets; (13) regulatory or legislative changes, including government actions in response to the stress experienced by the global financial markets; (14) adverse determinations in litigation or regulatory matters and our exposure to contingent liabilities, including in connection with our divestiture or winding down of businesses; (15) domestic or international military actions, natural or man-made disasters including terrorist activities or pandemic disease, or other events resulting in catastrophic loss of life; (16) ineffectiveness of risk management policies and procedures in identifying, monitoring and managing risks; (17) effects of acquisitions, divestitures and restructurings, including possible difficulties in integrating and realizing the projected results of acquisitions; (18) changes in statutory or U.S. GAAP accounting principles, practices or policies; (19) changes in assumptions for retirement expense; (20) Prudential Financial, Inc.'s primary reliance, as a holding company, on dividends or distributions from its subsidiaries to meet debt payment obligations and the ability of the subsidiaries to pay such dividends or distributions in light of our ratings objectives and/or applicable regulatory restrictions; and (21) risks due to the lack of legal separation between our Financial Services Businesses and our Closed Block Business. As noted above, the period since the second half of 2007 has been characterized by extreme adverse market and economic conditions. The foregoing risks are even more pronounced in these unprecedented market and economic conditions. Prudential Financial, Inc. does not intend, and is under no obligation, to update any particular forward-looking statement included in this document. See Risk Factors included in the Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2009 for discussion of certain risks relating to our businesses and investment in our securities.

Table of Contents

Throughout this Quarterly Report on Form 10-Q, Prudential Financial and the Registrant refer to Prudential Financial, Inc., the ultimate holding company for all of our companies. Prudential Insurance refers to The Prudential Insurance Company of America, before and after its demutualization on December 18, 2001. Prudential, the Company, we and our refer to our consolidated operations before and after demutualization.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements

1. BUSINESS AND BASIS OF PRESENTATION

Prudential Financial, Inc. (Prudential Financial) and its subsidiaries (collectively, Prudential or the Company) provide a wide range of insurance, investment management, and other financial products and services to both individual and institutional customers throughout the United States and in many other countries. Principal products and services provided include life insurance, annuities, retirement-related services, mutual funds, investment management, and real estate services. The Company has organized its principal operations into the Financial Services Businesses and the Closed Block Business. The Financial Services Businesses operate through three operating divisions: U.S. Retirement Solutions and Investment Management, U.S. Individual Life and Group Insurance, and International Insurance and Investments. The Company's real estate and relocation services business as well as businesses that are not sufficiently material to warrant separate disclosure and businesses to be divested, including the Company's investment in the retail securities brokerage joint venture Wachovia Securities Financial Holdings, LLC (Wachovia Securities), are included in Corporate and Other operations within the Financial Services Businesses. The Closed Block Business, which includes the Closed Block (see Note 6), is managed separately from the Financial Services Businesses. The Closed Block Business was established on the date of demutualization and includes the Company's in force participating insurance and annuity products and assets that are used for the payment of benefits and policyholders' dividends on these products, as well as other assets and equity that support these products and related liabilities. In connection with the demutualization, the Company ceased offering these participating products.

Basis of Presentation

The Unaudited Interim Consolidated Financial Statements include the accounts of Prudential Financial, entities over which the Company exercises control, including majority-owned subsidiaries and minority-owned entities such as limited partnerships in which the Company is the general partner, and variable interest entities in which the Company is considered the primary beneficiary. See Note 5 for more information on the Company's consolidated variable interest entities. The Unaudited Interim Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) on a basis consistent with reporting interim financial information in accordance with instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (SEC). Intercompany balances and transactions have been eliminated. The Company has evaluated subsequent events through November 6, 2009, the date these financial statements were issued as part of this Quarterly Report on Form 10-Q.

In the opinion of management, all adjustments necessary for a fair statement of the financial position and results of operations have been made. All such adjustments are of a normal, recurring nature. Interim results are not necessarily indicative of the results that may be expected for the full year. These financial statements should be read in conjunction with the Company's Audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The most significant estimates include those used in determining deferred policy acquisition costs and related amortization; measurement of goodwill and any related impairment; valuation of business acquired and its amortization; valuation of investments including derivatives and the recognition of other-than-temporary

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

impairments; future policy benefits including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; reserves for contingent liabilities, including reserves for losses in connection with unresolved legal matters.

Reclassifications

Certain amounts in prior periods have been reclassified to conform to the current period presentation.

2. ACCOUNTING POLICIES AND PRONOUNCEMENTS

Share-Based Payments

The Company issues employee share-based compensation awards, under a plan authorized by the Board of Directors, that are subject to specific vesting conditions. Generally the awards vest ratably over a three-year period, the nominal vesting period, or at the date the employee retires (as defined by the plan), if earlier. The Company accounts for those awards granted between (a) the adoption on January 1, 2003 of the fair value recognition provisions of authoritative guidance on accounting for stock based compensation, and (b) the adoption on January 1, 2006 of revised authoritative guidance on accounting for stock based compensation, which specify that an employee vests in the award upon retirement, using the nominal vesting period approach. Under this approach, the Company records compensation expense over the nominal vesting period. If the employee retires before the end of the nominal vesting period, any remaining unrecognized compensation cost is recognized at the date of retirement.

Upon the adoption of the revised authoritative guidance on accounting for stock based compensation on January 1, 2006, the Company revised its approach to the recognition of compensation costs for awards granted to retirement-eligible employees and awards that vest when an employee becomes retirement-eligible to apply the non-substantive vesting period approach to all new share-based compensation awards granted after January 1, 2006. Under this approach, all compensation cost is recognized on the date of grant for awards issued to retirement-eligible employees, or over the period from the grant date to the date retirement eligibility is achieved, if that is expected to occur during the nominal vesting period.

If the Company had accounted for all share-based compensation awards granted after January 1, 2003 under the non-substantive vesting period approach, net income of the Financial Services Businesses for the three and nine months ended September 30, 2008 would have been increased by \$0.2 million and \$1 million, respectively, with no reportable impact to earnings per share of Common Stock, on both a basic and diluted basis. There is no impact to net income for 2009, as all compensation expense relating to share-based compensation awards accounted for under the nominal vesting period approach had been recognized in net income by December 31, 2008.

Investments in Debt and Equity Securities

Fixed maturities are comprised of bonds, notes and redeemable preferred stock. Fixed maturities classified as available for sale are carried at fair value. See Note 12 for additional information regarding the determination of fair value. Fixed maturities that the Company has both the positive intent and ability to hold to maturity are carried at amortized cost and classified as held to maturity. The amortized cost of fixed maturities is adjusted for amortization of premiums and accretion of discounts to maturity. Interest income, as well as the related amortization of premium and accretion of discount, is included in Net investment income under the effective yield method. For mortgage-backed and asset-backed securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. In addition to prepayment assumptions, cash flow estimates vary based on assumptions regarding the underlying collateral, including default rates and changes in value. These assumptions

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

can significantly impact income recognition and the amount of other-than-temporary impairments recognized in other comprehensive income. For high credit quality mortgage-backed and asset-backed securities (those rated AA or above), cash flows are provided quarterly, and the amortized cost and effective yield of the security are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost are recorded as a charge or credit to net investment income in accordance with the retrospective method. For asset-backed and mortgage-backed securities rated below AA, the effective yield is adjusted prospectively for any changes in estimated cash flows. See the discussion below on realized investment gains and losses for a description of the accounting for impairments, as well as the impact of the Company's adoption of new authoritative guidance for the recognition and presentation of other-than-temporary impairments for debt securities. Unrealized gains and losses on fixed maturities classified as available for sale, net of tax, and the effect on deferred policy acquisition costs, valuation of business acquired, deferred sales inducements, future policy benefits and policyholders' dividends that would result from the realization of unrealized gains and losses, are included in Accumulated other comprehensive income (loss).

Trading account assets supporting insurance liabilities, at fair value includes invested assets that support certain products included in the Retirement segment, as well as certain products included in the International Insurance segment, which are experience rated, meaning that the investment results associated with these products are expected to ultimately accrue to contractholders. Realized and unrealized gains and losses for these investments are reported in Asset management fees and other income. Interest and dividend income from these investments is reported in Net investment income.

Other trading account assets, at fair value consist primarily of investments and certain derivatives used by the Company either in its capacity as a broker-dealer or for asset and liability management activities. These instruments are carried at fair value. Realized and unrealized gains and losses on other trading account assets are reported in Asset management fees and other income. Interest and dividend income from these investments is reported in Net investment income.

Equity securities available for sale are comprised of common stock, mutual fund shares, non-redeemable preferred stock, and perpetual preferred stock, and are carried at fair value. The associated unrealized gains and losses, net of tax, and the effect on deferred policy acquisition costs, valuation of business acquired, future policy benefits and policyholders' dividends that would result from the realization of unrealized gains and losses, are included in Accumulated other comprehensive income (loss). The cost of equity securities is written down to fair value when a decline in value is considered to be other-than-temporary. See the discussion below on realized investment gains and losses for a description of the accounting for impairments. Dividends from these investments are recognized in Net investment income when declared.

Short-term investments primarily consist of highly liquid debt instruments with a maturity of greater than three months and less than twelve months when purchased, other than those debt instruments meeting this definition that are included in Trading account assets supporting insurance liabilities, at fair value. These investments are generally carried at fair value and include money market investments, short-term debt securities issued by government sponsored entities and other highly liquid debt instruments.

Realized investment gains (losses) are computed using the specific identification method with the exception of some of the Company's International Insurance businesses' portfolios, where the average cost method is used. Realized investment gains and losses are generated from numerous sources, including the sale of fixed maturity securities, equity securities, investments in joint ventures and limited partnerships and

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

other types of investments, as well as adjustments to the cost basis of investments for net other-than-temporary impairments recognized in earnings. Realized investment gains and losses are also generated from prepayment premiums received on private fixed maturity securities, recoveries of principal on previously impaired securities, provisions for losses

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

on commercial mortgage and other loans, fair value changes on commercial mortgage loans carried at fair value, and fair value changes on embedded derivatives and free-standing derivatives that do not qualify for hedge accounting treatment, except those derivatives used in the Company's capacity as a broker or dealer.

The Company's available-for-sale and held-to-maturity securities with unrealized losses are reviewed quarterly to identify other-than-temporary impairments in value. In evaluating whether a decline in value is other-than-temporary, the Company considers several factors including, but not limited to the following: (1) the extent and the duration of the decline; (2) the reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening); and (3) the financial condition of and near-term prospects of the issuer. With regard to available-for-sale equity securities, the Company also considers the ability and intent to hold the investment for a period of time to allow for a recovery of value. When it is determined that a decline in value of an equity security is other-than-temporary, the carrying value of the equity security is reduced to its fair value, with a corresponding charge to earnings.

In addition, in April 2009, the Financial Accounting Standards Board (FASB) revised the authoritative guidance for the recognition and presentation of other-than-temporary impairments for debt securities. The Company early adopted this guidance on January 1, 2009. This guidance indicates that an other-than-temporary impairment must be recognized in earnings for a debt security in an unrealized loss position when an entity either (a) has the intent to sell the debt security or (b) more likely than not will be required to sell the debt security before its anticipated recovery. Prior to the adoption of this guidance the Company was required to record an other-than-temporary impairment for a debt security unless it could assert that it had both the intent and ability to hold the security for a period of time sufficient to allow for a recovery in its fair value to its amortized cost basis. For all debt securities in unrealized loss positions that do not meet either of these two criteria, the guidance requires that the Company analyze its ability to recover the amortized cost by comparing the net present value of projected future cash flows with the amortized cost of the security. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the debt security prior to impairment. The Company may use the estimated fair value of collateral as a proxy for the net present value if it believes that the security is dependent on the liquidation of collateral for recovery of its investment. If the net present value is less than the amortized cost of the investment, the difference is recorded as an other-than-temporary impairment.

Under the authoritative guidance for the recognition and presentation of other-than-temporary impairments, when an other-than-temporary impairment of a debt security has occurred, the amount of the other-than-temporary impairment recognized in earnings depends on whether the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the debt security meets either of these two criteria, the other-than-temporary impairment recognized in earnings is equal to the entire difference between the security's amortized cost basis and its fair value at the impairment measurement date. For other-than-temporary impairments of debt securities that do not meet these two criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the debt security and its net present value calculated as described above. Any difference between the fair value and the net present value of the debt security at the impairment measurement date is recorded in Other comprehensive income (loss). Unrealized gains or losses on securities for which an other-than-temporary impairment has been recognized in earnings is tracked as a separate component of Accumulated other comprehensive income (loss). Prior to the adoption of this guidance in 2009, an other-than-temporary impairment recognized in earnings for debt securities was equal to the total difference between amortized cost and fair value at the time of impairment.

For debt securities, the split between the amount of an other-than-temporary impairment recognized in other comprehensive income and the net amount recognized in earnings is driven principally by assumptions regarding

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

the amount and timing of projected cash flows. For mortgage-backed and asset-backed securities, cash flow estimates, including prepayment assumptions, are based on data from widely accepted third-party data sources or internal estimates. In addition to prepayment assumptions, cash flow estimates vary based on assumptions regarding the underlying collateral including default rates, recoveries and changes in value. For all other debt securities, cash flow estimates are driven by assumptions regarding probability of default and estimates regarding timing and amount of recoveries associated with a default. The Company has developed these estimates using information based on its historical experience as well as using market observable data, such as industry analyst reports and forecasts, sector credit ratings and other data relevant to the collectability of a security.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment, the impaired security is accounted for as if it had been purchased on the measurement date of the impairment. For debt securities, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

Goodwill

The Company tests goodwill for impairment annually as of December 31 and more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. A reporting unit is an operating segment or a unit one level below the operating segment.

The Company did not evaluate goodwill for impairment as of September 30, 2009, as no events occurred or circumstances changed that would have more likely than not reduced the fair value of a reporting unit below its carrying amount during the third quarter of 2009. The carrying value of goodwill was \$710 million as of September 30, 2009.

Derivative Financial Instruments

Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or the values of securities or commodities. Derivative financial instruments generally used by the Company include swaps, futures, forwards and options and may be exchange-traded or contracted in the over-the-counter market. Derivative positions are carried at fair value, generally by obtaining quoted market prices or through the use of valuation models. Values can be affected by changes in interest rates, foreign exchange rates, financial indices, values of securities or commodities, credit spreads, market volatility, expected returns and liquidity. Values can also be affected by changes in estimates and assumptions, including those related to counterparty behavior, used in valuation models.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Derivatives are used in a non-dealer capacity in insurance, investment and international businesses as well as treasury operations to manage the characteristics of the Company's asset/liability mix, to manage the interest rate and currency characteristics of assets or liabilities and to mitigate the risk of a diminution, upon translation to U.S. dollars, of expected non-U.S. earnings and net investments in foreign operations resulting from unfavorable changes in currency exchange rates. Additionally, derivatives may be used to seek to reduce exposure to interest rate, credit, foreign currency and equity risks associated with assets held or expected to be purchased or sold, and liabilities incurred or expected to be incurred. As discussed in detail below and in Note 14, all realized and unrealized changes in fair value of non-dealer related derivatives, with the exception of the effective portion of cash flow hedges and effective hedges of net investments in foreign operations, are recorded in current earnings. Cash flows from these derivatives are reported in the operating, investing, or financing activities sections in the Consolidated Statements of Cash Flows.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Derivatives are also used in a derivative dealer or broker capacity in the Company's securities operations to meet the needs of clients by structuring transactions that allow clients to manage their exposure to interest rates, foreign exchange rates, indices or prices of securities and commodities and similarly in a dealer or broker capacity through the operation of certain hedge portfolios. Realized and unrealized changes in fair value of derivatives used in these dealer related operations are included in Asset management fees and other income in the periods in which the changes occur. Cash flows from such derivatives are reported in the operating activities section of the Consolidated Statements of Cash Flows.

Derivatives are recorded either as assets, within Other trading account assets, or Other long-term investments, or as liabilities, within Other liabilities, in the Consolidated Statements of Financial Position, except for embedded derivatives which are recorded in the Consolidated Statements of Financial Position with the associated host contract. The Company nets the fair value of all derivative financial instruments with counterparties for which a master netting arrangement has been executed.

For non-dealer related derivatives the Company designates derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment (fair value hedge); (2) a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge); (3) a foreign-currency fair value or cash flow hedge (foreign currency hedge); (4) a hedge of a net investment in a foreign operation; or (5) a derivative that does not qualify for hedge accounting.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship. Even if a derivative qualifies for hedge accounting treatment, there may be an element of ineffectiveness of the hedge. Under such circumstances, the ineffective portion is recorded in Realized investment gains (losses), net.

The Company formally documents at inception all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives designated as fair value, cash flow, or foreign currency hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. Hedges of a net investment in a foreign operation are linked to the specific foreign operation.

When a derivative is designated as a fair value hedge and is determined to be highly effective, changes in its fair value, along with changes in the fair value of the hedged asset or liability (including losses or gains on firm commitments), are reported on a net basis in the income statement, generally in Realized investment gains (losses), net. When swaps are used in hedge accounting relationships, periodic settlements are recorded in the same income statement line as the related settlements of the hedged items.

When a derivative is designated as a cash flow hedge and is determined to be highly effective, changes in its fair value are recorded in Accumulated other comprehensive income (loss) until earnings are affected by the variability of cash flows being hedged (e.g., when periodic settlements on a variable-rate asset or liability are recorded in earnings). At that time, the related portion of deferred gains or losses on the derivative instrument is reclassified and reported in the income statement line item associated with the hedged item.

When a derivative is designated as a foreign currency hedge and is determined to be highly effective, changes in its fair value are recorded in either current period earnings or Accumulated other comprehensive income (loss), depending on whether the hedge transaction is a fair value hedge (e.g., a hedge of a recognized

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

foreign currency asset or liability) or a cash flow hedge (e.g., a foreign currency denominated forecasted transaction). When a derivative is used as a hedge of a net investment in a foreign operation, its change in fair value, to the extent effective as a hedge, is recorded in the cumulative translation adjustment account within Accumulated other comprehensive income (loss).

If it is determined that a derivative no longer qualifies as an effective fair value or cash flow hedge or management removes the hedge designation, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in Realized investment gains (losses), net. The asset or liability under a fair value hedge will no longer be adjusted for changes in fair value and the existing basis adjustment is amortized to the income statement line associated with the asset or liability. The component of Accumulated other comprehensive income (loss) related to discontinued cash flow hedges is amortized to the income statement line associated with the hedged cash flows consistent with the earnings impact of the original hedged cash flows.

When hedge accounting is discontinued because the hedged item no longer meets the definition of a firm commitment, or because it is probable that the forecasted transaction will not occur by the end of the specified time period, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in Realized investment gains (losses), net. Any asset or liability that was recorded pursuant to recognition of the firm commitment is removed from the balance sheet and recognized currently in Realized investment gains (losses), net. Gains and losses that were in Accumulated other comprehensive income (loss) pursuant to the hedge of a forecasted transaction are recognized immediately in Realized investment gains (losses), net.

If a derivative does not qualify for hedge accounting, all changes in its fair value, including net receipts and payments, are included in Realized investment gains (losses), net without considering changes in the fair value of the economically associated assets or liabilities.

The Company is a party to financial instruments that contain derivative instruments that are embedded in the financial instruments. At inception, the Company assesses whether the economic characteristics of the embedded derivative are clearly and closely related to the economic characteristics of the remaining component of the financial instrument (i.e., the host contract) and whether a separate instrument with the same terms as the embedded instrument would meet the definition of a derivative instrument. When it is determined that (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is separated from the host contract, carried at fair value, and changes in its fair value are included in Realized investment gains (losses), net. For certain financial instruments that contain an embedded derivative that otherwise would need to be bifurcated and reported at fair value, the Company may elect to classify the entire instrument as a trading account asset and report it within Other trading account assets, at fair value.

Income Taxes

The Company's liability for income taxes includes the liability for unrecognized tax benefits and interest and penalties which relate to tax years still subject to review by the Internal Revenue Service (IRS) or other taxing jurisdictions. Audit periods remain open for review until the statute of limitations has passed. Generally, for tax years which produce net operating losses, capital losses or tax credit carryforwards (tax attributes),

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

the statute of limitations does not close, to the extent of these tax attributes, until the expiration of the statute of limitations for the tax year in which they are fully utilized. The completion of review or the expiration of the

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

statute of limitations for a given audit period could result in an adjustment to the liability for income taxes. The statute of limitations for the 2002 tax year expired on April 30, 2009. The statute of limitations for the 2003 tax year expired on July 31, 2009. The statute of limitations for the 2004 and 2005 tax years is set to expire in June 2010. Tax years 2006 through 2008 are still open for IRS examination. The Company does not anticipate any significant changes within the next 12 months to its total unrecognized tax benefits related to tax years for which the statute of limitations has not expired.

As discussed above, the completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the liability for income taxes. As such, the three and nine months ended September 30, 2009 benefited from a reduction to the liability for unrecognized tax benefits and interest of \$156 million and \$307 million, respectively, primarily related to tax years prior to 2002 as a result of the expiration of the statute of limitations for the 2002 and 2003 tax years, additional interest on a tax refund received related to the 1997 through 2001 tax years, and changes in estimates.

The dividends received deduction (DRD) reduces the amount of dividend income subject to U.S. tax and is a significant component of the difference between the Company's effective tax rate and the federal statutory tax rate of 35%. The DRD for the current period was estimated using information from 2008, current year results, and was adjusted to take into account the current year's equity market performance. The actual current year DRD can vary from the estimate based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from mutual fund investments, changes in the account balances of variable life and annuity contracts, and the Company's taxable income before the DRD.

In August 2007, the IRS released Revenue Ruling 2007-54, which included, among other items, guidance on the methodology to be followed in calculating the DRD related to variable life insurance and annuity contracts. In September 2007, the IRS released Revenue Ruling 2007-61. Revenue Ruling 2007-61 suspended Revenue Ruling 2007-54 and informed taxpayers that the U.S. Treasury Department and the IRS intend to address through new regulations the issues considered in Revenue Ruling 2007-54, including the methodology to be followed in determining the DRD related to variable life insurance and annuity contracts. On May 11, 2009, the Obama Administration released the General Explanations of the Administration's Revenue Proposals. Although the Administration has not released proposed statutory language, one proposal would change the method used to determine the amount of the DRD. A change in the DRD, including the possible retroactive or prospective elimination of this deduction through regulation or legislation, could increase actual tax expense and reduce the Company's consolidated net income. These activities had no impact on the Company's 2008 or 2009 results.

In December 2006, the IRS completed all fieldwork with respect to its examination of the consolidated federal income tax returns for tax years 2002 and 2003. The final report was initially submitted to the Joint Committee on Taxation for their review in April 2007. The final report was resubmitted in March 2008 and again in April 2008. The Joint Committee returned the report to the IRS for additional review of an industry issue regarding the methodology for calculating the DRD related to variable life insurance and annuity contracts. The IRS completed its review of the issue and proposed an adjustment with respect to the calculation of the DRD. In order to expedite receipt of an income tax refund related to the 2002 and 2003 tax years, the Company has agreed to such adjustment. The report, with the adjustment to the DRD, was submitted to the Joint Committee on Taxation in October 2008. The Company was advised on January 2, 2009 that the Joint Committee completed its consideration of the report and has taken no exception to the conclusions reached by the IRS. Accordingly, the final report was processed and a \$157 million refund was received in February 2009. The Company believes that its return position with respect to the calculation of the DRD is technically correct. Therefore, the Company filed protective refund claims on October 1, 2009 to recover the taxes associated with the agreed upon adjustment and to pursue such other actions as appropriate. These activities had no impact on the Company's 2008 or 2009 results.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

In January 2007, the IRS began an examination of tax years 2004 through 2006. For tax years 2007, 2008 and 2009, the Company participated in the IRS's Compliance Assurance Program (CAP). Under CAP, the IRS assigns an examination team to review completed transactions contemporaneously during these tax years in order to reach agreement with the Company on how they should be reported in the tax returns. If disagreements arise, accelerated resolutions programs are available to resolve the disagreements in a timely manner before the tax returns are filed. It is management's expectation this program will shorten the time period between the filing of the Company's federal income tax returns and the IRS's completion of its examination of the returns.

The Company's affiliates in Japan file separate tax returns and are subject to audits by the local taxing authority. The general statute of limitations is 5 years from when the return is filed. During 2009, the Tokyo Regional Taxation Bureau concluded a routine tax audit of the tax returns of Prudential Life Insurance Company Ltd. for its tax years ending March 31, 2004 to March 31, 2008. These activities had no material impact on the Company's 2008 and 2009 results.

Accounting Pronouncements Adopted

In June 2009, the FASB issued authoritative guidance for, and on July 1, 2009 launched, the FASB's Accounting Standards CodificationTM as the source of authoritative U.S. GAAP to be applied by nongovernmental entities. The Codification is not intended to change U.S. GAAP but is a new structure which takes accounting pronouncements and organizes them by accounting topic. This guidance is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Company's adoption of this guidance effective for the interim reporting period ending September 30, 2009 impacts the way the Company references U.S. GAAP accounting standards in the financial statements.

In May 2009, the FASB issued authoritative guidance for subsequent events, which addresses the accounting for and disclosure of subsequent events not addressed in other applicable GAAP, including disclosure of the date through which subsequent events have been evaluated. This guidance is effective for interim or annual periods ending after June 15, 2009. The Company's adoption of this guidance effective with the interim period ending June 30, 2009 did not have a material effect on the Company's consolidated financial position or results of operations. The required disclosure of the date through which subsequent events have been evaluated is provided in Note 1.

In April 2009, the FASB revised the authoritative guidance for disclosures about fair value of financial instruments. This new guidance requires disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This guidance also amends the disclosure requirements. This guidance is effective for interim reporting periods ending after June 15, 2009. The Company adopted this guidance effective with the interim period ending June 30, 2009. The required disclosures are provided in Note 12.

In April 2009, the FASB revised the authoritative guidance for the recognition and presentation of other-than-temporary impairments. This new guidance amends the other-than-temporary impairment guidance for debt securities and expands the presentation and disclosure requirements of other-than-temporary impairments on debt and equity securities in the financial statements. This guidance also requires that the required annual

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

disclosures for debt and equity securities be made for interim reporting periods. This guidance does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This guidance is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company early adopted this guidance effective January 1, 2009, which resulted in a net after-tax increase to retained earnings and decrease to accumulated other comprehensive income (loss) of \$659 million. The disclosures required by this new guidance are provided in Note 4. See Investments in Debt and Equity Securities above for more information.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

In April 2009, the FASB revised the authoritative guidance for fair value measurements and disclosures to provide guidance on (1) estimating the fair value of an asset or liability if there was a significant decrease in the volume and level of trading activity for these assets or liabilities, and (2) identifying transactions that are not orderly. Further, this new guidance requires additional disclosures about fair value measurements in interim and annual periods. This guidance is effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. The Company's early adoption of this guidance effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations. The disclosures required by this revised guidance are provided in Note 12.

In April 2009, the FASB revised the authoritative guidance for the accounting for business combinations. This new guidance requires an asset acquired or liability assumed in a business combination that arises from a contingency to be recognized at fair value at the acquisition date, if the acquisition date fair value of that asset or liability can be determined during the measurement period. If the acquisition date fair value of an asset acquired or liability assumed in a business combination that arises from a contingency cannot be determined during the measurement period, the asset or liability shall be recognized at the acquisition date using the authoritative guidance related to accounting for contingencies. This new guidance also amends disclosure requirements. This guidance is effective for assets or liabilities arising from contingencies in business combinations for which the acquisition date is on or after January 1, 2009. The Company's adoption of this guidance effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations.

In September 2008, the FASB Emerging Issues Task Force (EITF) reached consensus on issuer's accounting for liabilities measured at fair value with a third-party credit enhancement. The consensus concluded that (a) the issuer of a liability (including debt) with a third-party credit enhancement that is inseparable from the liability, shall not include the effect of the credit enhancement in the fair value measurement of the liability; (b) the issuer shall disclose the existence of any third-party credit enhancement on such liabilities, and (c) in the period of adoption the issuer shall disclose the valuation techniques used to measure the fair value of such liabilities and disclose any changes from valuation techniques used in prior periods. The Company's adoption of this guidance on a prospective basis effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations.

In June 2008, the FASB EITF reached consensus on the following issues contained in authoritative guidance for derivative instruments and hedging activities for determining whether an instrument (or an embedded feature) is indexed to an entity's own stock: (1) how an entity should evaluate whether an instrument (or embedded feature) is indexed to the entity's own stock; (2) how the currency in which the strike price of an equity-linked financial instrument (or embedded equity-linked feature) is denominated affects the determination of whether the instrument is indexed to the entity's own stock; (3) how an issuer should account for equity-linked financial instruments issued to investors for purposes of establishing a market-based measure of the grant-date fair value of employee stock options. This guidance clarifies what instruments qualify as indexed to an entity's own stock and are thereby eligible for equity classification. The Company's adoption of this guidance effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations.

In June 2008, the FASB revised the authoritative guidance for earnings per share for determining whether instruments granted in share-based payment transactions are participating securities. This new guidance states that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share (EPS) pursuant to the two-class method. This guidance is effective for fiscal years and interim periods beginning after December 15, 2008, and must be applied retrospectively to all EPS data presented. The

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Company's adoption of this guidance effective January 1, 2009 had no reportable impact on earnings per basic and diluted share of Common Stock for the three months ended September 30, 2008, and reduced earnings per basic and diluted share of Common Stock for the nine months ended September 30, 2008 by \$0.01. The Company's adoption of this guidance effective January 1, 2009 reduced earnings per basic share of Common Stock for the years ended December 31, 2008, 2007, 2006, 2005 and 2004 by \$0.01, \$0.05, \$0.06, \$0.06 and \$0.02, respectively, and earnings per diluted share of Common Stock by \$0.01, \$0.01, \$0.02, \$0.03 and \$0.01, respectively.

In May 2008, the FASB revised the authoritative guidance for the accounting for convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement). This new guidance, which is effective for fiscal years and interim periods beginning after December 15, 2008 and must be applied retrospectively, addresses the accounting for certain convertible debt instruments including those that have been issued by the Company. It requires bifurcation of the instrument into a debt component that is initially recorded at fair value and an equity component. The difference between the fair value of the debt component and the initial proceeds from issuance of the instrument is recorded as a component of equity within additional paid-in capital. The liability component of the debt instrument is accreted to par using the effective yield method, with the accretion being reported as a component of interest expense. Bond issuance costs are allocated to the debt and equity components in proportion to the debt proceeds. The Company's adoption of this guidance effective January 1, 2009 reduced net income for the three months ended September 30, 2008 by \$10 million or \$0.02 per share of Common Stock, on both a basic and diluted basis and reduced net income for the nine months ended September 30, 2008 by \$28 million or \$0.06 per share of Common Stock, on both a basic and diluted basis. The Company's adoption of this guidance effective January 1, 2009 reduced net income for the years ended December 31, 2008, 2007, 2006 and 2005 by \$44 million, \$42 million, \$36 million and \$5 million, or \$0.10, \$0.09, \$0.07 and \$0.01 per share of Common Stock, on both a basic and diluted basis, respectively.

In April 2008, the FASB revised the authoritative guidance for the determination of the useful life of intangible assets. This new guidance amends the list of factors an entity should consider in developing renewal or extension assumptions used to determine the useful life of recognized intangible assets. This guidance is effective for fiscal years and interim periods beginning after December 15, 2008, with the guidance for determining the useful life of a recognized intangible asset being applied prospectively to intangible assets acquired after the effective date and the disclosure requirements being applied prospectively to all intangible assets recognized as of, and after, the effective date. The Company's adoption of this guidance effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations.

In March 2008, the FASB issued authoritative guidance for derivative instruments and hedging activities which amends and expands the disclosure requirements for derivative instruments and hedging activities by requiring companies to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. The Company's adoption of this guidance effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations. The required disclosures are provided in Note 14.

In February 2008, the FASB revised the authoritative guidance for the accounting for transfers of financial assets and repurchase financing transactions. The new guidance provides recognition and derecognition guidance for a repurchase financing transaction, which is a repurchase agreement that relates to a previously transferred financial asset between the same counterparties, that is entered into contemporaneously with or in contemplation of, the initial transfer. The guidance is effective for fiscal years beginning after November 15, 2008. The Company's adoption of this guidance on a prospective basis effective January 1, 2009 did not have a material effect on the Company's consolidated financial position

or results of operations.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

In February 2008, the FASB revised the authoritative guidance which delays the effective date related to fair value measurements and disclosures for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The Company's adoption of this guidance effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations.

In December 2007, the FASB issued authoritative guidance for business combinations which addresses the accounting for business acquisitions, is effective for fiscal years beginning on or after December 15, 2008, with early adoption prohibited, and generally applies to business acquisitions completed after December 31, 2008. Among other things, the new guidance requires that all acquisition-related costs be expensed as incurred, and that all restructuring costs related to acquired operations be expensed as incurred. This new guidance also addresses the current and subsequent accounting for assets and liabilities arising from contingencies acquired or assumed and, for acquisitions both prior and subsequent to December 31, 2008, requires the acquirer to recognize changes in the amount of its deferred tax benefits that are recognizable because of a business combination either in income from continuing operations in the period of the combination or directly in contributed capital, depending on the circumstances. The Company's adoption of this guidance effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations, but may have an effect on the accounting for future business combinations.

In December 2007, the FASB issued authoritative guidance for noncontrolling interests in consolidated financial statements which changes the accounting for minority interests, which will be recharacterized as noncontrolling interests and classified by the parent company as a component of equity. Upon adoption, this guidance requires retroactive adoption of the presentation and disclosure requirements for existing noncontrolling interests and prospective adoption for all other requirements. The Company's adoption of this guidance effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations, but did affect financial statement presentation and disclosure. Noncontrolling interests, previously reported as a liability, are now required to be reported as a separate component of equity on the balance sheet, and totaled \$301 million at September 30, 2008 and totaled \$351 million, \$409 million, \$329 million, \$110 million, and \$97 million at December 31, 2008, 2007, 2006, 2005 and 2004, respectively. In addition, income attributable to the noncontrolling interests, which was previously reported as an expense in General and administrative expenses and reflected within Income from Continuing Operations is now reported as a separate amount below Net Income, and totaled \$5 million and \$37 million for the three and nine months ended September 30, 2008, respectively, and totaled \$36 million, \$67 million, \$25 million, \$21 million and \$13 million for the years ended December 31, 2008, 2007, 2006, 2005 and 2004, respectively.

Recent Accounting Pronouncements

In September 2009, the FASB issued updated guidance for the fair value measurement of investments in certain entities that calculate net asset value per share including certain alternative investments such as hedge funds, private equity funds, and venture capital funds. This guidance allows companies to determine the fair value of such investments using net asset value (NAV) as a practical expedient if the fair value of the investment is not readily determinable and the investee entity issues financial statements in accordance with measurement principles for investment companies. Use of this practical expedient is prohibited if it is probable the investment will be sold at something other than NAV. This guidance also requires new disclosures for each major category of alternative investments. It is effective for the first annual or interim reporting period ending after December 15, 2009, with early application permitted. The Company will adopt this guidance effective December 31, 2009. The Company is currently assessing the impact of this guidance on the Company's consolidated financial position, results of operations, and financial statement disclosures.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

In August 2009, the FASB issued updated guidance for the fair value measurement of liabilities. This guidance includes techniques for measuring fair value when a quoted price in an active market for the identical liability is not available and clarifies that restrictions preventing the transfer of a liability should not be considered as a separate input or adjustment in the measurement of its fair value. This guidance is effective for the first reporting period (including interim periods) beginning after issuance. The Company will adopt this guidance effective with the annual reporting period ended December 31, 2009. The Company is currently assessing the impact of this guidance on the Company's consolidated financial position, results of operations, and financial statement disclosures.

In June 2009, the FASB issued authoritative guidance which changes the analysis required to determine whether or not an entity is a variable interest entity (VIE). In addition, the guidance changes the determination of the primary beneficiary of a VIE from a quantitative to a qualitative model. Under the new qualitative model, the primary beneficiary must have both the ability to direct the activities of the VIE and the obligation to absorb either losses or gains that could be significant to the VIE. This guidance also changes when reassessment is needed, as well as requires enhanced disclosures, including the effects of a company's involvement with a VIE on its financial statements. This guidance is effective for interim and annual reporting periods beginning after November 15, 2009. The Company will adopt this guidance effective January 1, 2010. The Company is currently assessing the impact of this guidance on the Company's consolidated financial position, results of operations, and financial statement disclosures.

In June 2009, the FASB issued authoritative guidance which changes the accounting for transfers of financial assets, and is effective for transfers of financial assets occurring in interim and annual reporting periods beginning after November 15, 2009. It removes the concept of a qualifying special-purpose entity (QSPE) from the guidance for transfers of financial assets and removes the exception from applying the guidance for consolidation of variable interest entities to qualifying special-purpose entities. It changes the criteria for achieving sale accounting when transferring a financial asset and changes the initial recognition of retained beneficial interests. The guidance also defines participating interest to establish specific conditions for reporting a transfer of a portion of a financial asset as a sale. Disclosure provisions will be applied to transfers that occurred both before and after January 1, 2010. The Company will adopt this guidance effective January 1, 2010. The Company is currently assessing the impact of this guidance on the Company's consolidated financial position, results of operations, and financial statement disclosures.

In December 2008, the FASB revised the authoritative guidance for employers' disclosures about postretirement benefit plan assets. This new guidance requires additional disclosures about the components of plan assets, investment strategies for plan assets, significant concentrations of risk within plan assets, and requires disclosures regarding the fair value measurement of plan assets. This guidance is effective for fiscal years ending after December 15, 2009. The Company will provide the required disclosures in the annual reporting period ending December 31, 2009.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

3. ACQUISITIONS AND DISPOSITIONS

Acquisition of Yamato Life

On May 1, 2009, the Company's Gibraltar Life operations acquired Yamato Life, a Japanese life insurance company that declared bankruptcy in October 2008. Gibraltar Life served as the reorganization sponsor for Yamato and under the reorganization agreement acquired Yamato by contributing \$72 million of capital to Yamato. As of September 30, 2009, the Company's Unaudited Interim Consolidated Statement of Financial Position reflects \$2.3 billion of assets and \$2.3 billion of liabilities related to Yamato. Subsequent to the acquisition, the Company renamed the acquired company The Prudential Financial of Japan Life Insurance Company Ltd.

Acquisition of Hyundai Investment and Securities Co., Ltd.

In 2004, the Company acquired an 80 percent interest in Hyundai Investment and Securities Co., Ltd., a Korean asset management firm, from an agency of the Korean government, for \$301 million in cash, including \$210 million used to repay debt assumed. Subsequent to the acquisition, the company was renamed Prudential Investment & Securities Co., Ltd. On January 25, 2008, the Company acquired the remaining 20 percent for \$90 million.

Additional Investment in UBI Pramerica

On January 18, 2008, the Company made an additional investment of \$154 million in its UBI Pramerica operating joint venture in Italy, which is accounted for under the equity method. This additional investment was necessary to maintain the Company's ownership interest at 35 percent and was a result of the merger of the Company's joint venture partner with another Italian bank, and the subsequent consolidation of their asset management companies into the UBI Pramerica joint venture.

Discontinued Operations

Income (loss) from discontinued businesses, including charges upon disposition, are as follows:

Fixed maturities, held to maturity:				
Proceeds from maturities/repayments	\$ 113	\$ 82	\$ 281	\$ 193
Gross investment gains from prepayments				
Fixed maturity and equity security impairments:				
Net writedowns for other-than-temporary impairment losses on fixed maturities recognized in earnings ⁽¹⁾	\$ (360)	\$ (452)	\$ (1,464)	\$ (1,652)
Writedowns for other-than-temporary impairment losses on equity securities	\$ (223)	\$ (85)	\$ (979)	\$ (415)

(1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

As discussed in Note 2, a portion of certain other-than-temporary impairment (OTTI) losses on fixed maturity securities are recognized in Other comprehensive income (loss) (OCI). The net amount recognized in earnings (credit loss impairments) represents the difference between the amortized cost of the security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment. Any remaining difference between the fair value and amortized cost is recognized in OCI. The following table sets forth the amount of pre-tax credit loss impairments on fixed maturity securities held by the Company as of the dates indicated, for which a portion of the OTTI loss was recognized in OCI, and the corresponding changes in such amounts for the periods indicated.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****Credit losses recognized in earnings on fixed maturity securities held by the Company for which a portion of the OTTI loss was recognized in OCI**

	Three Months Ended September 30, 2009	Nine Months Ended September 30, 2009
	(in millions)	
Balance, beginning of period	\$ 1,522	\$
Credit losses remaining in retained earnings related to adoption of new authoritative guidance on January 1, 2009		658
Credit loss impairments previously recognized on securities which matured, paid down, prepaid or were sold during the period	(60)	(151)
Credit loss impairments previously recognized on securities impaired to fair value during the period(1)	(3)	(9)
Credit loss impairment recognized in the current period on securities not previously impaired	81	639

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****Net Unrealized Investment Gains (Losses)**

Net unrealized investment gains and losses on securities classified as available for sale and certain other long-term investments and other assets are included in the Consolidated Statements of Financial Position as a component of Accumulated other comprehensive income (loss), or AOCI. Changes in these amounts include reclassification adjustments to exclude from Other comprehensive income (loss) those items that are included as part of Net income for a period that had been part of Other comprehensive income (loss) in earlier periods. The amounts for the periods indicated below, split between amounts related to fixed maturity securities on which an OTTI loss has been recognized, and all other net unrealized investment gains and losses, are as follows:

Net Unrealized Investment Gains and Losses on Fixed Maturity Securities on which an OTTI loss has been recognized

	Net Unrealized Gains (Losses) On Investments	Deferred Policy Acquisition Costs, Deferred Sales Inducements and Valuation of Business Acquired	Future Policy Benefits	Policyholders Dividends	Deferred Income Tax (Liability) Benefit	Accumulated Other Comprehensive Income (Loss) Related To Net Unrealized Investment Gains (Losses)

- (1) Includes \$926 million of fair value and \$133 million of gross unrealized losses at December 31, 2008 on securities classified as held to maturity, which are not reflected in accumulated other comprehensive income.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The gross unrealized losses at September 30, 2009 and December 31, 2008 are composed of \$4,019 million and \$12,863 million related to investment grade securities and \$2,750 million and \$3,752 million related to below investment grade securities, respectively. At September 30, 2009, \$3,764 million of the gross unrealized losses represented declines in value of greater than 20%, \$403 million of which had been in that position for less than six months, as compared to \$11,505 million at December 31, 2008 that represented declines in value of greater than 20%, \$10,509 million of which had been in that position for less than six months. At September 30, 2009, the \$5,107 million of gross unrealized losses of twelve months or more were concentrated in asset-backed securities, manufacturing, finance, and services sectors of the Company's corporate securities. At December 31, 2008, the \$8,731 million of gross unrealized losses of twelve months or more were concentrated in asset-backed securities, and in the manufacturing and utilities sectors of the Company's corporate securities. In accordance with its policy described in Note 2, the Company concluded that an adjustment to earnings for other-than-temporary impairments for these securities was not warranted at September 30, 2009 or December 31, 2008. These conclusions are based on a detailed analysis of the underlying credit and cash flows on each security. The gross unrealized losses are primarily attributable to credit spread widening and increased liquidity discounts. At September 30, 2009, the Company does not intend to sell the securities and it is not more likely than not that the Company will be required to sell the securities before the anticipated recovery of its remaining amortized cost basis.

Duration of Gross Unrealized Loss Positions for Equity Securities

The following tables show the fair value and gross unrealized losses aggregated by length of time that individual equity securities have been in a continuous unrealized loss position, as of the dates indicated:

	Less than twelve months		September 30, 2009 Twelve months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Equity securities, available for sale	\$ 1,258	\$ 103	\$ 737	\$ 108	\$ 1,995	\$ 211

	Less than twelve months		December 31, 2008 Twelve months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Equity securities, available for sale	\$ 3,978	\$ 1,419	\$ 263	\$ 63	\$ 4,241	\$ 1,482

At September 30, 2009, \$75 million of the gross unrealized losses represented declines of greater than 20%, \$20 million of which had been in that position for less than six months. At December 31, 2008, \$1,227 million of the gross unrealized losses represented declines of greater than 20%, \$1,086 million of which had been in that position for less than six months. Securities with fair value of \$737 million and \$263 million and gross unrealized losses of \$108 million and \$63 million that have been in a continuous unrealized loss position for twelve months or more as of September 30, 2009 and December 31, 2008, respectively, represent perpetual preferred securities, which have characteristics of both debt and

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

equity securities and to which an impairment model similar to the Company's fixed maturities is applied. In accordance with its policy described in Note 2, the Company concluded that an adjustment for other-than-temporary impairments for these securities was not warranted at September 30, 2009 or December 31, 2008.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****5. VARIABLE INTEREST ENTITIES**

In the normal course of its activities, the Company enters into relationships with various special purpose entities and other entities that are deemed to be variable interest entities ("VIEs"). A VIE is an entity that either (1) has equity investors that lack certain essential characteristics of a controlling financial interest (including the ability to control the entity, the obligation to absorb the entity's expected losses and the right to receive the entity's expected residual returns) or (2) lacks sufficient equity to finance its own activities without financial support provided by other entities, which in turn would be expected to absorb at least some of the expected losses of the VIE. If the Company determines that it stands to absorb a majority of the VIE's expected losses or to receive a majority of the VIE's expected residual returns, the Company would be deemed to be the VIE's primary beneficiary and would be required to consolidate the VIE.

Consolidated Variable Interest Entities for which the Company is the Sponsor

The Company is the sponsor of certain asset-backed investment vehicles (commonly referred to as collateralized debt obligations, or "CDOs") and certain other vehicles for which the Company earns fee income for investment management services, including certain investment structures which the Company's asset management business invests with other co-investors in investment funds referred to as feeder funds. The Company sells or syndicates investments through these vehicles, principally as part of the proprietary investing activity of the Company's asset management businesses. Additionally, the Company may invest in debt or equity securities issued by these vehicles. CDOs raise capital by issuing debt securities, and use the proceeds to purchase investments, typically interest-bearing financial instruments. The Company analyzes these relationships to determine whether or not it absorbs the majority of expected losses or receives the majority of the expected residual returns, and thus is the primary beneficiary. This analysis includes a review of the Company's size and relative position in the capital structure and/or a review of cash flow projections driven by assumptions regarding the underlying collateral including default rate, recovery rate, deal call probability, reinvestment rates and fees and expenses. The Company has not provided material financial or other support that was not contractually required to any VIE for which it is the sponsor.

The Company has determined that it is the primary beneficiary of certain VIEs that it sponsors, including one CDO and certain other investment structures, as it absorbs a majority of the expected losses or receives the majority of the expected residual returns. The table below reflects the carrying amount and balance sheet caption in which the assets and liabilities of consolidated VIEs for which the Company is the sponsor are reported. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIE.

	September 30, 2009	December 31, 2008
	(in millions)	
Fixed maturities, available for sale	\$ 76	\$ 29

Total liabilities of consolidated VIEs	\$ 466	\$ 515

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)***Unconsolidated Variable Interest Entities for which the Company is the Sponsor*

The Company has also determined that it is not the primary beneficiary of certain VIEs that it sponsors, including certain CDOs and other investment structures, as it will not absorb a majority of the expected losses or receive the majority of the expected residual returns. The Company's maximum exposure to loss resulting from its relationship with unconsolidated VIEs it sponsors is limited to its investment in the VIEs, which was \$392 million and \$674 million at September 30, 2009 and December 31, 2008, respectively. The Company's maximum exposure to loss decreased from December 31, 2008, reflecting the redemption of a fixed income fund as of September 30, 2009. These investments are reflected in Fixed maturities, available for sale and Other long-term investments. The fair value of assets held within these unconsolidated VIEs was \$6,913 million and \$5,916 million as of September 30, 2009 and December 31, 2008, respectively. There are no liabilities associated with these unconsolidated VIEs on the Company's balance sheet.

Consolidated Variable Interest Entities for which the Company is not the Sponsor

The Company is the primary beneficiary of certain VIEs in which the Company has invested, as part of its investment activities, but over which the Company does not exercise control and is not the sponsor. Included among these structured investments are structured investments issued by a VIE that manages yen-denominated investments coupled with cross-currency coupon swap agreements thereby creating synthetic dual currency investments. The Company's position in the capital structure and/or relative size indicates that the Company is the primary beneficiary. The Company has not provided material financial or other support that was not contractually required to these VIEs. The table below reflects the carrying amount and balance sheet caption in which the assets of consolidated VIEs for which the Company is not the sponsor are reported. The liabilities of consolidated VIEs for which the Company is not the sponsor are included in Other liabilities and are also reflected in the table below. These liabilities primarily comprise obligations under debt instruments issued by the VIEs that are non-recourse to the Company. The creditors of each consolidated VIE have recourse only to the assets of that VIE. As reflected in the table below, total assets of consolidated VIEs for which the Company is not a sponsor decreased from December 31, 2008 to September 30, 2009, reflecting the deconsolidation of a VIE that manages investments in the European market. The assets held by the VIE were distributed to the Company during March 2009.

	September 30, 2009	December 31, 2008

Total assets of consolidated VIEs	\$ 1,113	\$ 1,725
Total liabilities of consolidated VIEs	\$	\$ 61

In addition, not reflected in the table above, the Company has created a trust that is a VIE, to facilitate Prudential Insurance's Funding Agreement Notes Issuance Program (FANIP). The trust issues medium-term notes secured by funding agreements issued to the trust by Prudential Insurance with the proceeds of such notes.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

The trust is the beneficiary of an indemnity agreement with the Company that provides that the Company is responsible for costs related to the notes issued with limited exception. As a result, the Company has determined that it is the primary beneficiary of the trust, which is therefore consolidated.

The funding agreements represent an intercompany transaction that is eliminated upon consolidation. However, in recognition of the security interest in such funding agreements, the trust's medium-term note liability of \$5,484 million and \$7,130 million at September 30, 2009 and December 31, 2008, respectively, is classified within Policyholders' account balances. Creditors of the trust have recourse to Prudential Insurance if the trust fails to make contractual payments on the medium-term notes. The Company has not provided material financial or other support that was not contractually required to the trust.

Significant Variable Interests in Unconsolidated Variable Interest Entities for which the Company is not the Sponsor

In addition, in the normal course of its activities, the Company will invest in structured investments including VIEs for which it is not the sponsor. These structured investments typically invest in fixed income investments and are managed by third parties and include asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities. The Company's maximum exposure to loss on these structured investments, both VIEs and non-VIEs, is limited to the amount of its investment. The Company has not provided material financial or other support that was not contractually required to these structures. The Company has determined that it is not the primary beneficiary of these structures due to its relative size and position in the capital structure of these entities.

Included among these structured investments are asset-backed securities issued by VIEs that manage investments in the European market. In addition to a stated coupon, each investment provides a return based on the VIE's portfolio of assets and related investment activity. The market value of these VIEs was approximately \$8 billion as of both September 30, 2009 and December 31, 2008, and these VIEs were financed primarily through the issuance of notes similar to those purchased by the Company. The Company generally accounts for these investments as available for sale fixed maturities containing embedded derivatives that are bifurcated and marked-to-market through Realized investment gains (losses), net, based upon the change in value of the underlying portfolio. The Company's variable interest in each of these VIEs represents less than 50% of the only class of variable interests issued by the VIE. The Company's maximum exposure to loss from these interests was \$890 million and \$1,095 million at September 30, 2009 and December 31, 2008, respectively, which includes the fair value of the embedded derivatives.

6. CLOSED BLOCK

On the date of demutualization, Prudential Insurance established a Closed Block for certain individual life insurance policies and annuities issued by Prudential Insurance in the U.S. The recorded assets and liabilities were allocated to the Closed Block at their historical carrying amounts. The Closed Block forms the principal component of the Closed Block Business.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

The policies included in the Closed Block are specified individual life insurance policies and individual annuity contracts that were in force on the effective date of the Plan of Reorganization and for which Prudential Insurance is currently paying or expects to pay experience-based policy dividends. Assets have been allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses, and taxes and to provide

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

for continuation of the policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues. To the extent that, over time, cash flows from the assets allocated to the Closed Block and claims and other experience related to the Closed Block are, in the aggregate, more or less favorable than what was assumed when the Closed Block was established, total dividends paid to Closed Block policyholders in the future may be greater than or less than the total dividends that would have been paid to these policyholders if the policyholder dividend scales in effect in 2000 had been continued. Any cash flows in excess of amounts assumed will be available for distribution over time to Closed Block policyholders and will not be available to stockholders. If the Closed Block has insufficient funds to make guaranteed policy benefit payments, such payments will be made from assets outside of the Closed Block. The Closed Block will continue in effect as long as any policy in the Closed Block remains in force unless, with the consent of the New Jersey insurance regulator, it is terminated earlier.

The excess of Closed Block Liabilities over Closed Block Assets at the date of the demutualization (adjusted to eliminate the impact of related amounts in Accumulated other comprehensive income (loss)) represented the estimated maximum future earnings at that date from the Closed Block expected to result from operations attributed to the Closed Block after income taxes. In establishing the Closed Block, the Company developed an actuarial calculation of the timing of such maximum future earnings. If actual cumulative earnings of the Closed Block from inception through the end of any given period are greater than the expected cumulative earnings, only the expected earnings will be recognized in income. Any excess of actual cumulative earnings over expected cumulative earnings will represent undistributed accumulated earnings attributable to policyholders, which are recorded as a policyholder dividend obligation. The policyholder dividend obligation represents amounts to be paid to Closed Block policyholders as an additional policyholder dividend unless otherwise offset by future Closed Block performance that is less favorable than originally expected. If the actual cumulative earnings of the Closed Block from its inception through the end of any given period are less than the expected cumulative earnings of the Closed Block, the Company will recognize only the actual earnings in income. However, the Company may reduce policyholder dividend scales in the future, which would be intended to increase future actual earnings until the actual cumulative earnings equaled the expected cumulative earnings. As of January 1, 2009, the Company recognized an adjusted cumulative earnings policyholder dividend obligation of \$851 million to Closed Block policyholders for the excess of actual cumulative earnings over the expected cumulative earnings, which reflects a cumulative adjustment of \$418 million related to the Company's adoption of the revised authoritative guidance for the recognition and presentation of other-than-temporary impairments, effective January 1, 2009. See Note 2 for more information on the adoption of the new authoritative guidance for the recognition and presentation of other-than-temporary impairments. However, due to the accumulation of net unrealized investment losses as of December 31, 2008 that had arisen subsequent to the establishment of the Closed Block, the total policyholder dividend obligation balance was reduced to zero through Accumulated other comprehensive income (loss). As of September 30, 2009, actual cumulative earnings are below the expected cumulative earnings by \$690 million, thereby eliminating the cumulative earnings policyholder dividend obligation. Furthermore, the accumulation of net unrealized investment gains as of September 30, 2009 that have arisen subsequent to the establishment of the Closed Block, are not sufficient to overcome the cumulative earnings shortfall, and therefore, the policyholder dividend obligation balance remains at zero. See the table below for changes in the components of the policyholder dividend obligation for the nine months ended September 30, 2009.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Closed Block Liabilities and Assets designated to the Closed Block, as well as maximum future earnings to be recognized from Closed Block Liabilities and Closed Block Assets, are as follows:

- (2) See Note 2 for additional information on the adoption of new guidance for other-than-temporary impairments of debt securities.

8. EARNINGS PER SHARE

The Company has outstanding two separate classes of common stock. The Common Stock reflects the performance of the Financial Services Businesses and the Class B Stock reflects the performance of the Closed Block Business. Accordingly, earnings per share is calculated separately for each of these two classes of common stock.

Net income for the Financial Services Businesses and the Closed Block Business is determined in accordance with U.S. GAAP and includes general and administrative expenses charged to each of the respective businesses based on the Company's methodology for the allocation of such expenses. Cash flows between the Financial Services Businesses and the Closed Block Business related to administrative expenses are determined by a policy servicing fee arrangement that is based upon insurance and policies in force and statutory cash premiums. To the extent reported administrative expenses vary from these cash flow amounts, the differences are recorded, on an after tax basis, as direct equity adjustments to the equity balances of the businesses.

The direct equity adjustments modify the earnings available to each of the classes of common stock for earnings per share purposes.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****Common Stock**

A reconciliation of the numerators and denominators of the basic and diluted per share computations is as follows:

	Three Months Ended September 30,					
	Income	2009 Weighted Average Shares	Per Share Amount	Income	2008 Weighted Average Shares	Per Share Amount
	(in millions, except per share amounts)					
Basic earnings per share						
Income (loss) from continuing operations attributable to the Financial Services Businesses	\$ 1,044			\$ (118)		
Direct equity adjustment	12			10		
Less: Income (loss) attributable to noncontrolling interests	(50)			5		
Less: Earnings allocated to participating unvested share-based payment awards	12					
Income (loss) from continuing operations attributable to the Financial Services Businesses available to holders of Common Stock after direct equity adjustment	\$ 1,094	461.2	\$ 2.37	\$ (113)	423.8	\$ (0.27)
Effect of dilutive securities and compensation programs(1)						
Interest, net of tax, on Exchangeable Surplus Notes	\$ 1			\$		
Add: Earnings allocated to participating unvested share-based payment awards Basic	12					
Less: Earnings allocated to participating unvested share-based payment awards Diluted	12					
Stock options		2.4				
Deferred and long-term compensation programs		0.3				
Exchangeable Surplus Notes		0.7				
Diluted earnings per share(1)						
Income (loss) from continuing operations attributable to the Financial Services Businesses available to holders of Common Stock after direct equity adjustment	\$ 1,095	464.6	\$ 2.36	\$ (113)	423.8	\$ (0.27)

- (1) For the three months ended September 30, 2008, weighted average shares for basic earnings per share is also used for calculating diluted earnings per share because dilutive shares and dilutive earnings per share are not applicable when a loss from continuing operations is reported. As a result of the loss from continuing operations available to holders of Common Stock after direct equity adjustment for the three months ended September 30, 2008, all potential stock options and compensation programs were considered antidilutive.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

	Nine Months Ended September 30,					
	2009			2008		
	Income	Weighted Average Shares (in millions, except per share amounts)	Per Share Amount	Income	Weighted Average Shares	Per Share Amount

Unvested share-based payment awards that contain nonforfeitable rights to dividends are participating securities and included in the computation of earnings per share pursuant to the two-class method. Under this method, earnings of the Financial Services Businesses attributable to Prudential Financial, Inc. are allocated between Common Stock and the participating awards, as if the awards were a second class of stock. Earnings allocated to participating unvested share-based payment awards for the three months ended September 30, 2009 was based on 5.3 million of such awards, weighted for the period they were outstanding. For the three months ended September 30, 2008, earnings were not allocated to participating unvested share-based payment awards as these securities do not participate in losses. Earnings allocated to participating unvested share-based payment awards for the nine months ended September 30, 2009 and 2008 was based on 4.9 million and 2.6 million of such awards, respectively, weighted for the period they were outstanding. The computation of earnings per share of Common Stock excludes the dilutive impact of participating unvested share-based awards based on the application of the two-class method.

For the three months ended September 30, 2009, 10.4 million options, weighted for the portion of the period they were outstanding, with a weighted average exercise price of \$72.65 per share, were excluded from the computation of diluted earnings per share because the options,

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

based on application of the treasury stock method, were antidilutive. For the three months ended September 30, 2008, 17.9 million options and 4.2 million shares

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

related to deferred and long-term compensation programs, weighted for the portion of the period they were outstanding, are considered antidilutive as a result of the loss from continuing operations available to holders of Common Stock after direct equity adjustment. For the nine months ended September 30, 2009 and 2008, 14.1 million and 6.0 million options, respectively, weighted for the portion of the period they were outstanding, with a weighted average exercise price of \$62.87 and \$80.57 per share, respectively were excluded from the computation of diluted earnings per share because the options, based on application of the treasury stock method, were antidilutive.

On September 18, 2009, the Company issued \$500 million of surplus notes with an interest rate of 5.36% per annum which are exchangeable at the option of the note holders for shares of Common Stock. The exchange rate used in the diluted earnings per share calculation for the surplus notes is 10.1235 shares of Common Stock per each \$1,000 principal amount of surplus notes. In calculating diluted earnings per share under the if-converted method, the potential shares that would be issued assuming a hypothetical exchange, weighted for the period the notes are outstanding, is added to the denominator, and interest expense, net of tax, is added to the numerator, if the overall effect is dilutive. For the nine months ended September 30, 2009, the hypothetical impact of these shares was antidilutive and therefore excluded from the computation of diluted earnings per share. See Note 9 for additional information regarding the exchangeable surplus notes.

The Company's convertible senior notes provide for the Company to issue shares of its Common Stock as a component of the conversion of the notes. As of September 30, 2009, \$4 million of senior notes related to the \$2.0 billion December 2006 issuance remain outstanding. These will be dilutive to earnings per share if the average market price of the Common Stock for a particular period is above the initial conversion price of \$104.21. As of September 30, 2009, \$31 million of senior notes related to the \$3.0 billion December 2007 issuance remain outstanding. These senior notes will be dilutive to earnings per share if the average market price of the Common Stock for a particular period is above the initial conversion price of \$132.39. See Note 9 for additional information regarding the convertible senior notes.

Class B Stock

Income (loss) from continuing operations per share of Class B Stock was \$(10.00) and \$(34.00) for the three months ended September 30, 2009 and 2008, respectively, and \$(199.00) and \$(43.50) for the nine months ended September 30, 2009 and 2008, respectively.

The income (loss) from continuing operations attributable to the Closed Block Business available to holders of Class B Stock after direct equity adjustment for the three months ended September 30, 2009 and 2008 amounted to \$(20) million and \$(68) million, respectively. The direct equity adjustment resulted in a decrease in the income (loss) from continuing operations attributable to the Closed Block Business applicable to holders of Class B Stock for earnings per share purposes of \$12 million and \$10 million for the three months ended September 30, 2009 and 2008, respectively. The income (loss) from continuing operations attributable to the Closed Block Business available to holders of Class B Stock after direct equity adjustment for the nine months ended September 30, 2009 and 2008 amounted to \$(398) million and \$(87) million, respectively. The direct equity adjustment resulted in a decrease in the income (loss) from continuing operations attributable to the Closed Block Business applicable to holders of Class B Stock for earnings per share purposes of \$34 million and \$36 million for the nine months ended September 30, 2009 and 2008, respectively. For the three and nine months ended September 30, 2009 and 2008, the weighted average number of shares of Class B Stock used in the calculation of earnings per share amounted to 2.0 million. There are no potentially dilutive shares associated with the Class B Stock.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

9. SHORT-TERM AND LONG-TERM DEBT

Commercial Paper

Prudential Financial has a commercial paper program rated A-1 by Standard & Poor's Rating Services (S&P), P-2 by Moody's Investor Service, Inc. (Moody's) and F2 by Fitch Ratings Ltd. (Fitch) as of September 30, 2009. Prudential Financial's outstanding commercial paper borrowings were \$209 million and \$1,243 million as of September 30, 2009 and December 31, 2008, respectively.

Prudential Funding, LLC, a wholly owned subsidiary of Prudential Insurance, has a commercial paper program, rated A-1+ by S&P, P-2 by Moody's and F1 by Fitch as of September 30, 2009. Prudential Funding's outstanding commercial paper and master note borrowings were \$716 million and \$4,354 million as of September 30, 2009 and December 31, 2008, respectively. Prudential Financial has issued a subordinated guarantee covering Prudential Funding's domestic commercial paper program.

As of September 30, 2009 and December 31, 2008, the weighted average maturity of the total commercial paper outstanding was 49 and 29 days, respectively.

Both Prudential Financial's and Prudential Funding's commercial paper programs were granted approval during the fourth quarter of 2008 to participate in the Commercial Paper Funding Facility (CPFF) sponsored by the Federal Reserve Bank of New York. Commercial paper programs must maintain ratings of at least A-1/P-1/F1 by at least two rating agencies in order to be eligible for the CPFF. As of September 30, 2009, neither Prudential Financial nor Prudential Funding had any commercial paper outstanding under the CPFF. On February 19, 2009, the commercial paper credit rating of Prudential Financial was downgraded by Fitch from F1 to F2. Consequently, as of that date, Prudential Financial became ineligible to issue commercial paper under the CPFF. Prudential Funding continues to be eligible based on its current credit ratings to sell to the CPFF three-month unsecured U.S. dollar denominated commercial paper up to a maximum of \$9.815 billion, less the outstanding amount of any non-CPFF commercial paper at any applicable time. Access to the CPFF for the issuance of new commercial paper is scheduled to terminate on February 1, 2010, unless such date is extended by the Federal Reserve Bank of New York.

Convertible Senior Notes

On December 12, 2007, Prudential Financial issued in a private placement \$3.0 billion of floating rate convertible senior notes that are convertible by the holders at any time after issuance into cash and shares of Prudential Financial's Common Stock. The conversion price, \$132.39 per share, is subject to adjustment upon certain corporate events. The conversion feature requires net settlement in shares; therefore, upon conversion, a holder would receive cash up to the par amount of the convertible notes surrendered for conversion and shares of Prudential Financial Common Stock only for the portion of the settlement amount in excess of the par amount, if any. These notes are redeemable by

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Prudential Financial, at par plus accrued interest, on or after June 16, 2009. Holders of the notes may also require Prudential Financial to repurchase the notes, at par plus accrued interest, on contractually specified dates, of which the first such date was June 15, 2009. On June 15, 2009, \$1,819 million of these notes were repurchased by Prudential Financial as required by the holders. The next date on which holders of these notes may require Prudential Financial to repurchase these notes is December 15, 2009. Separately, during the fourth quarter of 2008 and the first nine months of 2009, the Company repurchased, in individually negotiated transactions, \$853 million and \$297 million, respectively, of these notes which were offered to the Company by certain holders. The notes repurchased in 2009 at a discount resulted in a pre-tax gain of \$7 million that is recorded within Asset management fees and other income. As of September 30, 2009, \$31 million of these floating rate convertible senior notes remain outstanding. In addition, as of September 30, 2009, \$4 million

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

of floating rate convertible senior notes that were issued by Prudential Financial in a private placement in December 2006 remain outstanding. The next date on which holders of these notes may require Prudential Financial to repurchase these notes is December 12, 2009.

Medium-term Notes

In June 2009, Prudential Financial issued \$250 million of 6.20% medium-term notes due January 2015 and \$750 million of 7.375% medium-term notes due June 2019 under its shelf registration statement. In September 2009, Prudential Financial issued \$600 million of 3.625% medium-term notes due September 2012 and \$900 million of 4.75% medium-term notes due September 2015 under its shelf registration statement.

Federal Home Loan Bank of New York

Prudential Insurance has been a member of the Federal Home Loan Bank of New York (FHLBNY) since June 2008. Membership allows Prudential Insurance access to collateralized advances, collateralized funding agreements, and other FHLBNY products. Collateralized advances from the FHLBNY are classified in Short-term debt or Long-term debt, depending on the maturity date of the obligation. Collateralized funding agreements issued to the FHLBNY are classified in Policyholders account balances. These funding agreements have priority claim status above debt holders of Prudential Insurance.

Prudential Insurance s membership in FHLBNY requires the ownership of member stock, and borrowings from FHLBNY require the purchase of FHLBNY activity based stock in an amount equal to 4.5% of the outstanding borrowings. All FHLBNY stock purchased by Prudential Insurance is classified as restricted general account investments within Other long-term investments, and the carrying value of these investments was \$221 million as of September 30, 2009.

The FHLBNY requires Prudential Insurance to pledge qualifying mortgage-related assets or U.S. Treasury securities as collateral for all borrowings. On May 8, 2009, the New Jersey Department of Banking and Insurance (NJDOBI) revised its prior guidance to increase the maximum amount of qualifying assets that Prudential Insurance may pledge as collateral to the FHLBNY from 5% to 7% of its prior year-end statutory net admitted assets exclusive of separate account assets; however, this limitation resets to 5% on December 31, 2010 unless extended by NJDOBI. Based on its statutory net admitted assets as of December 31, 2008, the 7% limitation equates to a maximum amount of pledged assets of \$10.5 billion and an estimated maximum borrowing capacity, after taking into account applicable required collateralization levels and required purchases of activity based FHLBNY stock, of approximately \$9.0 billion. However, the ability to borrow from the FHLBNY is subject to the availability and maintenance of qualifying assets at Prudential Insurance, and there is no assurance that Prudential Insurance will have sufficient qualifying assets available to it in order to access the increased capacity in full at any particular time. Also, the revised guidance from NJDOBI limits the aggregate amount of assets Prudential Insurance may pledge for all loans, including borrowings from the FHLBNY, to 10% of its prior year-end statutory net admitted assets exclusive of separate account assets; however, this limitation excludes certain activities, such as asset-based financing transactions.

