EL PASO ELECTRIC COMPANY AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

A. Principles of Preparation

These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto in the Annual Report of El Paso Electric Company on Form 10-K for the year ended December 31, 2009 (the 2009 Form 10-K). Capitalized terms used in this report and not defined herein have the meaning ascribed for such terms in the 2009 Form 10-K. In the opinion of the Company's management, the accompanying consolidated financial statements contain all adjustments necessary to present fairly the financial position of the Company at September 30, 2010 and December 31, 2009; the results of its operations and comprehensive operations for the three, nine and twelve months ended September 30, 2010 and 2009; and its cash flows for the nine months ended September 30, 2010 and 2009. The results of operations and comprehensive operations for the three and nine months ended September 30, 2010 and the cash flows for the nine months ended September 30, 2010 are not necessarily indicative of the results to be expected for the full calendar year.

Pursuant to the rules and regulations of the Securities and Exchange Commission (SEC), certain financial information has been condensed and certain footnote disclosures have been omitted. Such information and disclosures are normally included in financial statements prepared in accordance with generally accepted accounting principles. Certain prior period amounts have been reclassified to conform with the current period presentation.

Use of Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenues. Accounts receivable include accrued unbilled revenues of \$20.6 million and \$18.2 million at September 30, 2010 and December 31, 2009, respectively. The Company presents sales net of sales taxes in its consolidated statements of operations.

Extraordinary Item. As a regulated electric utility, the Company prepares its financial statements in accordance with the FASB guidance for regulated operations. FASB guidance for regulated operations requires us to show certain items as assets or liabilities on our balance sheet when the regulator provides assurance that these items will be charged to and collected from our customers or refunded to our customers. In the final order for Public Utility Commission of Texas (PUCT) Docket No. 37690, the Company was allowed to include the previously expensed loss on reacquired debt associated with the refinancing of first mortgage bonds in 2005 in its calculation of the weighted cost of debt to be recovered from its customers. The Company recorded the impacts of the re-application of FASB guidance for regulated operations to the Company's Texas jurisdiction in 2006 as an extraordinary item. In order to establish this regulatory asset, the Company recorded an extraordinary gain of \$10.3 million, net of income tax expense of \$5.8 million, in its 2010 statement of operations. This item has been recorded as a regulatory asset during the quarter ended September 30, 2010 pursuant to the final order received from the PUCT and will be amortized over the remaining life of the Company's 6% Senior Notes due in 2035.

New Accounting Standards. In December 2009, the FASB issued revised guidance related to financial reporting by enterprises involved with variable interest entities. This guidance became

Table of Contents**EL PASO ELECTRIC COMPANY AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

effective for reporting periods beginning after November 15, 2009. The guidance requires an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. The Company has performed the required analysis and has determined that it does not have any purchase power agreements that qualify as a variable interest entity.

Effective April 1, 2009, the Company adopted FASB guidance which establishes general standards of accounting and disclosure of events that occur after the balance sheet date, but before financial statements are issued. In February 2010, the Company adopted an amendment to FASB guidance removing the requirement for an SEC filer to disclose a date through which subsequent events have been evaluated. This new guidance changed disclosure requirements but does not impact the Company's financial statements.

In January 2010, the FASB issued new guidance to improve disclosure requirements related to fair value measurements and disclosures. The new requirements include (i) disclosure of significant transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfers; and (ii) disclosure in the reconciliation for Level 3 fair value measurements of information about purchases, sales, issuances, and settlements on a gross basis. The new guidance also clarifies existing disclosures and requires (i) an entity to provide fair value measurement disclosures for each class of assets and liabilities and (ii) disclosures about inputs and valuation techniques. The provisions of this new guidance were adopted in the first quarter of 2010 except for the reconciliation for the Level 3 fair value measurements on a gross basis which will be adopted during the first quarter of 2011. During the three and nine months ended September 30, 2010, there were no transfers in or out of Level 1 or Level 2 categories. This guidance requires additional disclosure on fair value measurements, but does not impact the Company's consolidated financial statements. See Note J.

EL PASO ELECTRIC COMPANY AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

B. Regulation

General

The rates and services of the Company are regulated by incorporated municipalities in Texas, the PUCT, the NMPRC, and the FERC. The PUCT and the NMPRC have jurisdiction to review municipal orders, ordinances, and utility agreements regarding rates and services within their respective states and over certain other activities of the Company. The FERC has jurisdiction over the Company's wholesale transactions and compliance with federally-mandated reliability standards. The decisions of the PUCT, NMPRC and the FERC are subject to judicial review.

Texas Regulatory Matters

Texas Freeze Period. The Company entered into agreements (Texas Rate Agreements) with El Paso, PUCT staff and other parties in Texas that provided for most retail base rates to remain at their current level through June 30, 2010. During the rate freeze period, if the Company's return on equity fell below the bottom of a defined range, the Company had the right to initiate a rate case and seek an adjustment to base rates. If the Company's return on equity exceeded the top of the range, the Company would refund an amount equal to 50% of the Texas jurisdictional pretax return in excess of the ceiling. The Company's return on equity fell within the then prevailing range during the last reporting period. Also pursuant to the Texas Rate Agreements, the Company agreed to share with its Texas customers 25% of off-system sales margins increasing to 90% after June 30, 2010.

2009 Texas Retail Rate Case. On December 9, 2009, the Company filed an application with the PUCT for authority to change rates, to reconcile fuel costs, to establish formula-based fuel factors, and to establish an energy efficiency cost-recovery factor. This case was assigned PUCT Docket No. 37690. The filing included a base rate increase which was based upon an adjusted test year ended June 30, 2009.

On July 30, 2010, the PUCT approved a settlement in the 2009 Texas retail rate case in PUCT Docket No. 37690. The settlement calls for an annual non-fuel base rate increase of \$17.15 million effective for usage beginning July 1, 2010. This increase was partially offset by the provision that, consistent with a prior rate agreement, effective July 1, 2010, the Company shares 90% of off-system sales margins with customers and retains 10% of such margins. Previously, the Company retained 75% of off-system sales margins. Interim rates went into effect July 1, 2010 pending final approval by the PUCT. All additions to electric plant in service since June 30, 1993 through June 30, 2009 were deemed to be reasonable and necessary with the exception of one small addition. The Company's new customer information system completed in April 2010 was also included in base rates with a ten-year amortization. The settlement provides for the reconciliation of fuel costs incurred through June 30, 2009 except for the recovery of final Four Corners coal mine reclamation costs. The fuel reconciliation (Docket No. 38361) was bifurcated from the rate case to allow for litigation of the final coal mine reclamation costs. The PUCT also approved the use of a formula-based fuel factor which provides for more timely recovery of fuel costs. The PUCT approved a \$19.7 million or 11% reduction in the Company's fixed fuel factor as the initial rate under the approved fuel factor formula.

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The PUCT also approved an energy efficiency cost-recovery factor that includes the recovery of deferred energy efficiency costs over a three-year period.

Fuel Reconciliation Case (Severed from 2009 Rate Case). Pursuant to the stipulation in Docket No. 37690, the fuel reconciliation component of the rate case was severed and a separate docket, PUCT Docket No. 38361, was established to address one fuel reconciliation issue not settled by the parties. That single issue is a determination of the proper amount of the Four Corners coal mine final reclamation costs that may be recovered from the Company's Texas retail customers. The hearing on the merits of the case was held on August 11, 2010 and briefs have been filed. A final order in this case is expected in the first quarter of 2011. The Company is unable at this time to predict the ultimate outcome of this docket.

Fuel and Purchased Power Costs. The Company's actual fuel costs, including purchased power energy costs, are recoverable from its customers. The PUCT has adopted a fuel cost recovery rule (Texas Fuel Rule) that allows the Company to seek periodic adjustments to its fixed fuel factor. The Company received approval on July 30, 2010 in PUCT Docket No. 37690 (discussed above), to implement a formula to determine its fuel factor. The Company can seek to revise its fixed fuel factor based upon the approved formula at least four months after its last revision except in the month of December. The Texas Fuel Rule requires the Company to request to refund fuel costs in any month when the over-recovery balance exceeds a threshold material amount and it expects fuel costs to continue to be materially over-recovered. The Texas Fuel Rule also permits the Company to seek to surcharge fuel under-recoveries in any month the balance exceeds a threshold material amount and it expects fuel cost recovery to continue to be materially under-recovered. Fuel over and under recoveries are considered material when they exceed 4% of the previous twelve months fuel costs. All such fuel revenue and expense activities are subject to periodic final review by the PUCT in fuel reconciliation proceedings.

On June 5, 2009, the Company filed a petition with the PUCT in PUCT Docket No. 37086 to decrease its fixed fuel factor by 13.1%, or \$27.9 million. On July 30, 2009, the PUCT approved the new factors effective for customer bills rendered beginning in August 2009.

On September 1, 2009, the Company filed a petition in PUCT Docket No. 37433 to refund \$12.0 million in fuel cost over-recoveries, including interest, for the period of July 2008 through July 2009. The Company entered into a stipulation in October 2009 that included the August 2009 over-recovery in the refund for a total refund of \$16.8 million, including interest, and provided for the refund to be paid in November and December 2009. On October 23, 2009, the PUCT issued an order approving the stipulation.

On December 17, 2009, the Company filed a petition with the PUCT in Docket No. 37788 to refund \$11.8 million in fuel cost over-recoveries, including interest, for the period September through November 2009. On January 20, 2010, a stipulation was filed that resolved all of the issues in this proceeding. The stipulation provided for the Company to implement a fuel refund for the net over-recovery of \$11.8 million, including interest, in the month of February 2010. On January 21, 2010, the administrative law judge assigned to the docket issued an order approving the implementation of

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

interim rates to allow the requested refund to be made. The PUCT issued a final order on February 11, 2010 approving the stipulation.

On May 12, 2010, the Company filed a petition with the PUCT which was assigned Docket No. 38253 to refund \$10.5 million in fuel cost over-recoveries, including interest, for the period December 2009 through March 2010. On June 14, 2010, the Company and all other parties filed a stipulation that resolved all of the issues in this case. In the stipulation, the Company and the other parties agreed to increase the refund by \$0.6 million to remove costs for the purchase of renewable energy credits from the Company's fuel cost, and as a result of that adjustment and the associated recalculation of interest, the total refund was \$11.1 million. On June 16, 2010, the Administrative Law Judge assigned to the docket issued an order approving the implementation of interim rates to allow the requested refund to be made in July and August 2010. The PUCT issued a final order on July 15, 2010 approving the stipulation.

On October 20, 2010, the Company filed a petition with the PUCT which was assigned Docket No. 38802 to refund \$12.8 million in fuel cost over-recoveries, including interest, for the period July 2009 through September 2010. In its filing, the Company requested the refund be made to customers in the single billing month of December 2010. This case is pending.

Application for Approval to Revise Energy Efficiency Cost Recovery Factor for 2011. On June 1, 2010, the Company filed with the PUCT an application for approval to revise its energy efficiency cost recovery factor, which was assigned PUCT Docket No. 38226. The Company requested that its revised energy efficiency cost recovery factor (EECRF) become effective beginning with the first billing cycle of its January 2011 billing month. In its application, the Company requests authority to increase its 2011 EECRF by a total of \$6.6 million to recover \$4.2 million in energy efficiency costs projected to be incurred in 2011, a performance bonus of \$0.1 million for the Company's 2009 program performance, and \$2.3 million in annual amortization of the energy efficiency costs that were deferred pursuant to the PUCT's final order in Docket No. 35612. A final order approving the Company's application was issued on October 4, 2010.

Application for a Certificate of Convenience and Necessity for Rio Grande Unit 9. On September 30, 2010, the Company filed a petition seeking a Certificate of Convenience and Necessity to construct an 87 MW natural gas-fired combustion turbine unit at the Company's existing Rio Grande Generating Station in the City of Sunland Park in southeast New Mexico. This case was assigned PUCT Docket No. 38717. An intervention deadline of November 15, 2010 has been established, but a full procedural schedule has not been established at this time.

