INTRODUCTION

Except where the context otherwise requires and for purposes of this annual report only:

we, us, our company, the company, our, refer to China Finance Online Co. Limited, or CFO Hong Kong and its subsidiaries, and the context of describing our operations include consolidated affiliates in China, Hong Kong or British Virgin Islands;

shares and ordinary shares refer to our ordinary shares, preferred shares refers to our preferred shares, all of which were converted into our ordinary shares upon the completion of our initial public offering on October 20, 2004. ADSs refers to our American depositary shares, each of which represents five ordinary shares, and ADRs refers to the American depositary receipts which evidence our ADSs;

China or PRC refers to the People's Republic of China, and solely for the purpose of this annual report, excluding Taiwan, Hong Kong and Macau;

Hong Kong refers to the Hong Kong Special Administrative Region of the People's Republic of China;

U.S. GAAP refers to generally accepted accounting principles in the United States; and

all references to Renminbi, RMB or yuan are to the legal currency of China, all references to U.S. dollars, dollars, \$ or US\$ legal currency of the United States and all references to Hong Kong dollars or HK\$ are to the legal currency of Hong Kong. Any discrepancies in any table between totals and sums of the amounts listed are due to rounding.

We and certain selling shareholders of our company completed the initial public offering of 6,200,000 American depositary shares, each representing five of our ordinary shares, par value HK\$0.001 per share on October 20, 2004. On October 15, 2004, we listed our ADSs on the NASDAQ Global Market (known as the Nasdaq National Market prior to July 1, 2006), or Nasdaq, under the symbol **JRJC**. Effective from January 3, 2011, our ADSs were elevated to trade on the NASDAQ Global Select Market.

FORWARD-LOOKING INFORMATION

This annual report on Form 20-F contains forward-looking statements that are based on our current expectations, assumptions, estimates and projections about us and our industry. All statements other than statements of historical fact in this annual report are forward-looking statements. These forward-looking statements can be identified by words or phrases such as may, will, expect, anticipate, estimate, intend, plan, /are likely to or other and similar expressions. The forward-looking statements included in this annual report relate to, among others:

our goals and new strategies, including how we effect our goals and new strategies;

our future business developments, business prospects, financial condition and results of operations;

our future pricing strategies or policies;

our plans to expand our service offerings and upgrade our business strategies;

Table of Contents

our plans to use acquisitions and investments as part of our corporate strategy;

our strategic transformation initiative;

cost-cutting initiatives and their effect on efficiency and operational performance;

competition in the PRC financial data and information services industry, securities investment advisory and wealth management services industry;

the market prospect of the online financial data and information services market;

the market prospect of the securities investment advisory and wealth management services markets;

performance of China's securities markets;

performance of Hong Kong's securities markets;

global macroeconomic uncertainties;

wavering investor confidence that could impact our business;

our ability to retain key personnel and attract new talents;

possible non-cash goodwill, intangible assets and investment impairment may adversely affect our net income;

PRC governmental policies relating to taxes and how they will impact our business;

PRC governmental policies relating to the Internet and Internet content providers;

PRC governmental policies relating to securities investment advisory companies to provide advisory services on securities and related products;

PRC governmental policies relating to wealth management services;

Edgar Filing: China Finance Online Co. LTD - Form 20-F

PRC governmental policies relating to the distribution of content, especially the distribution of financial content over the Internet;
and

PRC governmental policies relating to mobile value-added services.

These forward-looking statements involve various risks, assumptions and uncertainties. Although we believe that our expectations expressed in these forward-looking statements are reasonable, we cannot assure investors that our expectations will turn out to be correct. Our actual results could be materially different from and worse than our expectations. Important risks and factors that could cause our actual results to be materially different from our expectations are generally set forth in Item 3.D of this annual report, Key Information Risk factors and elsewhere in this annual report.

The failure of these markets to grow at the projected rates may have a material adverse effect on our business and the market price of our ADSs. In addition, the relatively new and rapidly changing nature of the online financial data and information services industry and securities investment advisory and wealth management services industry subjects any projections or estimates relating to the growth prospects or future condition of our markets to significant uncertainties. Furthermore, if any one or more of the assumptions underlying the market data turn out to be incorrect, actual results may differ from the projections based on these assumptions.

Table of Contents

The forward-looking statements made in this annual report relate only to events or information as of the date on which the statements are made in this annual report. You should not place undue reliance on these forward-looking statements and you should read these statements in conjunction with the risk factors disclosed in Item 3.D of this annual report, Key Information Risk factors. We undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date on which the statements are made or to reflect the occurrence of unanticipated events.

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not Applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not Applicable.

ITEM 3. KEY INFORMATION

A. Selected financial data.

The selected historical consolidated financial statement of operations data for the years ended December 31, 2009, 2010 and 2011 and the selected historical consolidated balance sheet data as of December 31, 2010 and 2011 set forth below are derived from our audited historical consolidated financial statements included elsewhere in this annual report. The selected historical consolidated statement of operations data for the years ended December 31, 2007 and 2008 and the selected historical consolidated balance sheet data as of December 31, 2007, 2008 and 2009 set forth below are derived from our audited historical consolidated financial statements, which are not included in this annual report. This data may not be indicative of our future condition or results of operations and should be read in conjunction with Operating and Financial Review and Prospects and the consolidated financial statements and accompanying notes.

(in thousands of U.S. dollars)	As of December 31,				
	2007	2008	2009	2010	2011
Consolidated balance sheet data:					
Cash and cash equivalents	\$ 74,729	\$ 97,544	\$ 107,391	\$ 106,773	\$ 64,641
Current working capital(2)	53,811	78,226	81,255	90,146	90,098
Total assets	103,885	141,823	165,609	180,091	159,977
Deferred revenue, current	20,457	28,202	30,620	32,995	17,287
Total current liabilities	31,034	35,472	52,401	60,259	61,903
Deferred revenue, non-current	4,665	8,786	14,547	13,022	7,237
Total China Finance Online Co. limited shareholders equity	67,834	96,942	97,407	105,900	90,941

(1) Each ADS represents five ordinary shares.

(2) Current working capital is the difference between total current assets and total current liabilities.

Table of Contents**Exchange Rate Information**

We have published our financial statements in U.S. dollars. Our business is primarily conducted in China and is denominated in Renminbi. Periodic reports will be made to shareholders and will be expressed in U.S. dollars using the then-current exchange rates. The conversion of Renminbi into U.S. dollars in this annual report is based on the official base exchange rate published by the People's Bank of China. Unless otherwise noted, all translations from Renminbi to U.S. dollars in this annual report were made at \$1.00 to RMB6.3009, which was the prevailing rate on December 31, 2011. The prevailing rate on April 16, 2012 was \$1.00 to RMB 6.2960. We make no representation that any Renminbi or U.S. dollar amounts could have been, or could be, converted into U.S. dollars or Renminbi, as the case may be, at any particular rate, the rates stated below, or at all. The PRC government imposes controls over its foreign currency reserves in part through direct regulation of the conversion of Renminbi into foreign exchange and through restrictions on foreign trade.

The People's Bank of China sets and publishes daily a base exchange rate. Until July 21, 2005, the People's Bank of China set this rate with reference primarily to the supply and demand of Renminbi against the U.S. dollar in the market during the prior day. Beginning on July 21, 2005, the People's Bank of China has set this rate with reference primarily to the supply and demand of Renminbi against a basket of currencies in the market during the prior day. The People's Bank of China also takes into account other factors such as the general conditions existing in the international foreign exchange markets. Although governmental policies were introduced in the PRC in 1996 to reduce restrictions on the convertibility of Renminbi into foreign currency for current account items, conversion of Renminbi into foreign exchange for capital items, such as foreign direct investment, loans or security, requires the approval of the State Administration for Foreign Exchange and other relevant authorities.

The following table sets forth various information concerning exchange rates between the Renminbi and the U.S. dollar for the periods indicated. These rates are provided solely for your convenience and are not necessarily the exchange rates that we used in this annual report or will use in the preparation of our periodic reports or any other information to be provided to you.

	Average(1)	High	Low	Period-end
		<i>(RMB per U.S.\$1.00)</i>		
December 31, 2007	7.5806	7.8127	7.2946	7.2946
December 31, 2008	6.9193	7.2946	6.7800	6.8225
December 31, 2009	6.8314	6.8399	6.8201	6.8282
December 31, 2010	6.7668	6.8284	6.6227	6.6227
December 31, 2011	6.4445	6.6349	6.3009	6.3009
Most recent six months:				
October 2011	6.3566	6.3762	6.3233	6.3233
November 2011	6.3408	6.3587	6.3165	6.3482
December 2011	6.3281	6.3421	6.3009	6.3009
January 2012	6.3168	6.3306	6.3001	6.3115
February 2012	6.3000	6.3116	6.2919	6.2919
March 2012	6.3081	6.3359	6.2840	6.2943
April 2012(through 16th)	6.3002	6.3072	6.2879	6.2960

- (1) Annual averages are calculated using the average of month-end rates of the relevant year. Monthly averages are calculated using the average of the daily rates during the relevant period.

Table of Contents

B. Capitalization and indebtedness.

In March 2011, Shenzhen Genius Information Technology Co. Ltd., or CFO Genius, entered into agreements with China Merchant Bank Company Shenzhen Branch and Woori Bank China Limited Shenzhen Branch respectively, under which CFO Genius deposited RMB 46,447,500 (approximately US\$7,372,000) with China Merchant Bank Company Limited Shenzhen Branch and deposited RMB 46,950,000 (approximately US\$7,451,000) with Woori Bank China Limited Shenzhen Branch to support Hong Kong Genius Information Technology Co., Ltd., or CFO HK Genius term loan of HKD55,000,000 (approximately US\$7,077,000) and revolving loan of HKD44,000,000 (approximately US\$5,661,000) granted at Hong Kong Wing Lung Bank.

In June 2011, CFO Genius renewed agreement with China Merchant Bank Company Shenzhen Branch, under which CFO Genius deposited RMB 91,730,000 (approximately US\$14,558,000) with China Merchants Bank Company Limited Shenzhen Branch to support CFO HK Genius's term loan facility up to HKD 50,000,000 (approximately US\$6,433,000) and revolving loan facility of HKD 49,000,000 (approximately US\$6,305,000).

As of December 31, 2011, the outstanding loan amount drawn down by CFO HK Genius is HKD 149,000,000 (approximately US\$19,171,000).

C. Reasons for the offer and use of proceeds.

Not Applicable.

D. Risk factors.

Risks relating to our business

Any prolonged or substantial slowdown in the global or Chinese economy could adversely affect Chinese investors' interests and engagement in the securities market, which may in turn have a significantly negative impact on our business.

Our business can be adversely affected by the general macroeconomic environment. Global economic, securities market and financial developments, including continued or further recessionary economic conditions as well as the current volatility and uncertainty concerning the euro, all could significantly influence the overall interests and engagement of Chinese investors in the stock market. China macro economic growth has also been slowed down due to various factors, including high inflation, a tighter monetary policy and deteriorating global economic conditions. Any prolonged or substantial slowdown in the global or Chinese economy could adversely affect Chinese investors' interests and engagement in the securities market, which may in turn have a significant negative impact on our business.

Negative changes in China's securities markets, economic conditions, inflation, regulatory policies, interest rates, the availability of hedging instruments and other factors that could affect investors' interests in investing in China's securities markets could have an adverse effect on our business.

We believe that the level of public interest in investing in China's securities market could significantly influence the demand for market intelligence on China's securities markets and our products. Such demand could be affected by the level of trading activities in China's securities markets. During the past several years, China's securities markets have experienced significant volatility. The benchmark Shanghai Stock Exchange Composite Index, or SSE Composite Index, surged 426.18% between the start of 2006 and the market peak in October 2007. The SSE Composite Index ended 2011 with a decrease of 21.68% for the year, a decrease of 63.90% from its all-time high on October 16, 2007. The benchmark Shenzhen Stock Exchange Component Index, or SZSE Component Index, ended 2011 with a decrease of 28.41% for the year, a decrease of 54.34% from its all-time high in October 2007.

Table of Contents

In addition, irregular activities involving China's securities markets, including, without limitation, insider trading, large-scale selling shares by executive officers of newly listed companies, over issuance of IPOs and inadequate legal protections of individual investors, have become increasingly intense in recent years and resulted in market volatility and decreased investor confidence in China's securities markets. Any factors that lead to prolonged weakness or intensified volatility in China's securities markets in the future may diminish investors' interest in China's securities markets, and our business could be adversely affected accordingly.

Also, in January 2010, in an effort to reform its securities market, the State Council of China principally approved a trial launch of margin trading and short selling and launch of stock index futures in China. The China Securities Regulatory Commission, or the CSRC, then issued a series of regulations, which make margin trading, short selling and stock index futures available to investors in China, subject to certain conditions and criteria. China launched its margin trading and short selling trial program on March 31, 2010 on the Shanghai and Shenzhen stock exchanges. Subsequently, index futures started trading on the China Financial Futures Exchange or CFFEX on April 16, 2010. On November 25, 2011, the trial margin trading and short selling rules at Shanghai and Shenzhen stock exchanges were officially approved by the CSRC, which indicates that margin trading and short selling have become the regular trading activities within China's securities market. It is possible that these hedging instruments could cause increased volatility in China's securities market, which, in turn, may have a negative impact on Chinese investors' participation in the securities market, and materially and adversely affect our business.

Finally, on November 30, 2011, the People's Bank of China reduced the RMB required reserve ratio for deposit taking institutions by 0.5 percentage points, effective from December 5, 2011, after the RMB required reserve ratio was consecutively increased by the People's Bank of China for six times in 2011. In addition, the People's Bank of China raised the benchmark one-year deposit and lending rate for three times in 2011. There is still uncertainty with the impact caused by the monetary policy changes, which are beyond our control, on Chinese investors' general participation in China's stock market, which could in turn materially and adversely affect our business. Any measures adopted by the People's Bank of China, such as an interest rate increase to reduce an inflation rate, may have an adverse effect on China's securities markets, which could materially and adversely impact our business.

Downturns, disruptions and volatility in Hong Kong securities markets and negative developments in the business, economic and market conditions that could affect investors' investing in Hong Kong securities markets could have a material and adverse impact on our business in the future.

Following the acquisition in 2007 of Daily Growth Securities Limited, or Daily Growth Securities, a licensed securities brokerage firm incorporated in Hong Kong, we provide a diversified portfolio of brokerage and information service to our clients in connection with their investment in Hong Kong securities market. Lower trading volumes and price levels of securities transactions in Hong Kong securities market may affect investors' participation in Hong Kong's securities markets and have a material and adverse impact on our business in the future. Historically, securities trading volume and price level in Hong Kong have fluctuated considerably. After reaching its all-time high on October 30, 2007, the Hang Seng Index lost approximately 65.18% of its value from October 30, 2007 through October 27, 2008. The Hang Seng Index then rebounded to 24,964.37 points on November 8, 2010. However, in 2011, the Hang Seng Index had a decrease of 19.97% for the year, falling from 23,035.45 points on December 31, 2010 to 18,434.39 points on December 30, 2011. Continued significant fluctuations in the Hong Kong securities markets may materially and adversely impact our business.

Table of Contents

Our securities brokerage, futures trading and securities advising business in Hong Kong operate in a highly regulated industry and compliance failures could materially and adversely affect our business.

Daily Growth Securities holds a Type 1 license and provides a diversified portfolio brokerage and other related services to our customers who invest in stocks listed on the Hong Kong Stock Exchanges and Clearing Limited, or HKEx. Daily Growth Futures Limited, or Daily Growth Futures, holds a Type 2 license and commences futures contract trading business in Hong Kong. Daily Growth Wealth Management Limited, or Daily Growth Wealth Management, holds a Type 4 license and engages in securities advising activities in Hong Kong. The securities brokerage, securities advising and futures trading business and operations in Hong Kong are subject to extensive regulations by HKEx, and Hong Kong Securities and Futures Commission, or SFC, which may increase our cost of doing business and may be a limiting factor on the operations and development of our securities brokerage, securities advising and futures trading business. The regulation on securities broker-dealer, securities advising and futures trading business is also an ever-changing area of law and is subject to modification by government, regulatory and judicial actions. As our business has expanded into the securities brokerage, futures trading and securities advising areas in Hong Kong, we devote more time to regulatory matters. Failure to comply with any of the laws, rules or regulations applicable to our securities brokerage, securities advising and futures trading business could lead to adverse consequences including, without limitation, investigations, fines, law suits and other penalties from regulatory agencies. Any of these consequences could materially and adversely affect our securities broker-dealer, futures trading and securities advising business.

We may not be able to successfully continue to innovate, improve and provide products and services to attract and retain paying subscribers and registered users, which could have a material and adverse impact on our business in the future.

In order to attract and retain users and compete against our competitors, we must continue to invest significant resources in research and development to enhance our Internet technology, improve our existing products and services and introduce additional high-quality products and services. We currently offer to our subscribers a limited number of services packages with different features and functionalities. If we are unable to anticipate user preferences or industry changes, or if we are unable to modify our products and services on a timely basis, or if we introduce a new feature or a new research tool that is not favorably received, we may lose users. Our operating results may also suffer if our innovations do not respond to the needs of our users, are not appropriately timed with market opportunities or are not effectively brought to market. Furthermore, our research tools or features may contain errors, including without limitation, programming errors, which are not discovered by our internal testing or are discovered after the services are introduced. Our business operation and our reputation shall be damaged by those errors, and we may need to significantly modify the design of these research tools or features to correct these errors, which could result in significant cost and expense. As Internet technology and products continues to develop, our competitors may be able to offer services and products including news, data, analytics and brokerage-related services through web portals, desktop solutions and mobile handsets that are, or that are perceived to be, substantially similar to or better than those generated by our services. This may force us to expend significant resources in order to remain competitive.

Table of Contents

Our transition to a new business model may not be successful, which may materially and adversely affect our performance.

Beginning in April 2012, while we continue to offer basic versions of paid individual subscription services to individual investors through our flagship portal sites and accumulate paid subscribers with basic software and information services, we will no longer accept new paid subscribers or renewals for its premium individual subscription service. We are implementing a strategic transition of our core business from providing premium subscription services to individual investors to developing fee-based securities investment advisory services with wealth management services to be added over time. While securities investment advisory and wealth management have attractive market potential in China, such businesses are relatively new and the related business models are unproven. We will be facing a variety of risks and uncertainties during the transition, many of which will be new and unexpected. As we make this transition, our subscription revenue will drop immediately, but we are uncertain when, if ever, revenue from our new areas of business will compensate for this lost revenue. If we are unable to successfully and smoothly transition into the new principal business and implement our growth strategies in a timely and cost-effective manner, our business and financial results will suffer, and loss of profit may occur during the transition period,

Uncertain legal regulation in our new areas of business may adversely impact our business.

Laws and regulations governing the securities investment advisory and wealth management services industry in China are developing and subject to further changes, as a result, substantial uncertainties exist regarding the evolution of the regulatory system and the interpretation and implementation of current and any future Chinese laws and regulations applicable to the securities investment advisory and wealth management services industry. We cannot assure you that we will be able to obtain or maintain our existing licenses and permits, renew any of them when their current term expires or obtain additional licenses requisite for our strategic transition. Any changes in the regulatory landscape may materially and adversely affect our business.

We will face significant competition in the securities investment advisory and wealth management services industry as we transition into the new principal business, and our operations and financial condition may suffer if we fail to compete effectively.

As a new market entrant competing in the highly competitive and fragmented securities investment advisory and wealth management services industry in China, we may not be able to compete effectively or provide a compelling service alternative for potential customers. The securities investment advisory and wealth management services industry in China is at an early stage in development and is highly fragmented and competitive, but provides a vast opportunity, and thus we expect competition to persist and intensify. In providing securities investment advisory and over time wealth management services, we face competition from independent firms providing wealth management services, securities advisory and investment corporations providing securities investment advisory services, brokerage firms providing securities investment advisory services and domestic commercial banks with an in-house sales force and private banking functions, such as China Merchants Bank, China Minsheng Bank and China Everbright Bank. Many of our competitors, especially the brokerage firms and commercial banks, have greater financial and marketing resources than we do. Many brokerage firms, trust companies and commercial banks we will be competing with enjoy significant competitive advantages due to their nationwide distribution network, longer operational history, broader client base, and settlement capabilities. Moreover, many of the securities investment advisory and wealth management services and product providers, such as brokerage firms, commercial banks and trust companies, are also engaged in, or may in the future engage in the distribution of wealth management products and they may benefit from the integration of wealth management products with their other services and product offerings. If we are unable to compete effectively against the existing and future competitors, our financial results will suffer.

Table of Contents

If we are unable to hire high quality personnel for the investment advisory and over time wealth management businesses, our new business model will suffer.

We will also be facing fierce competition hiring competent licensed securities investment advisors. Also, highly skilled and qualified financial advisors are in high demand throughout wealth management industry in China. The total number of individuals qualified to provide investment advisory and wealth management services in China is limited due to the early development stage of the industry. In addition, the rate of wage inflation in most areas of the economy remains persistently high in recent years. There is no assurance that we can recruit and retain sufficient licensed securities investment advisors and qualified wealth management financial advisors who meet our high quality requirements to support our further growth into the new principal business or if we do, whether the cost of doing so will permit us to realize reasonable margins. Even if we recruit sufficient licensed securities investment advisors and qualified wealth management financial advisors, we may have to incur disproportional compensation, training and other administrative expenses in order to retain such recruits in light of the aggressive hiring competition from other securities investment advisory firms, brokerage firms, commercial banks and trust companies that are better financially situated for recruitment of this kind. These factors may materially and adversely affect our business and our strategy.

We may not be able to realize cost reductions in connection with the business transition as planned.

While we expect the overall administrative expenses in connection with employees' compensation to decrease as part of our transition to our new principal business, we may incur higher expenses in payments to be made to outgoing employees, which will include without limitation, certain severance payment and non-compete payment obligations. As a part of our business transition and upgrade plan, we will reorganize certain departments and staff. The new principal business we are entering into will have lower personnel demands, reflecting in fewer telephone service personnel, product and technical support staff, which will foreseeably result in lower administrative costs. However, in addition to the aforementioned immediate term obligations, in transitioning into securities investment advisory and over time wealth management business, we may be required to incur development, operation and potential acquisition costs in order to keep pace with the new market and technology needs for the industry. As a result, our cost-cutting initiatives to increase efficiency and improve our operational performance may not prove to be effective in the short-term and we may experience losses in connection with the staffing changes and other adjustment measures we undertake during the transition period.

Ceasing providing new subscriptions of premium individual subscription service may have a chilling effect on our existing subscribers and result in lower than expected revenues, immediate-term cash refunds and possible losses.

Based on our strategic transition plan, we ceased providing new subscriptions of premium individual subscription service in April 2012 though we will continue to provide on-going services to our existing subscribers until the applicable subscription terms expire. In light of the new direction we are taking our business, our existing subscribers of premium individual subscription service may start to lose confidence in the resources, the quality and the expertise we devote into these existing subscription services during the time in which we are developing our capacity in the securities investment advisory and over time wealth management services. Such existing subscribers may terminate their existing subscription with us. As a result, revenue and deferred revenue would be reduced if we may be required to pay refunds, which will negatively impact on our financial results.

Our business could be materially and adversely affected if the stock exchanges from which we receive data and information fail to deliver us reliable data and price quotes or other trading related information, or if we cannot maintain our current business relationships with our historical data providers on commercially reasonable terms.

We depend on four securities data providers associated with SSE, SZSE, HKEx, and CFFEX to provide us with real-time stock, bond, mutual fund and financial futures quotes and other trading related information. We primarily rely on contractual arrangements with SSE Infonet Ltd. which is associated with SSE, with Shenzhen Securities Information Co., Ltd., which is associated with the SZSE, with HKEx Information Services Limited (HKEx-IS), which is a business subsidiary of HKEx, and with CFFEX, pursuant to which we pay fixed service fees in exchange for receiving real-time price quotes and other trading related information through satellite communication.

Table of Contents

We renew our agreement with SSE Infonet Ltd. on an annual basis to provide our subscribers SSE Level-I quotes. The renewed agreement will continue through December 31, 2012. In June 2006, we were certified by SSE Infonet Ltd. to develop service packages based on Level II quotes (which provide insight into stock price movements and provide faster and more comprehensive trading data), and upgrade the features and functions of our current products. The definitive agreement will continue through July 31, 2012 and we intend to renew this agreement at that time.

We renew, on an annual basis, our agreement with Shenzhen Securities Information Co., Ltd to provide our subscribers with SZSE Level-I quotes. The agreement was renewed to continue through March 31, 2013. In April 2010, we were certified by Shenzhen Securities Information Co., Ltd. to develop service packages based on Level II quotes, and upgrade the features and functions of our current products through an annually-renewed agreement. Shenzhen Securities Information Co., Ltd and we both agree that the company will be authorized to provide Level II quotes through March 31, 2013.

In October 2009, we entered into a definitive agreement with HKEx-IS whereby *www.jrj.com* became the first HKEx-IS designated finance portal in mainland China to provide free real-time basic market quotes to mainland China investors. *www.jrj.com* is authorized to provide free real-time quotes of securities traded on the HKEx. The definitive agreement with HKEx-IS was renewed in March 2011 and shall not be terminated until either party wants to terminate this agreement.

In April 2010, we entered into a definitive agreement with CFFEX to provide real-time coverage on China's newly introduced stock index futures, which is renewed on an annual basis. CFFEX authorizes us to provide all the data including market information, trading data and other information or data related to stock index futures products to end users in mainland China. The definitive agreement was renewed to continue through April 16, 2013.

We cannot assure investors that we will be able to timely renew business arrangements with each of the four securities data providers associated with the SSE, SZSE, HKEx, and CFFEX on commercially reasonable terms, or at all, after our current contracts expire. In addition, we cannot assure investors that the four securities data providers will not change their current mode of providing stock information to us, change the packages of stock information authorized to us, change their current qualification requirements on the authorized information service provider, or charge us service fees substantially higher than the service fees we are currently paying. If they did so, our business, financial condition and results of operations could be materially and adversely affected. Even if we are able to maintain our current business arrangements for data on commercially reasonable terms, any of the four securities data providers may fail to deliver us reliable price quotes or other trading related information. In either case, it would be difficult for us to receive reliable real-time price quotes and other trading related information from a different source, which could materially and adversely affect our business. Under the agreements, each of these four data providers can terminate its respective agreement with us if we breach the terms of the relevant agreement, such as our untimely payment of, or failure to pay, fees to these providers.

In addition, we have transitioned the primary source of historical data and information on listed companies, bonds and mutual funds to CFO Genius, which we acquired in September 2006. CFO Genius has become our primary provider of historical data and information, thereby mitigating our reliance on third-party backup providers of such historical data and information. Any problems arising in or any disruption to CFO Genius as the primary provider of historical data and information may have a material adverse effect on our business.

Table of Contents

Our business would be adversely affected if we do not continue to maintain an effective telemarketing and customer support force or if our customer support staff fails to comply with the laws and regulations in business.

We market our service offerings through our websites, as well as through our telemarketing and customer service centers in Beijing, Shanghai and Shenzhen. In addition to sales and marketing functions, we depend on our customer support force to market our service offerings to our existing and potential subscribers and to resolve our subscribers' technical problems. Many of our telemarketing and customer support personnel have only worked for us for a short period of time and some of them may not have received sufficient training or gained sufficient experience to effectively serve our customers. We may not be able to hire, retain, integrate or motivate additional customer support personnel without any short-term disruptions of our operations. As a result, our business could be adversely affected if we do not continue to maintain an effective customer support force.

The CSRC's Provisional Regulations effective from January 1, 2011 (Provisional Regulations) has considerably increased requirements on pre-sales disclosure, standardized contract signing and service provisions, and after-sales product return policies in the course of providing securities investment advisory services to customers. We required our customer support staff to study and comply with these new requirements imposed by the Provisional Regulations in their work. However, we cannot assure investors that our customer support staff shall fully comply with the Provisional Regulations. Our business could be subject to severe penalties if the failure of our customer support staff to comply with those requirements was detected by or complained to regulatory authorities.

Our acquisitions and investments could not recognize our strategic goals, and on the contrary, result in operating difficulties, and other harmful consequences that may adversely impact our business and results of operations.

Acquisitions and investments are important elements of our overall corporate strategy and we expect to continue to acquire and invest in companies, products, services and technologies in the future. For example, we acquired CFO Genius, a financial information database provider mainly serving Chinese domestic institutional customers, in September 2006. In October 2006, we acquired Stockstar Information Technology (Shanghai) Co., Ltd., or CFO Stockstar, a leading finance and securities website in China. In November 2007, we acquired Daily Growth Securities, a licensed securities brokerage firm incorporated in Hong Kong.

In October 2008, Fortune Software (Beijing) Co., Ltd., or CFO Software, one of our subsidiaries, entered into a series of contractual arrangements with Shenzhen Newrand Securities Advisory and Investment Co., Ltd., or CFO Newrand. CFO Newrand is a CSRC licensed securities investment advisory firm, which also wholly owns Shenzhen Newrand Securities Training Center, or CFO Newrand Training, a Shenzhen Bureau of Education licensed securities investment training center.

We invested in Mooloon International, Inc., or Mooloon, a Chinese wireless technology and service provider, in December 2005, and transferred Mooloon to Ocean Butterflies Holdings Inc., a private and independent music and entertainment production company incorporated in the Cayman Islands (referred to as Ocean Butterflies Holdings) in the form of share exchange between Mooloon and Ocean Butterflies Holdings in August 2010. After this transaction, we held 16.82% of the outstanding shares in Ocean Butterflies Holdings. During the second quarter of 2011, we recorded a non-cash impairment of \$1.48 million on our investment in Ocean Butterflies Holdings as a result of its unprofitable operations. This impairment has no adverse impact on our core business and the carrying balance of the investment has been reduced to zero.

Table of Contents

The acquisition and investment transactions may create risks that may have a material adverse effect on our financial condition and results of operation, including but not limited to:

we may not identify suitable candidates and successfully complete acquisition and investment transactions, and may not be able to manage post-closing issues such as the integration of acquired businesses, products or employees;

we may not fully realize all of the anticipated benefits of any acquisition and investment transaction;

the pricing and other terms of contracts for acquisition and investment transactions require us to make estimates and assumptions at the time we enter into these contracts, so that we may pay more than it is worth;

we may not identify all of the problems during the course of our due diligence, such as factors necessary to estimate our costs accurately, and issues with unlicensed use of intellectual property;

any increased or unexpected costs, unanticipated delays or failure to meet contractual obligations, and failure of investments to perform as expected, could make these transactions less profitable or unprofitable;

if we fail to successfully complete acquisitions that further our strategic objectives, we may be required to expend resources to develop products and technology internally, and we may be at a competitive disadvantage or we may be adversely affected by negative market perceptions;

our ongoing business may be disrupted and our management's attention may be diverted by transition or integration issues;

we may have legal and tax exposures or lose anticipated tax benefits as a result of unforeseen difficulties in our legal entity integration activities;

we may face contingencies related to intellectual property, financial disclosures and accounting practices or internal controls;

when goodwill, intangible assets and investments, in connection with potential acquisition and investment transactions become impaired, we may be required to incur additional material charges relating to the impairment of those assets;

we may incur additional amortization expense over the useful lives of certain intangible assets acquired in connection with acquisitions;

any acquisition and investment transactions may require a significant amount of capital investment, which would decrease the amount of cash available for working capital or capital expenditures;

we may issue common stock, potentially creating dilution for existing stockholders to complete acquisition and investment transactions;

Edgar Filing: China Finance Online Co. LTD - Form 20-F

we may borrow to finance these transactions, the amount and terms of which as well as other factors could affect our liquidity and financial condition, and debt instruments may contain restrictive covenants that could, among other things, restrict us from distributing dividends;

Table of Contents

we may experience risks relating to the challenges and costs of closing acquisition and investment transactions and the risk that an announced acquisition and investment transaction may not close.

We may be required to record a significant charge to earnings if we are required to reassess our goodwill or other intangible assets arising from further potential acquisitions.

In the course of our operating history, we have acquired assets and businesses, which have resulted in the recording of goodwill and/or intangible assets on our financial statements. We are required under U.S. GAAP to test goodwill for impairment at least annually or sooner if we determine there are indicators of impairment and to review our intangible assets for impairment when events or changes in circumstance indicate the carrying value may not be recoverable. Factors that could lead to impairment of goodwill and intangible assets include, but not limited to, significant adverse changes in the business climate (affecting our company as a whole or affecting any particular segment), unfavorable changes in our stock price and market capitalization, and declines in the financial condition of our business. In 2011, we have recorded a goodwill impairment loss of \$13.5 million and an intangible assets impairment loss of \$4.1 million associated with our subscription and brokerage business.

The carrying balance of the goodwill and acquired intangible assets has been reduced to zero. If we acquire new assets and businesses in the future, we may record additional goodwill and/or intangible assets. The possible write-off of the goodwill and/or intangible assets could negatively impact our future earnings and, as a result, the market price of our common stock could decline.

We face certain risks associated with our financial investment activities, including but not limited to our held to maturity bank financial products and trust products.

We explore selected investment opportunities that have financial value to us, including bank financial products and trust products that provide us with a more favorable rate of return than ordinary bank deposits.

As of December 31, 2011, we classify our purchased bank financial product and trust products as short-term investments held to maturity on our balance sheet, amounting to \$9.7 million. Although the bank financial product and trust products are administered by a reputable financial institution, any deterioration in the financial condition of the investment project funded by our bank financial product and trust products or any deterioration in the financial condition of the trustee of our trust product could cause significant loss to us and have a material effect on our financial condition and results of operations. In China, China Banking Regulatory Commission (the CBRC) prohibits the trust companies to promise the trust plans are risk-free or promise any sort of minimal return on a trust plan. We cannot assure investors that we will be able to achieve an adequate rate of return and to fully collect our investment principals. In addition, our future financial investment activities will be exposed to various risks, including but not limited to credit risks, market risks, interest risks, liquidity risks, etc. If we experience significant losses in connection with our investment activities, our financial condition and results of operation may be materially and adversely affected.

Stricter securities investment advisory regulations may materially weaken the investors' desire to subscribe or renew subscription for our securities investment advisory services.

The Provisional Regulations effective from January 1, 2011 expressly states that the business of providing securities advisory or other similar service through software tools or any other terminal equipment (securities advisory software business) should be subject to regulation by the CSRC. According to the Provisional Regulations, a securities advisory software business should be regarded as a securities investment advisory business, subject to laws and regulations with respect to securities investment advisory services. Therefore, providers of such services should obtain a securities investment advisory license.

Table of Contents

While we have already acquired such license, and will continue to devote resources to regulatory compliance, the failure to comply with such regulations could lead to adverse consequences which could materially affect our securities advisory software business. In order to comply with the Provisional Regulations, we have considerably increased pre-sales disclosure requirements, standardized contract signing and service provisions among others. Through fully disclosing the limitation of making investment decisions based on software tool and other terminals devices, we emphasize to clients that they must be liable to bear the risks of their own investments. However, rolling out the above procedures amidst a continuously sluggish stock market in 2011 during which vast majority of investors are losing money nevertheless has weakened customers' desire in purchasing new or renewing existing subscriptions.

Although the Provisional Regulations benefits the healthy development of securities investment advisory business in China in the long run, such negative impact on our business is anticipated to remain in the foreseeable future.

Interruption or failure of our own systems or those of third-party service providers we rely upon could impair our ability to provide our products and services, which could damage our reputation and harm our operating results.

We have limited backup systems and have previously experienced system failures, which have disrupted our operations. Any damage to or failure of our systems could interrupt our service. Service interruptions could reduce our revenues and profits and damage our brand and reduce competitiveness if our system is perceived to be unreliable. Our systems are vulnerable to damage or interruption as a result of terrorist attacks, wars, earthquakes, floods, fires, power loss, telecommunications failures, undetected errors or bugs in our software, computer viruses, interruptions in access to our websites through the use of denial of service or similar attacks, hacking or other attempts to harm our systems, and similar events. Any security breach caused by hackings, which involve efforts to gain unauthorized access to information or systems, or to cause intentional malfunctions or loss or corruption of data, software, hardware or other computer equipment, and the inadvertent transmission of computer viruses could cause our users to question the safety or reliability of our website and our services and could have a material adverse effect on our business, financial condition and results of operations. In addition, unauthorized access by third parties to our network could result in theft of personal user information, which could have a material adverse effect on our reputation.

If we experience frequent or persistent system failures on our websites and products due to interruptions and failures of third-party service providers we rely upon, our reputation and brand could be severely harmed. We depend on other Internet content providers, such as other financial information websites, to provide data and information to our website on a timely basis. Our websites could experience disruptions or interruptions in service due to the failure or delay in the transmission or receipt of this information. We also depend on securities data providers to provide us with real-time price quotes and trading related information. If interruptions of real-time transmissions occur due to failure of data providers or transmission network breakdown, we will not be able to provide our users with trading data accurately and on-time. In addition, our users depend on Internet service providers, online service providers and other website operators for access to our website. Each of them has experienced significant outages in the past, and could experience outages, delays and other difficulties due to system failures unrelated to our systems. These types of occurrences could cause users to perceive our website as not functioning properly and therefore cause them to use other methods to obtain the financial data and information services they need.

Table of Contents

If we are unable to adapt or expand our existing technology infrastructure to accommodate greater traffic or additional customer requirements, our business may be harmed.

In the past, our websites regularly serve a large number of users and receive a large number of daily unique visitors when there are significant business developments, financial news and activities, or stock market trading activities. In addition, the number of our users has continued to increase over time and we are seeking to further increase our user base. Therefore, our website must accommodate a high volume of traffic to meet peak user demand and deliver frequently updated information. Our websites have in the past experienced and may in the future experience slower response time or login delays for a variety of reasons. It is essential to our success that our websites are able to accommodate our users in an efficient manner so that our users' experience with us is viewed favorably and without frequent delays. Therefore we may be required to upgrade our technology infrastructure to keep up with the increasing traffic on our websites, such as increasing the capacity of our hardware servers and the sophistication of our software. If we fail to adapt our technology infrastructure to accommodate greater traffic or customer requirements, our users and customers may become dissatisfied with our services and switch to our competitors' websites, which could harm our business.

We depend largely on the infrastructure of the telecommunications operators in China, and any interruption of their network infrastructure may result in severe disruptions to our business.

Although private Internet service providers exist in China, substantially all access to the Internet in China is maintained through the telecommunications operators, under the administrative control and regulatory supervision of the Ministry of Industry and Information Technology, or MIIT. In addition, local networks connect to the Internet through a government-owned international gateway. We rely on this infrastructure and to a lesser extent, certain other Internet data centers in China to provide data communications capacity primarily through local telecommunications lines. In the event of a large-scale infrastructure disruption or failure, we may not have access to alternative networks and services, on a timely basis or at all.

We may not be able to lease additional bandwidth from the telecommunications operators in China on acceptable terms, on a timely basis or at all. In addition, we may not have means of getting access to alternative networks and services on a timely basis or at all in the event of any disruption or failure of the network.

We may be subject to, and may expend significant resources in defending against claims based on the content and services that we provide through our website and research tools.