The fair value of the qualifying assets pledged as collateral by Prudential Insurance must be maintained at certain specified levels of the borrowed amount, which can vary, depending on the nature of the assets pledged. As of September 30, 2009, Prudential Insurance had pledged qualifying assets with a fair value of \$7,530 million, which is above the minimum level required by the FHLBNY, and had total outstanding borrowings of \$3.5 billion. The total borrowings from the FHLBNY as of September 30, 2009, is comprised of collateralized advances, of which \$1.0 billion is reflected in Short-term debt and \$1.0 billion is reflected in Long-term debt, as well as \$1.5 billion of collateralized funding agreements that are reflected in Policyholders' account balances.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Exchangeable Surplus Notes

In September 2009, Prudential Insurance issued in a private placement \$500 million of surplus notes due September 2019 with an interest rate of 5.36% per annum. The surplus notes are exchangeable at the option of the holder, in whole but not in part, for shares of Prudential Financial Common Stock beginning in September 2014, or earlier upon a fundamental business combination involving Prudential Financial or a continuing payment default. The initial exchange rate for the surplus notes is 10.1235 shares of Common Stock per each \$1,000 principal amount of surplus notes, which represents an initial exchange price per share of Common Stock of \$98.78; however, the exchange rate is subject to customary anti-dilution adjustments. The exchange rate is also subject to a make-whole decrease in the event of an exchange prior to maturity (except upon a fundamental business combination or a continuing payment default), that will result in a reduction in the number of shares issued upon exchange (per \$1,000 principal amount of surplus notes) determined by dividing a prescribed cash reduction value (which will decline over the life of the surplus notes, from \$102.62 for an exercise on September 18, 2014 to zero for an exercise at maturity) by the price of the Common Stock at the time of exchange. In addition, the exchange rate is subject to a customary make-whole increase in connection with an exchange of the surplus notes upon a fundamental business combination where 10% or more of the consideration in that business combination consists of cash, other property or securities that are not listed on a U.S. national securities exchange.

The surplus notes are not redeemable by Prudential Insurance prior to maturity, except in connection with a fundamental business combination involving Prudential Financial, in which case the surplus notes will be redeemable by Prudential Insurance, subject to the noteholders' right to exchange the surplus notes instead, at par or, if greater, a make-whole redemption price. The surplus notes are subordinated to all other Prudential Insurance borrowings and policyholder obligations, except for other surplus notes of Prudential Insurance (including those currently outstanding), with which the surplus notes rank *pari passu*. Payments of interest and principal on the surplus notes may only be made with the prior approval of the New Jersey Department of Banking and Insurance.

TALF Borrowings

During the first nine months of 2009, the Company purchased securities under the Federal Reserve's Term Asset-Backed Securities Loan Facility (TALF). TALF provides secured financing for asset-backed securities backed by certain types of consumer and small business loans and as of July 2009 for certain high-quality commercial mortgage-backed securities issued before January 1, 2009. TALF financing is non-recourse to the borrower, is collateralized by the purchased securities and provides financing for the purchase price of the securities, less a haircut that varies based on the type of collateral. Borrowers under the program can deliver the collateralized securities to a special purpose vehicle created by the Federal Reserve in full defeasance of the loan.

During the first nine months of 2009, the Company obtained \$1,167 million of secured financing from the Federal Reserve under this program. In September 2009, the Company sold a portion of the securities purchased under the program and used the proceeds to repay \$188 million of the borrowings. As of September 30, 2009, the Company had \$1,066 million of securities purchased under TALF that are reflected within Other trading account assets, and had \$979 million of secured financing from the Federal Reserve related to the purchase of these securities that is reflected within Long-term debt. The Company is carrying the securities and the loan at fair value.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****10. EMPLOYEE BENEFIT PLANS**

The Company has funded and non-funded contributory and non-contributory defined benefit pension plans, which cover substantially all of its employees. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and earnings during their career.

The Company provides certain health care and life insurance benefits for its retired employees, their beneficiaries and covered dependents (other postretirement benefits). The health care plan is contributory; the life insurance plan is non-contributory. Substantially all of the Company's U.S. employees may become eligible to receive other postretirement benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service. The Company has elected to amortize its transition obligation for other postretirement benefits over 20 years.

Net periodic (benefit) cost included in General and administrative expenses includes the following components:

	Three Months Ended September 30,

11. SEGMENT INFORMATION

Segments

The Company has organized its principal operations into the Financial Services Businesses and the Closed Block Business. Within the Financial Services Businesses, the Company operates through three divisions, which together encompass seven reportable segments. The Company's real estate and relocation services business as well as businesses that are not sufficiently material to warrant separate disclosure and businesses to be divested, including the Company's investment in Wachovia Securities, are included in Corporate and Other operations within the Financial Services Businesses. Collectively, the businesses that comprise the three operating divisions and Corporate and Other are referred to as the Financial Services Businesses.

Adjusted Operating Income

In managing the Financial Services Businesses, the Company analyzes the operating performance of each segment using adjusted operating income. Adjusted operating income does not equate to income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures or net income as determined in accordance with U.S. GAAP but is the measure of segment profit or loss used by the Company to evaluate segment performance and allocate resources, and consistent with authoritative guidance, is the measure of segment performance presented below.

Adjusted operating income is calculated by adjusting each segment's income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures for the following items, which are described in greater detail below:

realized investment gains (losses), net, and related charges and adjustments;

net investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes;

the contribution to income/loss of divested businesses that have been or will be sold or exited but that did not qualify for discontinued operations accounting treatment under U.S. GAAP; and

equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

These items are important to an understanding of overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and the Company's definition of adjusted operating income may differ from that used by other companies. However, the Company believes that the presentation of adjusted operating income as measured for management purposes enhances the understanding of results of operations by highlighting the results from ongoing operations and the underlying profitability factors of the Financial Services Businesses.

Realized investment gains (losses), net, and related charges and adjustments. Adjusted operating income excludes realized investment gains (losses), net, except as indicated below. A significant element of realized investment gains and losses are impairments and credit-related and interest rate-related gains and losses from sales of securities. Impairments and losses from sales of credit-impaired securities, the timing of which depends largely on market credit cycles, can vary considerably across periods. The timing of other sales that would result in gains or losses, such as interest rate-related gains or losses, is largely subject to the Company's discretion and influenced by market opportunities, as well as the Company's tax and capital profile. Trends in the underlying profitability of the Company's businesses can be more clearly identified without the fluctuating effects of these transactions.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Charges that relate to realized investment gains (losses), net, are also excluded from adjusted operating income. The related charges are associated with: policyholder dividends; amortization of deferred policy acquisition costs, valuation of business acquired (VOBA), unearned revenue reserves and deferred sales inducements; interest credited to policyholders' account balances; reserves for future policy benefits; and payments associated with the market value adjustment features related to certain of the annuity products the Company sells. The related charges associated with policyholder dividends include a percentage of the net increase in the fair value of specified assets included in Gibraltar Life's reorganization plan that is required to be paid as a special dividend to Gibraltar Life policyholders. Deferred policy acquisition costs, VOBA, unearned revenue reserves and deferred sales inducements for certain products are amortized based on estimated gross profits, which include net realized investment gains and losses on the underlying invested assets. The related charge for these items represents the portion of this amortization associated with net realized investment gains and losses. The related charges for interest credited to policyholders' account balances relate to certain group life policies that pass back certain realized investment gains and losses to the policyholder. The reserves for certain policies are adjusted when cash flows related to these policies are affected by net realized investment gains and losses, and the related charge for reserves for future policy benefits represents that adjustment. Certain of the Company's annuity products contain a market value adjustment feature that requires us to pay to the contractholder or entitles us to receive from the contractholder, upon surrender, a market value adjustment based on the crediting rates on the contract surrendered compared to crediting rates on newly issued contracts or based on an index rate at the time of purchase compared to an index rate at time of surrender, as applicable. These payments mitigate the net realized investment gains or losses incurred upon the disposition of the underlying invested assets. The related charge represents the payments or receipts associated with these market value adjustment features.

Adjustments to Realized investment gains (losses), net, for purposes of calculating adjusted operating income, include the following:

Gains and losses pertaining to derivative contracts that do not qualify for hedge accounting treatment, other than derivatives used in the Company's capacity as a broker or dealer, are included in Realized investment gains (losses), net. This includes mark-to-market adjustments of open contracts as well as periodic settlements. As discussed further below, adjusted operating income includes a portion of realized gains and losses pertaining to certain derivative contracts.

Adjusted operating income of the International Insurance segment and International Investments segment, excluding the global commodities group, reflect the impact of an intercompany arrangement with Corporate and Other operations pursuant to which the segments' non-U.S. dollar denominated earnings in all countries for a particular year, including its interim reporting periods, are translated at fixed currency exchange rates. The fixed rates are determined in connection with a currency hedging program designed to mitigate the risk that unfavorable rate changes will reduce the segments' U.S. dollar equivalent earnings. Pursuant to this program, the Company's Corporate and Other operations execute forward currency contracts with third parties to sell the net exposure of projected earnings from the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these contracts correspond with the future periods in which the identified non-U.S. dollar denominated earnings are expected to be generated. These contracts do not qualify for hedge accounting under U.S. GAAP and, as noted above, all resulting profits or losses from such contracts are included in Realized investment gains (losses), net. When the contracts are terminated in the same period that the expected earnings emerge, the resulting positive or negative cash flow effect is included in adjusted operating income (net loss of \$5 million and gains of \$12 million for the three months ended September 30, 2009 and 2008, respectively, and net gains of \$8 million and \$16 million for the nine months ended September 30, 2009 and 2008, respectively). As of September 30, 2009 and December 31, 2008, the fair value of open contracts used for this purpose was a net liability of \$111 million and a net asset of \$85 million, respectively.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The Company uses interest rate and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. For the derivative contracts that do not qualify for hedge accounting treatment, mark-to-market adjustments of open contracts as well as periodic settlements are included in Realized investment gains (losses), net. However, the periodic swap settlements, as well as other derivative related yield adjustments, are included in adjusted operating income to reflect the after-hedge yield of the underlying instruments. In certain instances, when these derivative contracts are terminated or offset before their final maturity, the resulting realized gains or losses recorded within Realized investment gains (losses), net are recognized in adjusted operating income over periods that generally approximate the expected terms of the derivatives or underlying instruments in order for adjusted operating income to reflect the after-hedge yield of the underlying instruments. Adjusted operating income includes net gains of \$43 million and \$14 million for the three months ended September 30, 2009 and 2008, respectively, due to periodic settlements and yield adjustments of such contracts, and includes net gains of \$7 million and net losses of \$6 million, respectively, related to derivative contracts that were terminated or offset in prior periods. Adjusted operating income includes net gains of \$100 million and \$43 million for the nine months ended September 30, 2009 and 2008, respectively, due to periodic settlements and yield adjustments of such contracts, and includes net gains of \$18 million and net losses of \$14 million, respectively, related to derivative contracts that were terminated or offset in prior periods. The table below reflects the total deferred gain (loss) related to derivative contracts that were terminated or offset in prior periods that will be recognized in adjusted operating income in future periods for each segment, as well as the weighted average period over which these deferred amounts will be recognized.

Segment	As of September 30, 2009	
	Deferred amount (in millions)	Weighted average period
International Insurance	\$ 758	32 years
Asset Management	34	10 years
Corporate and Other	(62)	7 years
Total deferred gain (loss)	\$ 730	

Certain products the Company sells are accounted for as freestanding derivatives or contain embedded derivatives. Changes in the fair value of these derivatives, along with any fees received or payments made relating to the derivative, are recorded in Realized investment gains (losses), net. These Realized investment gains (losses), net are included in adjusted operating income in the period in which the gain or loss is recorded. In addition, the changes in fair value of any associated derivative portfolio that is part of an economic hedging program related to the risk of these products (but which do not qualify for hedge accounting treatment under U.S. GAAP) are also included in adjusted operating income in the period in which the gains or losses on the derivative portfolio are recorded. Adjusted operating income includes net losses of \$228 million and \$101 million for the three months ended September 30, 2009 and 2008, respectively, and net gains of \$630 million and net losses of \$146 million for the nine months ended September 30, 2009 and 2008, respectively, related to these products and any associated derivative portfolio.

Adjustments are also made for the purposes of calculating adjusted operating income for the following items:

The Company conducts certain activities for which Realized investment gains (losses), net are a principal source of earnings for its businesses and therefore included in adjusted operating income, particularly within the Company's Asset Management segment. For example, Asset Management's proprietary investing business makes investments for sale or syndication to other investors or for placement or co-investment in

the Company's

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

managed funds and structured products. The Realized investment gains (losses), net associated with the sale of these proprietary investments, as well as related derivative results, are a principal activity for this business and included in adjusted operating income. In addition, the Realized investment gains (losses), net associated with loans originated by the Company's commercial mortgage operations, as well as related derivative results and retained mortgage servicing rights, are a principal activity for this business and included in adjusted operating income. Net realized investment losses of \$44 million and net gains of \$64 million for the three months ended September 30, 2009 and 2008, respectively, and net losses of \$186 million and \$19 million for the nine months ended September 30, 2009 and 2008, respectively, related to these and other businesses were included in adjusted operating income as an adjustment to Realized investment gains (losses), net.

The Company has certain investments in its general account portfolios that are classified as trading. These trading investments are carried at fair value and included in Other trading account assets, at fair value on the Company's statements of financial position. Realized and unrealized gains and losses for these investments are recorded in Asset management fees and other income, and interest and dividend income for these investments is recorded in Net investment income. Consistent with the exclusion of realized investment gains and losses with respect to other investments managed on a consistent basis, the net gains or losses on these investments, which is recorded within Asset management fees and other income, is excluded from adjusted operating income and is reflected as an adjustment to Realized investment gains (losses), net. In addition, the secured financing received from the Federal Reserve under TALF that is reflected within Long-term debt, is carried at fair value under the fair value option under authoritative guidance around fair value. The changes in the fair value of this debt, which is recorded within Asset management fees and other income, is also excluded from adjusted operating income and are reflected as an adjustment to Realized investment gains (losses), net. This is consistent with the securities purchased with the proceeds from this financing, which are carried at fair value and included in Other trading account assets, at fair value as discussed above. The net impact of these adjustments was net gains of \$31 million and net losses of \$77 million for the three months ended September 30, 2009 and 2008, respectively, and net gains of \$14 million and net losses of \$59 million for the nine months ended September 30, 2009 and 2008, respectively.

The Company has certain assets and liabilities for which, under GAAP, the change in value due to changes in foreign currency exchange rates during the period is recorded in Asset management fees and other income. To the extent the foreign currency exposure on these assets and liabilities is economically hedged, the change in value included in Asset management fees and other income is excluded from adjusted operating income and is reflected as an adjustment to Realized investment gains (losses), net. These adjustments were net losses of \$18 million and \$31 million for the three months ended September 30, 2009 and 2008, respectively, and net gains of \$41 million and \$16 million for the nine months ended September 30, 2009 and 2008, respectively.

As a result of the Chapter 11 bankruptcy petition filed by Lehman Brothers Holdings Inc. (Lehman Brothers) on September 15, 2008, the Company experienced losses related to the unsecured portion of its counterparty exposure on derivative transactions it had entered into with Lehman Brothers and its affiliates. These losses are recorded within Asset management fees and other income within the Company's Corporate and Other operations and are excluded from adjusted operating income consistent with the adjusted operating income treatment of similar credit-related losses that are recorded within Realized investment gains (losses), net. For the three and nine months ended September 30, 2008, \$75 million of these losses were recorded in Asset management fees and other income and are excluded from adjusted operating income as a related adjustment to Realized investment gains (losses), net. Any subsequent recoveries of these losses will also be excluded from adjusted operating income. There were no adjustments for the three and nine months ended September 30, 2009.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes. Certain products included in the Retirement and International Insurance segments, are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The investments supporting these experience-rated products, excluding commercial mortgage and other loans, are classified as trading and are carried at fair value. These trading investments are reflected on the statements of financial position as Trading account assets supporting insurance liabilities, at fair value. Realized and unrealized gains and losses for these investments are reported in Asset management fees and other income. Interest and dividend income for these investments is reported in Net investment income. Commercial mortgage and other loans that support these experience-rated products are carried at unpaid principal, net of unamortized discounts and an allowance for losses, and are reflected on the statements of financial position as Commercial mortgage and other loans.

Adjusted operating income excludes net investment gains and losses on trading account assets supporting insurance liabilities. This is consistent with the exclusion of realized investment gains and losses with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains and losses on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in Interest credited to policyholders account balances. The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread the Company earns on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that are expected to accrue to the contractholders.

Divested businesses. The contribution to income/loss of divested businesses that have been or will be sold or exited, but that did not qualify for discontinued operations accounting treatment under U.S. GAAP, are excluded from adjusted operating income as the results of divested businesses are not relevant to understanding the Company's ongoing operating results.

Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests. Equity in earnings of operating joint ventures, on a pre-tax basis, are included in adjusted operating income as these results are a principal source of earnings. These earnings are reflected on a U.S. GAAP basis on an after-tax basis as a separate line on the Company's Unaudited Interim Consolidated Statements of Operations.

Earnings attributable to noncontrolling interests are excluded from adjusted operating income. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors, and are reflected on a U.S. GAAP basis as a separate line on the Company's Unaudited Interim Consolidated Statements of Operations.

12. FAIR VALUE OF ASSETS AND LIABILITIES

Fair Value Measurement Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative guidance around fair value established a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Level 1 Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available. Active markets are defined as having the following for the measured asset/liability: (i) many transactions, (ii) current prices, (iii) price quotes not varying substantially among market makers, (iv) narrow bid/ask spreads and (v) most information publicly available. The Company's Level 1 assets and liabilities primarily include certain cash equivalents and short term investments, equity securities and derivative contracts that are traded in an active exchange market. Prices are obtained from readily available sources for market transactions involving identical assets or liabilities.

Level 2 Fair value is based on significant inputs, other than Level 1 inputs, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

liabilities and other market observable inputs. The Company's Level 2 assets and liabilities include: fixed maturities (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain equity securities and commercial mortgage loans, short-term investments and certain cash equivalents (primarily commercial paper), and certain over-the-counter derivatives. Valuations are generally obtained from third party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs. Prices from services are validated through comparison to trade data and internal estimates of current fair value, generally developed using market observable inputs and economic indicators.

Level 3 Fair value is based on at least one or more significant unobservable inputs for the asset or liability. These inputs reflect the Company's assumptions about the assumptions market participants would use in pricing the asset or liability. The Company's Level 3 assets and liabilities primarily include: certain asset-backed securities collateralized by sub-prime mortgages as discussed below, certain private fixed maturities and equity securities, certain manually priced public equity securities and fixed maturities, certain highly structured over-the-counter derivative contracts, certain commercial mortgage loans, certain consolidated real estate funds for which the Company is the general partner, and embedded derivatives resulting from certain products with guaranteed benefits. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. Under certain conditions, based on its observations of transactions in active markets, the Company may conclude the prices received from independent third party pricing services or brokers are not reasonable or reflective of market activity. In those instances, the Company may choose to over-ride the third-party pricing information or quotes received and apply internally developed values to the related assets or liabilities. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3. As of September 30, 2009 and December 31, 2008 these over-rides on a net basis were not material.

Inactive Markets During the second and third quarter of 2009, the Company observed that the volume and level of activity in the market for asset-backed securities collateralized by sub-prime mortgages remained at historically low levels. This stood in particular contrast to the markets for other structured products with similar cash flow and credit profiles, which experienced an increase in the level of activity beginning in the second quarter of 2009. The Company also observed significant implied relative liquidity risk premiums, yields, and weighting of worst case cash flows for asset-backed securities collateralized by sub-prime mortgages in comparison with our own estimates for such securities. In contrast, the liquidity of other spread-based asset classes, such as corporate bonds, high yield and consumer asset-backed securities, such as those collateralized by credit cards or autos, which were previously more correlated with sub-prime securities, improved in the second and third quarter of 2009. Based on this information, the Company concluded as of June 30, 2009 and September 30, 2009 that the market for asset-backed securities collateralized by sub-prime mortgages was inactive and also determined the pricing quotes it received were based on little, if any, market activity, calling into question their representation of observable fair value. Furthermore, the Company's direct and indirect observations of the limited transactions that were occurring were dominated by forced liquidations or distressed sales and not executed in an orderly manner.

Based on this conclusion, in determining the fair value of certain asset-backed securities collateralized by sub-prime mortgages, the Company considered both third-party pricing information, and an internally developed price, based on a discounted cash flow model. The discount rate used in the model was based on observed spreads for other similarly structured credit markets which were active and dominated by observable orderly transactions. The Company also applied additional risk premiums to the discount rate to reflect the relative

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

illiquidity and asset specific cash flow uncertainty associated with asset-backed securities collateralized by sub-prime mortgages. This combined security specific additional spread reflects the Company's judgment of what an investor would demand for taking on such risks in an orderly transaction under current market conditions, and is significantly higher than would be indicative of historical spread differences between structured credit asset classes when all asset classes had active markets dominated with orderly transactions. The Company believes these estimated spreads are reflective of current market conditions in the sub-prime mortgage market and these spread estimates are further supported by their relationship to recent observations of limited transactions in sub-prime securities. Using this discount rate, valuations were developed based on the expected future cash flows of the assets. In determining how much weight to place on the third-party pricing information versus our discounted cash flow valuation, the Company considered the level of inactivity and impact of disorderly transactions. The Company weighted third-party pricing information as little as 30% where it had little observable market information, and as much as 90% where more observable information was available. As a result, as of September 30, 2009, the Company reported fair values for these sub-prime securities which were net \$795 million higher than the estimated fair values received from independent third party pricing services or brokers. The adjusted fair value of these securities was \$5,797 million, which was reflected within Level 3 in the fair value hierarchy as of September 30, 2009, based on the unobservable inputs used in the discounted cash flow model.

- (1) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account assets classified as Level 3 consist primarily of real estate and real estate investment funds. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Consolidated Statement of Financial Position.
- (2) Netting amounts represent cash collateral and the impact of offsetting asset and liability positions held with the same counterparty.

The methods and assumptions the Company uses to estimate fair value of assets and liabilities measured at fair value on a recurring basis are summarized as follows:

Fixed Maturity Securities The fair values of the Company's public fixed maturity securities are generally based on prices obtained from independent pricing services. Prices from pricing services are sourced from multiple vendors, and a vendor hierarchy is maintained by asset type

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

based on historical pricing experience and vendor expertise. The Company generally receives prices from multiple pricing services for each security, but ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. In order to validate reasonability, prices are reviewed by internal asset managers through comparison with directly observed recent market trades and internal estimates of current fair value, developed using market observable inputs and economic indicators. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2. If the pricing information received from third party pricing services is not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service. If the pricing service updates the price to be more consistent in comparison to the presented market observations, the security remains within Level 2.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

If the Company ultimately concludes that pricing information received from the independent pricing service is not reflective of market activity, non-binding broker quotes are used, if available. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may over-ride the information from the pricing service or broker with an internally developed valuation. As of September 30, 2009 and December 31, 2008 over-rides on a net basis were not material. Internally developed valuations or non-binding broker quotes are also used to determine fair value in circumstances where vendor pricing is not available. These estimates may use significant unobservable inputs, which reflect our own assumptions about the inputs market participants would use in pricing the asset. Circumstances where observable market data are not available may include events such as market illiquidity and credit events related to the security. Pricing service over-rides, internally developed valuations and non-binding broker quotes are generally included in Level 3 in our fair value hierarchy.

The fair value of private fixed maturities, which are primarily comprised of investments in private placement securities, originated by internal private asset managers, are primarily determined using a discounted cash flow model. In certain cases these models primarily use observable inputs with a discount rate based upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions, taking into account, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. Generally, these securities have been reflected within Level 2. For certain private fixed maturities, the discounted cash flow model may also incorporate significant unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the asset. Accordingly, these securities have been reflected within Level 3. Significant unobservable inputs used include: issue specific credit adjustments, material non-public financial information, management judgment, estimation of future earnings and cashflows, default rate assumptions, and liquidity assumptions. These inputs are usually considered unobservable, as not all market participants will have access to this data.

Private fixed maturities also include debt investments in funds that, in addition to a stated coupon, pay a return based upon the results of the underlying portfolios. The fair values of these securities are determined by reference to the funds' net asset value (NAV). Any restrictions on the ability to redeem interests in these funds at NAV are considered to have a de minimis effect on the fair value. Since the NAV at which the funds trade can be observed by redemption and subscription transactions between third parties, the fair values of these investments have been reflected within Level 2 in the fair value hierarchy.

Trading Account Assets (including trading account assets supporting insurance liabilities) consist primarily of public corporate bonds, treasuries, equity securities and derivatives whose fair values are determined consistent with similar instruments described above under **Fixed Maturity Securities** and below under **Equity Securities** and **Derivative Instruments**. Other trading account assets also includes collateral assets we hold under TALF, as described below under **Long-Term Debt**.

Equity Securities consist principally of investments in common and preferred stock of publicly traded companies, privately traded securities, as well as common stock mutual fund shares. The fair values of most publicly traded equity securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded equity securities are determined using valuation and discounted cash flow models that require a substantial level of judgment. In determining the fair value of certain privately traded equity securities the discounted cash flow model may also use unobservable inputs, which reflect the Company's assumptions about the inputs market participants would use in pricing the asset. Most privately traded equity securities are classified within Level 3. The fair values of common stock mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares and are classified

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

within Level 2 in the fair value hierarchy. The fair values of preferred equity securities are based on prices obtained from independent pricing services and, in order to validate reasonability, are compared with directly observed recent market trades. Accordingly, these securities are generally classified within Level 2 in the fair value hierarchy.

Commercial Mortgage and Other Loans The fair value of commercial mortgage loans held for investment and accounted for using the Fair Value Option are determined based on the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate, adjusted for the current market spread for similar quality loans. While the interest rate and market spread assumptions for similar quality loans are generally observable based upon market transactions, downward credit migration of these loans has resulted in the use of higher credit spreads, which are internally developed and not observable in the market place. As a result, these loans are included in Level 3 in the fair value hierarchy. The fair value of loans held for sale and accounted for using the Fair Value Option are determined utilizing pricing indicators from the whole loan markets, which are considered the principal exit markets for these loans. The Company has evaluated the valuation inputs used for these assets, including the terms of the loans, prevailing interest rates and credit risk, and deemed that the primary pricing inputs are Level 2 inputs in the fair value hierarchy.

Other Long-Term Investments include limited partnerships which are consolidated because the Company is either deemed to exercise control or considered the primary beneficiary of a variable interest entity. These entities are considered investment companies and follow specialized industry accounting whereby their assets are carried at fair value. The investments held by these entities include various feeder fund investments in underlying master funds (whose underlying holdings generally include public fixed maturities and equity securities), as well as wholly-owned real estate held within other investment funds.

The fair value of the feeder fund investments in master funds are generally determined by reference to the investments in the underlying master funds. The fair value of investments in funds holding publicly traded equity securities are generally based on quoted prices in active markets for identical investments and are therefore reflected as Level 1. The fair value of investments in funds holding public fixed maturities are generally based on validated quotes from pricing services as described above, and are reflected in Level 2.

The fair value of wholly-owned real estate held in consolidated investment funds is determined through an independent appraisal process. The appraisals generally utilize a discounted cash flow model, following an income approach that incorporates various assumptions including rental revenue, operating expenses and discount rates. These appraisals and the related assumptions are updated at least annually, and incorporate historical property experience and any observable market data, including any market transactions. Since many of the assumptions utilized are unobservable and are considered to be significant inputs to the valuation, the real estate investments within other long-term investments have been reflected within Level 3 in the fair value hierarchy.

Derivative Instruments Derivatives are recorded at fair value either as assets, within Other trading account assets, or Other long-term investments, or as liabilities, within Other liabilities, except for embedded derivatives which are recorded with the associated host contract. The fair values of derivative contracts are determined based on quoted prices in active exchanges or through the use of valuation models. The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected returns, non-performance risk and liquidity as well as other factors. Liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity, and other specific attributes of the underlying

derivative position. Fair values can also be affected by changes in estimates and assumptions including those related to counterparty behavior used in valuation models.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

The Company's exchange-traded futures and options include treasury futures, eurodollar futures, commodity futures, eurodollar options and commodity options. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in our fair value hierarchy.

The majority of the Company's derivative positions are traded in the over-the-counter (OTC) derivative market and are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models generally accepted in the financial services industry that use actively quoted or observable market input values from external market data providers, non-binding broker-dealer quotations, third-party pricing vendors and/or recent trading activity. The fair values of most OTC derivatives, including interest rate and cross currency swaps, currency forward contracts, commodity swaps, commodity forward contracts, single name credit default swaps, loan commitments held for sale and to-be-announced (or TBA) forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models' key assumptions include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, non-performance risk and volatility.

OTC derivative contracts are executed under master netting agreements with counterparties with a Credit Support Annex, or CSA, which is a bilateral ratings-sensitive agreement that requires collateral postings at established credit threshold levels. These agreements protect the interests of the Company and its counterparties, should either party suffer a credit rating deterioration. The vast majority of the Company's derivative agreements are with highly rated major international financial institutions. Consistent with the practice of major international financial institutions, the Company uses the credit spread embedded in the London Interbank Offered Rate (LIBOR) interest rate curve to reflect non-performance risk when determining the fair value of derivative assets and liabilities. The Company believes this credit spread is an appropriate estimate of the non-performance risk for derivative related assets and liabilities between highly rated institutions after consideration of the impacts of netting and the collateral posting process. Most OTC derivative contracts have bid and ask prices that are actively quoted or can be readily obtained from external market data providers. The Company's policy is to use mid-market pricing in determining its best estimate of fair value.

Level 3 includes OTC derivatives where the bid-ask spreads are generally wider than derivatives classified within Level 2 thus requiring more judgment in estimating the mid-market price of such derivatives.

Derivatives that are valued based upon models with unobservable market input values or input values from less actively traded or less-developed markets are classified within Level 3 in the fair value hierarchy. Derivatives classified as Level 3 include first-to-default credit basket swaps, look-back equity options and other structured products. The fair values of first-to-default credit basket swaps are derived from relevant observable inputs such as: individual credit default spreads, interest rates, recovery rates and unobservable model-specific input values such as correlation between different credits within the same basket. Look-back equity options and other structured options and derivatives are valued using simulation models such as the Monte Carlo technique. The input values for look-back equity options are derived from observable market indices such as interest rates, dividend yields, equity indices as well as unobservable model-specific input values such as certain volatility parameters. Level 3 methodologies are validated through periodic comparison of the Company's fair values to broker-dealer values.

Cash Equivalents and Short-Term Investments include money market instruments, commercial paper and other highly liquid debt instruments. Money market instruments are generally valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. The

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

remaining instruments in the Cash Equivalents and Short-term Investments category are typically not traded in active markets; however, their fair values are based on market observable inputs and, accordingly, these investments have been classified within Level 2 in the fair value hierarchy.

Other Assets and Other Liabilities Other assets carried at fair value include U.S. Treasury bills held within our global commodities group whose fair values are determined consistent with similar securities described above under Fixed Maturity Securities. Included in other liabilities are various derivatives contracts executed within our global commodities group, including exchange-traded futures, foreign currency and commodity contracts. The fair values of these derivative instruments are determined consistent with similar derivative instruments described above under Derivative Instruments.

Future Policy Benefits The liability for future policy benefits includes general account liabilities for guarantees on variable annuity contracts, including guaranteed minimum accumulation benefits (GMAB), guaranteed minimum withdrawal benefits (GMWB) and guaranteed minimum income and withdrawal benefits (GMIWB), accounted for as embedded derivatives. The fair values of the GMAB, GMWB and GMIWB liabilities are calculated as the present value of future expected benefit payments to customers less the present value of assessed rider fees attributable to the embedded derivative feature. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows. The determination of these risk premiums requires the use of management judgment.

The Company is also required to incorporate its own risk of non-performance in the valuation of the embedded derivatives associated with the optional living benefit features. Since insurance liabilities are senior to debt, the Company believes that reflecting the claims-paying ratings of the Company's insurance subsidiaries in the valuation of the liability appropriately takes into consideration the Company's own risk of non-performance. Historically, the expected cash flows were discounted using forward LIBOR interest rates, which were commonly viewed as being consistent with AA quality claims-paying ratings. However, in light of first quarter of 2009 developments, including rating agency downgrades to the claims-paying ratings of the Company's insurance subsidiaries, the Company determined that forward LIBOR interest rates were no longer indicative of a market participant's view of the Company's claims-paying ability. As a result, beginning in the first quarter of 2009, to reflect the market's perception of its non-performance risk, the Company incorporated an additional spread over LIBOR into the discount rate used in the valuations of the embedded derivatives associated with its optional living benefit features, thereby increasing the discount rate and reducing the fair value of the embedded derivative liabilities. The additional spread over LIBOR is determined taking into consideration publicly available information relating to the claims-paying ability of the Company's insurance subsidiaries, as indicated by the credit spreads associated with funding agreements issued by these subsidiaries. The Company adjusts these credit spreads to remove any liquidity risk premium. The additional spread over LIBOR incorporated into the discount rate as of September 30, 2009 generally ranged from 100 to 200 basis points for the portion of the interest rate curve most relevant to these liabilities.

Other significant inputs to the valuation models for the embedded derivatives associated with the optional living benefit features of the Company's variable annuity products include capital market assumptions, such as interest rate and implied volatility assumptions, as well as various policyholder behavior assumptions that are actuarially determined, including lapse rates, benefit utilization rates, mortality rates and withdrawal rates. These assumptions are reviewed at least annually, and updated based upon historical experience and give consideration to any observable market data, including market transactions such as acquisitions and reinsurance transactions. Since many of the assumptions utilized in the valuation of the embedded derivatives associated with the

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Company's optional living benefit features are unobservable and are considered to be significant inputs to the liability valuation, the liability included in future policy benefits has been reflected within Level 3 in the fair value hierarchy.

Long-Term Debt includes funding received from the Federal Reserve Bank of New York on a non-recourse basis to finance the purchase of eligible asset-backed securities, under TALF. The Company values these liabilities using various inputs including the value of the collateral (eligible asset-backed securities), a comparison of the liabilities' spread over LIBOR to the spreads in current TALF offerings and various other market observable and non-observable inputs which incorporate significant management judgment. As a result, the pricing of the non-recourse liabilities have been classified within Level 3 in the Company's fair value hierarchy. The pricing of the collateral assets (recorded in other trading account assets) is generally based on third party pricing information as discussed above, and included in Level 2 in the Company's fair value hierarchy. See Note 9 for additional information regarding the Company's participation in TALF.

Changes in Level 3 assets and liabilities The following tables provide a summary of the changes in fair value of Level 3 assets and liabilities for the three and nine months ended September 30, 2009, as well as the portion of gains or losses included in income for the three and nine months ended September 30, 2009 attributable to unrealized gains or losses related to those assets and liabilities still held at September 30, 2009.

Interest credited to policyholders' account balances	\$ (1,470)	\$	\$	\$

- (1) Other represents the impact of consolidation or deconsolidation of funds and reclasses of certain assets between reporting categories.
- (2) Transfers into or out of Level 3 are generally reported as the value as of the beginning of the quarter in which the transfer occurs.
- (3) Unrealized gains or losses related to assets still held at the end of the period do not include amortization or accretion of premiums and discounts.
- (4) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Unaudited Interim Consolidated Statement of Financial Position.

Transfers Transfers into Level 3 for Fixed Maturities, Available for Sale Commercial Mortgage-Backed securities for the three months ended September 30, 2009 is primarily the result of over-riding the third party pricing information downward with internally developed valuations for certain securities held in the Japanese insurance operations portfolio. Transfers into Level 3 for Commercial Mortgage and Other Loans for the three months ended September 30, 2009 is primarily due to downward credit migration of these loans. The downgrade in loans has resulted in the utilization of higher credit spreads, that are internally developed and not observable in the market place. This increase in credit spreads is now considered a significant input in the fair value calculation for these loans.

Transfers Transfers into Level 3 for Fixed Maturities Available for Sale Asset-Backed securities and Trading Account Assets Supporting Insurance Liabilities Asset-Backed securities include \$4,583 million and \$188 million, respectively for the nine months ended September 30, 2009, resulting from the Company's conclusion that the market for asset-backed securities collateralized by sub-prime mortgages was an inactive market, as discussed in detail above. In addition to these sub-prime securities, transfers into Level 3 for Fixed Maturities Available for Sale Asset-Backed securities as well as Fixed Maturities Available for Sale Corporate securities included transfers resulting from the use of unobservable inputs within valuation methodologies and the use of broker quotes (that could not be validated) when previously, information from third party pricing services (that could be validated) or models with observable inputs were utilized. Partially offsetting these transfers into Level 3 were transfers out of Level 3 due to the use of observable inputs in valuation methodologies as well as the utilization of pricing service information for certain assets that the Company was able to validate.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Transfers into Level 3 for Fixed Maturities, Available for Sale Commercial Mortgage-Backed securities for the nine months ended September 30, 2009 is primarily the result of over-riding the third party pricing information downward with internally developed valuations for certain securities held in the Japanese insurance operations portfolio.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

In addition to the sub-prime securities mentioned above, transfers into Level 3 for Trading Account Assets Supporting Insurance Liabilities Asset-Backed securities as well as Trading Account Assets Supporting Insurance Liabilities Corporate securities include transfers in due to the use of unobservable inputs within the valuation methodologies and broker quotes (that could not be validated), when previously information from third party pricing services (that could be validated) was utilized. The transfers out of Level 3 for Other Trading Account Assets Asset-Backed securities were primarily the result of the use of third party pricing for the securities purchased under TALF. In the first quarter of 2009, these assets were valued internally using a model.

Transfers into Level 3 for Commercial Mortgage and Other Loans for the nine months ended September 30, 2009 is primarily due to downward credit migration of these loans. The downgrade in loans has resulted in the utilization of higher credit spreads, that are internally developed and not observable in the market place. This increase in credit spreads is now considered a significant input in the fair value calculation for these loans.

The following tables provide a summary of the changes in fair value of Level 3 assets and liabilities for the three and nine months ended September 30, 2008, as well as the portion of gains or losses included in income for the three and nine months ended September 30, 2008 attributable to unrealized gains or losses related to those assets and liabilities still held at September 30, 2008.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Transfers Net transfers out of Level 3 for Fixed Maturities Available for Sale during the nine months ended September 30, 2008 were primarily due to the use of observable inputs in valuation methodologies as well as the utilization of pricing service information for certain assets that the Company was able to validate. Partially offsetting these transfers out of Level 3 were transfers into Level 3 primarily from the use of unobservable inputs within valuation methodologies and the use of broker quotes when previously information from third party pricing services was utilized.

The net amount of transfers out of Level 3 for Trading Account Assets Supporting Insurance Liabilities during the nine months ended September 30, 2008 is due primarily to the use of observable inputs in valuation methodologies as well as pricing service information for certain assets that the Company was able to validate. Partially offsetting these transfers out of Level 3 were transfers into Level 3 due to the use of unobservable inputs within the valuation methodologies and broker quotes, when previously information from third party pricing services was utilized. Transfers of Commercial Mortgage and Other Loans into Level 3 resulted from a reduction in the availability of market available prices during the year due to market illiquidity.

The net amount of Separate Account Assets transferred out of Level 3 for the nine months ended September 30, 2008 resulted from the use of vendor pricing information that the Company was able to validate that was previously unavailable. Partially offsetting the transfers out for this activity were transfers into Level 3 as a result of further review of valuation methodologies for certain assets that had been previously classified as Level 2.

Nonrecurring Fair Value Measurements Certain assets and liabilities are measured at fair value on a nonrecurring basis. Impairments of \$15 million and \$56 million were recorded for the three and nine months ended September 30, 2009, respectively, on certain cost method investments. The carrying value as of September 30, 2009 of these investments was \$262 million. Impairments on similar investments of \$11 million and \$20 million were recorded for the three and nine months ended September 30, 2008, respectively. The fair value adjustments were based on inputs classified as Level 3 in the valuation hierarchy. The inputs utilized were primarily discounted estimated future cash flows and valuations provided by the general partners taken into consideration with deal and management fee expenses. In addition, impairments of \$0 million and \$1 million were recorded for the three and nine months ended September 30, 2009, respectively on certain equity method investments. Impairments on similar investments of \$2 million and \$6 million were recorded for the three and nine months ended September 30, 2008, respectively. The fair value adjustments were based on inputs classified as Level 3 in the valuation hierarchy. The inputs utilized were primarily discounted estimated future cash flows. Impairments of \$6 million for the three and nine months ended September 30, 2008 were recorded for certain equity method investments and utilized inputs that were classified Level 2 on the hierarchy. The fair value measurement was based on negotiated sales price.

Impairments of \$4 million for the three and nine months ended September 30, 2009 were recorded associated with real estate held for investment. The impairments were based on appraisal values and were classified as Level 3 in the hierarchy.

The Company had written down certain commercial loans held at September 30, 2008 that were carried at the lower of cost or market. Losses of \$8 million and \$43 million were recorded for the three and nine months ended September 30, 2008, respectively, for such assets. The fair value measurements were classified as Level 3 in the valuation hierarchy. The inputs utilized for these valuations are pricing indicators from the whole loan market, which the Company considers its principal market for these loans.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Fair Value Option The following table presents information regarding changes in fair values recorded in earnings for commercial mortgage loans and long-term debt where the fair value option has been elected.

	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
	(in millions)			
Assets:				
Commercial Mortgage Loans:				
Changes in instrument-specific credit risk	\$ (9)	\$ (17)	\$ (44)	\$ (38)
Other changes in fair value		2	1	1
Liabilities:				
Long-term debt:				
Changes in fair value	\$	\$	\$	\$

Changes in fair value are reflected in Realized investment gains (losses), net for commercial mortgage loans and Asset management fees and other income for long-term debt. Changes in fair value due to instrument-specific credit risk are estimated based on changes in credit spreads and quality ratings for the period reported.

None of the commercial mortgage loans where the fair value option has been selected are more than 90 days past due or in non-accrual status. Interest income on commercial mortgage loans is included in net investment income. Interest income recorded on these loans was \$10 million and \$15 million for the three months ended September 30, 2009 and 2008, respectively and \$30 million and \$37 million for the nine months ended September 30, 2009 and 2008, respectively. Interest income on these loans is recorded based on the effective interest rates as determined at the closing of the loan. The fair values and aggregate contractual principal amounts of commercial mortgage loans, for which the fair value option has been elected, were \$602 million and \$651 million, respectively, as of September 30, 2009.

The fair values and aggregate contractual principal amounts of long-term debt, for which the fair value option has been elected, were \$979 million as of September 30, 2009. Interest expense recorded on this debt is included in general and administrative expenses. The Company recorded \$4 million and \$8 million of interest expense for the three and nine months ended September 30, 2009, respectively.

Fair Value of Financial Instruments The Company is required by U.S. GAAP to disclose the fair value of certain financial instruments including those that are not carried at fair value. For the following financial instruments the carrying amount equals or approximates fair value: fixed maturities classified as available for sale, trading account assets supporting insurance liabilities, other trading account assets, equity securities, securities purchased under agreements to resell, short-term investments, cash and cash equivalents, accrued investment income, separate account assets, securities sold under agreements to repurchase, and cash collateral for loaned securities, as well as certain items recorded within other assets and other liabilities such as broker-dealer related receivables and payables. See Note 14 for a discussion of derivative instruments.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The following table discloses the Company's financial instruments where the carrying amounts and fair values may differ:

	September 30, 2009	
	Carrying Amount	Fair Value
	(in millions)	
Assets:		
Fixed maturities, held to maturity	\$ 5,141	\$ 5,199
Commercial mortgage and other loans	32,125	30,876
Policy loans	10,070	12,096
Wachovia Securities lookback option	580	3,349
Liabilities:		
Policyholder account balances Investment contracts	\$ 72,985	\$ 73,574
Short-term and long-term debt	24,941	24,491
Debt of consolidated VIEs	413	197
Bank customer liabilities	1,512	1,525
Separate account liabilities Investment contracts	81,119	81,119

The fair values presented above for those financial instruments where the carrying amounts and fair values may differ have been determined by using available market information and by applying market valuation methodologies, as described in more detail below.

Fixed Maturities, held to maturity

The fair values of public fixed maturity securities are generally based on prices from third party pricing services, which are reviewed to validate reasonability. However, for certain public fixed maturity securities and investments in private placement fixed maturity securities, this information is either not available or not reliable. For these public fixed maturity securities the fair value is based on non-binding broker quotes, if available, or, to a lesser extent, is determined using internally developed values. For private fixed maturities fair value is determined using a discounted cash flow model, which utilizes a discount rate based upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions and takes into account, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. In determining the fair value of certain fixed maturity securities, the discounted cash flow model may also use unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the security.

Commercial Mortgage and Other Loans

The fair value of commercial mortgage and other loans, other than those held by the Company's commercial mortgage operations, is primarily based upon the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate or Japanese Government Bond

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

rate for yen based loans, adjusted for the current market spread for similar quality loans.

The fair value of commercial mortgage and other loans held by the Company's commercial mortgage operations is based upon various factors, including the terms of the loans, the principal exit markets for the loans, prevailing interest rates, and credit risk.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Policy Loans

The fair value of U.S. insurance policy loans is calculated using a discounted cash flow model based upon current U.S. Treasury rates and historical loan repayment patterns, while Japanese insurance policy loans use the risk-free proxy based on the Yen LIBOR. For group corporate- and trust-owned life insurance contracts and group universal life contracts, the fair value of the policy loans is the amount due as of the reporting date.

Wachovia Securities lookback option

As described in Note 13, the Company elected to exercise its rights under the lookback option as it relates to its interest in the Wachovia Securities joint venture. The fair value of the lookback option is determined internally by using an approach that employs both Black-Scholes and binominal option pricing models, which includes inputs such as equity market volatilities, risk-free rates, dividend yields and counterparty credit risk, as well as an illiquidity discount. The carrying value of the lookback option is reflected within Other assets.

Investment Contracts Policyholders Account Balances & Separate Account Liabilities

Only the portion of policyholders account balances and separate account liabilities related to products that are investment contracts (those without significant mortality or morbidity risk) are reflected in the table above. For fixed deferred annuities, single premium endowments, payout annuities and other similar contracts without life contingencies, fair values are derived using discounted projected cash flows based on interest rates that are representative of the Company's claims paying ratings, and hence reflects the Company's own nonperformance risk. For guaranteed investment contracts, funding agreements, structured settlements without life contingencies and other similar products, fair values are derived using discounted projected cash flows based on interest rates being offered for similar contracts with maturities consistent with those of the contracts being valued. For those balances that can be withdrawn by the customer at any time without prior notice or penalty, the fair value is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. For defined contribution and defined benefit contracts and certain other products the fair value is the market value of the assets supporting the liabilities.

Debt

The fair value of short-term and long-term debt, as well as debt of consolidated VIEs, is generally determined by either prices obtained from independent pricing services, which are validated by the Company, or discounted cash flow models. These fair values consider the Company's own nonperformance risk. Discounted cash flow models predominately use market observable inputs such as the borrowing rates currently available to the Company for debt and financial instruments with similar terms and remaining maturities. For commercial paper issuances and other debt with a maturity of less than 90 days, the carrying value approximates fair value. Debt of consolidated VIEs is reflected within Other

liabilities.

A portion of the senior secured notes issued by Prudential Holdings, LLC (the IHC debt) is insured by a third-party financial guarantee insurance policy. The effect of the third-party credit enhancement is not included in the fair value measurement of the IHC debt and the methodologies used to determine fair value consider the Company's own nonperformance risk.

Bank Customer Liabilities

The carrying amount for certain deposits (interest and non-interest demand, savings and money market accounts) approximates or equals their fair values. Fair values for fixed-rate certificates of deposit are estimated

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

using a discounted cash flow calculation that applies interest rates being offered on certificates at the reporting dates to a schedule of aggregated expected monthly maturities. Bank customer liabilities are reflected within Other liabilities.

13. INVESTMENT IN WACHOVIA SECURITIES

On July 1, 2003, the Company combined its retail securities brokerage and clearing operations with those of Wachovia Corporation (Wachovia) and formed Wachovia Securities, a joint venture currently headquartered in St. Louis, Missouri. The transaction included the contribution of certain assets and liabilities of the Company s securities brokerage operations; however, the Company retained certain assets and liabilities related to the contributed operations, including liabilities for certain litigation and regulatory matters. The Company and Wachovia have each agreed to indemnify the other for certain losses, including losses resulting from litigation and regulatory matters relating to certain events arising from the operations of their respective contributed businesses prior to March 31, 2004. Reflecting the Company s intention to put its interest in the Wachovia Securities joint venture, as discussed below, the results of the joint venture are included in Corporate and Other operations as a divested business.

On October 1, 2007, Wachovia completed the acquisition of A.G. Edwards, Inc. (A.G. Edwards) and on January 1, 2008 contributed the retail securities brokerage business of A.G. Edwards to the joint venture. Wachovia s contribution of this business entitled the Company to elect a lookback option (which the Company elected) permitting the Company to delay for a period of two years ending on January 1, 2010, the decision on whether or not to make payments to avoid or limit dilution of its 38% ownership interest in the joint venture or, alternatively, to put its joint venture interests to Wachovia based on the appraised value of the joint venture, excluding the A.G. Edwards business, as of January 1, 2008, the date of the combination of the A.G. Edwards business with Wachovia Securities. During this lookback period, the Company s share in the earnings of the joint venture and one-time costs associated with the combination of the A.G. Edwards business with Wachovia Securities is based on the Company s diluted ownership level, which has not yet been determined. Based upon the existing agreements and the Company s estimates of the values of the A.G. Edwards business and the joint venture excluding the A.G. Edwards business, the Company adjusted the carrying value of its ownership interest in the joint venture effective as of January 1, 2008 to reflect the addition of the A.G. Edwards business and the dilution of the Company s 38% ownership interest and to record the value of the above described rights under the lookback option. The Company accordingly recognized a corresponding increase to Additional paid-in capital of \$1.041 billion, net of tax, which represented the excess of the estimated value of the Company s share of the A.G. Edwards business received (of approximately \$1.444 billion) and the estimated value of the lookback option acquired (of approximately \$580 million) over the carrying value of the portion of the Company s ownership interest in Wachovia Securities that was diluted (of approximately \$422 million), net of taxes (of approximately \$561 million). The Company s recorded share of pre-tax losses from the joint venture of \$2 million for the nine months ended September 30, 2009 reflects its estimated diluted ownership level based upon the existing agreements and its estimates of the values of the A.G. Edwards business and the joint venture excluding the A.G. Edwards business. Establishment of definitive agreed or appraised values for the A.G. Edwards business and the joint venture excluding the A.G. Edwards business will result in an adjustment to the credit to equity and a true-up to the Company s earnings from the joint venture for any difference between the diluted ownership percentage used to record earnings for the nine months ended September 30, 2009 and the finally determined diluted ownership percentage. The Company does not anticipate any such adjustment to have a material effect on its reported results of operations.

On October 3, 2008, Wachovia and Wells Fargo & Company (Wells Fargo) announced that they had entered into an Agreement and Plan of Merger, pursuant to which Wachovia would be merged into Wells Fargo,

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

which would succeed to Wachovia's rights and obligations under the joint venture arrangements. As reported by Wells Fargo, this merger was completed on December 31, 2008. Wachovia Securities is now using the Wells Fargo Advisors name.

On December 4, 2008, the Company announced its intention to exercise its right under the lookback option to put its joint venture interests to Wells Fargo. On June 17, 2009, the Company provided notice to Wells Fargo of its exercise of its lookback option put rights. Under the terms of the joint venture agreements, the Company expects that the closing of the put transaction will occur on or about January 1, 2010. Under the terms of the joint venture agreements, Wells Fargo may elect to pay the proceeds from our exercise of the lookback put either in cash, Wells Fargo common stock or a combination of the foregoing. The Company has received notice from Wells Fargo that it intends to pay the proceeds in an unspecified combination of cash and Wells Fargo common stock. Under the terms of the agreements relating to the joint venture, the number of shares of Wells Fargo common stock to be received by the Company will be determined by dividing the portion of the proceeds to be paid in Wells Fargo common stock by the average of the closing prices of the Wells Fargo common stock during the 10 trading day period immediately prior to the closing. The joint venture agreements provide that the Company and Wells Fargo will enter into a registration rights agreement for the registration under the Securities Act of 1933 of the Wells Fargo shares to be received at the closing.

14. DERIVATIVE INSTRUMENTS

Types of Derivative Instruments and Derivative Strategies used in a non-dealer or broker capacity

Interest rate swaps are used by the Company to manage interest rate exposures arising from mismatches between assets and liabilities (including duration mismatches) and to hedge against changes in the value of assets it anticipates acquiring and other anticipated transactions and commitments. Swaps may be attributed to specific assets or liabilities or may be used on a portfolio basis. Under interest rate swaps, the Company agrees with other parties to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts calculated by reference to an agreed upon notional principal amount. Generally, no cash is exchanged at the outset of the contract and no principal payments are made by either party. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by one counterparty at each due date.

Exchange-traded futures and options are used by the Company to reduce risks from changes in interest rates, to alter mismatches between the duration of assets in a portfolio and the duration of liabilities supported by those assets, and to hedge against changes in the value of securities it owns or anticipates acquiring or selling. In exchange-traded futures transactions, the Company agrees to purchase or sell a specified number of contracts, the values of which are determined by the values of underlying referenced investments, and to post variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures and options with regulated futures commission's merchants who are members of a trading exchange.

Currency derivatives, including exchange-traded currency futures and options, currency forwards and currency swaps, are used by the Company to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell. The Company also uses currency forwards to hedge the currency risk associated with net investments in

foreign operations and anticipated earnings of its foreign operations.

Under currency forwards, the Company agrees with other parties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. As noted above, the Company uses currency

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

forwards to mitigate the risk that unfavorable changes in currency exchange rates will reduce U.S. dollar equivalent earnings generated by certain of its non-U.S. businesses, primarily its international insurance and investments operations. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. earnings are expected to be generated. These earnings hedges do not qualify for hedge accounting.

Under currency swaps, the Company agrees with other parties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by one counterparty for payments made in the same currency at each due date.

Credit derivatives are used by the Company to enhance the return on the Company's investment portfolio by creating credit exposure similar to an investment in public fixed maturity cash instruments. With credit derivatives the Company sells credit protection on an identified name, or a basket of names in a first to default structure, and in return receives a quarterly premium. With single name credit default derivatives, this premium or credit spread generally corresponds to the difference between the yield on the referenced name's public fixed maturity cash instruments and swap rates, at the time the agreement is executed. With first to default baskets, the premium generally corresponds to a high proportion of the sum of the credit spreads of the names in the basket. If there is an event of default by the referenced name or one of the referenced names in a basket, as defined by the agreement, then the Company is obligated to pay the counterparty the referenced amount of the contract and receive in return the referenced defaulted security or similar security. See Note 15 for a discussion of guarantees related to these credit derivatives. In addition to selling credit protection, in limited instances the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company's investment portfolio.

The Company uses to be announced (TBA) forward contracts to gain exposure to the investment risk and return of mortgage-backed securities. TBA transactions can help the Company to achieve better diversification and to enhance the return on its investment portfolio. TBAs provide a more liquid and cost effective method of achieving these goals than purchasing or selling individual mortgage-backed pools. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date.

In its mortgage operations, the Company enters into commitments to fund commercial mortgage loans at specified interest rates and other applicable terms within specified periods of time. These commitments are legally binding agreements to extend credit to a counterparty. Loan commitments for loans that will be held for sale are recognized as derivatives and recorded at fair value. The determination of the fair value of loan commitments accounted for as derivatives considers various factors including, among others, terms of the related loan, the intended exit strategy for the loans based upon either securitization valuation models or investor purchase commitments, prevailing interest rates, and origination income or expense. Loan commitments that relate to the origination of mortgage loans that will be held for investment are not accounted for as derivatives and accordingly are not recognized in the Company's financial statements. See Note 15 for a further discussion of these loan commitments.

The Company sells variable annuity products, which contain embedded derivatives. These embedded derivatives are marked to market through Realized investment gains (losses), net based on the change in value of the underlying contractual guarantees, which are determined using valuation models. The Company maintains a portfolio of derivative instruments that is intended to economically hedge the risks related to the

above

77

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

products features. The derivatives may include, but are not limited to equity options, total return swaps, interest rate swap options, caps, floors, and other instruments. In addition, some variable annuity products feature an automatic rebalancing element to minimize risks inherent in the Company's guarantees which reduces the need for hedges.

The Company sells synthetic guaranteed investment contracts which are investment-only, fee-based stable value products, to qualified pension plans. The assets are owned by the trustees of such plans, who invest the assets under the terms of investment guidelines agreed to with the Company. The contracts contain a guarantee of a minimum rate of return on participant balances supported by the underlying assets, and a guarantee of liquidity to meet certain participant-initiated plan cash flow requirements. These contracts are accounted for as derivatives and recorded at fair value.

The Company invests in fixed maturities that, in addition to a stated coupon, provide a return based upon the results of an underlying portfolio of fixed income investments and related investment activity. The Company accounts for these investments as available for sale fixed maturities containing embedded derivatives. Such embedded derivatives are marked to market through Realized investment gains (losses), net, based upon the change in value of the underlying portfolio.

The table below provides a summary of the gross notional amount and fair value of derivatives contracts, excluding embedded derivatives which are recorded with the associated host, by the primary underlying. Many derivative instruments contain multiple underlyings.

	September 30, 2009			December 31, 2008

- (1) Excludes embedded derivatives which contain multiple underlyings. The fair value of these embedded derivatives was a liability of \$1,162 million as of September 30, 2009 and a liability of \$3,942 million as of December 31, 2008, included in Future policy benefits and Fixed maturities, available for sale.

Cash Flow, Fair Value and Net Investment Hedges

The primary derivative instruments used by the Company in its fair value, cash flow, and net investment hedge accounting relationships are interest rate swaps, currency swaps and currency forwards. These instruments are only designated for hedge accounting in instances where the appropriate criteria are met. The Company does not use futures, options, credit, equity or embedded derivatives in any of its fair value, cash flow or net investment hedge accounting relationships.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The following table provides the financial statement classification and impact of derivatives used in qualifying and non-qualifying hedge relationships, excluding the offset of the hedged item in an effective hedge relationship:

- (1) Amounts deferred in Equity.
(2) Relates to the sale of equity method investments.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

For the three and nine months ended September 30, 2009, the ineffective portion of derivatives accounted for using hedge accounting was not material to the Company's results of operations and there were no material amounts reclassified into earnings relating to instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur by the anticipated date or within the additional time period permitted by the authoritative guidance for the accounting for derivatives and hedging. In addition, there were no instances in which the Company discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

Presented below is a roll forward of current period cash flow hedges in Accumulated other comprehensive income (loss) before taxes:

	(in millions)
Balance, December 31, 2008	\$ (227)
Net deferred losses on cash flow hedges from January 1 to September 30, 2009	(131)
Amount reclassified into current period earnings	30
Balance, September 30, 2009	\$ (328)

As of September 30, 2009, the Company does not have any qualifying cash flow hedges of forecasted transactions other than those related to the variability of the payment or receipt of interest or foreign currency amounts on existing financial instruments. The maximum length of time for which these variable cash flows are hedged is 14 years. Income amounts deferred in Accumulated other comprehensive income (loss) as a result of cash flow hedges are included in Net unrealized investment gains (losses) in the Consolidated Statements of Equity.

For effective net investment hedges, the amounts, before applicable taxes, recorded in the cumulative translation adjustment account within Accumulated other comprehensive income (loss) was an asset of \$117 million and an asset of \$268 million as of September 30, 2009 and December 31, 2008, respectively.

Credit Derivatives Written

The following tables set forth the Company's exposure from credit derivatives where the Company has written credit protection, excluding a credit derivative related to surplus notes issued by a subsidiary of Prudential Insurance and embedded derivatives contained in externally-managed investments in the European market, by NAIC rating of the underlying credits as of September 30, 2009 and December 31, 2008.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

(1) Credit default baskets may include various industry categories.

The Company entered into a credit derivative that will require the Company to make certain payments in the event of deterioration in the value of the surplus notes issued by a subsidiary of Prudential Insurance. The notional of this credit derivative is \$500 million and the fair value as of September 30, 2009 and December 31, 2008, was a liability of \$39 million and \$16 million, net of \$0 million and \$125 million of collateral that has been pledged, respectively.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

The Company holds certain externally-managed investments in the European market which contain embedded derivatives whose fair value are primarily driven by changes in credit spreads. These investments are medium term notes that are collateralized by investment portfolios primarily consisting of investment grade European fixed income securities, including corporate bonds and asset-backed securities, and derivatives, as well as varying degrees of leverage. The notes have a stated coupon and provide a return based on the performance of the underlying portfolios and the level of leverage. The Company invests in these notes to earn a coupon through maturity, consistent with its investment purpose for other debt securities. The notes are accounted for under U.S. GAAP as available for sale fixed maturity securities with bifurcated embedded derivatives (total return swaps). Changes in the value of the fixed maturity securities are reported in Equity under the heading Accumulated Other Comprehensive Income (Loss) and changes in the market value of the embedded total return swaps are included in current period earnings in Realized investment gains (losses), net. The Company's maximum exposure to loss from these investments was \$890 million and \$1,095 million at September 30, 2009 and December 31, 2008, respectively.

In addition to writing credit protection, the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company's investment portfolio. As of September 30, 2009 and December 31, 2008, the Company had \$2.343 billion and \$1.378 billion of outstanding notional amounts, reported at fair value as an asset of \$217 million and an asset of \$253 million, respectively.

Types of Derivative Instruments and Derivative Strategies used in a broker/dealer capacity

Futures, forwards and options contracts, and swap agreements, are also used in a derivative dealer or broker capacity in the Company's commodities operations to facilitate transactions of the Company's clients, hedge proprietary trading activities and as a means of risk management. These derivatives allow the Company to structure transactions to manage its exposure to commodities and securities prices, foreign exchange rates and interest rates. Risk exposures are managed through diversification, by controlling position sizes and by entering into offsetting positions. For example, the Company may manage the risk related to its precious metals inventory by entering into an offsetting position in exchange traded futures contracts.

The fair value of the Company's derivative contracts used in a derivative dealer or broker capacity is reported on a net-by-counterparty basis in the Company's Consolidated Statements of Financial Position when management believes a legal right of setoff exists under an enforceable netting agreement.

Realized and unrealized gains and losses from marking-to-market the derivatives used in proprietary positions are recognized on a trade date basis and reported in Asset management fees and other income.

The following table sets forth the income statement impact of derivatives used in a broker/dealer capacity.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Credit Risk

The Company is exposed to credit-related losses in the event of non-performance by counterparties to financial derivative transactions. The Company manages credit risk by entering into derivative transactions with major international financial institutions and other creditworthy counterparties, and by obtaining collateral where appropriate. Additionally, limits are set on single party credit exposures which are subject to periodic management review.

The credit exposure of the Company's over-the-counter (OTC) derivative transactions is represented by the contracts with a positive fair value (market value) at the reporting date. To reduce credit exposures, the Company seeks to (i) enter into OTC derivative transactions pursuant to master agreements that provide for a netting of payments and receipts with a single counterparty (ii) enter into agreements that allow the use of credit support annexes (CSAs), which are bilateral rating-sensitive agreements that require collateral postings at established threshold levels. Likewise, the Company effects exchange-traded futures and options transactions through regulated exchanges and these transactions are settled on a daily basis, thereby reducing credit risk exposure in the event of non-performance by counterparties to such financial instruments.

The vast majority of the Company's OTC derivative agreements are with highly rated major international financial institutions. Consistent with the practice of major international financial institutions, the Company utilizes the credit spread embedded in the LIBOR curve to reflect non-performance risk when determining the fair value of OTC derivative assets and liabilities after consideration of the impacts of the collateral posting process discussed above. This credit spread captures the non-performance risk of the Company's OTC derivative related assets and liabilities.

Certain of the Company's derivative agreements with some of its counterparties contain credit-risk related triggers. If the Company's credit rating were to fall below a certain level, the counterparties to the derivative instruments could request termination at the then fair value of the derivative or demand immediate full collateralization on derivative instruments in net liability positions. If a downgrade occurred and the derivative positions were terminated, the Company anticipates it would be able to replace the derivative positions with other counterparties in the normal course of business. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position were \$389 million as of September 30, 2009. In the normal course of business the Company has posted cash collateral related to these instruments of \$342 million as of September 30, 2009. If the credit-risk-related contingent features underlying these agreements had been triggered on September 30, 2009, the Company estimates that it would be required to post a maximum of \$47 million of additional collateral to its counterparties.

15. COMMITMENTS AND GUARANTEES, CONTINGENT LIABILITIES AND LITIGATION AND REGULATORY MATTERS

Commitments and Guarantees

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

In connection with the Company's commercial mortgage operations, it originates commercial mortgage loans. At September 30, 2009, the Company had outstanding commercial mortgage loan commitments with borrowers of \$1,790 million. In certain of these transactions, the Company prearranges that it will sell the loan to an investor, including to governmental sponsored entities as discussed below, after the Company funds the loan. At September 30, 2009, \$922 million of the Company's commitments to originate commercial mortgage loans are subject to such arrangements.

The Company also has other commitments, some of which are contingent upon events or circumstances not under the Company's control, including those at the discretion of the Company's counterparties. These other

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

commitments amounted to \$9,261 million at September 30, 2009. Reflected in these other commitments are \$9,212 million of commitments to purchase or fund investments, including \$5,447 million that the Company anticipates will ultimately be funded from its separate accounts. Of these separate account commitments, \$2,198 million have recourse to Prudential Insurance if the separate accounts are unable to fund the amounts when due.

In the course of the Company's business, it provides certain guarantees and indemnities to third parties pursuant to which it may be contingently required to make payments now or in the future.

A number of guarantees provided by the Company relate to real estate investments held in its separate accounts, in which entities that the separate account has invested in have borrowed funds, and the Company has guaranteed their obligations. The Company provides these guarantees to assist these entities in obtaining financing. The Company's maximum potential exposure under these guarantees was \$1,837 million at September 30, 2009, of which all but \$276 million is limited to the assets of the separate account and of which exposure primarily relates to guarantees limited to fraud, criminal activity or other bad acts. These guarantees generally expire at various times over the next sixteen years. At September 30, 2009, no amounts were accrued as a result of the Company's assessment that it is unlikely payments will be required. Any payments that may become required under these guarantees would either first be reduced by proceeds received by the creditor on a sale of the underlying collateral, or would provide rights to obtain the underlying collateral.

The Company has also provided a guarantee to a syndication of lenders in connection with a retail development project in Singapore that is 50% co-owned by the Company and an unconsolidated real estate fund managed by the Company. The principal provisions in the guarantee require that the loan-to-value ratio of the retail development project be maintained at 60% or lower, based on an external appraisal. A loan-to-value ratio in excess of 60% would require the Company and its co-owner to jointly and severally paydown the loan balance to the 60% level. The loan-to-value ratio, based on a December 2008 appraisal, is 59.6%. Other obligations under the guarantee include guaranteeing the interest-servicing on the loan on a proportionate basis and undertaking to complete the project and fund all development costs, including cost overruns. The Company's exposure under the guarantee was \$184 million at September 30, 2009, which assumes the co-owner honors its joint guarantee.

In the normal course of business, the Company may facilitate securities lending transactions on behalf of mutual funds and separate accounts for which the Company is the investment advisor and/or the asset manager. In certain of these arrangements, the Company has provided an indemnification to the mutual funds or separate accounts to hold them harmless against losses caused by counterparty (i.e. borrower) defaults associated with the securities lending activity facilitated by the Company. Collateral is provided by the counterparty to the mutual fund or separate account at the inception of the loan equal to or greater than 102% of the fair value of the loaned securities and the collateral is maintained daily at 102% or greater of the fair value of the loaned securities. The Company is only at risk if the counterparty to the securities lending transaction defaults and the value of the collateral held is less than the value of the securities loaned to such counterparty. As of September 30, 2009, the Company has provided such indemnities for \$10,454 million of securities loaned for which the fair value of the related collateral was \$10,663 million. The Company believes the possibility of any payments under these indemnities is remote and has not accrued any liability as of September 30, 2009.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

As discussed in Note 14, the Company writes credit derivatives under which the Company is obligated to pay the counterparty the referenced amount of the contract and receive in return the defaulted security or similar security. The Company's maximum amount at risk under these credit derivatives, assuming the value of the underlying referenced securities become worthless, is \$1,167 million as of September 30, 2009. These credit derivatives generally have maturities of five years or less.

Certain contracts underwritten by the Retirement segment include guarantees related to financial assets owned by the guaranteed party. These contracts are accounted for as derivatives and carried at fair value. At

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

September 30, 2009, such contracts in force carried a total guaranteed value of \$7,342 million. These guarantees are supported by collateral that is not reflected on the Company's balance sheet. This collateral had a fair value of \$7,546 million at September 30, 2009.

