Forward-Looking Information

Some statements in this Annual Report on Form 10-K constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act) and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). These forward-looking statements relate to, among other things, expectations of the business environment in which we operate, projections of future performance, perceived opportunities in the market and statements regarding our business strategies, objectives and vision. Forward-looking statements include, but are not limited to, statements preceded by, followed by or that include the word will, believes, expects, anticipates, intends, plans, estimates or similar expressions. These statements involve risks and uncertainties. Our actual results, performance or achievements may differ significantly from the results, performance or achievements expressed or implied in such forward-looking statements. For a more detailed discussion of factors that might cause such a difference, see Item 1A, Risk Factors . The Company does not undertake, and specifically disclaims any obligation, to update any forward looking statements to reflect the occurrence of events or circumstances after the date of such statements except as required by law.

Item 1. BUSINESS

General

Nara Bancorp, Inc. (Nara Bancorp, on a parent-only basis, and we or our on a consolidated basis) is a bank holding company headquartered in Los Angeles, California. We offer a full range of commercial banking and, to a lesser extent, consumer financial services through our wholly owned subsidiary, Nara Bank, a California state-chartered bank (the Bank or Nara Bank). Nara Bank primarily focuses its business in Korean communities in California and in the New York City metropolitan area. Our headquarters are located at 3731 Wilshire Boulevard, Suite 1000, Los Angeles, California 90010, and our telephone number at that address is (213) 639-1700.

Nara Bancorp is registered as a bank holding company and is regulated in that capacity by the Board of Governors of the Federal Reserve System (the FRB). Nara Bancorp was organized for the purpose of becoming the holding company for Nara Bank through a corporate reorganization that was completed in January 2005. Nara Bank s deposits are insured by the Federal Deposit Insurance Corporation (FDIC), up to applicable limits, and Nara Bank is a member of the Federal Reserve System.

Nara Bank opened for business in June 1989 under the name United Citizens National Bank as a national banking association, was renamed Nara Bank, National Association in January 1994 and, in January 2005, became Nara Bank upon converting to a California state-chartered bank in connection with its holding company reorganization transaction.

Nara Bank has supplemented its internal growth through strategic acquisitions in its primary market areas in California, New York and New Jersey.

We consider our business to have three primary segments: Banking Operations, Trade Finance Services and Small Business Administration Lending Services. Further information regarding our business segments is provided in Note 19 of Notes to Consolidated Financial Statements contained elsewhere in this report.

We file reports with the Securities and Exchange Commission (the Commission), which include our proxy statements, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K. These reports and other information on file can be inspected and copied on official business days at the public reference facilities of the Commission on file at 100 F Street, N.E., Washington D.C., 20549. The public may obtain information on the operation of the public reference rooms by calling the SEC at 1-800-SEC-0330. The Commission maintains a Web Site that contains the reports, proxy and information statements and other information we file with them. The address of the site is <http://www.sec.gov>. Our website address is

Table of Contents

www.narabank.com. Electronic copies of our annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, and amendments to those reports, are available free of charge by visiting the Investor Relation section of our website - <http://www.narabank.com>. These reports are generally posted as soon as reasonably practicable after they are electronically filed with the Securities and Exchange Commission.

Business Overview

Our principal business activities are conducted through Nara Bank and consist of earning interest on loans and investment securities that are funded by customer deposits and other borrowings. The difference between interest received and interest paid comprises the majority of our operating earnings. Interest rates are highly sensitive to many factors that are beyond our control, such as general economic conditions, new legislation affecting the banking industry, and the policies of various governmental and regulatory authorities, in particular those of the Federal Reserve Board. Although our business may vary with local and national economic conditions, such variations are not seasonal in nature.

Through our network of 21 branches and one loan production office, we offer a full range of commercial banking and, to a lesser extent, consumer financial services to our customers, who typically are small- to medium-sized businesses and individuals in our market areas. We accept deposits and originate a variety of loans including commercial business loans, commercial real estate loans, trade finance loans, Small Business Administration (SBA) loans. To better meet our customers' needs, our mini-market branches generally offer extended hours from 9 a.m. to 6 p.m. Each of our branches operates 24-hour automated teller machines (ATM). We provide courier services to qualifying customers and personal banking officers focus on customers to better support their banking needs. We honor merchant drafts for both VISA and MasterCard and provide debit card services to our customers. In addition, most of our branches offer travelers' checks, safe deposit boxes, notary services and other customary bank services. We also offer 24-hour banking by telephone. Our website at www.narabank.com offers both English and Korean applications and certain internet banking services.

Lending Activities

Commercial Business Loans

We provide commercial loans to businesses for various purposes such as for working capital, purchasing inventory, debt refinancing, business acquisitions and other business related financing needs. Commercial loans are typically classified as (1) short-term loans (or lines of credit) or (2) long-term loans (or term loans to businesses). Short term loans are often used to finance current assets such as inventory and accounts receivable and typically have terms of one year with interest paid monthly on the outstanding balance and principal balance due at maturity. Long term loans typically have terms of 5 to 7 years with principal and interest paid monthly. The credit worthiness of our borrowers is determined before a loan is originated and is periodically reviewed to ascertain whether credit quality changes have occurred. Commercial business loans are typically collateralized by the borrower's business assets and/or real estate property.

Our commercial business loan portfolio includes trade finance loans from Nara Bank's Corporate Banking Center, which generally serves businesses involved in international trade activities. These loans are typically collateralized by business assets and are used to meet the short-term working capital needs (accounts receivable and inventories) of our borrowers. The Corporate Banking Center also issues and advises on letters of credit for export and import businesses.

Commercial Real Estate Loans

Real estate loans are extended for the purchase and refinance of commercial real estate and are generally secured by first deeds of trust. The maturities on such loans are generally restricted to seven years with a 25-year principal amortization schedule and a balloon payment due at maturity. We offer both fixed and floating rate commercial real estate loans. It is our general policy to restrict commercial real estate loan amounts to 70% of the appraised value of the property at the date of origination.

Table of Contents

Small Business Administration Loans

The Bank also extends loans partially secured by the U.S. Small Business Administration (SBA). The Bank extends SBA loans known as 7(a) loans and SBA 504 loans. SBA 7(a) loans are typically extended for working capital needs, purchase of inventory, purchase of machinery and equipment, debt refinance, business acquisitions, start-up financing, or to purchase or construct owner-occupied commercial property. SBA 7(a) loans are typically term loans with maturities up to 10 years for loans not secured by real estate and up to 25 years for real estate secured loans. SBA loans are fully amortizing with monthly payments of principal and interest. SBA loans are typically floating rate loans that are secured by business assets and/or real estate. Depending on the loan amount, each loan is typically guaranteed 75% to 85% by the SBA, with a maximum gross loan amount to any one small business borrower of \$2.0 million, and a maximum SBA guaranteed amount of \$1.5 million. As part of Recovery Act Loan Enhancements enacted in 2009, the SBA guaranty percentage was temporarily increased to 90% until February, 2010.

The SBA 7(a) loans we generate represent an important segment of our non-interest income due to our ability to sell the guaranteed portion in the secondary market at a premium, while earning servicing fee income on the sold portion over the remaining life of the loan. Therefore, in addition to the interest yield earned on the un-guaranteed portion of the SBA loans that are not sold, we recognize income from gains on sales and from loan servicing on the SBA loans sold.

SBA 504 loans are typically extended for the purpose of purchasing owner-occupied commercial real estate or long-term capital equipment. SBA 504 loans are typically extended for up to 20 years or the life of the asset being financed. SBA 504 loans are financed as a participation loan between the Bank and the SBA through a Certified Development Company (CDC). Generally, the loans are structured so as to give the Bank a 50% first deed of trust (TD), the CDC a 40% second TD, and the remaining 10% is funded by the borrower. Rates for the first TD Bank loans are subject to normal bank commercial rates, and the second TD CDC loans are fixed for the life of the loans based on certain indices.

All of our SBA loans are originated through Nara Bank's SBA Loan Department. The SBA Loan Department is staffed by loan officers who provide assistance to qualified businesses. The Bank has been designated as an SBA Preferred Lender, which is the highest designation awarded by the U.S. Small Business Administration, and generally facilitates a more efficient marketing and approval process for SBA loans. We have attained SBA Preferred Lender status nationwide.

Consumer Loans

Our consumer loans consist of automobile and home equity loans, with a majority of our consumer loan portfolio currently consisting of automobile loans. Effective February 28, 2007, we discontinued originating auto loans and effective January 1, 2008, we discontinued originating new home equity loans, due to the lack of scalability and profitability of these types of lending.

Investing Activities

The main objectives of our investment strategy are to provide a source of on-balance sheet liquidity while providing a means to manage our interest rate risk, and to generate an adequate level of interest income without taking undue risks. Subject to various restrictions, our investment policy permits investment in various types of securities, certificates of deposits and federal funds sold. Our investment portfolio consists of government sponsored agency bonds, mortgage backed securities, collateralized mortgage obligations (CMOs), corporate bonds, and mutual funds. For a detailed breakdown of our investment portfolio, see Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Financial Condition Investment Security Portfolio.

Securities are classified as held-to-maturity or available-for-sale. We do not maintain a trading portfolio. Securities in the held-to-maturity category consist of securities purchased for long-term investment in order to enhance our ongoing stream of net interest income. Securities deemed held-to-maturity are classified as such

Table of Contents

because we have both the intent and ability to hold these securities to maturity. Securities purchased to meet investment-related objectives such as liquidity management, interest rate risk and which may be sold as necessary to implement management strategies, are designated as available for sale at the time of purchase. At December 31, 2009, we had no securities classified as held to maturity and \$782.7 million in securities available for sale. We purchased \$787.8 million, and sold \$235.3 million in investment securities during 2009.

Deposit Activities

We attract both short-term and long-term deposits from the general public by offering a wide range of deposit products and services. Through our branch network, we provide our banking customers with personal and business checking accounts, money market accounts, savings, certificates of deposit, individual retirement accounts, 24-hour automated teller machines, Internet banking and bill-pay services.

FDIC-insured deposits are our primary source of funds. As part of our asset liability management, we analyze our retail deposits' maturities and interest rates to monitor and manage the cost of retail funds, to the extent feasible in the context of changing market conditions, as well as to promote stability in our supply of funds. For more deposit information, see Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Financial Condition Deposits.

Borrowing Activities

When we have more funds than required for our reserve requirements or short-term liquidity needs, we sell federal funds to other financial institutions. Conversely, when we have less funds than required, we may borrow funds from the Federal Home Loan Bank of San Francisco (FHLB), the Federal Reserve Bank of San Francisco or our correspondent banks. In addition, we may borrow from the FHLB on a longer term basis to provide funding for certain loan or investment securities strategies, as well as asset-liability management strategies.

The FHLB system functions in a reserve credit capacity for qualifying financial institutions. As a member, we are required to own capital stock in the Federal Home Loan Bank of San Francisco and may apply for advances from the FHLB utilizing as collateral, qualifying mortgage loans and certain securities. The FHLB offers a full range of borrowing programs on its advances with terms ranging from one day to thirty years at competitive market rates. A prepayment penalty is usually imposed for early repayment of these advances. The Bank also has an unsecured line of credit from the FHLB. Information concerning FHLB borrowings is included in Note 7 of Notes to Consolidated Financial Statements.

As a member of the Federal Reserve Bank (FRB) system, we may also borrow from the Federal Reserve Bank of San Francisco. The maximum amount that we may borrow from the Federal Reserve Bank's discount window is 98% of the fair value of the securities that are pledged and 75% of the outstanding principal balance of the qualifying loans that are pledged. At December 31, 2009, the outstanding principal balance of the qualifying loans was \$286.9 million.

Market Area and Competition

We have 21 banking offices, of which 16 are located in the Los Angeles, Orange County, Oakland and Silicon Valley areas of California, and 5 are located in the New York metropolitan area and New Jersey, together with one loan production office located in Dallas. Most of our services are offered in Los Angeles County, Orange County, the San Francisco Bay Area, Silicon Valley (Santa Clara County) areas of California and the New York metropolitan area, each of which has high concentrations of Korean-Americans. The banking and financial services industry generally, and in our market areas specifically, are highly competitive. The increasingly competitive environment is a result primarily of strong competition among the banks servicing the Korean-American community, changes in regulation, changes in technology and product delivery systems, and the consolidation among financial services companies. In addition, federal legislation may have the effect of further increasing the pace of consolidation within the financial services industry. See Item 1. Business Supervision and Regulation .

Table of Contents

We compete for loans, deposits, and customers with other commercial banks, savings and loan associations, securities and brokerage companies, mortgage companies, insurance companies, finance companies, money market funds, credit unions, and other non-bank financial service providers. Many of these competitors are much larger in total assets and capitalization, have greater access to capital markets, are more widely recognized, have broader geographic scope, and offer a broader range of financial services than we do.

Economic Conditions, Government Policies and Legislation

Our profitability, like that of most financial institutions, depends primarily on interest rate differentials. In general, the difference between the interest expense on interest-bearing liabilities, such as deposits and borrowings, and the interest income on our interest-earning assets, such as loans we extend to our customers and securities held in our investment portfolio, as well as the level of non-interest bearing deposits, have a significant impact on profitability. Interest rates are highly sensitive to many factors that are beyond our control, such as the economy, inflation, unemployment, consumer spending and political events. The impact that future changes in domestic and foreign economic and political conditions might have on our performance cannot be predicted.

Our business also is influenced by the monetary and fiscal policies of the federal government and the policies of regulatory agencies, particularly the FRB. The FRB implements national monetary policies (with objectives such as curbing inflation or preventing recession) through its open-market operations in U.S. government securities, by adjusting the required level of reserves for depository institutions subject to its reserve requirements, and by varying the targeted federal funds and discount rates applicable to borrowings by depository institutions. The actions of the FRB in these areas influence the growth of bank loans, investments, and deposits and also affect interest rates earned on interest-earning assets and paid on interest-bearing liabilities. The nature and impact on Nara Bancorp and the Bank of future changes in monetary and fiscal policies cannot be predicted.

From time to time, legislation, as well as regulations, are enacted which have the effect of increasing the cost of doing business, limiting or expanding permissible activities, or affecting the competitive balance between banks and other financial services providers. Proposals to change the laws and regulations governing the operations and taxation of banks, bank holding companies, and other financial institutions and financial services providers are frequently made in the U.S. Congress, in the state legislatures, and before various regulatory agencies. These proposals may result in changes in banking statutes and regulations and our operating environment in substantial and unpredictable ways. If enacted, such legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions, and other financial institutions. We cannot predict whether any of this potential legislation will be enacted, and if enacted, the effect that it, or any implementing regulations, would have on our financial condition or results of operations. See Item 1. Business Supervision and Regulation below.

Supervision and Regulation

General

Nara Bank is a California state chartered bank that is subject to regulation and examination by the California Department of Financial Institutions (the DFI) and by the FRB as a member bank of the Federal Reserve System. Customer deposits are insured up to statutory limits by the FDIC. The Bank is subject to supervision and regulation of its business activities, including, among others, capital standards, general investment authority, deposit taking and borrowing authority, mergers, establishment of branch offices, and permitted subsidiary investments and activities. Nara Bancorp is registered with and subject to examination by the FRB as a bank holding company and is also subject to the bank holding company provisions of the California Financial Code, including being subject to examination by the DFI. These regulatory systems are intended primarily for the protection of depositors, the FDIC insurance fund and the banking system as a whole, rather than for the protection of shareholders or other investors.

Table of Contents

The following paragraphs summarize certain of the laws and regulations that apply to us and to the Bank. These descriptions of statutes and regulations and their possible effects do not purport to be complete descriptions of all of the provisions of those statutes and regulations and their possible effects on us, nor do they purport to identify every statute and regulation that may apply to us.

Recent Developments

In response to the recent economic downturn and financial industry instability, legislative and regulatory initiatives have been, and will likely continue to be, introduced and implemented, which could substantially intensify the regulation of the financial services industry (including a possible comprehensive overhaul of the financial institutions regulatory system, the creation of a new consumer financial protection agency, and enhanced supervisory attention and potential new restrictions on executive compensation arrangements). We cannot predict whether or when potential legislation or new regulations will be enacted, and if enacted, the effect that new legislation or any implemented regulations and supervisory policies would have on our financial condition and results of operations. Moreover, especially in the current economic environment, bank regulatory agencies have been very aggressive in responding to concerns and trends identified in examinations, and this has resulted in the increased issuance of enforcement actions to financial institutions requiring action to address credit quality, liquidity and risk management and capital adequacy, as well as other safety and soundness concerns.

Through its authority under the Emergency Economic Stabilization Act of 2008 (the "EESA"), as amended by the American Recovery and Reinvestment Act of 2009 (the "ARRA"), the U.S. Treasury ("Treasury") implemented the TARP Capital Purchase Program (the "CPP"), a program designed to bolster eligible healthy institutions by injecting capital into these institutions. We participated in the CPP so that we could continue to lend and support our current and prospective clients, especially during this unstable economic environment. Under the terms of our participation, we received \$67 million in exchange for the issuance of preferred stock and a warrant to purchase common stock and thereby became subject to various requirements, including certain restrictions on paying dividends on our common stock and repurchasing our equity securities, unless the Treasury has consented. Additionally, in order to participate in the CPP, we were required to adopt certain standards for executive compensation and corporate governance. We do not have an immediate plan to repay the funds received.

On December 29, 2009, after consultations with the DFI and FRB, the Board of Directors of Nara Bank adopted resolutions providing, among other things, that the Board will submit written plans to the DFI and FRB to reduce the Bank's credit risk profile and improve credit administration; submit a capital plan and a three year strategic plan and obtain prior DFI and FRB approval of dividends; and provide prior notice to the DFI and FRB of senior executive officer and director changes. The Board has established an Oversight Committee to ensure prompt compliance with the resolutions. The Board of Directors of Nara Bancorp recently adopted similar resolutions for Nara Bancorp after consultations with the FRB. The resolutions adopted by Nara Bancorp also require prior FRB approval for Nara Bancorp to issue, increase or renew any debt or issue trust preferred securities or for Nara Bancorp to make payments or other distributions in connection with its trust preferred securities.

Bank Holding Company Regulation

Nara Bancorp is registered as a bank holding company pursuant to the Bank Holding Company Act ("BHCA"). As such it is subject to supervision and examination by the FRB and its authority to:

Require periodic reports and such additional information as the FRB may require;

Require bank holding companies to maintain increased levels of capital (See "Capital Requirements" below);

Require that bank holding companies serve as a source of financial and managerial strength to subsidiary banks and commit resources as necessary to support each subsidiary bank.;

Table of Contents

Restrict the ability of bank holding companies to obtain dividends on other distributions from their subsidiary banks;

Terminate an activity or terminate control of or liquidate or divest certain subsidiaries, affiliates or investments if the FRB determines the activity or the control of the subsidiary or affiliate constitutes a significant risk to the financial safety, soundness or stability of any bank subsidiary;

Require the prior approval of senior executive officer or director changes;

Regulate provisions of certain bank holding company debt, including the authority to impose interest ceilings and reserve requirements on such debt and require prior approval to purchase or redeem securities in certain situations;

Approve acquisitions and mergers with banks and consider certain competitive, management, financial or other factors in granting these approvals in addition to similar California or other state banking agency approvals which may also be required.

The FRB's view is that in serving as a source of strength to its subsidiary banks, a bank holding company should stand ready to use available resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity and should maintain financial flexibility and capital-raising capacity to obtain additional resources for assisting its subsidiary banks. A bank holding company's failure to meet its source-of-strength obligations may constitute an unsafe and unsound practice or a violation of the FRB's regulations, or both. The source-of-strength doctrine most directly affects bank holding companies where a bank holding company's subsidiary bank fails to maintain adequate capital levels. In such a situation, the subsidiary bank will be required by the bank's federal regulator to take prompt corrective action. See Prompt Corrective Action below.

Subject to prior notice or FRB approval, bank holding companies may generally engage in, or acquire shares of companies engaged in, activities determined by the FRB to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. Bank holding companies which elect and retain financial holding company status pursuant to the Gramm-Leach-Bliley Act of 1999 (GLBA) may engage without prior FRB approval in these nonbanking activities and broader securities, insurance, merchant banking and other activities that are determined by the FRB, in consultation with the Treasury, to be financial in nature or are incidental or complementary to activities that are financial in nature. In order to elect and retain financial holding company status, all depository institution subsidiaries of a bank holding company must be well capitalized, well managed, and, except in limited circumstances, be in satisfactory compliance with the Community Reinvestment Act (CRA), which requires banks to help meet the credit needs of the communities in which they operate. Failure to sustain compliance with these requirements or correct any non-compliance within a fixed time period could lead to divestiture of subsidiary banks or the requirement to conform require all activities those permissible for a bank holding company. Nara Bancorp has not elected financial holding company status.

Securities Exchange Act of 1934

Nara Bancorp's common stock is publicly held and listed on NASDAQ, and Nara Bancorp is subject to the periodic reporting, information, proxy solicitation, insider trading, corporate governance and other requirements and restrictions of the Securities Exchange Act of 1934 and the regulations of the Securities and Exchange Commission promulgated hereunder and the listing requirements of NASDAQ.

Sarbanes-Oxley Act

Nara Bancorp is subject to the accounting oversight and corporate governance requirements of the Sarbanes-Oxley Act of 2002, including, among other things, required executive certification of financial presentations, increased requirements for board audit committees and their members, and enhanced disclosure of controls and procedures and internal control over financial reporting.

Table of Contents

Bank Regulation

Nara Bank is subject to regulation, supervision, and regular examination by the DFI and the FRB, and must comply with applicable regulations of the FRB. Specific federal and state laws and regulations which are applicable to banks regulate, among other things, the scope of their business, their investments, their reserves against deposits, the timing of the availability of deposited funds, their activities relating to dividends, investments, loans, the nature and amount of and collateral for certain loans, borrowings, capital requirements, certain check-clearing activities, branching, and mergers and acquisitions. California banks are also subject to FRB Regulation O and Federal Reserve Act Sections 23A and 23B and FRB Regulation W, which restrict or limit loans or extensions of credit to insiders, including officers directors and principal shareholders, and loans or extension of credit by banks to affiliates or purchases of assets from affiliates, including parent bank holding companies, except pursuant to certain limits and exceptions and only on terms and conditions at least as favorable to those prevailing for comparable transactions with unaffiliated parties.

The federal and California regulatory structure gives the bank regulatory agencies extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. The regulatory agencies have adopted guidelines to assist in identifying and addressing potential safety and soundness concerns before an institution's capital becomes impaired. The guidelines establish operational and managerial standards generally relating to: (1) internal controls, information systems, and internal audit systems; (2) loan documentation; (3) credit underwriting; (4) interest-rate exposure; (5) asset growth and asset quality; and (6) compensation, fees, and benefits. Further, the regulatory agencies have adopted safety and soundness guidelines for asset quality and for evaluating and monitoring earnings to ensure that earnings are sufficient for the maintenance of adequate capital and reserves. If as a result of an examination, the DFI or the FRB should determine that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity, or other aspects of the Bank's operations are unsatisfactory or that the Bank or its management is violating or has violated any law or regulation, the DFI and the FRB, and separately the FDIC as insurer of the Bank's deposits, have residual authority to:

Require affirmative action to correct any conditions resulting from any violation or practice;

Direct an increase in capital and the maintenance of higher specific minimum capital ratios, which may preclude the Bank from being deemed well capitalized and restrict its ability to accept certain brokered deposits;

Restrict the Bank's growth geographically, by products and services, or by mergers and acquisitions;

Enter into or issue informal or formal enforcement actions, including memoranda of understanding, written agreements and consent or cease and desist orders or prompt corrective action orders to take corrective action and cease unsafe and unsound practices;

Require prior approval of senior executive officer or director changes; remove officers and directors and assess civil monetary penalties; and

Take possession of and close and liquidate the Bank or appoint the FDIC as receiver.

Under the Federal Deposit Insurance Act (FDI Act) and the California Financial Code, California state chartered commercial banks may generally engage in any activity permissible for national banks. Additionally, Nara Bank may form subsidiaries to engage in the many so-called closely related to banking or nonbanking activities commonly conducted by national banks in operating subsidiaries. Further, pursuant to the amendments enacted by GLBA, California banks may conduct certain financial activities in a subsidiary to the same extent as may be national banks, provided the bank is and remains well capitalized, well managed and in satisfactory compliance with the CRA. Nara Bank currently does not conduct activities in subsidiaries.

Table of Contents

Capital Requirements

The federal banking agencies have adopted risk-based capital guidelines for bank holding companies and banks that are expected to provide a measure of capital that reflects the degree of risk associated with a banking organization's operations for both transactions reported on the balance sheet as assets, such as loans, and those recorded as off-balance sheet items, such as commitments, letters of credit and recourse arrangements. Under these capital guidelines, banking organizations are required to maintain certain minimum capital ratios, which are obtained by dividing its qualifying capital by its total risk-adjusted assets and off-balance sheet items. In general, the dollar amounts of assets and certain off-balance sheet items are risk-adjusted and assigned to various risk categories. Qualifying capital is classified depending on the type of capital:

Tier 1 capital consists of common equity, retained earnings, qualifying non-cumulative perpetual preferred stock, a limited amount of qualifying cumulative perpetual preferred stock and minority interests in the equity accounts of consolidated subsidiaries (including trust-preferred securities), less goodwill and certain other intangible assets. Qualifying Tier 1 capital may consist of trust-preferred securities, subject to certain criteria and quantitative limits for inclusion of restricted core capital elements in Tier 1 capital.

Tier 2 capital includes, among other things, hybrid capital instruments, perpetual debt, mandatory convertible debt securities, qualifying term subordinated debt, preferred stock that does not qualify as Tier 1 capital, a limited amount of allowance for loan and lease losses.

Tier 3 capital consists of qualifying unsecured subordinated debt.

Under the capital guidelines, there are three fundamental capital ratios: a total risk-based capital ratio, a Tier 1 risk-based capital ratio and a Tier 1 leverage ratio. To be deemed well capitalized a bank must have a total risk-based capital ratio, a Tier 1 risk-based capital ratio and a Tier 1 leverage ratio of at least ten percent, six percent and five percent, respectively. At December 31, 2009, the respective capital ratios of Nara Bancorp and Nara Bank exceeded the minimum percentage requirements to be deemed well-capitalized as provided in the schedule in Note 14 of Notes to Consolidated Financial Statements.