Due to the manner in which we obtain, collect, categorize and integrate content for our website, and because our services, including our online bulletin boards and discussion forums, may be used for the distribution of information and expression of opinions, claims may be filed against us for defamation, subversion, negligence, copyright or trademark infringement or other violations due to the nature and content of such information. For example, our bulletin boards and online forums reflect the statements and views of persons we do not control and we cannot be assured that such information is true and correct and is not misleading. These persons may also have conflicts of interest in relation to their statements or views regarding securities or other financial matters. Liability insurance for these types of claims is not currently available in the PRC. While we do not take responsibility for statements or views presented on our website, we may incur significant costs investigating and defending these types of claims even if they do not result in liability. Any such claim may also damage our reputation if our users and subscribers do not view this content as reliable or accurate, which could materially and adversely affect our business.

Table of Contents

We may be subject to intellectual property infringement claims, which may force us to incur substantial legal expenses and, if determined adversely against us, may materially disrupt our business.

We cannot be certain that our website content, online services and our research tools do not or will not infringe upon patents, valid copyrights or other intellectual property rights held by third parties. We may become subject to legal proceedings and claims from time to time relating to the intellectual property of others in the ordinary course of our business. If we are found to have violated the intellectual property rights of others, we may be enjoined from using such intellectual property, and we may incur licensing fees or be forced to develop alternatives. In addition, we may incur substantial expenses in defending against these third-party infringement claims, regardless of their merit. Successful infringement or licensing claims against us may result in substantial monetary liabilities, which may materially and adversely affect our business.

Unauthorized use of our intellectual property by third parties, and the expenses incurred in protecting our intellectual property rights, may materially and adversely affect our business.

We regard our copyrights, trademarks, trade secret and other intellectual property as critical to our success. Unauthorized use of the intellectual property used in our business may materially and adversely affect our business and reputation. We rely on trademark and copyright law, trade secret protection and confidentiality agreements with our employees, customers, business partners and others to protect our intellectual property rights. Despite our precautions, it may be possible for third parties to obtain and use our intellectual property without authorization. The validity, enforceability and scope of protection of intellectual property in Internet-related industries are uncertain and still evolving. In particular, the laws and enforcement procedures in the PRC do not protect intellectual property rights to the same extent as do the laws and enforcement procedures in the United States. Moreover, litigation may be necessary in the future to enforce our intellectual property rights. Future litigation could result in substantial costs and diversion of our resources, and could disrupt our business, as well as have a material adverse effect on our financial condition and results of operations.

We depend on our key personnel and our business and growth prospects may be severely disrupted if we lose their services.

Our future success is dependent upon the continued service of our key executives and employees. We rely on their expertise in our business operations. If one or more of our key executives are unable or unwilling to continue in their present positions, or if they join a competitor or form a competing company in violation of their employment agreements, we may not be able to easily replace them. As a result, our business may be significantly disrupted and our financial condition and results of operations may be adversely affected. In July 2011, Dr. Caogang Li, our then-Chief Operating Officer, resigned for personal reasons. There is no disagreement between us and Dr. Li in connection with his resignation. We do not believe that Dr. Li's resignation will have a material and adverse impact on our business and financial conditions. However, competition for qualified talent in China is intense, and the pool of qualified candidates is limited. Therefore, we cannot assure investors that we will be able to attract and retain a qualified candidate to fill in the vacancy created by Dr. Li in the near future. If we are unable to do so, our business shall be adversely affected.

Furthermore, since our industry is characterized by high demand and intense competition for talent, we may need to offer higher compensation and other benefits in order to attract and retain key personnel in the future. We cannot assure investors that we will be able to retain the services of our executives or key personnel, or attract and retain experienced executives or key personnel that we will need to achieve our business objectives in the future. We do not maintain key-man life insurance for any of our key personnel.

Table of Contents

The Internet infrastructure in China, which is not as well developed as in the United States or other more developed countries, may limit our growth.

The Internet infrastructure in China is not as well developed as in the United States or other more developed countries. In particular, we depend significantly on the PRC government and fixed line telecommunications operators in China to establish and maintain a reliable Internet infrastructure to reach a growing base of Internet users in China. We cannot assure investors that the Internet infrastructure in China will support the demands associated with the continued growth of the Internet industry in China. If the necessary infrastructure standards or protocols, or complementary products, services or facilities are not developed in China on a timely basis or at all by these enterprises, our business, financial condition and results of operations could be materially adversely affected.

Concerns about the security and confidentiality of information on the Internet may reduce use of our network and impede our growth.

A significant barrier to confidential communications over the Internet in general has been a public concern over security and privacy, including the transmission of confidential information. If these concerns are not adequately addressed, they may inhibit the growth of the Internet and other online services generally. If a well-publicized Internet breach of security were to occur, general Internet usage could decline, which could reduce traffic to our websites and impede our growth.

We may incur significant costs to protect against the threat of security breaches or to alleviate problems caused by these breaches. If unauthorized persons are able to penetrate our network security, they could misappropriate proprietary information, including personal information regarding our subscribers, or cause interruptions in our services. As a result, we may be required to incur substantial costs and divert our other resources to protect against or to alleviate these problems. Security breaches could have a material adverse effect on our reputation, business, financial condition and results of operations.

The limited use of personal computers in China and the relatively high cost of Internet access with respect to per capita gross domestic product may limit the development of the Internet in China and impede our growth.

Although the use of personal computers in China has increased in recent years, the penetration rate for personal computers in China is relatively low as compared to that in most developed countries. In addition, despite a decrease in the cost of personal computers and the expansion of broadband access, the cost of Internet access remains relatively high given the average per capita income in China. The limited use of personal computers in China and the relatively high cost of Internet access may limit the growth of our business. Furthermore, any Internet access or telecommunications fee increase could reduce the number of users that use our online services. Any fee or tariff increase could further decrease our user traffic and our ability to derive revenues from transactions over the Internet, which could have a material adverse effect on our business, financial condition and results of operations.

The low percentages of consumers who wish to pay for information and services on Internet in China could impede our growth

Chinese consumers are traditionally accustomed to obtaining information and services free on the Internet, and therefore they may be reluctant to pay for such information and services as compared to counterparts in the U.S. and other developed countries. This may limit the scale of paying subscribers of financial information and services on Internet in China. Our business growth shall be negatively affected if the widespread recognition of Chinese consumers in paying for subscription of information and services on Internet is not established.

Table of Contents

If we fail to maintain an effective system of internal control over financial reporting, we may lose investor confidence in the reliability of our financial statements.

We are subject to reporting obligations under the U.S. securities laws. The SEC, as required by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring every public company to include a management report on such company's internal control over financial reporting in its annual report, which contains management's assessment of the effectiveness of our internal control over financial reporting. In addition, an independent registered public accounting firm must attest to and report on the effectiveness of our internal control over financial reporting. We have been subject to these requirements since the fiscal year ended December 31, 2007.

Our management has concluded that our internal control over financial reporting is effective as of December 31, 2011. See Item 15. Control and Procedures. Our independent registered public accounting firm has issued an attestation report, which has concluded that our internal control over financial reporting is effective in all material aspects. However, if we fail to maintain effective internal control over financial reporting in the future, our management and our independent registered public accounting firm may not be able to conclude that we have effective internal control over financial reporting at a reasonable assurance level. This could in turn result in the loss of investor confidence in the reliability of our financial statements and negatively impact the trading price of our ADSs. Furthermore, we have incurred and anticipated that we will continue to incur considerable costs, management time and other resources in an effort to comply with Section 404 and other requirements of the Sarbanes-Oxley Act.

Because there is limited business insurance coverage in China, any business disruption or litigation we experience might result in our incurring substantial costs and the diversion of resources.

The insurance industry in China is still at an early stage of development. Insurance companies in China offer limited business insurance products and do not, to our knowledge, offer business liability insurance. While business disruption insurance is available to a limited extent in China, we have determined that the risks of disruption, cost of such insurance and the difficulties associated with acquiring such insurance make having such insurance impractical for us.

You should not place undue reliance on our financial guidance, nor should you rely on our quarterly operating results as an indication of our future performance, because our results of operations are subject to significant fluctuations.

We may experience significant fluctuations in our quarterly operating results including but not limited to net revenues and non-GAAP net income guidance for the year, strategic transformation initiative, cost-cutting initiative and its effect on efficiency and operational performance, potential business consolidation amidst the new regulatory environment, the market prospect of the business of securities investment advisory and wealth management, and the transition period to adapt to the new compliance requirements, due to a variety of factors, many of which are outside our control. Significant fluctuations in our quarterly operating results could be caused by any of the factors identified in this section, including but not limited to, our ability to retain existing users, attract new users at a steady rate and maintain user satisfaction; the announcement or introduction of new or enhanced services, content and products by us or our competitors; significant news events that increase traffic to our websites; technical difficulties, system downtime or Internet failures; the amount and timing of operating costs and capital expenditures relating to expansion of our business, operations and infrastructure; operators' policies; changing customer needs, regulatory environment and market condition; seasonal trends in Internet use; a shortfall in our revenues relative to our forecasts and a decline in our operating results due to our inability to adjust our spending quickly; wavering investor confidence that could impact our business; possible non-cash goodwill, intangible assets and investment impairment that may adversely affect our net income; the unpredictability of our strategic transformation and upgrade; general economic conditions and economic conditions specific to the Internet and wireless, financial information and services, securities investment advisory and wealth management, and the China and Hong Kong securities markets. As a result of these and other factors, you should not place undue reliance on our financial guidance, nor should you rely on quarter-to-quarter comparisons of our operating results as indicators of likely future performance. Our quarterly revenue and earnings per share guidance is our best estimate at the time we provide guidance. Our operating results may be below our expectations or the expectations of public market analysts and investors in one or more future quarters. If that occurs, the price of our underlying ordinary shares could decline and you could lose part or all of your investment.

Table of Contents

The effects of war, acts of terrorism, natural disasters or other unforeseen wide-scale events could have a material adverse effect on our operating results and financial condition.

The continued threat of terrorism and associated heightened security measures and military actions in response to acts of terrorism has disrupted commerce and has intensified uncertainties in the U.S. and international economies. Any further acts of terrorism, a future war or a widespread natural disaster, such as the earthquake and resulting tsunami in Japan, may disrupt commerce, undermine consumer confidence and lead to a further downturn in the U.S. or international economies, which could negatively impact our revenues. Furthermore, an act of terrorism or war, or the threat thereof, or any natural disaster that results in unforeseen interruptions of commerce, could negatively impact our business by interfering with our ability to obtain products from our manufacturers.

Risks relating to our corporate structure

We primarily rely on contractual arrangements with Beijing Fuhua Innovation Technology Development Co., Ltd., or CFO Fuhua, CFO Newrand, Shanghai Chongzhi Co., Ltd., or CFO Chongzhi, CFO Chuangying, Shenzhen Shangtong Software Co., Ltd., or CFO Shenzhen Shangtong, CFO Securities Consulting and Fortune (Beijing) Qicheng Technology Co., Ltd., or CFO Qicheng, our significant PRC-incorporated affiliates, and their shareholders for our China operations, which may not be as effective in providing operational control as direct ownership. If the affiliates fail to perform their obligations under these contractual arrangements or PRC laws impair the enforceability of these contracts, our business, financial condition and results of operations may be materially and adversely affected.

Because PRC regulations restrict our ability to provide Internet content directly in China, we rely on contractual arrangements with CFO Fuhua, our significant PRC-incorporated affiliate over which we have no direct ownership, and its shareholders for operating our website and conducting our advertising business. We also entered into contractual arrangements with CFO Newrand, CFO Chongzhi, CFO Chuangying, CFO Shenzhen Shangtong, CFO Qicheng and CFO Securities Consulting, our significant PRC-incorporated affiliates over which we have no direct ownership. Under the contractual arrangements, these significant PRC-incorporated affiliates will pay us service fees in return for our strategic consulting and technology support services.

We have no equity ownership interest in these entities and must rely on contractual arrangements to control and operate such businesses. These contractual arrangements may not be as effective in providing control over these entities as direct ownership. For example, these entities could fail to take actions required for our business or fail to perform its obligations under these contractual arrangements.

Table of Contents

These contractual arrangements are governed by PRC law and provide for the resolution of disputes through either arbitration or litigation in the PRC. Accordingly, these contracts would be interpreted in accordance with PRC law and any disputes would be resolved in accordance with PRC legal procedures. If any of CFO Fuhua, CFO Chongzhi, CFO Newrand, CFO Shenzhen Shangtong, CFO Chuangying, CFO Securities Consulting and CFO Qicheng fails to perform its obligations under these contractual arrangements, we may have to rely on legal remedies under PRC law, including seeking specific performance or injunctive relief, and claiming damages, which we cannot be sure would be effective. In addition, the legal environment in the PRC is not as developed as in other jurisdictions, such as the United States. As a result, uncertainties in the PRC legal system could limit our ability to enforce these contractual arrangements. In the event that we are unable to enforce these contractual arrangements, our business, financial condition and results of operations could be materially and adversely affected.

Entering into a share pledge agreement is a necessary agreement in our contractual arrangements with our PRC-incorporated affiliates. Under the share pledge agreements described under Item 7. Major Shareholders and Related Party Transactions, each of Zhiwei Zhao, our chief executive officer, and Jun Wang, our chief financial officer, have pledged their equity interest in CFO Fuhua to China Finance Online (Beijing) Co., Ltd, or CFO Beijing. According to the PRC Property Rights Law, which came into effect on October 1, 2007, such pledges will only be effective upon registration with the relevant local office for the administration for industry and commerce. We are in the process of obtaining the relevant registrations. There is no assurance that we can have these equity pledges registered successfully. Before a completed registration of the equity pledges, we cannot assure investors that the effectiveness of such pledges can be recognized in PRC courts if disputes arise regarding the pledged equity interests or that our subsidiaries' interests as pledgee will prevail over those of third parties. If the variable interest entities, or VIEs, and their shareholders breach their respective obligations under the contractual arrangements that established our operations in China, failure to enforce pledges may leave us with fewer remedies in enforcing our contracts with our affiliated entities. In the event we are unable to enforce these contractual arrangements, we may not be able to exert effective control over our operating entities and we may be precluded from operating our business, which would have a material adverse effect on our financial condition and results of operations.

If the PRC government finds that the agreements that establish the structure for operating our online financial data and information services no longer comply with PRC government restrictions on foreign investment in the Internet content services industry, we could be subject to severe penalties.

PRC regulations currently limit foreign ownership of companies that provide Internet content services, which include operating financial data and information services through the Internet, to be no more than 50%. Accordingly, foreign and wholly foreign-owned enterprises are currently not able to apply for the required licenses for operating such services in China.

We are a foreign enterprise and each of our significant subsidiaries, CFO Beijing, CFO Software, CFO Stockstar, CFO Genius, Jujin Software (Shenzhen) Co., Ltd., or CFO Jujin, Zhengning Information & Technology (Shanghai) Co., Ltd., or CFO Zhengning, Fortune (Beijing) Wisdom Technology Co., Ltd., or CFO Wisdom, and Fortune (Beijing) Success Technology Co., Ltd., or CFO Success, is a wholly foreign-owned enterprise under PRC law and, accordingly, neither we, CFO Beijing, CFO Software, CFO Stockstar, CFO Genius, CFO Jujin, CFO Zhengning, CFO Wisdom, nor CFO Success is eligible to apply for licenses to operate our website. In order to comply with foreign ownership restrictions, we operate our website in China through CFO Fuhua and its wholly owned subsidiary CFO Meining, both of which hold the licenses required to be an Internet information content provider under the relevant PRC laws. Zhiwei Zhao and Jun Wang hold 45% and 55% of the equity interests in CFO Fuhua, respectively. We have been and are expected to continue to be dependent on CFO Fuhua and its wholly owned subsidiary CFO Meining to host our websites, www.jrj.com and www.stockstar.com. We have entered into contractual arrangements with CFO Fuhua, pursuant to which we provide operational support to CFO Fuhua. In addition, we have entered into agreements with CFO Fuhua and Zhiwei Zhao and Jun Wang, the shareholders of CFO Fuhua, which provide us with the substantial ability to control CFO Fuhua. There are, however, substantial uncertainties regarding the interpretation and application of current or future PRC laws and regulations. Accordingly, we cannot assure investors that the PRC regulatory authorities will ultimately take a view that our arrangements with CFO Fuhua comply with PRC law.

Table of Contents

If we or any of our PRC subsidiaries and VIEs are found to be in violation of any existing or future PRC laws or regulations or fail to obtain or maintain any of the required permits or approvals, the relevant PRC regulatory authorities would have broad discretion in dealing with such violations, including:

revoking business and operating licenses of our PRC subsidiaries and VIEs;

discontinuing or restricting our PRC subsidiaries and VIEs' operations;

imposing conditions or requirements with which we or our PRC subsidiaries and VIEs could not satisfy;

requiring us or our PRC subsidiaries and VIEs to restructure the relevant ownership structure or operations; or

taking other regulatory or enforcement actions, including levying fines that could be harmful to our business.

Any of these actions could cause our business, financial condition and results of operations to suffer and the price of our ADSs to decline.

In addition, it was widely reported in 2011 that the PRC Ministry of Commerce and the CSRC, among other Chinese regulatory authorities, may be considering increased scrutiny or enhanced regulation of Chinese companies that use VIE structures as a means of complying with Chinese laws prohibiting or restricting foreign ownership of certain businesses in China, including businesses we are engaged in such as Internet information and content services. Such news reports appear to have had the effect of causing significant drops in the market prices of the shares of many Chinese companies, including us, that are publicly-traded in the United States. If any such Chinese regulatory authorities were to increase scrutiny of VIE structures or adopt regulations specifically governing their use, such scrutiny would have a material adverse impact on us by causing us to materially change our existing operational structure.

Contractual arrangements that we have entered into with our PRC-incorporated affiliates may be subject to scrutiny by the PRC tax authorities and a finding that we or our PRC-incorporated affiliates owe additional taxes could substantially reduce our consolidated net income.

Under PRC laws and regulations, arrangements and transactions among related parties may be subject to audit or challenge by the PRC tax authorities. We could face material and adverse tax consequences if the PRC tax authorities determine that the contractual arrangements among our PRC-incorporated subsidiaries and PRC-incorporated affiliates do not represent an arm's length price and adjust the income of our PRC-incorporated subsidiaries or that of our PRC-incorporated affiliates in the form of transfer pricing adjustments. Transfer pricing adjustments could, among other things, result in a reduction, for PRC tax purposes, of expense deductions recorded by our PRC incorporated subsidiaries or affiliates, which could in turn increase their respective tax liabilities. In addition, the PRC tax authorities may impose late payment fees and other penalties on our PRC-incorporated subsidiaries or affiliates for underpayment of taxes. Our consolidated net income may be materially and adversely affected if our PRC-incorporated subsidiaries or affiliates' tax liabilities increase or if they are found to be subject to late payment fees or other penalties.

Table of Contents

We rely principally on dividends and other distributions on equity paid by our wholly owned operating subsidiaries to fund any cash and financing requirements we may have.

We are a holding company, and our ability to pay dividends and other cash distributions to our shareholders, repay any debt we may incur and meet our other cash requirements depends solely on our ability to receive dividends and other distributions from our PRC subsidiaries and consolidated affiliated entities to our offshore affiliates and/or other contractual arrangements, more specifically:

- (a) Earnings of our PRC subsidiaries that we directly own and operate inside the PRC, which include CFO Software, CFO Beijing, CFO Success, CFO Wisdom, CFO Genius, and CFO Stockstar, are transferred to us by means of dividend payments. The amount of dividends paid to us by our directly owned PRC subsidiaries depends mainly on the service fees paid to them from our consolidated affiliated entities.
- (b) Earnings of our PRC subsidiaries that we indirectly hold through an intermediary Hong Kong or British Virgin Islands company, which include CFO Zhengning and CFO Jujin, are transferred to us by means of dividend payments via such intermediary company. The transfer of dividend payments from such intermediary company to us is not subject to PRC taxation or other regulatory restrictions.
- (c) Earnings of the VIEs, which we exert control via a series contracts including without limitation exclusive technology consulting and management service agreement, exclusive purchase right agreement, power of attorney and pledge agreement, are first transferred in full (pre-tax) to our wholly foreign owned enterprise via such contractual arrangements.

However, there are restrictions under PRC laws for the payment of dividends to us by our PRC subsidiaries. For example, if our PRC subsidiaries incur debt on its own behalf, the instruments governing the debt may restrict its ability to make payments or distributions to us. Furthermore, relevant PRC laws and regulations permit payments of dividends by the PRC subsidiaries only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations. Under PRC laws and regulations, the PRC subsidiaries are required to set aside at least 10% of its after-tax profits based on PRC accounting standards each year to fund a statutory reserve. This reserve is not distributable as dividends until the accumulated amount of such reserve has exceeded 50.0% of its registered capital. Consequently, each of our PRC subsidiaries is restricted in its ability to transfer a portion of its net assets to us or any of our other subsidiaries in the form of dividends, loans or advances. In addition, PRC tax authorities may require us to amend the VIEs contractual arrangements that would materially and adversely affect the ability of CFO Beijing, CFO Software, CFO Stockstar, CFO Genius, CFO Jujin, CFO Zhengning, CFO Success and CFO Wisdom to pay dividends and other distributions to us. The foregoing restrictions on the ability of the PRC subsidiaries to pay dividends to us could materially and adversely limit our ability to pay dividends to holders of our ADSs.

Risks relating to doing business in the People's Republic of China

The PRC's economic, political and social conditions, as well as government policies, could affect the financial markets in China and our business.

Substantially all of our assets are located in China and substantially all of our revenues are derived from our operations in China. Accordingly, our business, financial condition, results of operations and prospects are subject, to a significant extent, to economic, political and legal developments in China.

Table of Contents

The PRC economy differs from the economies of most developed countries in many respects, including the amount of government involvement, level of development, growth rate, and control of foreign exchange and allocation of resources. While the PRC economy has experienced significant growth in the past 20 years, growth has been uneven, both geographically and among various sectors of the economy. The PRC government has implemented various measures to encourage economic growth and guide the allocation of resources. Some of these measures benefit the overall PRC economy, but may also have a negative effect on us. For example, our financial condition and results of operations may be adversely affected by government control over capital investments or changes in tax regulations that are applicable to us.

The PRC economy has been transitioning from a planned economy to a more market-oriented economy. Although the PRC government has implemented measures since the late 1970s emphasizing the utilization of market forces for economic reform, the reduction of state ownership of productive assets and the establishment of improved corporate governance in business enterprises, a substantial portion of productive assets in China is still owned by the PRC government. In addition, the PRC government continues to play a significant role in regulating industry development by imposing industrial policies. The PRC government also exercises significant control over China's economic growth through the allocation of resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies. These actions, as well as future actions and policies of the PRC government, could materially affect the financial markets in China and our business and operations.

The PRC legal system embodies uncertainties which could limit the legal protections available to you and us.

The PRC legal system is a civil law system based on written statutes. Unlike common law systems, it is a system in which decided legal cases have little precedential value. In 1979, the PRC government began to promulgate a comprehensive system of laws and regulations governing economic matters in general. The overall effect of legislation which has been promulgated has significantly enhanced the protections afforded to various forms of foreign investment in China. Our significant PRC operating subsidiaries, CFO Beijing, CFO Software, CFO Stockstar, CFO Genius, CFO Jujin, CFO Zhengning, CFO Wisdom and CFO Success, respectively, are wholly foreign-owned enterprises, which are enterprises incorporated in China and wholly owned by foreign investors. Our wholly foreign-owned enterprises are subject to laws and regulations applicable to foreign investment in China in general and laws and regulations applicable to wholly foreign-owned enterprises in particular. However, these laws, regulations and legal requirements are constantly changing, and their interpretation and enforcement involve uncertainties. These uncertainties could limit the legal protections available to us and other foreign investors, including you. In addition, we cannot predict the effect of future developments in the PRC legal system, particularly with regard to the Internet, investment advisory and wealth management, including the promulgation of new laws, changes to existing laws or the interpretation or enforcement thereof, or the preemption of local regulations by national laws.

The PRC government may prevent us from distributing, and we may be subject to liability for, content that it believes is inappropriate.

China has enacted laws and regulations governing Internet access and the distribution of news, information or other content, as well as products and services, through the Internet. In the past, the PRC government has stopped the distribution of information through the Internet that it believes violates PRC law. MIIT, the General Administration of Press and Publication and the Ministry of Culture has promulgated regulations which prohibit information from being distributed through the Internet if it contains content that is found to, among other things, propagate obscenity, gambling or violence, instigate crimes, undermine public morality or the cultural traditions of the PRC, or compromise State security or secrets.

Table of Contents

In addition, MIIT has published regulations that subject website operators to potential liability for content included on their websites and the actions of users and others using their systems, including liability for violations of PRC laws prohibiting the distribution of content deemed to be socially destabilizing. The PRC's Ministry of Public Security has the authority to order any local Internet service provider, or ISP, to block any Internet website maintained outside China at its sole discretion. Periodically, the Ministry of Public Security has stopped the distribution over the Internet of information which it believes to be socially destabilizing. The PRC's State Secrecy Bureau, which is directly responsible for the protection of State secrets of the PRC government, is authorized to block any website it deems to be leaking State secrets or failing to meet the relevant regulations relating to the protection of State secrets in the distribution of online information.

Under applicable PRC regulation, we may be held liable for any content we offer or will offer through our website, including information posted on bulletin boards and online forums which we host and maintain on our website. Furthermore, we are required to delete any content we transmit through our website if such content clearly violates PRC laws and regulations. Where any content is considered suspicious, we are required to report such content to PRC governmental authorities.

It may be difficult to determine the type of content that may result in liability for us. If any financial data and information services we offer or will offer through our website were deemed to have violated any of such content restrictions, we would not be able to continue such offerings and could be subject to penalties, including confiscation of income, fines, suspension of business and revocation of licenses for operating online financial data and information services, which would materially and adversely affect our business, financial condition and results of operations. Moreover, if any information posted on our bulletin boards or online forums were deemed to have violated any of the content restrictions, we could be subject to similar penalties that materially and adversely affect our business, financial condition and results of operations.

If the current tax benefits we enjoy in PRC were no longer available, our effective tax rates for our PRC operations could increase.

The newly enacted PRC Enterprise Income Tax Law, or the EIT Law, and the implementation regulations to the EIT Law issued by the State Council of PRC, became effective as of January 1, 2008. Under the EIT Law, China adopted a uniform tax rate of 25% for all enterprises (including domestically owned enterprises and foreign-invested enterprises) and revoked the previous tax exemption, reduction and preferential treatments applicable to foreign-invested enterprises. However, there is a five-year transitional period during which certain enterprises are allowed to continue to enjoy existing preferential tax treatments provided by the then-applicable tax laws and administrative regulations. Enterprises that were subject to an enterprise income tax rate lower than 25% prior to January 1, 2008 may continue to enjoy the lower rate and gradually transition to the uniform tax rate within five years after the effective date of the EIT Law. In 2012, four of our subsidiaries will terminate their five-year transitional period and will be subject to uniform tax rate of 25%, which materially increases our tax obligations.

On April 14, 2008, the Ministry of Science and Technology, the Ministry of Finance and the State Administration of Taxation jointly issued the Administrative Measures on the Recognition of High and New Technology Enterprises, or the Recognition Rules, effective on January 1, 2008. According to the Recognition Rules, the provincial counterparts of the Ministry of Science and Technology, the Ministry of Finance and the State Administration of Taxation shall jointly determine whether an enterprise is qualified as a High and New Technology Enterprise under the EIT Law, who are entitled to enjoy preferential tax treatment and a preferential enterprise income tax rate of 15%. The qualification is valid for three years from the date of award, and enterprises should submit the application for renewal. In 2011, two of our subsidiaries are classified as High and New Technology Enterprises and enjoy the preferential tax rate. There is no assurance that they will continue to be classified as the High and New Technology Enterprises when they are subject to reevaluation in the future. In the event that the preferential tax treatment for them is discontinued, these entities will become subject to the uniform tax rate of 25%, which materially increase our tax obligations.

Table of Contents

On April 24, 2009, the Ministry of Finance and the State Administration of Taxation jointly promulgated Circular on Issues concerning the Implementation of Preferential Policies for Enterprise Income Tax, or Caishui Circular 69. According to Caishui Circular 69, subject to annual verification, a qualified software enterprise established prior to January 1, 2008 may continue to qualify under the tax holidays previously granted to it as a software enterprise. Where the software enterprise had qualified for tax holidays before 2008, it may continue to do so with respect to its remaining tax holidays from 2008 until the expiration of such tax holidays. In 2011, four of our subsidiaries are classified as Software Enterprises and experienced a preferential tax rate. However, one of our subsidiaries will not be classified as such because its tax holidays are terminated in 2012, which may increase our tax obligations. Our tax obligation shall be materially increased if the other three subsidiaries are not classified as software enterprises or their tax holidays shall be terminated.

In addition, companies that develop their own software and register the software with relevant authorities in China were generally entitled to a value-added tax, or VAT, refund. With respect to revenue generated from the sale of certain online subscriptions, including our service packages, nine of our subsidiaries obtained VAT refunds that reduce their effective VAT rates from 17% to 3% before 2011. The VAT refund policy was reconfirmed pursuant to the Notice on VAT Policy for Software Products, effective January 1, 2011, jointly promulgated by the Ministry of Finance and the State Administration of Taxation on October 13, 2011, or Caishui Circular 100. Although the Notice on VAT Policy for Software Products does not specify policy expiration date, in the event that the VAT refund policy for our subsidiaries is discontinued, our subsidiaries will become subject to the standard tax rate at 17%, which materially increase our tax obligations.

Uncertainties in the PRC tax system may lead to penalties, termination of preferential tax treatment or change of tax levy method imposed on us because of a difference in interpretation of the applicable law by the relevant governmental authority. For example, under current tax laws and regulations, the local tax authority approved certain of our entities to file the income tax by adopting the deemed-profit method. Under the method, the entities filed the income tax by calculating the tax as 2.5% of the gross revenues. However, since there is no clear guidance as to the applicability of certain areas of preferential tax treatment and tax levy position, we may be found to be in violation of the tax laws and regulations based on the interpretation of local tax authorities with regard to taxable income and the applicable tax rates, and therefore might be subject to penalties, including but not limited to monetary penalties, termination of preferential tax treatment or change of tax levy method, or claw-back and late payment interest. Reduction or elimination of the preferential tax treatments we have enjoyed or change of our tax levy method on us or our combined entities in China may significantly increase our income tax expenses and materially reduce our net income, which could have a material adverse effect on our business, prospects, results of operations and financial condition.

In addition, we cannot predict the effect of future tax application and tax developments in the PRC legal system, including the promulgation of new laws, changes to existing laws or the interpretation or enforcement thereof, or the preemption of local regulations by national laws. The discontinuation of tax application could materially and adversely affect our financial condition. Any significant increase in our income tax expenses may materially and adversely affect our profit.

Table of Contents***Enhanced scrutiny over acquisition transactions by the PRC tax authorities may have a negative impact on potential acquisitions we may pursue in the future.***

In connection with the EIT Law, the Ministry of Finance and the State Administration of Taxation jointly issued, on April 30, 2009, the Notice on Issues Concerning Process of Enterprise Income Tax in Enterprise Restructuring Business, or Circular 59. On December 10, 2009, the State Administration of Taxation issued the Notice on Strengthening the Management on Enterprise Income Tax for Non-resident Enterprises Equity Transfer, or Circular 698. On July 26, 2010, the State Administration of Taxation issued the Bulletin Concerning Promulgation of Administrative Measures on the Enterprise Income Tax Treatment of Enterprise Reorganization, or Bulletin 4. On March 28, 2011, the State Administration of Taxation issued the Bulletin Concerning the Tax Administration of Non-resident Enterprises, or Bulletin 24. Both Circular 59 and Circular 698 became effective retroactively on January 1, 2008. Bulletin 4 became effective retroactively on January 1, 2010. Bulletin 24 took effective since April 1, 2011 and also applies to transactions that have occurred prior to its effectiveness for which the relevant PRC tax matters have not been dealt with.

By promulgating and implementing these circulars, the PRC tax authorities have enhanced their scrutiny over the direct or indirect transfer of equity interests in a PRC resident enterprise by a non-resident enterprise. The PRC tax authorities have the discretion under Circular 59, and Circular 698, Bulletin 4 and Bulletin 24 to make adjustments to the taxable capital gains based on the difference between the fair value of the equity interests transferred and the cost of investment. If the PRC tax authorities make adjustments under Circular 59, Circular 698, Bulletin 4 or Bulletin 24, our income tax costs associated with such potential acquisitions will be increased.

Dividends we receive from our operating subsidiaries located in the PRC may be subject to PRC withholding tax.

The EIT Law provides that a maximum income tax rate of 20% may be applicable to dividends payable to non-PRC investors that are non-resident enterprises to the extent such dividends are derived from sources within the PRC, and the State Council has reduced such rate to 10% through the implementation regulations unless any such non-PRC investor's jurisdiction of incorporation has a tax treaty with China that provides for a different withholding arrangement. We are a Hong Kong incorporated company and substantially all of our income may be derived from dividends we receive from our operating subsidiaries located in the PRC. According to Mainland and Hong Kong Special Administrative Region Arrangement on Avoiding Double Taxation or Evasion of Taxation on Income agreed between the Mainland and Hong Kong Special Administrative Region in August 2006, dividends payable by a subsidiary located in the PRC to the company in Hong Kong who directly holds at least 25% of the equity interests in the subsidiary will be subject to a maximum 5% withholding tax under certain conditions. Since the preferential withholding tax is subject to the approval from competent taxation authorities in PRC, it remains uncertain whether our company in Hong Kong actually would be able to enjoy preferential withholding taxes for dividends distributed by our subsidiaries in China. If we are not able to enjoy the preferential withholding taxes and the tax rate may be 10% for dividends distributed by our subsidiaries, it will materially and adversely affect the amount of dividends, if any, we may pay to our shareholders and ADS holders.

We may be deemed a PRC resident enterprise under the EIT Law and be subject to the PRC taxation on our worldwide income.

Under the PRC Enterprise Income Tax Law and its Implementing Rules, an enterprise established outside of the PRC with de facto management bodies within the PRC is considered a resident enterprise and will be subject to the enterprise income tax at the rate of 25% on its worldwide income. The Implementing Rules define the term de facto management bodies as establishments that carry out substantial and overall management and control over the manufacturing and business operations, personnel, accounting, properties, etc. of an enterprise.

On April 22, 2009, the State Administration of Taxation, or the SAT, issued the Notice Regarding the Determination of Chinese-Controlled Offshore Incorporated Enterprises as PRC Tax Resident Enterprise on the Basis of De Facto Management Bodies, or SAT Circular 82, which provided certain specific criteria for determining whether the de facto management body of a Chinese-controlled offshore-incorporated enterprise is located in China. In addition, the SAT issued the Bulletin 45 on July 27, 2011 to provide more guidance on the implementation of the above circular with an effective date to be September 1, 2011. The Bulletin 45 made clarification in the areas of resident status determination, post-determination administration, as well as competent tax authorities. It also specifies that when provided with a copy of PRC tax resident determination certificate from a resident PRC-controlled offshore incorporated enterprise, the payer should not withhold 10% income tax when paying the PRC-sourced dividends, interest or royalties to the PRC-controlled offshore incorporated enterprise.

Although SAT Circular 82 and the Bulletin 45 only apply to offshore enterprises controlled by PRC enterprises, not those controlled by PRC individuals, the determining criteria set forth in SAT Circular 82 and the administration clarification made in Bulletin 45 may reflect the SAT's general position on how the de facto management body test should be applied in determining the tax resident status of offshore enterprises, regardless of whether they are controlled by PRC enterprises or individuals. Accordingly, we may be considered a resident enterprise and may therefore be subject to the enterprise income tax at 25% on our worldwide income. If we are considered a resident enterprise and earn income other than dividends from our PRC subsidiary, a 25% enterprise income tax on our worldwide income could significantly increase our tax burden and materially and adversely affect our cash flow and profitability.

Table of Contents

Dividends payable by us to our foreign investors and gain on the sale of our ADSs or ordinary shares may become subject to taxes under PRC tax laws.

Under the EIT Law and implementation regulations issued by the State Council, PRC income tax at the rate of 10% is applicable to dividends generated on or after January 1, 2008 payable to investors that are non-resident enterprises, which do not have an establishment or place of business in the PRC, or which have such establishment or place of business but the relevant income is not effectively connected with the establishment or place of business, to the extent such dividends have their sources within the PRC. Similarly, any gain realized on the transfer of ADSs or shares by such investors is also subject to 10% PRC income tax if such gain is regarded as income derived from sources within the PRC. If we are considered a PRC resident enterprise, it is unclear whether dividends we pay with respect to our ordinary shares or ADSs, or the gain you may realize from the transfer of our ordinary shares or ADSs, would be treated as income derived from sources within the PRC and be subject to PRC tax. If we are required under the EIT Law to withhold PRC income tax on dividends payable to our non-PRC investors that are non-resident enterprises or if you are required to pay PRC income tax on the transfer of our ordinary shares or ADSs, the value of your investment in our ordinary shares or ADSs may be materially and adversely affected.

Restrictions on currency exchange may limit our ability to utilize our revenues effectively.

The majority of our revenues and operating expenses are denominated in Renminbi. The PRC government imposes controls on the convertibility of the Renminbi into foreign currencies and, in certain cases, the remittance of currency out of China. Pursuant to the Foreign Currency Administration Rules promulgated on January 29, 1996 and amended on January 14, 1997 and various regulations issued by the Administration for Foreign Exchange (SAFE) and other relevant PRC government authorities, Renminbi is freely convertible only to the extent of current account items, such as trade-related receipts and payments, interest and dividends. Capital account items, such as direct equity investments, loans and repatriation of investment, require the prior approval from the SAFE or its local branch for conversion of Renminbi into a foreign currency, such as U.S. dollars, and remittance of the foreign currency outside the PRC. Shortages in the availability of foreign currency may restrict the ability of our PRC subsidiaries to remit sufficient foreign currency to pay dividends or other payments to us, or otherwise satisfy its foreign currency-denominated obligations. Currently, each of our PRC subsidiaries and affiliates may purchase foreign exchange for settlement of current account transactions, including payment of dividends to us and payment of license fees and service fees to foreign licensors and service providers, without the approval of SAFE. However, approval from the SAFE or its local branch is required where Renminbi is to be converted into foreign currency and remitted out of China to pay capital expenses such as the repayment of loans denominated in foreign currencies.

Each of our PRC subsidiaries and affiliates may also retain foreign exchange in their current accounts to satisfy foreign exchange liabilities or to pay dividends. However, we cannot assure investors that the relevant PRC governmental authorities will not limit or eliminate our ability to purchase and retain foreign currencies in the future. If the foreign exchange control system prevents us from obtaining sufficient foreign currency to satisfy our currency demands, we may not be able to pay dividends in foreign currencies to our shareholders. Since a significant amount of our future revenues will be in the form of Renminbi, the existing and any future restrictions on currency exchange may limit our ability to utilize revenues generated in Renminbi to fund our business activities outside China, if any, or expenditures denominated in foreign currencies.