The Company arranges for credit enhancements of certain debt instruments that provide financing for commercial real estate assets, including certain tax-exempt bond financings. The credit enhancements provide assurances to the debt holders as to the timely payment of amounts due under the debt instruments. At September 30, 2009, such enhancement arrangements total \$219 million, with remaining contractual maturities of up to fifteen years. The Company's obligations to reimburse required credit enhancement payments are secured by mortgages on the related real estate, which properties are valued at \$297 million at September 30, 2009. The Company receives certain ongoing fees for providing these enhancement arrangements and anticipates the extinguishment of its obligation under these enhancements prior to maturity through the aggregation and transfer of its positions to a substitute enhancement provider. At September 30, 2009, the Company has accrued no liability related to these arrangements.

As part of the commercial mortgage activities of the Company's Asset Management segment, the Company provides commercial mortgage origination, underwriting and servicing for certain government sponsored entities, such as Fannie Mae and Freddie Mac. The Company has agreed to indemnify the government sponsored entities for a portion of the credit risk associated with certain of the mortgages it services through a delegated authority arrangement. Under these arrangements, the Company originates multi-family mortgages for sale to the government sponsored entities based on underwriting standards they specify, and are obligated to make payments to them for a specified percentage share of losses they incur on certain loans serviced by the Company. The Company's percentage share of losses incurred generally varies from 2% to 20% of the loan balance, and is typically based on a first-loss exposure for a stated percentage of the loan balance, plus a shared exposure with the government sponsored entity for any losses in excess of the stated first-loss percentage, subject to a contractually specified maximum percentage. The Company services \$8,069 million of mortgages subject to these loss-sharing arrangements as of September 30, 2009, all of which are collateralized by first priority liens on the underlying multi-family residential properties. As of September 30, 2009, these mortgages had an average debt service coverage ratio of 1.65 times and an average loan-to-value ratio of 71%. The maximum exposure to loss as of September 30, 2009, assuming no recovery on any of the underlying collateral, is \$1,022 million, with first-loss exposure of \$331 million. Over the three years ended December 31, 2008, the Company's total share of losses related to indemnifications that were settled was \$8 million, with no additional settlements in the first nine months of 2009. As of September 30, 2009, the Company has established a liability of \$24 million related to these indemnifications.

In connection with certain acquisitions, the Company has agreed to pay additional consideration in future periods, contingent upon the attainment by the acquired entity of defined operating objectives. At September 30, 2009, maximum potential future consideration pursuant to such arrangements, to be resolved over the following four years, is \$130 million. Any such payments would result in increases in intangible assets, such as goodwill.

The Company is also subject to other financial guarantees and indemnity arrangements. The Company has provided indemnities and guarantees related to acquisitions, dispositions, investments and other transactions that are triggered by, among other things, breaches of representations, warranties or covenants provided by the Company. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or applicable. Since certain of these obligations are not subject to limitations, it is not possible to determine the maximum potential amount due under these guarantees. At September 30, 2009, the Company has accrued liabilities of \$6 million associated with all other financial guarantees and indemnity arrangements, which does not include retained liabilities associated with sold

businesses.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Contingent Liabilities

On an ongoing basis, the Company's internal supervisory and control functions review the quality of sales, marketing and other customer interface procedures and practices and may recommend modifications or enhancements. From time to time, this review process identifies product administration, servicing or other errors, including errors relating to the timing or amount of payments or contract values due to customers. In such cases, if appropriate, the Company may offer customers remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

Litigation and Regulatory Matters

The Company is subject to legal and regulatory actions in the ordinary course of its businesses. Pending legal and regulatory actions include proceedings relating to aspects of the Company's businesses and operations that are specific to it and proceedings that are typical of the businesses in which it operates, including in both cases businesses that have either been divested or placed in wind-down status. Some of these proceedings have been brought on behalf of various alleged classes of complainants. In certain of these matters, the plaintiffs are seeking large and/or indeterminate amounts, including punitive or exemplary damages. The outcome of a litigation or regulatory matter, and the amount or range of potential loss at any particular time, is often inherently uncertain.

Individual Life and Group Insurance

In April 2009, a purported nationwide class action, *Schultz v. The Prudential Insurance Company of America*, was filed in the United States District Court for the Northern District of Illinois. Plaintiff, a participant in a defined benefit plan governed by ERISA, alleges that pursuant to the terms of the group disability insurance policy funding her plan benefits, Prudential Insurance may not lawfully offset family Social Security disability benefits against Prudential contract benefits because Social Security benefits that members of her family received on account of her disability were not loss of time disability payments. The complaint alleges violations of ERISA, breach of contract and unfair claims practices. Plaintiff seeks recovery of the amount by which the challenged offset reduced her disability benefits, and additional monetary, declaratory and injunctive relief on behalf of a putative class of similarly situated disability claimants who are covered under other plans or policies governed by ERISA and on behalf of a putative class of similarly situated disability claimants who are participants in plans that are exempt from ERISA. In July 2009, the Company filed a motion to dismiss the complaint.

In November 2008, a purported nationwide class action, *Garcia v. Prudential Insurance Company of America*, was filed in the United States District Court for the District of New Jersey. The complaint, which is brought on behalf of beneficiaries of Prudential policies whose death benefits were placed in retained asset accounts, alleges that by investing the death benefits in these accounts, Prudential wrongfully delayed payment and improperly retained undisclosed profits. It alleges claims of breach of the contract of insurance, breach of contract with regard to the retained asset accounts, breach of fiduciary duty and unjust enrichment, and seeks an accounting, disgorgement, injunctive relief, attorneys fees, and prejudgment and post-judgment interest. In March 2009, Prudential filed a motion to dismiss the complaint.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

From November 2002 to March 2005, eleven separate complaints were filed against the Company and the law firm of Leeds Morelli & Brown in New Jersey state court. The cases were consolidated for pre-trial proceedings in New Jersey Superior Court, Essex County and captioned *Lederman v. Prudential Financial, Inc., et al.* The complaints allege that an alternative dispute resolution agreement entered into among Prudential

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Insurance, over 350 claimants who are current and former Prudential Insurance employees, and Leeds Morelli & Brown (the law firm representing the claimants) was illegal and that Prudential Insurance conspired with Leeds Morelli & Brown to commit fraud, malpractice, breach of contract, and violate racketeering laws by advancing legal fees to the law firm with the purpose of limiting Prudential's liability to the claimants. In 2004, the Superior Court sealed these lawsuits and compelled them to arbitration. In May 2006, the Appellate Division reversed the trial court's decisions, held that the cases were improperly sealed, and should be heard in court rather than arbitrated. In March 2007, the court granted plaintiffs' motion to amend the complaint to add over 200 additional plaintiffs and a claim under the New Jersey discrimination law but denied without prejudice plaintiffs' motion for a joint trial on liability issues. In June 2007, Prudential Financial and Prudential Insurance moved to dismiss the complaint. In November 2007, the court granted the motion, in part, and dismissed the commercial bribery and conspiracy to commit malpractice claims, and denied the motion with respect to other claims. In January 2008, plaintiffs filed a demand pursuant to New Jersey law stating that they were seeking damages in the amount of \$6.5 billion.

The Company, along with a number of other insurance companies, received formal requests for information from the State of New York Attorney General's Office (NYAG), the Securities and Exchange Commission (SEC), the Connecticut Attorney General's Office, the Massachusetts Office of the Attorney General, the Department of Labor, the United States Attorney for the Southern District of California, the District Attorney of the County of San Diego, and various state insurance departments relating to payments to insurance intermediaries and certain other practices that may be viewed as anti-competitive. In December 2006, Prudential Insurance reached a resolution of the NYAG investigation. Under the terms of the settlement, Prudential Insurance paid a \$2.5 million penalty and established a \$16.5 million fund for policyholders, adopted business reforms and agreed, among other things, to continue to cooperate with the NYAG in any litigation, ongoing investigations or other proceedings. Prudential Insurance also settled the litigation brought by the California Department of Insurance and agreed to business reforms and disclosures as to group insurance contracts insuring customers or residents in California and to pay certain costs of investigation. In April 2008, Prudential Insurance reached a settlement of proceedings relating to payments to insurance intermediaries and certain other practices with the District Attorneys of San Diego, Los Angeles and Alameda counties. Pursuant to this settlement, Prudential Insurance paid \$350,000 in penalties and costs. These matters are also the subject of litigation brought by private plaintiffs, including purported class actions that have been consolidated in the multidistrict litigation in the United States District Court for the District of New Jersey, *In re Employee Benefit Insurance Brokerage Antitrust Litigation*. In August and September 2007, the court dismissed the anti-trust and RICO claims. In January and February 2008, the court dismissed the ERISA claims with prejudice and the state law claims without prejudice. Plaintiffs have appealed to the Third Circuit Court of Appeals.

Retirement Solutions and Investment Management

The Company's subsidiary, Prudential Annuities Life Assurance Corporation, formerly named American Skandia Life Assurance Corporation, has substantially completed a remediation program to correct errors in the administration of approximately 11,000 annuity contracts issued by that company. The owners of these contracts did not receive notification that the contracts were approaching or past their designated annuitization date or default annuitization date (both dates referred to as the contractual annuity date) and the contracts were not annuitized at their contractual annuity dates. Some of these contracts also were affected by data integrity errors resulting in incorrect contractual annuity dates. The lack of notice and data integrity errors, as reflected on the annuities administrative system, all occurred before the acquisition of the American Skandia entities by the Company. The remediation and administrative costs of the remediation program are subject to the indemnification provisions of the acquisition agreement pursuant to which the Company purchased the American Skandia entities in May 2003 from Skandia Insurance Company Ltd (publ) (Skandia).

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

In October 2007, Prudential Retirement Insurance and Annuity Co. (PRIAC) filed an action in the United States District Court for the Southern District of New York, *Prudential Retirement Insurance & Annuity Co. v. State Street Global Advisors*, in PRIAC's fiduciary capacity and on behalf of certain defined benefit and defined contribution plan clients of PRIAC, against an unaffiliated asset manager, State Street Global Advisors (SSgA) and SSgA's affiliate, State Street Bank and Trust Company (State Street). This action seeks, among other relief, restitution of certain losses attributable to certain investment funds sold by SSgA as to which PRIAC believes SSgA employed investment strategies and practices that were misrepresented by SSgA and failed to exercise the standard of care of a prudent investment manager. PRIAC also intends to vigorously pursue any other available remedies against SSgA and State Street in respect of this matter. Given the unusual circumstances surrounding the management of these SSgA funds and in order to protect the interests of the affected plans and their participants while PRIAC pursues these remedies, PRIAC implemented a process under which affected plan clients that authorized PRIAC to proceed on their behalf have received payments from funds provided by PRIAC for the losses referred to above. The Company's consolidated financial statements, and the results of the Retirement segment included in the Company's Investment Division, for the year ended December 31, 2007 include a pre-tax charge of \$82 million, reflecting these payments to plan clients and certain related costs. In September 2008, the United States District Court for the Southern District of New York denied the State Street defendants' motion to dismiss claims for damages and other relief under Section 502(a)(2) of ERISA, but dismissed the claims for equitable relief under Section 502(a)(3) of ERISA. In October 2008, defendants answered the complaint and asserted counterclaims for contribution and indemnification, defamation and violations of Massachusetts' unfair and deceptive trade practices law.

In June 2009, special bankruptcy counsel for Lehman Brothers Holdings Inc. (LBHI), Lehman Brothers Special Financing (LBSF) and certain of their affiliates made a demand of Prudential Global Funding LLC (PGF) for the return of a portion of the \$550 million in collateral delivered by LBSF to PGF pursuant to swap agreements and a cross margining and netting agreement between PGF, LBSF and Lehman Brothers Finance S.A. a/k/a Lehman Brothers Finance AG (Lehman Switzerland), a Swiss affiliate that is subject to insolvency proceedings in the United States and Switzerland. LBSF claims that PGF wrongfully applied the collateral to Lehman Switzerland's obligations in violation of the automatic stay in LBSF's bankruptcy case, which is jointly administered under *In re Lehman Brothers Holdings Inc.* in the United States Bankruptcy Court in the Southern District of New York (the Lehman Chapter 11 Cases). In August 2009, PGF filed a declaratory judgment action (the DJ Action) in the same court against LBSF, Lehman Switzerland and LBHI (as guarantor of LBSF and Lehman Switzerland under the swap agreements) seeking an order that (a) PGF had an effective lien on the collateral that secured the obligations of both LBSF (\$197 million) and Lehman Switzerland (\$488 million) and properly foreclosed on the collateral, leaving PGF with an unsecured \$135 million claim against LBSF (and LBHI as guarantor), or, in the alternative, (b) PGF was entitled, under the Bankruptcy Code, to set off amounts owed by Lehman Switzerland against the collateral and the automatic stay was inapplicable. The DJ Action is captioned *Prudential Global Funding LLC v. Lehman Brothers Holdings Inc., et al.* In addition, PGF filed timely contingent claims against LBSF and LBHI, as guarantor of LBSF and Lehman Switzerland, in the Lehman Chapter 11 Cases for any amounts that may be due under the swap agreements, depending upon the results of the DJ action. In October 2009, LBSF and LBHI answered in the DJ Action and asserted counterclaims alleging that PGF breached the swap agreement by applying the collateral to Lehman Switzerland's obligations and failing to pay LBSF interest on the collateral, and violated the Bankruptcy Code by not returning \$372 million in excess collateral to LBSF. LBSF and LBHI seek a declaratory judgment that PGF had an effective lien on only \$178 million of the collateral, which could only be applied to amounts owed by LBSF and no right of set off against Lehman Switzerland's obligations. The counterclaim seeks the return of the collateral in the amount of \$372 million plus interest and the disallowance of PGF's claims against LBSF and LBHI.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****Securities**

Prudential Securities has been named as a defendant in a number of industry-wide purported class actions in the United States District Court for the Southern District of New York relating to its former securities underwriting business. Plaintiffs in one consolidated proceeding, captioned *In re: Initial Public Offering Securities Litigation*, allege, among other things, that the underwriters engaged in a scheme involving tying agreements, undisclosed compensation arrangements and research analyst conflicts to manipulate and inflate the prices of shares sold in initial public offerings in violation of the federal securities laws. Certain issuers of these securities and their current and former officers and directors have also been named as defendants. In October 2004, the district court granted plaintiffs' motion for class certification in six focus cases. In December 2006, the United States Court of Appeals for the Second Circuit vacated that decision and remanded the case to the district court for further proceeding. In August 2000, Prudential Securities was named as a defendant, along with other underwriters, in a purported class action, captioned *CHS Electronics Inc. v. Credit Suisse First Boston Corp. et al.*, which alleges on behalf of issuers of securities in initial public offerings that the defendants conspired to fix at 7% the discount that underwriting syndicates receive from issuers in violation of federal antitrust laws. Plaintiffs moved for class certification in September 2004 and for partial summary judgment in November 2005. In April 2006, the district court denied class certification. In September 2007, the Second Circuit Court of Appeals reversed the district court's decision denying class certification and remanded the cases to the district court for further proceedings. In a related action, captioned *Gillet v. Goldman Sachs et al.*, plaintiffs allege substantially the same antitrust claims on behalf of investors, though only injunctive relief is currently being sought. In June 2008, *CHS Electronics Inc.* and *Gillet* were settled by all defendants. Prudential Securities' share of the settlement amount was not material. In September 2009, the court entered a final order approving the settlement of *In re: Initial Public Offering Securities Litigation*. In October 2009, an objector filed a notice of appeal challenging the certification of the settlement class.

Other Matters*Mutual Fund Market Timing Practices*

In August 2006, Prudential Equity Group, LLC (PEG), a wholly owned subsidiary of the Company, reached a resolution of the previously disclosed regulatory and criminal investigations into deceptive market related activities involving PEG's former Prudential Securities operations. The settlements relate to conduct that generally occurred between 1999 and 2003 involving certain former Prudential Securities brokers in Boston and certain other branch offices in the U.S., their supervisors, and other members of the Prudential Securities control structure with responsibilities that related to the market timing activities, including certain former members of Prudential Securities senior management. The Prudential Securities operations were contributed to a joint venture with Wachovia Corporation in July 2003, but PEG retained liability for the market timing related activities. In connection with the resolution of the investigations, PEG entered into separate settlements with each of the United States Attorney for the District of Massachusetts (USAO), the Secretary of the Commonwealth of Massachusetts, Securities Division, SEC, the National Association of Securities Dealers, the New York Stock Exchange, the New Jersey Bureau of Securities and the NYAG. These settlements resolve the investigations by the above named authorities into these matters as to all Prudential entities without further regulatory proceedings or filing of charges so long as the terms of the settlement are followed and provided, in the case of the settlement agreement reached with the USAO, that the USAO has reserved the right to prosecute PEG if there is a material breach by PEG of that agreement during its five year term and in certain other specified events. Under the terms of the settlements, PEG paid \$270 million into a Fair Fund administered by the SEC to compensate those harmed by the market timing activities. In addition, \$330 million was paid in fines and penalties. Pursuant to the settlements, PEG retained, at PEG's ongoing cost and expense, the services of an Independent Distribution Consultant acceptable to certain of the authorities to develop a proposed distribution plan for the distribution of

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Fair Fund amounts according to a methodology developed in consultation with and acceptable to certain of the authorities. In addition, as part of the settlements, PEG agreed, among other things, to continue to cooperate with the above named authorities in any litigation, ongoing investigations or other proceedings relating to or arising from their investigations into these matters. In connection with the settlements, the Company agreed with the USAO, among other things, to cooperate with the USAO and to maintain and periodically report on the effectiveness of its compliance procedures. The settlement documents include findings and admissions that may adversely affect existing litigation or cause additional litigation and result in adverse publicity and other potentially adverse impacts to the Company's businesses.

In addition to the regulatory proceedings described above that were settled in 2006, in October 2004, the Company and Prudential Securities were named as defendants in several class actions brought on behalf of purchasers and holders of shares in a number of mutual fund complexes. The actions are consolidated as part of a multi-district proceeding, *In re: Mutual Fund Investment Litigation*, pending in the United States District Court for the District of Maryland. The complaints allege that the purchasers and holders were harmed by dilution of the funds' values and excessive fees, caused by market timing and late trading, and seek unspecified damages. In August 2005, the Company was dismissed from several of the actions, without prejudice to repleading the state claims, but remains a defendant in other actions in the consolidated proceeding. In July 2006, in one of the consolidated mutual fund actions, *Saunders v. Putnam American Government Income Fund, et al.*, the United States District Court for the District of Maryland granted plaintiffs leave to refile their federal securities law claims against Prudential Securities. In August 2006, the second amended complaint was filed alleging federal securities law claims on behalf of a purported nationwide class of mutual fund investors seeking compensatory and punitive damages in unspecified amounts. In June 2008, the Company was dismissed with prejudice from the remaining actions consolidated in *In re: Mutual Fund Investment Litigation* other than *Saunders v. Putnam American Government Income Fund, et al.* In July 2008, the Company moved for summary judgment and plaintiffs moved for class certification in *Saunders*.

Commencing in 2003, the Company received formal requests for information from the SEC and NYAG relating to market timing in variable annuities by certain American Skandia entities. In connection with these investigations, with the approval of Skandia, an offer was made by American Skandia to the SEC and NYAG, to settle these matters by paying restitution and a civil penalty of \$95 million in the aggregate. In April 2009, AST Investment Services, Inc., formerly named American Skandia Investment Services, Inc. (ASISI), reached a resolution of these investigations by the SEC and NYAG into market timing related misconduct involving certain variable annuities. The settlements relate to conduct that generally occurred between January 1998 and September 2003. The Company acquired ASISI from Skandia in May 2003. Subsequent to the acquisition, the Company implemented controls, procedures and measures designed to protect customers from the types of activities involved in these investigations. These settlements resolve the investigations by the above named authorities into these matters, subject to the settlement terms. Under the terms of the settlements, ASISI has paid a total of \$34 million in disgorgement and an additional \$34 million as a civil money penalty. These amounts will be paid into a Fair Fund administered by the SEC to compensate those harmed by the market timing related activities. Pursuant to the settlements, ASISI has retained, at its ongoing cost and expense, the services of an Independent Distribution Consultant acceptable to the Staff of the SEC to develop a proposed distribution plan for the distribution of Fair Fund amounts according to a methodology developed in consultation with and acceptable to the Staff. As part of these settlements, ASISI has undertaken that by the end of 2009 it will undergo a compliance review by an independent third party, who shall issue a report of its findings and recommendations to ASISI's Board of Directors, the Audit Committee of the Advanced Series Trust Board of Trustees and the Staff of the SEC. In addition, ASISI has agreed, among other things, to continue to cooperate with the SEC and NYAG in any litigation, ongoing investigations or other proceedings relating to or arising from their investigations into these matters. Under the terms of the purchase agreement pursuant to which the Company acquired ASISI from Skandia, the Company was indemnified for the costs of the settlements.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)***Corporate*

In April 2009, the Company's Board of Directors (the Board) received a letter demanding that the Board take action to recover allegedly improperly paid compensation to certain current and former employees and executive officers of the Company since at least 2005. The demand is made by a Prudential Financial stockholder, Service Employees International Union Pension Plans Master Trust (SEIU), and is one of many that SEIU has sent to large corporations. SEIU claims that the Company must bring an action, under theories of unjust enrichment and corporate waste, to recoup incentive compensation that was based on allegedly flawed economic metrics. SEIU also seeks rescission of exercised stock options because the options were based on mistaken facts concerning the fair value of the Company's stock. The letter states that between 2005 and 2008 the Company paid cash and equity compensation of approximately \$165 million to its senior executives and authorized senior executives to exercise stock options worth approximately \$66 million. The letter also demands that the Board enjoin any further approved, but unpaid, compensation payments, overhaul the Company's compensation structure, and allow stockholders an advisory vote on the Compensation Committee's report in the Company's annual proxy statement. SEIU reserves the right to bring a derivative action should the Board decline to act. In May 2009, the Board formed a Special Evaluation Committee, comprised of independent directors, and authorized the Committee to hire outside advisors and experts to assist in its evaluation of the demand letter. The Committee has engaged counsel that is reviewing the matter.

In March 2009, a purported class action, *Bauer v. Prudential Financial, et al.*, was filed in the United States District Court for the District of New Jersey. The case names as defendants, the Company, certain Company Directors, the Chief Financial Officer, Controller and former Chief Executive Officer and former Principal Accounting Officer, underwriters and the Company's independent auditors. The complaint, brought on behalf of purchasers of the Company's 9% Junior Subordinated Notes (retail hybrid subordinated debt), alleges that the Company's March 2006 Form S-3 Registration Statement and Prospectus and the June 2008 Prospectus Supplement, both of which incorporated other public filings, contained material misstatements or omissions. In light of the Company's disclosures in connection with its 2008 financial results, plaintiffs contend that the earlier offering documents failed to disclose impairments in the Company's asset-backed securities collateralized with subprime mortgages and goodwill associated with certain subsidiaries and other assets, and that the Company had inadequate controls relating to such reporting. The complaint asserts violations of the Securities Act of 1933, alleging Section 11 claims against all defendants, Section 12(a)(2) claims against the Company and underwriters and Section 15 claims against the individual defendants, and seeks unspecified compensatory and recessionary damages, interest, costs, fees, expenses and such injunctive relief as may be deemed appropriate by the court. In April 2009, two additional purported class action complaints were filed in the same court, *Haddock v. Prudential Financial, Inc. et al.* and *Pinchuk v. Prudential Financial, Inc. et al.* The complaints essentially allege the same claims and seek the same relief as *Bauer*. In June 2009, *Pinchuk* was voluntarily dismissed and the *Haddock* and *Bauer* matters were consolidated. In July 2009, an amended consolidated complaint was filed that added claims regarding contingent liability relating to the auction rate securities markets and reserves relating to annuity contract holders. The complaint restates the claims regarding impairments related to mortgage backed securities, but does not include prior claims regarding goodwill impairments. The complaint names all of the same defendants as the prior complaints, with the exception of the Company's independent auditors. In September 2009, the Company filed a motion to dismiss the complaint.

Other

In September and October 2005, five purported class action lawsuits were filed against the Company, Prudential Securities and PEG claiming that stockbrokers were improperly classified as exempt employees under state and federal wage and hour laws, were improperly denied overtime pay and that improper deductions were made from the stockbrokers' wages. Two of the stockbrokers' complaints, *Janowsky v. Wachovia Securities*,

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

LLC and Prudential Securities Incorporated and Goldstein v. Prudential Financial, Inc., were filed in the United States District Court for the Southern District of New York. The *Goldstein* complaint purports to have been filed on behalf of a nationwide class. The *Janowsky* complaint alleges a class of New York brokers. Motions to dismiss and compel arbitration were filed in the *Janowsky and Goldstein* matters, which have been consolidated for pre-trial purposes. The three stockbrokers complaints filed in California Superior Court, *Dewane v. Prudential Equity Group, Prudential Securities Incorporated, and Wachovia Securities LLC*; *DiLustro v. Prudential Securities Incorporated, Prudential Equity Group Inc. and Wachovia Securities*; and *Carayanis v. Prudential Equity Group LLC and Prudential Securities Inc.*, purport to have been brought on behalf of classes of California brokers. The *Carayanis* complaint was subsequently withdrawn without prejudice in May 2006. In June 2006, a purported New York state class action complaint was filed in the United States District Court for the Eastern District of New York, *Panesenko v. Wachovia Securities, et al.*, alleging that the Company failed to pay overtime to stockbrokers in violation of state and federal law and that improper deductions were made from the stockbrokers' wages in violation of state law. In September 2006, Prudential Securities was sued in *Badain v. Wachovia Securities, et al.*, a purported nationwide class action filed in the United States District Court for the Western District of New York. The complaint alleges that Prudential Securities failed to pay overtime to stockbrokers in violation of state and federal law and that improper deductions were made from the stockbrokers' wages in violation of state law. In December 2006, these cases were transferred to the United States District Court for the Central District of California by the Judicial Panel on Multidistrict Litigation for coordinated or consolidated pre-trial proceedings. In May 2009, a final order was entered by the court approving the settlement of this consolidated action. In October 2006, a class action lawsuit, *Bouder v. Prudential Financial, Inc. and Prudential Insurance Company of America*, was filed in the United States District Court for the District of New Jersey, claiming that Prudential Insurance failed to pay overtime to insurance agents who were registered representatives in violation of federal and Pennsylvania law, and that improper deductions were made from these agents' wages in violation of state law. The complaint seeks back overtime pay and statutory damages, recovery of improper deductions, interest, and attorneys' fees. In March 2008, the court conditionally certified a nationwide class. In March 2008, a purported nationwide class action lawsuit was filed in the United States District Court for the Southern District of California, *Wang v. Prudential Financial, Inc. and Prudential Insurance*, on behalf of agents who sold the Company's financial products. The complaint alleges claims that the Company failed to pay overtime and provide other benefits in violation of California and federal law and seeks compensatory and punitive damages in unspecified amounts. In September 2008, *Wang* was transferred to the United States District Court for the District of New Jersey and consolidated with the *Bouder* matter. In January 2009, an amended complaint was filed in the consolidated matter which adds wage claims based on the laws of thirteen additional states. In March 2009, a second amended complaint was filed which dropped the breach of contract claims. The Company moved to dismiss certain of the state claims in the consolidated complaint.

Summary

The Company's litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcome cannot be predicted. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company's financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, is not likely to have a material adverse effect on the Company's financial position.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Supplemental Combining Financial Information

1. BASIS OF PRESENTATION

The supplemental combining financial information presents the consolidated financial position and results of operations for Prudential Financial, Inc. and its subsidiaries (together, the Company), separately reporting the Financial Services Businesses and the Closed Block Business. The Financial Services Businesses and the Closed Block Business are both fully integrated operations of the Company and are not separate legal entities. The supplemental combining financial information presents the results of the Financial Services Businesses and the Closed Block Business as if they were separate reporting entities and should be read in conjunction with the Consolidated Financial Statements.

The Company has outstanding two classes of common stock. The Common Stock reflects the performance of the Financial Services Businesses and the Class B Stock reflects the performance of the Closed Block Business.

The Closed Block Business was established on the date of demutualization and includes the assets and liabilities of the Closed Block (see Note 6 to the Unaudited Interim Consolidated Financial Statements for a description of the Closed Block). It also includes assets held outside the Closed Block necessary to meet insurance regulatory capital requirements related to products included within the Closed Block; deferred policy acquisition costs related to the Closed Block policies; the principal amount of the IHC debt (as discussed in Note 2 below) and related unamortized debt issuance costs, as well as an interest rate swap related to the IHC debt; and certain other related assets and liabilities. The Financial Services Businesses consist of the U.S. Retirement Solutions and Investment Management, U.S. Individual Life and Group Insurance, and International Insurance and Investments divisions and Corporate and Other operations.

2. ALLOCATION OF RESULTS

This supplemental combining financial information reflects the assets, liabilities, revenues and expenses directly attributable to the Financial Services Businesses and the Closed Block Business, as well as allocations deemed reasonable by management in order to fairly present the financial position and results of operations of the Financial Services Businesses and the Closed Block Business on a stand alone basis. While management considers the allocations utilized to be reasonable, management has the discretion to make operational and financial decisions that may affect the allocation methods and resulting assets, liabilities, revenues and expenses of each business. In addition, management has limited discretion over accounting policies and the appropriate allocation of earnings between the two businesses. The Company is subject to agreements which provide that, in most instances, the Company may not change the allocation methodology or accounting policies for the allocation of earnings between the Financial Services Businesses and Closed Block Business without the prior consent of the Class B Stock holders or IHC debt bond insurer.

The Financial Services Businesses and Closed Block Business participate in separate internal short-term cash management facilities, pursuant to which they invest cash from securities lending and repurchase activities as well as certain trading and operating activities. The net funds invested in these facilities are generally held in investments that are short term, including mortgage- and asset-backed securities. Historically, a proportionate interest in each security held in a commingled portfolio was allocated to the Financial Services Businesses and the Closed Block Business as of the balance sheet date, based upon their proportional cash contributions to a single facility. Participation in the commingled

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

facility by the Financial Services Businesses and the Closed Block Business was dependent on cash flows arising from the activities noted above, which in turn, under the historical allocation methodology, could change the allocation of the facility's assets between the two Businesses. A proportionate share of any realized investment gain or loss was recorded by each Business based upon their respective ownership percentages in the commingled facility as of the date of the realized gain or loss.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Supplemental Combining Financial Information (Continued)

Beginning April 1, 2008, management implemented changes in order to permit each Business to hold discrete ownership of its investments in separate facilities without affecting or being affected by the level of participation of the other Business. With these changes, any realized investment gain or loss are recorded by the respective Businesses based upon their discrete ownership of investments in their facility. Beginning in the third quarter of 2007, pending the implementation of these changes, the commingled facility was managed so that the proportionate interests of the Financial Services Businesses and Closed Block Business in the entire facility were maintained at approximately the same proportions held as of June 30, 2007 (approximately 49% and 51%, respectively).

General corporate overhead not directly attributable to a specific business that has been incurred in connection with the generation of the businesses' revenues is generally allocated between the Financial Services Businesses and the Closed Block Business based on the general and administrative expenses of each business as a percentage of the total general and administrative expenses for all businesses.

Prudential Holdings, LLC, a wholly owned subsidiary of Prudential Financial, Inc., has outstanding senior secured notes (the IHC debt), of which net proceeds of \$1.66 billion were allocated to the Financial Services Businesses concurrent with the demutualization on December 18, 2001. The IHC debt is serviced by the cash flows of the Closed Block Business, and the results of the Closed Block Business reflect interest expense associated with the IHC debt.

Income taxes are allocated between the Financial Services Businesses and the Closed Block Business as if they were separate companies based on the taxable income or losses and other tax characterizations of each business. If a business generates benefits, such as net operating losses, it is entitled to record such tax benefits to the extent they are expected to be utilized on a consolidated basis.

Holders of Common Stock have no interest in a separate legal entity representing the Financial Services Businesses; holders of the Class B Stock have no interest in a separate legal entity representing the Closed Block Business; and holders of each class of common stock are subject to all of the risks associated with an investment in the Company.

In the event of a liquidation, dissolution or winding-up of the Company, holders of Common Stock and holders of Class B Stock would be entitled to receive a proportionate share of the net assets of the Company that remain after paying all liabilities and the liquidation preferences of any preferred stock.

The results of the Financial Services Businesses are subject to certain risks pertaining to the Closed Block. These include any expenses and liabilities from litigation affecting the Closed Block policies as well as the consequences of certain potential adverse tax determinations. In connection with the sale of the Class B Stock and IHC debt, the cost of indemnifying the investors with respect to certain matters will be borne by the Financial Services Businesses.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) addresses the consolidated financial condition of Prudential Financial as of September 30, 2009, compared with December 31, 2008, and its consolidated results of operations for the three and nine months ended September 30, 2009 and 2008. You should read the following analysis of our consolidated financial condition and results of operations in conjunction with the MD&A and the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2008, the Risk Factors section included in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2009, as well as the Risk Factors section, the statements under Forward-Looking Statements and the Unaudited Interim Consolidated Financial Statements included elsewhere in this Quarterly Report on Form 10-Q.

Overview

Prudential Financial has two classes of common stock outstanding. The Common Stock, which is publicly traded (NYSE:PRU), reflects the performance of the Financial Services Businesses, while the Class B Stock, which was issued through a private placement and does not trade on any exchange, reflects the performance of the Closed Block Business. The Financial Services Businesses and the Closed Block Business are discussed below.

Financial Services Businesses

Our Financial Services Businesses consist of three operating divisions, which together encompass seven segments, and our Corporate and Other operations. The U.S. Retirement Solutions and Investment Management division consists of our Individual Annuities, Retirement and Asset Management segments. The U.S. Individual Life and Group Insurance division consists of our Individual Life and Group Insurance segments. The International Insurance and Investments division consists of our International Insurance and International Investments segments. Our Corporate and Other operations include our real estate and relocation services business, as well as corporate items and initiatives that are not allocated to business segments. Corporate and Other operations also include businesses that have been or will be divested, including our investment in the retail brokerage joint venture with Wachovia Securities (now, Wells Fargo Advisors), and businesses that we have placed in wind-down status.

We attribute financing costs to each segment based on the amount of financing used by each segment, excluding financing costs associated with corporate debt which costs are reflected in Corporate and Other operations. The net investment income of each segment includes earnings on the amount of capital that management believes is necessary to support the risks of that segment.

We seek growth internally and through acquisitions, joint ventures or other forms of business combinations or investments. Our principal acquisition focus is in our current business lines, both domestic and international.

Closed Block Business

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

In connection with the demutualization, we ceased offering domestic participating products. The liabilities for our traditional domestic in force participating products were segregated, together with assets, in a regulatory mechanism referred to as the Closed Block. The Closed Block is designed generally to provide for the reasonable expectations for future policy dividends after demutualization of holders of participating individual life insurance policies and annuities included in the Closed Block by allocating assets that will be used exclusively for payment of benefits, including policyholder dividends, expenses and taxes with respect to these products. See Note 6 to the Consolidated Financial Statements for more information on the Closed Block. At the time of demutualization, we determined the amount of Closed Block assets so that the Closed Block assets

Table of Contents

initially had a lower book value than the Closed Block liabilities. We expect that the Closed Block assets will generate sufficient cash flow, together with anticipated revenues from the Closed Block policies, over the life of the Closed Block to fund payments of all expenses, taxes, and policyholder benefits to be paid to, and the reasonable dividend expectations of, holders of the Closed Block policies. We also segregated for accounting purposes the assets that we need to hold outside the Closed Block to meet capital requirements related to the Closed Block policies. No policies sold after demutualization will be added to the Closed Block, and its in force business is expected to ultimately decline as we pay policyholder benefits in full. We also expect the proportion of our business represented by the Closed Block to decline as we grow other businesses.

Concurrently with our demutualization, Prudential Holdings, LLC, a wholly owned subsidiary of Prudential Financial that owns the capital stock of Prudential Insurance, issued \$1.75 billion in senior secured notes, which we refer to as the IHC debt. The net proceeds from the issuances of the Class B Stock and IHC debt, except for \$72 million used to purchase a guaranteed investment contract to fund a portion of the bond insurance cost associated with that debt, were allocated to the Financial Services Businesses. However, we expect that the IHC debt will be serviced by the net cash flows of the Closed Block Business over time, and we include interest expenses associated with the IHC debt when we report results of the Closed Block Business.

The Closed Block Business consists principally of the Closed Block, assets that we must hold outside the Closed Block to meet capital requirements related to the Closed Block policies, invested assets held outside the Closed Block that represent the difference between the Closed Block assets and Closed Block liabilities and the interest maintenance reserve, deferred policy acquisition costs related to Closed Block policies, the principal amount of the IHC debt and related hedging activities, and certain other related assets and liabilities.

The Closed Block Business is not a separate legal entity from the Financial Services Businesses; however, they are operated as separate entities and are separated for financial reporting purposes. The Financial Services Businesses are not obligated to pay dividends on Closed Block policies. Dividends on Closed Block policies reflect the experience of the Closed Block over time and are subject to adjustment by Prudential Insurance's Board of Directors. Further, our plan of demutualization provides that we are not required to pay dividends on policies within the Closed Block from assets that are not within the Closed Block and that the establishment of the Closed Block does not represent a guarantee that any certain level of dividends will be maintained.

Executive Summary

Prudential Financial, a financial services leader with approximately \$641 billion of assets under management as of September 30, 2009, has operations in the United States, Asia, Europe and Latin America. Through our subsidiaries and affiliates, we offer a wide array of financial products and services, including life insurance, annuities, retirement-related services, mutual funds, investment management, and real estate services. We offer these products and services to individual and institutional customers through one of the largest distribution networks in the financial services industry.

Current Developments

Financial Markets. The global financial markets have recently shown marked improvement after experiencing extreme stress since the second half of 2007 through the early portion of 2009. During this period, volatility and disruption in the global financial markets reached unprecedented levels for the post World War II period and the availability and cost of credit was materially affected. These factors, combined with recent economic conditions, including depressed home and commercial real estate prices and increasing foreclosures, depressed equity market values, declining business and consumer confidence, and rising unemployment, resulted in a severe economic recession.

Table of Contents

As further discussed in [Liquidity and Capital Resources](#), the U.S. federal government has taken numerous actions to address financial market conditions. These actions include the U.S. Treasury's Capital Purchase Program, which is part of the Troubled Asset Relief Program, or TARP, as well as the Term Asset-Backed Securities Loan Facility, or TALF. The TARP Capital Purchase Program involves the issuance by qualifying institutions of preferred stock and warrants to purchase common stock to the U.S. Treasury. TALF is designed to provide secured financing for certain types of asset-backed securities, including certain high-quality commercial mortgage-backed securities issued before January 1, 2009. We applied in October 2008 to participate in the TARP Capital Purchase Program and on May 14, 2009, we received preliminary approval from the U.S. Treasury to participate in the program. However, on June 1, 2009, we announced that we would not participate in the TARP Capital Purchase Program. In the first quarter of 2009, we began participating in TALF as an eligible borrower. We continue to evaluate other government sponsored programs for which we may be eligible.

Markets have shown marked improvement since late second quarter of 2009. Equity markets have appreciated, with less volatility, and bond spreads have tightened significantly. We have been able to take advantage of the improving market conditions, and have raised approximately \$4.4 billion in financing during the first nine months of 2009 through the following:

Issued 36.9 million shares of Prudential Financial Common Stock in a public offering (at a price of \$39.00 per share for net proceeds of \$1.391 billion).

Issued \$2.5 billion of Prudential Financial medium-term notes.

Issued \$500 million of Prudential Insurance surplus notes, exchangeable for Prudential Financial Common Stock.

Due to the continuation of the financial market dislocations into early 2009 and in order to continue to manage our liquidity and capital resources, we undertook certain other actions in the first nine months of 2009, including the following:

Provided notice to Wells Fargo, on June 17, 2009, of the exercise of our lookback option put rights related to our minority joint venture interest in Wachovia Securities.

Made capital contributions and capital loans to our international insurance operations in Japan totaling \$366 million.

Borrowed \$1.5 billion in the form of collateralized funding agreements from the Federal Home Loan Bank of New York, or FHLB NY, which was subsequently used to replace inter-company funding agreements between Prudential Insurance and Prudential Financial, previously funded through proceeds from the sale of Prudential Financial's retail medium-term notes, making the corresponding proceeds available for general corporate purposes.

Reduced exposure to short-term financing markets, primarily through planned runoff of commercial paper borrowings.

Undertook sales of assets held by some of our affiliates to reduce their borrowing needs.

While the above actions have strengthened our liquidity and capital position, certain of them, as well as our decision to maintain higher levels of cash and short-term investments than in prior periods, have had a negative impact on current earnings. For additional information on our liquidity and capital resources, and the actions we undertook in the first nine months of 2009, see [Liquidity and Capital Resources](#).

We continue to monitor the liquidity and capital needs of Prudential Financial and its subsidiaries. If the recent improvements in the capital markets prove temporary and earlier disruptions in the capital markets were to resume, we may take additional capital management actions to maintain capital consistent with our rating objectives, which may include additional internal actions or, if internal resources are insufficient or market conditions deteriorate, further access to external sources of capital, if available.

Table of Contents

During the first nine months of 2009, rating agencies downgraded certain ratings of Prudential Financial and its subsidiaries. Downgrades in our claims-paying or credit ratings could potentially, among other things, limit our ability to market products, reduce our competitiveness, increase the number or value of policy surrenders and withdrawals, increase our borrowing costs and potentially make it more difficult to borrow funds, adversely affect the availability of financial guarantees, such as letters of credit, cause additional collateral requirements or other required payments under certain agreements, allow counterparties to terminate derivative agreements and/or hurt our relationships with creditors or trading counterparties thereby potentially negatively effecting our profitability, liquidity and/or capital. Refer to Ratings for more information.

Our financial condition and results of operations for the first nine months of 2009 reflect the following:

Net income of our Financial Services Businesses attributable to Prudential Financial, Inc. for the three and nine months ended September 30, 2009 was \$1.090 billion and \$1.623 billion, respectively, reflecting the positive impact of improved financial market conditions beginning in late second quarter of 2009 on reported results.

Pre-tax net realized investment losses and related adjustments of the Financial Services Businesses for the three and nine months ended September 30, 2009 were \$183 million and \$1.765 billion, respectively, primarily reflecting other-than-temporary impairments of fixed maturity and equity securities of \$329 million and \$1.397 billion, for the three and nine months ended September 30, 2009, respectively. Also impacting the nine months ended September 30, 2009 were decreases in the fair value of derivatives used in investment duration management and hedging programs of \$582 million. Partially offsetting these items were increases in market value of certain externally managed investments in the European market, which impacted both the three and nine months ended September 30, 2009.

Net unrealized gains on general account fixed maturity investments of the Financial Services Businesses amounted to \$979 million as of September 30, 2009, compared to net unrealized losses of \$6.567 billion as of December 31, 2008. Gross unrealized gains increased from \$4.684 billion as of December 31, 2008 to \$5.735 billion as of September 30, 2009 and gross unrealized losses decreased from \$11.251 billion to \$4.756 billion for the same periods as credit spreads tightened across most asset classes. Net unrealized gains on general account fixed maturity investments of the Closed Block Business amounted to \$229 million as of September 30, 2009, compared to net unrealized losses of \$4.035 billion as of December 31, 2008.

Individual Annuity gross sales for the third quarter of 2009 reached a record high of \$5.9 billion, an increase from \$2.5 billion in the prior year quarter. Individual Annuity net sales for the third quarter of 2009 were \$4.4 billion, an increase from \$481 million in the prior year quarter, and were \$7.1 billion in the first nine months of 2009, an increase from \$1.6 billion in the prior year.

Full Service Retirement gross deposits and sales were \$4.8 billion and net additions were \$1.5 billion for the third quarter of 2009, an increase from gross deposits and sales of \$3.3 billion and net additions of \$393 million in the prior year quarter.

We also continued to have positive net flows in our asset management business, as well as solid sales in our domestic and international insurance businesses, in the third quarter and first nine months of 2009.

For the third quarter of 2009, our International Insurance segment had a record level of adjusted operating income.

As of September 30, 2009, Prudential Financial, the parent holding company, had cash and short-term investments of \$4.233 billion.

Table of Contents**Results of Operations**

We analyze performance of the segments and Corporate and Other operations of the Financial Services Businesses using a measure called adjusted operating income. See Consolidated Results of Operations for a definition of adjusted operating income and a discussion of its use as a measure of segment operating performance.

Shown below are the contributions of each segment and Corporate and Other operations to our adjusted operating income for the three and nine months ended September 30, 2009 and 2008 and a reconciliation of adjusted operating income of our segments and Corporate and Other operations to income from continuing operations before income taxes and equity in earnings of operating joint ventures.

Results for the three and nine months ended September 30, 2009 presented above reflect the following:

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Individual Annuities segment results for the third quarter and first nine months of 2009 increased in comparison to the prior year periods primarily reflecting the impact of improved market conditions. Results for the three and nine month periods include a favorable variance of \$629 million and \$727 million, respectively, related to adjustments to the amortization of deferred policy acquisition and other

Table of Contents

costs and the reserves for our variable annuity products, largely reflecting improved financial market conditions in 2009. The favorable variance in both periods was partially offset by mark-to-market losses of \$140 million and \$142 million, for the three and nine month periods, respectively, related to derivative positions associated with our capital hedging program, which we began in the second quarter of 2009. Results for both periods were also impacted by a decrease in fee income, driven by lower average variable annuity asset balances invested in separate accounts, and an increase in investment results. Also impacting the nine month period was an \$895 million favorable variance related to the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features. This variance was largely driven by changes in our adjustment to the embedded derivative liabilities for market-perceived non-performance risk, and resulted in a corresponding \$641 million increase in the amortization of deferred policy acquisition and other costs.

Retirement segment results for the third quarter and first nine months of 2009 decreased in comparison to the corresponding prior year periods. Results for both periods include the impact of our annual review of the assumptions and other cumulative adjustments relating to the amortization of deferred policy acquisition costs and valuation of business acquired. Absent the impact of these items, results for the third quarter and first nine months of 2009 increased in comparison to the corresponding prior year periods, driven by improved investment results in our full service and institutional investments products businesses. A decline in asset based fees in our full service business was a partial offset.

Asset Management segment results for the third quarter of 2009 increased in comparison to the third quarter of 2008, largely attributable to a reduction in losses from the segment's proprietary investing activities, partially offset by unfavorable results from the segment's commercial mortgage activities reflecting an increase in the interim loan loss provision, as well as lower asset management fees. Results for the first nine months of 2009 decreased due to lower asset management fees, performance based incentive fees and transaction fees, as well as unfavorable results from the segment's commercial mortgage activities reflecting an increase in the interim loan loss provision, partially offset by lower compensation costs.

Individual Life segment results for the third quarter of 2009 improved slightly from the third quarter of 2008. Results for both periods benefited from lower amortization of net deferred policy acquisition costs and unearned revenue reserves reflecting updates of our actuarial assumptions based on an annual review. The third quarter of 2009 benefit was \$55 million, which included an increase in reserves for the guaranteed minimum death benefit feature in certain contracts. The comparable benefit for the same period last year was \$79 million. Results for both periods also benefited from compensation received based on multi-year profitability of third-party products we distribute, which benefited the current year period \$30 million and the prior year period \$53 million. Absent the impact of these items, results for the third quarter of 2009 increased \$52 million in comparison to the corresponding prior year period, primarily reflecting an additional decrease in amortization of deferred policy acquisition costs, net of related amortization of unearned revenue reserves, to reflect the quarterly impact of changes to the estimate of total gross profits primarily due to favorable separate account fund performance in the period. Results for the first nine months of 2009 decreased from the first nine months of 2008. Absent the impact of the annual review and compensation received on third-party products we distribute, results for the first nine months of 2009 increased \$31 million compared with the first nine months of 2008. The increase primarily reflects a decrease in amortization of deferred policy acquisition costs, net of related amortization of unearned revenue reserves associated with favorable separate account fund performance, partially offset by a decrease in asset based fees.

Group Insurance segment results declined in the third quarter of 2009, reflecting less favorable claims experience in both our group disability and group life businesses and the benefit in the prior year quarter from annual reserve refinements. Group Insurance segment results declined in the first nine months of 2009, reflecting the prior year benefits of a premium adjustment for updated data on a large case and annual reserve refinements. Excluding these benefits in the prior year, the segment results for the first nine months of 2009 improved, reflecting growth in both our group life and group disability businesses.

Table of Contents

The International Insurance segment is comprised of its Life Planner and Gibraltar Life operations. Results from the segment's Life Planner operations improved in both the third quarter of 2009 and the first nine months of 2009, reflecting the continued growth of our Japanese Life Planner operations. In addition, results for the first nine months of 2009 reflect a \$25 million benefit from the migration to a new policy valuation system, which was partially offset by higher general and administrative expenses. Results from the segment's Gibraltar Life operation improved in both the third quarter of 2009 and the first nine months of 2009, reflecting \$25 million of earnings in the third quarter of 2009 from the acquired former Yamato Life business. The earnings from Yamato include approximately \$15 million largely related to initial surrenders of policies following the restructuring of the business, essentially consistent with our overall expectations. Results for the first nine months of 2009 for the Gibraltar Life operations also reflect a decline in expense and other margins, which mainly reflects higher general and administrative expenses.

International Investments segment results declined in both the third quarter and first nine months of 2009, reflecting less favorable results from the segment's global commodities group, as well as lower results from the segment's Korean asset management operation in the first nine months of 2009.

Corporate and Other results for the third quarter of 2009 declined from the third quarter of 2008 primarily due to lower earnings from the investment of debt issuance proceeds in cash and short-term investments and increased interest expense on a higher level of capital debt. Results for the first nine months of 2009 declined from the first nine months of 2008 primarily due to lower earnings from the investment of debt issuance proceeds in cash and short-term investments, increased interest expense on capital debt, and greater losses in our real estate and relocation services business.

Realized investment gains (losses), net, and related adjustments for the Financial Services Businesses in the third quarter and first nine months of 2009 amounted to losses of \$183 million and \$1,765 million, respectively, primarily reflecting other-than-temporary impairments of fixed maturity and equity securities of \$329 million and \$1,397 million, respectively. Also impacting the first nine months of 2009 were decreases in the fair value of derivatives used in investment duration management and hedging programs of \$582 million. Partially offsetting these items were increases in the market value of certain externally managed investments in the European market, which impacted both the third quarter and first nine months of 2009.

Loss from continuing operations before income taxes in the Closed Block Business decreased \$97 million in the third quarter of 2009 compared to the third quarter of 2008. Results reflect the benefit from a decrease in dividends to policyholders and the cumulative earnings policyholder dividend obligation, partially offset by a decrease in net realized investment gains and net investment income. Loss from continuing operations before income taxes in the Closed Block Business increased \$471 million for the first nine months of 2009 compared to the first nine months of 2008. Results reflect higher net realized investment losses and a decrease in net investment income, which were partially offset by a decrease in dividends to policyholders and the cumulative earnings policyholder dividend obligation which was reduced to zero in 2009.

Accounting Policies & Pronouncements

Application of Critical Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America, or U.S. GAAP, requires the application of accounting policies that often involve a significant degree of judgment. Management, on an ongoing basis, reviews estimates and assumptions used in the preparation of financial statements. If management determines that modifications in assumptions and estimates are appropriate given current facts and circumstances, results of operations and financial position as reported in the Consolidated Financial Statements could change significantly.

Table of Contents

Management believes the accounting policies relating to the following areas are most dependent on the application of estimates and assumptions:

Valuation of investments, including the recognition of other-than-temporary impairments and loss reserves;

Policyholder liabilities;

Deferred policy acquisition costs;

Goodwill;

Pension and other postretirement benefits;

Taxes on income; and

Reserves for contingencies, including reserves for losses in connection with unresolved legal matters.

See below for an updated discussion of the application of estimates and assumptions around Goodwill. For an updated discussion of the application of estimates and assumptions around the valuation of investments, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities. For an updated discussion of the application of estimates and assumptions around the recognition of other-than-temporary impairments, see Realized Investment Gains and Losses and General Account Investments General Account Investments Fixed Maturity Securities Other-than-Temporary Impairments of Fixed Maturity Securities.

A discussion of each of the remaining critical accounting estimates may be found in our Annual Report on Form 10-K for the year ended December 31, 2008, under Management's Discussion and Analysis of Financial Condition and Results of Operations Accounting Policies & Pronouncements Application of Critical Accounting Estimates.

Goodwill

Goodwill is tested for impairment on an annual basis as of December 31 of each year and more frequently if events occur or circumstances change that would indicate a potential for impairment. The test is performed at the reporting unit level which is equal to or one level below our operating segments. Reporting units that have goodwill subject to testing are the Asset Management segment, the International Insurance segment's Life Planners business, and the Retirement segment's full service business.

The Company did not evaluate goodwill for impairment as of September 30, 2009, as no events occurred or circumstances changed that would have more likely than not reduced the fair value of a reporting unit below its carrying amount during the third quarter of 2009. The carrying value of goodwill was \$710 million as of September 30, 2009. Significant market declines or other events impacting the fair value of the

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

reporting units that have goodwill, or increases in the level of equity required to support these reporting units, could result in an impairment of some or all of the goodwill in future periods, resulting in a charge to General and administrative expenses.

Accounting Pronouncements Adopted

See Note 2 to the Unaudited Interim Consolidated Financial Statements for a discussion of recently adopted accounting pronouncements, including the adoption of revised authoritative guidance for disclosing fair value of financial instruments, the recognition and presentation of other-than-temporary impairments, fair value measurements and disclosures, the accounting for convertible debt instruments, earnings per share, and the accounting for noncontrolling interests in consolidated financial statements.

Table of Contents**Recent Accounting Pronouncements**

See Note 2 to the Unaudited Interim Consolidated Financial Statements for a discussion of recently issued accounting pronouncements.

Consolidated Results of Operations

Table of Contents**Results of Operations Financial Services Businesses**

2009 to 2008 Three Month Comparison. Income (loss) from continuing operations for the Financial Services Businesses increased \$1.162 billion, from a loss of \$118 million in the third quarter of 2008 to income of \$1.044 billion in the third quarter of 2009. The increase in income reflects a favorable variance related to adjustments to the amortization of deferred policy acquisition and other costs and the reserves for our variable annuity products primarily due to improved market conditions in 2009. In addition, income reflects an increase in other revenues, partially offset by an increase in benefits and expenses, due to changes in value of recorded assets and recorded liabilities that are expected to ultimately accrue to contractholders. Income also includes a net increase in premiums and policy charges and fee income, largely offset by an increase in policyholders' benefits, including changes in reserves, reflecting the impact of currency fluctuations, as well as business growth in our International Insurance operations. On a diluted per share basis, income (loss) from continuing operations attributable to the Financial Services Businesses for the three months ended September 30, 2009 of \$2.36 per share of Common Stock increased from \$(0.27) per share of Common Stock for the three months ended September 30, 2008. We analyze the operating performance of the segments included in the Financial Services Businesses using adjusted operating income as described in Segment Measures, below. For a discussion of our segment results on this basis see Results of Operations for Financial Services Businesses by Segment, below. In addition, for a discussion of the realized investment gains (losses), net attributable to the Financial Services Businesses, see Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses, below. For additional information regarding investment income, excluding realized investment gains (losses) see Realized Investment Gains and Losses and General Account Investments General Account Investments, below.

The direct equity adjustment increased income from continuing operations available to holders of the Common Stock for earnings per share purposes by \$12 million for the three months ended September 30, 2009, compared to \$10 million for the three months ended September 30, 2008. The direct equity adjustment modifies earnings available to holders of the Common Stock and the Class B Stock for earnings per share purposes. The holders of the Common Stock will benefit from the direct equity adjustment as long as reported administrative expenses of the Closed Block Business are less than the cash flows for administrative expenses determined by the policy servicing fee arrangement that is based upon insurance and policies in force and statutory cash premiums. As statutory cash premiums and policies in force in the Closed Block Business decline, we generally expect the benefit to the Common Stock holders from the direct equity adjustment to decline accordingly. If the reported administrative expenses of the Closed Block Business exceed the cash flows for administrative expenses determined by the policy servicing fee arrangement, the direct equity adjustment will reduce income available to holders of the Common Stock for earnings per share purposes.

2009 to 2008 Nine Month Comparison. Income (loss) from continuing operations for the Financial Services Businesses increased \$1.012 billion, from income of \$549 million for the first nine months of 2008 to income of \$1.561 billion for the first nine months of 2009. The increase in income reflects a favorable variance related to adjustments to the amortization of deferred policy acquisition and other costs and the reserves for our variable annuity products primarily due to improved market conditions in 2009. In addition, income reflects an increase in other revenues, partially offset by an increase in benefits and expenses, due to changes in value of recorded assets and recorded liabilities that are expected to ultimately accrue to contractholders. Results for the current year include a lower level of pre-tax net investment losses in our general account as compared to the prior year, as well as a favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with certain variable annuity products. This variance was largely driven by changes in our adjustment to the embedded derivative liabilities for market-perceived non-performance risk, and resulted in a related increase in the amortization of deferred policy acquisition and other costs. Income also includes a net increase in premiums and policy charges and fee income, largely offset by an increase in policyholders' benefits, including changes in reserves, reflecting the impact of currency fluctuations, as well as business growth in our International Insurance operations. On a diluted per share basis, income from continuing operations attributable to the Financial Services Businesses for the nine months ended September 30, 2009 of \$3.68 per share of Common

Table of Contents

Stock increased from \$1.25 per share of Common Stock for the nine months ended September 30, 2008. We analyze the operating performance of the segments included in the Financial Services Businesses using adjusted operating income as described in Segment Measures, below. For a discussion of our segment results on this basis see Results of Operations for Financial Services Businesses by Segment, below. In addition, for a discussion of the realized investment gains (losses), net attributable to the Financial Services Businesses, see Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses, below. For additional information regarding investment income, excluding realized investment gains (losses) see Realized Investment Gains and Losses and General Account Investments General Account Investments, below.

The direct equity adjustment increased income from continuing operations available to holders of the Common Stock for earnings per share purposes by \$34 million for the nine months ended September 30, 2009, compared to \$36 million for the nine months ended September 30, 2008.

Results of Operations Closed Block Business

2009 to 2008 Three Month Comparison. Income (loss) from continuing operations for the Closed Block Business for the three months ended September 30, 2009, was a loss of \$8 million, or \$(10.00) per share of Class B Stock, compared to a loss of \$58 million, or \$(34.00) per share of Class B Stock, for the three months ended September 30, 2008. The direct equity adjustment decreased income from continuing operations available to the Class B Stock holders for earnings per share purposes by \$12 million for the three months ended September 30, 2009, compared to \$10 million for the three months ended September 30, 2008. For a discussion of the results of operations for the Closed Block Business, see Results of Operations of Closed Block Business, below.

2009 to 2008 Nine Month Comparison. Income (loss) from continuing operations for the Closed Block Business for the nine months ended September 30, 2009, was a loss of \$364 million, or \$(199.00) per share of Class B Stock, compared to a loss of \$51 million, or \$(43.50) per share of Class B Stock, for the nine months ended September 30, 2008. The direct equity adjustment decreased income from continuing operations available to the Class B Stock holders for earnings per share purposes by \$34 million for the nine months ended September 30, 2009, compared to \$36 million for the nine months ended September 30, 2008. For a discussion of the results of operations for the Closed Block Business, see Results of Operations of Closed Block Business, below.

Segment Measures

In managing our business, we analyze operating performance separately for our Financial Services Businesses and our Closed Block Business. For the Financial Services Businesses, we analyze our segments' operating performance using adjusted operating income. Results of the Closed Block Business for all periods are evaluated and presented only in accordance with U.S. GAAP. Adjusted operating income does not equate to income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures or net income as determined in accordance with U.S. GAAP but is the measure of segment profit or loss we use to evaluate segment performance and allocate resources, and consistent with authoritative guidance, is our measure of segment performance.

Adjusted operating income is calculated for the segments of the Financial Services Businesses by adjusting each segment's income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures for the following items:

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

realized investment gains (losses), net, except as indicated below, and related charges and adjustments;

net investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes;

Table of Contents

the contribution to income/loss of divested businesses that have been or will be sold or exited that do not qualify for discontinued operations accounting treatment under U.S. GAAP; and

equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests.

The items above are important to an understanding of our overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and our definition of adjusted operating income may differ from that used by other companies. However, we believe that the presentation of adjusted operating income as we measure it for management purposes enhances understanding of our results of operations by highlighting the results from ongoing operations and the underlying profitability of the Financial Services Businesses.

Adjusted operating income excludes Realized investment gains (losses), net, except as indicated below, and related charges and adjustments. A significant element of realized investment gains and losses are impairments and credit-related and interest rate-related gains and losses from sales of securities. Impairments and losses from sales of credit-impaired securities, the timing of which depends largely on market credit cycles, can vary considerably across periods. The timing of other sales that would result in gains or losses, such as interest rate-related gains or losses, is largely subject to our discretion and influenced by market opportunities, as well as our tax and capital profile. Trends in the underlying profitability of our businesses can be more clearly identified without the fluctuating effects of these transactions. Similarly, adjusted operating income excludes investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes, because these recorded changes in asset and liability values are expected to ultimately accrue to the contractholders. Adjusted operating income excludes the results of divested businesses because they are not relevant to understanding our ongoing operating results. The contributions to income/loss of wind-down businesses that we have not divested remain in adjusted operating income. See Note 11 to the Unaudited Interim Consolidated Financial Statements for further information on the presentation of segment results.

As noted above, certain Realized investment gains (losses), net, are included in adjusted operating income. We include in adjusted operating income the portion of our realized investment gains and losses on derivatives that arise from the termination of contracts used to hedge our foreign currency earnings in the same period that the expected earnings emerge. Similarly, we include in adjusted operating income the portion of realized investment gains and losses on derivatives that represent current period yield adjustments. The realized investment gains or losses from products that are free standing derivatives, or contain embedded derivatives, along with the realized investment gains or losses from associated derivative portfolios that are part of an economic hedging program related to the risk of these products, are included in adjusted operating income. Adjusted operating income also includes those realized investment gains and losses that represent profit or loss of certain of our businesses which primarily originate investments for sale or syndication to unrelated investors.

Table of Contents**Results of Operations for Financial Services Businesses by Segment****U.S. Retirement Solutions and Investment Management Division***Individual Annuities**Operating Results*

The following table sets forth the Individual Annuities segment's operating results for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Operating results:				
Revenues	\$ 424	\$ 528	\$ 2,431	\$ 1,723
Benefits and expenses	258	835	1,816	1,761
Adjusted operating income	166	(307)	615	(38)
Realized investment gains (losses), net, and related adjustments(1)	37	(75)	19	(180)
Related charges(1)(2)	(57)	19	(89)	51
Income from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ 146	\$ (363)	\$ 545	\$ (167)

(1) Revenues exclude Realized investment gains (losses), net, and related charges and adjustments. The related charges represent payments related to the market value adjustment features of certain of our annuity products. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.

(2) Benefits and expenses exclude related charges which represent the unfavorable (favorable) impact of Realized investment gains (losses), net, on change in reserves and the amortization of deferred policy acquisition costs, deferred sales inducements and value of business acquired.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income increased \$473 million, from a loss of \$307 million in the third quarter of 2008 to income of \$166 million in the third quarter of 2009. As shown in the following table, adjusted operating income for the third quarter of 2009 included \$211 million of benefits related to adjustments to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products and to our estimate of total gross profits used as a basis for amortizing deferred policy acquisition and other costs, compared to \$418 million of charges included in the third quarter of 2008, resulting in a \$629 million favorable variance.

Table of Contents

- (1) Amounts reflect (charges) or benefits for (increases) or decreases, respectively, in the amortization of deferred policy acquisition, or DAC, and other costs.
- (2) Amounts reflect (charges) or benefits for reserve (increases) or decreases, respectively, related to the guaranteed minimum death and income benefit, or GMDB / GMIB, features of our variable annuity products.
- (3) As discussed below, market performance related adjustments were recognized quarterly beginning in the fourth quarter of 2008. Amounts for the third quarter of 2008 were recognized as part of our annual reviews.

These adjustments primarily reflect the market conditions that existed in the respective periods, and the impact of those market conditions on contractholder behavior, and are discussed individually in more detail below. Partially offsetting the net benefit from these adjustments was \$140 million of mark-to-market losses related to derivative positions associated with our capital hedging program. In the second quarter of 2009, we began the expansion of our hedging program to include a portion of the market exposure related to the overall capital position of our variable annuity business, including the impact of certain statutory reserve exposures. These capital hedges primarily consist of equity options which are designed to partially offset changes in our capital position resulting from market driven changes in certain living and death benefit features of our variable annuity products. In the third quarter of 2009, favorable market conditions resulted in an overall improvement in our capital position, which was partially offset by the mark-to-market losses on the capital hedges. In our living benefit hedging program, the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features resulted in a \$5 million favorable variance, as discussed below.

The \$256 million of benefits in the third quarter of 2009 relating to the quarterly market performance adjustments shown in the table above are attributable to changes to our estimate of total gross profits to reflect actual fund performance in the third quarter of 2009. The actual rate of return on variable annuity account values for the third quarter of 2009 was 10.6% compared to our previously expected rate of return of 2.4%. The \$280 million charge in the third quarter of 2008 reflects the impact on gross profits of market value decreases in the underlying assets associated with our variable annuity products in 2008, and was recognized as part of our annual reviews. Beginning in the fourth quarter of 2008 we determined that adjustments to our estimate of total gross profits to reflect actual fund performance and any corresponding changes to the future rate of return assumptions should no longer be dependent on a comparison to a statistically generated range of estimated gross profits. Instead, for purposes of evaluating deferred policy acquisition and other costs and the reserves for the guaranteed minimum death and income benefit features of our variable annuity products, total estimated gross profits are updated for these items each quarter. The better than expected market return in the third quarter of 2009 increased our estimates of total gross profits by establishing a new, higher starting point for the variable annuity account values used in estimating gross profits for future periods. The previously expected rate of return for the third quarter of 2009, for most contract groups, was based upon our maximum future rate of return assumption under the reversion to the mean approach, as discussed below. The increase in our estimate of total gross profits results in a lower required rate of amortization and lower required reserve provisions, which are applied to all prior periods' gross profits. The resulting cumulative adjustment to prior amortization and reserve provisions are recognized in the current period. In addition, the lower rate of amortization and reserve provisions will also be applied to future gross profits in calculating amortization and the provision for reserves in future periods which, all else being equal, will result in lower amortization, lower reserve provisions and higher net profits in future periods.

As shown in the table above, results for both periods include the impact of the annual reviews of the assumptions used in the reserve for the guaranteed minimum death and income benefit features of our variable annuity products and in our estimate of total gross profits used as a basis for amortizing deferred policy acquisition and other costs. The third quarter of 2009 included \$49 million of charges from these annual reviews, primarily related to reductions in the future rate of return assumptions applied to the underlying assets associated with our variable annuity products. These reductions were primarily driven by updates to the asset allocation assumptions for these underlying assets based on our actual experience, to reflect a higher percentage of lower-yielding fixed income investments versus higher-yielding equity investments. This adjustment impacted both our long-term future rate of return assumption and our near-term maximum future rate of return under the reversion

Table of Contents

to the mean approach, as discussed below. Partially offsetting the impact of the updated future rate of return assumptions were benefits related to the impact of lower mortality and higher investment spread assumptions. Adjusted operating income for the third quarter of 2008 included \$100 million of charges from these annual reviews, primarily reflecting increased cost of expected income and death benefit claims due to lower expected lapse rates for policies where the current policyholder account value is below the guaranteed minimum death benefit.

As mentioned above, we derive our near-term future rate of return assumptions using a reversion to the mean approach, a common industry practice. Under this approach, we consider actual returns over a period of time and initially adjust future projected returns over a four year period so that the assets grow at the long-term expected rate of return for the entire period. However, beginning in the fourth quarter of 2008 and continuing through the third quarter of 2009, the projected future annual rate of return calculated using the reversion to the mean approach for most contract groups was greater than our maximum future rate of return assumption across all asset types for this business. In those cases, we utilize the maximum future rate of return over the four year period, thereby limiting the impact of the reversion to the mean on our estimate of total gross profits. As discussed above, the near-term maximum future rate of return under the reversion to the mean approach was reduced in the third quarter of 2009 from 10.5% to 9.7% as part of our annual reviews. Included in this revised blended maximum future rate are assumptions for returns on various asset classes, including a 13% annual maximum rate of return on equity investments. Further or continued market volatility could result in additional market value changes within our separate account assets and corresponding changes to our gross profits, as well as additional adjustments to the amortization of deferred policy acquisition and other costs, and the costs relating to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products. Given that the estimates of future gross profits are based upon our maximum future rate of return assumption for most contract groups, all else being equal, future quarterly rates of return higher or lower than 2.4% will result in decreases or increases in the amortization of deferred policy acquisition and other costs, and the costs relating to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products.

