(Zip Code)

Registrant's telephone number, including area code: (215) 875-0700

Securities Registered Pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Shares of Beneficial Interest, par value \$1.00 per share	New York Stock Exchange
Securities Registered Pursuant to Section 12(g) of the Act: None	

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in the definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value, as of June 30, 2009, of the shares of beneficial interest, par value \$1.00 per share, of the Registrant held by non-affiliates of the Registrant was approximately \$207 million. (Aggregate market value is estimated solely for the purposes of this report and shall not be construed as an admission for the purposes of determining affiliate status.)

On March 10, 2010, 44,457,812 shares of beneficial interest, par value \$1.00 per share, of the Registrant were outstanding.

Documents Incorporated by Reference

Portions of the Registrant's definitive proxy statement for its 2010 Annual Meeting of Shareholders are incorporated by reference in Part III of this Form 10-K.

FORWARD LOOKING STATEMENTS

This Annual Report on Form 10-K for the year ended December 31, 2009, together with other statements and information publicly disseminated by us, contain certain forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements relate to expectations, beliefs, projections, future plans, strategies, anticipated events, trends and other matters that are not historical facts. These forward-looking statements reflect our current views about future events and are subject to risks, uncertainties and changes in circumstances that might cause future events, achievements or results to differ materially from those expressed or implied by the forward-looking statements. In particular, our business might be affected by uncertainties affecting real estate businesses generally as well as the following, among other factors:

our substantial debt and our high leverage ratio;

constraining leverage, interest and tangible net worth covenants under our 2010 Credit Facility, as well as mandatory pay down and capital application provisions;

our ability to refinance our existing indebtedness when it matures;

our ability to raise capital, including through the issuance of equity securities if market conditions are favorable, through joint ventures or other partnerships, through sales of properties, or through other actions;

our short- and long-term liquidity position;

the effects on us of dislocations and liquidity disruptions in the capital and credit markets;

the current economic downturn and its effect on consumer confidence and consumer spending, tenant business and leasing decisions and the value and potential impairment of our properties;

increases in operating costs that cannot be passed on to tenants;

our ability to maintain and increase property occupancy, sales and rental rates, including at our recently redeveloped properties;

risks relating to development and redevelopment activities;

changes in the retail industry, including consolidation and store closings;

general economic, financial and political conditions, including credit market conditions, changes in interest rates or unemployment;

concentration of our properties in the Mid-Atlantic region;

changes in local market conditions, such as the supply of or demand for retail space, or other competitive factors;

potential dilution from any capital raising transactions;

possible environmental liabilities;

our ability to obtain insurance at a reasonable cost; and

existence of complex regulations, including those relating to our status as a REIT, and the adverse consequences if we were to fail to qualify as a REIT.

Additional factors that might cause future events, achievements or results to differ materially from those expressed or implied by our forward-looking statements include those discussed in the section entitled Item 1A. Risk Factors. We do not intend to update or revise any forward-looking statements to reflect new information, future events or otherwise.

DEFINITIONS

Except as the context otherwise requires, references in this Annual Report on Form 10-K to we, our, us, the Company and PREIT refer to Pennsylvania Real Estate Investment Trust and its subsidiaries, including our operating partnership, PREIT Associates, L.P. References in this Annual Report on Form 10-K to PREIT Associates refer to PREIT Associates, L.P. References in this Annual Report on Form 10-K to PRI refer to PREIT-RUBIN, Inc., which is a taxable REIT subsidiary of the Company.

Table of Contents

The following industry terms used in this Annual Report on Form 10-K have the meanings set forth below:

Anchors: large format retail stores or department stores that serve as anchor tenants in malls.

GLA: gross leasable area of a property, including space leasable to anchors and in-line stores and other leasable space, in square feet.

In-line stores: rows of smaller stores located in lines between the anchors of a mall. In-line stores are frequently a mix of national, regional and local retailers.

Junior anchors: smaller versions of anchors, typically with 20,000 to 40,000 square feet, in a variety of tenant categories, including sporting goods, discount clothing, electronics, home décor, linens, pet supply, furniture and office supply.

Malls: enclosed, climate-controlled shopping venues that typically offer apparel, accessories and hard goods, as well as services, restaurants, entertainment and convenient parking. References to malls include both regional malls and super-regional malls.

Outparcel: land used for a freestanding development, such as a retail store, bank branch or restaurant, that is not attached to the main building(s) that comprises the mall, strip or power center.

Owned square feet: the portion of total square feet that we own.

Power centers: open air centers with 250,000 to 600,000 square feet of space with three to five non-department store specialty anchors.

Regional malls: malls that have more than 400,000 but less than 800,000 square feet of space.

REIT: real estate investment trust.

Strip centers: open air centers, including neighborhood and community centers, with more than 30,000 but less than 350,000 square feet of space and a line of stores.

Super-regional malls: malls that have more than 800,000 square feet of space.

Total square feet: the total retail space in a property, including anchors, in-line stores and outparcels.

Table of Contents

PART I

**ITEM 1. BUSINESS.
OVERVIEW**

Pennsylvania Real Estate Investment Trust, a Pennsylvania business trust founded in 1960 and one of the first equity REITs in the United States, has a primary investment focus on retail shopping malls and strip and power centers located in the eastern half of the United States, primarily in the Mid-Atlantic region. Our portfolio currently consists of a total of 54 properties in 13 states, including 38 shopping malls, 13 strip and power centers and three properties under development. The operating retail properties have a total of approximately 34.6 million square feet. The operating retail properties that we consolidate for financial reporting purposes have a total of approximately 30.1 million square feet, of which we own approximately 23.8 million square feet. The operating retail properties that are owned by unconsolidated partnerships with third parties have a total of approximately 4.5 million square feet, of which 2.9 million square feet are owned by such partnerships. The ground-up development portion of our portfolio contains three properties in two states, with two classified as mixed use (a combination of retail and other uses) and one classified as other.

We are a fully integrated, self-managed and self-administered REIT that has elected to be treated as a REIT for federal income tax purposes. In general, we are required each year to distribute to our shareholders at least 90% of our net taxable income and to meet certain other requirements in order to maintain the favorable tax treatment associated with qualifying as a REIT.

OWNERSHIP STRUCTURE

We hold our interests in our portfolio of properties through our operating partnership, PREIT Associates, L.P. (PREIT Associates). We are the sole general partner of PREIT Associates and, as of December 31, 2009, held a 95.0% controlling interest in PREIT Associates. We consolidate PREIT Associates for financial reporting purposes. We own our interests in our properties through various ownership structures, including partnerships or tenancy in common arrangements (collectively, partnerships). PREIT owns interests in some of these properties directly and has pledged the entire economic benefit of ownership to PREIT Associates. PREIT Associates' direct or indirect economic interest in the balance of the properties ranges from 40% to 50% (for eight partnership properties) up to 100%. See Item 2. Properties Retail Properties.

We provide our management, leasing and real estate development services through our subsidiaries PREIT Services, LLC (PREIT Services), which generally develops and manages properties that we consolidate for financial reporting purposes, and PREIT-RUBIN, Inc. (PRI), which generally develops and manages properties that we do not consolidate for financial reporting purposes, including properties in which we own interests through partnerships with third parties and properties that are owned by third parties in which we do not own an interest. PRI is a taxable REIT subsidiary, as defined by federal tax laws, which means that it is able to offer an expanded menu of services to tenants without jeopardizing our continuing qualification as a REIT under federal tax law.

RECENT DEVELOPMENTS

Amended, Restated and Consolidated Senior Secured Credit Agreement

On March 11, 2010, PREIT Associates and PRI, together with two of our other subsidiaries, entered into an Amended, Restated and Consolidated Senior Secured Credit Agreement comprised of 1) an aggregate \$520.0 million term loan made up of a \$436.0 million term loan (Term Loan A) to PREIT Associates and PRI and a separate \$84.0 million term loan (Term Loan B) to the other two subsidiaries (collectively, the 2010 Term Loan) and 2) a \$150.0 million revolving line of credit (the Revolving Facility, and, together with the 2010 Term Loan, the 2010 Credit Facility) with Wells Fargo Bank, National Association, and the other financial institutions signatory thereto. All capitalized terms used and not otherwise defined in the description of the 2010 Credit Facility have the meanings ascribed to such terms in the 2010 Credit Facility.

The 2010 Credit Facility replaces the previously existing \$500.0 million unsecured revolving credit facility, as amended (the 2003 Credit Facility), and a \$170.0 million unsecured term loan (the 2008 Term Loan) that had been scheduled to mature on March 20, 2010.

The initial term of the 2010 Credit Facility is three years, and we have the right to one 12-month extension of the initial maturity date, subject to certain conditions and to the payment of an extension fee of 0.50% of the then outstanding Commitments.

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

We used the initial proceeds from the 2010 Credit Facility to repay outstanding balances under the 2003 Credit Facility and 2008 Term Loan. At closing, the \$520.0 million 2010 Term Loan was fully outstanding and \$70.0 million was outstanding under the Revolving Facility.

Amounts borrowed under the 2010 Credit Facility bear interest at a rate between 4.00% and 4.90% per annum, depending on our leverage, in excess of LIBOR, with no floor. The initial rate in effect was 4.90% per annum in excess of LIBOR. In determining our leverage (the ratio of Total Liabilities to Gross Asset Value), the capitalization rate used to calculate Gross Asset Value is 8.00%. The unused portion of the Revolving Facility is subject to a fee of 0.40% per annum.

The obligations under Term Loan A are secured by first priority mortgages on 20 of our properties and a second lien on one property, and the obligations under Term Loan B are secured by first priority leasehold mortgages on two properties. The foregoing properties constitute substantially all of our previously unencumbered retail properties.

The aggregate amount of the lender Revolving Commitments and 2010 Term Loan under the 2010 Credit Facility is required to be reduced by \$33.0 million by March 11, 2011, by a cumulative total of \$66.0 million by March 11, 2012 and by a cumulative total of \$100.0 million by March 11, 2013 (if we exercise our right to extend the Termination Date), including all payments (except payments pertaining to the Release Price of a Collateral Property) resulting in permanent reduction of the aggregate amount of the Revolving Commitments and 2010 Term Loan.

Table of Contents**Mortgage Loan Activity**

The following table presents the mortgage loans that we or partnerships in which we own interests entered into after January 1, 2009:

Financing Date	Property	Amount Financed or Extended (in millions of dollars):	Stated Rate	Hedged Rate	Maturity
2009 Activity:					
March	New River Valley				
	Center ⁽¹⁾	\$ 16.3	LIBOR plus 3.25%	5.75%	March 2012
June	Pitney Road Plaza ⁽²⁾	6.4	LIBOR plus 2.50%	NA	June 2010
June	Lycoming Mall ⁽³⁾	33.0	6.84% fixed	NA	June 2014
September					
	Northeast Tower				
	Center ⁽⁴⁾	20.0	LIBOR plus 2.75%	NA	September 2011
October	Red Rose Commons ⁽⁵⁾	23.9	LIBOR plus 4.00%	NA	October 2011
2010 Activity:					
January	New River Valley Mall ⁽⁶⁾	30.0	LIBOR plus 4.50%	6.33%	January 2013
March	Lycoming Mall ⁽³⁾	2.5	6.84% fixed	NA	June 2014

⁽¹⁾ Mortgage loan has a term of three years and two one-year extension options.

⁽²⁾ We have made draws of \$6.4 million and a one time principal payment of \$1.9 million in connection with the sale of a parcel at the property. The loan has one six-month extension option during the construction period. We have the option to convert the loan to a two-year loan at the end of the construction period.

⁽³⁾ The mortgage loan agreement provides for a maximum loan amount of \$38.0 million. The initial amount of the mortgage loan was \$28.0 million. We took additional draws of \$5.0 million in October 2009 and \$2.5 million in March 2010.

⁽⁴⁾ In October 2009, we repaid the \$20.0 million mortgage loan on Northeast Tower Center in connection with the sale of a controlling interest in this property.

⁽⁵⁾ Interest only in its initial term. The unconsolidated partnership that owns Red Rose Commons entered into the mortgage loan. Our interest in the unconsolidated partnership is 50%.

⁽⁶⁾ Interest only. The mortgage loan has a three year term and one one-year extension option. \$25.0 million of the principal amount was swapped to a fixed rate of 6.33%.

Table of Contents

Other Mortgage Activity

In January 2009, we repaid a \$15.7 million mortgage loan on Palmer Park Mall in Easton, Pennsylvania using funds from the 2003 Credit Facility and the 2008 Term Loan.

In June 2009, we made a principal payment of \$2.4 million and exercised the first of two one-year extension options on the mortgage loan on the One Cherry Hill Plaza office building in Cherry Hill, New Jersey.

In July 2009, the unconsolidated partnership that owns Lehigh Valley Mall exercised its third extension option of a \$150.0 million mortgage loan. We own an indirect 50% ownership interest in this entity.

In November 2009, we entered into a one-year extension of a \$34.3 million mortgage loan secured by Valley View Mall in La Crosse, Wisconsin, with two additional six-month extension options.

In November 2009, the unconsolidated partnership that owns Springfield Mall exercised its third extension option of a \$72.3 million mortgage loan. We own an indirect 50% ownership interest in this entity.

Repurchase of Exchangeable Notes

In 2009 and 2008, we repurchased \$104.6 million and \$46.0 million, respectively, in aggregate principal amount of our 4% Senior Exchangeable Notes due 2012 (Exchangeable Notes) in privately negotiated transactions in exchange for an aggregate \$47.2 million in cash and 4.3 million common shares, with a fair market value of \$25.0 million, in 2009, and for \$15.9 million in cash in 2008. We terminated an equivalent notional amount of the related capped calls in 2009 and 2008.

We recorded gains on extinguishment of debt of \$27.0 million and \$27.1 million in 2009 and 2008, respectively. In connection with the repurchases, we retired an aggregate of \$5.4 million and \$3.0 million in 2009 and 2008, respectively, of deferred financing costs and debt discount.

As of December 31, 2009, \$136.9 million in aggregate principal amount of our Exchangeable Notes (excluding debt discount of \$4.7 million) remained outstanding.

Redevelopment

We have reached the last phases of the projects in our current redevelopment program. Since the beginning of 2009, we reached several major milestones for four of our largest projects, including the opening of Nordstrom and the restaurants of Bistro Row at Cherry Hill Mall, the opening of Whole Foods Market and Café at Plymouth Meeting Mall, the opening of the offices of the Commonwealth of Pennsylvania at The Gallery at Market East and the opening of retail and office space at Voorhees Town Center. We also completed the redevelopment of Wiregrass Commons Mall with the second of two new anchors opening in 2009.

The following table sets forth the amount of the currently estimated project cost and the amount invested as of December 31, 2009 for each ongoing redevelopment project:

Redevelopment Project	Estimated Project Cost⁽¹⁾	Invested as of December 31, 2009
Cherry Hill Mall	\$ 218.0 million	\$ 211.3 million
Plymouth Meeting Mall	97.7 million	90.5 million
The Gallery at Market East	81.6 million	81.5 million
Voorhees Town Center	83.0 million	67.6 million
		\$ 450.9 million

- (1) Our projected share of costs is net of any expected tenant reimbursements, parcel sales, tax credits or other incentives.

Table of Contents**Development**

We are engaged in the development of three mixed use and other projects, although we do not expect to make material investments in these projects in the short term. As of December 31, 2009, we had incurred \$77.6 million of costs related to these three projects. The details of the White Clay Point, Springhills and Pavilion at Market East projects and the related costs have not been determined.

The following table sets forth the amount of the currently estimated project cost and amounts invested as of December 31, 2009 in each ground-up development project:

Development Project	Invested as of December 31, 2009
White Clay Point ⁽¹⁾	\$ 43.5 million
Springhills ⁽²⁾	33.4 million
Pavilion at Market East ⁽³⁾	0.7 million
	\$ 77.6 million

⁽¹⁾ Amount invested as of December 31, 2009 does not reflect an \$11.8 million impairment charge that we recorded in 2008. See the notes to our consolidated financial statements for further discussion of this charge.

⁽²⁾ Amount invested as of December 31, 2009 does not reflect an \$11.5 million impairment charge that we recorded in 2009. See the notes to our consolidated financial statements for further discussion of this charge.

⁽³⁾ The property is unconsolidated. The amount shown represents our share.

Acquisitions

In January 2008, we entered into an agreement under which we acquired a 0.1% general partnership interest and a 49.8% limited partnership interest in Bala Cynwyd Associates, L.P. (BCA), and an option to purchase the remaining partnership interests in BCA in two closings, one that occurred in the second quarter of 2009 and one that is expected to occur in the second quarter of 2010. BCA is the owner of One Cherry Hill Plaza, an office building located within the boundaries of our Cherry Hill Mall in Cherry Hill, New Jersey. We acquired this interest in BCA for \$3.9 million in cash paid at the first closing in February 2008. In June 2009, we acquired an additional 49.9% limited partner interest for 140,745 units of PREIT Associates (OP Units) and a nominal cash amount.

Dispositions

In May 2009, we sold an outparcel and related land improvements containing an operating restaurant at Monroe Marketplace in Selinsgrove, Pennsylvania for \$0.9 million. We recorded an asset impairment charge of \$0.1 million immediately prior to this transaction. No gain or loss was recorded from this sale.

In June 2009, we sold a two outparcels and related improvements adjacent to North Hanover Mall in Hanover, Pennsylvania for \$2.0 million. We recorded a gain of \$1.4 million from this sale.

In June 2009, we sold a land parcel adjacent to Woodland Mall in Grand Rapids, Michigan for \$2.7 million. The parcel contained a department store that was subject to a ground lease. We recorded a gain of \$0.2 million from this sale.

In August 2009, we sold Crest Plaza in Allentown, Pennsylvania for \$15.8 million. We recorded a gain of \$3.4 million from this sale.

In October 2009, we sold two outparcels and related improvements adjacent to Monroe Marketplace in Selinsgrove, Pennsylvania for \$2.8 million. No gain or loss was recorded from this sale.

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

In October 2009, we sold a parcel and related land improvements at Pitney Road Plaza in Lancaster, Pennsylvania for \$10.2 million. The parcel contained a home improvement store that was subject to a ground lease. We recorded a gain of \$2.7 million from this sale.

Table of Contents

In October 2009, we sold a controlling interest in Northeast Tower Center in Philadelphia, Pennsylvania for \$30.4 million. We recorded a gain of \$6.1 million from this sale. In connection with the sale, we repaid the mortgage loan associated with Northeast Tower Center with a balance of \$20.0 million at closing.

RETAIL REAL ESTATE INDUSTRY

Our primary investment focus is retail shopping malls and strip and power centers. The International Council of Shopping Centers, a retail real estate industry trade group, generally classifies properties based on their size and on the way they are characterized by their owners as follows:

Type of Center	Concept	Square Feet (including Anchors)	Typical Anchor(s)
MALLS			
Regional	General merchandise; fashion (typically enclosed)	400,000-800,000	Full-line department store; junior department store; mass merchant; discount department store; fashion apparel
Super Regional	Similar to regional center but has more variety and assortment	800,000+	Full-line department store; junior department store; mass merchant; fashion apparel
OPEN AIR CENTERS			
Neighborhood Center	Convenience	30,000-150,000	Supermarket
Community Center	General merchandise; convenience	100,000-350,000	Discount department store; supermarket; drug; home improvement; large specialty/discount apparel
Lifestyle Center	Upscale national chain specialty stores; dining and entertainment in outdoor setting	Typically 150,000 to 500,000	Not usually anchored in the traditional sense but may include book store; other large format specialty retailers; multiplex cinema; small department store
Power Center	Category-dominant anchors; few small tenants	250,000-600,000	Category killer ; home improvement; discount

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

			department store; warehouse
			club; off-price
Theme/Festival Center	Leisure; tourist-oriented; retail	80,000-250,000	Restaurants; entertainment
	and service		
Outlet Center	Manufacturers outlet stores	50,000-400,000	Manufacturers outlet stores
<i>Source: International Council of Shopping Centers</i>			

Malls are often tailored to the economy and demographics of their trade areas, and mall managers employ corresponding strategies in determining the mix of tenants, the merchandise offered and the related general price point. Usually, there are two or more anchors in regional malls. Super regional malls often have three or more anchor tenants. The anchors have historically served as one of the main draws to the mall, and are usually situated such that there are rows of smaller in-line stores in between them.

Retail real estate industry participants sometimes classify malls based on the average sales per square foot of in-line mall tenants, the population and average household income of the trade area and the geographic market, the growth rates of the population and average household income in the trade area and geographic market, and numerous other factors. Based on these factors, in general, malls that have high average sales per square foot and are in trade areas

Table of Contents

with large populations and high household incomes and/or growth rates are considered Class A malls, malls with average sales that are in the middle range of population or household income and/or growth rates are considered Class B malls, and malls with lower average sales and smaller populations and lower household incomes and/or growth rates are considered Class C malls. Although these classifications are defined differently by different market participants, in general, some of our malls are in the Class A range and many might be classified as Class B or Class C properties. The classification of a mall can change, and one of the goals of the redevelopments of our malls is to increase the average sales per square foot of the properties and thus potentially its Class, and correspondingly its rental income and cash flows, in order to maximize the value of the property.

PREIT'S BUSINESS

We are primarily engaged in the ownership, management, leasing, development, redevelopment and acquisition of retail shopping malls and strip and power centers. Many of our malls and centers are located in middle markets, as determined by various population and demographic measures, in the eastern half of the United States, primarily in the Mid-Atlantic region. Approximately 28.9% of our gross leasable area is in the Philadelphia metropolitan area.

Our operating retail real estate portfolio currently consists of 38 shopping malls and 13 strip and power centers in 13 states. The retail properties have a total of approximately 34.6 million square feet, of which we and partnerships in which we own an interest own approximately 26.7 million square feet. See Item 2. Properties.

In general, our malls include national or regional department stores, large format retailers or other anchors and a diverse mix of national, regional and local in-line stores offering apparel (women's, family, teen), shoes, eyewear, cards and gifts, jewelry, books/music/movies, electronics and sporting goods, among other things. To enhance the experience for shoppers, most of our malls have restaurants and/or food courts and convenient parking and some of the malls have multi-screen movie theaters and other entertainment options, either as part of the mall or on outparcels around the perimeter of the mall property. In addition, many of our malls also have restaurants, banks or other stores located on outparcels. In their geographic trade areas, our malls frequently serve as a type of town square: a central place for community, promotional and charitable events.

The largest mall in our retail portfolio contains approximately 1.3 million square feet and 139 stores, and the smallest contains approximately 0.4 million square feet and 46 stores. The power centers in our retail portfolio range from 165,000 to 780,000 square feet, while the strip centers range from 235,000 square feet to 275,000 square feet. We derive the substantial majority of our revenue from rent received under leases with tenants for space at retail properties in our real estate portfolio. In general, our leases require tenants to pay base rent, which is a fixed amount specified in the lease, and which is often subject to scheduled increases during the term of the lease for longer term leases. In addition or in the alternative, certain tenants are required to pay percentage rent, which can be either a percentage of their sales revenue that exceeds certain levels specified in their lease agreements, or a percentage of their total sales revenue. Also, many of our leases provide that the tenant will reimburse us for certain expenses for common area maintenance (CAM), real estate taxes, utilities, insurance and other operating expenses incurred in the operation of the retail properties subject, in some cases, to certain limitations. The proportion of the expenses for which tenants are responsible is generally related to the tenant's pro rata share of space at the property. In recent years, our properties are experiencing a trend towards more leases that provide for the rent amount to be determined on the basis of a percentage of sales in lieu of minimum rent as well as more gross leases (leases that provide that tenants pay a higher base rent amount in lieu of contributing toward common area maintenance costs and real estate taxes). In-line stores typically generate a majority of the revenue of a mall, with a relatively small proportion coming from anchor tenants and junior anchors or large format retailers.

BUSINESS STRATEGY

Our primary objective is to maximize the long-term value of the Company for our shareholders. To that end, our business goals are to obtain the highest possible rental income, tenant sales and occupancy at our properties in order to maximize our cash flows, funds from operations, funds available for distribution to shareholders, and other operating measures and results, and ultimately to maximize the values of our properties.

Table of Contents

Short- to Intermediate-Term Strategy

In 2009, our main goals were to:

substantially complete construction on the remaining projects in our current redevelopment program;

make progress on leasing these newly-redeveloped properties;

source the capital needed to fund such last phases of construction;

make progress on stabilizing our balance sheet; and

more closely match our expenses to our revenue.

Complete Construction on Redevelopment Projects. We have reached the last phases of construction on the projects in our current redevelopment program (primarily Cherry Hill Mall, Plymouth Meeting Mall, Voorhees Town Center and The Gallery at Market East), and have invested amounts representing the substantial majority of the estimated project costs. We also completed the redevelopment of Wiregrass Commons Mall with the second of two new anchors opening in 2009.

Make Leasing Progress at Redeveloped Properties. Since the beginning of 2009, we have reached several major milestones in leasing for four of our largest projects, including the opening of Nordstrom and the restaurants of Bistro Row at Cherry Hill Mall, the opening of Whole Foods Market and Café at Plymouth Meeting Mall, the opening of the offices of the Commonwealth of Pennsylvania at The Gallery at Market East and the opening of retail and office space at Voorhees Town Center.

Source Capital for Redevelopments. In late 2008 and in 2009, United States credit markets experienced significant dislocations and liquidity disruptions. These circumstances materially affected liquidity in the debt markets, making financing terms for borrowers less attractive, and in certain cases resulted in the limited availability or unavailability of certain types of debt financing. Nevertheless, in support of our 2009 goals, we successfully sourced the capital needed to finance the last phases of our redevelopment projects by obtaining new mortgage loans on newly developed or previously unencumbered properties, drawing on our 2003 Credit Facility, entering into the 2008 Term Loan, selling properties and outparcels, reducing general and administrative expenses and reducing our dividend.

Stabilize the Balance Sheet. Although our leverage remains high, we have taken steps to improve our balance sheet. In the first quarter of 2010, we entered into a three-year amended, restated and consolidated senior secured credit agreement made up of an aggregate \$520.0 million in term loans (the 2010 Term Loan) and a \$150.0 million Revolving Facility (together with the 2010 Term Loan, the 2010 Credit Facility) with Wells Fargo Bank, National Association, and the other financial institutions signatory thereto. The 2010 Credit Facility replaced the previously existing \$500.0 million unsecured 2003 Credit Facility and \$170.0 million unsecured 2008 Term Loan that had been scheduled to mature on March 20, 2010. We used the initial proceeds from the 2010 Credit Facility to repay outstanding balances under the 2003 Credit Facility and 2008 Term Loan.

We also repurchased \$104.6 million in aggregate principal amount of our Exchangeable Notes in privately negotiated transactions in exchange for an aggregate \$47.2 million in cash and 4.3 million common shares, with a fair market value of \$25.0 million, in 2009. As of December 31, 2009, \$136.9 million in aggregate principal amount of Exchangeable Notes (excluding debt discount of \$4.7 million) remained outstanding. We had originally issued \$287.5 million in aggregate principal amount of Exchangeable Notes (excluding debt discount).

Align Expenses More Closely with Revenue. The current downturn in the overall economy and the recent disruptions in the financial markets have reduced consumer confidence and have negatively affected consumer spending on retail goods. The weaker operating performance of retailers has resulted in delays or deferred decisions regarding the openings of new retail stores at our properties and of lease renewals and has impaired the ability of our current tenants to meet their obligations to us. Consequently, the net operating income generated by our properties has decreased. In response, we have endeavored to align our costs more closely with our decreased net operating income, through cuts in nonpayroll general and administrative expenses, as well as a reduction in force.

Table of Contents

In 2010 and over the next few years, our business strategy is necessarily more closely linked to our capital strategy over that period, given the state of the economy generally and the state of the credit and capital markets, and hence our goals are to:

heighten our focus on operating our properties, including matching costs with revenue, and lease the space in properties where the construction for redevelopment projects has recently been completed;

strengthen our balance sheet;

pursue new initiatives designed to generate additional revenue, and pair our skill sets in property management, redevelopment and development with capital from various sources to produce favorable investment returns (subject to the terms of the 2010 Credit Facility);

prudently optimize the portfolio of properties by nurturing assets with growth potential, disposing of assets that no longer meet our hurdles, and repositioning challenged assets using a mix of uses.

Heighten Focus on Property and Corporate Operations and Lease Redeveloped Space. Like many other companies experiencing the effects of the current economic downturn, we are continuing to review our property and corporate operations in detail. We are taking steps designed to increase our revenues and net operating income. We are also pursuing actions to reduce our expenses. In addition, we continue to closely track our net operating income and our level of general, administrative and other expenses, and we will seek to maintain a run rate for these expenses that is supported by our net operating income.

In general, in all of our redevelopment projects, we intend to reach post-construction stabilization of the property as soon as possible. Currently, our leasing activities at our redeveloped and other properties face significant challenges because of reduced spending on retail goods. As a result, retailer performance has decreased, and we have experienced delays or deferred decisions regarding the openings of new retail stores. Nevertheless, we are redoubling our efforts to lease the available space at Cherry Hill Mall and Plymouth Meeting Mall following the significant recent investments in those assets. We are creatively seeking a variety of tenants at Voorhees Town Center, and we are continuing to pursue opportunities for the remaining retail portion of The Gallery at Market East.

Strengthen Our Balance Sheet. In March 2010, we entered into our 2010 Credit Facility, which extended the maturity date for \$670.0 million of financing until 2013, with an option to extend the maturity to 2014, subject to continuing covenant compliance. We have also reduced the aggregate principal amount outstanding of our Exchangeable Notes to \$136.9 million. The Exchangeable Notes mature in 2012. We are contemplating ways to reduce our leverage through a variety of means available to us, and subject to the terms of the 2010 Credit Facility. These means might include issuing equity securities if market conditions are favorable, joint ventures or other partnerships or arrangements involving our contribution of assets, selling properties with values in excess of their mortgage loans or allocable debt and applying proceeds to debt reduction, or through other actions. Also, we might repurchase additional Exchangeable Notes, if we can do so on favorable terms.

Pursue New Revenue Streams; Pair Our Property Skills With New Sources of Capital. We believe that we possess core competencies in property management, redevelopment and development through our skilled and experienced employees in these areas. We have historically provided management, leasing and development services to affiliated and third-party retail and office property owners. We believe that we can further expand our third party management business, and we intend to aggressively pursue opportunities to manage additional properties. In 2010, we expanded our portfolio of managed properties to include Arnot Mall in Horseheads, New York. In addition, we are in the process of determining whether there are other sources of demand for the services that we can provide using our existing property management platform. We are engaging in a number of efforts to contribute our competencies in asset management and real estate redevelopment and development to a project or venture where another party contributes some or all capital or equity. These efforts are designed to enable us to generate a return from our investment of predominantly our skills and labor, rather than our capital. To these ends, we are pursuing opportunities in forms that include, among others, partnerships with institutional real estate investors, joint ventures, and investments or funding from government sources.

Table of Contents

Prudently Optimize the Portfolio. We review all of the assets in our portfolio frequently and, as the manager of this portfolio, we make determinations about which assets should be nurtured and receive additional investment in the form of effort or funds (subject to the terms and conditions of our 2010 Credit Facility), and which properties or parcels should be divested, because we do not believe they meet the financial or strategic criteria we apply, given economic, market and other circumstances. We also look for ways to maximize the value of assets that are challenged and that are deployed for only one type of use by investigating a mix of uses or a use, initiated by ourselves or with a partner, that involves a greater concentration of people at the property, such as for an office or a residential facility. If appropriate, we will seek to attract certain nontraditional tenants to these properties.

Long-Term Strategy

In the longer term, we believe that conditions in the overall economy will improve and the challenging conditions in the capital and credit markets will ease. We believe that consumer confidence and consumer spending on retail goods will eventually increase. We believe that such projected increases are likely to have a positive effect on retail sales and on demand for retail space. We believe that this demand will be seen at our properties, and in particular, our recently redeveloped properties, and will ultimately have a positive effect on our overall occupancy and net operating income. Such projected increases would also likely have a positive effect on our results of operations and financial positions, and, over time, on our liquidity position and our access to capital sources. However, additional factors that might cause future events, achievements or results to differ materially from those expressed or implied by our forward-looking statements include those discussed in the section entitled Item 1A. Risk Factors. At that time, we anticipate that we will resume our efforts to execute several components of our long-term strategy, which are as follows:

Asset Management, Leasing and Operations

We conduct active asset management of our properties in an effort to maximize and maintain occupancy and optimize the diversity and mix of tenants, merchandise choices and price points in order to attract a wider range of customers and increase sales by mall tenants. Sales gains can increase tenant satisfaction and make our properties attractive to our tenants and prospective tenants, which can increase the rent we receive from our properties. For example, we coordinate closely with tenants on new store locations in an effort to position our property for their latest concept or store prototype, which is designed to drive traffic and stimulate customer spending.

Some space at properties might be available for a shorter period of time, pending a lease with a permanent tenant. We strive to manage the use of this space through our specialty leasing function, which manages the short-term leasing of stores and the licensing of income-generating carts and kiosks, with the goal of maximizing the rent we receive during the period when a space is not subject to a longer term lease.

As an integral part of our property management, we also attempt to generate ancillary revenue, such as through marketing partnerships, and we work on controlling operating costs and expenses, in an effort to contain tenant operating costs.

Acquisitions

We seek to selectively acquire, in an opportunistic and disciplined manner, properties that are well-located and that we believe have strong potential for increased cash flows and appreciation in value if we apply our skills in leasing, asset management and redevelopment to the property. We also seek to acquire additional parcels or properties that are included within, or adjacent to, the properties already in our portfolio in order to gain greater control over the merchandising and tenant mix of a property.

Development

We pursue ground-up development of additional retail and mixed use projects that we expect can meet the financial hurdles we apply, given economic, market and other circumstances. We seek to leverage our skill sets in site selection, entitlement and planning, cost estimation and project management to develop new retail and mixed use properties in trade areas that we believe have sufficient demand for those properties to generate cash flows that meet the financial thresholds we establish in the given environment. We manage all aspects of these undertakings, including market and trade area research, site selection, acquisition, preliminary development work, construction and leasing.