New Mexico Regulatory Matters

2009 New Mexico Stipulation. On May 29, 2009, the Company filed a general rate case using a test year ended December 31, 2008. The 2009 rate case was docketed as NMPRC Case No. 09-00171-UT. A comprehensive unopposed stipulation (the 2009 New Mexico Stipulation) was reached in this general rate case and filed on October 8, 2009. The 2009 New Mexico Stipulation

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

provided for an increase in New Mexico jurisdictional non-fuel and purchased power base rate revenues of \$5.5 million. The 2009 New Mexico Stipulation provided for the revision of depreciation rates for the Palo Verde nuclear generating plant to reflect a 20-year life extension and a revision of depreciation rates for other plant in service. The 2009 New Mexico Stipulation also provided for the continuation of the Company's Fuel and Purchased Power Cost Adjustment Clause (FPPCAC) without conditions or variance. In addition, it modified the market pricing of capacity and energy provided by Palo Verde Unit 3 using a methodology based upon a previous purchased power contract with Credit Suisse Energy, LLC. On December 10, 2009, the NMPRC issued a final order conditionally approving and clarifying the unopposed stipulation, and the stipulated rates went into effect with January 2010 bills.

Investigation into Recovering County Franchise Fees. On December 10, 2009, the NMPRC issued an order in NMPRC Case No. 09-00421-UT, requiring the Company to show cause why it should collect franchise fees from its customers on behalf of Doña Ana and Otero Counties (the Counties). The Company responded to the order on January 5, 2010. On January 26, 2010, the NMPRC issued a final order concluding that the imposition of franchise fees by New Mexico counties is not authorized under New Mexico law and, therefore, the Company may not pass through to its customers some past and all ongoing franchise fees imposed by the Counties. The order concluded that only home rule municipalities, who had adopted a charter under the state constitution, could impose franchise fees or taxes, provided the residents so voted.

As a result of its findings, the NMPRC directed the Company to immediately cease passing through to its customers any franchise fees paid by the Company to the Counties. The NMPRC also directed the Company to refund to its customers in the Counties the amount of franchise fees charged to those customers since June 1, 2004, plus interest. The order stated that the Company was required to refund these franchise fees to customers over a three-year period through a credit on customer bills and file tariffs for refunding within three days. On January 29, 2010, the NMPRC granted the Company's request to extend its deadline for compliance with the order until February 12, 2010. Interest will continue to accrue on the unamortized balance until fully refunded. The order does not relieve the Company of its obligation to pay franchise fees to the Counties but states that this issue must be addressed by the New Mexico courts.

The Company filed a Notice of Appeal with the New Mexico Supreme Court on January 27, 2010 (the Appeal), seeking to set aside the order on legal and jurisdictional grounds. The Company followed with a motion for Emergency Stay on January 29, 2010, asking the New Mexico Supreme Court to stay the order pending the Appeal. The Company also asked the NMPRC, on February 12, 2010, to delay implementation of its order pending the Appeal. The Counties moved to intervene in the Appeal on February 10, 2010. The Company had placed pending franchise payments to the Counties in separate accounts pending resolution of the proceedings. However, beginning in April 2010 the Company began paying franchise payments to the Counties in accordance with the current franchise agreements. On February 22, 2010, the New Mexico Supreme Court granted the Company's motion for Emergency Stay pending the outcome of the Appeal and granted the Counties' motion to intervene in the Appeal. In February 2010, the New Mexico legislature passed legislation that confirmed the legality of the Company's existing franchise agreements with the Counties. On October 26, 2010, the New Mexico

(Unaudited)

Supreme Court issued its opinion and held that the franchise fee charges fall outside the NMPRC's jurisdiction and vacated and annulled the NMPRC's order.

Investigation into the Service Quality of the Company. On October 22, 2009, NMPRC Staff filed a petition requesting an investigation into the quality of service of the Company's power distribution system in the Santa Teresa Industrial Park, based upon a report prepared for customers in that area by the Los Alamos National Laboratory. On October 27, 2009, the NMPRC decided to initiate an investigation and ordered the Company to respond no later than November 16, 2009. The Company filed an initial response on November 16, 2009 and a supplemental response on January 8, 2010 after obtaining data on which the report was based. The Company responses provided evidence that the reliability and power quality performance for the Company's service territory as a whole and on the Santa Teresa circuits in particular meet all applicable reliability standards and comport with good utility practices. On January 28, 2010, the NMPRC Staff filed a reply stating that it found no factual basis to conclude that the Company had violated NMPRC rules and recommended the NMPRC dismiss this proceeding.

On June 8, 2010, the hearing examiner issued a recommended decision concluding that there is no substantial evidence that would support the allegations in this case regarding the Company's quality of service. The hearing examiner found there is good cause to dismiss the investigation and close the docket without further proceedings. On November 4, 2010, the NMPRC issued a final order approving the recommended decision.

2010 Renewable Procurement Plan Pursuant to the Renewable Energy Act. On July 1, 2010, the Company filed its Application for Approval of its 2010 Renewable Procurement Plan, which was assigned NMPRC Case No. 10-00200-UT. The filing included renewable resources intended to meet the Company's Renewable Portfolio Standard (RPS) requirements in 2011 and future years. The 2010 Renewable Procurement Plan included a number of projects to meet the Company's RPS requirements, including three purchased power agreements for solar energy discussed in Note G below. In addition, the Company requested a variance from the solar diversity requirements in 2011 to be made up in later years from the new purchased power agreements for solar energy. Hearings were held on October 21, 2010. A final order is expected to be issued in December 2010.

Replacement of Revolving Credit Facility and Guarantee of Debt. On June 22, 2010, the Company received final approval from the NMPRC in Case No. 10-00145-UT to refinance the Company's revolving credit facility (RCF) and issue in a private placement up to \$110 million of senior notes by the Rio Grande Resources Trust II (the RGRT), guaranteed by the Company, to finance nuclear fuel. The refinancing of the RCF and the issuance of the senior notes was completed in the third quarter of 2010. See Note E.

Application for Approval to Recover Regulatory Disincentives and Incentives. On August 31, 2010, the Company filed an application for approval of its proposed rate design methodology to recover regulatory disincentives and incentives associated with the Company's energy efficiency and load management programs in New Mexico. A hearing is scheduled for March 15, 2011 and a final order is expected before June 2011.

New Mexico Investigation into Executive Compensation. In December 2007, the NMPRC initiated an investigation into executive compensation of investor-owned gas and electric public utilities. In its order initiating the investigation, Case No. 07-00443-UT, the NMPRC required each utility to provide information on compensation of executive officers and directors for the period 1977-2006. The Company provided the requested information. No further action was taken by the NMPRC and the case was closed on October 5, 2010.

Application for a Certificate of Convenience and Necessity for Rio Grande Unit 9. On September 30, 2010, the Company filed a petition seeking a Certificate of Convenience and Necessity to construct an 87 MW natural gas-fired combustion turbine unit at the Company's existing Rio Grande Generating Station in the City of Sunland Park in southeast New Mexico. This case was assigned NMPRC Case No. 10-00301-UT. The hearing is scheduled to begin April 13, 2011.

Federal Regulatory Matters

Transmission Dispute with Tucson Electric Power Company (TEP). In January 2006, the Company filed a complaint with the FERC to interpret the terms of a Power Exchange and Transmission Agreement (the Transmission Agreement) entered into with TEP in 1982. TEP filed a complaint with the FERC one day later raising virtually identical issues. TEP claimed that, under the Transmission Agreement, it was entitled to up to 400 MW of firm transmission rights on the Company's transmission system that would enable it to transmit power from the Luna Energy Facility (LEF) located near Deming, New Mexico to Springerville or Greenlee in Arizona. The Company asserted that TEP's rights under the Transmission Agreement do not include transmission rights necessary to transmit such power as contemplated by TEP and that TEP must acquire any such rights in the open market from the Company at applicable tariff rates or from other transmission providers. On April 24, 2006, the FERC ruled in the Company's favor, finding that TEP does not have transmission rights under the Transmission Agreement to transmit power from the LEF to Arizona. The ruling was based on written evidence presented and without an evidentiary hearing. TEP's request for a rehearing of the FERC's decision was granted in part and denied in part in an order issued October 4, 2006, and hearings on the disputed issues were held before an administrative law judge. In the initial decision dated September 6, 2007, the administrative law judge found that the Transmission Agreement allows TEP to transmit power from the LEF to Arizona but limits that transmission to 200 MW on any segment of the circuit and to non-firm service on the segment from Luna to Greenlee. The Company and TEP filed exceptions to the initial decision.

On November 13, 2008, the FERC issued an order on the initial decision finding that the transmission rights given to TEP in the Transmission Agreement are firm and are not restricted for transmission of power from Springerville as the receipt point to Greenlee as the delivery point. Therefore, pursuant to the order, TEP can use its transmission rights granted under the Transmission Agreement to transmit power from the LEF to either Springerville or Greenlee so long as it transmits no more than 200 MW over all segments at any one time.

The FERC also ordered that the Company refund to TEP all sums with interest that TEP had paid it for transmission under the applicable transmission service agreements since February 2006 for service relating to the LEF. On December 3, 2008, the Company refunded \$9.7 million to TEP. The Company had established a reserve for the rate refund of approximately \$7.2 million as of

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

September 30, 2008, resulting in a pre-tax charge to earnings of approximately \$2.5 million in 2008. The Company also paid TEP interest on the refunded balance of approximately \$0.9 million, which was also charged to earnings in 2008. The Company filed a request for rehearing of the FERC's decision on December 15, 2008, seeking reversal of the order on the merits and a return of any refunds made in the interim, as well as compensation for all service that the Company may provide to TEP from the LEF over the Company's transmission system on a going forward basis. On July 7, 2010, the FERC denied the Company's request for rehearing. On July 23, 2010, the Company filed a petition for review in the United States Court of Appeals for the District of Columbia Circuit and on August 18, 2010, TEP filed a motion to intervene in the proceeding. The Company cannot predict the outcome of that appeal. If the order is not reversed, the Company will lose the opportunity to receive compensation from TEP for such transmission service in the future.

In an ancillary proceeding, TEP filed a lawsuit in the United States District Court for the District of Arizona in December 2008, seeking reimbursement for amounts TEP paid a third party transmission provider for purchases of transmission capacity between April 2006 and May 2007, allegedly totaling approximately \$1.5 million, plus accrued interest. TEP alleges that the Company was obligated to provide TEP with that transmission capacity without charge under the Transmission Agreement. In September 2009, the Court granted a stay in this suit pending a resolution of the underlying FERC proceeding and any appeal thereof. The Company cannot predict the outcome of this matter.

Replacement of Revolving Credit Facility and Guarantee of Debt. On June 29, 2010, the Company received approval from the FERC in Docket No. ES10-43-000 to refinance the Company's RCF and issue in a private placement up to \$110 million of senior notes by the RGRT, guaranteed by the Company, to finance nuclear fuel. The refinancing of the RCF and the issuance of the senior notes was completed in the third quarter of 2010. See Note E.

C. Palo Verde

Spent Nuclear Fuel and Waste Disposal

Pursuant to the Nuclear Waste Policy Act of 1982, as amended in 1987 (the Waste Act), the DOE is legally obligated to accept and dispose of all spent nuclear fuel and other high-level radioactive waste generated by all domestic power reactors. In accordance with the Waste Act, the DOE entered into a spent nuclear fuel contract with the Company and all other Palo Verde Participants. The DOE has previously reported that its spent nuclear fuel disposal facilities would not be in operation in the near future. In November 1997, the United States Court of Appeals for the District of Columbia Circuit issued a decision preventing the DOE from excusing its own delay but refused to order the DOE to begin accepting spent nuclear fuel. The Company cannot predict when spent fuel shipments to the DOE will commence.

The Company expects to incur significant costs for on-site spent fuel storage during the life of Palo Verde that the Company believes are the responsibility of the DOE. These costs are assigned to fuel requiring the additional on-site storage and amortized as that fuel is burned until an agreement is reached with the DOE for recovery of these costs. In December 2003, APS, in conjunction with other

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

nuclear plant operators, filed suit against the DOE on behalf of the Palo Verde Participants to recover monetary damages associated with the delay in the DOE's acceptance of spent fuel. APS pursued a damages claim for costs incurred through December 2006 in a trial that began on January 28, 2009. On June 18, 2010, the court awarded APS and the other Palo Verde Participants approximately \$30 million. In October 2010, the Company received \$4.8 million, representing its share of the award and anticipates that the majority of the award will be refunded to customers through the applicable fuel adjustment clauses.