The quarterly adjustments for current period experience shown in the table above reflect the impact of differences between actual gross profits for the period and the previously estimated expected gross profits for the period, as well as an update for current and future expected claims costs associated with the guaranteed minimum death and income benefit features of our variable annuity products. To the extent each period's actual experience differs from the previous estimate for that period, the assumed level of total gross profits may change, and a cumulative adjustment to previous periods' amortization, referred to as an adjustment for current period experience, may be required in the current period. This adjustment to previous periods' amortization is in addition to the direct impact of actual gross profits on current period amortization and the market performance related adjustment to our estimates of gross profits for future periods. The adjustments for deferred policy acquisition and other costs in the third quarter of both 2009 and 2008 reflect an increase in amortization due to less favorable than expected gross profits, resulting primarily from the charges related to the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features, as described below. The adjustment for the reserves for the guaranteed minimum death and income benefit features of our variable annuity products in the third quarter of 2009 primarily reflects higher than expected fee income as well as lower than expected actual contract guarantee claims costs in the third quarter of 2009. The adjustment for the reserves for the guaranteed minimum death and income benefit features of our variable annuity products in the third quarter of 2008 reflected lower than expected fee income and higher actual contract guarantee claims costs, primarily driven by financial market conditions.

The \$5 million favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features referred to above reflects a charge of \$89 million in the third quarter of 2009 compared to a charge of \$94 million in the third quarter of 2008. The charge in the third quarter of 2009 includes charges of \$202 million related to an update of the actuarial and capital markets assumptions used in the valuation of the embedded derivatives, primarily driven by a reduction in the expected lapse rate

Table of Contents

assumption based on actual experience. The charge in the third quarter of 2008 includes a \$66 million benefit related to an update of the assumptions used in the valuation of the embedded derivatives, primarily driven by an update of the equity volatility assumption to better match the actual equity indices referenced.

Absent the impact of the assumption updates discussed above, the hedging program for the third quarter of 2009 resulted in a \$113 million benefit, reflecting a \$279 million benefit related to the change in the fair value of the embedded derivatives, partially offset by a \$166 million charge related to the change in the fair value of the related hedge positions. The hedging program for the third quarter of 2008, excluding similar assumption updates as discussed above, resulted in a \$160 million charge, reflecting a \$492 million charge related to the change in the fair value of the embedded derivatives, partially offset by a \$332 million benefit related to the change in the fair value of the related hedge positions. Variances for both periods are primarily driven by differences in the actual performance of the underlying separate account funds relative to the performance of the market indices we utilize as a basis for developing our hedging strategy. Given the sensitivity of the fair value of both the embedded derivatives and related hedge positions to financial market conditions, the variance related to the mark-to-market of these items for a given period will be largely dependent on the financial market conditions throughout the period. For additional information regarding the methodology used in determining the fair value of the embedded derivatives associated with our living benefit features, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Variable Annuity Optional Living Benefit Features.

The primary risk exposures of these optional living benefit features relate to actual deviations from, or changes to, the assumptions used in their original pricing, including equity market returns, interest rates, market volatility, timing of annuitization and withdrawals, contract lapses and contractholder mortality. Together with certain product design elements, our hedging program is designed to limit our exposure to the equity market, interest rate, and market volatility risk inherent in the living benefit features of certain variable annuity products, as part of our overall risk management strategy. A decrease in the availability or an increase in the cost of the derivative hedging instruments used in these hedging activities could have an adverse impact on our results of operations going forward. Changes in our market-perceived non-performance risk or changes in the actuarial assumptions around the timing of annuitization and withdrawals, contract lapses and contractholder mortality could also result in fluctuations in the estimated fair value of the embedded derivatives associated with our living benefit features and could positively or negatively impact our results of operations going forward.

2009 to 2008 Nine Month Comparison. Adjusted operating income increased \$653 million, from a loss of \$38 million in the first nine months of 2008 to income of \$615 million in the first nine months of 2009. As shown in the following table, adjusted operating income for the first nine months of 2009 included \$300 million of benefits related to adjustments to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products and to our estimate of total gross profits used as a basis for amortizing deferred policy acquisition and other costs, compared to \$427 million of charges included in the first nine months of 2008, resulting in a \$727 million favorable variance.

Table of Contents

- (1) Amounts reflect (charges) or benefits for (increases) or decreases, respectively, in the amortization of deferred policy acquisition, or DAC, and other costs.
- (2) Amounts reflect (charges) or benefits for reserve (increases) or decreases, respectively, related to the guaranteed minimum death and income benefit, or GMDB / GMIB, features of our variable annuity products.
- (3) As discussed below, market performance related adjustments were recognized quarterly beginning in the fourth quarter of 2008. Amounts for the third quarter of 2008 were recognized as part of our annual reviews.

These adjustments primarily reflect the market conditions that existed in the respective periods, and the impact of those market conditions on contractholder behavior, and are discussed individually in more detail below. Also included within the increase in adjusted operating income is an \$895 million favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features largely driven by changes in our market-perceived non-performance risk as discussed below. A corresponding increase in current period gross profits related to this favorable variance led to an offsetting increase in the amortization of deferred policy acquisition and other costs of \$641 million. Partially offsetting these increases was \$142 million of mark-to-market losses related to derivative positions associated with our capital hedging program, which we began in the second quarter of 2009 as discussed above. Also serving as a partial offset was a decrease in fee income, driven by lower average variable annuity asset balances invested in separate accounts. The declines in separate account assets were due to market depreciation and transfers of balances to a fixed general account option. The transfer of balances to our general account relates to an automatic rebalancing element in some of our optional living benefit features, which, as part of the overall product design, transferred approximately \$8 billion of net investments out of the separate accounts and into our general account since January 1, 2008, due to equity market declines. Higher average annuity account values invested in our general account resulting from these transfers also led to improved investment results, which partially offset the decrease in fee income.

The \$280 million of benefits in the first nine months of 2009 relating to the quarterly market performance adjustments shown in the table above are attributable to updates to our estimate of total gross profits for better than expected actual fund performance in the first nine months of 2009, reflecting improved market conditions during the period. Included within the \$38 million decrease in amortization of deferred policy acquisition and other costs for the first nine months of 2009 is a \$73 million charge to amortize the remaining balance of valuation of business acquired, or VOBA, related to the variable annuity contracts acquired from Allstate. The additional charge was required in the first quarter of 2009, as the declines in estimated future gross profits related to market performance caused the present value of estimated gross profits for these contracts to fall below zero. Since the VOBA balance was completely amortized for these contracts, it cannot be reestablished for market value appreciation in subsequent periods. Excluding this Allstate block of business, market value appreciation in the first nine months of 2009 increased our estimates of total gross profits by establishing a new, higher starting point for the variable annuity account values used in estimating gross profits for future periods. The increase in our estimate of total gross profits results in a lower required rate of amortization and lower required reserve provisions, which are applied to all prior periods' gross profits. The resulting cumulative adjustment to prior amortization and reserve provisions are recognized in the current period. The \$280 million charge in the first nine months of 2008 is attributable to a similar but opposite impact on gross profits of market value decreases in the underlying assets associated with our variable annuity products, reflecting financial market conditions during the period. Results for the first nine months of 2009 and 2008 also include charges of \$49 million and \$100 million, respectively, related to the annual reviews discussed above.

The quarterly adjustments for current period experience shown in the table above reflect the impact of differences between actual gross profits for the period and the previously estimated expected gross profits for the period, as well as an update for current and future expected claims costs associated with the guaranteed minimum death and income benefit features of our variable annuity products. The adjustments for deferred policy acquisition and other costs in the first nine months of 2009 reflect a reduction in amortization due to better than expected gross profits, resulting primarily from the favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features and better than expected lapse

Table of Contents

experience. The adjustment for the reserves for the guaranteed minimum death and income benefit features of our variable annuity products in the first nine months of 2009 primarily reflects higher than expected fee income due to market increases, partially offset by higher than expected actual contract guarantee claims costs due to lower than expected lapses. Less favorable than expected gross profits in the first nine months of 2008 were primarily due to lower than expected fee income, the unfavorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features, and higher actual contract guarantee claims costs in the first nine months of 2008, primarily driven by unfavorable financial market conditions.

The \$895 million favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features referred to above reflects a benefit of \$755 million in the first nine months of 2009 compared to a charge of \$140 million in the first nine months of 2008. The benefit in the first nine months of 2009 includes \$454 million of net benefits related to updates of the inputs used in the valuation of the embedded derivative liabilities, including a \$564 million benefit related to an update to reflect a market-perceived increase in our own risk of non-performance. The remaining \$110 million of net charges was primarily driven by a reduction in the expected lapse rate assumption based on our actual lapse experience, partially offset by the inclusion of new market inputs for implied volatility as well as updated assumptions for other actuarial and capital markets inputs. In light of recent developments, including rating agency downgrades to the claims-paying ratings of our insurance subsidiaries, beginning in the first quarter of 2009, we incorporated an additional spread over LIBOR into the discount rate used in the valuation of the embedded derivative liabilities to reflect an increase in our market perceived non-performance risk, thereby reducing the value of the embedded derivative liabilities. The \$140 million charge in the first nine months of 2008 included a \$66 million benefit related to an update of the assumptions used in the valuation of the embedded derivatives, primarily driven by an update of the equity volatility assumption to better match the actual equity indices referenced. For additional information regarding the methodology used in determining the fair value of the embedded derivatives associated with our living benefit features, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Variable Annuity Optional Living Benefit Features.

Excluding the \$454 million of net benefits related to updates of the inputs used in the valuation of the embedded derivatives associated with our living benefit features, the hedging activities resulted in a \$301 million benefit in the first nine months of 2009, reflecting a \$2,062 million benefit related to the change in the fair value of the embedded derivatives, partially offset by a \$1,761 million charge related to the change in the fair value of the related hedge positions. The hedging activities in the first nine months of 2008, excluding similar assumption updates, resulted in a \$206 million charge, reflecting a \$610 million charge related to the change in the fair value of the embedded derivatives, partially offset by a \$404 million charge related to the change in the fair value of the related hedge positions. Variances for both periods are primarily driven by differences in the actual performance of the underlying separate account funds relative to the performance of the market indices we utilize as a basis for developing our hedging strategy.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$104 million, from \$528 million in the third quarter of 2008 to \$424 million in the third quarter of 2009. Policy charges and fees and asset management fees and other income decreased \$150 million, including \$140 million of mark-to-market losses related to derivative positions associated with our capital hedging program, as discussed above. In addition, fee income declined, driven by lower average variable annuity asset balances invested in separate accounts due to net market depreciation between the third quarter of 2008 and the third quarter of 2009, and the transfer of balances to our general account relating to an automatic rebalancing element in some of our optional living benefit features. Partially offsetting these items, was a \$36 million increase in net investment income, reflecting higher average annuity account values invested in our general account, also resulting from these transfers.

Table of Contents

2009 to 2008 Nine Month Comparison. Revenues increased \$708 million, from \$1,723 million in the first nine months of 2008 to \$2,431 million in the first nine months of 2009. Policy charges and fees and asset management fees and other income increased \$471 million, including a \$895 million favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features, primarily driven by a market-perceived increase in our own risk of non-performance, as discussed above. This favorable variance was partially offset by \$142 million of mark-to-market losses related to derivative positions associated with our capital hedging program, as discussed above, as well as a decrease in fee income driven by lower average variable annuity asset balances invested in separate accounts. The decline in average asset balances was due to net market depreciation and the transfer of balances to our general account relating to an automatic rebalancing element in some of our optional living benefit features. In addition, net investment income increased \$226 million, reflecting higher average annuity account values invested in our general account, also resulting from these transfers.

Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, decreased \$577 million, from \$835 million in the third quarter of 2008 to \$258 million in the third quarter of 2009. Absent the net impact related to the adjustments to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products and to our estimate of total gross profits used as a basis for amortizing deferred policy acquisition and other costs discussed above, which accounts for a decrease in benefits and expenses of \$629 million, benefits and expenses increased \$52 million. On this basis, policyholders' benefits, including changes in reserves, increased \$37 million primarily reflecting higher actual and expected contract guarantee claims costs related to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products. Also on this basis, interest credited to policyholders' account balances and general and administrative expenses, net of capitalization, each increased \$12 million. The increase in interest credited to policyholders' account balances primarily reflects higher average annuity account values invested in our general account resulting from transfers relating to an automatic rebalancing element in some of our living benefit features. The increase in general and administrative expenses, net of capitalization, on this basis, was primarily driven by higher distribution costs, reflecting higher variable annuity sales. Partially offsetting these increases was a \$13 million decrease in interest expense, primarily driven by paydowns of inter-company debt, which were funded with affiliated capital contributions.

2009 to 2008 Nine Month Comparison. Benefits and expenses increased \$55 million, from \$1,761 million in the first nine months of 2008 to \$1,816 million in the first nine months of 2009. Absent the net \$727 million impact related to the adjustments to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products and to our estimate of total gross profits used as a basis for amortizing deferred policy acquisition and other costs and the \$641 million increase in the amortization of deferred policy acquisition and other costs due to the favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features discussed above, which account for a decrease in benefits and expenses of \$86 million, benefits and expenses increased \$141 million. On this basis, interest credited to policyholders' account balances increased \$132 million primarily reflecting higher average annuity account values invested in our general account, resulting from transfers relating to an automatic rebalancing element in some of our living benefit features. Also on this basis, policyholders' benefits, including changes in reserves, increased \$97 million primarily reflecting higher actual and expected contract guarantee claims costs related to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products. The amortization of deferred policy acquisition costs increased \$25 million on this basis, reflecting the higher rate of amortization applied to gross profits in calculating amortization for the first nine months of 2009, due to the negative market performance adjustments recognized during 2008. Partially offsetting these increases was a \$78 million decrease in general and administrative expenses, net of capitalization, absent the effect of the items mentioned above, and a \$35 million decrease in interest expense. The decrease in general and administrative expenses, net of capitalization, on this basis, was driven by declines in distribution and asset management costs associated with lower variable annuity account values, and lower amortization of VOBA subsequent to the

Table of Contents

complete write-off in the first quarter of 2009 of balances related to the variable annuity contracts acquired from Allstate, as discussed above. The decrease in interest expense reflects paydowns of inter-company debt, which were funded with affiliated capital contributions.

Account Values

The following table sets forth changes in account values for the individual annuity business, for the periods indicated. For our individual annuity business, assets are reported at account value, and net sales (redemptions) are gross sales minus redemptions or surrenders and withdrawals, as applicable.

	Three Months Ended September 30, 2009		Nine Months Ended September 30, 2009	
	2008		2008	
	(in millions)			
Variable Annuities(1):				
Beginning total account value	\$ 65,099	\$ 74,707	\$ 60,007	\$ 80,330
Sales	5,829	2,507	11,315	8,076
Surrenders and withdrawals	(1,444)	(1,988)	(4,202)	(6,346)

(1) Variable annuities include only those sold as retail investment products. Investments through defined contribution plan products are included with such products within the Retirement segment.

(2) As of September 30, 2009, variable annuity account values are invested in equity funds (\$26 billion or 34%), balanced funds (\$24 billion or 32%), market value adjusted or fixed rate options (\$12 billion or 16%), bond funds (\$9 billion or 12%) and other (\$5 billion or 6%).

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

2009 to 2008 Three Month Comparison. Total account values for fixed and variable annuities amounted to \$78.8 billion as of September 30, 2009, an increase of \$10.5 billion from June 30, 2009. The increase came primarily from increases in the market value of customers' variable annuities due to equity market appreciation and positive variable annuity net flows. Total account values as of September 30, 2009 increased \$7.5 billion from September 30, 2008, primarily due to positive variable annuity net flows and, to a lesser extent, increases in the market value of customers' variable annuities due to equity market appreciation. Individual variable annuity gross sales increased by \$3.3 billion, from \$2.5 billion in the third quarter of 2008 to \$5.8 billion in the third quarter of 2009. The increase reflects a benefit from the impact of market disruptions on some of our competitors, certain of which implemented product modifications to increase pricing and scale back product features in the second and third quarters of 2009. We also experienced increased sales in the third quarter of 2009.

Table of Contents

related to certain optional living benefit features which we previously announced would be discontinued during the third quarter of 2009. We believe our modified product offering will remain competitively positioned relative to our competitors going forward and provides us an attractive risk and profitability profile, as all future optional living benefit features include the automatic rebalancing element described below. Individual variable annuity surrenders and withdrawals decreased by \$544 million, from \$2.0 billion in the third quarter of 2008 to \$1.4 billion in the third quarter of 2009, reflecting lower lapses for policies where the current policyholder account value is below the guaranteed minimum death or living benefit value.

2009 to 2008 Nine Month Comparison. Total account values for fixed and variable annuities amounted to \$78.8 billion as of September 30, 2009, an increase of \$15.5 billion from December 31, 2008. The increase came primarily from increases in the market value of customers variable annuities due to equity market appreciation and from positive variable annuity net flows. Total account values as of September 30, 2009 increased \$7.5 billion from September 30, 2008, primarily due to positive variable annuity net flows and, to a lesser extent, increases in the market value of customers variable annuities due to equity market appreciation. Individual variable annuity gross sales increased by \$3.2 million, from \$8.1 billion in the first nine months of 2008 to \$11.3 billion in the first nine months of 2009, reflecting strong sales of our optional living benefit product features as discussed above. Individual variable annuity surrenders and withdrawals decreased by \$2.1 billion, from \$6.3 billion in the first nine months of 2008 to \$4.2 billion in the first nine months of 2009, reflecting the overall impact of lower account values due to market depreciation and lower lapses for policies where the current policyholder account value is below the guaranteed minimum death or living benefit value.

Variable Annuity Net Amount at Risk

As a result of the volatility and disruption in the global financial markets, in recent periods we have seen significant increases in the net amount at risk embedded in our variable annuity products with riders that include optional living and guaranteed minimum death benefit features. The net amount at risk is generally defined as the present value of the guaranteed minimum benefit amount in excess of the contractholder's current account balance. Variable annuity account values with living benefit features were \$47.5 billion, \$33.1 billion and \$35.2 billion as of September 30, 2009, December 31, 2008 and September 30, 2008, respectively. The following table sets forth the account value and net amount at risk of our variable annuities with living benefit features split between those that include an automatic rebalancing element and those that do not, as of the dates indicated.

	September 30, 2009		December 31, 2008		September 30, 2008	
	Account Value	Net Amount at Risk	Account Value	Net Amount at Risk	Account Value	Net Amount at Risk
	(in millions)					
Automatic rebalancing element(1)	\$ 30,116	\$ 1,129	\$ 17,653	\$ 1,328	\$ 16,445	\$ 1,142
No automatic rebalancing element	17,356	2,895	15,401	4,973	18,724	2,545
Total variable annuity account values with living benefit features	\$ 47,472	\$ 4,024	\$ 33,054	\$ 6,301	\$ 35,169	\$ 3,687

(1) As of September 30, 2009, December 31, 2008, and September 30, 2008, asset values that have rebalanced to fixed income investments due to the automatic rebalancing element represent 30% or \$9.1 billion of the \$30.1 billion total account value, 78% or \$13.8 billion of the \$17.7 billion total account value, and 70% or \$11.4 billion of the \$16.4 billion total account value, respectively.

The automatic rebalancing element, included in the design of certain optional living benefit features associated with our variable annuity products, transfers assets between contractholder sub-accounts depending on a number of factors, including the investment performance of the sub-accounts. Negative investment performance may result in transfers to either a fixed general account option or a separate account bond portfolio, depending on the benefit feature. In certain situations, assets may transfer back when investment performance improves. The

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

automatic rebalancing element is designed to help limit our exposure to equity market risk and market volatility. Our latest offerings of optional living benefit features associated with variable annuity products

Table of Contents

all include an automatic rebalancing element, and we have discontinued the sale of optional living benefit features without an automatic rebalancing element. As of September 30, 2009 approximately 63% of variable annuity account values with living benefit features included an automatic rebalancing element in the product design, compared to 53% and 47% as of December 31, 2008 and September 30, 2008, respectively. As of September 30, 2009 approximately 28% of the net amount at risk associated with variable annuity account values with living benefit features included an automatic rebalancing element in the product design, compared to 21% and 31% as of December 31, 2008 and September 30, 2008, respectively.

Our guaranteed minimum death benefits guarantee a minimum return on the contract value or an enhanced value, if applicable, to be used solely for purposes of determining benefits payable in the event of death. All of the \$47.5 billion, \$33.1 billion and \$35.2 billion of variable annuity account values with living benefit features as of September 30, 2009, December 31, 2008 and September 30, 2008, respectively, also contain guaranteed minimum death benefits. An additional \$24.3 billion, \$23.3 billion and \$28.6 billion of variable annuity account values, respectively, contain guaranteed minimum death benefits, but no living benefit features. The following table sets forth the account value and net amount at risk of our variable annuities with guaranteed minimum death benefits split between those that include an automatic rebalancing element and those that do not, as of the dates indicated.

	September 30, 2009		December 31, 2008		September 30, 2008	
	Account Value	Net Amount at Risk	Account Value	Net Amount at Risk	Account Value	Net Amount at Risk
	(in millions)					
Automatic rebalancing element	\$ 30,116	\$ 863	\$ 17,653	\$ 1,698	\$ 16,445	\$ 1,451
No automatic rebalancing	41,645	8,828	38,733	14,404	47,309	8,552
Total variable annuity account values with guaranteed minimum death benefits	\$ 71,761	\$ 9,691	\$ 56,386	\$ 16,102	\$ 63,754	\$ 10,003

As of September 30, 2009 approximately 42% of variable annuity account values with guaranteed minimum death benefits included an automatic rebalancing element in the product design, compared to 31% and 26% as of December 31, 2008 and September 30, 2008, respectively. As of September 30, 2009 approximately 9% of the net amount at risk associated with variable annuity account values with guaranteed minimum death benefits included an automatic rebalancing element in the product design, compared to 11% and 15% as of December 31, 2008 and September 30, 2008, respectively.

In addition to our automatic rebalancing element, we also manage the risks associated with our variable annuity products through our hedging program. Under this program we purchase equity options and futures as well as interest rate derivatives to hedge certain guarantees for changes in equity markets, interest rates, and market volatility. In the second quarter of 2009, we began the expansion of our hedging program to include a portion of the market exposure related to the overall capital position of our variable annuity business, including the impact of certain statutory reserve exposures. These capital hedges primarily consist of equity options which are designed to partially offset changes in our capital position resulting from market driven changes in certain living and death benefit features of our variable annuity products. We will continue to assess the composition of the hedging program over the next several quarters. The results of our hedging programs are discussed above.

Table of Contents**Retirement***Operating Results*

The following table sets forth the Retirement segment's operating results for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Operating results:				
Revenues	\$ 1,101	\$ 1,118	\$ 3,539	\$ 3,592

- (1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Benefits and expenses exclude related charges which represent the unfavorable (favorable) impact of Realized investment gains (losses), net, on change in reserves and the amortization of deferred policy acquisition costs.
- (3) Revenues exclude net investment gains and losses on trading account assets supporting insurance liabilities. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.
- (4) Benefits and expenses exclude changes in contractholder liabilities due to asset value changes in the pool of investments supporting these experience-rated contracts. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.

On October 10, 2008, we acquired MullinTBG Insurance Agency Services, LLC and related entities, or MullinTBG, a provider of executive benefit solutions and financing strategies, including nonqualified executive deferred compensation plans. The acquisition included \$8.9 billion of nonqualified full service retirement account values that we administer, which are not reported on our balance sheet.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income for the Retirement segment decreased \$14 million, from \$133 million in the third quarter of 2008 to \$119 million in the third quarter of 2009. Results for both periods include the impact of an annual review of the assumptions used in our estimate of total gross profits used as a basis for amortizing deferred policy acquisition costs and valuation of business acquired, as well as the impact of our quarterly adjustment to total gross profits for current period experience. Adjusted operating income for the

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

third quarter of 2009 and 2008 included charges of \$3 million and \$21 million, respectively, from the annual reviews. The charge in the third quarter of 2008 primarily reflected a decrease in our estimate of future gross profits, including a decline in our asset-based profit assumptions and an increase in our expense assumptions. The quarterly adjustment for current period experience resulted in a \$5 million charge in the third quarter of 2009 and a \$4 million benefit in the third quarter of 2008, reflecting the cumulative impact on amortization of differences between actual gross profits for the period and the previously estimated expected gross profits for the period. In addition, the third quarter of 2008 included a \$29 million benefit from a reduction

Table of Contents

in the amortization of valuation of business acquired due to a cumulative adjustment relating to the calculation of actual and expected gross profits. Together, these items resulted in a net charge of \$8 million in the third quarter of 2009 and a net benefit of \$12 million in the third quarter of 2008.

Excluding the items discussed above, adjusted operating income increased \$6 million compared to the third quarter of 2008, reflecting higher adjusted operating income in our institutional investment products business, and relatively unchanged results in our full service business. The increase in our institutional investment products business was driven by improved investment results, primarily due to increased net settlements on interest rate swaps, which resulted from a higher notional amount of swaps used to manage the duration of the investment portfolio and the favorable impact on those swaps of lower interest rates. Partially offsetting this increase was a lower benefit from the accretion into net investment income of fixed maturity other-than-temporary impairments recognized in previous periods. Such accretion did not contribute to results for the third quarter of 2009 due to our adoption of new authoritative guidance related to fixed maturity other-than-temporary impairments on January 1, 2009. In our full service business, improved investment results were largely offset by lower asset based fees. The increase in investment results was driven by higher average invested assets in our general account reflecting full service participant transfers from our equity based separate account products to our general account stable value products, as well as higher net yields due to the impact of lower crediting rates on general account liabilities, resulting from rate resets. Substantially all of our stable value general account products are either fully or partially participating, and we have the ability to reset crediting rates annually or semi-annually giving effect to previous investment experience. Average full service fee-based retirement account values for the third quarter of 2009 were relatively unchanged compared to the third quarter of 2008. However, recent large plan sales, which in some instances provide for more limited product offerings than existing business, partially offset the impact of market value declines on existing higher margin account values, driving the decline in asset based fees.

2009 to 2008 Nine Month Comparison. Adjusted operating income for the Retirement segment decreased \$21 million, from \$398 million in the first nine months of 2008 to \$377 million in the first nine months of 2009. Results for both periods include the impact of an annual review of the assumptions used in our estimate of total gross profits used as a basis for amortizing deferred policy acquisition costs and valuation of business acquired, as well as the impact of our quarterly adjustments to total gross profits for current period experience. Adjusted operating income for the first nine months of 2009 included a \$3 million charge from the annual review, compared to a \$21 million charge in the first nine months of 2008, as discussed above. The quarterly updates for actual experience resulted in \$5 million of charges in the first nine months of 2009 and \$13 million of benefits in the first nine months of 2008, reflecting the cumulative impact on amortization of differences between actual gross profits for the period and the previously estimated expected gross profits for the period. In addition, the first nine months of 2008 included a \$29 million benefit from a reduction in the amortization of valuation of business acquired due to a cumulative adjustment relating to the calculation of actual and expected gross profits. Together, these items resulted in a net charge of \$8 million in the first nine months of 2009 and a net benefit of \$21 million in the first nine months of 2008.

Excluding the items discussed above, adjusted operating income increased \$8 million compared to the first nine months of 2008, reflecting higher results in our institutional investment products business, partially offset by a decrease in adjusted operating income for our full service business. The increase in our institutional investment products business was driven by improved investment results and a favorable variance in the mark-to-market of equity investments required in certain of our separate account products. The increase in investment results was primarily due to increased net settlements on interest rate swaps used to manage the duration of the investment portfolio, as discussed above, and the impact of the scheduled maturity of a single large guaranteed investment contract which had an interest crediting rate in excess of our general account invested asset yield. Partially offsetting these increases was a lower benefit from the accretion into net investment income of fixed maturity other-than-temporary impairments recognized in previous periods. Such accretion did not contribute to results for the first nine months of 2009 due to our adoption of new authoritative guidance related to fixed maturity other-than-temporary impairments on January 1, 2009. Also serving as a partial offset were lower yields, including the

Table of Contents

impact of a higher balance of investments in lower yielding assets, such as cash and short-term investments, for liquidity purposes. Higher levels of short-term liquidity have been maintained in 2009 to provide additional capacity to address changing cash needs during the current market conditions. The decline in our full service business was primarily driven by lower asset based fees, due to a decrease in average full service fee-based retirement account values primarily resulting from equity market depreciation. Recent large plan sales, which in some instances provide for more limited product offerings than existing business, partially offset the impact of market value declines on existing higher margin account values. Serving as a partial offset to the decline in our full service business was an increase in investment results, driven by higher average invested assets in our general account reflecting full service participant transfers from our equity based separate account products to our general account stable value products, as well as higher net yields due to the impact of lower crediting rates on general account liabilities, resulting from rate resets.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$17 million, from \$1,118 million in the third quarter of 2008 to \$1,101 million in the third quarter of 2009. Net investment income decreased \$68 million, primarily reflecting lower portfolio yields, including lower interest rates on floating rate investments due to rate resets and a lower benefit from the accretion into net investment income of fixed maturity other-than-temporary impairments recognized in previous periods, as discussed above. Also contributing to the decline in net investment income was the impact of a higher balance of investments in lower yielding assets, such as cash and short-term investments, for liquidity purposes, as discussed above. A larger base of invested assets in our full service business, primarily driven by participant transfers from our equity based separate account products to our general account stable value products served as a partial offset to the decline in net investment income. Partially offsetting the decrease in net investment income was a \$33 million increase in premiums, driven by higher life-contingent structured settlement sales, and resulted in a corresponding increase in policyholders' benefits, including the change in policy reserves, as discussed below. Also serving as a partial offset, policy charges and fee income and asset management fees and other income increased \$18 million, primarily relating to increased net settlements on interest rate swaps used to manage the duration of the investment portfolio, as discussed above, and \$12 million of revenues in the third quarter of 2009 associated with the acquired operations of MullinTBG. Partially offsetting these increases in policy charges and fee income and asset management fees and other income was a decline in asset based fees in our full service business driven by the impact of equity market depreciation, partially offset by recent large plan sales, as discussed above.

2009 to 2008 Nine Month Comparison. Revenues decreased \$53 million, from \$3,592 million in the first nine months of 2008 to \$3,539 million in the first nine months of 2009. Net investment income decreased \$154 million, primarily reflecting lower portfolio yields, including lower interest rates on floating rate investments due to rate resets and a lower benefit from the accretion into net investment income of fixed maturity other-than-temporary impairments recognized in previous periods, as discussed above. Also contributing to the decline in net investment income was the impact of a higher balance of investments in lower yielding assets, such as cash and short-term investments, for liquidity purposes, as discussed above. Partially offsetting these declines were increases in net investment income from a larger base of invested assets in our full service business, primarily driven by participant transfers from our equity based separate account products to our general account stable value products, and a favorable variance in the mark-to-market of equity investments required in certain of our separate account products. Partially offsetting the decline in net investment income was a \$98 million increase in premiums, driven by higher life-contingent structured settlement sales, partially offset by lower single premium group annuity sales, which resulted in a corresponding increase in policyholders' benefits, including the change in policy reserves, as discussed below. In addition, policy charges and fee income and asset management fees and other income increased \$3 million, primarily relating to \$32 million of revenues in the first nine months of 2009 associated with the acquired operations of MullinTBG and a \$15 million favorable variance in the mark-to-market of embedded derivatives and derivative hedge positions related to the guaranteed minimum withdrawal benefits associated with certain defined contribution accounts. Also contributing to the increase was

Table of Contents

higher net settlements on interest rate swaps used to manage the duration of the investment portfolio, as discussed above. Partially offsetting these increases in policy charges and fee income and asset management fees and other income was a decline in asset based fees in our full service business driven by a decrease in average full service fee-based retirement account values primarily resulting from equity market depreciation, as well as full service participant transfers from our equity based separate account products to our general account stable value products, partially offset by recent large plan sales, as discussed above.

Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, decreased \$3 million, from \$985 million in the third quarter of 2008 to \$982 million in the third quarter of 2009. Absent the impact of the annual reviews and other adjustments to the amortization of deferred policy acquisition costs and valuation of business acquired discussed above, which account for a \$20 million increase, benefits and expenses decreased \$23 million. Interest credited to policyholders' account balances decreased \$70 million, primarily reflecting lower crediting rates on floating rate guaranteed investment products and lower crediting rates on full service stable value product liabilities due to rate resets and the impact of the scheduled maturity of a single large guaranteed investment contract, partially offset by the impact of higher full service general account stable value product account values from participant transfers from equity based separate account products. In addition, interest expense decreased \$13 million, reflecting lower interest rates on lower borrowings used to support investments. Partially offsetting these items, policyholders' benefits, including the change in policy reserves, increased \$46 million, primarily reflecting the increase in premiums discussed above, as well as a decreased benefit from reserve releases, including reserve refinements primarily reflecting updates of client census data and less favorable case experience related to our group annuity blocks of business. Also serving as a partial offset, general and administrative expenses, net of capitalization, increased \$16 million excluding the items mentioned above, driven by \$11 million of costs related to the acquired operations of MullinTBG.

2009 to 2008 Nine Month Comparison. Benefits and expenses decreased \$32 million, from \$3,194 million in the first nine months of 2008 to \$3,162 million in the first nine months of 2009. Absent the impact of the annual reviews and other adjustments to the amortization of deferred policy acquisition costs and valuation of business acquired discussed above, which account for a \$29 million increase, benefits and expenses decreased \$61 million. Interest credited to policyholders' account balances decreased \$154 million, primarily reflecting lower crediting rates on floating rate guaranteed investment products and lower crediting rates on full service stable value product liabilities due to rate resets, and the impact of the scheduled maturity of a single large guaranteed investment contract, partially offset by the impact of higher full service general account stable value product account values from participant transfers from equity based separate account products. In addition, interest expense decreased \$44 million, reflecting lower interest rates on lower borrowings used to support investments. Partially offsetting these decreases, policyholders' benefits, including the change in policy reserves, increased \$88 million, primarily reflecting the increase in premiums discussed above, partially offset by lower interest on lower general account policy reserves. General and administrative expenses, net of capitalization, increased \$51 million excluding the items mentioned above, driven by \$37 million of costs related to the acquired operations of MullinTBG, as well as expenses incurred to support several large client sales, partially offset by the absence of the costs of an interim service agreement relating to the retirement business acquired from Union Bank of California, N.A., which were included in the first nine months of 2008.

Table of Contents*Sales Results and Account Values*

The following table shows the changes in the account values and net additions (withdrawals) of Retirement segment products for the periods indicated. Net additions (withdrawals) are deposits and sales or additions, as applicable, minus withdrawals and benefits. These concepts do not correspond to revenues under U.S. GAAP, but are used as a relevant measure of business activity.

- (1) Ending total account value for the full service business includes assets of Prudential's defined contribution retirement plan of \$5.2 billion and \$5.3 billion as of September 30, 2009 and 2008, respectively.
- (2) Ending total account value for the institutional investment products business includes assets of Prudential's defined benefit retirement plan of \$5.3 billion and \$5.0 billion as of September 30, 2009 and 2008, respectively. Ending total account value for the institutional investments products business also includes \$1.5 billion as of September 30, 2009 related to collateralized funding agreements issued to the Federal Home Loan Bank of New York (FHLBNY), and \$1.9 billion and \$3.5 billion as of September 30, 2009 and 2008, respectively, related to affiliated funding agreements issued using the proceeds from the sale of Prudential Financial retail medium-term notes. For additional information regarding the FHLBNY and the retail medium-term notes program see, Liquidity and Capital Resources.
- (3) Additions includes \$500 million for the nine months ended September 30, 2009 representing transfers of externally managed client balances to accounts we manage. This addition is offset within Other, as there was no net impact on ending account values for this transfer.
- (4) Withdrawals and benefits includes \$(317) million for the three and nine months ended September 30, 2009 representing transfers of client balances from accounts we managed to externally managed accounts. This withdrawal is offset within Other, as there was no net impact on ending account values for this transfer.
- (5) Other includes transfers from (to) the Asset Management segment of \$(20) million and \$(111) million for the three and nine months ended September 30, 2008, respectively. Other also includes \$317 million and \$(183) million in the three and nine months ended September 30, 2009, respectively, representing transfers of client balances between externally managed accounts and accounts we manage. These transfers are offset within Additions or Withdrawals and benefits, as there was no net impact on ending account values for these transfers. For the nine months ended September 30, 2009, Other also includes \$1,500 million representing collateralized funding agreements issued to the FHLBNY and \$(1,522) million representing terminations of affiliated funding agreements utilizing proceeds from the issuances to FHLBNY. Remaining amounts for all periods presented primarily represent changes in asset balances for externally-managed accounts.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

2009 to 2008 Three Month Comparison. Account values in our full service business amounted to \$121.8 billion as of September 30, 2009, an increase of \$10.8 billion from June 30, 2009. The increase in account values was primarily driven by an increase in the market value of customer funds due to equity market appreciation and,

Table of Contents

to a lesser extent, by net additions. Account values in our full service business as of September 30, 2009 increased \$21.3 billion from September 30, 2008, driven by \$10.5 billion of net additions for the twelve months ended September 30, 2009 and the addition of \$8.9 billion of account values related to the acquisition of MullinTBG, as well as an increase in the market value of customer funds due to equity market appreciation. Net additions increased \$1,109 million, from \$393 million in the third quarter of 2008 to \$1,502 million in the third quarter of 2009, primarily reflecting higher new plan sales. New plan sales in the third quarter of 2009 included two client sales over \$100 million, totaling \$1.2 billion, compared to one client sale over \$100 million in the third quarter of 2008. Rating agency downgrades to the claims-paying ratings of our insurance subsidiaries in the first quarter of 2009 could have an adverse impact on sales of our full service general account stable value products in future periods.

Account values in our institutional investment products business amounted to \$50.1 billion as of September 30, 2009, an increase of \$662 million from June 30, 2009. The increase in account values was primarily driven by increases in the market value of customer funds primarily from credit spread tightening in the fixed income markets, partially offset by net withdrawals of \$1.2 billion, primarily reflecting the impact of scheduled withdrawals of our guaranteed investment products. Account values in our institutional investment products business as of September 30, 2009 increased \$96 million from September 30, 2008, primarily reflecting a \$3.3 billion increase in the market value of customer funds, partially offset by net withdrawals of \$1.9 billion for the twelve months ended September 30, 2009, driven by the impact of scheduled withdrawals of our guaranteed investment products, and net outflows from externally managed accounts. Net withdrawals increased \$132 million, from \$1,062 million in the third quarter of 2008 to \$1,194 million in the third quarter of 2009. This increase reflects the impact of transfers of client balances from accounts we manage to externally managed accounts, partially offset by higher additions. The increase in additions reflects higher sales of investment-only, fee-based stable value products, which more than offset lower sales of guaranteed investment products in the institutional and retail markets. Sales of our retail notes and institutional notes have been negatively impacted by unfavorable capital markets conditions, in particular during the second half of 2008 and into the third quarter of 2009, reflecting the extreme stress experienced by global financial markets from the second half of 2007 through the early portion of 2009. Rating agency downgrades to the claims-paying ratings of our insurance subsidiaries in the first quarter of 2009 could also have an adverse impact on sales of our guaranteed investment products in future periods.

2009 to 2008 Nine Month Comparison. Account values in our full service business amounted to \$121.8 billion as of September 30, 2009, an increase of \$22.0 billion from December 31, 2008. The increase in account values was driven by both an increase in the market value of customer funds due to equity market appreciation, and net additions of \$7.8 billion. Account values in our full service business as of September 30, 2009 increased \$21.3 billion from September 30, 2008, driven by \$10.5 billion of net additions for the twelve months ended September 30, 2009 and the addition of \$8.9 billion of account values related to the acquisition of MullinTBG, as well as an increase in the market value of customer funds due to equity markets appreciation. Net additions increased \$6.6 billion, from \$1.2 billion in the first nine months of 2008 to \$7.8 billion in the first nine months of 2009, primarily reflecting higher new plan sales. New plan sales in the first nine months of 2009 included a concentration of large client sales, including ten client sales over \$100 million, totaling \$7.0 billion, compared to six client sales over \$100 million in the first nine months of 2008, which totaled \$1.6 billion.

Account values in our institutional investment products business amounted to \$50.1 billion as of September 30, 2009, a decrease of \$354 million from December 31, 2008, reflecting net withdrawals of \$1.5 billion, driven by the impact of scheduled withdrawals of our guaranteed investment products, as well as net outflows from externally managed accounts. Increases in the market value of customer funds primarily from credit spread tightening in the fixed income markets partially offset these declines. Account values in our institutional investment products business as of September 30, 2009 increased \$96 million from September 30, 2008, primarily reflecting a \$3.3 billion increase in the market value of customer funds, partially offset by net withdrawals of \$1.9 billion for the twelve months ended September 30, 2009, driven by the impact of scheduled withdrawals of our guaranteed investment products, and net outflows from externally managed accounts. Net

Table of Contents

withdrawals increased \$241 million, from \$1,292 million in the first nine months of 2008 to \$1,533 million in the first nine months of 2009. This increase reflects the impact of lower sales of our guaranteed investment products, as discussed above.

Asset Management**Operating Results**

The following table sets forth the Asset Management segment's operating results for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Operating results:				
Revenues	\$ 291	\$ 345	\$ 896	\$ 1,457
Benefits and expenses	262	353	835	1,156
Adjusted operating income	29	(8)	61	301
Realized investment gains (losses), net, and related adjustments(1)	5	4	(20)	6
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests(2)	(40)	3	(36)	29
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ (6)	\$ (1)	\$ 5	\$ 336

(1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.

(2) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis on an after-tax basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represent the portion of earnings from consolidated entities that relate to the equity interests of minority investors.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income increased \$37 million, from a loss of \$8 million in the third quarter of 2008 to income of \$29 million in the third quarter of 2009. Results of the segment's proprietary investing activities increased \$81 million, from a loss of \$103 million in the third quarter of 2008 to a loss of \$22 million in the third quarter of 2009 primarily reflecting a reduction of losses in a fixed income fund and equity fund investments, partially offset by lower returns on real estate investments. Investment results in a fixed income fund included losses of \$76 million in the third quarter of 2008, compared to \$0 million in the third quarter of 2009 due to the redemption of the entire investment as of June 30, 2009. Proprietary investing results for equity investments increased \$33 million reflecting losses in the third quarter of 2008, and the subsequent exit of several of these equity investment funds in 2009. Real estate proprietary investing decreased \$29 million, reflecting the impact of lower real estate values on co-investments.

The improvement in adjusted operating income from the reduction in losses in proprietary investing were partially offset by a decline in results from the segment's commercial mortgage activities reflecting a \$24 million increase in the interim loan loss provision. Due to market conditions and the inherent risk of these loans, the underwriting of new interim loans was suspended during the third quarter of 2008. As of September 30, 2009, the principal balance of interim loans outstanding totaled \$1.8 billion, which excludes \$120 million of future

Table of Contents

fundings related to these loans that would need to be disbursed if the borrowers met the conditions for these fundings. As of September 30, 2009, these interim loans outstanding had a weighted average loan-to-value ratio of 109%, indicating that, in aggregate, the loan amount is greater than the collateral value, and a weighted average debt service coverage ratio of 1.13 times. A stabilized value and projected net operating income are used in the calculation of the loan-to-value and debt service coverage ratios. These loans also had an allowance for losses or credit related market value losses totaling \$186 million as of September 30, 2009. Results in the third quarter of 2009 also reflect a decrease in asset management fees primarily from retail customer assets as a result of lower equity markets, as well as lower asset management, transaction and performance based incentive fees related to institutional real estate investment management activities due to both lower real estate values and lower transaction volume. These declines were partially offset by a decrease in compensation costs.

2009 to 2008 Nine Month Comparison. Adjusted operating income decreased \$240 million, from \$301 million in the first nine months of 2008 to \$61 million in the first nine months of 2009. Results in 2009 reflect lower transaction and performance based incentive fees, primarily related to institutional real estate funds reflecting a decline in real estate values, as well as a decrease in asset management fees primarily from retail and institutional customer assets primarily as a result of lower average asset values. Results of the segment's commercial mortgage activities decreased reflecting an increase in the interim loan loss provision. In addition, the segment's proprietary investing activities decreased \$24 million primarily reflecting lower returns on real estate investments, as well as lower proprietary investing balances in 2009. Real estate proprietary investing decreased \$101 million primarily reflecting the impact of lower real estate values on co-investments. Partially offsetting the decline in real estate proprietary investing was a reduction of losses in a fixed income fund which included losses of \$67 million in the first nine months of 2008, compared to losses of \$11 million in the first nine months of 2009. Our entire investment in the fixed income fund was redeemed as of June 30, 2009. Proprietary investing results for equity investments increased \$17 million reflecting losses in the first nine months of 2008, compared to gains in the first nine months of 2009, and the subsequent exit of several of these equity investment funds in 2009. Also, results for the first nine months of 2009 reflect lower income related to mutual fund service fees and securities lending activities. These declines were partially offset by a decrease in compensation costs.

Revenues

The following tables set forth the Asset Management segment's revenues, presented on a basis consistent with the table above under "Operating Results," by type, asset management fees by source and assets under management for the periods indicated. In managing our business we analyze assets under management, which do not correspond to U.S. GAAP assets, because a principal source of our revenues are fees based on assets under management.

	Three Months Ended		Nine Months Ended	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008

Table of Contents

- (1) Consists of individual mutual funds and both variable annuities and variable life insurance asset management revenues from our separate accounts. This also includes funds invested in proprietary mutual funds through our defined contribution plan products. Revenues from fixed annuities and the fixed rate options of both variable annuities and variable life insurance are included in the general account.
- (2) Includes mortgage origination and spread lending revenues of our commercial mortgage origination and servicing business.
- (3) Includes payments from Wachovia Corporation under an agreement dated as of July 30, 2004 implementing arrangements with respect to money market mutual funds in connection with the combination of our retail securities brokerage and clearing operations with those of Wachovia Corporation. The agreement extends for ten years after termination of the joint venture. The revenue from Wachovia Corporation under this agreement was \$16 million and \$14 million in the three months ended September 30, 2009 and 2008, respectively, and \$46 million and \$42 million in the nine months ended September 30, 2009 and 2008, respectively.

Total	\$ 897	\$ 2,660

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$54 million, from \$345 million in the third quarter of 2008 to \$291 million in the third quarter of 2009. Service, distribution and other revenues decreased \$63 million, of which \$48 million related to lower revenues in certain consolidated funds, which were fully offset by lower expenses related to noncontrolling

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

interests in these funds. Also contributing to the decrease were lower revenues from securities lending activities. Asset management fees decreased \$20 million, primarily from retail customer assets as a result of lower equity markets, as well as lower asset management fees related to institutional real estate investment management activities due to decreased asset values. Commercial mortgage revenues decreased \$19 million reflecting an increase in the interim loan loss provision in the third quarter of 2009. Transaction and incentive fees decreased

Table of Contents

\$19 million primarily related to real estate investment management activities due to both lower real estate values and lower transaction volume. Proprietary investing increased \$67 million reflecting a decline in losses, primarily the result of lower proprietary investing balances in 2009, including the exiting of several equity investment funds and the redemption of a fixed income fund, compared to investment losses in these funds in the third quarter of 2008. Real estate proprietary investing decreased primarily from lower real estate values on co-investments.

2009 to 2008 Nine Month Comparison. Revenues decreased \$561 million, from \$1.457 billion in the first nine months of 2008 to \$896 million in the first nine months of 2009. Service, distribution and other revenues decreased \$207 million of which \$100 million related to lower revenues in certain consolidated funds, which were fully offset by lower expenses related to noncontrolling interests in these funds. The remainder of the decrease in service, distribution and other revenues includes lower mutual fund service fee revenues, as well as a decline in revenues related to securities lending activities. Asset management fees decreased \$96 million, primarily from the management of retail and institutional customer assets as a result of lower average asset values. In addition, transaction and incentive fees decreased \$138 million primarily reflecting a decline in real estate values due to adverse real estate market conditions. A portion of these incentive based fees are offset in incentive compensation expense in accordance with the terms of the contractual agreements. Certain of our incentive fees continue to be subject to positive or negative future adjustment based on cumulative fund performance in relation to specified benchmarks. As of September 30, 2009, \$126 million of cumulative incentive fee revenue, net of compensation, is subject to future adjustment, compared to \$123 million as of December 31, 2008. In the first nine months of 2009, adjustments of \$37 million related to previously recognized incentive fees contributed to the decline in incentive fees resulting from fund performance. Commercial mortgage revenues decreased \$62 million reflecting an increase in the interim loan loss provision in the first nine months of 2009, as discussed above. Proprietary investing revenues decreased \$58 million reflecting lower returns on real estate investments, as well as lower proprietary investing balances in 2009. Real estate proprietary investing revenues decreased primarily due to the impact of lower real estate values on co-investments. Proprietary investing revenues also reflect the redemption of a fixed income fund and the exiting of several equity investment funds in 2009, compared to investment losses in these funds in the first nine months of 2008.

Expenses

2009 to 2008 Three Month Comparison. Expenses, as shown in the table above under Operating Results, decreased \$91 million, from \$353 million in the third quarter of 2008 to \$262 million in the third quarter of 2009, driven by lower revenues associated with certain consolidated funds, and lower interest costs related to our reduced proprietary investing activities, as discussed above. In addition, compensation costs decreased primarily due to lower incentive compensation as a result of lower revenues, as well as lower headcount.

2009 to 2008 Nine Month Comparison. Expenses decreased \$321 million, from \$1.156 billion in the first nine months of 2008 to \$835 million in the first nine months of 2009, driven by lower expenses related to performance based incentive fees, lower revenues associated with certain consolidated funds, the decline in mutual fund service fee revenue, and lower interest costs related to our reduced proprietary investing activities, as discussed above. In addition, compensation costs decreased primarily due to lower incentive compensation as a result of lower revenues, as well as lower headcount.

Table of Contents**U.S. Individual Life and Group Insurance Division***Individual Life**Operating Results*

The following table sets forth the Individual Life segment's operating results for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Operating results:				
Revenues	\$ 656	\$ 682	\$ 2,039	\$ 2,038
Benefits and expenses	413	444	1,618	1,601
Adjusted operating income	243	238	421	437
Realized investment gains (losses), net, and related adjustments(1)	43	(158)	75	(228)
Income from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ 286	\$ 80	\$ 496	\$ 209

(1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income increased \$5 million, from \$238 million in the third quarter of 2008 to \$243 million in the third quarter of 2009. Results for both periods benefited from lower amortization of net deferred policy acquisition costs and unearned revenue reserves, partially offset by an increase in reserves for the guaranteed minimum death benefit feature in certain contracts, reflecting updates of our actuarial assumptions based on an annual review. The annual review covers assumptions used in our estimate of total gross profits which forms the basis for amortizing deferred policy acquisition costs and unearned revenue reserves as well as the reserve for the guaranteed minimum death benefit feature in certain contracts. The third quarter of 2009 includes a \$55 million benefit from the annual review, primarily reflecting higher investment spread assumptions and improved future mortality expectations. The benefit of these items was partially offset by updates to the interest rate assumptions which increased the reserve for the guaranteed minimum death benefit feature in certain contracts, as well as a reduction in our future rate of return assumption, as discussed below. Adjusted operating income for the third quarter of 2008 includes a \$79 million benefit from the annual review, primarily reflecting improved future mortality expectations. Third quarter 2009 results also include a \$30 million benefit from compensation received based on multi-year profitability of third-party products we distribute, while results for the prior year quarter include a similar benefit of \$53 million. These compensation arrangements are subject to renegotiation periodically which will affect the amount of additional compensation we are eligible to receive. The largest of these arrangements was renegotiated in 2008 and the profit opportunities will be significantly reduced in 2010 and beyond.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Absent the effect of these items, adjusted operating income for the third quarter of 2009 increased \$52 million from the year-ago quarter. On this basis, the increase in adjusted operating income primarily reflects lower amortization of deferred policy acquisition costs net of related amortization of unearned revenue reserves associated with the quarterly impact of changes to the estimate of total gross profits primarily due to favorable separate account fund performance in the period, that are not part of the annual review. More favorable mortality experience, net of reinsurance, in the third quarter of 2009 compared to the third quarter of 2008 also contributed to the increase in adjusted operating income. Slightly offsetting these items was a decrease in asset based fees due to lower average separate account asset balances in comparison to the prior year quarter, reflecting the impact of the unfavorable equity markets in late 2008 and early 2009.

Table of Contents

Amortization of deferred policy acquisition costs net of related amortization of unearned revenue reserves includes the impact of actual market performance on both actual profits and estimated future gross profits, used as the basis for amortizing deferred policy acquisition costs. We derive our near-term future rate of return assumptions using a reversion to the mean approach, a common industry practice. Under this approach, we consider actual returns over a period of time and initially adjust future projected returns over a four year period so that the assets grow at the long-term expected rate of return for the entire period. However, beginning in the fourth quarter of 2008 and continuing through the third quarter of 2009, the projected future annual rate of return calculated using the reversion to the mean approach was greater than our maximum future rate of return assumption across all asset types for this business. As a result, we utilized the maximum future rate of return over the four year period, thereby limiting the impact of the reversion to the mean on our estimate of total gross profits. As discussed above, the near-term maximum future rate of return under the reversion to mean approach was reduced in the third quarter of 2009 from 10.9% to 10.1% as part of our annual review. Included in this revised blended maximum future rate are assumptions for returns on various asset classes, including a 13% annual maximum rate of return on equity investments.

2009 to 2008 Nine Month Comparison. Adjusted operating income decreased \$16 million, from \$437 million in the first nine months of 2008 to \$421 million in the first nine months of 2009. Results for both periods benefited from lower amortization of net deferred policy acquisition costs and unearned revenue reserves, partially offset by an increase in reserves for the guaranteed minimum death benefit feature in certain contracts, reflecting updates of our actual assumptions based on an annual review. Adjusted operating income for the first nine months of 2009 includes a \$55 million benefit from the annual review compared to a similar benefit of \$79 million for the first nine months of 2008, as discussed above. Results for the first nine months of 2009 also include a \$30 million benefit from compensation received based on multi-year profitability of third-party products we distribute, while results for the prior year period include a \$53 million benefit for this item, as discussed above.

Absent the effect of these items, adjusted operating income for the first nine months of 2009 increased \$31 million from the prior year period. The increase in adjusted operating income reflects lower amortization of deferred policy acquisition costs net of related amortization of unearned revenue reserves relating to current quarter experience, primarily reflecting the impact of more favorable equity markets on separate account fund performance, which was partially offset by an increase in amortization of deferred policy acquisition costs net of related amortization of unearned revenue reserves reflecting the impact of unfavorable equity markets in late 2008 and early 2009 on variable product policy persistency. This net decrease in deferred policy acquisition costs net of related amortization of unearned revenue reserves reflects the quarterly impact of changes to the estimate of total gross profits primarily due to favorable separate account fund performance in the period, that are not part of the annual review. Results in 2009 also reflect higher earnings from growth in term and universal life insurance in force. More favorable mortality experience, net of reinsurance, in the first nine months of 2009 compared to the first nine months of 2008 also contributed to the increase in adjusted operating income. Partially offsetting these items was a decrease in asset based fees due to lower average separate account asset balances reflecting the impact of the unfavorable equity markets in late 2008 and early 2009, as well as losses on an investment in a real property separate account fund.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$26 million, from \$682 million in the third quarter of 2008 to \$656 million in the third quarter of 2009. Policy charges and fees and asset management fees and other income decreased \$63 million, including a \$26 million decrease in compensation received based on multi-year profitability of third-party products we distribute and an increase of \$11 million to the amortization of unearned revenue reserves due to the annual review of assumptions, as discussed above. Absent these items policy charges and fees and asset management fees and other income decreased \$48 million, primarily reflecting lower asset based fees due to lower average separate account asset balances reflecting the unfavorable impact of equity market performance in

Table of Contents

late 2008 and early 2009. Premiums increased \$23 million, primarily due to growth of our in force block of term insurance. Net investment income increased \$14 million, reflecting higher asset balances primarily from the financing of statutory reserves required for certain term life insurance policies and growth in universal life account balances due to increased policyholder deposits.

2009 to 2008 Nine Month Comparison. Revenues increased \$1 million, from \$2,038 million in the first nine months of 2008 to \$2,039 million in the first nine months of 2009. Premiums increased \$57 million, primarily due to growth of our in force block of term insurance. Net investment income increased \$49 million, reflecting higher asset balances primarily from the financing of statutory reserves required for certain term life insurance policies and growth in universal life account balances due to increased policyholder deposits, partially offset by losses on an investment in a real property separate account fund. Policy charges and fees and asset management fees and other income decreased \$105 million, including a \$26 million decrease in compensation received based on multi-year profitability of third-party products we distribute and an increase of \$11 million to the amortization of unearned revenue reserves due to the annual review of assumptions, as discussed above. Absent these items policy charges and fees and asset management fees and other income decreased \$90 million, primarily reflecting lower asset based fees due to lower average separate account asset balances reflecting the unfavorable impact of equity market performance in late 2008 and early 2009.

Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, decreased \$31 million, from \$444 million in the third quarter of 2008 to \$413 million in the third quarter of 2009. Absent the impacts of the annual reviews conducted in the third quarter of both periods, as discussed above, benefits and expenses decreased \$66 million, from \$604 million in the third quarter of 2008 to \$538 million in the third quarter of 2009. On this basis, amortization of deferred policy acquisition costs decreased \$79 million, primarily reflecting the impact of more favorable equity markets on separate account fund performance. Policyholders' benefits, including interest credited to policyholders' account balances, increased \$29 million, reflecting higher policyholder reserves from growth in our in force block of term insurance and an increase in interest credited to policyholders' account balances due to growth in universal life account balances from increased policyholder deposits, partially offset by lower death claim costs.

2009 to 2008 Nine Month Comparison. Benefits and expenses increased \$17 million, from \$1,601 million in the first nine months of 2008 to \$1,618 million in the first nine months of 2009. Absent the impacts of the annual reviews conducted in the third quarter of both periods, as discussed above, benefits and expenses decreased \$18 million, from \$1,761 million in the first nine months of 2008 to \$1,743 million in the first nine months of 2009. On this basis, amortization of deferred policy acquisition costs decreased \$76 million, primarily reflecting the impact of more favorable equity markets in the second and third quarters of 2009 on separate account fund performance, which was partially offset by an increase in amortization of deferred policy acquisition costs net of related amortization of unearned revenue reserves reflecting the impact of unfavorable equity markets in late 2008 and early 2009 on variable product policy persistency. Policyholders' benefits, including interest credited to policyholders' account balances, increased \$72 million, reflecting an expected level of higher death claim costs and policyholder reserves associated with growth in our in force block of term insurance and an increase in interest credited to policyholders' account balances due to growth in universal life account balances from increased policyholder deposits.

Table of Contents*Sales Results*

The following table sets forth individual life insurance annualized new business premiums for the periods indicated. In managing our individual life insurance business, we analyze annualized new business premiums, which do not correspond to revenues under U.S. GAAP, because annualized new business premiums measure the current sales performance of the business, while revenues primarily reflect the renewal persistency and aging of in force policies written in prior years and net investment income, in addition to current sales. Annualized new business premiums include 10% of first year excess premiums and deposits.

	Three Months Ended		Nine Months Ended	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
(in millions)				
Annualized New Business Premiums(1):				
Excluding corporate-owned life insurance:				
Variable life	\$ 3	\$ 8	\$ 12	\$ 29
Universal life	26	21	86	60
Term life	57	53	170	156
Total excluding corporate-owned life insurance	86	82	268	245
Corporate-owned life insurance				
Total	\$ 86	\$ 82	\$ 268	\$ 245
Annualized new business premiums by distribution channel, excluding corporate-owned life insurance(1):				
Prudential Agents	\$ 22	\$ 26	\$ 68	\$ 83
Third party	64	56	200	162
Total	\$ 86	\$ 82	\$ 268	\$ 245

- (1) The Individual Life sales measure was modified in the fourth quarter of 2008 to reflect annualized new business premiums, which represent annualized scheduled premiums plus 10% of excess (unscheduled) and single premiums from new sales. This new measure provides a more meaningful presentation of sales results and trends than the former measure, which included 100% of excess (unscheduled) or single premiums. Prior period amounts have been restated to conform to the current presentation.

2009 to 2008 Three Month Comparison. Sales of new life insurance, measured as described above, increased \$4 million, from \$82 million in the third quarter of 2008 to \$86 million in the third quarter of 2009. The increase in sales is primarily due to a \$5 million increase in sales of universal life products and a \$4 million increase in term life product sales, primarily by the third party distribution channel, partially offset by a \$5 million decrease in sales of variable life products by Prudential Agents. Sales from the third party distribution channel were \$8 million higher than the prior year quarter due to higher sales of term life products reflecting market disruptions for some of our competitors as well as higher sales of universal life products reflecting the impact of product repricing in the second half of 2008. In the second and fourth quarter of 2009 we increased universal life and term life prices, which could impact future sales. Sales by Prudential Agents were \$4 million lower than the prior year quarter primarily due to lower sales of variable life products which were impacted by the unfavorable market conditions experienced in late 2008 and early 2009. The number of Prudential Agents decreased slightly from 2,482 at September 30, 2008 to 2,453 at September 30, 2009.

2009 to 2008 Nine Month Comparison. Sales of new life insurance, measured as described above, increased \$23 million, from \$245 million in the first nine months of 2008 to \$268 million in the first nine months of 2009. The increase in sales is primarily due to a \$26 million increase in

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

sales of universal life products and a \$14 million increase in term life product sales primarily by the third party distribution channel, partially offset by a \$17 million decrease in sales of variable life products by Prudential Agents. Sales from the third party distribution channel were \$38 million higher than the first nine months of 2008 due to higher sales of universal life products reflecting the impact of product repricing in the second half of 2008 as well as higher sales of term

Table of Contents

life products reflecting market disruptions for some of our competitors. Sales by Prudential Agents were \$15 million lower than the first nine months of 2008 primarily due to lower sales of variable life products which were impacted by the unfavorable market conditions experienced in late 2008 and early 2009.

Policy Surrender Experience

The following table sets forth the individual life insurance business policy surrender experience for variable and universal life insurance, measured by cash value of surrenders, for the periods indicated. These amounts do not correspond to expenses under U.S. GAAP. In managing this business, we analyze the cash value of surrenders because it is a measure of the degree to which policyholders are maintaining their in force business with us, a driver of future profitability. Generally, our term life insurance products do not provide for cash surrender values.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Cash value of surrenders	\$ 173	\$ 188	\$ 665	\$ 562
Cash value of surrenders as a percentage of mean future benefit reserves, policyholders' account balances, and separate account balances	3.4%	3.5%	4.4%	3.4%

2009 to 2008 Three Month Comparison. The total cash value of surrenders decreased \$15 million, from \$188 million in the third quarter of 2008 to \$173 million in the third quarter of 2009, reflecting a lower volume of variable life insurance surrenders compared to the prior year quarter, primarily due to more favorable market conditions that began in the second quarter of 2009. The level of surrenders as a percentage of mean future policy benefit reserves, policyholders' account balances and separate account balances decreased from 3.5% in the third quarter of 2008 to 3.4% in the third quarter of 2009.

2009 to 2008 Nine Month Comparison. The total cash value of surrenders increased \$103 million, from \$562 million in the first nine months of 2008 to \$665 million in the first nine months of 2009, reflecting a greater volume of surrenders, including lapses to extended term, of variable life insurance in 2009 compared to the prior year, due primarily to market conditions and policyholders electing to surrender their policies rather than make premium payments or the contractually required deposits needed to keep the policies in force. The level of surrenders as a percentage of mean future policy benefit reserves, policyholders' account balances and separate account balances increased from 3.4% in the first nine months of 2008 to 4.4% in the first nine months of 2009.

*Group Insurance**Operating Results*

The following table sets forth the Group Insurance segment's operating results for the periods indicated.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Operating results:				
Revenues	\$ 1,356	\$ 1,232	\$ 3,992	\$ 3,707
Benefits and expenses	1,292	1,131	3,730	3,436
Adjusted operating income	64	101	262	271
Realized investment gains (losses), net, and related adjustments(1)	(8)	(46)	(193)	(249)
Related charges(2)	(2)		(6)	
Income from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ 54	\$ 55	\$ 63	\$ 22

Table of Contents

- (1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Benefits and expenses exclude related charges which represent the unfavorable (favorable) impact of Realized investment gains (losses), net, on interest credited to policyholders' account balances.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income decreased \$37 million, from \$101 million in the third quarter of 2008 to \$64 million in the third quarter of 2009. The prior year quarter reflects a net benefit of \$13 million, as compared to a net benefit of zero in the current year quarter, from refinements in group disability reserves as a result of annual reviews. Also contributing to the decrease in adjusted operating income were lower underwriting results in both our group disability and group life businesses due to less favorable claims experience.

2009 to 2008 Nine Month Comparison. Adjusted operating income decreased \$9 million, from \$271 million in the first nine months of 2008 to \$262 million in the first nine months of 2009. Results for the first nine months of 2008 include a \$20 million benefit from a premium adjustment for updated data on a large group life insurance case and a \$13 million benefit from refinements in group disability reserves as a result of annual reviews. Excluding the prior year benefits from the premium adjustment and annual reserve refinements, adjusted operating income increased \$24 million due to improved underwriting results during the first nine months of 2009 in both our group life and group disability businesses primarily related to business growth, which was partially offset by a related increase in operating expenses.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, increased \$124 million, from \$1.232 billion in the third quarter of 2008 to \$1.356 billion in the third quarter of 2009. Group life premiums and policy charges and fee income increased by \$84 million, from \$789 million in the third quarter of 2008 to \$873 million in the third quarter of 2009, primarily reflecting growth of business in force resulting from new sales and continued strong persistency. Also contributing to this increase were higher premiums from retrospectively experience-rated group life business resulting from the increase in policyholder benefits on these contracts as discussed below. Group disability premiums and policy charges and fee income, which include long-term care products, increased by \$32 million from \$259 million in the third quarter of 2008 to \$291 million in the third quarter of 2009, primarily reflecting growth in business in force resulting from new sales and continued strong persistency.

2009 to 2008 Nine Month Comparison. Revenues increased \$285 million, from \$3.707 billion in the first nine months of 2008 to \$3.992 billion in the first nine months of 2009. Group life premiums and policy charges and fee income increased by \$187 million, from \$2.392 billion in the first nine months of 2008 to \$2.579 billion in the first nine months of 2009. This increase primarily reflects growth of business in force resulting from new sales, and continued strong persistency of 94.7% in the first nine months of 2009 compared to 93.6% in the first nine months of 2008. Also contributing to this increase were higher premiums from retrospectively experience-rated group life business resulting from the increase in policyholder benefits on these contracts as discussed below. Partially offsetting the increase in group life premium is the premium adjustment recorded during the first nine months of 2008 as discussed above. Group disability premiums and policy charges and fee income, which include long-term care products, increased by \$88 million, from \$764 million in the first nine months of 2008 to \$852 million in the first nine months of 2009. This increase primarily reflects growth of business in force resulting from new sales, and continued strong persistency of 92.3% in the first nine months of 2009 compared to 86.7% in the first nine months of 2008.

Table of Contents*Benefits and Expenses*

The following table sets forth the Group Insurance segment's benefits and administrative operating expense ratios for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Benefits ratio(1):				
Group life	89.8%	88.1%	88.4%	88.2%
Group disability	93.5	81.5	88.5	86.4
Administrative operating expense ratio(2):				
Group life	9.1	9.4	8.9	8.6
Group disability	17.5	19.3	17.8	19.5

(1) Ratio of policyholder benefits to earned premiums, policy charges and fee income. Group disability ratios include long-term care products.

(2) Ratio of administrative operating expenses (excluding commissions) to gross premiums, policy charges and fee income. Group disability ratios include long-term care products.

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, increased \$161 million, from \$1.131 billion in the third quarter of 2008 to \$1.292 billion in the third quarter of 2009. This increase reflects a \$151 million increase in policyholders' benefits, including the change in policy reserves, from \$906 million in the third quarter of 2008 to \$1.057 billion in the third quarter of 2009, reflecting growth of business in force and less favorable claims experience in both our group life and group disability businesses, including greater benefits on retrospectively experience-rated group life business that resulted in increased premiums as discussed above. Also contributing to the increase in benefits and expenses were higher operating expenses primarily related to business growth, as well as the impact on reserves as a result of the annual reviews.

The group life benefits ratio deteriorated 1.7 percentage points from the third quarter of 2008 to the third quarter of 2009, due to less favorable mortality experience. The group disability benefits ratio deteriorated 12.0 percentage points from the third quarter of 2008 to the third quarter of 2009, due to less favorable claims experience combined with the impact of the annual reserve refinements as a result of annual reviews. Excluding the impact of the annual reserve refinements, the group disability benefits ratio deteriorated approximately 6.6 percentage points. The group life administrative operating expense ratio was relatively unchanged from the third quarter of 2008 to the third quarter of 2009. The group disability administrative operating expense ratio improved from the third quarter of 2008 to the third quarter of 2009, as growth in the business outpaced the related increase in operating expenses.