Table of Contents

Redevelopment

We strive to increase the potential value of properties in our portfolio by redeveloping them. If we believe that a property is not achieving its potential, we engage in a focused leasing effort in order to increase the property's performance. If we believe the property has the potential to support a more significant redevelopment project, we consider a formal redevelopment plan. Our redevelopment efforts are intended to increase the value of the property, and are designed to increase customer traffic and attract retailers, which can, in turn, lead to increases in sales, occupancy levels and rental rates. Our efforts to maximize a property's potential can also serve to maintain or improve that property's competitive position.

The tactics we use in our efforts to increase the potential value of properties include: remerchandising the tenant mix to capitalize on the economy and demographics of the property's trade area; creating a diversified anchor mix including fashion, value-oriented and traditional department stores; attracting non-traditional junior anchors and mall tenants to draw more customers to the property; incorporating sit down restaurants and other entertainment options to extend shoppers' time spent on the property; generating synergy by introducing components to mall properties; and redirecting traffic flow and creating additional space for in-line stores by relocating food courts.

Dispositions

We regularly conduct portfolio property reviews and, if appropriate, we dispose of properties or outparcels that we do not believe meet the financial and strategic criteria we apply, given economic, market and other circumstances. Disposing of these properties can enable us to redeploy our capital to other uses, such as to repay debt, to reinvest in other real estate assets and development and redevelopment projects and for other corporate purposes.

REIT Status; 2010 Credit Facility; Capital Availability

To maintain our status as a REIT, we are required, under federal tax laws, to distribute to shareholders 90% of our net taxable income, which generally leaves insufficient funds to finance major initiatives internally. Because of these requirements, we would ordinarily fund most of our significant capital requirements, such as the capital for redevelopments, development and acquisitions, through secured and unsecured indebtedness and, when appropriate, the issuance of additional equity securities.

However, as described above, in the first quarter of 2010, we entered into the three year 2010 Credit Facility. The 2010 Credit Facility contains affirmative and negative covenants. There are also provisions regarding the mandatory pay down of certain amounts over the term of the 2010 Credit Facility and the application of proceeds from a Capital Event or a Refinance Event, as defined in the 2010 Credit Facility. During the term of the 2010 Credit Facility, these covenants and provisions significantly limit our ability to use our cash flows and any debt or equity capital we obtain to execute our long-term strategy until significant amounts have been used toward paying down the amounts owed under the 2010 Credit Facility.

In addition, our ability to finance our growth using these sources depends, in part, on our creditworthiness, the availability of credit to us or the market for our securities at the time or times we need capital, subject to conditions available in the capital markets. The United States credit markets have recently experienced significant dislocations and liquidity disruptions. These circumstances have materially affected liquidity in the debt markets, making financing terms for borrowers less attractive, and in certain cases have resulted in the limited availability or unavailability of certain types of debt financing. Continued uncertainty in the credit markets might negatively impact our ability to access additional debt financing at reasonable terms, which might negatively affect our ability to fund our long-term strategies and other business initiatives. See Item 1A. Risk Factors.

Table of Contents

CAPITAL STRATEGY

In support of the long-term business strategies described above, our long-term corporate finance objective is to maximize the availability and minimize the cost of the capital we employ to fund our operations. In pursuit of this objective and for other business reasons, we seek the broadest range of funding sources (including commercial banks, institutional lenders, equity investors and joint venture partners) and funding vehicles (including mortgage loans, commercial loans and debt and equity securities) available to us on the most favorable terms. We pursue this goal by maintaining relationships with various capital sources and utilizing a variety of financing instruments, enhancing our flexibility to execute our business strategy in different economic environments or at different points in the business cycle.

Short- to Intermediate-Term Capital Strategy

While our long-term corporate finance objective has not changed, we have been making efforts to adjust the actions we take in pursuit of that goal, given current conditions in the economy, the capital markets and the retail industry. The difficult conditions in the market for debt capital and commercial mortgage loans, including the commercial mortgage backed securities market, and the downturn in the general economy and its effect on retail sales, as well as our significant leverage resulting from our redevelopment program and other development activity, have combined to necessitate that we vary our approach to obtaining, using and recycling capital, and have led to some of the actions and tactics described below. In pursuit of our corporate finance objective, we intend to consider all of our available options for accessing the capital markets, given our position and constraints.

In 2009, as described above under Business Strategy, we successfully sourced the capital needed to finance the last phases of our redevelopment projects by obtaining new mortgage loans on newly developed or previously unencumbered properties, drawing on our 2003 Credit Facility, selling properties and outparcels, reducing general and administrative expenses and reducing our dividend. We also repurchased \$104.6 million in aggregate principal amount of our Exchangeable Notes, using cash and common shares. As of December 31, 2009, \$136.9 million in aggregate principal amount of Exchangeable Notes (excluding debt discount of \$4.7 million) remained outstanding.

In March 2010, we entered into the three year secured 2010 Credit Facility (with a one year extension option), with its aggregate \$520.0 million 2010 Term Loan and \$150.0 million Revolving Facility, which replaced the previous \$500.0 million unsecured revolving 2003 Credit Facility and \$170.0 million unsecured 2008 Term Loan. The obligations under the new 2010 Credit Facility are secured by first priority mortgages or leasehold mortgages on 22 of our previously unencumbered properties, and a second lien on one property.

Through the end of 2012, 12 mortgage loans with an aggregate principal balance of \$556.1 million as of December 31, 2009 will mature. Approximately half of the mortgage loans will have balances of more than \$30.0 million, and a mortgage loan on Cherry Hill Mall has a remaining balance in excess of \$175.0 million. We believe that, in the aggregate, the values of these properties will be sufficient to support replacement financing, although we expect conditions in the credit market to remain difficult. See Item 1A. Risk Factors. In addition, the remaining balance of our unsecured Exchangeable Notes matures in 2012. Subject to the terms of the 2010 Credit Facility, we will continue to seek to opportunistically reduce the balance of the Exchangeable Notes, and we intend to review all available options to address their maturity in 2012, including the use of such things as internally generated cash flows, excess refinancing proceeds, or the refinancing or extending of the Exchangeable Notes in a similar or modified form.

As described above in Business Strategy, we are contemplating ways to reduce our leverage through a variety of means available to us, and subject to and in accordance with the terms of the 2010 Credit Facility. These steps might include obtaining equity capital, including through the issuance of equity securities if market conditions are favorable, through joint ventures or other partnerships or arrangements involving our contribution of assets with institutional investors, private equity investors or other REITs, through sales of properties with values in excess of their mortgage loans or allocable debt and application of the excess proceeds to debt reduction, or through other actions.

Table of Contents

Long-Term Capital Strategy

In general, in determining the amount and type of debt capital to employ in our business, we consider several factors, including: general economic conditions, the capital market environment, prevailing and forecasted interest rates for various debt instruments, the cost of equity capital, property values, capitalization rates for mall properties, our financing needs for redevelopment, development and acquisition opportunities, the debt ratios of other mall REITs and publicly-traded real estate companies, and the requirement under federal tax laws for REITs to distribute at least 90% of net taxable income, among other factors. An aspect of our approach to debt financing is that we strive to lengthen and stagger the maturities of our debt obligations in order to better manage our future capital requirements.

The United States credit markets have recently experienced significant dislocations and liquidity disruptions. These circumstances have materially affected liquidity in the debt markets, making financing terms for borrowers less attractive, and in certain cases have resulted in the limited availability or unavailability of certain types of debt financing. Continued uncertainty in the credit markets might negatively affect our ability to access additional debt financing at reasonable terms, which might negatively affect our ability to fund our future redevelopment and development projects and other business initiatives. A prolonged downturn in the credit markets might cause us to seek alternative sources of financing, which could potentially be less attractive and might require us to adjust our business plan accordingly. In addition, these factors might make it more difficult for us to sell properties or outparcels or might adversely affect the price we receive for properties that we do sell, as prospective buyers might experience increased costs of debt financing or difficulties in obtaining debt financing. Events in the credit markets have also had an adverse effect on other financial markets in the United States, which might make it more difficult or costly for us to raise capital through the issuance of equity. See Item 1A. Risk Factors.

In the normal course of business, we are exposed to financial market risks, including interest rate risk on our interest-bearing liabilities. We attempt to limit these risks by following established risk management policies, procedures and strategies, including the use of various types of financial instruments. To manage interest rate risk and limit overall interest cost, we may employ interest rate swaps, options, forwards, caps and floors or a combination thereof depending on our underlying exposure, and subject to our ability to satisfy collateral requirements.

COMPETITION

Competition in the retail real estate industry is intense. We compete with other public and private retail real estate companies, including companies that own or manage malls, strip centers, power centers, lifestyle centers, factory outlet centers, theme/festival centers and community centers, as well as other commercial real estate developers and real estate owners, particularly those with properties near our properties, on the basis of several factors, including location and rent charged. We compete with these companies to attract customers to our properties, as well as to attract anchor and in-line store tenants. We also compete to acquire land for new site development, during more favorable economic conditions. Our malls and our strip and power centers face competition from similar retail centers, including more recently developed or renovated centers that are near our retail properties. We also face competition from a variety of different retail formats, including internet retailers, discount or value retailers, home shopping networks, mail order operators, catalogs and telemarketers. This competition could have a material adverse effect on our ability to lease space and on the amount of rent that we receive. Our tenants face competition from companies at the same and other properties and from other retail formats as well.

We believe that the main criteria used by retailers in deciding where to locate include local trade area demographics, the property location, the attractiveness of the store location and the overall property, the rental rate, the total number of stores in the area and their geographic spread, the type and mix of other retailers at the property, and the management and operational skill of the landlord. Applying these criteria to our properties, we believe that several of our properties are located in submarkets or local trade areas with demographics that are favorable for retailers, that our significant redevelopment program is intended to make the properties being redeveloped more attractive and that the middle markets where several of our properties are located are not overly saturated with retailers, although our properties face significant challenges because the downturn in the overall economy and reduced consumer confidence have negatively affected consumer spending on retail goods.

The development of competing retail properties and the related increased competition for tenants might require us to make capital improvements to properties that we would have deferred or would not have otherwise planned to make

Table of Contents

and might also affect the occupancy and net operating income of such properties. Any such capital improvements undertaken individually or collectively would be subject to the terms and conditions of our 2010 Credit Facility and involve costs and expenses that could adversely affect our results of operations.

In addition, we compete with many other entities engaged in real estate investment activities for acquisitions of malls, other retail properties and other prime development sites, including institutional pension funds, other REITs and other owner-operators of retail properties. Our efforts to compete are also subject to the terms and conditions of our 2010 Credit Facility. Given current economic, capital market, and retail industry conditions, however, there has been substantially less competition with respect to acquisition activity in recent quarters. When we seek to make acquisitions, these competitors might drive up the price we must pay for properties, parcels, other assets or other companies or might themselves succeed in acquiring those properties, parcels, assets or companies. In addition, our potential acquisition targets might find our competitors to be more attractive suitors if they have greater resources, are willing to pay more, or have a more compatible operating philosophy. In particular, larger REITs might enjoy significant competitive advantages that result from, among other things, a lower cost of capital, a better ability to raise capital, a better ability to finance an acquisition and enhanced operating efficiencies. We might not succeed in acquiring retail properties or development sites that we seek, or, if we pay a higher price for a property and/or generate lower cash flow from an acquired property than we expect, our investment returns will be reduced, which will adversely affect the value of our securities.

ENVIRONMENTAL

Under various federal, state and local laws, ordinances, regulations and case law, an owner, former owner or operator of real estate might be liable for the costs of removal or remediation of hazardous or toxic substances present at, on, under, in or released from its property, regardless of whether the owner, operator or other responsible party knew of or was at fault for the release or presence of hazardous or toxic substances. The responsible party also might be liable to the government or to third parties for substantial property damage, investigation costs and clean up costs. Even if more than one person might have been responsible for the contamination, each person covered by the environmental laws might be held responsible for all of the clean-up costs incurred. In addition, some environmental laws create a lien on the contaminated site in favor of the government for damages and costs the government incurs in connection with the contamination. Contamination might adversely affect the owner's ability to sell or lease real estate or borrow with real estate as collateral. In connection with our ownership, operation, management, development and redevelopment of properties, or any other properties we acquire in the future, we might be liable under these laws and might incur costs in responding to these liabilities.

We are aware of certain environmental matters at some of our properties. We have, in the past, investigated and, where appropriate, performed remediation of such environmental matters, but we might be required in the future to perform testing relating to these matters and further remediation might be required, or we might incur liability as a result of such environmental matters. Environmental matters at our properties include the following:

Asbestos. Asbestos-containing materials are present in a number of our properties, primarily in the form of floor tiles, mastics, roofing materials and adhesives. Fire-proofing material containing asbestos is present at some of our properties in limited concentrations or in limited areas. Under applicable laws and practices, asbestos-containing materials in good, non-friable condition are allowed to be present, although removal might be required in certain circumstances. In particular, in the course of any redevelopment, renovation, construction or build out of tenant space, asbestos-containing materials are generally removed.

Underground and Above Ground Storage Tanks. Underground and above ground storage tanks are or were present at some of our properties. These tanks were used to store waste oils or other petroleum products primarily related to the operation of automobile service center establishments at those properties. In some cases, the underground storage tanks have been abandoned in place, filled in with inert materials or removed and replaced with above ground tanks. Some of these tanks might have leaked into the soil, leading to ground water and soil contamination. Where leakage has occurred, we might incur investigation, remediation and monitoring costs if responsible current or former tenants, or other responsible parties, are unavailable to pay such costs.

Ground Water and Soil Contamination. Ground water contamination has been found at some properties in which we currently or formerly had an interest. At some properties, dry cleaning operations, which might have used solvents, contributed to ground water and soil contamination.

Two of our malls also contain wastewater treatment facilities that treat wastewater at the malls before discharge into

Table of Contents

local streams. Operation of these facilities is subject to federal and state regulation.

Each of our retail properties has been subjected to a Phase I or similar environmental audit (which involves a visual property inspection and a review of records, but not soil sampling or ground water analysis) by environmental consultants. These audits have not revealed, and we are not aware of, any environmental liability that we believe would have a material adverse effect on our results of operations. It is possible, however, that there are material environmental liabilities of which we are unaware. Also, we cannot assure you that future laws will not impose any material environmental liability, or that the current environmental condition of our properties will not be affected by the operations of our tenants, by the existing condition of the land, by operations in the vicinity of the properties (such as the presence of underground storage tanks) or by the activities of unrelated third parties.

We have environmental liability insurance coverage for the types of environmental liabilities described above, which currently covers liability for pollution and on-site remediation of up to \$10.0 million per occurrence and \$20.0 million in the aggregate. We cannot assure you that this coverage will be adequate to cover future environmental liabilities. If this environmental coverage were inadequate, we would be obligated to fund those liabilities. We might be unable to continue to obtain insurance for environmental matters, at a reasonable cost or at all, in the future.

In addition to the costs of remediation, we might incur additional costs to comply with federal, state and local laws relating to environmental protection and human health and safety generally. There are also various federal, state and local fire, health, life-safety and similar regulations that might be applicable to our operations and that might subject us to liability in the form of fines or damages for noncompliance. The cost described above, individually or in the aggregate, could adversely affect our results of operations.

EMPLOYEES

We had 712 employees at our properties and in our corporate office as of December 31, 2009. None of our employees are represented by a labor union.

INSURANCE

We have comprehensive liability, fire, flood, terrorism, extended coverage and rental loss insurance that we believe is adequate and consistent with the level of coverage that is standard in our industry. We cannot assure you, however, that our insurance coverage will be adequate to protect against a loss of our invested capital or anticipated profits, or that we will be able to obtain adequate coverage at a reasonable cost in the future.

STATUS AS A REIT

We conduct our operations in a manner intended to maintain our qualification as a REIT under the Internal Revenue Code of 1986, as amended. Generally, as a REIT, we will not be subject to federal or state income taxes on our net taxable income that we currently distribute to our shareholders. Our qualification and taxation as a REIT depend on our ability to meet various qualification tests (including dividend distribution, asset ownership and income tests) and certain share ownership requirements prescribed in the Internal Revenue Code.

CORPORATE HEADQUARTERS

Our principal executive offices are located at The Bellevue, 200 South Broad Street, Philadelphia, Pennsylvania 19102.

SEASONALITY

There is seasonality in the retail real estate industry. Retail property leases often provide for the payment of a portion of rent based on a percentage of a tenant's sales revenue over certain levels. Income from such rent is recorded only after the minimum sales levels have been met. The sales levels are often met in the fourth quarter, during the December holiday season. Also, many new and temporary leases are entered into later in the year in anticipation of the holiday season, and there is a higher concentration of tenants vacating their space early in the year. As a result, our occupancy and cash flows are generally higher in the fourth quarter and lower in the first quarter, excluding the effect of ongoing redevelopment projects. Our concentration in the retail sector increases our exposure to seasonality and has resulted and is expected to continue to result in a greater percentage of our cash flows being received in the fourth quarter.

Table of Contents

AVAILABLE INFORMATION

We maintain a website with the address www.preit.com. We are not including or incorporating by reference the information contained on our website into this report. We make available on our website, free of charge and as soon as practicable after filing with the SEC, copies of our most recently filed Annual Report on Form 10-K, all Quarterly Reports on Form 10-Q and all Current Reports on Form 8-K filed during each year, including all amendments to these reports, if any. In addition, copies of our corporate governance guidelines, codes of business conduct and ethics (which include the code of ethics applicable to our chief executive officer, principal financial officer and principal accounting officer) and the governing charters for the audit, nominating and governance, and executive compensation and human resources committees of our Board of Trustees are available free of charge on our website, as well as in print to any shareholder upon request. We intend to comply with the requirements of Item 5.05 of Form 8-K regarding amendments to and waivers under the code of business conduct and ethics applicable to our chief executive officer, principal financial officer and principal accounting officer by providing such information on our website within four days after effecting any amendment to or granting any waiver under that code, and we will maintain such information on our website for at least twelve months.

Table of Contents

ITEM 1A. RISK FACTORS.

RISKS RELATED TO OUR INDEBTEDNESS AND OUR FINANCING

We have substantial debt, which could adversely affect our overall financial health and our operating flexibility. We require significant cash flows to satisfy our debt. If we are unable to satisfy these obligations, we might be constrained from using our cash flow for other purposes or might default on our obligations.

We use a substantial amount of debt to finance our business. As of December 31, 2009, we had an aggregate consolidated indebtedness outstanding (excluding debt premium and debt discount) of \$2,567.3 million, \$1,774.4 million of which was secured by certain of our properties and approximately \$792.9 million of which was unsecured indebtedness. In 2009, we obtained an aggregate of approximately \$75.6 million in new indebtedness and we repaid \$39.9 million of existing mortgage debt. These indebtedness amounts do not include our proportionate share of indebtedness of our partnership properties, which was approximately \$181.8 million at December 31, 2009. Our consolidated debt represented 81.6% of our total market capitalization as of December 31, 2009. In March 2010, we entered into a new three-year 2010 Credit Facility comprised of a \$520.0 million Term Loan and a \$150.0 million Revolving Facility, which replaced the previously existing \$500.0 million unsecured revolving 2003 Credit Facility, and \$170.0 million unsecured 2008 Term Loan.

Our substantial indebtedness involves significant obligations for the payment of interest and principal. As of December 31, 2009, we had \$496.1 million of variable rate debt, not including any variable rate debt held by our unconsolidated partnerships. Increases in interest rates will increase our cash interest payments on the variable rate debt we have outstanding from time to time. Amounts borrowed under the 2010 Credit Facility bear interest at a rate between 4.00% and 4.90% per annum, depending upon our leverage, over LIBOR or the LIBOR Market Index Rate, as compared to a rate of between 0.95% and 2.00% per annum over LIBOR under the 2003 Credit Facility. If we do not have sufficient cash flow from operations, we might not be able to make all required payments of principal and interest on our debt, which could result in a default or have a material adverse effect on our financial condition and results of operations, and which might adversely affect our ability to make distributions to shareholders.

In addition to our current debt, we might incur additional debt in the future in the form of mortgage loans, unsecured borrowings, 2010 Credit Facility borrowings or other vehicles in order to develop or redevelop properties, to finance acquisitions, or for other general corporate purposes, subject to the terms and conditions of our 2010 Credit Facility.

Our substantial obligations arising from our indebtedness could also have other negative consequences to our shareholders, including accelerating a significant amount of our debt if we are not in compliance with the terms of such debt or, if such debt contains cross-default or cross-acceleration provisions, other debt. If we fail to meet our obligations under our debt, we could lose assets due to foreclosure or sale on unfavorable terms, which could create taxable income without accompanying cash proceeds, or such failure could harm our ability to obtain additional financing in the future for working capital, capital expenditures, debt service requirements, acquisitions, development and redevelopment activities, execution of our business strategy or other general corporate purposes. Also, our indebtedness and mandated debt service might limit our ability to refinance existing debt or to do so at a reasonable cost, might make us more vulnerable to adverse industry and economic conditions, such as the current downturn, might limit our ability to respond to competition or to take advantage of opportunities, and might discourage business partners from working with us or counterparties from entering into hedging transactions with us.

If we were unable to comply with the covenants in our 2010 Credit Facility, we might be adversely affected.

Our new \$670.0 million 2010 Credit Facility, comprised of a \$520.0 million 2010 Term Loan and a \$150.0 million Revolving Facility, requires us to satisfy certain customary affirmative and negative covenants and to meet numerous financial tests, including tests relating to our leverage, interest coverage, fixed charge coverage, and tangible net worth.

We expect the current downturn and conditions in the credit and capital markets and the retail industry to continue to

Table of Contents

affect our operating results. The leverage covenant generally takes our net operating income and applies a capitalization rate to calculate Gross Asset Value, and consequently, deterioration in our operating performance also affects the calculation of our leverage. In addition, a material decline in future operating results could affect our ability to comply with other financial ratio covenants contained in our 2010 Credit Facility, which are calculated on a trailing four quarter basis. These covenants could restrict our ability to pursue development and redevelopment projects or property acquisitions, limit our ability to respond to changes and competition, and reduce our flexibility in conducting our operations by limiting our ability to borrow money, sell or place liens on assets, manage our cash flows, repurchase securities, make capital expenditures, make distributions to equity holders or engage in acquisitions.

The 2010 Credit Facility contains mandatory pay downs over the three year term and additional covenants that will limit our use of cash flow and the proceeds from various events. In general, the proceeds from any event by which we raise additional capital, whether through an asset sale, joint venture, additional secured or unsecured debt, issuance of equity, or from excess proceeds after the sale of a collateral property and payment of the predetermined release price, must be applied to the 2010 Credit Facility. The specific amounts applied to each component of the 2010 Credit Facility depend on the corporate debt yield and the facility debt yield, which is determined based on the net operating income of collateral properties during the preceding 12 months divided by the amount outstanding under the 2010 Credit Facility. Hence, our ability to use our cash flow or the proceeds of a capital or refinance event depends on the net operating income generated by the 22 properties that secure the 2010 Credit Facility with first liens, and a deterioration in the performance of these properties might restrict us from accessing funds from the 2010 Credit Facility for other purposes. Also, the predetermined release price for a property might exceed the amount we receive in a sale transaction for a collateral property, which might require us to deliver some additional cash from other sources to the lenders.

An inability to comply with these covenants would require us to seek waivers or amendments. There is no assurance that we could obtain such waivers or amendments, and even if obtained, we would likely incur additional costs. Our inability to obtain any such a waiver or amendment could result in a breach and a possible event of default under our 2010 Credit Facility, which could allow the lenders to discontinue lending or issuing letters of credit, terminate any commitments they have to provide us with additional funds and/or declare amounts outstanding to be immediately due and payable. There is no assurance that we would have sufficient funds to repay such obligations or that we could obtain alternative funding on terms acceptable to us. If we are unable to refinance our debt on acceptable terms, including at the maturity of our 2010 Credit Facility, we might be forced to dispose of properties on unfavorable terms, potentially resulting in losses that reduce cash flow from operating activities. If a default were to occur, we might have to refinance the debt through additional secured debt financing, private or public offerings of debt securities, or additional equity financings. Any of such consequences could negatively affect our financial position, results of operations, cash flow and ability to make capital expenditures and distributions to shareholders.

We might not be able to refinance our existing obligations or obtain the capital required to finance our new business initiatives. Recent disruptions in the credit markets could affect our ability to obtain debt financing on terms acceptable to us, or at all, and have other adverse effects on us.

The REIT provisions of the Internal Revenue Code generally require the distribution to shareholders of 90% of a REIT's net taxable income, excluding net capital gains, which generally leaves insufficient funds to finance major initiatives internally. Due to these requirements, and subject to the terms of the 2010 Credit Facility, we fund certain capital requirements, such as the capital for renovations, expansions, redevelopments and other non-recurring capital improvements, scheduled debt maturities, and acquisitions of properties or other assets, through secured and unsecured indebtedness and, when appropriate, the issuance of additional equity securities.

As of December 31, 2009, we had approximately \$656.0 million of indebtedness (including \$486.0 million under the \$500.0 million revolving 2003 Credit Facility and the \$170.0 million 2008 Term Loan that was replaced by the 2010 Credit Facility in March 2010), \$63.8 million of indebtedness at our consolidated properties and \$112.6 million of indebtedness of our unconsolidated partnerships that matures on or before December 31, 2010. Also, subject to the terms and conditions of our 2010 Credit Facility, we estimate that we will need \$40.4 million of additional capital to complete our current development and redevelopment projects, excluding White Clay Point, Springhills and Pavilion at Market East, because the total cost of these projects has not yet been determined. In the past, one avenue available to us to finance our obligations or new business initiatives has been to obtain unsecured debt, based in part on the existence of properties in our portfolio that were not subject to mortgage loans. The terms of the 2010 Credit Facility include our grant of a security interest consisting of a first lien on 22 properties and a second lien on one property. As a result, we have very few

Table of Contents

remaining assets that we could use to support unsecured debt financing. Our lack of properties in the portfolio that could be used to support unsecured debt might limit our ability to obtain capital in this way. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources for information about our available sources of funds. Our continued ability to finance our growth using these sources depends, in part, on our creditworthiness, our ability to refinance our existing debt as it comes due, the availability of credit to us or the market for our equity securities at the time or times we need capital, and on conditions in the capital markets.

The United States credit markets have recently experienced significant dislocations and liquidity disruptions. These circumstances have materially affected liquidity in the debt markets, making financing terms for borrowers less attractive, and in certain cases have resulted in the limited availability or unavailability of certain types of debt financing. Continued uncertainty in the credit markets might negatively affect our ability to access additional debt financing on terms acceptable to us, or at all, which might negatively affect our ability to fund the remaining amount needed for our current redevelopment and development projects and other business initiatives. A prolonged downturn in the credit markets might cause us to seek alternative sources of financing, which could be on less attractive terms and might require us to adjust our business plan accordingly. In addition, real or perceived decreases in the values of our properties resulting from the current downturn in the economy might also affect our ability to obtain financing based on our properties on reasonable terms. These conditions might make it more difficult for us to sell properties or might adversely affect the price we receive for properties that we do sell, as prospective buyers might experience increased costs of debt financing or other difficulties in obtaining debt financing. Events in the credit markets have also had an adverse effect on other financial markets in the United States, which might make it more difficult or costly for us to raise capital through the issuance of equity.

Much of our indebtedness does not require significant principal payments prior to maturity, and we might enter into agreements on similar terms in future transactions. If our mortgage loans and other debts cannot be repaid in full, refinanced or extended at maturity on acceptable terms, or at all, a lender could foreclose upon the mortgaged property and receive an assignment of rent and leases or pursue other remedies, or we might be forced to dispose of one or more of our properties on unfavorable terms, which could have a material adverse effect on our financial condition and results of operations and which might adversely affect our cash flow and our ability to make distributions to shareholders.

The current downturn in the overall economy and the recent disruptions in the financial markets might adversely affect our cash flows from operations.

The current downturn in the overall economy and the recent disruptions in the financial markets have reduced consumer confidence in the economy and negatively affected consumer spending on retail goods. The weaker operating performance of retailers has resulted in delays or deferred decisions regarding the openings of new retail stores at our properties and of lease renewals and has impaired the ability of our current tenants to meet their obligations to us, which has decreased the revenue generated by our properties and could adversely affect our ability to generate cash flows, meet our debt service requirements, comply with the covenants under our 2010 Credit Facility, make capital expenditures and make distributions to shareholders. These conditions could also have a material adverse effect on our financial condition and results of operations. There can be no assurance that past, current and future government responses to the disruptions in the economy and in the financial markets will restore consumer confidence and consumer spending on retail goods in a timely manner, or at all.

Payments by our direct and indirect subsidiaries of dividends and distributions to us might be adversely affected by their obligations to make prior payments to the creditors of these subsidiaries.

We own substantially all of our assets through our interest in PREIT Associates. PREIT Associates holds substantially all of its properties and assets through subsidiaries, including subsidiary partnerships and limited liability companies, and derives substantially all of its cash flow from cash distributions to it by its subsidiaries. We, in turn, derive substantially all of our cash flow from cash distributions to us by PREIT Associates. Our direct and indirect subsidiaries must make payments on their obligations to their creditors, when due and payable, before they may make distributions to us. Thus, PREIT Associates' ability to make distributions to its partners, including us, depends on its subsidiaries' ability first to satisfy their obligations to their creditors. Similarly, our ability to pay

Table of Contents

dividends to holders of our shares depends on PREIT Associates' ability first to satisfy its obligations to its creditors before making distributions to us. If the subsidiaries were unable to make payments to their creditors when due and payable, or if the subsidiaries had insufficient funds to both make payments to creditors and distribute funds to PREIT Associates, we might not have sufficient cash to satisfy our obligations and/or make distributions to our shareholders.

In addition, we will have the right to participate in any distribution of the assets of any of our direct or indirect subsidiaries upon the liquidation, reorganization or insolvency of such subsidiary only after the claims of the creditors, including trade creditors, of that subsidiary are satisfied. Our shareholders, in turn, will have the right to participate in any distribution of our assets upon our liquidation, reorganization or insolvency only after the claims of our creditors, including trade creditors, are satisfied.

The profitability of each partnership we enter into with third parties that has short-term financing or debt requiring a balloon payment is dependent on the availability of long-term financing on satisfactory terms. If satisfactory long-term financing is not available, we might have to rely on other sources of short-term financing or equity contributions. Although these partnerships are not wholly-owned by us, we might be required to pay the full amount of any obligation of the partnership, or we might elect to pay all of the obligations of such a partnership to protect our equity interest in its properties and assets. This could cause us to utilize a substantial portion of our liquidity sources or funds from operations and could have a material adverse effect on our operating results and reduce amounts available for distribution to shareholders.

Some of our properties are owned or ground-leased by subsidiaries that we created solely to own or ground-lease those properties. The mortgaged properties and related assets are restricted solely for the payment of the related loans and are not available to pay our other debts, which could impair our ability to borrow, which in turn could have a material adverse effect on our operating results and reduce amounts available for distribution to shareholders.

Our hedging arrangements might not be successful in limiting our risk exposure, and we might be required to post collateral or incur expenses in connection with these arrangements or their termination that could harm our results of operations or financial condition.

From time to time, we use interest rate hedging arrangements to manage our exposure to interest rate volatility, but these arrangements might expose us to additional risks, such as requiring that we fund our contractual payment obligations under such arrangements in relatively large amounts or on short notice. Developing an effective interest rate risk strategy is complex, and no strategy can completely insulate us from risks associated with interest rate fluctuations. We cannot assure you that our hedging activities will have a positive impact on our results of operations or financial condition. We might be subject to additional costs, such as transaction fees or breakage costs, if we terminate these arrangements, or increased requirements for security, including requirements to post collateral in connection with such transactions, which we might have difficulty satisfying. In addition, although our interest rate risk management policy establishes minimum credit ratings for counterparties, this does not eliminate the risk that a counterparty might fail to honor its obligations, particularly given current market conditions.

Recent disruptions in the credit markets could adversely affect our ability to access funds under the 2010 Credit Facility.

Disruptions in the credit markets and uncertainty in the U.S. economy could adversely affect one or more banks that participate in our 2010 Credit Facility. Our access to funds under the 2010 Credit Facility is dependent on the ability of the banks that are parties to the facility to meet their funding commitments. These banks might have incurred losses or might now have reduced capital reserves. As a result, these banks might be or become capital constrained and might tighten their lending standards, or become insolvent. If they experience shortages of capital and liquidity, banks that are parties to the 2010 Credit Facility could fail or refuse to honor their legal commitments and obligations under the 2010 Credit Facility, including by not extending credit up to the maximum amount permitted by the 2010 Credit Facility and/or by not honoring their loan commitments at all. If we were unable to draw funds under our 2010 Credit Facility because of a lender default or failure, and we were unable to obtain alternative cost-effective financing from other sources of unsecured or secured debt capital, our financial condition, results of operations, cash flow and our ability to make distributions to shareholders would be materially adversely affected.

Table of Contents

RISKS RELATED TO OUR BUSINESS AND OUR PROPERTIES

Any store closings, leasing delays, lease terminations or tenant bankruptcies or other financial difficulties we encounter could adversely affect our financial condition and results of operations.

We receive a substantial portion of our operating income as rent under leases with tenants. At any time, any tenant having space in one or more of our properties could experience a downturn in its business that might weaken its financial condition. Such tenants might enter into or renew leases with relatively shorter terms. Such tenants might also defer or fail to make rental payments when due, delay lease commencement, voluntarily vacate the premises or declare bankruptcy, which could result in the termination of the tenant's lease, and could result in material losses to us and harm to our results of operations. Also, it might take time to terminate leases of underperforming or nonperforming tenants and we might incur costs to remove such tenants. Some of our tenants occupy stores at multiple locations in our portfolio, and so the effect of any bankruptcy of those tenants might be more significant to us than the bankruptcy of other tenants, and store closing by such tenants might be more significant than store closings by other tenants. See Item 2. Properties Major Tenants. Given current conditions in the capital markets, retailers that have sought protection from creditors under bankruptcy law have had difficulty in some instances in obtaining debtor-in-possession financing, which has decreased the likelihood that such retailers will emerge from bankruptcy protection and has limited their alternatives. In addition, under many of our leases, our tenants pay rent based, in whole or in part, on a percentage of their sales. Accordingly, declines in these tenants' sales directly affect our results of operations. Also, if tenants are unable to comply with the terms of our leases, or otherwise seek changes to the terms, including changes to the amount of rent, we might modify lease terms in ways that are less favorable to us.