D. Common Stock

Common Stock Repurchase Program

Since 1999, the Company has repurchased approximately 22.5 million shares of common stock at an aggregate cost of \$333.6 million, including commissions. As of December 31, 2009, 200,982 shares remained available for repurchase under its authorized program. On February 19, 2010, the Board of Directors authorized the repurchase of up to 2 million additional shares of the Company's outstanding common stock (2010 Authorization). During the first nine months of 2010, the Company repurchased 1,391,049 shares of common stock in the open market at an aggregate cost of \$30.2 million under both the previously authorized program and under the 2010 Authorization. During the third quarter of 2010, the Company repurchased 888,557 shares of common stock in the open market at an aggregate cost of \$20.2 million. As of September 30, 2010, 809,933 shares remain available for repurchase under the 2010 Authorization. The Company may make purchases of its stock in the future pursuant to its stock repurchase plan at open market prices and may engage in private transactions, where appropriate. The repurchased shares will be available for issuance under employee benefit and stock incentive plans, or may be retired.

Basic and Diluted Earnings Per Share

The basic and diluted earnings per share are presented below:

	Three Months Ended September 30,	
	2010	2009
Weighted average number of common shares outstanding:		
Basic number of common shares outstanding	42,921,044	44,588,257
Dilutive effect of unvested performance awards	117,796	0
Dilutive effect of stock options	64,858	49,230
Diluted number of common shares outstanding	43,103,698	44,637,487
Basic net income per common share:		
Net income	\$ 60,182	\$ 33,932
Income allocated to participating restricted stock	(260)	(122)
Net income available to common shareholders	\$ 59,922	\$ 33,810
Diluted net income per common share:		
Net income	\$ 60,182	\$ 33,932
Income reallocated to participating restricted stock	(259)	(122)
Net income available to common shareholders	\$ 59,923	\$ 33,810
Basic net income per common share	\$ 1.40	\$ 0.76
Diluted net income per common share	\$ 1.39	\$ 0.76

The calculation of the weighted average number of common shares and dilutive potential shares outstanding for the three months ended September 30, 2010 and 2009, excludes 77,959 and 73,378 shares, respectively, of restricted stock awards because their effect was antidilutive.

No performance shares were excluded from the computation of diluted earnings per share for the three months ended September 30, 2010. Performance shares of 197,900 were excluded from the computation of diluted earnings per share for the three months ended September 30, 2009, as no payouts would be required based upon performance at the end of that period. These amounts assume a 100% performance level payout.

No stock options were excluded from the computation of diluted earnings per share in the third quarter of 2010 and 2009.

Basic net income per common share	\$ 2.31	\$ 1.56
Diluted net income per common share	\$ 2.31	\$ 1.55

The calculation of the weighted average number of common shares and dilutive potential shares outstanding for the twelve months ended September 30, 2010 and 2009, excludes 72,798 and 62,899 shares, respectively, of restricted stock awards because their effect was antidilutive.

Performance shares of 24,225 and 187,529 were excluded from the computation of diluted earnings per share for the twelve months ended September 30, 2010 and 2009, respectively, as no payouts would be required based upon performance at the end of each corresponding period. These amounts assume a 100% performance level payout.

No stock options were excluded from the computation of diluted earnings per share for the twelve months ended September 30, 2010. Options for 53,610 shares were excluded from the computation of diluted earnings per share for the twelve months ended September 30, 2009 as the exercise price was greater than the average stock price for that period.

E. Long-Term Debt and Financing Obligations

\$110 Million Senior Notes. On August 17, 2010, the Company entered into a Note Purchase Agreement (the Agreement) with RGRT, a Texas grantor trust through which the Company finances its portion of fuel for the Palo Verde Nuclear Generating Station, and various institutional purchasers. Under the terms of the Agreement, RGRT sold to the purchasers \$110 million aggregate principal amount of senior notes consisting of (a) \$15 million aggregate principal amount of 3.67% Senior Notes, Series A, due August 15, 2015, (b) \$50 million aggregate principal amount of 4.47% Senior Notes, Series B, due August 15, 2017, and (c) \$45 million aggregate principal amount of 5.04% Senior Notes, Series C, due August 15, 2020 (collectively, the Notes). The Company guarantees the payment of principal and interest on the Notes. RGRT's assets,

liabilities and operations are consolidated in the

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Company's financial statements and the Notes are included as long-term debt on the consolidated balance sheet.

RGRT will pay interest on the Notes on February 15 and August 15 of each year until maturity, beginning on February 15, 2011. RGRT may redeem the Notes, in whole or in part, at any time at a redemption price equal to 100% of the principal amount to be redeemed together with the interest on such principal amount accrued to the date of redemption, plus a make-whole amount based on the prevailing market interest rates.

The sale of the Notes was made by RGRT in reliance on a private placement exemption from registration under the Securities Act of 1933, as amended.

The proceeds of \$109.4 million, net of issuance costs, from the sale of the Notes was used by RGRT to repay amounts borrowed under the revolving credit facility and will enable future nuclear fuel financing requirements of RGRT to be met with a combination of the Notes and amounts borrowed from the revolving credit facility.

Revolving Credit Facility. On September 23, 2010, the Company and the Bank of New York Mellon Trust Company, N.A., as trustee of the RGRT entered into a credit agreement (the "RCF") with JP Morgan Chase Bank, N.A., as administrative agent and issuing bank, and Union Bank, N.A., as syndication agent, and various lending banks party thereto. Under the terms of the RCF, the Company has available \$200 million of credit for a term of four years. The Company may request that the RCF be increased up to a total of \$300 million during the term of the RCF.

The RCF provides that amounts borrowed by the Company may be used for, among other things, working capital and general corporate purposes. Any amounts borrowed by RGRT may be used, among other things, to finance the acquisition and processing of nuclear fuel. Amounts borrowed by RGRT are guaranteed by the Company and the balance borrowed under the RCF is recorded as a financing obligation on the consolidated balance sheet. The RCF is unsecured. The RCF requires compliance with certain covenants, including a total debt to capitalization ratio.

The RCF replaced a \$200 million credit facility that was due to expire on April 11, 2011, and that was terminated concurrently with entering into the RCF.

F. Income Taxes

The Company files income tax returns in the U.S. federal jurisdiction and in the states of Texas, New Mexico and Arizona. The Company is no longer subject to tax examination by federal taxing authorities for years prior to 2007 and in the state jurisdictions for years prior to 1998. A deficiency notice relating to the Company's 1998 through 2003 income tax returns in Arizona contests a pollution control credit, a research and development credit, and the sales and property apportionment factors. The Company is contesting these adjustments.

On March 23, 2010, the Patient Protection and Affordable Care Act ("PPACA") was signed into law. A major provision of the law is that, beginning in 2013, the income tax deductions for the cost of providing certain prescription drug coverage will be reduced by the amount of the Medicare Part D

Table of Contents**EL PASO ELECTRIC COMPANY AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

subsidies received. The Company was required to recognize the impacts of the tax law change at the time of enactment and recorded a one-time non-cash charge to income tax expense of approximately \$4.8 million in the first quarter of 2010.

For the three months ended September 30, 2010 and 2009, the Company's consolidated effective tax rate on income before extraordinary item was 35.3% and 34.1%, respectively. For the nine months ended September 30, 2010 and 2009, the Company's consolidated effective tax rate on income before extraordinary item was 38.0% and 34.8%, respectively. For the twelve months ended September 30, 2010 and 2009 the Company's consolidated effective tax rate on income before extraordinary item was 36.6% and 32.9%, respectively. For the nine and twelve months ended September 30, 2010, the Company's effective tax rates differ from the federal statutory tax rate of 35% primarily due to the enactment of the PPACA discussed above. The Company's consolidated effective tax rate without the effect of the enactment of the PPACA for the nine and twelve months ended September 30, 2010, was 34.6% and 33.5%, respectively. The Company's 2010 effective tax rates without the effect of the enactment of the PPACA and 2009 effective tax rates differ from the federal statutory tax rate of 35% primarily due to state income taxes, the allowance for equity funds used during construction, the tax rate on income or losses on investments in the Company's qualified decommissioning trust fund, and various permanent tax differences. The Company recorded an extraordinary gain of \$10.3 million, net of income tax expense of \$5.8 million, in the third quarter of 2010 related to Texas regulatory assets.

FASB guidance prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. In January 2010, the Company filed for a change of accounting method with the IRS related to the way in which units of property are determined for purposes of determining capitalized tax assets. The change was included in the 2009 federal income tax return. The Company recorded an additional unrecognized tax position of \$6.3 million related to the change in accounting method in the third quarter of 2010. An additional unrecognized tax position may be recognized after the IRS audits the 2009 tax return. A reconciliation of the September 30, 2010 and 2009 amount of unrecognized tax benefits is as follows (in millions):

	2010	2009
Balance at January 1	\$ 0.6	\$ 0.5
Additions/(reductions) based on tax positions related to the current year	6.3	0.0
Additions for tax positions of prior years	0.4	0.0
Balance at September 30, 2010 and 2009, respectively	\$ 7.3	\$ 0.5

If recognized, \$1.0 million of the unrecognized tax position at September 30, 2010, would affect the effective tax rate. Because of the impact of deferred tax accounting, the disallowance of the unrecognized tax position related to the change in accounting method discussed above does not change the amount of tax expense other than associated interest and penalties. The Company recognized income tax expense for an unrecognized tax position of \$0.4 million for the nine months ended September 30, 2010.

Table of Contents**EL PASO ELECTRIC COMPANY AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****G. Commitments, Contingencies and Uncertainties**

For a full discussion of commitments and contingencies, see Note J of Notes to Consolidated Financial Statements in the 2009 Form 10-K. In addition, see Note B and C above and Notes B and D of Notes to Consolidated Financial Statements in the 2009 Form 10-K regarding matters related to wholesale power sales contracts and transmission contracts subject to regulation and Palo Verde, including decommissioning, spent fuel storage, disposal of low-level radioactive waste, reactor vessel heads and liability and insurance matters.

Power Purchase and Sale Contracts

In addition to the contracts disclosed in the related table of the Company's 2009 Form 10-K, the Company has entered into several agreements with various counterparties for forward firm purchases of electricity:

Type of Contract	Quantity	Term
Power Purchase Agreement	20 MW	20 years after operational start date (1)
Power Purchase Agreement	Up to 40 MW	2010
Power Purchase Agreement	Up to 40 MW	2011 through September 2014
Power Purchase Agreement	Up to 5 MW	25 years after operational start date (2)

- (1) This contract is a power purchase agreement for the full capacity of a 20 MW solar photovoltaic plant to be built in southern New Mexico. The plant is scheduled for commercial operation by December 31, 2011.
- (2) This contract is a power purchase agreement for the full capacity of a 5 MW solar photovoltaic plant to be built in southern New Mexico. The plant is scheduled for commercial operation by June 30, 2011.

The Company entered into a 20-year contract (the "Contract") with New Mexico SunTower, LLC ("NM SunTower") in 2008 for the purchase of the output of a 92-MW concentrated solar plant which was expected to begin commercial operation in 2011. NM SunTower is an affiliate of NRG Energy, Inc. NM SunTower failed to meet its financial commitment milestone, and, on May 3, 2010, the Company delivered to NM SunTower a notice of default as provided under the terms of the Contract. The Company presented testimony to the NMPRC at a hearing June 8, 2010, seeking approval for NM SunTower's request to revise the Contract to (i) change the technology from concentrated solar to photovoltaic, (ii) downsize the solar project from 92 MW to 20 MW, and (iii) delay the date for commercial operation to December 31, 2011, at the earliest. The Company also requested deferral of its 2011 solar diversity requirements to the 2012-2015 period and approval to meet its 2011 RPS with purchases of renewable energy credits ("RECs") from a third party. On June 24, 2010, the NMPRC approved changes to the Contract with NM SunTower and requested that

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

the Company submit the other items requested in its annual Renewable Energy Procurement Plan (Plan) filing.

On July 1, 2010, the Company made its annual Plan filing requesting approval for a 20-year purchase power agreement for two additional solar photovoltaic projects totaling 24 MW, consisting of two 12 MW projects located in southern New Mexico expected to be operational by December 31, 2011. The Company also requested approval for a 20-year purchase power agreement for a 5 MW photovoltaic project also located in southern New Mexico expected to be operational by June 30, 2011. In addition, approval for the purchase of RECs to meet the Company's RPS requirements for the 2011 to 2015 period was requested. The Company expects NMPRC approval of its Plan by December 2010. See Note B.