Table of Contents

In addition, as further explained in disclosures below, each of our PRC subsidiary and affiliated consolidated entities is required to set aside at least 10% of its after-tax profit based on PRC accounting standards each year to its general reserves or statutory capital reserve fund until the accumulative amount of such reserve reaches 50% of its respective registered capital. These reserves are not distributable as cash dividends.

Fluctuations in exchange rates could result in foreign currency exchange losses.

Because substantially all of our revenues and expenditures are denominated in Renminbi and the net proceeds from our initial public offering were denominated in U.S. dollars, fluctuations in the exchange rate between U.S. dollars and Renminbi affect the relative purchasing power of these proceeds and our balance sheet and earnings per ADS in U.S. dollars. In addition, we report our financial results in U.S. dollars, and appreciation or depreciation in the value of the Renminbi relative to the U.S. dollar would affect our financial results reported in U.S. dollars without giving effect to any underlying change in our business or results of operations. Fluctuations in the exchange rate will also affect the relative value of any dividend we issue that will be exchanged into U.S. dollars and earnings from and the value of any U.S. dollar-denominated investments we make in the future.

Since July 2005, the Renminbi has no longer been pegged to the U.S. dollar. Although currently the Renminbi exchange rate versus the U.S. dollar is restricted to a rise or fall of no more than 1% per day and the People's Bank of China regularly intervenes in the foreign exchange market to prevent significant short-term fluctuations in the exchange rate, the Renminbi may appreciate or depreciate significantly in value against the U.S. dollar in the medium- to long-term. Moreover, it is possible that in the future, PRC authorities may lift restrictions on fluctuations in the Renminbi exchange rate and lessen intervention in the foreign exchange market.

Very limited hedging transactions are available in China to reduce our exposure to exchange rate fluctuations. To date, we have not entered into any hedging transactions in an effort to reduce our exposure to foreign currency exchange risk. While we may decide to enter into hedging transactions in the future, the availability and effectiveness of these hedging transactions may be limited and we may not be able to successfully hedge our exposure at all. In addition, our currency exchange losses may be magnified by PRC exchange control regulations that restrict our ability to convert Renminbi into foreign currency.

The audit report included in this annual report are prepared by auditors who are not inspected by the U.S. Public Company Accounting Oversight Board (PCAOB), as such, our investors currently do not have the benefits of PCAOB oversight.

Our independent registered public accounting firm that issues the audit reports included in our annual reports filed with the U.S. Securities and Exchange Commission, or SEC, as auditors of companies that are traded publicly in the United States and a firm registered with the PCAOB, is required by the laws of the United States to undergo regular inspections by the PCAOB to assess its compliance with the laws of the United States and applicable professional standards. Because our auditors are located in China, a jurisdiction where the PCAOB is currently unable to conduct inspections without the approval of the Chinese authorities, our auditors are not currently inspected by the PCAOB.

Table of Contents

Inspections of other firms that the PCAOB has conducted outside of China have identified deficiencies in those firms' audit procedures and quality control procedures, which may be addressed as part of the inspection process to improve future audit quality. This lack of PCAOB inspections in China prevents the PCAOB from regularly evaluating our auditor's audits and its quality control procedures. As a result, our investors may be deprived of the benefits of PCAOB inspections.

The inability of the PCAOB to conduct inspections of auditors in China makes it more difficult to evaluate the effectiveness of our auditor's audit procedures or quality control procedures as compared to auditors outside of China that are subject to PCAOB inspections. Investors may consequently lose confidence in our reported financial information and procedures and the quality of our financial statements.

PRC's new labor law restricts our ability to reduce our workforce in the PRC in the event of an economic downturn and may increase our labor costs.

The PRC Labor Contract Law became effective and was implemented on January 1, 2008. The Labor Contract Law has reinforced the protection for employees who, under the PRC Labor Contract Law, have the right, among others, to have written labor contracts, to enter into labor contracts with no fixed terms under certain circumstances, to receive overtime wages and to terminate or alter terms in labor contracts. Furthermore, the Labor Contract Law establishes additional restrictions and increases the costs involved with dismissing employees. As the Labor Contract Law is relatively new, there remains significant uncertainty as to its interpretation and application by the PRC government and courts. In the event that we decide to significantly reduce our workforce, particularly in the period with sluggish world economy prospect caused by the European debt crisis, the Labor Contract Law could adversely affect our ability to do so in a timely and cost effective manner, and our results of operations could be adversely affected. In addition, for employees whose contracts include non-competition terms, the Labor Contract Law requires employers to pay monthly compensation after such employment ends, which will increase employers' operating expenses.

Risks relating to our shares and ADSs

Due to recent credit crisis of U.S.-listed Chinese companies caused by Chinese companies' accounting scandals and the short selling agencies' raider activities in the aggregate, the price of our underlying common stock might fluctuate significantly and if our stock price drops sharply, we may not satisfy the continued listing requirements of NASDAQ

In 2011, there have been well-publicized accounting problems at several U.S.-listed Chinese companies that have resulted in significant drops in the trading prices of their shares and, in some cases, have led to the resignation of outside auditors, trading halts or share de-listings by NASDAQ or the New York Stock Exchange, and investigations by the Division of Enforcement of the U.S. Securities and Exchange Commission. Many, but not all, of the companies involved in these scandals had entered the U.S. trading market through reverse mergers into publicly traded shells. The scandals have had a broad effect on Chinese companies with shares listed in the United States. For example, Interactive Brokers Group joined other brokers in banning clients from borrowing money to buy securities of any of 160 Chinese companies, including Sina, Sohu and most PRC-based Internet companies. As of December 31, 2011, 46 U.S.-listed Chinese companies in total were compelled to delist or suspended from trading. We believe that, although we have had effective internal controls since our listing in NASDAQ in 2004, such accounting scandals in other Chinese companies could have an adverse effect on the market for shares of our underlying common stock. Investors could lose confidence in PRC companies in general, which could lead to fluctuations in the market prices of our underlying common stock and, if such prices were to drop sharply below \$1.00 for 30 days consecutively, could cause us not to satisfy the continued listing requirements of NASDAQ.

Table of Contents

In addition, some short selling agencies targeted U.S.-listed Chinese companies in 2011. Although the research reports issued by those short selling agencies regarding some U.S.-listed Chinese companies are meritless, those companies had suffered from significant fluctuations on their share prices. We cannot assure investors that we will not be the target of the short selling agencies in 2012. If we were to become their target, even if their claims are meritless, our share price may drop significantly, and if such prices were to drop sharply below \$1.00 for 30 days consecutively, could cause us not to satisfy the continued listing requirements of NASDAQ.

Stock prices of Internet-related companies, particularly companies with business operations primarily in China, have fluctuated widely in recent years, and the trading prices of our ADSs are likely to be volatile, which could result in substantial losses to investors.

The trading prices of our ADSs have been volatile and could fluctuate widely in response to factors beyond our control. Since the completion of our initial public offering in October 2004, the trading prices of our ADSs have ranged between a high of \$47.68 per ADS to a low of \$1.43 per ADS as of December 31, 2011. During the twelve-month period ended December 31, 2011, the price of our ADSs has ranged from a low of \$1.43 to a high of \$7.27 per ADS. The market prices of the securities of Internet-related companies have generally been especially volatile.

In particular, the performance and fluctuation of the market prices of other technology companies with business operations mainly in China that have listed their securities in the United States may affect the volatility in the price of and trading volumes for our ADSs. Some of these companies have experienced significant volatility, including significant price declines in connection with their initial public offerings and as a result of the global financial crisis. The trading performances of these Chinese companies' securities at the time of or after their offerings may affect the overall investor sentiment towards PRC companies listed in the United States and consequently may impact the trading performance of our ADSs. Changes in the U.S. stock market generally or as it concerns our industry, as well as geopolitical, economic, and business factors unrelated to us, may also affect the market price and volatility of our ADSs, regardless of our actual operating performance.

In addition to market and industry factors, the price and trading volume for our ADSs may be highly volatile for business specific reasons. Factors such as variations in our revenue, earnings and cash flow, announcements of strategic transition and new investments, cooperation arrangements or acquisitions, and fluctuations in market prices for our services could cause the market price for our ADSs to change substantially. The global financial crisis may have substantial negative impact on our financial and business performance. Any of these factors may result in large and sudden changes in the volume and price at which our ADSs will trade. We cannot assure investors that these factors will not occur in the future.

If we grant employee share options and other share-based compensation in the future, our net income could be materially and adversely affected.

We adopted the 2004 Stock Incentive Plan, or the 2004 Plan, in January 2004, and amended it in September 2004, August 2006, June 2009, and June 2010, respectively. The total number of ordinary shares issuable under the 2004 Plan as of December 31, 2011 is 24,688,488, including the newly increased 3,000,000 ordinary shares available for issuance under the 2004 Plan approved by our shareholders at the annual general meeting held on June 30, 2010. At the 2010 annual general meeting, our shareholders approved the increase in the number of ordinary shares available for issuance under the 2004 Plan by 3,000,000 ordinary shares annually until December 31, 2014. As of December 31, 2011, we had granted options under the 2004 Plan with the right to purchase a total of 21,917,328 ordinary shares, and 5,049,980 unvested options had been returned to the pool of our ungranted options as a result of resignation from employment by several former employees. We had also granted share options to purchase up to 6,829,500 ordinary shares in January 2004, under option agreements that were independent of the 2004 Plan, to other consultants and business advisors.

Table of Contents

We adopted the 2007 Equity Incentive Plan, or the 2007 Plan, in June 2007. As of December 31, 2011, we had granted restricted stock awards covering 10,558,493 of our ordinary shares to our eligible employees pursuant to the Restricted Stock Issuance and Allocation Agreement, or the Grant Agreement, entered into in July 2007 under the 2007 Plan. The Grant Agreement provides that the shares granted pursuant to it may become activated and vested during the three years following the granted date, or the Vesting Term, based on our achievement of certain performance targets for 2008 and 2009, or the Performance Period. Based on our operating performance during 2008, 8,658,048 shares were activated as of December 31, 2008. Based on our operating performance during 2009, no granted share was activated in 2009. In 2009, in light of the significant global economic downturn and its impact on our performance, our board amended the Grant Agreement to extend the Performance Period and the Vesting Term for an additional three years ending on December 31, 2012. Under the amended agreement any granted shares that were not activated as of December 31, 2009 would become activated and be eligible to vest based on the company's achievement of certain performance targets for 2010, 2011 and 2012. Based on our operating performance for 2010 and 2011, no more granted shares were activated in 2010 or 2011. The total 8,658,048 shares that were activated based on our operating performance for 2008 were fully vested as of December 31, 2011. All the shares granted under the Grant Agreement that have not been activated and vested by the end of calendar year 2012 will be forfeited to the company.

On November 1, 2010, Daily Growth Financial Holdings Limited, or Daily Growth Holdings granted restricted stock awards representing 15% of its ordinary shares pursuant to the 2010 Equity Incentive Plan of Daily Growth Holdings to awardees who are eligible to participate in the plan. In connection with such awards, we transferred 15% of the ordinary shares of Daily Growth Holdings to an entity representing the eligible awardees. In order to bind those awardees together to promote the common interests of the awardees, Daily Growth Holdings and the company, the ordinary shares were transferred to, and are held by, Hopewin Asia Limited, which was incorporated in BVI, on behalf of and exclusively for the benefit of the whole group of awardees eligible to participate in the plan. We believe such incentive plan will attract, maintain and incentivize our team, and we believe the plan is in our best interests and the best interests of our stockholders.

The sale or availability for sale of substantial amounts of our ADSs could adversely affect their market price.

Sales of substantial amounts of our ADSs in the public market in the future, or the perception that these sales could occur, could adversely affect the market price of our ADSs and could materially impair our future ability to raise capital through offerings of our ADSs.

There were 110,935,383 of our ordinary shares including 20,516,551 ADSs (representing 102,582,755 of those ordinary shares) outstanding as of December 31, 2011. In addition, there are outstanding options to purchase an additional 11,994,698 ordinary shares, including options to purchase 1,095,000 ordinary shares under the option agreements that were independent of the 2004 Plan. These ordinary shares, once issued, are exchangeable for our ADSs for trading in the public market. The 82,837,921 ordinary shares that were outstanding prior to our initial public offering are restricted securities as defined in Rule 144 promulgated under the Securities Act of 1933, as amended, or the Securities Act and may not be sold in the absence of registration other than in accordance with Rule 144 under the Securities Act or another exemption from registration. These restricted securities are available for sale subject to volume and other restrictions as applicable under Rule 144 of the Securities Act. To the extent ordinary shares are sold to the market, the market price of our ADSs could decline.

Table of Contents

A significant percentage of our outstanding ordinary shares are held by a small number of our shareholders, and these shareholders may have significantly greater influence on us and our corporate actions by nature of the size of their shareholdings relative to our public shareholders.

As of December 31, 2011, seven of our existing shareholders, including Zhiwei Zhao, IDG Technology Venture Investments, LP, IDG Technology Venture Investment Inc., Vertex Technology Fund (III) Ltd., Ling Zhang, Jianping Lu and Harvest Capital Strategies LLC, beneficially owned, collectively, approximately 59.99% of our outstanding ordinary shares.

For more information regarding our principal shareholders and their affiliated entities, see ITEM 6. Directors, Senior Management and Employees - E. Share Ownership .

Accordingly, these shareholders have had, and may continue to have, significant influence in determining the outcome of any corporate transaction or other matter submitted to the shareholders for approval, including mergers, consolidations and the sale of all or substantially all of our assets, election of directors and other significant corporate actions. In addition, without the consent of these shareholders, we could be prevented from entering into transactions that could be beneficial to us.

Provisions in our charter documents and Hong Kong law, and change in control agreements we have entered into with each of our chief executive officer and chief financial officer, may discourage our acquisition by a third party, which could limit your opportunity to sell your shares at a premium.

Our constituent documents and Hong Kong law include provisions that could limit the ability of others to acquire control of us, modify our structure or cause us to engage in change in control transactions, including, among other things, the following:

Our articles of association provide for a staggered board, which means that certain number of our directors, not exceeding the half of the remaining directors after excluding our chief executive officer, are retired at every annual general meeting and the vacancies created by the retirement stand for election. Our chief executive officer will at all time serve as a director, and will not retire as a director, so long as he remains our chief executive officer. This means that, with our staggered board, at least two annual shareholders meetings, instead of one, are generally required in order to effect a change in a majority of our directors. Our staggered board can discourage proxy contests for the election of our directors and purchases of substantial blocks of our shares by making it more difficult for a potential acquirer to take control of our board in a relatively short period of time.

Hong Kong law permits shareholders of a company to remove directors by a shareholders resolution. Our articles of association require any shareholder who wishes to remove a director in this way to give us at least 120 days notice of the resolution, making it more difficult and time consuming for a potential acquirer who has accumulated a substantial voting position to obtain control of our board by removing opposing directors.

Our articles of association provide that our board can have no less than five and no more than nine directors. Our board currently has five directors as of the date of this report. Any increase in the maximum number of directors on our board beyond nine directors can only be accomplished by amending our articles of association, which under Hong Kong law requires a shareholders supermajority vote of 75% and at least 21 days notice. These restrictions can make it more difficult for a potential acquirer who has accumulated a majority of our shares to take control of us by promptly increasing the size of our board and appointing new directors that are its nominees.

Table of Contents

Hong Kong does not have merger laws that permit Hong Kong companies to merge in the same way as U.S. companies could in the United States. However, the Hong Kong Companies Ordinance has provisions that facilitate arrangements for the reconstruction and amalgamation of companies. The arrangement must be approved by a majority in number of each class of shareholders and creditors with whom the arrangement is to be made, representing three-fourths in value of each such class of shareholders or creditors that are present and voting either in person or by proxy at meetings convened by the High Court of Hong Kong. The arrangements must be sanctioned by the High Court of Hong Kong after shareholders or creditors approve it at the court-convened meeting.

Our shareholders have authorized our board of directors, without any further action by shareholders, to issue additional shares. Under Hong Kong law, the authority granted by our shareholders will remain valid until the conclusion of our next annual general meeting, or the time when our next annual general meeting is required to be held. For as long as this approval remains effective, or is renewed, our board of directors will have the power to issue additional ordinary shares (including ordinary shares represented by ADSs) and preference shares without any further action by shareholders.

We are a Hong Kong company and because the legal and procedural protections of minority shareholders under Hong Kong law differ from those under U.S. law, you may have difficulty protecting your interests as our shareholder relative to shareholders of corporations organized in the U.S.

We are a Hong Kong company and are subject to the laws of Hong Kong. The fiduciary responsibilities of our directors and the ability of minority shareholders to take successful legal action in Hong Kong against us or our directors, are governed by the laws and court procedures of Hong Kong. Shareholders of a Hong Kong company would not be able to bring class action lawsuits against that company or its directors in a Hong Kong court in the same way that shareholders of a U.S. corporation might be able to bring such lawsuits in a U.S. court. In addition, professional conduct rules applicable to Hong Kong lawyers generally prohibit Hong Kong lawyers from accepting contingency fee arrangements, where a lawyer representing the plaintiffs is paid a fee only if the lawsuit is successful. Without contingency fee arrangements or the ability to bring class action lawsuits, our shareholders may find it more costly and difficult to take legal action against us or our directors in the Hong Kong courts. The Hong Kong courts are also unlikely:

to recognize or enforce against us judgments of courts of the United States based on the civil liability provisions of U.S. securities laws; or

to allow original actions brought in Hong Kong, based on the civil liability provisions of U.S. securities laws that are penal in nature. In addition, there is no automatic statutory recognition in Hong Kong of judgments obtained in the United States. Moreover, Hong Kong companies may not have standing to initiate a shareholder derivative action in a federal court of the United States.

As a result of the entire above, minority public shareholders may have more difficulties in protecting their interests in the face of actions taken by management, directors or controlling shareholders than they would as minority public shareholders of a U.S. corporation. Moreover, substantially all of our assets are located outside of the United States and all of our current operations are conducted in the PRC. In addition, most of our directors and officers are nationals and residents of countries other than the United States. All or a substantial portion of the assets of these persons are located outside the United States. As a result, it may be difficult for you to effect service of process within the United States upon these persons.

Table of Contents

The voting rights of holders of ADSs must be exercised in accordance with the terms of the deposit agreement, the American depositary receipts, and the procedures established by the depositary. The process of voting through the depositary may involve delays that limit the time available to you to consider proposed shareholders' actions and also may restrict your ability to subsequently revise your voting instructions.

A holder of ADSs may exercise his/her/its voting rights with respect to the underlying ordinary shares only in accordance with the provisions of the deposit agreement and the American depositary shares.

When the depositary receives from us notice of any shareholders meeting, it will distribute the information in the meeting notice and any proxy solicitation materials to you. The depositary will determine the record date for distributing these materials, and only ADS holders registered with the depositary on that record date will, subject to applicable laws, be entitled to instruct the depositary to vote the underlying ordinary shares. The depositary will also determine and inform you of the manner for you to give your voting instructions, including instructions to give discretionary proxies to a person designated by us. Upon receipt of voting instructions of a holder of ADSs, the depositary will endeavor to vote the underlying ordinary shares in accordance with these instructions. Although Hong Kong law requires us to call annual shareholders' meetings by not less than 21 days' notice in writing, and all other shareholders' meeting by not less than 14 days' notice in writing, these minimum notice requirements can be shortened or completely waived by the consent of all holders of our ordinary shares entitled to attend and vote (in the case of annual shareholders' meetings) or a majority in number of the holders of our ordinary shares representing at least 95% in nominal value of the shares giving the right to attend and vote (in the case of all other shareholders' meetings). If the minimum notice periods are shortened or waived, you may not receive sufficient notice of a shareholders' meeting for you to withdraw your ordinary shares and cast your vote with respect to any proposed resolution, as a holder of our ordinary shares. In addition, the depositary and its agents may not be able to send materials relating to the meeting and voting instruction forms to you, or to carry out your voting instructions, in a timely manner. We cannot assure investors that you will receive the voting materials in time to ensure that you can instruct the depositary to vote your shares. The additional time required for the depositary to receive from us and distribute to you meeting notices and materials, and for you to give voting instructions to the depositary with respect to the underlying ordinary shares, will result in your having less time to consider meeting notices and materials than holders of ordinary shares who receive such notices and materials directly from us and who vote their ordinary shares directly. If you have given your voting instructions to the depositary and subsequently decide to change those instructions, you may not be able to do so in time for the depositary to vote in accordance with your revised instructions.

Furthermore, the depositary has deemed any holders who do not send in voting instructions at all or in a timely manner as having instructed the depositary to give a discretionary voting proxy to the person(s) designated by us to receive voting proxies, with full power to exercise such holder's (or holders') voting rights under the ADSs' underlying ordinary shares in the manner as the proxy holder deems fit. Accordingly, matters that favor the incumbent board of directors and management will have a higher likelihood of passing than would otherwise be the case.

The depositary and its agents will not be responsible for any failure to carry out any instructions to vote, for the manner in which any vote is cast or for the effect of any such vote.

Table of Contents

You may not receive distributions on our ordinary shares or any value for them if such distribution is illegal or if any requisite government approval cannot be obtained in order to make such distribution available to you.

The depository of our ADSs has agreed to pay to you the cash dividends or other distributions (which may include securities or rights distributions) it or the custodian for our ADSs receives on our ordinary shares or other deposited securities after deducting its fees and expenses. You will receive these distributions in proportion to the number of our ordinary shares your ADSs represent. However, the depository is not responsible to make a distribution available to any holders of ADSs if it decides that it is unlawful to make such distribution. For example, it would be unlawful to make a distribution to holder of ADSs if it consisted of securities that required registration under the Securities Act but that were not properly registered or distributed pursuant to an applicable exemption from registration. The depository is not responsible for making a distribution available to any holders of ADSs if any government approval or registration required for such distribution cannot be obtained after reasonable efforts made by the depository. We have no obligation to take any other action to permit the distribution of our ADSs, ordinary shares, rights or anything else to holders of our ADSs. This means that you may not receive the distributions we make on our ordinary shares or any value for them if it is unlawful or unreasonable from a regulatory perspective for us to make them available to you. These restrictions may have a material adverse effect on the value of your ADSs.

You may be subject to limitations on transfer of your ADSs.

Your ADSs, each of which represents five ordinary shares, are transferable on the books of the depository. However, the depository may close its books at any time or from time to time when it deems expedient in connection with the performance of its duties. The depository may close its books from time to time for a number of reasons, including in connection with corporate events such as a rights offering, during which time the depository needs to maintain an exact number of ADS holders on its books for a specified period. The depository may also close its books in emergencies, and on weekends and public holidays. The depository may refuse to deliver, transfer or register transfers of our ADSs generally when the books of the depository are closed, or at any time if we or the depository thinks it is advisable to do so because of any requirement of law or any government or governmental body, or under any provision of the deposit agreement, or for any other reason.

Your right as a holder of ADSs to participate in any future rights offerings may be limited, which may cause dilution to your holdings.

We may from time to time distribute rights to our shareholders, including rights to acquire our securities. However, we cannot make rights available to our ADS holders in the United States unless we register the rights and the securities to which the rights relate under the Securities Act or an exemption from the registration requirements is available. In addition, the deposit agreement provides that the depository bank will not make rights available to you unless the distribution to ADS holders of both the rights and any related securities are either registered under the Securities Act or exempted from registration under the Securities Act. We are under no obligation to file a registration statement with respect to any such rights or securities or to endeavor to cause such a registration statement to be declared effective. Moreover, we may not be able to establish an exemption from registration under the Securities Act. Accordingly, ADS holders may be unable to participate in our rights offerings and may experience dilution in their holdings.

In addition, if the depository is unable to sell rights that are not exercised or not distributed or if the sale is not lawful or reasonably practicable, it will allow the rights to lapse, in which case you will receive no value for these rights.

Table of Contents

We were a passive foreign investment company, or PFIC, for the taxable year ended December 31, 2011, which could result in adverse United States federal income tax consequences to U.S. Holders of our ADSs or ordinary shares.

Based on the market price of our ADSs and the value and composition of our assets, we believe we were a passive foreign investment company, or PFIC, for U.S. federal income tax purposes for the taxable year ended December 31, 2011 and may be classified as a PFIC for the current taxable year unless our share value increases and/or we invest a substantial amount of the cash and other passive assets we hold in assets that produce or are held for the production of active income. A non-U.S. corporation will be considered a PFIC for any taxable year if either (1) at least 75% of its gross income is passive income or (2) at least 50% of the value of its assets (based on an average of the quarterly values of the assets during a taxable year) is attributable to assets that produce or are held for the production of passive income. The value of our assets is generally determined by reference to the market price of our ADSs and ordinary shares, which may fluctuate significantly. Because we believe we were a PFIC for the taxable year ended December 31, 2011, certain adverse U.S. federal income tax consequences would apply to the U.S. Holders with respect to any excess distribution received from us and any gain from a sale or other disposition of our ADSs or ordinary shares. For more information on the U.S. tax consequences to you that would result from our classification as a PFIC, please see Item 10.E. Additional Information Taxation U.S. Federal Income Taxation Passive Foreign Investment Company.

ITEM 4. INFORMATION ON THE COMPANY

A. History and development of the company.

China Finance Online Co. Limited was incorporated in Hong Kong in November 1998. In April 2001, we launched our online financial and listed company data and information services.

We acquired our website *www.jrj.com.cn* in April 2000 and our domain name *www.jrj.com* in October 2004, and commenced operating our business under this domain name in March 2005. We maintain the same content under both domain names. In 2006 we acquired website *www.stockstar.com*, which was established in 1996 and currently is one of the leading finance and securities websites in China. Also in 2006, we acquired CFO Genius, a financial information database provider primarily serving domestic securities and investment firms. CFO Genius was the first of its kind in China to provide such services at the time of its establishment in 1994. The acquisition strengthened our position in the industry and provided future opportunities to develop database products. In 2007, we acquired Daily Growth Securities, a licensed securities brokerage firm incorporated in Hong Kong, and therefore established our business outside mainland China. We currently hold 85% of the equity interests of Daily Growth Securities, Daily Growth Futures, Daily Growth Wealth Management, and Daily Growth Investment Services, companies incorporated in Hong Kong. We intend that all the equity interests held or to be held by CFO Hong Kong in a financial service related business will be integrated into Daily Growth Holdings, thereby making Daily Growth Holdings our platform to develop financial service related business outside China.

In October 2004, we completed the initial public offering of our ADSs, each of which represents five of our ordinary shares, and listed our ADSs on The Nasdaq Stock Market. On January 3, 2011, our ADSs were elevated to trade on the NASDAQ Global Select Market. The NASDAQ Global Select Market is designated for public companies that meet the highest initial listing standards in the world. Inclusion in the world-class blue chip market is a significant milestone of our progress and is indicative of our commitment to high standards and good governance, and marks our achievement, leadership and stature.

Table of Contents

Based on our assessment of changes in customer demand, market and regulatory environments and industry outlook, the Board of Directors has decided upon the following strategic transition. Beginning in April 2012, as we continue to offer basic versions of paid individual subscription services to individual investors through our flagship portal sites and accumulate paid subscribers with basic software and information services, we will no longer accept new paid subscribers or renewals for its premium individual subscription service. We will start targeting unpaid users of our flagship web portals and low-end subscribers for our securities investment advisory service and over time provide other wealth management services.

Our principal executive offices are currently located at 9th Floor of Tower C, Corporate Square, No. 35 Financial Street, Xicheng District, Beijing 100033, People's Republic of China and our telephone number is (8610) 5832-5288.

B. Business overview.

China Finance Online Co. Limited is the technology-driven and user-focused market leader in China in providing vertically integrated financial services and products including news, data, analytics, securities investment advisory and brokerage-related services through web portals, desktop solutions, and mobile handsets. Through its web portals, www.jrj.com and www.stockstar.com, the company provides individual users with subscription-based service packages that integrate financial and listed-company data, information and analytics from multiple sources with features and functions such as data and information search, retrieval, delivery, storage and analysis and will start providing integrated financial information and services, including securities investment advisory and wealth management services in near future. These features and functions are delivered through proprietary software available by download, through the internet or through mobile handsets. Through its subsidiary, CFO Genius, the Company provides financial information database and analytics to institutional customers including domestic securities and investment firms. Through its subsidiaries, Daily Growth-the platform to develop financial service related business outside China, the company provides securities brokerage-related services for stocks listed on HKEx.

Our service offerings to users are used by and targeted at a broad range of investors in China, including individual investors managing their own money, professional investors such as institutional investors managing large sums of money on behalf of their clients and high net worth individuals, other financial professionals such as investment bankers, stock analysts and financial reporters, and middle class individuals. Most, if not all, all of our research tools are designed for and tailored toward investors in China, allowing them to make informed investment decisions with respect to all of China's and Hong Kong's listed company stocks, bonds, mutual funds and stock index futures based on specifications and analyses determined by the investors.

Users are not charged for visiting our websites or obtaining basic financial information such as real-time quotes and historical financial information for all of China's and Hong Kong's listed company stocks, bonds and mutual funds, and financial news. Our integrated information platform, which allows users to select from a range of downloadable and web-based research tools, is available only through subscription. We categorize and process our website content through our subscription-based research tools and present data and research results to our subscribers, which allow them to make informed investment decisions.

Beginning in April 2012, as we continue to offer basic versions of paid individual subscription services to individual investors through our flagship portal sites and accumulate paid subscribers with basic software and information services, we will no longer accept new paid subscribers or renewals for its premium individual subscription service. We will start targeting unpaid users of our flagship web portals and low-end subscribers for our securities investment advisory service and over time provide other wealth management services.

Table of Contents

Cost reduction associated with the transition will help offset the loss in revenues and mitigate the loss of cash flow to a certain extent. We plan to implement additional cost-cutting initiatives to increase efficiency and improve operational performance. Deferred revenues will continue to be realized until the expiration of outstanding premium individual subscriptions. We intend to preserve our cash balance as ample cash is critical for ensuring the success of the strategic transition.

New businesses such as securities investment advisory and other wealth management services are still in the early stage of development. The company does not expect these areas to contribute material revenues any time soon. During this transition period, we will no longer provide financial or operational guidance.

Our subscription service offerings are designed to enhance our users' and subscribers' experience due to the following characteristics:

Comprehensiveness.

We offer a broad range of data and information regarding China's and Hong Kong's listed company stocks, bonds, mutual funds and stock index futures. We offer more than basic financial data such as price and trading information and provide our subscribers with breaking economic and financial news, detailed historical data and information, financial analysis tools, market coverage and listed company analysis and online forums that facilitate our subscribers' own investment analysis efforts. We believe we have built a comprehensive database of historical financial data and information on China's bonds and mutual funds with data and information dating back to December 1990, when the SSE and SZSE first opened for trading. Our database for Hong Kong listed companies traces back to 1986 with coverage of equities and warrants, financial and business description.

Integration.

Our information platform integrates data and information from multiple, credible sources with features and functions such as data and information search, retrieval, delivery, storage and analysis. Our platform integrates all of the research tools, data and other information we have developed or gathered and, together with our screen layout and menu options, displays them in a manner designed for ease of use. The content and technology comprising our integrated information platform is also designed to be adaptable so that as we develop new research tools, content and features, these new research tools, content and features can be easily integrated with our existing platform. Depending on the service package chosen by the subscriber, a subscriber can have different levels of access privileges to financial analysis tools, real-time and historical data, news, research reports and online forums.

Interaction.

We have established online bulletin boards, financial microblogging and discussion forums where users can share with each other views on stocks and trends in the financial markets in China. We launched a financial microblogging platform, Ganniu, to enable investors to share with each other their investment opinions, to gain valuable insight from experienced investors and to follow the latest developments in the market. We also created trading simulation platforms for the trading simulation of mainland stocks. We also pioneered the simulation for funds, Hong Kong stocks and index futures. Simulation platforms have provided educational platform for users to gain investment knowledge and improve investment techniques. The platforms have boosted our brand image and users outreach among Chinese investors.

Table of Contents

Timeliness.

We provide our subscribers and users access to real-time stock quotes, breaking news and updated research reports to allow them to stay current with the latest market developments. We receive real-time stock, bond, mutual fund, stock index futures quotes and other trading related information directly from the SSE, SZSE, HKEx and CFFEX. During an average trading day, we update our research tools between three and five seconds of receipt of new data and information from the stock exchanges. We also receive current news headlines from financial news websites and publishers and distributors of traditional media. We also have provided our subscribers and users with up-to-date personal finance news and wealth management products that we received from banks, trust companies, insurance companies and other financial institutions.

User-friendliness.

Our research tools and our website are designed with a screen layout, menu options and displays that we believe any user familiar with a computer will find easy to use. From our basic web page, our users can choose a variety of financial data and information topics that interest them. Through our research tools, our subscribers have access to a large pool of historical financial data and information, which they can categorize and analyze as they determine. Our product development team works closely with our customer support personnel to update and develop information and presentation formats that our subscribers view as enhancing ease of use and increasing the informative power of our research tools and our website. Our website is also designed to accommodate users who only have low bandwidth for the Internet access.

To assist us in the delivery of comprehensive, timely and easy to use service offerings, we have developed a technology platform that utilizes the capabilities of the Internet. Our technology platform allows us to retrieve real-time quotes from each of the SSE, SZSE, HKEx and CFFEX, historical financial data and information on listed companies, bonds and mutual funds from data providers, research reports from securities advisory companies, futures companies and securities brokerage companies licensed to provide securities advisory services, commentaries from licensed individual securities advisors and news feeds from news publishers and media companies.

In 2011, a substantial portion of our revenue is derived from annual subscription fees for our service offerings. For subscription services provided to individual investors, we receive subscription fees at the beginning of the subscribers' subscription periods. Revenues from the subscription fees are deferred and recognized ratably over the service period.

Our websites

We operate two of the most popular finance portals in China, *www.jrj.com* and *www.stockstar.com*, with broad geographic coverage of well-developed regions in China. JRJ is the abbreviation of Jin Rong Jie, which translates to the financial industry in Chinese. Our website content and our research tools are the key components of our information platform. Our websites have four primary functions, namely to:

attract visitors and market our service offerings. The pool of registered users that are attracted by the two finance portals for information and free services forms a natural target for our subscription services, brokerage services and securities investment advisory services with wealth management services to be added over time;

store content and serve as an integral part of our information platform;

serve as download platforms for our service offerings; and

display online advertisements.

Table of Contents

In order to attract visitors to our websites, we offer a significant portion of our website content free of charge. This free content includes real-time stock quotes, trading volumes, pricing indicators for listed companies in China and market news from the SSE, SZSE, HKEx as well as on the data including market information, trading data and other information data related to stock index futures from the CFFEX. Through our websites, users can also participate in online forum discussions, trading simulations and bulletin boards. Our websites also have an important marketing function for our subscription based service offerings. We provide examples to our visitors on our websites of the various premium content and features they can access and receive by becoming a subscriber to our value-added service offerings.

Our premium content and features are accessible through our research tools, some of which are web-based and others are computer-based. Subscribers to our web-based research tools are required to register and maintain personal accounts with our websites. These subscribers can store important information they viewed and analytical results they obtained in their personal accounts maintained at our websites, and later review that information and results using the same screen layouts and menu options our websites provide.

Subscribers to computer-based research tools can download from our website the packages they selected to their computers.

We believe our websites are designed for ease of use and accommodate low bandwidth access to the Internet. In addition, we have also derived some revenue from online advertising.

Our subscription services

We collect and process our website content through our research tools and provide to our subscribers financial analysis tools, real-time and historical data, news, research reports and online forums in one integrated information platform, which allows them to make informed investment decisions with respect to all of China's and Hong Kong's listed company stocks, bonds, mutual funds and stock index futures based on specifications determined by investors.

Our features

Through our integrated information platform, our subscribers have access to and can make use of each of our main content features: financial analysis tools, real-time and historical data, news, research reports and online forums.

We offer subscription-based services on a single information platform that integrates data and information from multiple sources with features and functions such as data and information search, retrieval, delivery, storage and analysis. We deliver these features and functions using software tools and mobile handsets that we have developed, which we refer to as research tools. Our research tools combine:

financial analysis tools that permit users to calculate and analyze quantitatively financial data;

current and historical financial data and information for China's and Hong Kong's listed company stocks, bonds, mutual funds and stock index futures; and

categorized news and research reports.

With our screen layout and menu options, we display our research tools in a manner designed for ease of use. The content and technology comprising our integrated information platform is also designed to be adaptable so that, as we develop new research tools and adopt new content and features, these new research tools, content and features can be easily integrated with our existing platform.

Table of Contents

Our service offerings are broadly divided into three categories: Securities Market Information, Technical Analysis and Fundamental Analysis. As of December 31, 2011, we had a total of approximately 94,000 active paying individual subscribers, representing a decrease of 40% from 156,000 as of December 31, 2010. Active paying individual subscribers refer to registered users who subscribe to one of our fee subscription-based services offered by either *www.jrj.com* or *www.stockstar.com* by download or through mobile devices.

The decrease in the number of active paid subscribers reflected a combination of changes in customer demand, market, regulatory environments and industry outlook, including the underperforming Chinese stock market, the declining market demand, the intensifying industry competition, the distorted competitive landscape and the new regulatory environment.

Financial analysis tools.

Our financial analysis tools are research tools that provide subscribers with the ability to quantitatively calculate and analyze financial data, which include:

Securities market data analysis tools. Our securities market data service packages are developed on the basis of Level II quotes licensed from the SSE and SZSE. Level II quotes give investors unique insight into a stock's price movement. In addition, Level II quotes provide faster and more comprehensive trading data and statistical information on market transactions.

Technical Analysis. Technical analysis involves researching historical price and volume data, patterns and trends to predict the performance of a given stock. This type of analysis focuses on chart formations and formulas in identifying major and minor trends to recognize buying opportunities and exit points.

Fundamental Analysis. Fundamental analysis involves examining the company's financials and operations, especially sales, earnings, growth potential, assets, debt, management, products, and competition. Fundamental Analysis takes into consideration only those variables that are directly related to the company itself, rather than the overall state of the market or technical analysis data. These tools allow our subscribers to perform fundamental and technical analysis on companies, bonds and mutual funds listed on the SSE, SZSE and HKEX, based on current and historical financial data and information, trading volumes and other user specifications.

Real-time and historical data.

Our integrated information platform offers subscribers interactive charts, quotes, reports and indicators on over 15,000 securities, including company stocks, bonds, warrants and mutual funds, listed on China's SSE, SZSE and Hong Kong's HKEX. Users can search by company name or ticker symbol for real-time stock quotes of these securities. Trading data is provided to us on a real-time basis by each of the SSE, SZSE, HKEX and CFFEX. We collect, categorize, organize and index trading data provided to us to allow searches, sorting and analysis by user specification and allow our subscribers to access and analyze the data, using our financial analysis tools and other research tools.

We also offer our subscribers detailed historical data and information on listed companies, mutual funds and bonds. This information is available for our subscribers to download from our website and is available on compact diskettes but are not accessible to general viewers. We collect historical data and information, process this information and, through our research tools, allow our subscribers to retrieve critical data and information they select.

Table of Contents

News.

