July 11, 2011

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT

PURSUANT TO SECTION 13 OR 15(d) OF THE

SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended May 31, 2011

Commission File Number 1-8803

MATERIAL SCIENCES CORPORATION

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of

95-2673173
(IRS employer

incorporation or organization)

identification number)

2200 East Pratt Boulevard

Elk Grove Village, Illinois
(Address of principal executive offices)

60007
(Zip code)

Registrant's telephone number, including area code: (847) 439-2210

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: MATERIAL SCIENCES CORP - Form 10-Q

As of June 30, 2011, there were 11,669,959 outstanding shares of common stock, \$.02 par value.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MATERIAL SCIENCES CORPORATION and SUBSIDIARIES

The data as of May 31, 2011, and for the three months ended May 31, 2011 and 2010, has not been audited by our independent registered public accounting firm. In the opinion of Material Sciences Corporation and Subsidiaries (the Company, we, our, us or MSC), the data reflects all adjustments (consisting of only normal, recurring adjustments) necessary for a fair presentation of the information at that date and for those periods. The financial information contained in this report should be read in conjunction with the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on April 29, 2011, for the fiscal year ended February 28, 2011 (fiscal 2011). A reclassification has been made to the prior years' consolidated financial statements to conform to the 2012 presentation. Rental Income was reclassified from Other, Net on the Condensed Consolidated Statements of Operations.

- (1) **Joint Venture.** In November 2000, a subsidiary of MSC formed a joint venture with Tekno S.A. (Tekno) for the manufacture and sale of Quiet Steel® and disc brake noise damping material for the South American market. The Company includes its portion of the joint venture's results in the Condensed Consolidated Statements of Operations under Equity in Results of Joint Venture. The Equity in Results of Joint Venture was income of \$142,000 for the three months ended May 31, 2011, compared with income of \$106,000 for the same period in 2010.
- (2) **Preferred Stock.** Preferred Stock, \$1.00 Par Value; 10 million Shares Authorized; 1 million Designated Series B Junior Participating Preferred; None Issued.
- (3) **Common Stock.** Common Stock, \$0.02 Par Value; 40,000,000 Shares Authorized; 19,003,892 Shares Issued and 11,795,244 Shares Outstanding as of May 31, 2011, and 18,993,892 Shares Issued and 12,893,560 Shares Outstanding as of February 28, 2011.
- (4) **Treasury Stock.** Our Board of Directors authorized the repurchase of shares of the Company's common stock as follows:

On January 7, 2008, 1,000,000 shares

On January 28, 2011, 1,000,000 shares

On May 27, 2011, 1,000,000 shares

The shares may be repurchased from time-to-time on the open market, subject to market conditions and other factors, and generally will be funded with internally generated cash. The Company repurchased 98,316 shares under the January 2008 authorization (completing that authorization) and 1,000,000 shares under the January 2011 authorization (completing that authorization) during the three months ended May 31, 2011. At May 31, 2011, there were 1,000,000 shares available for purchase under the May 2011 authorization.

	Shares	Cost of Shares Purchased (in thousands)	Average Price per Share
Treasury Stock as of February 28, 2011	6,090,332	\$ 56,885	\$ 9.34
Repurchases During the Three Months Ended May 31, 2011	1,098,316	7,741	\$ 7.05
Treasury Stock as of May 31, 2011	7,188,648	\$ 64,626	\$ 8.99

On May 27, 2011, the Company entered into a written trading plan to purchase up to 1 million shares under Rule 10b5-1 of the Exchange Act as part of the existing share repurchase program. The plan commenced on June 1, 2011, and will expire on May 31, 2012, or when 1 million shares have been repurchased, whichever occurs first.

- (5) **Commodity Contracts.** We are exposed to certain risks related to ongoing business operations. We enter into derivative instruments with the objective of managing our financial and operational exposure arising from these risks: primarily commodity price risk. From time-to-time in the ordinary course of business, the Company enters into purchase contracts for procuring nickel carbonate, zinc shot and natural gas, which are commodities used in its manufacturing processes. MSC maintains a commodity forward purchase policy. This seeks to ensure that, at any time, the majority of the expected consumption over the next 12 months is secured under a purchase contract at a pre-determined price. When we enter into these contracts, we apply the Normal Purchase/Normal Sale election, which excludes the contracts from being accounted for as derivative instruments at fair value for as long as they qualify for the election. At May 31, 2011, we did not have any commodity contracts that we accounted for at fair value.