Pursuant to federal regulations, banks must maintain capital levels commensurate with the level of risk to which they are exposed, including the volume and severity of problem loans. The federal banking agencies may change existing capital guidelines or adopt new capital guidelines in the future and have required many banks and bank holding companies subject to enforcement actions to maintain capital ratios in excess of the minimum ratios otherwise required to be deemed well capitalized, in which case institutions may no longer be deemed well capitalized and may therefore be subject to restrictions on taking brokered deposits.

The current risk-based capital guidelines are based upon the 1988 capital accord of the International Basel Committee on Banking Supervision, a committee of central banks and bank supervisors and regulators from the major industrialized countries that develops broad policy guidelines for use by each country's supervisors in determining the supervisory policies they apply. A new international accord, referred to as Basel II, became mandatory for large or core international banks outside the U.S. in 2008 (total assets of \$250 billion or more or consolidated foreign exposures of \$10 billion or more) and emphasizes internal assessment of credit, market and operational risk, as well as supervisory assessment and market discipline in determining minimum capital requirements. It is optional for other banks. The Basel Committee is currently reconsidering regulatory-capital standards, supervisory and risk-management requirements and additional disclosures to further strengthen the Basel II framework in response to recent worldwide economic developments. It is expected the Basel Committee may reinstitute a minimum leverage ratio requirement. It also is possible that a new tangible common equity ratio standard will be added.

Nara Bancorp and Nara Bank are required by the U.S. bank regulatory agencies to also maintain a leverage capital ratio designed to supplement the risk-based capital guidelines. Banks and bank holding companies that have received the highest rating of the five categories used by regulators to rate banks and that are not anticipating or experiencing any significant growth must maintain a ratio of Tier 1 capital (net of all intangibles) to

Table of Contents

adjusted total assets of at least 3%. All other institutions are required to maintain a leverage ratio of at least 100 to 200 basis points above the 3% minimum, for a minimum of 4% to 5%. As of December 31, 2009, Nara Bancorp and Nara Bank's leverage capital ratio were 12.4% and 11.8%, respectively, exceeding regulatory minimums.

Prompt Corrective Action

The federal banking agencies have issued regulations pursuant to the FDI Act defining five categories in which an insured depository institution will be placed, based on the level of its capital ratios: well-capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. A bank that may otherwise meet the minimum requirements to be classified as well-capitalized, adequately capitalized, or undercapitalized may be treated instead as though it were in the next lower capital category if the appropriate federal banking agency, after notice and opportunity for hearing, determines that unsafe or unsound condition, or an unsafe or unsound practices, warrants such treatment. Under the prompt corrective action regulations, the subsidiary bank will be required to submit to its federal regulator a capital restoration plan and to comply with the plan. Each parent company that controls the subsidiary bank will be required to provide assurances of compliance by the bank with the capital restoration plan. However, the aggregate liability of such parent companies will not exceed the lesser of (i) 5% of the bank's total assets at the time it became undercapitalized and (ii) the amount necessary to bring the bank into compliance with the plan. Failure to restore capital under a capital restoration plan can result in the bank's being placed into receivership if it becomes critically undercapitalized. A bank subject to prompt corrective action also may affect its parent bank holding company in other ways. These include possible restrictions or prohibitions on dividends to the parent bank holding company by the bank; subordinated debt payments to the parent; and other transactions between the bank and the holding company. In addition, the regulators may impose restrictions on the ability of the holding company itself to pay dividends; require divestiture of holding company affiliates that pose a significant risk to the bank; or require divestiture of the undercapitalized subsidiary bank. At each successive lower-capital category, an insured bank may be subject at the agencies' discretion to impose more restrictions under the agencies' prompt corrective action regulations, including restrictions on the bank's activities.

Deposit Insurance

The FDIC is an independent federal agency that insures deposits of federally insured banks and savings institutions, up to prescribed statutory limits for each depositor, through the Deposit Insurance Fund (the "DIF") and safeguards the safety and soundness of the banking and savings industries. The FDIC insures our customer deposits. Pursuant to the EESA, the maximum deposit insurance amount has been increased from \$100,000 to \$250,000 through the end of 2013. The amount of FDIC assessments paid by each DIF member institution is based on its relative risk of default as measured by regulatory capital ratios and other supervisory factors. During 2008 and 2009, there have been higher levels of bank failures which has dramatically increased resolution costs of the FDIC and depleted the deposit insurance fund. In order to maintain a strong funding position and restore reserve ratios of the deposit insurance fund, the FDIC has increased assessment rates of insured institutions and may continue to do so in the future. As of December 31, 2009, the Bank's assessment rate was between 5 and 7 cents per \$100 in assessable deposits. On November 12, 2009, the FDIC adopted a requirement for institutions to prepay in 2009 their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012.

We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures or if the FDIC otherwise determines, we may be required to pay even higher FDIC premiums than the recently increased levels. These announced increases and any future increases in FDIC insurance premiums may have a material and adverse affect on our earnings. Further, all FDIC-insured institutions are required to pay assessments to the FDIC to fund interest payments on bonds issued by the Financing Corporation ("FICO"), an agency of the Federal government established to recapitalize the predecessor to the DIF. The FICO assessment rates, which are determined quarterly, averaged 0.0106% of insured deposits in fiscal 2009. These assessments will continue until the FICO bonds mature in 2017.

The FDIC implemented two temporary programs under the Temporary Liquidity Guaranty Program ("TLGP") to provide deposit insurance for the full amount of most non-interest bearing transaction accounts through June 30, 2010 and to guarantee certain unsecured debt of financial institutions and their holding

Table of Contents

companies through June 2012 and the Deposit Guarantee Program. Nara Bank is participating in the deposit insurance program. On October 20, 2009, the FDIC established a limited, six-month emergency guarantee facility whereby, certain participating entities, including the Bank, can apply to the FDIC for permission to issue FDIC-guaranteed debt during the period starting October 31, 2009 through April 30, 2010. The FDIC charges systemic risk special assessments to depository institutions that participate in the TLGP. We have elected to participate in the Debt Guarantee Program, but do not expect to issue any debt under the program,

The FDIC may terminate a depository institution's deposit insurance upon a finding that the institution's financial condition is unsafe or unsound or that the institution has engaged in unsafe or unsound practices that pose a risk to the DIF or that may prejudice the interest of the bank's depositors. The termination of deposit insurance for a bank would also result in the revocation of the bank's charter by the DFI.

Restrictions on Dividends and Other Capital Distributions

Both California and federal law limit the payment of dividends by the Bank. Under the California Financial Code, the Bank is permitted to pay dividends out of the Bank's net profits up to the lesser of retained earnings or the Bank's net income for the last three fiscal years (less any distributions made to shareholders during such period), or with the prior written approval of the DFI, in an amount not exceeding the greatest of (i) the Bank's retained earnings, (ii) its net income for the Bank's last fiscal year and (iii) the Bank's net income for its current fiscal year. Under federal law and the regulations of the FRB, the Bank may not, without FRB approval, pay dividends exceeding the Bank's net income for its current year and two preceding fiscal years, less the sum of dividends paid during such periods and any transfers required by the FRB or required to be made for the retirement of preferred stock. In addition to the foregoing specific statutory and regulatory limitations, as a matter of general bank regulatory policy the FRB discourages the payment of dividends on common stock by bank holding companies and by banks that are members of the Federal Reserve System in amounts exceeding the paying entity's net income available to common stockholders for the preceding four quarters. Dividends by Nara Bank are also subject to the prior approval of the DFI and the FRB pursuant to the resolutions adopted by the Board of Directors on December 29, 2009.

It is the FRB's policy that bank holding companies should generally pay dividends on common stock only out of income available over the past year, and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. It is also the FRB's policy that bank holding companies should not maintain dividend levels that undermine their ability to be a source of strength to its banking subsidiaries. Additionally, in consideration of the current financial and economic environment, the FRB has indicated that bank holding companies should carefully review their dividend policy and has discouraged payment ratios that are at maximum allowable levels unless both asset quality and capital are very strong. Nara Bancorp will also be restricted as to the payment of dividends without the prior review or approval of the FRB by resolutions recently adopted by the Board of Directors.

Under the terms of the TARP CPP, for so long as any preferred stock issued under the TARP CPP remains outstanding, Nara Bancorp is prohibited from increasing dividends on its common stock, and from making certain repurchases of equity securities, including its common stock, without the Treasury's consent until the third anniversary of the Treasury's investment or until the Treasury has transferred all of the preferred stock it purchased under the TARP CPP to third parties. The terms of our Series A Preferred Stock and Junior Subordinated Securities also limit our ability to pay dividends on our common stock. If we are not current in our payment of dividends on our Series A Preferred Stock or in our payment of interest on our Junior Subordinated Securities, we may not pay dividends on our common stock.

Operations and Consumer Compliance Laws

The Bank must comply with numerous federal anti-money laundering and consumer protection statutes and implementing regulations, including the USA PATRIOT Act of 2001, the Bank Secrecy Act, the CRA, the Equal Credit Opportunity Act, the Truth in Lending Act, the National Flood Insurance Act and various federal and state

Table of Contents

privacy protection laws. Noncompliance with these laws could subject the Bank to lawsuits and could also result in administrative penalties, including, fines and reimbursements. The Bank and the Company are also subject to federal and state laws prohibiting unfair or fraudulent business practices, untrue or misleading advertising and unfair competition.

These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must deal with customers when taking deposits, making loans, collecting loans, and providing other services. Failure to comply with these laws and regulations can subject the Bank to various penalties, including but not limited to enforcement actions, injunctions, fines or criminal penalties, punitive damages to consumers, and the loss of certain contractual rights.

Regulation of Non-bank Subsidiaries

Operating non-bank subsidiaries may also be subject to additional or separate regulation and supervision by other state, federal and self-regulatory bodies. Additionally, any foreign-based subsidiaries would also be subject to foreign laws and regulations. Neither Nara Bancorp nor Nara Bank presently has any operating subsidiaries.

Employees

As of December 31, 2009, we had 337 full-time equivalent employees. None of our employees are represented by a union or covered by a collective bargaining agreement. Management believes that its relations with its employees are good.

Table of Contents

Item 1A. RISK FACTORS

Before deciding to purchase, hold or sell our common stock, you should carefully consider the risks described below in addition to the other cautionary statements and risks described elsewhere, and the other information contained, in this Report and in our other filings with the SEC, including our subsequent reports on Forms 10-Q and 8-K. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also affect our business. If any of these known or unknown risks or uncertainties actually occurs, our business, financial condition and results of operations could be seriously harmed. In that event, the market price for our common stock will likely decline.

If we fail to maintain an effective system of internal and disclosure controls, we may not be able to accurately report our financial results or prevent fraud. Effective internal and disclosure controls are necessary for us to provide reliable financial reports and effectively prevent fraud and to operate successfully as a public company. If we cannot provide reliable financial reports or prevent fraud, our reputation and operating results would be harmed. Any failure to develop or maintain effective controls or difficulties encountered in their implementation or other ineffective improvement of our internal and disclosure controls could result in regulatory enforcement action against us, adversely affect our operating results or cause us to fail to meet our reporting obligations.

Economic conditions in California, New York or South Korea could adversely affect our loan portfolio and reduce the demand for our services. We focus our business primarily in Korean communities in California and in the greater New York City metropolitan area. Adverse economic conditions in our market areas have had a material adverse impact on the quality of our business. A continued economic slowdown in California, New York, or South Korea could have the following consequences, any of which could reduce our net income and adversely affect our financial condition:

loan delinquencies may increase;

problem assets and foreclosures may increase;

the level and duration of deposits may decline;

claims and lawsuits may increase;

demand for our products and services may decline; and

collateral for loans may decline in value below the principal amount owed by the borrower.

Our allowance for loan losses may not cover actual loan losses. If our actual loan losses exceed the amount we have allocated for estimated probable losses, it will hurt our business. We try to limit the risk that borrowers will fail to repay loans by carefully underwriting the loans. Losses nevertheless occur. We create allowances for estimated loan losses in our accounting records. We base these allowances on estimates of the following:

historical experience with our loans;

evaluation of current economic conditions and other factors;

reviews of the quality, mix and size of the overall loan portfolio;

reviews of delinquencies;

the quality of the collateral underlying our loans.

If these allowances are inadequate, our financial condition could be materially and adversely affected and we could be required to raise additional capital to enhance our capital position. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the adequacy of our allowance.

Table of Contents

These agencies may require us to establish additional allowances based on their judgment of the information available at the time of their examinations. No assurance can be given that we will not sustain loan losses in excess of present or future levels of the allowance for loan losses.

We have a high level of loans secured by real estate collateral. A further downturn in the real estate market could seriously impair our loan portfolio. As of December 31, 2009, approximately 75% of our loan portfolio consisted of loans secured by various types of real estate. Real estate values have declined in the current economic downturn and we have experienced significant increases in nonperforming real estate loans and loan loss provisions, which significantly reduced our net income in 2009. If real estate values continue to decline significantly, especially in California or New York, and/or in the hospitality industry, higher vacancies and other factors could harm the financial condition of our borrowers, the collateral for our loans will provide less security, and we would be more likely to suffer losses on defaulted loans.

Changes in interest rates affect our profitability. Changes in prevailing interest rates may hurt our business. We derive our income mainly from the difference or spread between the interest earned on loans, securities and other interest-earning assets, and interest paid on deposits, borrowings and other interest-bearing liabilities. In general, the wider the spread, the more we earn. When market rates of interest change, the interest we receive on our assets and the interest we pay on our liabilities will fluctuate. This can cause decreases in our spread and can greatly affect our income. In addition, interest rate fluctuations can affect how much money we may be able to lend. The interest rate risk inherent in our lending, investing, and deposit taking activities is a significant market risk to us and our business. There can be no assurance that we will be successful in minimizing the adverse effects of changes in interest rates.

If we lose key employees, our business may suffer. Our future success depends on the continued contributions of existing senior management personnel. If we lose key employees temporarily or permanently, it could hurt our business. We could be particularly hurt if our key employees went to work for our competitors in the Korean American banking industry. In addition, the America Recovery and Reinvestment Act of 2009 places certain restrictions on executive compensation that may impact our ability to attract, retain and motivate senior management personnel.

Environmental laws could force us to pay for environmental problems. The cost of cleaning up or paying damages and penalties associated with environmental problems could increase our operating expenses. When a borrower defaults on a loan secured by real property, we often purchase the property in foreclosure or accept a deed to the property surrendered by the borrower. We may also take over the management of commercial properties whose owners have defaulted on loans. We also lease premises where our branches and other facilities are located and where environmental problems may exist. Although we have lending, foreclosure and facilities guidelines intended to exclude properties with an unreasonable risk of contamination, hazardous substances may exist on some of the properties that we own, lease, manage or occupy. We may face the risk that environmental laws could force us to clean up the properties at our expense. It may cost much more to clean up a property than the property is worth. We could also be liable for pollution generated by a borrower's operations if we take a role in managing those operations after a default. We may find it difficult or impossible to sell contaminated properties.

We are exposed to the risks of natural disasters. A significant portion of our operations is concentrated in Southern California. California is in an earthquake-prone region. A major earthquake could result in material loss to us. A significant percentage of our loans are and will be secured by real estate. Many of our borrowers could suffer uninsured property damage, experience interruption of their businesses or lose their jobs after an earthquake. Those borrowers might not be able to repay their loans, and the collateral for such loans could decline significantly in value. Unlike a bank with operations that are more geographically diversified, we are vulnerable to greater losses if an earthquake, fire, flood or other natural catastrophe occurs in Southern California.

Table of Contents

An increase in non-performing assets would reduce our income and increase our expenses. If the level of non-performing assets further increases in the future, it could adversely affect our operating results and financial condition. Non-performing assets are mainly loans on which the borrowers are not making their required payments. Non-performing assets also include loans that have been restructured to permit the borrower to have smaller payments and real estate that has been acquired through foreclosure of unpaid loans. To the extent that assets are non-performing, we have less or lower earning assets generating interest income and an increase in credit related expenses, including provisions for loan losses.

Legislative and regulatory actions taken to address the recent stresses in the banking industry may significantly affect our financial condition, results of operations, liquidity and stock price. Economic conditions, particularly in the financial markets, have resulted in government regulatory agencies and legislative bodies placing increased scrutiny on the banking industry. The U.S. government has intervened on an unprecedented scale, responding to what has been commonly referred to as the financial crisis. In addition to the Capital Purchase Program component of the U.S. Treasury Department's Troubled Asset Relief Program, in which we participated by selling \$67 million of our Fixed Rate Cumulative Perpetual Preferred Stock, Series A (the "Series A Preferred Stock") and a warrant to purchase up to 1,042,531 shares (which has been subsequently reduced to 521,266 shares) of our common stock (the "Warrant") to the U.S. Treasury Department, the U.S. government has taken steps that include enhancing the liquidity support available to financial institutions, establishing a commercial paper funding facility, temporarily guaranteeing money market funds and certain types of bank and other debt issuances, and increasing the levels of insurance on bank deposits. Our participation in the Capital Purchase Program subjects us to additional restrictions, oversight and costs that may have an adverse impact on our business, financial condition and results of operations and the price of our common stock.

The U.S. Congress, through the Emergency Economic Stabilization Act of 2008 and the American Recovery and Reinvestment Act of 2009, has imposed a number of restrictions and limitations on the operations of banks and other financial services companies participating in the federal programs. In addition, new proposals for legislation continue to be introduced in the U.S. Congress that could further substantially increase regulation of the financial services industry and impose restrictions on the operations and general ability of commercial banks and other companies in the industry to conduct business consistent with historical practices relating to, among others, interest rates, lending practices and compensation practices. Compliance with such current and potential regulation may significantly increase our costs, impede the efficiency of our internal business processes, make it more difficult to attract and retain key employees, require us to increase our regulatory capital and limit our ability to pursue business opportunities in an efficient manner.

We may experience adverse effects from possible future acquisitions. We have acquired other banking companies and bank offices in the past and consider additional acquisitions as opportunities arise. If we do not adequately address the financial and operational risks associated with acquisitions of other companies, we may incur material unexpected costs and disruption of our business. Risks involved in acquisitions of other companies include:

the risk of failure adequately to evaluate the asset quality of the acquired company;

difficulty in assimilating the operations, technology and personnel of the acquired company;

diversion of management's attention from other important business activities;

difficulty in maintaining good relations with the loan and deposit customers of the acquired company;

inability to maintain uniform standards, controls, procedures and policies;

potentially dilutive issuances of equity securities or the incurrence of debt and contingent liabilities; and

amortization of expenses related to acquired intangible assets that have finite lives.

Liquidity risk could impair our ability to fund operations and jeopardize our financial condition. Liquidity is essential to our business. An inability to raise funds through deposits, borrowings, the sale of loans, and other sources could have a material adverse effect on our liquidity. Our access to funding sources in amounts

Table of Contents

adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to a market downturn or adverse regulatory action against us. Our ability to acquire deposits or borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole.

The level of our problem assets, our incurrence of operating losses or a failure to comply with requirements of the agencies which regulate us could result in regulatory actions against us which may adversely affect our business and the market price of our common stock. The DFI, the Federal Deposit Insurance Corporation and the Federal Reserve Board each have authority to take actions to require that we comply with applicable regulatory capital requirements, to cease engaging in what they perceive to be unsafe or unsound practices or to make other changes in our business. Among others, the corrective measures that such regulatory authorities may take include requiring us to enter into informal or formal agreements regarding our operations, the issuance of cease and desist orders to refrain from engaging in unsafe and unsound practices, removal of officers and directors, and the assessment of civil monetary penalties. See Item 1. Business Supervision and Regulation for a further description of such regulatory powers. We have experienced increases in the level of our problem assets beginning in the latter part of 2008 which have resulted in increases in our net loan charge-offs and in our provisions for loan and lease losses and have caused operating losses. We are taking actions that we believe to be appropriate to address these adverse developments. At the request of the DFI, the Bank has submitted plans to the DFI and to the FRB for improvement of the Bank's asset quality, maintenance of its capital at sufficient levels and improvement of its earnings. The Bank has also committed, through resolutions adopted by its board of directors, that it will not declare or pay dividends without the prior written approval of the DFI and the FRB and will not appoint new directors or senior executive officers or materially change the responsibilities of senior executive officers without prior notification to, and review of specified information regarding any such proposed changes, by the DFI and the FRB. The Board of Directors of Nara Bancorp recently adopted similar resolutions for Nara Bancorp after consultations with the FRB. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Overview. Failure by the Bank to comply with the plans that it has submitted, or with revised plans if the initial plans are not accepted by the DFI and FRB, or with the other provisions of the resolutions adopted by the Bank's board of directors could result in more formal regulatory action with respect to the Bank. Regulatory action could also be taken with respect to the Company.

Increased deposit insurance costs may adversely affect our results of operations. Due to the greatly increased rate of bank failures experienced in the current period of financial stress, as well as the extraordinary programs in which the FDIC has been involved to support the banking industry generally, the FDIC's Deposit Insurance Fund has been substantially depleted and the FDIC has incurred substantially increased operating costs. For these reasons, the FDIC has significantly increased the rates of deposit insurance premiums that it charges insured banks, including Nara Bank, which has increased our costs of operation. Additional increases in the deposit insurance premium rates of the FDIC or other increases in costs related to deposit insurance may be imposed, which could result in further increases in Nara Bank's operating costs.

Changes in accounting standards may affect how we record and report our financial condition and results of operations. Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. From time to time, the Financial Accounting Standards Board and SEC change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes and their impacts on us can be hard to predict and may result in unexpected and materially adverse impacts on our reported financial condition and results of operations.

We are subject to operational risks relating to our technology and information systems. The continued efficacy of our technology and information systems, related operational infrastructure and relationships with third party vendors in our ongoing operations is integral to our performance. Failure of any of these resources,

Table of Contents

including but not limited to operational or systems failures, interruptions of client service operations, and ineffectiveness of or interruption in third party data processing or other vendor support, could cause material disruptions of our business, impairment of customer relations and exposure to liability for our customers, as well as action by bank regulatory authorities.

Our business reputation is important and any damage to it could have a material adverse effect on our business. Our reputation is very important to sustain our business, as we rely on our relationships with our current, former and potential clients and stockholders, and in the communities we serve. Any damage to our reputation, whether arising from regulatory, supervisory or enforcement actions, matters affecting our financial reporting or compliance with SEC and exchange listing requirements, negative publicity, or our conduct of our business or otherwise could have a material adverse effect on our business.

As we expand outside our California markets, we may encounter additional risks that could adversely affect us. Currently, the substantial majority of our offices are located in California, but we also have five offices in New York and Northern New Jersey and plan to expand our branch network in those states. Over time, we may also seek to establish offices to serve Korean American communities in other parts of the United States. In the course of these expansion activities, we may encounter significant risks including increased marketing and administrative expenses and operational difficulties arising from our efforts to attract business in new markets, manage operations in noncontiguous geographic markets, comply with local laws and regulations and effectively and consistently manage our non-California personnel and business. If we are unable to manage these risks, our operations could be adversely affected.

Adverse conditions in Korea could adversely affect our business. A substantial number of our customers have economic and cultural ties to Korea and, as a result, we are likely to feel the effects of adverse economic and political conditions in Korea. If economic conditions in Korea deteriorate, we could, among other things, be exposed to economic and transfer risk, and could experience an outflow of deposits by those of our customers with connections to Korea. Transfer risk may result when an entity is unable to obtain the foreign exchange needed to meet its obligations or to provide liquidity. This may adversely impact the recoverability of investments with or loans made to such entities. Adverse economic conditions in Korea may also negatively impact asset values and the profitability and liquidity of our customers who operate in this region.

Our use of appraisals in deciding whether to make loans secured by real property does not ensure that the value of the real property collateral will be sufficient to repay our loans. In considering whether to make a loan secured by real property, we require an appraisal of the property. However, an appraisal is only an estimate of the value of the property at the time the appraisal is made and requires the exercise of a considerable degree of judgment and adherence to professional standards. If the appraisal does not reflect the amount that may be obtained upon sale or foreclosure of the property, whether due to declines in property value after the date of the original appraisal or defective preparation, we may not realize an amount equal to the indebtedness secured by the property and may suffer losses.

Changes in governmental regulation may impair our operations or restrict our growth. Federal and state bank regulatory agencies regulate many aspects of our operations. These areas include:

the capital that must be maintained;

the dividend that may be paid;

the kinds of activities that can be engaged in;

the compensation that may be paid;

the kinds and amounts of investments that can be made;

the locations of offices;

Table of Contents

how much interest can be paid on demand deposits;

insurance of deposits and the premiums that must be paid for this insurance; and

how much cash must be set aside as reserves for deposits.

We are subject to significant governmental supervision and regulation. These regulations are intended primarily for the protection of depositors. Statutes and regulations affecting our business may be changed at any time, and the interpretation of these statutes and regulations by examining authorities may also change. Within the last several years Congress and the federal bank regulatory authorities have made significant changes to these statutes and regulations. There can be no assurance that such changes to the statutes and regulations or in their interpretation will not adversely affect our business. Nara Bank is subject to regulation and examination by the DFI and the FRB and Nara Bancorp is subject to the rules and regulations of the FRB. In addition to governmental supervision and regulation, Nara Bank and Nara Bancorp are subject to changes in other federal and state laws, including changes in tax laws, which could materially affect the banking industry. If we fail to comply with federal and state bank regulations, the regulators may limit our activities or growth, fine us or force the bank into receivership. Banking laws and regulations change from time to time. Bank regulations can hinder our ability to compete with financial services companies that are not regulated or are less regulated.

The short term and long term impact of the new Basel II capital standards and the forthcoming new capital rules to be proposed for non-Basel II U.S. banks is uncertain As a result of the deterioration in the global credit markets and the potential impact of increased liquidity risk and interest rate risk, it is unclear what the short term impact of the implementation of Basel II may be or what impact a pending alternative standardized approach to Basel II option for non-Basel II U.S. banks may have on the cost and availability of different types of credit and the potential compliance costs of implementing the new capital standards.