2009 to 2008 Nine Month Comparison. Benefits and expenses increased \$294 million, from \$3.436 billion in the first nine months of 2008 to \$3.730 billion in the first nine months of 2009. This increase reflects a \$263 million increase in policyholders' benefits, including the change in policy reserves, from \$2.770 billion in the first nine months of 2008 to \$3.033 billion in the first nine months of 2009, primarily due to growth of business in force and greater benefits on retrospectively experience-rated group life business that resulted in increased premiums as discussed above. Also contributing to the increase in benefits and expenses were higher operating expenses primarily related to business growth.

The group life benefits ratio was relatively unchanged from the first nine months of 2008 to the first nine months of 2009. Excluding the impact of the premium adjustment discussed above, the group life benefits ratio improved approximately 0.5 percentage points due to more favorable mortality experience. The group disability benefits ratio deteriorated 2.1 percentage points from the first nine months of 2008 to the first nine months of 2009, due to less favorable claims experience combined with the impact of annual reserve refinements as a result

Table of Contents

of annual reviews. Excluding the impact of the annual reserve refinements, the group disability benefits ratio deteriorated approximately 0.7 percentage points. The group life administrative operating expense ratio was relatively unchanged from the first nine months of 2008 to the first nine months of 2009. The group disability administrative operating expense ratio improved from the first nine months of 2008 to the first nine months of 2009, as growth in the business outpaced the related increase in operating expenses.

Sales Results

The following table sets forth the Group Insurance segment's annualized new business premiums for the periods indicated. In managing our group insurance business, we analyze annualized new business premiums, which do not correspond to revenues under U.S. GAAP, because annualized new business premiums measure the current sales performance of the business unit, while revenues primarily reflect the renewal persistency and aging of in force policies written in prior years and net investment income, in addition to current sales.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Annualized new business premiums(1):				
Group life	\$ 53	\$ 70	\$ 298	\$ 212
Group disability(2)	57	47	217	178
Total	\$ 110	\$ 117	\$ 515	\$ 390

(1) Amounts exclude new premiums resulting from rate changes on existing policies, from additional coverage under our Servicemembers' Group Life Insurance contract and from excess premiums on group universal life insurance that build cash value but do not purchase face amounts, and include premiums from the takeover of claim liabilities.

(2) Includes long-term care products.

2009 to 2008 Three Month Comparison. Total annualized new business premiums decreased \$7 million, from \$117 million in the third quarter of 2008 to \$110 million in the third quarter of 2009. Group life sales decreased \$17 million due to lower large case sales to both new and existing customers. Group disability sales increased \$10 million due to increased sales to existing customers.

2009 to 2008 Nine Month Comparison. Total annualized new business premiums increased \$125 million, from \$390 million in the first nine months of 2008 to \$515 million in the first nine months of 2009. Group life sales increased \$86 million driven primarily by increased large case sales to both new and existing customers during the first nine months of 2009. Group disability sales increased \$39 million primarily due to increased sales to new and existing customers, partially offset by lower premiums associated with the assumption of existing liabilities from third parties during the first nine months of 2009.

International Insurance and Investments Division*Impact of foreign currency exchange rate movements on earnings*

As a U.S.-based company with significant business operations outside the U.S., we seek to mitigate the risk that future unfavorable foreign currency exchange rate movements will reduce our U.S. dollar equivalent earnings. The operations of our International Insurance and International Investments segments are subject to currency fluctuations that can materially affect their U.S. dollar earnings from period to period even if earnings on a local currency basis are relatively constant. As discussed further below, we enter into forward currency derivative contracts, as well as dual currency and synthetic dual currency investments, as part of our strategy to effectively fix the currency exchange rates for a portion of our prospective non-U.S. dollar denominated earnings streams, thereby reducing earnings volatility from unfavorable and favorable foreign currency exchange rate movements.

Table of Contents*Forward currency hedging program*

The financial results of our International Insurance segment and International Investments segment, excluding the global commodities group, for all periods presented reflect the impact of an intercompany arrangement with Corporate and Other operations pursuant to which the segments non-U.S. dollar denominated earnings in all countries are translated at fixed currency exchange rates. The fixed rates are determined in connection with a currency income hedging program designed to mitigate the risk that unfavorable exchange rate changes will reduce the segments U.S. dollar equivalent earnings. Pursuant to this program, Corporate and Other operations executes forward currency contracts with third parties to sell the net exposure of projected earnings from the hedged currency in exchange for U.S. dollars at specified exchange rates. The maturities of these contracts correspond with the future periods in which the identified non-U.S. dollar denominated earnings are expected to be generated. This program is primarily associated with the International Insurance segment's businesses in Japan, Korea and Taiwan and the International Investments segment's businesses in Korea and Europe. The intercompany arrangement with Corporate and Other operations increased (decreased) revenues and adjusted operating income of each segment as follows for the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Impact on revenues and adjusted operating income:				
International Insurance	\$ (19)	\$ 8	\$ (23)	\$ 9
International Investments	1	(1)	5	
Total International Insurance and Investments Division	\$ (18)	\$ 7	\$ (18)	\$ 9

Results of Corporate and Other operations include any differences between the translation adjustments recorded by the segments and the gains or losses recorded from the forward currency contracts that settled during the period, which includes the impact of any over or under hedge of actual earnings as a result of projected earnings differing from actual earnings. The net impact of this program recorded within the Corporate and Other operations were gains of \$13 million and \$5 million for the three months ended September 30, 2009 and 2008, respectively, and gains of \$26 million and \$7 million for the nine months ended September 30, 2009 and 2008, respectively.

The notional amount of these forward currency contracts was \$2.5 billion and \$2.8 billion as of September 30, 2009 and December 31, 2008, respectively, of which \$1.8 billion as of both September 30, 2009 and December 31, 2008 related to our Japanese insurance operations.

Dual currency and synthetic dual currency investments

In addition, our Japanese insurance operations also hold dual currency investments in the form of fixed maturities and loans. The principal of these dual currency investments are yen-denominated while the related interest income is U.S. dollar denominated. These investments are the economic equivalent of exchanging what would otherwise be fixed streams of yen-denominated interest income for fixed streams of U.S. dollars interest income. Our Japanese insurance operations also hold investments in yen-denominated investments that have been coupled with cross-currency coupon swap agreements, creating synthetic dual currency investments. The yen/U.S. dollar exchange rate is effectively fixed, as we are obligated in future periods to exchange fixed amounts of Japanese yen interest payments generated by the yen-denominated investments for U.S. dollars at the yen/U.S. dollar exchange rates specified by the cross-currency coupon swap agreements. As of September 30, 2009, the notional amount of these investments was ¥428 billion, or \$3.8 billion, as compared to ¥500 billion, or \$4.4 billion as of December 31, 2008, based upon the foreign currency exchange rates applicable at the time these investments were acquired. The weighted average yields generated by these investments were 2.3% and 2.5% for the three and nine months ended September 30, 2009, respectively, and 2.3% for both the three and nine months ended September 30, 2008.

Table of Contents

Presented below is the fair value of these instruments as reflected on our balance sheet for the periods presented.

	September 30, 2009	December 31, 2008
	(in millions)	
Cross-currency coupon swap agreements	\$ (43)	\$ 12
Foreign exchange component of interest on dual currency investments	(87)	(82)
Total	\$ (130)	\$ (70)

The table below presents as of September 30, 2009, the yen-denominated earnings subject to our dual currency and synthetic dual currency investments and the related weighted average exchange rates resulting from these investments.

Year	Interest component of dual currency investments (1)	Cross-currency coupon swap element of synthetic dual currency investments (in billions)	Yen-denominated earnings subject to these investments	Weighted average exchange rate per U.S. Dollar (Yen per \$)
Remainder of 2009	¥ 0.9	¥ 1.5	¥ 2.4	88.9
2010	3.6	5.0	8.6	88.2
2011	3.4	3.9	7.3	85.3
2012	3.1	2.9	6.0	83.0
2013-2034	33.3	53.5	86.8	79.3
Total	¥ 44.3	¥ 66.8	¥ 111.1	80.7

(1) Yen amounts are imputed from the contractual U.S. dollar denominated interest cash flows.

The present value of the earnings reflected in the table above, on a U.S. dollar denominated basis, is \$0.9 billion as of September 30, 2009. The table above does not reflect the forward currency income hedging program discussed above. In establishing the level of yen-denominated earnings that will be hedged through the forward currency income hedging program we take into account the anticipated level of U.S. dollar denominated earnings that will be generated by dual currency and synthetic dual currency investments, as well as the anticipated level of U.S. dollar denominated earnings that will be generated by U.S. dollar denominated products and investments, which are discussed in greater detail below.

Impact of foreign currency exchange rate movements on equity*Hedges of U.S. GAAP equity and available economic capital*

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

We also seek to mitigate the risk that future unfavorable foreign currency exchange rate movements will reduce our U.S. dollar equivalent equity in foreign subsidiaries through various hedging strategies. We are in the process of developing an economic capital framework, which includes available economic capital, as discussed in [Liquidity and Capital Resources](#) [Prudential Financial Economic Capital](#), and as we further develop this framework, or as other events occur, we may alter this strategy. Available economic capital represents the excess of the fair value of assets over the fair value of liabilities for the current in force block of business. In our Japanese insurance operations, we currently seek to hedge a portion of estimated available economic capital and other measures of value, including the amount attributable to the U.S. GAAP equity of our Japanese insurance operations, which totaled \$5.5 billion as of September 30, 2009 excluding [Accumulated other comprehensive income](#) components of equity and certain other adjustments. We hedge the estimated available economic capital in our Japanese insurance operations through a variety of instruments, including U.S. dollar denominated assets. These assets are financed with yen-denominated liabilities and equity held in our Japanese insurance operations. In addition, we may also hedge estimated available economic capital using instruments held in our U.S.

Table of Contents

domiciled entities, such as U.S. dollar denominated debt that has been swapped to yen. In certain of our other foreign insurance operations, the U.S. GAAP equity exposure is mitigated by entering into forward currency contracts that generally qualify for hedge accounting treatment, and by holding U.S. dollar denominated investments. During the second quarter of 2009, we terminated our hedges of the U.S. GAAP equity exposure of our Korean operations due to a variety of considerations, including a desire to limit the potential for cash settlement outflows that would result from a strengthening Korean won.

As of September 30, 2009, the aggregate amount of the instruments serving as hedges of our estimated available economic capital in our Japanese insurance operations amounted to \$7.0 billion, a decrease of \$0.8 billion from the \$7.8 billion hedged as of December 31, 2008. These instruments were principally comprised of available for sale U.S. dollar denominated investments with an amortized cost of \$5.4 billion and held to maturity U.S. dollar denominated investments with an amortized cost of \$0.7 billion held in our Japanese insurance operations, as well as \$0.8 billion of net yen-denominated liabilities held in our U.S. domiciled entities, including a portion that has been converted to yen using swaps. The effects of the yen-denominated liabilities are reported in Corporate & Other operations. These amounts do not reflect the forward currency income hedging program or dual currency and synthetic dual currency investments discussed above, which when added to the \$7.0 billion of instruments serving as an equity hedge of our estimated available economic capital, results in a total estimated available economic capital hedge of approximately \$9.7 billion as of September 30, 2009.

Available for sale investments under U.S. GAAP are carried at fair value with unrealized changes in fair value (except as described below for impairments), including those from foreign currency exchange rate movements, recorded as unrealized gains or losses in Accumulated other comprehensive income within Equity. Changes in the U.S. GAAP equity of our Japanese insurance operations due to foreign currency exchange rate movements are also recorded in Accumulated other comprehensive income as Foreign currency translation adjustments, and can serve as an offset to the unrealized changes in the fair value of the available for sale investments. For the portion of available for sale investments that support our Japanese insurance operations U.S. GAAP equity this offset creates a natural equity hedge. For those U.S. dollar denominated investments, including available for sale investments, that support the portion of estimated available economic capital above our U.S. GAAP equity there is no offsetting impact to equity. In addition, the impact of foreign currency exchange rate movements on the U.S. GAAP equity of our Japanese insurance operations is partially offset by foreign currency exchange related changes in designated Yen-denominated debt and other hedging instruments within Foreign currency translation adjustments.

The investments designated as held to maturity under U.S. GAAP are recorded at amortized cost on the balance sheet, but are remeasured for foreign currency exchange rate movements, with the related change in value recorded within Asset management fees and other income. The remeasurement related to the change in value for foreign currency exchange rate movements for these investments is excluded from adjusted operating income, as part of our application of the hedge of available economic capital.

The U.S. dollar denominated investments that hedge a portion of our estimated available economic capital in our Japanese insurance operations pay a coupon, which is reflected within Net investment income, and, therefore, included in adjusted operating income, which is approximately 200 to 300 basis points greater than what a similar yen-based investment would pay. The incremental impact of this higher yield will vary over time, and is dependent on the duration of the underlying investment, as well as interest rate environments in the U.S. and Japan at the time of the investment. See Realized Investment Gains and Losses and General Account Investments General Account Investments Investment Results for a discussion of the investment yields generated by our Japanese insurance operations.

Because these U.S. dollar denominated investments are recorded on the books of yen-based entities, foreign currency exchange movements will impact their value. To the extent the value of the yen strengthens as compared to the U.S. dollar, the value of these U.S. dollar denominated investments will decrease as a result of changes in the foreign currency exchange rates. Upon the ultimate sale or maturity of the U.S. dollar

Table of Contents

denominated investments, any realized change in value related to changes in the foreign currency exchange rates will be included in Realized gains (losses), net within the income statement and, excluded from adjusted operating income. Similarly, other-than-temporary impairments on these investments may include the impact of changes in foreign currency exchange rates, which in certain circumstances will be included in Realized gains (losses), net within the income statement, and, as such, excluded from adjusted operating income. See Realized Investment Gains and Losses and General Account Investments General Account Investments Fixed Maturity Securities Other-than-Temporary Impairments of Fixed Maturity Securities for a discussion of our policies regarding impairments.

We also incorporate the impact of foreign currency exchange rate movements on the remaining U.S. dollar denominated net asset position of our Japanese insurance operations, which primarily relates to accrued investment income, as part of our overall application of the hedge of available economic capital. These U.S. dollar denominated assets and liabilities are remeasured for foreign currency exchange rate movements, as they are non-yen denominated items on the books of yen-based entities, and the related change in value is recorded within Asset management fees and other income. As these U.S. dollar denominated assets and liabilities are included in the determination of the Japanese insurance operations level of available economic capital, we exclude all remeasurement related to these items from adjusted operating income.

In addition, as of September 30, 2009 and December 31, 2008, our international insurance operations had \$7.3 billion and \$6.2 billion, respectively, of foreign currency exposure from U.S. dollar liabilities for U.S. dollar denominated products issued by these operations. A portion of these liabilities are coinsured to our U.S. domiciled insurance operations and supported by U.S. dollar denominated assets. For the U.S. dollar liabilities retained in Japan, our Japanese operations hold U.S. dollar denominated investments, including a significant portion that are designated as available for sale, and other related U.S. dollar denominated net assets, primarily accrued investment income, to support these products. The change in value due to changes in foreign currency exchange rate movements, or remeasurement, of the related U.S. dollar denominated assets and liabilities associated with these products is excluded from adjusted operating income.

International Insurance

The results of our International Insurance operations are translated on the basis of weighted average monthly exchange rates, inclusive of the effects of the intercompany arrangement discussed above. To provide a better understanding of operating performance within the International Insurance segment, where indicated below, we have analyzed our results of operations excluding the effect of the year over year change in foreign currency exchange rates. Our results of operations excluding the effect of foreign currency fluctuations were derived by translating foreign currencies to U.S. dollars at uniform exchange rates for all periods presented, including, for constant dollar information discussed below. The exchange rates used for 2009 and 2008 were Japanese yen at a rate of 106 yen per U.S. dollar and Korean won at a rate of 950 won per U.S. dollar. In addition, for constant dollar information discussed below, activity denominated in U.S. dollars is reported based on the amounts as transacted in U.S. dollars. Annualized new business premiums presented on a constant exchange rate basis in the Sales Results section below reflect translation based on these same uniform exchange rates.

Table of Contents*Operating Results*

The following table sets forth the International Insurance segment's operating results for the periods indicated.

	Three Months		Nine Months	
	Ended September 30, 2009	2008	Ended September 30, 2009	2008
	(in millions)			
Operating results:

- (1) Revenues exclude Realized investment gains (losses), net, and related charges and adjustments. The related charges represent payments related to the market value adjustment features of certain of our annuity products and the impact of Realized investment gains (losses), net, on the amortization of unearned revenue reserves. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Benefits and expenses exclude related charges that represent the element of Dividends to policyholders that is based on a portion of certain realized investment gains required to be paid to policyholders and the impact of Realized investment gains (losses), net, on the amortization of deferred policy acquisition costs.
- (3) Revenues exclude net investment gains and losses on trading account assets supporting insurance liabilities. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.
- (4) Benefits and expenses exclude changes in contractholder liabilities due to asset value changes in the pool of investments supporting these experience-rated contracts. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.
- (5) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis on an after-tax basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

Table of Contents

On May 1, 2009, our Gibraltar Life operations acquired Yamato Life, a Japanese life insurance company that declared bankruptcy in October 2008. Gibraltar Life served as the reorganization sponsor for Yamato and under the reorganization agreement acquired Yamato by contributing \$72 million of capital to Yamato. Concurrent with our acquisition, substantially all of Yamato's insurance liabilities were restructured under a plan of reorganization to include special surrender penalties on existing policies. These surrender charges are 20% in the first year and will decline by 2% each year thereafter. Subsequent to the acquisition, we renamed the acquired company The Prudential Financial of Japan Life Insurance Company Ltd.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income from Life Planner operations increased \$17 million, from \$293 million in the third quarter of 2008 to \$310 million in the third quarter of 2009, with no impact from currency fluctuations. The increase in adjusted operating income primarily reflects the continued growth of our Japanese Life Planner operation, as well as more favorable mortality. Partially offsetting these increases was the lower benefit in the current quarter from a reduction in amortization of deferred policy acquisition costs primarily reflecting improved future mortality assumptions, which benefited both periods, associated with our annual review of the estimated gross profits used to amortize deferred policy acquisition costs.

Gibraltar Life's adjusted operating income increased \$23 million, from \$167 million in the third quarter of 2008 to \$190 million in the third quarter of 2009, with no impact from currency fluctuations. The increase in adjusted operating income reflects \$25 million of earnings in the third quarter of 2009 from the acquired former business of Yamato Life. The earnings from Yamato include approximately \$15 million largely related to initial surrenders of policies following the restructuring of the business, essentially consistent with our overall expectations. Also impacting adjusted operating income was a decline in investment income margins reflecting actions taken to reduce equity exposure, which was partially offset by the continued growth of our multi-currency denominated fixed annuity products.

2009 to 2008 Nine Month Comparison. Adjusted operating income from Life Planner operations increased \$55 million, from \$864 million in the first nine months of 2008 to \$919 million in the first nine months of 2009, including a \$4 million net unfavorable impact of currency fluctuations. This increase in adjusted operating income primarily reflects the continued growth of our Japanese Life Planner operation, as well as improved investment income margins. The improved investment income margins primarily reflect higher investment yields and investment portfolio growth. In addition, adjusted operating income benefited by \$25 million in the first nine months of 2009 due to the continuing migration to a new policy valuation system that resulted in favorable refinements that mostly benefited our Japanese Life Planner operations in the current period. We anticipate completing this initiative in 2010. Partially offsetting these items was higher general and administrative expenses and increased amortization of deferred policy acquisition costs reflecting slightly less favorable persistency and unfavorable market conditions.

Gibraltar Life's adjusted operating income increased \$9 million, from \$462 million in the first nine months of 2008 to \$471 million in the first nine months of 2009, with no impact from currency fluctuations. The increase in adjusted operating income reflects \$25 million of earnings in the third quarter of 2009 from the acquired former business of Yamato Life, as discussed above. Also benefiting adjusted operating income was more favorable mortality experience than that of the prior year period and higher earnings from growth in our multi-currency denominated fixed annuity. Offsetting these items is a decline in expense and other margins, which reflects higher general and administrative expenses, as well as a detriment of \$7 million in the first nine months of 2009 due to the migration to a new policy valuation system that resulted in unfavorable refinements in the current period.

Table of Contents*Revenues*

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, increased \$442 million, from \$2.226 billion in the third quarter of 2008 to \$2.668 billion in the third quarter of 2009, including a net favorable impact of \$145 million relating to currency fluctuations. Excluding the impact of currency fluctuations, revenues increased \$297 million, from \$2.278 billion in the third quarter of 2008 to \$2.575 billion in the third quarter of 2009.

Revenues from our Life Planner operations increased \$134 million, from \$1.462 billion in the third quarter of 2008 to \$1.596 billion in the third quarter of 2009, including a net favorable impact of currency fluctuations of \$48 million. Excluding the impact of currency fluctuations, revenues increased \$86 million from the third quarter of 2008 to the third quarter of 2009. This increase in revenues came primarily from increases in premiums and policy charges and fee income of \$51 million, from \$1.230 billion in the third quarter of 2008 to \$1.281 billion in the third quarter of 2009. Premiums and policy charges and fee income from our Japanese Life Planner operation increased \$44 million, from \$850 million in the third quarter of 2008 to \$894 million in the third quarter of 2009, primarily reflecting growth of business in force from new sales and continued strong persistency. Net investment income also increased \$27 million, from \$252 million in the third quarter of 2008 to \$279 million in the third quarter of 2009, primarily due to investment portfolio growth.

Revenues from Gibraltar Life increased \$308 million, from \$764 million in the third quarter of 2008 to \$1.072 billion in the third quarter of 2009, including a favorable impact from currency fluctuations of \$97 million. Excluding the impact of currency fluctuations, revenues for Gibraltar Life increased \$211 million from the third quarter of 2008 to the third quarter of 2009. This increase reflects a \$199 million increase in premiums, from \$505 million in the third quarter of 2008 to \$704 million in the third quarter of 2009, as premiums benefited \$102 million from additional face amounts of insurance issued pursuant to the final payment under a special dividend arrangement established as part of Gibraltar Life's reorganization in 2001 for which the third quarter of 2008 includes no such benefit. Substantially all of the premiums recognized pursuant to the special dividend arrangement were offset by a corresponding charge to increase reserves for the affected policies. Also reflected in premiums is \$54 million of renewal premiums from the acquisition of Yamato, as well as higher sales of single premium whole life during the third quarter of 2009.

2009 to 2008 Nine Month Comparison. Revenues increased \$858 million, from \$6.880 billion in the first nine months of 2008 to \$7.738 billion in the first nine months of 2009, including a net favorable impact of \$235 million relating to currency fluctuations. Excluding the impact of currency fluctuations, revenues increased \$623 million, from \$6.927 billion in the first nine months of 2008 to \$7.550 billion in the first nine months of 2009.

Revenues from our Life Planner operations increased \$249 million, from \$4.528 billion in the first nine months of 2008 to \$4.777 billion in the first nine months of 2009, including a net unfavorable impact of currency fluctuations of \$28 million. Excluding the impact of currency fluctuations, revenues increased \$277 million from the first nine months of 2008 to the first nine months of 2009. This increase in revenues came primarily from increases in premiums and policy charges and fee income of \$176 million, from \$3.773 billion in the first nine months of 2008 to \$3.949 billion in the first nine months of 2009. Premiums and policy charges and fee income from our Japanese Life Planner operation increased \$151 million, from \$2.644 billion in the first nine months of 2008 to \$2.795 billion in the first nine months of 2009, primarily reflecting growth of business in force from new sales and continued strong persistency. Net investment income also increased \$88 million, from \$715 million in the first nine months of 2008 to \$803 million in the first nine months of 2009, primarily due to higher investment yields and investment portfolio growth.

Revenues from Gibraltar Life increased \$609 million, from \$2.352 billion in the first nine months of 2008 to \$2.961 billion in the first nine months of 2009, including a favorable impact from currency fluctuations of \$263 million. Excluding the impact of currency fluctuations, revenues for Gibraltar Life increased \$346 million from the first nine months of 2008 to the first nine months of 2009. This increase reflects a

\$301 million increase in

Table of Contents

premiums, from \$1.587 billion in first nine months of 2008 to \$1.888 billion in the first nine months of 2009, as premiums benefited \$102 million from additional face amounts of insurance issued under a special dividend arrangement as discussed above for which the first nine months of 2008 includes no such benefit. Substantially all of the premiums recognized pursuant to the special dividend arrangement were offset by a corresponding charge to increase reserves for the affected policies. Also reflected in premiums is \$54 million of renewal premiums from the acquisition of Yamato, as well as higher sales of single premium whole life during the first nine months of 2009.

Due to the long-term nature of many of the products we sell in Japan, we have historically sought to add duration exposure to our Japanese investment portfolio by employing various strategies, including investing in longer-term securities or, by entering into long-duration floating-to-fixed interest rate swaps. These strategies better support the characteristics of our long-dated product liabilities, and have resulted in higher portfolio yields. Based on an evaluation of market conditions at the time, beginning in the fourth quarter of 2008 and continuing into the first quarter of 2009, we terminated or offset many of these interest rate swaps in consideration of, among other things, the interest rate environment. The resulting realized investment gains from terminating or offsetting these interest rate swaps will be recognized in adjusted operating income over periods that generally approximate the expected terms of the derivatives. For the three months ended September 30, 2009 and 2008 we recognized gains of \$8 million and losses of \$6 million, respectively, and for the nine months ended September 30, 2009 and 2008 we recognized gains of \$22 million and losses of \$14 million, respectively, in adjusted operating income related to these realized investment gains (losses). As of September 30, 2009, \$758 million of deferred gains remain to be recognized in adjusted operating income over a weighted average period of 32 years. We continue to manage the interest rate risk profile of our businesses in the context of market conditions and relative opportunities, and we expect to resume implementing strategies to lengthen the duration of our Japanese investment portfolio as our assessment of market conditions changes. As we do so, the impact to our portfolio yields upon the resumption of these strategies will depend on the then current interest rate environment.

Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, increased \$402 million, from \$1.766 billion in the third quarter of 2008 to \$2.168 billion in the third quarter of 2009, including a net unfavorable impact of \$145 million related to currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$257 million, from \$1.808 billion in the third quarter of 2008 to \$2.065 billion in the third quarter of 2009.

Benefits and expenses of our Life Planner operations increased \$117 million, from \$1.169 billion in the third quarter of 2008 to \$1.286 billion in the third quarter of 2009, including a net unfavorable impact of \$48 million from currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$69 million from the third quarter of 2008 to the third quarter of 2009. Benefits and expenses of our Japanese Life Planner operation increased \$55 million from \$779 million in the third quarter of 2008 to \$834 million in the third quarter of 2009, primarily reflecting an increase in policyholder benefits, including changes in reserves, which was driven by the growth in business in force. The increase in policyholder benefits was partially offset by more favorable mortality.

Gibraltar Life's benefits and expenses increased \$285 million, from \$597 million in the third quarter of 2008 to \$882 million in the third quarter of 2009, including a net unfavorable impact of currency fluctuations of \$97 million. Excluding the impact of currency fluctuations, benefits and expenses increased \$188 million from the third quarter of 2008 to the third quarter of 2009. This increase primarily reflects an increase in policyholder benefits, including changes in reserves, of \$157 million reflecting the effects of the special dividend arrangement discussed above, the acquisition of Yamato and higher single premium whole life sales in the current quarter.

Table of Contents

2009 to 2008 Nine Month Comparison. Benefits and expenses increased \$794 million, from \$5.554 billion in the first nine months of 2008 to \$6.348 billion in the first nine months of 2009, including a net unfavorable impact of \$239 million related to currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$555 million, from \$5.571 billion in the first nine months of 2008 to \$6.126 billion in the first nine months of 2009.

Benefits and expenses of our Life Planner operations increased \$194 million, from \$3.664 billion in the first nine months of 2008 to \$3.858 billion in the first nine months of 2009, including a net favorable impact of \$24 million from currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$218 million from the first nine months of 2008 to the first nine months of 2009. Benefits and expenses of our Japanese Life Planner operation increased \$172 million from \$2.443 billion in the first nine months of 2008 to \$2.615 billion in the first nine months of 2009, primarily reflecting an increase in policyholder benefits, including changes in reserves, which was driven by the growth in business in force. Also contributing to the increase in benefits and expenses was higher general and administrative expenses and increased amortization of deferred policy acquisition costs reflecting slightly less favorable persistency and unfavorable market conditions. Reflected in the higher general and administrative expenses is \$10 million of expenses recorded in the first nine months of 2009 for the Life Planner operations related to an on-going initiative in Japan to enhance our information processes and technology systems in order to improve efficiency and lower costs.

Gibraltar Life's benefits and expenses increased \$600 million, from \$1.890 billion in the first nine months of 2008 to \$2.490 billion in the first nine months of 2009, including an unfavorable impact of currency fluctuations of \$263 million. Excluding the impact of currency fluctuations, benefits and expenses increased \$337 million from the first nine months of 2008 to the first nine months of 2009. This increase reflects an increase in policyholder benefits, including changes in reserves, of \$234 million reflecting the effects of the special dividend arrangement discussed above, higher single premium whole life sales in the first nine months of 2009, and the acquisition of Yamato, partially offset by more favorable mortality experience than that of the prior year period. Also contributing to this increase is higher amortization of deferred policy acquisition costs related to the continued growth of our U.S. dollar denominated fixed annuity product and the increase in single premium whole life sales, as well as higher general and administrative expenses.

We currently estimate that we will incur approximately \$35 million of non-capitalizable costs during the fourth quarter of 2009 and the first half of 2010 related to our on-going initiative in Japan to enhance our information processes and technology systems, as discussed above, with the vast majority of these expenditures to be recognized in our Gibraltar Life operations.

Table of Contents*Sales Results*

In managing our international insurance business, we analyze revenues, as well as annualized new business premiums, which do not correspond to revenues under U.S. GAAP. Annualized new business premiums measure the current sales performance of the segment, while revenues primarily reflect the renewal persistency of policies written in prior years and net investment income, in addition to current sales. Annualized new business premiums include 10% of first year premiums or deposits from single pay products. Annualized new business premiums on an actual and constant exchange rate basis are as follows for the periods indicated.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
	(in millions)			
Annualized new business premiums:				
On an actual exchange rate basis:				
Life Planner operations	\$ 212	\$ 175	\$ 613	\$ 598
Gibraltar Life	149	111	409	353
Total	\$ 361	\$ 286	\$ 1,022	\$ 951
On a constant exchange rate basis:				
Life Planner operations	\$ 205	\$ 178	\$ 613	\$ 599
Gibraltar Life	140	112	384	355
Total	\$ 345	\$ 290	\$ 997	\$ 954

2009 to 2008 Three Month Comparison. On a constant exchange rate basis, annualized new business premiums increased \$55 million, from \$290 million in the third quarter of 2008 to \$345 million in the third quarter of 2009.

Annualized new business premiums, on a constant exchange rate basis, from our Life Planner operations increased \$27 million, mainly due to higher sales in Korea and Taiwan mostly reflective of the improving economic environment.

Annualized new business premiums, on a constant exchange rate basis, from our Gibraltar Life operation increased \$28 million, primarily due to higher sales of protection products, such as whole life and retirement income products, in our bank distribution channels. Also contributing to the increase were higher sales of our multi-currency denominated fixed annuity products.

2009 to 2008 Nine Month Comparison. On a constant exchange rate basis, annualized new business premiums increased \$43 million, from \$954 million in the first nine months of 2008 to \$997 million in the first nine months of 2009.

Annualized new business premiums, on a constant exchange rate basis, from our Life Planner operations increased \$14 million, due to higher sales in Korea and Taiwan mostly reflective of the improving economic environment.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

The number of Life Planners increased by 237, or 4%, from 6,267 as of September 30, 2008 to 6,504 as of September 30, 2009, driven by increases of 102 in Taiwan, 77 in Korea and 74 in Brazil. During the same period, the number of Life Planners in Japan decreased by 41, reflective of the transfer of 163 Life Planners to Gibraltar over the last twelve months, primarily in support of our efforts to expand our bank channel distribution and to service orphaned policyholders. Factoring in these transfers, the number of Life Planners would have increased 6%, from September 30, 2008 to September 30, 2009. Prior to September 30, 2008, an additional 140 Japanese Life Planners were transferred to Gibraltar.

Table of Contents

Annualized new business premiums, on a constant exchange rate basis, from our Gibraltar Life operation increased \$29 million, primarily due to higher sales of protection products in our bank distribution channels. Also contributing to the increase were higher sales of our multi-currency denominated fixed annuity products.

The number of Life Advisors was relatively unchanged from 6,057 as of September 30, 2008 to 6,060 as of September 30, 2009, as new hires and the 67 Life Planners transferred to Gibraltar over the last twelve months were offset by resignations and terminations due to failure to meet minimum sales production standards. The remaining Life Planners transferred to Gibraltar, as discussed above, are not considered Life Advisors.

Investment Margins and Other Profitability Factors

Many of our insurance products sold in international markets provide for the buildup of cash values for the policyholder at mandated guaranteed interest rates. Authorities in some jurisdictions regulate interest rates guaranteed in our insurance contracts. The regulated guaranteed interest rates do not necessarily match the actual returns on the underlying investments. The spread between the actual investment returns and these guaranteed rates of return to the policyholder is an element of the profit or loss that we will experience on these products. With regulatory approval, guaranteed rates may be changed on new business. While these actions enhance our ability to set rates commensurate with available investment returns, the major sources of profitability on our products, other than those sold by Gibraltar Life, are margins on mortality, morbidity and expense charges rather than investment spreads.

We base premiums and cash values in most countries in which we operate on mandated mortality and morbidity tables. Our mortality and morbidity experience in the International Insurance segment on an overall basis in the first nine months of 2009 and the first nine months of 2008 was well within our pricing assumptions and below the guaranteed levels reflected in the premiums we charge.

*International Investments**Operating Results*

The following table sets forth the International Investments segment's operating results for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Operating results:				
Revenues	\$ 108	\$ 151	\$ 317	\$ 469

Adjusted operating income	13	37	39	88
Realized investment gains (losses), net, and related adjustments(1)	(6)	(1)	(6)	2
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests(2)	(11)	(7)	(30)	(21)

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ (4)	\$ 29	\$ 3	\$ 69
---	--------	-------	------	-------

- (1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis on an after-tax basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

Table of Contents

In 2004, we acquired an 80 percent interest in Hyundai Investment and Securities Co., Ltd., a Korean asset management firm, from an agency of the Korean government. We subsequently renamed the company Prudential Investment & Securities Co., Ltd, or PISC. On January 25, 2008, we acquired the remaining 20 percent for \$90 million and PISC is now a wholly owned operation. On October 4, 2009, we announced that we are exploring our options with regard to our Korean asset management operations, including a possible sale. This announcement does not affect our Korean life insurance operations.

On January 18, 2008, we made an additional investment of \$154 million in our UBI Pramerica operating joint venture in Italy, which we account for under the equity method. This additional investment was necessary to maintain our ownership interest at 35 percent and was a result of the merger of our joint venture partner with another Italian bank, and their subsequent consolidation of the asset management companies into the UBI Pramerica joint venture.

On July 1, 2008, we acquired a 40 percent interest in GAP Asset Management of Brazil, which we account for under the equity method as an operating joint venture.

On May 25, 2009, we entered into an agreement with Mexican financial services group Grupo Actinver SA to sell our mutual fund and banking operations in Mexico. As a result, we have reflected these operations as discontinued operations for all periods presented as of September 30, 2009. This transaction closed on October 6, 2009. This transaction does not include our insurance business, our pension fund business or our real estate investments that are located in Mexico. Income (loss) from discontinued operations reflects \$(1) million and \$1 million for the nine months ended September 30, 2009 and 2008, respectively, related to these operations. Net income from these operations was zero for both the three months ended September 30, 2009 and 2008.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income decreased \$24 million, from \$37 million in the third quarter of 2008 to \$13 million in the third quarter of 2009. This decrease primarily reflects lower results from the segment's global commodities group due to less favorable sales and trading results, as well as a benefit of \$14 million in the prior year quarter due to market value changes on securities relating to exchange memberships. The results of the segment's asset management businesses were relatively unchanged from the third quarter of 2008 to the third quarter of 2009, as higher performance based fees were mostly offset by lower revenues due to the conclusion of the agreement with the Korean government. The adjusted operating income of our Korean asset management operation includes \$5 million in the third quarter of 2008 of fee revenue from the Korean government under an agreement entered into in connection with the acquisition of PISC, related to the provision of asset management and brokerage services, which agreement ended on February 27, 2009.

2009 to 2008 Nine Month Comparison. Adjusted operating income decreased \$49 million, from \$88 million in the first nine months of 2008 to \$39 million in the first nine months of 2009. This decrease reflects lower results from the segment's global commodities group due to less favorable sales and trading results and a lower benefit from market value changes on securities relating to exchange memberships in the first nine months of 2009, partially offset by a \$19 million credit loss related to a brokerage client that was recorded in the first nine months of 2008. Also contributing to the decline in adjusted operating income were lower results from the segment's Korean asset management operations primarily due to a decline in asset based fees and the conclusion of the agreement with the Korean government discussed above. The adjusted operating income of our Korean asset management operation includes fee revenue from the Korean government under the agreement discussed above of \$3 million and \$14 million in the first nine months of 2009 and 2008, respectively.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$43 million, from \$151 million in the third quarter of 2008 to \$108 million in the third quarter of 2009, primarily reflecting lower revenues in the global commodities group.

Table of Contents

2009 to 2008 Nine Month Comparison. Revenues decreased \$152 million, from \$469 million in the first nine months of 2008 to \$317 million in the first nine months of 2009, primarily reflecting lower revenues in the global commodities group and the Korean asset management operation.

Expenses

2009 to 2008 Three Month Comparison. Expenses, as shown in the table above under Operating Results, decreased \$19 million, from \$114 million in the third quarter of 2008 to \$95 million in the third quarter of 2009, primarily reflecting lower expenses corresponding with the lower level of revenues generated by the global commodities group.

2009 to 2008 Nine Month Comparison. Expenses decreased \$103 million, from \$381 million in the first nine months of 2008 to \$278 million in the first nine months of 2009, primarily reflecting lower expenses corresponding with the lower level of revenues generated by the global commodities group and the Korean asset management operation.

Corporate and Other

Corporate and Other includes corporate operations, after allocations to our business segments, and real estate and relocation services.

Corporate operations consist primarily of: (1) investment returns on capital that is not deployed in any business segments; (2) returns from investments not allocated to business segments, including debt-financed investment portfolios, as well as tax credit investments and other tax-enhanced investments financed by business segments; (3) capital debt that is used or will be used to meet the capital requirements of the Company and the related interest expense; (4) income and expense from qualified pension and other employee benefit plans, after allocations to business segments; (5) corporate-level income and expense, after allocations to business segments, including corporate governance, corporate advertising, philanthropic activities and deferred compensation; (6) certain retained obligations relating to policyholders whom we had previously agreed to provide insurance for reduced or no premium in accordance with contractual settlements related to prior individual life insurance sales practices remediation; (7) businesses that we have placed in wind-down status but have not divested; and (8) the impact of transactions with other segments.

Table of Contents

- (1) Includes consolidating adjustments.
- (2) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (3) Revenues exclude net investment gains and losses on trading account assets supporting insurance liabilities. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.
- (4) See Divested Businesses.
- (5) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis on an after-tax basis as a separate line on our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

2009 to 2008 Three Month Comparison. Adjusted operating income decreased \$163 million, from a loss of \$38 million in the third quarter of 2008 to a loss of \$201 million in the third quarter of 2009. Adjusted operating income from corporate operations decreased \$173 million, from a loss of \$34 million in the third quarter of 2008 to a loss of \$207 million in the third quarter of 2009. Investment income, net of interest expense, excluding capital debt interest expense, decreased \$44 million, primarily reflecting lower earnings from the investment of proceeds from our debt issuances and other borrowings, which are invested in cash and short-term investments, as well as lower yields on cash. Higher levels of short-term liquidity have been maintained in 2009 to provide additional capability to address changing cash needs during the current market conditions. Investment income, net of interest expense, excluding capital debt interest expense was also impacted by our repurchase, since December 2008, of substantially all of our convertible senior notes, the proceeds of which had been invested primarily in short-term investments, as well as lower earnings on other invested assets. Capital debt interest expense increased \$26 million due to a greater level of capital debt, which reflects the use of a portion of the proceeds from prior sales of retail medium-term notes for general corporate purposes in 2009. Previously, these proceeds were used to support an asset portfolio within the Retirement segment for which the Company has employed a substitute funding source, as discussed in Liquidity and Capital Resources Financing Activities. Also contributing to the greater loss in adjusted operating income in 2009 are increased losses from other corporate activities, which reflects an increase in our deferred compensation liabilities and other retained corporate expenses. The increased losses were partially offset by a decline in the level of costs related to our retained obligations to certain policyholders with whom we had previously agreed to provide insurance for reduced or no premium in accordance with contractual settlements related to prior individual life sales practice remediation. Both our deferred compensation liabilities and our retained obligations to certain policyholders are impacted by changes in equity and other market levels.

Corporate operations pension income and employee benefits decreased \$3 million. The decrease reflects increased post-retirement benefit costs due to the amortization of prior year losses and lower investment returns due to the lower asset base reflective of market conditions in late 2008 and early 2009, partially offset by an increase in income from our qualified pension plan. Income from our qualified pension plan increased \$4 million, from \$73 million in the third quarter of 2008 to \$77 million in the third quarter of 2009.

Adjusted operating income of our real estate and relocation services business increased \$10 million, from a loss of \$4 million in the third quarter of 2008 to income of \$6 million in the third quarter of 2009. Our real estate and relocation services business continued to experience lower royalty fees and lower relocation revenue from real estate referral fees due to unfavorable residential real estate market conditions. The lower fees and relocation revenues in the third quarter of 2009 are offset by lower loan loss provisions and lower operating expenses. Certain of our clients utilize a fixed fee home sale program under which we assume the benefits and burdens of ownership with respect to a relocating employee's home that is purchased by us, including carrying costs and any loss on sale. As of September 30, 2009, we held in unsold inventory homes with a net value of \$46 million under this program.

Table of Contents

2009 to 2008 Nine Month Comparison. Adjusted operating income decreased \$420 million, from a loss of \$109 million in the first nine months of 2008 to a loss of \$529 million in the first nine months of 2009. Adjusted operating income from corporate operations decreased \$396 million, from a loss of \$79 million in the first nine months of 2008 to a loss of \$475 million in the first nine months of 2009. Investment income, net of interest expense, excluding capital debt interest expense, decreased \$146 million, primarily reflecting lower earnings from the investment of proceeds from our debt issuances, and other borrowings, which are invested in cash and short-term investments, as well as lower yields on cash, as discussed above. Investment income, net of interest expense, excluding capital debt interest expense was also impacted by our repurchase, since December 2008, of substantially all of our convertible senior notes, the proceeds of which had been invested primarily in short-term investments, as well as lower earnings on other invested assets. Capital debt interest expense increased \$134 million due to a greater level of capital debt, which includes the issuance in June 2008 of \$1.5 billion of junior subordinated notes and reflects the use of a portion of the proceeds from prior sales of retail medium-term notes for general corporate purposes in 2009. Previously, these proceeds were used to support an asset portfolio within the Retirement segment for which the Company has employed a substitute funding source, as discussed in [Liquidity and Capital Resources](#) Financing Activities. Also contributing to the greater loss in adjusted operating income in 2009 are increased losses from other corporate activities, which reflects an increase in our deferred compensation liabilities and other retained corporate expenses. The increased losses were partially offset by a decline in the level of costs related to our retained obligations to certain policyholders, as discussed above. Both our deferred compensation liabilities and our retained obligations to certain policyholders are impacted by financial market conditions.

Corporate operations pension income and employee benefits decreased \$35 million. The decrease reflects increased post-retirement benefit costs due to the amortization of prior year losses and lower investment returns due to the lower asset base reflective of market conditions in late 2008 and early 2009, partially offset by an increase in income from our qualified pension plan. Income from our qualified pension plan increased \$14 million, from \$217 million in the first nine months of 2008 to \$231 million in the first nine months of 2009.

Adjusted operating income of our real estate and relocation services business decreased \$24 million, from a loss of \$30 million in the first nine months of 2008 to a loss of \$54 million in the first nine months of 2009. Our real estate and relocation services business continued to experience lower royalty fees and lower relocation revenue from real estate referral fees due to unfavorable residential real estate market conditions. Results for the first nine months of 2009 also include our share of the earnings from equity method investments, which include goodwill impairments recorded in 2009 within these entities. Partially offsetting these items are lower loan loss provisions and lower operating expenses. Certain of our clients utilize a fixed fee home sale program under which we assume the benefits and burdens of ownership with respect to a relocating employee's home that is purchased by us, including carrying costs and any loss on sale. As of September 30, 2009, we held in unsold inventory homes with a net value of \$46 million under this program.

Results of Operations of Closed Block Business

We established the Closed Block Business effective as of the date of demutualization. The Closed Block Business includes our in force traditional domestic participating life insurance and annuity products and assets that are used for the payment of benefits and policyholder dividends on these policies, as well as other assets and equity and related liabilities that support these policies. We no longer offer these traditional domestic participating policies. See [Overview](#) Closed Block Business for additional details.

At the end of each year, the Board of Directors of Prudential Insurance determines the dividends payable on participating policies for the following year based on the experience of the Closed Block, including investment income, net realized and unrealized investment gains, mortality experience and other factors. Although Closed Block experience for dividend action decisions is based upon statutory results, at the time the Closed Block was established, we developed, as required by U.S. GAAP, an actuarial calculation of the timing of the maximum

Table of Contents

future earnings from the policies included in the Closed Block. If actual cumulative earnings in any given period are greater than the cumulative earnings we expected, we will record this excess as a policyholder dividend obligation. We will subsequently pay this excess to Closed Block policyholders as an additional dividend unless it is otherwise offset by future Closed Block performance that is less favorable than we originally expected. The policyholder dividends we charge to expense within the Closed Block Business will include any change in our policyholder dividend obligation that we recognize for the excess of actual cumulative earnings in any given period over the cumulative earnings we expected in addition to the actual policyholder dividends declared by the Board of Directors of Prudential Insurance.

As of September 30, 2009, actual cumulative earnings are below the expected cumulative earnings by \$690 million, thereby eliminating the cumulative earnings policyholder dividend obligation. Actual cumulative earnings, as required by U.S. GAAP, reflect the recognition of realized investment gains and losses in the current period, as well as changes in assets and related liabilities that support the Closed Block policies. Furthermore, the accumulation of net unrealized investment gains that have arisen subsequent to the establishment of the Closed Block, are not sufficient to overcome the cumulative earnings shortfall and therefore, the policyholder dividend obligation balance as of September 30, 2009 remains at zero.

Operating Results

Management does not consider adjusted operating income to assess the operating performance of the Closed Block Business. Consequently, results of the Closed Block Business for all periods are presented only in accordance with U.S. GAAP. The following table sets forth the Closed Block Business U.S. GAAP results for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
U.S. GAAP results:				
Revenues	\$ 1,548	\$ 1,778	\$ 3,513	\$ 4,945
Benefits and expenses	1,564	1,891	4,085	5,046
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ (16)	\$ (113)	\$ (572)	\$ (101)

Income (Loss) from Continuing Operations Before Income Taxes and Equity in Earnings of Operating Joint Ventures

2009 to 2008 Three Month Comparison. Loss from continuing operations before income taxes and equity in earnings of operating joint ventures decreased \$97 million, from a loss of \$113 million in the third quarter of 2008 to a loss of \$16 million in the third quarter of 2009. Results for 2009 include a decrease of \$146 million in net realized investment gains, from gains of \$119 million in the third quarter of 2008 to losses of \$27 million in the third quarter of 2009 primarily due to higher impairments and credit losses. For a discussion of Closed Block Business realized investment gains (losses), net, see Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses. Net investment income, net of interest expense, decreased \$42 million, primarily related to lower interest rates on floating rate investments due to rate resets and reinvestments at lower yields. Results in the third quarter of 2009 benefited from a decrease in dividends paid and accrued to policyholders, primarily due to a decrease in the 2009 dividend scale. In the third quarter of 2009, the cumulative earnings policyholder dividend obligation was zero, and therefore, provided no offset to the decline in earnings during the quarter. In the third quarter of 2008, the change in the cumulative earnings policyholder dividend obligation of \$92 million was an offset to the decline in earnings in the period. As noted above, as of September 30, 2009 actual cumulative earnings are below the expected cumulative earnings by \$690 million. There will be no cumulative earnings policyholder dividend obligation until this amount is recovered. Without the benefit of the cumulative

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

earnings policyholder dividend obligation, Closed Block Business earnings will continue to be volatile primarily due to changes in investment results.

Table of Contents

2009 to 2008 Nine Month Comparison. Loss from continuing operations before income taxes and equity in earnings of operating joint ventures increased \$471 million, from a loss of \$101 million in the first nine months of 2008 to a loss of \$572 million in the first nine months of 2009. Results for 2009 include an increase of \$980 million in net realized investment losses, from \$339 million in the first nine months of 2008 to \$1.319 billion in the first nine months of 2009 primarily due to a net decrease in the market value of derivatives used in duration management programs, as well as higher impairments and credit losses. For a discussion of Closed Block Business realized investment gains (losses), net, see

Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses. Net investment income, net of interest expense, decreased \$219 million, primarily related to lower portfolio yields, including lower interest rates on floating rate investments due to rate resets and reinvestments at lower yields, as well as a decrease in income on joint ventures and limited partnership investments accounted for under the equity method. These decreases to income were partially offset by a decrease of \$313 million in dividends paid and accrued to policyholders, primarily due to a decrease in the 2009 dividend scale. In addition, amortization of deferred policy acquisition costs decreased \$38 million reflecting the impact of investment losses on actual gross profits for the period compared to the previously estimated expected gross profits for the period. During the first nine months of 2009, the cumulative earnings policyholder dividend obligation was reduced from \$851 million to zero, and was a partial offset to the decline in earnings as discussed above. In the first nine months of 2008, the change in the cumulative earnings policyholder dividend obligation of \$557 million was an offset to the decline in earnings in the period.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$230 million, from \$1.778 billion in the third quarter of 2008 to \$1.548 billion in the third quarter of 2009, principally driven by the \$146 million increase in net realized investment losses and a decrease of \$47 million in net investment income, as discussed above. In addition, premiums declined, with a related decrease in changes in reserves, primarily due to a lower amount of dividends used by policyholders to purchase additional insurance, as a result of the 2009 dividend scale reduction.

2009 to 2008 Nine Month Comparison. Revenues decreased \$1.432 billion, from \$4.945 billion in the first nine months of 2008 to \$3.513 billion in the first nine months of 2009, principally driven by the \$980 million increase in net realized investment losses and a decrease of \$259 million in net investment income, as discussed above. In addition, premiums declined, with a related decrease in changes in reserves, primarily due to a lower amount of dividends used by policyholders to purchase additional insurance, as a result of the 2009 dividend scale reduction, and to a lesser extent, the expected in force decline as policies terminate.

Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, decreased \$327 million, from \$1.891 billion in the third quarter of 2008 to \$1.564 billion in the third quarter of 2009. This decline included a \$206 million decrease in dividends to policyholders reflecting a decrease in the cumulative earnings policyholder dividend obligation expense of \$92 million, as well as a decrease in dividends paid and accrued to policyholders of \$114 million, primarily due to a decrease in the dividend scale. Policyholders benefits, including changes in reserves, decreased \$101 million driven by a decline in premiums, as discussed above.

2009 to 2008 Nine Month Comparison. Benefits and expenses decreased \$961 million, from \$5.046 billion in the first nine months of 2008 to \$4.085 billion in the first nine months of 2009. This decline included a \$607 million decrease in dividends to policyholders reflecting a decrease in the cumulative earnings policyholder dividend obligation expense of \$294 million, as well as a decrease in dividends paid and accrued to policyholders of \$313 million, primarily due to a decrease in the dividend scale. Policyholders benefits, including changes in reserves, decreased \$262 million driven by a decline in premiums, as discussed above. In addition, amortization of deferred policy acquisition costs decreased reflecting the impact of investment losses on actual gross profits for the period compared to the previously estimated expected gross profits for the period.

Table of Contents

Income Taxes

Our income tax provision amounted to an income tax benefit of \$153 million in the third quarter of 2009 compared to a benefit of \$149 million in the third quarter of 2008. The income tax benefit in the third quarter of 2009 includes a reduction to the liability for unrecognized tax benefits and interest of \$156 million, primarily related to tax years prior to 2002 as a result of the expiration of the statute of limitations for the 2003 tax year, additional interest on a tax refund received related to the 1997 through 2001 tax years, and changes in estimates. In addition, current quarter income taxes include a benefit of \$35 million from a revision of the estimated income taxes for 2008, based upon the filing of the 2008 federal income tax return in the third quarter. Absent these items our income tax provision for the third quarter was \$38 million, reflecting the benefit of the dividends received reduction. The income tax benefit of \$149 million in the third quarter of 2008 reflects the pre-tax loss for the period, as well as a revision of the estimated income taxes for 2007, based upon the filing of the 2007 federal income tax return in the third quarter of 2008, as well as the benefit of the dividends received deduction.

Our income tax provision amounted to an income tax benefit of \$311 million in the first nine months of 2009 compared to a benefit of \$66 million in the first nine months of 2008. The income tax benefit in the first nine months of 2009 includes a reduction to the liability for unrecognized tax benefits and interest of \$307 million, primarily related to tax years prior to 2002 as a result of the expiration of the statute of limitations for the 2002 and 2003 tax years, additional interest on a tax refund received related to the 1997 through 2001 tax years, and changes in estimates. In addition, current year income taxes include a benefit of \$35 million from a revision of the estimated income taxes for 2008, based upon the filing of the 2008 federal income tax return in the third quarter. Absent these items our income tax provision for the first nine months of 2009 was \$31 million, reflecting the benefit of the dividends received reduction. The income tax benefit of \$66 million in the first nine months of 2008 reflects the benefit of the dividends received deduction as well as the impact of a lower level of taxable income.

We employ various tax strategies, including strategies to minimize the amount of taxes resulting from realized capital gains.

For additional information regarding income taxes, see Note 2 to the Unaudited Interim Consolidated Financial Statements.

Discontinued Operations

Included within net income are the results of businesses which are reflected as discontinued operations under U.S. GAAP. Income (loss) from discontinued operations, net of taxes, was a loss of \$(4) million and income of \$5 million for the three months ended September 30, 2009 and 2008, respectively, and income of \$18 million and \$4 million for the nine months ended September 30, 2009 and 2008, respectively.

For additional information regarding discontinued operations, see Note 3 to the Unaudited Interim Consolidated Financial Statements.

Table of Contents**Divested Businesses**

Our income from continuing operations includes results from several businesses that have been or will be sold or exited that do not qualify for discontinued operations accounting treatment under U.S. GAAP. The results of these divested businesses are reflected in our Corporate and Other operations, but excluded from adjusted operating income. A summary of the results of the divested businesses that have been excluded from adjusted operating income is as follows for the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in millions)			
Financial Advisory	\$ 22	\$ (216)	\$ (18)	\$ (148)

Prudential Securities capital markets	1	(2)	(4)	2
Prudential Home Mortgage Company		(1)		(1)
Other	1		1	
Total divested businesses excluded from adjusted operating income	\$ 25	\$ (219)	\$ (31)	\$ (276)

Financial Advisory

In 2008, we classified our Financial Advisory business as a divested business, reflecting our intention to exit this business. This business consists of our investment in the Wachovia Securities joint venture, in addition to expenses relating to obligations and costs we retained in connection with the businesses we contributed to the joint venture, primarily for litigation and regulatory matters. For more information on our investment in the Wachovia Securities joint venture, as well as our notice to Wells Fargo of our exercise of our lookback option put rights, see Note 13 to the Unaudited Interim Consolidated Financial Statements, as well as Liquidity and Capital Resources Liquidity and Capital Resources of Subsidiaries Domestic Insurance Subsidiaries Prudential Securities Group.

On August 15, 2008, Wachovia announced that it had reached an agreement in principle for a global settlement of investigations concerning the underwriting, sale and subsequent auction of certain auction rate securities by subsidiaries of Wachovia Securities and had recorded an increase to legal reserves. Our recorded share of pre-tax earnings from the joint venture for the three and nine months ended September 30, 2008 included \$235 million, which is our share of this charge.

Results of our Financial Advisory business presented above do not include certain payments to which our Asset Management segment is entitled under the Sweep Feature Agreement listed as Exhibit 10.61 to our Annual Report on Form 10-K for the year ended December 31, 2008. Revenues received under that agreement, contributed to pre-tax adjusted operating income of our Asset Management segment in the amount of \$46 million for the nine months ended September 30, 2009, \$55 million in 2008, \$51 million in 2007, \$51 million in 2006 and \$54 million in 2005. Payments under this agreement continue, unless otherwise agreed, for ten years after the termination of the Wachovia Securities joint venture.

Commercial Mortgage Securitization Operations

In 2008, we classified our commercial mortgage securitization operations as a divested business, reflecting our decision to exit this business. These operations, which involved the origination and purchase of commercial mortgage loans that we in turn would aggregate and sell into commercial mortgage-backed securitization transactions, together with related hedging activities, were previously reported within the Asset Management

Table of Contents

segment. We retained and continue the remainder of our commercial mortgage origination, servicing and other commercial mortgage related activities, which remain a part of our Asset Management segment. As of September 30, 2009 and 2008, our commercial mortgage securitization operations held loans with a principal balance of \$40 million and \$286 million, respectively, whose fair values continue to be subject to changes in credit spreads. The losses of \$13 million and \$129 million in the first nine months of 2009 and 2008, respectively, primarily reflect net realized and unrealized losses on the loans, bonds and hedges from instability in the commercial mortgage-backed securities market.

Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and**Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes**

Certain products included in the Retirement and International Insurance segments, are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The investments supporting these experience-rated products, excluding commercial mortgage and other loans, are classified as trading and are carried at fair value. These trading investments are reflected on the statements of financial position as Trading account assets supporting insurance liabilities, at fair value. Realized and unrealized gains and losses for these investments are reported in Asset management fees and other income. Interest and dividend income for these investments is reported in Net investment income. Commercial mortgage and other loans that support these experience-rated products are carried at unpaid principal, net of unamortized discounts and an allowance for losses, and are reflected on the statements of financial position as Commercial mortgage and other loans.

Adjusted operating income excludes net investment gains and losses on trading account assets supporting insurance liabilities. This is consistent with the exclusion of realized investment gains and losses with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains and losses on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in Interest credited to policyholders account balances. The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread we earn on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that we expect will ultimately accrue to the contractholders.

Results for the three months ended September 30, 2009 and 2008 include the recognition of net investment gains of \$694 million and net investment losses of \$534 million, respectively, and for the nine months ended September 30, 2009 and 2008 include the recognition of net investment gains of \$1.525 billion and net investment losses of \$919 million, respectively, on Trading account assets supporting insurance liabilities, at fair value. These net investment gains and losses primarily represent interest-rate related mark-to-market adjustments, which include the impact of changes in credit spreads on fixed maturity securities. Consistent with our treatment of Realized investment gains (losses), net, these gains and losses, which are expected to ultimately accrue to the contractholders, are excluded from adjusted operating income. In addition, results for the three months ended September 30, 2009 and 2008 include increases of \$458 million and decreases of \$388 million, respectively, and for the nine months ended September 30, 2009 and 2008 include increases of \$850 million and decreases of \$682 million, respectively, in contractholder liabilities due to asset value changes in the pool of investments that support these experience-rated contracts. These liability changes are reflected in Interest credited to policyholders account balances and are also excluded from adjusted operating income. Contractholder liabilities do not reflect declines in recorded asset values of \$49 million and \$385 million, as of September 30, 2009 and 2008, respectively, which we expect to recover in future periods through increases in recorded asset values or reductions in crediting rates on contractholder liabilities.

Table of Contents

In addition, as prescribed by U.S. GAAP, changes in the fair value of commercial mortgage and other loans held in our general account, other than when associated with impairments, are not recognized in income in the current period, while the impact of these changes in value are reflected as a change in the liability to fully participating contractholders in the current period. Included in the amounts above related to the change in the liability to contractholders related to commercial mortgage and other loans are increases of \$38 million and decreases of \$59 million for the three months ended September 30, 2009 and 2008, respectively, and increases of \$78 million and decreases of \$76 million for the nine months ended September 30, 2009 and 2008, respectively.

Valuation of Assets and Liabilities

Fair Value of Assets and Liabilities

The authoritative guidance related to fair value established a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. See Note 12 to the Unaudited Interim Consolidated Financial Statements for a description of these levels.

Table of Contents

The tables below present the balances of assets and liabilities measured at fair value on a recurring basis, as of September 30, 2009 and December 31, 2008, split between the Financial Services Businesses and Closed Block Business, by fair value hierarchy level. See Note 12 to the Unaudited Interim Consolidated Financial Statements for the balances of assets and liabilities measured at fair value on a recurring basis presented on a consolidated basis.

(1) The amount of Level 3 assets taken as a percentage of total assets measured at fair value on a recurring basis totaled 6% and 7% for the Financial Services Businesses and Closed Block Business, respectively. Excluding separate account assets for which the risk is borne by the policyholder, the amount of Level 3 assets taken as a percentage of total assets measured at fair value on a recurring basis totaled 5% for the Financial Services Businesses. The amount of Level 3 liabilities was immaterial to our balance sheet.

(2) Netting amounts represent cash collateral and the impact of offsetting asset and liability positions held with the same counterparty.

(3) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by us with respect to certain accounts. Separate account assets classified as Level 3

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

consist primarily of real estate and real estate investment funds. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in our Consolidated Statement of Financial Position.

- (3) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by us with respect to certain accounts. Separate account assets classified as Level 3 consist primarily of real estate and real estate investment funds. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in our Consolidated Statement of Financial Position.
- (4) The negative Other liability amount for Financial Services Businesses reflects the impact of inter-company eliminations.

Table of Contents

For additional information regarding the balances of assets and liabilities measured at fair value by hierarchy level see Note 12 to the Unaudited Interim Consolidated Financial Statements.

The determination of fair value, which for certain assets and liabilities is dependent on the application of estimates and assumptions, can have a significant impact on our results of operations. As discussed in more detail below, the determination of fair value for certain assets and liabilities may require the application of a greater degree of judgment given current market conditions, as the ability to value assets and liabilities can be significantly impacted by a decrease in market activity or a lack of transactions executed in an orderly manner. For a description of the key estimates and assumptions used in our determination of fair value, see Note 12 to the Unaudited Interim Consolidated Financial Statements. The following sections provide additional information regarding certain assets and liabilities valued using Level 3 inputs, that could have a significant impact on our results of operations. Information regarding Separate Account Assets is excluded as the risk of assets for these categories is ultimately borne by our customers and policyholders.

Fixed Maturity and Equity Securities

Public fixed maturity securities included in Level 3 in our fair value hierarchy are generally priced based on internally developed valuations or non-binding broker quotes. Despite the dislocated markets and low levels of liquidity in 2008 and the first nine months of 2009, except for our asset-backed securities collateralized by sub-prime mortgages as discussed below, the pricing we received from independent pricing services was not materially different from our internal estimates of current market value for the remainder of our public fixed maturity portfolio. As a result, for public fixed maturity securities we generally continued to use the price provided by the independent pricing services under our normal pricing protocol. Securities with prices based on validated quotes from pricing services are generally reflected within Level 2. For certain private fixed maturity and equity securities, the discounted cash flow or other valuation model uses significant unobservable inputs. Such securities are also included in Level 3 in our fair value hierarchy.

As of September 30, 2009 our Level 3 fixed maturity securities included certain asset-backed securities collateralized by sub-prime mortgages with a fair value of \$5,797 million. As discussed in Note 12 to the Unaudited Interim Consolidated Financial Statements, we reported fair values for these sub-prime securities which were net \$795 million higher than the estimated fair values received from third party pricing services or brokers, based on our determination that as of September 30, 2009, the market for asset-backed securities collateralized by sub-prime mortgages was an inactive market. We considered both third-party pricing information and an internally developed price based on a discounted cash flow model in determining the fair value of these securities. Based on the unobservable inputs used in the discounted cash flow model, these securities were included in Level 3. The \$795 million net increase in fair value included \$757 million relating to available-for-sale securities, with \$442 million related to securities attributable to our Financial Services Businesses and \$315 million related to securities attributable to our Closed Block Business. The increase to the fair value of these available-for-sale securities resulted in a corresponding increase to Accumulated other comprehensive income (loss), net. The remaining \$38 million increase in fair value related to trading account assets supporting insurance liabilities in our Financial Services Business, and resulted in a corresponding increase in Asset management fees and other income.

Excluding these asset-backed securities collateralized by sub-prime mortgages, as of September 30, 2009 about half of our \$3.3 billion of Level 3 fixed maturity securities were public fixed maturities, with values primarily based on non-binding broker-quotes, and about half were private fixed maturities, with values primary based on internally developed models. Significant unobservable inputs used included: issue specific credit adjustments, material non-public financial information, management judgment, estimation of future earnings and cashflows, default rate assumptions, liquidity assumptions and non-binding quotes from market makers. These inputs are usually considered unobservable, as not all market participants will have access to this data.

Table of Contents

As of December 31, 2008 we classified approximately \$122 million of our investments in asset-backed securities collateralized by sub-prime mortgages as Level 3, primarily reflecting securities valued based on non-binding broker quotes. The vast majority of our asset-backed securities collateralized by sub-prime mortgages were valued as of December 31, 2008 using information from independent pricing services, and were included in Level 2. Overall, about half of our Level 3 fixed maturity securities as of December 31, 2008 were public fixed maturities, with values primarily based on non-binding broker-quotes, and about half were private fixed maturities, with values primary based on internally developed models.

For additional information regarding our holdings of asset-backed securities collateralized by sub-prime mortgages, see, *Realized Investment Gains and Losses and General Account Investments* *General Account Investments* *Fixed Maturity Securities* *Asset-Backed Securities*. While the fair value of these investments, as well as others within our portfolio of fixed maturities, are in a significant unrealized loss position due to increased credit spreads and illiquidity in the financial markets, we believe the ultimate value that will be realized from these investments is greater than that reflected by their current fair value.

The impact our determination of fair value for fixed maturity and equity securities has on our results of operations is dependent on our classification of the security as either trading, available for sale, or held to maturity. For our investments classified as trading, the impact of changes in fair value is recorded within *Asset management fees and other income*. For our investments classified as available for sale, the impact of changes in fair value is recorded as an unrealized gain or loss in *Accumulated other comprehensive income (loss), net*, a separate component of equity. Our investments classified as held to maturity are carried at amortized cost.

Other Long-Term Investments

The fair value of wholly-owned real estate held in consolidated investment funds is determined through an independent appraisal process. The appraisals generally utilize a discounted cash flow model, following an income approach, that incorporates various assumptions including rental revenue, operating expenses and discount rates. These appraisals and the related assumptions are updated at least annually, and incorporate historical property experience and any observable market data, including any market transactions. Since many of the assumptions utilized are unobservable and are considered to be significant inputs to the valuation, the real estate investments within other long-term investments have been reflected within Level 3 in our fair value hierarchy. Consolidated real estate investment funds classified as Level 3 as of September 30, 2009 and December 31, 2008 totaled approximately \$0.4 billion and \$1.0 billion respectively. Our direct investment in these funds is not material, and the majority of the assets recorded as a result of the consolidation of these funds is offset by a noncontrolling interest reflected as a separate component of equity, which amount is not considered to be fair value and therefore, not included in fair value reporting above.

Derivative Instruments

Derivatives are recorded at fair value either as assets, within *Other trading account assets*, or *Other long-term investments*, or as liabilities, within *Other liabilities*, except for embedded derivatives which are recorded with the associated host contract. The fair values of derivative contracts are determined based on quoted prices in active exchanges or through the use of valuation models, and can be affected by changes in market factors including non-performance risk. The majority of our derivative positions are traded in the over the counter, or OTC, derivative market and are classified within Level 2 in our fair value hierarchy. Most OTC derivative contracts have bid and ask prices that are actively quoted or can be readily obtained from external market data providers. Our policy is to use mid-market pricing consistent with our best estimate of fair value. The bid-ask spreads for derivatives classified within Level 3 of the fair value hierarchy are generally wider than derivatives classified within Level 2 thus requiring more judgment in estimating the mid-market price of such derivatives. The fair values of OTC derivative assets and liabilities classified as Level 3 totaled approximately \$0.8 billion and \$40 million, respectively, as of September 30, 2009 and \$1.3 billion and \$140 million, respectively, as of December 31, 2008, without giving consideration to the impact of netting.

Table of Contents

Derivatives that are valued based upon models with unobservable market input values or input values from less actively traded or less-developed markets are classified within Level 3 in our fair value hierarchy. Derivatives classified as Level 3 include first-to-default credit basket swaps, look-back equity options and other structured products. For additional information regarding embedded derivatives in our annuity and retirement products classified as Level 3, see *Variable Annuity Optional Living Benefit Features* below. Level 3 methodologies are validated through periodic comparison of our fair values to broker-dealer values.