Environmental Matters

Environmental Regulation. The Company is subject to regulation with respect to air, soil and water quality, solid waste disposal and other environmental matters by federal, state, tribal and local authorities. Those authorities govern current facility operations and have continuing jurisdiction over facility modifications. Failure to comply with these environmental regulatory requirements can result in actions by regulatory agencies or other authorities that might seek to impose on the Company administrative, civil and/or criminal penalties. In addition, unauthorized releases of pollutants or contaminants into the environment can result in costly cleanup obligations that are subject to enforcement by regulatory agencies. These laws and regulations are subject to change and, as a result of those changes, the Company may face additional capital and operating costs to comply.

Another way in which environmental matters may impact the Company's operations and business is the implementation of the U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule (CAIR) which, as applied to the Company, may result in a requirement that it substantially reduce emissions of nitrogen oxides from its power plants in Texas and/or purchase allowances representing other parties' emissions reductions starting in 2009. These requirements become more stringent in 2015, and are anticipated to require even further emissions reductions or additional allowance purchases. On July 11, 2008, the U.S. Court of Appeals for the District of Columbia vacated CAIR in its entirety. On December 23, 2008 the DC Circuit Panel granted rehearing and instead remanded CAIR without vacating the original regulation. As a result, the Company must comply with CAIR as written until the EPA rewrites the CAIR as required by the Court's final opinion. The Company's 2009 report to comply with CAIR was filed timely, and all required allowances were purchased by the due date of March 1, 2010.

The EPA recently proposed a new rule, known as the Clean Air Transport Rule (the Transport Rule) which is intended by EPA to replace CAIR and which seeks to further reduce power plant emissions transported downwind as sulfur dioxide (SO₂) and oxides of nitrogen (NO_x) or, after transformation in the atmosphere, as fine particles or ozone. The proposed Transport Rule sets forth emission reduction requirements for electric generating units (EGUs). The proposed rule was published in the Federal Register on August 2, 2010, and the final rule is expected in late spring 2011. The EPA expects the rule to become effective within one year after the rule is finalized.

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Under the proposed Transport Rule, emissions of SO₂ and NO_x from EGUs with capacity greater than 25 MW in affected states would be directly regulated. The Transport Rule would set a pollution limit for each of the 31 affected states in the United States and the District of Columbia that significantly contribute to non-attainment or interfere with maintenance areas from downwind states. The state of Texas is included as one of the NO_x affected states during the ozone season of May to September. New Mexico is not affected by this proposed rule. The proposed Transport Rule would also allow limited interstate trading among power plants to address reliability issues if states can make assurances that they will meet pollution reduction requirements. Unlike other trading programs, the proposed Transport Rule limits total emissions from all affected sources in each individual state. Based on the current proposal, the Texas NO_x ozone trading budget will be 75,574 tons with 2,267 tons for a new unit set aside budget. It is unknown at this time how many allowances each of the Company's units located in Texas will be allocated and thus the cost to the Company to comply with the proposed rule.

Additional regulations governing the emission of greenhouse gases, such as carbon dioxide, could also impact the Company. The U.S. Congress is considering new legislation to restrict or regulate greenhouse gas emissions. The American Clean Energy and Security Act of 2009, which was passed by the U.S. House of Representatives in 2009, could, if enacted by the full Congress, require greenhouse gas emissions reductions by covered sources of as much as 17% from 2005 levels by 2020 and by as much as 83% by 2050. The State of New Mexico, where the Company operates one facility and has an interest in another facility, has joined with California and several other states in the Western Climate Initiative and is pursuing initiatives to reduce greenhouse gas emissions in the state.

Also, as a result of the U.S. Supreme Court's decision on April 2, 2007 in *Massachusetts, et al. v. EPA*, on December 15, 2009, the EPA officially published its finalized determination that emissions of carbon dioxide, methane and other greenhouse gases present an endangerment to human health and welfare because emissions of such gases are, according to the EPA, contributing to warming of the earth's atmosphere and other climatic changes. Following that determination, the EPA has said it will finalize regulations under its existing Clean Air Act (CAA) authority governing greenhouse gas emissions, including regulating emissions from large stationary sources, such as the fossil fuel-fired power plants operated by the Company, even if Congress does not adopt new legislation specifically addressing emissions of greenhouse gases. In addition, in September 2009, the EPA adopted a new rule requiring approximately 10,000 facilities comprising a substantial percentage of annual U.S. greenhouse gas emissions to inventory their emissions starting in 2010 and to report those emissions to the EPA beginning in 2011. The Company's fossil fuel-fired power generating assets are subject to this rule and the Company is complying with this requirement.

The Company will continue to monitor laws and regulations seeking to limit greenhouse gas emissions. Such laws and regulations have not imposed specific requirements on the Company to date and, as a result, no accrual has been made for potential compliance costs. While the Company strives to prepare for and implement actions necessary to comply with changing environmental regulations, substantial expenditures may be required for the Company to comply with such regulations in the future and, in some instances, those expenditures may be material.

Table of Contents**EL PASO ELECTRIC COMPANY AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

Ongoing Regulatory Compliance. The Company analyzes the costs of its current obligations arising from environmental matters on an ongoing basis and believes it has made adequate provision in its financial statements to meet the obligations which can be meaningfully quantified. As a result of this analysis, the Company has a provision for environmental remediation obligations of approximately \$1.2 million as of September 30, 2010, related to compliance with federal and state environmental standards. However, unforeseen expenses associated with environmental compliance or remediation may occur and could have a material adverse effect on the future operations and financial condition of the Company.

The Company incurred the following expenditures during the three, nine and twelve months ended September 30, 2010 and 2009 to comply with federal environmental statutes (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,		Twelve Months Ended September 30,	
	2010	2009	2010	2009	2010	2009
Clean Air Act (1)	\$ 88	\$ 70	\$ 376	\$ 663	\$ 523	\$ 931
Clean Water Act (2)	51	315	154	446	305	693

- (1) Includes a \$0.3 million reserve related to excess emissions at the Rio Grande generating station for the nine and twelve months ended September 30, 2009.
- (2) Includes a \$0.2 million reserve for remediation costs for the Gila River Boundary Site for the twelve months ended September 30, 2009. Excludes a \$0.6 million adjustment reducing estimated remediation costs for a property previously owned by the Company for the nine and twelve months ended September 30, 2009. The twelve months ended September 30, 2009 includes a \$0.3 million reserve for remediation costs related to an oil discharge at the Rio Grande generating station discussed below.

Along with many other companies, the Company received from the Texas Commission on Environmental Quality (TCEQ) a request for information in 2003 in connection with environmental conditions at a facility in San Angelo, Texas that was operated by the San Angelo Electric Service Company (SESCO). In November 2005, TCEQ proposed the SESCO site for listing on the registry of Texas state superfund sites and mailed notice to more than five hundred entities, including the Company, indicating that TCEQ considers each of them to be a potentially responsible party at the SESCO site. In October 2010, the Company reached a settlement with the SESCO working group to resolve this matter. The Company previously accrued \$0.3 million for potential costs related to this site, and the settlement does not result in a material additional charge to earnings.

The EPA has investigated releases or potential releases of hazardous substances, pollutants or contaminants at the Gila River Boundary Site, on the Gila River Indian Community (GRIC) reservation in Arizona and designated it as a Superfund Site. The Company currently owns 16.29% of the site and will share in the cost of cleanup of this site. The Company has a tentative agreement with the former property owner and the EPA to settle this matter for less than \$0.1 million, and the Company has accrued \$0.2 million for potential costs related to this matter.

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

In 2006, the Company experienced an oil discharge at the Rio Grande Power Station. The Company remediated the site by removing the contaminated soil and installing monitoring wells to monitor for the presence of hydrocarbons in the ground water. A monitoring well showed signs of contamination at levels exceeding New Mexico ground water standards. The Company notified the New Mexico Environmental Department (NMED) of its findings and submitted an abatement plan to the NMED addressing the soil and ground water impacts. The abatement plan was approved by the NMED, and the Company further assessed and remediated the site in accordance with the plan in 2010. The Company has incurred \$0.3 million in costs related to this matter. Four of the five oil tanks at the Rio Grande Power Station have recently been dismantled and removed. The Company does not expect any significant additional costs to be incurred related to the 2006 discharge.

In May 2007, the EPA finalized a new federal implementation plan which addresses emissions at the Four Corners Station in northwestern New Mexico of which the Company owns a 7% interest in Units 4 and 5. APS, the Four Corners operating agent, has filed suit against the EPA relating to this new federal implementation plan in order to resolve issues involving operating flexibility for emission opacity standards. The Company cannot predict the outcome of the suit filed against the EPA or whether compliance with the new requirements could have an adverse effect on its capital and operating costs.

On April 6, 2009, APS received a request from the EPA under Section 114 of the CAA seeking detailed information regarding projects and operations at Four Corners. APS has responded to this request. The Company is unable to predict the timing or content of EPA's response or any resulting actions.

On February 16, 2010, a group of environmental organizations filed a petition with the United States Departments of Interior and Agriculture requesting that the agencies certify to the EPA that emissions from Four Corners are causing reasonably attributable visibility impairment under the CAA. APS is currently reviewing the petition and has indicated that it will likely file a response in opposition to the petition. The Company cannot predict the outcome of the petition or whether any resulting actions could have an adverse effect on its capital or operating costs.

Except as described herein, the Company is not aware of any other active investigation of its compliance with environmental requirements by the EPA, the TCEQ or the NMED which is expected to result in any material liability. Furthermore, except as described herein, the Company is not aware of any unresolved, potentially material liability it would face pursuant to the Comprehensive Environmental Response, Comprehensive Liability Act of 1980, also known as the Superfund law.

Union Matters

The Company has approximately 1,000 employees, about 40% of whom are covered by a collective bargaining agreement. The International Brotherhood of Electrical Workers Local 960 (Local 960) represents the Company's employees working primarily in the power plants, substations, line crews, meter reading and collection, facilities services, and customer service. The Company entered into a new collective bargaining agreement effective September 3, 2010, with Local 960 for a three-year term ending September 2, 2013.

EL PASO ELECTRIC COMPANY AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

H. Litigation

The Company is a party to various legal actions. In many of these matters, the Company has excess casualty liability insurance that covers the various claims, actions and complaints. Based upon a review of these claims and applicable insurance coverage, to the extent that the Company has been able to reach a conclusion as to its ultimate liability, it believes that none of these claims will have a material adverse effect on the financial position, results of operations or cash flows of the Company.

See Note B for discussion of the effects of government legislation and regulation on the Company.

I. Employee Benefits**Retirement Plans**

The net periodic benefit cost recognized for the three, nine and twelve months ended September 30, 2010 and 2009 is made up of the components listed below as determined using the projected unit credit actuarial cost method (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,		Twelve Months Ended September 30,	
	2010	2009	2010	2009	2010	2009
Components of net periodic benefit cost:						
Service cost	\$ 1,516	\$ 1,383	\$ 4,548	\$ 4,150	\$ 5,932	\$ 5,418
Interest cost	3,407	3,295	10,222	9,887	13,518	13,037
Expected return on plan assets	(3,467)	(3,860)	(10,400)	(11,580)	(14,259)	(15,107)
Amortization of:						
Net loss	887	407	2,661	1,219	3,067	1,512
Prior service cost	29	29	87	87	115	115
Net periodic benefit cost	\$ 2,372	\$ 1,254	\$ 7,118	\$ 3,763	\$ 8,373	\$ 4,975

During the nine months ended September 30, 2010, the Company contributed \$6.6 million of its projected \$8.4 million 2010 annual contribution to its retirement plans.

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Other Postretirement Benefits

The net periodic benefit cost recognized for the three, nine and twelve months ended September 30, 2010 and 2009 is made up of the components listed below (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,		Twelve Months Ended September 30,	
	2010	2009	2010	2009	2010	2009
Components of net periodic benefit cost:						
Service cost	\$ 889	\$ 849	\$ 2,668	\$ 2,547	\$ 3,516	\$ 3,337
Interest cost	1,666	1,623	4,998	4,869	6,621	6,419
Expected return on plan assets	(382)	(375)	(1,147)	(1,125)	(1,521)	(1,588)
Amortization of:						
Prior service benefit	(717)	(717)	(2,152)	(2,152)	(2,869)	(2,869)
Net gain	(44)	0	(131)	0	(131)	(332)
Net periodic benefit cost	\$ 1,412	\$ 1,380	\$ 4,236	\$ 4,139	\$ 5,616	\$ 4,967

During the nine months ended September 30, 2010, the Company contributed \$3.7 million of its projected \$4.6 million 2010 annual contribution to its postretirement benefit plan.