If a tenant files for bankruptcy, the tenant might have the right to reject and terminate its leases, and we cannot be sure that it will affirm its leases and continue to make rental payments in a timely manner. A bankruptcy filing by, or relating to, one of our tenants would bar all efforts by us to collect pre-bankruptcy debts from that tenant, or from their property, unless we receive an order permitting us to do so from the bankruptcy court. In addition, we cannot evict a tenant solely because of its bankruptcy. If a lease is assumed by the tenant in bankruptcy, all pre-bankruptcy balances due under the lease must be paid to us in full. However, if a lease is rejected by a tenant in bankruptcy, we would have only a general unsecured claim for damages. If a bankrupt tenant vacates a space, it might not do so in a timely manner, and we might be unable to re-lease the vacated space during that time, or at all. In addition, this could result in lease terminations or reductions in rent by other tenants of the same property whose leases have co-tenancy provisions. These other tenants might seek changes to the terms of their leases, including changes to the amount of rent. Any unsecured claim we hold might be paid only to the extent that funds are available and only in the same percentage as is paid to all other holders of unsecured claims, and there are restrictions under bankruptcy laws that limit the amount of the claim we can make if a lease is rejected. As a result, it is likely that we would recover substantially less than the full value of any unsecured claims we hold, which would adversely affect our financial condition and results of operations. Tenant bankruptcies and liquidations have adversely affected, and, given current economic conditions, are likely in the future to adversely affect, our financial condition and results of operations. In 2009, our bad debt expenses associated with tenant bankruptcies were \$0.9 million, with 15 tenants in our portfolio filing for bankruptcy protection during the year, including Ritz Camera, Eddie Bauer, Crabtree & Evelyn and Bailey, Banks & Biddle.

Rising operating expenses, decreased occupancy and certain lease provisions have reduced, and could in the future continue to reduce, our expense reimbursements and our cash flow and funds available for future distributions.

Our properties are subject to operating risks common to real estate in general, any or all of which might negatively affect us. Our leases typically provide that the tenant is liable for a portion of common area maintenance (CAM) and other operating expenses. If these expenses increase, then the tenant's portion of such expenses also increases. Our properties are experiencing a trend towards more gross leases (leases that provide that tenants pay a higher base rent amount in lieu of contributing toward CAM costs and real estate taxes), as well as leases providing for fixed CAM or caps in the rate of annual increases in CAM, and leases that provide for the rent amount to be determined on the basis of a percentage of sales in lieu of minimum rent, with no contribution toward CAM costs and real estate taxes. In these cases, a tenant will pay a single specified rent amount, or a set or capped expense reimbursement amount, regardless of the actual amount of operating expenses. The tenant's payment remains the same even if operating

Table of Contents

expenses increase, causing us to be responsible for the excess amount. To the extent that existing leases, new leases or renewals of leases do not require a pro rata contribution from tenants, we are liable for the cost of such expenses in excess of the portion paid by tenants, if any. This has and could, in the future, adversely affect our results of operations and our ability to make distributions to shareholders. Further, if a property is not fully occupied, including in connection with the redevelopment of the property, we would be required to pay the portion of the expenses allocable to the vacant space that is otherwise typically paid by our tenants, which would adversely affect our operating results and our ability to make distributions to shareholders.

Our properties are also subject to the risk of increases in CAM and other operating expenses, which typically include real estate taxes, energy and other utility costs, repairs, maintenance and capital improvements to common areas, security, housekeeping, property and liability insurance and administrative costs. If operating expenses increase, the availability of other comparable retail space in our specific geographic markets might limit our ability to pass these increases through to tenants, or, if we do pass all or a part of these increases on, might lead tenants to seek retail space elsewhere, which, in either case, could adversely affect our results of operations and limit our ability to make distributions to shareholders.

The valuation and accounting treatment of certain long-lived assets, such as real estate, or of intangible assets, such as goodwill, could result in future asset impairments, which would be recorded as operating losses.

Real estate investments and related intangible assets are reviewed for impairment whenever events or changes in circumstances, such as a decrease in net operating income or the loss of an anchor tenant, indicate that the carrying amount of the property might not be recoverable. A property to be held and used is considered impaired only if management's estimate of the aggregate future cash flows to be generated by the property, undiscounted and without interest charges, are less than the carrying value of the property. This estimate takes into consideration factors such as expected future operating income, trends and prospects, as well as the effects of demand, competition and other factors. The current downturn in the economy and the recent disruptions in the financial markets have negatively affected consumer spending on retail goods and have consequently decreased the estimated cash flows generated by our properties, and might cause further decreases in the future. Applicable accounting principles require that goodwill and certain intangible assets be tested annually for impairment or earlier upon the occurrence of certain events or substantive changes in circumstances. If we find that the carrying value of real estate investments or related intangibles or goodwill or certain intangible assets exceed estimated fair value, we will reduce the carrying value of the real estate investment or goodwill or intangible asset to the estimated fair value, and we will recognize an impairment. Any such impairment is required to be recorded as a noncash operating expense.

Our 2009 impairment analysis resulted in noncash impairment charges on long lived assets and certain development projects of \$74.3 million, and, as a result, the carrying values of our impaired assets were reset to their estimated fair values as of December 31, 2009. Our 2008 impairment analysis resulted in noncash impairment charges on goodwill and certain development projects of \$27.6 million, and, as a result, the carrying values of our impaired assets were reset to their estimated fair values as of December 31, 2008. Any further decline in the estimated fair values of these assets could result in additional impairment charges. It is possible that such impairments, if required, could be material. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies Asset Impairments.

Changes in the retail industry, particularly among retailers that serve as anchor tenants, could adversely affect our results of operations.

The income we generate from our retail properties depends in part on the ability of our anchor tenants to attract customers to our properties. The ability of anchor tenants to attract customers to a property has a significant effect on the ability of the property to attract in-line tenants and, consequently, on the revenue generated by the property. In recent years, the retail industry and retailers that serve as anchor tenants have experienced or are currently experiencing operational changes, consolidation and other ownership changes. Combinations of retailers that serve as anchor tenants in recent years were believed to offer these companies even greater economies of scale, increasing their leverage with suppliers, including landlords, and enabling them to be more efficient. These past transactions and any similar transactions in the future might result in the restructuring of these companies, which

Table of Contents

could include closures or sales of anchor stores operated by them. The closure of an anchor store or a large number of anchor stores might have a negative effect on a property, on our portfolio and on our results of operations. In addition, for anchors that lease their space, the loss of any rental payments from an anchor, a lease termination by an anchor for any reason, a failure by that anchor to occupy the premises, or any other cessation of operations by an anchor could result in lease terminations or reductions in rent by other tenants of the same property whose leases permit cancellation or rent reduction if an anchor's lease is terminated or the anchor otherwise ceases occupancy or operations. In that event, we might be unable to re-lease the vacated space of the anchor or in-line store in a timely manner, or at all. In addition, the leases of some anchors might permit the anchor to transfer its lease, including any attendant approval rights, to another retailer. The transfer to a new anchor could cause customer traffic in the property to decrease or to be composed of different types of customers, which could reduce the income generated by that property. A transfer of a lease to a new anchor also could allow other tenants to make reduced rental payments or to terminate their leases at the property, which could adversely affect our results of operations.

The recent investments we have made in redeveloping older properties and developing new properties could be subject to higher costs, delays or other risks and might not yield the returns we anticipate, which would harm our financial condition and operating results.

We have reached the last phases of the projects in our current redevelopment program. Since the beginning of 2009, we reached several major milestones for four of our largest projects. We also completed the redevelopment of Wiregrass Commons Mall with the second of two new anchors in 2009. We are engaged in the ground-up development of three mixed use and other projects, although we do not expect to make material investments in these projects in the short term. To the extent we continue current redevelopment or development projects or enter into new redevelopment or development projects in the longer term, they will be subject to a number of risks that could negatively affect our return on investment, financial condition, results of operations and our ability to make distributions to shareholders, including, among others:

delayed ability or inability to reach projected occupancy, rental rates, profitability, and investment return;

timing delays due to tenant decision delays and other factors outside our control, which might make a project less profitable or unprofitable or delay profitability;

expenditure of money and time on projects that might be significantly delayed before stabilization.

Some of our retail properties were constructed or last renovated more than 10 years ago. Older, unrenovated properties tend to generate lower rent and might require significant expense for maintenance or renovations to maintain competitiveness, which could harm our results of operations. Subject to the terms and conditions of our 2010 Credit Facility, as a key component of our long-term growth strategy, we plan to continue to redevelop existing properties and develop new properties, and we might develop or redevelop other projects as opportunities arise. These plans are subject to the current difficult economic, capital market and retail industry conditions, which have led to tight credit, low liquidity, increased defaults and bankruptcies, lower consumer confidence and lower business and consumer spending. These conditions might cause us to reduce or eliminate development and redevelopment projects in the short term. We are adjusting our growth strategy in light of these conditions, and anticipate longer times until stabilization and potentially lower investment returns.

We might elect not to proceed with certain development projects after they are begun. In general, when a project is abandoned, the expensing of development costs for abandoned development projects will be accelerated to the then-current period. The accelerated recognition of these expenses could have a material adverse effect on our results of operations for the period in which the expenses are recognized. In the event of an unsuccessful development project, our loss could exceed our investment in the project.

Table of Contents

There is a concentration of our retail properties in the Eastern United States, particularly in the Mid-Atlantic region, and adverse market conditions in that region might affect the ability of our tenants to make lease payments and the interest of prospective tenants to enter into leases, which might reduce the amount of revenue generated by our properties.

Our retail properties are concentrated in the Eastern United States, particularly in the Mid-Atlantic region, including several properties in the Philadelphia, Pennsylvania area. To the extent adverse conditions affecting retail properties, such as economic conditions, population trends and changing demographics, availability and costs of financing, construction costs, income, sales and property tax laws, and weather conditions, are particularly adverse in Pennsylvania or in the Mid-Atlantic region, our results of operations will be affected to a greater degree than companies that do not have a concentration in this region. If the sales of stores operating at our properties were to decline significantly due to adverse conditions, the risk that our tenants, including anchors, will be unable to fulfill the terms of their leases to pay rent or will enter into bankruptcy might increase. Furthermore, such adverse conditions might affect the likelihood or timing of lease commitments by new tenants or lease renewals by existing tenants as such parties delay their leasing decisions in order to obtain the most current information about trends in their businesses or industries. If, as a result of prolonged adverse regional conditions, occupancy at our properties decreases or our properties do not generate sufficient revenue to meet our operating and other expenses, including debt service, our financial position, results of operations, cash flow and ability to make capital expenditures and distributions to shareholders would be adversely affected.

We have invested and expect to invest in the future in partnerships with third parties to acquire or develop properties, and we might not control the management, redevelopment or disposition of these properties, or we might be exposed to other risks.

We have invested and expect to invest in the future as a partner with third parties in the acquisition of existing properties or the development of new properties, in contrast to acquiring properties or developing projects on our own. Entering into partnerships with third parties involves risks not present where we act alone, in that we might not have exclusive control over the acquisition, development, redevelopment, financing, leasing, management, budget-setting and other aspects of the property or project. These limitations might adversely affect our ability to develop, redevelop or sell these properties at the most advantageous time for us. Also, there might be restrictive provisions and rights that apply to sales or transfers of interests in our partnership properties, which might require us to make decisions about buying or selling interests at a disadvantageous time.

Some of our retail properties are owned by partnerships in which we are a general partner. Under the terms of those partnership agreements, major decisions, such as a sale, lease, refinancing, redevelopment, expansion or rehabilitation of a property, or a change of property manager, require the consent of all partners. Accordingly, because decisions must be unanimous, necessary actions might be delayed significantly and it might be difficult or even impossible to remove a partner that is serving as the property manager. We might not be able to favorably resolve any conflicts which arise with respect to such decisions, or we might be required to provide financial or other inducements to our partners to obtain a resolution. In cases where we are not the controlling partner or where we are only one of the general partners, there are many decisions that do not relate to fundamental matters that do not require our approval and that we do not control. Also, in cases in which we serve as managing general partner of the partnership that owns the property, we might have certain fiduciary responsibilities to the other partners in those partnerships.

Business disagreements with partners might arise. We might incur substantial expenses in resolving these disputes. To preserve our investment, we might be required to make commitments to or on behalf of a partnership during a dispute that might not be credited or repaid in full. Moreover, we cannot assure you that our resolution of a dispute with a partner will be on terms that are favorable to us.

Table of Contents

Other risks of investments in partnerships with third parties include:

partners might become bankrupt or fail to fund their share of required capital contributions, which might inhibit our ability to make important decisions in a timely fashion or necessitate our funding their share to preserve our investment, which might be at a disadvantageous time;

partners might have business interests or goals that are inconsistent with our business interests or goals;

partners might be in a position to take action contrary to our policies or objectives;

we might incur liability for the actions of our partners; and

third-party managers might not be sensitive to publicly-traded company or REIT tax compliance matters.

The retail real estate industry is highly competitive, and this competition could harm our ability to operate profitably.

Competition in the retail real estate industry is intense. We compete with other public and private retail real estate companies, including companies that own or manage malls, strip centers, power centers, lifestyle centers, factory outlet centers, theme/festival centers and community centers, as well as other commercial real estate developers and real estate owners, particularly those with properties near our properties, on the basis of several factors, including location and rent charged. We compete with these companies to attract customers to our properties, as well as to attract anchor and in-line store tenants. We also compete to acquire land for new site development, during more favorable economic conditions. Our malls and our strip and power centers face competition from similar retail centers, including more recently developed or renovated centers, that are near our retail properties. We also face competition from a variety of different retail formats, including internet retailers, discount or value retailers, home shopping networks, mail order operators, catalogs, and telemarketers. This competition could have a material adverse effect on our ability to lease space and on the amount of rent that we receive. Our tenants face competition from companies at the same and other properties and from other retail formats as well.

The development of competing retail properties and the related increased competition for tenants might, subject to the terms and conditions of our 2010 Credit Facility, require us to make capital improvements to properties that we would have deferred or would not have otherwise planned to make, and affects the occupancy and net operating income of such properties. Any such capital improvements, undertaken individually or collectively, involve costs and expenses that could adversely affect our results of operations.

We might be unable to effectively manage simultaneously any redevelopment and development projects, which could affect our financial condition and results of operations.

We have reached the last phases of the four projects in our current redevelopment program. We are also engaged in the ground-up development of three mixed use and other projects, although we do not expect to make material investments in these projects in the short term. The complex nature of these redevelopment and development projects, and any future projects, calls for substantial management time, attention and skill. We might not have sufficient management resources to effectively manage our current redevelopment and development projects simultaneously, which might delay or inhibit the successful completion of these projects. Also, some of our redevelopment and development projects currently, and might in the future, involve mixed uses of the properties, including residential, office, and other uses. We might not have all of the necessary or desirable skill sets to manage such projects. The lack of sufficient management resources, or of the necessary skill sets to execute our plans, could delay or prevent us from realizing our expectations with respect to these projects and could adversely affect our results of operations and financial condition.

Table of Contents

We face competition for the acquisition of properties, development sites and other assets, which might impede our ability to make future acquisitions or might increase the cost of these acquisitions.

During more favorable economic conditions, we compete with many other entities engaged in real estate investment activities for acquisitions of malls, other retail properties and other prime development sites, including institutional pension funds, other REITs and other owner-operators of retail properties. Our efforts to compete are also subject to the terms and conditions of our 2010 Credit Facility. Given current economic, capital market and retail industry conditions, however, there has been substantially less acquisition activity in recent quarters. When we seek to make acquisitions, competitors might drive up the price we must pay for properties, parcels, other assets or other companies, or might themselves succeed in acquiring those properties, parcels, assets or companies. In addition, our potential acquisition targets might find our competitors to be more attractive suitors if they have greater resources, are willing to pay more, or have a more compatible operating philosophy. In particular, larger REITs might enjoy significant competitive advantages that result from, among other things, a lower cost of capital, a better ability to raise capital, a better ability to finance an acquisition, and enhanced operating efficiencies. We might not succeed in acquiring retail properties or development sites that we seek, or, if we pay higher price for a property, or generate lower cash flow from an acquired property than we expect, our investment returns will be reduced, which will adversely affect the value of our securities.

We might not be successful in starting and nurturing new business initiatives.

We believe that we can further expand our third party management business, and we intend to aggressively pursue opportunities to manage additional properties. In addition, we are in the process of determining whether there are other sources of demand for the services that we can provide using our existing property management platform. Identifying and serving new markets and executing operationally on such efforts is subject to various risks, including allocating resources that ultimately are not productive, directing management attention away from existing businesses, lacking necessary skills sets for such initiatives if they involve different property types, and possibly incurring negative effects on our image or brand. If we are unsuccessful in pursuing new businesses, we could incur costs and expenses that could adversely affect our results of operations.

We might not be successful in identifying suitable acquisitions that meet the criteria we apply, given economic, market or other circumstances, which might impede our growth.

Acquisitions of retail properties have been an important component of our growth strategy. However, subject to the terms and conditions of our 2010 Credit Facility, and given the current economic, capital market and retail industry conditions, we expect our acquisition activities to be limited in the short term. Expanding by acquisitions requires us to identify suitable acquisition candidates or investment opportunities that meet the criteria we apply, given economic, market or other circumstances, and that are compatible with our growth strategy. We must also typically obtain financing, and it must be on terms that are acceptable to us. See Item 1A. Risk Factors Risks Related to Our Indebtedness and Our Financing. We analyze potential acquisitions on a property-by-property and market-by-market basis. We might not be successful in identifying suitable properties or other assets in our existing geographic markets or in markets new to us that meet the acquisition criteria we apply, given economic, market or other circumstances, in financing such properties or other assets or in consummating acquisitions or investments on satisfactory terms. An inability to successfully identify or consummate acquisitions could reduce the number of acquisitions we complete and impede our growth, which could adversely affect our results of operations.

We might be unable to integrate effectively any additional properties we might acquire, which might result in disruptions to our business and additional expense.

Subject to the terms and conditions of our 2010 Credit Facility, to the extent that we pursue, in an opportunistic and disciplined manner, acquisitions of additional properties or portfolios of properties that meet the investment criteria we apply, given economic, market and other circumstances, we might not be able to adapt our management and operational systems to effectively manage any such acquired properties or portfolios.

Table of Contents

Specific risks for our ongoing operations posed by acquisitions we have completed or that we might complete in the future include:

we might not achieve the expected operating efficiencies, value-creation potential, economies of scale or other benefits of such transactions;

we might not have adequate personnel, personnel with necessary skill sets and financial and other resources to successfully handle our increased operations;

we might not be successful in leasing space in acquired properties;

the combined portfolio might not perform at the level we anticipate;

the additional property or portfolio might require excessive time and financial resources to make necessary improvements or renovations and might divert the attention of management away from our other operations;

we might experience difficulties and incur unforeseen expenses in connection with assimilating and retaining employees working at acquired properties, and in assimilating any acquired properties;

we might experience problems and incur unforeseen expenses in connection with upgrading and expanding our systems and processes; and

we might incur unexpected liabilities in connection with the properties and businesses we acquire.

If we fail to successfully integrate any properties, portfolios, assets or companies we acquire, or fail to effectively handle our increased operations or realize the intended benefits of any such transactions, our financial condition and results of operations, and our ability to make distributions to shareholders, might be adversely affected.

Our business could be harmed if Ronald Rubin, our chairman and chief executive officer, or other members of our senior management team terminate their employment with us.

Our future success depends, to a meaningful extent, upon the continued services of Ronald Rubin, our chairman and chief executive officer, and the services of our corporate management team (including the four-person Office of the Chairman that, in addition to Ronald Rubin, consists of George F. Rubin, Edward A. Glickman and Joseph F. Coradino). These executives have substantial experience in managing, developing and acquiring retail real estate. Although we have entered into employment agreements with Ronald Rubin and certain other members of our corporate management team, they could elect to terminate those agreements at any time. In addition, although we have purchased a key man life insurance policy in the amount of \$5.0 million to cover Ronald Rubin, we cannot assure you that this would compensate us for the loss of his services. The loss of services of one or more members of our corporate management team could harm our business and our prospects.

If we suffer losses that are not covered by insurance or that are in excess of our insurance coverage limits, we could lose invested capital and anticipated profits.

There are some types of losses, including those of a catastrophic nature, such as losses due to wars, earthquakes, floods, hurricanes, pollution, environmental matters, information technology system failures and lease and contract claims, that are generally uninsurable or not economically insurable, or might be subject to insurance coverage limitations, such as large deductibles or co-payments. If one of these events occurred to, or caused the destruction of, one or more of our properties, we could lose both our invested capital and anticipated profits from that property. We also might remain obligated for any mortgage loan or other financial obligation related to the property. In addition, if we are unable to obtain

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

insurance in the future at acceptable levels and at a reasonable cost, the possibility of losses in excess of our insurance coverage might increase and we might not be able to comply with covenants under our debt agreements, which could adversely affect our financial condition. If any of our properties were to experience a

Table of Contents

significant, uninsured loss, it could seriously disrupt our operations, delay our receipt of revenue and result in large expense to repair or rebuild the property. These types of events could adversely affect our cash flow, results of operations and ability to make distributions to shareholders.

We might incur costs to comply with environmental laws, which could have an adverse effect on our results of operations.

Under various federal, state and local laws, ordinances, regulations and case law, an owner, former owner or operator of real estate might be liable for the costs of removal or remediation of hazardous or toxic substances present at, on, under, in or released from its property, regardless of whether the owner, operator or other responsible party knew of or was at fault for the release or presence of hazardous or toxic substances. The responsible party also might be liable to the government or to third parties for substantial property damage, investigation costs and clean up costs. Even if more than one person might have been responsible for the contamination, each person covered by the environmental laws might be held responsible for all of the clean-up costs incurred. In addition, some environmental laws create a lien on the contaminated site in favor of the government for damages and costs the government incurs in connection with the contamination. In connection with our ownership, operation, management, development and redevelopment of properties, or any other properties we acquire in the future, we might be liable under these laws and might incur costs in responding to these liabilities, which could have an adverse effect on our results of operations. See Item 1. Business Environmental. Contamination might also adversely affect our ability to sell or lease real estate or borrow with real estate as collateral.

Inflation may adversely affect our financial condition and results of operations.

Inflationary price increases could have an adverse effect on consumer spending, which could impact our tenants' sales and, in turn, our tenants' business operations. This could affect the amount of rent these tenants pay, including if their leases provide for percentage rent or percentage of sales rent, and their ability to pay rent. Also, inflation could cause increases in operating expenses, which could increase occupancy costs for tenants and, to the extent that we are unable to recover operating expenses from tenants, could increase operating expenses for us. In addition, if the rate of inflation exceeds the scheduled rent increases included in our leases, then our net operating income and our profitability would decrease. Inflation could also result in increases in market interest rates, which would increase the borrowing costs associated with our existing or any future variable rate debt.

RISKS RELATED TO THE REAL ESTATE INDUSTRY

We are subject to risks that affect the retail real estate environment generally.

Our business focuses on retail real estate, predominantly malls and strip and power centers. As such, we are subject to certain risks that can affect the ability of our retail properties to generate sufficient revenue to meet our operating and other expenses, including debt service, to make capital expenditures and to make distributions to our shareholders, subject to the terms and conditions of our 2010 Credit Facility. Currently, we face significant challenges because the downturn in the overall economy and the disruptions in the financial markets have reduced consumer confidence and negatively affected consumer spending on retail goods. In general, a number of factors can affect the income generated by a retail property, or the value of a property, including a downturn in the national, regional or local economy, employment or consumer confidence or spending, which could result from plant closings, local industry slowdowns, higher energy or fuel costs, adverse weather conditions, natural disasters, terrorist activities and other factors, which tend to reduce consumer spending on retail goods; a weakening of local real estate conditions, such as an oversupply of, or a reduction in demand for, retail space or retail goods, and the availability and creditworthiness of current and prospective tenants; trends in the retail industry; seasonality; changes in perceptions by retailers or shoppers of the safety, convenience and attractiveness of a retail property; changes in operating costs, such as real estate taxes, utility rates and insurance premiums; perceived changes in the convenience and quality of competing retail properties and other retailing options such as internet retailers; changes in laws and regulations applicable to real property, including tax and zoning laws; and changes in interest rate levels and the cost and availability of financing. Changes in one or more of these factors can lead to a decrease in the revenue generated by our properties and can have a material adverse effect on our financial condition and results of operations.

Table of Contents

Illiquidity of real estate investments could significantly affect our ability to respond to adverse changes in the performance of our properties and harm our financial condition.

Substantially all of our assets consist of investments in real properties. Because real estate investments are relatively illiquid, our ability to quickly sell one or more properties in our portfolio in response to changing economic, financial and investment conditions is limited, particularly given current economic, capital market and retail industry conditions. The real estate market is affected by many factors, such as general economic conditions, availability of financing, interest rates and other factors, including supply and demand for space, that are beyond our control. We cannot predict whether we will be able to sell any property for the price or on the terms we set, or whether any price or other terms offered by a prospective purchaser would be acceptable to us. We also cannot predict the length of time needed to find a willing purchaser and to close the sale of a property. In addition, current economic and capital market conditions might make it more difficult for us to sell properties or might adversely affect the price we receive for properties that we do sell, as prospective buyers might experience increased costs of debt financing or other difficulties in obtaining debt financing. Furthermore, the properties that serve as collateral for our 2010 Credit Facility are subject to specified release prices being repaid to the lenders and provisions regarding the application of any excess proceeds.

Before a property can be sold, we might be required to make expenditures to correct defects or to make improvements. We cannot assure you that we will have funds available to correct those defects or to make those improvements, and if we cannot do so, we might not be able to sell the property, or might be required to sell the property on unfavorable terms. In acquiring a property, we might agree to provisions that materially restrict us from selling that property for a period of time or impose other restrictions, such as limitations on the amount of debt that can be placed or repaid on that property. These factors and any others that would impede our ability to respond to adverse changes in the performance of our properties could significantly harm our financial condition and results of operations.

Possible terrorist activity or other acts of violence or war could adversely affect our financial condition and results of operations.

Future terrorist attacks in the United States, and other acts of terrorism or war, might result in declining economic activity, which could harm the demand for goods and services offered by our tenants and the value of our properties, and might adversely affect the value of an investment in our securities. A decrease in retail demand could make it difficult for us to renew or re-lease our properties at lease rates equal to or above historical rates. Terrorist activities also could directly affect the value of our properties through damage, destruction or loss, and the availability of insurance for such acts, or of insurance generally, might be lower, or cost more, which could increase our operating expenses and adversely affect our financial condition and results of operations. To the extent that our tenants are affected by future attacks, their businesses similarly could be adversely affected, including their ability to continue to meet obligations under their existing leases. These acts might erode business and consumer confidence and spending, and might result in increased volatility in national and international financial markets and economies. Any one of these events might decrease demand for real estate, decrease or delay the occupancy of our properties, and limit our access to capital or increase our cost of raising capital.

RISKS RELATING TO OUR ORGANIZATION AND STRUCTURE

Our organizational documents contain provisions that might discourage a takeover of us and depress our share price.

Our organizational documents contain provisions that might have an anti-takeover effect and inhibit a change in our management and the opportunity to realize a premium over the then-prevailing market price of our securities. These provisions include:

- (1) *There are ownership limits and restrictions on transferability in our trust agreement.* In order to protect our status as a REIT, no more than 50% of the value of our outstanding shares (after taking into account options to acquire shares) may be owned, directly or constructively, by five or fewer individuals (as defined in the Internal Revenue Code), and the shares must be beneficially owned by 100 or more

Table of Contents

persons during at least 335 days of a taxable year of 12 months or during a proportionate part of a shorter taxable year. To assist us in satisfying these tests, subject to some exceptions, our trust agreement prohibits any shareholder from owning more than 9.9% of our outstanding shares of beneficial interest (exclusive of preferred shares) or more than 9.9% of any class or series of preferred shares. The trust agreement also prohibits transfers of shares that would cause a shareholder to exceed the 9.9% limit or cause our shares to be beneficially owned by fewer than 100 persons. Our Board of Trustees may exempt a person from the 9.9% ownership limit if it receives a ruling from the Internal Revenue Service or an opinion of counsel or tax accountants that exceeding the 9.9% ownership limit as to that person would not jeopardize our tax status as a REIT. Absent an exemption, this restriction might:

discourage, delay or prevent a tender offer or other transaction or a change in control or management that might involve a premium price for our shares or otherwise be in the best interests of our shareholders; or

compel a shareholder who had acquired more than 9.9% of our shares to transfer the additional shares to a trust and, as a result, to forfeit the benefits of owning the additional shares.

- (2) *Our trust agreement permits our Board of Trustees to issue preferred shares with terms that might discourage a third party from acquiring our Company.* Our trust agreement permits our Board of Trustees to create and issue multiple classes and series of preferred shares, and classes and series of preferred shares having preferences to the existing shares on any matter, without a vote of shareholders, including preferences in rights in liquidation or to dividends and option rights, and other securities having conversion or option rights. Also, the Board might authorize the creation and issuance by our subsidiaries and affiliates of securities having conversion and option rights in respect of our shares. Our trust agreement further provides that the terms of such rights or other securities might provide for disparate treatment of certain holders or groups of holders of such rights or other securities. The issuance of such rights or other securities could have the effect of discouraging, delaying or preventing a change in control over us, even if a change in control were in our shareholders' interest or would give the shareholders the opportunity to realize a premium over the then-prevailing market price of our securities.
- (3) *Advance Notice Requirements for Shareholder Nominations of Trustees.* Our advance notice procedures with regard to shareholder proposals relating to the nomination of candidates for election as trustees, as provided in our amended and restated Trust Agreement, require, among other things, that advance written notice of any such proposals, containing prescribed information, be given to our Secretary at our principal executive offices not less than 90 days nor more than 120 days prior to the anniversary date of the prior year's meeting (or within 10 business days of the day notice is given of the annual meeting date, if the annual meeting date is not within 30 days of the anniversary date of the immediately preceding annual meeting).

Limited partners of PREIT Associates may vote on certain fundamental changes we propose, which could inhibit a change in control that might otherwise result in a premium to our shareholders.

Our assets generally are held through our interests in PREIT Associates. We currently hold a majority of the outstanding units of limited partnership interest in PREIT Associates. However, PREIT Associates might, from time to time, issue additional units to third parties in exchange for contributions of property to PREIT Associates. These issuances will dilute our percentage ownership of PREIT Associates. Units generally do not carry a right to vote on any matter voted on by our shareholders, although units of limited partnership interests might, under certain circumstances, be redeemed for our shares. However, before the date on which at least half of the units issued on September 30, 1997 in connection with our acquisition of The Rubin Organization have been redeemed, the holders of units issued on September 30, 1997 are entitled to vote such units together with our shareholders, as a single class, on any proposal to merge, consolidate or sell substantially all of our assets. Ronald Rubin, George F. Rubin, Edward A. Glickman and Joseph F. Coradino are among the holders of these units. Our partnership interest in PREIT Associates is not included for purposes of determining when half of the partnership interests issued on

Table of Contents

September 30, 1997 have been redeemed, nor are they counted as votes. These existing rights could inhibit a change in control that might otherwise result in a premium to our shareholders. In addition, we cannot assure you that we will not agree to extend comparable rights to other limited partners in PREIT Associates.

We have entered into tax protection agreements for the benefit of certain former property owners, including some limited partners of PREIT Associates, that might affect our ability to sell or refinance some of our properties that we might otherwise want to sell, which could harm our financial condition.

As the general partner of PREIT Associates, we have agreed to indemnify certain former property owners, including some who have become limited partners of PREIT Associates, against tax liabilities that they might incur if we sell a property in a taxable transaction or significantly reduce the debt secured by a property acquired from them within a certain number of years after we acquired it. In some cases, these agreements might make it uneconomical for us to sell or refinance these properties, even in circumstances in which it otherwise would be advantageous to do so, which could harm our ability to address liquidity needs in the future or otherwise harm our financial condition.

Some of our officers and trustees have interests in properties that we manage and therefore might have conflicts of interest that could adversely affect our business.

We provide management, leasing and development services for partnerships and other ventures in which some of our officers and trustees, including Ronald Rubin, a trustee and our chairman and chief executive officer, and George F. Rubin, a trustee and vice chairman, have indirect ownership interests. In addition, we lease substantial office space from an entity in which some of our officers, including the Rubins, have an interest. Our officers or trustees who have interests in the other parties to these transactions have a conflict of interest in deciding to enter into these agreements and in negotiating their terms, which could result in our obtaining terms that are less favorable than we might otherwise obtain, which could adversely affect our business.

RISKS RELATING TO OUR SECURITIES

Holders of our common shares might have their interest in us diluted by actions we take in the future.

We are contemplating ways to reduce our leverage through a variety of means available to us, and subject to the terms of the 2010 Credit Facility. These means might include by obtaining equity capital, including through the issuance of equity securities if market conditions are favorable. Any issuance of equity securities might result in substantial dilution in the percentage of our common shares held by our then existing shareholders, and the rights of our shareholders might be materially adversely affected. The market price of our common shares could decline as a result of sales of a large number of shares in the market or the perception that such sales could occur. Additionally, future sales or issuances of substantial amounts of our common shares might be at prices below the then-current market price of our common shares and may adversely affect the market price of our common shares.

Table of Contents

Many factors, including changes in interest rates and the negative perceptions of the retail sector generally, can have an adverse effect on the market value of our securities.

As is the case with other publicly traded companies, a number of factors might adversely affect the price of our securities, many of which are beyond our control. These factors include:

Increases in market interest rates, relative to the dividend yield on our shares or the interest rate on our Exchangeable Notes. If market interest rates go up, prospective purchasers of our securities might require a higher yield. Higher market interest rates would not, however, result in more funds for us to distribute to shareholders and, to the contrary, would likely increase our borrowing costs and potentially decrease funds available for distribution to our shareholders. Thus, higher market interest rates could cause the market price of our shares to go down.