(6) **Comprehensive Income**

(in thousands)	Three Months Ended May 31,	
	2011	2010
Net Income	\$ 4,157	\$ 4,007
Other Comprehensive Income (Loss):		
Pension/Postretirement Adjustments, Net of Benefit for Income Taxes of \$0, and \$0, Respectively	(204)	149
Foreign Currency Translation Adjustments	(493)	(437)
Comprehensive Income	\$ 3,460	\$ 3,719

- (7) **Indebtedness.** The Company has a credit line (Line) with JPMorgan Chase Bank, N.A. Interest on the Line is at the bank's prime rate (3.25% as of May 31, 2011) or Libor plus 1.50%, at our discretion. There are annual letter of credit fees of 1.50% on outstanding letters of credit and a 0.25% fee on the annual unused credit line. The Line is secured by a borrowing base equal to a specified percentage of accounts receivable and liens on other Company assets including inventory, equipment, real property and intellectual property reduced by outstanding letters of credit. In April 2010, the Line was amended

to reduce the credit line to \$7.5 million and increase the minimum availability covenant to \$2.5 million. On May 10, 2011, MSC and JPMorgan Chase Bank, N.A. agreed to extend the existing Line for two years on substantially identical terms. Due to the borrowing base limitations and outstanding letters of credit of \$1.3 million, the net amount available for borrowing at May 31, 2011, was \$3.7 million. The lender may, at its discretion subject to the terms of the Line, modify the advance rates used in computing the borrowing base, which may limit the amounts available for future borrowings. There were no borrowings outstanding under the Line as of either May 31, 2011, or February 28, 2011, nor were any amounts borrowed during either the three months ended May 31, 2011, or May 31, 2010.

(8) **Inventory.** Inventories consisted of the following:

(in thousands)	May 31, 2011	February 28, 2011
Raw Materials	\$ 11,870	\$ 9,637
Finished Goods	13,570	11,269
Total Inventories	\$ 25,440	\$ 20,906

(9) **Significant Customers.** Due to the concentration in the automotive industry, management believes that sales to individual automotive customers are significant. The following table shows sales to the Company's significant customers as a percentage of consolidated net sales for the three months ended May 31, 2011 and 2010.

Customer	% of Consolidated Net Sales for the Three Months Ended May 31,	
	2011	2010
US Steel	26%	12%
Chrysler	16%	16%
Ford	11%	18%

The following table shows gross accounts receivable from the Company's significant customers as a percentage of total consolidated gross accounts receivable as of May 31, 2011, and February 28, 2011.

Customer	% of Consolidated Gross Accounts Receivable	
	May 31, 2011	February 28, 2011
Chrysler	19%	14%
US Steel (1)	12%	24%
Ford	11%	18%

(1) The reduction in US Steel is due to the timing of payments received at May 31 and February 28, 2011. The percentage at February 28, 2011, does not reflect a \$2.4 million payment received on March 1, 2011, which should have been received on February 28, 2011. Net sales of our domestic and foreign units are presented in the table below. No one foreign country comprised greater than 10% of consolidated net sales for any period presented.

(in thousands)	Three Months Ended	
	May 31,	
	2011	2010
Domestic Net Sales	\$ 32,152	\$ 39,485
Foreign Net Sales	3,884	2,982
Total Net Sales	\$ 36,036	\$ 42,467

Domestic Net Sales included sales originated by our domestic subsidiaries and shipped to customers located in Asia of \$0.8 million for the three months ended May 31, 2011, and \$0.7 million for the comparable prior-year period.

(10) **Interest Income, Net.** The table presented below analyzes the components of Interest Income, Net.

(in thousands)	Three Months Ended	
	May 31,	
	2011	2010
Interest Expense	\$ (9)	\$ (9)
Interest Income	27	34
Interest Income, Net	\$ 18	\$ 25

(11) **Income Taxes.** The Company evaluates its deferred income taxes on a quarterly basis to determine if valuation allowances are required, in full or in part. This includes considering available positive and negative evidence, such as past operating results, the existence of cumulative losses in the most recent fiscal years and our forecast of future taxable income on a jurisdiction-by-jurisdiction basis. In determining future taxable income, we review the reversal of temporary differences and the implementation of feasible and prudent tax planning strategies. After analyzing the ability to generate sufficient taxable income to utilize the benefit of the deferred tax assets, the Company established a valuation allowance on its U.S. and German deferred tax assets as of February 28, 2009. During the three months ended May 31, 2011, MSC recorded a decrease in the valuation allowances of approximately \$1.7 million relating to the tax effects of the income generated during the first quarter of the fiscal year ended February 29, 2012, and \$1.9 million related to the write-off of net operating losses, primarily in Pennsylvania, due to the liquidation of a subsidiary and the inability to utilize the losses. There were no other material changes to the Company's valuation allowances during the three months ended May 31, 2011. A full valuation allowance continues to be maintained for the MSC's remaining U.S. and German deferred tax assets at May 31, 2011.

The Company does not anticipate that the total amount of unrecognized tax benefits of \$2.4 million at May 31, 2011, will significantly change during the next 12 months.

For the three months ended May 31, 2011, MSC's effective income tax rate for continuing operations was an expense of 5.9%, compared with an expense of 7.0% in the same period last year. The low rates in both periods are due to the utilization of deferred tax assets principally net operating losses and AMT credits.

(12) **Retirement and Savings Plans.** The Company has one defined contribution retirement plan qualifying under the Internal Revenue Code Section 401(k): The Material Sciences

Savings & Investment Plan (the SIP). All MSC employees can elect to participate in the SIP.

MSC also has non-contributory defined benefit pension plans and other postretirement plans for certain of its employees. The following table provides the components of net periodic benefit cost for the Company's defined benefit plans and other post-retirement plans.