In March 2010, the President signed into law comprehensive health care reform legislation under the Patient Protection and Affordable Care Act and the Health Care Education and Affordability Reconciliation Act (the Acts). The Acts contain provisions which could impact the Company's accounting for retiree medical benefits in future periods. However, the extent of any additional impact cannot be completely determined until regulations are promulgated under the Acts and those regulations become available. The Company will continue to assess the accounting implications of the Acts as related regulations and interpretations of the Acts become available. Based on the analysis to date of the provisions in the Acts, the impact of which are reasonably determinable, a re-measurement of the Company's retiree plan liabilities is not required at this time.

J. Financial Instruments and Investments

FASB guidance requires the Company to disclose estimated fair values for its financial instruments. The Company has determined that cash and temporary investments, investment in debt securities, accounts receivable, decommissioning trust funds, long-term debt and financing obligations, accounts payable and customer deposits meet the definition of financial instruments. The carrying amounts of cash and temporary investments, accounts receivable, accounts payable and customer deposits approximate fair value because of the short maturity of these items. Investments in debt securities and decommissioning trust funds are carried at fair value.

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The fair values of the Company's long-term debt and financing obligations, including the current portion thereof, are based on estimated market prices for similar issues and are presented below (in thousands):

	September 30, 2010 Estimated		December 31, 2009 Estimated	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Pollution Control Bonds	\$ 193,135	\$ 205,772	\$ 193,135	\$ 197,680
Senior Notes	546,598	619,090	546,562	545,475
Nuclear Fuel Financing (1):				
Private Placement Senior Notes	110,000	114,106	0	0
RCF	14,100	14,100	106,998	106,998
Total	\$ 863,833	\$ 953,068	\$ 846,695	\$ 850,153

- (1) Nuclear fuel financing as of September 30, 2010 is funded through the \$110 million private placement senior notes and the RCF. See Note E. The interest rate on the Company's financing through the RCF is reset every quarter to reflect current market rates. Consequently, the carrying value approximates fair value.

Marketable Securities. The Company's marketable securities, included in decommissioning trust funds in the balance sheets, are reported at fair value which was \$147.2 million and \$135.4 million at September 30, 2010 and December 31, 2009, respectively. These securities are classified as available for sale under FASB guidance for certain investments in debt and equity securities and are valued using prices and other relevant information generated by market transactions involving identical or comparable securities. The reported fair values include gross unrealized losses on marketable securities whose impairment the Company has deemed to be temporary. The tables below present the gross unrealized losses and the fair value of these securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position (in thousands):

Description of Securities (1):	Less than 12 Months		September 30, 2010 12 Months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Federal Agency Mortgage Backed Securities	\$ 0	\$ 0	\$ 447	\$ (22)	\$ 447	\$ (22)
Municipal Obligations	4,745	(95)	2,014	(41)	6,759	(136)

Total temporarily impaired securities	\$ 33,339	\$ (1,181)	\$ 9,679	\$ (874)	\$ 43,018	\$ (2,055)

(1) Includes approximately 106 securities.

The Company monitors the length of time a security trades below its cost basis along with the amount and percentage of the unrealized loss in determining if a decline in fair value of marketable securities below original cost is considered to be other than temporary. In addition, the Company will research the future prospects of individual securities as necessary. As a result of these factors, as well as the Company's intent and ability to hold these securities until their market price recovers, these securities are considered temporarily impaired. The Company will not have a requirement to expend monies held in trust before 2024 or a later period when the Company begins to decommission Palo Verde.

The reported fair values also include gross unrealized gains on marketable securities which have not been recognized in the Company's net income. The table below presents the unrecognized gross unrealized gains and the fair value of these securities, aggregated by investment category (in thousands):

Description of Securities:	September 30, 2010		December 31, 2009	
	Fair Value	Unrealized Gains	Fair Value	Unrealized Gains
Federal Agency Mortgage Backed Securities	\$ 22,444	\$ 1,086	\$ 13,050	\$ 567

Table of Contents**EL PASO ELECTRIC COMPANY AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

The Company's marketable securities include investments in municipal, corporate and federal debt obligations. The contractual year for maturity of these available-for-sale securities as of September 30, 2010 is as follows (in thousands):

	Total	2010 through 2011	2012 through 2015	2016 through 2020	2021 and Beyond
Municipal Debt Obligations	\$ 30,583	\$ 3,036	\$ 11,587	\$ 11,640	\$ 4,320
Corporate Debt Obligations	8,930	0	3,996	2,979	1,955
Federal Agency Mortgage Backed Securities	22,891	447	1,796	1,637	19,011
U.S. Government Bonds	19,446	2,114	7,820	5,866	3,646

The Company recognizes impairment losses on certain of its securities deemed to be other than temporary. In accordance with FASB guidance, these impairment losses are recognized in net income, and a lower cost basis is established for these securities. The Company did not recognize any impairment losses for the three months ended September 30, 2010. For the nine and twelve months ended September 30, 2010, \$0.3 million and \$0.4 million of gross impairments deemed to be other than temporary were recognized in the consolidated statement of operations. For the three, nine and twelve months ended September 30, 2009, \$0.3 million, \$5.4 million and \$9.7 million of gross impairments were deemed to be other than temporary and recognized in the consolidated statement of operations.

The Company's marketable securities in its decommissioning trust funds are sold from time to time, and the Company uses the specific identification basis to determine the amount to reclassify out of accumulated other comprehensive income and into net income. The proceeds from the sale of these securities and the related effects on pre-tax income are as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,		Twelve Months Ended September 30,	
	2010	2009	2010	2009	2010	2009
Proceeds from sales of available-for-sale securities	\$ 12,731	\$ 31,259	\$ 46,936	\$ 52,071	\$ 74,799	\$ 77,818
Gross realized gains included in pre-tax income	\$ 95	\$ 625	\$ 621	\$ 1,090	\$ 3,981	\$ 5,535
Gross realized losses included in pre-tax income	(288)	(122)	(960)	(707)	(1,327)	(800)
Gross unrealized losses included in pre-tax income	0	(298)	(263)	(5,449)	(408)	(9,676)
Net gains (losses) in pre-tax income	\$ (193)	\$ 205	\$ (602)	\$ (5,066)	\$ 2,246	\$ (4,941)
Net unrealized holding gains (losses) included in other comprehensive income	\$ 7,019	\$ 8,880	\$ 3,041	\$ 11,238	\$ 4,619	\$ (526)
Net gains (losses) reclassified out of other comprehensive income	193	(205)	602	5,066	(2,246)	4,941
Net gains (losses) in other comprehensive income	\$ 7,212	\$ 8,675	\$ 3,643	\$ 16,304	\$ 2,373	\$ 4,415

Fair Value Measurements. FASB guidance requires the Company to provide expanded quantitative disclosures for financial assets and liabilities recorded on the balance sheet at fair value. Financial assets carried at fair value include the Company's decommissioning trust investments and investments in debt securities. The Company has no liabilities that are measured at fair value on a recurring basis. The FASB guidance establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels as follows:

Level 1 Observable inputs that reflect quoted market prices for identical assets and liabilities in active markets. Financial assets utilizing Level 1 inputs include the nuclear decommissioning trust investments in active exchange-traded equity securities and U.S. treasury securities that are in a highly liquid and active market.

Level 2 Inputs other than quoted market prices included in Level 1 that are observable for the asset or liability either directly or indirectly. Financial assets utilizing Level 2 inputs include the nuclear decommissioning trust investments in fixed income securities other than U.S. Treasury securities. The fair value of these financial instruments is based on evaluated prices that reflect observable market information, such as actual trade information of similar securities, adjusted for observable differences.

Level 3 Unobservable inputs using data that is not corroborated by market data and primarily based on internal Company analysis using models and various other analyses. Financial assets utilizing Level 3 inputs include the Company's investments in debt securities.

As of September 30, 2010, the Company had \$4.0 million invested in debt securities which consisted of two \$2.0 million investments in auction rate securities maturing in 2042 and 2044. The Company classifies these securities as trading securities which are included in deferred charges and other assets on the Company's consolidated balance sheets. These auction rate securities are collateralized with student loans which are re-insured by the Department of Education as part of the Federal Family Education Loan Program (FFELP) and have credit ratings of A by Standard & Poors and A2 by Moody's. The principal on the securities can be realized at maturity, sold in a successful auction, or sold in the secondary market. Interest rates on the auction rate securities are reset every 28 days. At September 30, 2010 upon a failed auction, the maximum interest rate for \$2.0 million of these debt securities was based upon the lesser of the interest paid on the student loan portfolio, less service costs, or one-month LIBOR plus 2.5%. At September 30, 2010, the default interest rate was 2.76% based on one-month LIBOR plus 2.5%. The maximum interest rate for the remaining \$2.0 million of debt securities was based upon the lesser of (i) the net loan rate (the interest paid on the student loan portfolio less service costs); (ii) 91-day Treasury bills plus 1.5%; (iii) one-month LIBOR plus 1.5%; (iv) 18%; or (v) highest rate legally payable. At September 30, 2010, the default interest rate was 1.54% based on the net loan rate.

The auction process historically provided a liquid market to sell the securities to meet cash requirements. These auction rate securities had successful auctions through January 2008. However, since February 2008, auctions for these securities have not been successful, resulting in the inability to

Table of Contents

EL PASO ELECTRIC COMPANY AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

liquidate these investments. The Company's valuation as of September 30, 2010 is based upon the average of a discounted cash flow model valuation and a market comparables method.

The discounted cash flow model valuation is based on expected cash flows using the maximum expected interest rates discounted by an expected yield reflecting illiquidity and credit risk. In order to more accurately forecast cash flows, Treasury and LIBOR yield curves were created using swap rates and data provided on the U.S. Department of the Treasury website and the British Bankers' Association website. After thorough analysis, future cash flows were projected based on interest rate models over a term, which was based on an estimate of the weighted average life of the student loan portfolio within the issuing trusts. The applied discount yield was based on the applicable forward LIBOR rate and yield spreads of 380 and 400 basis points based on each security's (i) credit risk, (ii) illiquidity, (iii) subordinated status, (iv) interest rate limitations, and (v) FFELP guarantees.

The market comparables method is based upon sales and purchases of auction rate securities in secondary market transactions. The secondary market discounts of 24% to 31% are based on discounts indicated in secondary market transactions involving comparable student loan auction rate securities. The average of the values provided by the discounted cash flow calculation and the market comparables method are used to arrive at the concluded value of the securities.

The securities in the Company's decommissioning trust funds are valued using prices and other relevant information generated by market transactions involving identical or comparable securities. FASB guidance identifies this valuation technique as the market approach with observable inputs. The Company analyzes available-for-sale securities to determine if losses are other than temporary.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

El Paso Electric Company:

We have reviewed the consolidated balance sheet of El Paso Electric Company and subsidiary as of September 30, 2010, the related consolidated statements of operations and comprehensive operations for the three-month, nine-month and twelve-month periods ended September 30, 2010 and 2009, and the related consolidated statements of cash flows for the nine-month periods ended September 30, 2010 and 2009. These consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of El Paso Electric Company and subsidiary as of December 31, 2009, and the related consolidated statements of operations, comprehensive operations, changes in common stock equity, and cash flows for the year then ended (not presented herein); and in our report dated February 25, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2009, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information contained in this Item 2 updates, and should be read in conjunction with, the information set forth in Part II, Item 7 of our 2009 Form 10-K.

FORWARD-LOOKING STATEMENTS

Certain matters discussed in this Quarterly Report on Form 10-Q other than statements of historical information are forward-looking statements. The Private Securities Litigation Reform Act of 1995 has established that these statements qualify for safe harbors from liability. Forward-looking statements may include words like we believe, anticipate, target, expect, pro forma, estimate, intend and words of similar meaning. Forward-looking statements describe our future plans, objectives, expectations or goals. Such statements address future events and conditions concerning and include, but are not limited to such things as:

capital expenditures,

earnings,

liquidity and capital resources,

litigation,

accounting matters,

possible corporate restructurings, acquisitions and dispositions,

compliance with debt and other restrictive covenants,

interest rates and dividends,

environmental matters,

nuclear operations, and

the overall economy of our service area.