A decline in the anticipated benefits of an investment in our securities as compared to an investment in securities of companies in other industries (including benefits associated with tax treatment of dividends and distributions).

Perception, by market professionals and participants, of REITs generally and REITs in the retail sector in particular. Our portfolio of properties consists almost entirely of retail properties and we expect to continue to focus primarily on acquiring retail centers in the future.

Perception by market participants of our potential for payment of cash distributions and for growth.

Levels of institutional investor and research analyst interest in our securities.

Relatively low trading volumes in securities of REITs.

Our results of operations and financial condition.

Investor confidence in the stock market generally.

The market value of our common shares is based primarily upon the market's perception of our liquidity and capital resources, our growth potential and our current and potential future earnings, funds from operations and cash distributions. Consequently, our common shares might trade at prices that are higher or lower than our net asset value per common share. If our future earnings, funds from operations or cash distributions are less than expected, it is likely that the market price of our common shares will decrease.

Individual taxpayers might perceive REIT securities as less desirable relative to the securities of other corporations because of the lower tax rate on certain dividends from such corporations, which might have an adverse effect on the market value of our securities.

Historically, the dividends of corporations other than REITs have been taxed at ordinary income rates, which range as high as 35%. In 2003, the maximum tax rate on certain corporate dividends received by individuals was reduced to an historically low 15%, through at least December 31, 2010. However, dividends from REITs do not generally qualify for the lower tax rate on corporate dividends because REITs generally do not pay corporate-level tax on income that they distribute currently to shareholders. This differing treatment of dividends received from REITs and from corporations that are not REITs might cause individual investors to view an investment in the shares of a non-REIT corporation as more attractive than shares in REITs, which might negatively affect the value of our shares.

Table of Contents

TAX RISKS

If we were to fail to qualify as a REIT, our shareholders would be adversely affected.

We believe that we have qualified as a REIT since our inception and intend to continue to qualify as a REIT. To qualify as a REIT, however, we must comply with certain highly technical and complex requirements under the Internal Revenue Code, which is more complicated in the case of a REIT such as ours that holds its assets primarily in partnership form. We cannot be certain we have complied with these requirements because there are very limited judicial and administrative interpretations of these provisions, and even a technical or inadvertent mistake could jeopardize our REIT status. In addition, facts and circumstances that might be beyond our control might affect our ability to qualify as a REIT. We cannot assure you that new legislation, regulations, administrative interpretations or court decisions will not change the tax laws significantly with respect to our qualification as a REIT or with respect to the federal income tax consequences of qualification.

If we were to fail to qualify as a REIT, we would be subject to federal income tax, including any applicable alternative minimum tax, on our taxable income at regular corporate rates. Also, unless the Internal Revenue Service granted us relief under statutory provisions, we would remain disqualified from treatment as a REIT for the four taxable years following the year during which we first failed to qualify. The additional tax incurred at regular corporate rates would significantly reduce the cash flow available for distribution to shareholders and for debt service. In addition, we would no longer be required to make any distributions to shareholders. If there were a determination that we do not qualify as a REIT, there would be a material adverse effect on our results of operations and there could be a material reduction in the value of our common shares.

We might be unable to comply with the strict income distribution requirements applicable to REITs, or compliance with such requirements could adversely affect our financial condition or cause us to forego otherwise attractive opportunities.

To obtain the favorable tax treatment associated with qualifying as a REIT, in general, we are required each year to distribute to our shareholders at least 90% of our net taxable income. In addition, we are subject to a tax on any undistributed portion of our income at regular corporate rates and might also be subject to a 4% excise tax on this undistributed income. We could be required to seek to borrow funds on a short-term basis to meet the distribution requirements that are necessary to achieve the tax benefits associated with qualifying as a REIT, even if conditions are not favorable for borrowing, which could adversely affect our financial condition and results of operations. In addition, compliance with these REIT requirements might cause us to forego opportunities we would otherwise pursue.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

Table of Contents**ITEM 2. PROPERTIES.
RETAIL PROPERTIES**

As of December 31, 2009, we owned interests in 51 operating retail properties containing an aggregate of approximately 34.6 million square feet (including space owned by anchors). As of December 31, 2009, we and partnerships in which we own an interest owned approximately 26.7 million square feet of space at the 51 operating retail properties. PREIT Services currently manages 45 of these properties, 44 of which we consolidate for financial reporting purposes, and one that is owned by a partnership in which we hold a 50% interest. PRI co-manages one property, which is owned by a partnership that is not wholly owned by us. The remaining five properties are also owned by partnerships that are not wholly owned by us and are managed by our partners, or by an entity we or our partners designated.

Total occupancy in our consolidated malls, including only space we own, was 89.4% as of December 31, 2009. In-line occupancy in our consolidated malls was 84.2% as of that date, and occupancy in our consolidated strip and power centers was 93.1% as of that date.

Total occupancy in our unconsolidated malls, including only space owned by the partnerships in which we own an interest, was 92.0% as of December 31, 2009. In-line occupancy in our unconsolidated malls was 89.9% as of that date, and occupancy in our unconsolidated strip and power centers was 89.9% as of that date.

Total occupancy in all of our malls, including only space we and partnerships in which we own an interest own, was 89.5% as of December 31, 2009. In-line occupancy in all of our malls was 84.5% as of that date, and occupancy in all of our strip and power centers was 91.5% as of that date.

In general, we own the land underlying our properties in fee or, in the case of our properties held by partnerships with others, ownership by the partnership entity is in fee. At certain properties, however, the underlying land is owned by third parties and leased to us or the partnership in which we hold an interest pursuant to long-term ground leases. In a ground lease, the building owner pays rent for the use of the land and is responsible for all costs and expenses related to the building and improvements.

The following tables present information regarding our retail properties as of December 31, 2009. We refer to the total retail space of these properties, including anchors and in-line stores, as total square feet, and the portion that we own as owned square feet.

- (1) The location stated is the major city or town nearest to the property and is not necessarily the local jurisdiction in which the property is located.
- (2) Total square feet includes space owned by us and space owned by tenants or other lessors.
- (3) Owned square feet includes only space owned by us and excludes space owned by tenants or other lessors.
- (4) Occupancy is calculated based on space owned by us, excludes space owned by tenants or other lessors and includes space occupied by both anchor and in-line tenants.
- (5) Includes anchors/major tenants that own their space or lease from lessors other than us and do not pay rent to us.
- (6) A portion of the underlying land at this property is subject to a ground lease.

Table of Contents

(7) The owned square feet for The Gallery at Market East and Willow Grove Park includes former Strawbridge's department store buildings that are currently vacant. These vacant department stores represent 30.4% and 27.6% of owned square feet for The Gallery at Market East and Willow Grove Park, respectively.

(8) Tenant currently holds a long-term ground lease with an option to purchase the related store and parking area at a nominal purchase price. These locations are deemed owned by their anchor occupants as they only pay a nominal rent.

Table of Contents

The following table sets forth our average annual base rent per square foot (for consolidated properties and our proportionate share of unconsolidated properties) for the five years ended December 31, 2009:

Year	Non-Anchor Stores	Anchor Stores
2005	\$ 23.39	\$ 3.11
2006	23.79	3.18
2007	23.96	3.27
2008	24.18	3.48
2009	24.89	3.68

Table of Contents**LARGE FORMAT RETAILERS AND ANCHORS**

Historically, large format retailers and anchors have been an important element of attracting customers to a mall, and they have generally been department stores whose merchandise appeals to a broad range of customers, although in recent years we have attracted some non-traditional large format retailers. These large format retailers and anchors either own their stores, the land under them and adjacent parking areas, or enter into long-term leases at rent that is generally lower than the rent charged to in-line tenants. Well-known, large format retailers and anchors continue to play an important role in generating customer traffic and making malls desirable locations for in-line store tenants, even though the market share of traditional department store anchors has been declining. The following table indicates the parent company of each of our large format retailers and anchors and sets forth the number of stores and square feet owned or leased by each at our retail properties including those properties that are wholly-owned and those that are owned by partnerships, as of December 31, 2009:

Tenant Name⁽¹⁾	# of Stores⁽²⁾	GLA⁽²⁾	% of GLA

Total/Average	119	11,813,573	\$ 43,008	\$ 3.82

(1) In thousands of dollars. Includes our proportionate share of tenant rent from partnership properties that are not consolidated by us based on our ownership percentage in the respective partnerships. Annualized base rent is calculated based only on fixed monthly rent as of December 31, 2009.

Table of Contents

DEVELOPMENT PROPERTIES

The ground-up development portion of our portfolio contains three properties in two states. Two of the development projects are classified as mixed use (a combination of retail and other uses) and one project is classified as other. For additional information regarding our development properties, see Item 1. Business Recent Developments Development.

OFFICE SPACE

We lease our principal executive offices from Bellevue Associates, an entity in which certain of our officers/trustees have an interest. Our rented space under the office lease has a total of approximately 68,100 square feet. The term of the office lease is 10 years, and it commenced on November 1, 2004. We have the option to renew the lease for up to two additional five year periods at the then-current fair market rate calculated in accordance with the terms of the office lease. In addition, we have the right on one occasion at any time during the seventh lease year (2011) to terminate the office lease upon the satisfaction of certain conditions. Effective June 1, 2004, our base rent was \$1.4 million per year for the first five years of the office lease and is \$1.5 million per year during the second five years.

Table of Contents

ITEM 3. LEGAL PROCEEDINGS.

In the normal course of business, we have been and might become involved in legal actions relating to the ownership and operation of our properties and the properties we manage for third parties. In management's opinion, the resolutions of any such pending legal actions are not expected to have a material adverse effect on our consolidated financial condition or results of operations.

ITEM 4. (REMOVED AND RESERVED)

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.****Common Shares**

Our common shares of beneficial interest are listed on the New York Stock Exchange under the symbol PEI.

The following table presents the high and low sales prices for our common shares of beneficial interest, as reported by the New York Stock Exchange, and cash distributions paid per share for the periods indicated:

	High	Low	Dividend Paid
Quarter ended March 31, 2009	\$ 8.71	\$ 2.20	\$ 0.29
Quarter ended June 30, 2009	\$ 7.86	\$ 3.45	0.15
Quarter ended September 30, 2009	\$ 9.13	\$ 3.87	0.15
Quarter ended December 31, 2009	\$ 8.95	\$ 6.80	0.15
			\$ 0.74

	High	Low	Dividend Paid
Quarter ended March 31, 2008	\$ 29.70	\$ 22.00	\$ 0.57
Quarter ended June 30, 2008	\$ 27.88	\$ 23.00	0.57
Quarter ended September 30, 2008	\$ 24.29	\$ 16.57	0.57
Quarter ended December 31, 2008	\$ 19.86	\$ 2.21	0.57
			\$ 2.28

As of December 31, 2009, there were approximately 3,500 holders of record of our common shares and approximately 19,000 beneficial holders of our common shares.

We currently anticipate that cash distributions will continue to be paid in March, June, September and December. In February 2010, our Board of Trustees declared a cash dividend of \$0.15 per share payable in March 2010. Our future payment of distributions will be at the discretion of our Board of Trustees and will depend on numerous factors, including our cash flow, financial condition, capital requirements, annual distribution requirements under the REIT provisions of the Internal Revenue Code, the terms and conditions of our 2010 Credit Facility and other factors that our Board of Trustees deems relevant.

In addition, the 2010 Credit Facility provides generally that dividends may not exceed 110% of REIT Taxable Income for a fiscal year, but if the ratio of EBITDA to total indebtedness (the Corporate Debt Yield) exceeds 10.00%, then the aggregate amount of dividends may not exceed 75% of FFO or 110% of REIT Taxable Income (unless necessary for us to maintain our status as a REIT), and if a net operating income of the collateral properties during the preceding 12 months divided by the amount outstanding under the 2010 Credit Facility (the Facility Debt Yield) of 11.00% and a Corporate Debt Yield of 10.00% are achieved and continuing, there are no limits on dividends under the 2010 Credit Facility, so long as no Default or Event of Default would result from paying such dividends. We must maintain our status as a REIT at all times. All capitalized terms used in this report have the meanings ascribed to such terms in the 2010 Credit Facility.

Units

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

Class A and Class B Units of PREIT Associates (OP Units) are redeemable by PREIT Associates at the election of the limited partner holding the Units at the time and for the consideration set forth in PREIT Associates' partnership agreement. In general, and subject to exceptions and limitations, beginning one year following the respective issue dates, qualifying parties may give one or more notices of redemption with respect to all or any part of the Class A Units then held by that party. Class B Units are redeemable at the option of the holder at any time after issuance.

Table of Contents

If a notice of redemption is given, we have the right to elect to acquire the OP Units tendered for redemption for our own account, either in exchange for the issuance of a like number of our common shares, subject to adjustments for stock splits, recapitalizations and like events, or a cash payment equal to the average of the closing prices of our shares on the ten consecutive trading days immediately before our receipt, in our capacity as general partner of PREIT Associates, of the notice of redemption. If we decline to exercise this right, then PREIT Associates will pay a cash amount equal to the number of OP Units tendered multiplied by such average closing price.

Unregistered Offerings

In June 2009, we issued to a holder of our 4.00% Exchangeable Senior Notes due 2012 (Exchangeable Notes) 3,000,000 common shares in exchange for \$25.0 million in aggregate principal amount of Exchangeable Notes which are guaranteed by the Company and exchangeable at our option for cash or shares. The shares were issued under exemptions provided by Section 3(a)(9) of the Securities Act of 1933 (the 1933 Act). No commission or other remuneration was paid or given directly or indirectly for this transaction.

In October 2009, we issued to a holder of Exchangeable Notes 1,300,000 common shares, and paid \$13.3 million in cash in exchange for \$35.0 million in aggregate principal amount of Exchangeable Notes. The shares were issued under exemptions provided by Section 3(a)(9) of the 1933 Act. No commission or other remuneration was paid or given directly or indirectly for this transaction.

Issuer Purchases of Equity Securities

We did not acquire any shares in the fourth quarter of 2009.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as part of Publicly Announced Plans or Program⁽¹⁾	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs⁽¹⁾
October 1 - October 31, 2009		\$		\$ 100,000,000
November 1 - November 30, 2009				\$ 100,000,000
December 1 - December 31, 2009				\$ 100,000,000
Total		\$		

- (1) On December 21, 2007, we announced that our Board of Trustees authorized a program to repurchase up to \$100.0 million of our common shares in the open market or in privately negotiated or other transactions from January 1, 2008 until December 31, 2009. This program expired by its terms on December 31, 2009.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA.**

The following table sets forth Selected Financial Data for the Company as of and for the years ended December 31, 2009, 2008, 2007, 2006 and 2005. The information set forth below should be read in conjunction with Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and notes thereto appearing elsewhere in this Annual Report on Form 10-K. Certain prior period amounts have been reclassified to conform with the current year presentation.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following analysis of our consolidated financial condition and results of operations should be read in conjunction with our consolidated financial statements and the notes thereto included elsewhere in this report.

OVERVIEW

Pennsylvania Real Estate Investment Trust, a Pennsylvania business trust founded in 1960 and one of the first equity REITs in the United States, has a primary investment focus on retail shopping malls and strip and power centers located in the eastern half of the United States, primarily in the Mid-Atlantic region. Our portfolio currently consists of a total of 54 properties in 13 states, including 38 shopping malls, 13 strip and power centers and three properties under development. The operating retail properties have a total of approximately 34.6 million square feet. The operating retail properties that we consolidate for financial reporting purposes have a total of approximately 30.1 million square feet, of which we own approximately 23.8 million square feet. The operating retail properties that are owned by unconsolidated partnerships with third parties have a total of approximately 4.5 million square feet, of which 2.9 million square feet are owned by such partnerships. The ground-up development portion of our portfolio contains three properties in two states, with two classified as mixed use (a combination of retail and other uses) and one classified as other.

Our primary business is owning and operating shopping malls and strip and power centers. We evaluate operating results and allocate resources on a property-by-property basis, and do not distinguish or evaluate our consolidated operations on a geographic basis. No individual property constitutes more than 10% of our consolidated revenue or assets, and thus the individual properties have been aggregated into one reportable segment based upon their similarities with regard to the nature of our properties and the nature of our tenants and operational processes, as well as long-term financial performance. In addition, no single tenant accounts for 10% or more of our consolidated revenue, and none of our properties are located outside the United States.

We hold our interests in our portfolio of properties through our operating partnership, PREIT Associates, L.P. (PREIT Associates). We are the sole general partner of PREIT Associates and, as of December 31, 2009, held a 95.0% controlling interest in PREIT Associates. We consolidate PREIT Associates for financial reporting purposes. We hold our investments in seven of the 51 retail properties and one of the three ground-up development properties in our portfolio through unconsolidated partnerships with third parties in which we own a 40% to 50% interest. We hold a non-controlling interest in each unconsolidated partnership, and account for such partnerships using the equity method of accounting. We do not control any of these equity method investees for the following reasons:

Except for two properties that we co-manage with our partner, all of the other entities are managed on a day-to-day basis by one of our other partners as the managing general partner in each of the respective partnerships. In the case of the co-managed properties, all decisions in the ordinary course of business are made jointly.

The managing general partner is responsible for establishing the operating and capital decisions of the partnership, including budgets, in the ordinary course of business.

All major decisions of each partnership, such as the sale, refinancing, expansion or rehabilitation of the property, require the approval of all partners.

Voting rights and the sharing of profits and losses are generally in proportion to the ownership percentages of each partner. We record the earnings from the unconsolidated partnerships using the equity method of accounting under the income statement caption entitled Equity in income of partnerships, rather than consolidating the results of the unconsolidated partnerships with our results. Changes in our investments in these entities are recorded in the balance sheet caption entitled Investment in partnerships, at equity. In the case of deficit investment balances, such amounts are recorded in Investments in partnerships, deficit balances.

We hold our interest in three of our unconsolidated partnerships through tenancy in common arrangements. For each of these properties, title is held by us and another person or persons, and each has an undivided interest in the property. With respect to each of the three properties, under the applicable agreements between us and the other persons with ownership interests, we and such other persons have joint control because decisions regarding matters such as the sale, refinancing, expansion or rehabilitation of the property require the approval of both us and the other

Table of Contents

person (or at least one of the other persons) owning an interest in the property. Hence, we account for each of the properties using the equity method of accounting. The balance sheet items arising from these properties appear under the caption Investments in partnerships, at equity. The income statement items arising from these properties appear in Equity in income of partnerships.

For further information regarding our unconsolidated partnerships, see note 3 to our consolidated financial statements.

We provide our management, leasing and real estate development services through PREIT Services, LLC (PREIT Services), which generally develops and manages properties that we consolidate for financial reporting purposes, and PREIT-RUBIN, Inc. (PRI), which generally develops and manages properties that we do not consolidate for financial reporting purposes, including properties we own interests in through partnerships with third parties and properties that are owned by third parties in which we do not have an interest. PRI is a taxable REIT subsidiary, as defined by federal tax laws, which means that it is able to offer an expanded menu of services to tenants without jeopardizing our continuing qualification as a REIT under federal tax law.

Our revenue consists primarily of fixed rental income, additional rent in the form of expense reimbursements, and percentage rent (rent that is based on a percentage of our tenants' sales or a percentage of sales in excess of thresholds that are specified in the leases) derived from our income producing retail properties. We also receive income from our real estate partnership investments and from the management and leasing services PRI provides.

Our net loss increased by \$73.7 million to a net loss of \$90.1 million for the year ended December 31, 2009 from a net loss of \$16.4 million for the year ended December 31, 2008. The increase in the loss was affected by challenging conditions in the economy, the impairment of assets, the effects of ongoing redevelopment initiatives, increased depreciation and amortization and interest expense as a result of development and redevelopment assets having been placed in service, increased interest expense as a result of a higher aggregate debt balance and increased property operating expenses compared to the year ended December 31, 2008. These factors were offset by gains on the extinguishment of debt in connection with repurchases of a portion of our 4% Senior Exchangeable Notes due in 2012 (Exchangeable Notes).

Current Economic Downturn, Challenging Capital Market Conditions, Our Leverage and our Near Term Capital Needs

The downturn in the overall economy and the disruptions in the financial markets have reduced consumer confidence and negatively affected employment and consumer spending on retail goods. As a result, the sales and profit performance of retailers in general has decreased, sales at our properties in particular have decreased, and we have experienced delays or deferred decisions regarding the openings of new retail stores and of lease renewals. We are adjusting our plans and actions to take into account the difficult current environment.

In addition, credit markets have experienced significant dislocations and liquidity disruptions. These circumstances have materially affected liquidity in the debt markets, making financing terms for borrowers less attractive, and in certain cases have resulted in the limited availability or unavailability of certain types of debt financing.

The difficult conditions in the market for debt capital and commercial mortgage loans, including the commercial mortgage backed securities market, and the downturn in the general economy and its effect on retail sales, as well as our significant leverage resulting from use of debt to fund our redevelopment program and other development activity, have combined to necessitate that we vary our approach to obtaining, using and recycling capital. We intend to consider all of our available options for accessing the capital markets, given our position and constraints.

The amounts remaining to be invested in the last phases of our current redevelopment projects are significantly less than in 2009, and we believe that we have access to sufficient capital to fund these remaining amounts.

We are contemplating ways to reduce our leverage through a variety of means available to us, and subject to and in accordance with the terms of the 2010 Credit Facility. These steps might include obtaining equity capital, including

Table of Contents

through the issuance of equity securities if market conditions are favorable, through joint ventures or other partnerships or arrangements involving our contribution of assets with institutional investors, private equity investors or other REITs, through sales of properties with values in excess of their mortgage loans or allocable debt and application of the excess proceeds to debt reduction, or through other actions.

2009 Dispositions

In May 2009, we sold an outparcel and related land improvements containing an operating restaurant at Monroe Marketplace in Selinsgrove, Pennsylvania for \$0.9 million. We recorded an asset impairment charge of \$0.1 million immediately prior to this transaction. No gain or loss was recorded from this sale.

In June 2009, we sold two outparcels and related improvements adjacent to North Hanover Mall in Hanover, Pennsylvania for \$2.0 million. We recorded a gain of \$1.4 million from this sale.

In June 2009, we sold a land parcel adjacent to Woodland Mall in Grand Rapids, Michigan for \$2.7 million. The parcel contained a department store that was subject to a ground lease. We recorded a gain of \$0.2 million from this sale.

In August 2009, we sold Crest Plaza in Allentown, Pennsylvania for \$15.8 million. We recorded a gain of \$3.4 million from this sale.

In October 2009, we sold two outparcels and related improvements adjacent to Monroe Marketplace in Selinsgrove, Pennsylvania for \$2.8 million. No gain or loss was recorded from this sale.

In October 2009, we sold a parcel and related land improvements at Pitney Road Plaza in Lancaster, Pennsylvania for \$10.2 million. The parcel contained a home improvement store that was subject to a ground lease. We recorded a gain of \$2.7 million from this sale.

In October 2009, we sold a controlling interest in Northeast Tower Center in Philadelphia, Pennsylvania, for \$30.4 million. We recorded a gain of \$6.1 million from this sale. In connection with the sale, we repaid the mortgage loan associated with Northeast Tower Center, with a balance of \$20.0 million at closing.

2007 Dispositions

In March 2007, we sold Schuylkill Mall in Frackville, Pennsylvania for \$17.6 million. We recorded a \$6.7 million gain on the sale. In connection with the sale, we repaid the mortgage loan associated with Schuylkill Mall, with a balance of \$16.5 million at closing.

In May 2007, we sold an outparcel and related land improvements containing an operating restaurant at New River Valley Mall in Christiansburg, Virginia for \$1.6 million. We recorded a \$0.6 million gain from this sale.

In May 2007, we sold an outparcel and related land improvements at Plaza at Magnolia in Florence, South Carolina for \$11.3 million. We recorded a \$1.5 million gain from this sale.

In August 2007, we sold undeveloped land adjacent to Wiregrass Commons Mall in Dothan, Alabama for \$2.1 million. We recorded a \$0.3 million gain from this sale.

In December 2007, we sold undeveloped land in Monroe Township, Pennsylvania for \$0.8 million. There was no gain or loss recorded from this sale.

2009 and 2008 Acquisitions

In February 2008, we acquired a 49.9% ownership interest in Bala Cynwyd Associates, L.P. See [Related Party Transactions](#) for further information about this transaction. In June 2009, we acquired an additional 49.9% ownership interest.

In July 2008, we acquired a parcel in Lancaster, Pennsylvania for \$8.0 million plus customary closing costs. We developed this property and it is currently operating as Pitney Road Plaza.

Table of Contents

In July 2008, we acquired land previously subject to a ground lease located at Wiregrass Commons in Dothan, Alabama for \$3.2 million.

2007 Acquisitions

In August 2007, we purchased a 116 acre land parcel in Monroe Township, Pennsylvania for \$5.5 million. We had previously acquired an aggregate of approximately 10 acres on adjacent parcels. We developed this property and it is currently operating as Monroe Marketplace.

In August 2007, we purchased Plymouth Commons, a 60,000 square foot office building adjacent to Plymouth Meeting Mall, for \$9.2 million.

Development and Redevelopment

We have reached the last phases of the projects in our current redevelopment program. Since the beginning of 2009, we reached several major milestones for four of our largest projects, including the opening of Nordstrom and the restaurants of Bistro Row at Cherry Hill Mall, the opening of Whole Foods Market and Café at Plymouth Meeting Mall, the opening of the offices of the Commonwealth of Pennsylvania at The Gallery at Market East and the opening of retail and office space at Voorhees Town Center. We also completed the redevelopment of Wiregrass Commons Mall with the second of two new anchors opening in 2009.

The following table sets forth the amount of the currently estimated project cost and the amount invested as of December 31, 2009 for each ongoing redevelopment project:

Redevelopment Project	Estimated Project Cost⁽¹⁾	Invested as of December 31, 2009
Cherry Hill Mall	\$ 218.0 million	\$ 211.3 million
Plymouth Meeting Mall	97.7 million	90.5 million
The Gallery at Market East	81.6 million	81.5 million
Voorhees Town Center	83.0 million	67.6 million
		\$ 450.9 million

⁽¹⁾ Our projected share of costs is net of any expected tenant reimbursements, parcel sales, tax credits or other incentives.

We are engaged in the ground-up development of three mixed use and other projects, although we do not expect to make material investments in these projects in the short term. As of December 31, 2009, we had incurred \$77.6 million of costs related to these three projects. The details of the White Clay Point, Springhills and Pavilion at Market East projects and related costs have not been determined. In each case, we will evaluate the financing opportunities available to us at the time a project requires funding. In cases where the project is undertaken with a partner, our flexibility in funding the project might be governed by the partnership agreement or the covenants contained in our 2010 Credit Facility, which limit our involvement in such projects.

Table of Contents

The following table sets forth the amount of our intended investment and the amounts invested as of December 31, 2009 in each ground-up development project:

Development Project	Invested as of December 31, 2009
Development Properties:	
White Clay Point ⁽¹⁾	\$ 43.5 million
Springhills ⁽²⁾	33.4 million
Pavilion at Market East ⁽³⁾	0.7 million
	\$ 77.6 million

⁽¹⁾ Amount invested as of December 31, 2009 does not reflect an \$11.8 million impairment charge that we recorded in December 2008. See the notes to our consolidated financial statements for further discussion of this charge.

⁽²⁾ Amount invested as of December 31, 2009 does not reflect an \$11.5 million impairment charge that we recorded in 2009. See the notes to our consolidated financial statements for further discussion of this charge.

⁽³⁾ The property is unconsolidated. The amount shown represents our share.

In connection with our current redevelopment and ground-up development projects, we have made contractual and other commitments on these projects in the form of tenant allowances, lease termination fees and contracts with general contractors and other professional service providers. As of December 31, 2009, the unaccrued remainder to be paid against these contractual and other commitments was \$2.3 million, which is expected to be financed through our 2010 Credit Facility or through various other capital sources. The projects on which these commitments have been made have total expected remaining costs of \$40.4 million.

OFF BALANCE SHEET ARRANGEMENTS

We have no material off-balance sheet items other than the partnerships described in note 3 to the consolidated financial statements and in the Overview section above.

RELATED PARTY TRANSACTIONS*General*

PRI provides management, leasing and development services for eight properties owned by partnerships and other entities in which certain officers or trustees of the Company and of PRI or members of their immediate families and affiliated entities have indirect ownership interests. Total revenue earned by PRI for such services was \$0.9 million, \$1.1 million and \$0.9 million for the years ended December 31, 2009, 2008 and 2007, respectively. As of December 31, 2009, \$0.2 million was due from the property-owning partnerships to PRI.

We lease our principal executive offices from Bellevue Associates (the Landlord), an entity in which certain of our officers/trustees have an interest. Total rent expense under this lease was \$1.6 million for each of the years ended December 31, 2009, 2008, and 2007. Ronald Rubin and George F. Rubin, collectively with members of their immediate families and affiliated entities, own approximately a 50% interest in the Landlord. The office lease has a 10 year term that commenced on November 1, 2004. We have the option to renew the lease for up to two additional five-year periods at the then-current fair market rate calculated in accordance with the terms of the office lease. In

Table of Contents

addition, we have the right on one occasion at any time during the seventh lease year (2011) to terminate the office lease upon the satisfaction of certain conditions. Effective June 1, 2004, our base rent was \$1.4 million per year during the first five years of the office lease and is \$1.5 million per year during the second five years.

We use an airplane in which Ronald Rubin owns a fractional interest. We did not incur any expenses in 2009 for this service. We paid \$174,000 and \$35,000 in the years ended December 31, 2008 and 2007, respectively, for flight time used by employees exclusively for Company-related business.

As of December 31, 2009, nine of our officers had employment agreements with terms of one year that renew automatically for additional one-year terms. Their 2008 employment agreements provided for aggregate base compensation for the year ended December 31, 2009 of \$3.4 million, subject to increases as approved by our Board compensation committee in future years, as well as additional incentive compensation.

Tax Protection Agreements

We have agreed to provide tax protection related to our acquisition of Cumberland Mall Associates in 2005 and New Castle Associates in 2003 and 2004 to the prior owners of Cumberland Mall Associates and New Castle Associates, respectively, for a period of eight years following the respective closings. Ronald Rubin and George F. Rubin are beneficiaries of these tax protection agreements.

Bala Cynwyd Associates, L.P.

On January 22, 2008, PREIT, PREIT Associates, L.P. and another subsidiary of PREIT entered into a Contribution Agreement with Bala Cynwyd Associates, L.P. (BCA), City Line Associates (CLA), Ronald Rubin, George F. Rubin, Joseph F. Coradino, and two other individuals to acquire all of the partnership interests in BCA. BCA had also entered into a tax deferred exchange agreement with the owners of One Cherry Hill Plaza, an office building located within the boundaries of our Cherry Hill Mall (the Office Building), to acquire title to the Office Building in exchange for an office building located in Bala Cynwyd, Pennsylvania owned by BCA.

Ronald Rubin, George F. Rubin, Joseph F. Coradino and two other individuals owned 100% of CLA, which in turn directly or indirectly owned 100% of BCA immediately prior to the initial closing. Each of Ronald Rubin and George F. Rubin owned 40.53% of the partnership interests in CLA, and Joseph F. Coradino owned 3.16% of the partnership interests. At the initial closing under the Contribution Agreement in 2008 and in exchange for a 0.1% general partner interest and 49.8% limited partner interest in BCA, we made a capital contribution to BCA in an approximate amount of \$3.93 million.

In June 2009, a second closing occurred pursuant to a put/call arrangement, at which time we acquired an additional 49.9% of the limited partner interest in BCA for approximately \$199,000 in cash and 140,745 units of Class A limited partnership interest (OP Units) in PREIT Associates, L.P. A third closing is expected to occur pursuant to a put/call arrangement approximately one year after the second closing, at which time the remaining interest in BCA will be acquired by us in exchange for approximately \$1,000 in cash and 564 OP Units. None of Ronald Rubin, George Rubin or Joseph Coradino received any consideration from us in connection with the first closing. At the second closing, Ronald Rubin received 60,208 OP Units, George F. Rubin received 60,208 OP Units, and Joseph F. Coradino received 4,691 OP Units.

The acquisition of the Office Building was financed in part by a mortgage loan in the principal amount of \$8.0 million.

In accordance with our related party transactions policy, a special committee consisting exclusively of independent members of our Board of Trustees considered and approved the terms of the transaction. The approval was subject to final approval of our Board of Trustees, and the disinterested members of our Board of Trustees approved the transaction.

Crown

In connection with the merger (the Merger) with Crown American Realty Trust (Crown) in 2003, we entered into a tax protection agreement with Mark E. Pasquerilla (one of our trustees) and entities affiliated with Mr. Pasquerilla (the Pasquerilla Group). Under this tax protection agreement, we agreed not to dispose of certain

Table of Contents

protected properties acquired in the Merger in a taxable transaction until November 20, 2011 or, if earlier, until the Pasquerilla Group collectively owns less than 25% of the aggregate of the shares and OP Units that they acquired in the Merger. If we were to sell any of the protected properties during the first five years of the protection period, we would have owed the Pasquerilla Group an amount equal to the sum of the hypothetical tax owed by the Pasquerilla Group, plus an amount intended to make the Pasquerilla Group whole for taxes that may be due upon receipt of such payments. From the end of the first five years through the end of the tax protection period, the payments were intended to compensate the affected parties for interest expense incurred on amounts borrowed to pay the taxes incurred on the sale. We paid \$2,000 and \$8,000 to the Pasquerilla Group in 2008 and 2007 pursuant to this agreement, respectively. As of December 31, 2009, the Pasquerilla Group collectively owns less than 25% of the aggregate of the shares and OP Units that they acquired in the Merger.

