## Qualitative Information and Financial Statements

### 1. Qualitative information related to the consolidated results of operations

With respect to the economic and financial environment for the April-December period of fiscal 2009, the US and European economies turned to positive growth and continued to improve further due to financial and monetary packages addressing the global financial crisis. Asian economies followed recovery path prior to the Western economies supported by stimulus package effects. As for the Japanese economy, exports and production continued to recover due to improvement in overseas economies, largest-ever stimulus packages and progress in inventory adjustment. Private consumption was also pushed up by economic measure effects. Business fixed investment, however, declined as economic activity remained at an extremely low level and poor corporate performance continued. The employment and income situation also followed a worsening trend.

In the financial environment, the policy rate remained virtually zero in the United States as non-performing loans continued to increase rapidly. In the Euro zone, the European Central Bank kept its key interest rate at a historical low 1.0 percent. Japan's short-term interest rates moderately declined, in response to the Bank of Japan's continued monetary easing policy such as the ultra-low interest rate policy, purchase of CP and corporate bonds, and the special funds-supplying operations to facilitate corporate financing. Long-term interest rates fluctuated at a low level amid rising deflationary pressure and concerns over the worsening of fiscal conditions. In the foreign exchange market, the yen-dollar exchange rates followed a strong yen trend with some fluctuation, reflecting the narrowing spread of domestic and overseas interest rates.

Under such business environment, consolidated gross profits for the nine months ended December 31, 2009 increased by 196.9 billion yen from the previous nine months ended December 31, 2008 to 2,689.8 billion yen. This was mainly due to increase in lending income, market product income and a new consolidation of ACOM CO., LTD. General and administrative expenses decreased by 8.9 billion yen from the previous nine months ended December 31, 2008 to 1,564.0 billion yen due to an intensive corporate-wide cost reduction as well as the effect of the system integration. As a result, net business profits increased by 205.9 billion yen from the previous nine months ended December 31, 2008 to 1,125.8 billion yen.

Total credit costs for the nine months ended December 31, 2009 increased by 194.2 billion yen from the previous nine months ended December 31, 2008 to 627.7 billion yen, mainly due to an increase in credit costs from our overseas subsidiary, and the consolidation of ACOM CO., LTD. Net gains on equity securities for the nine months ended December 31, 2009 increased significantly by 306.2 billion yen due to decrease in losses on write-down of equity securities and other non-recurring losses for nine months ended December 31, 2009 increased by 76.7 billion yen from the previous nine months ended December 31, 2008 due to an increase in retirement benefit costs.

Based on the above results, ordinary profits for the nine months ended December 31, 2009 was 356.0 billion yen, an increase of 242.1 billion yen from the previous nine months ended December 31, 2008 and consolidated net income for the nine months ended December 31, 2009 was 217.0 billion yen, an increase of 259.1 billion yen from the previous nine months ended December 31, 2008.

## 2. Qualitative information related to the consolidated financial conditions

Total assets as of December 31, 2009 increased by 2,502.3 billion yen from March 31, 2009 to 201,236.2 billion yen, and total net assets as of December 31, 2009 increased by 2,355.3 billion yen from March 31, 2009 to 10,925.9 billion yen. The increase in total net assets reflected an increase in total shareholder's equity of 1,104.8 billion yen, which was mainly due to the issuance of new shares by way of public offering, in addition, an increase in total valuation and translation adjustments of 990.1 billion yen, which was mainly due to an increase of net unrealized gains on other securities by the higher stock prices.

With regards to major items of assets, securities as of December 31, 2009 increased by 5,841.4 billion yen from March 31, 2009 to 54,155.5 billion yen and loans and bills discounted as of December 31, 2009 decreased by 6,664.3 billion yen from March 31, 2009 to 85,392.5 billion yen. The balance as of the end of December 2009 decreased to ¥1.92 trillion in total, a decrease of ¥0.37 trillion compared with the balance as of the end of March 2009, mainly due to sales of securitized products, which have risk of being downgraded or deteriorated, and redemptions.

The effect on the P/L for the nine months ended December 31, 2009 was a loss of ¥14 billion, mainly due to losses on the sales of securitized products as described above.

The above table does not include mortgage-backed securities arranged and guaranteed by U.S. government sponsored enterprises, etc., Japanese RMBS such as Japanese Housing Finance Agency securities, and products held by funds such as investment trusts. These are also applicable to the tables in this document.

2. Following the publication of Tentative Solution on Reclassification of Debt Securities (Practical Issue Task Force No.26, The Accounting Standards Board of Japan, December 5, 2008), some of our securitized products were reclassified into securities being held to maturity from securities available-for-sale at and after the end of January 2009. The balance and net unrealized gains (losses) of the securities being held to maturity in the above table are based on book value before reclassification.