These forward-looking statements involve known and unknown risks that may cause our actual results in future periods to differ materially from those expressed in any forward-looking statement. Factors that would cause or contribute to such differences include, but are not limited to, such things as:

Edgar Filing: EL PASO ELECTRIC CO /TX/ - Form 10-Q

ability of our operating partners to maintain plant operations and manage operation and maintenance costs at the Palo Verde and Four Corners plants,

reductions in output at generation plants operated by the Company,

unscheduled outages, including outages at Palo Verde,

the size of our construction program and our ability to complete construction on budget and on a timely basis,

the recovery of capital investments through rates,

electric utility deregulation or re-regulation,

regulated and competitive markets,

ongoing municipal, state and federal activities,

economic and capital market conditions,

changes in accounting requirements and other accounting matters,

changing weather trends,

rates, cost recoveries and other regulatory matters including the ability to recover fuel costs on a timely basis,

changes in environmental regulations, including those related to greenhouse gas emissions,

political, legislative, judicial and regulatory developments,

Table of Contents

the impact of lawsuits filed against us,

the impact of changes in interest rates,

changes in, and the assumptions used for, pension and other post-retirement and post-employment benefit liability calculations, as well as actual and assumed investment returns on pension plan assets,

the impact of the U.S. health care reform legislation,

the impact of changing cost escalation and other assumptions on our nuclear decommissioning liability for Palo Verde,

Texas, New Mexico and electric industry utility service reliability standards,

homeland security considerations,

coal, uranium, natural gas, oil and wholesale electricity prices and availability, and

other circumstances affecting anticipated operations, sales and costs.

These lists are not all-inclusive because it is not possible to predict all factors. A discussion of some of these factors is included in this document under the headings "Risk Factors" and in the 2009 Form 10-K under the headings "Management's Discussion and Analysis -Summary of Critical Accounting Policies and Estimates" and "Liquidity and Capital Resources." This report should be read in its entirety. No one section of this report deals with all aspects of the subject matter. Any forward-looking statement speaks only as of the date such statement was made, and we are not obligated to update any forward-looking statement to reflect events or circumstances after the date on which such statement was made except as required by applicable laws or regulations.

Summary of Critical Accounting Policies and Estimates

The preparation of our financial statements requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and related notes for the periods presented, and actual results could differ in future periods from those estimates. Critical accounting policies and estimates are both important to the portrayal of our financial condition and results of operations and require complex, subjective judgments and are more fully described in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our 2009 Form 10-K.

Summary

The following is an overview of our results of operations for the three, nine and twelve month periods ended September 30, 2010 and 2009. Income for the three, nine and twelve month periods ended September 30, 2010 and 2009 is shown below:

Three Months Ended		Nine Months Ended		Twelve Months Ended	
September 30,		September 30,		September 30,	
2010	2009	2010	2009	2010	2009

Edgar Filing: EL PASO ELECTRIC CO /TX/ - Form 10-Q

Increased depreciation and amortization (f)	(938)	(2,870)	(2,881)
Increased (decreased) investment and interest income (g)	(102)	2,977	4,785
Elimination of Medicare Part D tax benefit (h)	0	(4,787)	(4,787)
Other	(567)	1,384	(1,414)
September 30, 2010 net income before extraordinary item	\$ 49,896	\$ 82,852	\$ 90,813

- (a) The increase in retail non-fuel base revenues in all three periods was primarily due to new non-fuel base rates in New Mexico and Texas reflecting higher seasonal rates in the summer months. Non-fuel retail base revenues also increased for the three months ended September 30, 2010 compared to the same period last year due to a 4.8% increase in kWh sales to retail customers as a result of a 1.5% growth in customers served. Non-fuel retail base revenues also increased for the nine months ended September 30, 2010 compared to the same period last year due to a 5.1% increase in kWh sales to retail customers as a result of colder winter weather and a 1.7% growth in customers served. Non-fuel retail base revenues also increased for the twelve months ended September 30, 2010 compared to the same period last year due to a 5.1% increase in kWh sales to retail customers and included increased rates to large and industrial customers. Non-fuel retail base revenues exclude fuel recovered through New Mexico base rates.
- (b) Revenues from retail sales of deregulated Palo Verde Unit 3 power increased for the three months ended September 30, 2010 compared to the same period last year due to higher proxy market prices. Revenues from retail sales of deregulated Palo Verde Unit 3 power increased for the nine months ended September 30, 2010 compared to the same period last year due to increased generation at Palo Verde Unit 3 in 2010 and higher proxy market prices. In 2009, Palo Verde Unit 3 had a scheduled refueling and maintenance outage through most of April and May 2009. Decreased revenues from sales of deregulated Palo Verde Unit 3 power for the twelve months ended September 30, 2010 reflects decreased Unit 3 power sold to retail customers.
- (c) Consistent with a prior rate agreement, the 2009 Texas rate case settlement reduced the off-system sales margin retained from 75% to 10% effective July 1, 2010, which reduced retained margins in all three time periods for 2010. Lower retained margins on off-system sales in all three current periods were also the result of reduced margins per MWh due to lower market prices. For the nine and twelve months ended September 30, 2010, off-system sales margin retained also decreased due to declines in MWh sales.
- (d) Pension and benefits expense increased for all three periods primarily due to changes in actuarial assumptions used to calculate expenses for our pension plan.
- (e) Taxes other than income taxes increased for all three periods due to revenue-related taxes and increased property taxes.
- (f) Depreciation and amortization expense increased for all three periods due to increased depreciable plant balances.
- (g) Investment and interest income increased for the nine and twelve months ended September 30, 2010 compared to the same periods last year primarily due to reduced impairments and losses on equity securities in our Palo Verde decommissioning trust funds of \$3.6 million and \$5.7 million, respectively.
- (h) Tax expense increased for the nine and twelve months ended September 30, 2010 due to a change in the tax law enacted as part of the Patient Protection and Affordable Care Act to eliminate the tax benefit related to the Medicare Part D subsidies.

Table of Contents**Historical Results of Operations**

The following discussion includes descriptions of factors affecting individual line items in the results of operations. The amounts presented below are presented on a pre-tax basis.

Operating revenues

We realize revenue from the sale of electricity to retail customers at regulated rates and the sale of energy in the wholesale power market generally at market based prices. Sales for resale (which are wholesale sales within our service territory) accounted for less than 1% of revenues. Off-system sales are wholesale sales into markets outside our service territory. Off-system sales are primarily made in off-peak periods when we have competitive generation capacity available after meeting our regulated service obligations. We shared 25% of off-system sales margins with our Texas and New Mexico customers and retained 75% of off-system sales margins through June 30, 2010. Pursuant to rate agreements in prior years, effective July 1, 2010, we share 90% of off-system sales margins with our Texas and New Mexico customers, and we retain 10% of off-system sales margins. We also share 25% of our off-system sales margins with our sales for resale customer under the terms of a contract which was effective April 1, 2008.

Revenues from the sale of electricity include fuel costs that are recovered from our customers through fuel adjustment mechanisms. A significant portion of fuel costs are also recovered through base rates in New Mexico. We record deferred fuel revenues for the difference between actual fuel costs and recoverable fuel revenues until such amounts are collected from or refunded to customers. Non-fuel base revenues refers to our revenues from the sale of electricity excluding such fuel costs.

Retail non-fuel base revenue percentages by customer class are presented below:

	Three Months Ended September 30,		Nine Months Ended September 30,		Twelve Months Ended September 30,	
	2010	2009	2010	2009	2010	2009
Residential	42%	44%	41%	41%	40%	40%
Commercial and industrial, small	35	34	35	36	36	37
Commercial and industrial, large	7	7	8	7	8	7
Sales to public authorities	16	15	16	16	16	16
Total retail non-fuel base revenues	100%	100%	100%	100%	100%	100%

No retail customer accounted for more than 3% of our non-fuel revenues during such periods. As shown in the table above, residential and small commercial customers comprise more than 75% of our revenues. While this customer base is more stable, it is also more sensitive to changes in weather conditions. As a result, our business is seasonal, with higher kWh sales and revenues during the summer cooling season.

Weather significantly impacts our residential, small commercial and industrial customers, and to a lesser extent, our sales to public authorities. Heating and cooling degree days can be used to evaluate the effect of weather on energy use. For each degree the average outdoor temperature varies from a standard of 65 degrees Fahrenheit, a degree day is recorded. Both 2010 and 2009 have experienced hotter summer weather conditions as compared to historical averages. The table below shows heating and cooling degree days compared to a 10-year average.

	Three Months Ended September 30,			Nine Months Ended September 30,			Twelve Months Ended September 30,		
	2010	2009	10-Year Average	2010	2009	10-Year Average	2010	2009	10-Year Average*
Heating degree days	0	2	0	1,478	1,114	1,306	2,508	2,027	2,290
Cooling degree days	1,603	1,601	1,448	2,607	2,651	2,453	2,724	2,744	2,556

* Calendar year basis.

Table of Contents

Customer growth is a primary driver of the growth of retail sales. The average number of retail customers grew more than 1.5% for the three months ended September 30, 2010 and 1.7% for both the nine and twelve months ended September 30, 2010 when compared to the same periods last year. See the tables presented on pages 43, 44 and 45 which provide detail on the average number of retail customers and the related revenues and kWh sales.

Retail non-fuel base revenues. The new rate structure in New Mexico, effective January 1, 2010, and in Texas, effective July 1, 2010, increases base rates during the peak summer season of May through October while decreasing base rates during November through April. This will cause our revenues to be more seasonal than in the past.

Retail non-fuel base revenues increased by \$32.9 million, or 22.5%, for the three months ended September 30, 2010 when compared to the same period last year primarily due to (i) new non-fuel base rates in New Mexico and Texas; (ii) a 5.1% increase in kWh sales to residential customers reflecting a 1.9% growth in the average number of customers served; (iii) a 1.4% increase in kWh sales to small commercial and industrial customers; (iv) increased retail non-fuel base revenues received from large commercial and industrial customers attributable to an increase of 8.2% in kWh sales and the implementation of higher rates in new contracts and tariffs with several large customers whose contracts had expired; and (v) a 7.5% increase in kWh sales to public authorities, including military bases. Most of the revenue increases related to new non-fuel base rates in Texas and New Mexico were realized in the third quarter of 2010 as the rate increases provided for higher summer peak rates and lower rates in the non-peak months. Summer rates for residential customers are effective May through October and summer rates for other customers are effective June through September.

For the nine months ended September 30, 2010, retail non-fuel base revenues increased by \$47.8 million, or 12.9%, compared to the same period in 2009 primarily due to (i) new non-fuel base rates in New Mexico and Texas which are higher in the summer months; and (ii) a 6.6% increase in kWh sales to residential customers reflecting colder winter weather in 2010 and a 1.8% growth in the average number of customers served. During the nine months ended September 30, 2010, heating degree days were 33% above the same period in 2009 and 13% above the 10-year average. Retail non-fuel base revenues also increased due to a 2.1% increase in kWh sales to small commercial and industrial customers primarily as a result of a 1.5% increase in the average number of small commercial and industrial customers served. Retail non-fuel base revenues from large commercial and industrial customers also increased due to an increase of 9.3% in kWh sales and the implementation of higher rates in new contracts and tariffs with several large customers whose contracts had expired. Revenues to public authorities also increased due to a 4.7% increase in kWh sales largely due to increased sales to military bases.

Retail non-fuel base revenues for the twelve months ended September 30, 2010 increased by \$51.1 million, or 10.6%, compared to the same period in 2009 primarily due to (i) new non-fuel base rates in New Mexico and Texas which are higher in the summer months; and (ii) an increase of 6.6% in kWh sales to residential customers reflecting colder winter weather in 2010 and a 1.8% growth in the average number of customers served. During the twelve months ended September 30, 2010, heating degree days were 24% above the same period in 2009 and 10% above the 10-year average. Retail non-fuel base revenues also increased due to a 1.6% increase in kWh sales to small commercial and industrial customers primarily as a result of a 1.4% increase in the average number of small commercial and industrial customers served. Retail non-fuel base revenues from large commercial and industrial customers also increased due to an increase of 11.2% in kWh sales and the implementation of higher rates in new contracts and tariffs with several large customers whose contracts had expired. Revenues

Table of Contents

to public authorities also increased due to a 4.0% increase in kWh sales largely due to increased sales to military bases.