CRITICAL ACCOUNTING POLICIES

Critical Accounting Policies are those that require the application of management's most difficult, subjective, or complex judgments, often because of the need to make estimates about the effect of matters that are inherently uncertain and that might change in subsequent periods. In preparing the consolidated financial statements, management has made estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting periods. In preparing the financial statements, management has utilized available information, including the Company's past history, industry standards and the current economic environment, among other factors, in forming its estimates and judgments, giving due consideration to materiality. Actual results may differ from these estimates. In addition, other companies may utilize different estimates, which may impact comparability of our results of operations to those of companies in similar businesses. The estimates and assumptions made by management in applying critical accounting policies have not changed materially during 2009, 2008 and 2007, except as otherwise noted, and none of these estimates or assumptions have proven to be materially incorrect or resulted in our recording any significant adjustments relating to prior periods. We will continue to monitor the key factors underlying our estimates and judgments, but no change is currently expected. Set forth below is a summary of the accounting policies that management believes are critical to the preparation of the consolidated financial statements. This summary should be read in conjunction with the more complete discussion of our accounting policies included in note 1 to our consolidated financial statements.

Our management makes complex or subjective assumptions and judgments with respect to applying its critical accounting policies. In making these judgments and assumptions, management considers, among other factors:

events and changes in property, market and economic conditions;

estimated future cash flows from property operations; and

the risk of loss on specific accounts or amounts.

Revenue Recognition

We derive over 95% of our revenue from tenant rent and other tenant related activities. Tenant rent includes base rent, percentage rent, expense reimbursements (such as common area maintenance, real estate taxes and utilities), amortization of above- and below-market intangibles and straight-line rent. We record base rent on a straight-line basis, which means that the monthly base rent income according to the terms of our leases with tenants is adjusted so that an average monthly rent is recorded for each tenant over the term of its lease. When tenants vacate prior to the end of their lease, we accelerate amortization of any related unamortized straight-line rent balances, and unamortized above-market and below-market intangible balances are amortized as a decrease or increase to real estate revenue, respectively.

Percentage rent represents rental income that the tenant pays based on a percentage of its sales, either as a percentage of their total sales or as a percentage of sales over a certain threshold. In the latter case, we do not record percentage rent until the sales threshold has been reached. Revenue for rent received from tenants prior to their due dates is deferred until the period to which the rent applies.

In addition to base rent, certain lease agreements contain provisions that require tenants to reimburse a fixed or pro rata share of certain common area maintenance costs and real estate taxes. Tenants generally make expense reimbursement payments monthly based on a budgeted amount determined at the beginning of the year. During the year, our income increases or decreases based on actual expense levels and changes in other factors that influence

Table of Contents

the reimbursement amounts, such as occupancy levels. Subsequent to the end of the year, we prepare a reconciliation of the actual amounts due from tenants. The difference between the actual amount due and the amounts paid by the tenant throughout the year is billed or credited to the tenant, depending on whether the tenant paid too little or too much during the year.

Payments made to tenants as inducements to enter into a lease are treated as deferred costs that are amortized as a reduction of rental revenue over the term of the related lease.

Lease termination fee income is recognized in the period when a termination agreement is signed, collectibility is assured, and we are no longer obligated to provide space to the tenant. In the event that a tenant is in bankruptcy when the termination agreement is signed, termination fee income is deferred and recognized when it is received.

We also generate revenue by providing management services to third parties, including property management, brokerage, leasing and development. Management fees generally are a percentage of managed property revenue or cash receipts. Leasing fees are earned upon the consummation of new leases. Development fees are earned over the time period of the development activity and are recognized on the percentage of completion method. These activities collectively are included in *Interest and other income* in the consolidated statements of operations.

Fair Value

On January 1, 2008, we adopted new accounting requirements that define fair value, establish a framework for measuring fair value, and expand disclosures about fair value measurements. These new accounting requirements apply to reported balances that are required or permitted to be measured at fair value under existing accounting pronouncements; the standard does not require any new fair value measurements of reported balances.

These new accounting requirements emphasize that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, a fair value hierarchy was established that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to access.

Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals.

Level 3 inputs are unobservable inputs for the asset or liability, which are typically based on an entity's own assumptions, as there is little, if any, related market activity.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability. We utilize the fair value hierarchy in our accounting for derivatives and in our impairment reviews of real estate assets and goodwill.

Derivatives

Currently, we use interest rate swaps and caps to manage its interest rate risk. The valuation of these instruments is determined using widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs.

Table of Contents

We incorporate credit valuation adjustments to appropriately reflect both our own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of our derivative contracts for the effect of nonperformance risk, we have considered the impact of netting and any applicable credit enhancements. Although we have determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads, to evaluate the likelihood of default by itself and its counterparties. However, as of December 31, 2009, we have assessed the significance of the effect of the credit valuation adjustments on the overall valuation of its derivative positions and we have determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, we have determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

Financial Instruments

Carrying amounts reported on the balance sheet for cash and cash equivalents, tenant and other receivables, accrued expenses, other liabilities and the 2003 Credit Facility approximate fair value due to the short-term nature of these instruments. The majority of our variable-rate debt is subject to interest rate swaps that have effectively fixed the interest rates on the underlying debt has an estimated fair value that is approximately the same as the recorded amounts in the balance sheets. The estimated fair value for fixed-rate debt, which is calculated for disclosure purposes, is based on the borrowing rates available to us for fixed-rate mortgage loans and corporate notes payable with similar terms and maturities.

Asset Impairment

Real estate investments and related intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the property might not be recoverable. A property to be held and used is considered impaired only if our estimate of the aggregate future cash flows, less estimated capital expenditures, to be generated by the property, undiscounted and without interest charges, are less than the carrying value of the property. This estimate takes into consideration factors such as expected future operating income, trends and prospects, as well as the effects of demand, competition and other factors. In addition, these estimates may consider a probability weighted cash flow estimation approach when alternative courses of action to recover the carrying amount of a long lived asset are under consideration or when a range of possible values is estimated.

The determination of undiscounted cash flows requires significant estimates by us, including the expected course of action at the balance sheet date that would lead to such cash flows. Subsequent changes in estimated undiscounted cash flows arising from changes in the anticipated action to be taken with respect to the property could impact the determination of whether an impairment exists and whether the effects could materially impact our results of operations. To the extent estimated undiscounted cash flows are less than the carrying value of the property, the loss will be measured as the excess of the carrying amount of the property over the estimated fair value of the property.

Our assessment of the recoverability of certain lease related costs must be made when we have a reason to believe that the tenant might not be able to perform under the terms of the lease as originally expected. This requires us to make estimates as to the recoverability of such costs.

An other than temporary impairment of an investment in an unconsolidated joint venture is recognized when the carrying value of the investment is not considered recoverable based on evaluation of the severity and duration of the decline in value, including the results of discounted cash flow and other valuation techniques. To the extent impairment has occurred, the excess carrying value of the asset over its estimated fair value is charged to income.

Real Estate

Land, buildings, fixtures and tenant improvements are recorded at cost and stated at cost less accumulated depreciation. Expenditures for maintenance and repairs are charged to operations as incurred. Renovations or replacements, which improve or extend the life of an asset, are capitalized and depreciated over their estimated useful lives.

Table of Contents

For financial reporting purposes, properties are depreciated using the straight-line method over the estimated useful lives of the assets. The estimated useful lives are as follows:

Buildings	30-50 years
Land improvements	15 years
Furniture/fixtures	3-10 years
Tenant improvements	Lease term

We are required to make subjective assessments as to the useful lives of our properties for purposes of determining the amount of depreciation to reflect on an annual basis with respect to those properties based on various factors, including industry standards, historical experience and the condition of the asset at the time of acquisition. These assessments have a direct impact on our results of operations. If we were to determine that a longer expected useful life was appropriate for a particular asset, it would be depreciated over more years, and, other things being equal, result in less annual depreciation expense and higher annual net income.

Gains from sales of real estate properties and interests in partnerships generally are recognized using the full accrual method provided that various criteria are met relating to the terms of sale and any subsequent involvement by us with the properties sold.

Real Estate Acquisitions

We account for our property acquisitions by allocating the purchase price of a property to the property's assets based on our estimates of their fair value.

Debt assumed in connection with property acquisitions is recorded at fair value at the acquisition date, and the resulting premium or discount is amortized through interest expense over the remaining term of the debt, resulting in a non-cash decrease (in the case of a premium) or increase (in the case of a discount) in interest expense.

Intangible Assets

The determination of the fair value of intangible assets requires significant estimates by management and considers many factors, including our expectations about the underlying property and the general market conditions in which the property operates. The judgment and subjectivity inherent in such assumptions can have a significant impact on the magnitude of the intangible assets that we record.

A portion of the purchase price of a property is allocated to intangible assets. Our methodology for this allocation includes estimating an as-if vacant fair value of the physical property, which is allocated to land, building and improvements. The difference between the purchase price and the as-if vacant fair value is allocated to intangible assets. There are three categories of intangible assets to be considered: (i) value of in-place leases, (ii) above- and below-market value of in-place leases and (iii) customer relationship value.

The value of in-place leases is estimated based on the value associated with the costs avoided in originating leases comparable to the acquired in-place leases, as well as the value associated with lost rental revenue during the assumed lease-up period. The value of in-place leases is amortized as real estate amortization over the remaining lease term.

Above-market and below-market in-place lease values for acquired properties are recorded based on the present value of the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) our estimates of fair market lease rates for the comparable in-place leases, based on factors including historical experience, recently executed transactions and specific property issues, measured over a period equal to the remaining non-cancelable term of the lease. The value of above-market lease values is amortized as a reduction of rental income over the remaining terms of the respective leases. The value of below-market lease values is amortized as an increase to rental income over the remaining terms of the respective leases, including any below-market optional renewal periods.

We allocate purchase price to customer relationship intangibles based on our assessment of the value of such relationships.

Table of Contents

Goodwill

We conduct an annual review of our goodwill balances for impairment to determine whether an adjustment to the carrying value of goodwill is required. We determined the fair value of our properties and the goodwill that is associated with the properties by applying a capitalization rate to our estimate of projected income at those properties. We also consider factors such as property sales performance, market position and current and future operating results.

Assets Held for Sale and Discontinued Operations

The determination to classify an asset as held for sale requires significant estimates by us about the property and the expected market for the property, which are based on factors including recent sales of comparable properties, recent expressions of interest in the property, financial metrics of the property and the condition of the property. We must also determine if it will be possible under those market conditions to sell the property for an acceptable price within one year. When assets are identified by management as held for sale, we discontinue depreciating the assets and estimate the sales price, net of selling costs of such assets. We generally consider operating properties to be held for sale when they meet the criteria, which include factors such as whether the sale transaction has been approved by the appropriate level of management and there are no known material contingencies relating to the sale such that the sale is probable within one year. If, in management's opinion, the net sales price of the asset that has been identified as held for sale is less than the net book value of the asset, the asset is written down to fair value less the cost to sell. Assets and liabilities related to assets classified as held for sale are presented separately in the consolidated balance sheet.

Assuming no significant continuing involvement, a sold operating real estate property is considered a discontinued operation. In addition, operating properties classified as held for sale are considered discontinued operations. Operating properties classified as discontinued operations are reclassified as such in the consolidated statement of operations for each period presented. Interest expense that is specifically identifiable to the property is used in the computation of interest expense attributable to discontinued operations. See note 2 to our consolidated financial statements for a description of the properties included in discontinued operations. Land parcels and other portions of operating properties, non-operating real estate and investments in partnerships are excluded from discontinued operations treatment.

Capitalization of Costs

Costs incurred in relation to development and redevelopment projects for interest, property taxes and insurance are capitalized only during periods in which activities necessary to prepare the property for its intended use are in progress. Costs incurred for such items after the property is substantially complete and ready for its intended use are charged to expense as incurred. Capitalized costs, as well as tenant inducement amounts and internal and external commissions, are recorded in construction in progress. We capitalize a portion of development department employees' compensation and benefits related to time spent involved in development and redevelopment projects.

We capitalize payments made to obtain options to acquire real property. Other related costs that are incurred before acquisition that are expected to have ongoing value to the project are capitalized if the acquisition of the property or of an option to acquire the property is probable. If the property is acquired, such costs are included in the amount recorded as the initial value of the asset. Capitalized pre-acquisition costs are charged to expense when it is probable that the property will not be acquired.

We capitalize salaries, commissions and benefits related to time spent by leasing and legal department personnel involved in originating leases with third-party tenants.

Tenant Receivables

We make estimates of the collectibility of our tenant receivables related to tenant rent including base rent, straight-line rent, expense reimbursements and other revenue or income. We specifically analyze accounts receivable, including straight-line rent receivable, historical bad debts, customer creditworthiness and current economic and industry trends when evaluating the adequacy of the allowance for doubtful accounts. The receivables analysis places particular emphasis on past-due accounts and considers the nature and age of the receivables, the payment history and financial condition of the payor, the basis for any disputes or negotiations with the payor, and other information that could affect collectibility. In addition, with respect to tenants in bankruptcy, we make estimates of the expected recovery of pre-petition and post-petition claims in assessing the estimated collectibility of the related

Table of Contents

receivable. In some cases, the time required to reach an ultimate resolution of these claims can exceed one year. These estimates have a direct effect on our results of operations because higher bad debt expense results in less net income, other things being equal. For straight line rent, the collectibility analysis considers the probability of collection of the unbilled deferred rent receivable given our experience regarding such amounts.

RESULTS OF OPERATIONS*Comparison of Years Ended December 31, 2009, 2008 and 2007**Overview*

Our net loss increased by \$73.7 million to a net loss of \$90.1 million for the year ended December 31, 2009 from net loss of \$16.4 million for the year ended December 31, 2008. The increase in the loss was affected by challenging conditions in the economy, the impairment of assets, the effects of ongoing redevelopment initiatives, tenant bankruptcies, increased depreciation and amortization and interest expense as a result of development and redevelopment assets having been placed in service, increased interest expense as a result of a higher aggregate debt balance and increased property operating expenses compared to the year ended December 31, 2008. These factors were offset by gains on the extinguishment of debt in connection with repurchases of a portion of our Exchangeable Notes.

Our net income decreased by \$39.5 million to a net loss of \$16.4 million for the year ended December 31, 2008 from net income of \$23.1 million for the year ended December 31, 2007. The decrease was affected by challenging conditions in the economy, the impairment of assets, tenant bankruptcies, the effects of ongoing redevelopment initiatives, increased depreciation and amortization as a result of development and redevelopment assets having been placed in service, increased interest expense as a result of a higher aggregate debt balance and increased property operating expenses compared to the year ended December 31, 2007 and a decrease in gains on the sales of discontinued operations. These decreases were partially offset by a gain on the extinguishment of debt in connection with a repurchase of a portion of our Exchangeable Notes.

The table below sets forth certain occupancy statistics for properties that we consolidate as of December 31, 2009, 2008, and 2007:

	Consolidated Properties Occupancy as of December 31,		
	2009	2008	2007
Retail portfolio weighted average:			
Total including anchors	89.7%	90.3%	90.5%
Excluding anchors	84.7%	87.3%	88.1%
Enclosed malls weighted average:			
Total including anchors	89.4%	89.6%	90.1%
Excluding anchors	84.2%	86.5%	87.7%
Strip and power center weighted average:			
	93.1%	99.2%	96.6%

Table of Contents

The following table sets forth certain occupancy statistics for properties owned by partnerships in which we own a 50% interest as of December 31, 2009, 2008 and 2007:

	Partnership Properties Occupancy as of December 31,		
	2009	2008	2007
Retail portfolio weighted average:			
Total including anchors	90.7%	94.3%	95.7%
Excluding anchors	87.6%	91.9%	93.9%
Enclosed malls weighted average:			
Total including anchors	92.0%	91.8%	95.2%
Excluding anchors	89.9%	89.6%	93.8%
Strip and power center weighted average:	89.9%	95.6%	95.9%

The following information sets forth our results of operations for the years ended December 31, 2009, 2008 and 2007:

(in thousands of dollars)	Year Ended December 31, 2009	% Change 2008 to 2009	Year Ended December 31, 2008	% Change 2007 to 2008	Year Ended December 31, 2007
Results of operations:					
Revenue	\$ 463,088	(1%)	\$ 467,993	2%	\$ 460,590
Operating expenses	(193,576)	4%	(186,520)	4%	(179,010)
General and administrative expenses	(37,558)	(7%)	(40,324)	(3%)	(41,415)
Income taxes and other	(169)	(29%)	(237)	(43%)	(413)
Impairment of assets and abandoned project costs	(75,012)	160%	(28,889)	1,787%	(1,531)
Interest expense, net	(133,460)	16%	(115,013)	15%	(100,188)
Depreciation and amortization	(166,570)	11%	(150,041)	15%	(130,632)
Equity in income of partnerships	10,102	43%	7,053	52%	4,637
Gain on extinguishment of debt	27,047		27,074		
Gains on sales of real estate	923				579
Gains on sales of non-operating real estate	3,388				1,731
Income from discontinued operations	11,706	359%	2,549	(71%)	8,772
Net (loss) income	\$ (90,091)	451%	\$ (16,355)	(171%)	\$ 23,120

The amounts reflected as income from continuing operations in the preceding table reflect our consolidated properties, with the exception of properties that are classified as discontinued operations. Our unconsolidated partnerships are presented under the equity method of accounting in the line item Equity in income of partnerships.

Table of Contents*Real Estate Revenue*

Real estate revenue decreased by \$3.4 million, or 1%, in 2009 as compared to 2008. Real estate revenue in 2009 was significantly affected by tenant bankruptcies and store closings, resulting in lower occupancy and expense reimbursements and higher bad debt expense compared to 2008. Real estate revenue from properties that were owned by us for the entire period from January 1, 2008 to December 31, 2009 (2009 Same Store Properties) decreased by \$7.2 million in 2009, primarily due to decreases of \$1.9 million in lease termination revenue, \$1.8 million in percentage rent, \$1.7 million in other revenue, \$1.3 million in expense reimbursements and \$0.5 million in base rent, which is comprised of minimum rent, straight line rent and rent from tenants that pay a percentage of sales in lieu of minimum rent. These changes in real estate revenue are explained below in further detail. Real estate revenue increased \$3.8 million from one property under development during 2008 that was placed in service in 2009.

Lease termination revenue from 2009 Same Store Properties decreased by \$1.9 million in 2009, primarily due to amounts received from two tenants during 2008 that did not recur in 2009. Percentage rent from 2009 Same Store Properties decreased by \$1.8 million due in part to a decrease in tenant sales from \$333 per square foot in 2008 to \$325 per square foot in 2009. This decrease was also partially due to a trend in certain more recent leases that have higher thresholds at which percentage rent begins. Other revenue from 2009 Same Store Properties decreased by \$1.7 million in 2009, primarily due to a \$1.1 million decrease in marketing revenue, a \$0.2 million decrease in corporate sponsorship revenue and a \$0.1 million decrease in gift card revenue. The decrease in marketing revenue was offset by a corresponding \$1.1 million decrease in marketing expense. Marketing revenue is generally recognized in tandem with marketing expense.

Expense reimbursements from 2009 Same Store Properties decreased by \$1.3 million in 2009 as compared to 2008. At many of our malls, we have continued to recover a lower proportion of common area maintenance and real estate tax expenses. In addition to being affected by store closings, our properties are experiencing a trend towards more gross leases (leases that provide that tenants pay a higher base rent amount in lieu of contributing toward common area maintenance costs and real estate taxes), as well as more leases that provide for the rent amount to be determined on the basis of a percentage of sales in lieu of minimum rent or any contribution toward common area maintenance or real estate tax expenses. We are also experiencing rental concessions made to tenants affected by our redevelopment activities and to tenants experiencing financial difficulties, that resulted in lower recoveries.

Base rent from 2009 Same Store Properties decreased by \$0.5 million in 2009 as compared to 2008. Base rent decreased by \$5.5 million due to store closings and liquidations associated with tenant bankruptcy filings during 2009 and 2008. Partially offsetting these decreases, base rent at Cherry Hill Mall, Voorhees Town Center and Plymouth Meeting Mall, three projects in the current redevelopment program, increased by \$2.4 million, \$1.6 million and \$1.1 million, respectively, due to increased occupancy from newly opened tenants. Partially offsetting the increases at Voorhees Town Center and Plymouth Meeting Mall were lease inducement and straight line rent receivable write-offs of \$0.6 million and \$0.2 million, respectively, associated with tenant delinquencies, which reduced base rent.

Interest and other income decreased by \$1.5 million, or 33%, in 2009 as compared to 2008 due to lower interest rates on excess cash investments and non-recurring development fees and leasing commissions recorded in 2008.

We believe that the current downward trend in the overall economy and the recent disruptions in the financial markets have reduced consumer confidence in the economy and negatively affected employment and consumer spending on retail goods, and have consequently decreased the demand for retail space and the revenue generated by our properties. The weaker operating performance of retailers has resulted in delays or deferred decisions regarding the opening of new retail stores and renewals of existing leases at our properties and has affected the ability of our current tenants to meet their obligations to us, which has and is anticipated to continue to adversely affect our ability to generate real estate revenue during the duration of the current downturn and disruptions.

Real estate revenue increased by \$9.9 million, or 2%, in 2008 as compared to 2007, including an increase of \$4.1 million from properties that were under development during 2007 that were placed in service in 2008 and an increase of \$1.5 million from One Cherry Hill Plaza (acquired in February 2008). Real estate revenue from properties that were owned by us for the entire period from January 1, 2007 to December 31, 2008 (2008 Same Store Properties) increased by \$4.3 million in 2008, primarily due to increases of \$2.7 million in expense reimbursements, \$2.5 million in lease termination revenue and \$2.1 million in base rent, partially offset by decreases of \$1.9 million in percentage rent and \$1.1 million in other revenue.

Table of Contents

Expense reimbursements from 2008 Same Store Properties increased by \$2.7 million in 2008 as compared to 2007 due in large part to higher reimbursable expenses, as discussed below under Operating Expenses. Lease termination revenue from 2008 Same Store Properties increased by \$2.5 million, primarily due to amounts received from two tenants during 2008.

Base rent from 2008 Same Store Properties increased by \$2.1 million in 2008 as compared to 2007 primarily due to an increase in rental rates and increased occupancy at redevelopment projects, including a \$1.0 million increase at Voorhees Town Center, a \$0.9 million increase at Plymouth Meeting Mall and a \$0.7 million increase at Cherry Hill Mall. Additionally, base rent in 2008 increased by \$0.9 million at redevelopment projects completed during 2008 and 2007 due to an increase in rental rates and increased occupancy. These increases were partially offset by a \$1.5 million decrease in base rent at our remaining properties due to decreases of \$1.0 million in specialty leasing revenue, \$0.9 million in straight line rent and \$0.5 million in above/below market rent amortization, partially offset by increases of \$0.5 million in minimum rent and \$0.4 million in percentage of sales rent in lieu of minimum rent. Percentage rent decreased by \$1.9 million in 2008 as compared to 2007 due in part to a decrease in tenant sales from \$349 per square foot in 2007 to \$333 in 2008. Percentage rent also decreased in connection with a trend among certain tenants to have higher thresholds at which percentage rent begins. Other revenue decreased by \$1.1 million in 2008 compared to 2007, including a \$0.4 million decrease in marketing revenue, a \$0.3 million decrease in gift card revenue and a \$0.3 million decrease in ancillary revenue. These revenue decreases were offset by corresponding decreases of \$0.5 million in marketing expense, \$0.3 million in gift card expense and \$0.3 million in ancillary expense.

Interest and other income decreased by \$2.5 million, or 36%, in 2008 as compared to 2007 due to a \$1.5 million one time payment received in 2007 that did not recur in 2008 in connection with Swansea Mall in Swansea, Massachusetts, a mall that we formerly managed.

Operating Expenses

Operating expenses increased by \$7.1 million, or 4%, in 2009 as compared to 2008. Operating expenses from 2009 Same Store Properties increased by \$6.0 million in 2009, primarily due to a \$3.4 million increase in real estate tax expense and a \$3.4 million increase in common area maintenance expense. These increases were partially offset by a \$0.8 million decrease in non-common area utility expense. Operating expenses increased \$1.0 million from two properties under development during 2008 that were placed in service in 2009, and \$0.1 million from a property we acquired in February 2008.

Real estate tax expense increased by \$3.4 million in 2009, primarily due to higher tax rates and increased property assessments at some of our properties. Common area maintenance expenses increased by \$3.4 million, due primarily to increases of \$1.5 million in snow removal, \$1.4 million in repairs and maintenance and \$0.7 million in loss prevention expense. Snow removal expense amounts at our properties located in Pennsylvania and New Jersey increased as a result of a significant snowstorm that affected the Mid-Atlantic states in mid-December 2009. Total snow removal costs associated with this storm were approximately \$1.6 million. Repairs and maintenance expense and loss prevention expense increased due primarily to stipulated annual contractual increases. Non-common area utility expense decreased by \$0.8 million in 2009, including a \$0.5 million decrease at our four properties located in New Jersey due to a combination of lower utility rates and lower consumption resulting from newly installed equipment at Voorhees Town Center and Cherry Hill Mall.

Other operating expenses were affected by a \$1.1 million decrease in marketing expense, a \$0.3 million decrease in legal fee expense, a \$0.2 million decrease in non-common area maintenance expense, a \$0.2 million decrease in ground rent expense and a \$0.1 million decrease in gift card expense, offset by a \$1.9 million increase in bad debt expense. The increase in bad debt expense was affected by \$0.9 million associated with 15 tenant bankruptcy filings during 2009.

Operating expenses increased by \$7.5 million, or 4%, in 2008 as compared to 2007. Operating expenses from 2008 Same Store Properties increased by \$5.9 million in 2008, primarily due to a \$2.6 million increase in common area maintenance expense, a \$2.0 million increase in real estate tax expense and a \$1.5 million increase in other property operating expenses. These increases were partially offset by a \$0.2 million decrease in non-common area utility expense. Operating expenses also included \$0.6 million from properties that were under development during 2007 that were placed in service in 2008 and \$1.0 million from One Cherry Hill Plaza (acquired in February 2008).

Table of Contents

Common area maintenance expenses from 2008 Same Store Properties increased by \$2.6 million in 2008 as compared to 2007, primarily due to increases of \$2.3 million in repairs and maintenance expense, \$0.6 million in loss prevention expense, \$0.4 million in common area utility expense and \$0.4 million in on-site management expense, partially offset by a \$1.1 million decrease in snow removal expense. Repairs and maintenance expense and loss prevention expense increased in 2008 primarily due to stipulated annual contractual cost increases. Snowfall amounts at our properties decreased in 2008 as compared to 2007, particularly at our properties located in Pennsylvania and New Jersey. Real estate tax expense increased by \$2.0 million in 2008 as compared to 2007, primarily due to higher tax rates in the jurisdictions where properties are located. Other property operating expenses from 2008 Same Store Properties increased by \$1.5 million in 2008 as compared to 2007, including a \$2.1 million increase in bad debt expense, a \$0.4 million increase in non-common area maintenance expense and a \$0.2 million increase in vacant store utility expense. These increases were partially offset by decreases of \$0.5 million in marketing expense, \$0.3 million in gift card expense and \$0.3 million in ancillary expense. The increase in bad debt expense was affected by a \$1.3 million increase in 2008 associated with tenant bankruptcy filings.

General and Administrative Expenses

General and administrative expenses decreased by \$2.8 million, or 7%, in 2009 as compared to 2008. Other general and administrative expenses decreased by \$1.9 million, primarily due to lower travel costs, professional fees, convention expenses and other miscellaneous expenses. This overall decrease was also due in part to a \$0.4 million decrease in compensation costs, as a result of a reduction in headcount and lower incentive compensation costs.

General and administrative expenses decreased by \$1.1 million, or 3%, in 2008 as compared to 2007. The decrease was due to a \$1.1 million decrease in net compensation expense related to decreased incentive compensation.

Impairment of Assets and Abandoned Project Costs

During the year ended December 31, 2009, we recorded asset impairments totaling \$74.3 million, consisting of \$62.7 million related to the investment in real estate at Orlando Fashion Square in Orlando, Florida, \$11.5 million related to the Springhills ground-up development project in Gainesville, Florida and \$0.1 million related to the sale of an outparcel and related land improvements containing an operating restaurant at Monroe Marketplace in Selinsgrove, Pennsylvania. See note 2 of the notes to consolidated financial statements. We also recorded \$0.8 million of abandoned development projects expense in 2009.

During 2009, Orlando Fashion Square experienced significant decreases in non-anchor occupancy and net operating income as a result of unfavorable economic conditions in the Orlando market combined with negative trends in the retail sector. The occupancy declines resulted from store closings from bankrupt and underperforming tenants. Net operating income at this property was also impacted by an increase in the number of tenants paying a percentage of their sales in lieu of minimum rent combined with declining tenant sales. As a result of these conditions, in connection with the preparation of our 2010 business plan and budgets, management determined that its estimate of future cash flows, net of estimated capital expenditures, to be generated by the property were less than the carrying value of the property. As a result, we determined that the property was impaired and a write down of \$62.7 million to the property's estimated fair value of \$40.2 million was necessary.

Springhills is a mixed use ground-up development project located in Gainesville, Florida. During the fourth quarter of 2009, in connection with our 2010 business planning process, which included a strategic review of our future development projects, management determined that the development plans for Springhills were uncertain. Consequently, we recorded an impairment loss of \$11.5 million, to write down the carrying amount of the project to the estimated fair value of \$22.0 million.

During the year ended December 31, 2008, we recorded asset impairments totaling \$27.6 million, consisting of \$11.8 million related to the White Clay Point ground-up development project, \$7.0 million related to the Sunrise Plaza power center project, \$4.6 million related to goodwill, \$3.0 million related to our investment in and receivables from Valley View Downs, \$0.9 million related to a proposed commercial project in West Chester, Pennsylvania and \$0.2 million related to an undeveloped parcel adjacent to Viewmont Mall classified as land held for development. See note 2 of the notes to consolidated financial statements. We also recorded \$1.3 million of abandoned development projects expense in 2008.

Interest Expense

Interest expense increased by \$18.4 million, or 16%, in 2009 as compared to 2008. This increase was primarily attributable to assets placed in service with an aggregate cost basis of \$286.7 million in 2009. Interest on these assets was capitalized during construction periods on our development and redevelopment projects, and was expensed during periods after the improvements were placed in service. This increase resulted in part from a higher aggregate debt balance. Interest expense in 2008 was reduced by \$2.0 million as a result of a gain from hedging

activities.

Interest expense increased \$14.8 million, or 15%, in 2008 as compared to 2007. The increase was attributable to a \$12.6 million increase related to new mortgage financings in 2008, a \$2.7 million increase related to the Term Loan financing completed in September 2008 and a \$5.7 million increase in interest arising from the revolving 2003 Credit Facility and our Exchangeable Notes (due to larger amounts outstanding in the aggregate in 2008 as compared to 2007). These increases were partially offset by a decrease in mortgage loan interest of \$4.2 million related to the repayment of the 15 property real estate mortgage investment conduit (REMIC), a \$2.0 million gain from hedging activities and the repayment of the mortgage loan on Crossroads Mall in 2008 and a \$0.3 million decrease in interest paid on mortgage loans outstanding during 2008 due to principal amortization, as well as the effects of lower average interest rates.

Table of Contents

Depreciation and Amortization

Depreciation and amortization expense increased by \$16.5 million, or 11%, in 2009 as compared to 2008. Depreciation and amortization expense from 2009 Same Store Properties increased by \$15.4 million, primarily due to a higher asset base resulting from capital improvements at our properties, particularly at properties where we have recently completed redevelopments and that are now placed in service. We placed assets with an aggregate basis of \$286.0 million in service in 2009. Depreciation and amortization expense increased \$1.4 million from one property under development during 2008 that is now placed in service and decreased \$0.3 million from One Cherry Hill Plaza (acquired February 2008).

Depreciation and amortization expense increased by \$19.4 million, or 15%, in 2008 as compared to 2007. Depreciation and amortization expense from 2008 Same Store Properties increased by \$16.3 million, primarily due to a higher asset base resulting from capital improvements at our properties, particularly at redevelopment properties. Depreciation and amortization expense increased \$1.9 million from properties under development during 2007 that were placed in service in 2008 and \$1.2 million from One Cherry Hill Plaza.

Gain on Extinguishment of Debt

In 2009, we repurchased \$104.6 million in aggregate principal amount of our Exchangeable Notes in privately-negotiated transactions in exchange for \$47.2 million in cash and 4.3 million common shares with a fair market value of \$25.0 million. This resulted in a gain on extinguishment of debt of \$27.0 million. In connection with the repurchases, we retired an aggregate of \$5.4 million of deferred financing costs and debt discount.

In 2008, we repurchased \$46.0 million in aggregate principal amount of our Exchangeable Notes in privately-negotiated transactions for \$15.9 million in cash. This resulted in a gain on extinguishment of debt of \$27.1 million. In connection with the repurchases, we retired an aggregate of \$3.0 million of deferred financing costs and debt discount.

During 2007, we did not repurchase any of our Exchangeable Notes.

Gains on sales of real estate

Gains on sales of interests in real estate were \$4.3 million in 2009 due to a \$2.7 million gain from the sale of a parcel and related land improvements at Pitney Road Plaza, a \$1.4 million gain from the sale of land adjacent to North Hanover Mall and a \$0.2 million gain from the sale of a land parcel adjacent to Woodland Mall.

There were no gains on sales of real estate in 2008.

Gains on sales of interests in real estate were \$2.3 million in 2007 due to a \$1.5 million gain from the sale of a parcel and related land improvements at Plaza at Magnolia, a \$0.6 million gain from the sale of an outparcel and related land improvements containing an operating restaurant at New River Valley Mall, and a \$0.2 million gain from the sale of land adjacent to Wiregrass Commons.

Discontinued Operations

We have presented as discontinued operations the operating results of Crest Plaza (a strip center in Allentown, Pennsylvania), Northeast Tower Center (a power center in Philadelphia, Pennsylvania), Schuylkill Mall (a mall in Frackville, Pennsylvania), South Blanding Village (a strip center in Jacksonville, Florida) and Festival at Exton (a strip center in Exton, Pennsylvania).