(in thousands)	Pension Benefits		Other Benefits	
	Three Months Ended May 31,			
	2011	2010	2011	2010
Service Cost	\$	\$	\$ 5	\$ 30
Interest Cost	167	170	21	71
Amortization of Unrecognized Prior Service Cost			(69)	
Expected Return on Plan Assets	(154)	(134)		
Amortization of Net Loss	101	98	47	61
Total Net Periodic Benefit Cost	\$ 114	\$ 134	\$ 4	\$ 162

MSC previously disclosed in the notes to its financial statements for the year ended February 28, 2011, that it expected to contribute \$1.2 million toward its qualified and nonqualified defined benefit pension plans and \$0.2 million toward its other post-retirement benefit plans other than pension plans in fiscal 2012. As of May 31, 2011, \$0.3 million of contributions/payments have been made toward the pension plans and less than \$0.1 million of net contributions/payments have been made to the other post-retirement plans.

- (13) **Equity and Compensation Plans.** The Company has one active equity award plan, the Material Sciences Corporation 1992 Omnibus Awards Plan for Key Employees (1992 Plan). There are 3,262,500 shares authorized under the 1992 Plan to provide stock options, restricted stock and other equity awards under various programs. Non-qualified stock options generally vest over three years from the date of grant and expire between five and 10 years from the date of grant. Restricted stock awards generally vest over three to five years from the date of grant. Restricted stock awards have been issued with restrictions based upon time, MSC earnings performance or a combination of the two.

The Company also has one inactive equity award plan: The Material Sciences Corporation 2001 Compensation Plan for Non-Employee Directors (2001 Directors Plan). The 2001 Directors Plan expired on February 29, 2004, and no additional grants will be made under the plan. There were 25,958 stock options outstanding and exercisable under this plan at May 31, 2011.

In March 2010, the Company granted 200,000 stock options. The weighted average Black-Scholes value of each option granted was \$0.93. In May 2010, MSC issued 10,000 shares of restricted stock. These shares will vest over three years. In March 2011, the Company granted 200,000 stock options. The weighted average Black-Scholes value of each option granted was \$4.13. In May 2011, MSC issued 10,000 shares of restricted stock, which will vest over three years.

- (14) **Segments.** MSC operates in one segment based on how the Chief Operating Decision Maker views the business for evaluating performance and making operating decisions. The Company provides material-based solutions for acoustical and coated applications. The acoustical material-based solutions include multilayer composites consisting of metals, polymers and other materials used to manage noise and vibration. The coated metal material-based solutions include coil coated and electrogalvanized (EG) protective and decorative coatings applied to coils of metal in a continuous, high-speed, roll-to-roll process. MSC's material-based solutions are designed to meet specific customer requirements for the automotive, appliance, building and construction, lighting and electronics markets.

Each of our domestic facilities houses one or more principal production lines. These lines are used to transform coils of cold rolled steel into materials for our customers in a continuous process. The process varies somewhat, depending on the application and what materials are to be bonded to the cold rolled steel coil. However, the core production line equipment does not change markedly. The products are differentiated by the type of material bonded to the steel and the bonding method employed. Various paints and coatings are applied by running the uncoiled steel ribbon through a paint bath and baking it onto the steel in high temperature ovens. Our proprietary Quiet Steel® is produced by bonding two metal coils together with highly engineered viscoelastic core materials. Zinc and zinc-nickel corrosion protections are applied by running the steel through metal electrolyte baths and galvanizing the material to the metal with electricity. This galvanization process is only performed at our Walbridge facility.

We use a significant level of shared assets, and share resources for sales, general and administrative expense, and management across each of our product categories. It is common for a single customer to purchase products from several different product categories as well as from different plants. Capital projects, whether for cost savings or generating incremental revenue, are evaluated individually based on estimated economic returns (e.g., net present value, return on investment), not based on related product line or geographic location. We use a centralized functional management structure, and share administration and production resources, to deliver individual products that, together, provide solutions to our customer base. Disaggregated financial information for individual products is largely limited to top-line revenues.

Net Sales (\$ in millions)	For the three months ended			
	2011		May 31, 2010	
Acoustical	\$ 17.6	49%	\$ 21.4	50%
Coated	18.4	51	21.1	50
Total Net Sales	\$ 36.0	100%	\$ 42.5	100%

- (15) **Recent Accounting Pronouncements.** On May 12, 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-04. The ASU is the result of joint efforts by the FASB and the International Accounting Standards Board (IASB) to develop a single, converged fair value framework that is, converged guidance on how (not when) to measure fair value and on what disclosures to provide about fair value measurements. There are few differences between the ASU and its international counterpart, International Financial Reporting Standard (IFRS) 13. While

the ASU is largely consistent with existing fair value measurement principles in U.S. GAAP, it expands ASC 820's existing disclosure requirements for fair value measurements and makes other amendments. Many of these amendments are being made to eliminate unnecessary wording differences between U.S. GAAP and IFRS. However, some could change how the fair value measurement guidance in ASC 820 is applied. The ASU is effective for interim and annual periods beginning after December 15, 2011, for public companies. MSC is evaluating the impact of adopting this guidance, but does not expect it to have a material impact on the Company's results of operations, financial position and cash flow.