Our stock price may become more volatile, which could result in substantial losses for our stockholders. The market price of our common stock could be subject to wider fluctuations in response to a number of factors,

issuing new equity securities;

the amount of our common stock outstanding and the trading volume of our stock;

actual or anticipated changes in our future financial performance;

changes in financial performance estimates of us by securities analysts;

competitive developments, including announcements by us or our competitors of new products or services or significant contracts, acquisitions, strategic partnerships, joint ventures or capital commitments;

the operating and stock performance of our competitors;

changes in interest rates;

addition or departures of key personnel;

changes in economic conditions that affect Bank performance; and

changes in legislation or regulations that affect the Bank

We have suspended declaration and payment of dividends on our common stock. Our ability to declare and pay dividends in the future, as well as the ability of the Bank to make dividend payments to us, will be subject to regulatory, statutory and other restrictions. In March, 2009, we announced the suspension of our prior policy of paying quarterly dividends in order to preserve capital. In addition, the Company has agreed with the FRB and the Bank has agreed with the DFI and FRB that neither will declare or pay dividends without the prior written regulatory approval. Further, under Federal Reserve Board policy, bank holding companies are

Table of Contents

expected to inform and consult with the Federal Reserve Supervisory Staff prior to declaring and paying a dividend that exceeds the holding company's earnings for the period for which the dividend is being paid. Our ability to declare and pay dividends on our outstanding common stock and preferred stock is also subject to further limitations under applicable federal and state law and regulations. See Item 1. Business Supervision and Regulation.

Our outstanding preferred stock impacts net income available to our common stockholders and earnings per common share, and the Warrant as well as other potential issuances of equity securities may be dilutive to holders of our common stock. The dividends declared and the accretion on discount on our outstanding preferred stock will reduce the net income available to common stockholders and our earnings per common share. Our outstanding preferred stock would also receive preferential treatment in the event of our liquidation, dissolution, or winding up. Additionally, the ownership interest of the existing holders of our common stock will be diluted to the extent the Warrant is exercised. The 521,266 shares of common stock underlying the Warrant represent approximately 1.4% of the shares of our common stock outstanding as of December 31, 2009 (including the shares issuable upon exercise of the Warrant in total shares outstanding). Although the U.S. Treasury has agreed not to vote any of the shares of common stock it receives upon exercise of the Warrant, a transferee of any portion of the Warrant or of any shares of common stock acquired upon exercise of the Warrant is not bound by this restriction. In addition, to the extent options to purchase common stock under our stock option plans are exercised, holders of our common stock will incur dilution of their ownership interest in Nara Bancorp. We are not restricted from issuing additional common stock or preferred stock, including any securities that are convertible into or exchangeable for, or that represent the right to receive, common stock or preferred stock or any substantially similar securities. If we sell additional equity or convertible debt securities, these sales could result in increased dilution to our stockholders

A continued decline in the value of our common stock may result in future impairment of our intangible assets. We assess the carrying value of intangible assets, including goodwill, at least annually in order to determine whether such assets are impaired. In reviewing the carrying value of intangible assets, we look to the market value of our common stock, compared to the book value. We further assess the recoverability of such intangible assets by evaluating the fair value of the related business unit. If recoverability is deemed impaired, a write down of such intangible assets would be required.

Item 1B. UNRESOLVED STAFF COMMENTS.

None.

Item 2. PROPERTIES

Our principal executive offices are located at 3731 Wilshire Blvd., Suite 1000, Los Angeles, California 90010. We conduct our operations through 21 branch offices and one loan production office. We lease all of our offices. We believe our present facilities are adequate for our current needs. We also believe that, if necessary, we could secure suitable alternative facilities on similar terms, without adversely impacting operations. We are currently under construction for the Great Neck (New York) and Edison (New Jersey) offices.

As of December 31, 2009 the premises and equipment, net of accumulated depreciation and amortization, totaled \$10.9 million. Total occupancy expense, including furniture and equipment expense for the year ended December 31, 2009, was \$12.8 million. Total lease expense for the year ended December 31, 2009 was \$6.6 million.

Item 3. LEGAL PROCEEDINGS

The Company is a nominal defendant in Thomas Chung v. Nara Bancorp, Inc., et al, a shareholder derivative lawsuit which purports to be brought on the Company's behalf by Mr. Thomas Chung, a former chairman of the Company's board of directors (the Chung Lawsuit) and which was filed on May 20, 2008 in

Table of Contents

the Superior Court of California, County of Los Angeles. The Chung Lawsuit alleges that the members of the Company's board of directors as composed on the date the lawsuit was filed, as well as the Company's board of directors as it was composed in March 2005 (collectively, the Boards) breached their fiduciary duties to the Company's shareholders and mismanaged corporate assets.

The Chung Lawsuit alleges that the 2005 restatement of the Company's 2002 consolidated financial statements was not required and was undertaken by the Board as composed in 2005 in bad faith. Mr. Chung further alleges that the restatement resulted in a decline of \$54 million in the value of the Company's outstanding stock, and that the Board as composed in 2008 breached its fiduciary duties by failing to pursue the claims alleged in the Chung Lawsuit. The letter between Mr. Chung and Mr. Benjamin Hong, the restatement of the Company's 2002 consolidated financial statements and certain related matters are further described in the Form 8-K/A filed by the Company with the SEC on March 31, 2005.

The complaint seeks damages exceeding \$54 million from the Boards, together with reimbursement from all defendants of Mr. Chung's legal costs incurred in pursuing the Chung Lawsuit. If any damages are recovered by the purported shareholder derivative lawsuit, such damages, but not any awards of legal costs to Mr. Chung would be payable to the Company.

The Company filed a *demurrer*, the request for dismissal, with the Superior Court which was denied on December 22, 2008. Discovery has been completed. The Company believes the Chung Lawsuit is without merit.

We are involved in routine litigation incidental to our business, none of which is expected to have a material adverse effect on us.

Item 4. *RESERVED*

Table of Contents**PART II****Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is traded on the Nasdaq Global Market under the symbol NARA .

We had approximately 2,758 beneficial owners and 509 registered holders of our common stock as of February 8, 2010. The following table sets forth, the range of high and low sales prices for, and quarterly dividend paid on our common stock for the calendar quarters indicated.

Quarters ended:	High Sales Price	Low Sales Price	Dividends
December 31, 2009	\$ 12.23	\$ 6.21	
September 30, 2009	\$ 9.16	\$ 4.49	
June 30, 2009	\$ 5.50	\$ 2.80	
March 31, 2009	\$ 9.95	\$ 2.05	
December 31, 2008	\$ 11.61	\$ 7.38	\$ 0.0275
September 30, 2008	\$ 14.92	\$ 9.58	\$ 0.0275
June 30, 2008	\$ 13.32	\$ 10.68	\$ 0.0275
March 31, 2008	\$ 13.41	\$ 9.81	\$ 0.0275

The closing price for our common stock on the Nasdaq Global Market on February 26, 2010 was \$8.83 per share.

In March 2009, we announced our decision to suspend our prior policy of paying quarterly cash dividends in order to preserve capital. Future dividends are subject to the discretion of our Board of Directors after its consideration of a number of factors, including our future earnings, financial condition, cash needs and general business conditions. In addition, Nara Bancorp agreed in connections with its issuance of Series A Preferred Stock to the United States Treasury Department that it would not pay cash dividends on its common stock at a quarterly rate greater than \$0.0275 per share, or redeem, purchase or acquire any of its common stock or other equity securities, without the prior approval of the Treasury Department, while the Series A Preferred Stock remains outstanding.

Nara Bancorp's ability to pay dividends is subject to restrictions set forth in the Delaware General Corporation Law. The Delaware General Corporation Law provides that a Delaware corporation may pay dividends either (i) out of the corporation's surplus (as defined by Delaware law), or (ii) if there is no surplus, out of the corporation's net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. In addition, the payment of dividends by Nara Bancorp is subject to review and possible limitation by the Federal Reserve Board under its authority as regulator of bank holding companies. In general, the FRB discourages the payment of dividends on common stock in amounts exceeding a holding company's net income available to common stockholders for the four quarters preceding a dividend payment. If we defer interest on the subordinated debentures issued in connection with our trust preferred securities, Nara Bancorp would also be prohibited from paying any dividends on our common stock or preferred stock until Nara Bancorp is current on its interest payments.

Nara Bancorp's ability to pay cash dividends in the future will depend in large part on the ability of the Bank to pay dividends on its capital stock to Nara Bancorp. The ability of the Bank to declare a cash dividend to Nara Bancorp is subject to compliance with its minimum capital requirements, additional limitations under federal and California law and regulations and policies of the FRB. In addition, the Company and the Bank have each undertaken through resolutions adopted by its respective board of directors at the request of their respective regulators not to declare or pay dividends without prior regulatory approval.

Table of Contents

The applicable statutory and regulatory limitations on the declaration and payment of dividends are further described in Item 1. Business Supervision and Regulation.

Recent Completion of Stock Offering

On October 27, 2009, the Company completed an offering of \$86.3 million of its common stock through an underwritten public offering of 11.5 million shares of the Company's common stock at a price of \$7.50 per share, including a 15% over-allotment option. Net proceeds were approximately \$82 million. The shares were issued pursuant to a prospectus supplement filed as part of a shelf registration statement previously filed with the Securities and Exchange Commission on Form S-3 (No. 333-161992).

We did not repurchase any of our securities during 2009 and do not currently have any publicly announced repurchase plan. Our ability to repurchase common stock is subject to prior approval of the FRB and the U.S. Treasury pursuant to the agreements we entered into in connection with our participation in the U.S. Treasury's capital purchase program.

Stock Performance Graph

The following graph compares the yearly percentage change in the cumulative total shareholder return (stock price appreciation plus reinvested dividends) on the common stock of the Company with (i) the cumulative total return of the Nasdaq Market Index, (ii) the cumulative total return of the S&P Small Cap 600 Index, (iii) a published index comprised of banks and thrifts selected by SNL Financial LLC, and (iv) the cumulative total return of the S&P 500 Index. The graph assumes an initial investment of \$100 and reinvestment of dividends. Points on the graph represent the performance as of the last business day of each of the years indicated. The graph is not necessarily indicative of future price performance.

Table of Contents

The following graph does not constitute soliciting material and shall not be deemed filed or incorporated by reference into any filing by the Company under the Securities Act of 1933, as amended, or under the Securities Exchange Act of 1934, as amended, except to the extent that we may specifically incorporate this graph by reference.

- (6) Interest expense divided by the average interest-bearing liabilities
- (7) Noninterest expense divided by the sum of net interest income plus noninterest income

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our financial condition and results of operations together with our Consolidated Financial Statements and accompanying notes presented elsewhere in this Report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors, including those set forth under Item 1A Risk Factors and elsewhere in this Report.

Overview

Nara Bancorp, Inc. is a bank holding company headquartered in Los Angeles, California. We offer a full range of commercial banking and, to a lesser extent, consumer financial services through our wholly owned subsidiary, Nara Bank, a California state-chartered bank. Nara Bank primarily focuses its business in Korean communities in California and in the New York City metropolitan area. We offer our banking services through our network of 21 banking offices in California, the New York metropolitan area, New Jersey and one loan production office located in Dallas, Texas, to our customers who typically are small- to medium-sized businesses in our market areas. We accept deposits and originate a variety of loans including commercial business loans, commercial real estate loans, trade finance and Small Business Administration (SBA) loans. We discontinued originating consumer loans; however, we continue to service consumer loans in our portfolio.

Our principal business involves earning interest on loans and investment securities that are funded by customer deposits and other borrowings. Our operating income and net income are derived primarily from the difference between interest income received from interest-earning assets and interest expense paid on interest-bearing liabilities and, to a lesser extent, from fees received in connection with servicing loan and deposit

Table of Contents

accounts and income from the sale of SBA loans. Our major expenses are the interest we pay on deposits and borrowings, provisions for loan losses and general operating expenses, which primarily consist of salaries and employee benefits and occupancy costs. Interest rates are highly sensitive to many factors that are beyond our control, such as changes in the national economy and in the related monetary policies of the Board of Governors of the Federal Reserve System, inflation, unemployment, consumer spending and political events. We cannot predict the impact that these factors and future changes in domestic and foreign economic and political conditions might have on our performance.

We have a significant business and geographic concentration in the Korean communities in California and in the New York City metropolitan area and our results are affected by economic conditions in these areas and in Korea. A further decline in economic and business conditions in our market areas and in Korea could have a material impact on the quality of our loan portfolio or the demand for our products and services, which in turn may have a material adverse effect on our results of operations.

Year 2009 continued to be a very challenging year for us. The deterioration in credit markets that started to show in 2007 continued through 2008 and 2009. The housing crisis, the unraveling of sub-prime loans, the freezing of the credit markets, which led to failures of major investment banks and commercial banks and thrifts, all have led to unprecedented market volatility. The resulting contraction in the economy, evidenced by high unemployment, asset price declines and falling consumer spending, leading to falling business revenues, has hurt financial services companies, including our bank.

During 2009, we experienced significant deterioration in our loan portfolio, especially in the commercial real estate sector caused by the decline in asset values, and tightening of cash flows from the slowdown in the economy. The increased provision for loan losses, along with the low interest rate environment, and the decline in SBA loan sale gains adversely affected our net income in 2009. Our net loss was (\$5.7 million) for the year ended December 31, 2009, representing a 308% decrease from net income of \$2.8 million for the year ended December 31, 2008.

In accordance with the Board Resolution (the Resolution) adopted by the Bank's board of directors at the request of the DFI, the Bank has submitted plans to the DFI and the FRB for improvement of the Bank's asset quality, maintenance of the Bank's capital at sufficient levels and improvement of the Bank's earnings. The Resolution further provides that the Bank will not declare or pay any dividends without the prior written approval of the DFI and the FRB. The Resolution also provides that the Bank will notify and provide specified information to the DFI and the FRB prior to appointing any new director or senior executive officer, or materially changing the responsibilities of any existing senior executive officer, and will not make such appointment or change of responsibilities effective until the DFI and the FRB have completed their review of the information provided by the Bank. The Board of Directors of Nara Bancorp recently adopted similar resolutions for Nara Bancorp after consultations with the FRB.

The plans that have been submitted pursuant to the Resolution are currently being reviewed by the DFI and FRB. Failure to comply with those plans or revised plan if the initial plans are not accepted by the DFI and FRB, or to comply with the other provisions of the Resolution could result in more formal regulatory action being taken with respect to the Bank. In addition, the adoption of the Resolution does not preclude regulatory action being taken with respect to the Bank of the Company.

Critical Accounting Policies

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and general practices within the banking industry. The financial information contained within these statements is, to a significant extent, financial information that is based on approximate measures of the financial effects of transactions and events that have already occurred. All of our significant accounting policies are described in Note 1 of our consolidated financial statements presented elsewhere herein and are essential to understanding Management's Discussion and Analysis of Financial Condition and Results of

Table of Contents

Operations. GAAP requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

The following is a summary of the more judgmental and complex accounting estimates and principles affecting the financial condition and results reported in our financial statements. In each area, we have identified the variables we believe to be the most important in the estimation process. We use the best information available to us to make the estimations necessary to value the related assets and liabilities in each of these areas.

Accounting for the allowance for loan losses involves significant judgments and assumptions by management, which has a material impact on the carrying value of net loans. The judgments and assumptions used by management are based on historical data and management's analysis of other qualitative factors, including the current economic environment as described under **Financial Condition** **Allowance for Loan Losses** below.

We evaluate securities for other-than-temporary impairment on at least a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the financial condition and near-term prospects of the issuer; the length of time and the extent to which the fair value has been less than cost, and our intention to sell, or it is more likely than not that we will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. In analyzing an issuer's financial condition, we consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and the results of reviews of the issuer's financial condition. We do not believe that we had any investment securities with unrealized losses that would be deemed to be other-than-temporarily impaired as of December 31, 2009. Investment securities are discussed in more detail under **Financial Condition** **Investment Securities Portfolios** below.

Certain SBA loans that we have the intent to sell prior to maturity are designated as held for sale at origination and are recorded at the lower of cost or fair value, on an aggregate basis. A valuation allowance is established if the aggregate fair value of such loans is lower than their cost, and operations are charged or credited for valuation adjustments. A portion of the premium on sale of SBA loans is recognized as other operating income at the time of the sale. The remaining portion of the premium (relating to the portion of the loan retained) is deferred and amortized over the remaining life of the loan as an adjustment to yield. Servicing assets are recognized when loans are sold with servicing retained. Servicing assets are recorded based on the present value of the contractually specified servicing fee, net of servicing costs, over the estimated life of the loan, using a discount rate based on the related note rate plus 1% to 2%. The market rate is used to determine servicing costs. Servicing assets are amortized in proportion to and over the period of estimated future servicing income. Management periodically evaluates the servicing asset for impairment, which is the amount, if any, by which the carrying value of the servicing asset exceeds the fair value of the servicing asset. Impairment, if it occurs, is recognized as a write down or charge-off in the period of impairment.

We assess the carrying value of intangible assets including goodwill at least annually in order to determine if such intangible assets are impaired. In reviewing the carrying value of intangible assets, we assess the recoverability of such assets by evaluating the fair value of the related business unit. Any impairment would be required to be recorded during the period identified. If our intangible assets were determined to be impaired, the related charge to earnings could be material. For additional information regarding intangible assets, see Note 5 to our consolidated financial statements presented elsewhere herein.

Results of Operations

General

Our most significant source of income is net interest income, which is the difference between our interest income and our interest expense. Generally, interest income is generated from the loans we extend to our customers and investments, and interest expense is generated from interest-bearing deposits our customers have

Table of Contents

with us and borrowings that we may have, such as Federal Home Loan Bank borrowings and subordinated debentures. Our ability to generate profitable levels of net interest income is largely dependent on our ability to manage the levels of interest earning assets and interest-bearing liabilities, and the rates received or paid on them, as well as our ability to maintain sound asset quality and appropriate levels of capital and liquidity. As mentioned above, interest income and interest expense may fluctuate based on factors beyond our control, such as economic or political conditions.

We attempt to minimize the effect of interest rate fluctuations on net interest margin by monitoring our interest-sensitive assets and our interest-sensitive liabilities. Net interest income can be affected by a change in the composition of assets and liabilities, for example, if higher yielding loans were to replace a like amount of lower yielding investment securities. Changes in the level of nonaccrual loans and changes in volume and changes in rates can also affect net interest income. Volume changes are caused by differences in the level of interest-earning assets and interest-bearing liabilities. Rate changes result from differences in yields earned on assets and rates paid on liabilities.

We also have non-interest income, including service charges and fees on deposit accounts, fees from trade finance activities and the issuance of letters of credit, and net gains on sale of loans that were held for sale and investment securities available for sale. Our non-interest income can be reduced by net losses on sales of other real estate owned and charges for other than temporary impairment on investment securities and derivative instruments.

In addition to interest expense, our income is impacted by provisions for loan losses, and non-interest expenses, primarily salaries and benefits and occupancy expense.

Net Income

Our net income (loss) available to common stockholders was (\$10.0 million) for 2009, compared to \$2.3 million for 2008 and \$33.2 million for 2007. Our earnings (loss) per common share based on fully diluted shares were (\$0.35), \$0.09 and \$1.25 for 2009, 2008 and 2007, respectively. The return on average assets was -0.19%, 0.11% and 1.50% and the return on average stockholders' equity was -1.88%, 1.15% and 16.21% for these same periods.

The decline in earnings for 2009 was primarily due to increases in loan loss provisions, non-interest expense and dividends and discount accretion on preferred stock and decrease in net interest income due to compression in our net interest margin, partially offset by an increase in non-interest income and income tax benefits. During 2008, net income decreased significantly as compared with 2007 primarily due to higher loan loss provisions, lower net interest income due to margin compression and lower non-interest income from lower gains on sale of SBA and other loans and net losses on sales of other real estate owned and a charge for other than temporary impairment on a security available for sale.

Operations Summary

(Dollars in thousands)	Year Ended December 31,

Table of Contents***Net Interest Income and Net Interest Margin***

Net interest income was \$92.3 million for 2009, compared to \$96.2 million for 2008 and \$97.2 million for 2007. The net interest margin was 3.15% for 2009 compared to 3.96% for 2008 and 4.60% for 2007.

Net interest income decreased \$3.9 million, or 4%, during 2009. The decline in net interest income was due to the decline in the net interest margin, as well as a significant shift in asset allocation from loans receivable to liquid assets and investment securities with lower yields. The net interest margin was lower during 2009 primarily due to the lag effect of deposit pricing. There was no change to prime rate during 2009.

Net interest income decreased \$984 thousand, or 1%, during 2008, primarily due to a decline in net interest margin from a series of rate cuts made by Federal Reserve Board thought the year, offset by 15% growth in average interest earning assets. The Wall Street Journal prime rate, to which approximately 50% of our loans are tied, decreased 400 basis points throughout 2008.

Interest income reversed for non-accrual loans (net of income recognized) was \$1.5 million for 2009, compared to \$689 thousand for 2008 and \$697 thousand for 2007. Excluding this effect, the net interest margin for 2009, 2008 and 2007 was 3.20%, 3.99% and 4.64%, respectively.

Interest Income

Interest income was \$158.0 million for 2009, compared to \$166.9 million for 2008 and \$175.8 million for 2007. The yield on average interest-earning assets was 5.39% for 2009, compared to 6.87% for 2008 and 8.32% for 2007.

The decrease in interest income of \$8.9 million, or 5%, for 2009 compared to 2008 was primarily due to a decline in the prime rate in late 2008 to which our adjustable rate loans are tied, partially offset by 21% growth in average earning assets, mostly in investment securities. Average interest earning assets increased \$501 million to \$2.9 billion for 2009, compared to \$2.4 billion for 2008. The increase in average investment securities accounted for 64% of the increase in average interest earning assets.

The average yield on loans decreased 104 basis points to 6.19% for 2009, compared to 7.23% for 2008. Average loans increased \$34.8 million to \$2.1 billion for 2009 from \$2.09 billion for 2008. Interest income on securities increased \$11.3 million, or 79%, to \$25.7 million for 2009 from \$14.4 million for 2008, primarily due to the growth in the securities portfolio. The average yield on investment securities for 2009 decreased to 4.15% from 4.82% for 2008, due to new investment securities purchased in 2009, which had lower yields than the weighted average yield of the portfolio. The investment securities purchased during 2009 amounted to \$768 million with an average yield of 3.80%.

The decrease in interest income of \$8.8 million, or 5%, for 2008 compared to 2007 was primarily due to a decline in the prime rate to which our adjustable rate loans are tied, partially offset by 11% growth in average loans. The average yield on loans decreased 150 basis points to 7.23% for 2008, compared to 8.73% for 2007. Average loans increased \$210.3 million to \$2.09 billion for 2008 from \$1.88 billion for 2007.

Interest income on securities increased \$4.5 million, or 46%, to \$14.4 million for 2008 from \$9.9 million for 2007, primarily due to the growth in the securities portfolio. The average yield on investment securities for 2008 decreased to 4.82% from 4.95% for 2007, due to a decrease in LIBOR rates to which the floating rate securities are tied.

Interest Expense***Deposits***

Interest expense on deposits was \$50.6 million for 2009 compared to \$54.1 million for 2008 and \$68.2 million for 2007. The average cost of total deposits was 2.21% for 2009 compared to 2.91% for 2008 and 3.85% for 2007. The average cost of interest-bearing deposits was 2.54% for 2009 compared to 3.54% for 2008 and

Table of Contents

4.87% for 2007. The decrease in interest expense on total deposits of \$3.5 million, or 6%, for 2009 compared to 2008 was due to the decrease in rates paid on deposits as we lowered the rates several times in 2009, partially offset by an increase in average interest-bearing deposits. Average interest-bearing deposits increased \$463.5 million, or 30% during 2009 while average non-interest bearing deposits decreased \$27.8 million, or 8%.

The decrease in interest expense on total deposits of \$14.2 million, or 21%, for 2008 compared to 2007 was due to the decrease in rates paid on deposits as the market interest rates decreased, partially offset by an increase in average interest-bearing deposits. Average interest-bearing deposits increased \$127 million, or 9% during 2008 while average non-interest bearing deposits decreased \$43 million, or 12%.

Borrowings

Borrowings include borrowings from the FHLB, the FRB, federal funds purchased and subordinated debentures. As part of our asset liability management, we utilize FHLB borrowings to supplement our deposit source of funds. Therefore, there may be fluctuations in these balances depending on the short-term liquidity and longer-term financing needs of the Bank.

Average FHLB and other borrowings decreased \$15.4 million, or 4%, for 2009 compared to 2008. Interest expense on FHLB borrowings was \$13.0 million for 2009, compared to \$13.9 million for 2008 and \$7.0 million for 2007. The average cost of those borrowings was 3.66% for 2009, compared to 3.74% for 2008 and 4.33% for 2007. Interest expense on subordinated debentures was \$2.0 million for 2009, compared to \$2.7 million for 2008 and \$3.3 million for 2007.

The average cost of other borrowing, including subordinated debentures, was 5.34% for 2009, compared to 7.15% for 2008 and 8.87% for 2007, as the 3-month LIBOR, to which all but one of our issues of subordinated debentures is tied, decreased over the years.

Net Interest Margin and Net Interest Rate Spread

We analyze our earnings performance using, among other measures, the net interest spread and net interest margin. The net interest spread represents the difference between the average yield on interest-earning assets and average rate paid on interest-bearing liabilities. Net interest income, when expressed as a percentage of average total interest-earning assets, is referred to as the net interest margin. Our net interest margin is affected by changes in the yields earned on assets and rates paid on liabilities, as well as the ratio of the amounts of interest-earning assets to interest-bearing liabilities.

Interest rates charged on our loans are affected principally by the demand for such loans, the supply of money available for lending purposes, and other competitive factors. These factors are in turn affected by general economic conditions and other factors including those beyond our control, such as federal economic policies, the general supply of money in the economy, legislative tax policies, governmental budgetary matters, and the actions of the Federal Reserve Board. The table below presents the average yield on each category of interest-earning assets, the average rate paid on each category of interest-bearing liabilities, and the resulting net interest spread and net interest margin for each year in the three-year period ended December 31, 2009.

Edgar Filing: NARA BANCORP INC - Form 10-K

- (1) Interest income on loans includes amortization of loan fees and net interest settlements from interest rate swaps and prepayment fees received on loan pay-offs. See the table below for detail. The average balance of loans is net of deferred loan fees.