Table of Contents

Operating results and gains on sales of discontinued operations for the properties in discontinued operations for the periods presented were as follows:

(In thousands of dollars)	For the year ended December 31,		
	2009	2008	2007
Operating results of:			
Northeast Tower Center	\$ 1,820	\$ 1,965	\$ 1,697
Crest Plaza	383	584	506
Schuylkill Mall			(97)
Festival at Exton			(28)
South Blanding Village			(5)
Operating results from discontinued operations	2,203	2,549	2,073
Gains on sales of discontinued operations	9,503		6,699
Income from discontinued operations	\$ 11,706	\$ 2,549	\$ 8,772

Gains on Sales of Discontinued Operations

Gains on sales of discontinued operations were \$9.5 million for 2009 due to the gain on the sale of a controlling interest Northeast Tower Center of \$6.1 million and a gain on the sale of Crest Plaza of \$3.4 million.

There were no gains on sales of discontinued operations in 2008.

Gains on sales of discontinued operations were \$6.7 million for 2007 due to the sale of Schuylkill Mall.

NET OPERATING INCOME

Net operating income (a non-GAAP measure) is derived from real estate revenue (determined in accordance with GAAP) minus property operating expenses (determined in accordance with GAAP). It does not represent cash generated from operating activities in accordance with GAAP and should not be considered to be an alternative to net income (determined in accordance with GAAP) as an indication of our financial performance or to be an alternative to cash flow from operating activities (determined in accordance with GAAP) as a measure of our liquidity; nor is it indicative of funds available for our cash needs, including our ability to make cash distributions. We believe that net income is the most directly comparable GAAP measurement to net operating income. We believe that net operating income is helpful to management and investors as a measure of operating performance because it is an indicator of the return on property investment, and provides a method of comparing property performance over time.

Net operating income excludes interest and other income, general and administrative expenses, interest expense, depreciation and amortization, gains on sales of interests in real estate, gains or sales of non-operating real estate, gains on sales of discontinued operations, gain on extinguishment of debt, impairment losses, abandoned project costs and other expenses.

Table of Contents

The following table presents net operating income results for the years ended December 31, 2009 and 2008. The results are presented using the proportionate-consolidation method (a non-GAAP measure), which presents our share of the results of our partnership investments. Under GAAP, we account for our partnership investments under the equity method of accounting. Operating results for retail properties that we owned for the full periods presented (Same Store) exclude properties acquired or disposed of during the periods presented:

(in thousands of dollars)	For the Year Ended December 31, 2009			For the Year Ended December 31, 2008		
	Real Estate Revenue	Operating Expenses	Net Operating Income	Real Estate Revenue	Operating Expenses	Net Operating Income
Same Store	\$ 490,584	\$ (202,489)	\$ 288,095	\$ 497,773	\$ (196,348)	\$ 301,425
Non Same Store	11,431	(4,060)	7,371	9,178	(3,286)	5,892
Total	\$ 502,015	\$ (206,549)	\$ 295,466	\$ 506,951	\$ (199,634)	\$ 307,317

	% Change 2009 vs. 2008	
	Same Store	Total
Real estate revenue	(1.4%)	(1.0%)
Operating expenses	3.1%	3.5%
Net operating income	(4.4%)	(3.9%)

Primarily because of the items discussed above under Revenue and Operating Expenses, total net operating income decreased by \$11.9 million in 2009 compared to 2008, and Same Store net operating income decreased by \$13.3 million in 2009 compared to 2008.

The following information is provided to reconcile net loss to net operating income:

(in thousands of dollars)	For the Year Ended December 31,	
	2009	2008
Net loss	\$ (90,091)	\$ (16,355)
Adjustments:

Wholly owned and consolidated partnerships	166,570	150,041
Unconsolidated partnerships	8,144	8,361
Discontinued operations	1,176	1,571
Interest expense		
Wholly owned and consolidated partnerships	133,460	115,013
Unconsolidated partnerships	7,260	10,274
Discontinued operations	104	535
Gains on sales of interests in real estate	(923)	
Gains on sales of non-operating real estate	(3,388)	
Gains on sales of discontinued operations	(9,503)	
Gain on extinguishment of debt	(27,047)	(27,074)
Impairment of assets and abandoned project costs	75,012	28,889
Other expenses	37,727	40,561
Interest and other income	(3,035)	(4,499)
Net operating income	\$ 295,466	\$ 307,317

FUNDS FROM OPERATIONS

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

The National Association of Real Estate Investment Trusts (NAREIT) defines Funds From Operations, which is a non-GAAP measure, as income before gains and losses on sales of operating properties and extraordinary items (computed in accordance with GAAP); plus real estate depreciation; plus or minus adjustments for unconsolidated partnerships to reflect funds from operations on the same basis. We compute Funds From Operations by taking the

Table of Contents

amount determined pursuant to the NAREIT definition and subtracting dividends on preferred shares (FFO) (for periods during which we had preferred shares outstanding).

Funds From Operations is a commonly used measure of operating performance and profitability in the real estate industry, and we use FFO and FFO per diluted share and OP Unit as supplemental non-GAAP measures to compare our Company's performance for different periods to that of our industry peers. Similarly, FFO per diluted share and OP Unit is a measure that is useful because it reflects the dilutive impact of outstanding convertible securities. In addition, we use FFO and FFO per diluted share and OP Unit as one of the performance measures for determining bonus amounts earned under certain of our performance-based executive compensation programs. We compute Funds From Operations in accordance with standards established by NAREIT, less dividends on preferred shares (for periods during which we had preferred shares outstanding), which may not be comparable to Funds From Operations reported by other REITs that do not define the term in accordance with the current NAREIT definition, or that interpret the current NAREIT definition differently than we do.

FFO does not include gains and losses on sales of operating real estate assets, which are included in the determination of net income in accordance with GAAP. Accordingly, FFO is not a comprehensive measure of our operating cash flows. In addition, since FFO does not include depreciation on real estate assets, FFO may not be a useful performance measure when comparing our operating performance to that of other non-real estate commercial enterprises. We compensate for these limitations by using FFO in conjunction with other GAAP financial performance measures, such as net income and net cash provided by operating activities, and other non-GAAP financial performance measures, such as net operating income. FFO does not represent cash generated from operating activities in accordance with GAAP and should not be considered to be an alternative to net income (determined in accordance with GAAP) as an indication of our financial performance or to be an alternative to cash flow from operating activities (determined in accordance with GAAP) as a measure of our liquidity, nor is it indicative of funds available for our cash needs, including our ability to make cash distributions.

We believe that net income is the most directly comparable GAAP measurement to FFO. We believe that FFO is helpful to management and investors as a measure of operating performance because it excludes various items included in net income that do not relate to or are not indicative of operating performance, such as various non-recurring items that are considered extraordinary under GAAP, gains on sales of operating real estate and depreciation and amortization of real estate.

FFO was \$73.1 million for the year ended December 31, 2009, a decrease of \$67.9 million, or 48%, compared to \$141.0 million for 2008. FFO decreased because of the decrease in net income as a result of impairment losses, higher property operating expenses and higher interest expense, partially offset by a gain on extinguishment of debt. FFO per share decreased \$1.74 per share to \$1.69 per share for the year ended December 31, 2009, compared to \$3.43 per share for the year ended December 31, 2008.

The shares used to calculate both FFO per basic share and FFO per diluted share include common shares and OP Units not held by us. FFO per diluted share also includes the effect of common share equivalents.

Table of Contents

The following information is provided to reconcile net loss to FFO, and to show the items included in our FFO for the periods indicated:

(in thousands of dollars)	For the Year Ended December 31, 2009	Per share (including OP Units)	For the Year Ended December 31, 2008	Per share (including OP Units)
Net loss	\$ (90,091)	\$ (2.08)	\$ (16,355)	\$ (0.40)
Adjustments:				
Gains on sales of discontinued operations	(9,503)	(0.22)		
Gains on sales of interest in real estate	(923)	(0.02)		
Depreciation and amortization:				
Wholly owned and consolidated partnerships ⁽¹⁾	164,284	3.80	147,435	3.59
Unconsolidated partnerships ⁽¹⁾	8,144	0.19	8,361	0.20
Discontinued operations ⁽¹⁾	1,176	0.02	1,571	0.04
Funds from operations ⁽²⁾	\$ 73,087	\$ 1.69	\$ 141,012	\$ 3.43
Impairment of assets	74,254	1.72	27,592	0.67
Gain on extinguishment of debt	(27,047)	(0.63)	(27,074)	(0.66)
Funds from operations as adjusted	\$ 120,294	\$ 2.78	\$ 141,530	\$ 3.45
Weighted average number of shares outstanding	40,953		38,807	
Weighted average effect of full conversion of OP Units	2,268		2,236	
Effect of common share equivalents	12		14	
Total weighted average shares outstanding, including OP Units	43,233		41,057	

⁽¹⁾ Excludes depreciation of non-real estate assets and amortization of deferred financing costs.

⁽²⁾ Includes the non-cash effect of straight-line rent of \$1.3 million and \$2.0 million for the twelve months ended December 31, 2009 and 2008, respectively.

LIQUIDITY AND CAPITAL RESOURCES

This Liquidity and Capital Resources section contains certain forward-looking statements that relate to expectations and projections that are not historical facts. These forward-looking statements reflect our current views about our future liquidity and capital resources, and are subject to risks and uncertainties that might cause our actual liquidity and capital resources to differ materially from the forward-looking statements. Additional factors that might affect our liquidity and capital resources include those discussed in the section entitled Item 1A. Risk Factors. We do not intend to update or revise any forward-looking statements about our liquidity and capital resources to reflect new information, future events or otherwise.

Table of Contents

Capital Resources

We expect to meet our short-term liquidity requirements, including distributions to shareholders, recurring capital expenditures, tenant improvements and leasing commissions, but excluding development and redevelopment projects, generally through our available working capital and net cash provided by operations, and subject to the terms and conditions of our 2010 Credit Facility. We believe that our net cash provided by operations will be sufficient to allow us to make any distributions necessary to enable us to continue to qualify as a REIT under the Internal Revenue Code of 1986, as amended. The aggregate distributions made to common shareholders and OP Unitholders in 2009 were \$32.5 million, based on distributions of \$0.74 per share and OP Unit. For the first quarter of 2010, we have announced a payment of \$0.15 per share, which equates to an annual distribution amount of \$0.60 per share. The following are some of the factors that could affect our cash flows and require the funding of future cash distributions, recurring capital expenditures, tenant improvements or leasing commissions with sources other than operating cash flows:

adverse changes or prolonged downturns in general, local or retail industry economic, financial, credit market or competitive conditions, leading to a reduction in real estate revenue or cash flows or an increase in expenses;

deterioration in our tenants' business operations and financial stability, including tenant bankruptcies, leasing delays or terminations, or lower sales, causing deferrals or declines in rent, percentage rent and cash flows;

inability to achieve targets for, or decreases in, property occupancy and rental rates, resulting in lower or delayed real estate revenue and operating income;

increases in interest rates resulting in higher borrowing costs; and

increases in operating costs that cannot be passed on to tenants, resulting in reduced operating income and cash flows.

We expect to meet certain of our remaining obligations to fund existing development and redevelopment projects and certain capital requirements, including scheduled debt maturities, future property and portfolio acquisitions, expenses associated with acquisitions, renovations, expansions and other non-recurring capital improvements, through a variety of capital sources, subject to the terms and conditions of our 2010 Credit Facility.

The difficult conditions in the market for debt capital and commercial mortgage loans, including the commercial mortgage backed securities market, and the downturn in the general economy and its effect on retail sales, as well as our significant leverage resulting from debt incurred to fund our redevelopment projects and other development activity, have combined to necessitate that we vary our approach to obtaining, using and recycling capital. We intend to consider all of our available options for accessing the capital markets, given our position and constraints.

The amounts remaining to be invested in the last phases of our current redevelopment projects are significantly less than in 2009, and we believe that we have access to sufficient capital to fund these remaining amounts.

In the past, one avenue available to us to finance our obligations or new business initiatives has been to obtain unsecured debt, based in part on the existence of properties in our portfolio that were not subject to mortgage loans. The terms of the 2010 Credit Facility include our grant of a security interest consisting of a first lien on 22 properties and a second lien on one property. As a result, we have very few remaining assets that we could use to support unsecured debt financing. Our lack of properties in the portfolio that could be used to support unsecured debt might limit our ability to obtain capital in this way.

We are contemplating ways to reduce our leverage through a variety of means available to us, and subject to and in accordance with the terms and conditions of the 2010 Credit Facility. These steps might include obtaining equity capital, including through the issuance of equity securities if market conditions are favorable, through joint ventures or other partnerships or arrangements involving our contribution of assets with institutional investors, private equity investors or other REITs, through sales of properties with values in excess of their mortgage loans or allocable debt and application of the excess proceeds to debt reduction, or through other actions.

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

In March 2009, the SEC declared effective a \$1.0 billion universal shelf registration statement. Currently, we may use our shelf registration statement to offer and sell common shares of beneficial interest, preferred shares and

Table of Contents

various types of debt securities, among other types of securities, to the public. However, we may be unable to issue securities under the shelf registration statement, or otherwise, on terms that are favorable to us, if at all.

2010 Credit Facility

Amended, Restated and Consolidated Senior Secured Credit Agreement

On March 11, 2010, PREIT Associates and PRI (collectively, the Borrower), together with PR Gallery I Limited Partnership (GLP) and Keystone Philadelphia Properties, L.P. (KPP), two of our other subsidiaries, entered into an Amended, Restated and Consolidated Senior Secured Credit Agreement comprised of 1) an aggregate \$520.0 million term loan made up of a \$436.0 million term loan (Term Loan A) to PALP and PRI and a separate \$84.0 million term loan (Term Loan B) to the other two subsidiaries (collectively, the 2010 Term Loan) and 2) a \$150.0 million revolving line of credit (the Revolving Facility, and, together with the 2010 Term Loan, the 2010 Credit Facility) with Wells Fargo Bank, National Association, and the other financial institutions signatory thereto.

The 2010 Credit Facility replaces the previously existing \$500.0 million unsecured revolving credit facility, as amended (the 2003 Credit Facility), and a \$170.0 million unsecured term loan (the 2008 Term Loan) that had been scheduled to mature on March 20, 2010. All capitalized terms used and not otherwise defined in the description of the 2010 Credit Facility have the meanings ascribed to such terms in the 2010 Credit Facility.

The initial term of the 2010 Credit Facility is three years, and we have the right to one 12-month extension of the initial maturity date, subject to certain conditions and to the payment of an extension fee of 0.50% of the then outstanding Commitments.

We used the initial proceeds from the 2010 Credit Facility to repay outstanding balances under the 2003 Credit Facility and 2008 Term Loan. At closing, the \$520.0 million 2010 Term Loan was fully outstanding and \$70.0 million was outstanding under the Revolving Facility.

Amounts borrowed under the 2010 Credit Facility bear interest at a rate between 4.00% and 4.90% per annum, depending on our leverage, in excess of LIBOR, with no floor. The initial rate in effect was 4.90% per annum in excess of LIBOR. In determining our leverage (the ratio of Total Liabilities to Gross Asset Value), the capitalization rate used to calculate Gross Asset Value is 8.00%. The unused portion of the Revolving Facility is subject to a fee of 0.40% per annum.

The obligations under Term Loan A are secured by first priority mortgages on 20 of our properties and a second lien on one property, and the obligations under Term Loan B are secured by first priority leasehold mortgages on the properties ground leased by GLP and KPP (the Gallery Properties). The foregoing properties constitute substantially all of our previously unencumbered retail properties.

We and certain of our subsidiaries that are not otherwise prevented from doing so serve as guarantors for funds borrowed under the 2010 Credit Facility.

The aggregate amount of the lender Revolving Commitments and 2010 Term Loan under the 2010 Credit Facility is required to be reduced by \$33.0 million by March 11, 2011, by a cumulative total of \$66.0 million by March 11, 2012 and by a cumulative total of \$100.0 million by March 11, 2013 (if we exercise our right to extend the Termination Date), including all payments (except payments pertaining to the Release Price of a Collateral Property) resulting in permanent reduction of the aggregate amount of the Revolving Commitments and 2010 Term Loan.

The 2010 Credit Facility contains provisions regarding the application of proceeds from a Capital Event. A Capital Event is any event by which we raise additional capital, whether through an asset sale, joint venture, additional secured or unsecured debt, issuance of equity, or from excess proceeds after payment of a Release Price. Capital Events do not include Refinance Events or other specified events. After payment of interest and required distributions, the Remaining Capital Event Proceeds will generally be applied in the following order:

If the Facility Debt Yield is less than 11.00% or the Corporate Debt Yield is less than 10.00%, Remaining Capital Event Proceeds will be allocated 25% to pay down the Revolving Facility (repayments of the Revolving Facility generally may be reborrowed) and 75% to pay down and permanently reduce Term Loan A (or Term Loan B if Term Loan A is repaid in full) or, if the Revolving Facility balance is or would become \$0 as a result of such payment, to pay down the Revolving Facility in full and to use any remainder of that 25% to pay down and permanently reduce Term Loan A (or Term Loan B if Term Loan A is repaid in full). So long as the Facility Debt Yield is greater than or equal to 11.00% and the Corporate Debt Yield is greater than or equal to 10.00% and each will remain so immediately after the Capital Event, and so long as either the Facility Debt Yield is less than 12.00% or the Corporate Debt Yield is less than 10.25% and will remain so immediately after the Capital Event, the Remaining Capital Event Proceeds will be allocated 75% to pay down the Revolving Facility and 25% to pay down and permanently reduce Term Loan A (or Term Loan B if Term Loan A is repaid in full) or, if the Revolving Facility balance is or would become \$0

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

as a result of such payment, to pay down the Revolving Facility in full and to use any remainder of that 75% for general corporate purposes. So long as the Facility Debt Yield is greater than or equal to 12.00% and the Corporate Debt Yield is greater than or equal to 10.25% and each will remain so immediately after the Capital Event, Remaining Capital Event Proceeds will be applied 100% to pay down the Revolving Facility, or if the Revolving Facility balance is or would become \$0 as a result of such payment, to pay down the Revolving Facility in full and to use any remainder for general corporate purposes. Remaining proceeds from a Capital Event or Refinance Event relating to Cherry Hill Mall will be used to pay down the Revolving Facility and may be reborrowed only to repay our unsecured indebtedness.

The 2010 Credit Facility also contains provisions regarding the application of proceeds from a Refinance Event. A Refinance Event is any event by which we raise additional capital from refinancing of secured debt encumbering an existing asset, not including collateral for the 2010 Credit Facility. The proceeds in excess of the amount required to retire an existing secured debt will be applied, after payment of interest, to pay down the Revolving Facility, or if the Revolving Facility balance is or would become \$0 as a result of such payment, to pay down the Revolving Facility in full and to use any remainder for general corporate purposes. Remaining proceeds from a Capital Event or Refinancing Event relating to the Gallery Properties may only be used to pay down and permanently reduce Term Loan B (or, if the outstanding balance on Term Loan B is or would become \$0 as a result such payment, to pay down Term Loan B in full and to pay any remainder in accordance with the preceding paragraph).

A Collateral Property will be released as security upon a sale or refinancing, subject to payment of the Release Price and the absence of any default or Event of Default. If, after release of a Collateral Property (and giving pro forma effect thereto), the Facility Debt Yield will be less than 11.00%, the Release Price will be the Minimum Release Price plus an amount equal to the lesser of (A) the amount that, when paid and applied to the 2010 Term Loan, would result in a Facility Debt Yield equal to 11.00% and (B) the amount by which the greater of (1) 100.0% of net cash proceeds and (2) 90.0% of the gross sales proceeds exceeds the Minimum Release Price. The Minimum Release Price is 110% (120% if, after the Release, there will be fewer than 10 Collateral Properties) multiplied by the proportion that the value of the property to be released bears to the aggregate value of all of the Collateral Properties on the closing date of the 2010 Credit Facility, multiplied by the amount of the then Revolving Commitments plus the aggregate principal amount then outstanding under the 2010 Term Loan. In general, upon release of a Collateral Property, the post-release Facility Debt Yield must be greater than or equal to the pre-release Facility Debt Yield. Release payments must be used to pay down and permanently reduce the amount of the Term Loan.

The 2010 Credit Facility contains affirmative and negative covenants customarily found in facilities of this type, including, without limitation, requirements that we maintain, on a consolidated basis: (1) minimum Tangible Net Worth of not less than \$483.1 million, minus non-cash impairment charges with respect to the Properties recorded in the quarter ended December 31, 2009, plus 75% of the Net Proceeds of all Equity Issuances effected at any time after September 30, 2009; (2) maximum ratio of Total Liabilities to Gross Asset Value of 0.75:1; (3) minimum ratio of EBITDA to Interest Expense of 1.60:1; (4) minimum ratio of Adjusted EBITDA to Fixed Charges of 1.35:1; (5) maximum Investments in unimproved real estate and predevelopment costs not in excess of 3.0% of Gross Asset Value; (6) maximum Investments in Persons other than Subsidiaries, Consolidated Affiliates and Unconsolidated Affiliates not in excess of 1.0% of Gross Asset Value; (7) maximum Investments in Indebtedness secured by Mortgages in favor of the Company, the Borrower or any other Subsidiary not in excess of 1.0% of Gross Asset Value on the basis of cost; (8) the aggregate value of the Investments and the other items subject to the preceding clauses (5) through (7) shall not exceed 5.0% of Gross Asset Value; (9) maximum Investments in Consolidation Exempt Entities not in excess of 20.0% of Gross Asset Value; (10) a maximum Gross Asset Value attributable to any one Property not in excess of 15.0% of Gross Asset Value; (11) maximum Projects Under Development not in excess of 10.0% of Gross Asset Value; (12) maximum Floating Rate Indebtedness in an aggregate outstanding principal amount not in excess of one-third of all Indebtedness of the Company, its Subsidiaries, its Consolidated Affiliates and its Unconsolidated Affiliates; (13) minimum Corporate Debt Yield of 9.50%, provided that such Corporate Debt Yield may be less than 9.50% for one period of two consecutive fiscal quarters, but may not be less than 9.25%; and (14) Distributions may not exceed 110% of REIT taxable income for a fiscal year, but if the Corporate Debt Yield exceeds 10.00%, then the aggregate amount of Distributions may not exceed the greater of 75% of FFO and 110% of REIT Taxable Income (unless necessary for the Company to retain its status as a REIT), and if a Facility Debt Yield of 11.00% and a Corporate Debt Yield of 10.00% are achieved and continuing, there are no limits on Distributions under the 2010 Credit Facility, so long as no Default or Event of Default would result from making such Distributions. We are required to maintain our status as a REIT at all times.

We may prepay the Revolving Facility at any time without premium or penalty. We must repay the entire principal amount outstanding under the 2010 Credit Facility at the end of its term, as the term may have been extended.

Upon the expiration of any applicable cure period following an event of default, the lenders may declare all of the obligations in connection with the 2010 Credit Facility immediately due and payable, and the Commitments of the lenders to make further loans under the 2010 Credit Facility will terminate. Upon the occurrence of a voluntary or involuntary bankruptcy proceeding of the Company, PALP, PRI, any owner of a Collateral Property or any Material Subsidiary, all outstanding amounts will automatically become immediately due and payable and the Commitments of the lenders to make further loans will automatically terminate.

Table of Contents

Exchangeable Notes

In May 2007, we, through PREIT Associates, completed the sale of \$287.5 million aggregate principal amount of 4% Senior Exchangeable Notes due 2012 (Exchangeable Notes). The net proceeds from the offering of \$281.0 million were used for the repayment of indebtedness under the 2003 Credit Facility, the cost of the related capped call transactions, and for other general corporate purposes. The Exchangeable Notes are general unsecured senior obligations of PREIT Associates and rank equally in right of payment with all other senior unsecured indebtedness of PREIT Associates. Interest payments, which are due on June 1 and December 1 of each year, began on December 1, 2007 and will continue until the maturity date of June 1, 2012. PREIT Associates' obligations under the Exchangeable Notes are fully and unconditionally guaranteed by PREIT.

The Exchangeable Notes bear interest at 4.00% per annum and contain an exchange settlement feature. Pursuant to this feature, upon surrender of the Exchangeable Notes for exchange, the Exchangeable Notes will be exchangeable for cash equal to the principal amount of the Exchangeable Notes and, with respect to any excess exchange value above the principal amount of the Exchangeable Notes, at our option, for cash, common shares of the Company or a combination of cash and common shares at an initial exchange rate of 18.303 shares per \$1,000 principal amount of Exchangeable Notes, or \$54.64 per share. The Exchangeable Notes will be exchangeable only under certain circumstances. Prior to maturity, PREIT Associates may not redeem the Exchangeable Notes except to preserve our status as a real estate investment trust. If we undergo certain change of control transactions at any time prior to maturity, holders of the Exchangeable Notes may require PREIT Associates to repurchase their Exchangeable Notes in whole or in part for cash equal to 100% of the principal amount of the Exchangeable Notes to be repurchased plus unpaid interest, if any, accrued to the repurchase date, and there is a mechanism for the holders to receive any excess exchange value. The Indenture for the Exchangeable Notes does not contain any financial covenants.

In connection with the offering of the Exchangeable Notes, we and PREIT Associates entered into capped call transactions with affiliates of the initial purchasers of the Exchangeable Notes. These agreements effectively increase the exchange price of the Exchangeable Notes to \$63.74 per share. The cost of these agreements of \$12.6 million was recorded in the shareholders' equity section of our balance sheet.

Our Exchangeable Notes had a balance of \$136.9 million and \$241.5 million (excluding debt discount of \$4.7 million and \$11.4 million) as of December 31, 2009 and December 31, 2008, respectively. Interest expense related to the Exchangeable Notes was \$8.6 million, \$11.5 million and \$7.4 million (excluding non-cash amortization of debt discount of \$2.8 million, \$3.5 million and \$2.1 million) for the years ended December 31, 2009, 2008, and 2007 respectively. The Exchangeable Notes bear interest at a contractual rate of 4.00% per annum. The Exchangeable Notes had an effective interest rate of 5.85% for the year ended December 31, 2009, including the effect of the debt discount amortization.

In 2009 and 2008, we repurchased \$104.6 million and \$46.0 million, respectively, in aggregate principal amount of our Exchangeable Notes in privately negotiated transactions in exchange for an aggregate \$47.2 million in cash and 4.3 million common shares, with a fair market value of \$25.0 million, in 2009, and for \$15.9 million in cash in 2008. We terminated an equivalent notional amount of the related capped calls in 2009 and 2008.

We recorded gains on extinguishment of debt of \$27.0 million and \$27.1 million in 2009 and 2008, respectively. In connection with the repurchases, we retired an aggregate of \$5.4 million and \$3.0 million in 2009 and 2008, respectively, of deferred financing costs and debt discount.

Table of Contents**Mortgage Loan Finance Activity**

The following table presents the mortgage loans we or partnerships in which we own interests entered into since January 1, 2007:

Financing Date	Property	Amount Financed or Extended (in millions of dollars):	Stated Rate	Hedged Rate	Maturity
2007 Activity:					
May	The Mall at Prince Georges ⁽¹⁾	\$ 150.0	5.51% fixed	NA	June 2017
2008 Activity:					
January	Cherry Hill Mall ⁽²⁾⁽³⁾	55.0	5.51% fixed	NA	October 2012
February	One Cherry Hill Plaza ⁽¹⁾⁽⁴⁾	5.6	LIBOR plus 1.30%	NA	August 2010
May	Creekview Center ⁽⁵⁾	20.0	LIBOR plus 2.15%	5.56%	June 2010
June	Christiana Center ⁽¹⁾⁽⁶⁾	45.0	LIBOR plus 1.85%	5.87%	June 2011
July	Paxton Towne Centre ⁽¹⁾⁽⁶⁾	54.0	LIBOR plus 2.00%	5.84%	July 2011
September	Patrick Henry Mall ⁽⁷⁾	97.0	6.34% fixed	NA	October 2015
September	Jacksonville Mall ⁽¹⁾⁽⁸⁾	56.3	LIBOR plus 2.10%	5.83%	September 2013
September	Logan Valley Mall ⁽¹⁾⁽⁸⁾⁽⁹⁾	68.0	LIBOR plus 2.10%	5.79%	September 2013
September	Wyoming Valley Mall ⁽¹⁾⁽⁸⁾⁽¹⁰⁾	65.0	LIBOR plus 2.25%	5.85%	September 2013
October	Whitehall Mall ⁽¹¹⁾	12.4	7.00% fixed	NA	November 2018
November	Francis Scott Key Mall ⁽¹⁾	55.0	LIBOR plus 2.35%	5.25%	December 2013
November	Viewmont Mall ⁽¹⁾	48.0	LIBOR plus 2.35%	5.25%	December 2013
December	Exton Square Mall ⁽¹²⁾	70.0	7.50% fixed	NA	January 2014
2009 Activity:					
March	New River Valley Center ⁽¹³⁾	16.3	LIBOR plus 3.25%	5.75%	March 2012
June	Pitney Road Plaza ⁽¹⁴⁾	6.4	LIBOR plus 2.50%	NA	June 2010
June	Lycoming Mall ⁽¹⁵⁾	33.0	6.84% fixed	NA	June 2014
September	Northeast Tower Center ⁽¹⁶⁾	20.0	LIBOR plus 2.75%	NA	September 2011
October	Red Rose Commons ⁽¹⁷⁾	23.9	LIBOR plus 4.00%	NA	October 2011
2010 Activity:					
January	New River Valley Mall ⁽¹⁾⁽¹⁸⁾	30.0	LIBOR plus 4.50%	6.33%	January 2013
March	Lycoming Mall ⁽¹⁵⁾	2.5	6.84% fixed	NA	June 2014

(1) Interest only.

(2) Supplemental financing with a maturity date that coincides with the existing first mortgage loan.

(3) First 24 payments are interest only followed by principal and interest payments based on a 360-month amortization schedule.

(4) In February 2008, we entered into this mortgage loan as a result of the acquisition of Bala Cynwyd Associates, L.P. The original maturity date of the mortgage loan was August 2009, with two separate one year extension options. In June 2009, we made a principal payment of \$2.4 million and exercised the first extension option.

(5) The mortgage loan has a term of two years and three one-year extension options.

(6) The mortgage loan has a term of three years and two one-year extension options.

(7) Payments based on 25 year amortization schedule, with a balloon payment in October 2015.

(8) The mortgage loan has a term of five years and two one-year extension options.

(9) The mortgage loan bears interest at an annual rate equal to, at our election, LIBOR plus 2.10%, or a base rate equal to the prime rate, or if greater, the federal funds rate plus 0.50%, plus a margin of 0.50%.

(10) The mortgage loan bears interest at an annual rate equal to, at our election, LIBOR plus 2.25%, or a base rate equal to the prime rate, or if greater, the federal funds rate plus 0.50%, plus a margin of 0.50%.

Table of Contents

- (11) The unconsolidated partnership that owns Whitehall Mall entered into the mortgage loan. Our interest in the unconsolidated partnership is 50%.
- (12) Payments based on 30 year amortization schedule, with balloon payment in January 2014. The mortgage loan has a term of three years and two one-year extension options.
- (13) The mortgage loan has a term of three years and two one-year extension options.
- (14) We have made draws of \$6.4 million and a one time principal payment of \$1.9 million in connection with the sale of a parcel at the property. The loan has one six-month extension option during the construction period. We have the option to convert the loan to a two-year loan at the end of the construction period.
- (15) The mortgage loan agreement provides for a maximum loan amount of \$38.0 million. The initial amount of the mortgage loan was \$28.0 million. We took additional draws of \$5.0 million in October 2009 and \$2.5 million in March 2010.
- (16) In October 2009, we repaid the \$20.0 million mortgage loan on Northeast Tower Center in connection with the sale of a controlling interest in this property.
- (17) Interest only in its initial term. The unconsolidated partnership that owns Red Rose Commons entered into the mortgage loan. Our interest in the unconsolidated partnership is 50%.
- (18) The mortgage loan has a three year term and one one-year extension option. \$25.0 million of the principal amount was swapped to a fixed rate of 6.33%.

In July 2008, we repaid a \$12.7 mortgage loan on Crossroads Mall in Beckley, West Virginia, using funds from the 2003 Credit Facility and available working capital.

In December 2008, we repaid a \$93.0 million mortgage loan on Exton Square Mall in Exton, Pennsylvania using \$70.0 million from a new mortgage on the property, the 2003 Credit Facility, the 2008 Term Loan and available working capital.

In January 2009, we repaid a \$15.7 million mortgage loan on Palmer Park Mall in Easton, Pennsylvania using funds from the 2003 Credit Facility and the 2008 Term Loan.

In June 2009, we made a principal payment of \$2.4 million and exercised the first one-year extension option on the mortgage loan on the One Cherry Hill Plaza office building in Cherry Hill, New Jersey.

In July 2009, the unconsolidated partnership that owns Lehigh Valley Mall exercised its third extension option of a \$150.0 million mortgage loan. We own an indirect 50% ownership interest in this entity.

In October 2009, we repaid the \$20.0 million mortgage loan on Northeast Tower Center in Philadelphia, Pennsylvania in connection with the sale of a controlling interest in this property.

In November 2009, we entered into a one-year extension of a \$34.3 million mortgage loan secured by Valley View Mall in La Crosse, Wisconsin, with two additional six-month extension options.

In November 2009, the unconsolidated partnership that owns Springfield Mall exercised its third extension option of a \$72.3 million mortgage loan. We own an indirect 50% ownership interest in this entity.

Interest Rate Derivative Agreements

As of December 31, 2009, we had entered into 12 interest rate swap agreements and one cap agreement that have a weighted average rate of 3.29% on a notional amount of \$597.5 million maturing on various dates through November 2013.

We entered into these interest rate derivatives in order to hedge the interest payments associated with our 2009 and 2008 issuances of floating rate long-term debt. We assessed the effectiveness of these swaps as hedges at inception and on December 31, 2009 and considered these swaps to be highly effective cash flow hedges. Our interest rate swaps are net settled monthly.

Table of Contents

As of December 31, 2009, the aggregate estimated unrealized net loss attributed to these interest rate derivatives was \$14.6 million. The carrying amount of the derivative assets is reflected in deferred costs and other assets, the associated liabilities are reflected in accrued expenses and other liabilities and the net unrealized loss is reflected in accumulated other comprehensive loss in the accompanying balance sheets.