On June 16, 2011, the FASB issued ASU 2011-05, which revises the manner in which entities present comprehensive income in their financial statements. The new guidance removes the presentation options in ASC 220 and requires entities to report components of comprehensive income in either (1) a continuous statement of comprehensive income or (2) two separate but consecutive statements. Under the two-statement approach, the first statement would include components of net income, which is consistent with the income statement format used today, and the second statement would include components of other comprehensive income (OCI). The ASU does not change the items that must be reported in OCI. For public entities, the ASU's amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company is currently evaluating the impact of adopting this guidance, which may result in changes in the presentation of its financial statements.

(16) **Commitments and Contingencies.** MSC is a party to various legal proceedings in connection with the remediation of certain environmental matters. The most significant proceeding relates to the Company's involvement in a Superfund site in Gary, Indiana. MSC has been named as a potentially responsible party (PRP) under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) for the surface, soil and ground water contamination at this site.

The United States District Court for the Northern District of Indiana has entered a Consent Decree between the government and certain PRPs on the scope of the remediation work at the Gary site. The Company receives periodic updates on the projected costs of the remediation work from the environmental consultant employed by certain PRPs (including the Company) to manage the remediation project. Remediation work is ongoing and MSC maintains a letter of credit for approximately \$1.2 million to secure its obligation to pay its currently estimated share of the remediation expenses at this site. The amount of the Company's liability recorded for this site was \$0.9 million at May 31, 2011.

In 2003, MSC, along with many other companies, was named as a PRP by the United States Environmental Protection Agency (USEPA) under CERCLA at the Lake Calumet Cluster Site in Chicago, Illinois, for allegedly sending certain waste from its Elk Grove Village facility to the site. The Illinois EPA (ILEPA) has assumed the role of lead agency for the site and is conducting soil grading work, capping and a cost analysis with funds made available by the state. No lawsuits have been filed against any of the PRPs, but it is likely that the USEPA will seek reimbursement of its past costs. In March 2010, the USEPA indicated it will make Lake Calumet a superfund site, which will provide additional federal funds for the clean-up. To date, we have not received any notice that this

designation has occurred. MSC cannot determine what effect, if any, this change in designation will have on its liability. The estimate of the Company's liability for this site was \$0.3 million at May 31, 2011.

In 1998, the California Environmental Protection Agency (CEPA) named MSC and numerous other entities as PRPs under CERCLA at the Chatham Brothers Barrelyard Site in Escondido, California (Chatham Site) for surface, soil and ground water contamination associated with former waste handling activities there. CEPA alleged that a predecessor to MSC arranged for the transportation and treatment of waste handled at the Chatham Site. California's Department of Toxic Substances Control (DTSC) is acting as lead agency for the investigation and cleanup of the Chatham Site. It has approved a Remedial Action Plan and remediation is expected to last well into the future. The amount of the Company's liability recorded for this site was \$0.1 million at May 31, 2011.

The Company's environmental reserves were approximately \$1.3 million as of May 31, 2011, and February 28, 2011. Management does not believe that the outcome of environmental proceedings will have a material adverse effect on MSC's financial statements, given the reserves recorded as of May 31, 2011, and, where applicable, taking into account contributions from other PRPs. There are, however, a number of uncertainties. These include, without limitation, the final cost of site cleanup, the discretionary authority of federal and state regulatory authorities in bringing enforcement actions and other factors that affect the Company's exposures.

The Company is also a party to various legal actions and customer disputes arising in the ordinary course of its business. These legal actions and customer disputes cover a broad variety of claims spanning its entire business. The Company believes that the resolution of these legal actions and customer disputes will not, individually or in the aggregate, have a material adverse effect on its financial statements.

- (17) **Middletown Asset Sale.** The Company closed its coil coating facility in Middletown, Ohio, in July 2004. On June 24, 2010, MSC sold the facility to NCI Group for \$4.9 million. The carrying value of these assets prior to the sale was \$2.9 million. The Company recorded a gain on the sale of approximately \$1.9 million (net of fees) in the second quarter of fiscal 2011.
- (18) **Restructuring.** In the first quarter of fiscal 2011, the Company executed a restructuring plan in conjunction with the sale of certain coil coating assets located in Elk Grove Village. See Note 21, "Elk Grove Village Asset Sale," for additional discussion of the sale. The plan included eliminating positions in production and SG&A departments. The Company recognized approximately \$1.1 million in employee termination benefit and related expenses, all of which was paid by the end of fiscal 2011. During the fourth quarter of fiscal 2011, MSC recognized severance expense of \$0.2 million, which will be paid through fiscal 2012.

The year-to-date activity in the restructuring reserve is presented in the chart below.