Table of Contents

Year ended December 31,	Loan Fees	Deferred (Fees) cost	Loan prepayment fee income (In thousands)	Non-accrual Loan Income(expense)
2009	\$ 1,311	\$ (2,343)	\$ 632	\$ (1,470)
2008	\$ 1,556	\$ (1,505)	\$ 1,668	\$ (689)
2007	\$ 2,037	\$ (1,459)	\$ 1,880	\$ (697)

- (2) Average balances of loans are net of deferred loan fees and costs and include non-accrual loans and loans held for sale, but excludes the guaranteed portion of delinquent SBA loans.
- (3) Interest income and yields are not presented on a tax-equivalent basis.
- (4) Interest on earning assets minus interest on interest-bearing liabilities
- (5) Interest on earning assets minus interest on interest-bearing liabilities and non-interest bearing deposits
- (6) Interest on interest bearing liabilities and non-interest bearing deposits

The following table illustrates changes in interest income (including loan fees) and interest expense and the amounts of such changes attributable to variations in interest rates and volumes for the period indicated. The variances attributable to simultaneous volume and rate changes have been allocated to the change due to volume and the change due to rate categories in proportion to the relationship of the absolute dollar amounts attributable solely to the change in volume and to the change in rate.

Provision for Loan Losses

The provision for loan losses reflects our judgment of the current period cost associated with credit risk inherent in our loan portfolio. The loan loss provision for each period is dependent upon many factors, including loan growth, net charge-offs, changes in the composition of the loan portfolio, delinquencies, assessments by management, third parties and regulators examination of the loan portfolio, the value of the underlying collateral on problem loans and the general economic conditions in our market areas. Specifically, the provision for loan losses represents the amount charged against current period earnings to achieve an allowance for loan losses that, in our judgment, is adequate to absorb probable incurred losses inherent in our loan portfolio. Periodic fluctuations in the provision for loan losses result from management's assessment of the adequacy of the allowance for loan losses; however, actual loan losses may vary from current estimates. If the allowance for loan losses is inadequate, it could have a material adverse effect on our financial condition.

Table of Contents

The provision for loan losses was \$61.0 million for 2009, an increase of \$12.2 million, or 25%, from \$48.8 million for 2008. The increase is primarily due to higher net charge-offs, an increase in loss migration factors based on continued deterioration in the portfolio and increasing Watch List loans, as well as changes in qualitative factors that may adversely affect the loan portfolio. Net charge-offs increased to \$45.0 million for 2009, compared to \$25.4 million for 2008. The increase in net charge-offs was mostly due to an increase in partial charge-offs on impaired loans resulting primarily from declines in collateral values on collateral dependent loans. Total classified loans increased significantly to \$157.2 million at December 31, 2009, compared to \$65.5 million at December 31, 2008, partially due to the increase in the Troubled Debt Restructured loans.

The provision for loan losses was \$48.8 million for 2008, an increase of \$41.3 million, from \$7.5 million for 2007. The increase in the provision for loan losses for 2008 over 2007 was due to the deterioration in the portfolio as mentioned previously. Net charge-offs increased to \$25.4 million in 2008 from \$6.6 million in 2007. Total classified loans increased to \$65.5 million at December 31, 2008, compared to \$21.4 million at December 31, 2007.

See Financial Condition Allowance for Loan Losses for a description of our methodology for determining the allowance for loan losses.

Non-interest Income

Non-interest income was \$18.5 million for 2009, compared to \$14.0 million for 2008 and \$22.6 million for 2007.

Service charges on deposit accounts decreased \$595 thousand, or 8%, to \$6.8 million for 2009 from \$7.4 million for 2008. The decrease was primarily in NSF charges, which decreased \$421 thousand, or 8%, to \$5.1 million for 2009 from \$5.5 million for 2008 due to less volume of NFSs. Net gains on sales of SBA loans decreased \$906 thousand, or 57%, to \$694 thousand in 2009 from \$1.6 million in 2008. The origination of SBA loans declined significantly starting in the second quarter of 2008 due to the tightening of our underwriting standards and decreases in business sales transactions due to the slowdown in the economy. Total SBA loan originations during 2009 were \$11.2 million compared to \$49.2 million for 2008. Sales of SBA loans during 2009 also decreased to \$11.0 million compared to \$42.3 million for 2008. The decrease in net gains on sales of SBA loans was partially offset by the increase in premium paid. The average premium increased to 6.14% for 2009 compared to 4.97% for 2008. Other loans sold in 2009 and 2008 were \$13.7 million and \$11.7 million, respectively. Net gains on sales of other loans increased \$547 thousand, or 302%, to \$728 thousand for 2009 from \$181 thousand for 2008.

Net gains on sales of securities available-for-sale increased \$3.6 million, or 415%, to \$4.4 million for 2009 from \$860 thousand for 2008. A total of \$235.3 million in available-for-sale investment securities were sold during 2009 as part of the rebalancing of duration and mix of the investment securities portfolio. Net losses on sales of other real estate owned (OREO) decreased \$683 thousand, or 68%, to (\$320 thousand) for 2009 from (\$1.0 million) for 2008. During 2009, valuation of the underlying properties upon foreclosure was closer to actual value realized upon sale of the properties. We sold eleven properties during 2009 compared to three in 2008. During the second quarter of 2008, we recognized an other than temporary impairment (OTTI) charge of (\$1.7 million) on a non-agency asset backed security with a book value of \$1.7 million. The impairment charge was due to a down grade of the security by one of the rating agencies. The security has been written down in full. We have no other non-agency asset-backed securities in the investment portfolio. This write-down adversely affected non-interest income for 2008.

Service charges on deposit accounts increased \$356 thousand, or 5.1%, to \$7.4 million for 2008 from \$7.0 million for 2007. The increase was primarily due to changes in our fee structure for certain items. International service fee income decreased \$514 thousand, or 20%, to \$2.1 million for 2008 from \$2.6 million for 2007. The decrease is due to a slowdown in trade finance activities. Net gains on sales of SBA loans decreased \$3.6 million,

Table of Contents

or 69%, to \$1.6 million in 2008 from \$5.2 million in 2007. The origination of SBA loans declined significantly starting in the second quarter of 2008 due to the tightening of our underwriting standards and decreases in business sales transactions due to the slowdown in the economy. Total SBA loan originations during 2008 were \$49.2 million compared to \$172.8 million for 2007. Sales of SBA loans during 2008 also decreased to \$42.3 million compared to \$126.4 million for 2007. The decrease in net gains on sales of SBA loans was also affected by the decrease in premium paid. The average premium decreased to 4.97% for 2008 compared to 6.65% for 2007. Net gains on sales of commercial real estate loans decreased \$2.2 million, or 92%, to \$181 thousand for 2008 from \$2.4 million for 2007. We sold \$11.7 million in commercial real estate loans during 2008, compared to \$61.0 million during 2007. The average premium received was significantly lower, to 1.51% for 2008 compared to 3.89% for 2007.

During 2008, we recognized a net loss on sales of other real estate owned (OREO) of \$1.0 million. We had no OREO in 2007. As mentioned above, the recognition of OTTI charge of \$1.7 million caused a decrease in the non-interest income for 2008. As part of our interest rate risk and liquidity management strategy, we sold certain investment securities and recognized net gains of \$860 thousand during 2008, compared to \$27 thousand during 2007.

The breakdown of non-interest income by category is shown below:

(Dollars in thousands)	Year Ended December 31,						
	2009	Increase (Decrease)		2008	Increase (Decrease)		2007
	Amount	Amount	%	Amount	Amount	%	Amount
Non-interest Income:							
Service charges on deposit accounts	\$ 6,784	\$ (595)	(8)%	\$ 7,379	\$ 356	5%	\$ 7,023

Total non-interest income	\$ 18,468	\$ 4,475	32%	\$ 13,993	\$ (8,580)	(38)%	\$ 22,573

Non-interest Expense

Non-interest expense was \$61.7 million for 2009, compared to \$57.0 million for 2008 and \$56.5 million for 2007. The increases were \$4.7 million, or 8%, for 2009 and \$559 thousand, or 1%, for 2008.

The increase in non-interest expense for 2009 over 2008 is primarily due to increases in the FDIC insurance premium, credit related expenses and occupancy expense, partially offset by a decrease in salaries and employee benefits. The FDIC insurance premium increased by \$3.8 million, or 270%, to \$5.2 million 2009, compared to \$1.4 million for 2008. The increase is due to an increase in the FDIC insurance assessment rate effective second quarter 2009. In addition, a one-time special assessment fee was imposed by the FDIC on all insured depository institutions. The Bank paid \$1.5 million during the second quarter of 2009 as a result of this special assessment. Credit related expenses increased \$3.2 million, or 280% to \$4.4 million for 2009 from \$1.2 million for 2008. This increase was primarily due to a significant increase in loan collection related expense and OREO valuation

Table of Contents

allowances and related expenses. The OREO valuation allowances and related expenses increased \$1.5 million to \$1.7 million for 2009 from \$220.1 thousand for 2008. Salaries and employee benefits decreased \$3.5 million, or 11.9% to \$25.4 million for 2009 from \$28.9 million for 2008. The decrease was due to decreases in bonus expense and in the number of FTE employees. The number of FTE employees decreased to 337 at 2009 year-end compared to 366 at 2008 year-end. The increase in occupancy expense is primarily due to the opening of new branches during 2008 and 2009. We opened a branch in the Fashion District of Downtown, Los Angeles in July of 2008 and a branch in Fort Lee, New Jersey in April of 2009.

Non-interest expense increased slightly for 2008 over 2007. Salaries and employee benefits increased \$458 thousand, or 2%, during 2008. This increase was a result of annual compensation increases and a decrease in loan origination cost benefits, offset by a decrease in the number of full-time equivalent (FTE) employees and bonus expenses. The number of FTE employees decreased to 366 at 2008 year-end compared to 404 at 2007 year-end. Occupancy expense increased \$626 thousand, or 7%, to \$9.1 million for 2008 from \$8.5 million for 2007. The increase is due to branch renovations, new branch leases and annual rent increases. Data processing and communication expense decreased \$207 thousand, or 6%, primarily due to an on-going elimination of closed accounts, unused telephone and data lines, and consolidating communication tools. Professional fees decreased \$854 thousand, or 30%, to \$2.0 million for 2008 compared to \$2.8 million for 2007. The decrease is primarily due to a decrease in legal expenses. We incurred higher legal expenses during 2007 due to expenses related to an arbitration matter.

A breakdown of non-interest expense by category is provided below:

(Dollars in thousands)	Year Ended December 31,						2007
	2009	Increase (Decrease)		2008	Increase (Decrease)		
	Amount	Amount	%	Amount	Amount	%	
Non-interest Expense:							
Salaries and employee benefits	\$ 25,437	\$ (3,450)	(12)%	\$ 28,887	\$ 458	2%	\$ 28,429
Occupancy	9,918	786	9%	9,132	626	7%	8,506
Furniture and equipment	2,926	97	3%	2,829	105	4%	2,724
Advertising and marketing	1,671	(358)	(18)%	2,029	36	2%	1,993
Data processing and communications	3,742	467	14%	3,275	(207)	(6)%	3,482
Professional fees	2,324	363	19%	1,961	(854)	(30)%	2,815
FDIC assessment	5,237	3,822	270%	1,415	187	15%	1,228
Credit related expense	4,407	3,246	280%	1,161	672	137%	489
Other	6,051	(269)	(4)%	6,320	(464)	(7)%	6,784
Total non-interest expense:	\$ 61,713	\$ 4,704	8%	\$ 57,009	\$ 559	1%	\$ 56,450

Income Tax Provision

The provision (benefit) for income taxes for 2009 was (\$6.2) million compared to \$1.6 million in 2008 and \$22.6 million in 2007. The effective income tax (benefit) rate was (52%) for 2009 compared to 37% for 2008 and 41% for 2007. The higher effective benefit tax rate for 2009 was primarily due to the impact of state taxes and tax credits in a loss year. The lower effective tax rate for 2008 was due to the lower state taxes and the greater impact of the low-income housing tax credit due to lower pre-tax income.

Financial Condition

Our total assets were \$3.23 billion at December 31, 2009 compared to \$2.67 billion at December 31, 2008, an increase of \$555.9 million or 21%. The increase in total assets was primarily attributable to a 93% increase in investment securities available-for-sale, a 4% increase in net loans and 156% increase in cash and cash equivalents. These increases in 2009 were funded by a 26% growth in deposits.

Table of Contents**Loan Portfolio**

We offer various products designed to meet the credit needs of our borrowers. Our lending activities primarily consist of commercial real estate loans, commercial business loans and trade finance loans. We discontinued the origination of consumer loans; however, we continue to service the existing consumer loan portfolio. During 2009, new loans originated were \$424.4 million compared to \$509.6 million for 2008. Gross loans outstanding (net of deferred loan fees and costs), excluding loans held for sale and the guaranteed portion of delinquent SBA loans, increased by \$110.5 million, or 5%, to \$2.21 billion at December 31, 2009 compared to \$2.10 billion at December 31, 2008. Average loans outstanding, as a percentage of our average total interest-earning assets, were 73% for 2009 compared to 86% for 2008. Average loans were \$2.12 billion and \$2.09 billion for the years ended December 31, 2009 and 2008, respectively. The increases in average loans were \$34.8 million, or 2%, during 2009 and \$210.3 million, or 11%, during 2008. Loan growth remained concentrated in commercial real estate loans although the growth slowed down during 2009 due to the slowing economy and tightening credit standards. The rates of interest charged on adjustable rate loans are set at specified spreads based on the prime lending rate and accordingly vary as the prime lending rate varies. Approximately 48% of our total loans were adjustable rate loans at December 31, 2009, compared to 50% at December 31, 2008. Approximately 59% of new loan originations were fixed rate loans for 2009 compared to 26% for 2008.

With certain exceptions, we are permitted under applicable law to make unsecured loans to single borrowers (including certain related persons and entities) in aggregate amounts of up to 15% of the sum of our total capital and our allowance for loan losses (as defined for regulatory purposes) and certain capital notes and debentures issued by us (if any). As of December 31, 2009, our lending limit was approximately \$55.5 million per borrower for unsecured loans. For lending limit purposes, a secured loan is defined as a loan secured by collateral having a current fair value of at least 100% of the amount of the loan or extension of credit at all times and satisfying certain other requirements. In addition to unsecured loans, we are permitted to make such collateral-secured loans in an additional amount up to 10% (for a total of 25%) of our total capital and the allowance for loan losses for a total limit of \$92.5 million to one borrower. The largest aggregate amount of loans that the Bank had outstanding to any one borrower and related entities was \$35.2 million at December 31, 2009.

The following table shows the composition of our loan portfolio by type of loan on the dates indicated:

(Dollars in thousands)	2009		2008		December 31, 2007		2006		2005

Table of Contents

Real Estate Loans

Our real estate loans consist primarily of loans secured by deeds of trust on *Commercial* real estate properties, including SBA loans secured by commercial real estate. It is our general policy to restrict commercial real estate loan amounts to 70% of the appraised value of the property at the time of loan funding. We offer both fixed and floating interest rate loans. The maturities on such loans are generally up to seven years (with payments determined on the basis of principal amortization schedules of up to 25 years and a balloon payment due at maturity). *Residential* real estate loans comprise less than 1% of the total loan portfolio, and are currently not being offered by the Bank. This pool of residential real estate loans is made up of loans funded in prior years that are still being serviced by the Bank. *Construction* loans are also a smaller portion of the total real estate portfolio, comprising approximately 2% of total loans outstanding. Total real estate loans, consisting primarily of commercial real estate loans, increased \$181.2 million or 12.3%, to \$1.7 billion at December 31, 2009 from \$1.5 billion at December 31, 2008.

Other Loans

Commercial Business Loans include term loans to businesses, lines of credit, trade finance facilities, and SBA loans. Business term loans are generally provided to finance business acquisitions, working capital, and/or equipment purchases. Lines of credit are generally provided to finance short-term working capital needs. *Trade finance* facilities are generally provided to finance import and export activities. SBA loans are provided to small businesses under the U.S. SBA guarantee program. Short-term credit facilities (payable within one year) typically provide for periodic interest payments, with principal payable at maturity. Term loans (usually 5 to 7 years) normally provide for monthly payments of both principal and interest. SBA commercial loans usually have a longer maturity (7 to 10 years). These credits are regularly reviewed on a periodic basis, and most loans are secured by business assets and/or real estate. During 2009, Commercial and Industrial Loans decreased \$44.2 million, or 8.3%, to \$487.7 million at December 31, 2009 from \$532.0 million at December 31, 2008. *Consumer Loans* comprise less than 1% of the total loan portfolio. Most of our consumer loan portfolio consists of automobile loans, home equity lines and loans, and signature (unsecured) lines of credit and loans. We ceased offering auto loans in February 2007 and ceased offering home equity loans in January 2008.

We provide lines of credit to business customers usually on an annual renewal basis. We normally do not make loan commitments in material amounts for periods in excess of one year.

The following table shows our loan commitments and letters of credit outstanding at the dates indicated:

(Dollars in thousands)	2009	2008	December 31, 2007	2006	2005
Commitments to extend credit	\$ 198,807	\$ 200,170	\$ 224,837	\$ 214,685	\$ 199,968
Standby letters of credit	9,907	9,354	15,231	12,786	14,077
Other commercial letters of credit.	23,575	17,183	18,552	27,146	25,858
	\$ 232,289	\$ 226,707	\$ 258,620	\$ 254,617	\$ 239,903

Non-performing Assets

Non-performing assets consist of non-accrual loans, accruing loans that are 90 days or more past due, accruing restructured loans and other real estate owned (OREO).

Loans are placed on non-accrual status when they become 90 days or more past due, unless the loan is both well-secured and in the process of collection. Loans may be placed on non-accrual status earlier if the full and timely collection of principal or interest becomes uncertain. When a loan is placed on non-accrual status, unpaid accrued interest is charged against interest income. Loans are charged off when the collection is determined unlikely. Loans are restructured when, for economic or legal reasons related to the borrower's financial difficulties, the bank grants a concession to the borrower that it would not otherwise consider. OREO consists of real estate acquired by the Bank through foreclosure or similar means, including by deed from the owner in lieu of foreclosure, and are held for sale.

Table of Contents

Non-performing assets were \$118.1 million at December 31, 2009, compared to \$43.8 million at December 31, 2008. The change in non-performing assets in 2009 was primarily due to increases in non-accrual loans and restructured loans. Restructured loans as defined by FASB ASC 310-40 *Troubled Debt Restructurings by Creditors*, increased during 2009 to \$64.3 million at December 31, 2009, compared to \$3.3 million at December 31, 2008. The increase in troubled debt restructuring reflects the Bank's continuing efforts to increase the probability of ultimately collecting the loan in full, by providing loan term modifications to fundamentally sound borrowers that are experiencing immediate and transitory financial stress.

The amount of additional interest income that the Bank would have recorded in 2009, 2008 and 2007, if non-accrual loans had been current in accordance with their original contracted terms, was \$3.2 million, \$348 thousand and \$620 thousand, respectively. The following table illustrates the composition of non-performing assets as of the dates indicated:

(Dollars in thousands)	December 31,				
	2009	2008	2007	2006	2005
Non-accrual loans	\$ 51,674	\$ 37,580	\$ 16,592	\$ 3,271	\$ 5,489
Loans past due 90 days or more, still accruing					
Total nonperforming loans	51,674	37,580	16,592	3,271	5,489
Other real estate owned	2,044	2,969			
Restructured loans	64,341	3,256	765	298	741
Total non-performing assets	\$ 118,059	\$ 43,805	\$ 17,357	\$ 3,569	\$ 6,230

We did not have any commitments to extend additional credit on restructured loans as of December 31, 2009 or 2008.

Maturity and Repricing of Loans

The following table illustrates the maturity distribution and repricing intervals of our loans outstanding as of December 31, 2009. The table also shows the distribution of such loans between those with variable or floating interest rates and those with fixed or predetermined interest rates.

(Dollars in thousands)	December 31, 2009				
	Within One Year	Loans Maturing and repricing Between One and Five Years		After Five Years	Total

Total	\$ 1,143,466	\$	849,000	\$ 218,820	\$ 2,211,286

Table of Contents**Concentrations**

Loan concentrations are considered to exist when there are significant amounts of loans to multiple borrowers engaged in similar activities, which would cause them to be similarly affected by economic or other conditions. The following table summarizes the industry concentrations exceeding 10% of our loan portfolio as of the dates indicated:

(Dollars in thousands)	December 31,									
	2009		2008		2007		2006		2005	
	Amount	% of Portfolio	Amount	% of Portfolio	Amount	% of Portfolio	Amount	% of Portfolio	Amount	% of Portfolio

Allowance for Loan Losses

The Bank has implemented a multi-faceted process to identify, manage, and mitigate the credit risks that are inherent in the loan portfolio. For new loans, we fully analyze each loan application package, with experienced reviewers and approvers. In accordance with current lending approval authority guidelines, a majority of loans are approved by the Management Loan Committee (MLC), which is comprised of the Chief Executive Officer, Chief Operating Officer, Chief Credit Officer, and Senior Credit Administrators. For existing loans, the Bank maintains a systematic loan review program, which includes a quarterly loan review by the internal loan review officer and a semi-annual loan review by external loan review consultants. Based on these reviews, loans are graded as to their overall credit quality, which is measured based on: the sufficiency of credit and collateral documentation; proper lien perfection; proper approval by loan committee(s); adherence to any loan agreement covenants; compliance with internal policies and procedures, and with laws and regulations; adequacy and strength of repayment sources including borrower or collateral generated cash flow; payment performance; and liquidation value of the collateral. We closely monitor loans that management has determined require further supervision because of the loan size, loan structure, and/or specific circumstances of the borrower. These loans are also periodically reviewed by the MLC.

When principal or interest on a loan is ninety days or more past due, a loan is normally placed on non-accrual status unless it is considered to be both well-secured and in the process of collection. Further, a loan is considered a loss in whole or in part when (1) it appears that loss exposure on the loan exceeds the collateral value for the loan, (2) servicing of the unsecured portion has been discontinued, or (3) collection is not anticipated due to the borrower's financial condition and general economic conditions in the borrower's industry. Any loan or portion of a loan judged by management to be uncollectible is charged against the allowance for loan losses, while any recoveries are credited to such allowance.

The allowance for loan losses was \$59.4 million at December 31, 2009, compared to \$43.4 million at December 31, 2008. The allowance for loan losses increased \$16.0 million, or 37%, during 2009, primarily due to increased provisions as a result of increases in the levels of our non-accrual loans, Watch List loans, and impaired loans. The Bank recorded provisions for loan losses of \$61.0 million in 2009, compared to \$48.8 million in 2008 and \$7.5 million in 2007. During 2009, the Bank charged off \$45.7 million in loans outstanding, and recovered \$668 thousand in loans previously charged off. Total Watch List loans at December 31, 2009 were \$199.9 million compared to \$136.7 million at December 31, 2008. The allowance for loan losses was 2.69% of gross loans at December 31, 2009, compared to 2.07% at December 31, 2008.

Table of Contents

For loans not classified as impaired loans, general loan loss allowances are provided to cover probable and inherent losses. The allowance is determined based first on a quantitative analysis using a loss migration methodology. The loans are classified by type and loan grade, and the historical loss migration is tracked for the various stratifications. These stratifications were enhanced in the third quarter of 2009 by segmenting the commercial real estate loan pool into ten different sub-portfolios based on property type (For example: Retail, industrial/warehouse, mixed-use, multi-family, hotel/motel, etc.). This enhanced stratification allows the bank to achieve more granularity in the historical loss data analyzed, which ultimately provides a more accurate and specific calculation of reserve requirements. Loss experience is quantified for the most recent 12 quarters, and that loss experience is applied to the stratified portfolio at each quarter end. In the current environment, the loss experience of the most recent four quarters is given more weight in determination of the loss experience factor to be applied to the portfolio. In addition to the quantitative analysis, a qualitative analysis is performed each quarter to provide additional loss allowances for various factors that have a bearing in the loss content in the portfolio. See **Financial Condition Allowance for Loan Losses Methodology** for a more detailed description of our loan loss methodology.

Impaired loans as defined by FASB ASC 310-10-35, **Accounting by Creditors for Impairment of a Loan** totaled \$120.5 million and \$50.3 million, respectively as of December 31, 2009 and December 31, 2008, with specific allowances of \$19.8 million and \$15.0 million, respectively. Management and the Loan and Credit Policy Committee (**LCPC**) of the Bank review the adequacy of the allowance for loan losses at least quarterly. Based upon these evaluations, and internal and external reviews of the overall quality of our loan portfolio, management and the LCPC believe that the allowance for loan losses was adequate to absorb estimated probable incurred losses inherent in the loan portfolio as of December 31, 2009. However, no assurances can be given that the Bank will not experience further losses in excess of the allowance, which may require additional future provisions for loan losses

The following table illustrates total delinquent loans and watch list loans as of the dates indicated:

DELINQUENT LOANS BY TYPE*	12/31/2009	12/31/2008	12/31/2007	12/31/2006	12/31/2005

Allowance for loan losses to nonperforming loans	115%	116%	121%	584%	321%
Allowance for Loan Losses Methodology					

We maintain an allowance for loan losses to provide for estimated probable losses that are inherent in our loan portfolio. The allowance is based on our regular quarterly assessments. Our methodologies for measuring the appropriate level of the allowance include the combination of: (1) a quantitative historical loss migration Analysis (Migration Analysis) for pools of loans, and a qualitative analysis of subjective factors and (2) a specific allowance method for impaired loans.

Table of Contents

The following table reflects our allocation of the allowance for loan losses by loan category and the ratio of each loan category to total loans as of the dates indicated:

Loan Type	Allocation of Allowance for Loan Losses			
	12/31/2009		12/31/2008	
	Amount	%	Amount	%
	(Dollars in thousands)			
Residential real estate	\$ 18	0%	\$ 27	0%

Consumer and other	940	1%	821	1%
Unallocated	443	N/A	319	N/A
Total	\$ 59,424	100%	\$ 43,419	100%

The adequacy of the allowance for loan losses is determined by management based upon an evaluation and review of the credit quality of the loan portfolio, consideration of historical loan loss experience, relevant internal and external factors that affect the collection of a loan, and other pertinent factors.

The Migration Analysis is a formula methodology based on the Bank's actual historical net charge-off experience for each loan pool and loan risk grade (Pass, Special Mention, Substandard and Doubtful). The migration analysis is centered on the Bank's internal credit risk rating system. Our internal loan review and external contracted credit review examinations are used to determine and validate loan risk grades. This credit review system takes into consideration factors such as: borrower's background and experience; historical and current financial condition; credit history and payment performance; economic conditions and their impact on various industries; type, fair value and volatility of the fair value of collateral; lien position; and the financial strength of any guarantors.