Our news feature allows users to search and view breaking economic and financial news and information from China and around the world. We have a team of editorial staff who compile on a daily basis economic and financial news and information reported by other public sources that are relevant to China's financial markets. Our editorial staff further indexes them according to topics and categories for the convenience of our users. Through our research tools and website content, our subscribers can access timely and customized financial information and reports, categorized and integrated into topics and sub-topics that they select, based on their investment and analysis needs. The financial data and information presented on our website or through our research tools is gathered from other financial information content providers such as major financial publications in China and intermediaries with whom we have contractual arrangements.

Research reports.

Through our integrated information platform, our users can view financial news letters and analytical reports from a number of China's prominent securities professionals. We draw market research reports and commentaries from securities advisory companies, futures companies and securities brokerage companies licensed to provide securities advisory services, commentaries from licensed individual securities advisors. For our subscribers, we categorize these reports and commentaries based on topics, industry sector and other customary categorizations.

Online forums.

We host several online bulletin boards on our websites by which Chinese licensed securities advisors offer their commentaries on a variety of topics ranging from macroeconomic conditions to performance of individual stocks, bonds, mutual funds and stock index futures. We do not support, comment on or advocate any views presented by any such securities advisors. We also maintain several online forums on our website, enabling our users to participate in the discussions on specific financial topics we believe will be of interest to them. The online forums are moderated by third-party moderators approved by us. We believe the online bulletin boards and discussion forums enhance our users' experience and, through our active monitoring, allow us to better understand our users' behavior and needs.

Our research tools

Through our research tools we have developed, our subscribers can access and analyze our content, including our real-time and historical data, news and research reports, in one integrated platform, allowing our subscribers to make informed investment decisions with respect to all of China's and Hong Kong's listed company stocks, bonds, mutual funds and stock index futures according to specifications and analyses determined by them. Some of our research tools are web-based and others require download from our website and are computer-based or mobile-based. Our subscribers pay us a subscription fee for the use of our subscription services over a specified period of time, which is typically 12 months.

We offer subscribers a variety of research tools designed to provide information and analysis, including financial analysis, as well as the ability to search and sort out data and information, based on subscribers' needs and preferences. For example, we make available services that permit subscribers to analyze our content using some or all of the following research tools:

Categorized macro information. This feature allows subscribers to search and sort up-to-date and comprehensive news and information relating to the broader financial markets or a specific financial topic or industry sector. We have a dedicated team of professional editors who collect, organize, categorize and index macro-economic and financial market information on a daily basis, according to user feedback and classification methods that we believe are accepted practice in securities markets in China.

Table of Contents

Industry sector analysis. Many investors in China seek to distinguish between listed companies with investment potential and those prone to financial trouble by analyzing listed companies' financial data published in their financial statements and comparing such data among companies within the same industry sector. We collect and process listed company financial data and information according to classification methods set by relevant PRC regulatory authorities, and allow subscribers to view the relative standings of listed companies in the same industry sector or geographical locations based on market accepted performance parameters, including price-to-earnings ratios and profit margins.

Fundamental analysis. Historical and real-time financial information are important to investors because they provide insight into company fundamentals. This research tool integrates the historical and real-time trading information we maintain in our database, as well as fundamental financial information such as earnings-per-share, shareholding structure, business description and competition and other related data and information. Our subscribers can receive fundamental financial and trading information organized by their specifications and display these results on a graphical interface that we designed to be easy to visualize and navigate.

Mutual fund analysis. Our mutual fund research tool focuses on categorizing information relating to the portfolio holdings of mutual funds. This feature allows subscribers to study the collective effect of large market players on individual stocks. This feature also offers information relating to the performance of individual mutual funds, allowing subscribers to assess the risks and rewards of investing in mutual funds.

Technical analysis. This feature allows investors interested in trends formulated by historical trading data to perform technical analysis on listed companies. With over 60 markets accepted technical indicators and a complete database of historical data and information on all of China's and Hong Kong's listed company stocks, our subscribers can perform extensive chart analysis and pattern recognition on any stock listed on China's stock exchanges.

Securities market data analysis. This feature provides faster and more comprehensive trading data and statistical information on market transactions. With our Securities Market Data service packages developed on the basis of Level II quotes licensed from the SSE and SZSE, our subscribers are provided with trading transparency and unique insight into a stock price's movements, and can make more informed investment decisions.

We currently offer different service packages incorporating some or all of our research tools to our users. Our service packages provide research tools focused around three main areas: securities market data, technical analysis and fundamental analysis. We view the migration of existing subscribers and the attraction of new subscribers to our service offerings with more comprehensive research tools as one of our most important growth strategies.

Pricing policy

We price our service packages based on the research tools included and their level of comprehensiveness, as well as on market demand. Each of the securities service packages has multiple versions ranging from low end to high end with different levels of comprehensiveness in terms of features and functionality which target various levels of customer demand. Therefore, we focus on enhancing and upgrading the available features and functions of our research tools and continue to introduce updated versions of our service packages. We encourage all of our users to upgrade to newer versions of our service packages or more comprehensive service packages.

Table of Contents

We may, from time to time, offer discounts or promotions, depending on our perceived need in accordance with our pricing policy. Any of such discounts or promotions could apply to new or repeat subscribers as we may determine.

Our brokerage services

With the acquisition of Hong Kong-based Daily Growth Securities in November 2007, a licensed securities brokerage firm, we provide certain brokerage and related services to our customers who invest in stocks listed on HKEx. Daily Growth Securities is regulated by HKEx and SFC. In 2011, brokerage and related services provided by Daily Growth Securities and Daily Growth Futures represented approximately 7% of our total net revenues, and such services were not part of our core business in 2011.

Our online advertisement services

We believe that our websites www.jrj.com and www.stockstar.com are among the most popular financial information websites in China. Although we believe our Internet community is an attractive demographic target for advertisers because it represents an affluent, educated and technically sophisticated audience group, in 2011, we continued to allocate most of our advertising inventory to promote our own subscription-based software offerings. In 2011, revenues from advertising-related services represented approximately 12% of our total net revenues, and online advertising was not part of our core business.

Our securities investment advisory

In China, securities investment advisory refers to fee-based investing advice and counsel on stocks and related financial products from licensed professionals who assist in clients' investment decision-making process. Beginning in April 2012, we are implementing a strategic transition of our core business from providing premium subscription services to individual investors to developing fee-based securities investment advisory services with wealth management services to be added over time.

Customer support

Our customer support center provides our subscribers real-time and personal support. In addition, our customer support personnel assist our existing and prospective subscribers to resolve any technical problems, and perform sales and marketing functions. We have an in-house training program for our customer support personnel, which include training courses on China's securities markets, our service features and functionalities, technical problem solving skills in respect of our research tools and general customer service guidelines.

Our content providers

We draw content from the SSE, SZSE and HKEx, which provide us with real-time stock, bond, mutual fund pricing and other information, CFFEX, which provides us with real-time stock index futures pricing, and our data providers, CFO Genius, which provide us with historical financial data and information on listed companies, bonds and mutual funds, according to our parameters, specifications and requirements. We also collect data and draw content from securities advisory companies, futures companies and securities brokerage companies licensed to provide securities advisory services, licensed individual securities advisors, and news publishers and media companies, as well as financial institutions, such as banks, trust companies and insurance companies.

Table of Contents

SSE, SZSE, HKEx and CFFEX

We receive real-time stock, bond and mutual fund quotes and other trading related information directly from the SSE, SZSE, and HKEx. We have entered into information service agreements with each of the stock exchanges pursuant to which we pay the stock exchanges fixed service fees in exchange for receiving real-time price quotes and other trading related information through satellite communication. We also have cable links to both exchanges to serve as back-ups to satellite communication data feeds.

Our agreement with SSE Infonet Ltd., which is associated with the SSE, allows us to develop service packages based on Level II quotes and upgrade the features and functions of our current products. Level II quotes give investors unique insight into a stock price's movement and provide faster and more comprehensive trading data.

Our agreement with Shenzhen Securities Information Co., Ltd., associated with SZSE, allows us to develop service packages based on Level II quotes, and upgrade the features and functions of our current products.

Our agreement with HKEx-IS, a business subsidiary of HKEx allows, *www.jrj.com*, one of the most popular Chinese finance websites owned by us, to become the first HKEx-IS designated finance portal in mainland China to provide free real-time basic market prices of all securities traded on the HKEx to global investors.

Our agreement with CFFEX allows us to provide real-time coverage on China's stock index futures. Pursuant to the agreement, CCFEX has authorized us to provide all the data including market information, trading data and other information or data related to stock index futures products to end users in mainland China.

Data providers

We acquired CFO Genius in September 2006. CFO Genius has become our primary provider of historical data and information on listed companies, bonds and mutual funds for input into our information platform. We are able to obtain information in accordance with designated parameters, specifications and requirements. This information includes historical financial information for listed companies, significant corporate events such as mergers and acquisitions and significant changes in the shareholdings of listed companies, information concerning major shareholders of listed companies, biographical information for directors and management of listed companies, as well as financial news and other data and information.

Financial institutions, securities advisors and stock brokerages

We have entered into cooperation contracts with various financial institutions, including banks, insurance and trust companies. According to these contracts, they will provide the personal finance information and product updates directly to us. We have also entered into cooperation arrangements with securities advisory companies, futures companies and securities brokerage companies, each licensed to provide securities advisory services. Under these arrangements, we have the right to extract market commentary and research notes taken from their websites, and to store, reproduce, market and deliver such information to our customers by means of our information platforms. We upload financial content from these websites on a regular basis. In addition, we have entered into cooperation arrangements with licensed individual securities advisors to receive through email and other means their published articles and commentaries covering a range of topics from macroeconomic conditions to performance of individual stocks, bonds and mutual funds. Many of these individual securities advisors have dedicated columns or bulletin boards maintained on our website for which they are responsible for maintenance. We also indirectly own licensed securities investment advisory firms and the investment education securities training center through the contractual arrangements, which would enable us to offer investment research and securities advisory services to individual and institutional clients, and provide a wide range of investor education services to our customers in the future.

Table of Contents

News and media conglomerates

We also draw content in the form of breaking headlines and other news information from publishers and distributors of traditional media.

Chinese news publishers and media companies

We are permitted under our arrangements with content partners to extract financial news, reports and information taken from their print publication channels, and to store, reproduce, market and deliver such information to our users through our website. We rely on our editorial staff to compile, for publication on our website, publicly available financial news, reports and information received from these sources that are relevant to China's financial markets.

Sales and marketing

We market our service offerings through our websites, as well as through customer support personnel at our telemarketing and customer service centers. Our websites provide detailed descriptions of our service offerings while our customer support personnel are available to explain to callers the various features of our offerings and to resolve our subscribers' technical problems. We also market our service offerings through banks, mutual funds and stock brokerage firms.

We charge our subscribers a subscription fee for the use of our service packages over an agreed-upon service period, typically one year. Our subscribers either pay us by cash, by money order via post, by online bank transfer or by direct wiring of cash. Upon receipt of payment, we promptly activate our subscribers' accounts with us. We do not take any credit risk of our subscribers.

Product development

We place significant emphasis on refining and upgrading our information platform, and on creating new and innovative features to meet the changing needs of our customers and utilizing the latest technology and innovation. We believe that we are one of the few online financial information service providers in China that have solid in-house software development capabilities. Our ability to develop software internally allows us to broaden our service offerings and enhance our competitiveness.

Our product development team works as an integral part of our overall service offering efforts. For example, we require our product development team to conduct frequent meetings with our sales and marketing team to discuss the feasibility of new service offerings and the progress of existing product development efforts. Our product development team also works closely with our customer support team to develop features and content that is based on feedback we received from our subscribers and users.

We expect product development to remain an important part of our business as the online financial data and information services industry in China becomes increasingly sophisticated. In order to remain competitive, we expect to continue to expand our product development efforts, namely to:

increase the breadth of our service offerings through the addition of new features and functions to our service packages;

Table of Contents

enhance our subscribers' experience by improving the quality of our research tools and website;

develop additional research tools, features and content specifically targeting the high-end subscribers; and

design and build new financial instrument service products that fit our strategies.

Technology and infrastructure

Our internally developed technology infrastructure is designed to maximize the number of concurrent users we can serve, while minimizing information retrieval time for our users. We deliver electronically real-time and historical financial data and analysis tools to our users through our internally developed technology platform, which is designed specifically for our web-based and computer-based software services. Our technology platform, which consists of web server technology, database technology and a data aggregation engine, enables us to enhance performance, reliability and scalability in handling bursts of high-volume data requests during peak time, allowing users to quickly retrieve the information that they search for even during periods of high concurrent use.

Strategic Alliances

We have developed strategic relationships with a range of content, data, service and distribution partners in order to serve users more effectively and to extend our brand and services to a broader audience.

Competition

We face competition in every aspect of our business. The number of online financial news and information sources, who are competing for users' attention and subscriptions, has increased since we commenced operations. Competition is intensifying among companies that provide security analysis software despite the declining market demand. As a result, the security analysis software industry is showing signs of over-capacity. Sales of many companies started to stall or decline and profit margins continue to be squeezed. More broadly, we also compete, directly and indirectly, for users and subscribers with companies in the business of providing financial data and information services, including:

publishers and distributors of traditional media, including print, radio and television as well as radio and television programs and news focused on financial news and information;

internet portals providing information on business, finance and investing;

financial information web pages offered by websites;

stock research software vendors, especially those that develop and market stock research software through stock brokerage companies;

stock brokerage companies, especially stock brokerage companies with online trading capabilities; and

other companies that provide similar products and services as ours.

Table of Contents

Our ability to compete depends on many factors, including the comprehensiveness, timeliness and trustworthiness of our content, the market acceptance, pricing and sophistication of our analytical tools, the ease of use of our information platform and the effectiveness of our sales and marketing efforts.

In addition, few substantial barriers to entry have historically caused certain unqualified companies and low-quality products to compete with us in the market. Certain unlicensed participants supplied counterfeit, illegal or low-quality and inferior products or services under our name. Such unlawful acts could not only distort market order, but also negatively impact our reputation and materially and adversely affect our future developments. Despite their long-term positive effects on standardizing industry practices and creating a more transparent and trustworthy environment, regulatory requirements effective from January of 2011 have increased companies' compliance costs. The resultant increase in expenses is becoming apparent across the industry.

New businesses such as securities investment advisory and other wealth management services are still in the early stage of development. We will operate in an increasingly competitive environment and compete for clients on the basis of product choices, client services, reputation and brand names. The key challenges we will face include:

Competition from securities advisory and investment corporations providing securities investment advisory services;

Competition from brokerage firms providing securities investment advisory services; .

Competitions from commercial banks. Many commercial banks rely on their own wealth management arms and sales force to distribute their products, such as China Merchants Bank, China Minsheng Bank and China Everbright Bank;

Competition from brokerage firms, trust companies, mutual fund companies which are also engaged in, or may in the future engage in the distribution of wealth management product and services offerings;

Competition from independent wealth management service providers; and

We will also be facing fierce competition hiring competent investment advisory personnel.

Intellectual property

Our intellectual property is an essential element of our business operations. We rely on copyright, trademark, trade secret and other intellectual property law, as well as non-competition, confidentiality and license agreements with our employees, suppliers, business partners and others to protect our intellectual property rights. Our employees are generally required to sign agreements to acknowledge that all inventions, trade secrets, works of authorship, developments and other processes generated by them on our behalf are our property, and to assign to us any ownership rights that they may claim in those works. Despite our precautions, it may be possible for third parties to obtain and use intellectual property that we own or license without consent.

Our PRC subsidiaries and PRC-incorporated affiliates are the registered owners of 130 software copyrights as of December 31, 2011, each of which has been registered with the National Copyright Administration of the PRC.

We have registered two key domain names relating to our websites, *www.jrj.com* and *www.stockstar.com*, with the Internet Corporation for Assigned Names and Numbers, or ICANN, an internationally organized, non-profit corporation. We have also registered one domain name relating to our website, *www.jrj.com.cn*, with the China Internet Network Information Center, a domain name registration service in the PRC. We currently have 29 trademarks registered with the Trademark Office of State Administration of Industry and Commerce (the SAIC) and one trademark registered in Hong Kong as of December 31, 2011.

Table of Contents

Regulation

We operate our business primarily in the PRC under a legal regime consisting of the State Council, which is the highest authority of the executive branch of the PRC central government, and several ministries and agencies under its leadership, including:

MIIT;

CSRC;

CBRC;

Ministry of Culture;

General Administration of Press and Publication (National Copyright Administration);

National Development and Reform Commission (NDRC);

SAIC;

Ministry of Public Security;

Ministry of Commerce; and

State Administration of Radio Film and Television

The State Council and these ministries and agencies have issued a series of rules that regulate a number of different substantive areas of our business, which are discussed below.

Foreign ownership restriction on Internet content provision businesses

According to the Provisions on Administration of Foreign Invested Telecommunications Enterprises, or the FITE Provisions, promulgated by the State Council in December 2001 and amended in September 2008, foreign ownership in the companies that provide Internet content services, including our business of providing financial information and data to Internet users, must not exceed 50%. In order to comply with this foreign ownership restriction, we operate our website in China through CFO Fuhua, which is wholly owned by Zhiwei Zhao, our chief executive officer, and Jun Wang, our chief financial officer, both of whom are PRC citizens. Under FITE Provisions and other related regulations, we cannot directly hold the licenses and approvals necessary to operate our website because those licenses and approvals cannot be held by foreign entities or majority foreign-owned entities. We, as a company incorporated in Hong Kong, are a foreign entity for this purpose.

There are, however, substantial uncertainties regarding the interpretation and application of current or future PRC laws and regulations. Accordingly, we cannot assure investors that the PRC regulatory authorities will not ultimately take a view that is contrary to the opinion of our PRC legal counsel. If the PRC government finds that the agreements that establish the structure of our operations in China do not comply with PRC government restrictions on foreign investment in our industry, we could be subject to severe penalties.

Table of Contents

Internet-related Licenses and permits

There are a number of aspects of our business which require us to obtain licenses from a variety of PRC and Hong Kong regulatory authorities.

In September 2000, the State Council promulgated the Telecommunications Regulations, or the Telecom Regulations. The Telecom Regulations categorize all telecommunications businesses in the PRC as either basic or value-added. Internet content services, or ICP services, are classified as value-added telecommunications businesses. Under the Telecom Regulations, commercial operators of value-added telecommunications services must first obtain an operating license from the MIIT or its provincial level counterparts. In September 2000, the State Council issued the Administrative Measures on Internet Information Services, or the Internet Measures. According to the Internet Measures, commercial ICP service operators must obtain an ICP license from the relevant government authorities before engaging in any commercial ICP operations within the PRC.

In order to host our website, CFO Fuhua and CFO Meining are required to hold an ICP license issued by MIIT or its local offices. Pursuant to the revised Administrative Measures for Telecommunications Business Operating License promulgated by MIIT in March 2009, ICP operators providing value-added services in multiple provinces are required to obtain an inter-regional license (or National License) and ICP operators providing the same services in one province are required to obtain a local license (or Local License). CFO Fuhua currently holds a Local License and an ICP license both issued by the local branch of MIIT in Beijing, and CFO Meining currently holds a National License issued by MIIT and an ICP license issued by the local branch of MIIT in Shanghai.

A regulation issued by MIIT, the Notice on Certain Issues Regarding the Regulation of Short Messaging Services on April 29, 2004, requires short message, or SMS, content providers to obtain an SMS license from MIIT or its local offices. We have obtained the required SMS license by CFO Fuhua and CFO Meining for the delivery of our financial short message content.

Furthermore, MIIT has promulgated the Internet Electronic Messaging Service Administrative Measures in November 2000, or the BBS Measures, requiring ICP license holders that provide online bulletin board services to register with, or obtain an approval from, the relevant telecommunications authorities. CFO Fuhua and CFO Meining have obtained such approval from Beijing Communications Administration and Shanghai Communications Administration, respectively, the government agency in charge of this matter.

On July 6, 2004, the State Administration of Radio Film and Television promulgated the Rules for the Administration of Broadcasting of Audio/Video Programs through the Internet and Other Information Networks, or the A/V Broadcasting Rules. The A/V Broadcasting Rules apply to the opening, broadcasting, integration, transmission or download of audio/video programs via the Internet and other information networks. Anyone who wishes to engage in Internet broadcasting activities must first obtain an audio/video program transmission license, with a term of two years, issued by the State Administration of Radio Film and Television and operate pursuant to the scope as provided in such license. Foreign invested enterprises are not allowed to engage in this business nor obtain such license. On December 20, 2007, the State Administration of Radio Film and Television and the MIIT jointly issued the Rules for the Administration of Internet Audio and Video Program Services, commonly known as Document 56, which came into effect as of January 31, 2008. Document 56 reiterates the requirement set forth in the A/V Broadcasting Rules that online audio/video service provider must obtain a license from the State Administration of Radio Film and Television. Furthermore, Document 56 requires all online audio/video service providers to be either wholly state-owned or state-controlled. According to relevant official answers to press questions published on the State Administration of Radio Film and Television's website dated February 3, 2008, officials from the State Administration of Radio Film and Television and the MIIT clarified that online audio/video service providers that already had been operating lawfully prior to the issuance of Document 56 may re-register and continue to operate without becoming state-owned or controlled, provided that such providers have not engaged in any unlawful activities. This exemption will not be granted to online audio/video service providers established after Document 56 was issued. CFO Fuhua holds a Radio and TV Program Production and Business Operation License which allows it to produce and publish cartoons, entertainment programs and special topic programs and an Information Network Communicated Audio-Video Program License which allows it to broadcast securities and futures information related audio-video programs through website.

Table of Contents

Regulation of Internet content

The PRC government has promulgated measures relating to Internet content through a number of ministries and agencies, including MIIT, the Ministry of Culture and the General Administration of Press and Publication. These measures specifically prohibit Internet activities, which include provision of financial information through the Internet, that result in the publication of any content which is found to, among other things, propagate obscenity, gambling or violence, instigate crimes, undermine public morality or the cultural traditions of the PRC, or compromise State security or secrets. If an ICP license holder violates these measures, the PRC government may revoke its ICP license and shut down its websites.

CFO Fuhua's and CFO Meining's ICP licenses expressly state that, in relation to their Internet content provision, among other things, they are not allowed to publish general news on politics, society or culture, or establish a news column, or provide such information under express heading of news. On September 25, 2005, State Council Information Office and MIIT jointly promulgated the Provisions for the Administration of Internet News Information Services, in which the authorities provided an applicable definition of Internet news information services and defined such news information as general news information. It further required that ICPs that provide Internet news information services within such definition must apply for a license. In practice, such license is compulsorily required when political, military or diplomatic news is involved. Our current business, specifically the provision of financial or securities related information through the Internet, will not be affected without procuring such license.

Regulation of Information security

The National People's Congress has enacted legislation that prohibits use of the Internet that breaches the public security, disseminates socially destabilizing content or leaks state secrets. Breach of public security includes breach of national security and infringement on legal rights and interests of the state, society or citizens. Socially destabilizing content includes any content that incites defiance or violations of PRC laws or regulations or subversion of the PRC government or its political system, spreads socially disruptive rumors or involves cult activities, superstition, obscenities, pornography, gambling or violence. State secrets are defined broadly to include information concerning PRC national defense, state affairs and other matters as determined by the PRC authorities.

According to other relevant regulations, ICP operators must complete mandatory security filing procedures and regularly update information security and censorship systems for their websites with local public security authorities, and must also report any public dissemination of prohibited content.

In addition, the State Secrecy Bureau has issued provisions authorizing the blocking of access to any website it deems to be leaking state secrets or failing to comply with the relevant legislation regarding the protection of state secrets during online information distribution. Specifically, Internet companies in China with bulletin boards, chat rooms or similar services must apply for specific approval prior to operating such services.

Table of Contents

On November 23, 2005, the Ministry of Public Security promulgated Provisions on Technological Measures for Internet Security Protection, or Internet Protection Measures. The Internet Protection Measures require all ICP operators to keep records of certain information about its users (including user registration information, log-in and log-out time, IP address, content and time of posts by users) for at least 60 days and submit the above information as required by laws and regulations. Both CFO Fuhua and CFO Meining have already taken measures to comply with these laws and regulations.

Regulation of Intellectual property rights

The State Council and the National Copyright Administration have promulgated various regulations and rules relating to protection of software in China. Under these regulations and rules, software owners, licensees and transferees should register their rights in software with the National Copyright Administration or its local offices and obtain software copyright registration certificates. The National People's Congress amended the Copyright Law in 2001 and 2010 to widen the scope of works and rights that are eligible for copyright protection. The amended Copyright Law extends copyright protection to products disseminated over the Internet and computer software. We have registered all of our self-developed software with the National Copyright Administration.

PRC law requires owners of Internet domain names to register their domain names with qualified domain name registration agencies approved by MIIT and obtain a registration certificate from such registration agencies. A registered domain name owner has an exclusive use right over its domain name.

Unregistered domain names may not receive proper legal protections and may be misappropriated by unauthorized third parties. We have registered our domain names, *www.jrj.com* and *www.stockstar.com*, with the ICANN and obtained a certificate for this domain name. ICANN is an internationally organized, non-profit corporation that has responsibility for Internet Protocol (IP) address space allocation, protocol identifier assignment, generic (gTLD) and country code (ccTLD) Top-Level Domain name system management, and root server system management functions.

Regulation of Website name

On October 1, 2004, the Administrative Rules on Filing of Commercial Websites for Records were promulgated by the Beijing Municipal Administration of Industry and Commerce, or Beijing AIC to replace the Implementing Measures of the Temporary Administration Rules on Filing of Commercial Website for Record promulgated by the Beijing AIC on September 1, 2000. According to The Administrative Rules on the Filing of Commercial websites, websites must comply with the following requirements:

they must file with the Beijing AIC and obtain electronic registration marks;

they must place the registration marks on their websites' homepages; and

they must register their website names with the Beijing AIC.

CFO Fuhua and CFO Meining have registered website names, JRJ Investment and Finance Network and Stockstar with, and received electronic registration marks from Beijing AIC.

Table of Contents

Regulation of Privacy protection

PRC law does not prohibit ICPs from collecting and analyzing personal information from their users. We require our users to accept a user agreement whereby they agree to provide certain personal information to us. PRC law prohibits ICPs from disclosing to any third parties any information transmitted by users through their networks unless otherwise permitted by law. If an ICP violates these regulations, MIIT or its local offices may impose penalties and the ICP may be liable for damages caused to its users.

Regulation of Online advertising

The PRC government regulates advertising, including online advertising, principally through the State Administration for Industry and Commerce, although there are no national PRC laws or regulations specifically regulating online advertising business. Under the Rules for Administration of Foreign-Invested Advertising Enterprise, promulgated by the State Administration for Industry and Commerce and the Ministry of Commerce in March 2004 and amended in October 2008, foreign investors are permitted to own equity interests in PRC advertising companies. However, foreign investors in wholly foreign-owned and joint venture advertising companies are required to have at least three years and two years, respectively, of direct operations in the advertising industry outside of China. Since we have not been involved in advertising outside of China for the required number of years, we cannot hold equity interests in PRC companies engaged in advertising business directly.

On November 30, 2004, the SAIC issued the Administrative Regulations for Advertising Operation Licenses, or the Advertising Regulations, taking effect as of January 1, 2005. Pursuant to the Advertising Regulations and other related rulings, enterprises conducting online advertising activities are exempted from the previous requirement to obtain an advertising permit in addition to a business license. We proceed with our online advertising business through CFO Fuhua and CFO Meining, both of which have procured business licenses that include online advertising in their business scope.

Advertisers, advertising operators and advertising distributors are required by PRC advertising laws and regulations to ensure that the contents of the advertisements they prepare or distribute are true and in full compliance with applicable laws and regulations. In addition, where a special government review is required for certain categories of advertisements before publishing, the advertisers, advertising operators and advertising distributors are obligated to confirm that such review has been performed and that relevant approval has been obtained. Violation of these regulations may result in penalties, including fines, confiscation of advertising income, orders to cease dissemination of the advertisements and orders to publish an advertisement correcting the misleading information. In the case of serious violations, the State Administration for Industry and Commerce or its local branches may force the violator to terminate its advertising operation or even revoke its business license. Furthermore, advertisers, advertising operators or advertising distributors may be subject to civil liability if they infringe on the legal rights and interests of third parties.

Regulation of Investment advisory

Securities investment advisory is intensely regulated in China, which mainly include the Securities Law (2005), the Tentative Measures for Administration of Securities and Futures Investment Consultancy (1997), the Notice on Several Issues related to Regulation of Securities Investment Advisory provided to the Public (2001) and the Provisional Regulations. Those laws and regulations impose licensing requirements on the provision of securities investment advisory to the public in China.

The CSRC has adopted a series of rules in regulating the methods of providing securities investment advisory to the public, including without limitation Tentative Provisions for Issuance of Securities-related Research Reports (2010), Tentative Provisions for Securities Investment Consultancy Business with Membership System (2005), Rules on Strengthening the Broadcast Management of Information related to Securities and Futures (1997). Those rules established the requirements on the companies engaged in securities investment advisory business to set up branches in China, required securities investor advisors to disclose any conflict of interest and set up firewall measures internally, and prohibited securities investor advisor from disseminating the information related to securities investment on TV channels or radio programs without the approval by the CSRC and the State Administration of Radio Film and Television.

Table of Contents

The Provisional Regulations promulgated by the CSRC in October 2010 and effective as of January 1, 2011 require that securities investment advisory providers obtain a license. We have obtained such license in accordance therewith to provide investment advisory services which assist in clients' investment decision-making process to its individual and corporate clients. CFO Newrand Training owns an investment education license issued by Shenzhen Bureau of Education.

Daily Growth Securities, regulated by HKEx and SFC, holds a type 1 license, which allows it to engage in securities trading and brokerage business in Hong Kong. Daily Growth Futures, regulated by the SFC, holds a type 2 license, which allows it to engage in futures contract trading business. Daily Growth Wealth Management, regulated by the SFC, holds a type 4 license, which allows it to engage in securities advising activities in Hong Kong.

Regulation of Wealth management

Wealth management for private investors is still in early development stage in China. China has not adopted a unified and specific regulatory framework governing the distribution of wealth management products and the provision of wealth management consulting services. Nevertheless, there are ad hoc laws and regulations related to several types of wealth management products as the following:

PRC Trust Law (2001) and the Administrative Rules Regarding Trust Company-Sponsored Collective Fund Trust Plans (2007 and amended in 2009) are principal laws and regulations for trust products;

PRC Partnership Enterprise Law (2006), the Notice on Further Standardizing the Development and Record-filing Administration of Equity Investment Enterprises in Pilot Regions (2011) promulgated by the NDRC and a series of local regulations promulgated by provinces and certain cities, including Beijing, Shanghai and Tianjin, to encourage and regulate the development of private equity investment in the applicable region;

Administrative Measures for the Sale of Securities Investment Funds promulgated by the CSRC on June 9, 2011 are the principal regulation for the sale of mutual fund.

Table of Contents**C. Organizational structure.**

The following table sets forth the details of our principal subsidiaries and significant PRC-incorporated affiliates as of December 31, 2011:

Table of Contents

PRC regulations currently limit foreign ownership of companies that provide ICP services, which include our business of providing financial information and data to Internet users, not to exceed 50%. We are a Hong Kong company and we conduct our operations solely in China through our wholly owned subsidiaries. We are a foreign enterprise and the wholly owned subsidiaries are all foreign invested enterprises under PRC law and, accordingly, neither we nor our wholly owned subsidiaries are eligible for a license to operate ICP services or provide online advertising services in China. In order to comply with foreign ownership restrictions, we operate our online business in China through CFO Fuhua. We have entered into a series of contractual arrangements with CFO Fuhua and its shareholders, including contracts relating to the leasing of equipment, the licensing of our domain name, the provision of technical support services and strategic consulting and certain shareholder rights and corporate government matters in 2004. Upon the transfer of Jun Ning and Wu Chen's holdings in CFO Fuhua to Zhiwei Zhao and Jun Wang in November 2006 and October 2007, respectively, Zhiwei Zhao and Jun Wang replaced Jun Ning and Wu Chen, respectively, as a party to each of the contractual arrangements we had entered into with Jun Ning and Wu Chen with respect to their holdings in CFO Fuhua and the operation of CFO Fuhua.

Loan Agreement. We entered into a loan agreement with Zhiwei Zhao effective November 20, 2006 to extend to Mr. Zhao a loan in the amount of \$163,000, for the sole purpose of financing his acquisition of the equity interests of CFO Fuhua from Jun Ning. The initial term of these loans is 10 years which may be extended upon the parties' agreement. Zhiwei Zhao can only repay the loans by transferring all of his interest in CFO Fuhua to us or a third party designated by us. When Zhiwei Zhao transfers his interest in CFO Fuhua to us or our designee, if the actual transfer price is higher than the principal amount of the loans, the amount exceeding the principal amount of the loans will be deemed as interest accrued on such loans and repaid by Zhiwei Zhao to us. While Hong Kong law limits the maximum interest payment chargeable under a loan to 60% of the outstanding principal amount per annum, this limitation would only be relevant if, at the time of a future transfer to us of the interest in CFO Fuhua held by Zhiwei Zhao, the actual value of CFO Fuhua were to have increased at an average annual rate greater than 60%. CFO Fuhua's assets currently consist primarily of registered capital and licenses to provide Internet content and advertising related services, and its operations are primarily limited to operating our free website and providing advertising related services on behalf of CFO Beijing. Accordingly, we do not believe this limitation will have a material effect on our business and operations, or will result in a material amount being paid to the shareholders of CFO Fuhua if and when they are permitted to transfer their interest in CFO Fuhua to us.

We entered into a loan agreement with Jun Wang in October 2007 to extend to Mr. Wang a loan in the amount of \$199,000 for the sole purpose of financing his acquisition of the equity interests of CFO Fuhua from Wu Chen subject to the same terms and conditions as the loan agreement we entered into with Zhiwei Zhao as discussed above.

Purchase Option Agreement. Pursuant to a purchase option and cooperation agreement, or the purchase option agreement, entered into among us, CFO Beijing, Jun Ning, Wu Chen and CFO Fuhua on May 27, 2004, its subsequent amendments on November 20, 2006 upon the transfer of shares by Jun Ning to Zhiwei Zhao, and a purchase option and cooperation agreement entered into among us, CFO Beijing, Zhiwei Zhao, Jun Wang and CFO Fuhua on October 18, 2007 upon the transfer of shares by Wu Chen to Jun Wang, Zhiwei Zhao and Jun Wang jointly granted us an exclusive option to purchase all or any portion of their equity interest in CFO Fuhua, and CFO Fuhua granted us an exclusive option to purchase all of its assets if and when (1) such purchase is permitted under applicable PRC law and (2) to the extent permitted by law, Zhiwei Zhao and/or Jun Wang ceases to be a director or employee of CFO Fuhua, or either Zhiwei Zhao or Jun Wang desires to transfer his equity interest in CFO Fuhua to a party other than the existing shareholders of CFO Fuhua. We may purchase such interest or assets ourselves or designate another party to purchase such interest or assets.

Table of Contents

The exercise price of the option will equal the total principal amount of the loan lent by us to Zhiwei Zhao and Jun Wang under their loan agreements to purchase their respective equity interest in CFO Fuhua, or the price required by relevant PRC law or government approval authority if such required price is higher than the total principal amount of the loans lent by us to Zhiwei Zhao and Jun Wang. We may choose to pay the purchase price payable to Zhiwei Zhao and Jun Wang by canceling our loans to Zhiwei Zhao and Jun Wang.

Following any exercise of the option, the parties will enter into a definitive share or asset purchase agreement and other related transfer documents within 30 days after written notice of exercise is delivered by us. Pursuant to the purchase option agreement, at all times before we or any party designated by us acquire 100% of CFO Fuhua's shares or assets, CFO Fuhua may not (1) sell, transfer, assign, dispose of in any manner or create any encumbrance in any form on any of its assets unless such sale, transfer, assignment, disposal or encumbrance is related to the daily operation of CFO Fuhua or has been disclosed to and consented to in writing by us; (2) enter into any transaction which may have a material effect on CFO Fuhua's assets, liabilities, operations, equity or other legal interest unless such transaction relates to the daily operation of CFO Fuhua or has been disclosed to and consented to in writing by us; or (3) distribute any dividends to its shareholders in any manner, and Zhiwei Zhao and Jun Wang may not cause CFO Fuhua to amend its articles of association to the extent such amendment may have a material effect on CFO Fuhua's assets, liabilities, operations, equity or other legal interest except for pro rata increases of registered capital required by law.

Voting arrangement. Upon Zhiwei Zhao's receipt of Jun Ning's holdings in CFO Fuhua on November 20, 2006, and Jun Wang's receipt of Wu Chen's holdings in CFO Fuhua on October 18, 2007, each of Zhiwei Zhao and Jun Wang delivered an executed proxy substantially identical to the proxy executed by Jun Ning and Wu Chen, respectively, with respect to their voting rights as shareholders of CFO Fuhua.

Share Pledge Agreement. Pursuant to a share pledge agreement, dated May 27, 2004, Jun Ning and Wu Chen have pledged all of their equity interest in CFO Fuhua to CFO Beijing to secure the payment obligations of CFO Fuhua under the equipment leasing agreement, the technical support agreement and the amended and restated strategic consulting agreement between CFO Beijing and CFO Fuhua. Upon Zhiwei Zhao's receipt of Jun Ning's holdings in CFO Fuhua on November 20, 2006, and Jun Wang's receipt of Wu Chen's holdings in CFO Fuhua on October 18, 2007, Zhiwei Zhao and Jun Wang replaced Jun Ning and Wu Chen, respectively, as a party to the share pledge agreement. Under this agreement entered into by and among Zhiwei Zhao, Jun Wang and CFO Beijing, each of Zhiwei Zhao and Jun Wang have agreed not to transfer, assign, pledge or in any other manner dispose of his interest in CFO Fuhua or create any other encumbrance on his interest in CFO Fuhua which may have a material effect on CFO Beijing's interest without the written consent of CFO Beijing, except the transfer of their interest in CFO Fuhua to us or the third-party assignee designated by us according to the purchase option agreement.

We entered into contractual arrangements with our affiliates including significant affiliates such as CFO Newrand, CFO Chongzhi, CFO Chuangying, CFO Qicheng and CFO Shenzhen Shangtong and their shareholders similar to agreements we had entered into with CFO Fuhua and its shareholders. As a result of these contractual arrangements we obtained substantial control and became the primary beneficiary of our PRC-incorporated affiliates and, accordingly, we consolidate the results of operations of our PRC-incorporated affiliates in our financial statements.

Table of Contents

D. Property, Plants and equipment.

Our principal executive offices as well as our subsidiaries and affiliates that locate in Beijing lease approximately 5,616 square meters. Our subsidiaries and affiliates that locate in Shanghai lease approximately 3,767 square meters. Our subsidiaries and affiliates that locate in Shenzhen lease approximately 1,927 square meters. Daily Growth Securities, Daily Growth Futures, Wealth Management and Daily Growth Investment Services are located in Hong Kong, leasing approximately 557 square meters. We intend to seek additional office space as required for our operations as needed on commercially reasonable terms. We believe that we will be able to obtain adequate facilities, principally through the leasing of appropriate properties, to accommodate our future expansion plans.