All realized and unrealized changes in fair value of dealer and non-dealer related derivatives, with the exception of the effective portion of qualifying cash flow hedges and hedges of net investments in foreign operations, are recorded in current earnings. Generally, the changes in fair value of non-dealer related derivatives, excluding those that qualify for hedge accounting, are recorded in *Realized investment gains (losses), net*. For additional information regarding the impact of changes in fair value of derivative instruments on our results of operations see *Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses* below.

Variable Annuity Optional Living Benefit Features

Our liability for future policy benefits includes general account liabilities for guarantees on variable annuity contracts, including guaranteed minimum accumulation benefits (*GMAB*), guaranteed minimum withdrawal benefits (*GMWB*) and guaranteed minimum income and withdrawal benefits (*GMIWB*). While these guarantees primarily relate to the optional living benefit features of our Individual Annuities segment, they are also included in certain variable annuities in our International Insurance segment and certain retirement account based group variable annuities in our Retirement segment. These benefits are accounted for as embedded derivatives and are carried at fair value with changes in fair value included in *Realized investment gains (losses), net*.

The fair values of the *GMAB*, *GMWB* and *GMIWB* liabilities are calculated as the present value of future expected benefit payments to customers less the present value of assessed rider fees attributable to the embedded derivative feature. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally developed models with option pricing techniques. The significant assumptions utilized in the valuation of the embedded derivatives associated with our optional living benefit features are primarily unobservable; therefore the liability included in future policy benefits has been reflected within Level 3 in our fair value hierarchy.

We are required to incorporate our own risk of non-performance in the valuation of the embedded derivatives associated with our optional living benefit features. Since insurance liabilities are senior to debt, we believe that reflecting the claims-paying ratings of our insurance subsidiaries in the valuation of the liability appropriately takes into consideration our own risk of non-performance. To reflect the market's perception of our own risk of non-performance, we incorporate an additional spread over LIBOR into the discount rate used in the valuations of the embedded derivative liabilities. In the third quarter of 2009, changes to the non-performance risk adjustment resulted in a pre-tax benefit of \$5 million in our Individual Annuities segment and a pre-tax charge of \$4 million in our Retirement segment. The increase in the non-performance risk adjustment in our Individual Annuities segment was primarily driven by an increase in the embedded derivative liabilities due to updates to the assumptions used in determining the fair value of the embedded derivative liabilities, as discussed below, partially offset by a decrease in the additional spread over LIBOR in the third quarter of 2009, reflecting general credit spread tightening. The decrease in the non-performance risk adjustment in our Retirement segment was primarily driven by the decrease in the additional spread over LIBOR in the third quarter of 2009. The additional spread over forward LIBOR rates incorporated into the discount rate as of September 30, 2009 generally ranged from 100 to 200 basis points for the portion of the interest rate curve most relevant to these liabilities. For the first nine months of 2009, our adjustment for the market's perception of our non-performance risk resulted in a \$564 million pre-tax benefit to our Individual Annuities segment and a \$3 million pre-tax

Table of Contents

benefit to our Retirement segment, reflecting the additional spread over LIBOR we incorporated into the discount rate used in the valuations of the embedded derivative liabilities beginning in the first quarter of 2009 to reflect changes in the market's perception of our non-performance risk.

In addition, the third quarter and first nine months of 2009 include charges of \$202 million and \$110 million, respectively, in our Individual Annuities segment related to an update of the actuarial and capital markets assumptions used in the valuation of the embedded derivatives. The charge in the third quarter of 2009 was primarily driven by a reduction in the expected lapse rate assumption based on actual experience. The charge in the first nine months of 2009 also includes this impact, partially offset by a further update to our market volatility assumptions to reflect the inclusion of new market inputs, as well as updated assumptions for other actuarial and capital markets inputs. Our market volatility assumptions are no longer based on the implied volatility of over-the-counter equity options, but an index based on historical market volatilities.

The change in fair value of the GMAB, GMWB and GMIWB resulted in a decrease in the total liability of \$44 million and \$2,477 million for the third quarter and first nine months of 2009, respectively, primarily reflecting a decrease in future expected benefit payments, resulting from an increase in policyholder account balance due to equity market appreciation, and the update of our market-perceived non-performance risk and other actuarial and capital markets assumption discussed above. These changes were significantly offset by increased amortization of deferred policy acquisition and other costs, and changes in value of related hedging instruments, primarily in our Individual Annuities segment as described in more detail under Results of Operations for Financial Services Businesses by Segment U.S. Retirement Solutions and Investment Management Division Individual Annuities.

Realized Investment Gains and Losses and General Account Investments

Realized Investment Gains and Losses

Realized investment gains and losses are generated from numerous sources, including the sale of fixed maturity securities, equity securities, investments in joint ventures and limited partnerships and other types of investments, as well as adjustments to the cost basis of investments for other-than-temporary impairments. Realized investment gains and losses are also generated from prepayment premiums received on private fixed maturity securities, recoveries of principal on previously impaired securities, provisions for losses on commercial mortgage and other loans, fair value changes on commercial mortgage loans carried at fair value, and fair value changes on embedded derivatives and free-standing derivatives that do not qualify for hedge accounting treatment, except those derivatives used in our capacity as a broker or dealer.

For a further discussion of our policies regarding other-than-temporary declines in investment value and the related methodology for recording fixed maturity other-than-temporary impairments, see General Account Investments Fixed Maturity Securities Other-than-Temporary Impairments of Fixed Maturity Securities below. For a further discussion of our policies regarding other-than-temporary declines in investment value and the related methodology for recording equity impairments, see General Account Investments Equity Securities Other-than-Temporary Impairments of Equity Securities below.

The level of other-than-temporary impairments generally reflects economic conditions and is generally expected to increase when economic conditions worsen and to decrease when economic conditions improve. Historically, the causes of other-than-temporary impairments have been specific to each individual issuer and have not directly resulted in impairments to other securities within the same industry or geographic region. However, as discussed in more detail below, certain of the other-than-temporary impairments recognized for the three and nine months ended September 30, 2009 and 2008 relate to asset-backed securities collateralized by sub-prime mortgages and reflect the overall deterioration of the housing market.

Table of Contents

We may realize additional credit and interest rate related losses through sales of investments pursuant to our credit risk and portfolio management objectives. In light of unprecedented market conditions, and in consideration of the potential impact on capital and tax positions, beginning in the fourth quarter of 2008 we temporarily curtailed the active trading policy of certain portfolios. In the second quarter of 2009, we resumed a more restricted trading program in these portfolios. Other-than-temporary impairments, interest rate related losses and credit losses (other than those related to certain of our businesses which primarily originate investments for sale or syndication to unrelated investors) are excluded from adjusted operating income.

We require most issuers of private fixed maturity securities to pay us make-whole yield maintenance payments when they prepay the securities. Prepayments are driven by factors specific to the activities of our borrowers as well as the interest rate environment.

We use interest rate and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. We use derivative contracts to mitigate the risk that unfavorable changes in currency exchange rates will reduce U.S. dollar equivalent earnings generated by certain of our non-U.S. businesses. We also use equity-based derivatives to hedge the equity risks embedded in some of our annuity products. Derivative contracts also include forward purchases and sales of to-be-announced mortgage-backed securities primarily related to our mortgage dollar roll program. Many of these derivative contracts do not qualify for hedge accounting, and, consequently, we recognize the changes in fair value of such contracts from period to period in current earnings, although we do not necessarily account for the related assets or liabilities the same way. Accordingly, realized investment gains and losses from our derivative activities can contribute significantly to fluctuations in net income.

Adjusted operating income excludes Realized investment gains (losses), net, (other than those representing profit or loss of certain of our businesses which primarily originate investments for sale or syndication to unrelated investors, and those associated with terminating hedges of foreign currency earnings, current period yield adjustments, or product derivatives and the effect of any related economic hedging program) and related charges and adjustments.

Table of Contents

The following tables set forth Realized investment gains (losses), net, by investment type for the Financial Services Businesses and Closed Block Business, as well as related charges and adjustments associated with the Financial Services Businesses, for the periods indicated. For a discussion of our general account investment portfolio and related results, including overall income yield and investment income, as well as our policies regarding other-than-temporary declines in investment value and the related methodology for recording impairment charges, see

General Account Investments below. For additional details regarding adjusted operating income, which is our measure of performance for the segments of our Financial Services Businesses, see Note 11 to the Unaudited Interim Consolidated Financial Statements.

(1) Related adjustments include that portion of Realized investment gains (losses), net, that are included in adjusted operating income, including those pertaining to certain derivative contracts, as well as those that represent profit or loss of certain of our businesses which primarily originate investments for sale or syndication to unrelated investors. Related adjustments also include that portion of Asset management fees and other income that are excluded from adjusted operating income, including the change in value due to the impact of changes in foreign currency exchange rates during the period on certain assets and liabilities for which we economically hedge the foreign currency exposure as well as counterparty credit losses on derivative positions. See Note 11 to the Unaudited Interim Consolidated Financial Statements for additional information on these related adjustments.

(2) Reflects charges that are related to realized investment gains (losses), net, and excluded from adjusted operating income, as described more fully in Note 11 to the Unaudited Interim Consolidated Financial Statements.

2009 to 2008 Three Month Comparison

Financial Services Businesses

The Financial Services Businesses net realized investment losses in the third quarter of 2009 were \$430 million, compared to net realized investment losses of \$392 million in the third quarter of 2008.

Table of Contents

Net realized losses on fixed maturity securities were \$236 million in the third quarter of 2009, compared to net realized losses of \$378 million in the third quarter of 2008, as set forth in the following table:

	Three Months Ended September 30,	
	2009	2008
	(in millions)	
Realized investment gains (losses) Fixed Maturity Securities Financial Services Businesses		
Gross realized investment gains:		
Gross gains on sales and maturities	\$ 107	\$ 51
Private bond prepayment premiums	12	11
Total gross realized investment gains	119	62
Gross realized investment losses:		
Net other-than-temporary impairments recognized in earnings(1)	(267)	(333)
Gross losses on sales and maturities(2)	(63)	(95)
Credit related losses on sales	(25)	(12)
Total gross realized investment losses	(355)	(440)
Realized investment gains (losses), net Fixed Maturity Securities	\$ (236)	\$ (378)
Net gains (losses) on sales and maturities Fixed Maturity Investments(2)	\$ 44	\$ (44)

(1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

(2) Amounts exclude credit related losses through sales of investments pursuant to our credit risk and portfolio management objectives.

Gross trading gains on sales and maturities of fixed maturity securities of \$107 million in the third quarter of 2009 were primarily due to sales within our Individual Annuities and Retirement segments and sales of government bonds in our Gibraltar Life operations. Sales of fixed maturity securities in our Individual Annuities segment were primarily due to transfers of investments out of our general account and into separate accounts relating to an automatic rebalancing element embedded in the living benefit features of some of our variable annuity products. None of the gross losses on sales and maturities in the third quarter of 2009 related to asset-backed securities collateralized by sub-prime mortgages. Gross losses on sales and maturities of fixed maturity investments of \$95 million in the third quarter of 2008, were primarily related to credit spread increases in the credit markets resulting generally from concerns over the economic slowdown, and interest rates. None of the gross losses on sales and maturities in the third quarter of 2008 related to asset-backed securities collateralized by sub-prime mortgages. See General Account Investments Fixed Maturity Securities Asset-Backed Securities for additional information regarding our exposure to sub-prime mortgages. See below for additional information regarding the other-than-temporary impairments of fixed maturity securities in the third quarter of 2009 and 2008.

Net realized losses on equity securities were \$39 million in the third quarter of 2009, including other-than-temporary impairments of \$62 million, partially offset by net trading gains on sales of equity securities of \$23 million. Net trading gains were primarily due to sales within our International Insurance segment. Net realized losses on equity securities were \$103 million in the third quarter of 2008, of which other-than-temporary impairments were \$71 million and net trading losses on sales of equity securities were \$32 million. Net trading losses were primarily due to sales within our International Insurance segment. See below for additional information regarding the other-than-temporary impairments of equity securities in the third quarter of 2009 and 2008.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Net realized losses on derivatives were \$28 million in the third quarter of 2009, compared to net realized gains of \$114 million in the third quarter of 2008. The net derivative losses in the third quarter of 2009 primarily reflect net losses of \$228 million on embedded derivatives associated with certain variable annuity contracts, net of the impact of our hedging programs, primarily in our Individual Annuities Segment. For additional

Table of Contents

information regarding these embedded derivatives and our hedging programs, see Results of Operations for Financial Services Businesses by Segment U.S. Retirement Solutions and Investment Management Division Individual Annuities. Also contributing to the net derivative losses in the third quarter of 2009 were net mark-to-market losses of \$156 million on foreign currency forward contracts used to hedge the future income of non-U.S. businesses due to the weakening of the U.S. dollar. Partially offsetting these losses were net mark-to-market gains of \$201 million on interest rate derivatives used to manage duration as interest rates declined and gains of \$143 million on embedded derivatives associated with certain externally managed investments in the European market. The net derivative gains in the third quarter of 2008 primarily reflect mark-to-market gains of \$153 million on currency derivatives used to hedge foreign investments due to the strengthening of the U.S. dollar and net gains of \$147 million from interest rate derivative contracts mainly used to manage the duration of the fixed maturity investment portfolio. Also contributing to the net derivative gains in the third quarter of 2008 were net gains of \$103 million on foreign currency forward contracts used to hedge the future income of non-U.S. businesses and net gains of \$31 million related to equity market hedges used in our asset management business. Partially offsetting these gains were mark-to-market losses of \$132 million on embedded derivatives associated with certain externally managed investments in the European market, net losses of \$112 million on credit derivatives mainly related to contracts tied to our own credit and net losses of \$101 million on embedded derivatives within certain variable annuity contracts, net of the effect of a related derivative hedging portfolio. Contracts tied to our own credit primarily relate to a credit derivative we issued concurrent with the issuance of surplus notes by one of our insurance subsidiaries. For additional information regarding these surplus notes and the associated credit derivative see Liquidity and Capital Resources Financing Activities. For information regarding our externally managed investments in the European market, see General Account Investments Fixed Maturity Securities Asset-Backed Securities.

Net realized losses on other investments were \$127 million in the third quarter of 2009, primarily related to \$106 million of increases to commercial mortgage and other loan loss reserves. The remaining \$21 million of net realized losses on other investments was primarily driven by losses in our real estate and relocation services businesses and our divested commercial mortgage securitization operations, as well as \$6 million of other-than-temporary impairments on joint ventures and partnerships and real estate investments. Net realized losses on other investments were \$25 million in the third quarter of 2008, including \$11 million of other-than-temporary impairments on real estate investments and investments in joint ventures and partnerships. The remaining \$14 million primarily related to mark-to-market losses on mortgage loans within our divested commercial mortgage securitization operations due to instability in the commercial mortgage-backed securities market during 2008. For additional information regarding our commercial mortgage and other loan loss reserves see General Account Investments Commercial Mortgage and Other Loans Commercial Mortgage and Other Loan Quality.

During the third quarter of 2009 we recorded other-than-temporary impairments of \$335 million in earnings, compared to total other-than-temporary impairments of \$415 million recorded in earnings in the third quarter of 2008. The following tables set forth, for the periods indicated, the composition of other-than-temporary impairments recorded in earnings attributable to the Financial Services Businesses by asset type, and for fixed maturity securities, by reason.

	Three Months Ended September 30, 2009 2008 (in millions)	
Other-than-temporary impairments recorded in earnings Financial Services Businesses(1)		
Public fixed maturity securities	\$ 244	\$ 328
Private fixed maturity securities	23	5
Total fixed maturity securities	267	333
Equity securities	62	71
Other invested assets(2)	6	11
Total	\$ 335	\$ 415

Table of Contents

- (1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.
- (2) Includes other-than-temporary impairments relating to investment real estate and investments in joint ventures and partnerships.

	Three Months Ended September 30, 2009		
	Asset-Backed Securities		
	Collateralized		
	By Sub-Prime Mortgages	All Other Fixed Maturity Securities (in millions)	Total Fixed Maturity Securities
Other-than-temporary impairments on fixed maturity securities recorded in earnings Financial Services Businesses(1)			
Due to credit events or adverse conditions of the respective issuer(2)	\$ 147	\$ 57	\$ 204
Due to other accounting guidelines(3)	2	61	63
Total	\$ 149	\$ 118	\$ 267

- (1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.
- (2) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. The amount of the impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.
- (3) Primarily represents circumstances where we intend to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis and amounts related to foreign currency translation losses for securities approaching maturity.

	Three Months Ended September 30, 2008		
	Asset-Backed Securities		
	Collateralized		
	By Sub-Prime Mortgages	All Other Fixed Maturity Securities (in millions)	Total Fixed Maturity Securities
Other-than-temporary impairments on fixed maturity securities recorded in earnings Financial Services Businesses			
Due to credit events or adverse conditions of the respective issuer(1)	\$ 38	\$ 197	\$ 235
Due to other accounting guidelines(2)	53	45	98
Total	\$ 91	\$ 242	\$ 333

- (1) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. In certain of these circumstances the decrease in fair value, at the time the impairment was recorded, was partially driven by general credit spread widening or liquidity concerns and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.
- (2) Includes certain circumstances relating to asset-backed securities with a credit rating below AA, where the present value of prospective cash flows of the security have declined, but we do not believe credit events or other adverse conditions of the respective issuers have caused a deficiency in the contractual cash flows related to the investment. Also includes circumstances where we cannot assert our ability or intent to hold for a period of time to allow for a recovery of value. In certain of these circumstances the decrease in fair value, at the time the impairment was recorded, was driven primarily by general credit spread widening or liquidity concerns, and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Fixed maturity other-than-temporary impairments in the third quarter of 2009 were concentrated in asset-backed securities collateralized by sub-prime mortgages, and the finance and manufacturing sectors of our corporate securities, and were primarily driven by liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers, which have caused, or we believe will lead to, a deficiency in the contractual cash flows related to the investment. Equity security other-than-temporary impairments in the third quarter of 2009 were primarily in our Japanese insurance operations equity portfolio. Other-than-temporary impairments of other investments in the third quarter of 2009 were mainly related to joint ventures and limited partnerships and real estate investments. Fixed maturity other-than-temporary impairments in the third quarter of

Table of Contents

2008 were concentrated in asset-backed securities and the finance and services sectors of our corporate securities, and were primarily driven by downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers. Fixed maturity other-than-temporary impairments in the third quarter of 2008 included \$82 million related to the filing of a Chapter 11 bankruptcy petition by Lehman Brothers Holdings Inc., or Lehman Brothers, and \$49 million related to American International Group, or AIG. Equity security other-than-temporary impairments in the third quarter of 2008 were primarily driven by overall declines in the Japanese equity markets.

As mentioned above, fixed maturity other-than-temporary impairments in the third quarter of 2008 included \$82 million related to the filing of a Chapter 11 bankruptcy petition by Lehman Brothers. In addition, the third quarter of 2008 also included a \$75 million loss associated with this bankruptcy filing relating to the unsecured portion of our counterparty exposure on derivative transactions we had entered into with Lehman Brothers and its affiliates. We replaced these derivative positions with various other counterparties. The counterparty loss was included in Asset management fees and other income, under the broker-dealer accounting model followed by our affiliated derivative subsidiary that executed these transactions, and was excluded from adjusted operating income as a related adjustment to Realized investment gains (losses), net. See Note 11 to the Unaudited Interim Consolidated Financial Statements for additional information.

Closed Block Business

For the Closed Block Business, net realized investment losses in the third quarter of 2009 were \$27 million, compared to net realized investment gains of \$119 million in the third quarter of 2008.

Net realized losses on fixed maturity securities were \$72 million in the third quarter of 2009, compared to net realized losses of \$54 million in the third quarter of 2008, as set forth in the following table:

	Three Months Ended September 30, 2009 2008	
	(in millions)	
Realized investment gains (losses) Fixed Maturity Securities Closed Block Business		
Gross realized investment gains:		
Gross gains on sales and maturities	\$ 24	\$ 114
Private bond prepayment premiums	7	15

Net gains (losses) on sales and maturities Fixed Maturity Investments(2)	\$ 14	\$ 51

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

- (1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.
- (2) Amounts exclude credit related losses through sales of investments pursuant to our credit risk and portfolio management objectives.

Net trading gains on sales and maturities of fixed maturity securities of \$14 million in the third quarter of 2009 were primarily due to sales related to our total return strategy. Gross losses on sales and maturities of fixed maturity securities of \$10 million in the third quarter of 2009, declined in comparison to \$63 million of such losses in the third quarter of 2008, primarily due to the restriction of our active trading policies, as discussed below. There were no gross losses on sales or maturities in the third quarter of 2009 or the third quarter of 2008 related to asset-backed securities collateralized by sub-prime mortgages. In light of unprecedented market

Table of Contents

conditions and in consideration of the potential impact on capital and tax positions, beginning in the fourth quarter of 2008 we curtailed our active trading policy. Starting in the second quarter of 2009, we resumed a more restricted trading program in these portfolios. These restrictions resulted in a lower level of realized gains and losses in this portfolio than might otherwise have been incurred. Net gains on sales and maturities of fixed maturity securities of \$51 million in the third quarter of 2008 were also primarily due to sales related to our total return strategy. See

General Account Investments Fixed Maturity Securities Asset-Backed Securities for additional information regarding our exposure to sub-prime mortgages. See below for additional information regarding the other-than-temporary impairments of fixed maturity securities in the third quarter of 2009 and 2008.

Net realized losses on equity securities were \$84 million in the third quarter of 2009, including other-than-temporary impairments of \$161 million, partially offset by net trading gains on sales of equity securities of \$77 million. Net realized losses on equity securities were \$46 million in the third quarter of 2008, of which net losses on sales of equity securities were \$32 million and other-than-temporary impairments were \$14 million. Results for both periods reflect sales pursuant to our total return strategy, which remained partially restricted for the third quarter of 2009, as discussed above. See below for additional information regarding the other-than-temporary impairments of equity securities in the third quarter of 2009 and 2008.

Net realized gains on derivatives were \$149 million in the third quarter of 2009, compared to net realized gains of \$235 million in the third quarter of 2008. Derivative gains in the third quarter of 2009 primarily reflect net mark-to-market gains of \$193 million on interest rate derivatives used to manage duration and net gains of \$29 million on embedded derivatives associated with certain externally managed investments in the European market. Partially offsetting these gains were net losses of \$71 million related to currency derivatives used to hedge foreign denominated investments. Derivative gains in the third quarter of 2008 primarily reflect net mark-to-market gains of \$152 million on currency derivatives used to hedge foreign investments and net gains of \$89 million on interest rate derivatives used to manage the duration of the fixed maturity investment portfolio.

Net realized losses on other investments were \$20 million in the third quarter of 2009, including \$13 million of other-than-temporary impairments on joint ventures and partnerships. The remaining \$7 million was primarily related to increases to commercial mortgage and other loan loss reserves. Net realized investment losses on other investments were \$16 million in the third quarter of 2008, primarily related to \$9 million of impairments on joint ventures and partnerships. For additional information regarding our commercial mortgage and other loan loss reserves see General Account Investments Commercial Mortgage and Other Loans Commercial Mortgage and Other Loan Quality.

During the third quarter of 2009 we recorded other-than-temporary impairments of \$267 million in earnings, compared to other-than-temporary impairments of \$142 million recorded in earnings in the third quarter of 2008. The following tables set forth, for the periods indicated, the composition of other-than-temporary impairments recorded in earnings attributable to the Closed Block Business by asset type, and for fixed maturity securities, by reason.

	Three Months Ended September 30, 2009 2008 (in millions)	
Other-than-temporary impairments recorded in earnings Closed Block Business(1)

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Fixed maturity other-than-temporary impairments in the third quarter of 2009 were concentrated in asset-backed securities collateralized by sub-prime mortgages, and the finance and manufacturing sectors of our corporate securities and were primarily driven by liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers, which have caused, or we believe will lead to, a deficiency in the contractual cash flows related to the investment. Fixed maturity other-than-temporary impairments in the third quarter of 2008 were concentrated in asset-backed securities and the services and finance sectors of our corporate securities and were primarily driven by downgrades in credit, bankruptcy or other adverse financial

Table of Contents

conditions of the respective issuers. Fixed maturity other-than-temporary impairments in the third quarter of 2008 included \$16 million related to the filing of a Chapter 11 bankruptcy petition by Lehman Brothers and \$30 million related to AIG. Equity security other-than-temporary impairments in both the third quarter of 2009 and 2008 were primarily driven by overall declines in the equity markets.

2009 to 2008 Nine Month Comparison*Financial Services Businesses*

The Financial Services Businesses net realized investment losses in the first nine months of 2009 were \$1,268 million, compared to net realized investment losses of \$1,744 million in the first nine months of 2008.

Net realized losses on fixed maturity securities were \$790 million in the first nine months of 2009, compared to net realized losses of \$1,266 million in the first nine months of 2008, as set forth in the following table:

	Nine Months Ended September 30, 2009 2008 (in millions)	
Realized investment gains (losses) Fixed Maturity Securities Financial Services Businesses		
Gross realized investment gains:		
Gross gains on sales and maturities	\$ 620	\$ 200
Private bond prepayment premiums	13	20
Total gross realized investment gains	633	220
Gross realized investment losses:		
Net other-than-temporary impairments recognized in earnings(1)	(1,018)	(1,173)
Gross losses on sales and maturities(2)	(313)	(265)
Credit related losses on sales	(92)	(48)
Total gross realized investment losses	(1,423)	(1,486)

Net gains (losses) on sales and maturities Fixed Maturity Investments(2)	\$ 307	\$ (65)

(1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

(2) Amounts exclude credit related losses through sales of investments pursuant to our credit risk and portfolio management objectives.

Gross trading gains on sales and maturities of fixed maturity securities of \$620 million in the first nine months of 2009 were primarily due to sales of government bonds in our Gibraltar Life and Japanese Life Planner operations and sales within our Individual Annuities segment. Sales of fixed maturity securities in our Individual Annuities segment were primarily due to transfers of investments out of our general account and

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

into separate accounts relating to an automatic rebalancing element embedded in the living benefit features of some of our variable annuity products. None of the gross losses on sales and maturities in the first nine months of 2009 related to asset-backed securities collateralized by sub-prime mortgages. Gross losses on sales and maturities of fixed maturity investments of \$265 million in the first nine months of 2008, were primarily related to credit spread increases in the credit markets resulting generally from concerns over sub-prime mortgage exposures, and interest rates. None of the gross losses on sales and maturities in the first nine months of 2008 related to asset-backed securities collateralized by sub-prime mortgages. See [General Account Investments Fixed Maturity Securities Asset-Backed Securities](#) for additional information regarding our exposure to sub-prime mortgages. See below for additional information regarding the other-than-temporary impairments of fixed maturity securities in the first nine months of 2009 and 2008.

Table of Contents

Net realized losses on equity securities were \$419 million in the first nine months of 2009, of which other-than-temporary impairments were \$379 million and net trading losses on sales of equity securities were \$40 million. Net trading losses were primarily due to sales within our Gibraltar Life operations. Net realized losses on equity securities were \$256 million in the first nine months of 2008, of which other-than-temporary impairments were \$214 million and net trading losses on sales of equity securities were \$42 million. See below for additional information regarding the other-than-temporary impairments of equity securities in the first nine months of 2009 and 2008.

Net realized gains on derivatives were \$355 million in the first nine months of 2009, compared to net realized losses of \$129 million in the first nine months of 2008. The net derivative gains in the first nine months of 2009 primarily reflect net gains of \$630 million on embedded derivatives associated with certain variable annuity contracts, net of the impact of our hedging program, primarily in our Individual Annuities Segment. For additional information regarding these embedded derivatives and our hedging programs, see Results of Operations for Financial Services Businesses by Segment U.S. Retirement Solutions and Investment Management Division Individual Annuities. Also contributing to the net derivative gains in the first nine months of 2009 were gains of \$148 million on embedded derivatives associated with certain externally managed investments in the European market. Partially offsetting these gains were net mark-to-market losses of \$309 million on interest rate derivatives used to manage duration and net losses of \$118 million on currency derivatives used to hedge foreign denominated investments. The net derivative losses in the first nine months of 2008 primarily reflect net mark-to-market losses of \$318 million on embedded derivatives associated with certain externally managed investments in the European market and net losses of \$146 million on embedded derivatives within certain variable annuity contracts, net of the effect of a related derivative hedging portfolio. Partially offsetting these losses were mark to market gains of \$132 million on foreign currency forward contracts used to hedge the future income of non-U.S. businesses, net gains of \$62 million related to equity market hedges used in our asset management business, net gains of \$60 million on interest rate derivatives used to manage the duration of the fixed maturity investment portfolio, and net gains of \$58 million on currency derivatives used to hedge foreign investments in our domestic investment portfolio. For information regarding our externally managed investments in the European market, see General Account Investments Fixed Maturity Securities Asset-Backed Securities.

Net realized losses on other investments were \$414 million in the first nine months of 2009, primarily related to \$317 million of increases to commercial mortgage and other loan loss reserves. The remaining \$96 million of net realized losses on other investments was primarily driven by mark-to-market losses on mortgage loans within our divested commercial mortgage securitization operations and losses on real estate related joint ventures in our asset management operations, as well as \$34 million of other other-than-temporary impairments on joint ventures and partnerships and real estate investments. Net realized losses on other investments were \$93 million in the first nine months of 2008, primarily related to mark-to-market losses on mortgage loans within our divested commercial mortgage securitization operations due to instability in the commercial real estate market during 2008. For additional information regarding our commercial mortgage and other loan loss reserves see General Account Investments Commercial Mortgage and Other Loans Commercial Mortgage and Other Loan Quality.

Table of Contents

During the first nine months of 2009 we recorded other-than-temporary impairments of \$1,431 million in earnings, compared to total other-than-temporary impairments of \$1,405 million recorded in earnings in the first nine months of 2008. The following tables set forth, for the periods indicated, the composition of other-than-temporary impairments recorded in earnings attributable to the Financial Services Businesses by asset type, and for fixed maturity securities, by reason.

	Nine Months Ended September 30, 2009 2008 (in millions)

Due to other accounting guidelines(3)	14	128	142
Total	\$ 598	\$ 420	\$ 1,018

- (1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.
- (2) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. The amount of the impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.
- (3) Primarily represents circumstances where we intend to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis and amounts related to foreign currency translation losses for securities approaching maturity.

Table of Contents

- (1) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. In certain of these circumstances the decrease in fair value, at the time the impairment was recorded, was partially driven by general credit spread widening or liquidity concerns and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.
- (2) Includes certain circumstances relating to asset-backed securities with a credit rating below AA, where the present value of prospective cash flows of the security have declined, but we do not believe credit events or other adverse conditions of the respective issuers have caused a deficiency in the contractual cash flows related to the investment. Also includes circumstances where we cannot assert our ability or intent to hold for a period of time to allow for a recovery of value. In certain of these circumstances the decrease in fair value, at the time the impairment was recorded, was driven primarily by general credit spread widening or liquidity concerns, and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.

Fixed maturity other-than-temporary impairments in the first nine months of 2009 were concentrated in asset-backed securities collateralized by sub-prime mortgages, and the manufacturing and services sectors of our corporate securities, and were primarily driven by liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers, which have caused, or we believe will lead to, a deficiency in the contractual cash flows related to the investment. Equity security other-than-temporary impairments in the first nine months of 2009 were primarily driven by overall declines in the Japanese equity markets and losses in fund shares representing our interest in high yield bond funds of certain of our separate account investments supporting corporate owned life insurance. Fixed maturity other-than-temporary impairments in the first nine months of 2008 were concentrated in asset-backed securities and the finance, services, and manufacturing sectors of our corporate securities, and were primarily driven by credit spread increases as discussed above, liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers. Fixed maturity other-than-temporary impairments in the first nine months of 2008 included \$82 million related to the filing of a Chapter 11 bankruptcy petition by Lehman Brothers and \$49 million related to AIG. Equity security other-than-temporary impairments in the first nine months of 2008 were primarily driven by overall declines in the Japanese equity markets.

As mentioned above, fixed maturity other-than-temporary impairments in the first nine months of 2008 included \$82 million related to the filing of a bankruptcy petition by Lehman Brothers. In addition, the first nine months of 2008 also included a \$75 million loss associated with this bankruptcy filing relating to the unsecured portion of our counterparty exposure on derivative transactions we had entered into with Lehman Brothers and its affiliates. We replaced these derivative positions with various other counterparties. The loss was included in Asset management fees and other income, under the broker-dealer accounting model followed by our affiliated derivative subsidiary that executed these transactions, and was excluded from adjusted operating income as a related adjustment to Realized investment gains (losses), net. See Note 11 to the Unaudited Interim Consolidated Financial Statements for additional information.

Table of Contents*Closed Block Business*

For the Closed Block Business, net realized investment losses in the first nine months of 2009 were \$1,319 million, compared to net realized investment losses of \$339 million in the first nine months of 2008.

Net realized losses on fixed maturity securities were \$369 million in the first nine months of 2009, compared to net realized losses of \$269 million in the first nine months of 2008, as set forth in the following table:

	Nine Months Ended September 30,	
	2009	2008
	(in millions)	
Realized investment gains (losses) Fixed Maturity Securities Closed Block Business		
Gross realized investment gains:		
Gross gains on sales and maturities	\$ 137	\$ 439
Private bond prepayment premiums	9	23
Total gross realized investment gains	146	462
Gross realized investment losses:		
Net other-than-temporary impairments recognized in earnings(1)	(446)	(479)
Gross losses on sales and maturities(2)	(64)	(224)
Credit related losses on sales	(5)	(28)
Total gross realized investment losses	(515)	(731)
Realized investment gains (losses), net Fixed Maturity Securities	\$ (369)	\$ (269)
Net gains (losses) on sales and maturities Fixed Maturity Investments(2)	\$ 73	\$ 215

(1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

(2) Amounts exclude credit related losses through sales of investments pursuant to our credit risk and portfolio management objectives.

Net gains on sales and maturities of fixed maturity securities of \$73 million in the first nine months of 2009 were primarily due to sales related to our total return strategy. Gross losses on sales and maturities of fixed maturity securities of \$64 million in the first nine months of 2009, declined in comparison to \$224 million of such losses in the first nine months of 2008, primarily due to the restriction of our active trading policies, as discussed below. There were no gross losses on sales or maturities in the first nine months of 2009 or the first nine months of 2008 related to asset-backed securities collateralized by sub-prime mortgages. In light of the unprecedented market conditions and in consideration of the potential impact on capital and tax positions, beginning in the fourth quarter of 2008 we curtailed our active trading policy. Starting in the second quarter of 2009, we resumed a more restricted trading program in these portfolios. These restrictions resulted in a lower level of realized gains and losses in this portfolio than might otherwise have been incurred. Net gains on sales and maturities of fixed maturity securities of \$215 million in the first nine months of 2008 were also primarily due to sales related to our total return strategy. See General Account Investments Fixed Maturity Securities Asset-Backed Securities for additional information regarding our exposure to sub-prime mortgages. See below for additional information regarding the other-than-temporary impairments of fixed maturity securities in the first nine months of 2009 and 2008.

Net realized losses on equity securities were \$523 million in the first nine months of 2009, of which other-than-temporary impairments were \$600 million, partially offset by net trading gains on sales of equity securities of \$77 million. Net realized losses on equity securities were \$252 million in the first nine months of 2008, of which other-than-temporary impairments were \$201 million, and net trading losses on sales of equity securities were \$51 million. Net trading losses for the first nine months of 2008 reflect sales pursuant to our active

Table of Contents

management strategy, which was curtailed or partially restricted for the first nine months of 2009, as discussed above. See below for additional information regarding the other-than-temporary impairments of equity securities in the first nine months of 2009 and 2008.

Net realized losses on derivatives were \$303 million in the first nine months of 2009, compared to net realized gains of \$207 million in the first nine months of 2008. Derivative losses in the first nine months of 2009 primarily reflect net mark-to-market losses of \$201 million on interest rate derivatives used to manage the duration of the fixed maturity investment portfolio and net losses of \$153 million related to currency derivatives used to hedge foreign denominated investments. Derivative gains in the first nine months of 2008 primarily reflect net mark-to-market gains of \$121 million on interest rate derivatives used to manage the duration of the fixed maturity investment portfolio, net gains \$68 million on currency derivatives used to hedge foreign investments and net gains of \$42 million on credit derivatives used to hedge credit exposure in our investment portfolio.

Net realized losses on other investments were \$124 million in the first nine months of 2009, including \$51 million of other-than-temporary impairments on joint ventures and partnerships. The remaining \$73 million was primarily related to increases to commercial mortgage loan loss reserves. Net realized investment losses on other investments were \$25 million in the first nine months of 2008, primarily related to impairments on joint ventures and partnerships. For additional information regarding our commercial mortgage and other loan loss reserves see [General Account Investments](#) [Commercial Mortgage and Other Loans](#) [Commercial Mortgage and Other Loan Quality](#).

During the first nine months of 2009 we recorded other-than-temporary impairments of \$1,097 million in earnings, compared to other-than-temporary impairments of \$695 million recorded in earnings in the first nine months of 2008. The following tables set forth, for the periods indicated, the composition of other-than-temporary impairments recorded in earnings attributable to the Closed Block Business by asset type, and for fixed maturity securities, by reason.

	Nine Months Ended September 30,	
	2009	2008
	(in millions)	
Other-than-temporary impairments recorded in earnings Closed Block Business(1)		
Public fixed maturity securities	\$ 411	\$ 455
Private fixed maturity securities	35	24
Total fixed maturity securities	446	479
Equity securities	600	201
Other invested assets(2)	51	15
Total	\$ 1,097	\$ 695

- (1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.
- (2) Includes other-than-temporary impairments relating to investments in joint ventures and partnerships.

	Asset-Backed Securities		
	Collateralized		
	by Sub-Prime Mortgages	All Other Fixed Maturity Securities (in millions)	Total Fixed Maturity Securities
Other-than-temporary impairments on fixed maturity securities recorded in earnings Closed Block Business			
Due to credit events or adverse conditions of the respective issuer(1)	\$ 36	\$ 98	\$ 134
Due to other accounting guidelines(2)	282	63	345
Total	\$ 318	\$ 161	\$ 479

- (1) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. In certain of these circumstances the decrease in the fair value, at the time the impairment was recorded, was partially driven by general credit spread widening or liquidity concerns and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.
- (2) Includes certain circumstances relating to asset-backed securities with a credit rating below AA, where the present value of prospective cash flows of the security have declined, but we do not believe credit events or other adverse conditions of the respective issuers have caused a deficiency in the contractual cash flows related to the investment. Also includes circumstances where we cannot assert our ability or intent to hold for a period of time to allow for a recovery of value. In certain of these circumstances the decrease in fair value, at the time the impairment was recorded, was driven primarily by general credit spread widening or liquidity concerns, and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.

Fixed maturity other-than-temporary impairments in the first nine months of 2009 were concentrated in asset-backed securities collateralized by sub-prime mortgages, and the manufacturing and services sectors of our corporate securities and were primarily driven by liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers, which have caused, or we believe will lead to, a deficiency in the contractual cash flows related to the investment. Other-than-temporary impairments in the first nine months of 2008 were concentrated in asset-backed securities and the services, finance, and manufacturing sectors of our corporate securities and were primarily driven by credit spread increases as discussed above, liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers. Fixed maturity other-than-temporary impairments in the first nine months of 2008 included \$16 million related to the filing of

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

a Chapter 11 bankruptcy petition by Lehman Brothers and \$30 million related to AIG. Equity security other-than-temporary impairments in the first nine months of 2009 and 2008 were primarily driven by overall declines in the equity markets.

Table of Contents**General Account Investments***Portfolio Composition*

Our investment portfolio consists of public and private fixed maturity securities, commercial mortgage and other loans, equity securities and other invested assets. The composition of our general account reflects, within the discipline provided by our risk management approach, our need for competitive results and the selection of diverse investment alternatives available primarily through our Asset Management segment. The size of our portfolio enables us to invest in asset classes that may be unavailable to the typical investor. The following tables set forth the composition of the investments of our general account apportioned between the Financial Services Businesses and the Closed Block Business as of the dates indicated.

	Financial Services Businesses	September 30, 2009		% of Total
		Closed Block Business	Total

Table of Contents

- (1) Other long-term investments consist of real estate and non-real estate related investments in joint ventures (other than our investment in operating joint ventures, which includes our investment in Wachovia Securities) and partnerships, investment real estate held through direct ownership and other miscellaneous investments.
- (2) Short-term investments consist primarily of money market funds with virtually no sub-prime exposure.
- (3) Includes invested assets of brokerage, trading and banking operations, real estate and relocation services, and asset management operations. Excludes assets of our asset management operations managed for third parties and those assets classified as Separate account assets on our balance sheet. For additional information regarding these investments, see Invested Assets of Other Entities and Operations below.

As of September 30, 2009, the average duration of our general account investment portfolio attributable to the domestic Financial Services Businesses, including the impact of derivatives, is between 4 and 5 years. The increase in general account investments attributable to the Financial Services Businesses in the first nine months of 2009 was primarily a result of a net increase in fair value driven by credit spread tightening, portfolio growth as a result of reinvestment of net investment income, the investment of proceeds from our debt and equity issuances in the second and third quarter of 2009, the acquisition of Yamato Life and the impact of foreign currency. The increase in general account investments attributable to the Closed Block Business in the first nine months of 2009 was primarily due to a net increase in market value and portfolio growth as a result of reinvestment of net investment income, partially offset by a decrease in leverage.

We have substantial insurance operations in Japan, with 35% of our Financial Services Businesses general account investments relating to our Japanese insurance operations as of both September 30, 2009 and December 31, 2008. The following table sets forth the composition of the investments of our Japanese insurance operations general account as of the dates indicated.

	September 30, 2009	December 31, 2008
	(in millions)	
Fixed Maturities:		
Public, available for sale, at fair value	\$ 47,643	\$ 42,223
Public, held to maturity, at amortized cost	4,110	3,002
Private, available for sale, at fair value	2,713	2,803
Private, held to maturity, at amortized cost	1,031	806
Trading account assets supporting insurance liabilities, at fair value	1,251	1,077
Other trading account assets, at fair value	669	519
Equity securities, available for sale, at fair value	1,522	2,071
Commercial mortgage and other loans, at book value	3,632	3,373
Policy loans, at outstanding balance	1,747	1,547
Other long-term investments(1)	1,088	2,143
Short-term investments	369	266
Total Japanese general account investments(2)	\$ 65,775	\$ 59,830

- (1) Other long-term investments consist of real estate and non-real estate related investments in joint ventures and partnerships, investment real estate held through direct ownership, derivatives, and other miscellaneous investments.
- (2) Excludes assets classified as Separate accounts assets on our balance sheet.

As of September 30, 2009 the average duration of our general account investment portfolio related to our Japanese insurance operations, including the impact of derivatives, is approximately 11 years. The increase in general account investments related to our Japanese insurance operations in the first nine months of 2009 is primarily attributable to the acquisition of Yamato Life, portfolio growth as a result of business inflows, a net increase in fair value driven by credit spread tightening, and the impact of changes in foreign currency exchange rates. For additional information regarding our acquisition of Yamato Life see Note 3 to the Unaudited Interim Consolidated Financial Statements.

Our Japanese insurance operations use the yen as their functional currency, as it is the currency in which they conduct the majority of their operations. Although the majority of the Japanese general account is invested

Table of Contents

in yen denominated investments, our Japanese insurance operations also hold significant investments denominated in U.S. dollars. As of September 30, 2009, our Japanese insurance operations had \$12.9 billion of investments denominated in U.S. dollars, including \$1.3 billion that were hedged to yen through third party derivative contracts and \$7.4 billion that support liabilities denominated in U.S. dollars. As of December 31, 2008, our Japanese insurance operations had \$12.3 billion of investments denominated in U.S. dollars, including \$1.1 billion that were hedged to yen through third party derivative contracts and \$6.0 billion that support liabilities denominated in U.S. dollars. For additional information regarding U.S. dollar investments held in our Japanese insurance operations see, Results of Operations for Financial Services Businesses by Segment International Insurance and Investments Division.

- (1) Yields are annualized, for interim periods, and based on quarterly averages calculated using beginning and end of period balances. Yields are based on carrying values except for fixed maturities, equity securities and securities lending activity. Yields for fixed maturities are based on amortized cost. Yields for equity securities are based on cost. Yields for fixed maturities and short-term investments and cash equivalents are calculated net of liabilities and rebate expenses corresponding to securities lending activity. Yields exclude investment income on assets other than those included in invested assets. Prior periods yields are presented on a basis consistent with the current period presentation.
- (2) Includes investment income of securities brokerage, securities trading, banking operations, real estate and relocation services, and asset management operations.

See below for a discussion of the change in the Financial Services Businesses yields. The decrease in net investment income yield attributable to the Closed Block Business for the three months ended September 30, 2009 compared to the three months ended September 30, 2008 was primarily due to the impact of lower interest rates on floating rate investments due to rate resets and lower income from short-term investments as a result of lower short-term rates.

- (1) Yields are annualized, for interim periods, and based on quarterly averages calculated using beginning and end of period balances. Yields are based on carrying values except for fixed maturities, equity securities and securities lending activity. Yields for fixed maturities are based on amortized cost. Yields for equity securities are based on cost. Yields for fixed maturities and short-term investments and cash equivalents are calculated net of liabilities and rebate expenses corresponding to securities lending activity. Yields exclude investment income on assets other than those included in invested assets. Prior periods yields are presented on a basis consistent with the current period presentation.
- (2) Includes investment income of securities brokerage, securities trading, banking operations, real estate and relocation services, and asset management operations.

See below for a discussion of the change in the Financial Services Businesses yields. The decrease in net investment income yield attributable to the Closed Block Business for the nine months ended September 30, 2009 compared to the nine months ended September 30, 2008 was primarily due to the impact of lower interest rates on floating rate investments due to rate resets, lower income from investments in joint ventures and limited partnerships, driven by lower appreciation and losses on the underlying assets, and lower income from short-term investments as a result of lower short-term rates.

Table of Contents

The following tables set forth the income yield and investment income, excluding realized investment gains (losses), for each major investment category of the Financial Services Business general account, excluding the Japanese operations portion of the general account which is presented separately below, for the periods indicated.

	Three Months Ended September 30, 2009		Three Months Ended September 30, 2008

The decrease in yield on the Japanese insurance portfolio for the three months ended September 30, 2009 compared to the three months ended September 30, 2008 is primarily attributable to a lower interest rate environment both in the U.S. and Japan which impacts reinvestment rates. The U.S. dollar denominated fixed maturities that are not hedged to yen through third party derivative contracts provide a yield that is substantially higher than the yield on comparable Japanese fixed maturities. The average value of U.S. dollar denominated fixed maturities that are not hedged to yen through third party derivative contracts for the three months ended September 30, 2009 and 2008 was approximately \$9.8 billion and \$11.0 billion, respectively, based on amortized cost. For additional information regarding U.S. dollar investments held in our Japanese insurance operations see, Results of Operations for Financial Services Businesses by Segment International Insurance and Investments Division.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Excluded from the above are securities held outside the general account in other entities and operations. For additional information regarding investments held outside the general account, see [Invested Assets of Other Entities and Operations](#) below.

- (5) The table above excludes fixed maturity securities classified as trading. See [Trading Account Assets Supporting Insurance Liabilities](#) and [Other Trading Account Assets](#) for additional information.

Table of Contents

The gross unrealized losses related to our fixed maturity portfolio attributable to the Financial Services Businesses of \$4.756 billion as of September 30, 2009 decreased compared to \$11.251 billion as of December 31, 2008, as credit spreads tightened across most asset classes. The gross unrealized gains related to our fixed maturity portfolio attributable to the Financial Services Businesses increased from \$4.684 billion as of December 31, 2008 to \$5.735 billion as of September 30, 2009, primarily due to a decrease in risk-free rates.

The following table sets forth the composition of the portion of our fixed maturity securities portfolio by industry category attributable to the Closed Block Business as of the dates indicated and the associated gross unrealized gains and losses.

- (2) As of September 30, 2009 and December 31, 2008, based on amortized cost, no individual foreign country represents more than 9% and 8%, respectively of the balance.
- (3) The table above excludes fixed maturity securities classified as trading. See [Other Trading Account Assets](#) for additional information.

The gross unrealized losses related to our fixed maturity portfolio attributable to the Closed Block Business decreased from \$5.319 billion as of December 31, 2008 to \$1.988 billion as of September 30, 2009, primarily due to credit spread tightening across most asset classes. The gross unrealized gains related to our fixed maturity portfolio attributable to the Closed Block Business increased from \$1.284 billion as of December 31, 2008 to \$2.217 billion as of September 30, 2009, primarily due to a decrease in risk-free rates.

Table of Contents*Asset-Backed Securities*

Included within asset-backed securities attributable to the Financial Services Businesses are securities collateralized by sub-prime mortgages. While there is no market standard definition, we define sub-prime mortgages as residential mortgages that are originated to weaker quality obligors as indicated by weaker credit scores, as well as mortgages with higher loan-to-value ratios, or limited documentation. The significant deterioration of the U.S. housing market, high interest rate resets, higher unemployment levels, and relaxed underwriting standards for some originators of sub-prime mortgages have led to higher delinquency rates, particularly for those mortgages issued in 2006 and 2007. The following tables set forth the amortized cost and fair value of our asset-backed securities attributable to the Financial Services Businesses as of the dates indicated, by credit quality, and for asset-backed securities collateralized by sub-prime mortgages, by year of issuance (vintage).

- (1) Our enhanced short-term portfolio is used primarily to invest cash proceeds of securities lending and repurchase activities, commercial paper issuances and cash generated from certain trading and operating activities. The investment policy statement of this portfolio requires that securities purchased for this portfolio have a remaining expected average life of 2 years or less when acquired.
- (2) Included within the \$4.5 billion of asset-backed securities collateralized by sub-prime mortgages as of September 30, 2009 are \$0.5 billion of securities collateralized by second-lien exposures.
- (3) As of September 30, 2009, includes the \$(307) million impact of the bifurcated embedded derivative described below.
- (4) As of September 30, 2009, includes collateralized debt obligations with amortized cost of \$444 million and fair value of \$381 million, with less than 1% secured by sub-prime mortgages. Also includes asset-backed securities collateralized by education loans, equipment leases, timeshares, aircraft, and franchises.
- (5) Excluded from the tables above are asset-backed securities held outside the general account in other entities and operations. For additional information regarding asset-backed securities held outside the general account, see *Invested Assets of Other Entities and Operations* below. Also excluded from the table above are asset-backed securities classified as trading and carried at fair value. See *Trading Account Assets Supporting Insurance Liabilities* and *Other Trading Account Assets* for additional information regarding these securities.

Table of Contents

The tables above provide ratings as assigned by nationally recognized rating agencies as of September 30, 2009, including Standard & Poor's, Moody's, and Fitch. In making our investment decisions, rather than relying solely on the rating agencies' evaluations, we assign internal ratings to our asset-backed securities based upon our dedicated asset-backed securities unit's independent evaluation of the underlying collateral and securitization structure, including any guarantees from monoline bond insurers. The following table sets forth the percentage, based on amortized cost, of our asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses by lowest rating agency rating, as of the dates indicated.

Asset-Backed Securities Collateralized by Sub-prime Mortgages - Financial Services Businesses

	Lowest Rating Agency Rating				BB and below
	AAA	AA	A	BBB	
December 31, 2008	22%	22%	13%	22%	21%
March 31, 2009	6%	18%	14%	18%	44%
June 30, 2009	4%	17%	12%	10%	57%
September 30, 2009	3%	15%	9%	9%	64%

The changes in the ratings above reflect the impact of both paydowns in the senior tranches and increased rating agency downgrade activity generally consistent with the continued collateral deterioration.

On an amortized cost basis, asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses decreased from \$5.356 billion as of December 31, 2008 to \$4.542 billion as of September 30, 2009, primarily reflecting principal paydowns and other-than-temporary impairments recognized, partially offset by the increase in amortized cost resulting from our adoption of new authoritative guidance related to other-than-temporary impairments of debt securities on January 1, 2009. For additional information regarding our adoption of this guidance, see Note 2 to the Unaudited Interim Consolidated Financial Statements. Gross unrealized losses related to our asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses were \$1.507 billion as of September 30, 2009 and \$1.781 billion as of December 31, 2008. For additional information regarding other-than-temporary impairments of asset-backed securities collateralized by sub-prime mortgages see Realized Investment Gains and Losses above. For information regarding the methodology used in determining the fair value of our asset-backed securities collateralized by sub-prime mortgages, including the impact of our determination that the market for these securities was an inactive market, see Note 12 to the Unaudited Interim Consolidated Financial Statements.

The weighted average estimated subordination percentage of our asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses, excluding those supported by guarantees from monoline bond insurers, was 30% as of September 30, 2009. The subordination percentage represents the current weighted average estimated percentage of the capital structure subordinated to our investment holding that is available to absorb losses before the security incurs the first dollar loss of principal. As of September 30, 2009, based on amortized cost, approximately 77% of the asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses have estimated credit subordination percentages of 20% or more, and 41% have estimated credit subordination percentages of 30% or more.

In addition to subordination, certain securities, referred to as front pay or second pay securities, benefit from the prioritization of principal cash flows within the senior tranches of the structure. In most instances, these shorter duration senior securities have priority to principal cash flows over other securities in the structure, including longer duration senior securities. Included within the \$4.542 billion of asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses as of September 30, 2009 were \$1.178 billion of securities, on an amortized cost basis, that represent front pay or second pay securities, depending on the overall structure of the securities.

Table of Contents

The \$689 million of externally managed investments in the European market, included above in asset-backed securities of the Financial Services Businesses as of September 30, 2009, reflects our investment in medium term notes that are collateralized by investment portfolios primarily consisting of European fixed income securities, including 47% European corporate and bank bonds, 22% bank capital, 10% European asset-backed securities, and 21% other, as well as derivatives and varying degrees of leverage. Our investment in these notes further diversifies our credit risk. As of September 30, 2009 none of the underlying investments are securities collateralized by U.S. sub-prime mortgages, and 84% of the underlying investments are rated investment grade. The notes have a stated coupon and provide a return based on the return of the underlying portfolios and the level of leverage. The notes are accounted for as available for sale fixed maturity securities with bifurcated embedded derivatives (total return swaps). Changes in the value of the fixed maturity securities are reported in Stockholders' Equity under the heading Accumulated Other Comprehensive Income. Changes in the market value of the embedded total return swaps are included in current period earnings in Realized investment gains (losses), net. As discussed further in Note 11 to the Unaudited Interim Consolidated Financial Statements, any changes in market value of the embedded total return swaps are excluded from adjusted operating income. The fair value of the embedded derivatives associated with these investments increased during the third quarter of 2009 due to the impact of credit spread tightening on the underlying investments. As of September 30, 2009 the embedded derivatives remain in a \$307 million loss position on a cumulative basis as a result of the stress experienced in the credit markets. However, we believe the investment fundamentals remain sound, and the ultimate value that will be realized from these investments is greater than reflected by the current fair value of the embedded derivatives. Beginning in the second quarter of 2008 and continuing through the third quarter of 2009, we restructured certain of these investments, which are now included as direct holdings in our portfolio, primarily classified within Other trading account assets, at fair value.

Included within asset-backed securities attributable to the Closed Block Business are securities collateralized by sub-prime mortgages, as defined above. The following tables set forth the amortized cost and fair value of our asset-backed securities attributable to the Closed Block Business as of the dates indicated, by credit quality, and for asset-backed securities collateralized by sub-prime mortgages, by year of issuance (vintage).

- (1) Our enhanced short-term portfolio is used primarily to invest cash proceeds of securities lending and repurchase activities, and cash generated from certain trading and operating activities. The investment policy statement of this portfolio requires that securities purchased for this portfolio have a remaining expected average life of 2 years or less when acquired.
- (2) Included within the \$3.7 billion of asset-backed securities collateralized by sub-prime mortgages as of September 30, 2009 are \$0.2 billion of securities collateralized by second-lien exposures.
- (3) As of September 30, 2009, includes the \$(97) million impact of the embedded derivative described below.
- (4) As of September 30, 2009, includes collateralized debt obligations with amortized cost of \$55 million and fair value of \$43 million, with none secured by sub-prime mortgages. Also includes asset-backed securities collateralized by equipment leases, timeshares, aircraft and franchises.
- (5) Excluded from the table above are asset-backed securities classified as other trading and carried at fair value. For additional information see Other Trading Account Assets.

Table of Contents

The following table sets forth the percentage, based on amortized cost, of our asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business by lowest rating agency rating, as of the dates indicated.

Asset-Backed Securities Collateralized by Sub-prime Mortgages Closed Block Business

	Lowest Rating Agency Rating				BB and below
	AAA	AA	A	BBB	
December 31, 2008	26%	25%	10%	18%	21%
March 31, 2009	9%	20%	9%	13%	49%
June 30, 2009	7%	19%	8%	10%	56%
September 30, 2009	6%	18%	6%	9%	61%

The changes in the ratings above reflect the impact of both paydowns in the senior tranches and increased rating agency downgrade activity generally consistent with the continued collateral deterioration.

On an amortized cost basis, asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business decreased from \$4.438 billion as of December 31, 2008 to \$3.671 billion as of September 30, 2009, primarily reflecting principal paydowns and other-than-temporary impairments recognized. Gross unrealized losses related to our asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business were \$1.138 billion as of September 30, 2009 and \$1.405 billion as of December 31, 2008. For additional information regarding other-than-temporary impairments of asset-backed securities collateralized by sub-prime mortgages see

Realized Investment Gains and Losses above. For information regarding the methodology used in determining the fair value of our asset-backed securities collateralized by sub-prime mortgages, including the impact of our determination that the market for these securities was an inactive market, see Note 12 to the Unaudited Interim Consolidated Financial Statements.

The weighted average estimated subordination percentage of asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business, excluding those supported by guarantees from monoline bond insurers, was 32% as of September 30, 2009. The subordination percentage represents the current weighted average estimated percentage of the capital structure subordinated to our investment holding that is available to absorb losses before the security incurs the first dollar loss of principal. As of September 30, 2009, based on amortized cost, approximately 80% of the asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business have estimated credit subordination percentages of 20% or more, and 44% have estimated credit subordination percentages of 30% or more.

In addition to subordination, certain securities, referred to as front pay or second pay securities, benefit from the prioritization of principal cash flows within the senior tranches of the structure. In most instances, these shorter duration senior securities have priority to principal cash flows over other securities in the structure, including longer duration senior securities. Included within the \$3.671 billion of asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business as of September 30, 2009 were \$1.174 billion of securities, on an amortized cost basis, that represent front pay or second pay securities, depending on the overall structure of the securities.

The \$184 million of externally managed investments in the European market, included in asset-backed securities of the Closed Block Business as of September 30, 2009, reflects our investment in medium term notes that are collateralized by investment portfolios primarily consisting of European fixed income securities, as described above. The notes are accounted for as available for sale fixed maturity securities with bifurcated embedded derivatives (total return swaps). The fair value of the embedded derivatives associated with these investments increased during the third quarter of 2009 due to the impact of credit spread tightening on the

Table of Contents

underlying investments. As of September 30, 2009 the embedded derivatives remain in a \$97 million loss position on a cumulative basis as a result of the stress experienced in the credit markets. However, we believe the investment fundamentals remain sound, and the ultimate value that will be realized from these investments is greater than reflected by the current fair value of the embedded derivatives.

Residential Mortgage-Backed Securities

As of September 30, 2009, on an amortized cost basis, \$10.182 billion of the residential mortgage-backed securities in the Financial Services Businesses were publicly traded agency pass-through securities, which are supported by implicit or explicit government guarantees and have credit ratings of A or above. Of these pass-through securities, \$8.572 billion are supported by the U.S. government, and \$1.610 billion are supported by foreign governments. Collateralized mortgage obligations, including approximately \$41 million secured by ALT-A mortgages, represented the remaining \$78 million of residential mortgage-backed securities (and less than 1% of total fixed maturities in the Financial Services Businesses), of which 41% have credit ratings of A or above, 16% have BBB credit ratings and the remaining 43% have below investment grade ratings.

As of September 30, 2009, on an amortized cost basis, \$2.549 billion of the residential mortgage-backed securities in the Closed Block Business were publicly traded agency pass-through securities, which are supported by implicit or explicit U.S. government guarantees and have credit ratings of A or above. Collateralized mortgage obligations, including approximately \$129 million secured by ALT-A mortgages, represented the remaining \$318 million of residential mortgage-backed securities (and 1% of total fixed maturities in the Closed Block Business), of which 58% have A credit ratings or above, and 42% have below investment grade ratings.

Commercial Mortgage-Backed Securities

Weakness in commercial real estate fundamentals, along with an overall decrease in liquidity and availability of capital have led to a very difficult refinancing environment and an increase in the overall delinquency rate on commercial mortgages in the commercial mortgage-backed securities market. Difficult conditions in the global financial markets and the overall economic downturn continue to put additional pressure on these fundamentals through rising vacancies, falling rents and falling property values. In addition, we have observed several market factors related to commercial mortgage-backed securities issued in 2006 and 2007, including less stringent underwriting, higher levels of leverage and collateral valuations that are generally no longer realizable. To ensure our investment objectives and asset strategies are maintained, we consider these market factors in making our investment decisions on securities in these vintages. The following tables set forth the amortized cost and fair value of our commercial mortgage-backed securities attributable to the Financial Services Businesses as of the dates indicated by credit quality and by year of issuance (vintage).

See *Trading Account Assets Supporting Insurance Liabilities* for additional information regarding these securities.
- (2) Included in the table above as of September 30, 2009 are commercial mortgage-backed securities collateralized by Non-U.S. properties with amortized cost of \$11 million in AAA, none in AA, \$20 million in A, \$116 million in BBB and \$195 million in BB and below.
- (3) Included in the table above as of September 30, 2009 are downgraded super senior securities with amortized cost of \$80 million in AA and \$36 million in A.

The weighted average estimated subordination percentage of our commercial mortgage-backed securities attributable to the Financial Services Businesses was 33% as of September 30, 2009. The subordination percentage represents the current weighted average estimated percentage of the capital structure subordinated to our investment holding that is available to absorb losses before the security incurs the first dollar loss of principal. The weighted average estimated subordination percentage includes an adjustment for that portion of the capital structure, which has been effectively defeased by U.S. Treasury securities. As of September 30, 2009, based on amortized cost, approximately 92% of the commercial mortgage-backed securities attributable to the Financial Services Businesses have estimated credit subordination percentages of 20% or more, and 76% have estimated credit subordination percentages of 30% or more. The following tables set forth the weighted average estimated subordination percentage, adjusted for that portion of the capital structure which has been effectively defeased by U.S. Treasury securities, of our commercial mortgage-backed securities collateralized by U.S. and Non-U.S. properties, attributable to the Financial Services Businesses based on amortized cost as of September 30, 2009, by rating and vintage.

2004 & Prior						

The super senior structure was introduced to the U.S. commercial mortgage-backed securities market in late 2004 and was modified in early 2005 to increase subordination from 20% to 30%. With the changes to the commercial mortgage-backed securities structure in 2005, there became three distinct AAA classes for commercial mortgage-backed securities with fixed rate terms, (1) super senior AAA with 30% subordination, (2) mezzanine AAA with 20% subordination and (3) junior AAA with approximately 14% subordination. The super senior class has priority over the mezzanine and junior classes to all principal cashflows (repayments, prepayments and recoveries on defaulted loans). As a result, all super senior bonds must be completely repaid before the mezzanine or junior bonds receive any principal cashflows. In addition, the super senior bonds will not experience any loss of principal until both the entire mezzanine and junior bonds are written-down to zero. We believe the importance of this additional credit enhancement afforded to the super senior class over the mezzanine and junior classes is limited in a benign commercial real estate cycle with low defaults but becomes more significant in a deep commercial real estate downturn under which expected losses increase substantially.

In addition to enhanced subordination, certain securities within the super senior class benefit from the prioritization of principal cash flows. The super senior class is generally structured such that shorter duration time tranches have priority over longer duration time tranches as to all principal cashflows (repayments, prepayments, and recoveries on defaulted loans) until the deal reaches 30% cumulative net loss, at which point all super senior securities are paid pro rata. As a result, short of reaching 30% cumulative net losses, the shorter duration super senior tranches must be completely repaid before the longest duration super senior tranche receives any principal cashflows. We have generally focused our purchases of recent vintage commercial mortgage-backed securities on shorter duration super senior tranches that we believe have sufficient priority to ensure that in most scenarios our positions will be fully repaid prior to the structure reaching the 30% cumulative net loss threshold. The following tables set forth the amortized cost of our AAA commercial mortgage-backed securities attributable to the Financial Services Businesses as of the dates indicated, by type and by year of issuance (vintage).

The weighted average estimated subordination percentage of commercial mortgage-backed securities attributable to the Closed Block Business was 29% as of September 30, 2009. See above for a definition of this percentage. As of September 30, 2009, based on amortized cost, approximately 86% of the commercial mortgage-backed securities attributable to the Closed Block Business have estimated credit subordination percentages of 20% or more, and 50% have estimated credit subordination percentages of 30% or more. The following tables set forth the weighted average estimated subordination percentage, adjusted for that portion of the capital structure which has been effectively defeased by US Treasury securities, of our commercial mortgage-backed securities attributable to the Closed Block Business based on amortized cost as of September 30, 2009, by rating and vintage.

Fixed Maturity Securities Credit Quality

The Securities Valuation Office, or SVO, of the NAIC, evaluates the investments of insurers for regulatory reporting purposes and assigns fixed maturity securities to one of six categories called NAIC Designations. NAIC designations of 1 or 2 include fixed maturities considered investment grade, which include securities rated Baa3 or higher by Moody's or BBB- or higher by Standard & Poor's. NAIC Designations of 3 through 6 are referred to as below investment grade, which include securities rated Ba1 or lower by Moody's and BB+ or lower by Standard & Poor's. As a result of time lags between the funding of investments, the finalization of legal documents and the completion of the SVO filing process, the fixed maturity portfolio generally includes securities that have not yet been rated by the SVO as of each balance sheet date. Pending receipt of SVO ratings, the categorization of these securities by NAIC designation is based on the expected ratings indicated by internal analysis.

Investments of our international insurance companies are not subject to NAIC guidelines. Investments of our Japanese insurance operations are regulated locally by the Financial Services Agency, an agency of the Japanese government. The Financial Services Agency has its own investment quality criteria and risk control standards. Our Japanese insurance companies comply with the Financial Services Agency's credit quality review and risk monitoring guidelines. The credit quality ratings of the non-U.S. dollar denominated investments of our Japanese insurance companies are based on ratings assigned by Moody's, Standard & Poor's, or rating equivalents based on ratings assigned by Japanese credit ratings agencies.

The amortized cost of our public and private below investment grade fixed maturities attributable to the Financial Services Businesses totaled \$10.8 billion, or 8%, of the total fixed maturities as of September 30, 2009 and \$9.0 billion, or 7%, of the total fixed maturities as of December 31, 2008. Below investment grade fixed maturities represented 36% and 19% of the gross unrealized losses attributable to the Financial Services Businesses as of September 30, 2009 and December 31, 2008, respectively. The increase in below investment grade fixed maturity securities is primarily due to credit migration on existing securities, rather than new originations or purchases.

The amortized cost of our public and private below investment grade fixed maturities attributable to the Closed Block Business totaled \$7.5 billion, or 18%, of the total fixed maturities as of September 30, 2009 and \$6.6 billion, or 15%, of the total fixed maturities as of December 31,

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

2008. Below investment grade fixed maturities represented 52% of the gross unrealized losses attributable to the Closed Block Business as of September 30, 2009, compared to 29% of gross unrealized losses as of December 31, 2008.

Credit Derivative Exposure to Public Fixed Maturities

In addition to the credit exposure from public fixed maturities noted above, we sell credit derivatives to enhance the return on our investment portfolio by creating credit exposure similar to an investment in public fixed maturity cash instruments.

In a credit derivative we sell credit protection on an identified name, or a basket of names in a first to default structure, and in return receive a quarterly premium. With single name credit default derivatives, this premium or credit spread generally corresponds to the difference between the yield on the referenced name's public fixed maturity cash instruments and swap rates, at the time the agreement is executed. With first-to-default baskets, because of the additional credit risk inherent in a basket of named credits, the premium generally corresponds to a high proportion of the sum of the credit spreads of the names in the basket. If there is an event of default by the referenced name or one of the referenced names in a basket, as defined by the agreement, then we are obligated to pay the counterparty the referenced amount of the contract and receive in return the referenced defaulted security or similar security. Subsequent defaults on the remaining names within such instruments require no further payment to counterparties.