Fuel revenues. Fuel revenues consist of: (i) revenues collected from customers under fuel recovery mechanisms approved by the state commissions and FERC, (ii) deferred fuel revenues which are comprised of the difference between fuel costs and fuel revenues collected from customers, and (iii) fuel costs recovered in base rates in New Mexico. In New Mexico and with our sales for resale customer, the fuel adjustment clause allows us to recover under-recoveries or refund over-recoveries of current fuel costs above the amount recovered in base rates with a two-month lag. In Texas, fuel costs are recovered through a fixed fuel factor that may be adjusted up to three times per year. In addition, if we materially over-recover fuel costs, we must seek to refund the over recovery, and if we materially under recover fuel costs, we may seek a surcharge to recover those costs.

We over-recovered fuel costs by \$9.7 million, \$21.8 million, and \$28.7 million for the three, nine, and twelve months ended September 30, 2010 compared to fuel over-recoveries of \$23.0 million, \$59.7 million, and \$75.5 million in the same periods last year. At September 30, 2010, we had a net fuel over-recovery balance of \$16.7 million, including \$12.6 million in Texas and \$4.1 million in New Mexico.

Off-system sales. Off-system sales are primarily made in off-peak periods when we have competitive generation capacity available after meeting our regulated service obligations. Typically, we realize a significant portion of our off-system sales margins in the first quarter of each calendar year when our native load is lower than at other times of the year, allowing for the sale in the wholesale market of relatively larger amounts of off-system energy generated from lower cost generating resources. Palo Verde's availability is an important factor in realizing these off-system sales margins. The table below shows the MWhs, sales revenue, fuel costs, total margins, and retained margins made on off-system sales for the three, nine, and twelve month periods (in thousands except for MWhs).

	Three Months Ended September 30,		Nine Months Ended September 30,		Twelve Months Ended September 30,	
	2010	2009	2010	2009	2010	2009
MWh sales	804,558	715,641	2,163,766	2,408,122	2,751,628	3,346,455
Sales revenues	\$ 28,221	\$ 28,349	\$ 84,634	\$ 89,430	\$ 111,268	\$ 134,960
Fuel cost	\$ 26,119	\$ 25,314	\$ 75,642	\$ 78,530	\$ 98,777	\$ 118,895
Total margin	\$ 2,102	\$ 3,035	\$ 8,992	\$ 10,900	\$ 12,491	\$ 16,065
Retained margin	\$ 223	\$ 2,278	\$ 5,392	\$ 8,178	\$ 8,017	\$ 12,052

Off-system sales revenues decreased in the three, nine, and twelve month periods ended September 30, 2010 when compared to the same periods last year as a result of lower average market prices for power. For the nine and twelve month periods ended September 30, 2010, off-system sales revenues also decreased due to declines in MWh sales. Customers were credited with 25% of the off-system sales margins through fuel recovery mechanisms through June 30, 2010. In July 2010, off-system sales margins shared with customers in Texas and New Mexico increased to 90%.

- (1) Excludes \$28.5 million and \$29.0 million, respectively, of deferred fuel revenues recovered through Texas fuel surcharges.
- (2) Represents revenues with no related kWh sales.

Table of Contents*Energy expenses*

Our sources of energy include electricity generated from our nuclear, natural gas and coal generating plants and purchased power. Palo Verde represents approximately 39% of our available net generating capacity and approximately 55%, 58% and 58% of our Company-generated energy for the three, nine and twelve months ended September 30, 2009, respectively. The price of natural gas is the primary factor influencing the price of purchased power and has a significant impact on our cost of energy.

Our energy expenses increased \$6.7 million, or 8.2%, for the three months ended September 30, 2010 when compared to 2009 primarily due to increased natural gas costs of \$4.8 million as a result of a 22% increase in MWhs generated with natural gas, and increased nuclear fuel costs of \$2.7 million as a result of a 32% increase in the average cost of nuclear fuel. The table below details the sources and costs of energy for the three months ended September 30, 2010 and 2009.

Fuel Type	Three Months Ended September 30,					
	2010			2009		
	Cost (in thousands)	MWh	Cost per MWh	Cost (in thousands)	MWh	Cost per MWh
Natural gas	\$ 47,278	957,079	\$ 49.40	\$ 42,503	782,861	\$ 54.29
Coal	1,861	173,298	10.74	2,956	168,755	17.52
Nuclear	11,155	1,375,883	8.11	8,492	1,379,943	6.15
Total	60,294	2,506,260	24.06	53,951	2,331,559	23.14
Purchased power	28,229	768,878	36.71	27,878	726,433	38.38
Total energy	\$ 88,523	3,275,138	27.03	\$ 81,829	3,057,992	26.76

Our energy expenses increased \$11.1 million, or 4.9%, for the nine months ended September 30, 2010 when compared to 2009 primarily due to increased natural gas costs of \$16.5 million as a result of a 27% increase in MWhs generated with natural gas, and increased nuclear fuel costs of \$5.7 million as a result of a 28% increase in the average cost of nuclear fuel. This increase was partially offset by decreased costs of purchased power of \$8.9 million due to an 11% decrease in MWhs purchased and a \$2.2 million decrease in coal costs primarily due to a 17% decrease in MWhs generated with coal. The table below details the sources and costs of energy for the nine months ended September 30, 2010 and 2009.

Fuel Type	Nine Months Ended September 30,					
	2010			2009		
	Cost (in thousands)	MWh	Cost per MWh	Cost (in thousands)	MWh	Cost per MWh
Natural gas	\$ 123,976	2,276,456	\$ 54.46	\$ 107,494	1,796,812	\$ 59.82
Coal	7,630	461,332	16.54	9,835	554,711	17.73
Nuclear	28,533	3,748,164	7.61	22,798	3,826,096	5.96
Total	160,139	6,485,952	24.69	140,127	6,177,619	22.68
Purchased power	76,628	1,924,621	39.81	85,571	2,168,446	39.46
Total energy	\$ 236,767	8,410,573	28.15	\$ 225,698	8,346,065	27.04

Table of Contents

Our energy expenses decreased \$7.7 million, or 2.5%, for the twelve months ended September 30, 2010 when compared to 2009 primarily due to decreased purchased power costs of \$26.6 million as a result of a 17% decrease in the MWhs purchased and a 5% decrease in the average cost of purchased power, and decreased coal cost of \$2.5 million primarily as a result of a 17% decrease in the MWhs generated with coal. This decrease was partially offset by a \$15.8 million increase in natural gas costs due to a 22% increase in the MWhs generated with natural gas, and a \$5.6 million increase in nuclear fuel costs due to a 21% increase in the average price of nuclear fuel. The table below details the sources and costs of energy for the twelve months ended September 30, 2010 and 2009.

Fuel Type	Twelve Months Ended September 30,					
	Cost (in thousands)	2010 MWh	Cost per MWh	Cost (in thousands)	2009 MWh	Cost per MWh
Natural gas	\$ 160,425	2,865,276	\$ 55.99	\$ 144,655	2,350,294	\$ 61.55
Coal	10,633	651,479	16.32	13,177	780,563	16.88
Nuclear	34,791	4,770,868	7.29	29,144	4,850,788	6.01
Total	205,849	8,287,623	24.84	186,976	7,981,645	23.43
Purchased power	99,660	2,501,675	39.84	126,219	3,019,977	41.79
Total energy	\$ 305,509	10,789,298	28.32	\$ 313,195	11,001,622	28.47

Other operations expense

Other operations expense increased \$4.9 million, or 8.9%, for the three months ended September 30, 2010 compared to the same period last year primarily due to (i) increased administrative and general expense of \$3.6 million primarily as a result of increased pension and benefits cost related to increased costs for retirement plans, increased outside services, and the amortization of rate case costs; (ii) increased operations expense related to customer accounts and billing of \$1.2 million; and (iii) increased Palo Verde operations expense of \$0.8 million. These increases were partially offset by decreased transmission wheeling expense of \$0.4 million.

Other operations expense increased \$6.6 million, or 4.3%, for the nine months ended September 30, 2010 compared to the same period last year primarily due to (i) increased administrative and general expense of \$6.3 million primarily as a result of increased pension and benefits cost reflecting a change in actuarial assumptions for our pension plans; and (ii) increased operations expense related to customer accounts and billing of \$3.4 million. These increases were partially offset by decreased transmission wheeling expense of \$2.0 million.

Other operations expense increased \$13.0 million, or 6.2%, for the twelve months ended September 30, 2010 compared to the same period last year primarily due to (i) increased administrative and general expense of \$6.8 million primarily as a result of increased pension and benefits expenses of \$4.0 million reflecting a change in actuarial assumptions for our pension plan and increased accruals for employee compensation; (ii) increased Palo Verde operations expense of \$3.9 million primarily as a result of an increase in employee pension and benefit costs; and (iii) increased operations expense related to customer accounts and billing of \$3.7 million. These increases were partially offset by decreased transmission operations expense of \$3.1 million.

Table of Contents

Maintenance expense

Maintenance expense decreased approximately \$1.2 million, or 9.8% for the three months ended September 30, 2010 compared to the same period last year primarily due to decreased Palo Verde maintenance expense. Maintenance expense decreased \$0.7 million, or 1.7%, for the nine months ended September 30, 2010 compared to the same period last year primarily due to decreased Palo Verde maintenance expense, partially offset by increased general plant maintenance expense primarily due to the reversal of a reserve for environmental remediation costs in 2009 with no comparable amount in 2010.

Maintenance expense increased \$0.2 million, or less than 1%, for the twelve months ended September 30, 2010 compared to the same period last year primarily due to (i) decreased Palo Verde maintenance expense of \$1.3 million as a result of decreased maintenance expenses associated with refueling outages in 2010 compared to 2009 partially offset by increased general plant maintenance expense of \$1.1 million primarily as a result of the reversal of a reserve for environmental remediation costs in 2009 with no comparable amount in 2010.

Depreciation and amortization expense

Depreciation and amortization expense increased \$1.5 million, \$4.6 million and \$4.6 million for the three, nine and twelve months ended September 30, 2010 compared to the same period last year primarily due to increases in depreciable plant balances and increased depreciation rates.

Taxes other than income taxes

Taxes other than income taxes increased \$2.5 million and \$2.4 million, or 18.6% and 6.3%, for the three and nine months ended September 30, 2010 compared to the same period last year primarily due to higher revenue-related taxes in Texas resulting from an increase in billed revenues in the current periods and increased property taxes. Taxes other than income taxes increased \$1.3 million, or 2.5%, for the twelve months ended September 30, 2010 compared to the same period last year primarily due to higher property and payroll taxes partially offset by lower revenue-related taxes in Texas resulting from decreased billed revenues in the current period.

Other income (deductions)

Other income (deductions) increased \$0.6 million for the three months ended September 30, 2010 compared to the same period last year primarily due to an increase in fair value of our investments in auction rate securities of \$0.3 million and increased Allowance for Equity Funds Used During Construction (AEFUDC) of \$0.2 million.

Other income (deductions) increased \$4.7 million for the nine months ended September 30, 2010 compared to the same period last year primarily due to reduced impairments of equity securities in our Palo Verde decommissioning trust funds of \$4.5 million when compared to the same period last year.

Other income (deductions) increased \$4.6 million for the twelve months ended September 30, 2010 due to a \$4.9 million loss for impairments of equity securities in our Palo Verde decommissioning trust funds in 2009 compared to a \$2.2 million gain on such funds in 2010, and a \$1.8 million decrease in miscellaneous non-operating deductions. This increase was partially offset by a \$2.6 million decrease in interest income collected on fuel surcharges in the twelve months ended September 30, 2009 with no comparable amount in 2010, and a \$2.6 million decrease in miscellaneous income primarily related to an

Table of Contents

increase in the cash surrender value of life insurance policies in the 2009 period with no comparable amount in 2010.

Interest charges (credits)

Interest charges (credits) remained relatively unchanged for the three months ended September 30, 2010 compared to the same period last year. Interest charges (credits) decreased \$1.6 million, or 4.8%, for the nine months ended September 30, 2010 compared to the same period last year primarily due to lower interest rates on pollution control bonds. Two series of pollution control bonds were refunded in March 2009 at a fixed 7.25% interest rate which was lower than the variable interest rates applied to these bonds before refunding.