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion of our financial condition and results of operations is based upon and should be read in conjunction with our consolidated financial statements and their related notes included in this annual report on Form 20-F. This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, without limitation, statements regarding our expectations, beliefs, intentions or future strategies that are signified by the words expect, anticipate, intend, believe, or similar language. All forward-looking statements included in this annual report are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements. In evaluating our business, you should carefully consider the information provided under the caption Risk factors in this annual report on Form 20-F. We caution you that our businesses and financial performance are subject to substantial risks and uncertainties.

A. Operating Results

We mainly offer subscription-based services based on a single integrated information platform that combines financial analysis tools, real-time and historical data, news, research reports and online forums. Our service offerings are used by and targeted at a broad range of investors in China, including individual investors managing their own money, professional investors such as institutional investors managing large sums of money on behalf of their clients and high net worth individuals, other financial professionals such as investment bankers, stock analysts and financial reporters, and middle class individuals.

Our net revenues decreased by 11.2% to \$53.0 million in 2011 from \$59.7 million in 2010. The net loss attributable to China Finance Online Co. Limited was \$19.3 million in 2011. For subscription services provided to individual investors, we receive subscription fees at the beginning of the subscribers' subscription periods. Revenues from the subscription fees are deferred and recognized ratably over the subscription periods. Our deferred revenues were \$24.5 million as of December 31, 2011, compared to \$46.0 million as of December 31, 2010.

Our principal capital expenditures for 2009, 2010 and 2011 consisted of primarily purchases of servers, workstations, computers, computer software, and other items related to our network infrastructure for a total of approximately \$4.5 million, \$0.9 million and \$0.7 million, respectively.

Table of Contents

Key factors affecting our operating results and financial condition

Some of the key factors affecting our operating results and financial condition include the following:

global macroeconomic uncertainties, as well as the overall performance of China's economy;

performance of China's securities markets, and user demand for market intelligence on China's securities markets;

competition in the PRC financial data and information services industry;

PRC governmental policies relating to the security analysis software industry;

possible non-cash goodwill, intangible assets and investment impairment may adversely affect our net income;

termination of our TopView series of market data analysis products. On December 31, 2008, SSE Infonet Ltd. terminated the provision of TopView data to third-party software vendors, including us. We subsequently terminated the offering of TopView products to our customers. Our 2009 operating results were impacted from the TopView termination;

contribution of alternative revenue resources such as revenues from online advertising;

seasonality associated with the level of activity of our users and subscribers and the trading activities of China's securities markets;

tax refund from the PRC tax authorities for value-added-taxes we are required to pay on the sale of subscriptions to our service packages;

other tax incentives we receive from PRC tax authorities resulting from CFO Success, CFO Zhengning, CFO Qicheng, and CFO Shenzhen Shangtong being the Software Enterprises; CFO Software and CFO Meining being the High and New Technology companies; and CFO Stockstar, CFO Genius, CFO Jujin, and CFO Newrand are entitled to enjoy a reduced tax rate;

our cost structure, including, in particular, our cost for raw data, bandwidth costs and personnel-related expenses;

the desirability of our service packages relative to other products and offerings available in the market;

our ability to benefit from the acquisition of CFO Stockstar, CFO Genius, Daily Growth Securities and the contractual arrangements with CFO Newrand, CFO Fuhua, CFO Chongzhi, CFO Chuangying, CFO Securities Consulting, and CFO Shenzhen Shangtong and other VIEs; and

Edgar Filing: China Finance Online Co. LTD - Form 20-F

PRC telecommunication and regulatory policies.

We derive revenues primarily from annual subscription fees from subscribers to our financial data and information services. The level of public interests in investing in China's securities market could significantly influence the demand for market intelligence on China's securities markets and our products. Such demand could be affected by the level of trading activity in China's securities markets. During the past several years, China's securities markets have experienced sizable volatility.

Table of Contents

To a lesser extent, we also derive revenues through advertisement sales on our website, which contributed \$6.2 million in 2011, representing a 11.2% decrease from the \$7.03 million contributed in 2010. Revenues from advertising accounted for 11.8% of our net revenues in 2011. We allocated most of our advertising inventories to promote our subscription-based software offerings, and hence online advertising was not considered a core service line of our business in 2011.

Our gross revenues also include the benefit of a refund from the PRC tax authorities for VAT, which we are required to pay on the sale of subscriptions to our service packages. We receive these refunds from the PRC tax authorities as part of the PRC government's policy of encouraging software development in the PRC. There is generally a one-month lapse between the time we complete a sale and pay the VAT on that sale and the time we receive the refund. We recognized approximately \$3.1 million in revenue for VAT refunds in 2011. The VAT refund policy was intended to be effective until 2011. The VAT refund policy was reconfirmed pursuant to the Notice on VAT Policy for Software Products, effective from January 1, 2011, jointly promulgated by the Ministry of Finance and the State Administration of Taxation on October 13, 2011, or Caishui Circular 100. Although the Notice on VAT Policy for Software Products does not specify policy expiration date, in the event that the preferential tax treatment for them is discontinued, these entities will become subject to the standard tax rate at 17%, which materially increase our tax obligations.

Gross revenues

We generate subscription fee revenues mostly from the sales of the service packages we currently offer, which are comprised of downloadable and web-based research tools. In general, a subscription permits the subscriber to use the selected service package for a one-year period.

The most significant factors that affect our subscription revenues are:

the number of registered user accounts on our websites;

the number of active paying individual subscribers; and

the service packages selected by our subscribers.

Although users of our website are not charged for visiting our website and obtaining basic financial information, such as real-time stock quotes and historical financial information for all of China's listed company stocks, bonds and mutual funds, financial news and research reports, these users are our primary source of existing and potential subscribers. As users frequent our website and rely on our offerings, we expect that a number of them will opt to purchase our subscription services. A substantial portion of our revenues are currently derived from our subscription services. Registered user accounts refer to user accounts registered by individuals with either *www.jrj.com* or *www.stockstar.com*. Active paying individual subscribers refer to registered users who subscribe for a fee to one of our subscription-based services offered by either *www.jrj.com* or *www.stockstar.com* by download or through the mobile devices.

We generally encourage our subscribers to migrate to newer, more comprehensive and higher priced service offerings. We price our service packages based on the research tools included and their level of comprehensiveness, as well as on market demand. From time to time, we may offer discounts to and promotional rates for our service packages, which may be offered to new subscribers or repeat subscribers.

Net revenues

Our net revenues reflect a deduction from our gross revenues for business taxes and related surcharges incurred in connection with our China operations. The gross revenues of PRC entities from sales that are not subject to VAT are subject to a business tax at a rate ranging from 3% to 5%. We pay business tax in the PRC on revenues from advertising-related business and from mobile value-added services included in our subscription services.

Table of Contents

We derive revenue from external customers for each of the following services during the years presented:

	Years ended December 31,		
	2009	2010	2011
Subscription fees	\$ 47,201,162	\$ 49,518,331	\$ 43,100,486
Advertising revenue	3,985,699	7,031,219	6,243,748
Brokerage service revenue	2,228,630	3,003,246	3,539,664
Others	190,386	163,246	124,167
Total revenue from external customers	\$ 53,605,877	\$ 59,716,042	\$ 53,008,065

Cost of revenues

A large portion of costs of revenues are website maintenance expenses, which consist of bandwidth costs, personnel-related expenses, rent and content expenses for our *jrj.com* and *stockstar.com* websites. Cost of revenues accounted for 14% and 17 % of our net revenues in 2010 and 2011, respectively.

Rent. Rent attributable to cost of revenues reflects that portion of our rent expense that is directly used in the provision of our web content. We allocate rent to cost of revenues to the extent the space is occupied by our web content personnel.

Bandwidth Costs. Bandwidth fees are the fees we pay to Internet Data Center, or the IDC, for telecommunications services and for hosting our servers. We expect our bandwidth costs, as variable costs, to increase with the traffic on our websites. Our bandwidth costs could also increase if the IDC increase their service charges. Our bandwidth fees are the largest component of our cost of revenues, constituting 31% of our cost of revenues in 2011.

Cost of raw data. Our cost of raw data consists of fees we pay to the stock exchanges and our other data providers pursuant to our commercial agreements with those parties. These contracts are typically for a fixed rate, without regard to the level of use, for a term, typically less than three years, depending on the provider. Our cost of raw data is likely to be our most variable element of cost of revenues. Our cost of raw data is expected to increase:

if we enter into additional commercial agreements for purchasing data from new sources or if we obtain different or additional data from existing sources; or

due to rate increases we may experience in the future upon renewal of our existing agreements.

Salary and compensation. Salary and compensation expenses include wages, bonuses and other benefits, including welfare benefits. Salary and compensation included in our cost of revenues relate to our web content personnel.

Operating expenses

Our operating expenses consist of general and administrative expenses, product development expenses, sales and marketing expenses and impairment loss of intangible assets and goodwill, if any. Stock-based compensation expenses are reported within each of the operating expense financial statement line items, as appropriate.

Table of Contents

General and administrative expenses. General and administrative expenses primarily consist of salary and compensation for our general management, finance and administrative personnel, stock-based compensation expenses, rent, professional services fees and other expenses, including travel and other general business expenses, office supplies and depreciation for general office furniture and equipment.

Product development expenses. Our product development expenses primarily consist of salary and compensation expenses of personnel engaged in the research, development and implementation of our new service offerings, rent and depreciation of equipment attributable to our product development efforts.

Sales and marketing expenses. Our sales and marketing expenses primarily consist of salary and compensation for our sales and marketing personnel, as well as the marketing promotion fees.

Stock option plan and option agreements

We adopted the 2004 Plan in January 2004. The 2004 Plan is intended to promote our success and to increase shareholder value by providing an additional means to attract, motivate, retain and reward selected directors, officers, employees and other eligible persons. We amended the 2004 Plan in September 2004, August 2006, June 2009 and June 2010, respectively. Subsequent to these amendments, the total number of ordinary shares issuable under the 2004 Plan as of December 31, 2011 is 24,688,488, including the newly increased 3,000,000 ordinary shares available for issuance under the 2004 Plan approved by our shareholders at the annual general meeting held on June 30, 2010. At the annual general meeting held on June 30, 2010, our shareholders approved the increase in the number of ordinary shares available for issuance under the 2004 Plan by 3,000,000 ordinary shares annually until December 31, 2014. In 2007, we granted to selected directors, officers, employees, individual consultants and advisors under the 2004 Plan options with the right to purchase up to 3,848,000 ordinary shares, and 172,760 unvested options were forfeited and returned to the pool of our ungranted options as a result of resignation from employment by a few former employees. In 2008, we granted to selected directors, officers, employees, individual consultants and advisers under the 2004 Plan options with right to purchase up to 2,820,840 ordinary shares, and 970,000 unvested options were forfeited and returned to the pool of our ungranted options as a result of resignation from employment by a few former employees. In 2009, we granted to selected employees under the 2004 Plan options with a right to purchase up to 10,000 ordinary shares, and 379,200 unvested options were forfeited and returned to the pool of our ungranted options as a result of resignation from employment by a few former employees. In 2010, we granted to selected employees under the 2004 Plan options with a right to purchase up to 3,562,000 ordinary shares, and 655,340 unvested options were forfeited and returned to the option pool as a result of resignation from employment by a few former employees. In 2011, we granted to selected employees under the 2004 Plan options with a right to purchase up to 285,000 ordinary shares, and 1,346,040 options were forfeited and returned to the option pool as a result of resignation from employment by a few former employees. As of December 31, 2011, options to purchase 7,821,140 ordinary shares were available for future grant under the 2004 Plan.

Table of Contents

The options we granted in January 2007 under the 2004 Plan have an exercise price of \$0.96 per share and will expire on January 17, 2017. The options we granted in April and May, 2007 have exercise prices of \$1.25 and \$1.318 per share, respectively, and will expire on April 4, 2017 and May 9, 2017, respectively. The options we granted in August and September 2007 have exercise prices of \$2.03 and 2.188 per share, respectively, and will expire on August 26, 2017 and September 3, 2017, respectively. The options we granted in January and March, 2008, respectively, have exercise prices of \$2.44 and \$2.70 per share, respectively, and will expire on January 21, 2018 and March 18, 2018, respectively. The options we granted in June and December, 2008 have exercise prices of \$3.134 and \$1.26 per share, respectively, and will expire on June 26, 2018 and November 30, 2018, respectively. The options we granted on December 1, 2009 have exercise prices of \$1.65, and will expire on November 30, 2019. The options we granted on February 22, 2010 and October 8, 2010 have exercise prices of \$1.426 and \$1.43 per share, respectively, and will expire on February 21, 2020 and October 7, 2020, respectively. The options we granted on February 1, 2011 and April 1, 2011 have exercise prices of \$1.14 and \$0.874 per share, respectively, and will expire on January 31, 2021 and March 31, 2021, respectively.

Options granted under the 2004 Plan generally do not vest unless the grantee remains under our employment or in service with us on the given vesting date. However, in circumstances where there is a death or disability of the grantee, or a change in the control of our company, the vesting of options will be accelerated to permit immediate exercise of all options granted to a grantee. Generally, to the extent an outstanding option granted under the 2004 Plan has not vested by the date the grantee's employment or service with us terminates, the option will terminate and become unexercisable. Our Board of Directors may amend, alter, suspend or terminate the 2004 Plan at any time; provided, however, that our Board of Directors must first seek the approval of our shareholders and, if such amendment, alteration, suspension or termination would adversely affect the rights of an optionee under any option granted prior to that date, the approval of such optionee. Under the 2004 Plan, as of December 31, 2011, we have a total number of 9,493,058 options that are currently vested and exercisable for ordinary shares.

We also granted share options to purchase up to 6,829,500 ordinary shares in January 2004, under option agreements that were independent of the 2004 Plan, to other consultants and business advisors of the company, of which 5,734,500 ordinary shares have been exercised as of December 31, 2011.

On July 2, 2007, we granted restricted stock awards covering 10,558,493 of our ordinary shares under the 2007 Plan to our employees who are eligible for the 2007 Plan. The vesting of the restrictive stock is subject to us achieving certain financial performance targets stated in the 2007 Plan. In order to bind the employees together in achieving the common goal, the ordinary shares are held by C&F International Holdings Limited for the benefit of the whole group of eligible employees. Pursuant to the 2007 Plan and the restricted stock issuance and allocation agreement effective as of July, 2, 2007, we issued 10,558,493 ordinary shares to C&F International Holdings Limited, a company incorporated in British Virgin Islands, which holds the ordinary shares on behalf of and exclusively for the benefit of the group of employees eligible to participate in the 2007 Plan. C&F International Holdings Limited is 100% owned by C&F Global Limited, a British Virgin Islands Company, which is in turn owned by the grantees. As of December 31, 2009, 10,558,493 ordinary shares have been issued and allotted to selected employees pursuant to the 2007 Plan. Based on our operating performance during 2008, 8,658,048 shares were activated as of December 31, 2008. Based on our operating performance during 2009, no granted share was activated in 2009. As of December 31, 2009, 7,215,040 shares were vested. In 2009, in light of the significant global economic downturn and its impact on our performance, our board amended the Grant Agreement to extend the Performance Period and the Vesting Term for another three years ending on December 31, 2012. Under the amended agreement any granted shares that are not activated as of December 31, 2009 shall become activated and be eligible to vest based on the company's achievement of certain performance targets for 2010, 2011 and 2012. As of December 31, 2011, the total 8,658,048 shares that were activated based on our operating performance during 2008 were vested.

Table of Contents

On November 1, 2010, Daily Growth Holdings granted restricted stock awards representing 15% of its ordinary shares pursuant to the 2010 Equity Incentive Plan of Daily Growth Holdings to awardees who are eligible to participate in the plan. In connection with such awards, we transferred 15% of the ordinary shares of Daily Growth Holdings to an entity representing the eligible awardees. In order to bind those awardees together to promote the common interests of the awardees, Daily Growth Holdings and the company, the ordinary shares were transferred to, and are held by, Hopewin Asia Limited, which was incorporated in BVI, on behalf of and exclusively for the benefit of the whole group of awardees eligible to participate in the plan. We believe such incentive plan will attract, maintain and motivate our team, and we believe the plan is in our best interests and the best interests of our stockholders.

Taxation***Hong Kong Profits Tax***

We and our subsidiaries established in Hong Kong, including Daily Growth Securities, Daily Growth Futures, Daily Growth Investment Services, Daily Growth Wealth Management, CFO HK Genius and other five subsidiaries, are subject to the uniform tax rate of 16.5% in Hong Kong for the year ended December 31, 2011. The profits derived from outside Hong Kong are exempted from Hong Kong profits tax, and there are no withholding taxes in Hong Kong on remittance of dividends. In 2009, 2010 and 2011, the income tax expenses charged in Hong Kong are nil, nil and \$159,000, respectively.

PRC Enterprise Income Tax

Our wholly owned subsidiaries and variable interest entities, CFO Success, CFO Zhengning, CFO Qicheng and CFO Shenzhen Shangtong, are classified as Software Enterprises. CFO Success enjoyed exemption from enterprise income tax for 2008 and 2009, and a preferential enterprise income tax rate of 12.5% from 2010 to 2012. CFO Shengzheng Shangtong and CFO Qicheng enjoy exemption from enterprise income tax for 2010 and 2011, and a preferential enterprise income tax rate of 12.5% from 2012 to 2014. In March 2009, the local tax authority published a guideline on EIT law. According to the new implementation details, CFO Zhengning, designated as Software Enterprises, obtained from the relevant local tax authority a 50% reduction of its transitional tax rate, which would be subject to income tax at the rate of 12.5% before the guideline came in force. CFO Zhengning enjoys a reduced tax rate of 10%, 11% and 12% for 2009, 2010 and 2011, respectively, and an eventual transition to the standard 25% in 2012.

On April 14, 2008, the Ministry of Science and Technology, the Ministry of Finance and the State Administration of Taxation jointly issued the Administrative Measures on the Recognition of High and New Technology Enterprises, or the Recognition Rules, effective on January 1, 2008. According to the Recognition Rules, the provincial counterparts of the Ministry of Science and Technology, the Ministry of Finance and the State Administration of Taxation shall jointly determine whether an enterprise is qualified as a high and new technology enterprise under the EIT Law. In making such determination, these government agencies shall consider, among other factors, ownership of core technology, whether the products or services fall within the scope of high and new technology strongly supported by the state as specified in the Recognition Rules, the ratios of technical personnel and research and development (R&D) personnel to total personnel, the ratio of R&D expenditures to annual sales revenues, the ratio of revenues attributed to high and new technology products or services to total revenues, and other measures set forth in relevant guidance. In 2008, CFO Software, CFO Genius and CFO Meining were designated by relevant government authorities as High and New Technology Enterprises under the EIT Law. Therefore, CFO Software, CFO Genius and CFO Meining are entitled to enjoy a preferential tax treatment as long as they maintain their qualification as High and New Technology Enterprises under the EIT Law. CFO Software enjoys a preferential tax rate of 7.5% from 2008 to 2010. CFO Genius and CFO Meining enjoy preferential tax treatment and a preferential enterprise income tax rate of 15% from 2008 to 2010. The High and New Technology Enterprises qualification is valid for three years from the date of award, and Enterprises should submit the application for renewal. In 2011, CFO Software and CFO Meining obtained the renewal of HNTE status, and would enjoy a preferential tax rate of 15% for an additional three years from 2011 to 2013. There is no assurance that CFO Software and CFO Meining will continue to qualify as the High and New Technology Enterprises when they are subject to reevaluation and enjoy the preferential tax treatment in the future. In the event that the preferential tax treatment for them is discontinued, these entities will become subject to the standard tax rate at 25%, which materially increase our tax obligations.

Table of Contents

Furthermore, CFO Stockstar, CFO Jujin and CFO Newrand enjoy a reduced tax rate of 18%, 20%, 22% and 24% for 2008, 2009, 2010 and 2011, respectively, and an eventual transition to the standard 25% in 2012. Besides, CFO Genius enjoys a reduced tax rate of 24% in 2011.

If our PRC subsidiaries or consolidated affiliated entities no longer qualify for preferential tax treatment, it may cause our effective tax rate to increase.

Withholding Tax

The EIT Law provides that a maximum income tax rate of 20% may be applicable to dividends payable to non-PRC investors that are non-resident enterprises to the extent such dividends are derived from sources within the PRC, and the State Council has reduced such rate to 10% through the implementation regulations unless any such non-PRC investor's jurisdiction of incorporation has a tax treaty with China that provides for a different withholding arrangement. We are a Hong Kong incorporated company and substantially all of our income may be derived from dividends we receive from our operating subsidiaries located in the PRC. According to Mainland and Hong Kong Special Administrative Region Arrangement on Avoiding Double Taxation or Evasion of Taxation on Income agreed between the Mainland and Hong Kong Special Administrative Region in August 2006, dividends payable by a subsidiary located in the PRC to the company in Hong Kong who directly holds at least 25% of the equity interests in the subsidiary will be subject to a maximum 5% withholding tax under certain conditions. Since the preferential withholding tax is subject to the approval from competent taxation authorities in PRC, it remains uncertain whether our company in Hong Kong actually would be able to enjoy preferential withholding taxes for dividends distributed by our subsidiaries in China. If we are not able to enjoy the preferential withholding taxes and the tax rate may be 10% for dividends distributed by our subsidiaries, it will materially and adversely affect the amount of dividends, if any, we may pay to our shareholders and ADS holders.

If our PRC subsidiaries declare and distribute profits earned after January 1, 2008 to us in the future, such dividend payments will be subject to withholding tax, which will increase our tax liabilities and reduce the amount of cash available to our company.

Tax Residence

Under the PRC Enterprise Income Tax Law and its Implementing Rules, an enterprise established outside of the PRC with de facto management bodies within the PRC is considered a resident enterprise and will be subject to the enterprise income tax at the rate of 25% on its worldwide income. The Implementing Rules define the term de facto management bodies as establishments that carry out substantial and overall management and control over the manufacturing and business operations, personnel, accounting, properties, etc. of an enterprise.

On April 22, 2009, the State Administration of Taxation, or the SAT, issued the Notice Regarding the Determination of Chinese-Controlled Offshore Incorporated Enterprises as PRC Tax Resident Enterprise on the Basis of De Facto Management Bodies, or SAT Circular 82, which provided certain specific criteria for determining whether the de facto management body of a Chinese-controlled offshore-incorporated enterprise is located in China. In addition, the SAT issued the Bulletin 45 on July 27, 2011 to provide more guidance on the implementation of the above circular with an effective date to be September 1, 2011. The Bulletin 45 made clarification in the areas of resident status determination, post-determination administration, as well as competent tax authorities. It also specifies that when provided with a copy of PRC tax resident determination certificate from a resident PRC-controlled offshore incorporated enterprise, the payer should not withhold 10% income tax when paying the PRC-sourced dividends, interest or royalties to the PRC-controlled offshore incorporated enterprise.

Although SAT Circular 82 and the Bulletin 45 only apply to offshore enterprises controlled by PRC enterprises, not those controlled by PRC individuals, the determining criteria set forth in SAT Circular 82 and the administration clarification made in Bulletin 45 may reflect the SAT's general position on how the de facto management body test should be applied in determining the tax resident status of offshore enterprises, regardless of whether they are controlled by PRC enterprises or individuals. Accordingly, we may be considered a resident enterprise and may therefore be subject to the enterprise income tax at 25% on our worldwide income. If we are considered a resident enterprise and earn income other than dividends from our PRC subsidiary, a 25% enterprise income tax on our worldwide income could significantly increase our tax burden and materially and adversely affect our cash flow and profitability.

Table of Contents

Critical accounting policies

We prepare our financial statements in conformity with U.S. GAAP, which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities on the date of the financial statements and the reported amounts of revenues and expenses during the financial reporting period. We continually evaluate these estimates and assumptions based on the most recently available information, our own historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates. Some of our accounting policies require higher degrees of judgment than others in their application. We consider the policies discussed below to be critical to an understanding of our financial statements as their application places the most significant demands on our management's judgment.

Revenue recognition. We charge our subscribers a subscription fee for the right to use our service packages for, in general, a one-year period. For subscription services provided to individual investors, our subscription fee is paid in full prior to the delivery of our service packages. Therefore, we do not take any credit risk with respect to our individual subscribers. Upon receipt of payment in full, we activate our subscriber's account, marking the start of the subscription period, and promptly provide the subscriber with an account access code. We begin to recognize subscription fees as revenue upon activation of the subscriber's account and then ratably over the service period. Subscription fees that have been paid but not yet recognized are accounted for as deferred revenue on our balance sheets. Deferred revenue is reduced proportionately as revenue is recognized ratably over the service period. Estimated refund of subscription fees is recorded as deduction of revenue and deferred revenue. We estimate the refund of subscription fees based on historical experience as well as the impact of the changes in market condition and regulation, such as the Provisional Regulations on Securities Investment Advisory and Provisional Regulations on Issuance of Securities Research Reports promulgated by CSRC.

We derive advertising fees from advertising sales on our website principally for fixed periods of time, which are generally less than one year. We recognize advertising fees ratably over the periods during which the advertisements are displayed on our website.

We also derive commission from brokerage services provided by Daily Growth Securities and Daily Growth Futures, which buy or sell securities on their customers' behalf. The commission income is recognized on a trade date basis as securities transactions occur.

Income taxes. Deferred income taxes are recognized for temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, net operating loss carry forwards and credits by applying enacted statutory tax rates applicable to future years. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Current income taxes are provided for in accordance with the laws of the relevant taxing authorities.

Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets. The valuation allowance is based on our estimates of taxable income by jurisdiction in which we operate and the period over which our deferred tax assets will be recoverable. In the event that actual results differ from these estimates or we adjust these estimates in future periods, we may need to establish an additional valuation allowance, which could materially impact our financial position and results of operations.

Table of Contents

Uncertainties exist with respect to how the PRC Enterprise Income Tax Law applies to our overall operations, and more specifically, with regard to our tax residency status. The Enterprise Income Tax Law includes a provision specifying that legal entities organized outside of the PRC will be considered residents for PRC income tax purposes if their place of effective management or control is within the PRC. The implementation rules to the Enterprise Income Tax Law provide that non-resident legal entities will be considered PRC residents if substantial and overall management and control over the manufacturing and business operations, personnel, accounting, properties, among others, occur within the PRC. Despite the present uncertainties resulting from the limited PRC tax guidance on the issue, we do not believe that our legal entities organized outside of the PRC should be treated as residents for the Enterprise Income Tax Law's purposes. If one or more of our legal entities organized outside of the PRC were characterized as PRC tax residents, the impact would adversely affect our results of operation. See Item 3. Key Information D. Risk Factors Risks Relating to doing business in the People's Republic of China We may be deemed a PRC resident enterprise under the EIT Law and be subject to the PRC taxation on our worldwide income

The impact of an uncertain income tax position on the income tax return is recognized at the largest amount that is more-likely-than not to be sustained upon audit by the relevant tax authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. Interest and penalties on income taxes will be classified as a component of the provisions for income taxes.

Stock-based compensation. Stock-based compensation with employees is measured based on the grant date fair value of the equity instrument, we recognizes the compensation costs net of a forfeiture rate using straight-line method or graded vesting attribution method, over the requisite service period of the award, which is generally the vesting period of the award. The estimate of forfeitures will be adjusted over the requisite service period to the extent that actual forfeitures differ, or are expected to differ, from such estimates. Changes in estimated forfeitures will be recognized through a cumulative catch-up adjustment in the period of change.

The fair values of our option awards granted to employees were estimated on the date of grant using Black-Scholes option-pricing model that uses assumptions including the fair value of the ordinary shares underlying the options, expected volatility, risk-free interest rate, expected option life, expected dividend yield and exercise price. Risk-free interest rate was estimated based on the yield to maturity of treasury bonds of the United States with a maturity period close to the expected term of the options. The dividend yield was estimated by the company based on its expected dividend policy over the expected term of the options. Options are generally granted at an exercise price equal to the fair market value of the company's shares at the date of grant.

For options granted prior to 2011- The volatility of the underlying ordinary shares during the life of the options was estimated based on the historical stock price volatility of the company and comparable listed companies. The company chooses the comparable companies by considering synthesis effect of the characteristics including industry, stage of life cycle, size and financial leverage. We used the simplified method to estimate the expected life.

For option granted in 2011-The volatility of the underlying ordinary shares during the life of the options was estimated based on the historical stock price volatility of the company over the past years. The expected life was estimated based on historical information.

For stock-based compensation awards issued to non-employees, we use the Black-Scholes Option Pricing Model to measure the value of options granted to non-employees at the earlier of the commitment date or the date at which the non-employee's performance is complete. Prior to the measurement date, non-employee stock-based compensation is remeasured at its fair value at each financial reporting date with any changes in the fair value recorded in the consolidated statements of operations.

For the nonvested shares granted with performance condition, stock-based compensation expense is recognized based on the probable outcome of the performance condition. A performance condition is not taken into consideration in determining fair value of the nonvested shares granted. For the nonvested shares granted under the 2007 Plan, the company does not expect the performance target will be met.

Table of Contents

Cost method investment. For investments in an investee over which we do not have significant influence, we carry the investment at cost and recognize income as any dividends declared from distribution of investee's earnings. We review the cost method investments for impairment whenever events or changes in circumstances indicate that the carrying value may no longer be recoverable. An impairment loss is recognized in earnings equal to the difference between the investment's cost and its fair value at the balance sheet date of the reporting period for which the assessment is made.

In 2011, the financial conditions of Ocean Butterflies Holdings have deteriorated and its operation was not profitable. We determined that its investment in Ocean Butterflies Holdings was fully impaired and recorded an additional impairment loss of \$1,479,571 in 2011, reducing the carrying balance of such investment to nil as of December 31, 2011.

Impairment of goodwill and indefinite-lived intangible assets. The excess of the purchase price over the fair value of net assets acquired is recorded on the consolidated balance sheet as goodwill.

We complete a two-step goodwill impairment test. The first step is to compare the fair values of each reporting unit to its carrying amount, including goodwill. If the fair value of each reporting unit exceeds its carrying amount, goodwill is not considered to be impaired and the second step will not be required. If the carrying amount of a reporting unit exceeds its fair value, the second step is to compare the implied fair value of goodwill to the carrying value of a reporting unit's goodwill. The implied fair value of goodwill is determined in a manner similar to accounting for a business combination with the allocation of the assessed fair value determined in the first step to the assets and liabilities of the reporting unit. The excess of the fair value of the reporting unit over the amounts assigned to the assets and liabilities is the implied fair value of goodwill. An impairment loss is recognized for any excess in the carrying value of goodwill over the implied fair value of goodwill. We perform goodwill impairment tests annually on December 31 by comparing the carrying value to the fair value of each reporting unit.

During the third quarter of 2011, we determined that due to the significant decline in its stock price for a sustained period, there was an impairment indicator related to goodwill as of September 30, 2011. We performed an assessment of the carrying value of goodwill as of September 30, 2011. Based on that assessment, we concluded that goodwill allocated to the Northern China and Hong Kong Reporting Units were fully impaired because the estimated growth rates and profit margins for future periods were expected lower than that of prior years. In the fourth quarter of 2011, we realized our operating environment has undergone profound structural changes and decided upon a strategic transition since starting from April 2011, that we will implement a strategic transition of our core business from mainly providing subscription services to individual investors to developing fee-based securities investment advisory services with wealth management services. We evaluated the situation as of December 31, 2011 by considering a strategic transition and impact of structural changes, and concluded that goodwill allocated to the Eastern China and Southern China Reporting Units were fully impaired as of December 31, 2011 because the estimated growth rates and profit margins for future periods were expected to be substantially lower than that of prior years.

The impairment test for other intangible assets not subject to amortization consists of a comparison of the fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. The estimates of fair values of intangible assets not subject to amortization are determined using various discounted cash flow valuation methodologies. Based on our assessment, we recorded nil, nil and \$1,042,819 impairment losses in relation to intangible assets with indefinite life due to management's estimation of the expected future cash flows associated with these assets were insufficient to recover their carrying values.

Table of Contents

In applying the income approach to the valuation of product sales unit, the discounted cash flow methodology was used. The following are critical assumptions in determining the fair value of the reporting unit:

The revenue growth is projected at a compound annual growth rate, or CAGR. The CAGR of the four reporting units are approximately -31.2%, -18.8%, -5.3%, 1.4% and 3.5% for 2012 through 2016 for Southern China; -52.1%, 26.6%, 18.6%, 8.5%, 11.5% for 2012 through 2016 for Eastern China; -19.0%, 10.0%, 23.1%, 15.6% and 10.0% for 2012 through 2016 for Northern China and -4.5%, 9.6%, 9.4%, 9.3% for 2012 through 2015 for Hong Kong, which is within the range of comparable companies at the time of valuation.

In the projection period, the cost of revenues as a percentage of revenues is expected to remain stable.

Operating expenses, including selling expenses, R&D expenses and general and administrative expenses, as a percentage of sales is expected to remain stable.

To maintain normal operations, capital expenditures are estimated to be around 3% of revenue for each of the four reporting units, respectively.

The working capital requirement is estimated based on main accounts turnover days.

A perpetual growth rate after 2016 is assumed to be at 3% per year for each of the four reporting units.

The weighted average cost of capital, or WACC, used in the calculation is 19%, 22%, 23.5% and 16% for the four reporting units, respectively.

Estimates of fair value result from a complex series of judgments about future events and uncertainties and rely heavily on estimates and assumptions at a point in time. The judgments made in determining an estimate of fair value can materially impact our results of operations. The valuations are based on information available as of the impairment review date and are based on expectations and assumptions that have been deemed reasonable by management. Any changes in key assumptions, including unanticipated events and circumstances, may affect the accuracy or validity of such estimates and could potentially result in an impairment charge.

Impairment of long-lived assets with definite lives. We review our long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may no longer be recoverable. When these events occur, we compare the carrying value of the long-lived assets to the estimated undiscounted future cash flows expected to result from the use of the assets and our eventual disposition. If the sum of the expected undiscounted cash flow is less than the carrying amount of the assets, we would recognize an impairment loss based on the fair value of the assets. There were nil, nil and 3,035,265 impairment losses in relation to the long-lived assets with definite lives for the years ended December 31, 2009, 2010 and 2011.

Table of Contents**Results of operations**

The following table sets forth certain information relating to our results of operations, and our consolidated statements of operations as a percentage of net revenues, for the periods indicated:

(in thousands of U.S. dollars, except as % of net revenues)	For the year ended December 31,					
	2009		2010		2011	
Consolidated statement of operations and comprehensive income (loss) data:

Year ended December 31, 2011 compared to year ended December 31, 2010

Revenues

Our gross revenues decreased by 11.3% from \$61.4 million in 2010 to \$54.5 million in 2011. For our subscription business, individual customers pay the entire subscription fee upfront in cash for services to be received over a specified period of time, typically 12 months. Such subscription fees are recognized as net revenues ratably over the service period, and those that have not been rendered at the end of a reporting period are recorded as deferred revenue in the balance sheet. Deferred revenue at the end of 2011 was \$24.5 million, compared to \$46.0 million at the end of 2010.

Our business taxes attributable to our gross revenues decreased from \$1.7 million in 2010 to \$1.5 million in 2011, primarily due to the decrease in volume of our advertising businesses. After taking into account business taxes and related surcharges attributable to our gross revenues, our net revenues decreased by 11.2% to \$53.0 million in 2011 from \$59.7 million in 2010. This decrease was mainly due to a decrease in our net revenues derived from individual subscription business, which contributed to 75.8%, 79.2% of our net revenues respectively for 2011 and 2010. Our net revenues derived from individual subscription business decreased by 15.1% from \$47.3 million to \$40.2 million in 2011, reflecting the

decreased demand for financial information products caused by a plunging stock market in China, deteriorating global macroeconomics, as well as the continuing impact on sales due to the Provisional Regulations effective from January 1, 2011.

Table of Contents

Our net revenues derived from online advertising sales, which were not a sizable portion of our business in 2011, decreased to \$6.2 million in 2011 from \$7.0 million in 2010.

Our net revenues derived from brokerage income increased to \$3.5 million in 2011 from \$3.0 million in 2010, representing 7.0% and 5.0% of total net revenues for each year.

Cost of revenues

Our cost of revenues in 2011 increased by 3.2% to \$8.8 million from \$8.5 million in 2010, primarily due to the increase of cost of raw data for our *www.jrj.com* and *www.stockstar.com* websites, and the increase in payroll costs.

Gross profit

As a result of the foregoing, our gross profit decreased by 13.6% to \$44.2 million in 2011 from \$51.2 million in 2010.

Operating expenses

Our operating expenses increased by 19.2% to \$63.4 million in 2011 from \$53.2 million in 2010, primarily due to the non-cash impairment loss of \$17.5 million for goodwill and intangible assets. Operating expenses as a percentage of net revenues increased to 119.6% in 2011 from 89.1% in 2010.

General and administrative. Our general and administrative expenses decreased by 15.0% to \$11.2 million in 2011 from \$13.2 million in 2010. The decrease in general and administrative expenses primarily due to the stock-based compensation related to the activated shares of the performance-based restricted stock awards granted in the third quarter of 2007 has been fully amortized as the year ended 2010. Our general and administrative expenses as a percentage of net revenues decreased to 21.2% in 2011 from 22.1% in 2010.

Product development. Our product development expenses slightly increased by 2.2% to \$13.3 million in 2011 from \$13.0 million in 2010, as the company continues to invest in data, product and technical capability to build solid foundation. Our product development expenses increased as a percentage of net revenues to 25.1% in 2011 from 21.8% in 2010.

Sales and marketing. Our sales and marketing expenses decreased by 20.9% to \$21.3 million in 2011 from \$27.0 million in 2010. This was primarily due to the lower marketing expenses and sales commissions from reduced sales revenue. Our sales and marketing expenses as a percentage of net revenues decreased to 40.3% in 2011 from 45.2% in 2010.

Loss from impairment of intangible assets. Our loss from impairment of intangible assets was \$4,078,084 due to the estimation of the expected future cash flows associated with our intangible assets were insufficient to recover their carrying values.

Loss from impairment of goodwill. Based on the impairment tests performed, our loss from impairment of goodwill was \$13,463,224.

Table of Contents

During the third quarter of 2011, we determined that due to the significant decline in its stock price for a sustained period, there was an impairment indicator related to goodwill as of September 30, 2011. We performed an assessment of the carrying value of goodwill as of September 30, 2011. Based on that assessment, we concluded that goodwill allocated to the Northern China and Hong Kong Reporting Units were fully impaired because the estimated growth rates and profit margins for future periods were expected lower than that of prior years.

We perform the annual goodwill impairment tests on December 31 of each year. In the fourth quarter of 2011, we realized our operating environment has undergone profound structural changes and decided upon a strategic transition since April 2012, that we will implement a strategic transition of its core business from mainly providing subscription services to individual investors to developing fee-based securities investment advisory services with wealth management services. We evaluated the situation as of December 31, 2011 by considering a strategic transition and impact of structural changes, and concluded that goodwill allocated to the Eastern China and Southern China Reporting Units were fully impaired as of December 31, 2011 because the estimated growth rates and profit margins for future periods were expected to be substantially lower than that of prior years.