To calculate the various loss allocation factors, we utilize a twelve-quarter rolling average of historical losses based on specific charge-offs and recoveries incurred within each loan pool type over the prior three-year time period. We then apply this loss ratio to current loan balances to determine the estimated credit losses for non-classified and classified loans within each loan pool type. Also, in order to reflect the impact of recent loss and recovery trends more heavily, the twelve-quarter rolling average has been weighted. The most recent four quarters have been assigned a 67% weighted average while the prior four quarters have been assigned a 27% weighted average and the oldest four quarters have been assigned a 6% weighted average.

Additionally, in order to systematically quantify the credit risk impact of other trends and changes within the loan portfolio, the Bank utilizes qualitative adjustments to the Migration Analysis within established parameters. The parameters for making adjustments are established under a Credit Risk Matrix that provides seven possible scenarios for each of the factors below. The matrix allows for up to three positive/decrease (Major, Moderate, and Minor), three negative/increase (Major, Moderate, and Minor), and one neutral credit risk scenarios within each factor for each loan type pool. Generally, the factors are considered to have no significant impact (neutral) to our historical migration ratios. However, if information exists to warrant adjustment to the Migration Analysis, changes are made in accordance with the established parameters supported by narrative and/or statistical analysis. The Credit Risk Matrix and the seven possible scenarios enable the Bank to qualitatively adjust the Loss Migration Ratio by as much as 50 basis points in either direction (positive or negative) for each loan type pool. This matrix considers the following nine factors, which are patterned after the guidelines provided under the FFIEC Interagency Policy Statement on the Allowance for Loan and Lease Losses:

Changes in lending policies and procedures, including underwriting standards and collection, charge-off, and recovery practices.

Table of Contents

Changes in national and local economic and business conditions and developments, including the condition of various market segments.

Changes in the nature and volume of the loan portfolio.

Changes in the experience, ability, and depth of lending management and staff.

Changes in the trends of the volume and severity of past due and classified loans; and changes in trends in the volume of non-accrual loans and troubled debt restructurings, and other loan modifications.

Changes in the quality of our loan review system and the degree of oversight by the Directors.

Changes in the value of underlying collateral for collateral-dependent loans.

The existence and effect of any concentrations of credit, and changes in the level of such concentrations.

The effect of external factors such as competition and legal and regulatory requirements on the level of estimated losses in our loan portfolio.

We also establish specific loss allowances for loans where we have identified potential credit risk conditions or circumstances related to a specific individual credit. The specific allowance amounts are determined by a method prescribed by FASB ASC 310-10-35-22, *Measurement of Impairment*. The loans identified as impaired will be accounted for in accordance with one of the three acceptable valuations: 1) the present value of future cash flows discounted at the loan's effective interest rate; 2) the loan's observable market price; or 3) the fair value of the collateral, if the loan is collateral dependent.

The Bank considers a loan to be impaired when it is probable that not all amounts due (principal and interest) will be collectible in accordance with the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. The significance of payment delays and payment shortfalls is determined on a case-by-case basis by taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed.

For commercial and industrial loans, real estate loans and certain consumer loans, we base the measurement of loan impairment on the present value of the expected future cash flows, discounted at the loan's effective interest rate or on the fair value of the loan's collateral if the loan is collateral dependent. We evaluate most consumer loans for impairment on a collective basis, because these loans have generally smaller balances and are homogeneous in the underwriting terms and conditions, and to the type of collateral. If a loan is deemed to be impaired, the amount of the impairment is supported by a specific allowance amount which is included in the allowance for loan losses through a charge to the provision for loan losses.

Investment Security Portfolio

The main objectives of our investment strategy are to provide a source of liquidity while managing our interest rate risk, and to generate an adequate level of interest income without taking undue risks. Our investment policy permits investments in various types of securities, certificates of deposits and federal funds sold in compliance with various restrictions in the policy. Securities are classified as held to maturity or available for sale. We do not maintain a trading portfolio. The securities which we have the ability and intent to hold to maturity are classified as held to maturity securities. All other securities are classified as available for sale.

Edgar Filing: NARA BANCORP INC - Form 10-K

Our available-for-sale securities totaled \$782.7 million at December 31, 2009, compared to \$406.6 million at December 31, 2008. We had no securities in the held to maturity category at December 31, 2009 or 2008. During 2009, \$135.6 million in mortgage related securities were paid down, \$235.3 million in securities were sold, \$24.6 million in securities were either called or matured, and \$787.8 million were purchased. All of the

Table of Contents

securities involved in these transactions were classified as available for sale. Securities with an amortized cost of \$2.0 million were pledged to the Federal Reserve Board as required or permitted by law at December 31, 2009. We also pledged \$237.6 million in securities to the California State Treasurer's Office as deposit collateral for time certificates deposit. Our investment portfolio consists of government sponsored enterprise bonds, mortgage backed securities, CMOs, mutual funds, and corporate notes.

The following table summarizes the amortized cost, estimated fair value and maturity distribution of our investment securities portfolio as of dates indicated

	46	\$ 230,991	\$ (2,554)	7	\$ 31,977	\$ (1,733)	53	\$ 262,968	\$ (4,287)	

We evaluate securities for other-than-temporary impairment on at least a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the financial condition and near-term prospects of the issuer; the length of time and the extent to which the fair value has been less than cost, and our intention to sell, or it is more likely than not that we will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. In analyzing an issuer's financial condition, we consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and the results of reviews of the issuer's financial condition.

The corporate note consists of one bond with an amortized cost of \$4.5 million and an unrealized loss of \$1.0 million at December 31, 2009. The bond is scheduled to mature in May 2047, with a first call date option in May 2012. Management determined this unrealized loss did not meet the criteria other-than-temporary impairment at December 31, 2009 as the investment is rated investment grade and there are no credit quality concerns of the obligor. The fair value decline is deemed to be due to the current market volatility and is not reflective of management's expectations of their ability to fully recover this investment. Interest on the corporate note has been paid as agreed and management believes this will continue in the future and the bond will be repaid in full as scheduled. For these reasons, no other-than-temporary impairment was recognized on the corporate note at December 31, 2009.

As noted above, we consider the losses on our investments in an unrealized loss position at December 31, 2009 to be temporary based on: 1) the likelihood of recovery; 2) the information relative to the extent and duration of the decline in fair value; and 3) the Company does not intend to sell these securities at losses, and it is more likely than not that the Company will not be required to sell these securities before anticipated recovery.

Deposits

Deposits are our primary source of funds for making loans and investment activities. We offer a wide variety of deposit account products to commercial and consumer customers. Total deposits increased \$495.6 million, or 26%, to \$2.43 billion at December 31, 2009 compared to \$1.94 billion at December 31, 2008.

The increase in deposits during 2009 was primarily attributable to an increase in interest bearing demand deposits and jumbo time deposits. The deposit campaign to the non-Korean markets during the first quarter of 2009 which extended into the second quarter was very successful in bringing in those deposits. In addition, the Fort Lee, New Jersey branch was successful in raising \$222.5 million in total deposits since it opened for operation in April of 2009. The increase was partially offset by a decrease in wholesale deposits of \$294.1 million. Brokered deposits were paid off as retail deposits grew significantly during the year. Retail deposits totaled \$2.23 billion at December 31, 2009, an increase of \$781.6 million, or 54%, from \$1.43 billion at

Table of Contents

December 31, 2008. Interest-bearing demand deposits, including money market and Super Now accounts, totaled \$524.2 million at December 31, 2009, an increase of \$217.7 million, or 71%, from \$306.5 million at December 31, 2008. Total jumbo time deposits were \$932.7 million, an increase of \$305.8 million, or 49%, from \$626.9 million at December 31, 2008.

The growth in time deposits during the first and second quarter of 2009 was primarily 12-month CDs that were issued at a rate of 2.85% for non-jumbo deposits and 3.10% for jumbo deposits. These deposits will begin to mature in March 2010, with approximately \$313.7 million maturing in March 2010, \$207.6 million maturing in April 2010 and \$204.0 million in May 2010. Retention goals, plans and funding strategies have been developed to accommodate these maturing CDs, however no assurance can be given as to the retention percentage of these deposits.

Although our deposits may vary with local and national economic conditions, we do not believe that our deposits are seasonal in nature. The following table sets forth information for the periods indicated and the balances of our deposits by category.

	2009		December 31, 2008		2007

Borrowings

We utilize a combination of short-term and long-term borrowings to help manage our liquidity position.

Federal Funds Purchased

Federal funds purchased generally mature within one to three business days from the transaction date. At December 31, 2009, we did not have any federal funds purchased.

FHLB Advances

We may borrow from the FHLB on a longer term basis to provide funding for certain loan or investment securities strategies, as well as for asset liability management strategies. As of December 31, 2009 and 2008, FHLB advances totaled \$350 million. \$340 million of these advances have remaining maturity terms ranging from one year to seven years and fixed rates ranging from 1.68% to 4.57%. The remaining \$10 million of advances will mature in January 2010 and have rates of 3.18% and 3.35%. The weighted average rate for FHLB advances was 3.46% at year-end 2009, compared to 3.70% at year-end 2008. See Note 7 of Notes to Consolidated Financial Statements for more detailed information on FHLB advances.

Subordinated Debentures

At December 31, 2009, five wholly owned subsidiary grantor trusts established by us had issued \$38 million of pooled Trust Preferred Securities (Trust Preferred Securities). The Trust Preferred Securities accrue and pay distributions periodically at specified annual rates as provided in the related indentures for the securities. The trusts used the net proceeds from the offering to purchase a like amount of subordinated debentures (the Debentures) issued by us. The Debentures are the sole assets of the trusts. Our obligations under Debentures and related documents, taken together, constitute a full and unconditional guarantee by us of the obligations of the trusts. The Trust Preferred Securities are mandatorily redeemable upon the maturity of the Debentures, or upon earlier redemption as provided in the indentures. We have the right to redeem the Debentures in whole (but not in part) on or after specific dates, at a redemption price specified in the indentures plus any accrued but unpaid interest to the redemption date. We have agreed not to pay interest on the Debentures or to issue any additional trust preferred securities without the prior written approval of the FRB.

With the adoption of FASB ASC 810, we deconsolidated the five grantor trusts. As a result, the Debentures issued by us to the grantor trusts, totaling \$39.3 million, are reflected in our consolidated statements of financial condition in the liabilities section at December 31, 2009 and 2008, under the caption subordinated debentures. We record interest expense on the corresponding subordinated debentures in the consolidated statements of income. We also recorded \$1.49 million and \$1.51 million in other assets in the consolidated statements of financial condition at December 31, 2009 and 2008, respectively, for the common capital securities issued by the issuer trusts held by us.

Table of Contents

The following table summarizes our outstanding Debentures related to the trust preferred securities at December 31, 2009.

(Dollars in thousands)

TRUST NAME	ISSUANCE DATE	AMOUNT	PRINCIPAL BALANCE OF DEBENTURES	STATED MATURITY	ANNUALIZED COUPON RATE	RATE AT 12/31/2009	INTEREST DISTRIBUTION DATES
Nara Bancorp Capital Trust I	3/28/2001	\$ 10,000	\$ 10,400	6/8/2031	10.18%	10.18%	June 8 and December 8
Nara Capital Trust III	6/5/2003	\$ 5,000	\$ 5,155	6/15/2033	3 month LIBOR + 3.15%	3.40%	Every 15 th of March, June, September, and December
Nara Statutory Trust IV	12/22/2003	\$ 5,000	\$ 5,155	1/7/2034	3 month LIBOR + 2.85%	3.13%	Every 7 th of January, April, July and October

Total Trust		\$ 38,000	\$ 39,268				

The Debentures are not redeemable prior to June 8, 2011 with respect to Nara Bancorp Capital Trust I, March 15, 2010 with respect to Nara Capital Trust III, January 7, 2010 with respect to Nara Statutory Trust IV, March 17, 2010 with respect to Nara Statutory Trust V, and March 15, 2012 with respect to Nara Statutory Trust VI, unless certain events have occurred.

Capital Resources

Historically, our primary source of capital has primarily been the retention of earnings, net of dividend payments to shareholders. We seek to maintain capital at a level sufficient to assure our stockholders, our customers, and our regulators that our company and our bank subsidiary are financially sound. For this purpose, we perform ongoing assessments of our components of capital as well as projected sources and uses of capital in conjunction with projected increases in assets and levels of risks. We have considered, and we will continue consider, additional sources of capital as needs arise, through the issuance of additional stock or debt. Based on the Board of Directors analysis of our capital needs (including any needs arising out of our financial condition and results of operations) and the input of our regulators, we could determine, or our regulators could require us to raise additional capital.

On November 21, 2008, Nara Bancorp issued 67,000 shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series A (the Senior Preferred Stock), having a liquidation preference of \$1,000 per share, together with a ten-year warrant to purchase 1,042,531 of Nara Bancorp common stock at an exercise price of \$9.64 per share, to the United States Department of the Treasury for gross proceeds of \$67 million. The sale of the Senior Preferred Stock was made pursuant to the Treasury Department's TARP Capital Purchase Program established by the Treasury Department. The warrant was reduced to 521,266 shares upon completion of qualified stock offering in November, 2009.

On October 27, 2009, we raised additional capital of approximately \$82.0 million, net of costs, through an issuance of 11.5 million shares of our common stocks at \$7.50 per share.

Table of Contents

Our total stockholders' equity increased \$78.0 million, or 27%, to \$368.0 million at December 31, 2009 from \$290.0 million at December 31, 2008. At December 31, 2009, our Tier I Capital, defined as stockholders' equity less intangible assets, plus proceeds from the trust preferred securities, was \$399.4 million, compared to \$324.9 million at December 31, 2008. The increase was primarily due to the additional capital raised during 2009, partially offset by a net loss of \$5.7 million and \$3.3 million in preferred stock dividends for 2009. At December 31, 2009, Nara Bancorp's ratio of total capital to total risk-weighted assets ratio was 17.99%, Tier I Capital to total risk weighted assets ratio was 16.73% and Tier I leverage ratio was 12.36%.

At December 31, 2009, the Bank's total capital to total risk-weighted assets ratio was 17.30%, the Tier I Capital to total risk weighted assets ratio was 16.03% and its Tier I leverage ratio was 11.78%.

The following tables compare Nara Bancorp's and the Bank's actual capital at December 31, 2009 to those required by our regulatory agencies for capital adequacy classification purposes:

	As of December 31, 2009 (Dollars in thousands)					
	Actual		Required		Excess	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Nara Bancorp, Inc						
Tier 1 capital to total assets	\$ 399,447	12.4%	\$ 129,248	4.0%	\$ 270,199	8.4%
Tier 1 risk-based capital ratio	\$ 399,447	16.7%	\$ 95,524	4.0%	\$ 303,923	12.7%
Total risk-based capital ratio	\$ 429,666	18.0%	\$ 191,048	8.0%	\$ 238,618	10.0%

	As of December 31, 2009 (Dollars in thousands)					
	Actual		Required		Excess	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Nara Bank						
Tier I capital to total assets	\$ 382,081	11.8%	\$ 129,841	4.0%	\$ 252,240	7.8%
Tier 1 risk-based capital ratio	\$ 382,081	16.0%	\$ 95,399	4.0%	\$ 286,682	12.0%
Total risk-based capital ratio	\$ 412,261	17.3%	\$ 190,799	8.0%	\$ 221,462	9.3%

Liquidity Management

Liquidity risk is the risk of reduction in our earnings or capital that would result if we were not able to meet our obligations when they come due without incurring unacceptable losses. Liquidity risk includes the risk of unplanned decreases or changes in funding sources and changes in market conditions that affect our ability to liquidate assets quickly and with minimum loss of value. Factors considered in liquidity risk management are the stability of the deposit base; the marketability, maturity, and pledging of our investments; the availability of alternative sources of funds; and our demand for credit.

The objective of our liquidity management is to have funds available to meet cash flow requirements arising from fluctuations in deposit levels and the demands of daily operations, which include funding of securities purchases, providing for customers' credit needs, and ongoing repayment of borrowings.

We manage our liquidity actively on a daily basis and it is reviewed periodically by our management-level Asset/Liability Management Committee and the Asset Liability Management Committee of the Board of Directors. This process is intended to ensure the maintenance of sufficient funds to meet our liquidity needs, including adequate cash flow for off-balance-sheet commitments. In general, our liquidity is managed daily by controlling the level of federal funds and the funds provided by cash flow from operations. To meet unexpected demands, lines of credit are maintained with the Federal Home Loan Bank and the Federal Reserve Bank. The sale of investment securities also serves as a source of funds.

Our primary sources of liquidity are derived from financing activities, which include customer and broker deposits, federal funds facilities, and advances from the Federal Home Loan Bank of San Francisco. These funding sources are augmented by payments of principal and interest on loans, proceeds from sales of loans and

Table of Contents

the liquidation or sale of securities from our available for sale portfolio. Primary uses of funds include withdrawal of and interest payments on deposits, originations of loans, purchases of investment securities, and payment of operating expenses.

Net cash inflows from operating activities totaled \$57.5 million, \$32.2 million and \$35.5 million during 2009, 2008 and 2007, respectively. Net cash inflows from operating activities for 2009 were primarily attributable to proceeds from sales of loans during 2009.

Net cash outflows from investing activities totaled \$554.1 million, \$252.1 million and \$406.9 million during 2009, 2008 and 2007, respectively. Net cash outflows for investing activities for those periods were attributable primarily to the growth in our loan portfolio and purchases of securities available for sale. These activities were partially offset by payments of principal and interest on loans, and by maturities, payments and net sales proceeds from loans and from investment securities available-for-sale.

Net cash inflows from financing activities totaled \$573.1 million, \$219.8 million and \$339.7 million during 2009, 2008 and 2007, respectively. Net cash inflows from financing activities for those periods were attributable primarily to growth in deposits and the issuance of additional common stock.

When we have more funds than required for our reserve requirements or short-term liquidity needs, we sell federal funds to other financial institutions. Conversely, when we have less funds than required, we may borrow funds from the FHLB or the FRB. The maximum amount that we currently are available to borrow on an overnight basis from the FHLB and the FRB is \$452.3 million. The Federal Home Loan Bank System functions as a line of credit facility for qualifying financial institutions. As a member, we are required to own capital stock in the Federal Home Loan Bank of San Francisco and may apply for advances from the FHLB utilizing as collateral, qualifying mortgage loans and certain securities as collateral for these advances. The Federal Home Loan Bank of San Francisco has suspended dividends beginning with the fourth quarter of 2008 to preserve capital and they have ceased redemptions of outstanding stock until further notice.

At times we maintain a portion of our liquid assets in interest-bearing cash deposits with other banks, in overnight federal funds sold to other banks, and in investment securities available-for-sale that are not pledged. Our liquid assets, consisting of cash and cash equivalent, interest-bearing cash deposits with other banks, overnight federal funds sold to other banks, investment securities available for sale that are not pledged, and loan repayments within 30 days, were \$690.0 million at December 31, 2009 compared to \$204.9 million at December 31, 2008. Cash and cash equivalents, including federal funds sold were \$125.6 million at December 31, 2009, compared to \$49.1 million at December 31, 2008. See *Financial Condition Deposits* for a discussion of liquidity plan for maturing CDs.

Because our primary sources and uses of funds are deposits and loans, the relationship between gross loans and total deposits provides one measure of our liquidity. Typically, the closer the ratio of loans to deposits is to or exceeds 100%, the more we rely on borrowings and other sources to provide liquidity. Alternative sources of funds such as FHLB advances and brokered deposits and other collateralized borrowings that provide liquidity as needed from diverse liability sources are an important part of our asset/liability management strategy. For 2009, our gross loan to deposit ratio averaged 93%, compared to an average ratio of 113% for 2008 and an average ratio of 106% for 2007.

Off-Balance- Sheet Activities and Contractual Obligations

The Bank routinely engages in activities that involve, to varying degrees, elements of risk that are not reflected, in whole or in part, in the consolidated financial statements. These activities are part of our normal course of business and include traditional off-balance-sheet credit-related financial instruments, interest rate swap contracts, operating leases and long-term debt.

Traditional off-balance-sheet credit-related financial instruments are primarily commitments to extend credit and standby letters of credit. These activities could require us to make cash payments to third parties in the

Table of Contents

event certain specified future events occur. The contractual amounts represent the extent of our exposure in these off-balance-sheet activities. However, since certain off-balance-sheet commitments, particularly standby letters of credit, are expected to expire or be only partially used, the total amount of commitments does not necessarily represent future cash requirements. These activities are necessary to meet the financing needs of our customers.

The Bank also enters into interest rate swap and cap contracts where we are required to either receive cash from or pay cash to counterparties depending on changes in interest rates. We utilize interest rate swap and cap contracts to help manage the risk of changing interest rates. Our accounting for interest rate swap and cap contracts is discussed below under Item 7A.

We do not anticipate that our current off-balance-sheet activities will have a material impact on our future results of operations or financial condition. Further information regarding our financial instruments with off-balance-sheet risk can be found in Note 12 of the Notes to Consolidated Financial Statements and in Item 7A Quantitative and Qualitative Disclosures about Market Risk.

We lease our banking facilities and equipment under non-cancelable operating leases with the remaining terms up to 10 years. Our facility lease obligations are discussed in Note 12 of the Notes to Consolidated Financial Statements.

The following table shows our contractual obligations and commitments as of December 31, 2009.

	Total	Payments due by period			
		Less than 1 year	1-3 years	3-5 years	Over 5 years
Contractual Obligations and Commitments					
Time Deposits	\$ 1,442,709	\$ 1,412,500	\$ 30,209	\$	\$
Subordinated Debentures	39,268				39,268
Federal Home Loan Bank Borrowings	350,000	35,000	171,000	139,000	5,000
Operating Lease Obligations	44,833	6,986	12,451	11,748	13,648
Unused commitments to extend credit	198,807	184,724	9,865	387	3,831
Standby letters of credit	9,907	9,716	191		
Other commercial letters of credit	23,575	23,575			
Total	\$ 2,109,099	\$ 1,672,501	\$ 223,716	\$ 151,135	\$ 61,747

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The objective of our asset and liability management activities is to improve our earnings by adjusting the type and mix of assets and liabilities to effectively address changing conditions and risks. Through overall management of our balance sheet and by controlling various risks, we seek to optimize our financial returns within safe and sound parameters. Our operating strategies for attaining this objective include managing our net interest margin through appropriate risk/return pricing of assets and liabilities and emphasizing growth in retail deposits, as a percentage of interest-bearing liabilities, to reduce our cost of funds. We also seek to improve earnings by controlling non-interest expense, and enhancing non-interest income. We use risk management instruments to modify interest rate characteristics of certain assets and liabilities to hedge against our exposure to interest rate fluctuations, reducing the effects these fluctuations might have on associated cash flows or values. We also perform periodic internal analyses to measure, evaluate and monitor market risk.

Interest Rate Risk

Market risk is the risk of loss to future earnings, to the fair value of our assets and liabilities, or to future cash flows that may result from changes in the price of a financial instrument. Interest rate risk is the most significant market risk impacting us. Interest rate risk occurs when interest rate sensitive assets and liabilities do

Table of Contents

not reprice simultaneously or at the same rate of interest or in equal volume. A key objective of our asset and liability management is to manage interest rate risk associated with changing asset and liability cash flows, values of our assets and liabilities, and market interest rate movements. The management of our interest rate risk is governed by policies reviewed and approved annually by the Board of Directors of the Bank. The Board delegates responsibility for interest rate risk management to the Asset/Liability Management (ALM) Committee of the board and the Asset and Liability Management Committee (ALCO), which is composed of the Bank's senior executives and other designated officers.

The fundamental objective of our ALCO is to manage our exposure to interest rate fluctuations while maintaining adequate levels of liquidity and capital. ALCO meets regularly to monitor the interest rate risk, the sensitivity of our assets and liabilities to interest rate changes, the book and fair values of assets and liabilities, and our investment activities and directs changes in the composition of our interest earning assets and interest bearing liabilities. ALCO reports at least quarterly to the ALM Committee of the board. Our strategy has been to reduce the sensitivity of our earnings to interest rate fluctuations by more closely matching the effective maturities or repricing characteristics of our assets and liabilities. Certain assets and liabilities, however, may react in different degrees to changes in market interest rates. Further, interest rates on certain types of assets and liabilities may fluctuate prior to changes in market interest rates, while interest rates on other types may lag behind. We consider the anticipated effects of these factors when implementing our interest rate risk management objectives.

Swaps and Caps

As part of our asset and liability management strategy, we may enter into derivative financial instruments, such as interest rate swaps, caps and floors, with the overall goal of minimizing the impact of interest rate fluctuations on our net interest margin. Interest rate swaps and caps involve the exchange of fixed-rate and variable-rate interest payment obligations without the exchange of the underlying notional amounts.

Interest rate swap information at December 31, 2009 is summarized as follows:

(In thousands)

Notional Amount	Floating Rate	December 31, 2009		Fair Value
		Fixed Rate (Dollars in thousands)	Maturity Date	
\$10,000	6 Mo. LIBOR	3.57%	01/14/2010	\$ (129.1)
10,000	6 Mo. LIBOR	3.57%	01/14/2010	(129.1)
10,000	6 Mo. LIBOR	3.57%	01/14/2010	(129.1)
10,000	6 Mo. LIBOR	3.57%	01/14/2010	(129.1)
10,000	6 Mo. LIBOR	3.57%	01/14/2010	(129.1)
\$50,000				\$ (645)

As of December 31, 2009, the fair value of the outstanding interest rate swaps was (\$645 thousand) and was recognized as a loss under non-interest income. During January 2008, the Company terminated the \$50 million of interest rate swaps that were outstanding at December 31, 2007. The gain of \$247,000, net of tax, on termination of the swaps is being amortized into income over the remaining life of the swap. \$84 thousand, net of tax of \$56 thousand, was recognized in income during 2009

During the third quarter of 2009, we entered into two interest cap agreements with an aggregate notional amount of \$50 million. Under these cap agreements, we receive quarterly payments from the counterparty when the quarterly resetting 3 Month London-Interbank Offered Rate (3 Mo. LIBOR) exceeds the strike level of 2.00%. The upfront fee paid to the counterparty in entering into these two interest rate cap agreements was \$359 thousand. These interest rate cap agreements are considered free-standing due to non-designation of a hedge

Table of Contents

relationship to any of its financial assets or liabilities. Under FASB ASC 815, valuation gains or losses on interest rate caps not designated as hedging instruments are recognized in earnings. At December 31, 2009, the fair value of the outstanding interest rate caps was \$177 thousand and we recognized mark-to-market losses on valuation of \$181 thousand for 2009.