The majority of referenced names in the credit derivatives where we have sold credit protection, as well as all the counterparties to these agreements, are investment grade credit quality and our credit derivatives generally have maturities of five years or less. Credit derivative contracts are recorded at fair value with changes in fair value, including the premium received, recorded in Realized investment gains (losses), net. The premium received for the credit derivatives we sell attributable to the Financial Services Businesses was \$2 million and \$7 million for the three and nine months ended September 30, 2009, respectively, and \$3 million and \$10 million for the three and nine months ended September 30, 2008, respectively, and is included in adjusted operating income as an adjustment to Realized investment gains (losses), net.

Table of Contents

The following tables set forth our exposure where we have sold credit protection through credit derivatives in the Financial Services Businesses by NAIC rating of the underlying credits as of the dates indicated.

Credit Derivatives, Sold Protection Financial Services Businesses

(2)

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Excludes embedded derivatives contained in certain externally-managed investments in the European market. See Note 14 to the Unaudited Interim Consolidated Financial Statements for additional information regarding these derivatives.

In addition to selling credit protection, we have purchased credit protection using credit derivatives in order to hedge specific credit exposures in our investment portfolio, including exposures relating to certain guarantees from monoline bond insurers. As of September 30, 2009 and December 31, 2008, the Financial Services Businesses had \$1.863 billion and \$1.069 billion of outstanding notional amounts, reported at fair value as a \$150 million asset and a \$189 million asset, respectively. As of September 30, 2009 and December 31, 2008, the Closed Block Business had \$480 million and \$309 million of outstanding notional amounts, reported at fair value as an asset of \$67 million and \$64 million, respectively. The premium paid for the credit derivatives we purchase attributable to the Financial Services Businesses was \$13 million and \$32 million for the three and nine months ended September 30, 2009, respectively, and \$6 million and \$15 million for the three and nine months ended

Table of Contents

September 30, 2008, respectively, and is included in adjusted operating income as an adjustment to Realized investment gains (losses), net. See Note 14 to the Unaudited Interim Consolidated Financial Statements for additional information regarding credit derivatives and an overall description of our derivative activities.

Unrealized Losses from Fixed Maturity Securities

The following table sets forth the amortized cost and gross unrealized losses of fixed maturity securities attributable to the Financial Services Businesses where the estimated fair value had declined and remained below amortized cost by 20% or more for the following timeframes:

Unrealized Losses from Fixed Maturity Securities, Greater than 20% Financial Services Businesses

	September 30, 2009		December 31, 2008	
	Amortized Cost(1)	Gross Unrealized Losses(1)	Amortized Cost(1)	Gross Unrealized Losses(1)
	(in millions)			
Less than three months	\$ 654	\$ 114	\$ 9,612	\$ 2,605
Three months or greater but less than six months	322	83	13,481	4,623
Six months or greater but less than nine months	1,455	514	1,082	488
Nine months or greater but less than twelve months	1,567	463	272	159
Greater than twelve months	3,968	1,409		
Total	\$ 7,966	\$ 2,583	\$ 24,447	\$ 7,875

(1) The aging of amortized cost and gross unrealized losses is determined based upon a count of the number of months the estimated fair value remained below amortized cost by 20% or more, using month-end valuations. The month count was reset back to historical unrealized loss month counts for securities impacted by the adoption of new authoritative guidance related to other-than-temporary impairments on January 1, 2009.

The gross unrealized losses were primarily concentrated in asset-backed securities as of September 30, 2009 and December 31, 2008. Gross unrealized losses attributable to the Financial Services Businesses where the estimated fair value had declined and remained below amortized cost by 20% or more of \$2.583 billion as of September 30, 2009 includes \$1.357 billion relating to asset-backed securities collateralized by sub-prime mortgages. Gross unrealized losses attributable to the Financial Services Businesses where the estimated fair value had declined and remained below amortized cost by 20% or more as of September 30, 2009 also includes \$93 million of gross unrealized losses on securities with amortized cost of \$144 million where the estimated fair value had declined and remained below amortized cost by 50% or more, of which, \$1 million was included in the three months or greater but less than six months timeframe, \$11 million was included in the six months or greater but less than nine months timeframe, \$7 million was included in the nine months or greater but less than twelve months timeframe and \$74 million was included in the greater than twelve months timeframe. We have not recognized the gross unrealized losses shown in the tables above as other-than-temporary impairments in earnings based on our detailed analysis of the underlying credit and cashflows on each of these securities. The gross unrealized losses are primarily attributable to general credit spread widening in the structured credit marketplace and liquidity discounts, and we believe the recoverable value of these investments based on the expected future cash flows is greater than or equal to our remaining amortized cost. At September 30, 2009, we do not intend to sell these securities and it is not more likely than not that we will be required to sell these securities before the anticipated recovery of its remaining amortized cost basis. See Other-Than-Temporary Impairments of Fixed Maturity Securities for a discussion of the factors we consider in making these determinations.

Table of Contents

The following table sets forth the amortized cost and gross unrealized losses of fixed maturity securities attributable to the Closed Block Business where the estimated fair value had declined and remained below amortized cost by 20% or more for the following timeframes:

Unrealized Losses from Fixed Maturity Securities, Greater than 20% Closed Block Business

	September 30, 2009		December 31, 2008	
	Amortized Cost(1)	Gross Unrealized Losses(1)	Amortized Cost(1)	Gross Unrealized Losses(1)
	(in millions)			
Less than three months	\$ 588	\$ 201	\$ 3,377	\$ 928
Three months or greater but less than six months	27	9	6,159	2,338
Six months or greater but less than nine months	861	316	662	325
Nine months or greater but less than twelve months	361	122	25	21
Greater than twelve months	1,640	629		
Total	\$ 3,477	\$ 1,277	\$ 10,223	\$ 3,612

- (1) The aging of amortized cost and gross unrealized losses is determined based upon a count of the number of months the estimated fair value remained below amortized cost by 20% or more, using month-end valuations. The month count was reset back to historical unrealized loss month counts for securities impacted by the adoption of new authoritative guidance related to other-than-temporary impairments on January 1, 2009.

The gross unrealized losses were primarily concentrated in asset-backed securities as of September 30, 2009 and December 31, 2008. Gross unrealized losses attributable to the Closed Block Business where the estimated fair value had declined and remained below amortized cost by 20% or more of \$1.277 billion as of September 30, 2009 includes \$1.036 billion relating to asset-backed securities collateralized by sub-prime mortgages. Gross unrealized losses attributable to the Closed Block Business where the estimated fair value had declined and remained below amortized cost by 20% or more as of September 30, 2009 does not include any gross unrealized losses on securities where the estimated fair value had declined and remained below amortized cost by 50% or more. We have not recognized the gross unrealized losses shown in the tables above as other-than-temporary impairments in earnings based on our detailed analysis of the underlying credit and cashflows on each of these securities. The gross unrealized losses are primarily attributable to general credit spread widening in the structured credit marketplace and liquidity discounts, and we believe the recoverable value of these investments based on the expected future cash flows is greater than or equal to our remaining amortized cost. At September 30, 2009, we do not intend to sell these securities and it is not more likely than not that we will be required to sell these securities before the anticipated recovery of its remaining amortized cost basis. See *Other-Than-Temporary Impairments of Fixed Maturity Securities* for a discussion of the factors we consider in making these determinations.

Other-Than-Temporary Impairments of Fixed Maturity Securities

We maintain separate monitoring processes for public and private fixed maturities and create watch lists to highlight securities that require special scrutiny and management. Our public fixed maturity asset managers formally review all public fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances, and/or company or industry specific concerns.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

For private placements our credit and portfolio management processes help ensure prudent controls over valuation and management. We have separate pricing and authorization processes to establish checks and balances for new investments. We apply consistent standards of credit analysis and due diligence for all transactions, whether they originate through our own in-house origination staff or through agents. Our regional offices closely monitor the portfolios in their regions. We set all valuation standards centrally, and we assess the fair value of all investments quarterly. Our private fixed maturity asset managers formally review all private

Table of Contents

fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances, and/or company or industry specific concerns.

Fixed maturity securities classified as held to maturity are those securities where we have the intent and ability to hold the securities until maturity. These securities are reflected at amortized cost in our consolidated statements of financial position. Other fixed maturity securities are considered available for sale, and, as a result, we record unrealized gains and losses to the extent that amortized cost is different from estimated fair value. All held to maturity securities and all available for sale securities with unrealized losses are subject to our review to identify other-than-temporary impairments in value. In evaluating whether a decline in value is other-than-temporary, we consistently consider several factors including, but not limited to, the following:

the reasons for the decline in value (credit event, currency or interest rate related, including general credit spread widening);

the financial condition of and near-term prospects of the issuer; and

the extent and the duration of the decline, including, but not limited to, the following general guidelines;

declines in value greater than 20%, maintained for six months or greater;

declines in value greater than 15%, maintained for more than one year on below investment grade bonds; and

declines in value less than six months where there has been a precipitous (generally 50% or greater) decline in value.

Given recent market conditions and liquidity concerns, and the resulting historically wide bid-ask spreads and high levels of price volatility, the extent and duration of a decline in value have become less indicative of when the market may believe there has been credit deterioration with respect to an issuer. Considering these current conditions, beginning in the third quarter of 2008 our determinations of whether a decline in value is other-than-temporary have placed greater emphasis on our analysis of the underlying credit versus the extent and duration of a decline in value. Our credit analysis of an investment includes determining whether the issuer is current on its contractual payments, evaluating whether it is probable that we will be able to collect all amounts due according to the contractual terms of the security, and analyzing our overall ability to recover the amortized cost of the investment. We continue to utilize valuation declines as a potential indicator of credit deterioration, and apply additional levels of scrutiny in our analysis as the severity and duration of the decline increases.

In addition, effective with our adoption on January 1, 2009 of new authoritative guidance related to debt securities we recognize an other-than-temporary impairment in earnings for a debt security in an unrealized loss position when either (a) we have the intent to sell the debt security or (b) it is more likely than not we will be required to sell the debt security before its anticipated recovery. For all debt securities in unrealized loss positions that do not meet either of these two criteria, we analyze our ability to recover the amortized cost by comparing the net present value of our best estimate of projected future cash flows with the amortized cost of the security. If the net present value is less than the amortized cost of the investment, an other-than-temporary impairment is recorded. The determination of the assumptions used in these projections requires the use of significant management judgment. See Note 2 to the Unaudited Interim Consolidated Financial Statements for additional information regarding these assumptions and our policies for recognizing other-than-temporary impairments for debt securities.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Other-than-temporary impairments of general account fixed maturity securities attributable to the Financial Services Businesses that were recognized in earnings were \$267 million and \$332 million for the three months ended September 30, 2009 and 2008, respectively, and \$1,006 million and \$1,152 million for the nine months ended September 30, 2009 and 2008, respectively. Included in the other-than-temporary impairments of general account fixed maturities attributable to the Financial Services Businesses for the three months ended

Table of Contents

September 30, 2009 and 2008, were \$149 million and \$91 million, respectively, of other-than-temporary impairments on asset-backed securities collateralized by sub-prime mortgages. Other-than-temporary impairments of general account fixed maturities attributable to the Financial Services Businesses for the nine months ended September 30, 2009 and 2008 include \$598 million and \$756 million, respectively, of other-than-temporary impairments on asset-backed securities collateralized by sub-prime mortgages.

Other-than-temporary impairments of fixed maturity securities attributable to the Closed Block Business that were recognized in earnings were \$93 million and \$119 million for the three months ended September 30, 2009 and 2008, respectively, and \$446 million and \$479 million for the nine months ended September 30, 2009 and 2008, respectively. Included in the other-than-temporary impairments of fixed maturities attributable to the Closed Block Business for the three months ended September 30, 2009 and 2008, were \$72 million and \$39 million, respectively, of other-than-temporary impairments on asset-backed securities collateralized by sub-prime mortgages. Other-than-temporary impairments of general account fixed maturities attributable to the Closed Block Business for the nine months ended September 30, 2009 and 2008 include \$273 million and \$318 million, respectively, of other-than-temporary impairments on asset-backed securities collateralized by sub-prime mortgages. For a further discussion of other-than-temporary impairments, see *Realized Investment Gains and Losses* above.

Trading account assets supporting insurance liabilities

Certain products included in the Retirement and International Insurance segments, are experience-rated, meaning that we expect the investment results associated with these products will ultimately accrue to contractholders. The investments supporting these experience-rated products, excluding commercial mortgage and other loans, are classified as trading. These trading investments are reflected on the balance sheet as *Trading account assets supporting insurance liabilities*, at fair value. Realized and unrealized gains and losses for these investments are reported in *Asset management fees and other income*, and excluded from adjusted operating income. Investment income for these investments is reported in *Net investment income*, and is included in adjusted operating income. The following table sets forth the composition of this portfolio as of the dates indicated.

	September 30, 2009		December 31, 2008	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(in millions)

As a percentage of amortized cost, 75% of the portfolio was publicly traded as of both September 30, 2009, and December 31, 2008. As of both September 30, 2009 and December 31, 2008, 88% of the fixed maturity portfolio was classified as investment grade. As of September 30, 2009, \$1.150 billion of the residential mortgage-backed securities were publicly traded agency pass-through securities, which are supported by implicit or explicit government guarantees all of which have credit ratings of A or higher. Collateralized mortgage obligations, including approximately \$120 million secured by ALT-A mortgages, represented the remaining

Table of Contents

\$196 million of residential mortgage-backed securities, of which 88% have credit ratings of A or better and 12% are BBB and below. For a discussion of changes in the fair value of our trading account assets supporting insurance liabilities see Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes, above.

The following table sets forth the composition by industry category of the corporate securities included in our trading account assets supporting insurance liabilities portfolio as of the dates indicated.

Table of Contents**Other Trading Account Assets**

Other trading account assets, at fair value consist primarily of investments and certain derivatives we use either in our capacity as a broker-dealer or for asset and liability management activities. Also, for certain financial instruments that contain an embedded derivative that otherwise would need to be bifurcated and reported at fair value, we may elect to classify the entire instrument as a trading account asset and report it within Other trading account assets. These instruments are carried at fair value, with realized and unrealized gains and losses reported in Asset management fees and other income, and excluded from adjusted operating income. Interest and dividend income from these investments is reported in Net investment income, and is included in adjusted operating income. The following table sets forth the composition of our other trading account assets as of the dates indicated.

During the first nine months of 2009, we purchased asset-backed securities under the Federal Reserve's Term Asset-Backed Securities Loan Facility, or TALF. TALF provides secured financing for asset-backed securities backed by certain types of consumer and small business loans. As of September 30, 2009, \$1,066 million of asset-backed securities attributable to the Financial Services Businesses were purchased under TALF and are reflected within Other trading account assets. We received secured financing from the Federal Reserve of \$979 million related to the purchase of these securities that is reflected within Long-term debt. For additional information regarding TALF, see Liquidity and Capital Resources.

As of September 30, 2009, on an amortized cost basis 93% of asset-backed securities classified as Other trading account assets attributable to the Financial Services Businesses have credit ratings of A or above, 5% have BBB and the remaining 2% have BB and below credit ratings. As of September 30, 2009, on an amortized cost basis 37% of asset-backed securities classified as Other trading account assets attributable to the Closed Block Business have credit ratings of A or above and the remaining 63% have BBB credit ratings.

Beginning in second quarter of 2008 and continuing through the third quarter of 2009, we restructured certain externally managed investments in the European market attributable to the Financial Services Businesses, which reflected our investment in medium term notes that are collateralized by investment portfolios primarily consisting of European fixed income securities. These investments are now included as direct

holdings in our

Table of Contents

portfolio and are reflected within Other trading account assets. The medium term note investments were previously recorded within fixed maturity securities available for sale. For additional information regarding externally managed investments in the European market, see Fixed Maturity Securities Asset-Backed Securities.

Commercial Mortgage and Other Loans*Investment Mix*

As of September 30, 2009 and December 31, 2008 we held approximately 12% and 13%, respectively, of our general account investments in commercial mortgage and other loans. This percentage is net of a \$511 million and \$211 million allowance for losses as of September 30, 2009 and December 31, 2008, respectively. The following table sets forth the composition of our commercial mortgage and other loans portfolio, before the allowance for losses, as of the dates indicated.

	September 30, 2009		December 31, 2008	
	Financial Services Businesses	Closed Block Business	Financial Services Businesses	Closed Block Business
	(in millions)			
Commercial mortgage loans	\$ 19,586	\$ 8,642	\$ 19,936	\$ 8,765
Uncollateralized loans	1,317		1,204	40
Loans collateralized by residential properties	945	1	976	1
Other collateralized loans(1)	111		129	
Total commercial mortgage and other loans(2)	\$ 21,959	\$ 8,643	\$ 22,245	\$ 8,806

- (1) Other collateralized loans attributable to the Financial Services Businesses includes \$92 million and \$109 million of collateralized consumer loans and \$19 million and \$19 million of loans collateralized by aviation assets as of September 30, 2009 and December 31, 2008, respectively.
- (2) Excluded from the tables above are commercial mortgage loans held outside the general account in other entities and operations. For additional information regarding commercial mortgage loans held outside the general account, see Invested Assets of Other Entities and Operations below.

We originate domestic commercial mortgage loans using dedicated investment staff and a network of independent companies through our various regional offices across the country. All loans are underwritten consistently to our standards using a proprietary quality rating system that has been developed from our experience in real estate and mortgage lending.

Uncollateralized loans primarily represent reverse dual currency loans and corporate loans which do not meet the definition of a security under authoritative accounting guidance.

Loans collateralized by residential properties primarily include Japanese recourse loans. Upon default of these recourse loans we can make a claim against the personal assets of the property owner, in addition to the mortgaged property. In addition, these loans are backed by third party guarantors.

Composition of Commercial Mortgage Loans

The global financial markets have experienced extreme stress since the second half of 2007. The availability and cost of credit has been materially affected, leading to a decrease in the overall liquidity and availability of capital in the commercial mortgage loan market, and in particular a decrease in activity by securitization lenders. These conditions have led to greater opportunities for more selective originations by portfolio lenders such as our general account. While we have observed weakness in commercial real estate fundamentals, delinquency rates on our commercial mortgage loans have been relatively stable in recent years. However, continued difficult conditions in the global financial markets and the overall economic downturn could put additional pressure on these fundamentals through rising vacancies, falling rents and falling property values, potentially resulting in higher levels of loan losses.

Table of Contents

Our commercial mortgage loan portfolio strategy emphasizes diversification by property type and geographic location. The following tables set forth the breakdown of the gross carrying values of our general account investments in commercial mortgage loans by geographic region and property type as of the dates indicated.

	September 30, 2009				December 31, 2008

Loan-to-value and debt service coverage ratios are measures commonly used to assess the quality of commercial mortgage loans. The loan-to-value ratio compares the amount of the loan to the fair value of the underlying property collateralizing the loan, and is commonly expressed as a percentage. Loan-to-value ratios greater than 100% percent indicate that the loan amount is greater than the collateral value. A

smaller

220

Table of Contents

loan-to-value ratio indicates a greater excess of collateral value over the loan amount. The debt service coverage ratio compares a property's net operating income to its debt service payments. Debt service coverage ratios less than 1.0 times indicate that property operations do not generate enough income to cover the loan's current debt payments. A larger debt service coverage ratio indicates a greater excess of net operating income over the debt service payments.

As of September 30, 2009, our general account investments in commercial mortgage loans attributable to the Financial Services Businesses had a weighted average debt service coverage ratio of 1.80 times, and a weighted average loan-to-value ratio of 65%. As of September 30, 2009, our general account investments in commercial mortgage loans attributable to the Closed Block Business had a weighted average debt service coverage ratio of 1.92 times, and a weighted average loan-to-value ratio of 58%. For those general account commercial mortgage loans attributable to the Financial Services Businesses that were originated in 2009, the weighted average loan-to-value ratio was 57%, and the weighted average debt service coverage ratio was 1.63 times.

The values utilized in calculating these loan-to-value ratios are developed as part of our periodic review of the commercial mortgage loan portfolio, which includes an internal evaluation of the underlying collateral value. Our periodic review also includes a quality re-rating process, whereby we update the internal quality rating originally assigned at underwriting based on the proprietary quality rating system mentioned above. As discussed below, the internal quality rating is a key input in determining our allowance for loan losses.

For loans with collateral under construction, renovation or lease-up, a stabilized value and projected net operating income are used in the calculation of the loan-to-value and debt service coverage ratios. Our commercial mortgage loan portfolio attributable to the Financial Services Businesses included approximately \$1.6 billion and \$1.8 billion of such loans as of September 30, 2009 and December 31, 2008, respectively, and our commercial mortgage loan portfolio attributable to the Closed Block Business included approximately \$0.6 billion and \$0.7 billion of such loans as of September 30, 2009 and December 31, 2008, respectively. All else being equal, these loans are inherently more risky than those collateralized by properties that have already stabilized. While these unstabilized loans are included in the calculation of our portfolio reserve as discussed below, as of September 30, 2009 there are no loan-specific reserves related to these loans. For information regarding similar loans we hold as part of our commercial mortgage operations, see *Invested Asset of Other Entities and Operations*. The following tables set forth the gross carrying value of our general account investments in commercial mortgage loans attributable to the Financial Services Businesses and the Closed Block Business as of the dates indicated by loan-to-value and debt service coverage ratios.

Commercial Mortgage Loans by Loan-to-Value and Debt Service Coverage Ratios - Financial Services Businesses

Commercial Mortgage and Other Loan Quality

Ongoing review of the portfolio is performed and loans are placed on watch list status based on a predefined set of criteria. We place loans on early warning status in cases where, based on our analysis of the loan's collateral, the financial situation of the borrower or tenants or other market factors, we believe a loss of principal or interest could occur. We classify loans as closely monitored when we determine there is a collateral deficiency or other credit events that may lead to a potential loss of principal or interest. Loans not in good standing are those loans where we have concluded that there is a high probability of loss of principal, such as when the loan is in the process of foreclosure or the borrower is in bankruptcy. In our domestic operations, our workout and special servicing professionals manage the loans on the watch list. As described below, in determining our allowance for losses we evaluate each loan on the watch list to determine if it is probable that amounts due

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

according to the contractual terms of the loan agreement will not be collected. In our international portfolios, we monitor delinquency in consumer loans on a pool basis and evaluate any servicing relationship and guarantees the same way we do for commercial mortgage loans.

We establish an allowance for losses to provide for the risk of credit losses inherent in the lending process. The allowance includes loan specific reserves for loans that are determined to be non-performing as a result of

Table of Contents

our loan review process, and a portfolio reserve for probable incurred but not specifically identified losses for loans which are not on the watch list. We define a non-performing loan as a loan for which it is probable that amounts due according to the contractual terms of the loan agreement will not be collected. The loan specific portion of the loss allowance is based on our assessment as to ultimate collectability of loan principal and interest. Valuation allowances for a non-performing loan are recorded based on the present value of expected future cash flows discounted at the loan's effective interest rate or based on the fair value of the collateral if the loan is collateral dependent. The portfolio reserve for incurred but not specifically identified losses considers the current credit composition of the portfolio based on the internal quality ratings mentioned above, as well as property type diversification, our past loan experience and other relevant factors. Together with historical credit migration and default statistics, the internal quality ratings are used to determine a default probability by loan. Historical loss severity statistics by property type are then applied to arrive at an estimate for incurred but not specifically identified losses. Historical credit migration, default and loss severity statistics are updated each quarter based on our actual loan experience, and are considered together with other relevant qualitative factors in making the final portfolio reserve calculations. The valuation allowance for commercial mortgage and other loans can increase or decrease from period to period based on these factors.

The following table sets forth the gross carrying value for commercial mortgage and other loans by loan classification as of the dates indicated:

	September 30, 2009		December 31, 2008	
	Financial Services Businesses	Closed Block Business	Financial Services Businesses	Closed Block Business
	(in millions)			
Current	\$ 21,658	\$ 8,630	\$ 22,162	\$ 8,788
Delinquent, not in foreclosure	211	13	57	17
Delinquent, in foreclosure	8			
Restructured	82		26	1
Total commercial mortgage and other loans	\$ 21,959	\$ 8,643	\$ 22,245	\$ 8,806

The following table sets forth the change in valuation allowances for our commercial mortgage and other loan portfolio as of the dates indicated:

	September 30, 2009		December 31, 2008	
	Financial Services Businesses	Closed Block Business	Financial Services Businesses	Closed Block Business
	(in millions)			
Allowance, beginning of year	\$ 153	\$ 58	\$ 90	\$ 28
Addition to/(release of) allowance for losses	284	96	58	30
Charge-offs, net of recoveries	(60)	(20)		
Change in foreign exchange			5	
Allowance, end of period	\$ 377	\$ 134	\$ 153	\$ 58

As of September 30, 2009 the \$377 million valuation allowance for our commercial mortgage and other loan portfolio attributable to the Financial Services Businesses includes \$141 million related to loan specific reserves and \$236 million related to the portfolio reserve for probable incurred but not specifically identified losses. As of December 31, 2008 the \$153 million valuation allowance for our commercial mortgage and other loan portfolio attributable to the Financial Services Businesses included \$8 million related to loan specific reserves and \$145 million related to the portfolio reserve for probable incurred but not specifically identified losses.

Table of Contents

As of September 30, 2009 the \$134 million valuation allowance for our commercial mortgage and other loan portfolio attributable to the Closed Block Business includes \$26 million related to loan specific reserves and \$108 million related to the portfolio reserve for probable incurred but not specifically identified losses. As of December 31, 2008 the \$58 million valuation allowance for our commercial mortgage and other loan portfolio attributable to the Closed Block Business included \$6 million related to loan specific reserves and \$52 million related to the portfolio reserve for probable incurred but not specifically identified losses. The increase in the allowance for both the Financial Services Businesses and the Closed Block Business primarily reflects the overall economic downturn and weakness in commercial real estate fundamentals, as discussed above.

Equity Securities*Investment Mix*

The equity securities attributable to the Financial Services Businesses consist principally of investments in common and preferred stock of publicly traded companies, as well as mutual fund shares and perpetual preferred securities, as discussed below. The following table sets forth the composition of our equity securities portfolio attributable to the Financial Services Businesses and the associated gross unrealized gains and losses as of the dates indicated:

Equity Securities Financial Services Businesses

	September 30, 2009				December 31, 2008			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(in millions)							
Public equity	\$ 2,927	\$ 422	\$ 93	\$ 3,256	\$ 3,807	\$ 43	\$ 624	\$ 3,226
Private equity	451	72	44	479	461	20	48	433
Total Equity	\$ 3,378	\$ 494	\$ 137	\$ 3,735	\$ 4,268	\$ 63	\$ 672	\$ 3,659

Public equity securities include mutual fund shares representing our interest in the underlying assets of certain of our separate account investments supporting corporate owned life insurance. These mutual funds invest primarily in high yield bonds. The cost, gross unrealized gains, gross unrealized losses, and fair value of these shares as of September 30, 2009 were \$1,286 million, \$316 million, \$0 million, and \$1,602 million, respectively. The cost, gross unrealized gains, gross unrealized losses, and fair value of these shares as of December 31, 2008 were \$1,306 million, \$23 million, \$119 million, and \$1,210 million, respectively.

Equity securities also include perpetual preferred securities, which have characteristics of both debt and equity securities. The cost, gross unrealized gains, gross unrealized losses, and fair value of perpetual preferred securities as of September 30, 2009 were \$332 million, \$19 million, \$28 million, and \$323 million, respectively. The cost, gross unrealized gains, gross unrealized losses, and fair value of these securities as of December 31, 2008 were \$378 million, \$1 million, \$93 million, and \$286 million, respectively.

Table of Contents

The equity securities attributable to the Closed Block Business consist principally of investments in common and preferred stock of publicly traded companies, as well as perpetual preferred securities. The following table sets forth the composition of our equity securities portfolio attributable to the Closed Block Business and the associated gross unrealized gains and losses as of the dates indicated:

Equity Securities Closed Block Business

	Cost	September 30, 2009		Fair Value (in millions)	Cost	December 31, 2008		Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses			Gross Unrealized Gains	Gross Unrealized Losses	
Public equity	\$ 2,596	\$ 424	\$ 74	\$ 2,946	\$ 2,998	\$ 196	\$ 811	\$ 2,383
Private equity	6	1		7	17			17
Total Equity	\$ 2,602	\$ 425	\$ 74	\$ 2,953	\$ 3,015	\$ 196	\$ 811	\$ 2,400

The cost, gross unrealized gains, gross unrealized losses, and fair value of perpetual preferred securities as of September 30, 2009 were \$187 million, \$8 million, \$17 million, and \$178 million, respectively. The cost, gross unrealized gains, gross unrealized losses, and fair value of these securities as of December 31, 2008 were \$106 million, \$0 million, \$29 million, and \$77 million, respectively.

Unrealized Losses from Equity Securities

The following table sets forth the cost and gross unrealized losses of our equity securities attributable to the Financial Services Businesses where the estimated fair value had declined and remained below cost by less than 20% for the following timeframes:

Unrealized Losses from Equity Securities, Less than 20% Financial Services Businesses

	September 30, 2009		December 31, 2008	
	Cost(1)	Gross Unrealized Losses(1)	Cost(1)	Gross Unrealized Losses(1)
	(in millions)			
Less than three months	\$ 925	\$ 13	\$ 1,352	\$ 104

Nine months or greater but less than twelve months	22	4	322	88
Greater than twelve months	22	10		
Total	\$ 234	\$ 54	\$ 1,611	\$ 522

(1) The aging of amortized cost and gross unrealized losses is determined based upon a count of the number of months the estimated fair value remained below cost by 20% or more, using month-end valuations.

The gross unrealized losses as of September 30, 2009 were primarily concentrated in the finance, public utilities, and other sectors compared to December 31, 2008 where the gross unrealized losses were primarily concentrated in the finance, other, and manufacturing sectors. Gross unrealized losses attributable to the Financial Services Businesses where the estimated fair value had declined and remained below cost by 20% or more of \$54 million as of September 30, 2009 includes \$10 million of gross unrealized losses on securities with a cost of \$21 million where the estimated fair value had declined and remained below cost by 50% or more, all of which was included in the greater than twelve months timeframe. Securities that have been in a continuous unrealized loss position for twelve months or more as of September 30, 2009 represent perpetual preferred securities, which have characteristics of both debt and equity securities and to which an impairment model similar to our fixed maturities is applied. We have not recognized the gross unrealized losses shown in the table above as other-than-temporary impairments. See [Other-Than-Temporary Impairments of Equity Securities](#) for a discussion of the factors we consider in making these determinations.

The following table sets forth the cost and gross unrealized losses of our equity securities attributable to the Closed Block Business where the estimated fair value had declined and remained below cost by less than 20% for the following timeframes:

Unrealized Losses from Equity Securities, Less than 20% Closed Block Business

- (1) The aging of amortized cost and gross unrealized losses is determined based upon a count of the number of months the estimated fair value remained below cost by less than 20%, using month-end valuations.

Table of Contents

The following table sets forth the cost and gross unrealized losses of our equity securities attributable to the Closed Block Business where the estimated fair value had declined and remained below cost by 20% or more for the following timeframes:

Unrealized Losses from Equity Securities, Greater than 20% Closed Block Business

	September 30, 2009		December 31, 2008	
	Cost(1)	Gross Unrealized Losses(1)	Cost(1)	Gross Unrealized Losses(1)
	(in millions)			
Less than three months	\$ 15	\$ 4	\$ 288	\$ 89
Three months or greater but less than six months	17	4	1,289	580
Six months or greater but less than nine months	18	6	72	36
Nine months or greater but less than twelve months	11	4		
Greater than twelve months	9	2		
Total	\$ 70	\$ 20	\$ 1,649	\$ 705

(1) The aging of amortized cost and gross unrealized losses is determined based upon a count of the number of months the estimated fair value remained below cost by 20% or more, using month-end valuations.

The gross unrealized losses as of September 30, 2009 were primarily concentrated in the finance, energy, and manufacturing sectors compared to December 31, 2008 where the gross unrealized losses were primarily concentrated in the manufacturing, finance and services sectors. Gross unrealized losses attributable to the Closed Block Business where the estimated fair value had declined and remained below cost by 20% or more of \$20 million as of September 30, 2009 does not include any gross unrealized losses on securities where the estimated fair value had declined and remained below cost by 50% or more. Securities that have been in a continuous unrealized loss position for twelve months or more as of September 30, 2009 represent perpetual preferred securities, which have characteristics of both debt and equity securities and to which an impairment model similar to our fixed maturities is applied. We have not recognized the gross unrealized losses shown in the table above as other-than-temporary impairments. See *Other-Than-Temporary Impairments of Equity Securities* for a discussion of the factors we consider in making these determinations.

Other-Than-Temporary Impairments of Equity Securities

For those equity securities classified as available for sale we record unrealized gains and losses to the extent cost is different from estimated fair value. All securities with unrealized losses are subject to our review to identify other-than-temporary impairments in value. In evaluating whether a decline in value is other-than-temporary, we consistently consider several factors including, but not limited to, the following:

the extent and the duration of the decline; including, but not limited to, the following general guidelines:

declines in value greater than 20%, maintained for six months or greater;

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

declines in value maintained for one year or greater; and

declines in value greater than 50%;

the reasons for the decline in value (issuer specific event, currency or market fluctuation);

our ability and intent to hold the investment for a period of time to allow for a recovery of value, including certain equity securities managed by independent third parties where we do not exercise management discretion concerning individual buy or sell decisions; and

the financial condition of and near-term prospects of the issuer.

Given recent market conditions and liquidity concerns, and the resulting high levels of price volatility, beginning in the third quarter of 2008 we extended the parameters under which we consider a decline in value to

Table of Contents

be other-than-temporary. In particular, we generally recognize other-than-temporary impairments for securities with declines in value greater than 50% maintained for six months or greater or with any decline in value maintained for one year or greater. In addition, in making our determinations we continue to analyze the financial condition and near-term prospects of the issuer, including an assessment of the issuer's capital position, and consider our ability and intent to hold the investment for a period of time to allow for a recovery of value.

For those securities that have declines in value that are deemed to be only temporary, we make an assertion as to our ability and intent to retain the security until recovery. Once identified, these securities are restricted from trading unless authorized based upon events that could not have been foreseen at the time we asserted our ability and intent to retain the security until recovery. Examples of such events include, but are not limited to, the deterioration of the issuer's creditworthiness, a major business combination or disposition, a change in regulatory requirements, certain other portfolio actions or other similar events. For those securities that have declines in value for which we cannot assert our ability and intent to retain until recovery, including certain equity securities managed by independent third parties where we do not exercise management discretion concerning individual buy or sell decisions, impairments are recognized as other-than-temporary regardless of the reason for, or the extent of, the decline. For perpetual preferred securities, which have characteristics of both debt and equity securities, we apply an impairment model similar to our fixed maturity securities, factoring in the position of the security in the capital structure and the lack of a formal maturity date. For additional discussion of our policies regarding other-than-temporary impairments of fixed maturity securities, see *Fixed Maturity Securities - Other-than-Temporary Impairments of Fixed Maturity Securities* above.

When we determine that there is an other-than-temporary impairment, we record a writedown to estimated fair value, which reduces the cost basis and is included in *Realized investment gains (losses)*. See Note 2 to the Unaudited Interim Consolidated Financial Statements for additional information regarding our policies around other-than-temporary impairments for equity securities. See Note 12 to the Unaudited Interim Consolidated Financial Statements for information regarding the fair value methodology used for equity securities.

Impairments of equity securities attributable to the Financial Services Businesses were \$62 million and \$71 million for the three months ended September 30, 2009 and 2008, respectively, and \$379 million and \$214 million for the nine months ended September 30, 2009 and 2008, respectively. Impairments of equity securities attributable to the Closed Block Business were \$161 million and \$14 million for the three months ended September 30, 2009 and 2008, respectively, and \$600 million and \$201 million for the nine months ended September 30, 2009 and 2008, respectively. For a further discussion of impairments, see *Realized Investment Gains and Losses* above.

Other Long-Term Investments

Other long-term investments are comprised as follows:

	September 30, 2009		December 31, 2008	
	Financial Services Businesses	Closed Block Business	Financial Services Businesses	Closed Block Business
	(in millions)			
Joint ventures and limited partnerships:				
Real estate related	\$ 340	\$ 354	\$ 405	\$ 348
Non real estate related	840	1,017	904	1,044
Real estate held through direct ownership	1,058		1,109	
Other(1)	573	211	617	237
Total other long-term investments	\$ 2,811	\$ 1,582	\$ 3,035	\$ 1,629

- (1) Primarily includes derivatives and member stock held in the Federal Home Loan Bank of New York. For additional information regarding our holding in the Federal Home Loan Bank of New York, see Note 9 to the Unaudited Interim Consolidated Financial Statements.

Table of Contents***Invested Assets of Other Entities and Operations***

The following table sets forth the composition of the investments held outside the general account in other entities and operations as of the dates indicated.

	September 30, 2009	December 31, 2008
	(in millions)	
Fixed Maturities:		
Public, available for sale, at fair value	\$ 1,956	\$ 1,805
Private, available for sale, at fair value	50	55
Other trading account assets, at fair value	1,595	3,488
Equity securities, available for sale, at fair value	12	6
Commercial mortgage and other loans, at book value	2,034	2,274
Securities purchased under agreements to resell	6	480
Other long-term investments	1,485	2,348
Short-term investments	1,591	1,218
Total investments	\$ 8,729	\$ 11,674

The table above includes the invested assets of our brokerage, trading and banking operations, real estate and relocation services, and asset management operations. Assets of our asset management operations managed for third parties and those assets classified as separate account assets on our balance sheet are not included.

Our derivatives trading operations maintain trading positions in various foreign exchange instruments and commodities, primarily to facilitate transactions for our clients. We seek to use short security positions and forwards, futures, options and other derivatives to limit exposure to interest rate and other market risks associated with these positions. We also trade derivative financial instruments that allow our clients to manage exposure to interest rate, currency and other market risks. Our derivative transactions involve both exchange-listed and over-the-counter contracts. Our global commodities group provides advice, sales and trading on a global basis covering a wide variety of commodity, financial and foreign exchange futures, swap and forward contracts, including agricultural commodities, base and precious metals, major currencies, interest rate and stock indices. We act both as a broker, buying and selling exchange-listed contracts for our customers, and as a dealer, by entering into futures and security transactions as a principal. The positions held relating to these trading operations are primarily included in Other trading account assets.

In our banking operations, customer deposit liabilities are primarily supported by fixed maturity and short-term investments, in addition to cash and cash equivalents.

As part of our asset management operations we make proprietary investments in real estate, as well as fixed income, public equity and real estate securities, including controlling interests. Certain of these investments are made primarily for purposes of co-investment in our managed funds and structured products. Other proprietary investments are made with the intention to sell or syndicate to investors, including our general account, or for placement in funds and structured products that we offer and manage (seed investments). These proprietary investments are primarily included in Other long-term investments. As part of our asset management operations we also make short term loans to our managed funds that are secured by equity commitments from investors or assets of the funds. These short term loans are primarily included in Short-term investments.

Our asset management operations also include our commercial mortgage operations, which provide mortgage origination, asset management and servicing for our general account, institutional clients, and government sponsored entities such as Fannie Mae, the Federal Housing Administration, and Freddie Mac. We also originate shorter-term interim loans for spread lending that are collateralized by assets generally under renovation or lease-up. All else being equal, these interim loans are inherently more risky than those

Table of Contents

collateralized by properties that have already stabilized. Due to market conditions and the inherent risk of these loans, the underwriting of new interim loans was suspended during the third quarter of 2008. Our interim loans are generally paid off through refinancing or the sale of the underlying collateral by the borrower. As of September 30, 2009, the interim loans had an unpaid principal balance of \$1.8 billion and an allowance for losses or credit related market value losses totaling \$186 million. The weighted average loan-to-value ratio was 109%, indicating that, in aggregate, the loan amount was greater than the collateral value, and the weighted average debt service coverage ratio was 1.13 times. A stabilized value and projected net operating income are used in the calculation of the loan-to-value and debt service coverage ratios. The mortgage loans of our commercial mortgage operations are included in Commercial mortgage and other loans, with related derivatives and other hedging instruments primarily included in Other trading account assets and Other long-term investments.

As of September 30, 2009, invested assets held outside the general account in other entities and operations include available for sale residential mortgage-backed securities with amortized cost of \$755 million and fair value of \$787 million, 99% of which have credit ratings of A or above and the remaining 1% of which have credit ratings of BB and below. Also included are available for sale commercial mortgage-backed securities with amortized cost of \$81 million and fair value of \$84 million, 91% of which have credit ratings of A or above and the remaining 9% of which have credit ratings of BB and below. Less than \$1 million of commercial mortgage-backed securities held outside the general account are classified as other trading account assets as of September 30, 2009 all of which have AAA credit ratings.

As of September 30, 2009, invested assets held outside the general account in other entities and operations also includes available for sale asset-backed securities with amortized cost of \$206 million and fair value of \$200 million, less than 1% of which represents securities collateralized by sub-prime mortgages. Based on amortized cost, 85% of the available for sale asset-backed securities have credit ratings of A or above and the remaining 15% have BBB or below credit ratings. The asset-backed securities as of September 30, 2009, includes collateralized debt obligations with amortized cost of \$21 million and fair value of \$9 million. An additional \$21 million of asset-backed securities held outside the general account as of September 30, 2009 are classified as other trading account assets, 97% of which have credit ratings of AAA and 3% of which have credit ratings of B.

Table of Contents**Commercial Real Estate**

As discussed above, we have investment-based exposure to commercial real estate through a variety of investment vehicles. This exposure primarily results from our investments in commercial mortgage-backed securities and our whole-loan commercial mortgage holdings. For additional information regarding our exposure to commercial real estate, see the respective investment sections above within General Account Investments. Our invested asset exposure to commercial real estate as of the dates indicated includes the following, shown at their respective balance sheet carrying value:

	September 30, 2009		December 31, 2008	
	Financial Services Businesses	Closed Block Business	Financial Services Businesses	Closed Block Business
(in millions)				
General Account				
Commercial Mortgage-Backed Securities, at fair value:				
Fixed Maturity Securities	\$ 7,798	\$ 3,695	\$ 6,852	\$ 3,188
Trading Account Assets Supporting Insurance Liabilities	2,091		2,092	
Other Trading Account Assets	128		135	
Commercial Mortgage Loans, at gross carrying value(1)	19,586	8,642	19,936	8,765
Real estate related joint ventures and limited partnerships(2)	340	354	405	348
Real estate held through direct ownership(3)	1,058		1,109	
Other Entities and Operations(4)				
Commercial Mortgage-Backed Securities, at fair value:				
Fixed Maturity Securities	\$ 84	\$	\$ 22	\$
Other Trading Account Assets			1	
Commercial Mortgage Loans, at gross carrying value(5)	2,016		2,175	
Real estate related joint ventures and limited partnerships(2)	473		437	
Real estate held through direct ownership(3)	401		1,056	

- (1) Carrying value is generally based on unpaid principal balance. Amounts are shown gross of allowance for losses of \$326 million and \$134 million as of September 30, 2009 and \$116 million and \$58 million as of December 31, 2008, attributable to the Financial Services Businesses and the Closed Block Business, respectively. Commercial Mortgage Loans are shown net of the allowance for losses on the statement of financial position.
- (2) Balances accounted for under either the cost or equity method and include all real estate related exposures, net of impairments.
- (3) Represents wholly-owned investment real estate which the Company has the intent to hold for the production of income as well as real estate held for sale. Real estate which the Company has the intent to hold for the production of income is carried at depreciated cost less any writedowns to fair value for impairment. Real estate held for sale is carried at the lower of depreciated cost or fair value less estimated selling costs and is not further depreciated once classified as such.
- (4) Includes invested assets of brokerage, trading and banking operations, real estate and relocation services, and asset management operations. Excludes assets of our asset management operations managed for third parties and those assets classified as Separate account assets on our balance sheet.
- (5) Carrying value is generally based on unpaid principal balance, the lower of cost or fair value, or fair value. Amounts are shown gross of allowance for losses of \$147 million and \$76 million as of September 30, 2009 and December 31, 2008, respectively. Commercial Mortgage Loans are shown net of the allowance for losses on the statement of financial position.

Liquidity and Capital Resources**Extraordinary Market Conditions and their Impact on our Liquidity and Capital Resources**

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

The disruptions in the capital markets that began in the latter half of 2007, initially due to concerns over sub-prime mortgage holdings of financial institutions, accelerated to unprecedented levels in the latter half of 2008 and the early portion of 2009, resulting in failure, consolidation, or U.S. federal government intervention on behalf of several significant financial institutions. These disruptions resulted in significant market volatility and adversely impacted the availability and cost of credit and capital. We, like other financial institutions, were not immune to these events.

Table of Contents

As a consequence of the market dislocation and in order to manage our liquidity and capital resources, we undertook certain actions during 2008 that enabled us to maintain capital at December 31, 2008 consistent with our ratings objectives, and to maintain sufficient liquidity and capital flexibility. Those actions are described in more detail in the Liquidity and Capital Resources section of our 2008 Annual Report on Form 10-K.

Markets have shown marked improvement since late second quarter of this year. Equity markets have appreciated, with less volatility, and bond spreads have tightened significantly. We have been able to take advantage of the improving market conditions, and have raised approximately \$4.4 billion in financing since June 2009 through the sale of (1) 36,858,975 shares of Prudential Financial Common Stock in a public offering (at a price of \$39.00 per share for gross proceeds of \$1.438 billion), (2) \$2.5 billion of Prudential Financial medium-term notes and (3) \$500 million of Prudential Insurance surplus notes that are exchangeable for Prudential Financial Common Stock. This has allowed us to preserve our financial flexibility by conserving internal resources and paying down a portion of our commercial paper borrowings.

Due to the continuation of the market dislocation into early 2009, we took certain other actions to strengthen our liquidity and capital position during 2009, including the following: (1) made capital contributions and capital loans to our international insurance operations in Japan totaling \$366 million; (2) borrowed \$1.5 billion from the Federal Home Loan Bank of New York, or FHLBNY, in the form of collateralized funding agreements, which allowed the use of these proceeds to replace funding agreements between Prudential Financial and Prudential insurance, thereby converting retail medium-term note issuances to general corporate debt; (3) reduced our reliance on commercial paper; (4) sold assets held by some of our affiliates to reduce their borrowing needs; (5) monetized gains from certain derivative positions, including those related to the U.S. dollar denominated products co-insured from our Japanese insurance operations; and (6) acquired assets that would be eligible to be pledged as collateral to the FHLBNY. While the above actions have strengthened our liquidity and capital position, certain of them, as well as our decision to maintain higher levels of cash and short-term investments than in prior periods, have had a negative impact on current earnings.

In addition, the following events occurred during the first nine months of 2009: (1) on June 1, 2009, Prudential Financial announced it will not participate in the TARP Capital Purchase Program; (2) on June 15, 2009, we repurchased \$1.819 billion of the floating rate convertible senior notes that we issued in 2007, at par plus accrued interest, as required by the holders under the terms of the notes, using existing cash and short-term investments; and (3) on June 17, 2009, we provided notice to Wells Fargo of our exercise of the lookback option put rights under the terms of the joint venture agreements relating to our minority interest in Wachovia Securities.

The Company continues to operate with significant cash and short-term investments on the balance sheet and has access to alternate sources of liquidity, as described below. However, should the recent improvements in the capital markets prove temporary and earlier trends resume, such market disruptions could potentially adversely affect Prudential Financial and its subsidiaries ability to access sources of liquidity, as well as threaten to reduce our capital below a level that is consistent with our existing ratings objectives. We may take additional actions beyond those described above, especially in the event of such disruptions, which may include but are not limited to: (1) further access external sources of capital, including the debt or equity markets; (2) utilize further proceeds from our outstanding retail medium-term notes for general corporate purposes by accelerating repayments of additional funding agreements from Prudential Insurance; (3) undertake additional capital management activities, including reinsurance transactions; (4) transfer ownership of certain subsidiaries of Prudential Financial to Prudential Insurance; (5) take additional actions related to derivatives; (6) limit or curtail sales of certain products and/or restructure existing products; (7) effectuate the repayment of affiliate surplus notes; (8) undertake further asset sales, internal asset transfers or pursue asset securitizations; and (9) seek temporary or permanent changes to regulatory rules. Certain of these actions may require regulatory approval and/or agreement of counterparties, which are outside of our control, or have economic costs associated with them. In the event that market conditions were to deteriorate, we may also be required to make further capital contributions to our regulated domestic or international subsidiaries.

Table of Contents

Management monitors the liquidity of Prudential Financial and the Company on a daily basis and projects borrowing and capital needs over a multi-year time horizon through our quarterly planning process. We believe that cash flows from the sources of funds presently available to us are sufficient to satisfy the current liquidity requirements of Prudential Financial, including reasonably foreseeable contingencies.

Prudential Financial

The principal sources of funds available to Prudential Financial, the parent holding company and registrant, to meet its obligations, including the payment of debt service, shareholder dividends, operating expenses, capital contributions and obligations to subsidiaries, are dividends, returns of capital, interest income from its subsidiaries, and cash and short-term investments. These sources of funds may be supplemented by Prudential Financial's access to the capital markets and bank facilities, as well as the Alternative Sources of Liquidity described below.

As of September 30, 2009, Prudential Financial had cash and short-term investments of \$4.233 billion, a decrease of \$201 million from December 31, 2008. Included in the cash and short-term investments of Prudential Financial is \$642 million held in an intercompany liquidity account that is designed to optimize the use of cash by facilitating the lending and borrowing of funds between Prudential Financial and its affiliates on a daily basis. Short-term investments comprise \$1.576 billion of Prudential Financial's total cash and short-term investments and consist primarily of government agency securities and money market funds.

Prudential Financial's principal sources and uses of cash and short-term investments for the nine months ended September 30, 2009 were as follows:

	Nine Months Ended September 30, 2009 (in millions)
Sources:	
Dividends and/or returns of capital from subsidiaries(1)	\$ 1,094
Net proceeds from the issuance of Common Stock(2)	1,391
Proceeds from the issuance of long-term senior debt, net of repayments(2)	2,264
Repayment of funding agreements from Prudential Insurance(3)	1,262
Proceeds from stock-based compensation and exercise of stock options	147
Total sources	6,158
Uses:	
Capital contributions to subsidiaries(4)	1,169
Shareholder dividends(5)	39
Repayment of short-term debt, net of issuances(6)	1,864
Repayment of retail medium term notes(2)	90
Repayment of floating rate convertible senior notes(2)	2,109
Payments to purchase fixed maturity securities	127
Net borrowings under intercompany loan agreements(7)	846
Other, net	115
Total uses	6,359
Net increase in cash and short-term investments	\$ (201)

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

- (1) Includes dividends and/or returns of capital of \$892 million from international insurance and investments subsidiaries, including the repayment of capital loans which were refinanced from internal sources in connection with the maturity of ¥74 billion borrowed under unsecured bridge loan facilities, \$178 million from asset management subsidiaries and \$24 million from other subsidiaries.
- (2) See Financing Activities.
- (3) See Prudential Financial Alternative Sources of Liquidity Federal Home Loan Bank of New York.
- (4) Includes capital contributions of \$685 million to international insurance and investments subsidiaries, \$239 million to Pruco Reinsurance, \$167 million to asset management subsidiaries and \$78 million to other subsidiaries.

Table of Contents

- (5) Represents payments of Common Stock dividends made in the first nine months of 2009 with respect to the dividend declared in 2008.
- (6) Includes repayment at maturity of ¥74 billion borrowed under unsecured bridge loan facilities as discussed in Financing Activities and a decrease in outstanding commercial paper as discussed in Prudential Financial Alternative Sources of Liquidity Commercial Paper Programs.
- (7) Includes net borrowings of \$480 million by asset management subsidiaries, \$348 million by Pruco Reinsurance and \$289 million by our real estate and relocation services business, partially offset by net repayments of \$216 million by international insurance subsidiaries. The remainder represents loans and repayments from other subsidiaries.

Prudential Financial is a holding company whose principal assets are its investments in subsidiaries. We believe Prudential Financial's capitalization and use of financial leverage are consistent with its ratings targets. Our long-term senior debt rating targets for Prudential Financial are A for Standard & Poor's Rating Services, or S&P, Moody's Investors Service, Inc., or Moody's, and Fitch Ratings Ltd., or Fitch, and a for A.M. Best Company, or A.M. Best. Our financial strength rating targets for our domestic life insurance companies are AA/Aa/AA for S&P, Moody's and Fitch, respectively, and A+ for A.M. Best. For our current ratings (some of which are below these targets), a description of material rating actions that occurred in 2009, and a discussion of the potential impacts of ratings downgrades, see Ratings. We seek to capitalize all of our subsidiaries and businesses in accordance with their ratings targets.

The primary components of capitalization for the Financial Services Businesses consist of the equity we attribute to the Financial Services Businesses (excluding accumulated other comprehensive income related to unrealized gains and losses on investments and pension and postretirement benefits), outstanding junior subordinated debt and outstanding capital debt of the Financial Services Businesses, as discussed below under Financing Activities. Based on these components, the capital position of the Financial Services Businesses as of September 30, 2009 was as follows:

	September 30, 2009 (in millions)
Attributed equity (excluding unrealized gains and losses on investments and pension/postretirement benefits)	\$ 23,919
Junior subordinated debt (hybrid securities)(1)	1,518
Capital debt(1)	6,976
 Total capital	 \$ 32,413

- (1) Our capital debt to total capital ratio was 22.7% as of September 30, 2009. For the purpose of calculating this ratio, 75% of the hybrid securities are attributed equity credit, with the remaining 25% treated as capital debt.

As shown in the table above, as of September 30, 2009, the Financial Services Businesses had \$32.4 billion in capital, all of which was available to support the aggregate capital requirements of its three divisions and its Corporate and Other operations. Based on our assessments of these businesses and operations, we believe this level of capital was consistent with the AA ratings targets of our regulated operating entities as of September 30, 2009.

In response to the market dislocation affecting the banking system and financial markets, on October 3, 2008, President Bush signed the Emergency Economic Stabilization Act of 2008, or EESA, into law. On October 14, 2008, the U.S. Treasury announced that it would use EESA authority to invest an aggregate of \$250 billion (of the first \$350 billion released under EESA) in capital issued by qualifying U.S. financial institutions under the U.S. Treasury's Capital Purchase Program, which is part of the Troubled Asset Relief Program, or TARP. The TARP Capital Purchase Program involves the issuance by qualifying institutions of preferred stock and warrants to purchase common stock to the U.S. Treasury. In addition, since March 2008, the Federal Reserve has created several lending facilities to stabilize financial markets, including the Term Asset-Backed Securities Loan Facility, or TALF. The TALF is designed to provide secured financing for certain types of asset-backed securities, including certain high-quality commercial mortgage-backed securities issued before January 1, 2009.

Table of Contents

We applied in October 2008 to participate in the TARP Capital Purchase Program and on May 14, 2009, we received preliminary approval from the U.S. Treasury to participate in the Program. However, on June 1, 2009, we announced that we would not participate in the TARP Capital Purchase Program.

Beginning in the first quarter of 2009, we began participating in TALF as an eligible borrower as discussed in more detail in Financing Activities Consolidated Borrowings. We continue to evaluate other government sponsored programs for which we may be eligible.

In addition to the foregoing, the U.S. federal government, as well as foreign governments and central banks, have taken or are considering taking other actions to address the financial market dislocation. We cannot predict with any certainty whether these actions will be effective or the effect they may have on the financial markets, or on our businesses, results of operations, cash flows or financial condition.

Restrictions on Dividends and Returns of Capital from Subsidiaries

Our insurance and various other companies are subject to regulatory limitations on the payment of dividends and other transfers of funds to affiliates. With respect to Prudential Insurance, New Jersey insurance law provides that, except in the case of extraordinary dividends or distributions, all dividends or distributions paid by Prudential Insurance may be declared or paid only from unassigned surplus, as determined pursuant to statutory accounting principles, less unrealized investment gains and losses and revaluation of assets. As of December 31, 2008, Prudential Insurance's unassigned surplus was \$2.781 billion, and it recorded applicable adjustments for cumulative unrealized investment gains of \$283 million. Prudential Insurance must also notify the New Jersey Department of Banking and Insurance of its intent to pay a dividend or distribution. If the dividend or distribution, together with other dividends or distributions made within the preceding twelve months, exceeds a specified statutory limit it is considered an extraordinary dividend or distribution and Prudential Insurance must obtain the prior non-disapproval of the Department. The current statutory limitation applicable to New Jersey life insurers is generally the greater of 10% of the prior calendar year's statutory surplus, which surplus was \$6.432 billion as of December 31, 2008, or the prior calendar year's statutory net gain from operations excluding realized investment gains and losses, which was \$498 million for the year ended December 31, 2008. Prudential Insurance and our other insurance subsidiaries may also be subject to additional company specific regulatory limitations and adjustments. In addition to these regulatory limitations, the terms of the IHC debt contain restrictions potentially limiting dividends by Prudential Insurance applicable to the Financial Services Businesses in the event the Closed Block Business is in financial distress and under certain other circumstances.

We anticipate that dividends from Prudential Insurance will either not be available or will be substantially constrained in 2009 by the capital requirements of our financial strength rating targets. In 2008, Prudential Insurance declared an ordinary dividend of \$727 million and an extraordinary dividend of \$773 million to Prudential Holdings, LLC, which were in turn distributed to Prudential Financial.

The laws regulating dividends of the other states and foreign jurisdictions where our other insurance companies are domiciled are similar, but not identical, to New Jersey's. Pursuant to Gibraltar Life's reorganization, in addition to regulatory restrictions, there are certain other restrictions on Gibraltar Life's ability to pay dividends to Prudential Financial. We anticipate that it will be several years before these restrictions will allow Gibraltar Life to pay such dividends. There are also regulatory restrictions on the payment of dividends by The Prudential Life Insurance Company, Ltd., or Prudential of Japan, which began paying dividends in 2006. Further, current market conditions have impacted capital positions of our international insurance companies, which could further restrict their ability to pay dividends. The ability of our asset management subsidiaries, and the majority of our other operating subsidiaries, to pay dividends is largely unrestricted.

See Liquidity and Capital Resources of Subsidiaries below for additional details on the liquidity of our domestic insurance subsidiaries, international insurance subsidiaries and asset management subsidiaries.

Table of Contents*Alternative Sources of Liquidity*

Prudential Financial maintains an intercompany liquidity account that is designed to optimize the use of cash by facilitating the lending and borrowing of funds between the parent holding company and its affiliates on a daily basis. Depending on the overall availability of cash, the parent holding company invests excess cash on a short-term basis or borrows funds in the capital markets. Additional longer term liquidity is available through inter-affiliate borrowing arrangements. Prudential Financial and certain of its subsidiaries also have access to bank facilities, as discussed under *Lines of Credit and Other Credit Facilities*, as well as the other alternative sources of liquidity described below.

Commercial Paper Programs

Prudential Financial has a commercial paper program currently rated *A-1* by S&P, *P-2* by Moody's and *F2* by Fitch with an authorized capacity of \$5.0 billion. The rating from Fitch currently has a negative outlook. Prudential Financial commercial paper borrowings have been generally used to fund the working capital needs of Prudential Financial's subsidiaries and provide short-term liquidity at Prudential Financial. Prudential Financial's outstanding commercial paper borrowings were \$209 million as of September 30, 2009, with a weighted average maturity of 22 days of which 16% was overnight. This represents a decrease of \$1,034 million from December 31, 2008, largely due to the repayment of maturing commercial paper issued under the CPFF program, described below, and a reduction in the commercial paper supporting excess cash held at Prudential Financial. The daily average commercial paper outstanding during the first nine months of 2009 under this program was \$690 million. The weighted average interest rate on these borrowings was 1.72% and 3.27% for the nine months ended September 30, 2009 and 2008, respectively.

Prudential Funding, LLC, or Prudential Funding, a wholly owned subsidiary of Prudential Insurance, has a commercial paper program currently rated *A-1+* by S&P, *P-2* by Moody's and *F1* by Fitch with a current authorized capacity of \$12.0 billion. On August 20, 2009, Moody's downgraded Prudential Funding's commercial paper rating to *P-2* and changed the outlook to stable. The rating from Fitch currently has a negative outlook. Prudential Funding's outstanding commercial paper and master note borrowings were \$716 million as of September 30, 2009, with a weighted average maturity of 57 days of which 6% was overnight. This represents a decrease of \$3.638 billion from December 31, 2008, largely due to a reduction in the investment in our enhanced short-term portfolio and repayment of loans by our affiliates, funded through a combination of asset sales, substitute funding from Prudential Financial from the proceeds of the medium-term notes issued in 2009, and other internal sources of cash. As of September 30, 2009, the majority of these proceeds were held in cash and cash equivalents, while the remainder was primarily utilized to fund the working capital needs of our affiliates and short-term cash flow timing mismatches. The daily average commercial paper outstanding during the first nine months of 2009 under this program was \$2.9 billion. The weighted average interest rates on these borrowings were 0.79% and 2.67% for the nine months ended September 30, 2009 and 2008, respectively. Prudential Financial has issued a subordinated guarantee covering Prudential Funding's domestic commercial paper program.

Both Prudential Financial's and Prudential Funding's commercial paper programs were granted approval to participate in the Federal Reserve Bank of New York's Commercial Paper Funding Facility, or CPFF, during the fourth quarter of 2008. The CPFF is intended to improve liquidity in short-term funding markets by increasing the availability of term commercial paper funding to issuers and by providing greater assurance to both issuers and investors that firms will be able to roll over their maturing commercial paper. Commercial paper programs must maintain ratings of at least *A-1/P-1/F1* by at least two rating agencies in order to be eligible for the CPFF. Unsecured commercial paper issued under the CPFF is discounted based on a rate equal to a spread (200 basis points) over the three-month overnight index swap rate on the day of purchase. Access to the CPFF for the issuance of new commercial paper is scheduled to terminate on February 1, 2010, unless such date is extended by the Federal Reserve Bank of New York. As of September 30, 2009, neither Prudential Financial nor Prudential Funding had any commercial paper outstanding under the CPFF.

Table of Contents

On February 19, 2009, Prudential Financial became ineligible to issue commercial paper under the CPFF following a downgrade of its commercial paper program by Fitch to F2. Prudential Funding continues to be an eligible issuer under the CPFF based on its current credit ratings and may sell to the CPFF three-month unsecured U.S. dollar denominated commercial paper up to a maximum of \$9.815 billion, less the outstanding amount of any non-CPFF commercial paper at any applicable time. However, as noted above, Moody's downgraded its rating of Prudential Funding's commercial paper program to P-2 on August 20, 2009, and the Fitch rating currently has a negative outlook. Consequently, if Prudential Funding fails to maintain either its S&P or Fitch rating at an A-1/F1 level, its commercial paper program would also no longer be eligible for the CPFF.

Despite the recent improvement in the short-term funding markets, Prudential still faces some challenges in the commercial paper market due to credit constraints that exist in the general market. Rating agency actions during the same period have additionally impacted our commercial paper programs. The financing cost of Prudential Financial commercial paper remained elevated versus its historical cost basis relative to the target federal funds rate, as investors demanded a premium for such Tier 2 rated commercial paper. The financing cost of Prudential Funding commercial paper increased versus its historical cost basis relative to the target federal funds rate over the same period. Additionally, we have experienced a reduction in investor demand for Prudential Funding's commercial paper.

While we consider availability of commercial paper as one of our alternative sources of liquidity, we have continued to reduce our reliance on commercial paper to fund our operations, and have developed plans which would enable us to further reduce, or if necessary eliminate, our borrowings under the Prudential Financial and Prudential Funding commercial paper programs through the use of other sources of liquidity.

Both commercial paper programs are backed by our unsecured committed lines of credit. As of September 30, 2009, Prudential Financial, Prudential Insurance and Prudential Funding had unsecured committed lines of credit totaling \$4.34 billion. There were no outstanding borrowings under these facilities as of September 30, 2009. For a further discussion of lines of credit, see Lines of Credit and Other Credit Facilities.

Asset-based Financing

We conduct asset-based or secured financing within our insurance and other subsidiaries, including transactions such as securities lending and repurchase agreements, in order to earn spread income, to borrow funds, or to facilitate trading activity. These programs are driven by portfolio holdings in securities that are lendable based on counterparty demand for these securities in the marketplace. The collateral received in connection with these programs is primarily used to purchase securities in the short-term spread portfolios of our domestic insurance entities. Investments held in the short-term spread portfolios include cash and cash equivalents, short-term investments and fixed maturities, including mortgage- and asset-backed securities, with a weighted average life at time of purchase of two years or less. A portion of the asset-backed securities held in our short-term spread portfolios, including our enhanced short-term portfolio, are collateralized by sub-prime mortgages. See

Realized Investment Gains and Losses and General Account Investments - General Account Investments - Fixed Maturity Securities for a further discussion of our asset-backed securities collateralized by sub-prime holdings, including details regarding those securities held in our enhanced short-term portfolio. These short-term portfolios are subject to specific investment policy statements, which among other things, do not allow for significant asset/liability interest rate duration mismatch.

As of September 30, 2009, our Financial Services Businesses had liabilities totaling \$6.443 billion under such programs, including \$3.650 billion representing securities sold under agreements to repurchase, \$2.573 billion representing cash collateral for loaned securities and \$220 million representing securities sold but not yet purchased. Of the \$6.443 billion for the Financial Services Businesses as of September 30, 2009, \$3.315 billion represents securities that may be returned to the company overnight requiring immediate return of the cash collateral, and the remainder generally has maturities ranging from 2 days to 3 months with a weighted average maturity of 32 days. As of December 31, 2008, our Financial Services Businesses had liabilities totaling \$7.455 billion under such programs.

Table of Contents

As of September 30, 2009, our Closed Block Business had liabilities totaling \$4.725 billion under such programs, including \$3.550 billion representing securities sold under agreements to repurchase and \$1.175 billion representing cash collateral for loaned securities. Of the \$4.725 billion for the Closed Block Business as of September 30, 2009, \$2.432 billion represents securities that may be returned to the company overnight requiring immediate return of the cash collateral, and the remainder generally has maturities ranging from 2 days to 3 months with a weighted average maturity of 25 days. As of December 31, 2008, our Closed Block Business had liabilities totaling \$5.096 billion under such programs.

As of September 30, 2009, our domestic insurance entities had assets eligible for the lending program of \$71.4 billion, of which \$9.9 billion were on loan. Taking into account market conditions and outstanding loan balances as of September 30, 2009, we believe approximately \$21.8 billion of the remaining eligible assets are readily lendable, subject to potential regulatory constraints, of which approximately \$14.5 billion relates to the Financial Services Business. Further changes in market conditions can affect the ability to lend the available assets.

As referenced above, these programs are typically limited to securities in demand that can be loaned at relatively low financing rates. As such, we believe there is unused capacity available through these programs. Holdings of cash and cash equivalent investments in these short-term spread portfolios allow for further flexibility in sizing the portfolio to better match available financing. Current conditions in both the financing and investment markets are continuously monitored in order to appropriately manage the cost of funds, investment spreads, asset/liability duration matching and liquidity.

Federal Home Loan Bank of New York

Prudential Insurance has been a member of the Federal Home Loan Bank of New York, or FHLBNY, since June 2008. Membership allows Prudential Insurance to participate in FHLBNY's product line of financial services, including collateralized advances, collateralized funding agreements and general asset/liability management that can be used for liquidity management and as an alternative source of funding. Our membership in FHLBNY requires us to maintain ownership of member stock, and borrowings from FHLBNY require us to purchase FHLBNY activity based stock in an amount equal to 4.5% of outstanding borrowings. Under FHLBNY guidelines, borrowings by its members are at the discretion of the FHLBNY.

The FHLBNY requires Prudential Insurance to pledge qualifying mortgage-related assets or U.S. Treasury securities as collateral for all borrowings. On May 8, 2009, the New Jersey Department of Banking and Insurance, or NJDOBI, revised its prior guidance to increase the maximum amount of qualifying assets that Prudential Insurance may pledge as collateral to the FHLBNY from 5% to 7% of its prior year-end statutory net admitted assets exclusive of separate account assets; however, this limitation resets to 5% on December 31, 2010 unless extended by NJDOBI. Based on its statutory net admitted assets as of December 31, 2008, the 7% limitation equates to a maximum amount of pledged assets of \$10.5 billion and an estimated maximum borrowing capacity, after taking into account applicable required collateralization levels and required purchases of activity based FHLBNY stock, of approximately \$9.0 billion. However, the ability to borrow from the FHLBNY is subject to the availability and maintenance of qualifying assets at Prudential Insurance, and there is no assurance that Prudential Insurance will have sufficient qualifying assets available to it in order to access the increased capacity in full at any particular time. Also, the revised guidance from NJDOBI limits the aggregate amount of assets Prudential Insurance may pledge for all loans, including borrowings from the FHLBNY, to 10% of its prior year-end statutory net admitted assets exclusive of separate account assets; however, this limitation excludes certain activities, such as the asset-based financing transactions described above.