(in thousands)	
Restructuring Reserve as of February 28, 2011	\$ 202
Restructuring Expenses Recorded During Fiscal 2012	
Cash Payments and Other Adjustments	(56)
Restructuring Reserve as of May 31, 2011	\$ 146

- (19) **Asset Impairment.** During the first quarter of fiscal 2011, in conjunction with the sale of a portion of our coil coating assets, we conducted an impairment analysis of the real estate and building improvement assets at our Plant #7 in Elk Grove Village, Illinois. These assets housed the coil coating assets that were sold. With the sale, the future cash flow generated by the building was substantially reduced. (See Note 21, Elk Grove Village Asset Sale, for further discussion.) We compared the projected undiscounted future cash flows of the real estate and building improvement assets to their carrying value and determined their value might be impaired. We requested a valuation from a reputable commercial real estate firm. Based on that valuation, we determined the assets were impaired and recorded a \$3.7 million write down of the assets in the first quarter of fiscal 2011.
- (20) **Note Receivable from Morrisville Asset Sale.** In March 2010, the buyer made its regular quarterly payment of principal and interest, reducing the balance of the note to \$1.6 million. On April 30, 2010, the buyer paid \$1.6 million to retire the note.
- (21) **Elk Grove Village Asset Sale.** On April 12, 2010, the Company sold a portion of its coil coating assets and associated business base to Roll Coater, Inc. for \$10 million (\$9.3 million after investment banking fees). Roll Coater purchased the coil coating machinery, related processing equipment, and corresponding customer base associated with MSC's Plant #7 in Elk Grove Village, Illinois. Based on fiscal 2010 shipments, the associated business base included approximately \$28.6 million in sales of general-line coil coated products. In addition, MSC and Roll Coater entered into a multi-year lease agreement to store the purchased equipment. The transaction did not include the sale of any real estate by Material Sciences. The Company recorded a gain on the sale of approximately \$4.7 million (net of \$0.3 million of legal fees) in the first quarter of fiscal 2011. MSC also recorded \$1.1 million of employee termination benefit expenses and \$0.2 million of inventory write-off expenses in connection with the sale.
- (22) **Plan to Sell Elk Grove Village Building.** In April 2011, after receiving authority from the Board of Directors, management committed to a plan to sell the building located at 2200 East Pratt Boulevard in Elk Grove Village, Illinois. This building houses our corporate offices and housed our coil coating assets before they were sold in April 2010. Since the production portion of the building is idle, and we have sufficient office space in our Plant #2 building in Elk Grove Village, Illinois, to accommodate our corporate offices, this building is no longer critical to our business. We do not expect the sale to occur within the next 12 months due to current economic conditions and the availability of similar space in the Chicago area. We have also leased significant portions of the building for the next two years, which may affect our ability to sell it quickly. Because of these factors, the building does not meet the criteria to be classified as an asset held for sale; however, if circumstances change, we will reevaluate the appropriate classification of the building.

MATERIAL SCIENCES CORPORATION and SUBSIDIARIES

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following management's discussion and analysis of financial condition and results of operations (MD&A) should be read in conjunction with the unaudited Condensed Consolidated Financial Statements and related notes, included in Item 1 of this Form 10-Q, and the audited Consolidated Financial Statements and related notes and the MD&A included in the Company's Annual Report on Form 10-K for the year ended February 28, 2011, filed on April 29, 2011 (Form 10-K), as well as the Company's other filings with the Securities and Exchange Commission.

Executive Summary

Material Sciences Corporation and its subsidiaries (the Company, MSC, we, our or us) design, manufacture and market material-based solutions for acoustical and coated applications. Our acoustical material-based solutions include composites that consist of layers of metal, rubber and other materials used to manage noise and vibration in such products as automotive body panels; brake dampers; engine parts; appliances; heating, ventilation and air conditioning (HVAC) and computer disk drives. Our coated material-based solutions include coil coated and electrogalvanized (EG) protective, decorative and rubber coatings applied to coils of metal in a continuous, high-speed, roll-to-roll process for such products as automotive body panels and fuel tanks, building products, gaskets, appliances and lighting fixtures. These solutions are designed to meet specific customer requirements for the automotive, building, consumer and industrial markets. We use a significant level of shared assets and management across each of our product categories. It is common for a single customer to purchase products from several different product categories.

We continue our efforts to expand existing relationships in Asia through our sales offices in Korea, Malaysia and China, and have an ongoing relationship with Hae Won in Korea and Federal Iron Works in Malaysia for the production of our products.

As a part of our strategic planning process, management evaluates the strategic position, growth and economic value potential of our businesses with the objective of creating additional value for our shareholders. This planning process includes a review of organic growth opportunities, potential sales of assets, acquisitions of products or businesses and strategic partnerships.

In April 2010, we sold a portion of our coil coating assets, including the coil coating machinery, related processing equipment, and corresponding customer base associated with our Plant #7 in Elk Grove Village, Illinois, to Roll Coater, Inc. for \$10 million (\$9.3 million after investment banking fees). Based on fiscal 2010 shipments, the associated business base included approximately \$28.6 million in sales of general-line coil coated products. In addition, we entered into a three-year lease agreement to store the purchased equipment. The transaction did not include the sale of any real estate by MSC. The Company recorded a gain on the sale of approximately \$4.7 million (net of \$0.3 million of legal expenses) in the first quarter of fiscal

2011, which was partially offset by severance expenses of \$1.1 million and inventory disposal costs of \$0.2 million. As part of the transaction, MSC agreed that it would not develop, manufacture or sell general-line coil coating products in some North American markets for five years.

Although MSC has engaged in significant sales of production assets in recent years, it is unlikely this will continue. We will consider selling other non-core assets if the circumstances are appropriate. As discussed in Note 22 of the Notes to the Condensed Consolidated Financial Statements in Item 1 of this Form 10-Q, we plan to sell the building located at 2200 East Pratt Boulevard in Elk Grove Village, Illinois.