Interest Rate Sensitivity

Our monitoring activities related to managing interest rate risk include both interest rate sensitivity gap analysis and the use of a simulation model. While traditional gap analysis provides a simple picture of the interest rate risk embedded in the statement of financial condition, it provides only a static view of interest rate sensitivity at a specific point in time and does not measure the potential volatility in forecasted results relating to changes in market interest rates over time. Accordingly, we combine the use of gap analysis with the use of a simulation model, which provides a dynamic assessment of interest rate sensitivity.

The interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets anticipated to reprice within a specific time period and the amount of interest-bearing liabilities anticipated to reprice within that same time period. A gap is considered positive when the amount of interest rate sensitive assets repricing within a specific time period exceeds the amount of interest-bearing liabilities repricing within that same time period. A positive cumulative gap suggests that earnings will increase when interest rates rise and decrease when interest rates fall. A negative cumulative gap suggests that earnings will increase when interest rates fall and decrease when interest rates rise.

The following table illustrates our combined asset and liability repricing as of December 31, 2009:

	0 - 90 days or Less	Over 90 Days to 365 days	1 - 5 years Amount	Over 5 years Amount	Total
	(Dollars in thousands)				
Total Investments ⁽¹⁾	\$ 198,292	\$ 124,748	\$ 349,746	\$ 236,810	\$ 909,596
Total Loans ⁽²⁾	982,388	165,834	849,000	218,820	2,216,042
Rate Sensitive Assets	1,180,680	290,582	1,198,746	455,630	3,125,638
TCD \$100,000 or more	540,868	388,814	3,017		932,699
TCD under \$100,000	198,991	283,827	27,192		510,010
Money Market accounts and other	524,188				524,188
Savings accounts	87,312	22,708	24,789	1,995	136,804
Borrowings from FHLB & Other	10,000	25,000	310,000	5,000	350,000
Subordinated Debentures	28,000			10,000	38,000
Rate Sensitive Liabilities	1,389,359	720,349	364,998	16,995	2,491,701
Interest Rate Cap	50,000		(50,000)		
Net Gap Position	\$ (158,679)	\$ (429,767)	\$ 783,748	\$ 438,635	
Cumulative Gap Position	\$ (158,679)	\$ (588,446)	\$ 195,302	\$ 633,937	

⁽¹⁾ Includes investment securities, federal funds sold, FRB stock, FHLB stocks, and interest bearing deposits with other financial institutions.

⁽²⁾ Includes loans held for sale of \$4.8 million, but excludes the guaranteed portion of delinquent SBA loans of \$12.5 million.

The simulation model discussed above provides our ALCO with the ability to simulate our net interest income. In order to measure, at December 31, 2009, the sensitivity of our forecasted net interest income to changing interest rates, both in rising and falling interest rate scenarios, were projected and compared to base market interest rate forecasts. One application of our simulation model measures the impact of market interest rate changes on the net present value of estimated cash flows from our assets and liabilities, defined as our

Table of Contents

market value of equity. This analysis assesses the changes in market values of interest rate sensitive financial instruments that would occur in response to an instantaneous and sustained increase in market interest rates.

Our net interest income and market value of equity exposure related to these hypothetical changes in market interest rates are illustrated in the following table.

Simulated Rate Changes	December 31, 2009		December 31, 2008	
	Estimated Net Interest Income Sensitivity	Market Value Of Equity Volatility	Estimated Net Interest Income Sensitivity	Market Value Of Equity Volatility
+ 200 basis points	(6.47)%	(10.29)%	3.36%	(9.04)%
+ 100 basis points	(4.06)%	(4.31)%	1.83%	(3.97)%
- 100 basis points	2.35%	1.89%	(2.29)%	3.22%
- 200 basis points	(1.61)%	1.77%	(8.61)%	3.51%

The estimated sensitivity does not necessarily represent our forecast of future results and the estimated results may not be indicative of actual changes to our net interest income. These estimates are based upon a number of assumptions including: the nature and timing of interest rate levels including yield curve shape, prepayment on loans and securities, pricing strategies on loans and deposits, and replacement of asset and liability cash flows. While the assumptions used are based on current economic and local market conditions, there is no assurance as to the predictive nature of these conditions including how customer preferences or competitor influences may change. The Board ALM Committee, which oversees the Company's interest rate risk management, has established the exposure limits for acceptable changes in net interest income and market value of equity related to these hypothetical changes in market interest rates. Given the limitations of the analyses, management believes that these hypothetical changes are considered tolerable and manageable as of December 31, 2009.

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The following Consolidated Financial Statements of the Company, together with the reports thereon of Crowe Horwath LLP, begin at page F-1 of this Report and are incorporated herein by reference:

Report of Independent Registered Public Accounting Firm

Consolidated Statements of Financial Condition as of December 31, 2009 and 2008

Consolidated Statements of Income for the Years Ended December 31, 2009, 2008 and 2007

Consolidated Statements of Changes in Stockholders' Equity for the Years Ended December 31, 2009, 2008 and 2007

Consolidated Statements of Cash Flows for the Years Ended December 31, 2009, 2008 and 2007

Notes to Consolidated Financial Statements for the Years Ended December 31, 2009, 2008 and 2007

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

Table of Contents

Item 9A. CONTROLS AND PROCEDURES

a. Evaluation of disclosure controls and procedures

We conducted an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Interim Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of December 31, 2009. Based upon that evaluation, our Chief Executive Officer and Interim Chief Financial Officer determined that our disclosure controls and procedures were effective to ensure that material information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported as and when required. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments.

b. Management's Annual Report on Internal Control Over Financial Reporting

The management of Nara Bancorp, Inc. (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting for the Company as defined in Rule 13a-15(f) under the Exchange Act. This system, which management has chosen to base on the framework set forth in *Internal Control-Integrated Framework*, published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and which is effected by the Company's board of directors, management and other personnel, is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

The Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and the directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, a system of internal control over financial reporting can provide only reasonable assurance and may not prevent or detect misstatements. Further, because of changes in conditions, effectiveness of internal controls over financial reporting may vary over time.

With the participation of the Company's Chief Executive Officer and Interim Chief Financial Officer, management has conducted an evaluation of the effectiveness of the Company's system of internal control over financial reporting. Based on this evaluation, management determined that the Company's system of internal control over financial reporting was effective as of December 31, 2009.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Nara Bancorp, Inc.

Los Angeles, California

We have audited the accompanying consolidated statements of financial condition of Nara Bancorp, Inc. and Subsidiaries (the Company) as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2009. We also have audited the Company's internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting located in Item 9a of Form 10-K. Our responsibility is to express an opinion on these financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Nara Bancorp, Inc. and Subsidiaries as of December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2009 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2009, 2008 AND 2007

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation The accounting and reporting policies of Nara Bancorp, Inc. and Subsidiaries (the Company) are in accordance with accounting principles generally accepted in the United States of America and conform to practices within the banking industry. The consolidated financial statements include the accounts of Nara Bancorp, Inc. (Nara Bancorp) and its wholly owned subsidiaries, principally Nara Bank (the Bank). The consolidated financial statements also include the accounts of the Bank's wholly owned subsidiary, Nara Real Estate Trust, which was a Maryland real estate investment trust that held only loans secured by real estate. The subsidiary was dissolved in July, 2009. Nara Loan Center, a New Jersey corporation organized in 2000, was another subsidiary of the Bank until it was dissolved in April, 2008 after the acquisition of a branch office in New Jersey.

Nara Bancorp was formed as a holding company of the Bank and registered with the Securities and Exchange Commission under the Securities Act of 1933 on December 5, 2000. Effective February 2, 2001, upon consummation of the reorganization of the Bank into a holding company structure, each of the Bank's common shares at par value of \$3 was exchanged for one share of Nara Bancorp's common stock at par value of \$0.001. The reorganization was accounted for at historical cost in a manner similar to a pooling of interests.

The Bank, previously a national association, converted to a California state-chartered bank on January 3, 2005, and maintains 21 branch operations and one loan production office offering a full range of commercial banking and, to a lesser extent, consumer financial services to our customers, who typically are small- to medium-sized businesses and individuals in our market areas.

Cash Flows Cash and cash equivalents include cash and due from banks, interest-earning deposits, federal funds sold and term federal funds sold, which have original maturities less than 90 days. The Company is required to maintain reserve and clearing balances with the Federal Reserve Bank under the Federal Reserve Act. The reserve and clearing requirement balance was approximately \$22.5 million at December 31, 2009 and \$22.0 million at December 31, 2008. Net cash flows are reported for customer loan and deposit transactions, deferred income taxes and other assets and liabilities.

Securities Securities are classified into one of two categories and accounted for as follows:

- (i) Securities that the Company has the positive intent and ability to hold to maturity are classified as held to maturity and reported at amortized cost;
- (ii) Securities are classified as available for sale when they might be sold before maturity and are reported at fair value. Unrealized holding gains and losses are reported as a separate component of stockholders' equity in accumulated other comprehensive income (loss), net of taxes.

Accreted discounts and amortized premiums on securities are included in interest income using the interest method, and realized gains or losses related to sales of securities are calculated using the specific identification method, without anticipating prepayments, except for mortgage-backed securities where prepayments are expected.

Management evaluates securities for other than temporary impairment (OTTI) at least on a quarterly basis and more frequently when economic conditions warrant such evaluation.

Derivative Financial Instruments and Hedging Transactions As part of our asset and liability management strategy, we may enter into derivative financial instruments, such as interest rate swaps, caps and

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

floors, with the overall goal of minimizing the impact of interest rate fluctuations on our net interest margin. The Company's interest rate swaps and caps involve the exchange of fixed-rate and variable-rate interest payment obligations without the exchange of the underlying notional amounts and are therefore accounted for as stand-alone derivatives. Changes in the fair value of the stand-alone derivatives are reported in earnings as non-interest income. As part of the Company's overall risk management, the Company's Asset Liability Committee, which meets monthly, monitors and measures interest rate risk and the sensitivity of assets and liabilities to interest rate changes, including the impact of derivative transactions.

Loans Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of any unearned interest, deferred loan fees and costs, and an allowance for loan losses. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method without anticipating prepayments. Interest on loans is credited to income as earned and is accrued only if deemed collectible. A loan is placed on non-accrual status when it is 90 days or more delinquent, (unless it is well-secured and in the process of collection,) or if we believe that the collection is highly uncertain. Generally, payments received on non-accrual loans are recorded as principal reductions. Interest income on non-accrual loans is recognized after all principal has been repaid or an improvement in the condition of the loan has occurred that would warrant resumption of interest accruals.

Nonrefundable fees, net of certain direct costs, associated with the origination or acquisition of loans are deferred and recognized as an adjustment of the loan yield over the life of the loan. Other loan fees and charges, representing service costs for the prepayment of loans, for delinquent payments or for miscellaneous loan services, are recorded as income when collected.

SBA Loans Certain Small Business Administration (SBA) loans that the Company has the intent to sell prior to maturity have been designated as held for sale at origination and are recorded at the lower of cost or fair value, on an aggregate basis. A valuation allowance is established if the aggregate fair value of such loans is lower than their cost, and charged to earnings. SBA loan transfers are accounted for as sales when control over the loan has been surrendered. Control over such loans is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Loan Servicing Assets The Company typically sells the guaranteed portion of SBA loans and retains the unguaranteed portion (retained interest). A portion of the premium on sale of SBA loans is recognized as gain on sale of loans at the time of the sale by allocating the carrying amount between the asset sold and the retained interest, based on their relative fair values. The remaining portion of the premium is recorded as a discount on the retained interest and is amortized over the remaining life of the loan as an adjustment to yield. The retained interest, net of any discount, are included in loans receivable net of allowance for loan losses in the accompanying consolidated statements of financial condition.

Servicing assets are recognized when SBA loans are sold with servicing retained with the income statement effect recorded in gains on sales of SBA loans. Servicing assets are initially recorded at fair value based on the present value of the contractually specified servicing fee, net of servicing costs, over the estimated life of the loan, using a discount rate based on the related note rate, plus 1 to 2%. The Company's servicing costs approximates industry average servicing costs of 40 basis points. All classes of servicing assets are subsequently

measured using the amortization method which requires servicing rights to be amortized into non-interest income

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

in proportion to, and over the period of, the estimated future net servicing income of the underlying loans. The Company has capitalized \$200 thousand, \$765 thousand and \$2.2 million of servicing assets during 2009, 2008 and 2007, respectively, and amortized \$1.1 million, \$1.6 million and \$1.7 million during the years ended December 31, 2009, 2008 and 2007, respectively. The carrying amount of servicing assets was \$2.8 million and \$3.6 million at December 31, 2009 and 2008, respectively.

Management periodically evaluates servicing assets for impairment based upon the fair value of the rights as compared to carrying amount. Impairment is determined by stratifying rights into groupings based on predominant risk characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual grouping, to the extent that fair value is less than the carrying amount. If the Company later determines that all or a portion of the impairment no longer exists for a particular grouping, a reduction of the allowance may be recorded as an increase to income. At December 31, 2009, the fair value of servicing assets was determined using a weighted-average discount rate of 5.7% and prepayment speed of 14.7%. At December 31, 2008, the fair value of servicing assets was determined using a weighted-average discount rate of 7.4% and prepayment speed of 15.7%. The fair values of servicing assets were approximately \$4.5 million and \$5.0 million at December 31, 2009 and 2008, respectively, on serviced loans totaling \$239.8 million and \$273.8 million at December 31, 2009 and 2008 and is included in other assets. No impairment charges were required in 2009, 2008, or 2007.

The estimated annual amortization of servicing assets as of December 31, 2009, for each of the succeeding five fiscal years is indicated in the table below:

Year Ending December 31 (In thousands)	
2010	\$ 607
2011	487
2012	386
2013	302
2014	232
Thereafter	780
	\$ 2,794

Servicing fee income which is reported on the income statement as *Loan Servicing Fees, net* is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal; or a fixed amount per loan and are recorded as income when earned. The amortization of mortgage servicing rights is netted against loan servicing fee income. Servicing fees totaled \$2.6 million, \$3.0 million and \$2.8 million for the years ended December 31, 2009, 2008 and 2007, respectively. Late fees and ancillary fees related to loan servicing are not material.

Allowance for Loan Losses The allowance for loan losses is a valuation allowance for probable incurred credit losses that are inherent in the loan portfolio. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. Management estimates the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off.

Table of Contents

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In addition, the Company is subject to periodic examination by its federal and state examiners, and may be required by such regulators to recognize additions to the allowance for loan losses based on their assessment of credit information available to them at the time of their examinations.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired. The general component covers non-impaired loans and is based on historical loss experience adjusted for qualitative factors.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Loans, for which the terms have been modified, and for which the borrower is experiencing financial difficulties, may be considered troubled debt restructurings and classified as impaired. Factors considered by management in determining impairment include payment status, collateral values, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not deemed to be impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis by either the present value of expected future cash flows discounted at the loan's effective interest rate, or the fair value of the collateral if the loan is collateral dependent. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and residential loans for impairment disclosures.

The process of assessing the adequacy of the allowance for loan losses is necessarily subjective. Further, and particularly in terms of economic downturns, it is reasonably possible that future credit losses may exceed historical loss levels and may also exceed management's current estimates of incurred credit losses inherent within the loan portfolio. As such, there can be no assurance that future loan charge-offs will not exceed management's current estimate of what constitutes a reasonable allowance for loan losses.

Impairment losses are included in the allowance for loan losses through a charge to the provision for loan losses. Upon disposition of an impaired loan, any unpaid balance is charged off to the allowance for loan losses.

Concentration of Credit Risk Our loan portfolio is divided into three general markets: California, New York / New Jersey, and all other states. The California market represents the biggest credit market concentration (61.4%) followed by New York / New Jersey (25.2%) and All Other States (13.6%). Within the California market, most of our business activity is with customers located within Los Angeles County (30.9%). Therefore, the Company's exposure to credit risk is significantly affected by changes in the economy in the Los Angeles County area.

Within our CRE loan portfolio, the largest industry concentrations are hotel/motel (14.7%), gas stations (10.3%), multi-tenant retail building (9.4%), and mixed-use facilities (7.1%). Within our commercial and industrial loan portfolio, the largest industry concentrations are supermarkets (6.8%), wholesalers (4.3%), and manufacturing (2.6%).

Federal Home Loan Bank (FHLB) Stock The Bank is a member of the FHLB system. Members are required to own a certain amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. FHLB stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends are reported as income.

Table of Contents

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Premises and Equipment Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation on furniture, fixtures and equipment is computed on the straight-line method over the estimated useful lives of the related assets, which range from 3 to 5 years for furniture, fixtures and equipment.

Leasehold improvements are capitalized and amortized on the straight-line method over the term of the lease or the estimated useful lives of the improvements up to 40 years, whichever is shorter. An accelerated method of depreciation is followed, as appropriate, for federal income tax purposes.

Other Real Estate Owned Other real estate owned, which represents real estate acquired through foreclosure in satisfaction of commercial and real estate loans, is stated at fair value less estimated selling costs of the real estate. Loan balances in excess of the fair value of the real estate acquired at the date of acquisition are charged to the allowance for loan losses. Any subsequent operating expenses or income, reduction in estimated fair values, and gains or losses on disposition of such properties are charged or credited to current operations. The carrying amount of other real estate owned was \$2.0 million and \$3.0 million at December 31, 2009 and 2008.

Goodwill and Intangible Assets Goodwill resulting from business combinations prior to January 1, 2009 represents the excess of the purchase price over the fair value of the net assets of businesses acquired. Goodwill resulting from business combinations after January 1, 2009 is generally determined as the excess of the fair value of the consideration transferred, plus the fair value of any noncontrolling interests in the acquiree, over the fair value of the net assets acquired and liabilities assumed as of the acquisition date. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but tested for impairment at least annually. The Company has selected December 31 as the date to perform the annual impairment test. Intangible assets with definite useful lives are amortized over their estimated useful lives to their estimated residual values. Goodwill is the only intangible asset with an indefinite life on our balance sheet. The Company tested goodwill for impairment as of December 31, 2009 and 2008 noting no impairment of recorded goodwill.

Stock-Based Compensation Compensation cost is recognized for stock options and restricted stock awards issued to employees, based on the fair value of these awards at the date of grant. A Black-Scholes model is utilized to estimate the fair value of stock options, while the market price of the Company's common stock at the date of grant is used for restricted stock awards. Compensation cost is recognized over the required service period, generally defined as the vesting period. For awards with graded vesting, compensation cost is recognized on a straight-line basis over the requisite service period for the entire award.

Income Taxes Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred income tax assets and liabilities represent the tax effects, based on current tax law, of future deductible or taxable amounts attributable to events that have been recognized in the financial statements. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, the projected future taxable income and tax planning strategies in making this assessment. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

The Company adopted guidance issued by the FASB with respect to accounting for uncertainty in income taxes as of January 1, 2007. A tax position is recognized as a benefit only if it is more likely than not that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The

Table of Contents

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the more likely than not test, no tax benefit is recorded. The adoption had no effect on the Company's consolidated financial statements.

The Company recognizes interest and / or penalties related to income tax matters in income tax expense.

Employee Stock Ownership Plan (ESOP) Compensation expense is based on the market price of shares as they are committed to be released to participant accounts. Dividends on allocated ESOP shares reduce retained earnings.

Earnings per Common Share Basic Earnings per Common Share is computed by dividing net income (loss) available to common stockholders by the weighted-average number of common shares outstanding for the period. Allocated ESOP shares are considered outstanding for this calculation. Diluted Earnings per Common Share reflects the potential dilution of securities that could share in the earnings of the Company. Earnings and dividends per share are restated for all stock splits and stock dividends through the date of issuance of the financial statements.

Equity The Company accrues for preferred stock dividends as earned and for common stock dividends as declared. Preferred stock dividends of \$4.0 million and \$0 were paid in 2009 and 2008 and there were \$428,000 and \$372,000 of preferred stock dividends accrued but unpaid at December 31, 2009 and 2008, respectively. Common stock dividends declared but unpaid were \$722,000 at December 31, 2008. There were no common stock dividends declared during 2009. Accrued preferred and common stock dividends are included in other liabilities.

Bank Owned Life Insurance The Company has purchased life insurance policies on certain key executives and directors. Bank owned life insurance (BOLI) is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

Comprehensive Income Comprehensive income consists of net income and other comprehensive income (loss). Other comprehensive income (loss) includes unrealized gains and losses on securities available for sale, cash flow hedges, and interest-only strips which are also recognized as separate components of stockholders' equity, net of tax.

Loss Contingencies Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. Management believes there are no such matters that would have a material effect on the consolidated financial statements as of December 31, 2009 or 2008.

Fair Values of Financial Instruments Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in a separate note. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates.

Operating Segments Internal financial information is primarily reported and aggregated in three lines of business, banking, trade finance service, and SBA lending services.

Impairment of Long-Lived Assets The Company evaluates long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. If the

Table of Contents

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

estimated future cash flows (undiscounted) over the remaining useful life of the asset are less than the carrying value, an impairment loss would be recorded to reduce the related asset to its estimated fair value.

Use of Estimates in the Preparation of Consolidated Financial Statements The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are susceptible to change in the near term relate to the determination of the allowance and provision for loan losses, the evaluation of other than temporary impairment of investment securities, accounting for derivatives and hedging activities, determining the carrying value for cash surrender value of life insurance, disclosures about segment information, carrying value of goodwill and other intangible assets, accounting for deferred tax assets and related valuation allowances, the determination of the fair values of investment securities and other financial instruments, accounting for lease arrangements, accounting for incentive compensation, profit sharing and bonus payments and the valuation of servicing assets.

Reclassifications Some items in the prior year financial statements were reclassified to conform to the current presentation.

Recent Accounting Pronouncements

In September 2006, the FASB issued guidance that defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This guidance also establishes a fair value hierarchy about the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. The guidance was effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued guidance which delayed the effective date of this fair value guidance for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The adoption of this new guidance did not have a significant impact on the Company's consolidated results of operations or financial condition.

In March 2008, the FASB issued guidance which amends and expands the disclosure requirements for derivative instruments and hedging activities. The guidance requires qualitative disclosure about objectives and strategies for using derivative and hedging instruments, quantitative disclosures about fair value amounts of the instruments and gains and losses on such instruments, as well as disclosures about credit-risk features in derivative agreements. The guidance was effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The adoption of this standard did not have a material effect on the Company's consolidated results of operations or financial condition.

In June 2009, the FASB replaced *The Hierarchy of Generally Accepted Accounting Principles*, with the *FASB Accounting Standards Codification*[™] (the Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. Rules and interpretive releases of the Securities and Exchange Commission under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. The Codification was effective for financial statements issued for periods after September 15, 2009.

In April 2009, the FASB amended existing guidance for determining whether impairment is other-than-temporary for debt securities. This requires an entity to assess whether it intends to sell, or it is more likely than

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

not that it will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. If either of these criteria is met, the entire difference between amortized cost and fair value is recognized as impairment through earnings. For securities that do not meet the aforementioned criteria, the amount of impairment is split into two components as follows: 1) other-than-temporary impairment (OTTI) related to other factors, which is recognized in other comprehensive income and 2) OTTI related to credit loss, which must be recognized in the income statement. The credit loss is determined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis. Additionally, disclosures about other-than-temporary impairments for debt and equity securities were expanded. The guidance was effective for interim and annual reporting periods ending June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company adopted this guidance as of April 1, 2009. The adoption of this standard did not have a material effect on the Company's consolidated results of operations or financial condition.

In April 2009, the FASB issued guidance that emphasizes that the objective of a fair value measurement does not change even when market activity for the asset or liability has decreased significantly. Fair value is the price that would be received for an asset sold or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. When observable transactions or quoted prices are not considered orderly, then little, if any, weight should be assigned to the indication of the asset or liability's fair value. Adjustments to those transactions or prices would be needed to determine the appropriate fair value. The guidance, which was applied prospectively, was effective for interim and annual reporting periods ending after June 15, 2009 with early adoption for periods ending after March 15, 2009. The adoption of this standard did not have a material effect on the Company's consolidated results of operations or financial condition.

In August 2009, the FASB amended existing guidance for the fair value measurement of liabilities by clarifying that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using a valuation technique that uses the quoted price of the identical liability when traded as an asset, quoted prices for similar liabilities or similar liabilities when traded as assets, or that is consistent with existing fair value guidance. The amendments in this guidance also clarify that both a quoted price for the identical liability at the measurement date and the quoted price for the identical liability when traded as an asset in an active market when no adjustments to the quoted price of the asset are required are Level 1 fair value measurements. The guidance was effective for the first reporting period (including interim periods) beginning after issuance. Adoption of this guidance did not have a material impact on the Company's consolidated results of operations or financial condition.

Newly Issued But Not Yet Effective Accounting Pronouncements

In June 2009, the FASB amended previous guidance relating to the transfers of financial assets and eliminates the concept of a qualifying special purpose entity. This Statement must be applied as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. This Statement must be applied to transfers occurring on or after the effective date. Additionally, on and after the effective date, the concept of a qualifying special-purpose entity is no longer relevant for accounting purposes. Therefore, formerly qualifying special-purpose entities should be evaluated for consolidation by reporting entities on and after the effective date in accordance with the applicable consolidation guidance. Additionally, the disclosure provisions of this Statement were also amended and apply to transfers that occurred both before and after the effective date of this Statement. Upon adoption of these Statements the sales of the guaranteed portion of SBA loans will be treated as secured borrowings during the initial 90 day recourse period with gain recognition deferred until the end of the recourse period.

We evaluate securities for other-than-temporary impairment on at least a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the financial condition and near-term prospects of the issuer; the length of time and the extent to which the fair value has been less than cost, and our intention to sell, or it is more likely than not that it will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. In analyzing an issuer's financial condition, we consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and the results of reviews of the issuer's financial condition.