Loss from operations

Our loss from operations was \$18.9 million compared to operating loss of \$1.5 million in 2010, and our operating margin increased to negative 35.7% in 2011 from negative 2.5% in 2010.

Interest income

Our interest income increased by 72.6% to \$2.7 million in 2011 from \$1.6 million in 2010.

Interest expense

Our interest expense increased by 74.6% to \$248,000 in 2011 from \$142,000 in 2010.

Short-term investment income

Our gain from short-term investments, which are classified as trading, held-to-maturity or available-for-sale, slightly decreased to \$1.0 million in 2011 from \$1.1 million in 2010.

Loss from impairment of cost method investments

Our loss from impairment of cost method investments was \$1.5 million on investment in Ocean Butterflies Holdings in 2011, since the financial conditions of Ocean Butterflies Holdings have deteriorated and its operation was not profitable.

Income tax benefit (expense)

Our income tax expense was \$3.9 million in 2011 compared to an income tax expense was \$264,000 in 2010, primarily due to the significant increase in valuation allowance provided on deferred tax assets.

Net income / (loss) attributable to the company

Our net loss attributable to the Company was \$19.3 million in 2011 compared to a net income attributable to the company was \$2.0 million in 2010, and our net income margin decreased to negative 36.5% in 2011 from 3.3% in 2010.

Table of Contents

Year ended December 31, 2010 compared to year ended December 31, 2009

Revenues

Our gross revenues increased by 11.4% from \$55.1 million in 2009 to \$61.4 million in 2010. For our subscription business, individual customers pay the entire subscription fee upfront in cash for services to be received over a specified period of time, typically 12 months. Such subscription fees are recognized as net revenues ratably over the service period, and those that have not been rendered at the end of a reporting period are recorded as deferred revenue in the balance sheet. Deferred revenue at the end of 2010 was \$46.0 million, compared to \$45.2 million at the end of 2009. Such increase in deferred revenue will be recorded as net revenues over the next several quarters.

Our net revenues derived from online advertising sales, which were not a sizable portion of our business in 2010, increased to \$7.0 million in 2010 from \$4.0 million in 2009.

Our net revenues derived from brokerage income were \$3.0 million in 2010, representing 5.0% of total net revenues for the year.

Our business taxes attributable to our gross revenues increased from \$1.5 million in 2009 to \$1.7 million in 2010, primarily due to the increase in volume of our advertising businesses. After taking into account business taxes attributable to our gross revenues, our net revenues increased by 11.4% to \$59.7 million in 2010 from \$53.6 million in 2009.

Cost of revenues

Our cost of revenues in 2010 increased by 4.9% to \$8.5 million from \$8.1 million in 2009, primarily due to the incurrence of Level-2 quote expenses associated with the Shenzhen Stock Exchange, which began in 2010 but did not exist in 2009, and the increase in payroll costs.

Gross profit

As a result of the foregoing, our gross profit increased by 12.7% to \$51.2 million in 2010 from \$45.4 million in 2009.

Operating expenses

Our operating expenses slightly decreased by 1.1% to \$53.2 million in 2010 from \$53.8 million in 2009. Operating expenses as a percentage of net revenues decreased to 89.1% in 2010 from 100.4% in 2009.

General and administrative. Our general and administrative expenses decreased by 22.2% to \$13.2 million in 2010 from \$17.0 million in 2009. The decrease in general and administrative expenses excluding stock-based compensation expenses primarily due to a decrease in payroll costs as we continue to streamline operations through efficiency enhancements. In addition, based on the company's operating performance during 2008 and 2009, 4,329,024, 2,886,016 and 1,443,008 shares were vested in 2008, 2009 and 2010. Our general and administrative expenses as a percentage of net revenues decreased to 22.1% in 2010 from 31.7% in 2009.

Product development. Our product development expenses increased by 21.1% to \$13.0 million in 2010 from \$10.7 million in 2009, as the company continues to invest in data, product and technical capability to build solid foundation. Our product development expenses increased as a percentage of net revenues to 21.8% in 2010 from 20.1% in 2009.

Sales and marketing. Our sales and marketing expenses increased by 3.4% to \$27.0 million in 2010 from \$26.1 million in 2009. This was primarily due to an increase in marketing promotion expense. Our sales and marketing expenses as a percentage of net revenues decreased to 45.2% in 2010 from 48.7% in 2009.

Table of Contents***Income (loss) from operations***

Our loss from operations was \$1.5 million compared to operating loss of \$7.8 million in 2009, and our operating margin increased to negative 2.5% in 2010 from negative 14.6% in 2009.

Interest income

Our interest income increased by 17.6% to \$1.59 million in 2010 from \$1.35 million in 2009.

Interest expense

Our interest expense was \$142,000 and nil in 2010 and 2009, respectively.

Gain from trading securities Our gain from trading securities increased to \$1.1 million in 2010 from \$41,000 in 2009.

Income tax benefit (provision)

Our income tax expense was \$264,000 in 2010 compared to an income tax benefit was \$446,000 in 2009.

Net income / (loss) attributable to the company

Our net income attributable to the company was \$2.0 million in 2010 compared to a net loss attributable to the company of \$6.2 million in 2009, and our net income margin increased to 3.3% in 2010 from negative 11.6% in 2009.

B. Liquidity and capital resources.**Cash flows and working capital**

As of December 31, 2011, we had approximately \$64.6 million in cash and cash equivalents. As of the same date, we recorded a \$19.2 million short-term loan in our consolidation balance sheet. Our cash and cash equivalents primarily consist of cash on hand. We generally deposit our excess cash in interest-bearing bank accounts. In addition, we had short-term investments of \$10.7 million as of December 31, 2011.

The following table shows our cash flows with respect to operating activities, investing activities and financing activities in 2009, 2010 and 2011:

(in thousands of U.S. dollars)	For the year ended December 31		
	2009	2010	2011
Net cash provided by (used in) operating activities	\$ 16,231	\$ 4,585	\$ (23,786)
Net cash used in investing activities	(6,472)	(14,376)	(32,776)
Net cash provided by financing activities	189	7,153	12,739
Net increase (decrease) in cash and cash equivalents	9,847	(618)	(42,132)
Cash and cash equivalents at beginning of year	97,544	107,391	106,773
Cash and cash equivalents at end of year	\$ 107,391	\$ 106,773	\$ 64,641

Table of Contents

Net cash used in operating activities for 2011 was \$23.8 million, compared to net cash provided by operating activities was \$4.6 million in 2010. The decrease was primarily due to the decrease in cash receipt from the sale of services of \$30.9 million. More specifically, the cash receipt from our individual subscription business was decreased about \$32.1 million as a result of the decreased demand for financial information products amid a sluggish stock market in China, deteriorating global macroeconomics, as well as the continuing impact on sales due to new regulatory requirements effective from January of 2011.

Net cash provided by operating activities for 2010 decreased US\$11.6 million to US\$4.6 million from US\$16.2 million in 2009. The decrease primarily attributable to the following factors: (i) an decrease in cash receipts from the sale of services of US\$2.0 million; (ii) an increase in payment for advertising and marketing expenses of US\$4.3 million, due to marketing activities associated with registered user acquisition and product promotion; (iii) an increase in salary, sales bonus and social insurance charges paid to employees in amount of US\$1.6 million, due to an increase in wage rate; and (iv) an increase of margin loan provided to the margin clients in our brokerage service in amount of US\$3.6 million, due to higher customer demand for margin financing.

Net cash used in investing activities was \$32.8 million in 2011, compared to net cash used in investing activities of \$14.4 million in 2010. The increase primarily due to (i) \$40.7 million of the purchase of short-term investments and \$31.6 million of the proceeds from sales of short-term investments in 2011, resulting in a net cash out flow of \$9.1 million; (ii) \$9.6 million loaned to third parties.

Net cash used in investing activities was \$14.4 million in 2010, compared to net cash used in investing activities of \$6.5 million in 2009. The increase was primarily due to \$14.2 million of restricted cash.

Net cash provided by financing activities was \$12.7 million in 2011, compared to net cash provided by financing activities of \$7.2 million in 2010. The increase was primarily due to an increase in the proceeds from a bank loan of \$6.3 million.

Net cash provided by financing activities was \$7.2 million in 2010, due primarily to the proceeds from a bank loan. Net cash provided by financing activities in 2009 was \$189,000.

We currently intend to retain all available funds and any future earnings for use in the operation and expansion of our business and do not anticipate paying any cash dividends on our ordinary shares, or indirectly on our ADSs, for the foreseeable future.

Capital resources

Our principal capital expenditures for 2009, 2010 and 2011 consisted primarily of purchases of servers, workstations, computers, computer software and other items related to our network infrastructure for a total of approximately \$4.5 million, \$906,000 and \$726,000, respectively.

In June, 2010, China Merchants Bank Company Limited Shenzhen Branch issued a standby letter of credit in favor of Hong Kong Wing Lung Bank guaranteeing any credit that Hong Kong Wing Lung Bank grants to Hong Kong Genius Information Technology Co., Ltd., or CFO HK Genius, one of our wholly owned subsidiaries in Hong Kong. Based on the aforementioned standby letter of credit, Hong Kong Wing Lung Bank has granted CFO HK Genius a credit of a term loan facility up to HKD 20,000,000 (approximately US\$2,570,000) and a revolving loan facility of HKD 79,000,000 (approximately US\$10,150,000). Prior to the issuance of the aforementioned standby letter of credit, CFO Genius deposited RMB 96,250,000 (approximately US\$14,533,000), which are classified as restricted cash in the consolidated balance sheet, with China Merchants Bank Company Limited Shenzhen Branch to support CFO HK Genius credit application with Hong Kong Wing Lung Bank. As of December 31, 2010, the outstanding loan amount drawn down by CFO HK Genius is HKD 50,000,000 (approximately US\$6,424,000).

Table of Contents

In June 2011, CFO Genius renewed agreement with China Merchant Bank Company Shenzhen Branch, under which CFO Genius deposited RMB 91,730,000 (approximately US\$14,558,000), which were classified as restricted cash in the consolidated balance sheet, with China Merchants Bank Company Limited Shenzhen Branch to support CFO HK Genius' s term loan facility up to HKD 50,000,000 (approximately US\$6,433,000) and revolving loan facility of HKD 49,000,000 (approximately US\$6,305,000).

In March 2011, CFO Genius entered into agreements with China Merchant Bank Company Shenzhen Branch and Woori Bank China Limited Shenzhen Branch respectively, under which CFO Genius deposited RMB 46,447,500 (approximately US\$7,372,000) with China Merchant Bank Company Limited Shenzhen Branch and deposited RMB 46,950,000 (approximately US\$7,451,000) with Woori Bank China Limited Shenzhen Branch to support CFO HK Genius' term loan of HKD55,000,000 (approximately US\$7,077,000) and revolving loan of HKD44,000,000(approximately US\$5,661,000) granted at Hong Kong Wing Lung Bank. The deposits in China Merchant Bank Company Shenzhen Branch and Woori Bank China Limited Shenzhen Branch were classified as restricted cash in the consolidated balance sheet.

As of December 31, 2011, the outstanding loan amount drawn down by CFO HK Genius is HKD 149,000,000 (approximately US\$19,171,000).

Capital expenditures in 2010 and 2011 have been, and our 2012 capital expenditures are expected to continue to be, funded through operating cash flows and through our existing capital resources. We believe that our current cash and cash equivalents, and cash flow from operations will be sufficient to meet our anticipated cash needs, including for our working capital and capital expenditure needs, for the foreseeable future. We may, however, require additional cash resources due to changes in business conditions or other future developments. If these sources are insufficient to satisfy our cash requirements, we may seek to sell debt securities or additional equity securities or obtain a credit facility. The sale of convertible debt securities or additional equity securities could result in additional dilution to our shareholders. The incurrence of indebtedness would result in debt service obligations and could result in operating and financial covenants that would restrict our operations. We cannot assure investors that financing will be available in amounts or on terms acceptable to us, if at all.

From time to time, we also evaluate possible investments, acquisitions or divestments and may, if a suitable opportunity arises, make an investment or acquisition or conduct a divestment.

Restricted net assets

The PRC Enterprise Income Tax Law, or the EIT Law, provides that a maximum income tax rate of 20% may be applicable to dividends payable to non-PRC investors that are non-resident enterprises, to the extent such dividends are derived from sources within the PRC, and the State Council of the PRC has reduced such rate to 10% through the implementation regulations.

We are a Hong Kong holding company and the majority of our income is derived from dividends we receive from our PRC subsidiaries. Thus, dividends paid to us by our PRC subsidiaries may be subject to the 10% income tax if we are considered to be a non-resident enterprise under the EIT Law. If we are considered a PRC resident enterprise, it is unclear whether dividends we pay with respect to our ordinary shares, or the gain our shareholders may realize from the transfer of our ordinary shares, would be treated as income derived from sources within the PRC and be subject to PRC tax. In the event that we are required under the EIT Law to withhold PRC income tax on dividends payable to our non-PRC investors that are non-resident enterprises, or that a shareholder is required to pay PRC income tax on the transfer of our ordinary shares, the value of such shareholder's investment in our ordinary shares may be materially and adversely affected.

Table of Contents

In addition, prior to payment of dividends, pursuant to the laws applicable to the PRC Domestic Enterprises and PRC Foreign Investment Enterprises, the PRC entities must make appropriations from after-tax profit to non-distributable statutory reserve funds, including general reserve, enterprise expansion fund, and staff bonus and welfare fund. Subject to certain cumulative limits, the general reserve fund requires annual appropriations of not less than 10% of after-tax profit (as determined under accounting principles and financial regulations applicable to PRC enterprises at each year-end); the other two funds are to be made at the discretion of the board of directors. These reserve funds can only be used for specific purposes and are not distributable as cash dividends.

As a result of the above and other restrictions under PRC laws and regulations, our PRC subsidiaries and affiliates are restricted in their ability to transfer a portion of their net assets to us either in the form of dividends, loans or advances. The restricted portion amounted to approximately \$68.7 million, or 75.6%, of our total consolidated net assets, as of December 31, 2011.

Even though we currently do not require any such dividends, loans or advances from our PRC subsidiaries and affiliates, we may in the future require additional cash resources from our PRC subsidiaries and affiliates due to changes in business conditions, to fund future acquisitions or developments, or merely to declare and pay dividends or distributions to our shareholders, although we currently have no intention to do so.

Restrictions on Renminbi conversion

The majority of our revenues and operating expenses are denominated in Renminbi. The PRC government imposes controls on the convertibility of the Renminbi into foreign currencies and, in certain cases, the remittance of currency out of China. Pursuant to the Foreign Currency Administration Rules promulgated on January 29, 1996 and amended on January 14, 1997 and various regulations issued by the SAFE and other relevant PRC government authorities, Renminbi is freely convertible only to the extent of current account items, such as trade-related receipts and payments, interest and dividends. Capital account items, such as direct equity investments, loans and repatriation of investment, require the prior approval from the SAFE or its local branch for conversion of Renminbi into a foreign currency, such as U.S. dollars, and remittance of the foreign currency outside the PRC. Shortages in the availability of foreign currency may restrict the ability of our PRC subsidiaries to remit sufficient foreign currency to pay dividends or other payments to us, or otherwise satisfy its foreign currency-denominated obligations. Currently, each of our PRC subsidiaries and affiliates may purchase foreign exchange for settlement of current account transactions, including payment of dividends to us and payment of license fees and service fees to foreign licensors and service providers, without the approval of SAFE. However, approval from the SAFE or its local branch is required where Renminbi is to be converted into foreign currency and remitted out of China to pay capital expenses such as the repayment of loans denominated in foreign currencies.

Each of our PRC subsidiaries and affiliates may also retain foreign exchange in their current accounts to satisfy foreign exchange liabilities or to pay dividends. However, we cannot assure investors that the relevant PRC governmental authorities will not limit or eliminate our ability to purchase and retain foreign currencies in the future. If the foreign exchange control system prevents us from obtaining sufficient foreign currency to satisfy our currency demands, we may not be able to pay dividends in foreign currencies to our shareholders. Since a significant amount of our future revenues will be in the form of Renminbi, the existing and any future restrictions on currency exchange may limit our ability to utilize revenues generated in Renminbi to fund our business activities outside China, if any, or expenditures denominated in foreign currencies.

Table of Contents**C. Research and development.**

Our research and development efforts consist of continuing to:

increase the breadth of our service offerings through the addition of new features and functions to our service packages;

enhance our subscribers' experience by improving the quality of our research tools and website; and

develop additional research tools, features, content and services specifically targeting the high-end subscribers.

D. Trend information.

Other than as disclosed elsewhere in this annual report, we are not aware of any trends, uncertainties, demands, commitments or events for the period from January 1, 2011 to December 31, 2011 that are reasonably likely to have a material effect on our net revenues, income, profitability, liquidity or capital resources, or that caused the disclosed financial information to be not necessarily indicative of future operating results or financial conditions.

E. Off-balance sheet arrangements.

We have not entered into any financial guarantee or other commitments to guarantee the payment obligations of any other parties. We do not enter into any derivative financial instruments. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. Moreover, we do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or research and development services with us.

F. Tabular disclosure of contractual obligations.

We have entered into arrangements relating to office premises leasing and data purchase agreement. The following sets forth our known contractual obligations as of December 31, 2011 and as of the types that are specified below:

	Office Premises	Data Purchase <i>(in U.S. dollars)</i>	Total
Less than 1 year	\$ 2,573,179	\$ 2,647,802	\$ 5,220,981
1 - 3 years	519,796	95,784	615,580
3 - 5 years			

Apart from such premises, as of December 31, 2011, we did not have any long-term debt obligations, capital (finance) lease obligations, purchase obligations or any other long-term liabilities reflected on our balance sheets with durations to maturity as are set forth in the chart directly above.

G. Safe harbor

See the section headed "Forward-Looking Information".

Quantitative and qualitative disclosures about market risk.**Interest rate risk**

Our exposure to market rate risk for changes in interest rates relates primarily to the interest income generated by excess cash invested in short term money market accounts and certificates of deposit, as well as the interest rate exposure related to the loan facility. We have not used

derivative financial instruments in our investment portfolio.

Table of Contents

Our future interest income may fall short of expectations due to adverse changes in interest rates. With respect to cash and cash equivalents as of December 31, 2010, a hypothetical 1% (100 basis-point) decrease in interest rates would have decreased our interest income for the year then ended from \$1.6 million to \$751,000. In addition, with respect to cash and cash equivalents as of December 31, 2011, a hypothetical 1.0% (100 basis-point) decrease in interest rates would have decreased our interest income for the year then ended from \$2.7 million to \$1.7 million.

As of December 31, 2011, the outstanding loan amount drawn down by CFO HK Genius is HKD 149,000,000 (approximately US\$19,171,000). The interest rate under the credit facility is equal to interest margin plus HIBOR (Hong Kong Interbank Offered Rate) for the relevant interest period. The credit facility exposes us to market risk primarily from adverse changes in interest rate. See Item 5. Operating and Financial Review and Prospects B. Liquidity and capital resources Capital Resources . If HIBOR increases, we may be required to pay higher rates of interest on borrowings under its credit facility. With respect to short-term loan as of December 31, 2010, a hypothetical 1% (100 basis-point) increase in interest rates would have increased our interest expenses for the year then ended from \$142,000 to \$168,000. In addition, with respect to short-term loan as of December 31, 2011, a hypothetical 1% (100 basis-point) increase in interest rates would have increased our interest expenses for the year then ended from \$248,000 to \$394,000.

Foreign currency risk

Substantially all our revenues and expenses are denominated in Renminbi and HK Dollar, and a substantial portion of our cash is kept in Renminbi and HK Dollar, but as noted above, a portion of our cash is also kept in U.S. dollars. Although we believe that, in general, our exposure to foreign exchange risks should be limited, the value of our ADSs, will be affected by the foreign exchange rate between U.S. dollars and Renminbi. For example, to the extent that we need to convert U.S. dollars into Renminbi for our operational needs and the Renminbi appreciates against the U.S. dollar at that time, our financial position and the price of our ADSs may be adversely affected. Conversely, if we decide to convert our Renminbi into U.S. dollars for the purpose of declaring dividends on our ADSs or otherwise and the U.S. dollar appreciates against the Renminbi, the U.S. dollar equivalent of our earnings from our subsidiaries and controlled entities in China would be reduced.

We have recorded foreign exchange gains of \$1.3 million in net income in 2011, due to the recent revaluation of RMB against the U.S. dollar by Chinese government. On July 21, 2005, the Chinese government changed its policy of pegging the value of the Renminbi to that of U.S. dollar. Under the new policy, the Renminbi has fluctuated within a narrow and managed band against a basket of certain foreign currencies. As a result, the Renminbi appreciated approximately 4% and 5% against the U.S. dollar in 2010 and 2011, respectively, and may appreciate or depreciate significantly in value against the U.S. dollar or other foreign currencies in the long term. Since we have not engaged in any hedging activities, we may experience economic loss as a result of any foreign currency exchange rate fluctuations. As of December 31, 2011, we had cash and cash equivalents of US\$52.1 million (approximately RMB 328.6 million) which were denominated in RMB at the exchange of \$1.00 for RMB 6.3009, and US\$12.5 million which were denominated in foreign currencies. Assuming a 1.0% depreciation of the RMB against the U.S. dollar, cash and cash equivalents denominated in RMB would have decreased to \$51.6 million as of December 31, 2011.

Recently issued accounting pronouncements not yet adopted.

In May 2011, the FASB issued an authoritative pronouncement on fair value measurement. The guidance is the result of joint efforts by the FASB and International Accounting Standards Board to develop a single, converged fair value framework. The guidance is largely consistent with existing fair value measurement principles in GAAP. The guidance expands the existing disclosure requirements for fair value measurements and makes other amendments, mainly including:

Highest-and-best-use and valuation-premise concepts for nonfinancial assets the guidance indicates that the highest-and-best-use and valuation-premise concepts only apply to measuring the fair value of nonfinancial assets.

Table of Contents

Application to financial assets and financial liabilities with offsetting positions in market risks or counterparty credit risk-the guidance permits an exception to fair value measurement principles for financial assets and financial liabilities (and derivatives) with offsetting positions in market risks or counterparty credit risk when several criteria are met. When the criteria are met, an entity can measure the fair value of the net risk position.

Premiums or discounts in fair value measure-the guidance provides that premiums or discounts that reflect size as a characteristic of the reporting entity's holding (specifically, a blockage factor that adjusts the quoted price of an asset or a liability because the market's normal daily trading volume is not sufficient to absorb the quantity held by the entity) rather than as a characteristic of the asset or liability (for example, a control premium when measuring the fair value of a controlling interest) are not permitted in a fair value measurement.

Fair value of an instrument classified in a reporting entity's stockholders' equity the guidance prescribes a model for measuring the fair value of an instrument classified in stockholders' equity; this model is consistent with the guidance on measuring the fair value of liabilities.

Disclosures about fair value measurements-the guidance expands disclosure requirements, particularly for Level 3 inputs. Required disclosures include:

(i) For fair value measurements categorized in Level 3 of the fair value hierarchy: (1) a quantitative disclosure of the unobservable inputs and assumptions used in the measurement, (2) a description of the valuation process in place (e.g., how the entity decides its valuation policies and procedures, as well as changes in its analyses of fair value measurements, from period to period), and (3) a narrative description of the sensitivity of the fair value to changes in unobservable inputs and interrelationships between those inputs.

(ii) The level in the fair value hierarchy of items that are not measured at fair value in the statement of financial position but whose fair value must be disclosed.

The guidance is effective for interim and annual periods beginning after December 15, 2011. Early adoption is not permitted. The guidance should be applied prospectively. The company will adopt this pronouncement effective January 1, 2012, which will not have a significant impact on its financial condition or results of operations.

In June 2011, the FASB issued an authoritative pronouncement to require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The guidance does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The guidance should be applied retrospectively. For public entities, the guidance is effective for fiscal years and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted. In December 2011, the FASB issued an authoritative pronouncement related to deferral of the effective date for amendments to the presentation of reclassifications of items out of accumulated other comprehensive income. This guidance allows the FASB to redeliberate whether to present on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income for all periods presented. While the FASB is considering the operational concerns about the presentation requirements for reclassification adjustments and the needs of financial statement users for additional information about reclassification adjustments, entities should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect before update the pronouncement issued in June 2011. The company does not expect the adoption of this guidance to have a significant effect on our consolidated financial statements.

Table of Contents

In September 2011, the FASB issued an authoritative pronouncement related to testing goodwill for impairment. The guidance is intended to simplify how entities, both public and nonpublic, test goodwill for impairment. The guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if a public entity's financial statements for the most recent annual or interim period have not yet been issued. The company will adopt this pronouncement effective January 1, 2012, which will not have a significant impact on its financial condition or results of operations.

In December 2011, the FASB issued an authoritative pronouncement on disclosures about offsetting assets and liabilities. Under this pronouncement, entities are required to disclose both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. This scope would include derivatives, sale and repurchase agreements and reverse sale and repurchase agreements, and securities borrowing and securities lending arrangements. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. We are in the process of evaluating the effect of adoption of this pronouncement.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**A. Directors and senior management.**

The following table sets forth the name, age and position of each director and executive officer as of the date of this report.

Name	Age	Position
Zhiwei Zhao	48	Chairman of the Board of Directors and Chief Executive Officer
Kheng Nam Lee(1)	64	Director
Rongquan Leng(2)(3)	63	Director
Ling Wang(1)(2)(3)	49	Director
Neo Chee Beng (1)(2)	51	Director
Jun (Jeff) Wang	41	Chief Financial Officer
Kiang Dalaroy	55	Chief Strategy Officer

(1) Member, audit committee

(2) Member, compensation committee

(3) Member, nominations committee

* Hugo Shong, former Chairman, and Fansheng Guo, former director, resigned from the company's Board for personal reasons in April 2012.

** Dr. Caogang Li, former Chief Operating Officer, resigned from the company for personal reasons in July 2011.

The address of each of our executive officers and directors is 9th Floor of Tower C, Corporate Square, No. 35 Financial Street, Xicheng District, Beijing, China 100033.

Table of Contents

Biographical Information

Zhiwei Zhao has served as our Chief Executive Officer since June 21, 2005 and our director since July 25, 2005. He was elected as the Chairman of our Board of directors as of April 2012 and continues to serve as the Chief Executive Officer of the company. Mr. Zhao was the Chairman of the Board of Directors of Abitcool Inc before joining us. Abitcool is a company that provides broadband internet services in China. It boasts the largest private Internet Data Center in China. From 1998 to 2005, he served as the General Manager of Huatong International Development Limited in Hong Kong. Mr. Zhao graduated with a Bachelor of Science degree from Huazhong University of Science and Technology.

Kheng Nam Lee has served as our director since May 2004. Mr. Lee is presently a Venture Partner of GGV Capital. At the same time he is Chairman of Advantec Pte Ltd, an investment holding company. Mr. Lee is also the non-executive Chairman of Vertex Management (II) Pte Ltd and Vertex Venture Holdings Ltd (VVH), both of which are wholly-owned subsidiaries of Temasek Holdings (Private) Limited, engaged in the venture capital direct investment and fund management business. For more than 23 years, Mr. Lee has been in leading positions in several capital investment companies that invest in many international companies in various industries. Besides the company, Mr. Lee serves as a director of public companies, Creative Technology Ltd (Creative) and BCD Semiconductor Manufacturing Ltd (BCD). He is a member of the Audit and Compensation Committees of Creative where he had served as Chairman of the Audit Committee since 1992. Since August 2010, Mr. Lee also sits on the Audit Committee and Compensation Committees of BCD, a company listed on NASDAQ from January 2011. Mr. Lee holds a Bachelor of Science degree in mechanical engineering, with first class honors, from Queen's University, Canada and a Master of Science degree in operations research and systems analysis from the U.S. Naval Postgraduate School. Mr. Lee also got a diploma in Business Administration, University of Singapore.

Rongquan Leng has served as our director since April 2012. Mr. Leng is the Vice Chairman of China Institute of Communications. Mr. Leng served as Executive Director, President and Chief Operating Officer of China Telecom Corporation Limited (China Telecom)(NYSE:CHA HKEx:728), Deputy General Manager and Chief Engineer of China Telecommunications Corporation, Deputy General Manager of China Network Communications Group Corporation, Deputy Chief Engineer of the Directorate General of Telecommunications (DGT) of the Ministry of Posts and Telecommunications (MPT), Chief Engineer of the Beijing Long-Distance Telephone Office, Vice Chairman of the Internet Society of China and Deputy Director of Post and Telecommunications Technology Committee of Ministry of Information Industry. Mr. Leng is a professor-level senior engineer. He graduated from Beijing University of Posts and Telecommunications with a Master's Degree in engineering science. Mr. Leng has more than 30 years of operational management experience in the telecommunications industry in China.

Ling Wang has served as our director since May 2004. Mr. Wang has been a director of Tiantian Online Co. Limited, a provider of broadband Internet audio-visual programs (or Internet TV) in the PRC since 2003. Mr. Wang graduated with a Bachelor of Science degree in Mathematics from the University of Science and Technology of China, and also has a Master of Science degree in automation control from the Beijing Institute of Information Control.

Neo Chee Beng has served as our director since January 2012. Mr. Neo is an executive director and the Chief Compliance Officer of Persistent Asset Management Pte Ltd (Persistent Asset Management), an exempt fund manager registered with the monetary authority of Singapore. Mr. Neo has been an independent director of LottVision Ltd., a company listed in the Singapore Stock Exchange, and also serves on its audit committee. Mr. Neo was a former Vice President of investments at Vertex Management II Pte Ltd (Vertex Management II), an affiliate of Temasek Holdings Pte Ltd, where he headed its Beijing office from year 2000 to early 2005. Mr. Neo was the finance manager of the Singapore Stock Exchange-listed Jardine Cycle & Carriage Ltd, where he assisted the general manager of finance. Mr. Neo had years of auditing experience with international audit firms including Moores Rowland and Ernest & Young. He received his education in Singapore from Hwa Chong Junior College and received professional accountancy training. He is a fellow of the Association of Chartered Certified Accountants, United Kingdom and a member of Singapore Institute of Directors.

Table of Contents

Jun (Jeff) Wang has served as our Chief Financial Officer since August 15, 2006, and joined our company as Vice President of Finance in May 2006. Mr. Wang was a Senior Manager in the Tax and Business Advisory Services at Deloitte Beijing Office before joining us. From 2002 to 2005 Jun Wang was founder and president of Miracle Professional Services Inc., a company that provided training and financial consulting services to finance professionals. Prior to that Mr. Wang worked in Deloitte's Beijing, London and New York offices, providing tax and business advisory and management consulting services. Mr. Wang obtained his Master of Business Administration from New York University's Leonard N. Stern School of Business, his Master of Economics in accounting from Beijing Technology and Business University and his B.A. degree from Shandong University. Mr. Wang is a member of the U.S. Certified Management Accountants (CMA) and has a professional designation of Chartered Financial Analyst (CFA).

Kiang Dalaroy has served as our Chief Strategy Officer since the first quarter of 2011. Before joining us, Mr. Dalaroy was a Deputy General Manager and Chief Information Officer at the Shanghai Stock Exchange Infonet Ltd., where he pioneered Level-2 market data, XBRL financial reporting products and associated commercial models in China. Previously, Mr. Dalaroy held managerial, business development and technical positions in Reuters Group companies for fifteen years in Asia and North America. Mr. Dalaroy possesses a degree in Electronics Engineering from Taiwan's Taipei Institution of Technology, and obtained EMBA certificates from top business schools in executive development programs.

B. Compensation of directors and executive officers.

In 2011, we paid aggregate cash compensation of approximately \$593,200 to our directors and executive officers as a group. We have no service contracts with any of our directors or executive officers that provide benefits to them upon termination, except for change in control agreements we entered into with each of our chief executive officer and chief financial officer. The change in control agreements provide that if after a change-of-control of our company has occurred, the chief executive officer or chief financial officer is terminated without cause or resigns for good reason, we are obligated to provide severance benefits to the chief executive or chief financial officer.

All of our current directors and executive officers have entered into indemnification agreements in which we agree to indemnify, to the fullest extent allowed by Hong Kong law, our charter documents or other applicable law, our directors and executive officers from any liability or expenses, unless the liability or expense arises from the director or executive officer's own willful negligence, intentional malfeasance, bad faith act, or other transactions from which the director or executive officer may not be relieved of liability under applicable law. The indemnification agreements also specify the procedures to be followed with respect to indemnification.

Directors and officers liability insurance

We have renewed directors and officers liability insurance on behalf of our directors and officers that will expire in January 2013.

Table of Contents

Employee s stock option plan

We adopted the 2004 Plan in January 2004. The 2004 Plan is intended to promote our success and to increase shareholder value by providing an additional means to attract, motivate, retain and reward selected directors, officers, employees and other eligible persons. We amended the 2004 Plan in September 2004, August 2006, June 2009 and June 2010, respectively. Subsequent to these amendments, the total number of ordinary shares issuable under the 2004 Plan as of December 31, 2011 is 24,688,488, including the newly increased 3,000,000 ordinary shares available for issuance under the 2004 Plan approved by our shareholders at the annual general meeting held on June 30, 2010. At the 2010 annual general meeting, our shareholders approved the increase in the number of ordinary shares available for issuance under the 2004 Plan by 3,000,000 ordinary shares annually until December 31, 2014. As of December 31, 2011, options to purchase 7,821,140 ordinary shares were available for future grant.

Options granted under the 2004 Plan generally do not vest unless the grantee remains under our employment or in service with us on the given vesting date. However, in circumstances where there is a death or disability of the grantee, or a change in the control of our company, the vesting of options will be accelerated to permit immediate exercise of all options granted to a grantee. Generally, to the extent an outstanding option granted under the 2004 Plan has not vested by the date the grantee s employment or service with us terminates, the option will terminate and become unexercisable. Our board of directors may amend, alter, suspend or terminate the 2004 Plan at any time, provided, however, that our board of directors must first seek the approval of our shareholders and, if such amendment, alteration, suspension or termination would adversely affect the rights of an optionee under any option granted prior to that date, the approval of such optionee. Under the 2004 Plan, as of December 31, 2011, we have a total number of 9,493,058 options that are currently vested and exercisable for ordinary shares. Under option agreements that were independent of the 2004 Plan, 1,095,000 options that are currently vested and exercisable for ordinary shares as of December 31, 2011.

Table of Contents

The table below sets forth the option grants made to our current and former directors and executive officers as of December 31, 2011 pursuant to the 2004 Plan:

	Number of ordinary Shares to be issued upon exercise of options	Exercise price per ordinary share	Date of grant	Date of expiration
Zhiwei Zhao	400,000	\$ 1.120	November 15, 2005	November 15, 2015
	400,000	\$ 1.070	July 5, 2006	July 5, 2016
	800,000	\$ 0.960	January 18, 2007	January 17, 2017
	750,000	\$ 1.426	February 22, 2010	February 21, 2020
Hugo Shong ₂	*	\$ 0.160	January 5, 2004	January 4, 2014
	*	\$ 1.040	June 15, 2004	June 14, 2014
	*	\$ 1.314	February 18, 2005	February 18, 2015
	*	\$ 0.960	January 18, 2007	January 17, 2017
	*	\$ 1.426	February 22, 2010	February 21, 2020
Kheng Nam Lee	*	\$ 0.160	January 5, 2004	January 4, 2014
	*	\$ 1.040	June 15, 2004	June 14, 2014
	*	\$ 1.314	February 18, 2005	February 18, 2015
	*	\$ 0.960	January 18, 2007	January 17, 2017
	*	\$ 1.426	February 22, 2010	February 21, 2020
Fansheng Guo ₂	*	\$ 0.160	January 5, 2004	January 4, 2014
	*	\$ 1.040	June 15, 2004	June 14, 2014
	*	\$ 1.314	February 18, 2005	February 18, 2015
	*	\$ 0.960	January 18, 2007	January 17, 2017
	*	\$ 1.426	February 22, 2010	February 21, 2020
Ling Wang	*	\$ 0.160	January 5, 2004	January 4, 2014
	*	\$ 1.040	June 15, 2004	June 14, 2014
	*	\$ 1.314	February 18, 2005	February 18, 2015
	*	\$ 0.960	January 18, 2007	January 17, 2017
	*	\$ 1.426	February 22, 2010	February 21, 2020
Jun (Jeff) Wang	*	\$ 1.070	July 5, 2006	July 5, 2016
	*	\$ 0.960	January 18, 2007	January 17, 2017
	*	\$ 1.426	February 22, 2010	February 21, 2020
Kiang Dalaroy	*	\$ 1.140	February 1, 2011	January 31, 2021
Caogang Li ₁	*	\$ 1.158	November 30, 2005	November 30, 2015
	*	\$ 0.96	January 18, 2007	January 17, 2017
	*	\$ 1.426	February 22, 2010	February 21, 2020

* Upon exercise of all options granted, would beneficially own less than 1% of our outstanding ordinary shares.

¹ Change of Executive Officer: Termination of employment with the company in July 2011.

² Changes of Directors of the Board: Mr. Hugo Shong, former Chairman, and Mr. Fansheng Guo, former director, resigned from the Company's Board for personal reasons in April 2012; Mr. Neo Chee Beng joined the Board as an independent director in January 2012; Mr. Rongquan Leng joined the Board as an independent director in April 2012.

Equity Incentive Plan

We adopted the 2007 Equity Incentive Plan, or the 2007 Plan, in June 2007. As of December 31, 2011, we had granted restricted stock awards covering 10,558,493 of our ordinary shares to our eligible employees pursuant to the Restricted Stock Issuance and Allocation Agreement, or the 2007 Grant Agreement, entered into in July 2007 under the 2007 Plan. In order to bind the employees together in achieving the common goal, the ordinary shares are held by C&F International Holdings Limited for the benefit of the whole group of eligible employees. C&F International Holdings Limited is 100% owned by C&F Global Limited, which is in turn 100% owned by Zhiwei Zhao. As of December 31, 2011, restricted stock awards have been allotted to selected employees pursuant to the 2007 Plan.

Table of Contents

The table below sets forth the shares issued and allotted to selected employees pursuant to the Plan:

Name	Number	Percent
Selected Employees		
Zhiwei Zhao	8,958,493	8.08%
Jun (Jeff) Wang	*	*
Caogang Li	*	*
All executive officers as a group (3 persons)	10,558,493	9.52%

Based on our operating performance for 2008, 8,658,048 shares were activated as of December 31, 2008. Based on our operating performance for 2009, no granted shares were activated in 2009.

In 2009, in light of the significant global economic downturn and its impact on our performance, our board amended the Grant Agreement to extend the Performance Period and the Vesting Term for an additional three years ending on December 31, 2012. Under the amended agreement any granted shares that are not activated as of December 31, 2009 shall become activated and be eligible to vest based on the company's achievement of certain performance targets for 2010, 2011 and 2012. Any granted shares that are activated but not yet vested as of December 31, 2009, shall continue to be eligible to vest during the remainder of the Vesting Term in accordance with the terms of the Grant Agreement.