Results of Operations

Here is a summary of our consolidated financial performance for the three months ended March 31, 2011 and 2010:

(\$ in thousands)	Three Months Ended		
	2011	May 31, 2010	% Variance
Net Sales	\$ 36,036	\$ 42,467	(15.1)%
Gross Profit	\$ 9,521	\$ 9,483	0.4%
% of Net Sales	26.4%	22.3%	
Selling, General and Administrative	\$ 5,550	\$ 5,286	5.0%
% of Net Sales	15.4%	12.4%	

Sales

(\$ in thousands)	Net Sales for the Three Months Ended May 31,			
	2011	2010	\$ Variance	% Variance
Application				
Acoustical	\$ 17,619	\$ 21,400	\$ (3,781)	-17.7%
Coated	18,417	21,067	(2,650)	-12.6
Total	\$ 36,036	\$ 42,467	\$ (6,431)	-15.1%

Comparison of Results of Operations for the Three Months Ended May 31, 2011 and 2010

Sales in the quarter ended May 31, 2011, decreased by \$6.4 million from the prior fiscal year quarter.

Acoustical sales declined \$3.8 million due to weaker demand for our products from our automotive customers. Body panel laminate sales for the first quarter of fiscal year 2012 were off \$3.2 million, mainly due to lower shipments to 1) General Motors as some models containing Quiet Steel® have gone out of production and the company stopped using the technology on certain models; and 2) lower body panel laminate sales to other automotive companies due to plant shutdowns associated with parts shortages related to the recent crisis in Japan. Brake sales were also lower by \$0.5 million

primarily due to lower domestic aftermarket brake sales. Returns and allowances (a component of net sales) decreased by \$0.1 million due mainly to lower revenues generated by scrap sales.

Sales of coated metal products declined overall by \$2.6 million. The prior year sale of coil coating assets at the Elk Grove Village Plant #7 and associated revenue accounted for a \$6.1 million reduction. This facility primarily served the appliance and building products markets. Fuel tank sales to Ford decreased \$3.3 million because certain vehicles at Ford have converted from the coated steel supplied by MSC to plastic fuel tank materials. These lower volumes were offset by \$5.1 million in stronger sales of electrogalvanized material products used in automotive body panel applications, as well as, \$0.8 million in higher sales from our new ElectroBrite® product. Returns and allowances (a component of net sales) improved by \$0.9 million due to improvements in product mix (lower coil coating and higher EG), product quality and scrap sales.

Gross Profit

First quarter gross profit was \$9.5 million for both fiscal 2012 and 2011. However, it was a higher percent of net sales in the latest period, 26.4% of net sales, versus 22.3% in the prior fiscal year quarter. This resulted from the two primary factors detailed below:

Sales and operating factors accounted for a \$0.4 million decrease in gross profit, reflecting the following:

A decline in acoustical sales.

Higher material costs, mainly metal.

An improvement in sales mix (margin improvement) because of a lower volume of coil coating sales (due to the Elk Grove Village asset sale), and higher sales of EG coated metal.

The cost of non-conformance (product quality, net of scrap sales) improved by \$0.4 million from a year ago because:

Coil coating sales, which had a high cost of non-conformance, were lower in the first quarter of fiscal 2012 due to the Elk Grove Village asset sale.

Scrap metal sales, which are a byproduct of our manufacturing process, increased due to higher production volumes and improved scrap pricing in the secondary market.

Selling, General and Administrative (SG&A) Expenses

SG&A expenses for the three months ended May 31, 2011, were \$5.6 million, or 15.4% of net sales, compared with \$5.3 million, or 12.4% of net sales, in the same period last year. SG&A expenses in the first quarter of fiscal 2012 were higher by \$0.3 million compared with last year. This is principally due to incentive costs recognized in the current year that did not exist a year ago, partially offset by reduced employee-related expenses and lower director stock incentive expenses in the latest period.

Total Other Income, Net

Total other income, net for the three months ended May 31, 2011, was \$0.4 million compared with \$0.2 million in the same period of fiscal 2011. The increase was primarily due to higher income from leasing a portion of our Elk Grove Village Plant #7.

Income Taxes

The Company evaluates its deferred income taxes on a quarterly basis to determine if valuation allowances are required, in full or in part. This includes considering available positive and negative evidence, such as past operating results, the existence of cumulative losses in the most recent fiscal years and our forecast of future taxable income on a jurisdiction-by-jurisdiction basis. In determining future taxable income, we review the reversal of temporary differences and the implementation of feasible and prudent tax planning strategies. After analyzing the ability to generate sufficient taxable income to utilize the benefit of the deferred tax assets, the Company established a valuation allowance on its U.S. and German deferred tax assets as of February 28, 2009. During the three months ended May 31, 2011, MSC recorded a decrease in the valuation allowances of approximately \$1.7 million relating to the tax effects of the income generated during the first quarter of fiscal 2012 and \$1.9 million related to the write-off of net operating losses, primarily in Pennsylvania, due to the liquidation of a subsidiary and the inability to utilize the losses. There were no other material changes to the Company's valuation allowances during the three months ended May 31, 2011. A full valuation allowance continues to be maintained for MSC's remaining U.S. and German deferred tax assets at May 31, 2011.