During the second quarter 2008, we received a downgrade notification from one of the rating agencies on a non-agency asset-backed security. The downgrade reduced the credit rating from investment grade to substantially below investment grade, requiring an OTTI charge of \$1.7 million to write down the security value.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

to zero. We have no other non-agency asset-backed securities in portfolio. The corporate note at December 31, 2009 and 2008 consists of one bond with an amortized cost of \$4.5 million and an unrealized loss of \$1.0 million at December 31, 2009. The bond is scheduled to mature in May 2047, with a first call date option in May 2012. Management determined this unrealized loss did not represent other-than-temporary impairment at December 31, 2009 as the investment is rated investment grade and there are no credit quality concerns with the obligor. The market value decline is deemed to be due to the current market volatility and is not reflective of management's expectations of their ability to fully recover this investment. Interest on the corporate note has been paid as agreed and management believes this will continue in the future and the bond will be repaid in full as scheduled. For these reasons, no other-than-temporary impairment was recognized on the corporate note at December 31, 2009.

Except as noted above, we consider the losses on our investments in an unrealized loss position at December 31, 2009 to be temporary based on: 1) the likelihood of recovery; 2) the information relative to the extent and duration of the decline in market value; and 3) the Company's intention not to sell, or it is more likely than not that it will not be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis.

3. LOANS RECEIVABLE AND THE ALLOWANCE FOR LOAN LOSSES

The following is a summary of loans by major category at December 31:

	2009	2008
	(In thousands)	
Loan portfolio composition		
Real estate loans:		
Residential	\$ 4,801	\$ 5,280
Commercial & industrial	1,595,219	1,406,068
Construction	54,084	61,524
Total real estate loans	1,654,104	1,472,872
Commercial business	487,736	531,953
Trade finance	51,411	66,603
Consumer and other	18,035	28,520
Total loans outstanding	2,211,286	2,099,948
Less: deferred loan fees	(2,343)	(1,505)
Gross loans receivable	2,208,943	2,098,443
Less: allowance for loan losses	(59,424)	(43,419)
Loans receivable, excluding guaranteed portion of delinquent SBA loans	2,149,519	2,055,024
Guaranteed portion of delinquent SBA loans	12,490	20,911
Loans receivable, net	\$ 2,162,009	\$ 2,075,935

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Activity in the allowance for loan losses is as follows for the years ended December 31:

	2009	2008 (In thousands)	2007
Balance, beginning of year	\$ 43,419	\$ 20,035	\$ 19,112
Provision for loan losses	61,023	48,825	7,530
Loans charged off	(45,686)	(25,693)	(7,448)
Recoveries of charge-offs	668	252	841
Balance, end of year	\$ 59,424	\$ 43,419	\$ 20,035

The allowance for loan losses is comprised of specific loss allowances for impaired loans and general loan loss allowances based on quantitative and qualitative analyses.

Individually impaired loans were as follows:

(In thousands)	December 31, 2009	December 31, 2008 (In thousands)
Year-end loans with no allocated allowance for loan losses	\$ 37,941	\$ 17,179
Year-end loans with allocated allowance for loan losses	82,599	33,134
Total	\$ 120,540	\$ 50,313
Amount of the allowance for loan losses allocated	\$ 19,803	\$ 14,957

	December 31, 2009	December 31, 2008 (In thousands)
Average of individually impaired loans during the period	\$ 84,593	\$ 34,067
Interest income recognized during impairment	4,466	2,318
Cash-basis interest income recognized	4,249	2,023

Non accrual loans and loans past due 90 days still on accrual were as follows:

	December 31, 2009	December 31, 2008 (In thousands)
Loans past due over 90 days still on accrual	\$ 51,674	\$ 37,580
Nonaccrual loans	51,674	37,580

Nonaccrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

A general loan loss allowance is provided on loans not specifically identified as impaired (non-impaired loans). The allowance is determined first based on a quantitative analysis using a loss migration methodology. The loans are classified by type and loan grade, and the historical loss

Edgar Filing: NARA BANCORP INC - Form 10-K

migration is tracked for the various stratifications. Loss experience is quantified for the most recent 12 quarters, and that loss experience is applied to the stratified portfolio at each quarter end. In the current environment, the loss experience of the most recent four

F-23

Table of Contents

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

quarters is given more weight in determination of the loss experience factor to be applied to the non-impaired loan portfolio. During 2009, the non-impaired Commercial and Industrial Real Estate loan portfolio was stratified into ten different loan pools based on property types and the non-impaired Commercial and Industrial loan portfolio was stratified into five different loan pools based on loan type, to allocate historic loss experience to more granular loan pools.

The stratification of the non-impaired loan portfolio resulted in a quantitative general loan loss allowance of \$11.3 million at December 31, 2009 compared to \$8.4 million at December 31, 2008.

In addition to the quantitative analysis, a qualitative analysis is performed each quarter to provide additional loss allowances on the non-impaired loan portfolio for the following factors that have a bearing on its loss content.

Changes in lending policies and procedures, including underwriting standards and collection, charge-off, and recovery practices.

Changes in international, national and local economic and business conditions and developments, including the condition of various market segments.

Changes in the nature and volume of the loan portfolio.

Changes in the experience, ability, and depth of lending management and staff.

Changes in the trends of the volume and severity of past due and classified loans; and changes in trends in the volume of non-accrual loans, troubled debt restructurings, and other loan modifications.

Changes in the quality of our loan review system.

The existence and effect of any concentrations of credit, and changes in the level of such concentrations.

Changes in the value of underlying collateral for collateral dependent loans.

Other external factors not considered above.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The qualitative loan loss allowance on the non-impaired loan portfolio was \$28.4 million at December 31, 2009 compared to \$20.1 million at December 31, 2008. The following table presents the allocation of the specific and general components of the allowance by significant loan types:

	12/31/2009				12/31/2008			
	Commercial Real Estate Loans	Commercial Loans	Other Loans**	Total	Commercial Real Estate Loans	Commercial Loans	Other Loans	Total
Impaired loans	\$ 94,600	\$ 23,598	\$ 2,342	\$ 120,540	\$ 27,693	\$ 22,620	\$	\$ 50,313

Total allowance for loan losses	\$ (41,045)	\$ (15,655)	\$ (2,724)	\$ (59,424)	\$ (24,219)	\$ (18,060)	\$ (1,140)	\$ (43,419)
Loss coverage ratio	2.57%	3.21%	2.16%	2.69%	1.65%	3.08%	2.39%	2.07%

* Excludes the guaranteed portion of delinquent SBA loans.

** Includes residential real estate, construction, trade finance and consumer loans.

Under certain circumstances, we will provide borrowers relief through a loan modification. These modifications are either temporary in nature (temporary modifications), or are more substantive troubled debt restructuring. At December 31, 2009 total modified loans were \$108.4 million, compared to \$53.1 at December 31, 2008. The temporary modifications generally consist of interest only payments for a three to six month period, whereby principal payments are deferred. At the end of the modification period, the remaining principal balance is re-amortized based on the original maturity date. Loans subject to temporary modifications are generally downgraded to substandard or special mention. At December 31, 2009 total temporary modifications outstanding were \$26.4 million compared to \$43.7 million at December 31, 2008. At the end of the modification period, the loan 1) returns to the original contractual terms; 2) is further modified and accounted for as a troubled debt restructuring in accordance with FASB ASC 310-10-35; or 3) is disposed of through foreclosure or liquidation.

Trouble Debt Restructured (TDR) loans are defined by FASB ASC 310-40, Troubled Debt Restructurings by Creditors and FASB ASC 470-60, Troubled Debt Restructurings by Debtors and evaluated for impairment in accordance with FASB ASC 310-10-35. At December 31, 2009, loans classified as a TDR totaled \$82.1 million, of which \$17.8 million was on non-accrual status and \$64.3 million was on accrual status. At December 31, 2008, loans classified as a TDR totaled \$9.4 million, of which \$6.1 million was on non-accrual status and \$3.3 million was on accrual status. The Company has allocated \$14.1 million and \$3.9 million of specific reserves to TDRs as of December 31, 2009 and 2008, respectively. TDRs are generally downgraded to substandard, partially accounting for the increase in loans classified as substandard to \$153.5 million at

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

December 31, 2009 from \$55.6 million at December 31, 2008. As of December 31, 2009 and December 31, 2008, we did not have any outstanding commitments to extend additional funds to these borrowers.

4. PREMISES AND EQUIPMENT, NET

Premises and equipment, net consisted of the following at December 31:

	2009	2008
	(In thousands)	
Furniture, fixtures and equipment	\$ 10,915	\$ 12,252
Leasehold improvements	13,886	13,290
	24,801	25,542
Accumulated depreciation and amortization	(13,936)	(13,555)
	\$ 10,865	\$ 11,987

Depreciation and amortization expense on furniture, fixtures and equipment and leasehold improvements was approximately \$2.8 million, \$2.8 million and \$2.5 million for the years ended December 31, 2009, 2008 and 2007, respectively.

5. GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amount of goodwill amounted to \$2.5 million at December 31, 2009 and 2008. Goodwill is tested for impairment on an annual basis as of December 31, or more frequently as events occur, or as current circumstances and conditions warrant. The Company records impairment writedowns as charges to noninterest expense and adjustments to the carrying value of goodwill. Subsequent reversals of goodwill impairment are prohibited. The Company tested goodwill for impairment as of December 31, 2009, 2008 and 2007 and determined that there was no impairment.

The Company also has premiums on acquired deposits which represent the intangible value of depositor relationships resulting from deposit liabilities assumed in various acquisitions. Other intangibles are tested for impairment on an annual basis, or more frequently as events occur, or as current circumstances and conditions warrant. The gross carrying amount of deposit premiums totaled \$5.9 million at December 31, 2009 and 2008, and the related accumulated amortization totaled \$4.8 million and \$4.2 million at December 31 2009 and 2008, respectively. The Company did not record any impairment writedowns on deposit premiums during 2009, 2008 and 2007. The Company amortizes premiums on acquired deposits based on the projected useful lives of the related deposits. Total amortization expense on deposit premiums was \$585 thousand, \$665 thousand and \$657 thousand for the years ended December 31, 2009, 2008 and 2007, respectively.

In February 2008, the Company purchased a branch located in New Jersey from a New Jersey-based financial institution (Provident) and recorded goodwill of \$350 thousand and a core deposit intangible of \$50 thousand. The Company amortized the core deposit intangible over an estimated useful life of 1 year on a straight line basis.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Following is a summary of the Company's intangible assets at December 31:

	2009		2008	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
(In thousands)				
Goodwill:				
Goodwill KEBNY	\$ 1,117	\$ (242)	\$ 1,117	\$ (242)

Total		\$ 5,862	\$ (4,820)	\$ 5,862	\$ (4,235)

6. DEPOSITS

Interest expense for time deposits for the years ended December 31 was as follows:

	2009	2008	2007
	(In thousands)		
Time deposits of \$100,000 or more	\$ 17,830	\$ 27,033	\$ 40,207
Other time deposits	19,910	13,863	12,772
Total	\$ 37,740	\$ 40,896	\$ 52,979

Included in time deposits of \$100,000 or more were \$200.0 million in California State Treasurer's deposits at December 31, 2009 and 2008. The California State Treasurer's deposits are subject to withdrawal based on the State's periodic evaluations. The Company is required to pledge eligible collateral of at least 110% of outstanding deposits. At December 31, 2009 and 2008, securities with carrying values of approximately \$237.6 million and \$242.0 million, respectively, were pledged as collateral for the California State Treasurer's deposits.

Brokered deposits of \$243 thousand and \$294.3 million are included in other time deposits at December 31, 2009 and 2008, respectively.

At December 31, 2009, the scheduled maturities for time deposits were as follows:

	Year Ended December 31 (In thousands)
2010	\$ 1,412,500
2011	30,097
2012	112
	\$ 1,442,709

F-27

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****7. BORROWINGS**

The Company maintains a secured credit facility with the Federal Home Loan Bank of San Francisco (FHLB SF) against which the Company may take advances. The borrowing capacity is limited to the lower of 30% of the Bank's total assets or the Bank's collateral capacity, which was \$562.2 million at December 31, 2009. The terms of this credit facility require the Company to pledge with the FHLB, eligible collateral equal to at least 100% of outstanding advances.

At December 31, 2009 and December 31, 2008, real estate secured loans with a carrying amount of approximately \$1.1 billion were pledged as collateral for borrowings from the FHLB. At December 31, 2009 and December 31, 2008, other than FHLB stock, no securities were pledged as collateral for borrowings from the FHLB.

At December 31, 2009 and December 31, 2008, FHLB borrowings were \$350 million, had a weighted average interest rate of 3.46% and 3.70%, respectively, and had various maturities through September 2016. At December 31, 2009, \$150 million of the advances were puttable advances with various puttable dates and strike prices. During 2009, the Bank obtained \$50 million of additional FHLB advances, and repaid \$50 million during the same period. The new advances have a weighted average cost of 1.85% with average remaining maturities of 2.7 years. The cost of FHLB borrowings as of December 31, 2009 ranged between 1.68% and 4.57%. At December 31, 2009, the Company had a remaining borrowing capacity of \$212.2 million.

At December 31, 2009, the contractual maturities for FHLB borrowings were as follows:

	Contractual Maturities	Maturity/ Put Date
	(In thousand)	
Due within one year	\$ 35,000	\$ 185,000
Due after one year through five years	310,000	160,000
Due after five years through ten years	5,000	5,000
	\$ 350,000	\$ 350,000

In addition, as a member of the Federal Reserve Bank (FRB) system, we may also borrow from the Federal Reserve Bank of San Francisco. The maximum amount that we may borrow from the Federal Reserve Bank's discount window is 98% of the fair value of the securities that are pledged and 75% of the outstanding principal balance of the qualifying loans that are pledged. At December 31, 2009, the outstanding principal balance of the qualifying loans was \$286.9 million. As of December 31, 2009 and 2008, there was no borrowing outstanding against the line.

8. SUBORDINATED DEBENTURES

At December 31, 2009, five wholly-owned subsidiary grantor trusts established by Nara Bancorp had issued \$38 million of pooled Trust Preferred Securities (trust preferred securities). Trust preferred securities accrue and pay distributions periodically at specified annual rates as provided in the indentures. The trusts used the net proceeds from the offering to purchase a like amount of subordinated debentures (the Debentures) of Nara Bancorp. The Debentures are the sole assets of the trusts. Nara Bancorp's obligations under the subordinated debentures and related documents, taken together, constitute a full and unconditional guarantee by Nara Bancorp of the obligations of the trusts. The trust preferred securities are mandatorily redeemable upon the maturity of the Debentures, or upon earlier redemption as provided in the indentures. Nara Bancorp has the right to redeem the Debentures in whole (but not in part) on or after specific dates, at a redemption price specified in the indentures plus any accrued but unpaid interest to the redemption date. Nara Bancorp also has a right to defer consecutive payments of interest on the debentures up to five years.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table is a summary of trust preferred securities and debentures at December 31, 2009:

Issuance Trust	Issuance Date	(Dollars in Thousands)		Rate Type	Initial Rate	Rate at 12/31/09	Maturity Date
		Preferred Security Amount	Subordinated Debentures Amount				
Nara Bancorp Capital Trust I	03/28/2001	\$ 10,000	\$ 10,400	Fixed	10.18%	10.18%	06/08/2031
Nara Capital Trust III	06/05/2003	5,000	5,155	Variable	4.44%	3.40%	06/15/2033
Nara Statutory Trust IV	12/22/2003	5,000	5,155	Variable	4.02%	3.13%	01/07/2034
Nara Statutory Trust V	12/17/2003	10,000	10,310	Variable	4.12%	3.20%	12/17/2033
Nara Statutory Trust VI	03/22/2007	8,000	8,248	Variable	7.00%	1.90%	06/15/2037
TOTAL ISSUANCE		\$ 38,000	\$ 39,268				

The Company's investment in the common stock of the issuer trusts of \$1.5 million at December 31, 2009 and 2008 is included in other assets. Although the securities issued by each of the trusts are not included as a component of stockholders' equity in the consolidated balance sheets, the securities are treated as capital for regulatory purposes. Specifically, under applicable regulatory guidelines, the \$38 million of securities issued by the trusts qualify as Tier 1 capital, along with the \$63.3 million of Fixed Rate Cumulative Perpetual Preferred Stock, net of discount, up to a maximum of 25% of capital on an aggregate basis. Any amount that exceeds 25% qualifies as Tier 2 capital. At December 31, 2009, all of the combined \$101.3 million of the trusts' securities and preferred stock outstanding qualified as Tier 1 capital.

The Board of Governors of the Federal Reserve System, which is the holding company's banking regulator, has promulgated a modification of the capital regulations affecting trust preferred securities. Under this modification, beginning March 31, 2011, the Company is required to use a more restrictive formula to determine the amount of trust preferred securities that can be included in regulatory Tier I capital. The Company will be allowed to include in Tier I capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is generally defined as stockholders' equity less certain intangibles, including core deposit intangibles, net of any related deferred income tax liability. The existing regulations in effect limit the amount of trust preferred securities that can be included in Tier I capital to 25% of the sum of core capital elements without a deduction for permitted intangibles. The adoption of this modification is not expected to have a material impact on the inclusion of trust preferred securities for purposes of Tier 1 capital.

9. INCOME TAXES

A summary of income tax provision (benefit) follows for the years ended December 31:

	Current	Deferred (In thousands)	Total
2009			
Federal	\$ 469	\$ (4,497)	\$ (4,028)
State	(296)	(1,875)	(2,171)
	\$ 173	\$ (6,372)	\$ (6,199)
2008			
Federal	\$ 8,656	\$ (6,932)	\$ 1,724
State	2,854	(2,953)	(99)

Edgar Filing: NARA BANCORP INC - Form 10-K

	\$ 11,510	\$ (9,885)	\$ 1,625
2007			
Federal	\$ 17,057	\$ (319)	\$ 16,738
State	6,024	(163)	5,861
	\$ 23,081	\$ (482)	\$ 22,599

F-29

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Deferred tax assets and liabilities at December 31, 2009 and 2008 are comprised of the following:

	2009	2008
	(In thousands)	
Deferred tax assets:		
Statutory bad debt deduction less than financial statement provision	\$ 27,081	\$ 20,215
Net operating loss carryforward	2,490	2,799
Capital loss carryforward	612	612
Investment security provision	802	812
Lease expense	1,510	1,482
State tax deductions		540
Accrued compensation	333	343
Deferred compensation	606	658
Mark to market on loans held for sale	33	131
Depreciation	937	789
Nonaccrual loan interest	595	
Other real estate owned	226	85
Other	238	116
Non-qualified stock option and restricted unit expense	1,551	1,653
Unrealized loss on securities available for sale		864
Amortization of intangibles	276	175
	37,290	31,274
Deferred tax liabilities:		
FHLB stock dividends	(569)	(573)
Deferred loan costs	(1,722)	(2,087)
State taxes deferred and other	(2,677)	(2,010)
Prepaid expenses	(828)	(641)
State tax credit	(23)	
Unrealized gain on securities available for sale	(1,900)	
Unrealized gain on interest rate swaps	(53)	(109)
Unrealized gain on interest only strips	(31)	(24)
	(7,803)	(5,444)
Valuation allowance on capital loss carryforward	(612)	(612)
Net deferred tax assets:	\$ 28,875	\$ 25,218

At year end 2009, the Company had capital loss carryforwards of approximately \$1.3 million which expire in 2010. The Company has evaluated the available evidence supporting the realization of its deferred tax assets and determined it is more likely than not that the Company would not realize an additional \$1.3 million of capital gains to offset the remaining capital loss carryforward. The Company has recorded a valuation against the remaining capital loss of \$1.3 million.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A reconciliation of the difference between the federal statutory income tax rate and the effective tax rate is shown in the following table for the years ended December 31:

	2009	2008	2007
Statutory tax rate (benefit)	(35)%	35%	35%
State taxes (benefit)-net of federal tax effect	(12)	(1)	7
CRA investment tax credit	(4)	(9)	(1)
Valuation allowance		14	
Other	(1)	(2)	
	(52)%	37%	41%

A summary of the Company's net operating loss carry-forwards is as follows:

	Remaining Amount	FEDERAL Expires	Annual Limitation (In thousands)	Remaining Amount	STATE Expires	Annual Limitation

Total	\$ 7,736		\$ 928	\$ 847		\$ 431

For the 2008 and 2009 tax years, the state of California suspended the utilization of Net Operating Losses (NOLs). Suspended NOLs for 2008 and 2009 will be allowed additional carryover periods of two years and one year, respectively.

Our Company and its subsidiaries are subject to U.S. federal income tax as well as income tax of the state of California and various other state income taxes. The statute of limitations related to the consolidated Federal income tax return is closed for all tax years up to and including 2005. The expiration of the statute of limitations related to the various state income tax returns that the Company and subsidiaries file, varies by state. The Company has been audited by the California Franchise Tax Board for the 2005 and 2006 tax years. The audit has been concluded and the additional tax liabilities have been paid as discussed below.

A reconciliation of the beginning and ending amount of unrecognized tax benefits for the years ended December 31 is as follows:

Edgar Filing: NARA BANCORP INC - Form 10-K

	2009	2008
	(In thousands)	
Balance at January 1,	\$ 352	\$ 262
Additions based on tax positions related to the current year	47	134
Additions based on tax positions related to the prior year	83	
Settlements	(277)	
Reductions due to the expiration of the statute of limitations	(54)	(44)
Balance at December 31,	\$ 151	\$ 352

F-31

Table of Contents

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The total amount of unrecognized tax benefits was \$352 thousand at January 1, 2009 and \$151 thousand at December 31, 2009 and is primarily for uncertainties related to California enterprise zone loan interest deductions taken in prior years. The total amount of tax benefits that, if recognized, would favorably impact the effective tax rate was \$352 thousand and \$151 thousand at January 1, 2009 and December 31, 2009, respectively. The amount of unrecognized tax benefits decreased due to payments to California Franchise Tax Board as a result of the audit adjustments for the apportionment factors and California Enterprise Zone loan interest deductions on the Company's 2005 and 2006 state income tax returns. We do not expect the total amount of unrecognized tax benefits to significantly change in the next twelve months.

We recognize interest and penalties related to income tax matters in income tax expense. We had approximately \$11 thousand and \$47 thousand for interest and penalties accrued at December 31, 2009 and 2008, respectively.

10. STOCK BASED INCENTIVE PLANS

The Company has a stock based incentive plan, the 2007 Nara Bancorp, Inc. Equity Incentive Plan (2007 Plan). The 2007 Plan, which was approved by our stockholders on May 31, 2007, provides for grants of stock options, stock appreciation rights (SARs), restricted stock, performance shares and performance units (sometimes referred to individually or collectively as awards) to non-employee directors, officers, employees and consultants of the Company. Stock options may be either incentive stock options (ISOs), as defined in Section 422 of the Internal Revenue Code of 1986, as amended (the Code), or nonqualified stock options (NQSOs).

The 2007 Plan gives the Company flexibility to (i) attract and retain qualified non-employee directors, executives and other key employees and consultants with appropriate equity-based awards, (ii) motivate high levels of performance, (iii) recognize employee contributions to the Company's success, and (iv) align the interests of Plan participants with those of the Company's stockholders. The exercise price for the shares underlying each award is the fair market value (FMV) on the date the award is granted. The exercise price for shares under an ISO may not be less than 100% of fair market value on the date the award is granted under Code Section 422. Similarly, under the terms of the 2007 Plan the exercise price for SARs and NQSOs may not be less than 100% of FMV on the date of grant. Performance units are awarded to a participant at the market price of the Company's common stock on the date of award (after the lapse of the restriction period and the attainment of the performance criteria). There is no minimum exercise price prescribed for performance shares and restricted stock awarded under the 2007 Plan.

ISOs, SARs and NQSOs have vesting periods of three to five years and have 10-year contractual terms. Restricted stock, performance shares, and performance units will be granted with a restriction period not less than one year from the grant date for performance-based awards and not less than three years from the grant date for time-based vesting of grants. Compensation expense for awards is recorded over the vesting period.

The 2007 Plan reserves 1,300,000 shares for issuance. The total shares reserved for issuance will serve as the underlying value for all equity awards under the 2007 Plan. With the exception of the shares underlying stock options and restricted stock awards, the board of directors may choose to settle the awards by paying the equivalent cash value or by delivering the appropriate number of shares.

The Company authorized 1,300,000 shares under the 2007 Plan; 1,192,300 shares were available for future grants as of December 31, 2009.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Stock option plans adopted in 1989 and 2000, under which options and restricted units were previously granted to employees, officers, and directors of the Company are no longer active and no additional equity may be granted under either plan. Options under the 1989 and 2000 Plan were granted with an exercise price equal to the fair market value on the date of grant with vesting periods from three to five years and have 10-year contractual terms. Restricted units were awarded to a participant at the fair market value of the Company's common stock on the date of award and all units will vest on the third anniversary of the grant. Compensation expense for the awards is recorded over the vesting period.

The fair value of each option granted for the year ended December 31, 2009 is estimated on the date of grant using a Black-Scholes valuation model that uses the assumptions noted in the following table. Expected stock price volatility is based on the historical volatility of our stock. We use historical data to estimate the option exercise and employee terminations within the valuation model. The expected term of options granted is derived from the output of the option valuation model and represents the period of time that options granted are expected to be outstanding. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

	2009
Risk-free interest rate	2.3%
Expected option life (years)	6.2
Expected stock price volatility	51.2%
Dividend yield	3.4%
Weighted average fair value of options granted during the period	\$ 0.44

For the years ended December 31, 2008 and 2007, no stock options were granted.

A summary of stock option activity under the Plan for the year ended December 31, 2009 is as follows:

	Number of Shares	Weighted- Average Exercise Price Per Share	Weighted- Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding January 1, 2009	1,053,250	\$ 11.74		
Granted	40,000	8.64		
Exercised				
Forfeited/canceled	(60,000)	8.64		
Outstanding December 31, 2009	1,033,250	\$ 11.80	4.57	\$ 2,095,000
Options exercisable December 31, 2009	963,250	\$ 11.83	4.34	\$ 1,987,000
Unvested options expected to vest after December 31, 2009	54,278	\$ 11.50	7.68	\$ 84,000

The aggregate intrinsic value of options exercised for the years ended December 31, 2009, 2008 and 2007 was \$0, \$71 thousand and \$1.0 million, respectively. The tax benefit realized for options exercised for the years ending December 31, 2009, 2008 and 2007 was \$0.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A summary of restricted unit activity under the Plan for the year ended December 31, 2009 was as follows:

	Number of Shares	Weighted- Average Grant Date Fair Value	Weighted- Average Remaining Contractual Life (Years)
Outstanding January 1, 2009	128,120	\$ 16.34	
Granted	28,500	7.78	
Vested	(87,640)	17.60	
Forfeited/canceled	(10,680)	16.49	
Outstanding December 31, 2009	58,300	\$ 10.23	8.86

The total fair value of performance units vested for the years ended December 31, 2009, 2008 and 2007 was \$586 thousand, \$0 and \$0, respectively.