Based on our operating performance for 2010 and 2011, no more granted shares were activated in 2010 and 2011. The total 8,658,048 shares that were activated based on our operating performance for 2008 were fully vested as of December 31, 2011. All the shares granted to C&F International Holdings Limited that have not been activated and vested by the end of calendar year 2012 will be forfeited to the company.

2010 Equity Incentive Plan of Daily Growth Holdings

On November 1, 2010, Daily Growth Holdings granted restricted stock awards representing 15% of its ordinary shares pursuant to the 2010 Equity Incentive Plan of Daily Growth Holdings to awardees who are eligible to participate in the plan. In connection with such awards, we transferred 15% of the ordinary shares of Daily Growth Holdings to an entity representing the eligible awardees. In order to bind those awardees together to promote the common interests of the awardees, Daily Growth Holdings and the company, the ordinary shares were transferred to, and are held by, Hopewin Asia Limited, which was incorporated in BVI, on behalf of and exclusively for the benefit of the whole group of awardees eligible to participate in the plan. We believe such incentive plan will attract, maintain and motivate our team, and we believe the plan is in our best interests and the best interests of our stockholders.

C. Board practices.

In 2011, our directors met in person or passed resolutions by unanimous written consent a total of six times. No director is entitled to any severance benefits upon termination of his directorship with us. Our board of directors has also concluded that Mr. Kheng Nam Lee meets the criteria for an audit committee financial expert as established by the SEC.

Board committees

Our board of directors has established an audit committee, a compensation committee and a nominations committee.

Table of Contents

Audit committee. Our audit committee currently consists of Kheng Nam Lee, Ling Wang and Neo Chee Beng. Our board of directors has determined that all of our audit committee members are independent directors within the meaning of Nasdaq Listing Rule 5605(a)(2) and meet the criteria for independence set forth in Section 10A(m)(3) of the U.S. Securities Exchange Act of 1934, or the Exchange Act. Our audit committee is responsible for, among other things:

recommending to our shareholders, if appropriate, the annual re-appointment of our independent registered public accounting firm and pre-approving all auditing and non-auditing service fees permitted to be performed by the independent registered public accounting firm;

annually reviewing an independent registered public accounting firm's report describing the independent registered public accounting firm's internal quality-control procedures, any material issues raised by the most recent internal quality control review, or peer review, of the independent registered public accounting firm and all relationships between the independent registered public accounting firm and our company;

setting clear hiring policies for employees or former employees of the independent registered public accounting firm;

reviewing with the independent registered public accounting firm any audit problems or difficulties and management's response;

reviewing and approving all proposed related-party transactions, as defined in Item 404 of Regulation S-K under the U.S. securities laws;

discussing the annual audited financial statements with management and the independent registered public accounting firm;

discussing with management and the independent registered public accounting firm major issues regarding accounting principles and financial statement presentations; reviewing reports prepared by management or the independent auditors relating to significant financial reporting issues and judgments;

reviewing reports prepared by management or the independent registered public accounting firm relating to significant financial reporting issues and judgments;

discussing earnings press releases, as well as financial information and earnings guidance provided to analysts and rating agencies;

reviewing with management and the independent registered public accounting firm the effect of regulatory and accounting initiatives, as well as off-balance sheet structures on our financial statements;

discussing policies with respect to risk assessment and risk management;

reviewing major issues as to the adequacy of our internal controls and any special audit steps adopted in light of material control deficiencies;

Edgar Filing: China Finance Online Co. LTD - Form 20-F

timely reviewing annual reports from the independent registered public accounting firm regarding all critical accounting policies and practices to be adopted by our company, all alternative treatments of financial information within U.S. GAAP that have been discussed with management and all other material written communications between the independent registered public accounting firm and management;

Table of Contents

establishing procedures for the receipt, retention and treatment of complaints received from our employees regarding accounting, internal accounting controls or auditing matters and the confidential, anonymous submission by our employees of concerns regarding questionable accounting or auditing matters;

annually reviewing and reassessing the adequacy of our audit committee charter;

such other matters that are specifically delegated to our audit committee by our board of directors from time to time;

meeting separately, periodically, with management and the independent registered public accounting firm; and

reporting regularly to the full board of directors.

Compensation committee. Our current compensation committee consists of Rongquan Leng, Ling Wang, and Neo Chee Beng. Our board of directors has determined that all of our compensation committee members are independent directors within the meaning of Nasdaq Listing Rule 5605(a)(2). Our compensation committee is responsible for:

determining and recommending the compensation of our senior management;

reviewing and making recommendations to our board of directors regarding our compensation policies and forms of compensation provided to our directors and officers;

reviewing and determining bonuses for our officers and other employees;

reviewing and determining stock-based compensation for our directors, officers, employees and consultants;

administering our equity incentive plans in accordance with the terms thereof; and

such other matters that are specifically delegated to the compensation committee by our board of directors from time to time.

Nominations committee. Our current nominations committee consists of Rongquan Leng and Ling Wang. Our board of directors has determined that all of our nominations committee members are independent directors within the meaning of Nasdaq Listing Rule 5605(a)(2). Our nominations committee is responsible for, among other things, selecting and recommending the appointment of new directors to our board of directors.

Corporate governance

Our board of directors has adopted a code of ethics, which is applicable to our senior executive and financial officers. In addition, our board of directors has adopted a code of conduct, which is applicable to all of our directors, officers and employees. Our code of ethics and our code of conduct are publicly available on our website.

In addition, our board of directors has adopted a set of corporate governance guidelines. The guidelines reflect certain guiding principles with respect to our board's structure, procedures and committees. The guidelines are not intended to change or interpret any law, or our memorandum and articles of association.

Table of Contents

Duties of directors

Under Hong Kong law, our directors have a duty of loyalty to act honestly in good faith with a view to our best interests. Our directors also have a duty to exercise the care, diligence and skills that a reasonable person with that director's qualifications and experience would exercise in comparable circumstances. In fulfilling their duty of care to us, our directors must ensure compliance with our memorandum and articles of association.

The functions and powers of our board of directors include, among others:

convening shareholders' meetings and reporting its work to shareholders at such meetings;

implementing shareholders' resolutions;

determining our business plans and investment proposals;

formulating our profit distribution plans and loss recovery plans;

determining our debt and finance policies and recommending proposals for the increase or decrease in our share capital and the issuance of debentures;

formulating our major acquisition and disposition plans, and plans for consolidation, division or dissolution;

proposing amendments to our articles of association; and

exercising any other powers conferred at shareholders' meetings or under our memorandum and articles of association.

Terms of directors and executive officers

We have a staggered board, which means certain number of our directors (excluding our chief executive officer), retire at every annual general meeting and the vacancies created by such retirement stand for election. Our chief executive officer will at all times be a director, and will not retire as a director, so long as he remains our chief executive officer. Accordingly, our directors, excluding our chief executive officer, hold office until the second annual meeting of shareholders following their election, or until their successors have been duly elected and qualified. Our board has adopted a policy providing that no director may be nominated for re-election or re-appointment to our board after reaching 70 years of age, unless our board concludes that such person's continued service as our director is in our best interest. Officers are elected by and serve at the discretion of the board of directors.

D. Employees.

As of December 31, 2009, 2010 and 2011, we employed approximately 1,600, 1,600 and 1,300 employees. China enacted a new Labor Contract Law, which became effective on January 1, 2008. We have updated our employment contracts and employee handbook and are in compliance with the new law. We work with the employees to insure that the employees obtain the full benefit of the new Labor Contract Law and its implementary rules. We consider our relations with our employees to be generally good. However, as our operations and employee base further expand, we cannot assure you that we will always be able to maintain good relations with all of our employees. See Item 3.D. Key Information Risk Factors - Risks relating to doing business in the People's Republic of China - PRC's new labor law restricts our ability to reduce our workforce in the PRC in the event of an economic downturn and may increase our labor costs.

Table of Contents**E. Share ownership.**

As of December 31, 2011, 110,935,383 of our ordinary shares were outstanding, excluding shares issuable upon exercise of outstanding options. On that date, a total of 20,516,551 of our ADSs were outstanding.

The following table sets forth information with respect to the beneficial ownership, within the meaning of Section 13(d)(3) of the Exchange Act of our ordinary shares by:

each person known to us to own beneficially more than 5% of our ordinary shares; and

each of our directors and executive officers who beneficially own any of our ordinary shares.

Beneficial ownership includes voting or investment power with respect to the securities. Except as indicated below, and subject to applicable community property laws, the persons named in the table have sole voting and investment power with respect to all ordinary shares shown as beneficially owned by them. Percentage of beneficial ownership is based on 110,935,383 ordinary shares outstanding.

* Unless otherwise noted, the address of each shareholder is China Finance Online (Beijing) Co., Ltd., 9th Floor of Tower C, Corporate Square, No.35 Financial Street, Xicheng District, Beijing, China 100033.

Table of Contents

The company has granted restricted stock awards covering ordinary shares under the 2007 Equity Incentive Plan of the company (the 2007 Plan) to certain employees of the company who are eligible under the Plan (Employees). Pursuant to the 2007 Plan and the Restricted Stock Issuance and Allocation Agreement 2007 Equity Incentive Plan effective as of July 2, 2007 (the Stock Issuance and Allocation Agreement), the company issued 10,558,493 ordinary shares of the company to C&F International Holdings Limited, which holds the ordinary shares of the company on behalf of and exclusively for the benefit of the Employees. C&F International Holdings Limited is 100% owned by C&F Global Limited, which is in turn 100% owned by Zhiwei Zhao, who represents the employees of the company who are eligible for the 2007 Equity Plan. Zhiwei Zhao is the sole director of C&F Global Limited. All the shares granted to C&F International Holdings Limited that have not been activated and vested by the end of calendar year 2012 will be forfeited to the company.

According to the 13D/A filed with SEC on November 14, 2011, on November 2, 2011, Grand Continental Holdings Limited, a company incorporated in British Virgin Islands, purchased 2,200,000 ADSs of the company, representing 11,000,000 ordinary shares from IDG Technology Venture Investment, Inc. Grand Continental Holdings Limited will pay the purchase price in three installments: payment of 5,500,000 ordinary shares no later than December 2, 2011, payment of 2,750,000 ordinary shares no later than February 2, 2012, and payment of 2,750,000 ordinary shares no later than May 2, 2012. Zhiwei Zhao is the sole beneficial owner of Grand Continental Holdings Limited. Thus, Zhiwei Zhao is deemed the beneficial owner of 11,000,000 ordinary shares after the completion of transaction.

The company has granted options covering Ordinary Shares under the 2004 Stock Incentive Plan (the 2004 Plan) to certain employees of the company who are eligible under the plan. Pursuant to the 2004 Plan, 2,110,000 Ordinary Shares will be beneficially owned by Zhiwei Zhao upon exercise of all options exercisable or vesting within 60 days of December 31, 2011.

- (2) Includes 6,723,115 ordinary shares held by IDG Technology Venture Investments, LP., according to the 13G filed with the SEC on March 28, 2012 and the 13G/A filed with the SEC on February 13, 2012. The general partner of IDG Technology Venture Investments, LP is IDG Technology Venture Investments, LLC. Chi Sing Ho and Quan Zhou are managing members of IDG Technology Venture Investments, LLC, both of whom disclaim beneficial ownership of our shares held by IDG Technology Venture Investments, LLC. - (5) Includes (i) 4,028,156 ordinary shares held by Cast Technology, Inc.; and (ii) 3,127,965 ordinary shares held by Fanasia Capital Limited. Both Cast Technology, Inc. and Fanasia Capital Limited are held 45% and 55% by Jianping Lu and Ling Zhang, respectively.
- (6) Includes (i) 4,923,302 ordinary shares held by Cast Technology, Inc.; and (ii) 3,823,068 ordinary shares held by Fanasia Capital Limited. Both Cast Technology, Inc. and Fanasia Capital Limited are held 45% and 55% by Jianping Lu and Ling Zhang, respectively.
- (7) Harvest Capital Strategies LLC (HCS) acts as the investment adviser of one or more investment partnerships, pooled investment vehicles and/or one or more client accounts that beneficially holds 1,600,000 American Depositary Shares of China Finance Online Co. Limited, representing 8,000,000 ordinary shares according to the 13G filed with the SEC on February 14, 2012. As investment advisor, HCS has been granted the authority to dispose of and vote the Securities. The investment partnerships, pooled investment vehicles and/or client accounts have the right to receive (or the power to direct the receipt of) dividends received in connection with ownership of the Securities, and the proceeds from the sale of the securities. The registered address is 600 Montgomery Street, Suite 1700 San Francisco, CA 94111, U.S.A..

None of our existing shareholders has voting rights that differ from the voting rights of other shareholders. We are not aware of any arrangement that may, at a subsequent date, result in our change in control.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. Major shareholders.

Please refer to Item 6. Directors, Senior Management and Employees Share Ownership

B. Related party transactions.

Contractual arrangements with CFO Fuhua and its shareholders.

PRC law currently limits foreign equity ownership of companies that provide Internet content business. To comply with these foreign ownership restrictions, we operate our online business in China through CFO Fuhua. We entered into a series of contractual arrangements with CFO Fuha and its shareholders in 2004, including contracts relating to the leasing of equipment, the licensing of our domain name, the provision of technical support services and strategic consulting and certain shareholder rights and corporate government matters. Upon the transfer of Jun Ning and Wu Chen's holdings in CFO Fuhua to Zhiwei Zhao and Jun Wang in November 2006 and October 2007, respectively, Zhiwei Zhao and Jun Wang replaced Jun Ning and Wu Chen, respectively, as a party to each of the contractual arrangements that we had entered into with Jun Ning and Wu Chen with respect to their holdings in CFO Fuhua and the operation of CFO Fuhua.

Table of Contents

Loan Agreements. We entered into a loan agreement with Zhiwei Zhao effective November 20, 2006 to extend to Mr. Zhao a loan in the amount of \$163,000, for the sole purpose of financing his acquisition of the equity interests of CFO Fuhua from Jun Ning. The initial term of these loans is 10 years which may be extended upon the parties' agreement. Zhiwei Zhao can only repay the loans by transferring all of his interest in CFO Fuhua to us or a third party designated by us. When Zhiwei Zhao transfers his interest in CFO Fuhua to us or our designee, if the actual transfer price is higher than the principal amount of the loans, the amount exceeding the principal amount of the loans will be deemed as interest accrued on such loans and repaid by Zhiwei Zhao to us. While Hong Kong law limits the maximum interest payment chargeable under a loan to 60% of the outstanding principal amount per annum, this limitation would only be relevant if, at the time of a future transfer to us of the interest in CFO Fuhua held by Zhiwei Zhao, the actual value of CFO Fuhua were to have increased at an average annual rate greater than 60%. CFO Fuhua's assets currently consist primarily of registered capital and licenses to provide Internet content and advertising related services, and its operations are primarily limited to operating our free website and providing advertising related services on behalf of CFO Beijing. In addition, we do not expect CFO Fuhua to continue to provide the aforesaid Internet content and advertising related services once CFO Beijing is qualified to do so. Accordingly, we do not believe this limitation will have a material effect on our business and operations, or will result in a material amount being paid to the shareholders of CFO Fuhua if and when they are permitted to transfer their interest in CFO Fuhua to us.

We entered into a loan agreement with Jun Wang in October 2007 to extend to Mr. Wang a loan in the amount of \$199,000 for the sole purpose of financing his acquisition of the equity interests of CFO Fuhua from Wu Chen subject to the same terms and conditions as the loan agreement we entered into with Zhiwei Zhao as discussed above.

Purchase Option Agreement. Pursuant to a purchase option and cooperation agreement, or the purchase option agreement, entered into among us, CFO Beijing, Jun Ning, Wu Chen and CFO Fuhua on May 27, 2004, its subsequent amendments on November 20, 2006 upon the transfer of shares by Jun Ning to Zhiwei Zhao, and a purchase option and cooperation agreement entered into among us, CFO Beijing, Zhiwei Zhao, Jun Wang and CFO Fuhua on October 18, 2007 upon the transfer of shares by Wu Chen to Jun Wang, Zhiwei Zhao and Jun Wang jointly granted us an exclusive option to purchase all or any portion of their equity interest in CFO Fuhua, and CFO Fuhua granted us an exclusive option to purchase all of its assets if and when (1) such purchase is permitted under applicable PRC law, and (2) to the extent permitted by law, when Zhiwei Zhao and/or Jun Wang ceases to be a director or employee of CFO Fuhua, or either Zhiwei Zhao or Jun Wang desires to transfer his equity interest in CFO Fuhua to a party other than the existing shareholders of CFO Fuhua. We may purchase such interest or assets ourselves or designate another party to purchase such interest or assets.

The exercise price of the option will equal the total principal amount of the loan lent by us to Zhiwei Zhao and Jun Wang under their loan agreements to purchase their respective equity interest in CFO Fuhua, or the price required by relevant PRC law or government approval authority if such required price is higher than the total principal amount of the loans lent by us to Zhiwei Zhao and Jun Wang. We may choose to pay the purchase price payable to Zhiwei Zhao and Jun Wang by canceling our loans to Zhiwei Zhao and Jun Wang.

Following any exercise of the option, the parties will enter into a definitive share or asset purchase agreement and other related transfer documents within 30 days after written notice of exercise is delivered by us. Pursuant to the purchase option agreement, at all times before we or any party designated by us acquire 100% of CFO Fuhua's shares or assets, CFO Fuhua may not (1) sell, transfer, assign, dispose of in any manner or create any encumbrance in any form on any of its assets unless such sale, transfer, assignment, disposal or encumbrance is related to the daily operation of CFO Fuhua or has been disclosed to and consented to in writing by us; (2) enter into any transaction which may have a material effect on CFO Fuhua's assets, liabilities, operations, equity or other legal interest unless such transaction relates to the daily operation of CFO Fuhua or has been disclosed to and consented to in writing by us; or (3) distribute any dividends to its shareholders in any manner, and Zhiwei Zhao and Jun Wang may not cause CFO Fuhua to amend its articles of association to the extent such amendment may have a material effect on CFO Fuhua's assets, liabilities, operations, equity or other legal interest except for pro rata increases of registered capital required by law.

Table of Contents

Voting arrangement. Upon Zhiwei Zhao's receipt of Jun Ning's holdings in CFO Fuhua on November 20, 2006, and Jun Wang's receipt of Wu Chen's holdings in CFO Fuhua on October 18, 2007, each of Zhiwei Zhao and Jun Wang delivered an executed proxy substantially identical to the proxy executed by Jun Ning and Wu Chen respectively, with respect to their voting rights as shareholders of CFO Fuhua.

Share Pledge Agreement. Pursuant to a share pledge agreement, dated May 27, 2004, Jun Ning and Wu Chen have pledged all of their equity interest in CFO Fuhua to CFO Beijing to secure the payment obligations of CFO Fuhua under the equipment leasing agreement, the technical support agreement and the amended and restated strategic consulting agreement between CFO Beijing and CFO Fuhua. Upon Zhiwei Zhao's receipt of Jun Ning's holdings in CFO Fuhua on November 20, 2006, and Jun Wang's receipt of Wu Chen's holdings in CFO Fuhua on October 18, 2007, Zhiwei Zhao and Jun Wang replaced Jun Ning and Wu Chen, respectively, as a party to the share pledge agreement. Under this agreement entered into by and among Zhiwei Zhao, Jun Wang and CFO Beijing, each of Zhiwei Zhao and Jun Wang have agreed not to transfer, assign, pledge or in any other manner dispose of his interest in CFO Fuhua or create any other encumbrance on his interest in CFO Fuhua which may have a material effect on CFO Beijing's interest without the written consent of CFO Beijing, except the transfer of his interest in CFO Fuhua to us or the third-party assignee designated by us according to the purchase option agreement.

Financing support. Pursuant to the purchase option agreement, we have agreed to provide or designate one of our affiliates to provide financing to CFO Fuhua in a way permitted by relevant laws in the event CFO Fuhua requires such financing. If CFO Fuhua is unable to repay the financing due to its losses, we agree to waive or cause other relevant parties to waive all recourse against CFO Fuhua with respect to the financing.

Indemnifications. Pursuant to the purchase option agreement, CFO Beijing has agreed to provide necessary support to and to indemnify Zhiwei Zhao and Jun Wang to the extent that they are subject to any legal or economic liabilities as a result of performing their obligations pursuant to their agreements with us or CFO Beijing.

Contractual Arrangements with CFO Chongzhi and Its Individual Shareholders

We entered into a series of contractual arrangements with CFO Chongzhi and its individual shareholders, Xun Zhao and Zhenfei Fan in 2008. Upon the transfer of Zhenfei Fan's holdings in CFO Chongzhi to Zhengyan Wu in January 2010, Zhengyan Wu replaced Zhenfei Fan, as a party to each of the contractual arrangements that we had entered into with Zhenfei Fan with respect to his holdings in CFO Chongzhi and the operation of CFO Chongzhi. The terms of these contractual arrangements are similar to the terms of our contractual arrangements with CFO Fuhua. Our contractual arrangements with CFO Chongzhi include:

a strategic consulting service agreement between CFO Software and CFO Chongzhi;

a technical support agreement between CFO Software and CFO Chongzhi;

an operation agreement between CFO Software and CFO Chongzhi;

a loan agreement with Xun Zhao and Zhengyan Wu. We entered into a loan agreement with Xun Zhao and Zhengyan Wu to extend to them a loan in the amount of \$65,958 and \$80,553, respectively, for the sole purpose of financing their acquisition of equity interests in CFO Chongzhi;

a purchase option agreement among CFO Software, CFO Chongzhi, Xun Zhao and Zhengyan Wu;

Table of Contents

voting arrangements with each of Xun Zhao and Zhengyan Wu regarding their voting rights in CFO Chongzhi; and

a share pledge agreement among CFO Software, Xun Zhao and Zhengyan Wu.

Contractual Arrangements with CFO Newrand and Its Individual Shareholders

Loans to Lin Yang and Linghai Ma. On October 17, 2008, CFO Software entered into a loan agreement with Lin Yang, to extend to Lin Yang a loan in the amount of \$620,587 for the sole purpose of financing his acquisition of 17.5% of the equity interests in CFO Newrand. The terms of the agreement is similar to the one we entered into with Zhiwei Zhao and Jun Wang with respect to financing their investment in CFO Fuhua. On October 17, 2008, CFO Success and CFO Software entered into a loan agreement with Linghai Ma. Under the loan agreement, each of CFO Success and CFO Software agreed to extend to Linghai Ma a loan in the amount of \$2,080,474 and \$845,151, respectively, for the sole purpose of financing his acquisition of 82.5% of the equity interests in CFO Newrand. The terms of the agreement is similar to the one we entered into with Zhiwei Zhao and Jun Wang with respect to financing their investment in CFO Fuhua.

Purchase option agreement. CFO Software entered into a purchase option agreement with Lin Yang on October 17, 2008. In addition, on the same date, Linghai Ma entered into a purchase option agreement with CFO Software and CFO Success. The terms of these two agreements are similar to the purchase option agreement entered into among CFO Beijing, Zhiwei Zhao and Jun Wang in respect of their equity interests in CFO Fuhua. Furthermore, under the purchase option agreements, each of Lin Yang and Linghai Ma is required to issue a proxy to the satisfaction of CFO Software (and CFO Success in case of Linghai Ma). The proxy shall grant CFO Software or CFO Success or its designee, who shall be a PRC citizen, the power to exercise Lin Yang's or Linghai Ma's voting rights as a shareholder of CFO Newrand, including the right to appoint directors, the general manager and other senior managers of CFO Newrand.

In January 2012, CFO Software (and CFO Success in case of Linghai Ma) exercised its share purchase option under the above purchase option agreement with Lin Yang, Linghai Ma and CFO Newrand by readjusting shares percentages held by Lin Yang and Linghai Ma from 17.5% to 45%, 82.5% to 55%, respectively, and CFO Newrand's share capital was also increased. CFO Software entered into a new purchase option agreement with Lin Yang, Linghai Ma and CFO Newrand, the terms of which are similar to those of the aforementioned agreement.

Contractual Arrangements with CFO Chuangying and Its Individual Shareholders

We entered into a series of contractual arrangements with CFO Chuangying and its individual shareholders, Yang Yang and Zhenfei Fan in 2009. Upon the transfer of Yang Yang and Zhenfei Fan's holdings in CFO Chuangying to Zhiwei Zhao and Jun Wang October 2009, Zhiwei Zhao and Jun Wang replaced Yang Yang and Zhenfei Fan, respectively, as a party to each of the contractual arrangements that we had entered into with Yang Yang and Zhenfei Fan with respect to their holdings in CFO Chuangying and the operation of CFO Chuangying. The terms of these contractual arrangements are similar to the terms of our contractual arrangements with CFO Fuhua. Our contractual arrangements with CFO Chuangying include:

a strategic consulting and service agreement between CFO Software and CFO Chuangying;

a technical support agreement between CFO Software and CFO Chuangying;

an operation agreement between CFO Software and CFO Chuangying;

a loan agreement with Zhiwei Zhao and Jun Wang. We entered into a loan agreement with Zhiwei Zhao and Jun Wang to extend to each of them a loan in the amount of \$322,100 and \$263,500, respectively, for the sole purpose of financing their acquisition of equity interests in CFO Chuangying;

Table of Contents

a purchase option agreement among CFO Software, CFO Chuangying, Zhiwei Zhao and Jun Wang; and

voting arrangements with each of Zhiwei Zhao and Jun Wang regarding their voting rights in CFO Chuangying.

Contractual Arrangements with CFO Shenzhen Shangtong and Its Individual Shareholders

In August 2009, we entered into a series of contractual arrangements with CFO Shenzhen Shangtong and its individual shareholders, Lin Yang and Shaoming Shi. The terms of these contractual arrangements are similar to the terms of our contractual arrangements with CFO Fuhua and its individual shareholders. Our contractual arrangements with CFO Shenzhen Shangtong and its individual shareholders include:

a strategic consulting service agreement between CFO Success and CFO Shenzhen Shangtong;

a technical support agreement between CFO Success and CFO Shenzhen Shangtong;

an operation agreement between CFO Success and CFO Shenzhen Shangtong;

a loan agreement with Lin Yang and Shaoming Shi. We entered into a loan agreement with Lin Yang and Shaoming Shi to extend to each of them a loan in the amount of \$80,500 and \$65,900, respectively, for the sole purpose of financing their acquisition of equity interests in CFO Shenzhen Shangtong;

a purchase option agreement among CFO Success, CFO Shenzhen Shangtong, Lin Yang and Shaoming Shi;

voting arrangements with each of Lin Yang and Shaoming Shi regarding their voting rights in CFO Shenzhen Shangtong; and

a share pledge agreement among CFO Success, Lin Yang and Shaoming Shi.

In January 2012, CFO Success exercised its share purchase option under the above purchase option agreement with Lin Yang, Shaoming Shi and CFO Shenzhen Shangtong by designating Linghai Ma and Lin Yang to acquire the 100% equity interests in CFO Shenzhen Shangtong held by Lin Yang and Shaoming Shi respectively. To finance Linghai Ma and Lin Yang for the acquisition, CFO Success extended each of Linghai Ma and Lin Yang a loan in the amount of \$80,500 and \$65,900, respectively. Lin Yang, Shaoming Shi then repaid the loans extended by CFO Success to them under the above loan agreement by using the consideration they each received from the acquisition. Following the acquisition, CFO Success entered into a purchase option agreement and share pledge agreement with Linghai Ma, Lin Yang and CFO Shenzhen Shangtong, the terms of which are similar to those of the aforementioned purchase option agreement and share pledge agreement with Lin Yang, Shaoming Shi and CFO Shenzhen Shangtong.

Contractual Arrangements with CFO Qicheng and Its Individual Shareholders

In November 2009, we entered into a series of contractual arrangements with CFO Qicheng and its individual shareholders, Lin Yang and Yang Yang. The terms of these contractual arrangements are similar to the terms of our contractual arrangements with CFO Fuhua and its individual shareholders. Our contractual arrangements with CFO Qicheng and its individual shareholders include:

a strategic consulting service agreement between CFO Chuangying and CFO Qicheng;

a technical support agreement between CFO Chuangying and CFO Qicheng;

an operation agreement between CFO Chuangying and CFO Qicheng;

a loan agreement with Lin Yang and Yang Yang. We entered into a loan agreement with Lin Yang and Yang Yang to extend to each of them a loan in the amount of \$80,500 and \$65,900, respectively, for the sole purpose of financing their acquisition of equity interests in CFO Qicheng;

a purchase option agreement among CFO Chuangying, CFO Qicheng, Lin Yang and Yang Yang;

voting arrangements with each of Lin Yang and Yang Yang regarding their voting rights in CFO Qicheng; and

a share pledge agreement among CFO Chuangying, Lin Yang and Yang Yang.

Contractual Arrangements with other entities and their shareholders

Besides CFO Fuhua, CFO Chongzhi, CFO Qicheng, CFO Shenzhen Shangtong, CFO Newrand and CFO Chuangying, we also entered into a series of contractual arrangements with other entities and their shareholders. The terms of these contractual arrangements are similar to the terms of our contractual arrangements with CFO Chongzhi and its individual shareholders.

2004 Stock Incentive Plan, 2007 Equity Incentive Plan and 2010 Equity Incentive Plan of Daily Growth Holdings

Please refer to Item 6.B Directors, Senior Management and Employees B. Compensation of directors and executive officers.

Other related party transactions

According to the 13D/A filed with SEC on November 14, 2011, on November 2, 2011, Grand Continental Holdings Limited, a company incorporated in British Virgin Islands, purchased 2,200,000 ADS of the company, representing 11,000,000 ordinary shares from IDG Technology Venture Investment, Inc., a company organized under the laws of the State of Massachusetts, for an aggregate purchase price of US\$15,400,000. Grand Continental Holdings Limited will pay the purchase price in three installments: 5,500,000 shares no later than December 2, 2011, 2,750,000 shares no later than February 2, 2012, and 2,750,000 shares no later than May 2, 2012. Zhiwei Zhao, our CEO, is the sole beneficial owner of Grand Continental Holdings Limited. Thus, for the purpose of Rule 13d-3 under the Exchange Act, Mr. Zhao will be deemed the beneficial owner of 11,000,000 ordinary shares upon completion of the transaction.

ITEM 8. FINANCIAL INFORMATION

A. Consolidated financial statements and other financial information.

We have appended consolidated financial statements filed as part of this annual report.

Legal Proceedings

None.

Dividend Policy

We currently intend to retain all available funds and any future earnings for use in the operation and expansion of our business and do not anticipate paying any cash dividends on our ordinary shares, or indirectly on our ADSs, for the foreseeable future. Investors seeking cash dividends should not purchase our ADSs. Future cash dividends, if any, will be at the discretion of our board of directors and will depend upon our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors as our board of directors may deem relevant. In addition, we can pay dividends only out of our profit or other distributable reserves. Any dividend we declare will be paid to the holders of ADSs, subject to the terms of the deposit agreement, to the same extent as holders of our ordinary shares, less the fees and expenses payable under the deposit agreement. Other distributions, if any, will be paid by the depository to holders of our ADSs in any means it deems legal, fair and practical. Any dividend will be distributed by the depository, in the form of cash or additional ADSs, to the holders of our ADSs. Cash dividends on our ADSs, if any, will be paid in U.S. dollars.

B. Significant changes since December 31, 2011.

Except as disclosed elsewhere in this annual report, we have not experienced any significant changes since the date of our audited consolidated financial statements included in this annual report.

ITEM 9. THE OFFER AND LISTING

A. Offering and listing details.

Our ADSs, each representing five of our ordinary shares, have been listed on the NASDAQ Global Market (known as the Nasdaq National Market prior to July 1, 2006) since October 15, 2004. Effective January 3, 2011, our ADSs have been elevated to trade on the NASDAQ Global Select Market. Our ADSs trade under the symbol JRJC.

Table of Contents

The following table provides the high and low trading prices for our ADSs on Nasdaq for (1) the years 2007, 2008, 2009, 2010 and 2011, (2) each of the quarters since the first quarter in 2010 and (3) each of the six months since October 2011.

	Sales Price	
	High	Low
Yearly highs and lows		
Year 2007	47.68	4.53
Year 2008	26.15	4.72
Year 2009	13.54	6.97

ITEM 10. ADDITIONAL INFORMATION

A. Share capital.

Not applicable.

B. Memorandum and articles of association.

We incorporate by reference into this annual report on Form 20-F the description of our amended and restated memorandum of association contained in our registration statement on Form F-1 (File No. 333-119166) filed with the Commission on October 14, 2004. Our shareholders adopted our amended and restated memorandum and articles of association at an extraordinary shareholder meeting on October 14, 2004.

C. Material contracts.

We have not entered into any material contracts other than in the ordinary course of business and other than those described in Item 4, Information on the company or elsewhere in this annual report on Form 20-F.

D. Exchange controls.

China's government imposes control over the convertibility of RMB into foreign currencies. Under the current unified floating exchange rate system, the People's Bank of China publishes a daily exchange rate for RMB, based on the previous day's dealings in the inter-bank foreign exchange market. Financial institutions authorized to deal in foreign currency may enter into foreign exchange transactions at exchange rates within an authorized range above or below the daily exchange rate according to market conditions.

Pursuant to the Foreign Exchange Control Regulations issued by the State Council on January 29, 1996 and effective as of April 1, 1996 (and amended on January 14, 1997) and the Administration of Settlement, Sale and Payment of Foreign Exchange Regulations which came into effect on July 1, 1996 regarding foreign exchange control, or the Regulations, conversion of Renminbi into foreign exchange by foreign investment enterprises for current account items, including the distribution of dividends and profits to foreign investors of joint ventures, is permissible upon the proper production of qualified commercial vouchers or legal documents as required by the Regulations. Foreign investment enterprises are permitted to remit foreign exchange from their foreign exchange bank account in China upon the proper production of, inter alia, the board resolutions declaring the distribution of the dividend and payment of profits. Conversion of RMB into foreign currencies and remittance of foreign currencies for capital account items, including direct investment, loans, security investment, is still subject to the approval of the SAFE, in each such transaction. On January 14, 1997, the State Council amended the Foreign Exchange Control Regulations and added, among other things, an important provision, as Article 5 provides that the State shall not impose restrictions on recurring international payments and transfers under current accounts.

Under the Regulations, foreign investment enterprises are required to open and maintain separate foreign exchange accounts for capital account items (but not for other items). In addition, foreign investment enterprises may only buy, sell and/or remit foreign currencies at those banks authorized to conduct foreign exchange business upon the production of valid commercial documents and, in the case of capital account item transactions, document approval from SAFE.

Currently, foreign investment enterprises are required to apply to SAFE for foreign exchange registration certificates for foreign investment enterprises. With such foreign exchange registration certificates (which are granted to foreign investment enterprises, upon fulfilling specified conditions and which are subject to review and renewal by SAFE on an annual basis) or with the foreign exchange sales notices from the SAFE (which are obtained on a transaction-by-transaction basis), foreign-invested enterprises may open foreign exchange bank accounts and enter into foreign exchange transactions at banks authorized to conduct foreign exchange business to obtain foreign exchange for their needs.

Table of Contents

E. Taxation.

Hong Kong taxation

Profits tax. No tax is imposed in Hong Kong in respect of capital gains from the sale of property, such as the ordinary shares underlying our ADSs. However, trading gains from the sale of property by persons carrying on a trade, profession or business in Hong Kong where such gains are derived from or arise in Hong Kong from such trade, profession or business will be chargeable to Hong Kong profit tax. Liability for Hong Kong profits tax would therefore arise in respect of trading gains from the sale of ADSs or the underlying ordinary shares realized by persons in the course of carrying on a business of trading or dealing in securities in Hong Kong. From the year of assessment 2008/2009, the profits tax rate had been decreased to 16.5% for corporations and 15% for unincorporated businesses.

In addition, Hong Kong does not impose withholding tax on gains derived from the sale of stock in Hong Kong companies and does not impose withholding tax on dividends paid outside of Hong Kong by Hong Kong companies. Accordingly, investors will not be subject to Hong Kong withholding tax with respect to a disposition of their ADSs or with respect to the receipt of dividends on their ADSs, if any. No income tax treaty relevant to the acquiring, withholding or dealing in the ADSs or the ordinary shares underlying our ADSs exists between Hong Kong and the U.S.

Stamp duty. Hong Kong stamp duty is generally payable on the transfer of shares in companies incorporated in Hong Kong. The stamp duty is payable both by the purchaser on every purchase and by the seller on every sale of such shares at the ad valorem rate of HK\$1.00 per HK\$1,000 or part thereof, on the higher of the consideration for or the value of the shares transferred. In addition, a fixed duty, currently of HK\$5, is payable on an instrument of transfer of such shares. Where one party to the sale is a non-resident of Hong Kong and does not pay the required stamp duty, the stamp duty not paid will be assessed on the instrument of transfer of such shares (if any), and the purchaser will be liable for payment of such stamp duty. A withdrawal of ordinary shares upon the surrender of ADSs, and the issuance of ADSs upon the deposit of ordinary shares, will also require payment of Hong Kong stamp duty at the rate described above for sale and purchase transactions, unless such withdrawal or deposit does not result in a change in the beneficial ownership of shares under Hong Kong law. The issuance of the ADSs upon the deposit of ordinary shares issued directly to the depository or for the account of the depository does not require payment of stamp duty. In addition, no Hong Kong stamp duty is payable upon the transfer of ADSs effected outside Hong Kong.

U.S. federal income taxation

This discussion describes the material U.S. federal income tax consequences of the purchase, ownership and disposition of our ADSs. This discussion does not address any aspect of U.S. federal gift or estate tax, or the state, local or foreign tax consequences of an investment in our ADSs. This discussion applies to you only if you hold and beneficially own our ADSs as capital assets for tax purposes. This discussion does not apply to you if you are a member of a class of holders subject to special rules, such as:

dealers in securities or currencies;

Table of Contents

traders in securities that elect to use a mark-to-market method of accounting for securities holdings;

banks or other financial institutions;

insurance companies;

tax-exempt organizations;

regulated investment companies or real estate investment trusts;

U.S. expatriates;

partnerships and other entities treated as partnerships for U.S. federal income tax purposes or persons holding ADSs through any such entities;

persons that hold ADSs as part of a hedge, straddle, constructive sale, conversion transaction or other integrated investment;

U.S. Holders (as defined below) whose functional currency for tax purposes is not the U.S. dollar;

persons liable for alternative minimum tax; or

persons who actually or constructively own 10% or more of the total combined voting power of all classes of our shares (including ADSs) entitled to vote.

This discussion is based on the U.S. Internal Revenue Code of 1986, as amended, which we refer to in this discussion as the Code, its legislative history, existing and proposed regulations promulgated thereunder, published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis. In addition, this discussion relies on our assumptions regarding the value of our shares and the nature of our business over time. Finally, this discussion is based in part upon the representations of the depositary and the assumption that each obligation in the deposit agreement and any related agreement will be performed in accordance with its terms. For U.S. federal income tax purposes, as a holder of ADSs, you are treated as the owner of the underlying ordinary shares represented by such ADSs.

U.S. holders are urged to consult their own tax advisor concerning the particular U.S. federal income tax consequences to you of the purchase, ownership and disposition of our ADSs, as well as the consequences to you arising under the laws of any other taxing jurisdiction.