The Company does not anticipate that the total amount of unrecognized tax benefits of \$2.4 million at May 31, 2011, will significantly change during the next 12 months.

For the three months ended May 31, 2011, MSC's effective income tax rate for continuing operations was an expense of 5.9%, compared with an expense of 7.0% in the same period last year. The low rates in both periods are due to the utilization of deferred tax assets principally net operating losses and AMT credits.

Liquidity and Capital Resources

We have historically financed our operations with funds generated from operating activities, borrowings under credit facilities and sales of various assets. We believe that our cash on hand, cash generated from operations and cash available under our credit facility will be sufficient to fund our operations and meet our working capital needs for the foreseeable future.

During the first three months of fiscal 2012, we generated \$5.7 million of cash from operating activities compared with \$2.9 million during the first three months of last fiscal year. The increase was primarily due to a decrease in accounts receivable in the current quarter, compared to an increase in the prior quarter related to the timing of sales and cash receipts in the two periods resulting in \$7.5 million more in cash. This increase was partially offset by an increase in inventory of \$4.4 million in fiscal 2012 due to higher current year production volumes, the timing of raw material receipts in fiscal 2012 and reductions in inventory in the prior year quarter as part of the sale of the coil coating assets.

In the first three months of fiscal 2012, we invested \$1.5 million in capital improvement projects, compared with \$0.5 million in the same period last year. The increase was primarily attributable to additional investments in production equipment at our Elk Grove Village, Illinois Plant #2 and Walbridge, Ohio facilities. In the prior year quarter, we generated \$9.3 million from the sale of the Elk Grove Village Plant #7 production assets and the collection of \$1.7 million from the Morrisville note receivable; these activities did not repeat in the current year quarter.

In the first three months of fiscal 2012, we spent \$7.9 million purchasing our common stock.

The Company has a credit line (Line) with JPMorgan Chase Bank, N.A. Interest on the Line is at the bank's prime rate (3.25% as of May 31, 2011) or Libor plus 1.50%, at our discretion. There are annual letter of credit fees of 1.50% on outstanding letters of credit and a 0.25% fee on the annual unused credit line. The Line is secured by a borrowing base equal to a specified percentage of accounts receivable and liens on other Company assets including inventory, equipment, real property and intellectual property reduced by outstanding letters of credit. In April 2010, the Line was amended to reduce the credit line to \$7.5 million and increase the minimum availability covenant to \$2.5 million. On May 10, 2011, MSC and JPMorgan Chase Bank, N.A. agreed to extend the existing Line for two years on substantially identical terms.

Due to the borrowing base limitations and outstanding letters of credit of \$1.3 million, the net amount available for borrowing at May 31, 2011, was \$3.7 million. The lender may, at its discretion subject to the terms of the Line, modify the advance rates used in computing the borrowing base, which may limit the amounts available for future borrowings. The lack of the borrowing availability under the credit line and our potential inability to obtain a replacement source of credit could materially affect our operations and financial condition. There were no borrowings outstanding under the Line as of May 31, 2011, nor were any amounts borrowed during the three months ended May 31, 2011 or 2010.

Our Board of Directors authorized the repurchase of shares of the Company's common stock as follows:

On January 7, 2008, 1,000,000 shares

On January 28, 2011, 1,000,000 shares

On May 27, 2011, 1,000,000 shares

The shares may be repurchased from time-to-time on the open market, subject to market conditions and other factors, and generally will be funded with internally generated cash. The Company repurchased 98,316 shares under the January 2008 authorization (completing that authorization) and 1,000,000 shares under the January 2011 authorization (completing that authorization) during the three months ended May 31, 2011. At May 31, 2011, there were 1,000,000 shares available for purchase under the May 2011 authorization.

MSC is party to various legal proceedings in connection with the remediation of certain environmental matters. The Company's environmental reserves were approximately \$1.3 million as of May 31, 2011, and February 28, 2011. Refer to Note 16 of the Notes to the Condensed Consolidated Financial Statements in Item 1 of this Form 10-Q for additional information.

Contractual Obligations

As of May 31, 2011, there were no significant changes to the contractual obligations table presented in our Form 10-K.

Critical Accounting Policies

We have identified significant accounting policies that, as a result of the judgments, uncertainties, uniqueness and complexities of the underlying accounting standards and operations involved could result in material changes to our financial condition or results of

operations under different conditions or using different assumptions. Our most critical accounting policies, to which there have been no changes, are related to the following areas: revenue recognition, allowance for doubtful accounts, inventory, long-lived assets, income taxes, environmental reserves and defined benefit retirement plans. Details regarding our use of these policies and the related estimates are described fully in our Form 10-K.

Cautionary Statement Concerning Forward-Looking Statements

The Securities and Exchange Commission encourages companies to disclose forward-looking information so that investors and shareowners can better understand a company's future prospects and make informed investment decisions. This Form 10-Q contains forward-looking statements that include, without limitation, information about our anticipated results based on our plans and assumptions. We have tried, wherever possible, to identify these statements by using words such as anticipates, estimates, expects, projects, intends, will, plans, believes and similar terms in connection with any discussion of future operating or financial performance.