The fair value of the qualifying assets pledged as collateral by Prudential Insurance must be maintained at certain specified levels of the borrowed amount, which can vary, depending on the nature of the assets pledged. If the fair value of the collateral declines below these levels or if assets previously pledged cease to qualify under FHLBNY guidelines (such as due to ratings downgrades on mortgage-backed securities), Prudential Insurance

Table of Contents

could be required to pledge additional collateral or repay outstanding borrowings. If at the time of a proposed borrowing, or at a time when required to pledge additional collateral in respect of outstanding borrowings, Prudential Insurance had insufficient qualifying assets, it would need to obtain and pledge additional mortgage-related assets and/or Treasury securities through asset purchases, reacquiring assets on loan or otherwise, subject to availability on appropriate terms. As of September 30, 2009, we had pledged qualifying assets with a fair value of \$7.53 billion, which would have allowed us to borrow up to approximately \$6.7 billion. As of that date, our actual borrowings outstanding, in the form of collateralized advances and collateralized funding agreements, were \$3.5 billion. The additional collateral provides us the flexibility for further borrowings, and obviates the need for periodic collateral true-ups due to volatility in the fair value of the pledged assets or assets previously pledged ceasing to qualify as collateral under FHLBNY guidelines.

In February and March 2009, Prudential Insurance issued collateralized funding agreements in an aggregate amount of \$1.5 billion to the FHLBNY. The funding agreements, which are reflected in Policyholders' account balances, have priority claim status above debt holders of Prudential Insurance. These funding agreements currently serve as a substitute funding source for a product of our Retirement segment for which we earn investment spread that was previously funded by retail medium-term notes issued by Prudential Financial. This substitution allows Prudential Financial to use the proceeds from the sale of the corresponding retail medium-term notes for general corporate purposes. To effect the substitution, during the first and second quarters of 2009, \$1.015 billion and \$507 million, respectively, of intercompany funding agreements that were previously issued by Prudential Insurance to Prudential Financial were terminated for payments of \$730 million and \$491 million, respectively, from Prudential Insurance to Prudential Financial. These payments represent the fair value of the funding agreements on the date of termination. We may conduct similar transactions, or take other actions, in future periods in order to utilize additional retail medium-term notes proceeds for general corporate purposes.

In addition, as of September 30, 2009, \$1 billion of the FHLBNY advances outstanding are reflected in Long-term debt and mature on December 6, 2010, and \$1 billion is reflected in Short-term debt and mature on June 4, 2010. As of September 30, 2009, proceeds from these advances of \$300 million were invested in cash and short-term investments at Prudential Insurance, \$1.1 billion were used to support the operating needs of our businesses, \$300 million were used as a replacement source of funding for a portion of capital requirements of Gibraltar Life, previously funded through foreign currency denominated unsecured bridge loan facilities, and the balance was used to purchase investments, including the requisite FHLBNY activity based stock.

Prudential Insurance may, from time to time, borrow additional funds from FHLBNY for purposes of managing liquidity, making operating loans to affiliates, asset/liability management, or issuance of funding agreements. Under FHLBNY guidelines, if Prudential Insurance's claims-paying ratings decline below certain levels, and the FHLBNY does not receive written assurances from NJDOBI regarding Prudential Insurance's solvency, new borrowings from the FHLBNY would be limited to a term of 90 days or less. Because Prudential Insurance's rating from one rating agency is at the required minimum level and its other ratings are above the required minimum level, currently there is no restriction on the term of borrowings from the FHLBNY.

Economic Capital

We are in the process of developing an economic capital framework, and have begun using economic capital as an additional source of information for our business decisions. As we continue developing the framework, we will be assessing our overall capital position using both economic capital and our current framework, which is primarily based on statutory risk based capital measures.

Table of Contents

Liquidity and Capital Resources of Subsidiaries

Domestic Insurance Subsidiaries

General Liquidity

Liquidity refers to a company's ability to generate sufficient cash flows to meet the needs of its operations. We manage the liquidity of our domestic insurance operations to ensure stable, reliable and cost-effective sources of cash flows to meet all of our obligations. Liquidity is provided by a variety of sources, as described more fully below, including portfolios of liquid assets. The investment portfolios of our domestic operations are integral to the overall liquidity of those operations. We segment our investment portfolios and employ an asset/liability management approach specific to the requirements of our product lines. This enhances the discipline applied in managing the liquidity, as well as the interest rate and credit risk profiles, of each portfolio in a manner consistent with the unique characteristics of the product liabilities. We use a projection process for cash flows from operations to ensure sufficient liquidity is available to meet projected cash outflows, including claims.

Liquidity is measured against internally developed benchmarks that take into account the characteristics of both the asset portfolio and the liabilities that they support. The results are affected substantially by the overall asset type and quality of our investments.

We have recently received a request pursuant to the documentation for the disposition of our property and casualty operations completed in 2003 to deposit into a trust cash or securities for the purpose of securing insurance liabilities that were to have been transferred to Prudential Insurance following completion of the disposition but that have not been so transferred. We estimate that the amount of cash or securities to be deposited is approximately \$500 million, and we are allowed to satisfy a portion of this requirement through the deposit of promissory notes received from the purchaser at the time of the disposition. We believe that the deposit of these assets would not be a material liquidity event for Prudential Insurance.

Cash Flow

The principal sources of liquidity for Prudential Insurance and our other domestic insurance subsidiaries are premiums and annuity considerations, investment and fee income, and investment maturities and sales associated with our insurance and annuity operations, as well as internal and external borrowings. The principal uses of that liquidity include benefits, claims, dividends paid to policyholders, and payments to policyholders and contractholders in connection with surrenders, withdrawals and net policy loan activity. Other uses of liquidity include commissions, general and administrative expenses, purchases of investments, and payments in connection with financing activities.

We believe that the cash flows from our insurance and annuity operations are adequate to satisfy the current liquidity requirements of these operations, including under reasonably foreseeable stress scenarios. The continued adequacy of this liquidity will depend upon factors such as future securities market conditions, changes in interest rate levels, policyholder perceptions of our financial strength, and the relative safety of competing products (including those with enhancements under EESA), each of which could lead to reduced cash inflows or increased cash outflows. In addition, market volatility can impact the level of capital required to support our businesses, particularly in our annuity business. Our domestic insurance operations' cash flows from investment activities result from repayments of principal, proceeds from maturities and sales of invested assets and investment income, net of amounts reinvested. The primary liquidity risks with respect to these cash flows are the risk of

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

default by debtors or bond insurers, our counterparties' willingness to extend repurchase and/or securities lending arrangements, commitments to invest and market volatility. We closely manage these risks through our credit risk management process and regular monitoring of our liquidity position.

In managing the liquidity of our domestic insurance operations, we also consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions when selecting assets to support these contractual obligations. We use surrender charges and other contract provisions to mitigate the extent, timing and

Table of Contents

profitability impact of withdrawals of funds by customers from annuity contracts and deposit liabilities. The following table sets forth withdrawal characteristics of our general account annuity reserves and deposit liabilities (based on statutory liability values) as of the dates indicated.

	September 30, 2009		December 31, 2008	
	Amount	% of Total	Amount	% of Total
	(\$ in millions)			
Not subject to discretionary withdrawal provisions	\$ 35,845	46%	\$ 36,880	47%
Subject to discretionary withdrawal, with adjustment:				
With market value adjustment	20,665	27	20,341	26
At market value	1,542	2	1,279	2
At contract value, less surrender charge of 5% or more	4,240	5	4,048	5
Subtotal	62,292	80	62,548	80
Subject to discretionary withdrawal at contract value with no surrender charge or surrender charge of less than 5%	15,955	20	15,906	20
Total annuity reserves and deposit liabilities	\$ 78,247	100%	\$ 78,454	100%

Individual life insurance policies are less susceptible to withdrawal than our annuity reserves and deposit liabilities because policyholders may incur surrender charges and be subject to a new underwriting process in order to obtain a new insurance policy. Our annuity reserves with guarantee features may be less susceptible to withdrawal than historical experience indicates, due to the current value of these guarantee features to policyholders as a result of recent market declines. Annuity benefits under group annuity contracts are generally not subject to early withdrawal. Gross account withdrawals for our domestic insurance operations products were consistent with our assumptions in asset/liability management and the associated cash outflows did not have a material adverse impact on our overall liquidity.

Liquid Assets

Liquid assets include cash, cash equivalents, short-term investments, fixed maturities that are not designated as held to maturity and public equity securities. As of September 30, 2009 and December 31, 2008, our domestic insurance operations had liquid assets of \$133.7 billion and \$125.6 billion, respectively, which includes a portion financed with asset-based financing. The portion of liquid assets comprised of cash and cash equivalents and short-term investments was \$9.7 billion and \$10.7 billion as of September 30, 2009 and December 31, 2008, respectively. As of September 30, 2009, \$105.1 billion, or 87%, of the fixed maturity investments that are not designated as held to maturity within our domestic insurance company general account portfolios were rated investment grade. The remaining \$15.6 billion, or 13%, of these fixed maturity investments were rated non-investment grade. We consider attributes of the various categories of liquid assets (for example, type of asset and credit quality) in calculating internal liquidity measures in order to evaluate the adequacy of our domestic insurance operations liquidity under a variety of stress scenarios. We believe that the liquidity profile of our assets is sufficient to satisfy current liquidity requirements, including under foreseeable stress scenarios.

Given the size and liquidity profile of our investment portfolios, we believe that claim experience varying from our projections does not constitute a significant liquidity risk. Our asset/liability management process takes into account the expected maturity of investments and expected claim payments as well as the specific nature and risk profile of the liabilities. Historically, there has been no significant variation between the expected maturities of our investments and the payment of claims.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Our domestic insurance companies liquidity is managed through access to substantial investment portfolios as well as a variety of instruments available for funding and/or managing short-term cash flow mismatches, including from time to time those arising from claim levels in excess of projections. To the extent we need to pay claims in excess of projections, we may borrow temporarily or sell investments sooner than anticipated to pay

Table of Contents

these claims, which may result in increased borrowing costs or realized investment gains or losses affecting results of operations. For a further discussion of realized investment gains or losses, see *Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses*. We believe that borrowing temporarily or selling investments earlier than anticipated will not have a material impact on the liquidity of our domestic insurance companies. Payment of claims and sale of investments earlier than anticipated would have an impact on the reported level of cash flow from operating, investing and financing activities, respectively, in our financial statements. Instead of selling investments at depressed market prices externally, in order to preserve economic value (including tax attributes), we may also sell investments from one subsidiary to another at fair market value or transfer investments internally between businesses within the same subsidiary.

Prudential Funding, LLC

Prudential Funding, LLC, or Prudential Funding, a wholly owned subsidiary of Prudential Insurance, serves as an additional source of financing to meet the working capital needs of Prudential Insurance and its subsidiaries. Prudential Funding also lends to other subsidiaries of Prudential Financial up to limits established with the New Jersey Department of Banking and Insurance. To the extent that other subsidiaries of Prudential Financial have financing needs in excess of these limits, these needs are met through financing from Prudential Financial directly or from third parties. Prudential Funding operates under a support agreement with Prudential Insurance whereby Prudential Insurance has agreed to maintain Prudential Funding's positive tangible net worth at all times. Prudential Financial has also issued a subordinated guarantee covering Prudential Funding's domestic commercial paper program. Prudential Funding borrows funds primarily through the direct issuance of commercial paper. Prudential Funding's outstanding commercial paper, including master note borrowings, were \$716 million as of September 30, 2009 and \$4.354 billion as of December 31, 2008, and are more fully discussed in *Alternate Sources of Liquidity*. The impact of Prudential Funding's financing capacity on liquidity is considered in the internal liquidity measures of the domestic insurance operations.

The total principal amount of debt outstanding under Prudential Funding's domestic medium-term note programs was \$172 million as of both September 30, 2009 and December 31, 2008. The weighted average interest rates on Prudential Funding's long-term debt, including the effect of interest rate hedging activity, were 1.06%, and 4.23% for the nine months ended September 30, 2009 and 2008, respectively.

Capital

The Risk Based Capital, or RBC, ratio is a primary measure by which we evaluate the capital adequacy of Prudential Insurance and our other domestic life insurance subsidiaries, which includes businesses in both the Financial Services Businesses and the Closed Block Business. We manage Prudential Insurance's RBC ratio to a level consistent with a AA ratings target. RBC is determined by statutory guidelines and formulas that consider, among other things, risks related to the type and quality of the invested assets, insurance-related risks associated with an insurer's products and liabilities, interest rate risks and general business risks. The RBC ratio calculations are intended to assist insurance regulators in measuring the adequacy of an insurer's statutory capitalization. The reporting of RBC measures is not intended for the purpose of ranking any insurance company or for use in connection with any marketing, advertising or promotional activities. Prudential Insurance reported an RBC ratio of 452% as of December 31, 2008. The RBC ratio is an annual calculation; however, based upon September 30, 2009 amounts, we estimate that the RBC ratios for Prudential Insurance and our other domestic life insurance subsidiaries would exceed the minimum level required by applicable insurance regulations.

The level of statutory capital of our domestic life insurance subsidiaries can be materially impacted by interest rate and equity market fluctuations, changes in the values of derivatives, the level of impairments recorded, and credit quality migration of the investment portfolio, among other items. Further, a recapture of business subject to reinsurance arrangements due to defaults by, or credit quality migration affecting, the reinsurers could result in higher required statutory capital levels. The level of statutory capital of our domestic life insurance subsidiaries is also affected by statutory accounting rules, which are subject to change by insurance regulators.

Table of Contents

The implementation of VACARVM, a new statutory reserve methodology for variable annuities with guaranteed benefits, effective December 31, 2009 is not expected to have a material impact on the statutory surplus of our domestic life insurance subsidiaries in the aggregate. However, VACARVM is expected to result in higher statutory reserves ceded to our offshore captive reinsurance company, which we currently anticipate will increase statutory reserve credit requirements by approximately \$1.0 billion from the levels at December 31, 2008. Several strategies are currently under review to meet the increased statutory reserve credit requirement. The activities we intend to undertake to mitigate or address these needs will include a combination of funding a statutory reserve credit trust with available cash, certain hedge assets and loans from Prudential Financial and/or affiliates, and obtaining letters of credit. However, our ability to successfully execute these strategies may depend on market or other conditions.

Prudential Securities Group

As a result of the negative impact of market dislocations on capital levels within Prudential Insurance experienced during 2008, we contributed Prudential Securities Group, LLC to Prudential Insurance to strengthen capital during the fourth quarter of 2008. This contribution increased Prudential Insurance's net admitted assets by \$2.2 billion.

Prudential Securities Group owns our investment in the Wachovia Securities joint venture, which we account for under the equity method, as well as other wholly owned businesses, principally our global commodities group. As of September 30, 2009 and December 31, 2008, Prudential Securities Group's assets totaled \$7.3 billion and \$10.4 billion, respectively. Distributions from our investment in Wachovia Securities to Prudential Securities Group totaled \$104 million for the nine months ended September 30, 2008. There have been no distributions in 2009.

On June 17, 2009, we provided notice to Wells Fargo of the exercise of our right under the "lookback" option to put our interests in the Wachovia Securities joint venture to Wells Fargo. Under the terms of the joint venture agreements, we expect that the closing of the put transaction would occur on or about January 1, 2010. For more information on our investment in the Wachovia Securities joint venture, see Note 13 to the Unaudited Interim Consolidated Financial Statements, as well as "Divested Businesses" Financial Advisory.

Under the terms of the joint venture agreements, Wells Fargo may elect to pay the proceeds from our exercise of the "lookback" put either in cash, Wells Fargo common stock or a combination of the foregoing. We have received notice from Wells Fargo that it intends to pay the proceeds in an unspecified combination of cash and Wells Fargo common stock. Under the terms of the agreements relating to the joint venture, the number of shares of Wells Fargo common stock to be received by us will be determined by dividing the portion of the proceeds to be paid in Wells Fargo common stock by the average of the closing prices of the Wells Fargo common stock during the 10 trading day period immediately prior to the closing. The joint venture agreements provide that the Company and Wells Fargo will enter into a registration rights agreement for the registration under the Securities Act of 1933 of the Wells Fargo shares to be received at the closing.

We will bear the risk of changes in the market value of the portion of the payment received at closing in Wells Fargo common stock until such stock is disposed of. We are evaluating our options for mitigating potential reductions in the ultimate proceeds from any common stock received at closing. Our ability to hedge such market risk may be limited and our ability to dispose of such stock will be subject to securities law and other restrictions.

We have estimated the proceeds from the exercise of the "lookback" put to be approximately \$5 billion, based on a January 1, 2010 closing, the terms of the joint venture agreements and our assessment of market conditions and retail brokerage firm valuations at the relevant valuation date of January 1, 2008, producing an estimated gain upon settlement of approximately \$2.8 billion or about \$1.8 billion on an after-tax basis; however, the amount of such proceeds and gain have not been finally determined and could be more or less. The after-tax gain on sale would be

reflected in the capital and surplus of Prudential Insurance.

Table of Contents

Notwithstanding the terms of the joint venture agreements governing the lookback put, we have from time to time had discussions with Wells Fargo concerning a possible early settlement of the lookback put. The proceeds received upon any early settlement would take into account the time value of money, the benefits and certainty provided by an early resolution and the form of consideration to be received. Taking into account these factors, it could be expected that we may agree to an amount less than our \$5 billion estimate in an early settlement. Absent an early settlement, we will proceed with the closing of the lookback put transaction in accordance with the relevant terms of the joint venture agreements as discussed above.

In connection with the establishment of the Wachovia Securities joint venture, Wachovia Securities, LLC issued a subordinated promissory note in the principal amount of \$417 million, which is held by Prudential Insurance. This note bears interest, payable quarterly, at three month LIBOR plus 105 basis points. Under the terms of the joint venture agreements, this note becomes payable, together with accrued and unpaid interest, within thirty days of termination of the joint venture.

The other wholly-owned businesses in Prudential Securities Group, principally our global commodities group, continue to maintain sufficiently liquid balance sheets, consisting mostly of cash and cash equivalents, segregated client assets, and short-term receivables from clients, broker-dealers, and exchanges. As registered broker-dealers and members of various self-regulatory organizations, our U.S. registered broker-dealer subsidiaries and Wachovia Securities are subject to the SEC's Uniform Net Capital Rule, as well as the net capital requirements of the Commodity Futures Trading Commission and the various securities and commodities exchanges of which they are members. Compliance with these capital requirements could limit the ability of these operations to pay dividends.

International Insurance and Investments Subsidiaries

In our international insurance operations, liquidity is provided through ongoing operations as well as portfolios of liquid assets. In managing the liquidity and the interest and credit risk profiles of our international insurance portfolios, we employ a discipline similar to the discipline employed for domestic insurance subsidiaries. We monitor liquidity through the use of internal liquidity measures, taking into account the liquidity of the asset portfolios.

As with our domestic operations, in managing the liquidity of these operations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions in selecting assets to support these contractual obligations. As of September 30, 2009 and December 31, 2008, our international insurance subsidiaries had total general account insurance related liabilities (other than dividends payable to policyholders) of \$71.3 billion and \$64.9 billion, respectively. Of those amounts, \$38.4 billion and \$34.7 billion, respectively, were associated with Gibraltar Life.

Concurrent with our acquisition of Gibraltar Life in April 2001, substantially all of its insurance liabilities were restructured under a plan of reorganization to include special surrender penalties on existing policies. These charges, which were initially 15%, have gradually declined each year and expired in April 2009. We did not experience any material increases in the level of surrenders due to the expiration of these surrender charges. Policies issued by Gibraltar Life post-acquisition are generally subject to discretionary withdrawal at contract value, less applicable surrender charges, which currently start at 5% or more.

A special dividend is payable to certain Gibraltar Life policyholders based on 70% of the net increase in the fair value, through March 2009, of certain real estate and loans, net of transaction costs and taxes, included in the Gibraltar Life reorganization plan. The first special dividend was paid in 2005 and the final special dividend is payable generally on the next anniversary of the issue date of each applicable insurance policy, beginning in April 2009. During the three months ended September 30, 2009, Gibraltar made distributions to policyholders of \$213 million in

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

payment of the 2009 special dividend, primarily in the form of additional policy values, and to a lesser extent in cash. As of September 30, 2009, the remaining liability of \$228 million related to the special dividend is included in "Policyholders' dividends" and will be paid upon the applicable policy anniversary dates throughout the next few quarters. Gibraltar Life's investment portfolio continues to be structured to provide adequate liquidity for payment of the special dividend.

Table of Contents

On May 1, 2009, our Gibraltar Life operations acquired Yamato Life, a Japanese life insurance company that declared bankruptcy in October 2008. Gibraltar Life served as the reorganization sponsor for Yamato and under the reorganization agreement acquired Yamato by contributing \$72 million of capital to Yamato. Concurrent with our acquisition, substantially all of Yamato's insurance liabilities were restructured under a plan of reorganization to include special surrender penalties on existing policies. These charges are 20% in the first year and will decline by 2% each year thereafter. Subsequent to the acquisition, we renamed the acquired company Prudential Financial of Japan Life Insurance Company Ltd.

The Prudential Life Insurance Company, Ltd., or Prudential of Japan, had \$26.6 billion and \$24.9 billion of general account insurance related liabilities, other than dividends to policyholders, as of September 30, 2009 and December 31, 2008, respectively. Prudential of Japan did not have a material amount of general account annuity reserves or deposit liabilities subject to discretionary withdrawal as of September 30, 2009 or December 31, 2008. Additionally, we believe that the individual life insurance policies sold by Prudential of Japan do not have significant withdrawal risk because policyholders may incur surrender charges and must undergo a new underwriting process in order to obtain a new insurance policy.

As of September 30, 2009 and December 31, 2008, our international insurance subsidiaries had cash and short-term investments of \$2.5 billion and \$2.7 billion, respectively, and fixed maturity investments, other than those designated as held to maturity, with fair values of \$55.2 billion and \$49.3 billion, respectively. As of September 30, 2009, \$53.8 billion, or 98%, of the fixed maturity investments that are not designated as held to maturity within our international insurance subsidiaries were rated investment grade with \$39.6 billion, or 72%, invested in government or government agency bonds. The remaining \$1.4 billion, or 2%, of these fixed maturity investments were rated non-investment grade. Of those amounts, \$29.3 billion of the investment grade fixed maturity investments and \$0.9 billion of the non-investment grade fixed maturity investments were associated with Gibraltar Life. We consider attributes of the various categories of liquid assets (for example, type of asset and credit quality) in calculating internal liquidity measures to evaluate the adequacy of our international insurance operations' liquidity under stress scenarios. We believe that ongoing operations and the liquidity profile of our international insurance assets provide sufficient liquidity under reasonably foreseeable stress scenarios.

Similar to the RBC ratios that are employed by U.S. insurance regulators, regulatory authorities in the international jurisdictions in which we operate generally establish some form of minimum solvency margin requirements for insurance companies. All of our international insurance subsidiaries have solvency margins in excess of the minimum levels required by the applicable regulatory authorities. These solvency margins are also a primary measure by which we evaluate the capital adequacy of our international insurance operations. We manage these solvency margins to a capitalization level consistent with our AA ratings target. During the fourth quarter of 2008 and continuing into the first quarter of 2009, market conditions negatively impacted the level of capital in our international life insurance subsidiaries, particularly in Japan. To maintain our solvency ratios at or above the desired target level, we made capital contributions and capital loans of \$366 million to our Japan life insurance subsidiaries during the first quarter of 2009. Maintenance of our solvency ratios at certain levels is also important to our competitive positioning, as in certain jurisdictions, such as Japan, these solvency margins are required to be disclosed to the public and therefore impact the public perception of an insurer's financial strength.

We employ various hedging strategies to manage potential exposure to foreign currency exchange rate movements, including the strategies discussed in Results of Operations for Financial Services Businesses by Segment International Insurance and Investments Division. Cash settlements from these hedging activities result in cash flows to or from Prudential Financial and are dependent on changes in foreign currency exchange rates and the notional amount of the exposures hedged. The cash settlements include those for internal hedges related to U.S. dollar denominated investments held on the books of the yen-based entities, as well as for external hedges. A significant yen appreciation over an extended period of time would result in net cash outflows from Prudential Financial in excess of our historical experience. During the second quarter of 2009, we terminated our hedges of the U.S. GAAP equity exposure of our Korean operations due to a variety of considerations, including a desire to limit the potential for cash settlement outflows that would result from a strengthening Korean won.

Table of Contents

In our international investments operations, liquidity is provided through asset management fees as well as commission revenue. The principal uses of liquidity include general and administrative expenses, and distributions of dividends and returns of capital. As with our domestic operations, the primary liquidity risks for our fee based asset management businesses relate to their profitability, which is impacted by market conditions and our investment management performance. We believe cash flows from our international investments subsidiaries are adequate to satisfy the current liquidity requirements of their operations, as well as requirements that could arise under foreseeable stress scenarios, which are monitored through the use of internal measures.

Asset Management Subsidiaries

Our asset management businesses, which include real estate, public and private fixed income and public equity asset management, as well as commercial mortgage origination and servicing, and retail investment products, such as mutual funds and other retail services, are largely unregulated from the standpoint of dividends and distributions. Our asset management subsidiaries through which we conduct these businesses generally do not have restrictions on the amount of distributions they can make, and the fee based asset management business can provide a relatively stable source of cash flow to Prudential Financial.

The principal sources of liquidity for our fee-based asset management businesses include asset management fees and commercial mortgage servicing fees. The principal uses of liquidity include general and administrative expenses, and distribution of dividends and returns of capital to Prudential Financial. The primary liquidity risks for our fee based asset management businesses relate to their profitability, which is impacted by market conditions and our investment management performance. We believe the cash flows from our fee based asset management businesses are adequate to satisfy the current liquidity requirements of their operations, as well as requirements that could arise under foreseeable stress scenarios, which are monitored through the use of internal measures.

The principal sources of liquidity for our proprietary investments and interim loans are cash flows from investments, the ability to liquidate investments, and available borrowing lines from internal sources, including Prudential Funding and Prudential Financial. The primary liquidity risks include the inability to sell assets in a timely manner, declines in the value of assets and credit defaults. The current adverse market conditions have increased the liquidity risks associated with our proprietary investments and interim loans, as the markets for certain investments, such as commercial mortgages and real estate, have become less liquid. If we needed to sell these investments, we may have difficulty doing so in a timely manner at a price that we could otherwise realize.

In December 2008, we received approval from NJDOBI for Prudential Insurance to provide an 18-month \$1.5 billion lending facility to our commercial mortgage operation that is collateralized primarily by its interim loan portfolio. As of September 30, 2009, we were in compliance with the loan-to-value covenant of the facility. However, there is a risk that further deterioration in the collateral pledged under the facility could require posting of additional collateral or a partial pay down of the facility to bring the facility into compliance with its covenants. As of September 30, 2009, \$0.7 billion was outstanding under this facility and the proceeds were used to repay financing provided by Prudential Financial.

In April 2009, our commercial mortgage origination and servicing business received approval to participate in a Fannie Mae alternative delivery program known as ASAP Plus (As Soon as Pooled delivery). Our approval limit for outstanding balances on ASAP Plus is presently \$350 million. This program allows us to assign a qualified Fannie Mae loan trade commitment to Fannie Mae as early as the next business day after a loan closes, and receive 99% of the loan purchase price from Fannie Mae. The program does not eliminate the need to provide temporary warehouse financing, but does significantly reduce the duration of funding requirements for eligible Fannie Mae originated loans from the normal delivery cycle of two to four weeks down to as little as one to two days.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

During the first nine months of 2009, in our proprietary investing business, we received repayments of real estate loans secured by equity commitments from investors and assets of funds managed by us, and we reduced

Table of Contents

exposure to certain public equity and real estate seed investments. The proceeds of these activities, which totaled \$897 million, were used to repay financing provided by Prudential Financial and Prudential Funding. During the quarter ended September 30, 2009, the Company extended the maturity dates on \$332 million of loans sufficiently collateralized by investor equity commitments or fund assets.

Certain real estate funds under management are held for the benefit of clients in insurance company separate accounts sponsored by Prudential Insurance. In the normal course of business, these separate accounts enter into purchase commitments which include commitments to purchase real estate, invest in future real estate partnerships, and/or fund additional construction or other expenditures on previously acquired real estate investments. Certain purchases of real estate are contingent on the developer's development of the real estate according to plans and specifications outlined in a pre-sale agreement or the property achieving a certain level of leasing. Purchase commitments are typically entered into by Prudential Insurance on behalf of the particular separate account and, upon acquisition, are titled either in Prudential Insurance or an LLC subsidiary formed for that purpose. In certain cases, the commitments specify that recourse on the obligation is limited to the assets of the separate account.

The following is a summary of the outstanding purchase commitments for these separate account portfolios as of September 30, 2009:

Separate Account Purchase Commitments	Contractual Maturity Date			Total
	Remaining 2009	2010	After 2010	
Recourse to Prudential Insurance	\$ 830	\$ 2,318	\$ 985	\$ 4,133
Recourse limited to assets of separate accounts	642	2,584	1,901	5,127
Total	\$ 1,472	\$ 4,902	\$ 2,886	\$ 9,260

The contractual maturity dates of some of the outstanding purchase commitments may accelerate upon a failure to maintain required loan-to-value ratios, upon the downgrade of ratings applicable to the separate account funds or upon the failure to satisfy other financial covenants. Of the \$9.260 billion of total commitments, \$5.447 billion represents contingent commitments as of September 30, 2009.

These separate accounts have also entered into syndicated credit facilities providing for borrowings in the aggregate amount of up to \$1.0 billion, of which \$0.2 billion was outstanding at September 30, 2009. These facilities also include loan-to-value ratio requirements and other financial covenants. Recourse on obligations under these facilities is limited to the assets of the applicable separate account. As of September 30, 2009, these separate account portfolios had a combined gross and net asset value of \$23.8 billion and \$11.9 billion, respectively.

At the time of maturity of a commitment obligation, Prudential Insurance often endeavors to negotiate extensions, refinancings or other solutions with creditors. Management believes that the separate accounts have sufficient resources to ultimately meet their obligations. However, because of the volatility and disruption in the credit and capital markets, the separate accounts may not be able to timely fund all maturing obligations from regular sources such as asset sales, operating cash flow, deposits from clients, debt refinancings or from the above-mentioned portfolio level credit facilities. In cases where the separate account is not able to fund maturing obligations, Prudential Insurance may be called upon or required to provide interim funding solutions.

As of September 30, 2009 and December 31, 2008, our asset management subsidiaries had cash and cash equivalents and short-term investments of \$852 million and \$1.192 billion, respectively, which include \$20 million and \$462 million of loans secured by investor equity commitments

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

or fund assets, respectively. The balance as of September 30, 2009 reflects a decrease of \$442 million, of which \$110 million came primarily from paydowns and \$332 million came from the reclassification of certain secured loans to other long-term investments due to the Company's decision to extend the loans beyond their original maturity date.

Table of Contents**Financing Activities**

In March 2009, Prudential Financial filed a shelf registration statement with the SEC, which permits the issuance of public debt, equity and hybrid securities. As a Well-Known Seasoned Issuer under SEC rules, Prudential Financial's shelf registration statement provides for automatic effectiveness upon filing, pay-as-you-go fees and the ability to add securities by filing automatically effective amendments. Also, in accordance with these rules, the shelf registration statement has no stated issuance capacity.

In June 2009, Prudential Financial issued 36,858,975 shares of its Common Stock (which number includes the exercise in full of the underwriters' option to purchase up to an additional 4,807,692 shares of Common Stock) in a public offering at a price of \$39.00 per share for gross proceeds of \$1.438 billion. The net proceeds from this offering of \$1.391 billion are expected to be used for general corporate purposes, a portion of which is currently held in cash and cash equivalents at Prudential Financial.

As of September 30, 2009 and December 31, 2008, total short- and long-term debt of the Company on a consolidated basis was \$24.9 billion and \$30.8 billion, respectively, which as shown below includes \$14.9 billion and \$16.6 billion, respectively, related to the parent company, Prudential Financial.

Prudential Financial Borrowings

Prudential Financial is authorized to borrow funds from various sources to meet its capital and other funding needs, as well as the capital and other funding needs of its subsidiaries. The following table sets forth the outstanding short- and long-term debt of Prudential Financial, other than debt issued to consolidated subsidiaries, as of the dates indicated:

	September 30, 2009	December 31, 2008
	(in millions)	
Borrowings:		
General obligation short-term debt:		
Commercial paper	\$ 209	\$ 1,243
Floating rate convertible senior notes	35	2,131
Foreign currency denominated bridge loan facility		816
Current portion of long-term debt	52	264
General obligation long-term debt:		
Senior debt	9,725	7,255
Junior subordinated debt (hybrid securities)	1,518	1,518
Retail medium-term notes	3,335	3,413
Total general obligations	\$ 14,874	\$ 16,640

The following table presents, as of September 30, 2009, Prudential Financial's contractual maturities of its general obligation long-term debt:

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Calendar Year	Senior Debt	Junior Subordinated Debt (in millions)	Retail Medium-term Notes
2010	\$	\$	\$ 10
2011	350		134
2012	850		147
2013	1,100		234
2014	1,500		140
2015 and thereafter	5,925	1,518	2,670
Total	\$ 9,725	\$ 1,518	\$ 3,335

Table of Contents

In March 2009, Prudential Financial filed an updated prospectus supplement for its Medium-Term Notes, Series D program under the shelf registration statement. The authorized issuance capacity under the Series D program is \$10 billion, and as of September 30, 2009, approximately \$2.6 billion remained available under the program. In June 2009, Prudential Financial issued under this program \$250 million of 6.20% notes due January 2015 and \$750 million of 7.375% 10-year notes. Also, in September 2009, Prudential Financial issued under this program \$900 million of 4.75% 6-year notes and \$600 million of 3.625% 3-year notes. A portion of these proceeds was used to replace borrowing needs of our affiliates that were previously financed through commercial paper, and the remainder is held in cash and cash equivalents at Prudential Financial for general corporate purposes. The weighted average interest rates on Prudential Financial's medium-term and senior notes, including the effect of interest rate hedging activity, were 5.56% and 5.43% for the nine months ended September 30, 2009 and 2008, respectively, excluding the effect of debt issued to consolidated subsidiaries.

In March 2009, Prudential Financial filed an updated prospectus supplement under the shelf registration statement for its retail medium-term notes, including the InterNotes® program. The authorized issuance capacity under the current retail medium-term notes program is \$5 billion, and as of September 30, 2009, approximately \$2.4 billion remained available under this program. This retail medium-term notes program has served as a funding source for a product of our Retirement segment for which we earn investment spread that is economically similar to funding agreement-backed medium-term notes issued to institutional investors, except that the retail notes are senior unsecured obligations of Prudential Financial and are primarily purchased by retail investors. However, beginning in the first quarter of 2009, some of the proceeds from prior sales of retail medium-term notes are being used for general corporate purposes and funding agreements issued to the FHLBNY are being used as a substitute funding source for the asset portfolio within the Retirement segment, as discussed in more detail in Prudential Financial Alternative Sources of Liquidity Federal Home Loan Bank of New York. The weighted average interest rates on Prudential Financial's retail medium-term notes were 5.56% and 5.97% for the nine months ended September 30, 2009 and 2008, respectively, excluding the effect of debt issued to consolidated subsidiaries. Our retail medium-term notes program has been negatively impacted by the disruptions in the credit markets. The decline in demand for risk-bearing investments among retail investors, and the related increase in funding costs, has resulted in a halt in new debt issuances under this program. As the market dislocations abate and investor demand improves, we may resume issuances under the program.

In February 2009, Prudential Financial repaid at maturity ¥74 billion borrowed under unsecured bridge loan facilities provided by two institutions using internal sources of cash. The net proceeds had been used to repay maturing debt that was issued concurrently with our acquisition of Gibraltar Life in April 2001, which served to fund capital requirements of Gibraltar Life. This requirement is now funded through a combination of borrowings from the FHLBNY, long-term debt of Prudential Funding, and internal sources of cash.

In June 2008, Prudential Financial issued \$600 million of 8.875% fixed-to-floating rate junior subordinated notes to institutional investors. Also in June 2008, Prudential Financial issued \$800 million of junior subordinated notes to retail investors with a fixed interest rate of 9.0% paid quarterly and issued an additional \$120 million of the retail junior subordinated notes in July 2008, following the underwriters' exercise of their over-allotment option. Both issuances are considered hybrid capital securities, which receive enhanced equity treatment from the rating agencies. Both series of notes have a scheduled maturity of June 15, 2038 and a final maturity of June 15, 2068. See Note 12 to our Consolidated Financial Statements included in our 2008 Annual Report on Form 10-K for additional information concerning these junior subordinated notes.

In December 2007, Prudential Financial issued in a private placement \$3 billion of floating rate convertible senior notes. These notes are convertible by the holders at any time after issuance into cash and shares of Prudential Financial's Common Stock at a conversion price of \$132.39 per share, which is subject to adjustment upon certain corporate events. The interest rate on these notes is a floating rate equal to 3-month LIBOR minus 1.63%, with a minimum interest rate of 0%. Holders of the notes may require Prudential Financial to repurchase the notes, at par plus accrued interest, on contractually specified dates. On the first such date, June 15, 2009,

Table of Contents

\$1.819 billion of these notes were repurchased by Prudential Financial as required by the holders. The next date on which holders of these notes may require Prudential Financial to repurchase these notes is December 15, 2009. The Company has and may again in the future, depending on economic considerations, also choose to repurchase portions of the outstanding notes from certain qualified institutional buyers. During the fourth quarter of 2008, the first quarter of 2009 and the third quarter of 2009, the Company repurchased, in individually negotiated transactions, \$853 million, \$245 million, and \$52 million respectively, of these notes which were offered to the Company by certain holders. As of September 30, 2009, \$31 million of these floating rate convertible senior notes remain outstanding. In addition, as of September 30, 2009, \$4 million of floating rate convertible senior notes that were issued by Prudential Financial in a private placement in December 2006 remain outstanding. The next date on which holders of these notes may require Prudential Financial to repurchase these notes is December 12, 2009. See Note 12 to our Consolidated Financial Statements included in our 2008 Annual Report on Form 10-K for additional information concerning convertible senior notes.

Prudential Financial also maintains a Euro medium term notes program under which it is authorized to issue up to \$1.5 billion of notes. As of September 30, 2009, there was no debt outstanding under this program.

Consolidated Borrowings

Current capital markets activities for the Company on a consolidated basis principally consist of unsecured short-term and long-term borrowings by Prudential Funding and Prudential Financial, unsecured third party bank borrowings, and asset-based or secured financing. As of September 30, 2009, we were in compliance with all debt covenants related to the borrowings in the table below.

The following table sets forth total consolidated borrowings of the Company as of the dates indicated:

	September 30, 2009	December 31, 2008
	(in millions)	
Borrowings:		
General obligation short-term debt(1)	\$ 2,182	\$ 10,197
General obligation long-term debt:		
Senior debt	13,371	11,054
Junior subordinated debt (hybrid securities)	1,518	1,518
Surplus notes(3)	4,141	3,644
Other(2)	1,000	2,000
Total general obligation long-term debt	20,030	18,216
Total general obligations	22,212	28,413
Limited and non-recourse borrowing:		
Limited and non-recourse short-term debt		338
Limited and non-recourse long-term debt(4)	2,729	2,074
Total limited and non-recourse borrowing	2,729	2,412
Total borrowings(5)	24,941	30,825

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Total asset-based financing	11,168	12,551
Total borrowings and asset-based financings	\$ 36,109	\$ 43,376

- (1) As of both September 30, 2009 and December 31, 2008 \$1.0 billion of short-term debt represent collateralized advances with the Federal Home Loan Bank of New York, which are discussed in more detail in Prudential Financial Alternative Sources of Liquidity Federal Home Loan Bank of New York.
- (2) Reflects collateralized advances with the Federal Home Loan Bank of New York, which are discussed in more detail in Prudential Financial Alternative Sources of Liquidity Federal Home Loan Bank of New York.

Table of Contents

- (3) As of both September 30, 2009 and December 31, 2008, includes \$3.2 billion of floating rate surplus notes issued by subsidiaries of Prudential Insurance to fund regulatory reserves, as well as \$941 million and \$444 million, respectively, of fixed rate surplus notes issued by Prudential Insurance.
- (4) As of both September 30, 2009 and December 31, 2008, \$1.750 billion of limited and non-recourse long-term debt outstanding was attributable to the Closed Block Business. In addition, long-term debt as of September 30, 2009 reflects \$979 million of secured financing related to TALF, which is discussed in more detail below.
- (5) Does not include \$5.5 billion and \$7.1 billion of medium-term notes of consolidated trust entities secured by funding agreements purchased with the proceeds of such notes as of September 30, 2009 and December 31, 2008, respectively, or \$1.5 billion of collateralized funding agreements issued to the Federal Home Loan Bank of New York as of September 30, 2009. These notes and funding agreements are included in Policyholders' account balances. For additional information on the trust notes, see Funding Agreement Notes Issuance Program and for additional information on the Federal Home Loan Bank of New York funding agreements, see Alternative Sources of Liquidity Federal Home Loan Bank of New York.

On September 18, 2009, Prudential Insurance issued in a private placement \$500 million of surplus notes due September 2019, with an interest rate of 5.36% per annum, that are exchangeable by the holders for shares of Prudential Financial Common Stock. See Note 9 to the Unaudited Interim Consolidated Financial Statements for more information regarding these exchangeable surplus notes. The proceeds from the sale of these surplus notes are currently held in cash and cash equivalents and are expected to be used for general corporate purposes at Prudential Insurance.

Total general debt obligations decreased by \$6.2 billion from December 31, 2008 to September 30, 2009, primarily due to a reduction in short-term debt. The primary drivers of the reduction in short-term debt were the reduction in outstanding Prudential Financial and Prudential Funding commercial paper, as further described in Alternative Sources of Liquidity, the repayment of Y74 billion borrowed under unsecured bridge loan facilities described earlier, the repurchases of a substantial portion of our convertible senior notes and maturities of our medium-term notes.

During the first nine months of 2009, we purchased securities under the Federal Reserve's Term Asset-Backed Securities Loan Facility, or TALF. TALF provides secured financing for asset-backed securities backed by certain types of consumer and small business loans and for certain high-quality commercial mortgage-backed securities issued before January 1, 2009. TALF financing is non-recourse to the borrower, is collateralized by the purchased securities and provides financing for the purchase price of the securities, less a haircut that varies based on the type of collateral. Borrowers under the program can deliver the collateralized securities to a special purpose vehicle created by Federal Reserve in full defeasance of the loan.

During the first nine months of 2009, the Company obtained \$1,167 million of secured financing from the Federal Reserve under this program. In September 2009, the Company sold a portion of the securities purchased under the program and used the proceeds to repay \$188 million of the borrowings. As of September 30, 2009, we had \$1.066 billion of securities purchased under TALF that are reflected within Other trading account assets, and had \$979 million of secured financing from the Federal Reserve related to the purchase of these securities that is reflected within Long-term debt. The Company is carrying both the securities and the loans at fair value.

The NAIC has adopted a Model Regulation entitled Valuation of Life Insurance Policies, commonly known as Regulation XXX, and a supporting Guideline entitled The Application of the Valuation of Life Insurance Policies, commonly known as Guideline AXXX. The Regulation and supporting Guideline require insurers to establish statutory reserves for term and universal life insurance policies with long-term premium guarantees that are consistent with the statutory reserves required for other individual life insurance policies with similar guarantees. Many market participants believe that this level of reserves is excessive, and we have implemented reinsurance and capital management actions to mitigate the impact of Regulation XXX and Guideline AXXX on our term and universal life insurance businesses, including those actions which are described in more detail below.

During 2006, a subsidiary of Prudential Insurance entered into a surplus note purchase agreement with an unaffiliated financial institution that provides for the issuance of up to \$3 billion of ten-year floating rate surplus

Table of Contents

notes through 2016, if certain conditions are met (commonly referred to as XXX notes), for the purpose of financing certain regulatory reserves required to be held by subsidiary life insurers in connection with the intercompany reinsurance of certain term life insurance policies. In connection with this financing arrangement, Prudential Financial has agreed with such subsidiary that it or certain of its affiliates will make capital contributions to such subsidiary as necessary to maintain the capital of such subsidiary at or above a prescribed minimum level. Concurrent with the issuance of each surplus note, Prudential Financial enters into arrangements with the buyer, which are accounted for as derivative instruments, that may result in payments by, or to, Prudential Financial over the term of the surplus notes, to the extent there are significant changes in the value of the surplus notes. Principal factors that impact the value of the surplus notes are mortality experience and interest rates. As of September 30, 2009, there have been no payments made under the derivative instrument. Surplus notes issued under this facility are subordinated to policyholder obligations and are subject to regulatory approvals for principal and interest payments. Total outstanding notes under this facility was \$2.7 billion both as of September 30, 2009 and December 31, 2008. See Note 12 to our Consolidated Financial Statements included in our 2008 Annual Report on Form 10-K for additional information.

During 2007, a subsidiary of Prudential Insurance issued \$500 million of 45-year floating rate surplus notes (commonly referred to as AXXX notes) to an unaffiliated financial institution for the purpose of financing certain regulatory reserves required to be held by subsidiary life insurers in connection with the intercompany reinsurance of certain universal life insurance policies. Surplus notes issued under this facility are subordinated to policyholder obligations and are subject to regulatory approvals for principal and interest payments. See Note 12 to our Consolidated Financial Statements included in our 2008 Annual Report on Form 10-K for additional information. In connection with this financing arrangement, Prudential Financial has agreed with such subsidiary that it or certain of its affiliates will make capital contributions to such subsidiary as necessary to maintain the capital of such subsidiary at or above a prescribed minimum level. Concurrent with the issuance of these surplus notes, Prudential Financial entered into a credit derivative that requires Prudential Financial to make certain payments in the event of deterioration in the value of the surplus note. Under this credit derivative, we are required to post cash collateral based on tests that consider the level of 10-year credit default swap spreads on Prudential Financial's senior debt. As of September 30, 2009, when estimates of Prudential Financial's 10-year credit default swap spreads were approximately 224 basis points, no collateral amounts were required to be posted by us.

As we continue to underwrite term and universal life business, we expect to have borrowing needs in 2009 to finance statutory reserves required under Regulation XXX and Guideline AXXX. Several strategies are currently under review to reduce the strain of increased AXXX and XXX statutory reserves associated with our term and universal life products. The activities we may undertake to mitigate or address these needs include entering into reinsurance transactions or executing other capital market strategies; however, our ability to successfully execute these strategies may depend on market conditions. Further, we have \$300 million currently available under our XXX notes facility described above. Absent any successful mitigation efforts and assuming full usage of the XXX notes facility, we currently believe that our financing need for 2009 could be up to \$200 million for XXX and AXXX combined, but this amount may fluctuate due to changes in market conditions or product sales. If we are unsuccessful in satisfying or mitigating this strain as a result of market conditions or otherwise, this financing need could have an adverse effect on our overall liquidity and capital. The inability to finance the statutory reserves could require us to increase prices and/or reduce our sales of term or universal life products in the future.

Our total borrowings consist of capital debt, investment related debt, securities business related debt and debt related to specified other businesses. Capital debt is borrowing that is used or will be used to meet the capital requirements of Prudential Financial as well as borrowings invested in equity or debt securities of direct or indirect subsidiaries of Prudential Financial and subsidiary borrowings utilized for capital requirements. Investment related borrowings consist of debt issued to finance specific investment assets or portfolios of investment assets, including institutional spread lending investment portfolios, real estate and real estate related investments held in consolidated joint ventures, as well as institutional and insurance company portfolio cash

Table of Contents

flow timing differences. Securities business related debt consists of debt issued to finance primarily the liquidity of our broker-dealers and our capital markets and other securities business related operations. Debt related to specified other businesses consists of borrowings associated with our individual annuity business, real estate franchises and relocation services. Borrowings under which either the holder is entitled to collect only against the assets pledged to the debt as collateral, or has only very limited rights to collect against other assets, have been classified as limited and non-recourse debt. Consolidated borrowings as of both September 30, 2009 and December 31, 2008 included \$1.750 billion of limited and non-recourse debt attributable to the Closed Block Business.

The following table summarizes our borrowings, categorized by use of proceeds, as of the dates indicated:

	September 30, 2009	December 31, 2008
	(in millions)	
General obligations:		
Capital debt	\$ 8,494	\$ 7,535
Investment related	10,506	16,480
Securities business related	2,587	3,356
Specified other businesses	625	1,042
Total general obligations	22,212	28,413
Limited and non-recourse debt	2,729	2,412
Total borrowings	\$ 24,941	\$ 30,825
Short-term debt	\$ 2,182	\$ 10,535
Long-term debt	22,759	20,290
Total borrowings	\$ 24,941	\$ 30,825
Borrowings of Financial Services Businesses	\$ 23,191	\$ 28,632
Borrowings of Closed Block Business	1,750	2,193
Total borrowings	\$ 24,941	\$ 30,825

Funding Agreement Notes Issuance Program

In 2003, Prudential Insurance established a Funding Agreement Notes Issuance Program pursuant to which a Delaware statutory trust issues medium-term notes (which are included in our statements of financial position in Policyholders account balances and not included in the foregoing table) secured by funding agreements issued to the trust by Prudential Insurance and included in our Retirement segment. The funding agreements provide cash flow sufficient for the debt service on the related medium-term notes. The medium-term notes are sold in transactions not requiring registration under the Securities Act of 1933. The notes have fixed or floating interest rates and original maturities ranging from two to seven years. As of September 30, 2009 and December 31, 2008, the outstanding aggregate principal amount of such notes totaled \$5.5 billion and \$7.1 billion, respectively, out of a total authorized amount of up to \$15 billion. The decrease in outstanding aggregate principal amount of such notes is due to maturities in excess of issuances during the first nine months of 2009. Given the current market environment, our ability to issue new notes during the first nine months of 2009 has been negatively impacted. The aggregate maturities of these notes over the next 12 months are approximately \$2.0 billion. We intend to repay the maturing notes through a combination of cash flows from asset maturities, asset sales, new liability origination and internal sources of funds.

Table of Contents

Lines of Credit and Other Credit Facilities

As of September 30, 2009, Prudential Financial, Prudential Insurance and Prudential Funding had unsecured committed lines of credit totaling \$4.34 billion. These facilities are available to each of the borrowers, up to the aggregate committed credit, to be used for general corporate purposes. This amount includes a \$1.94 billion 5-year credit facility that expires in May 2012, which includes 20 financial institutions, and a \$2.4 billion credit facility, of which \$200 million expires in December 2011 and \$2.2 billion expires in December 2012, which includes 18 financial institutions. The available credit and number of lenders reflects the removal in January 2009 of Lehman Commercial Paper Inc. and Lehman Brothers Bank FSB as participants in these facilities. Lehman Commercial Paper Inc., which filed for bankruptcy in October 2008, had been a participant in the amount of \$60 million and Lehman Brothers Bank FSB had been a participant in the amount of \$100 million. We maintain these facilities primarily as back up liquidity lines for our commercial paper programs, and there were no outstanding borrowings under either facility as of September 30, 2009. Any borrowings made under these outstanding facilities would mature no later than the respective expiration dates of the facilities and would bear interest at the rates set forth in each facility agreement. Within each facility, no single financial institution has more than 15% of the total committed credit.

Our ability to borrow under these facilities is conditioned on the continued satisfaction of customary conditions, including the maintenance at all times by Prudential Insurance of total adjusted capital of at least \$5.5 billion based on statutory accounting principles prescribed under New Jersey law and Prudential Financial's maintenance of consolidated net worth of at least \$12.5 billion, which for this purpose is based on U.S. GAAP stockholders' equity, excluding net unrealized gains and losses on investments. Our ability to borrow under these facilities is not contingent on our credit ratings or subject to material adverse change clauses. As of September 30, 2009, Prudential Insurance's total adjusted capital and Prudential Financial's consolidated U.S. GAAP stockholders' equity, excluding net unrealized gains and losses on investments, exceeded the minimum amounts required to borrow under these facilities. We also use uncommitted lines of credit from financial institutions.

Table of Contents**Ratings**

Claims-paying and credit ratings are important factors affecting public confidence in an insurer and its competitive position in marketing products. National Recognized Statistical Ratings Organizations continually review the financial performance and condition of insurers, including Prudential Insurance and our other insurance company subsidiaries. Our credit ratings are also important for our ability to raise capital through the issuance of debt and for the cost of such financing.

Claims-paying ratings, which are sometimes referred to as financial strength ratings, represent the opinions of rating agencies regarding the financial ability of an insurance company to meet its obligations under an insurance policy. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. The following table summarizes the ratings for Prudential Financial and certain of its subsidiaries as of the date of this filing.

	A.M. Best(1)	S&P(2)	Moody's(3)	Fitch(4)
Insurance Claims-Paying Ratings:				
The Prudential Insurance Company of America	A+	AA-	A2	A+

* NR indicates not rated.

- (1) A.M. Best Company, which we refer to as A.M. Best, claims-paying ratings for insurance companies currently range from A++ (superior) to F (in liquidation). A.M. Best's ratings reflect its opinion of an insurance company's financial strength, operating performance and ability to meet its obligations to policyholders. An A.M. Best long-term credit rating is an opinion of the ability of an obligor to pay interest and principal in accordance with the terms of the obligation. A.M. Best long-term credit ratings range from aaa (exceptional) to d (in default), with ratings from aaa to bbb considered as investment grade. An A.M. Best short-term credit rating reflects an opinion of the issuer's fundamental credit quality. Ratings range from AMB-1+, which represents an exceptional ability to repay short-term debt obligations, to AMB-4, which correlates with a speculative (bb) long-term rating.
- (2) Standard & Poor's Rating Services, which we refer to as S&P, claims-paying ratings currently range from AAA (extremely strong) to R (regulatory supervision). These ratings reflect S&P's opinion of an operating insurance company's financial capacity to meet the obligations of its insurance policies in accordance with their terms. A + or - indicates relative strength within a category. An S&P credit rating is a current opinion of the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations or a specific financial program. S&P's long-term issue credit ratings range from AAA (extremely strong) to D (default). S&P short-term ratings range from A-1 (highest category) to D (default).
- (3) Moody's Investors Service, Inc., which we refer to as Moody's, insurance claims-paying ratings currently range from Aaa (exceptional) to C (lowest). Moody's insurance ratings reflect the ability of insurance companies to repay punctually senior policyholder claims and obligations. Numeric modifiers are used to refer to the ranking within the group with 1 being the highest and 3 being the lowest. These modifiers are used to indicate relative strength within a category. Moody's credit ratings currently range from

Table of Contents

- Aaa (highest) to C (default). Moody's credit ratings grade debt according to its investment quality. Moody's considers A1, A2 and A3 rated debt to be up to medium grade obligations, subject to low credit risk. Moody's short-term ratings are opinions of the ability of issuers to honor senior financial obligations and contracts. Prime ratings range from Prime-1 (P-1), which represents a superior ability for repayment of senior short-term debt obligations, to Prime-3 (P-3), which represents an acceptable ability for repayment of such obligations. Issuers rated Not Prime do not fall within any of the Prime rating categories.
- (4) Fitch Ratings Ltd., which we refer to as Fitch, claims-paying ratings currently range from AAA (exceptionally strong) to D (distressed). Fitch's ratings reflect its assessment of the likelihood of timely payment of policyholder and contractholder obligations. Fitch long-term credit ratings currently range from AAA (highest credit quality), which denotes exceptionally strong capacity for timely payment of financial commitments, to D (default). Investment grade ratings range between AAA and BBB. Short-term ratings range from F1 (highest credit quality) to C (high default risk). Within long-term and short-term ratings, a plus or a minus may be appended to a rating to denote relative status within major rating categories.
- (5) Includes the retail medium-term notes program.

The ratings set forth above with respect to Prudential Financial, Prudential Funding, LLC, Prudential Insurance and our other insurance and financing subsidiaries reflect current opinions of each rating organization with respect to claims-paying ability, financial strength, operating performance and ability to meet obligations to policyholders or debt holders, as the case may be. These ratings are of concern to policyholders, agents and intermediaries. They are not directed toward shareholders and do not in any way reflect evaluations of the safety and security of the Common Stock. These ratings are reviewed periodically and we cannot assure you that we will maintain our current ratings in the future. Each rating should be evaluated independently of any other rating.

Our claims-paying ratings are an important factor affecting public confidence in most of our products and, as a result, our competitiveness. The interest rates we pay on our borrowings are largely dependent on our credit ratings. A downgrade in the credit or financial strength (i.e., claims-paying) ratings of Prudential Financial or its rated subsidiaries could potentially, among other things, limit our ability to market products, reduce our competitiveness, increase the number or value of policy surrenders and withdrawals, increase our borrowing costs and potentially make it more difficult to borrow funds, adversely affect the availability of financial guarantees, such as letters of credit, cause additional collateral requirements or other required payments under certain agreements, allow counterparties to terminate derivative agreements and/or hurt our relationships with creditors or trading counterparties thereby potentially negatively affecting our profitability, liquidity and/or capital.

In addition, we consider our own risk of non-performance in determining the fair value of our liabilities. Therefore, changes in our credit ratings and our claims-paying ratings, which represent the market's perception of our non-performance risk, will affect the fair value of our liabilities.

Additional collateral requirements or other required payments under certain agreements, including derivative agreements, are eligible to be satisfied in cash or by posting securities held by the subsidiaries subject to the agreements. A ratings downgrade of three ratings levels from the ratings levels as of September 30, 2009 would result in estimated additional collateral posting requirements or payments under such agreements of approximately \$170 million as of September 30, 2009. The amount of collateral required to be posted for derivative agreements is also dependent on the fair value of the derivative positions as of the balance sheet date. For additional information regarding the potential impacts of a ratings downgrade on our derivative agreements see Note 14 to the Unaudited Interim Consolidated Financial Statements. In addition, a ratings downgrade by A.M. Best to A- for our domestic life insurance companies would require Prudential Insurance to post a letter of credit in the amount of approximately \$1.3 billion, based on the level of statutory reserves related to an acquired business, that we estimate would result in annual cash outflows of approximately \$30 million, or collateral posting in the form of cash or securities to be held in a trust. We believe that the posting of such collateral would not be a material liquidity event for Prudential Insurance.

Rating agencies use an outlook statement for both industry sectors and individual companies. For an industry sector, a negative outlook generally implies that over the next 12-18 months, the rating agency expects more downgrades than upgrades among companies in the sector. However, such an outlook does not imply that all, or even a majority of, companies will necessarily experience ratings downgrades. For a particular company,

Table of Contents

an outlook generally indicates a medium- or long-term trend (generally six months to two years) in credit fundamentals, which if continued, may lead to a rating change. These indicators are not necessarily a precursor of a rating change nor do they preclude a rating agency from changing a rating at any time without notice.

In view of the difficulties experienced recently by many financial institutions, the rating agencies have heightened the level of scrutiny that they apply to such institutions, have increased the frequency and scope of their credit reviews, have requested additional information from the companies that they rate, and may adjust upward the capital and other requirements employed in the rating agency models for maintenance of certain ratings levels, such as the financial strength ratings currently held by our life insurance subsidiaries. In addition, actions we might take to access third party financing or to realign our capital structure may in turn cause rating agencies to reevaluate our ratings.

Provided below is a discussion of the significant changes in our ratings or rating outlooks that occurred from the beginning of 2009 through the date of this filing.

On February 10, 2009, Moody's placed the long-term ratings of Prudential Financial and our life insurance subsidiaries on review for possible downgrade. The short-term ratings of Prudential Financial and Prudential Funding were affirmed with a stable outlook.

On March 18, 2009, Moody's lowered the long-term senior debt rating of Prudential Financial to Baa2 from A3 and lowered the financial strength ratings of our life insurance subsidiaries to A2 from Aa3, with a negative outlook. Moody's also placed the short-term debt rating of Prudential Funding on review for possible downgrade.

On June 26, 2009, Moody's affirmed the long-term senior debt rating of Prudential Financial at Baa2 and the financial strength ratings of our life insurance subsidiaries at A2, and revised the outlook from negative to stable. The short-term debt rating of Prudential Funding remained on review for possible downgrade.

On August 20, 2009, Moody's downgraded the short-term debt rating for commercial paper of Prudential Funding to P-2 from P-1, concluding the review for downgrade that was initiated on March 18, 2009. The outlook for this rating was revised to stable.

On February 19, 2009, Fitch lowered Prudential Financial's long-term senior debt rating to BBB from A- and the short-term rating to F2 from F. Fitch also downgraded the financial strength ratings of the life insurance subsidiaries to A+ from AA- and the short-term rating of Prudential Funding to F1 from F1+. The outlook for all ratings remains negative.

On February 17, 2009, S&P lowered Prudential Financial's long-term senior debt rating to A from A+ and affirmed the AA ratings of our life insurance subsidiaries. The long-term ratings outlook was revised from stable to negative.

On February 26, 2009, S&P lowered the financial strength ratings of our life insurance subsidiaries to AA- from AA and affirmed Prudential Financial's long-term senior debt ratings as A. The outlook for both ratings was revised from negative to stable.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

On June 3, 2009, S&P affirmed Prudential Financial's long-term senior debt rating at A and short-term rating at A-1. S&P also affirmed the financial strength ratings of our life insurance subsidiaries at AA- and the short-term debt rating of Prudential Funding at A1+. The outlook for all of these companies remains stable.

On May 27, 2009, A.M. Best affirmed the financial strength ratings of our life subsidiaries at A+, and affirmed Prudential Financial's long-term senior debt rating at a-. The outlook for both was revised from stable to negative.

Table of Contents

Off-Balance Sheet Arrangements

Guarantees and Other Contingencies

In the course of our business, we provide certain guarantees and indemnities to third parties pursuant to which we may be contingently required to make payments now or in the future. See *Commitments and Guarantees* within Note 15 to our Unaudited Interim Consolidated Financial Statements for additional information.

Other Contingent Commitments

We also have other commitments, some of which are contingent upon events or circumstances not under our control, including those at the discretion of our counterparties. See *Commitments and Guarantees* within Note 15 to the Unaudited Interim Consolidated Financial Statements for additional information regarding these commitments. For further discussion of certain of these commitments that relate to our separate accounts, also see *Liquidity and Capital Resources of Subsidiaries* *Asset Management Subsidiaries*.

Other Off-Balance Sheet Arrangements

We do not have retained or contingent interests in assets transferred to unconsolidated entities, or variable interests in unconsolidated entities or other similar transactions, arrangements or relationships that serve as credit, liquidity or market risk support, that we believe are reasonably likely to have a material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or our access to or requirements for capital resources. In addition, we do not have relationships with any unconsolidated entities that are contractually limited to narrow activities that facilitate our transfer of or access to associated assets.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of change in the value of financial instruments as a result of absolute or relative changes in interest rates, foreign currency exchange rates or equity or commodity prices. To varying degrees, the investment and trading activities supporting all of our products and services generate market risks. There have been no material changes in our market risk exposures from December 31, 2008, a description of which may be found in our Annual Report on Form 10-K for the year ended December 31, 2008, Item 7A, *Quantitative and Qualitative Disclosures About Market Risk*, filed with the Securities and Exchange Commission. See Item 1A, *Risk Factors* included in the Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2009 for a discussion of how the difficult conditions in the financial markets and the economy generally may materially adversely affect our business and results of our operations.

Item 4. Controls and Procedures

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

In order to ensure that the information we must disclose in our filings with the Securities and Exchange Commission is recorded, processed, summarized, and reported on a timely basis, the Company's management, including our Chief Executive Officer and Chief Financial Officer, have reviewed and evaluated the effectiveness of our disclosure controls and procedures, as defined in Exchange Act Rule 13a-15(e), as of September 30, 2009. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of September 30, 2009, our disclosure controls and procedures were effective. No change in our internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f), occurred during the quarter ended September 30, 2009, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

We are subject to legal and regulatory actions in the ordinary course of our businesses, including class action lawsuits. Our pending legal and regulatory actions include proceedings specific to us and proceedings generally applicable to business practices in the industries in which we operate including, in both cases, businesses that have either been divested or placed in wind-down status. We are also subject to litigation arising out of our general business activities, such as our investments, contracts, leases and labor and employment relationships, including claims of discrimination and harassment. In some of our pending legal and regulatory actions, parties are seeking large and/or indeterminate amounts, including punitive or exemplary damages.

In September 2009, the Company filed a motion to dismiss the complaint in *Bauer v. Prudential Financial, et al.*, a purported class action alleging violations of federal securities laws in connection with disclosures relating to a subordinated note offering.

In September 2009, the United States District Court for the Southern District of New York approved the final settlement in *In re: Initial Public Offering Securities Litigation*, an industry-wide class action against underwriters alleging manipulation and inflation of share prices of initial public offerings in violation of the securities laws. In October 2009, an objector filed a notice of appeal challenging the certification of the settlement class.

In July 2009, the Company filed a motion to dismiss the complaint in *Schultz v. The Prudential Insurance Company of America*, a purported class action challenging the Company's offset of certain Social Security benefits against disability benefit payments and alleging violations of ERISA, breach of contract and unfair claims practices.

In June 2009, special bankruptcy counsel for Lehman Brothers Holdings Inc. (LBHI), Lehman Brothers Special Financing (LBSF) and certain of their affiliates made a demand of Prudential Global Funding LLC (PGF) for the return of a portion of the \$550 million in collateral delivered by LBSF to PGF pursuant to swap agreements and a cross margining and netting agreement between PGF, LBSF and Lehman Brothers Finance S.A. a/k/a Lehman Brothers Finance AG (Lehman Switzerland), a Swiss affiliate that is subject to insolvency proceedings in the United States and Switzerland. LBSF claims that PGF wrongfully applied the collateral to Lehman Switzerland's obligations in violation of the automatic stay in LBSF's bankruptcy case, which is jointly administered under *In re Lehman Brothers Holdings Inc.* in the United States Bankruptcy Court in the Southern District of New York (the Lehman Chapter 11 Cases). In August 2009, PGF filed a declaratory judgment action (the DJ Action) in the same court against LBSF, Lehman Switzerland and LBHI (as guarantor of LBSF and Lehman Switzerland under the swap agreements) seeking an order that (a) PGF had an effective lien on the collateral that secured the obligations of both LBSF (\$197 million) and Lehman Switzerland (\$488 million) and properly foreclosed on the collateral, leaving PGF with an unsecured \$135 million claim against LBSF (and LBHI as guarantor), or, in the alternative, (b) PGF was entitled, under the Bankruptcy Code, to set off amounts owed by Lehman Switzerland against the collateral and the automatic stay was inapplicable. The DJ Action is captioned *Prudential Global Funding LLC v. Lehman Brothers Holdings Inc., et al.* In addition, PGF filed timely contingent claims against LBSF and LBHI, as guarantor of LBSF and Lehman Switzerland, in the Lehman Chapter 11 Cases for any amounts that may be due under the swap agreements, depending upon the results of the DJ action. In October 2009, LBSF and LBHI answered in the DJ Action and asserted counterclaims alleging that PGF breached the swap agreement by applying the collateral to Lehman Switzerland's obligations and failing to pay LBSF interest on the collateral, and violated the Bankruptcy Code by not returning \$372 million in excess collateral to LBSF. LBSF and LBHI seek a declaratory judgment that PGF had an effective lien on only \$178 million of the collateral, which could only be applied to amounts owed by LBSF and no right of set off against Lehman Switzerland's obligations. The counterclaim seeks the return of the collateral in the amount of \$372 million plus interest and the disallowance of PGF's claims against LBSF and LBHI.

Table of Contents

The Special Evaluation Committee formed by the Company's Board has engaged counsel that is reviewing the compensation issues and demand made by the Service Employees International Union Pension Plans Master Trust in a letter to the Board in April 2009.

Our litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, the outcomes cannot be predicted. It is possible that our results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on our financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, is not likely to have a material adverse effect on our financial position.

The foregoing discussion is limited to recent material developments concerning our legal and regulatory proceedings. See Note 15 to the Unaudited Interim Consolidated Financial Statements included herein for additional discussion of our litigation and regulatory matters, including those referred to above.

Item 1A. Risk Factors

You should carefully consider the risks described under **Risk Factors** in our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2009. These risks could materially affect our business, results of operations or financial condition, cause the trading price of our Common Stock to decline materially or cause our actual results to differ materially from those expected or those expressed in any forward looking statements made by or on behalf of the Company. These risks are not exclusive, and additional risks to which we are subject include, but are not limited to, the factors mentioned under **Forward-Looking Statements** above and the risks of our businesses described elsewhere in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the year ended December 31, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) The following table provides information about purchases by the Company during the quarter ended September 30, 2009, of its Common Stock.

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet be Purchased under the Program
July 1, 2009 through July 31, 2009	1,596	\$ 37.79		
August 1, 2009 through August 31, 2009	967	\$ 43.63		
September 1, 2009 through September 30, 2009	3,028	\$ 50.10		

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Total	5,591	\$ 45.47	\$
-------	-------	----------	----

- (1) Reflects shares of Common Stock withheld from participants for income tax withholding purposes whose shares of restricted stock and restricted stock units vested during the period. Restricted stock and restricted stock units were issued to participants pursuant to the Prudential Financial, Inc. Omnibus Incentive Plan that was adopted by the Company's Board of Directors in March 2003 (as subsequently amended and restated).