Mortgage Loans

Twenty-eight mortgage loans, which are secured by 26 of our consolidated properties, are due in installments over various terms extending to the year 2017. Seventeen of the mortgage loans bear interest at a fixed rate and nine of the mortgage loans bear interest at variable rates that have been swapped to or capped at a fixed rate. These mortgage loans have interest rates that range from 4.95% to 7.61% and had a weighted average interest rate of 5.80% at December 31, 2009. We also have two properties with variable interest rate mortgage loans that had a weighted average interest rate of 3.07% at December 31, 2009. The weighted average interest rates of all consolidated mortgage loans is 5.79%. Mortgage loans for properties owned by unconsolidated partnerships are accounted for in Investments in partnerships, at equity and Distributions in excess of partnership investments on the consolidated balance sheets and are not included in the table below.

The following table outlines the timing of principal payments related to our mortgage loans as of December 31, 2009.

(in thousands of dollars)	Total	Payments by Period			
		2010	2011-2012	2013-2014	Thereafter
Principal payments	\$ 97,462	\$ 19,988	\$ 39,575	\$ 25,166	\$ 12,733
Balloon payments ⁽¹⁾	1,676,915	63,165	473,971	499,623	640,156
Total	\$ 1,774,377	\$ 83,153	\$ 513,546	\$ 524,789	\$ 652,889

⁽¹⁾ Due dates for certain of the balloon payments set forth in this table may be extended pursuant to the terms of the respective loan agreements.

Contractual Obligations

The following table presents our aggregate contractual obligations as of December 31, 2009 for the periods presented.

(in thousands of dollars)	Total	2010	2011-2012	2013-2014	Thereafter
Mortgage loans	\$ 1,774,377	\$ 83,153	\$ 513,546	\$ 524,789	\$ 652,889
Interest on mortgage loans	446,385	101,159	177,851	117,341	50,034
Exchangeable Notes	136,900		136,900		
Interest on Exchangeable Notes	13,234	5,476	7,758		
2008 Term Loan	170,000	170,000			
Interest on 2008 Term Loan	2,179	2,179			
2003 Credit Facility ⁽¹⁾	486,000	486,000			
Operating leases	9,115	2,263	3,963	2,889	
Ground leases	53,443	992	1,845	1,460	49,146
Development and redevelopment commitments ⁽²⁾	2,320	2,320			
Total	\$ 3,093,953	\$ 853,542	\$ 841,863	\$ 646,479	\$ 752,069

⁽¹⁾ The 2003 Credit Facility had a term that expired in March 2010. See Business Recent Developments. This amount represents the amount outstanding related to the unsecured revolving 2003 Credit Facility.

⁽²⁾ The timing of the payments of these amounts is uncertain. We estimate that such payments will be made in the upcoming year, but situations could arise at these development and redevelopment projects that could delay the settlement of these obligations.

Table of Contents

Preferred Shares

On July 31, 2007, we redeemed all of our 11% non-convertible senior preferred shares for \$129.9 million, or \$52.50 per preferred share, plus accrued and unpaid dividends to the redemption date of \$1.9 million. The preferred shares were issued in November 2003 in connection with the Merger with Crown and were initially recorded at \$57.90 per preferred share, the fair value based on the market value of the corresponding Crown preferred shares as of May 13, 2003, the date on which the financial terms of the Merger were substantially complete. In order to finance the redemption, we borrowed \$131.8 million under our 2003 Credit Facility. As a result of the redemption, the \$13.3 million excess of the carrying amount of the preferred shares, net of expenses, over the redemption price is included in Net Income Attributed to PREIT in the year ended December 31, 2007.

Share Repurchase Programs

In December 2007, our Board of Trustees authorized a program to repurchase up to \$100.0 million of our common shares through solicited or unsolicited transactions in the open market or privately negotiated or other transactions from January 1, 2008 through December 31, 2009, subject to our authority to terminate the program earlier. Previously, in October 2005, our Board of Trustees had authorized a program to repurchase up to \$100.0 million of our common shares. That program expired by its terms on December 31, 2007. The program was in effect until the end of 2009, when it expired according to its terms.

In 2007, we repurchased 152,500 shares at an average price of \$35.67, or an aggregate purchase price of \$5.4 million. The cumulative amount of shares repurchased from the inception of our prior repurchase program to December 31, 2008 was 371,200 shares, at an average price of \$37.15, or an aggregate purchase price of \$13.8 million. We did not repurchase any shares in 2009.

CASH FLOWS

Net cash provided by operating activities totaled \$136.1 million for the year ended December 31, 2009, compared to \$125.0 million for the year ended December 31, 2008, and \$149.5 million for the year ended December 31, 2007. The increase in 2009 as compared to 2008 was primarily due to changes in working capital, including a \$2.4 million increase in accrued expenses compared to a \$12.4 million decrease in accrued expenses in 2008 and a \$2.7 million decrease in tenant deposits and deferred rent, partially offset by the factors discussed in Results of Operations.

Cash flows used for investing activities were \$103.4 million for the year ended December 31, 2009, compared to \$353.2 million for the year ended December 31, 2008, and \$242.4 million for the year ended December 31, 2007. Investing activities for 2009 reflect investment in construction in progress of \$128.4 million and real estate improvements of \$39.1 million, all of which primarily relate to our development and redevelopment activities. Investing activities for 2009 also reflect proceeds of \$62.6 million from the sale of real estate investments. Cash flows from investing activities for the year ended December 31, 2008 reflect investment in construction in progress of \$307.4 million, real estate improvements of \$25.0 million and real estate acquisitions of \$11.9 million.

Cash flows provided by financing activities were \$31.7 million for the year ended December 31, 2009, compared to \$210.1 million for the year ended December 31, 2008, and \$105.0 for the year ended December 31, 2007. Cash flows provided by financing activities for the year ended December 31, 2009 were primarily affected by \$75.6 million of proceeds from the mortgage loans on New River Valley Center, Pitney Road Plaza, Lycoming Mall and Northeast Tower Center as well as \$86.0 million in borrowings from the 2003 Credit Facility and \$10.1 million of contributions from noncontrolling interests. We used some of these proceeds to repay the \$20.0 million mortgage loan on Northeast Tower Center and to repay the \$15.7 million mortgage loan on Palmer Park Mall, and to make a \$2.4 million principal payment on the mortgage loan on One Cherry Hill Plaza. Cash flows from financing activities for the year ended December 31, 2009 were also affected by dividends and distributions of \$32.5 million, principal installments on mortgage loans of \$17.6 million, and payments of \$47.2 million for the repurchase of Exchangeable Notes.

COMMITMENTS

At December 31, 2009, we had \$2.3 million of unaccrued contractual obligations to complete current development and redevelopment projects. Total remaining costs for the particular projects with such commitments are \$40.4 million. We expect to finance these amounts through borrowings under the 2010 Credit Facility or through various other capital sources. See Liquidity and Capital Resources Capital Resources.

Table of Contents

ENVIRONMENTAL

We are aware of certain environmental matters at some of our properties, including ground water contamination and the presence of asbestos containing materials. We have, in the past, performed remediation of such environmental matters, and we are not aware of any significant remaining potential liability relating to these environmental matters. We may be required in the future to perform testing relating to these matters. We have insurance coverage for certain environmental claims up to \$10.0 million per occurrence and up to \$20.0 million in the aggregate. See Item 1. Business Environmental.

COMPETITION AND TENANT CREDIT RISK

Competition in the retail real estate industry is intense. We compete with other public and private retail real estate companies, including companies that own or manage malls, strip centers, power centers, lifestyle centers, factory outlet centers, theme/festival centers and community centers, as well as other commercial real estate developers and real estate owners, particularly those with properties near our properties, on the basis of several factors, including location and rent charged. We compete with these companies to attract customers to our properties, as well as to attract anchor and in-line store tenants. We also compete to acquire land for new site development, during more favorable economic conditions. Our malls and our strip and power centers face competition from similar retail centers, including more recently developed or renovated centers that are near our retail properties. We also face competition from a variety of different retail formats, including internet retailers, discount or value retailers, home shopping networks, mail order operators, catalogs, and telemarketers. This competition could have a material adverse effect on our ability to lease space and on the amount of rent that we receive. Our tenants face competition from companies at the same and other properties and from other retail formats as well.

The development of competing retail properties and the related increased competition for tenants might require us to make capital improvements to properties that we would have deferred or would not have otherwise planned to make and might also affect the occupancy and net operating income of such properties. Any such capital improvements, undertaken individually or collectively, would be subject to the terms and conditions of the 2010 Credit Facility and involve costs and expenses that could adversely affect our results of operations.

We compete with many other entities engaged in real estate investment activities for acquisitions of malls, other retail properties and other prime development sites, including institutional pension funds, other REITs and other owner-operators of retail properties. Our efforts to compete are also subject to the terms and conditions of our 2010 Credit Facility. Given current economic, capital market and retail industry conditions, however, there has been substantially less competition with respect to acquisition activity in recent quarters. When we seek to make acquisitions, these competitors might drive up the price we must pay for properties, parcels, other assets or other companies or might themselves succeed in acquiring those properties, parcels, assets or companies. In addition, our potential acquisition targets might find our competitors to be more attractive suitors if they have greater resources, are willing to pay more, or have a more compatible operating philosophy. In particular, larger REITs might enjoy significant competitive advantages that result from, among other things, a lower cost of capital, a better ability to raise capital, a better ability to finance an acquisition, and enhanced operating efficiencies. We might not succeed in acquiring retail properties or development sites that we seek, or, if we pay a higher price for a property and/or generate lower cash flow from an acquired property than we expect, our investment returns will be reduced, which will adversely affect the value of our securities.

We receive a substantial portion of our operating income as rent under long-term leases with tenants. At any time, any tenant having space in one or more of our properties could experience a downturn in its business that might weaken its financial condition. These tenants might defer or fail to make rental payments when due, delay or defer lease commencement, voluntarily vacate the premises or declare bankruptcy, which could result in the termination of the tenant's lease, and could result in material losses to us and harm to our results of operations. Also, it might take time to terminate leases of underperforming or nonperforming tenants and we might incur costs to remove such tenants. Some of our tenants occupy stores at multiple locations in our portfolio, and so the effect of any bankruptcy of those tenants might be more significant to us than the bankruptcy of other tenants. See Item 2. Properties Major Tenants. In addition, under many of our leases, our tenants pay rent based on a percentage of their sales. Accordingly, declines in these tenants' sales directly affect our results of operations. Also, if tenants are unable to comply with the terms of their leases, we might modify lease terms in ways that are less favorable to us.

Table of Contents

SEASONALITY

There is seasonality in the retail real estate industry. Retail property leases often provide for the payment of a portion of rent based on a percentage of a tenant's sales revenue over certain levels. Income from such rent is recorded only after the minimum sales levels have been met. The sales levels are often met in the fourth quarter, during the December holiday season. Also, many new and temporary leases are entered into later in the year in anticipation of the holiday season and there is a higher concentration of tenants vacating their space early in the year. As a result, our occupancy and cash flows are generally higher in the fourth quarter and lower in the first quarter, excluding the effect of ongoing redevelopment projects. Our concentration in the retail sector increases our exposure to seasonality and is expected to continue to result in a greater percentage of our cash flows being received in the fourth quarter.

INFLATION

Inflation can have many effects on financial performance. Retail property leases often provide for the payment of rent based on a percentage of sales, which may increase with inflation. Leases may also provide for tenants to bear all or a portion of operating expenses, which may reduce the impact of such increases on us. However, rent increases might not keep up with inflation, or if we recover a smaller proportion of property operating expenses, we might bear more costs if such expenses increase because of inflation.

Table of Contents

FORWARD LOOKING STATEMENTS

This Annual Report on Form 10-K for the year ended December 31, 2009, together with other statements and information publicly disseminated by us, contain certain forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements relate to expectations, beliefs, projections, future plans, strategies, anticipated events, trends and other matters that are not historical facts. These forward-looking statements reflect our current views about future events and are subject to risks, uncertainties and changes in circumstances that might cause future events, achievements or results to differ materially from those expressed or implied by the forward-looking statements. In particular, our business might be affected by uncertainties affecting real estate businesses generally as well as the following, among other factors:

our substantial debt and our high leverage ratio;

constraining leverage, interest and tangible net worth covenants under our 2010 Credit Facility, as well as mandatory pay down and capital application provisions;

our ability to refinance our existing indebtedness when it matures;

our ability to raise capital, including through the issuance of equity securities if market conditions are favorable, through joint ventures or other partnerships, through sales of properties, or through other actions;

our short- and long-term liquidity position;

the effects on us of dislocations and liquidity disruptions in the capital and credit markets;

the current economic downturn and its effect on consumer confidence and consumer spending, tenant business and leasing decisions and the value and potential impairment of our properties;

increases in operating costs that cannot be passed on to tenants;

our ability to maintain and increase property occupancy, sales and rental rates, including at our recently redeveloped properties;

risks relating to development and redevelopment activities;

changes in the retail industry, including consolidation and store closings;

general economic, financial and political conditions, including credit market conditions, changes in interest rates or unemployment;

concentration of our properties in the Mid-Atlantic region;

changes in local market conditions, such as the supply of or demand for retail space, or other competitive factors;

potential dilution from any capital raising transactions;

possible environmental liabilities;

our ability to obtain insurance at a reasonable cost; and

existence of complex regulations, including those relating to our status as a REIT, and the adverse consequences if we were to fail to qualify as a REIT.

Additional factors that might cause future events, achievements or results to differ materially from those expressed or implied by our forward-looking statements include those discussed in the section entitled Item 1A. Risk Factors. We do not intend to update or revise any forward-looking statements to reflect new information, future events or otherwise.

Except as the context otherwise requires, references in this Annual Report on Form 10-K to we, our, us, the Company and PREIT refer to Pennsylvania Real Estate Investment Trust and its subsidiaries, including our operating partnership, PREIT Associates, L.P. References in this Annual Report on Form 10-K to PREIT Associates refer to PREIT Associates, L.P. References in this Annual Report on Form 10-K to PRI refer to PREIT-RUBIN, Inc.

Table of Contents**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**

The analysis below presents the sensitivity of the market value of our financial instruments to selected changes in market interest rates. As of December 31, 2009, our consolidated debt portfolio consisted primarily of \$486.0 million borrowed under our revolving 2003 Credit Facility, which bore interest at a LIBOR rate plus an applicable margin at December 31, 2009, \$136.9 million of Exchangeable Notes, which bear interest at 4.00%, excluding debt discount of \$4.7 million, \$170.0 million borrowed under our senior unsecured 2008 Term Loan, which bore interest at a weighted-average swapped fixed interest rate of 5.29% at December 31, 2009 and \$1,777.1 million in fixed and variable rate mortgage loans, including \$2.7 million of mortgage debt premium.

Twenty-eight mortgage loans, which are secured by 26 of our consolidated properties, are due in installments over various terms extending to the year 2017. Seventeen of the mortgage loans bear interest at a fixed rate and nine of the mortgage loans bear interest at variable rates that have been swapped to or capped at a fixed rate. These mortgage loans have interest rates that range from 4.95% to 7.61% and had a weighted average interest rate of 5.80% at December 31, 2009. We also have two properties with variable interest rate mortgage loans that had a weighted average interest rate of 3.07% at December 31, 2009. The weighted average interest rate of all consolidated mortgage loans is 5.79%. Mortgage loans for properties owned by unconsolidated partnerships are accounted for in Investments in partnerships, at equity and Distributions in excess of partnership investments on the consolidated balance sheets and are not included in the table below.

Our interest rate risk is monitored using a variety of techniques. The table below presents the principal amounts of the expected annual maturities and the weighted average interest rates for the principal payments in the specified periods:

(in thousands of dollars)	Fixed-Rate Debt		Variable-Rate Debt	
	Principal Payments	Weighted Average Interest Rate	Principal Payments	Weighted Average Interest Rate
Year Ended December 31,				
2010	\$ 243,061	5.66%	\$ 496,092 ⁽¹⁾	2.26% ⁽²⁾
2011	\$ 119,682	5.82%		
2012	\$ 530,764	5.45%		
2013	\$ 416,136	5.48%		
2014	\$ 108,653	6.57%		
2015 and thereafter	\$ 652,889	5.60%		

⁽¹⁾ Includes the unsecured revolving 2003 Credit Facility, which had a term that would have expired in March 2010. The 2003 Credit Facility was replaced by the 2010 Credit Facility.

⁽²⁾ The 2003 Credit Facility interest rate is based on the weighted average interest rate in effect as of December 31, 2009.

Changes in market interest rates have different impacts on the fixed and variable portions of our debt portfolio. A change in market interest rates applicable to the fixed portion of the debt portfolio affects the fair value, but it has no effect on interest incurred or cash flows. A change in market interest rates applicable to the variable portion of the debt portfolio affects the interest incurred and cash flows, but does not affect the fair value. The following sensitivity analysis related to the fixed debt portfolio, which includes the effects of our interest rate swap agreements, assumes an immediate 100 basis point change in interest rates from their actual December 31, 2009 levels, with all other variables held constant. A 100 basis point increase in market interest rates would have resulted in a decrease in our net financial instrument position of \$67.9 million at December 31, 2009. A 100 basis point decrease in market interest rates would have resulted in an increase in our net financial instrument position of \$70.7 million at December 31, 2009. Based on the variable-rate debt included in our debt portfolio as of December 31, 2009, a 100 basis point increase in interest rates would have resulted in an additional \$5.0 million in interest annually. A 100 basis point decrease would have reduced interest incurred by \$5.0 million annually.

At December 31, 2008, a 100 basis point increase in market interest rates would have resulted in a decrease in our net financial instrument position of \$56.5 million. A 100 basis point decrease in market interest rates would have resulted in an increase in our net financial instrument position of \$59.5 million at December 31, 2008. Based on the variable-rate debt included in our debt portfolio as of December 31, 2008, a 100 basis point increase in interest rates

Table of Contents

would have resulted in an additional \$4.0 million in interest annually. A 100 basis point decrease would have reduced interest incurred by \$4.0 million annually.

To manage interest rate risk and limit overall interest cost, we may employ interest rate swaps, options, forwards, caps and floors or a combination thereof, depending on the underlying exposure. Interest rate differentials that arise under swap contracts are recognized in interest expense over the life of the contracts. If interest rates rise, the resulting cost of funds is expected to be lower than that which would have been available if debt with matching characteristics was issued directly. Conversely, if interest rates fall, the resulting costs would be expected to be higher. We may also employ forwards or purchased options to hedge qualifying anticipated transactions. Gains and losses are deferred and recognized in net income in the same period that the underlying transaction occurs, expires or is otherwise terminated. See note 5 of the notes to our consolidated financial statements.

We have an aggregate \$597.5 million in notional amount of swap agreements settling on various dates through November 2013.

Because the information presented above includes only those exposures that existed as of December 31, 2009, it does not consider changes, exposures or positions which could arise after that date. The information presented herein has limited predictive value. As a result, the ultimate realized gain or loss or expense with respect to interest rate fluctuations will depend on the exposures that arise during the period, our hedging strategies at the time and interest rates.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

Our consolidated balance sheets as of December 31, 2009 and 2008, and the related consolidated statements of operations, equity and comprehensive income and cash flows for the years ended December 31, 2009, 2008 and 2007, and the notes thereto, our report on internal control over financial reporting, the reports of our independent registered public accounting firm thereon, our summary of unaudited quarterly financial information for the years ended December 31, 2009 and 2008, and the financial statement schedule begin on page F-1 of this report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

We are committed to providing accurate and timely disclosure in satisfaction of our SEC reporting obligations. In 2002, we established a Disclosure Committee to formalize our disclosure controls and procedures. Our Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2009, and have concluded as follows:

Our disclosure controls and procedures are designed to ensure that the information that we are required to disclose in our reports under the Securities Exchange Act of 1934 (the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Our disclosure controls and procedures are effective to ensure that information that we are required to disclose in our Exchange Act reports is accumulated and communicated to management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

There was no change in our internal controls over financial reporting that occurred during the fourth quarter of 2009 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

See Management's Report on Internal Control Over Financial Reporting included before the financial statements contained in this report.

ITEM 9B. OTHER INFORMATION.

None.

Management's Report on Internal Control Over Financial Reporting

Management of Pennsylvania Real Estate Investment Trust (us or the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in the rules of the Securities and Exchange Commission, internal control over financial reporting is a process designed by, or under the supervision of, our principal executive and principal financial officers and effected by our Board of Trustees, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Our internal control over financial reporting includes those policies and procedures that:

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the Company's transactions and the dispositions of assets of the Company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of the Company's management and trustees; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, a system of internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation and presentation and may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In connection with the preparation of the Company's annual consolidated financial statements, management has conducted an assessment of the effectiveness of our internal control over financial reporting based on the framework set forth in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management's assessment included an evaluation of the design of the Company's internal control over financial reporting and testing of the operational effectiveness of those controls. Based on this evaluation, we have concluded that, as of December 31, 2009, our internal control over financial reporting was effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Our independent registered public accounting firm, KPMG LLP, independently assessed the effectiveness of the Company's internal control over financial reporting. KPMG has issued a report concurring with management's assessment, which is included on page F-3 in this report.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Trustees and Shareholders

Pennsylvania Real Estate Investment Trust:

We have audited the accompanying consolidated balance sheets of Pennsylvania Real Estate Investment Trust (a Pennsylvania business trust) and subsidiaries as of December 31, 2009 and 2008, and the related consolidated statements of operations, equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2009. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedule III. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Pennsylvania Real Estate Investment Trust and subsidiaries as of December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, the Company has changed its method of accounting for noncontrolling interests and Exchangeable Notes due to the adoption of FASB Accounting Standard 160 *Noncontrolling Interests In Consolidated Financial Statements* and FASB Staff Positions 14-1 *Accounting For Convertible Debt Instruments That May Be Settled in Cash Upon Conversion (Including Partial Cash Settlement)*, respectively, (included in FASB ASC Topics 805 *Business Combinations* and 470 *Debt*, respectively) as of January 1, 2009.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Pennsylvania Real Estate Investment Trust's internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 15, 2010 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Trustees and Shareholders

Pennsylvania Real Estate Investment Trust:

We have audited Pennsylvania Real Estate Investment Trust's internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Pennsylvania Real Estate Investment Trust's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and trustees of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Pennsylvania Real Estate Investment Trust maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Pennsylvania Real Estate Investment Trust and subsidiaries as of December 31, 2009 and 2008, and the related consolidated statements of operations, equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2009, and our report dated March 15, 2010 expressed an unqualified opinion on those consolidated financial statements.

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the Years Ended December 31, 2009, 2008 and 2007

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Pennsylvania Real Estate Investment Trust, a Pennsylvania business trust founded in 1960 and one of the first equity real estate investment trusts (REITs) in the United States, has a primary investment focus on retail shopping malls and strip and power centers located in the eastern half of the United States, primarily in the Mid-Atlantic region. As of December 31, 2009, the Company's portfolio consisted of a total of 54 properties in 13 states, including 38 shopping malls, 13 strip and power centers and three properties under development. The ground-up development portion of the Company's portfolio contained three properties in two states, with two classified as mixed use (a combination of retail and other uses), and one classified as other.

The Company holds its interest in its portfolio of properties through its operating partnership, PREIT Associates, L.P. (the Operating Partnership). The Company is the sole general partner of the Operating Partnership and, as of December 31, 2009, the Company held a 95.0% interest in the Operating Partnership, and consolidates it for reporting purposes. The presentation of consolidated financial statements does not itself imply that the assets of any consolidated entity (including any special-purpose entity formed for a particular project) are available to pay the liabilities of any other consolidated entity, or that the liabilities of any consolidated entity (including any special-purpose entity formed for a particular project) are obligations of any other consolidated entity.

The Company evaluates operating results and allocates resources on a property-by-property basis, and does not distinguish or evaluate consolidated operations on a geographic basis. No individual property constitutes more than 10% of consolidated revenue or assets, and thus the individual properties have been aggregated into one reportable segment based upon their similarities with regard to the nature of the Company's properties and the nature of the Company's tenants and operational processes, as well as long-term financial performance. In addition, no single tenant accounts for 10% or more of consolidated revenue, and none of the Company's properties are located outside the United States.

Pursuant to the terms of the partnership agreement of the Operating Partnership, each of the limited partners has the right to redeem such partner's units of limited partnership interest in the Operating Partnership (OP Units) for cash or, at the election of the Company, the Company may acquire such OP Units for common shares of the Company on a one-for-one basis, in some cases beginning one year following the respective issue date of the OP Units and in other cases immediately. In the event of the redemption of all of the outstanding OP Units held by limited partners for cash, the total amount that would have been distributed as of December 31, 2009 would have been \$19.7 million, which is calculated using the Company's December 31, 2009 closing share price on the New York Stock Exchange of \$8.46 multiplied by the number of outstanding OP Units held by limited partners.

The Company provides its management, leasing and real estate development services through two companies: PREIT Services, LLC (PREIT Services), which generally develops and manages properties that the Company consolidates for financial reporting purposes, and PREIT-RUBIN, Inc. (PRI), which generally develops and manages properties that the Company does not consolidate for financial reporting purposes, including properties owned by partnerships in which the Company owns an interest and properties that are owned by third parties in which the Company does not have an interest. PREIT Services and PRI are consolidated. PRI is a taxable REIT subsidiary, as defined by federal tax laws, which means that it is able to offer an expanded menu of services to tenants without jeopardizing the Company's continuing qualification as a REIT under federal tax law.

Consolidation

The Company consolidates its accounts and the accounts of the Operating Partnership and other controlled subsidiaries and reflects the remaining interest of such entities as noncontrolling interest. All significant intercompany accounts and transactions have been eliminated in consolidation.

Current Economic Downturn, Challenging Capital Market Conditions, the Company's Leverage and Near Term Capital Needs

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

The downturn in the overall economy and the disruptions in the financial markets have reduced consumer confidence and negatively affected employment and consumer spending on retail goods. As a result, the sales and profit performance of retailers in general has decreased, sales at the Company's properties in particular have decreased, and the Company has experienced delays or deferred decisions regarding the openings of new retail stores and of lease renewals. The Company is adjusting its plans and actions to take into account the difficult current environment.

In addition, credit markets have experienced significant dislocations and liquidity disruptions. These circumstances have materially affected liquidity in the debt markets, making financing terms for borrowers less attractive, and in certain cases have resulted in the limited availability or unavailability of certain types of debt financing.

The difficult conditions in the market for debt capital and commercial mortgage loans, including the commercial mortgage backed securities market, and the downturn in the general economy and its effect on retail sales, as well as the Company's significant leverage resulting from the use of debt to fund its redevelopment program and other development activity, have combined to necessitate that the Company vary its approach to obtaining, using and recycling capital. The Company intends to consider all of its available options for accessing the capital markets, given its position and constraints.

The amounts remaining to be invested in the last phases of the Company's current redevelopment projects are significantly less than in 2009, and the Company believes it has access to sufficient capital to fund these remaining amounts.

The Company is contemplating ways to reduce its leverage through a variety of means available to it, and subject to and in accordance with the terms of the 2010 Credit Facility. These steps might include obtaining equity capital, including through the issuance of equity securities if market conditions are favorable, through joint ventures or other partnerships or arrangements involving the contribution of assets with institutional investors, private equity investors or other REITs, through sales of properties with values in excess of their mortgage loans or allocable debt and application of the excess proceeds to debt reduction, or through other actions.

Table of Contents

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the Years Ended December 31, 2009, 2008 and 2007

Partnership Investments

The Company accounts for its investments in partnerships that it does not control using the equity method of accounting. These investments, each of which represent a 40% to 50% noncontrolling ownership interest at December 31, 2009, are recorded initially at the Company's cost and subsequently adjusted for the Company's share of net equity in income and cash contributions and distributions. The Company does not control any of these equity method investees for the following reasons:

Except for two properties that the Company co-manages with its partner, the other entities are managed on a day-to-day basis by one of the Company's other partners as the managing general partner in each of the respective partnerships. In the case of the co-managed properties, all decisions in the ordinary course of business are made jointly.

The managing general partner is responsible for establishing the operating and capital decisions of the partnership, including budgets, in the ordinary course of business.

All major decisions of each partnership, such as the sale, refinancing, expansion or rehabilitation of the property, require the approval of all partners.

Voting rights and the sharing of profits and losses are in proportion to the ownership percentages of each partner.

Statements of Cash Flows

The Company considers all highly liquid short-term investments with an original maturity of three months or less to be cash equivalents. At December 31, 2009 and 2008, cash and cash equivalents totaled \$74.2 million and \$9.8 million, respectively, and included tenant security deposits of \$4.1 million and \$4.5 million, respectively. Cash paid for interest, including interest related to discontinued operations, was \$124.9 million, \$117.5 million and \$109.5 million for the years ended December 31, 2009, 2008 and 2007, respectively, net of amounts capitalized of \$5.6 million, \$16.0 million and \$16.3 million, respectively.

Significant Non-Cash Transactions

Accrued construction expenses decreased \$27.1 million in the twelve months ended December 31, 2009, representing a non-cash decrease in construction in progress.

In October 2009, the Company repurchased \$35.0 million in aggregate principal amount of its 4% Senior Exchangeable Notes due in 2012 (Exchangeable Notes) in exchange for 1.3 million common shares with a fair market value of \$10.0 million and \$13.3 million of cash. In June 2009, the Company repurchased \$25.0 million in aggregate principal amount of its Exchangeable Notes in exchange for 3.0 million common shares with a fair market value of \$15.0 million.

In February 2008, the Company acquired a 0.1% general partner interest and a 49.8% limited partner interest in Bala Cynwyd Associates, L.P. (BCA) for \$3.9 million. In June 2009, the Company acquired an additional 49.9% of the limited partner interest in BCA for 140,745 OP Units pursuant to a put/call arrangement. In connection with the acquisition of partnership interests in BCA in 2008, the Company consolidated an \$8.0 million mortgage loan.

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

On June 6, 2007, the Company issued 1,580,211 common shares in exchange for a like number of OP Units in a transaction with an entity that is an affiliate of Mark Pasquerilla, a trustee of the Company.

Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial

F-10

Table of Contents

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the Years Ended December 31, 2009, 2008 and 2007

statements, and the reported amounts of revenue and expense during the reporting periods. Actual results could differ from those estimates.

The Company's management makes complex or subjective assumptions and judgments in applying its critical accounting policies. In making these judgments and assumptions, management considers, among other factors:

events and changes in property, market and economic conditions;

estimated future cash flows from property operations; and

the risk of loss on specific accounts or amounts.

The estimates and assumptions made by the Company's management in applying its critical accounting policies have not changed materially over time, and none of these estimates or assumptions have proven to be materially incorrect or resulted in the Company recording any significant adjustments relating to prior periods. The Company will continue to monitor the key factors underlying its estimates and judgments, but no change is currently expected.

Revenue Recognition

The Company derives over 95% of its revenue from tenant rent and other tenant-related activities. Tenant rent includes base rent, percentage rent, expense reimbursements (such as common area maintenance, real estate taxes and utilities), amortization of above-market and below-market intangibles (as described below under *Intangible Assets*) and straight-line rent. The Company records base rent on a straight-line basis, which means that the monthly base rent income according to the terms of the Company's leases with its tenants is adjusted so that an average monthly rent is recorded for each tenant over the term of its lease. When tenants vacate prior to the end of their lease, the Company accelerates amortization of any related unamortized straight-line rent balances, and unamortized above-market and below-market intangible balances are amortized as a decrease or increase to real estate revenue, respectively. The straight-line rent adjustment increased revenue by approximately \$1.3 million in 2009, \$2.3 million in 2008 and \$2.4 million in 2007. The straight-line receivable balances included in tenant and other receivables on the accompanying balance sheet as of December 31, 2009 and December 31, 2008 were \$24.9 million and \$24.2 million, respectively.

Percentage rent represents rental income that the tenant pays based on a percentage of its sales, either as a percentage of their total sales or as a percentage of sales over a certain threshold. In the latter case, the Company does not record percentage rent until the sales threshold has been reached. Revenue for rent received from tenants prior to their due dates is deferred until the period to which the rent applies.

In addition to base rent, certain lease agreements contain provisions that require tenants to reimburse a fixed or pro rata share of certain common area maintenance costs and real estate taxes. Tenants generally make expense reimbursement payments monthly based on a budgeted amount determined at the beginning of the year. During the year, the Company's income increases or decreases based on actual expense levels and changes in other factors that influence the reimbursement amounts, such as occupancy levels. As of December 31, 2009 and 2008, the Company's accounts receivable included accrued income of \$8.9 million and \$11.7 million, respectively, because actual reimbursable expense amounts able to be billed to tenants under applicable contracts exceeded amounts actually billed. Subsequent to the end of the year, the Company prepares a reconciliation of the actual amounts due from tenants. The difference between the actual amount due and the amounts paid by the tenant throughout the year is billed or credited to the tenant, depending on whether the tenant paid too little or too much during the year.

Payments made to tenants as inducements to enter into a lease are treated as deferred costs that are amortized as a reduction of rental revenue over the term of the related lease.

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

No single tenant represented 10% or more of the Company's rental revenue in any period presented.

Lease termination fee income is recognized in the period when a termination agreement is signed, collectibility is assured and the Company is no longer obligated to provide space to the tenant. In the event that a tenant is in bankruptcy when the termination agreement is signed, termination fee income is deferred and recognized when it is received.

The Company also generates revenue by providing management services to third parties, including property management, brokerage, leasing and development. Management fees generally are a percentage of managed property revenue or cash receipts. Leasing fees are earned upon the consummation of new leases. Development fees are earned over the time period of the development activity and are recognized on the percentage of completion method. These activities are collectively included in Interest and other income in the consolidated statements of operations.

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the Years Ended December 31, 2009, 2008 and 2007

Fair Value

Fair value accounting applies to reported balances that are required or permitted to be measured at fair value under existing accounting pronouncements; the standard does not require any new fair value measurements of reported balances.

These new accounting requirements emphasize that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, these accounting requirements establish a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access.

Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals.

Level 3 inputs are unobservable inputs for the asset or liability, which are typically based on an entity's own assumptions, as there is little, if any, related market activity.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability. The Company utilizes the fair value hierarchy in its accounting for derivatives (level 2), financial instruments (level 3) and in its impairment reviews of real estate assets (level 3) and goodwill (level 3).