For purposes of the U.S. federal income tax discussion below, you are a U.S. Holder if you beneficially own ADSs and are:

a citizen or individual resident of the United States;

a corporation, or other entity taxable as a corporation for U.S. federal income purposes, that was created or organized in or under the laws of the United States or any political subdivision thereof;

an estate the income of which is subject to U.S. federal income tax regardless of its source; or

a trust if (a) a court within the United States is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all substantial decisions of the trust, or (b) the trust has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person.

Table of Contents

If you are not a U.S. person, please refer to the discussion below under *Non-U.S. Holders*.

For U.S. federal income tax purposes, income earned through a foreign or domestic partnership or other flow-through entity is attributed to its owners. Accordingly, if a partnership or other flow-through entity holds ADSs, the tax treatment of the holder will generally depend on the status of the partner or other owner and the activities of the partnership or other flow-through entity.

U.S. Holders

Dividends on ADSs

We do not anticipate paying dividends on our ordinary shares or indirectly on our ADSs, in the foreseeable future. See *Dividend policy*.

Subject to the *Passive Foreign Investment Company* discussion below, if we do make distributions and you are a U.S. Holder, the gross amount of any distributions you receive on your ADSs will generally be treated as dividend income if the distributions are made from our current or accumulated earnings and profits, calculated according to U.S. federal income tax principles. Dividends will generally be subject to U.S. federal income tax as ordinary income on the day you actually or constructively receive such income. However, if you are an individual and have held your ADSs for a sufficient period of time, dividend distributions on our ADSs will generally constitute qualified dividend income taxed at a preferential rate (generally 15% for dividend distributions before January 1, 2009) as long as our ADSs continue to be readily tradable on Nasdaq and certain other conditions apply. You should consult your own tax adviser as to the rate of tax that will apply to you with respect to dividend distributions, if any, you receive from us.

We do not intend to calculate our earnings and profits according to U.S. tax accounting principles. Accordingly, distributions on our ADSs, if any, will generally be taxed to you as dividend distributions for U.S. tax purposes. Even if you are a corporation, you will not be entitled to claim a dividends-received deduction with respect to distributions you receive from us. Dividends generally will constitute foreign source passive income for U.S. foreign tax credit limitation purposes.

Sales and other dispositions of ADSs

Subject to the *Passive Foreign Investment Company* discussion below, when you sell or otherwise dispose of ADSs, you will generally recognize capital gain or loss in an amount equal to the difference between the amounts realized on the sale or other disposition and your adjusted tax basis in the ADSs, both as determined in U.S. dollars. Your adjusted tax basis will generally equal the amount you paid for the ADSs. Any gain or loss you recognize will be long-term capital gain or loss if your holding period in our ADSs is more than one year at the time of disposition. If you are an individual, any such long-term capital gain will be taxed at preferential rates. Your ability to deduct capital losses will be subject to various limitations.

Table of Contents

Passive Foreign Investment Company

Based on the market value of our ADSs and ordinary shares, the composition of our assets and income and our operations, we believe that for our taxable year ended December 31, 2011, we were a passive foreign investment company (PFIC) for United States federal income tax purposes. However, our PFIC status for the current taxable year ending December 31, 2012 will not be determinable until its close. A non-U.S. corporation is considered a PFIC for any taxable year if either:

at least 75% of its gross income is passive income (the income test), or

at least 50% of the value of its assets (based on an average of the quarterly values of the assets during a taxable year) is attributable to assets that produce or are held for the production of passive income (the asset test).

We will be treated as owning our proportionate share of the assets and earning our proportionate share of the income of any other corporation in which we own, directly or indirectly, more than 25% (by value) of the shares.

We must make a separate determination each year as to whether we are a PFIC. As a result, our PFIC status may change. In particular, because the total value of our assets for purposes of the asset test will generally be calculated using the market price of our ADSs and ordinary shares, our PFIC status will depend in large part on the market price of our ADSs and ordinary shares which may fluctuate considerably. Accordingly, fluctuations in the market price of the ADSs and ordinary shares may result in our being a PFIC for any year. If we are a PFIC for any year during which you hold ADS or ordinary shares, we will generally continue to be treated as a PFIC for all succeeding years during which you hold ADS or ordinary shares. However, if we cease to be a PFIC, provided that you have not made a mark-to-market election, as described below, you may avoid some of the adverse effects of the PFIC regime by making a deemed sale election with respect to the ADSs or ordinary shares, as applicable.

If we are a PFIC for any taxable year during which you hold ADSs or ordinary shares, you will be subject to special tax rules with respect to any excess distribution that you receive and any gain you realize from a sale or other disposition (including a pledge) of the ADSs or ordinary shares, unless you make a mark-to-market election as discussed below. Distributions you receive in a taxable year that are greater than 125% of the average annual distributions you received during the shorter of the three preceding taxable years or your holding period for the ADSs or ordinary shares will be treated as an excess distribution. Under these special tax rules:

the excess distribution or gain will be allocated ratably over your holding period for the ADSs or ordinary shares,

the amount allocated to the current taxable year, and any taxable year prior to the first taxable year in which we became a PFIC, will be treated as ordinary income, and

the amount allocated to each other taxable year will be subject to the highest tax rate in effect for that taxable year and the interest charge generally applicable to underpayments of tax will be imposed on the resulting tax attributable to each such taxable year.

The tax liability for amounts allocated to years prior to the year of disposition or excess distribution cannot be offset by any net operating losses for such years, and gains (but not losses) realized on the sale of the ADSs or ordinary shares cannot be treated as capital, even if you hold the ADSs or ordinary shares as capital assets.

Table of Contents

Alternatively, a U.S. Holder of marketable stock (as defined below) in a PFIC may make a mark-to-market election for such stock of a PFIC to elect out of the tax treatment discussed in the two preceding paragraphs. If you make a valid mark-to-market election for the ADSs or ordinary shares, you will include in income each year an amount equal to the excess, if any, of the fair market value of the ADSs or ordinary shares as of the close of your taxable year over your adjusted basis in such ADSs or ordinary shares. You are allowed a deduction for the excess, if any, of the adjusted basis of the ADSs or ordinary shares over their fair market value as of the close of the taxable year. Such deductions, however, are allowable only to the extent of any net mark-to-market gains on the ADSs or ordinary shares included in your income for prior taxable years. Amounts included in your income under a mark-to-market election, as well as gain on the actual sale or other disposition of the ADSs or ordinary shares, are treated as ordinary income. Ordinary loss treatment also applies to the deductible portion of any mark-to-market loss on the ADSs or ordinary shares, as well as to any loss realized on the actual sale or disposition of the ADSs or ordinary shares, to the extent that the amount of such loss does not exceed the net mark-to-market gains previously included for such ADSs or ordinary shares. Your basis in the ADSs or ordinary shares will be adjusted to reflect any such income or loss amounts. If you make such a mark-to-market election, tax rules that apply to distributions by corporations which are not PFICs would apply to distributions by us (except that the lower applicable capital gains rate would not apply).

The mark-to-market election is available only for marketable stock which is stock that is traded in other than *de minimis* quantities on at least 15 days during each calendar quarter (regularly traded) on a qualified exchange or other market, as defined in applicable Treasury regulations. We expect that the ADSs will continue to be listed on the Nasdaq National Market, which is a qualified exchange for these purposes, and, consequently, assuming that the ADSs are regularly traded, if you are a holder of ADSs, it is expected that the mark-to-market election would be available to you were we to become a PFIC.

Alternatively, if a non-U.S. corporation is a PFIC, a U.S. Holder may avoid the PFIC tax consequences described above in respect to its ADSs and ordinary shares by making a timely qualified electing fund, or QEF, election. In order to comply with the requirements of a QEF election, a U.S. Holder must receive certain information from us. We, however, currently do not intend to prepare or provide such information.

If you hold ADSs or ordinary shares in any year in which we are a PFIC, you will be required to file Internal Revenue Service Form 8621 regarding distributions received on the ADSs or ordinary shares and any gain realized on the disposition of the ADSs or ordinary shares.

You are urged to consult your tax advisor regarding the application of the PFIC rules to your investment in ADSs or ordinary shares.

Non-U.S. Holders

If you beneficially own ADSs and are not a U.S. Holder for U.S. federal income tax purposes (a Non-U.S. Holder), you generally will not be subject to U.S. federal income tax or withholding on dividends received from us with respect to ADSs unless that income is considered effectively connected with your conduct of a U.S. trade or business and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax with respect to income from your ADSs, such dividends are attributable to a permanent establishment that you maintain in the United States. You generally will not be subject to U.S. federal income tax, including withholding tax, on any gain realized upon the sale or exchange of ADSs, unless:

that gain is effectively connected with the conduct of a U.S. trade or business and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax with respect to income from your ADSs, such gain is attributable to a permanent establishment that you maintain in the United States; or

Table of Contents

you are a nonresident alien individual and are present in the United States for at least 183 days in the taxable year of the sale or other disposition and either (1) your gain is attributable to an office or other fixed place of business that you maintain in the United States or (2) you have a tax home in the United States.

If you are engaged in a U.S. trade or business, unless an applicable tax treaty provides otherwise, the income from your ADSs, including dividends and the gain from the disposition of ADSs, that is effectively connected with the conduct of that trade or business will generally be subject to the rules applicable to U.S. Holders discussed above. In addition, if you are a corporation, you may be subject to an additional branch profits tax at a rate of 30% or any lower rate under an applicable tax treaty.

U.S. information reporting and backup withholding rules

In general, dividend payments with respect to the ADSs and the proceeds received on the sale or other disposition of those ADSs may be subject to information reporting to the IRS and to backup withholding (currently imposed at a rate of 28%). Backup withholding will not apply, however, if you (1) are a corporation or come within certain other exempt categories and, when required, can demonstrate that fact or (2) provide a taxpayer identification number, certify as to no loss of exemption from backup withholding and otherwise comply with the applicable backup withholding rules. To establish your status as an exempt person, you will generally be required to provide certification on IRS Form W-9, W-8BEN or W-8ECI, as applicable. Any amounts withheld from payments to you under the backup withholding rules will be allowed as a refund or a credit against your U.S. federal income tax liability, provide that you furnish the required information to the IRS.

Additional Reporting Requirements

Effective for taxable years beginning after March 18, 2010, individuals and, to the extent provided by the U.S. Secretary of Treasury in regulations or other guidance, certain domestic entities that hold an interest in a specified foreign financial asset will be required to attach certain information regarding such assets to their income tax return for any year in which the aggregate value of all such assets exceeds US\$50,000. A specified foreign financial asset includes any depository or custodial accounts at foreign financial institutions, non-publicly traded debt or equity interests in a foreign financial institution, and to the extent not held in an account at a financial institution, (i) stocks or securities issued by non-U.S. persons; (ii) any financial instrument or contract held for investment that has an issuer or counterparty which is non-U.S. person; and (iii) any interest in a non-U.S. entity. Penalties may be imposed for the failure to disclose such information regarding specified foreign financial assets. You are urged to consult your tax advisors regarding the potential reporting requirements that may be imposed by this new legislation with respect to ownership of ADSs or ordinary shares.

New Legislation Regarding Medicare Tax

For taxable years beginning after December 31, 2012, certain U.S. Holders that are individuals, estates or trusts will be subject to a 3.8% tax on all or a portion of their net investment income, which may include all or a portion of their dividends and net gains from the sale or other disposition of ordinary shares. If you are a U.S. Holder that is an individual, estate or trust, you should consult your tax advisors regarding the applicability of the Medicare tax to your income and gains in respect of your investment in our ordinary shares.

Table of Contents

HOLDERS OF OUR ADSs SHOULD CONSULT WITH THEIR OWN TAX ADVISORS REGARDING THE APPLICATION OF THE U.S. FEDERAL INCOME TAX LAWS TO THEIR PARTICULAR SITUATIONS AS WELL AS ANY TAX CONSEQUENCES RESULTING FROM PURCHASING, HOLDING OR DISPOSING OF THE ADSs, INCLUDING THE APPLICABILITY AND EFFECT OF THE TAX LAWS OF ANY STATE, LOCAL OR FOREIGN JURISDICTION AND INCLUDING ESTATE, GIFT AND INHERITANCE LAWS.

H. Documents on display.

We have previously filed with the Commission our registration statement on Form F-1, as amended, and our prospectus under the Securities Act, with respect to our ordinary shares.

We are subject to the periodic reporting and other informational requirements of the Exchange Act. Under the Exchange Act, we are required to file reports and other information with the SEC. Specifically, we are required to file annually a Form 20-F within four months after the end of each fiscal year for fiscal years ending on or after December 15, 2011. Copies of reports and other information, when so filed, may be inspected without charge and may be obtained at prescribed rates at the public reference facilities maintained by the SEC at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information regarding the Washington, D.C. Public Reference Room by calling the Commission at 1-800-SEC-0330. The SEC also maintains a Web site at www.sec.gov that contains reports, proxy and information statements, and other information regarding registrants that make electronic filings with the SEC using its EDGAR system. As a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of quarterly reports and proxy statements, and officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act.

Our financial statements have been prepared in accordance with U.S. GAAP.

In accordance with NASDAQ Stock Market Rule 5250(d), we will post this annual report on Form 20-F on our website at <http://ir.chinafinanceonline.com>. In addition, we will provide hardcopies of our annual report on Form 20-F free of charge to shareholders and ADS holders upon request.

(e) Transferring, splitting or grouping receipts	Transfers of depository receipts	US\$1.50 per ADS

Table of Contents

Category	Depository actions	Associated fee
(f) General depository services, particularly those charged on an annual basis	Services performed by the depository in administering the ADRs	US\$0.02 per ADS (or portion thereof) not more than once each calendar year and payable at the sole discretion of the depository by billing ADR Holders or by deducting such charge from one or more cash dividends or other cash distributions
(g) Expenses of the Depository	Expenses incurred on behalf of ADR Holders in connection with:	Expenses payable at the sole discretion of the depository by billing ADR Holders or by deducting such charges from one or more cash dividends or other cash distributions
	Compliance with foreign exchange control regulations or any law or regulation relating to foreign investment	
	The depository's or its custodian's compliance with applicable law, rule or regulation	
	Stock transfer or other taxes and other governmental charges	
	Cable, telex and facsimile transmission and delivery charges	
	Fees for the transfer or registration of deposited securities in connection with the deposit or withdrawal of deposited securities	
	Expenses of the depository in connection with the conversion of foreign currency into U.S. dollars (which are paid out of such foreign currency)	
	Any other charge payable by depository or its agents in connection with the servicing of the shares or the deposited securities	

We will pay all other charges and expenses of the depository and any agent of the depository (except the custodian) pursuant to agreements from time to time between us and the depository. The fees described above may be amended from time to time.

Fees and Payments from the Depository to Us

Edgar Filing: China Finance Online Co. LTD - Form 20-F

The depositary has agreed to reimburse us annually for our expenses incurred in connection with the administration and maintenance of our ADS facility including, but not limited to, investor relations expenses, exchange listing fees or any other program related expenses. The depositary has also agreed to provide additional payments to us based on the applicable performance indicators relating to our ADS facility. There are limits on the amount of expenses for which the depositary will reimburse us. We were entitled to receive the maximum annual amount as US\$ 200,000 for the year between October 1, 2010 and September 30, 2011 and US\$ 207,000 for the year between October 1, 2011 and September 30, 2012 (after withholding tax) from the depositary as reimbursement for our expenses incurred in connection with, among other things, investor relationship programs related to the ADS facility.

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management, with the participation of Zhiwei Zhao, our CEO, and Jun Wang, our CFO, has evaluated the effectiveness of our disclosure controls and procedures, as defined in Exchange Act Rule 13(a)-15(e) as of the end of the period covered by this Annual Report on Form 20-F, and have concluded that such disclosure controls and procedures were effective.

Management's Annual Report on Internal Control over Financial Reporting

The management of China Finance Online Co. Limited, or the Company, is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Securities Exchange Act of 1934, as amended.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management, with the participation of the Company's principal executive and principal financial officers, assessed the effectiveness of the Company's internal control over financial reporting as of end of the most recent fiscal year, December 31, 2011. In making this assessment, the Company's management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on its assessment, management concluded that, as of the end of the Company's most recent fiscal year, December 31, 2011, the Company's internal control over financial reporting is effective based on those criteria.

The Company's independent registered public accounting firm, who audited the financial statements included in Form 20-F, has issued an attestation report on the Company's internal control over financial reporting. The attestation report appears below.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the period covered by this annual report on Form 20-F that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of the Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of China Finance Online Co. Limited.

We have audited the internal control over financial reporting of China Finance Online Co. Limited, its subsidiaries, its variable interest entities (VIEs) and its VIEs' subsidiaries (collectively the Group) as of December 31, 2011, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Group's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Group's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the Group's principal executive and principal financial officers, or persons performing similar functions, and effected by the Group's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Group; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Group are being made only in accordance with authorizations of management and directors of the Group; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Group's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Group maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2011 of the Group and our report dated April 27, 2012 expressed an unqualified opinion on those financial statements and financial statement schedule.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

See Item 6.C. of this annual report, Directors, Senior Management and Employees Board Practices.

Our board of directors has concluded that Mr. Kheng Nam Lee, a member of our audit committee, meets the criteria for an audit committee financial expert as established by the U.S. SEC.

Mr. Kheng Nam Lee will not be deemed an expert for any purpose, including, without limitation, for purposes of section 11 of the Securities Act as a result of being designated or identified as an audit committee financial expert. The designation or identification of Mr. Kheng Nam Lee as an audit committee financial expert does not impose on him any duties, obligations or liability that are greater than the duties, obligations and liability imposed on him as a member of the audit committee and board of directors in the absence of such designation or identification. The designation or identification of Mr. Kheng Nam Lee as an audit committee financial expert does not affect the duties, obligations or liability of any other member of the audit committee or board of directors.

ITEM 16B. CODE OF ETHICS

See Item 6.C. of this annual report, Directors, Senior Management and Employees Board Practices.

Our board of directors has adopted a code of ethics, which is applicable to our senior executive and financial officers and any other persons who perform similar functions for us. We have posted the text of our code of ethics on our Internet website at http://www.chinafinanceonline.com/list/en_CorporateGovernance.shtml.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The following table sets forth the aggregate fees by category specified below in connection with certain professional services rendered by Deloitte Touche Tohmatsu CPA Ltd., our independent registered public accounting firm, for the periods indicated. We did not pay any other fees to our independent registered public accounting firm during the periods indicated below.

	For the Year Ended December 31,		
	2011	2010	2009
Audit Fees ⁽¹⁾	US\$ 799,050	US\$ 735,000	US\$ 735,000
Audit Related Fees			
Tax Fees ⁽²⁾			
All Other Fees			

⁽¹⁾ Audit Fees means the aggregate fees in each of the fiscal years listed for professional services rendered by Deloitte Touche Tohmatsu CPA Ltd. for the audit of our annual financial statements, review of interim financial statements and attestation services that are provided in connection with statutory and regulatory filings or engagements.

⁽²⁾ Tax Fees means the aggregate fees billed in each of the fiscal years listed for professional tax services rendered by Deloitte Touche Tohmatsu CPA Ltd.

Audit Committee Pre-approval Policies and Procedures

Our audit committee has adopted procedures which set forth the manner in which the committee will review and approve all audit and non-audit services to be provided by Deloitte Touche Tohmatsu CPA Ltd. before that firm is retained for such services. The pre-approval procedures are as follows:

Any audit or non-audit service to be provided to us by the independent accountant must be submitted to the audit committee for review and approval, with a description of the services to be performed and the fees to be charged.

The audit committee in its sole discretion then approves or disapproves the proposed services and documents such approval, if given, through written resolutions or in the minutes of meetings, as the case may be.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE BOARD OF DIRECTORS AND

SHAREHOLDERS OF CHINA FINANCE ONLINE CO. LIMITED

We have audited the accompanying consolidated balance sheets of China Finance Online Co. Limited, its subsidiaries, its variable interest entities (VIEs) and its VIEs subsidiaries (collectively, the Group) as of December 31, 2010 and 2011, and the related consolidated statements of operations, equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2011. Our audits also included the financial statement schedule included in Schedule I. These consolidated financial statements and financial statement schedule are the responsibility of the Group s management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Group as of December 31, 2010 and 2011, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2011, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Group s internal control over financial reporting as of December 31, 2011, based on the criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated April 27, 2012 expressed an unqualified opinion on the Group s internal control over financial reporting.

Table of Contents**CHINA FINANCE ONLINE CO. LIMITED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011**

(In U.S. dollars)

1. ORGANIZATION AND PRINCIPAL ACTIVITIES

China Finance Online Co. Limited (China Finance Online or the Company) was incorporated in Hong Kong on November 2, 1998. China Finance Online, its subsidiaries, its variable interest entities (VIEs) and its VIEs subsidiaries (collectively, the Group) are principally providing vertically integrated financial services including news, data, analytics, securities investment advisory and brokerage through web portals, software systems, and mobile handsets.

In the fourth quarter of 2011, the Group determined to implement a strategic transition of its core business from providing subscription services to individual investors to developing fee-based securities investment advisory services with wealth management services starting from April 2012.

Details of China Finance Online's significant subsidiaries, VIEs and VIEs subsidiaries as of December 31, 2011 were as follows:

Company name	Place of incorporation or establishment	Date of incorporation or acquisition	legal ownership interest	Principal activity
Subsidiaries:				
China Finance Online (Beijing) Co., Ltd. (CFO Beijing)	Beijing, PRC	Jul. 9, 1998	100%	Subscription service
Fortune Software (Beijing) Co., Ltd. (CFO Software)	Beijing, PRC	Dec. 7, 2004	100%	Subscription service

PRC regulations prohibit direct foreign ownership of business entities providing certain services in PRC, such as internet content service and securities investment advisory service. In order to comply with these regulations, China Finance Online, through its subsidiaries, entered into contractual arrangements with the Company's VIEs and their equity owners who are PRC citizens as follows:

The Group made loans to the shareholders of the VIEs solely for the purposes of capitalizing the VIEs. Pursuant to the loan agreements, these loans can only be repaid by transferring all of their interests in the VIEs to the Group or a third party designated by the Group.

FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011

(In U.S. dollars)

1. ORGANIZATION AND PRINCIPAL ACTIVITIES continued

To provide the Company effective control over and ability to receive substantially all of the economic benefits of its VIEs, the Company's wholly owned subsidiaries including CFO Beijing, CFO Software and CFO Success (collectively, the WOFEs and each a WOFE) have entered into a series of contractual arrangements with the VIEs, which include CFO Fuhua, CFO Chongzhi, CFO Qicheng, CFO Chuangying, CFO Newrand and CFO Shenzhen Shangtong.

Exclusive technology consulting and management service agreement

Pursuant to a series of technology support and service agreements, the WOFEs retain exclusive right to provide the VIEs and their subsidiaries technology support and consulting services and exclusive management consulting service. As a result of these services, the WOFEs are entitled to charge the VIEs and their subsidiaries annual service fees. The terms of the strategic consulting services agreement, the technical support services agreement and the operating support services agreement are twenty, ten and ten years, respectively, and these agreements will be automatically renewed on applicable expiration dates, unless the contracting WOFE informs the corresponding VIE its intention to terminate such contract one month prior to the applicable expiration date. Notwithstanding the foregoing, none of the parties has a right to terminate the service contracts. The principal services agreements that the WOFEs have entered into with VIEs include:

strategic consulting services agreement, pursuant to which the amount of the fee to be charged is 30% of each VIE's income before tax;

technical support services agreement, pursuant to which the amount of the fee to be charged is 30% of each VIE's income before tax; and

operating support services agreement, pursuant to which the amount of the fee to be charged is 40% of each VIE's income before tax.

Exclusive purchase right agreement on the equity interest of the VIEs

Pursuant to the purchase option agreement, the WOFEs have the unconditional right to purchase the entire equity interest in, or all the assets of the VIEs at a price equal to the total principal amount of the loan lent by the WOFEs to the shareholders of the VIEs when and if such purchase is permitted by the PRC law or the current shareholders of the VIEs cease to be directors or employees of the VIEs. The term of the exclusive purchase right agreement is perpetual and can be terminated at the discretion of the WOFEs.

Table of Contents**CHINA FINANCE ONLINE CO. LIMITED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS continued****FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011****(In U.S. dollars)****1. ORGANIZATION AND PRINCIPAL ACTIVITIES continued***Power of attorney*

Pursuant to the power of attorney, each of the shareholders of the VIEs have executed an irrevocable power of attorney assigning the WOFEs or individuals designated by the WOFEs as their attorney-in-fact to vote on their behalf on all matters of the VIEs requiring shareholder approval under PRC laws and regulations and the articles of association of VIEs.

The Articles of Incorporation of the VIE state that the major rights of the shareholders include the right to appoint directors, the general manager and other senior management. Therefore, through the irrevocable power of attorney arrangement, the WOFEs have the ability to exercise effective control over the VIEs through shareholder votes and, through such votes, to also control the composition of the board of directors. In addition, the senior management team of the VIEs is the same as that of the WOFEs. The term of the power of attorney is twenty years and will be automatically renewed on the expiration date. The contract can be terminated at the discretion of the WOFEs.

Pledge agreement

Pursuant to the equity pledge agreement between the WOFEs and the shareholders of the VIEs, the shareholders of the VIEs pledged all of their equity interests in the VIEs to the WOFEs to guarantee the VIEs performance of its obligations under the exclusive technology consulting and service agreement. If the VIEs breach their contractual obligations under that agreement, the WOFEs, as the pledge, will be entitled to certain rights, including the rights to sell the pledged equity interests. The shareholders of the VIEs agree that, without prior written consent of the WOFEs, they will not transfer, sell, and dispose of or create any encumbrance on their equity interest in the VIEs. The term of the pledge agreement is twenty years and will be automatically renewed on the expiration date, unless the WOFEs inform the VIEs of their intention to terminate the agreement one month prior to the expiration date.

Through these contractual agreements, the WOFEs have the ability to effectively control the VIEs and are also able to receive substantially all the economic benefits of the VIEs.

Details of significant VIEs and their counterparts which substantially control the VIEs as of December 31, 2011 were as follows:

VIE name	Contractual arrangement	Date counterpart
CFO Fuhua	May 27, 2004	CFO Beijing
CFO Chongzhi	June 8, 2008	CFO Software
CFO Newrand	October 17, 2008	CFO Software and CFO Success
CFO Chuangying	January 21, 2009	CFO Software
CFO Shenzhen Shangtong	August 3, 2009	CFO Success
CFO Qicheng	November 20, 2009	CFO Chuangying

1. ORGANIZATION AND PRINCIPAL ACTIVITIES continued

Risks in relation to the VIE structure

The Company's ability to control the VIEs also depends on the power of attorney the WOFEs have to vote on all matters requiring shareholder approval in the VIEs. As noted above, the Company believes this power of attorney is legally enforceable but may not be as effective as direct equity ownership.

In addition, if the legal structure and contractual arrangements were found to be in violation of any existing PRC laws and regulations, the regulatory authorities may exercise their discretion and

revoke the business and operating licenses of our PRC subsidiaries or VIEs;

restrict the rights to collect revenues from any of our PRC subsidiaries;

discontinue or restrict the operations of any related-party transactions among our PRC subsidiaries or VIEs;

require our PRC subsidiaries or VIEs to restructure the relevant ownership structure or operations;

take other regulatory or enforcement actions, including levying fines that could be harmful to our business; or

impose additional conditions or requirements with which we may not be able to comply.

The imposition of any of these penalties may result in a material adverse effect on the Company's ability to conduct its business. In addition, if the imposition of any of these penalties causes the Company to lose the rights to direct the activities of the VIEs and their subsidiaries or the right to receive their economic benefits, the Company would no longer be able to consolidate the VIEs. The Company does not believe that any penalties imposed or actions taken by the PRC Government would result in the liquidation of the Company, its subsidiaries, or the VIEs.

The Company has consolidated its VIEs because it was the primary beneficiary of those entities. Through the contractual agreements discussed above, the Company, through its wholly owned subsidiaries, has (1) the power to direct the activities of the VIEs that most significantly affect the entities' economic performance and (2) the right to receive benefits from the VIEs, therefore it consolidates the VIEs.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011

(In U.S. dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The consolidated financial statements of the Group have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Basis of consolidation

The consolidated financial statements include the financial statements of China Finance Online, its subsidiaries, VIEs and VIEs subsidiaries. All inter-company transactions and balances have been eliminated upon consolidation.

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and highly liquid investments which are unrestricted as to withdrawal or use, and which have remaining maturities of three months or less when purchased.

Restricted cash

Restricted cash consist of i)the security deposit for the credit standby letter issued by a bank to provide guarantee for the short-term loan borrowed by CFO HK Genius; ii) the deposit in bank accounts for providing guarantee to subscription revenue customers by CFO Securities Consulting in accordance with the requirement of China Securities Regulatory Commission (CSRC). The restriction period is one year.

Fair value

Fair value is the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Group considers the principal or most advantageous market in which it would transact and it considers assumptions that market participants would use when pricing the asset or liability.

FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011

(In U.S. dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES continued

Fair value continued

Authoritative literature provides a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The level in the hierarchy within which the fair value measurement in its entirety falls is based upon the lowest level of input that is significant to the fair value measurement as follows:

Level 1-inputs are based upon unadjusted quoted prices for identical instruments traded in active markets.

Level 2-inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3-inputs are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability. The fair values are therefore determined using model-based techniques that include option pricing models, discounted cash flow models, and similar techniques.

Trust bank balances held on behalf of customers

Daily Growth Securities and Daily Growth Futures receive fund from customers for purpose of buying or selling securities on behalf of its customers and deposits the fund in its interest-bearing bank account. Such bank balance represents an asset of the Group for the amounts due to customers for the trust bank balance held on their behalf and payable to customers on demand. The Group also recognizes a corresponding liability.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and revenue and expenses in the financial statements and accompanying notes. Significant accounting estimates reflected in the Group's financial statements include cost method investment, goodwill and impairment of long-lived assets, income taxes, sales refund and share-based compensation. Actual results could differ from those estimates.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011

(In U.S. dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES continued

Loan receivable

Loans are reported at either their outstanding principal balances or at fair value. For loans reported at their outstanding principal balances, interest income is accrued on the unpaid principal balance. A loan is considered impaired when, based on current events and the financial condition of the borrower, it is probable that the company will be unable to collect all principal and interest due according to the contractual terms of the loan agreement. Loan collectability is monitored by the Group in connection with the ongoing monitoring of the associated financial guarantee transactions.

Short-term investments

Short-term investments comprise marketable debt and equity securities, which are classified as trading, held-to-maturity or available-for-sale. Trading securities are securities that are bought and held principally for the purpose of selling them in the near term and are reported at fair value, with unrealized gains and losses recognized in earnings. Short-term investments are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. All of the Company's held-to-maturity securities are classified as short-term investments on the consolidated balance sheets based on their contractual maturity dates which are less than one year and are stated at their amortized costs. Short-term investments classified as available for sale are carried at their fair values and the unrealized gains or losses from the changes in fair values are included in accumulated other comprehensive income. Available for sale securities are classified as current assets on the accompanying consolidated balance sheets because they are available for immediate sale.

The Group reviews its short-term investments for other-than-temporary impairment based on the specific identification method. The Company considers available quantitative and qualitative evidence in evaluating potential impairment of its short-term investments. If the cost of an investment exceeds the investment's fair value, the Group considers, among other factors, general market conditions, government economic plans, the duration and the extent to which the fair value of the investment is less than the cost, and the Group's intent and ability to hold the investment, in determining if impairment is needed.

Property and equipment, net

Property and equipment, net are carried at cost less accumulated depreciation. Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Technology infrastructure	5 years
Computer equipment	5 years
Furniture, fixtures and equipment	5 years
Motor vehicle	5 years
Leasehold improvements	Shorter of the lease term or 5 years

Table of Contents**CHINA FINANCE ONLINE CO. LIMITED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS continued****FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011****(In U.S. dollars)****2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES continued****Acquired intangible assets, net**

Acquired intangible assets are estimated by management based on the fair value of assets acquired. Identifiable intangible assets are carried at cost less accumulated amortization. Amortization of definite-lived intangible assets is computed using the straight-line method over the estimated average useful lives, which are as follows:

Securities consulting license and related trademarks	15 years
Completed technology	5 years
Customer relationship	4-5 years
Value-added service license	3-4 years
Agreement with mobile operators	3 years
Intellectual property	10 years

Certain trademarks resulting from the acquisitions of business and certain trading rights bought by the Company are determined to have indefinite lives. If an intangible asset is determined to have an indefinite life, it is not amortized until its useful life is determined to be no longer indefinite.

Impairment of long-lived assets with definite lives

The Group reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may no longer be recoverable. When these events occur, the Group compares the carrying value of the long-lived assets to the estimated undiscounted future cash flows expected to result from the use of the assets and their eventual disposition. If the sum of the expected undiscounted cash flow is less than the carrying amount of the assets, the Group would recognize an impairment loss based on the fair value of the assets. There were nil, nil and \$3,035,265 impairment losses in relation to the long-lived assets with definite lives for the years ended December 31, 2009, 2010 and 2011.

Business combinations

Business combinations are recorded using the acquisition method of accounting. The assets acquired, the liabilities assumed, and any noncontrolling interest of the acquiree at the acquisition date, if any, are measured at their fair values as of that date. Goodwill is recognized and measured as the excess of the total consideration transferred plus the fair value of any noncontrolling interest of the acquiree, if any, at the acquisition date over the fair values of the identifiable net assets acquired. Common forms of the consideration made in acquisitions include cash and common equity instruments. Consideration transferred in a business acquisition is measured at the fair value as at the date of acquisition.

Where the consideration in an acquisition includes contingent consideration the payment of which depends on the achievement of certain specified conditions post-acquisition, from January 1, 2009, the contingent consideration is recognized and measured at its fair value at the acquisition date and if recorded as a liability it is subsequently carried at fair value with changes in fair value reflected in earnings.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011

(In U.S. dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES continued

Impairment of goodwill and indefinite-lived intangible assets

The Group reviews the carrying value of intangible assets not subject to amortization, including goodwill, to determine whether impairment may exist, whenever events or changes in circumstances indicate that the carrying amount of an asset may no longer be recoverable at least annually.

The excess of the purchase price over the fair value of net assets acquired is recorded on the consolidated balance sheet as goodwill. The Company completes a two-step goodwill impairment test. The first step is to compare the fair values of each reporting unit to its carrying amount, including goodwill. If the fair value of each reporting unit exceeds its carrying amount, goodwill is not considered to be impaired and the second step will not be required. If the carrying amount of a reporting unit exceeds its fair value, the second step is to compare the implied fair value of goodwill to the carrying value of a reporting unit's goodwill. The implied fair value of goodwill is determined in a manner similar to accounting for a business combination with the allocation of the assessed fair value determined in the first step to the assets and liabilities of the reporting unit. The excess of the fair value of the reporting unit over the amounts assigned to the assets and liabilities is the implied fair value of goodwill. An impairment loss is recognized for any excess in the carrying value of goodwill over the implied fair value of goodwill. Estimating fair value is performed by utilizing various valuation techniques, with the primary technique being a discounted cash flow.

The impairment test for other intangible assets not subject to amortization consists of a comparison of the fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. The estimates of fair values of intangible assets not subject to amortization are determined using various discounted cash flow valuation methodologies. Significant assumptions are inherent in this process, including estimates of discount rates. Discount rate assumptions are based on an assessment of the risk inherent in the respective intangible assets.

The Group performs the annual impairment tests on December 31 of each year. Based on the Group's assessment, the Group recorded nil, nil and \$13,463,224 goodwill impairment losses during the years ended December 31, 2009, 2010 and 2011, respectively. In addition, the Group recorded nil, nil and \$1,042,819 impairment losses in relation to intangible assets with indefinite life during the years ended December 31, 2009, 2010 and 2011, respectively.

FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011

(In U.S. dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES continued

Revenue recognition

The Group generates revenue primarily from annual subscription fees from subscribers to their financial data and information services including their downloadable proprietary research tools. The Group recognizes revenues when all of the following criteria are met: (1) persuasive evidence of an arrangement exists, (2) delivery has occurred, (3) the fee is fixed or determinable and (4) collectability is probable. Upon receipt of the upfront cash payments from the subscriber, the Group will activate the subscriber's account and provide the subscriber the access code. This will commence a certain subscription period according to the customer demand and the full payment will be deferred and recognized ratably over the subscription period. The Group recognizes revenue ratably over the life of the arrangement. Estimated refund of subscription fees is recorded as deduction of revenue and deferred revenue. The Group estimates the refund of subscription fees based on historical experience as well as the impact of the changes in market condition and regulation, such as the Provisional Regulations on Securities Investment Advisory and Provisional Regulations on Issuance of Securities Research Reports promulgated by CSRC. As of December 31, 2010 and 2011, estimated refunds were recorded in the amounts of \$1,328,554 and \$1,242,226, respectively.

The Group derives its advertising fees from advertising sales on their website principally for a fixed period of time, generally less than one year. Revenues from advertising arrangements are recognized ratably over the period the advertising is displayed.

The Group also derives commission from its brokerage services provided by the subsidiaries, Daily Growth Securities and Daily Growth Futures which buy or sell securities and futures on their customers' behalf. The commission income is recognized on a trade date basis as transactions occur.

Business taxes and value added taxes

Revenue is recorded net of business taxes when incurred. The Group is subject to business taxes of 3%-5% on taxable services provided to its customers. During the years ended December 31, 2009, 2010, and 2011, business taxes totaled \$1,501,799, \$1,692,069, and \$1,478,653, respectively.

The Group's PRC subsidiaries, VIEs and VIEs' subsidiaries are subject to value added tax at a rate of 17% on subscription-based revenue. Value added tax payable on subscription-based revenue is computed net of value added tax paid on purchases. In respect of subscription-based revenue, however, if the net amount of value added tax payable exceeds 3% of subscription-based revenue, the excess portion of value added tax can be refunded immediately. The Group therefore is subject to an effective net value added tax burden of 3% from subscription-based revenue and records value added tax on a net basis. Net amount of value added tax is recorded either in the line item of other current liabilities or prepaid expenses and other current assets on the face of consolidated balance sheet.

Subscription-based revenue includes the benefit of the rebate of value added taxes on sale of the downloadable software received from the Chinese tax authorities as part of the PRC government policy of encouraging software development in the PRC. In 2009, 2010 and 2011, the Group recognized \$4,424,737, \$3,711,613, and \$3,140,764, respectively, in value added tax refunds.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEARS ENDED DECEMBER 31, 2009, 2010 AND 2011

(In U.S. dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES continued

Government subsidies

The Group records government subsidies when granted by local government authority and are not subject to future return. The government subsidies include R&D subsidy, business tax refund, innovation fund and high-tech company subsidy.

Deferred revenue

Payments received in advance of service are recorded as deferred revenue until earned and when the relevant revenue recognition requirements have been met.

Cost method investment

For investments in an investee over which the Group does not have significant influence, the Group carries the investment at cost and recognizes income as any dividends declared from distribution of investee's earnings. The Group reviews the cost method investments for impairment whenever events or changes in circumstances