Achievement of future results is subject to risks, uncertainties and assumptions. Should known or unknown risks or uncertainties materialize, or should underlying assumptions prove inaccurate, actual results could vary materially from what we anticipate, estimate or project in this Form 10-Q. Many of the factors that could cause this are discussed in detail in Part I, Item 1A, Risk Factors of our Form 10-K. As discussed there, we rely on sales to a small number of customers, and the loss of any one of these customers could have a material adverse impact on revenues and profits.

We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. This discussion of potential risks and uncertainties is by no means complete but is designed to highlight important factors that may affect our financial condition or results of operations. Other sections of this Form 10-Q may include additional factors that could have an adverse impact on our business and financial performance. In addition, we operate in a competitive environment. New risks emerge from time to time and it is not possible for us to predict all risk factors, nor can we assess the impact of all these risk factors on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those in any forward-looking statements. Given this situation, stockholders should not place undue reliance on forward-looking statements as a prediction of actual results.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no material change in the assessment of our sensitivity to market risk since the presentation set forth in Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in our Annual Report on Form 10-K, filed with the Securities and Exchange Commission on April 29, 2011, for the fiscal year ended February 28, 2011.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures. MSC maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our controls and procedures also ensure this

information is accumulated and communicated to management, including the Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions on required disclosure. MSC periodically reviews the design and effectiveness of its disclosure controls and internal control over financial reporting. The Company makes modifications to improve the design and effectiveness of its disclosure controls and internal control over financial reporting, and may take other corrective actions if its reviews identify a need for these.

There are inherent limitations to the effectiveness of any system of disclosure controls and internal control over financial reporting, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and internal control over financial reporting can only provide reasonable assurance of achieving their control objectives.

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of the Company's management, including the CEO and CFO, of the effectiveness of the design and operation of MSC's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based on that evaluation, management concluded that the Company's disclosure controls and procedures were effective at the reasonable assurance level as of the end of the period covered by this Quarterly Report.

Changes in internal control over financial reporting. During the quarter ended May 31, 2011, there were no changes in internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The required certifications of our principal executive officer and principal financial officer are included as exhibits to this Quarterly Report on Form 10-Q. The disclosures set forth here contain information on the evaluation of our disclosure controls and procedures and changes in internal control over financial reporting referred to in those certifications. For a more complete understanding of the matters covered by the certifications, read Item 9A of the Company's 2011 Annual Report on Form 10-K as filed with the SEC on April 29, 2011.

MATERIAL SCIENCES CORPORATION

FORM 10-Q

For the Quarter Ended May 31, 2011

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

MSC is party to various legal actions arising in the ordinary course of its business. These legal actions cover a broad variety of claims spanning the Company's entire business. We believe that the resolution of these legal actions will not, individually or in the aggregate, have a material adverse effect on the Company's financial statements. See Note 16 to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Form 10-Q.

Item 1A. Risk Factors

Our operations and financial results are subject to various risks and uncertainties that could adversely affect our business, financial condition, and results of operations, cash flows, and liquidity, and the market price of our common stock. Item 1A of our Annual Report on Form 10-K for the year ended February 28, 2011, includes a detailed discussion of the risk factors we believe still exist in our business. In addition to those factors, other risks and uncertainties may have a material adverse effect on our business, financial condition, and/or operating results, cash flows, and liquidity.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) None

(b) None

(c) Our Board of Directors authorized the repurchase of shares of the Company's common stock as follows:

On January 7, 2008, 1,000,000 shares

On January 28, 2011, 1,000,000 shares

On May 27, 2011, 1,000,000 shares

The shares may be repurchased from time-to-time on the open market, subject to market conditions and other factors, and generally will be funded with internally generated cash. Frequently, MSC uses written trading plans under Rule 10b5-1 of the SEC to complete the purchases.

During the three months ended May 31, 2011, the Company repurchased 98,316 shares under the January 2008 authorization (completing that authorization) and 1,000,000 shares under the January 2011 authorization (completing that authorization). All of the shares purchased were acquired under a written trading plan.

At May 31, 2011, there were 1,000,000 shares available for purchase under the May 2011 authorization. On May 27, 2011, the Company entered into a written trading plan to purchase up to 1 million shares under Rule 10b5-1 of the Exchange Act as part of the existing share repurchase program. The plan commenced on June 1, 2011, and will expire on May 31, 2012, or when 1 million shares have been repurchased, whichever occurs first.

The following table shows the repurchases of common stock made by the Company during the fiscal quarter ended May 31, 2011:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that may Yet Be Purchased Under the Plans or Programs (1)
March 1 31, 2011	256,598	\$ 6.71	256,598	841,718
April 1 30, 2011	305,875	\$ 7.08	305,875	535,843
May 1 31, 2011	535,843	\$ 7.19	535,843	0
Total	1,098,316	\$ 7.05	1,098,316	

- (1) Of the shares repurchased during the fiscal quarter ended May 31, 2011, 1,098,316 were bought under an open market stock repurchase program (Rule 10b5-1 plan) which was previously announced on February 25, 2011 and which was set to terminate on February 28, 2012. All shares authorized under the February 2011 repurchase program have been repurchased.