Derivatives

Currently, the Company uses interest rate swaps and caps to manage its interest rate risk. The valuation of these instruments is determined using widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs.

The Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements. Although the Company has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads, to evaluate the likelihood of default by itself and its counterparties. However, as of December 31, 2009, the Company has assessed the significance of the effect of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Company has determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

Financial Instruments

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

Carrying amounts reported on the balance sheet for cash and cash equivalents, tenant and other receivables, accrued expenses, other liabilities and the 2003 Credit Facility approximate fair value due to the short-term nature of these instruments. The majority of the Company's variable-rate debt is subject to interest rate swaps that have effectively fixed the interest rates on the underlying debt. The estimated fair value for fixed-rate debt, which is calculated for disclosure purposes, is based on the borrowing rates available to the Company for fixed-rate mortgage loans and corporate notes payable with similar terms and maturities.

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the Years Ended December 31, 2009, 2008 and 2007

Asset Impairment

Real estate investments and related intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the property might not be recoverable. A property to be held and used is considered impaired only if management's estimate of the aggregate future cash flows, less estimated capital expenditures, to be generated by the property, undiscounted and without interest charges, are less than the carrying value of the property. This estimate takes into consideration factors such as expected future operating income, trends and prospects, as well as the effects of demand, competition and other factors. In addition, these estimates may consider a probability weighted cash flow estimation approach when alternative courses of action to recover the carrying amount of a long-lived asset are under consideration or when a range of possible values is estimated.

The determination of undiscounted cash flows requires significant estimates by management, including the expected course of action at the balance sheet date that would lead to such cash flows. Subsequent changes in estimated undiscounted cash flows arising from changes in the anticipated action to be taken with respect to the property could impact the determination of whether an impairment exists and whether the effects could materially impact the Company's net income. To the extent estimated undiscounted cash flows are less than the carrying value of the property, the loss will be measured as the excess of the carrying amount of the property over the estimated fair value of the property.

Assessment of the recoverability by the Company of certain lease related costs must be made when the Company has a reason to believe that the tenant might not be able to perform under the terms of the lease as originally expected. This requires the Company to make estimates as to the recoverability of such costs.

An other than temporary impairment of an investment in an unconsolidated joint venture is recognized when the carrying value of the investment is not considered recoverable based on evaluation of the severity and duration of the decline in value. To the extent impairment has occurred, the excess carrying value of the asset over its estimated fair value is charged to income.

Goodwill

The Company conducts an annual review of its goodwill balances for impairment to determine whether an adjustment to the carrying value of goodwill is required. The Company has determined the fair value of its properties and the goodwill that is associated with certain of its properties. Fair value is determined by applying a capitalization rate to the Company's estimate of projected income at those properties. The Company also considers factors such as property sales performance, market position and current and future operating results.

The Company's intangible assets on the accompanying consolidated balance sheets at December 31, 2009 and 2008 included \$7.2 million (net of \$1.1 million of amortization expense recognized prior to January 1, 2002) of goodwill recognized in connection with the acquisition of The Rubin Organization in 1997.

Changes in the carrying amount of goodwill for the three years ended December 31, 2009 were as follows:

(in thousands of dollars)	Basis	Accumulated Amortization	Impairment Write-Offs	Total
Balance, January 1, 2007	\$ 12,877	\$ (1,073)	\$	\$ 11,804

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the Years Ended December 31, 2009, 2008 and 2007

Real Estate

Land, buildings, fixtures and tenant improvements are recorded at cost and stated at cost less accumulated depreciation. Expenditures for maintenance and repairs are charged to operations as incurred. Renovations or replacements, which improve or extend the life of an asset, are capitalized and depreciated over their estimated useful lives.

For financial reporting purposes, properties are depreciated using the straight-line method over the estimated useful lives of the assets. The estimated useful lives are as follows:

Buildings	30-50 years
Land improvements	15 years
Furniture/fixtures	3-10 years
Tenant improvements	Lease term

The Company is required to make subjective assessments as to the useful lives of its real estate assets for purposes of determining the amount of depreciation to reflect on an annual basis with respect to those assets based on various factors, including industry standards, historical experience and the condition of the asset at the time of acquisition. These assessments have a direct impact on the Company's net income. If the Company were to determine that a longer expected useful life was appropriate for a particular asset, it would be depreciated over more years, and, other things being equal, result in less annual depreciation expense and higher annual net income.

Gains from sales of real estate properties and interests in partnerships generally are recognized using the full accrual method provided that various criteria are met relating to the terms of sale and any subsequent involvement by the Company with the properties sold.

Real Estate Acquisitions

The Company accounts for its property acquisitions by allocating the purchase price of a property to the property's assets based on management's estimates of their fair value. Debt assumed in connection with property acquisitions is recorded at fair value at the acquisition date, and the resulting premium or discount is amortized through interest expense over the remaining term of the debt, resulting in a non-cash decrease (in the case of a premium) or increase (in the case of a discount) in interest expense. The determination of the fair value of intangible assets requires significant estimates by management and considers many factors, including the Company's expectations about the underlying property and the general market conditions in which the property operates. The judgment and subjectivity inherent in such assumptions can have a significant impact on the magnitude of the intangible assets that the Company records.

Intangible Assets

The Company allocates a portion of the purchase price of a property to intangible assets. The Company's methodology for this allocation includes estimating an as-if vacant fair value of the physical property, which is allocated to land, building and improvements. The difference between the purchase price and the as-if vacant fair value is allocated to intangible assets. There are three categories of intangible assets to be considered: (i) value of in-place leases, (ii) above- and below-market value of in-place leases and (iii) customer relationship value.

The value of in-place leases is estimated based on the value associated with the costs avoided in originating leases comparable to the acquired in-place leases, as well as the value associated with lost rental revenue during the assumed lease-up period. The value of in-place leases is amortized as real estate amortization over the remaining lease term.

Above-market and below-market in-place lease values for acquired properties are recorded based on the present value of the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) management's estimates of fair market lease rates for the comparable

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

in-place leases, based on factors such as historical experience, recently executed transactions and specific property issues, measured over a period equal to the remaining non-cancelable term of the lease. The value of above-market lease values is amortized as a reduction of rental income over the remaining terms of the respective leases. The value of below-market lease values is amortized as an increase to rental income over the remaining terms of the respective leases, including any below-market optional renewal periods.

Table of Contents

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the Years Ended December 31, 2009, 2008 and 2007

The Company allocates purchase price to customer relationship intangibles based on management's assessment of the value of such relationships.

The following table presents the Company's intangible assets and liabilities, net of accumulated amortization, as of December 31, 2009 and 2008:

(in thousands of dollars)	As of December 31, 2009	As of December 31, 2008
Value of in-place lease intangibles	\$ 28,360	\$ 55,745
Above-market lease intangibles	3,462	5,395
Subtotal	31,822	61,140
Goodwill (see above)	7,156	7,156
Total intangible assets	\$ 38,978	\$ 68,296
Below-market lease intangibles	\$ (5,942)	\$ (7,996)

Amortization of in-place lease intangibles was \$27.4 million, \$29.1 million and \$29.0 million for the years ended December 31, 2009, 2008 and 2007, respectively.

Amortization of above-market and below-market lease intangibles increased revenue by \$0.1 million in 2009 and decreased revenue by \$0.6 million and \$0.1 million in 2008 and 2007, respectively.

In the normal course of business, the Company's intangible assets will amortize in the next five years and thereafter as follows:

(in thousands of dollars)	In-Place Lease Intangibles	Above/(Below) Market Leases
For the Year Ended December 31,		
2010	\$ 22,042	\$ 142
2011	5,086	197
2012	1,189	(29)
2013	43	(249)
2014		(437)
2015 and thereafter		(2,104)
Total	\$ 28,360	\$ (2,480)

Assets Held for Sale and Discontinued Operations

The determination to classify an asset as held for sale requires significant estimates by the Company about the property and the expected market for the property, which are based on factors including recent sales of comparable properties, recent expressions of interest in the property, financial metrics of the property and the condition of the property. The Company must also determine if it will be possible under those market conditions to sell the property for an acceptable price within one year. When assets are identified by management as held for sale, the Company discontinues depreciating the assets and estimates the sales price, net of selling costs, of such assets. The Company generally considers operating

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

properties to be held for sale when they meet the criteria which include factors such as whether the sale transaction has been approved by the appropriate level of management and there are no known material contingencies relating to the sale such that the sale is probable and is expected to qualify for recognition as a completed sale within one year. If, in management's opinion, the net sales price of the asset that has been identified as held for sale is less than the net book value of the asset, the asset is written down to fair value less the cost to sell. Assets and liabilities related to assets classified as held for sale are presented separately in the consolidated balance sheet.

Assuming no significant continuing involvement, a sold operating real estate property is considered a discontinued operation. In addition, operating properties classified as held for sale are considered discontinued operations. Operating properties classified as discontinued operations are reclassified as such in the consolidated statement of operations for each period presented. Interest expense that is specifically identifiable to the property is used in the computation of interest expense attributable to discontinued operations. See note 2 for a description of the properties included in discontinued operations. Land parcels and other portions of operating properties, non-operating real estate and investments in partnerships are excluded from discontinued operations treatment.

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the Years Ended December 31, 2009, 2008 and 2007

Capitalization of Costs

Costs incurred in relation to development and redevelopment projects for interest, property taxes and insurance are capitalized only during periods in which activities necessary to prepare the property for its intended use are in progress. Costs incurred for such items after the property is substantially complete and ready for its intended use are charged to expense as incurred. Capitalized costs, as well as tenant inducement amounts and internal and external commissions, are recorded in construction in progress. The Company capitalizes a portion of development department employees' compensation and benefits related to time spent involved in development and redevelopment projects.

The Company capitalizes payments made to obtain options to acquire real property. Other related costs that are incurred before acquisition that are expected to have ongoing value to the project are capitalized if the acquisition of the property is probable. If the property is acquired, such costs are included in the amount recorded as the initial value of the asset. Capitalized pre-acquisition costs are charged to expense when it is probable that the property will not be acquired. The Company recorded abandoned project costs of \$0.8 million, \$1.3 million and \$1.5 million for the years ended December 31, 2009, 2008 and 2007, respectively.

The Company capitalizes salaries, commissions and benefits related to time spent by leasing and legal department personnel involved in originating leases with third-party tenants.

The following table summarizes the Company's capitalized salaries and benefits, real estate taxes and interest for the years ended December 31, 2009, 2008 and 2007:

(in thousands of dollars)	For the Year Ended December 31,		
	2009	2008	2007
Development/Redevelopment:			
Salaries and benefits	\$ 2,123	\$ 3,276	\$ 2,349
Real estate taxes	\$ 951	\$ 2,380	\$ 2,236
Interest	\$ 5,613	\$ 15,968	\$ 16,259
Leasing:			
Salaries, commissions and benefits	\$ 4,341	\$ 5,314	\$ 4,830

Tenant Receivables

The Company makes estimates of the collectibility of its tenant receivables related to tenant rent including base rent, straight-line rent, expense reimbursements and other revenue or income. The Company specifically analyzes accounts receivable, including straight-line rent receivable, historical bad debts, customer creditworthiness and current economic and industry trends when evaluating the adequacy of the allowance for doubtful accounts. The receivables analysis places particular emphasis on past-due accounts and considers the nature and age of the receivables, the payment history and financial condition of the payor, the basis for any disputes or negotiations with the payor, and other information that could affect collectibility. In addition, with respect to tenants in bankruptcy, the Company makes estimates of the expected recovery of pre-petition and post-petition claims in assessing the estimated collectibility of the related receivable. In some cases, the time required to reach an ultimate resolution of these claims can exceed one year. These estimates have a direct effect on the Company's net income because higher bad debt expense results in less net income, other things being equal. For straight-line rent, the collectibility analysis considers the probability of collection of the unbilled deferred rent receivable given the Company's experience regarding such amounts.

Boscov's Inc. Note Receivable

The Company has a note receivable from a subsidiary of Boscov's, Inc. with an outstanding principal balance of \$10.0 million as of December 31, 2009 and 2008. The note was originated in December 2008. The note bears interest at the rate of 18.0% per annum, of which 10.0% is payable monthly, and 8.0% is deferred and either paid annually in January of each year that the note is outstanding or added to the principal

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

balance. The note matures in December 2013 at which time all principal and deferred interest is payable. The note may be prepaid in whole or in part at any time without premium or penalty. Interest payments under the note were current as of December 31, 2009. Boscov's, Inc. owns 39 Boscov's department stores, eight of which are located at properties owned by the Company, and one of which is located at a property owned by a partnership in which the Company owns a 50% interest. Boscov's, Inc. filed for bankruptcy protection in August 2008, and exited from bankruptcy in September 2009.

Income Taxes

The Company has elected to qualify as a real estate investment trust under Sections 856-860 of the Internal Revenue Code of 1986, as amended, and intends to remain so qualified.

Earnings and profits, which determine the taxability of distributions to shareholders, will differ from net income (loss) reported for financial reporting purposes due to differences in cost basis, differences in the estimated useful lives used to compute depreciation and differences between the allocation of the Company's net income and loss for financial reporting purposes and for tax reporting purposes.

The Company is subject to a federal excise tax computed on a calendar year basis. The excise tax equals 4% of the excess, if any, of 85% of the Company's ordinary income plus 95% of the Company's capital gain net income for

Table of Contents

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the Years Ended December 31, 2009, 2008 and 2007

the year plus 100% of any prior year shortfall over cash distributions during the year, as defined by the Internal Revenue Code. The Company has, in the past, distributed a substantial portion of its taxable income in the subsequent fiscal year and might also follow this policy in the future.

No provision for excise tax was made for the years ended December 31, 2009, 2008, and 2007, as no excise tax was due in those years.

The per share distributions paid to shareholders had the following components for the years ended December 31, 2009, 2008, and 2007:

	For the Year Ended December 31,		
	2009	2008	2007
Ordinary income	\$ 0.63	\$ 2.25	\$ 2.11
Capital gains	0.11		
Return of capital		0.03	0.17
	\$ 0.74	\$ 2.28	\$ 2.28

The Company follows accounting requirements that prescribe a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken in a tax return. The Company must determine whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the more likely than not recognition threshold, the position is measured at the largest amount of benefit that is greater than 50% likely of being realized upon settlement to determine the amount of benefit to recognize in the financial statements.

PRI is subject to federal, state and local income taxes. The Company had no provision or benefit for federal or state income taxes in the years ended December 31, 2009, 2008 and 2007. The Company had net deferred tax assets of \$5.1 million and \$5.3 million for the years ended December 31, 2009 and 2008, respectively. The deferred tax assets are primarily the result of net operating losses. A valuation allowance has been established for the full amount of the deferred tax assets, since it is more likely than not that these will not be realized.

The Company recorded expense of \$0.1 million, \$0.2 million and \$0.2 million related to Philadelphia net profits tax for each of the years ended December 31, 2009, 2008 and 2007, respectively.

The aggregate cost basis and depreciated basis for federal income tax purposes of the Company's investment in real estate was approximately \$3,921.7 million and \$3,091.2 million, respectively, at December 31, 2009, and \$3,864.4 million and \$3,108.1 million, respectively, at December 31, 2008.

Derivatives

In the normal course of business, the Company is exposed to financial market risks, including interest rate risk on its interest-bearing liabilities. The Company endeavors to limit these risks by following established risk management policies, procedures and strategies, including the use of derivative financial instruments. The Company does not use derivative financial instruments for trading or speculative purposes.

Derivative financial instruments are recorded on the balance sheet as assets or liabilities based on the instruments' fair value. Changes in the fair value of derivative financial instruments are recognized currently in earnings, unless the derivative financial instrument meets the criteria for hedge accounting. If the derivative financial instruments meet the criteria for a cash flow hedge, the gains and losses in the fair value of the instrument are deferred in other comprehensive income. Gains and losses on a cash flow hedge are reclassified into earnings when the forecasted transaction affects earnings. A contract that is designated as a hedge of an anticipated transaction that is no longer likely to occur is immediately

recognized in earnings.

The anticipated transaction to be hedged must expose the Company to interest rate risk, and the hedging instrument must reduce the exposure and meet the requirements for hedge accounting. The Company must formally designate the instrument as a hedge and document and assess the effectiveness of the hedge at inception and on a quarterly basis. Interest rate hedges that are designated as cash flow hedges hedge future cash outflows on debt.

F-17

Table of Contents

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the Years Ended December 31, 2009, 2008 and 2007

Operating Partnership Unit Redemptions

Shares issued upon redemption of OP Units are recorded at the book value of the OP Units surrendered.

Share-Based Compensation Expense

The Company follows the expense recognition provisions of required accounting provisions, which require all share based payments to employees, including grants of employee stock options and restricted shares, to be valued at fair value on the date of grant, and to be expensed over the applicable vesting period.

Earnings Per Share

The difference between basic weighted average shares outstanding and diluted weighted average shares outstanding is the dilutive impact of common stock equivalents. Common stock equivalents consist primarily of shares to be issued under employee share compensation programs and outstanding share options whose exercise price was less than the average market price of the Company's share during these periods.

Recent Accounting Pronouncements

Accounting for Convertible Debt

Effective January 1, 2009, the Company adopted new accounting requirements that clarify the accounting treatment for convertible debt instruments that may be settled in cash upon either mandatory or optional conversion (including partial cash settlement). The Company's Exchangeable Notes are within the scope of these new accounting requirements. The Company was required to retrospectively apply these new accounting requirements to prior periods, and recorded the impact of its adoption of these new accounting requirements as of the issuance date of the Exchangeable Notes (May 2007). Pursuant to these new accounting requirements, the value assigned to the debt component is the estimated fair value of a similar bond without the conversion feature, which would result in the debt being recorded at a discount. The Company determined that the fair value of the conversion feature at the date of the issuance was \$19.3 million, which was recorded as an increase to capital contributed in excess of par and a decrease to Exchangeable Notes in the accompanying consolidated balance sheets at inception. The amount that was recorded for the conversion feature is not amortized. The debt discount is amortized as additional non-cash interest expense over the period during which the debt is expected to be outstanding. The unamortized discount on the Exchangeable Notes was \$4.7 million and \$11.4 million as of December 31, 2009 and December 31, 2008, respectively, following repurchases of some outstanding Exchangeable Notes by the Company in 2009 and 2008. The implementation of this new accounting requirement resulted in an increase to interest expense and net loss of \$3.5 million and \$2.1 million from amounts previously reported for the years ended December 31, 2008 and December 31, 2007, respectively.

Business Combinations

Effective January 1, 2009, the Company prospectively adopted new accounting requirements relating to business combinations. These new accounting requirements apply to all transactions or other events in which an entity obtains control of one or more businesses, including those combinations achieved without the transfer of consideration. These new accounting requirements expand the scope of the acquisition method of accounting to include all business combinations and require an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interests in the acquiree at their fair values as of the acquisition date. Additionally, these new accounting requirements change the way entities account for business combinations achieved in stages by requiring the identifiable assets and liabilities to be measured at fair value at the acquisition date. These new accounting requirements require entities to directly expense transaction costs. The adoption of these new accounting requirements did not have a material effect on the Company's consolidated financial statements.

Classification and Measurement of Redeemable Securities

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

Effective January 1, 2009, the Company adopted new accounting requirements related to the classification and measurement of redeemable securities. The ownership interests in a subsidiary that are held by owners other than the parent are noncontrolling interests (which were previously reported on the consolidated balance sheet as Minority interest). Under these new accounting requirements, noncontrolling interest represents the portion of equity in a subsidiary not attributable, directly or indirectly, to a parent. Under these new accounting requirements, such

F-18

Table of Contents

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the Years Ended December 31, 2009, 2008 and 2007

noncontrolling interests are reported on the consolidated balance sheets within equity, separately from the Company's equity. Consolidated statements of equity are included for both quarterly and annual financial statements, including beginning balances, activity for the period and ending balances. On the consolidated statements of operations, revenue, expenses and net loss are reported at the consolidated amounts including both the amounts attributable to the Company and to noncontrolling interests. However, in accordance with these new accounting requirements, securities (including those considered to be noncontrolling interests) that are redeemable for cash or other assets at the option of the holder, not solely within the control of the issuer, must be classified outside of permanent equity. The Company makes this determination based on terms in applicable agreements, specifically in relation to redemption provisions. Additionally, with respect to noncontrolling interests for which the Company has a choice to settle the contract by delivery in its own shares, the Company considered the guidance relating to the accounting for derivative financial instruments indexed to, and potentially settled in, a company's own stock, to evaluate whether such provisions are solely within the Company's control. The Company has concluded that for its noncontrolling interests that allow for redemption in either cash or Company shares, all such provisions are solely within its control. As a result of its evaluation, the Company has determined that all of its noncontrolling interests qualify as permanent equity, and therefore are not subject to the classification and measurement provisions of these new accounting requirements.

Also as a result of the adoption of these new accounting requirements, the statement of operations captions entitled "Income (loss) before minority interest," "Minority interest" and "Net income (loss)" are now entitled "Net income (loss)," "Net income (loss) attributable to noncontrolling interest" and "Net income (loss) attributable to PREIT," respectively.

As of December 31, 2009, the Company has a 99.8% interest in Bala Cynwyd Associates, L.P. ("BCA") and an option to purchase the remaining interests, as described in note 3. BCA owns an office building. The Company has consolidated the assets, liabilities and results of operations of BCA in the Company's consolidated financial statements. The interest that was not owned by the Company is reflected in noncontrolling interest on the accompanying consolidated balance sheets of \$15,000 and \$3.8 million as of December 31, 2009 and December 31, 2008, respectively.

Disclosures about Derivative Instruments and Hedging Activities

Effective January 1, 2009, the Company adopted new accounting requirements relating to disclosures about derivative instruments and hedging activities, which require enhanced disclosures about an entity's derivative and hedging activities and thereby improve the transparency of financial reporting (see note 5 for the Company's disclosure relating to its derivative activities).

Accounting for Transfers of Financial Assets

On January 1, 2010, the Company adopted new accounting requirements relating to accounting for transfers of financial assets. The recognition and measurement provisions of these new accounting requirements are applied to transfers that occur on or after the effective date. The disclosure provisions of these new accounting requirements are applied to transfers that occurred both before and after the effective date of the new accounting requirements. The adoption of these new accounting requirements did not have a material effect on the Company's consolidated financial statements.

Variable Interest Entities

On January 1, 2010, the Company adopted new accounting requirements relating to variable interest entities. These new accounting requirements amend the existing accounting guidance as follows: a) to require an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity, identifying the primary beneficiary of a variable interest entity; b) to require ongoing reassessment of whether an enterprise is the primary beneficiary of a variable interest entity, rather than only when specific events occur; c) to eliminate the quantitative approach previously required for determining the primary beneficiary of a variable interest; d) to amend certain guidance for determining whether an entity is a variable interest entity; e) to add an additional reconsideration event when changes in facts and circumstances pertinent to a variable interest entity occur; f) to eliminate the exception for troubled debt restructuring regarding variable interest entity reconsideration; and g) to require advanced disclosures that will provide users of financial

Table of Contents

statements with more transparent information about an enterprise's involvement in a variable interest entity. The adoption of these new accounting requirements did not have a material effect on the Company's consolidated financial statements.

FASB Accounting Standards Codification

Effective September 30, 2009, the Company adopted the Financial Accounting Standards Board Accounting Standards Codification (ASC). The ASC is the sole source of authoritative United States GAAP for interim and annual periods ending after September 15, 2009, except for rules and interpretive releases of the SEC, which are sources of authoritative GAAP for SEC registrants. The adoption of the ASC did not have a significant effect on the Company's consolidated financial statements.

2. REAL ESTATE ACTIVITIES

Investments in real estate as of December 31, 2009 and 2008 were comprised of the following:

(in thousands of dollars)	As of December 31,	
	2009	2008

Impairment of assets and abandoned project costs

During the years ended December 31, 2009 and December 31, 2008, the Company recorded asset impairment charges and abandoned project costs totaling \$75.0 million and \$28.9 million, respectively, which are included in Impairment of assets and abandoned project costs in the consolidated statement of operations. Details about the assets that were written down are as follows:

(in thousands of dollars)	As of December 31,		
	2009	2008	2007
Orlando Fashion Square	\$ 62,700	\$	\$
Springhills	11,484		
Monroe Marketplace	70		
White Clay Point		11,799	
Sunrise Plaza		7,027	
Goodwill		4,648	
Valley View Downs		3,032	
Predevelopment costs		936	
Land held for development		150	
Abandoned project costs	758	1,297	1,531
Total	\$ 75,012	\$ 28,889	\$ 1,531

2009 Impairments

During 2009, Orlando Fashion Square experienced significant decreases in non-anchor occupancy and net operating income as a result of unfavorable economic conditions in the Orlando market combined with negative trends in the retail sector. The occupancy declines resulted from store closings from bankrupt and underperforming tenants. Net operating income at this property was also impacted by an increase in the number of tenants paying a percentage of their sales in lieu of minimum rent combined with declining tenant sales. As a result of these conditions, in

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

connection with the preparation of the Company's 2010 business plan and budgets, management determined that its estimate of future cash flows, net of estimated capital expenditures, to be generated by the property were less than

F-20

For the Years Ended December 31, 2009, 2008 and 2007

the carrying value of the property. As a result, the Company determined that the property was impaired and a write down of \$62.7 million to the property's estimated fair value of \$40.2 million was necessary.

Springhills is a mixed use ground-up development project located in Gainesville, Florida. During the fourth quarter of 2009, in connection with the Company's 2010 business planning process, which included a strategic review of its future development projects, management determined that the development plans for Springhills were uncertain. Consequently, the Company recorded an impairment loss of \$11.5 million, to write down the carrying amount of the project to the estimated fair value of \$22.0 million.

In May 2009, the Company sold an outparcel and related land improvements containing an operating restaurant at Monroe Marketplace in Selinsgrove, Pennsylvania for \$0.9 million. The Company recorded an asset impairment charge of \$0.1 million immediately prior to this transaction because the sales price of the parcel was less than the carrying value of the parcel.

2008 Impairments

White Clay Point is a mixed use ground-up development project located in Landenberg, Pennsylvania. During the fourth quarter of 2008, in connection with the Company's 2009 business planning process, which included a strategic review of its future development projects, management determined that the development plans for White Clay Point were uncertain. Consequently, the Company recorded an impairment loss of \$11.8 million, which represents the aggregate of the costs excluding the purchase price of the land that had been capitalized to date for this development.

Sunrise Plaza is an operating power center located in Forked River, New Jersey. During the fourth quarter 2008, in connection with the Company's 2009 business planning process, which included a strategic review of its future development projects, management determined that Sunrise Plaza's carrying value exceeded its fair value. Consequently, the Company recorded an impairment loss of \$7.0 million, which represents the excess of the carrying value of the project's assets over their fair value determined by their future discounted cash flows.

In September 2008, the Company entered into an Amendment Agreement with Valley View Downs, LP (Valley View) and Centaur Pennsylvania, LLC (Centaur) with respect to the development of a proposed harness racetrack and casino in western Pennsylvania (the Project) to be owned and operated by Valley View. The Amendment Agreement amends the terms of the Binding Memorandum of Understanding dated October 7, 2004, as amended by Amendment No. 1 to the Binding Memorandum of Understanding dated October 1, 2007, among the Company, Valley View and Centaur (the MOU).

Pursuant to the Amendment Agreement, the Company will permit Centaur and Valley View to suspend any payments to the Company otherwise required by the MOU and the related development agreement until September 30, 2010. If there is a sale or other disposition by Valley View and Centaur of all or substantially all of their economic interest in the project on or prior to September 30, 2010, the Company and Valley View have agreed (i) that the Company will accept a cash payment of \$13.0 million to the Company in satisfaction of the obligations of Valley View to the Company under the MOU and development agreement, and (ii) upon such payment, the MOU and the development agreement will be terminated. If a disposition and payment do not occur on or prior to September 30, 2010, the obligations of Centaur and Valley View to make the payments to the Company required by the MOU and development agreement will be reinstated. In the fourth quarter of 2008, the Company recorded a \$3.0 million impairment charge against the amounts the Company has spent in connection with the MOU and the fees the Company has earned under the development agreement. The decision was made following a downgrade in Centaur's credit rating by major rating agencies, which caused the Company to conclude that there is significant uncertainty that it will recover the carrying amounts of the accounts receivable and the original investment associated with this project.

Valley View has obtained a harness racing license for the proposed racetrack and has applied for a license to operate a casino, but has advised the Company of the prospect of the sale or other disposition of its economic interest in the Project.

During the fourth quarter of 2008, the Company determined that there was significant uncertainty about the likelihood that it would continue in its plans to acquire a site in West Chester, Pennsylvania for a future mixed use project. The Company recorded an impairment charge of \$0.9

million related to this project, representing the costs incurred related to this project to date.

For the Years Ended December 31, 2009, 2008 and 2007

During the fourth quarter of 2008, the Company determined that the carrying value of an undeveloped land parcel adjacent to its Viewmont Mall exceeded its fair value based on the Company's estimate of discounted cash flows associated with this parcel. Consequently, the Company recorded an impairment loss of \$0.2 million.

2009 Dispositions

In May 2009, the Company sold an outparcel and related land improvements containing an operating restaurant at Monroe Marketplace in Selinsgrove, Pennsylvania for \$0.9 million. The Company recorded an asset impairment charge of \$0.1 million immediately prior to this transaction. No gain or loss was recorded from this sale.

In June 2009, the Company sold a land parcel adjacent to Woodland Mall in Grand Rapids, Michigan for \$2.7 million. The parcel contained a department store that was subject to a ground lease. The Company recorded a gain of \$0.2 million from this sale.

In June 2009, the Company sold two outparcels and related improvements adjacent to North Hanover Mall in Hanover, Pennsylvania for \$2.0 million. The Company recorded a gain of \$1.4 million from this sale.

In August 2009, the Company sold Crest Plaza in Allentown, Pennsylvania for \$15.8 million. The Company recorded a gain of \$3.4 million from this sale.

In October 2009, the Company sold two outparcels and related improvements adjacent to Monroe Marketplace in Selinsgrove, Pennsylvania for \$2.8 million. No gain or loss was recorded from this sale.

In October 2009, the Company sold a parcel and related land improvements at Pitney Road Plaza in Lancaster, Pennsylvania for \$10.2 million. The parcel contained a home improvement store that was subject to a ground lease. The Company recorded a gain of \$2.7 million from this sale.

In October 2009, the Company sold a controlling interest in Northeast Tower Center in Philadelphia, Pennsylvania for \$30.4 million. The Company recorded a gain of \$6.1 million from this sale. In connection with the sale, the Company repaid the mortgage loan associated with the Northeast Tower Center, with a balance of \$20.0 million at closing.

2007 Dispositions

In March 2007, the Company sold Schuylkill Mall in Frackville, Pennsylvania for \$17.6 million. The Company recorded a gain of \$6.7 million from this sale. In connection with the sale, the Company repaid the mortgage loan associated with Schuylkill Mall, with a balance of \$16.5 million at closing.

In May 2007, the Company sold an outparcel and related land improvements containing an operating restaurant at New River Valley Mall in Christiansburg, Virginia for \$1.6 million. The Company recorded a \$0.6 million gain from this sale.

In May 2007, the Company sold an outparcel and related land improvements at Plaza at Magnolia in Florence, South Carolina for \$11.3 million. The Company recorded a \$1.5 million gain from this sale.

In August 2007, the Company sold undeveloped land adjacent to Wiregrass Commons in Dothan, Alabama for \$2.1 million. The Company recorded a \$0.3 million gain from this sale.

In December 2007, the Company sold undeveloped land in Monroe Township, Pennsylvania for \$0.8 million. There was no gain or loss recorded from this sale.

Discontinued Operations

The Company has presented as discontinued operations the operating results of Crest Plaza, Northeast Tower Center, Schuylkill Mall, South Blanding Village and Festival at Exton.

Total expenses	(2,462)	(3,537)	(4,982)
Operating results from discontinued operations	2,203	2,549	2,073
Gains on sales of discontinued operations	9,503		6,699
Income from discontinued operations	\$ 11,706	\$ 2,549	\$ 8,772

2009 and 2008 Acquisitions

In January 2008, the Company entered into an agreement under which it acquired a 0.1% general partnership interest and a 49.8% limited partnership interest in Bala Cynwyd Associates, L.P. ("BCA"), and an option to purchase the remaining partnership interests in BCA in two closings in the second quarter of 2009 and the second quarter of 2010. BCA is the owner of One Cherry Hill Plaza, an office building located within the boundaries of the Company's Cherry Hill Mall in Cherry Hill, New Jersey. The Company acquired its interests in BCA for \$3.9 million in cash paid at the first closing in February 2008. See note 11 for further discussion. The Company has consolidated BCA for financial reporting purposes. In June 2009, the Company acquired an additional 49.9% ownership interest.

In July 2008, the Company acquired a parcel in Lancaster, Pennsylvania for \$8.0 million plus customary closing costs. This property was developed by the Company and is currently operating as Pitney Road Plaza.

In July 2008, the Company acquired land previously subject to ground lease at Wiregrass Commons in Dothan, Alabama for \$3.2 million.

2007 Acquisitions

In August 2007, the Company purchased a 116 acre land parcel in Monroe Township, Pennsylvania for \$5.5 million. The Company had previously acquired an aggregate of approximately 10 acres on adjacent parcels. This property was developed by the Company and is currently operating as Monroe Marketplace.

In August 2007, the Company purchased Plymouth Commons, an office building adjacent to Plymouth Meeting Mall, for \$9.2 million.

Development Activities

As of December 31, 2009 and 2008, the Company had capitalized \$228.3 million and \$421.2 million, respectively, related to construction and development activities. Of the balance at December 31, 2009, \$2.1 million is included in "Deferred costs and other assets" in the accompanying consolidated balance sheets, \$215.2 million is included in "Construction in progress," \$1.7 million is included in "Investments in partnerships, at equity," and \$9.3 million is included in "Land held for development." The Company had \$0.4 million of deposits on land purchase contracts at December 31, 2009, of which \$0.1 million was nonrefundable.