The amount charged against income, before income tax benefit of \$562 thousand, \$552 thousand and \$545 thousand, in relation to the stock-based payment arrangements was \$1.5 million, \$1.7 million and \$1.5 million for 2009, 2008 and 2007, respectively. At December 31, 2009, unrecognized compensation expense related to non-vested stock option grants and restricted units aggregated \$445 thousand, and is expected to be recognized over a weighted average period of 1.50 years.

The estimated annual stock-based compensation as of December 31, 2009 for each of the succeeding years is indicated in the table below:

	Stock Based Compensation Expense (in thousands)
For the year ended December 31:	
2010	\$ 299
2011	80
2012	55
Thereafter	11
Total	\$ 445

11. EMPLOYEE BENEFIT PLANS

Deferred Compensation Plan In 1996, the Company established a deferred compensation plan that permits eligible officers and directors to defer a portion of their compensation. In 2001, the Board of Directors approved and the Company established a deferred compensation plan that allowed key executives of the Company additional deferment of their compensation. The deferred compensation plans still in effect were amended in 2007 to be in compliance with the new IRC §409 (A) regulations. The deferred compensation, together with accrued accumulated interest, is distributable in cash after retirement or termination of service. The deferred compensation liabilities at December 31, 2009 and 2008 amounted to \$1.4 million and \$1.7 million, respectively, which are included in other liabilities. Interest expense recognized under the deferred compensation plan totaled \$58 thousand, \$121 thousand and \$123 thousand for 2009, 2008 and 2007, respectively.

Edgar Filing: NARA BANCORP INC - Form 10-K

In 2008, the Company established and the Board approved a Long Term Incentive Plan (LTIP) that rewards the named executive officers (NEO) with deferred compensation if the Company meets certain performance goals, the NEOs meet individual performance goals, and the NEOs remain employed for a

F-34

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

pre-determined period (between five and ten years, depending on the officer). The Company did not meet the required performance goals, and thus the Company did not incur any liabilities or expense under the LTIP for 2009 and 2008.

The Company has insured the lives of certain officers and directors who participate in the deferred compensation plan. The Company has also purchased life insurance policies and entered into split dollar life insurance agreements with certain directors and officers. Under the terms of the split dollar life insurance agreements, a portion of the death benefits received by the Bank will be paid to beneficiaries named by the directors and officers. However, upon separation of service, all death benefits accrue to the Company.

401(k) Savings Plan In 1996, the Company established a 401(k) savings plan, which is open to all eligible employees who are 21 years old or over and have completed six months of service. The plan requires the Bank to match 100% up to 3% of employee deferrals and 50% of the next 2% of employee deferrals for an additional contribution of up to 1% during the plan year. Employer matching is immediately vested in full regardless of the service term. Total employer contributions to the plan and expense amounted to approximately \$360 thousand, \$623 thousand and \$611 thousand for 2009, 2008 and 2007, respectively. Effective September 7, 2009, the Company has amended the Plan to discontinue with the safe harbor employer matching contributions.

Employees Stock Ownership Plan (ESOP) In 1996, the Company established an ESOP, which is open to all eligible employees who have completed one year of service working at least 1,000 hours. The Company's contributions to the ESOP represent an annual profit-sharing bonus paid to employees. Such contributions and available forfeitures are allocated to active employees based on the percentage that their compensation represents of the total compensation of eligible employees. The Company purchased no shares of its common stock for the ESOP in 2009, 2008 and 2007. There were no contributions or expense to the ESOP for 2009, 2008 and 2007. As of December 31, 2009 and 2008, the ESOP held 158,357 and 176,646 shares, and there were no unallocated shares. On an annual basis, the Board determines the amount to contribute to the ESOP as a profit sharing bonus. There were no such contributions in 2009, 2008 and 2007.

Upon termination, plan participants are paid in cash or retain their vested balance in the ESOP. During 2009, 2008 and 2007, shares withdrawn from the ESOP by participants who terminated their employment with the Company amounted to 18,289, 15,966 and 25,375 shares, respectively. During 2009, 2008 and 2007, no shares were added to the ESOP plan from dividend reinvestments.

12. COMMITMENTS AND CONTINGENCIES

The Company leases its premises under non-cancelable operating leases, and at December 31, 2009, the future minimum rental commitments under these leases are as follows:

	(In thousands)
2010	\$ 6,986
2011	6,270
2012	6,181
2013	5,940
2014	5,808
Thereafter	13,648
	\$ 44,833

Operating lease expense recorded under such leases in 2009, 2008 and 2007 amounted to approximately \$6.3 million, \$5.8 million and \$5.8 million, respectively.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In the normal course of business, the Company is involved in various legal claims. Management has reviewed all legal claims against the Company with counsel for the fiscal year ended December 31, 2009, and has taken into consideration the views of such counsel as to the outcome of the claims. In management's opinion, the final disposition of all such claims will not have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. As of December 31, 2009 and 2008, the Company recorded an accrued liability of \$105 thousand and \$0, respectively, for litigation settlements.

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and other commercial letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statements of financial condition. The Company's exposure to credit loss in the event of nonperformance by the other party to commitments to extend credit and standby letters of credit and other commercial letters of credit is represented by the contractual notional amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for extending loan facilities to customers. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable; inventory; property, plant and equipment; and income-producing properties.

Commitments at December 31, 2009 and 2008 are summarized as follows:

	2009	2008
	(In thousands)	
Commitments to extend credit	\$ 198,807	\$ 200,170
Standby letters of credit	9,907	9,354
Other commercial letters of credit	23,575	17,183
	\$ 232,289	\$ 226,707

Commitments and letters of credit generally have variable rates that are tied to the prime rate. The amount of fixed rate commitments is not considered material to this presentation. From time to time, the Company enters into certain types of contracts that contingently require the Company to indemnify parties against third party claims and other obligations customarily indemnified in the ordinary course of the Company's business. The terms of such obligations vary, and, generally, a maximum obligation is not explicitly stated. Therefore, the overall maximum amount of the obligations cannot be reasonably estimated. The most significant of these contracts relate to certain agreements with the Company's officers and directors under which the Company may be required to indemnify such persons for liabilities arising out of their employment relationship. Historically, the Company has not been obligated to make significant payments for these obligations, and no liabilities have been recorded for these obligations on its consolidated statements of financial condition as of December 31, 2009 and 2008.

13. FAIR VALUE

FASB ASC 820, *Fair Value Measurements and Disclosures*, establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Table of Contents

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Securities Available for Sale

The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs) or matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities relationship to other benchmark quoted securities (Level 2 inputs).

Impaired Loans

The fair values of impaired loans are generally measured for impairment using the practical expedients permitted by FASB ASC 310-10-35 including impaired loans measured at an observable market price (if available), or at the fair value of the loan's collateral (if the loan is collateral dependent). Fair value of the loan's collateral, when the loan is dependent on collateral, is determined by appraisals or independent valuation, which is then adjusted for the cost related to liquidation of the collateral. These are considered Level 2 inputs. For the loan's collateral for which observable market prices are not available, fair value is estimated using discount cash flow models. These are considered Level 3 inputs.

Derivatives

The fair value of our derivative financial instruments, including interest rate swaps and caps, is based on derivative valuation models using market data inputs as of the valuation date that can generally be verified and do not typically involve significant management judgments. (Level 2 inputs).

Other Real Estate Owned

Other real estate owned is valued at the time the loan is foreclosed upon and the asset is transferred to other real estate owned. The value is based primarily on third party appraisals, less costs to sell and result in a Level 2 classification of the inputs for determining fair value. Other real estate owned is reviewed and evaluated on at least an annual basis for additional impairment and adjusted accordingly, based on the same factors identified above.

	At December 31, 2008	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(In thousands)				
Assets:				
Impaired loans at fair value	\$ 25,960	\$	\$ 14,238	\$ 11,722

Impaired loans, which are usually measured for impairment using the fair value of collateral, had a carrying amount of \$120.5 million at December 31, 2009, after partial charge-offs of \$17.0 million. In addition, these loans have a specific valuation allowance of \$19.8 million at December 31, 2009. Of the \$120.5 million impaired loan portfolio at December 31, 2009, \$101.1 million were carried at their fair value of \$81.3 million as a result of the aforementioned charge-offs and specific valuation allowances. The remaining \$19.4 million were carried at cost at December 31, 2009, as the fair value of the collateral on these loans exceeded the book value for each individual credit. Charge-offs and changes in specific valuation allowances during 2009 on impaired loans carried at fair value at December 31, 2009 resulted in additional provision for loan losses of \$51.2 million.

At December 31, 2008, impaired loans had a carrying amount of \$50.3 million, after partial charge-offs of \$15.9 million. In addition, these loans had a specific valuation allowance of \$15.0 million. Of the \$50.3 million impaired loan portfolio at December 31, 2008, \$41.0 million were carried at their fair value of \$26.0 million as a result of the aforementioned charge-offs and specific valuation allowances. The remaining \$9.4 million were carried at cost at December 31, 2008, as the fair value of the collateral on these loans exceeds the book value for each individual credit. Charge-offs and changes in specific valuation allowances during 2008 on impaired loans carried at fair value at December 31, 2008 resulted in additional provision for loan losses of \$35.0 million.

Other real estate owned had a carrying amount of \$2.0 million at December 31, 2009, which is made up of an outstanding balance of \$2.5 million, with a valuation allowance of \$484 thousand. Changes in the valuation allowance on other real estate owned outstanding at December 31, 2009 resulted in a write-down of \$1.7 million during 2009.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Fair Value of Financial Instruments**

The methods and assumptions used to estimate fair value are described as follows.

Edgar Filing: NARA BANCORP INC - Form 10-K

The carrying amount is the estimated fair value for cash and cash equivalents, savings and other interest bearing demand deposits, accrued interest receivable and payable, customer s and Bank s liabilities on acceptances, non-interest-bearing deposits, short-term debt, and variable rate loans or deposits that reprice

F-40

Table of Contents

NARA BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

frequently and fully. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk. The allowance for loan losses is considered to be a reasonable estimate of discount for credit quality concerns. Fair value of loans held for sale is based on market quotes. Fair value of time deposits and debt is based on current rates for similar financing. It was not practicable to determine the fair value of Federal Reserve Bank stock or Federal Home Loan Bank stock due to restrictions placed on their transferability. The fair value of commitments to fund loans represents fees currently charged to enter into similar agreements with similar remaining maturities and is not presented herein. The fair value of these financial instruments is not material to the consolidated financial statements.

14. STOCKHOLDERS EQUITY AND REGULATORY MATTERS

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements, such as restrictions on the growth, expansion or the payment of dividends or other capital distributions or management fees. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier I capital (as defined) to average assets (as defined). Management believes that, as of December 31, 2009 and 2008, the Company and the Bank met all capital adequacy requirements to which they are subject.

As of December 31, 2009 and 2008, the most recent regulatory notification categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier I risk-based and Tier I leverage ratios as set forth in the table below. There are no conditions or events since the notification that management believes have changed the Bank's category.

On November 21, 2008 the Company received \$67 million from the U.S. Treasury through its TARP capital purchase plan and issued 67,000 shares of cumulative preferred stock. The preferred stock will pay cumulative dividends at the rate of 5% per year for the first five years and 9% per year thereafter. The shares are callable by the Company at par after three years if the repurchase is made with proceeds of a new offering or placement of common equity or of certain preferred stock treated as Tier 1 capital under applicable Federal banking regulations.

Prior to the earlier of the third anniversary of the closing date and the date on which the preferred shares have been redeemed in whole or the investor has transferred all of the preferred shares to third parties which are not affiliates of the investor, neither the Company nor any Company subsidiary shall, without the consent of the investor, declare or pay any dividend or make any distribution on its common stock (other than (A) regular quarterly cash dividends of not more than \$0.0275, which was the amount of the last quarterly cash dividend per

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

share declared or, if lower, publicly announced an intention to declare, on the common stock prior to October 14, 2008, as adjusted for any stock split, stock dividend, reverse stock split, reclassification or similar transaction, (B) dividends payable solely in shares of common stock and (C) dividends or distributions of rights or junior stock in connection with a stockholders' rights plan).

The preferred stock issued qualifies as Tier 1 capital.

In conjunction with the purchase of the Company's preferred stock, the U.S. Treasury received a warrant to purchase 1,042,531 shares of the Company's common stock at \$9.64 per share. The term of the warrant is ten years. On December 3, 2009, US Treasury approved the Company's request for an adjustment to the Company's warrant share position due to a qualified equity offering in November 2009, which is discussed below. The adjusted number of warrant is 521,266, or 50% of original issuance of 1,042,531.

On October 27, 2009, the Company closed an offering of \$86.3 million of its common stock through an underwritten public offering of 11.5 million shares of the Company's common stock at a price of \$7.50 per share, including a 15% over-allotment option. Net proceeds were approximately \$82 million. The shares were issued pursuant to a prospectus supplement filed as part of a shelf registration statement previously filed with the Securities and Exchange Commission on Form S-3 (No. 333-161992).

The Company's and the Bank's actual capital amounts and ratios are presented in the table below:

	Actual		Required For Capital Adequacy Purposes		Required To Be Well Capitalized under Prompt Corrective Action Provisions

Bank	\$ 319,435	12.4%	\$ 102,800	4.0%	\$ 128,500	5.0%

Under federal banking law, dividends declared by the Bank in any calendar year may not, without the approval of the regulatory agency, exceed its net income for that year combined with its retained income from the preceding two years. However, the regulatory agency has previously issued a bulletin to all banks outlining guidelines limiting the circumstances under which banks may pay dividends even if the banks are otherwise statutorily authorized to pay dividends. The limitations impose a requirement or in some cases suggest that prior approval of the regulatory agency should be obtained before a dividend is paid if a bank is the subject of administrative action or if the payment could be viewed by the regulatory agency as unsafe or unusual. In 2009, the Bank agreed with its primary regulatory agencies to obtain the prior written approval to pay any dividends.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****15. EARNINGS PER SHARE**

EPS information is as follows for the years ended December 31:

	Income (Numerator)	Shares (Denominator)	Per Share Amount
	(In thousands, except share and per share data)		
2009			
Net loss as reported	\$ (5,723)		
Less: preferred stock dividends and accretion of preferred stock discount	(4,276)		
Basic EPS common stock	\$ (9,999)	28,359,496	\$ (0.35)
Effect of dilutive securities:			
Stock options			
Diluted EPS common stock	\$ (9,999)	28,359,496	\$ (0.35)
2008			
Net income as reported	\$ 2,755		
Less: preferred stock dividends and accretion of preferred stock discount	(474)		
Basic EPS common stock	\$ 2,281	26,200,344	\$ 0.09
Effect of dilutive securities:			
Stock options		219,189	
Diluted EPS common stock	\$ 2,281	26,419,533	\$ 0.09
2007			
Basic EPS common stock	\$ 33,199	26,168,176	\$ 1.27
Effect of dilutive securities:			
Stock options		335,457	
Diluted EPS common stock	\$ 33,199	26,503,633	\$ 1.25

Basic EPS excludes dilution and is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if stock options or other contracts to issue common stock were exercised or converted to common stock that would then share in our earnings. For the years ended December 31, 2009, 2008 and 2007, stock options and restricted shares awards for approximately 1,092,000, 440,000 and 410,000 shares of common stock were excluded in computing diluted earnings per common share because they were antidilutive. Additionally, warrants to purchase 521,266, 1,042,531 and 0 shares of common stock were also antidilutive for years ended December 31, 2009, 2008 and 2007, respectively.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****16. COMPREHENSIVE INCOME (LOSS)**

Total	\$ (1,142)	\$ 4,119	\$ 2,977

17. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

Edgar Filing: NARA BANCORP INC - Form 10-K

As part of our asset and liability management strategy, we may enter into derivative financial instruments, such as interest rate swaps, caps and floors, with the overall goal of minimizing the impact of interest rate fluctuations on our net interest margin. Interest rate swaps and caps involve the exchange of fixed-rate and variable-rate interest payment obligations without the exchange of the underlying notional amounts.

Under the interest rate swap agreements that the Company had entered into as of December 31, 2007, the Company received a fixed rate and paid a floating rate. The interest rate swaps qualified as cash flow hedges for accounting purposes, and effectively fixed the interest rate received on the variable rate loans indexed to Prime as of December 31, 2007. As of December 31, 2007, the amounts in accumulated other comprehensive income (loss) associated with these cash flow hedges totaled a gain of \$122 thousand (net of tax of \$73 thousand).

F-45

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

During January 2008, the Company terminated the \$50 million of interest rate swaps that were outstanding at December 31, 2007. The gain of \$247 thousand, net of tax, on termination of the swaps is being amortized into income over the remaining life of the swaps. \$84 thousand, net of tax of \$56 thousand, was recognized into income during 2009.

In January of 2008, the Company entered into five interest swap agreements with an aggregate notional amount of \$50 million. Under these swap agreements, the Company receives a floating rate, resetting semi-annually based on the 6 Month London-Interbank Offered Rate (6 Mo. LIBOR), and pays a fixed rate of 3.57%, until January 2010. These interest rate swap agreements are considered free-standing due to non-designation of a hedge relationship to any of its financial assets or liabilities. Under FASB ASC 815, valuation gains or losses on interest rate swaps not designated as hedging instruments are recognized currently in earnings. At December 31, 2009, the fair value of the outstanding interest rate swaps was \$(645 thousand) compared to \$(857 thousand) at December 31, 2008.

The aggregate fair value of all derivative instruments that were in a liability position at December 31, 2009, was \$645 thousand, for which we had posted \$2.0 million in investment securities as collateral. The contract arrangement of these derivative instruments does not contain any credit-risk related contingent features, which would require us to post additional collateral as a result of any adverse change in our creditworthiness in the future.

Interest rate swap information at December 31, 2009 and 2008 is summarized as follows:

(In thousands)				
December 31, 2009				
Notional				
Amount	Floating Rate	Fixed Rate	Maturity Date	Fair Value
(Dollars in thousands)				
\$10,000	6 Mo. LIBOR	3.57%	01/14/2010	\$ (129.1)

\$50,000				\$ (857)

Edgar Filing: NARA BANCORP INC - Form 10-K

During the third quarter of 2009, we entered into two interest cap agreements with an aggregate notional amount of \$50 million. Under these cap agreements, we receive quarterly payments from the counterparty when the quarterly resetting 3 Month London-Interbank Offered Rate (3 Mo. LIBOR) exceeds the strike level of

F-46

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

2.00%. The upfront fee paid to the counterparty in entering into these two interest rate cap agreements was \$359 thousand. These interest rate cap agreements are considered free-standing due to non-designation of a hedge relationship to any of its financial assets or liabilities. Under FASB ASC 815, valuation gains or losses on interest rate caps not designated as hedging instruments are recognized in earnings. At December 31, 2009, the fair value of the outstanding interest rate caps was \$177 thousand and we recognized mark-to-market losses on valuation of \$181 thousand for 2009.

The following tables summarize the fair value of derivative financial instruments utilized by the Company:

	December 31, 2009		Derivatives at December 31, 2008	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives not designated as hedging instruments:				
Interest rate caps	Other Assets	\$ 177	Other Assets	\$
Interest rate swaps	Other Liabilities	(645)	Other Liabilities	(857)
Total derivatives not designated as hedging instruments		\$ (468)		\$ (857)

The effect of derivative instruments on the Consolidated Statement of Income for 2009 and 2008 are as follows:

		(In thousands)	
		Amount of Gain or (Loss) Recognized in Income on Derivatives	Amount of Gain or (Loss) Recognized in Income on Derivatives
Derivatives not designated as hedging instruments under FASB ASC 815:			
Interest rate contracts (1)	Other income	\$ (586)	\$ (689)
Total		\$ (586)	\$ (689)

- (1) Includes amounts representing the net interest payments as stated in the contractual agreements and the valuation gains or (losses) on interest rate contracts not designated as hedging instruments.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****18. QUARTERLY FINANCIAL DATA (UNAUDITED)**

Summarized unaudited quarterly financial data follows for the three months ended:

	March 31	June 30	September 30	December 31
	(In thousands, except per share amounts)			
2009				
Interest income	\$ 36,059	\$ 38,410	\$ 41,706	\$ 41,870
Interest expense	15,620	17,150	17,473	15,456
Net interest income before provision for loan losses	20,439	21,260	24,233	26,414
Provision for loan losses	15,670	19,000	8,500	17,853
Net interest income after provision for loan losses	4,769	2,260	15,733	8,561
Non-interest income	4,365	3,785	4,894	5,424
Non-interest expense	15,248	16,822	14,668	14,975
Income (loss) before income tax provision	(6,114)	(10,777)	5,959	(990)
Income tax provision (benefit)	(2,934)	(4,769)	2,018	(514)
Net income (loss)	\$ (3,180)	\$ (6,008)	\$ 3,941	\$ (476)
Dividends and discount accretion on preferred stock	\$ (1,068)	\$ (1,069)	\$ (1,069)	\$ (1,070)
Net income (loss) available to common stockholders	\$ (4,248)	\$ (7,077)	\$ 2,872	\$ (1,546)
Basic earnings (loss) per common share	\$ (0.16)	\$ (0.27)	\$ 0.11	\$ (0.04)
Diluted earnings (loss) per common share	\$ (0.16)	\$ (0.27)	\$ 0.11	\$ (0.04)

The lower provision for loan losses in the third quarter, compared to other quarters, was primarily due to the impact of lower net charge offs and lower special mention and classified loans, partially offset by an increase in non-performing loans.

	March 31	June 30	September 30	December 31
	(In thousands, except per share amounts)			
2008				
Interest income	\$ 44,360	\$ 41,787	\$ 41,690	\$ 39,091
Interest expense	19,750	17,631	16,937	16,389
Net interest income before provision for loan losses	24,610	24,156	24,753	22,702
Provision for loan losses	4,993	9,652	6,180	28,000
Net interest income after provision for loan losses	19,617	14,504	18,573	(5,298)
Non-interest income	4,599	3,325	4,011	2,058
Non-interest expense	14,431	14,840	13,991	13,747

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The fluctuation in net income (loss) in the fourth quarter of 2008 is mainly attributed to the increase in provision for loan losses, which is related to the deterioration in asset quality we experienced during the period. Non-performing loans increased by \$7.1 million to \$37.6 million at December 31, 2008 from \$30.5 million at September 30, 2008. Net loan charge-offs during fourth quarter 2008 were \$12.4 million, compared to \$6.3 million during third quarter 2008.

19. BUSINESS SEGMENT INFORMATION

The Company segregates its operations into three primary segments: Banking Operations, Trade Finance Services (TFS) and Small Business Administration Lending Services (SBA). The Company determines the operating results of each segment based on an internal management system that allocates certain expenses to each segment.

Banking Operations The Company provides lending products, including commercial, installment and real estate loans, to its customers.

Trade Finance Services The TFS department allows the Company's import/export customers to handle their international transactions. Trade finance products include the issuance and collection of letters of credit, international collection and import/export financing.

Small Business Administration Lending Services The SBA department provides customers of the Company access to the U.S. SBA guaranteed lending program.

	Banking Operations	Business Segment		Company
		TFS (Dollars in Thousands)	SBA	
2009				
Net interest income	\$ 76,384	\$ 4,637	\$ 11,325	\$ 92,346
Less provision for loan losses*	38,602	3,122	19,299	61,023
Non-interest income	13,667	2,088	2,713	18,468
Net revenue (expense)	51,449	3,603	(5,261)	49,791
Non-interest expense	51,584	2,968	7,161	61,713
Income (loss) before income taxes	\$ (135)	\$ 635	\$ (12,422)	\$ (11,922)
Goodwill	\$ 2,509	\$	\$	\$ 2,509
Total assets	\$ 2,744,684	\$ 181,135	\$ 302,138	\$ 3,227,957

* The increase in the provision for loan losses during 2009 is due to the increase in delinquencies and impaired loans in the loan portfolio.

Table of Contents**NARA BANCORP, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	Banking Operations	Business Segment		Company
		TFS (Dollars in Thousands)	SBA	
2008				
Net interest income	\$ 78,999	\$ 4,429	\$ 12,793	\$ 96,221
Less provision for loan losses*	24,141	7,886	16,798	48,825
Non-interest income**	9,386	2,140	2,467	13,993
Net revenue (expense)	64,244	(1,317)	(1,538)	61,389
Non-interest expense	45,995	3,405	7,609	57,009
Income (loss) before income taxes	\$ 18,249	\$ (4,722)	\$ (9,147)	\$ 4,380
Goodwill	\$ 2,509	\$	\$	\$ 2,509
Total assets	\$ 2,147,194	\$ 182,821	\$ 342,039	\$ 2,672,054

* The increases in the provision for loan losses for all segments during 2008 are due to the increases in delinquency in the loan portfolio originated in the segments.

** The decrease in non-interest income for the SBA segment during 2008 is due to the decrease in net gains on sales of SBA loans, as a result of reduced volumes of SBA loan originations and sales along with lower margins on these sales, and a loss of \$1.0 million on sales of other real estate owned.

	Banking Operations	Business Segment		Company
		TFS (Dollars in Thousands)	SBA	
2007				
Net interest income	\$ 74,601	\$ 6,511	\$ 16,093	\$ 97,205
Less provision for loan losses*	3,840	2,040	1,650	7,530
Non-interest income	11,452	2,717	8,404	22,573
Net revenue	82,213	7,188	22,847	112,248
Non-interest expense	45,624	3,742	7,084	56,450
Income before income taxes	\$ 36,589	\$ 3,446	\$ 15,763	\$ 55,798
Goodwill	\$ 2,159	\$	\$	\$ 2,159
Total assets	\$ 1,859,315	\$ 194,574	\$ 369,521	\$ 2,423,410

The SBA business segment primarily originates for sale and services SBA loans generated from our loan production offices and from branch referrals. It also originates commercial real estate loans and commercial business loans, not covered by the SBA guarantee program. Total SBA

Edgar Filing: NARA BANCORP INC - Form 10-K

business segment assets at December 31, 2009 and 2008 included SBA loans (principally, the unguaranteed portion) of \$103.2 million and \$99.1 million; commercial real estate loans of \$189.2 million and \$198.7 million; and commercial business loans of \$15.7 million and \$14.4 million, respectively.