Interest charges (credits) for the twelve month period ended September 30, 2010 decreased \$4.5 million, or 9.7%, compared to the same period last year primarily due to \$3.4 million decrease in interest related to two series of pollution control bonds discussed above and an interest payment of \$0.9 million related to a refund of transmission revenues in November 2008.

Income tax expense

Income tax expense, before extraordinary item, increased by \$9.6 million, or 54.7% in the three months ended September 30, 2010 compared to the three months ended September 30, 2009, primarily due to an increase in pre-tax income. In March 2010, the Patient Protection and Affordable Care Act (PPACA) was signed into law. A major provision of the law is that, beginning in 2013, the income tax deductions for the cost of providing certain prescription drug coverage will be reduced by the amount of the Medicare Part D subsidies received. The Company was required to recognize the impacts of the tax law change at the time of enactment and recorded a one-time non-cash charge to income tax expense of approximately \$4.8 million in the first quarter of 2010. Income tax expense, before extraordinary item, increased by \$19.4 million and \$18.2 million, or 61.8% and 53.0%, in the nine and twelve months ended September 30, 2010 compared to the same periods last year, respectively, primarily due to the passage of PPACA and an increase in pre-tax income.

Extraordinary item

As a regulated electric utility, we prepare our financial statements in accordance with the FASB guidance for regulated operations. FASB guidance for regulated operations requires us to show certain items as assets or liabilities on our balance sheet when the regulator provides assurance that these items will be charged to and collected from our customers or refunded to our customers. In the final order for Public Utility Commission of Texas (PUCT) Docket No. 37690, we were allowed to include the previously expensed loss on reacquired debt associated with the refinancing of first mortgage bonds in 2005 in our calculation of the weighted cost of debt to be recovered from our customers. We recorded the impacts of the re-application of FASB guidance for regulated operations to our Texas jurisdiction in 2006 as an extraordinary item. In order to establish this regulatory asset, we recorded an extraordinary gain of \$10.3 million, net of income tax expense of \$5.8 million, in our 2010 statements of operations. This item was recorded as a regulatory asset during the quarter ended September 30, 2010 pursuant to the final order received from the PUCT and will be amortized over the remaining life of our 6% Senior Notes due in 2035.

New Accounting Standards

In December 2009, the FASB issued revised guidance related to financial reporting by enterprises involved with variable interest entities. This guidance became effective for reporting periods beginning after November 15, 2009. The guidance requires an enterprise to perform an analysis to

Table of Contents

determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. We have performed the required analysis and have determined that we do not have any purchase power agreements that qualify as a variable interest entity.

Effective April 1, 2009, we adopted FASB guidance which establishes general standards of accounting and disclosure of events that occur after the balance sheet date but before financial statements are issued. In February 2010, we adopted an amendment to FASB guidance, removing the requirement for an SEC filer to disclose a date through which subsequent events have been evaluated. This new guidance changed our disclosures but does not impact our financial statements.

In January 2010, the FASB issued new guidance to improve disclosure requirements related to fair value measurements and disclosures. The new requirements include (i) disclosure of significant transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfers; and (ii) disclosure in the reconciliation for Level 3 fair value measurements of information about purchases, sales, issuances, and settlements on a gross basis. The new guidance also clarifies existing disclosures and requires (i) an entity to provide fair value measurement disclosures for each class of assets and liabilities and (ii) disclosures about inputs and valuation techniques. The provisions of this new guidance were adopted in the first quarter of 2010 except for the reconciliation for the Level 3 fair value measurements on a gross basis which will be adopted during the first quarter of 2011. During the nine months ended September 30, 2010, there were no transfers in or out of Level 1 or Level 2 categories. This guidance requires additional disclosure on fair value measurements but does not impact our consolidated financial statements.

Inflation

For the last several years, inflation has been relatively low and, therefore, has had minimal impact on our results of operations and financial condition.

Table of Contents

Liquidity and Capital Resources

We continue to maintain a strong capital structure which allows us to access financing from the capital markets at a reasonable cost. At September 30, 2010, our capital structure, including common stock, long-term debt, and the current portion of long-term debt and financing obligations, consisted of 47.8% common stock equity and 52.2% debt. At September 30, 2010, our liquidity included \$66.9 million in cash and cash equivalents, most of which was invested in United States Treasury securities.

Our principal liquidity requirements in the near-term are expected to consist of capital expenditures to expand and support electric service obligations, expenditures for nuclear fuel inventory, interest payments on our indebtedness, and operating expenses including fuel costs, non-fuel operation and maintenance costs and taxes. In addition, we may repurchase common stock in the future.

Capital requirements and resources have been impacted by the timing of the recovery of fuel costs through fuel recovery mechanisms in Texas and New Mexico and our sales for resale customer. We recover actual fuel costs from customers through fuel adjustment mechanisms in Texas, New Mexico, and from our sales for resale customer. We record deferred fuel revenues for the under-recovery or over-recovery of fuel costs until they can be recovered from or refunded to customers. In Texas, fuel costs are recovered through a fixed fuel factor. Effective July 1, 2010, we can seek to revise our fixed fuel factor based upon our approved formula at least four months after our last revision except in the month of December.

In the nine months ended September 30, 2010, we had decreased cash from operations due primarily to a reduction in the collection of deferred fuel revenues in 2010. During the nine months ended September 30, 2010, the Company had an under-recovery of deferred fuel revenues, net of refunds of \$1.3 million, as compared to an over-recovery, including surcharges of \$74.7 million, during the nine months ended September 30, 2009. At September 30, 2010, we had a net fuel over-recovery balance of \$16.7 million, including \$12.6 million in Texas and \$4.1 million in New Mexico. On October 20, 2010, we filed with the PUCT to refund \$12.8 million in fuel over-recoveries, including interest, for the period July 2009 through September 2010, to be refunded in December 2010.

Capital Requirements. During the nine months ended September 30, 2010, our capital requirements primarily consisted of expenditures for the construction and purchase of electric utility plant, purchases of nuclear fuel, and the repurchase of common stock. Projected utility construction expenditures will consist primarily of expanding and updating our transmission and distribution systems, adding new generation, and making capital improvements and replacements at Palo Verde and other generating facilities. We are constructing Newman Unit 5, a 288 MW gas-fired combined cycle combustion turbine generating unit, which will be completed in two phases at an estimated cost of approximately \$230 million, including AFUDC. The first phase of Newman Unit 5 was completed in May 2009, and the second phase is currently expected to be completed by April 2011. As of September 30, 2010, we had expended \$196.1 million, including AFUDC, on Newman Unit 5, including \$37.6 million in the first nine months of 2010. Revised estimated construction expenditures for 2010 are approximately \$180 million, including \$42 million for Newman Unit 5. Capital expenditures were \$124.8 million in the nine months ended September 30, 2010 compared to \$145.5 million in the nine months ended September 30, 2009.

Table of Contents

We continually evaluate our funding requirements related to our retirement plans, other postretirement benefit plans, and decommissioning trust funds. We contributed \$6.6 million of the projected \$8.4 million 2010 annual contribution to our retirement plans during the nine months ended September 30, 2010. In the nine months ended September 30, 2010, we contributed \$3.7 million of the projected \$4.6 million 2010 annual contribution to our other postretirement benefit plan, and \$6.2 million of the projected \$8.2 million 2010 annual contribution to our decommissioning trust funds. We are in compliance with the funding requirements of the federal government for our benefit plans and decommissioning trust. Our cash requirements for federal and state income taxes vary from year to year based on taxable income, which is influenced by the timing of revenues and expenses recognized for income tax purposes. Tax payments for 2010 are expected to be approximately \$17.3 million.

We do not currently pay dividends on common stock. Since 1999, we have repurchased approximately 22.5 million shares of common stock at an aggregate cost of \$333.6 million, including commissions. As of December 31, 2009, 200,982 shares remained available for repurchase under our authorized program. On February 19, 2010, the Board of Directors authorized a repurchase of up to 2 million additional shares of the Company's outstanding common stock (2010 Authorization). During the first nine months of 2010, we repurchased 1,391,049 shares of common stock in the open market at an aggregate cost of approximately \$30.2 million under both the previously authorized program and under the 2010 Authorization. During the third quarter of 2010, we repurchased 888,557 shares of common stock in the open market at an aggregate cost of \$20.2 million. As of September 30, 2010, 809,933 shares remain available for repurchase under the 2010 Authorization. We may make purchases of our stock in the future pursuant to our stock repurchase program at open market prices and may engage in private transactions, where appropriate. The repurchased shares will be available for issuance under employee benefit and stock incentive plans, or may be retired.

Capital Resources. Cash generated from operations decreased \$49.9 million in the nine months ended September 30, 2010 compared to the same period in 2009 primarily due to a decrease in the collection of fuel revenues in 2010 and an increase in accounts receivable. During the nine months ended September 30, 2010, the Company had an under-recovery of deferred fuel revenues, net of refunds, of \$1.3 million as compared to an over-recovery, including surcharges, of \$74.7 million during the nine months ended September 30, 2009. Cash flows from operations also decreased due to an increase of \$42.7 million in accounts receivable in the nine months ended September 30, 2010 compared to a \$2.5 million increase for the same period in 2009. The increase in accounts receivable is primarily due to increased kWh sales and increased rates in both Texas and New Mexico. Cash from operations will continue to be a primary source of funds for capital expenditures for electric plant.

On August 17, 2010, Rio Grande Resources Trust (RGRT) completed the sale of \$110 million aggregate principal amount of senior notes. We guarantee RGRT's payment of principal and interest on the senior notes. RGRT is the trust through which we finance our portion of nuclear fuel for Palo Verde, and its asset, liabilities and operations are consolidated in the Company's financial statements. The proceeds from the sale of the senior notes were used by RGRT to repay amounts borrowed under the then existing revolving credit facility and will enable future nuclear fuel financing requirements of RGRT to be met with a combination of the senior notes and amounts borrowed under the revolving credit facility.

On September 23, 2010, the Company, along with RGRT, entered into a new credit agreement for a \$200 million revolving credit facility. The revolving credit facility has a term of four years, and we may request that the facility be increased up to \$300 million during the term of the facility. The terms of the agreement provide that amounts we borrow under the facility may be used for working capital and general corporate purposes. Any amounts borrowed by RGRT may be used to finance the acquisition

Table of Contents

and processing of nuclear fuel. We guarantee the amounts borrowed by RGRT. This revolving credit facility replaces the \$200 million revolving credit facility that was due to expire on April 11, 2011. Total amount borrowed for nuclear fuel by RGRT was \$124.1 million at September 30, 2010 of which \$14.1 million was borrowed under this new revolving credit facility and \$110.0 million was borrowed through the senior notes discussed above. Borrowings by RGRT for nuclear fuel were \$113.0 million as of September 30, 2009, including accrued interest and fees. Interest costs on borrowings to finance nuclear fuel are accumulated by RGRT and charged to the Company as fuel is consumed and is recovered by the Company through fuel recovery charges. No borrowings were outstanding at September 30, 2010 under the revolving credit facility for working capital or general corporate purposes.

At September 30, 2010, we had \$185.9 million of unused credit available on our new revolving credit facility discussed above. The combination of the issuance of senior notes by RGRT and the refinancing of the revolving credit facility provides additional liquidity to the Company. We expect to have sufficient liquidity to finance construction expenditures and other capital requirements through 2011. In addition, we may seek to issue debt in the capital markets to finance capital requirements.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk due to changes in interest rates, equity prices and commodity prices. See our 2009 Form 10-K, Item 7A,

Quantitative and Qualitative Disclosures About Market Risk, for a complete discussion of the market risks we face and our market risk sensitive assets and liabilities. As of September 30, 2010, there have been no material changes in the market risks we face or the fair values of assets and liabilities disclosed in Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in our 2009 Form 10-K.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures. Under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, we conducted an evaluation pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 of our disclosure controls and procedures as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934. Based on that evaluation, our chief executive officer and our chief financial officer concluded that, as of September 30, 2010, our disclosure controls and procedures are effective.

Changes in internal control over financial reporting. There were no changes in our internal control over financial reporting in connection with the evaluation required by paragraph (d) of the Securities Exchange Act of 1934 Rules 13a-15 or 15d-15, that occurred during the quarter ended September 30, 2010, that materially affected, or that were reasonably likely to materially affect, our internal control over financial reporting.
